CGG Announces Third Quarter 2013 Results

Third Quarter 2013 Revenue up 6%

YTD Revenue up 14%

2013 Revenue expected to increase by 15%-17%

2013 EBIT margin to be between 12%-13%

PARIS, France November 7th 2013 CGG (ISIN: 0000120164 NYSE: CGG) announced today its non-audited third quarter 2013 consolidated results. All comparisons are made on a year-on-year basis with CGG 2012 results before the Fugro Geoscience acquisition.

Q3 Revenue up 6% and EBIT at \$95 million*

Group revenue at \$908 million, up 6%

Lower Equipment sales due to temporary weakness in demand for seismic equipment

Low land acquisition activity

Weaker multi-client after-sales after strong Q2

High multi-client prefunding rate at 79%

Reported Group EBIT at \$73.2 million

Group EBIT margin at 10.4% before NRFI (8.1% reported)

Net income of \$4 million

End of September Revenue up 14% and EBIT at \$350 million**

Group revenue at \$2.810 billion, up 14%

Revenue down 21% in Equipment, up 28% in Acquisition and up 40% in Geology, Geophysics & Reservoir (GGR)

Reported Group EBIT at \$352.6 million and Group EBIT margin at 12.5%, 26.3% in Equipment, 6.6% in Acquisition and 25.0% in GGR

Net income of \$119 million corresponding to an EPS of \$0.64 (0.49) up 56%

Backlog at the end of October stood at \$1.25 billion with fleet utilized 96% in Q4, and 75% Q1 2014

2013 Expectations

Group revenue expected to be up 15%-17%

Group EBIT margin expected to be up and between 12%-13% including a 28% EBIT margin for the Equipment Division

Multi-client capex revised up to \$450-\$500 million with a prefunding rate expected above 75%

Industrial capex targeted at \$300-\$350 million

Positive free cash flow generation, before Fugro Geoscience transaction negative cash elements

Improved Return On Capital Employed

CGG CEO, Jean-Georges Malcor, commented:

After a solid H1, which was better than expected, we are now seeing a tougher H2 due to a temporary weakness in demand for seismic equipment and softer contract marine market conditions. At the end of September, our revenue was up 14% with an EBIT margin of 12.5%. Although our Q4 performance, driven by equipment and multi-client sales, will be typically stronger than Q3, we now expect our full year 2013 revenue to be up 15% to 17%. The 2013 EBIT margin should however increase year-on-year and remain high between 12% and 13%, thanks to good operational performance and cost management.

* Before the Q3 \$(21)m non-recurring items related to the Fugro Geoscience transaction (NRFI)

** Before the 3Q \$3m NRFI

Looking ahead into 2014, CGG should continue on its path of profitable growth. The successful launch of Sercel's 508XT system, representing a step-change technology in land acquisition technology and the confirmation of tenders for land acquisition mega crews in H2 should enable Equipment division to grow. In Acquisition, the recent award of large marine contracts in Angola and Mexico, as well as an expected solid North Sea season give us confidence into 2014. GGR should continue to increase its level of activity and deliver high profitability thanks notably to its high-end technologies in Geology, Subsurface Imaging, Reservoir Characterization and well prefunded multi-clients programs.

Equipment division Total Revenue was \$223 million, down 21% compared to the third quarter of 2012 and down 12% sequentially due to temporary weakness in seismic equipment which represented 34% of total revenue. External sales were \$187 million, down 15% and internal sales represented 16% of total revenue. Sales were strong in Eastern Europe and Russia.

In September Sercel successfully launched the 508^{XT}, its new-generation land acquisition system. The 508^{XT} will have the ability to address increasing industry demand for land Mega-Crews to record up to 1 million channels in real time and improves data quality through real time quality control and second generation MEMS sensors three times quieter than any existing sensor. It will also lead to increased productivity through zero downtime with reinforced redundancy systems and efficient operational cost management with 30% lighter equipment and the need for 25% less crew. Finally, it will contribute to safe and environmentally friendly operations.

Equipment division EBITDAs was \$63 million, a margin of 28%.

Equipment division EBIT was \$51 million, a margin of 23%. The reduced margin is mainly due to stable operating costs (R&D and SG&A) facing lower revenue.

Equipment division Capital Employed was \$0.9 billion at the end of September 2013.

Capital Employed (in billion \$)		3.3	3.4

Acquisition division Total Revenue was \$568 million, up 8% year-on-year and down 6%, sequentially with a strong operational performance by Marine acquisition and lower land acquisition revenue. External revenue was \$423 million.

Marine Acquisition revenue was \$462 million, up 28% year-on-year and down 10% sequentially. 22% of the fleet was dedicated to multi-client programs. Utilization rate was at a high level this quarter for the whole fleet with availability rate at 89% and a production rate at a historically high level at 94%.

During the quarter, CGG was notably awarded a BroadSeis™ contract by PETRONAS to acquire and process a 10,000km² 3D seismic survey program offshore Malaysia. CGG also received a letter of award for a large high-end BroadSeis wide-azimuth acquisition program in Angola corresponding to a 1,484 km² acquisition program. CGG has also been recently selected to acquire the phase 5 of the Pemex's Centauro program in Mexico which will add another 6,850 km² of data to the existing 25,000 km² acquired since the launch of the program in October 2010, bringing the total volume to almost 32,000 km².

Land and Airborne Acquisition revenue totalled \$106 million, down 37% year-on-year and up 10% sequentially. This decrease y-o-y is mainly due to the transfer of our shallow water and OBC/OBN activity into the Seabed Geosolutions JV. The situation in North Africa is slowly improving. The Airborne organization joined CGG on the 2nd of September.

Acquisition division EBITDAs was \$115 million, a margin of 20%.

Acquisition division EBIT was \$42 million (before NRFI), a margin of 7%. Marine acquisition delivered a strong operational performance with a record production rate. Land profitability has slightly improved.

Acquisition division Capital Employed was \$3.4 billion at the end of September 2013.

GGR Division Total Revenue was \$298 million, up 24% year-on-year and down 19% sequentially with lower multi-client after-sales as expected.

Multi-client and basin data revenue increased to \$145 million, up 24% year-on-year and down 33% sequentially with low after-sales after a strong second quarter whereas the cash prefunding rate was 79%, higher than expected.

Prefunding revenue was \$97 million. Multi-client cash capex was \$125 million, 79% prefunded and mainly focused offshore in the North Sea but also in the Gulf of Mexico with the continuation of our IBALT program. CGG delivered on schedule the Fast Trax™ TTI RTM processed data from its IBALT broadband full-azimuth survey covering over 5,000 km² (221 blocks) in the Keathley Canyon area of the Gulf of Mexico. CGG also successfully completed a second BroadSeis™ multi-client survey offshore Norway located in the southeastern part of the Barents Sea. Following a very strong Q2, after-sales were at a low level.

Subsurface Imaging & Reservoir revenue was \$153 million, up 25% year-on-year and stable sequentially. Demand for imaging and reservoir characterization activities remained strong. CGG and Baker Hughes signed a letter of intent to realign the firms' joint venture VSFusion to focus on microseismic monitoring, processing, visualization and interpretation as well as microseismic permanent monitoring. The joint venture, now called Magnitude, strengthens the capabilities of Baker Hughes and CGG in unconventional resource plays and other emerging markets.

GGR Division EBITDAs was \$169 million, a margin of 57%.

GGR Division EBIT was \$54 million, a margin of 18%. The multi-client depreciation rate amounted to 74%, leading to a \$803 million Net Book Value at the end of September 2013.

GGR Division Capital Employed was \$2.8 billion at the end of September 2013.

Third Quarter 2013 Financial Results

Group Total Revenue was \$908 million, up 6% year-on-year and down 12% sequentially. This breaks down to 20% from the Equipment division, 47% from the Acquisition division, and 33% from the GGR division.

Reported Group EBITDAs was \$272 million, a margin of 30%. Before the non-recurring charge associated with the Fugro Geoscience transaction, Group EBITDAs was \$274 million.

Group EBIT was \$352.6 million up 26%, a margin of 12.9%. Before the non-recurring impact of the Fugro Geoscience deal, Group EBIT was \$350.3 million, a margin of 12.5%:

Facing the \$69 million net capital gain from SWOBS transaction (\$85 million capital gain reduced by the year-to-date negative contribution of the Seabed Geosolutions JV due to a slow start and operational issues on one project), the restructuring costs amounted \$(66) million: \$(50) million in Q1, \$(11) million in Q2 and \$(5) million in Q3. The NFRI were \$3 million at the end of September.

Equipment EBIT margin was at 26.3% showing a strong resilience despite the lower sales volume thanks to efficient cost management.

Acquisition EBIT margin (before NRFI) was at 6.6% mainly due to an excellent marine production rate at a record level of 93%, while land was gradually recovering in still challenging safety conditions.

GGR EBIT margin was at 25.0% driven by a solid multi-client activity and a strong prefunding rate at 70%. The performance of Subsurface Imaging & Reservoir remained high with fair market conditions. Reservoir and geology activities continued to be solid driven by sustained demand for complex geologies projects.

Balance Sheet

Debt Management:

As part of the company's proactive management of its debt, CGG accelerated in July the refinancing of its credit facilities by extending the debt maturity periods:

A five-year-\$200-million credit facility was signed with a 4.4% interest rate, notably to reimburse the 2013 tranche of our Fugro Vendor Loan

The two existing \$289m Revolving Credit Facilities expiring in January/February 2014 were fully renewed with:

A-\$165-million US Revolving Credit Facility for a period of 5 years

A-\$325-million French Revolving Credit Facility for a period of three years and the potential for 2 year extensions

CGG made an early repayment in August of \$125 million of the 9.5% 2016 High Yield Bond

At the end of September, after full completion of the Fugro Geoscience s transaction and repayment of the 2013 installment, the Fugro Vendor Loan totaled 112.5 million

Net Debt to Equity Ratio:

Group gross debt was \$2.689 billion at the end of September 2013. Available cash was \$320 million and Group net debt was \$2.369 billion.

Net debt to equity ratio, at the end of September 2013, was 51%.

UNAUDITED ANALYSIS BY OPERATING SEGMENT

We previously reported our results on the basis of two segments: Geophysical Services and Geophysical Equipment. As a result of the acquisition of the Fugro's Geoscience Division, we changed our organization, as well as the way management measures our performance. Since February 1, 2013, we have been organized in three Divisions:

Acquisition segment, which comprises the following business lines:

Marine acquisition: seismic data acquisition offshore undertaken by us on behalf of a specific client;

Land and Airborne: other seismic data acquisition undertaken by us on behalf of a specific client;

Geology, Geophysics & Reservoir (GGR) segment which comprises the following business lines:

Multi-clients, basin data and Data Management: seismic and geological data undertaken by us and licensed to a number of clients on a non-exclusive basis and data management services;

Imaging and Reservoir: processing and imaging of geophysical data and reservoir characterization.

Equipment segment, which we conduct through Sercel, comprises our manufacturing and sales activities for seismic equipment used for data acquisition, both on land and marine.

Financial information by segment is reported in accordance with our internal reporting system and provides internal segment information that is used by the chief operating decision maker to manage and measure the performance.

We also changed our main performance indicator from operating income to earnings before interest and tax (EBIT). We define EBIT as operating income plus our share of income in companies accounted for under the equity method. EBIT is used by management as performance indicator because it captures the contribution to our results of the significant businesses that we manage through our joint-ventures.

Prior period segment disclosure has been restated to reflect the new segments.
