Notes to Schedule of Investments:

- (1) Floating or variable rate security. The interest shown reflects the rate in effect at September 30, 2013.
 - (2) Security exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be resold, normally only to qualified institutional buyers. At September 30, 2013, the value of these securities amounted to \$71,964,665 or 26.4% of net assets. These securities are determined to be liquid by the Advisor, unless otherwise noted, under procedures established by and under the general supervision of the Fund's Board of Directors.
 - (3) As of September 30, 2013, security is not accruing interest.
 - (4) Investments issued under Regulation S of the Securities Act of 1933, may not be offered, sold, or delivered within the United States except under special exemptions. At September 30, 2013, the value of these securities amounted to \$1,466,122 or 0.5% of net assets.
 - (5) All or a portion of this security is segregated to cover open futures contracts.
 - (6) A portion of the principal balance has been written-off during the period due to defaults in the underlying loans.
 - (7) Illiquid security.
 - (8) Rate stated is the effective yield.
 - (9) Security is currently in default due to bankruptcy or failure to make payment of principal or interest of the issuer. Income is not being accrued.
 - (10) Non-income producing security.
 - (11) Rate shown represents yield-to-maturity.
- ABS - Asset-Backed Securities.
CDO - Collateralized Debt Obligation.
CLO - Collateralized Loan Obligation.
EETC - Enhanced Equipment Trust Certificate.
I/F - Inverse Floating rate security whose interest rate moves in the opposite direction of prevailing interest rates.
I/O - Interest Only Security.

Edgar Filing: TCW STRATEGIC INCOME FUND INC - Form N-Q

PAC - Planned Amortization Class.

REIT - Real Estate Investment Trust.

TAC - Target Amortization Class.

TCW Strategic Income Fund, Inc.**Notes to Schedule of Investments (Unaudited)****September 30, 2013****Note 1 Security Valuation**

Securities and derivative contracts that are traded on national exchanges, except those traded on the NASDAQ Stock Market, Inc. (NASDAQ), are valued at the last reported sales price or the mean of the current bid and asked prices if there are no sales in the trading period. Securities traded on the NASDAQ are valued in accordance with the NASDAQ Official Closing Price, which may not be the last reported sales price. Other securities which are traded on the over-the-counter market are valued at the mean of current bid and asked prices as furnished by independent pricing services or by dealer quotations. Short-term debt securities with maturities of 60 days or less at the time of purchase are valued at amortized cost. Other short-term debt securities are valued on a marked-to-market basis until such time as they reach a remaining maturity of 60 days, after which they are valued at amortized cost using their value of the 61st day prior to maturity. Swap agreements are valued using an official closing price published by an index or the last ask price if no sales are reported. Securities for which market quotations are not readily available, including circumstances under which market quotations are not reflective of a security's market value, are valued at their fair value as determined in good faith under procedures established by and under the general supervision of the Fund's Board of Directors.

Fair value is defined as the price that a fund would receive upon selling an investment in a timely transaction to an independent buyer in the principal or most advantageous market for the investment. In accordance with the authoritative guidance on fair value measurements and disclosures under the accounting principles generally accepted in the United States of America (GAAP), the Fund discloses investments in a three-tier hierarchy. This hierarchy is utilized to establish classification of fair value measurements for disclosure purposes. Inputs refer broadly to the assumptions that market participants would use in pricing the asset or liability, including assumptions about risk. Inputs may be observable or unobservable. Observable inputs are inputs that reflect the assumptions market participants would use in pricing the asset or liability developed based on market data obtained from sources independent of the reporting entity. Unobservable inputs are inputs that reflect the reporting entity's own assumptions about the assumptions market participants would use in pricing the asset or liability developed based on the best information available under the circumstances. The three-tier hierarchy of inputs is summarized in the three broad Levels listed below.

Level 1 quoted prices in active markets for identical investments

Level 2 other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.)

Level 3 significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)

Changes in valuation techniques may result in transfers in or out of an investment's assigned Level within the hierarchy. The inputs or methodology used for valuing investments are not necessarily an indication of the risk associated with investing in those investments and the determination of the significance of a particular input to the fair value measurement in its entirety requires judgment and consideration of factors specific to each security.

The availability of observable inputs can vary from security to security and is affected by a wide variety of factors, including, for example, the type of security, whether the security is new and not yet established in the marketplace, the liquidity of markets, and other characteristics particular to the security. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised in determining fair value is greatest for instruments categorized in Level 3.

In periods of market dislocation, the observability of prices and inputs may be reduced for many instruments. This condition, as well as changes related to liquidity of investments, could cause a security to be reclassified between Level 1, Level 2, or Level 3.

In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, for disclosure purposes the level in the fair value hierarchy within which the fair value measurement falls in its entirety is determined based on the lowest level input that is significant to the fair value measurement in its entirety.

Fair Value Measurements: A description of the valuation techniques applied to the Fund's major categories of assets and liabilities measured at fair value on a recurring basis follows:

Asset-backed securities, mortgage-backed securities and collateralized mortgage obligations. The fair value of asset-backed securities, mortgage-backed securities and collateralized mortgage obligations is estimated based on models that consider the estimated cash flows of each debt tranche of the issuer, establish a benchmark yield, and develop an estimated tranche specific spread to the benchmark yield based on the unique attributes of the tranche including, but not limited to, the prepayment speed assumptions and attributes of the collateral. To the extent the inputs are observable and timely, the values would be categorized in Level 2 of the fair value hierarchy; otherwise they would be categorized as Level 3.

Bank loans. The fair value of bank loans is estimated using recently executed transactions, market price quotations, credit/market events, and cross-asset pricing. Inputs are generally observable and are obtained from independent sources. Bank loans are generally categorized in Level 2 of the fair value hierarchy.

Corporate bonds. The fair value of corporate bonds is estimated using recently executed transactions, market price quotations (where observable), bond spreads, or credit default swap spreads adjusted for any basis difference between cash and derivative instruments. Corporate bonds are generally categorized in Level 2 of the fair value hierarchy; in instances where prices, spreads, or any of the other aforementioned key inputs are unobservable, they are categorized in Level 3 of the hierarchy.

Equity securities. Securities are generally valued based on quoted prices from the applicable exchange. To the extent these securities are actively traded, valuation adjustments are not applied and they are categorized in Level 1 of the fair value hierarchy. Restricted securities issued by publicly held companies valued at a discount to similar publicly traded securities are categorized as Level 2 of the fair value hierarchy to the extent that the discount is considered to be insignificant to the fair value measurement in its entirety; otherwise they are categorized as Level 3. Restricted securities held in non-public entities are included in Level 3 of the fair value hierarchy because they trade infrequently, and therefore, the inputs are unobservable.

Futures contracts. Futures contracts are generally valued at the settlement prices established at the close of business each day by the exchange on which they are traded. The value of each of the Fund's futures contracts is marked daily and an appropriate payable or receivable for the change in value (variation margin) is recorded by the Fund. As such they are categorized as Level 1.

Municipal bonds. Municipal bonds are fair valued based on pricing models that take into account, among other factors, information received from market makers and broker-dealers, current trades, bid-wants lists, offerings, market movements, the callability of the bond, state of issuance, benchmark yield curves, and bond insurance. To the extent that these inputs are observable and timely, the fair values of municipal bonds are categorized as Level 2; otherwise the fair values are categorized as Level 3.

Restricted securities. Restricted securities that are deemed to be both Rule 144A securities and illiquid, as well as restricted securities held in non-public entities, are included in Level 3 of the fair value hierarchy because they trade infrequently, and therefore, the inputs are unobservable.

U.S. Government and agency securities. U.S. government and agency securities are normally valued using a model that incorporates market observable data such as reported sales of similar securities, broker quotes, yields, bids, offers, quoted market prices, and reference data. Accordingly, U.S. government and agency securities are normally categorized in Level 1 and 2 of the fair value hierarchy depending on the liquidity and transparency of the market.

The following is a summary of the inputs used as of September 30, 2013 in valuing the Fund's investments:

Edgar Filing: TCW STRATEGIC INCOME FUND INC - Form N-Q

Description	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Total
Fixed Income Securities

* See Schedule of Investments for corresponding industries.

The Fund did not have any transfers in and out of Level 1 and Level 2 of the fair value hierarchy during the period ended September 30, 2013.

The following is a reconciliation of investments in which significant unobservable inputs (Level 3) were used in determining value:

	Balance as of 12/31/2012	Accrued Discounts Premiums	Realized Gain (Loss)	Change in Unrealized Appreciation (Depreciation)	Purchases	Sales	Transfers into Level 3*	Transfers (out) of Level 3*	Balance as of 09/30/13	Net Change in Unrealized Appreciation (Depreciation) from Investments Still Held as of 09/30/13
Asset-Backed Securities	\$ 437,143	\$	\$	\$ 54	\$ 4,650,000	\$ (825,181)	\$ 1,989,575**	\$	\$ 6,251,591	\$ 54
Residential Mortgage-Backed Securities Non-Agency	11,546,414		1,733,739	(2,400,030)		(5,911,296)		\$ 4,968,827		(2,400,030)
Corporate Bonds							56,250**	\$ 56,250		

Edgar Filing: TCW STRATEGIC INCOME FUND INC - Form N-Q

Total	\$ 11,983,557	\$ 1,733,739	\$ (2,399,976)	\$ 4,650,000	\$ (6,736,477)	\$ 2,045,825	\$ 11,276,668	\$ (2,399,976)
-------	---------------	--------------	----------------	--------------	----------------	--------------	---------------	----------------

* The Fund recognizes transfers in and transfers out at the beginning of the period.

** Financial assets transferred between Level 2 and Level 3 were due to a change in observable and/or unobservable inputs. Significant unobservable valuations inputs for Level 3 investments as of September 30, 2013, are as follows:

Edgar Filing: TCW STRATEGIC INCOME FUND INC - Form N-Q

Description	Fair Value at 9/30/2013	Valuation Techniques*	Unobservable Input	Range
Asset-Backed Securities	\$ 6,251,591	Methods of Comparables/Consensus Pricing	Offered Quotes	\$ 100.001 to 100.03
Residential Mortgage-Backed Securities - Non-Agency (Interest Only, Collateral Strip Rate Securities)	\$ 3,863,851	Methods of Comparables/Consensus Pricing	Offered Quotes	\$ 1.033 to 4.057
Residential Mortgage-Backed Securities - Non-Agency (Interest Only Securities)	\$ 1,104,976	Methods of Comparables/Consensus Pricing	Offered Quotes	\$ 20.184
Corporate Bonds	\$ 56,250	Methods of Comparables/Consensus Pricing	Offered Quotes	\$ 2.50

* The Methods of Comparables/Consensus Pricing valuation technique for Level 3 securities involve gathering observable and unobservable data related to securities that exhibit characteristics that are comparable to that of the Level 3 security, and using such information as an input into the valuation of the Level 3 security. Such observable and unobservable data may include offered quotes (prices offered to the Fund by potential buyers in the market), broker quotes, and vendor prices for the comparable securities.

Level 3 Valuation Process: Investments classified within Level 3 of the fair value hierarchy may be fair valued by the Advisor with approval by the Fund's Pricing Committee in accordance with procedures approved by the Board of Directors, and under the general oversight of the Board of Directors. The Fund's Pricing Committee employs various methods to determine fair valuations including a regular review of key inputs and assumptions and review of any related market activity. The Fund's Pricing Committee reports to the Board of Directors at their regularly scheduled meetings. It is possible that fair value prices will be used by the Fund to a significant extent. The value determined for an investment using the Fund's fair value procedures may differ from recent market prices for the investment and may be significantly different from the value realized upon the sale of such investment. The Advisor, as part of the daily process, conducts back-testing of prices based on daily trade activities.

The Pricing Committee consists of the Chief Risk Officer, Chief Compliance Officer, Treasurer, Assistant Treasurer, Secretary, and a representative from the portfolio management team as well as alternate members as the Board of Directors may from time to time designate. The Pricing Committee reviews and makes recommendations concerning the fair valuation of portfolio securities and the Fund's pricing procedures in general.

Derivative Instruments: Derivatives are financial instruments whose values are based on the values of one or more indicators, such as a security, asset, currency, interest rate, or index. Derivative transactions can create investment leverage and may be highly volatile. It is possible that a derivative transaction will result in a loss greater than the principal amount invested. The Fund may not be able to close out a derivative transaction at a favorable time or price.

At September 30, 2013, the Fund had the following derivatives and transactions in derivatives, grouped in the following risk category:

	Equity Risk
Liability Derivatives	
Futures Contracts	\$ (18,986)
Number of Contracts	
Futures Contracts	52

Futures Contracts: The Fund may seek to manage a variety of different risks through the use of futures contracts, such as interest rate risk, equity price risk, and currency risk. The Fund may use index futures to hedge against broad market risks to its portfolio or to gain broad market exposure when it holds uninvested cash or as an inexpensive substitute for cash investments directly in securities or other assets. Securities index futures contracts are contracts to buy or sell units of a securities index at a specified future date at a price agreed upon when the contract is made and are settled in cash. Positions in futures may be closed out only on an exchange or board of trade which provides a secondary market for such futures. Because futures contracts are exchange-traded, they typically have minimal exposure to counterparty risk. Parties to a futures contract are not required to post the entire notional amount of the contract, but rather a small percentage of that amount (by way of margin), both at the time they enter into futures transactions, and then on a daily basis if their positions decline in value; as a result, futures contracts are highly leveraged. Such payments are known as variation margin and are recorded by the Fund as unrealized gains or losses. Because futures markets are highly leveraged, they can be extremely volatile, and there can be no assurance that the pricing of a futures contract will correlate precisely with the pricing of the asset or index underlying it or the asset or liability of the Fund that is the subject of the hedge. It may not always be possible for the Fund to enter into a closing transaction with respect to a futures contract it has entered into, at a favorable time or price. When the Fund enters into a futures transaction, it is subject to the risk that the value of the futures contract will move in a direction unfavorable to it.

When the Fund uses futures contracts for hedging purposes, it is likely that the Fund will have an asset or liability that will offset any loss (or gain) on the transactions, at least in part. When a futures contract is closed, the Fund records a realized gain or loss equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed. The Fund used the S&P Futures to gain exposure to the equity market. Futures contracts outstanding at September 30, 2013 are listed in the Fund's Schedule of Investments.

Swap Agreements: The Fund may enter into swap agreements. Swap agreements are typically two-party contracts entered into primarily by institutional investors. In a standard swap transaction, two parties agree to exchange the returns (or differentials in rates of return) earned or realized on particular predetermined investments or instruments, which may be adjusted for an interest factor. The gross returns to be exchanged or swapped between the parties are generally calculated with respect to a notional amount, (i.e., the return on or increase in value of a particular dollar amount invested at a particular interest rate or in a basket of securities representing a particular index).

The Fund may enter into credit default swap transactions, as a buyer or seller of credit protection. In a credit default swap, one party provides what is in effect insurance against a default or other adverse credit event affecting an issuer of debt securities (typically referred to as a reference entity). In general, the buyer of credit protection is obligated to pay the protection seller an upfront amount or a periodic stream of payments over the term of the swap. If a credit event occurs, the buyer has the right to deliver to the seller bonds or other obligations of the reference entity (with a value up to the full notional value of the swap), and to receive a payment equal to the par value of the bonds or other obligations. Credit events that would trigger a request that the seller make payment are specific to each credit default swap agreement, but generally include bankruptcy, failure to pay, restructuring, obligation acceleration, obligation default, or repudiation/moratorium. When the Fund buys protection, it may or may not own securities of the reference entity. When the Fund sells protection under a credit default swap, the position may have the effect of creating leverage in the Fund's portfolio through the Fund's indirect long exposure to the issuer or securities on which the swap is written. When the Fund sells protection, it may do so either to earn additional income or to create such a synthetic long position.

During the term of a swap transaction, changes in the value of the swap are recognized as unrealized gains or losses by marking to market to reflect the market value of the swap. When the swap is terminated, the Fund will record a realized gain or loss equal to the difference, if any, between the proceeds from (or cost of) the closing transaction and the Fund's basis in the agreement. Upfront swap premium payments paid or received by a Fund, if any, are recorded within the value of the open swap agreement and represent payments paid or received upon entering into the swap agreement to compensate for differences between stated terms of the swap agreement and prevailing market conditions (credit spreads, currency exchange rates, and other relevant factors). These upfront payments are recorded as realized gain or loss upon termination or maturity of the swap agreement.

During the term of a swap transaction, the periodic net payments can be made for a set period of time or may be triggered by a predetermined credit event. The net periodic payments may be based on a fixed or variable interest rate, the change in market value of a specified security, basket of securities or index, or the return generated by a security. These periodic payments received or made by the Fund are recorded as realized gains and losses, respectively. During the period ended September 30, 2013, the Fund did not enter into such agreements.

Mortgage-Backed Securities: The Fund may invest in mortgage pass-through securities which represent interests in pools of mortgages in which payments of both principal and interest on the securities are generally made monthly, in effect passing through monthly payments made by borrowers on the residential or commercial mortgage loans which underlie the securities (net of any fees paid to the issuer or guarantor of the securities). Mortgage pass-through securities differ from other forms of debt securities, which normally provide for periodic payment of interest in fixed amounts with principal payments at maturity or specified call dates. The Fund may also invest in Collateralized Mortgage Obligations (CMOs). CMOs are debt obligations collateralized by residential or commercial mortgage loans or residential or commercial mortgage pass-through securities. Interest and principal are generally paid monthly. CMOs may be collateralized by whole mortgage loans or private mortgage pass-through securities but are more typically collateralized by portfolios of mortgage pass-through securities guaranteed by Ginnie Mae, Freddie Mac or Fannie Mae. The issuer of a series of CMOs may elect to be treated for tax purposes as a Real Estate Mortgage Investment Conduit (REMIC). CMOs are structured into multiple classes, each bearing a different stated maturity. Monthly payment of principal received from the pool of underlying mortgages, including prepayments, is first returned to investors holding the shortest maturity class. Investors holding the longer maturity classes usually receive principal only after shorter classes have been retired. An investor may be partially protected against a sooner than desired return of principal because of the sequential payments. The Fund may invest in stripped mortgage backed securities. Stripped mortgage-backed securities are usually structured with two classes that receive different proportions of the interest and principal distributions on a pool of mortgage assets. In certain cases, one class will receive all of the interest (the interest-only or IO class), while the other class will receive all of the principal (the principal-only or PO class). The yield to maturity on IOs is sensitive to the rate of principal repayments (including prepayments) on the related underlying mortgage assets, and principal payments may have a material effect on yield to maturity. If the underlying mortgage assets experience greater than anticipated prepayments of principal, a Fund may not fully recoup its initial investment in IOs.

When-Issued, Delayed-Delivery and Forward Commitment Transactions: The Fund may enter into when-issued, delayed-delivery, or forward commitment transactions in order to lock in the purchase price of the underlying security, or in order to adjust the interest rate exposure of the Fund's existing portfolio. In when-issued, delayed-delivery, or forward commitment transactions, the Fund commits to purchase or sell particular securities, with payment and delivery to take place at a future date. Although the Fund does not pay for the securities or start earning interest on them until they are delivered, it immediately assumes the risks of ownership, including the risk of price fluctuation. If the Fund's counterparty fails to deliver a security purchased on a when-issued, delayed-delivery or forward commitment basis, there may be a loss, and the Fund may have missed an opportunity to make an alternative investment.

Prior to settlement of these transactions, the value of the subject securities will fluctuate, reflecting interest rate changes. In addition, because the Fund is not required to pay for when-issued, delayed-delivery or forward commitment securities until the delivery date, they may result in a form of leverage to the extent the Fund does not maintain liquid assets equal to the face amount of the contract. To guard against the deemed leverage, the Fund segregates cash or securities in the amount or value at least equal to the amount of these transactions.

Repurchase Agreements: The Fund may enter into repurchase agreements, under the terms of a Master Repurchase Agreement, that are secured by U.S. Government obligations and by other securities with select commercial banks and broker-dealers, under which the Fund acquires securities as collateral and agrees to resell the securities at an agreed upon time and at an agreed upon price. Securities pledged as collateral for repurchase agreements are held by the Fund's custodian bank or designated subcustodians, under tri-party Master Repurchase Agreements, until maturity of the repurchased agreements. Provisions of the agreements ensure that the market value of the collateral is sufficient in the event of default (where the market value of the collateral is at least equal to 100% of the repurchase price in the case of a repurchase agreement of one-day duration and 102% of the repurchase price in the case of all other repurchase agreements). In the event of default or bankruptcy by the other party under the Master Repurchase Agreement, realization of the collateral by the Fund may be delayed, limited or wholly denied.

Security Lending: The Fund can lend securities to brokers. The brokers must provide collateral, which must be maintained at not less than 100% of the value of the loaned securities, to secure the obligation. The Fund receives income, net of broker fees, by investing the collateral. The Fund did not lend securities any time during the period ended September 30, 2013.

Note 2 Federal Income Taxes

It is the policy of the Fund to comply with the requirements of the Internal Revenue Code applicable to regulated investment companies and distribute all of its net taxable income, including any net realized gains on investments, to its shareholders. Therefore, no federal income tax provision is required.

At September 30, 2013, net unrealized appreciation on investments for federal income tax purposes was as follows:

Unrealized Appreciation	\$ 24,534,783
Unrealized (Depreciation)	(5,318,478)
Net Unrealized Appreciation	\$ 19,216,305
Cost of Investments for Federal Income Tax Purposes	\$ 273,998,586

Note 3 Restricted Securities

The Fund is permitted to invest in securities that are subject to legal or contractual restrictions on resale. These securities may be resold in transactions exempt from registration or to the public if the securities are registered. Disposal of these securities may involve time consuming negotiations and expense, and prompt sale at an acceptable price may be difficult. There were no restricted securities (excluding Rule 144A issues) at September 30, 2013.

Item 2. Controls and Procedures.

(a) The Registrant's Chief Executive Officer and Chief Financial Officer concluded that the Registrant's disclosure controls and procedures (as defined in Rule 30a-3(c) under the Investment Company Act of 1940) are effective as of a date within 90 days prior to the filing date of this report (the Evaluation Date), based on their evaluation of the effectiveness of the Registrant's disclosure controls and procedures as of the Evaluation Date.

(b) There were no changes in the Registrant's internal control over financial reporting (as defined in Rule 30a-3(d) under the 1940 Act (17 CFR 270.30a-3(d))) that occurred during the Registrant's last fiscal quarter that has materially affected, or is reasonably likely to materially affect, the Registrant's internal control over financial reporting.

Item 3. Exhibits.

(a) Certification of Chief Executive Officer and Chief Financial Officer of the Registrant as required by Rule 30a-2(a) under the Investment Company Act of 1940 (17 CFR 270.30a-2(a)) is attached hereto as Exhibit 99CERT.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934 and the Investment Company Act of 1940, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.

(Registrant) TCW Strategic Income Fund, Inc.
