Charter has made a number of claims in its public comments about TWC and the

Charter proposal that we believe reflect a fundamental lack of understanding of our operations and strategy

We will address these claims in due course. However, none of what Charter has claimed changes the simple fact that its proposal is grossly inadequate

As such, these materials focus on TWC's value as a one-of-a-kind asset that Tom Rutledge correctly has identified as the biggest and best M&A option available

Presentation Context

4

Charter's proposal fails to reflect the significant value of TWC's high quality assets, unique scale, synergy potential, growth opportunities and strong financial position

It is materially below precedent transaction multiples, especially transactions of a

similar scale to TWC

The proposal fails to adequately compensate and protect TWC shareholders for the risks of owning Charter's stock

We have engaged with Charter, but Charter is not prepared to pay for a one-of-a-

kind asset and instead chose to go public with another low-ball proposal in an attempt to steal the Company

Charter's Proposal is Grossly Inadequate

The TWC Board of Directors unanimously rejected Charter's third grossly inadequate proposal

5
Starting
in
May
of
2013,
TWC
management
engaged
with

Charter
and
Liberty
in
an
attempt
to

understand their approach. After numerous meetings in May, June, and July, Charter made a low-ball offer of \$114 per TWC share, which was rejected by our Board

Charter did not re-engage with TWC until late October, when it made another low-ball offer of \$127 per TWC share, which was also rejected by our Board

In December, TWC management had numerous conversations with Charter management in order to understand:

On December 27, TWC management made clear to Charter:

TWC Has Engaged With Charter

Rather than pursuing this path, Charter has chosen to go public with its third low-ball offer trying to pressure TWC's Board into selling the Company at a grossly inadequate price

Charter's proposal and operational plan

Charter's view on synergies and tax attributes

Charter's proposed capital structure and financing plan

Our concerns about the highly uncertain value of Charter's stock

That
our
Board
is
open
to
a
transaction
with
Charter
at
\$160
per
TWC
share
consisting
of
\$100
in
cash
and

\$60 per share of Charter common stock, with a 20% symmetrical collar

6
Charter's proposal is well below recent cable transactions, especially transactions of a similar scale to TWC

Only true comparable deal from a scale perspective, AT&T Broadband, sold in 2002 for ~21x EBITDA, ~8x higher than the average trading multiple of public comparable cable companies at the time

The
Charter
proposal
to
acquire
TWC
is

at
a
significant
discount
to
Charter's
standalone
public trading multiple
