SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-K

(Mark One)

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended December 31, 2013

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission File Number 000-25131

BLUCORA, INC.

(Exact name of registrant as specified in its charter)

Delaware
(State or other jurisdiction of
incorporation or organization)

91-1718107
(IRS Employer
Identification No.)

10900 NE 8th Street, Suite 800, Bellevue, Washington 98004

(Address of principal executive offices) (Zip code)

Edgar Filing: BLUCORA, INC. - Form 10-K

Registrant's telephone number, including area code:

(425) 201-6100

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Name of each exchange on which registered
Common Stock, par value \$0.0001 per share	NASDAQ Global Select Market

Securities registered pursuant to Section 12(g) of the Act: None

(Title of Class)

Indicate by check mark whether the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark whether the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (§229.405 of this chapter) is not contained herein, and will not be contained, to the best of the registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definitions of "large accelerated filer", "accelerated filer", and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company

(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No

The aggregate market value of the Common Stock held by non-affiliates of the registrant outstanding as of June 30, 2013, based upon the closing price of Common Stock on June 30, 2013 as reported on the NASDAQ Global Select Market, was \$722.3 million. Common Stock held by each officer and director (or his or her affiliate) has been excluded because such persons may be deemed to be affiliates. This determination of affiliate status is not necessarily a conclusive determination for other purposes.

As of February 21, 2014, 42,187,983 shares of the registrant's Common Stock were outstanding.

DOCUMENTS INCORPORATED BY REFERENCE

Part III incorporates certain information by reference from the definitive proxy statement to be filed by the registrant in connection with the 2014 Annual Meeting of Stockholders (the *Proxy Statement*).

This report contains forward-looking statements that involve risks and uncertainties. The statements in this report that are not purely historical are forward-looking statements within the meaning of Section 21E of the Securities Exchange Act of 1934, as amended. Words such as anticipate, believe, plan, expect, future, intend, may, will, should, estimate, predict, potential, continue, and similar expressions identify forward-looking statements, but the absence of these words does not mean that the statement is not forward-looking. These forward-looking statements include, but are not limited to, statements regarding projections of our future financial performance; trends in our businesses; our future business plans and growth strategy, including our plans to expand, develop, or acquire particular operations or businesses; and the sufficiency of our cash balances and cash generated from operating, investing, and financing activities for our future liquidity and capital resource needs.

Forward-looking statements are subject to known and unknown risks, uncertainties, and other factors that may cause our results, levels of activity, performance, achievements, and prospects to be materially different from those expressed or implied by such forward-looking statements. These risks, uncertainties, and other factors include, among others, those identified under Item 1A, Risk Factors, and elsewhere in this report. You should not rely on forward-looking statements, which speak only as of the date of this Annual Report on Form 10-K. We do not undertake any obligation to update any forward-looking statement to reflect new information, events, or circumstances after the date of this Annual Report on Form 10-K or to reflect the occurrence of unanticipated events.

PART I

ITEM 1. Business

Overview

Blucora, Inc. (the *Company*, *Blucora*, or *we*) was founded in 1996 and incorporated in the state of Delaware. The Company was named InfoSpace, Inc. prior to a name change in June 2012. Our principal corporate office is located in Bellevue, Washington. Our common stock is listed on the NASDAQ Global Select Market under the symbol BCOR.

Blucora, Inc. operates a diverse group of Internet businesses. Our search business, InfoSpace, provides search services to distribution partners web properties as well as to its owned and operated web properties. Our tax preparation business consists of the operations of TaxACT, Inc. (*TaxACT*), which we acquired on January 31, 2012, and provides online tax preparation service for individuals, tax preparation software for individuals and professional tax preparers, and ancillary services. Our e-commerce business consists of the operations of Monoprice, Inc. (*Monoprice*), which we acquired on August 22, 2013, and provides self-branded electronics and accessories to both consumers and businesses.

Following the acquisitions of TaxACT and Monoprice, we determined that we have three reporting segments: Search, Tax Preparation, and E-Commerce. Our Search segment is the InfoSpace business, our Tax Preparation segment is the TaxACT business, and our E-Commerce segment is the Monoprice business. Unless the context indicates otherwise, we use the term Search to represent the Infospace business, we use the term Tax Preparation to represent services and products sold through the TaxACT business, and we use the term E-Commerce to represent products sold through the Monoprice business.

See Note 2: Summary of Significant Accounting Policies of the Notes to Consolidated Financial Statements in Part II Item 8 of this report for additional information on our Search, Tax Preparation, and E-Commerce businesses and revenues. See Note 12: Segment Information of the Notes to Consolidated Financial Statements in Part II Item 8 of this report for information regarding revenues, operating income, and assets for

each of our segments.

Table of Contents

Search Business

Our InfoSpace search business primarily offers search services through the web properties of its distribution partners, which are generally private-labeled and customized to address the unique requirements of each distribution partner. The search business also distributes aggregated search content through its owned and operated websites, such as Dogpile.com and WebCrawler.com. Our search revenue primarily is derived from search content providers who provide paid search links for display as part of our search services. From these content providers, whom we refer to as our Search Customers, we license rights to certain search products and services, including both non-paid and paid search links. We receive revenues from our Search Customers when an end user of our web search services clicks on a paid search link that is provided by that Search Customer and displayed on one of our owned and operated web properties or displayed on the web property of one of our search distribution partners. Revenues are recognized in the period in which such paid clicks occur and are based on the amounts earned and remitted to us by our Search Customers for such clicks.

Our main Search Customer agreements are with Google and Yahoo!. We derive a significant portion of our Search revenue from Google, and we expect this concentration to continue in the foreseeable future. Google accounted for 88% of our total Search revenues in 2013. If either of these Search Customers reduce or eliminate the services provided to us or our distribution partners, or if either is unwilling to pay amounts owed to us, it could materially harm our business and financial results. Our agreement with Yahoo! runs through December 31, 2014. We recently renewed our agreement with Google, which now runs through March 31, 2017, and may be extended for an additional year upon the mutual agreement of both parties. Both Google and Yahoo! have requirements and guidelines regarding, and reserve certain rights of approval over, the use and distribution of their respective search products and services. Both Google and Yahoo! may modify certain requirements and guidelines of their agreements with us at their discretion, and even when unmodified, we occasionally disagree with our Search Customers on interpretations of these requirements and guidelines. If Google or Yahoo! believe that we or our search distribution partners have failed to meet the requirements and guidelines of the Search Customer agreements, they may suspend or terminate our or our distribution partners' use and distribution of their search products and services, with or without notice, and in the event of certain violations, may terminate their agreements with us. We and our distribution partners have limited rights to cure breaches of the requirements and guidelines.

Our partners for distribution of our online search services include software application providers, web portals, and internet service providers. Traffic from our largest distribution partners generates a significant percentage of our search revenue. In 2013, 33% of our Search revenue was generated by traffic from the web properties operated by our top five distribution partners, and this percentage was 47% in both 2012 and 2011. Our agreements with our distribution partners typically renew annually. In addition, our agreements with some of our distribution partners are not exclusive, meaning that they have the right to shift some or all of the search traffic that they send to us to our competitors.

Our primary focus for the Search business is on improving the search services offered to our end users, growing our end users, maintaining our current distribution partners, and adding new distribution partners for our search services.

Tax Preparation Business

Our TaxACT business consists of an online tax preparation service for individuals, tax preparation software for individuals and professional tax preparers, and ancillary services. TaxACT generates revenue primarily through its online service at www.taxact.com. The TaxACT business's basic federal tax preparation online software service is free for everyone, meaning that any taxpayer can use the services to e-file his or her federal income return without paying for upgraded services and may do so for every form that the IRS allows to be e-filed. This free offer differentiates TaxACT's offerings from many of its competitors who limit their free software and/or services offerings to certain categories of customers or certain forms. The TaxACT business

Table of Contents

generates revenue from a percentage of these free users who purchase a state form or choose to upgrade for a fee to the Deluxe or Ultimate product, which includes additional support, tools, or state forms in the case of the Ultimate offering. In addition, revenue is generated from the sale of ancillary services, which include, among other things, tax preparation support services, data archive services, bank or reloadable pre-paid debit card services, and additional e-filing services. TaxACT is the recognized value player in the digital do-it-yourself space, offering comparable software and/or services at a lower cost to the end user compared to larger competitors. This, coupled with its free for everyone offer, provides TaxACT a valuable marketing position. TaxACT's professional tax preparer software allows professional tax preparers to file individual returns for their clients. Revenue from professional tax preparers historically has constituted a relatively small percentage of the TaxACT business's overall revenue and requires relatively modest incremental development costs as the basic software is substantially similar to the consumer-facing software and online service.

Our primary focus for the TaxACT business is on enhancements to the customer experience for our tax preparation services and products, including expanding our product offerings, retaining current tax preparation customers, and attracting new customers.

E-Commerce Business

Our E-Commerce business, Monoprice, is an online retailer of self-branded electronics and accessories to both consumers and businesses. Monoprice offers its products for sale through the www.monoprice.com website, where the majority of our E-Commerce revenue is derived, and fulfills those orders from our warehouse in Rancho Cucamonga, California. We also sell our products through distributor, reseller, and marketplace agreements. Monoprice has built a well-respected consumer brand by delivering products with premium quality on par with well-known national brands, selling these products at prices far below the prices for those well-known brands, and providing top-tier service and rapid product delivery. The Monoprice website showcases 14 product categories and over 5,800 individual products. Monoprice has developed an efficient product cost structure that is enabled by a direct import supply chain solution that eliminates traditional layers of mark-ups imposed by intermediaries. Consumers are able to access and purchase products 24 hours a day from the convenience of a computer or a mobile device. Monoprice's team of customer service representatives assists customers primarily by online chat or email. Nearly all sales are to customers located in the United States.

Our primary focus for the E-Commerce business is on increasing the number of orders through existing and new consumer and business customers, product category expansion and diversification, revenue expansion into new geographic areas, and continuing to build brand recognition by providing unparalleled value and exceptional customer experience.

Business Strategy

In addition to the strategies for growth outlined above for each of our business segments, an important component of Blucora's strategy for future growth is to acquire new technology businesses. In the ordinary course of business, we are continuously engaged in various stages of diligence, discussion, and negotiation with acquisition targets, including companies and assets that complement our existing businesses, as well as companies and assets that are unrelated to our existing businesses. Potential acquisitions may be material to our business, financial condition, and results of operations.

Research and Development

Edgar Filing: BLUCORA, INC. - Form 10-K

We believe that our technology is essential to expand and enhance our products and services and maintain their attractiveness and competitiveness. Research and development expenses were \$7.3 million in 2013, \$6.1 million in 2012, and \$4.1 million in 2011. These amounts exclude any amounts spent by the TaxACT and Monoprice businesses on research and development prior to our acquisition of those businesses.

Table of Contents

Intellectual Property

Our success depends significantly upon our technology and intellectual property rights. To protect our rights and the value of our corporate brands and reputation, we rely on a combination of domain name registrations, confidentiality and intellectual property assignment agreements with employees and third parties, protective contractual provisions, and laws regarding copyrights, patents, trademarks, and trade secrets. We hold multiple issued patents and registered trademarks in the United States and in various foreign countries and have applied for additional patents and trademarks. We may not be successful in obtaining issuance or registration for these applications or in maintaining existing patents and trademarks. In addition, issued patents and registered marks may not provide us with any competitive advantages. We may be unable to adequately or cost-effectively protect or enforce our intellectual property rights, and failure to do so could weaken our competitive position and negatively impact our business and financial results. If others claim that our products infringe their intellectual property rights, we may be forced to seek expensive licenses, re-engineer our products, engage in expensive and time-consuming litigation, or stop marketing and licensing our products. See the section entitled *Risk Factors* in Part I Item 1A of this report for additional information regarding protecting and enforcing intellectual property rights by us and third parties against us.

Competition

We face intense competition in all markets in which our businesses operate. Many of our competitors or potential competitors have substantially greater financial, technical, and marketing resources, larger customer bases, longer operating histories, more developed infrastructures, greater brand recognition, better access to vendors, or more established relationships in the industry than we have. Our competitors may be able to adopt more aggressive pricing policies, develop and expand their product and service offerings more rapidly, adapt to new or emerging technologies more quickly, take advantage of acquisitions and other opportunities more readily, achieve greater economies of scale, and devote greater resources to the marketing and sale of their products and services than we can. In addition, we may face increasing competition for market share from new startups, mobile providers, and social media sites and applications. For our businesses to be successful, we must be competitive in some or all of the specific competitive factors in the Search, Tax Preparation, and E-Commerce markets that are described below.

Search Competition

In the online search market, we face competition for various elements of our search business from multiple sources, including our Search Customers. In particular, Google, Yahoo!, and Bing (Microsoft) collectively control a significant majority of the consumer-facing online search market serviced by our owned and operated sites and those of our distribution partners. Each of these three companies provides search results to our search services in addition to competing for internet users. Our distribution partners also compete with us for internet users. We also compete with our Search Customers and other content providers for contracts with new and existing distribution partners. We believe that the primary competitive factors in the market for online search services are:

the ability to continue to meet the evolving information, content, and service demands of Internet users and our distribution partners;

the ability to offer our distribution partners competitive rates and comprehensive search and advertising content;

the cost-effectiveness, reliability, and security of the search applications and services;

Edgar Filing: BLUCORA, INC. - Form 10-K

the ability to attract Internet users to search services in a cost effective way;

the ability to provide and support products or services, such as embedded search browsers, default search provider settings within the search browsers, or downloadable applications, that may displace competing search services; and

the ability to develop innovative products and services that enhance the appearance and utility of search services, both to Internet users and to current and potential distribution partners.

Table of Contents

Tax Preparation Competition

Our Tax Preparation business operates in a very competitive marketplace. There are many competing software products and online services, including two competitors who have a significant percentage of the software and online service market: Intuit's TurboTax and H&R Block's products and services. Our Tax Preparation business must also compete with alternate methods of tax preparation, including pencil and paper do-it-yourself return preparation by individual filers and storefront tax preparation services, including both local tax preparers and large chains such as H&R Block, Liberty, and Jackson Hewitt. Finally, our Tax Preparation business faces the risk that state or federal taxing agencies will offer software or systems to provide direct access for individual filers that will reduce the need for TaxACT's software and services. We believe that the primary competitive factors in the market for tax preparation software and services are:

the ability to continue to offer software and services that have quality and ease-of-use that are compelling to consumers;

the ability to market the software and services in a cost effective way;

the ability to offer ancillary services that are attractive to users; and

the ability to develop the software and services at a low enough cost to be able to offer them at a competitive price point.

E-Commerce Competition

Our E-Commerce business operates in a very competitive marketplace with low barriers to entry. Our competitors that offer similar products include existing well-known brands, including online e-commerce sites and offline retail stores, as well as new entrants to the e-commerce market. We believe that the primary competitive factors in the market for our E-Commerce business are:

product quality and selection;

brand loyalty;

price;

customer service;

shopping convenience;

website organization and load speed; and

order processing, fulfillment and delivery time.

Governmental Regulation

We face increasing governmental regulation in all of our businesses. U.S. and foreign governments have adopted, or may in the future adopt, applicable laws and regulations addressing issues such as consumer protection, user privacy, security, pricing, age verification, content, taxation, intellectual property, advertising, and product and services quality. These or other laws or regulations that may be enacted in the future could have adverse effects on our business, including higher regulatory compliance costs, limitations on our ability to provide some services in some states or countries, and liabilities that might be incurred through lawsuits or regulatory penalties. See the section entitled "Risk Factors" in Part I Item 1A of this report for additional information regarding the potential impact of governmental regulation on our operations and results.

Seasonality

Revenue from our Tax Preparation business is highly seasonal, with the significant majority of its annual revenue earned in the first four months of our fiscal year. Revenue from our E-Commerce business also is

Table of Contents

seasonal, with revenues historically being the lowest in the second quarter, a period that does not include consumer back-to-school or holiday-related spending. We anticipate that these seasonal effects will continue in the foreseeable future.

Employees

As of December 31, 2013, we had 450 full-time employees. None of our employees are represented by a labor union, and we consider employee relations to be positive. There is significant competition for qualified personnel in the industries in which we operate, particularly for software development and other technical staff. We believe that our future success will depend in part on our continued ability to hire and retain qualified personnel.

Acquisitions and Dispositions

As noted above, on August 22, 2013, we acquired Monoprice. On January 31, 2012, we acquired TaxACT, and TaxACT acquired Balance Financial, Inc. (*Balance Financial*) on October 4, 2013. We disposed of our Mercantila e-commerce business on June 22, 2011. For further detail on our acquisition and disposition of these businesses, see the discussion in Management's Discussion and Analysis of Financial Condition and Results of Operations in Part II Item 7 of this report.

Company Internet Site and Availability of SEC Filings

Our corporate website is located at www.blucora.com. We make available on that site, as soon as reasonably practicable, our Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q, and Current Reports on Form 8-K, as well as any amendments to those filings and other reports filed with or furnished to the U.S. Securities and Exchange Commission (the *SEC*). Our SEC filings, as well as our Code of Conduct and Ethics and other corporate governance documents, can be found in the Investor Relations section of our site and are available free of charge. Information on our website is not part of this Annual Report on Form 10-K. In addition, the SEC maintains a website at www.sec.gov that contains reports, proxy and information statements, and other information regarding us and other issuers that file electronically with the SEC.

Table of Contents

ITEM 1A. Risk Factors

RISKS COMMON TO ALL OF OUR BUSINESSES

Future revenue growth depends upon our ability to adapt to technological change and successfully introduce new and enhanced products and services.

The online service, software, and e-commerce industries are characterized by rapidly changing technology, evolving industry standards, and frequent new product introductions. Our competitors in the Search, Tax Preparation, and E-Commerce segments offer new and enhanced products and services every year, and customer expectations change as a result. We must successfully innovate and develop new products and features to meet changing customer needs and expectations. We will need to devote significant resources to continue to develop our skills, tools, and capabilities to capitalize on existing and emerging technologies. Our inability to successfully introduce new and enhanced products and services on a timely basis could harm our business and financial results.

Our products and services have historically been provided through desktop computers, but the number of people who access similar products and services through mobile devices, such as smartphones and tablets, has increased dramatically in the past few years. We have limited experience to date in developing products and services for users of these alternative devices, and the versions of our products and services developed for these devices may not be compelling to users. As new devices and new platforms are continually being released, it is difficult to predict the problems we may encounter in developing versions of our products and services for use on these alternative devices, and we may need to devote significant resources to the creation, support, and maintenance of such offerings. If we are slow to develop products and services that are compatible with these alternative devices, particularly if we cannot do so as quickly as our competitors, we will fail to maintain or grow our share of the markets in which we compete. In addition, such new products and services may not succeed in the marketplace, resulting in lost market share, wasted development costs, and damage to our brands.

Our business depends on our strong reputation and the value of our brands.

Developing and maintaining awareness of our brands is critical to achieving widespread acceptance of our existing and future products and services and is an important element in attracting new customers. Adverse publicity (whether or not justified) relating to events or activities attributed to our businesses, our employees, our vendors, or our partners may tarnish our reputation and reduce the value of our brands. Damage to our reputation and loss of brand equity may reduce demand for our products and services and have an adverse effect on our future financial results. Such damage also would require additional resources to rebuild our reputation and restore the value of the brands.

Our website and transaction management software, data center systems, or the systems of third-party co-location facilities and cloud service providers could fail or become unavailable, which could harm our reputation and result in a loss of revenues and current or potential customers.

Any system interruptions that result in the unavailability or unreliability of our websites, transaction processing systems, or network infrastructure could reduce our revenue and impair our ability to properly process transactions. We use internally developed and third-party systems, including cloud computing and storage systems, for our online services and certain aspects of transaction processing. Some of our systems are relatively new and untested, and thus may be subject to failure or unreliability. Any system unavailability or unreliability may cause unanticipated system disruptions, slower response times, degradation in customer satisfaction, additional expense, or delays in reporting accurate

financial information.

Our data centers and cloud service could be susceptible to damage or disruption, which could have a material adverse effect on our business. Our Search and E-Commerce businesses rely on third-party co-location facilities and cloud service providers. Although these third party services provide some redundancy, not all of our systems and operations have backup redundancy. Our TaxACT business has a disaster recovery center that we built in late 2012 and have tested, but if the primary data center fails and the disaster recovery center fails to fully restore the failed environments, our TaxACT business will suffer, particularly if such interruption occurs during the tax season.

Table of Contents

Our systems and operations, and those of our third-party service providers, could be damaged or interrupted by fire, flood, earthquakes, other natural disasters, power loss, telecommunications failure, internet breakdown, break-in, human error, software bugs, hardware failures, malicious attacks, computer viruses, computer denial of service attacks, terrorist attacks, or other events beyond our control. Such damage or interruption may affect internal and external systems that we rely upon to provide our services, take and fulfill customer orders, handle customer service requests, and host other products and services. During the period in which services are unavailable, we will be unable or severely limited in our ability to generate revenues, and we may also be exposed to liability from those third parties to whom we provide services. We could face significant losses as a result of these events, and our business interruption insurance may not be adequate to compensate us for all potential losses. For these reasons, our business and financial results could be materially harmed if our systems and operations are damaged or interrupted.

If the volume of traffic to our infrastructure increases substantially, we must respond in a timely fashion by expanding our systems, which may entail upgrading our technology, transaction processing systems, and network infrastructure. Our ability to support our expansion and upgrade requirements may be constrained due to our business demands or constraints of our third-party co-location facility providers and cloud service providers. Due to the number of our customers and the services that we offer, we could experience periodic capacity constraints that may cause temporary unanticipated system disruptions, slower response times and lower levels of customer service, and limit our ability to develop, offer, or release new or enhanced products and services. Our business could be harmed if we are unable to accurately project the rate or timing of increases, if any, in the use of our services, or we fail to adequately expand and upgrade our systems and infrastructure to accommodate these increases.

The security measures we have implemented to secure confidential and personal information may be breached, and such a breach may pose risks to the uninterrupted operation of our systems, expose us to mitigation costs, litigation, potential investigation and penalties by authorities, potential claims by persons whose information was disclosed, and damage our reputation.

Our networks and those from our third-party service providers may be vulnerable to unauthorized access by hackers, rogue employees or contractors, computer viruses, and other disruptive problems. A person who is able to circumvent security measures could misappropriate proprietary information or personal information or cause interruptions in our operations. Unauthorized access to, or abuse of, this information could result in significant harm to our business.

We collect and retain certain sensitive personal data. Our TaxACT business collects, uses, and retains large amounts of customer personal and financial information, including information regarding income, family members, credit cards, tax returns, bank accounts, social security numbers, and healthcare. Our search services receive, retain, and transmit certain personal information about our website visitors. Subscribers to some of our search services are required to provide information that may be considered to be personally identifiable or private information. Our E-Commerce business and its partners collect and retain certain information regarding its customers, including certain payment information, purchase information, e-mail addresses, and shipping addresses.

We are subject to laws, regulations, and industry rules relating to the collection, use, and security of user data. We expect regulation in this area to increase. As a result of such new regulation, our current data protection policies and practices may not be sufficient and may require modification. New regulations may also impose burdens that may require notification to customers or employees of a security breach, restrict our use of personal information, and hinder our ability to acquire new customers or market to existing customers. As our business continues to expand to new industry segments that may be more highly regulated for privacy and data security, our compliance requirements and costs may increase. We have incurred, and may continue to incur, significant expenses to comply with privacy and security standards and protocols imposed by law, regulation, industry standards, and contractual obligations.

A major breach of our systems or those of our third-party service providers may have serious negative consequences for our businesses, including possible fines, penalties and damages, reduced customer demand for

Table of Contents

our services, harm to our reputation and brands, further regulation and oversight by federal or state agencies, and loss of our ability to provide financial transaction services or accept and process customer credit card orders or tax returns. We may detect, or receive notices from customers or public or private agencies that they have detected, vulnerabilities in our servers, our software or third-party software components that are distributed with our products. The existence of vulnerabilities, even if they do not result in a security breach, may harm customer confidence and require substantial resources to address, and we may not be able to discover or remediate such security vulnerabilities before they are exploited. In addition, hackers develop and deploy viruses, worms and other malicious software programs that may attack our offerings. Although we deploy network and application security measures, internal control measures, and physical security procedures to safeguard our systems, there can be no assurance that a security breach, intrusion, loss or theft of personal information will not occur, which may harm our business, customer reputation and future financial results and may require us to expend significant resources to address these problems, including notification under data privacy regulations.

We rely on the infrastructure of the Internet over which we have no control and the failure of which could substantially undermine our operations.

The success of our Search, Tax Preparation, and E-Commerce businesses depends on the maintenance and expansion of the infrastructure of the Internet. In particular, we rely on other companies to maintain reliable network systems that provide adequate speed, data capacity, and security. As the Internet continues to experience growth in the number of users, frequency of use, and amount of data transmitted, the segments of the internet infrastructure that we rely on may be unable to support the demands placed upon it. The failure of any parts of the internet infrastructure that we rely on, even for a short period of time, would substantially undermine our operations and would have a material adverse effect on our business and financial results.

We regularly consider acquisition opportunities, and our financial and operating results may suffer if we are unsuccessful in completing any such acquisitions on favorable terms.

An important component of our strategy for future growth is to acquire new technologies and businesses. We may seek to acquire companies or assets that complement our existing businesses. We may also consider acquisitions of companies and assets that are not related to search, tax preparation, or e-commerce. We regularly explore such opportunities in the ordinary course of our business, and potential acquisition targets range in size from relatively small to a size comparable to our own, and, therefore, may be material to our business, financial condition, and results of operations. There can be no guarantee that any of the opportunities that we evaluate will result in the purchase by us of any business or asset being evaluated, or that if acquired, we will be able to successfully integrate such acquisition.

If we are successful in our pursuit of any acquisition opportunities, we intend to use available cash, debt and/or equity financings, and/or other capital or ownership structures designed to diversify our capital sources and attract a competitive cost of capital, all of which may change our leverage profile. There are a number of factors that impact our ability to succeed in acquiring the companies and assets we identify, including competition for these companies and assets, sometimes from larger or better-funded competitors. As a result, our success in completing acquisitions is not guaranteed. Our expectation is that, to the extent we are successful, any acquisitions will be additive to our business, taking into account potential benefits of diversification or operational synergies. However, these new business additions and acquisitions involve a number of risks and may not achieve our expectations; and, therefore, we could be adversely affected by any such new business additions or acquisitions. There can be no assurance that the short or long-term value of any business or technology that we develop or acquire will be equal to the value of the cash and other consideration that we paid or expenses we incurred.

Table of Contents

Our financial and operating results may suffer if we are unsuccessful in integrating acquisitions we may complete, and any new businesses or technologies may not be complementary to our current operations or leverage our current infrastructure and operational experience.

Even if we are successful in identifying and completing acquisitions of new businesses or technologies, the process of integrating such new businesses and technologies involves numerous risks that could materially and adversely affect our results of operations or stock price, including:

expenses related to the acquisition process, both for consummated and unconsummated transactions, and impairment charges to goodwill and other intangible assets related to certain acquisitions;

diversion of management's or other key personnel's attention from current operations and other business concerns and potential strain on financial and managerial controls and reporting systems and procedures;

disruption of our ongoing business or the ongoing acquired business, including impairment of existing relationships with the employees, distributors, suppliers, or customers of our existing businesses or those of the acquired companies;

difficulties in assimilating the operations, products, technology, information systems, and management and other personnel of acquired companies that result in unanticipated allocation of resources, costs, or delays;

the dilutive effect on earnings per share as a result of issuances of stock, incurring operating losses, and the amortization of intangible assets for the acquired business;

stock volatility due to the perceived value of the acquired business by investors;

any debt incurred to finance acquisitions would increase costs, may increase volatility in our stock price, and could accelerate a decline in stockholder equity in the event of poor financial performance;

diversion of capital from other uses;

failure to achieve the anticipated benefits of the acquisitions in a timely manner, or at all;

difficulties in acquiring foreign companies, including risks related to integrating operations across different cultures and languages, currency risks, and the particular economic, political, and regulatory risks associated with specific countries; and

adverse outcome of litigation matters or other contingent liabilities assumed in or arising out of the acquisitions.

Developing or acquiring a business or technology, and then integrating it with our other operations, will be complex, time consuming, and expensive. The successful integration of an acquisition requires, among other things, that we: retain key personnel; maintain and support preexisting supplier, distribution, and customer relationships; and integrate accounting and support functions. The complexity of the technologies and operations being integrated and the disparate corporate cultures and/or industries being combined, may increase the difficulties

Edgar Filing: BLUCORA, INC. - Form 10-K

of integrating an acquired technology or business. If our integration of acquired or internally developed technologies or businesses, including our recent acquisitions of the Monoprice business, is not successful, we may experience adverse financial or competitive effects.

Our stock price has been highly volatile and such volatility may continue.

The trading price of our common stock has been highly volatile. Between January 1, 2012 and December 31, 2013, our stock price ranged from \$10.98 to \$29.82. On February 21, 2014, the closing price of our common stock was \$19.80. Our stock price could decline or fluctuate significantly in response to many factors, including the other risks discussed in this report and the following:

actual or anticipated variations in quarterly and annual results of operations;

announcements of significant acquisitions, dispositions, charges, changes in or loss of material contracts and relationships, or other business developments by us, our partners, or our competitors;

Table of Contents

conditions or trends in the search services, tax preparation, or e-commerce markets;

changes in general conditions in the U.S. and global economies or financial markets;

announcements of technological innovations or new services by us or our competitors;

changes in financial estimates or recommendations by securities analysts;

disclosures of any accounting issues, such as restatements or material weaknesses in internal control over financial reporting;

equity issuances resulting in the dilution of stockholders;

the adoption of new regulations or accounting standards; and

announcements or publicity relating to litigation or governmental enforcement actions.

In addition, the market for technology company securities has experienced extreme price and volume fluctuations, and our stock has been particularly susceptible to such fluctuations. Often, class action litigation has been instituted against companies after periods of volatility in the price of such companies' stock. If such litigation were to be instituted against us, even if we were to prevail, it could result in substantial cost and diversion of management's attention and resources.

Our financial results may fluctuate, which could cause our stock price to be volatile or decline.

Our financial results have varied on a quarterly basis and are likely to continue to fluctuate in the future. These fluctuations could cause our stock price to be volatile or decline. Many factors could cause our quarterly results to fluctuate materially, including but not limited to:

changes or potential changes in our relationships with Google or Yahoo! or future significant Search Customers, such as the effects of changes to their requirements or guidelines or their measurement of the quality of traffic that we send to their advertiser networks, and any resulting loss or reduction of content that we can use or provide to our distribution partners;

the loss, termination, or reduction in scope of key search distribution relationships as a result of, for example, distribution partners licensing content directly from content providers, or any suspension by our Search Customers (particularly Google) of the right to use or distribute content on the web properties of our distribution partners;

the inability of any of our businesses to meet our expectations;

the extreme seasonality of our TaxACT business and the resulting large quarterly fluctuations in our revenues;

Edgar Filing: BLUCORA, INC. - Form 10-K

the success or failure of our strategic initiatives and our ability to implement those initiatives in a cost effective manner;

the mix of search services revenue generated by our owned and operated web properties versus our distribution partners' web properties;

the mix of revenues generated by existing businesses, or other businesses we develop or acquire;

our, and our distribution partners', ability to attract and retain quality traffic for our search services;

gains or losses driven by mark to market fair value accounting;

litigation expenses and settlement costs;

expenses incurred in finding, negotiating, consummating, and integrating acquisitions;

variable demand for our services, rapidly evolving technologies and markets, and consumer preferences;

Table of Contents

any restructuring charges we may incur;

any economic downturn, which may lead to lower online advertising revenue from advertisers on our Search business, lower acceptance rates on premium products and services offered by our Tax Preparation business, and reduced sales for our E-Commerce business;

new court rulings, or the adoption of new laws, rules, or regulations, that adversely affect our ability to acquire content and distribute our search services, that adversely affect our tax preparation products and services, or that otherwise increase our potential liability or compliance costs;

impairment in the value of long-lived assets or the value of acquired assets, including goodwill, core technology, and acquired contracts and relationships; and

the effect of changes in accounting principles or standards or in our accounting treatment of revenues or expenses.

For these reasons, among others, you should not rely on period-to-period comparisons of our financial results to forecast our future performance. Furthermore, our fluctuating operating results may fall below the expectations of securities analysts or investors and financial results volatility could make us less attractive to investors, either of which could cause the trading price of our stock to decline.

We sold \$201.25 million of Convertible Senior Notes in 2013, which may impact our financial results, result in the dilution of existing stockholders, and restrict our ability to take advantage of future opportunities.

In March 2013, we sold \$201.25 million aggregate principal amount of 4.25% Convertible Senior Notes (the *Notes*) due 2019. The accounting for the Notes will result in our having to recognize interest expense significantly more than the stated interest rate of the Notes and may result in volatility to our financial results. Upon issuance of the Notes, we were required to establish a separate initial value for the conversion option and bifurcate this value from the value attributable to the balance of the Notes, or the debt component. As a result, for accounting purposes, we were required to treat the Notes as having been issued with a discount to their face principal amount, which is referred to as debt discount. We are accreting the debt discount to interest expense ratably over the term of the Notes, which results in an effective interest rate in our consolidated statement of comprehensive income that is in excess of the stated coupon rate of the Notes. This will reduce our earnings and could adversely affect the price at which our common stock trades, but will have no effect on the amount of cash interest paid to holders or on our cash flows.

Our intent is to settle conversions of the Notes with cash for the principal amount of the debt and shares of common stock for any related conversion premium. Shares associated with the conversion premium will be included in diluted earnings per share when the average stock price exceeds the conversion price of the Notes and could adversely affect our diluted earnings per share and the price at which our common stock trades.

The conditional conversion feature of the Notes, if triggered, and the requirement to repurchase the Notes upon a fundamental change may adversely affect our financial condition and financial results. In the event the conditional conversion feature of the Notes is triggered, holders of Notes will be entitled to convert the Notes at any time during specified periods at their option. If we undergo a fundamental change, (as described in the applicable Indenture), subject to certain conditions, holders of the Notes may require us to repurchase for cash all or part of their Notes at a price equal to 100% of the principal amount of the Notes, plus accrued and unpaid interest.

Edgar Filing: BLUCORA, INC. - Form 10-K

The payment of the interest and the repayment of principal at maturity, conversion, or under a fundamental change, will require the use of a substantial amount of our cash, and if such cash is not available, we may be required to sell other assets or enter into alternate financing arrangements at terms that may or may not be desirable. The existence of the Notes and the obligations we incurred by issuing them may restrict our ability to take advantage of certain future opportunities, such as engaging in future debt or equity financing activities, which may reduce or impair our ability to acquire new businesses or invest in our existing businesses.

Table of Contents

We incurred debt in connection with our acquisitions of the Monoprice and TaxACT businesses, and may incur future debt related to other acquisitions, which may adversely affect our financial condition and future financial results.

In November 2013, Monoprice incurred debt as part of our acquisition of Monoprice's business, of which \$50.0 million remained outstanding as of December 31, 2013. In addition, TaxACT incurred debt as part of our acquisition of TaxACT's business, which was refinanced with a new credit agreement on August 30, 2013 and of which \$71.4 million remained outstanding as of December 31, 2013. Both are non-recourse debts that are guaranteed by Monoprice Holdings, Inc. and TaxACT Holdings, Inc., respectively, both of which are Blucora's direct subsidiaries. These debts may adversely affect our financial condition and future financial results by, among other things:

increasing Monoprice's or TaxACT's vulnerability to downturns in their businesses, to competitive pressures, and to adverse economic and industry conditions;

requiring the dedication of a portion of our expected cash from Monoprice's and TaxACT's operations to service the indebtedness, thereby reducing the amount of expected cash flow available for other purposes, including capital expenditures and acquisitions;

requiring cash infusions from Blucora to Monoprice or TaxACT if either or both are unable to meet their payment or other obligations under the applicable credit facilities;

increasing our interest payment obligations in the event that interest rates rise dramatically; and

limiting our flexibility in planning for, or reacting to, changes in our businesses and our industries.

These credit facilities impose restrictions on Monoprice and TaxACT, including restrictions on their ability to create liens on their assets and on our ability to incur indebtedness, and require Monoprice and TaxACT to maintain compliance with specified financial ratios. Their ability to comply with these ratios may be affected by events beyond their control. In addition, these credit facilities include covenants, the breach of which may cause the outstanding indebtedness to be declared immediately due and payable. These debts, and our ability to repay them, may also negatively impact our ability to obtain additional financing in the future and may affect the terms of any such financing.

We or our subsidiaries may incur additional debt in the future to finance additional acquisitions or for other purposes. Such debt may result in risks similar to those discussed above related to the Monoprice and TaxACT debts, or in other risks specific to the credit agreements entered into for those debts.

Existing cash and cash equivalents, short-term investments, and cash generated from operations may not be sufficient to meet our anticipated cash needs for servicing debt, working capital and capital expenditures.

Although we believe that existing cash and cash equivalents, short-term investments, and cash generated from operations will be sufficient to meet our anticipated cash needs for servicing debt, working capital, and capital expenditures for at least the next 12 months, the underlying levels of revenues and expenses that we project may not prove to be accurate. In March 2013, we sold \$201.25 million aggregate principal amount of 4.25% Convertible Senior Notes due 2019. In addition, as of December 31, 2013, Monoprice and TaxACT had \$50.0 million and \$71.4 million outstanding, respectively, under the credit agreements entered into in November 2013 and August 2013, respectively. Servicing these debts will require the dedication of a portion of our expected cash flow from operations, thereby reducing the amount of our cash flow

Edgar Filing: BLUCORA, INC. - Form 10-K

available for other purposes. In addition, our ability to make scheduled payments of the principal of, to pay interest on, or to refinance our indebtedness depends on our future performance, which is subject to economic, financial, competitive, and other factors beyond our control. Our businesses may not continue to generate cash flow from operations in the future sufficient to service our debt and make necessary capital expenditures. If we are unable to generate such cash flow, we may be required to adopt one or more alternatives, such as selling assets, restructuring debt, or obtaining additional equity capital on terms that may be onerous or highly dilutive. Our ability to refinance our

Table of Contents

indebtedness will depend on the capital markets and our financial condition at such time. We may not be able to engage in any of these activities or engage in these activities on desirable terms, which could result in a default on our debt obligations.

In addition, we evaluate acquisitions of businesses, products, or technologies from time to time. Any such transactions, if completed, may use a significant portion of our cash balances and marketable investments. If we are unable to liquidate our investments when we need liquidity for acquisitions or for other business purposes, we may need to change or postpone such acquisitions or find alternative financing for such acquisitions. We may seek additional funding through public or private financings, through sales of equity, or through other arrangements. Our ability to raise funds may be adversely affected by a number of factors, including factors beyond our control, such as economic conditions in the markets in which we operate and increased uncertainty in the financial, capital, and credit markets. Adequate funds may not be available when needed or may not be available on favorable terms. If we raise additional funds by issuing equity securities, dilution to existing stockholders may result. If funding is insufficient at any time in the future, we may be unable, or delayed in our ability, to develop or enhance our products or services, take advantage of business opportunities, or respond to competitive pressures, any of which could harm our business.

If others claim that our services infringe their intellectual property rights, we may be forced to seek expensive licenses, reengineer our services, engage in expensive and time-consuming litigation, or stop marketing and licensing our services.

Companies and individuals with rights relating to the technology and consumer electronics industries have frequently resorted to litigation regarding intellectual property rights. In some cases, the ownership or scope of an entity's or person's rights is unclear and may also change over time, including through changes in U.S. or international intellectual property laws or regulations or through court decisions or decisions by agencies or regulatory boards that manage such rights. These parties have in the past, and may in the future, make claims against us alleging infringement of patents, copyrights, trademarks, trade secrets, or other intellectual property or proprietary rights, or alleging unfair competition or violations of privacy or publicity rights. Responding to any such claims could be time-consuming, result in costly litigation, divert management's attention, cause product or service release delays, require us to remove or redesign our products or services, require us to pay damages for infringement, or require us to enter into royalty or licensing agreements. Our technology, services, and products may not be able to withstand any third-party claims or rights against their use. If a successful claim of infringement was made against us and we could not develop non-infringing technology or content, or license the infringed or similar technology or content on a timely and cost-effective basis, our business could suffer.

We do not regularly conduct patent searches to determine whether the technology used in our products or services infringes patents held by third parties. Patent searches may not return every issued patent or patent application that may be deemed relevant to a particular product or service. It is therefore difficult to determine, with any level of certainty, whether a particular product or service may be construed as infringing a current or future U.S. or foreign patent.

We rely heavily on our technology and intellectual property, but we may be unable to adequately or cost-effectively protect or enforce our intellectual property rights, thus weakening our competitive position and negatively impacting our business and financial results. We may have to litigate to enforce our intellectual property rights, which can be time consuming, expensive, and difficult to predict.

To protect our rights in our services and technology, we rely on a combination of copyright and trademark laws, patents, trade secrets, confidentiality agreements with employees and third parties, and protective contractual provisions. We also rely on laws pertaining to trademarks and domain names to protect the value of our corporate brands and reputation. Despite our efforts to protect our proprietary rights, unauthorized parties may copy aspects of our services or technology, obtain and use information, marks, or technology that we regard as proprietary, or otherwise violate or infringe our intellectual property rights. In addition, it is possible that others could independently develop substantially equivalent intellectual property. If we do not effectively protect

Table of Contents

our intellectual property, or if others independently develop substantially equivalent intellectual property, our competitive position could be weakened.

Effectively policing the unauthorized use of our services and technology is time-consuming and costly, and the steps taken by us may not prevent misappropriation of our technology or other proprietary assets. The efforts we have taken to protect our proprietary rights may not be sufficient or effective, and unauthorized parties may obtain and use information, marks, or technology that we regard as proprietary, copy aspects of our services, or use similar marks or domain names. In some cases, the ownership or scope of an entity's or person's rights is unclear and may also change over time, including through changes in U.S. or international intellectual property laws or regulations or through court decisions or decisions by agencies or regulatory boards that manage such rights. Our intellectual property may be subject to even greater risk in foreign jurisdictions, as protection is not sought or obtained in every country in which our services and technology are available and it is often more difficult and costly to obtain, register, or enforce our rights in foreign jurisdictions.

We may have to litigate to enforce our intellectual property rights, to protect our trade secrets, or to determine the validity and scope of others' proprietary rights, which are sometimes not clear or may change. Litigation can be time consuming and expensive, and the outcome can be difficult to predict.

Legislation and regulation may impact our business operations, restrict our opportunities, increase our costs, and create potential liability.

All of our businesses are subject to laws and regulations relating to how they conduct their operations and we anticipate that additional applicable laws and regulations will be enacted in the future. Many of these laws and regulations restrict the operations and opportunities of our businesses and result in compliance costs. In addition, interpretations of these laws and regulations are not always clear, and failure to comply with them in the manner that a government regulator or court interprets could result in liability. For example, all of our businesses have privacy compliance obligations, and any failure by us to comply with our posted privacy policies, Federal Trade Commission (*FTC*) requirements, or other privacy-related laws and regulations could result in proceedings by the FTC or others, including potential class action litigation, which could potentially have an adverse effect on our business, results of operations, and financial condition. Additional applicable legal and regulatory requirements for each of our businesses are discussed below under the sections of these Risk Factors that are specific to those businesses. It is not possible to predict whether or when additional applicable legislation or regulation may be adopted and certain proposals, if adopted, could materially and adversely affect our business. Our failure or inability to comply with applicable laws and regulations could materially impact our operations and financial results.

Delaware law and our charter documents may impede or discourage a takeover, which could cause the market price of our shares to decline.

We are a Delaware corporation and the anti-takeover provisions of Delaware law impose various impediments to the ability of a third party to acquire us, even if a change of control would be beneficial to our existing stockholders. For example, Section 203 of the Delaware General Corporation Law may discourage, delay, or prevent a change in control by prohibiting us from engaging in a business combination with an interested stockholder for a period of three years after the person becomes an interested stockholder. In addition, our certificate of incorporation and bylaws contain provisions that may discourage, delay, or prevent a third party from acquiring us without the consent of our board of directors, even if doing so would be beneficial to our stockholders. Provisions of our charter documents that could have an anti-takeover effect include:

Edgar Filing: BLUCORA, INC. - Form 10-K

the classification of our board of directors into three groups so that directors serve staggered three-year terms, which may make it difficult for a potential acquirer to gain control of our board of directors;

the requirement for supermajority approval by stockholders for certain business combinations;

the ability of our board of directors to authorize the issuance of shares of undesignated preferred stock without a vote by stockholders;

Table of Contents

the ability of our board of directors to amend or repeal our bylaws;

limitations on the removal of directors;

limitations on stockholders' ability to call special stockholder meetings;

advance notice requirements for nominating candidates for election to our board of directors or for proposing matters that can be acted upon by stockholders at stockholder meetings; and

certain restrictions in our charter on transfers of our common stock designed to preserve our federal net operating loss carryforwards (*NOLs*).

At our 2009 annual meeting, our stockholders approved an amendment to our certificate of incorporation that restricts any person or entity from attempting to transfer our stock, without prior permission from the Board of Directors, to the extent that such transfer would (i) create or result in an individual or entity becoming a five-percent stockholder of our stock, or (ii) increase the stock ownership percentage of any existing five-percent stockholder. This amendment provides that any transfer that violates its provisions shall be null and void and would require the purported transferee to, upon our demand, transfer the shares that exceed the five percent limit to an agent designated by us for the purpose of conducting a sale of such excess shares. This provision in our certificate of incorporation may make the acquisition of Blucora more expensive to the acquirer and could significantly delay, discourage, or prevent third parties from acquiring Blucora without the approval of our board of directors.

If there is a change in our ownership within the meaning of Section 382 of the Internal Revenue Code, our ability to use our NOLs may be severely limited or potentially eliminated.

As of December 31, 2013, we had NOLs of \$643.3 million that will expire primarily over a seven to eleven year period. If we were to have a change of ownership within the meaning of Section 382 of the Internal Revenue Code (defined as a cumulative change of 50 percentage points or more in the ownership positions of certain stockholders owning five percent or more of a company's common stock over a three-year rolling period), then under certain conditions, the amount of NOLs we could use in any one year could be limited to an amount equal to our market capitalization, net of substantial non-business assets, at the time of the ownership change multiplied by the federal long-term tax exempt rate. Our certificate of incorporation imposes certain limited transfer restrictions on our common stock that we expect will assist us in preventing a change of ownership and preserving our NOLs, but there can be no assurance that these restrictions will be sufficient. In addition, other restrictions on our ability to use the NOLs may be triggered by a merger or acquisition, depending on the structure of such a transaction. It is our intention to limit the potential impact of these restrictions, but there can be no guarantee that such efforts will be successful. If we are unable to use our NOLs before they expire, or if the use of this tax benefit is severely limited or eliminated, there could be a material reduction in the amount of after-tax income and cash flow from operations, and it could have an effect on our ability to engage in certain transactions.

If we are unable to hire, retain, and motivate highly qualified employees, including our key employees, we may not be able to successfully manage our business.

Our future success depends on our ability to identify, attract, hire, retain, and motivate highly skilled management, technical, sales and marketing, and corporate development personnel. Qualified personnel with experience relevant to our businesses are scarce and competition to recruit them is intense. If we fail to successfully hire and retain a sufficient number of highly qualified employees, we may have difficulties in supporting or expanding our businesses. Realignments of resources, reductions in workforce, or other operational decisions have created and

Edgar Filing: BLUCORA, INC. - Form 10-K

could continue to create an unstable work environment and may have a negative effect on our ability to hire, retain, and motivate employees.

Our business and operations are substantially dependent on the performance of our key employees. Changes of management or key employees may cause disruption to our operations, which may materially and adversely affect our business and financial results or delay achievement of our business objectives. In addition, if we lose

Table of Contents

the services of one or more key employees and are unable to recruit and retain a suitable successor, we may not be able to successfully and timely manage our business or achieve our business objectives. For example, the success of our Search business is partially dependent on key personnel who have long-term relationships with our Search Customers and distribution partners. There can be no assurance that any retention program we initiate will be successful at retaining employees, including key employees.

Like many technology companies, we use stock options, restricted stock units, and other equity-based awards to recruit and retain senior level employees. With respect to those employees to whom we issue such equity-based awards, we face a significant challenge in retaining them if the value of equity-based awards in aggregate or individually is either not deemed by the employee to be substantial enough or deemed so substantial that the employee leaves after their equity-based awards vest. If our stock price does not increase significantly above the exercise prices of our options, we may need to issue new equity-based awards in order to motivate and retain our executives. We may undertake or seek stockholder approval to undertake other equity-based programs to retain our employees, which may be viewed as dilutive to our stockholders or may increase our compensation costs. Additionally, there can be no assurance that any such programs, or any other incentive programs, we undertake will be successful in motivating and retaining our employees.

Restructuring and streamlining our business, including implementing reductions in workforce, discretionary spending, and other expense reductions, may harm our business.

We have in the past and may in the future find it advisable to take measures to streamline operations and reduce expenses, including, without limitation, reducing our workforce or discontinuing products or businesses. Such measures may place significant strains on our management and employees, and could impair our development, marketing, sales, and customer support efforts. We may also incur liabilities from these measures, including liabilities from early termination or assignment of contracts, potential failure to meet obligations due to loss of employees or resources, and resulting litigation. Such effects from restructuring and streamlining could have a negative impact on our business and financial results.

RISKS RELATED TO OUR SEARCH BUSINESS

We may be unable to compete successfully in the search market.

We face intense competition in the search market. Many of our competitors have substantially greater financial, technical, and marketing resources, larger customer bases, longer operating histories, more developed infrastructures, greater brand recognition, better access to vendors, or more established relationships in the industry than we have. Our competitors may be able to adopt more aggressive pricing policies, develop and expand their product and service offerings more rapidly, adapt to new or emerging technologies and changes in content provider and distribution partner requirements more quickly, achieve greater economies of scale, and devote greater resources to the marketing and sale of their products and services than we can. Some of the companies that we compete with in the search market are currently Search Customers of ours, the loss of any of which could harm our business. In addition, we may face increasing competition for search market share from new search startups, mobile search providers, and social media sites and applications. If we are unable to match or exceed our competitors' marketing reach and customer service experience, our business may not be successful. Because of these competitive factors and due to our relatively small size and financial resources, we may be unable to compete successfully in the search market and, to the extent that these competitive factors apply to other markets that we pursue, in such other markets.

Most of our search services revenue is attributable to Google, and the loss of, or a payment dispute with, Google or any other significant Search Customer would harm our business and financial results.

If Google, Yahoo!, or any future significant Search Customer were to substantially reduce or eliminate the content it provides to us or to our distribution partners, our business results could materially suffer if we are

Table of Contents

unable to establish and maintain new Search Customer relationships, or expand our remaining Search Customer relationships, to replace the lost or disputed revenue. Google accounted for approximately 66% of our total Company revenues in 2013. Yahoo! remains an important partner and contributes to our value proposition as a metasearch provider, but Yahoo!'s percentage of our revenue generally has declined over the course of the past several years, and now constitutes a much less significant source of revenue than Google. We continue to believe that if our Google relationship ended or was impaired, we could replace a portion of the lost revenue with revenue from Yahoo!, but because of the increased importance of Google to our Search operations, and its position as the overwhelming market leader in the search industry, these two Search Customers are no longer interchangeable. In addition, Yahoo! has entered into an agreement with Microsoft's Bing search service, under which Bing provides all of Yahoo!'s algorithmic search results and some of its paid search results. If Yahoo! cannot maintain an agreement with Bing on favorable terms, or if Bing is unable to adequately perform its obligations to Yahoo!, then Yahoo!'s ability to provide us with algorithmic and paid search results may be impaired. If a Search Customer is unwilling to pay us amounts that it owes us, or if it disputes amounts it owes us or has previously paid to us for any reason (including for the reasons described in the risk factors below), our business and financial results could materially suffer.

The success of our Search business depends on our ability to negotiate extensions of our Search Customer agreements on favorable terms. We recently renewed our agreement with Google, which now runs to March 31, 2017. Our agreement with Yahoo! also recently renewed and now runs to December 31, 2014. If we cannot negotiate extensions of our current agreements or new agreements on favorable terms (including revenue share rates, our continued ability to offer combined search results or advertisements from different partners as part of our metasearch service, and other operational aspects of our search services), the financial results of our Search business will suffer.

We may be unable to successfully compete in the search market as the market shifts to mobile search.

Our Search business, and that of most of our distribution partners, is primarily based on searches conducted from browsers and other applications on desktop and laptop computers. As mobile phones, tablets, and other mobile devices increase in popularity, functionality, and usage, mobile searches will constitute an increasing percentage of the search market. Because our Search business has been primarily focused on the desktop and laptop markets, we may have less experience and capability in offering and monetizing mobile search services than our competitors. In addition, because we rely on our Search Customers to provide us with search results and advertisements, our ability to innovate for mobile search and to expand in that market is dependent on the cooperation of, and collaboration with, those Search Customers. Under the terms of our new agreement with Google, which takes effect on April 1, 2014, we will not be offering Google's AdSense for Search on our mobile search services, and this change will require us to increase usage of our other current advertising solutions for mobile and/or find additional mobile advertising solutions and partners. If we cannot develop services and partners that allow us to sufficiently innovate for the mobile search market and if our mobile advertising solutions monetize at a significantly lower level than our desktop advertising solutions, our ability to participate in the market shift to mobile search will be impaired, which will likely have a material adverse effect on our Search business and its financial results.

Failure by us or our search distribution partners to comply with the guidelines promulgated by Google and Yahoo! may cause that Search Customer to temporarily or permanently suspend the use of its content or terminate its agreement with us, or may require us to modify or terminate certain distribution relationships.

If we or our search distribution partners fail to meet the guidelines promulgated by Google or Yahoo! for the use of their content, we may not be able to continue to use their content or provide the content to such distribution partners. Our agreements with Google and Yahoo! give them the ability to suspend the use and the distribution of their content for non-compliance with their requirements and guidelines and, in the case of breaches of certain other provisions of their agreements, to terminate their agreements with us immediately, regardless of whether such breaches could be cured.

Table of Contents

The terms of the Search Customer agreements with Google and Yahoo! and the related guidelines are subject to differing interpretations by the parties. Google and Yahoo! have in the past suspended, and may in the future, suspend their content provided to our websites and the websites of our distribution partners, without notice, when they believe that we or our distribution partners are not in compliance with their guidelines or are in breach of the terms of their agreements. During such suspension we will not receive any revenue from any property of ours or a distribution partner that is affected by the suspended content, and the loss of such revenue could harm our business and financial results.

Additionally, as our business evolves, we expect that the guidelines of Google and Yahoo!, as well as the parties' interpretations of compliance, breach, and sufficient justification for suspension of use of content will change. Both Yahoo! and Google regularly change their guidelines and requirements, both as part of our renegotiation of our agreements with them and generally as they manage their networks of distribution partners. These changes in the guidelines and any changes in the parties' interpretations of those guidelines may result in restrictions on our use of the Google and Yahoo! search services, and may require us to terminate our agreement with distribution partners or forego entering into agreements with distribution partners. The loss or reduction of content that we can use or make available to our distribution partners as a result of suspension, termination, or modification of distribution or Search Customer agreements could have a material adverse effect on our business and financial results.

Restrictions on our ability, and the ability of our search distribution partners, to distribute, market, or offer search-related applications, products, and services may impact our financial results.

A significant portion of our Search revenue is dependent on business models that can be negatively impacted by changes in policies or technology. For example, many of our Search distribution partners distribute applications, extensions, or toolbars that are monetized through the search services that we provide. Our Search Customers require that such applications, extensions, or toolbars, and the distribution of those applications, extensions, or toolbars, comply with certain guidelines. Our Search Customers can and do modify these guidelines from time to time, and recent modifications of these guidelines may impact the distribution of applications, extensions, or toolbars that drive traffic and revenue to our search services. In addition, our Search Customers' guidelines have in the past, and may in the future, negatively affected our ability, and the ability of our Search distribution partners, to drive traffic to our Search services through the use of online marketing.

Further, certain third parties have introduced, and can be expected to continue to introduce, new or updated technologies, applications, and policies that may interfere with the ability of users of search services provided directly by us or by our Search distribution partners to access those services. For example third parties have introduced technologies and applications (including new and enhanced web browsers) that prevent users from downloading the extensions or toolbars provided by some of our Search partners. Those applications may also have features and policies that interfere with the functionality of search boxes embedded within extensions and toolbars and the maintenance of home page and other settings previously selected by users.

Any changes in technologies, applications, and policies that restrict the distribution, marketing, and offering of search-related applications, extensions, toolbars, products, and services may impact our operating and financial results.

A substantial portion of our search services revenue is dependent on our relationships with a small number of distribution partners, the loss of which could have a material adverse effect on our business and financial results.

We rely on our relationships with search distribution partners, including Internet service providers, web portals, and software application providers, for distribution of our search services. Approximately 62% of our total revenues for 2013 came from searches conducted by end users on the web properties of our search distribution partners, and approximately 25% of our total revenues for the year came from searches

conducted by end users on

Table of Contents

the web properties of our top five distribution partners. Our agreements with many of our distribution partners come up for renewal in 2014, and some of our distributors have the right to immediately terminate their agreements in the event of certain breaches or events. There can be no assurance that these relationships will continue or will be renewed on terms that are as favorable as current terms. If we are unable to maintain relationships with our distribution partners on favorable terms, our business and financial results could be materially adversely affected.

A significant percentage of our Search business's revenue is generated by our distribution partner network. Given the nature of our relationships with our distribution partners, we have limited insight into the methods that our partners use to drive search traffic, which may result in unanticipated volatility in our financial results.

We operate a distribution partner network of greater than 100 distribution partners, which generates the majority of our Search revenue. We have contractual relationships with each partner in the network, but many of these relationships are not exclusive and may not provide us with the ability to have full insight into the methods that our partners use to drive search traffic or their business models. As a result, partners can vary their traffic serviced by our search services, and we may not be able to foresee or control this variation. Additionally, our ability to grow our revenue depends on both our ability to attract new distribution partners and retain existing distribution partners and on our partners' ability to acquire and retain new users that use our search services. For example, a distribution partner may increase or decrease marketing initiatives in ways that we did not predict, and if that partner's traffic is significantly correlated to marketing, such increase or decrease in marketing may result in a significant increase or decrease in search traffic. Without full insight into a partner's business model and related revenue drivers, our ability to accurately predict the traffic driven, and revenue generated, by that partner is limited, in part, to historical patterns. The historical revenue patterns of partners may not be consistent with actual and forecasted results due to unknown factors that impact the partner's business model and/or any related changes to such model.

If advertisers perceive that they are not receiving quality traffic to their sites through their paid-per-click advertisements, they may reduce or eliminate their advertising through the Internet, which could have a negative material impact on our business and financial results.

Most of our revenue from our Search business is based on the number of clicks on paid search results that are served on our web properties or those of our distribution partners. Each time a user clicks on a paid search result, the Search Customer that provided the paid search result receives a fee from the advertiser who paid for the click and the Search Customer pays us a portion of that fee. If the click originated from one of our distribution partners' web properties, we share a portion of the fee we receive with such partner. If an advertiser receives what it perceives to be poor quality traffic, meaning that the advertiser's objectives are not met for a sufficient percentage of clicks for which it pays, the advertiser may reduce or eliminate its advertisements through the Search Customer that provided the commercial search result to us. This leads to a loss of revenue for our Search Customers and consequently lower fees paid to us. Also, if a Search Customer perceives that the traffic originating from one of our web properties or the web property of a distribution partner is of poor quality, the Search Customer may discount the amount it charged all advertisers whose paid click advertisements appeared on such website or web property, and accordingly may reduce the amount it pays us. The Search Customer may also suspend or terminate our ability to provide its content through such websites or web properties if such activities are not modified to satisfy the Search Customer's concerns.

Poor quality traffic may be a result of invalid click activity. Such invalid click activity occurs, for example, when a person or automated click generation program clicks on a commercial search result to generate fees for the web property displaying the commercial search result rather than to view the webpage underlying the commercial search result. Some of this invalid click activity is referred to as click fraud. When such invalid click activity is detected, the Search Customer may not charge the advertiser or may refund the fee paid by the advertiser for such invalid clicks. If the invalid click activity originated from one of our distribution partners' web properties or our owned and operated properties, such non-charge or refund of the fees paid by the

Table of Contents

advertisers in turn reduces the amount of fees the Search Customer pays us. Initiatives we undertake to improve the quality of the traffic that we send to our Search Customers may not be successful and, even if successful, may result in loss of revenue in a given reporting period.

We may be subject to liability for our use or distribution of information that we gather or receive from third parties and indemnity protections or insurance coverage may be inadequate to cover such liability.

Our search services obtain content and commerce information from third parties and link users, either directly through our own websites or indirectly through the web properties of our distribution partners, to third-party webpages and content in response to search queries and other requests. These services could expose us to legal liability from claims relating to such third-party content and sites, the manner in which these services are distributed and displayed by us or our distribution partners, or how the content provided by our Search Customers was obtained or provided by our Search Customers. This could subject us to legal liability for such things as defamation, negligence, intellectual property infringement, violation of privacy or publicity rights, and product or service liability, among others. Laws or regulations of certain jurisdictions may also deem some content illegal, which also may expose us to liability. Regardless of the legal merits of any such claims, they could result in costly litigation, be time consuming to defend, and divert management's attention and resources. If there was a determination that we had violated third-party rights or applicable law, we could incur substantial monetary liability, be required to enter into costly royalty or licensing arrangements (if available), or be required to change our business practices. We are also subject to laws and regulations, both in the United States and abroad, regarding the collection and use of end user information and search related data. If we do not comply with these laws and regulations, we may be exposed to legal liability.

Although the agreements by which we obtain content contain indemnity provisions, these provisions may not cover a particular claim or type of claim or the party giving the indemnity may not have the financial resources to cover the claim. Our insurance coverage may be inadequate to cover fully the amounts or types of claims that might be made against us. In addition, we may also have an obligation to indemnify and hold harmless certain of our Search Customers or distribution partners from damages they suffer for such violations under our contracts with them. Implementing measures to reduce our exposure to such claims could require us to expend substantial resources and limit the attractiveness of our services. As a result, these claims could result in material harm to our business. Any liability that we incur as a result of content we receive from third parties could harm our financial results.

Governmental regulation and the application of existing laws may slow business growth, increase our costs of doing business, and create potential liability.

The growth and development of the Internet has led to new laws and regulations, as well as the application of existing laws to the Internet, in both the U.S. and foreign jurisdictions. Application of these laws can be unclear. For example, it is unclear how many existing laws regulating or requiring licenses for certain businesses (such as gambling, online auctions, distribution of pharmaceuticals, alcohol, tobacco, firearms, insurance, securities brokerage, or legal services) apply to search services, online advertising, and our business. The costs of complying or failure to comply with these laws and regulations could limit our ability to operate in our market (including limiting our ability to distribute our services; conduct targeted advertising; collect, use, or transfer user information; or comply with new data security requirements), expose us to compliance costs and substantial liability, and result in costly and time-consuming litigation. It is impossible to predict whether or when any new legislation may be adopted or existing legislation or regulatory requirements will be deemed applicable to us, any of which could materially and adversely affect our business.

The FTC has recommended that search engine providers delineate paid-ranking search results from non-paid results. To the extent that we are required to modify presentation of search results as a result of specific regulations or requirements that may be issued in the future by the FTC or other state or federal agencies or legislative bodies with respect to the nature of such delineation or other aspects of advertising in connection with

Table of Contents

search services, revenue from the affected search engines could be negatively impacted. Addressing these regulations may require us to develop additional technology or otherwise expend significant time and expense.

Due to the nature of the Internet, it is possible that the governments of states and foreign countries might attempt to regulate Internet transmissions, through data protection laws amongst others, or institute proceedings for violations of their laws. We might unintentionally violate such laws, such laws may be modified, and new laws may be enacted in the future. Any such developments (or developments stemming from enactment or modification of other laws) could increase the costs of regulatory compliance for us or force us to change our business practices.

RISKS RELATED TO OUR TAX PREPARATION BUSINESS

The tax preparation market is very competitive, and failure to effectively compete will adversely affect our financial results.

Our TaxACT business operates in a very competitive marketplace. There are many competing software products and online services, including two competitors who have a significant percentage of the software and online service market: Intuit's TurboTax and H&R Block's products and services. Our TaxACT business must also compete with alternate methods of tax preparation, including pencil and paper do-it-yourself return preparation by individual filers and storefront tax preparation services, including both local tax preparers and large chains such as H&R Block, Liberty, and Jackson Hewitt. Finally, our TaxACT business faces the risk that state or federal taxing agencies will offer software or systems to provide direct access for individual filers that will reduce the need for TaxACT's software and services. Our financial results will suffer if we cannot continue to offer software and services that have quality and ease-of-use that are compelling to consumers; market the software and services in a cost effective way; offer ancillary services that are attractive to users; and develop the software and services at a low enough cost to be able to offer them at a competitive price point.

The seasonality of our Tax Preparation business requires a precise development and release schedule and any delays or issues with accuracy or quality may damage our reputation and harm our future financial results.

Our tax preparation software and online service must be ready to launch in final form near the beginning of each calendar year to take advantage of the full tax season. We must update the code for our software and service each year to account for annual changes in tax laws and regulations. Delayed and unpredictable changes to federal and state tax laws and regulations can cause an already tight development cycle to become even more challenging. We must develop our code on a precise schedule that both incorporates all such changes and ensures that the software and service are accurate. If we are unable to meet this precise schedule and we launch our software and service late, we risk losing customers to our competitors. If we cannot develop our software with a high degree of accuracy and quality, we risk errors in the tax returns that are generated. Such errors could result in loss of reputation, lower customer retention, or legal fees and payouts related to the warranty on our software and service.

The hosting, collection, use, and retention of personal customer information and data by our TaxACT business create risk that may harm our business.

Our TaxACT business collects, uses, and retains large amounts of customer personal and financial information, including information regarding income, family members, credit cards, tax returns, bank accounts, social security numbers, and healthcare. Some of this personal customer

Edgar Filing: BLUCORA, INC. - Form 10-K

information is held by third-party vendors that process certain transactions. In addition, as many of our products and services are web-based, the amount of data we store for our users on our servers (including personal information) has been increasing and will continue to increase as we further evolve our businesses. We and our vendors use security technologies to protect transactions and personal information and use security and business controls to limit access and use of personal information. However, individuals or third parties, including rogue employees, contractors, temporary workers, vendors, business partners, or hackers, may be able to circumvent these security and business measures.

Table of Contents

In addition, our clients may access our online tax preparation services from their computers and mobile devices, install and use our tax preparation software on their computers and mobile devices, and access online banking services from their computers and mobile devices. Because our business model relies on our clients' use of their own personal computers, mobile devices, and the Internet, computer viruses and other attacks on our clients' personal computer systems and mobile devices could create losses for our clients even without any breach in the security of our systems, and could thereby harm our business and our reputation.

If we are unable to develop, manage, and maintain critical third party business relationships for our TaxACT business, it may be adversely affected.

Our TaxACT business is dependent on the strength of our business relationships and our ability to continue to develop, maintain, and leverage new and existing relationships. We rely on various third party partners, including software and service providers, suppliers, vendors, distributors, contractors, financial institutions, licensing partners, among others, in many areas of this business to deliver our services and products. In certain instances, the products or services provided through these third party relationships may be difficult to replace or substitute, depending on the level of integration of the third party's products or services into, or with, our offerings and/or the general availability of such third party's products and services. In addition, there may be few or no alternative third party providers or vendors in the market. The failure of third parties to provide acceptable and high quality products, services, and technologies or to update their products, services, and technologies may result in a disruption to our business operations, which may reduce our revenues and profits, cause us to lose customers, and damage our reputation. Alternative arrangements and services may not be available to us on commercially reasonable terms or we may experience business interruptions upon a transition to an alternative partner.

In particular, our TaxACT business has relationships with banks, credit unions or other financial institutions, both as customers and as suppliers of certain critical services we offer to our other customers. If any of these institutions fail, consolidate, stop providing certain services, or institute cost-cutting efforts, our results may suffer and we may be unable to offer those services to our customers.

We may be unable to effectively adapt to changing government regulations relating to tax preparation, which may harm our operating results.

The tax preparation industry is heavily regulated at the state and federal level, and is frequently subject to significant new and revised laws and regulations. The application of these laws and regulations to our businesses is often unclear and compliance with these regulations may involve significant costs or require changes to our business practices. Any changes to our business practices that result from a change to laws or regulations, or from any change in the interpretation of a law or regulation (for example due to a court ruling or an administrative ruling or interpretation), may result in a negative impact on our operating results. We are also required to comply with a variety of IRS and state revenue agency standards in order to successfully operate our tax preparation and electronic filing services. Changes in these requirements, including the required use of specific technologies or technology standards, may significantly increase the costs of providing those services to our customers and may prevent us from delivering a quality product to our customers in a timely manner.

In order to meet regulatory standards, we may be required to increase investment in compliance and auditing functions or new technologies. In addition, government authorities may enact other laws, rules or regulations that place new burdens or restrictions on our business or determine that our operations are directly subject to existing rules or regulations, such as requirements related to data collection, use, transmission, retention, processing and security, which may make our business more costly, less efficient or impossible to conduct, and may require us to modify our current or future products or services, which may harm our future financial results.

Table of Contents

Restrictions on our ability to offer certain financial products related to our tax preparation services may harm our financial results.

We offer certain financial products related to our tax preparation software and services, and we generate some of our Tax Preparation segment revenue from such products. These products include prepaid debit cards on which a tax filer may receive his or her tax return and the ability of certain of our users to have the fees for our services deducted from their tax return. Any regulation of these products by state or federal governments, or any competing products offered by state and federal tax collection agencies could impact our revenue from these financial products. In addition, litigation brought by consumers or state or federal agencies relating to these products may result in additional restrictions on the offering of these products. To the extent that any additional restrictions on our tax preparation related financial products restrict our ability to offer such products, our financial results may suffer.

Unanticipated changes in income tax rates, deduction types, or the taxation structure may adversely affect our TaxACT business.

Changes in the way that the state and federal governments structure their taxation regimes may affect our results. The introduction of a simplified or flattened taxation structure may make our services less necessary or attractive to individual filers. We also face risk from the possibility of increased complexity in taxation structures, which may encourage some of our customers to seek professional tax advice instead of using our software or services. In the event that such changes to tax structures cause us to lose market share, our results may suffer.

If our TaxACT business fails to process transactions effectively or fails to adequately protect against disputed or potential fraudulent activities, our revenue and earnings may be harmed.

Our TaxACT business processes a significant volume and dollar value of transactions on a daily basis. Due to the size and volume of transactions that we handle, effective processing systems and controls are essential to ensure that transactions are handled appropriately. Despite our efforts, it is possible that we may make errors or that fraudulent activity may affect our services. In addition to any direct damages and fines that any such problems may create, which may be substantial, a loss of confidence in our controls may seriously harm our business and damage our brand. The systems supporting our business are comprised of multiple technology platforms that are difficult to scale. If we are unable to effectively manage our systems and processes we may be unable to process customer data in an accurate, reliable, and timely manner, which may harm our business.

RISKS RELATED TO OUR E-COMMERCE BUSINESS

The electronics and accessories market is highly competitive, and failure to effectively compete will adversely affect our financial results.

The electronics and accessories market in which our Monoprice business sells products is highly competitive. All of Monoprice's products face competition from many sellers of similar products, some of which are much larger and well-known than Monoprice. We attempt to offer products that provide similar quality and technology as those offered by our competitors, but at a lower price, and we attempt to do so with customer service and support that equals or exceeds that of many of our competitors. Many of our competitors have significant competitive advantages over us that may adversely affect our ability to successfully compete on price, quality, technology, service, or support, including larger scale, advanced research facilities, extensive experience in the industry, proprietary intellectual property, greater financial resources, more advanced and extensive supply chain and distribution capacity, better service and support capability, and stronger relationships with suppliers and resellers. If we are unable to successfully compete on price, quality, technology, service, or support, we may not be able to attract and retain

customers.

We also face competition in attracting the attention of customers in a cost-effective manner. Many of our competitors have better brand recognition, have stronger distribution networks, and spend significantly more than

Table of Contents

us on marketing efforts. Our financial results depend on our ability to effectively attract customers at a cost that allows us to continue to offer low prices and maintain our margins, and if our efforts are not effective and cost-efficient, our financial results will suffer.

If we fail to accurately forecast customer demand, our inventory may either exceed demand or be insufficient to meet demand, which could harm our financial results.

We rely on our supplier network to manufacture our products, and as a result, we must forecast demand for our products well in advance of the sale of those products when placing orders from our suppliers. If our orders exceed eventual demand, we will have excess inventory, which will increase our inventory carrying costs, may increase risk that those products will become obsolete prior to sale, and may result in write-offs and/or significant price reductions of that inventory. If our orders are insufficient to meet demand, we may not be able to adequately replace that inventory to meet all customer orders in a timely manner, resulting in back-orders, potential lost sales, and negative customer experiences. Significant failure to accurately forecast customer demand may thus impact our short- and long-term financial results.

Our ability to be competitive depends on our ability to introduce new and updated products with sufficient speed to satisfy customers and thus maintain and grow our market share.

The electronics and accessories market is subject to frequent new product introductions, rapid advancements in technology, changes in industry standards, and evolving consumer preferences. Many of our electronics and accessories have short life cycles and/or must be updated frequently. Our future success depends on our ability to develop, introduce, and deliver on a timely basis, and in sufficient quantity, new products and enhancements to current products. The success of any new product or any update to a current product will depend on several factors, including our ability to:

Accurately predict features that are compelling to customers;

Acquire or develop technology to incorporate those features in our products;

Ensure that the design of products is appealing to consumers;

Arrange for the manufacture and delivery of a sufficient amount of the products on a timely and cost-effective basis; and

Ensure that the products are of sufficient quality to maintain customer satisfaction.

If we cannot successfully execute on the above factors, our offerings may not match customer demand, with the result that our inventory may become obsolete, we may not be able to maintain or grow sales, our reputation may suffer, and we may be unable to attract and retain customers.

Our ability to maintain and grow market share depends on our ability to offer quality products at price well below the average market price for such products.

We attempt to offer electronics and accessories at a price below our competitors' prices for similar products, while still maintaining similar quality. Our ability to continue to offer quality products at lower prices depends on our ability to adequately source such products at sufficient quality, quantity, and cost and on our ability to keep other operating expenses proportionally low. Because prices for electronics and accessories tend to decline over time, our continued success will depend on our ability to offer some of our products at even lower prices in the future and on our ability to identify new products or product categories that we can offer at similar low prices. If we cannot continue to offer current products, and introduce new products, at such quality, quantity, and low cost, we will be unable to maintain or grow our revenues and our financial results will suffer.

Table of Contents

We depend on international third-party manufacturers to supply our electronics and accessories and risks related to the manufacture and shipping of our products could adversely affect our operations and financial results.

We outsource most of the manufacturing of our electronics and accessories to suppliers in Asia. We rely on the performance of these suppliers, and any problems with such performance could result in cost overruns, delayed deliveries, shortages, poor quality control, intellectual property issues (both theft of our intellectual property and infringement by our suppliers of the intellectual property of others), and compliance issues. Performance problems by our suppliers could result from many events, including the following: suppliers' willful or unintentional breach of supply agreements; their failure to comply with applicable laws and regulations; labor unrest at their facilities; civil unrest; natural or human disasters at production or shipping facilities; equipment or other facility failures; their inability to acquire sufficient quantities or qualities of components or raw materials at expected prices; infrastructure problems in their countries (e.g., power or transportation infrastructure problems); their bankruptcy, insolvency, or other financial problems; and requests or requirements by their other customers that may conflict with our requirements. In addition, because most of our products are shipped from Asia, we face risks related to such shipping, including performance failures by our shipping partners and those of our suppliers, natural disasters, shipping equipment failure, and export and import regulation compliance issues.

The performance of our manufacturers, suppliers, and shippers is largely outside of our control. As the result of any performance failures, we may lose sales, or we may be required to adjust product designs, change production schedules, or develop suitable alternative contract manufacturers, suppliers, or shippers, which could result in delays in the delivery of products to our customers and/or increased costs. Any such delays, disruptions, or quality problems could adversely impact our ability to sell our products, harm our reputation, impair our customer relationships, and adversely affect our operations and financial results.

Our electronics and accessories could experience quality or safety defects that could result in damage to our reputation, require us to provide replacement products, or cause us to institute product recalls.

We expect that all of our electronics and accessories will meet or exceed all applicable standards for quality and safety. We monitor and attempt to address any quality or safety issues during the design and manufacturing processes, but some problems or defects may not be identified until after introduction and shipment of products to consumers. Resolving such problems or defects may result in increased costs related to production and shipment of replacement parts or products, increased customer support requirements, and redesign and manufacture of products. If we are unable to fix defects in a timely manner or adequately address quality control issues, our relationships with our customers may be impaired, our reputation may suffer, and we may lose customers. If the problems or defects result in a significant safety hazard, we may be forced to institute a product recall, resulting in negative publicity, loss of reputation, administrative costs, distraction of personnel from regular duties, and recall, refund, and replacement expenses. In addition, such product recalls may result in disputes with suppliers and customers or lead to adverse proceedings such as arbitration or litigation, which can be costly and expensive.

Product liability claims or regulatory actions could adversely affect our financial results or harm our reputation.

As the seller of consumer products, we face the possibility that there will be claims for losses or injuries caused by some of our products. In addition to the risk of substantial monetary judgments and penalties that could have a material effect on our financial condition and results of operations, product liability claims or regulatory actions could result in negative publicity that could harm our reputation in the marketplace. We also could be required to recall and possibly discontinue the sale of possible defective or unsafe products, which could result in adverse publicity and significant expenses. Although we maintain product liability insurance coverage, potential product liability claims may exceed the amount of coverage or could be excluded under the terms of the policy.

Table of Contents

If our products or operations, or those of our suppliers fail to comply with domestic and international government regulations, or if these regulations result in restrictions on our business, our results could be negatively impacted.

Our products and operations, and the operations of our suppliers and partners, must comply with various domestic and international laws, regulations, and standards, which are complicated and subject to interpretation. Failure by us or our partners to comply with existing or evolving laws or regulations, including export and import restrictions and barriers, or to obtain domestic or foreign regulatory approvals or certificates on a timely basis could result in restrictions on our operations or in our inability to obtain or sell certain products, with the result that our business may be adversely impacted.

We require that all of our suppliers comply with our design and product content specifications, ethical and human rights requirements, applicable laws (including product safety, security, labor, and environmental laws), and otherwise be certified as meeting our supplier code of conduct. While we do conduct a monitoring program to attempt to ensure compliance by our suppliers, our program cannot ensure 100% compliance. Any failure by our suppliers to comply with our supplier code of conduct, or with any other applicable standard, law, or regulation, could result in our inability or unwillingness to continue working with that supplier, additional monitor costs, and/or negative publicity and damage to our brand and reputation.

ITEM 1B. Unresolved Staff Comments

None.

ITEM 2. Properties

Our principal corporate office is located in Bellevue, Washington, as are the operations for our Infospace business. We provide some data center services for our search operations from a third-party co-location facility located in Tukwila, Washington. The headquarters and data center facility for our TaxACT business are in Cedar Rapids, Iowa, and we have a disaster recovery center for our TaxACT business in Waukee, Iowa. The headquarters for our E-Commerce business is in Rancho Cucamonga, California. All of our facilities are leased. We believe our properties are suitable and adequate for our present and anticipated near-term needs.

ITEM 3. Legal Proceedings

See Note 9: Commitments and Contingencies of the Notes to Consolidated Financial Statements in Part II Item 8 of this report for information regarding legal proceedings.

ITEM 4. Mine Safety Disclosures

None.

Table of Contents**PART II****ITEM 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities****Market for Our Common Stock**

Our common stock trades on the NASDAQ Global Select Market under the symbol BCOR. The following table sets forth, for the periods indicated, the high and low sales prices for our common stock as reported by the NASDAQ Global Select Market.

	High	Low
Fiscal year ended December 31, 2013:		
First Quarter	\$ 16.56	\$ 14.44
Second Quarter	\$ 19.11	\$ 14.45
Third Quarter	\$ 23.61	\$ 19.12
Fourth Quarter	\$ 29.82	\$ 22.60
Fiscal year ended December 31, 2012:		
First Quarter	\$ 13.68	\$ 10.99
Second Quarter	\$ 13.45	\$ 10.98
Third Quarter	\$ 18.25	\$ 12.07
Fourth Quarter	\$ 18.24	\$ 14.09

On February 21, 2014, the last reported sale price for our common stock on the NASDAQ Global Select Market was \$19.80 per share.

 Holders

As of February 21, 2014, there were 445 holders of record of our common stock. A substantially greater number of holders are beneficial owners whose shares are held of record by banks, brokers, and other financial institutions.

 Dividends

There were no dividends paid in 2013, 2012, or 2011. We currently intend to retain our earnings to finance future growth and, therefore, do not anticipate paying any cash dividends on our common stock in the foreseeable future.

 Share Repurchases

Edgar Filing: BLUCORA, INC. - Form 10-K

See Note 10: Stockholder's Equity of the Notes to Consolidated Financial Statements for additional information regarding the Company's stock repurchase program. Share repurchase activity during the fourth quarter 2013 was as follows (in thousands, except per share data):

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Approximate Dollar Value of Shares that May Yet be Purchased under the Plans or Programs
October 1 - 31, 2013				
November 1 - 30, 2013				
December 1 - 31, 2013	226	\$ 28.66	226	\$ 40,010
Total	226	\$ 28.66	226	\$ 40,010

Unregistered Sales of Equity Securities

On November 21, 2013, we issued and sold 1.0 million shares of Common Stock to Cambridge Information Group I LLC (*CIG*) and CIG Equity Partners LLC, an entity managed by CIG, upon exercise of a warrant (the *Warrant*) originally issued to CIG in August 2011, for the aggregate exercise price of \$9.62 million, which was paid in cash. These shares were issued in reliance on Section 4(2) of the Securities Act of 1933.

Table of Contents**ITEM 6. Selected Financial Data**

The following selected consolidated financial data should be read in conjunction with Management's Discussion and Analysis of Financial Condition and Results of Operations in Part II Item 7, our consolidated financial statements and notes thereto in Part II Item 8, and other financial information included elsewhere in this report. The selected consolidated statements of operations data and the consolidated balance sheet data are derived from our audited consolidated financial statements.

- (1) For a discussion of activity in 2011 through 2013, see Management's Discussion and Analysis of Financial Condition and Results of Operations in Part II Item 7. In 2010, we recorded a \$19.0 million net gain on a litigation settlement. The net gain allowed us to use a portion of our net operating loss carryforwards resulting in a net income tax expense of \$6.6 million. In 2009, we recorded other-than-temporary impairment charges of \$5.4 million.
- (2) In 2011, we recorded a reversal of \$18.9 million of the valuation allowance related to our deferred tax assets.
- (3) We completed the sale of Mercantila on June 22, 2011. The operating results of this business have been presented as discontinued operations for 2011 and 2010.
- (4) On January 31, 2012, we acquired TaxACT, which generated \$62.1 million of revenue in 2012.
- (5) On August 22, 2013, we acquired Monoprice, which generated \$54.3 million of revenue in 2013.
- (6) During 2013, Monoprice entered into a credit facility agreement, and TaxACT entered into a new credit facility agreement (to replace the one entered into in 2012). These arrangements had total outstanding balances, net of any discounts and including any short-term portion, of \$49.7 million and \$71.4 million, respectively, as of December 31, 2013. During 2012, TaxACT entered into a credit facility agreement, under which \$73.9 million, net of discount and including the short-term portion, was outstanding as of December 31, 2012. During 2013, the Monoprice acquisition resulted in a \$27.7 million deferred tax liability related to intangible assets.

ITEM 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

You should read the following discussion and analysis in conjunction with the Selected Consolidated Financial Data and our consolidated financial statements and notes thereto included elsewhere in this report.

Introduction

Blucora operates a portfolio of leading internet businesses: an internet search business, an online tax preparation business, and an e-commerce business. The Search business, InfoSpace, provides search services to distribution partners' web properties as well as to our owned and operated properties. The Tax Preparation business consists of the operations of TaxACT, which we acquired on January 31, 2012, and provides online tax preparation service for individuals, tax preparation software for individuals and professional tax preparers, and ancillary services. The E-Commerce business consists of the operations of Monoprice, which we acquired on August 22, 2013, and provides self-branded electronics and accessories to both consumers and businesses.

Our Businesses

Search

The majority of our revenues are generated by our Search segment. The InfoSpace search business primarily offers search services through the web properties of its distribution partners, which are generally private-labeled and customized to address the unique requirements of each distribution partner. The search business also distributes aggregated search content through its owned and operated websites, such as Dogpile.com and WebCrawler.com. Our search revenue primarily is derived from search content providers who provide paid search links for display as part of our search services. From these content providers, whom we refer to as our Search Customers, we license rights to certain search products and services, including both non-paid and paid search links. We receive revenues from our Search Customers when an end user of our web search services clicks on a paid search link that is provided by that Search Customer and displayed on one of our owned and operated web properties or displayed on the web property of one of our search distribution partners. Revenues are recognized in the period in which such paid clicks occur and are based on the amounts earned and remitted to us by our Search Customers for such clicks. Our main Search Customer agreements are with Google and Yahoo!. We derive a significant portion of our revenue from Google, and we expect this concentration to continue in the foreseeable future. For the year ended December 31, 2013, Search revenue from Google accounted for approximately 88% of our Search segment revenue and 66% of our total revenue.

Tax Preparation

Our TaxACT business consists of an online tax preparation service for individuals, tax preparation software for individuals and professional tax preparers, and ancillary services. TaxACT generates revenue primarily through its online service at www.taxact.com. The TaxACT business's basic federal tax preparation online software service is "free for everyone," meaning that any taxpayer can use the services to e-file his or her federal income tax return without paying for upgraded services and may do so for every form that the IRS allows to be e-filed. This free offer differentiates TaxACT's offerings from many of its competitors who limit their free software and/or services offerings to certain categories of customers or certain forms. The TaxACT business generates revenue from a percentage of these "free" users who purchase a state form or choose to upgrade for a fee to the Deluxe or Ultimate product, which includes additional support, tools, or state forms in the case of the Ultimate offering. In addition, revenue is generated from the sale of ancillary services, which include, among other things, tax preparation support

Edgar Filing: BLUCORA, INC. - Form 10-K

services, data archive services, bank and/or reloadable pre-paid debit card services, and additional e-filing services. TaxACT is the recognized value player in the digital do-it-yourself space, offering comparable software and/or services at a lower cost to the end user compared to larger competitors. This, coupled with its free for everyone offer, provides TaxACT a valuable marketing position. TaxACT's professional tax preparer software allows professional tax preparers to file individual returns for their clients. Revenue from professional tax preparers historically has constituted a relatively small percentage of the

Table of Contents

TaxACT business's overall revenue and requires relatively modest incremental development costs as the basic software is substantially similar to the consumer-facing software and online service.

On October 4, 2013, TaxACT acquired Balance Financial, a provider of web and mobile-based financial management software through its website www.balancefinancial.com.

E-Commerce

Our E-Commerce business, Monoprice, is an online retailer of self-branded electronics and accessories to both consumers and businesses. Monoprice offers its products for sale through the www.monoprice.com website, where the majority of our E-Commerce revenue is derived, and fulfills those orders from our warehouse in Rancho Cucamonga, California. We also sell our products through distributor, reseller, and marketplace agreements. Monoprice has built a well-respected consumer brand by delivering products with premium quality on par with well-known national brands, selling these products at prices far below the prices for those well-known brands, and providing top-tier service and rapid product delivery. The Monoprice website showcases 14 product categories and over 5,800 individual products. Monoprice has developed an efficient product cost structure that is enabled by a direct import supply chain solution that eliminates traditional layers of mark-ups imposed by intermediaries. Consumers are able to access and purchase products 24 hours a day from the convenience of a computer or a mobile device. Monoprice's team of customer service representatives assists customers primarily by online chat or email. Nearly all sales are to customers located in the United States.

Acquisitions and Dispositions

Monoprice: On August 22, 2013, we acquired Monoprice for \$182.9 million in cash, after a \$0.4 million working capital adjustment in the fourth quarter of 2013. Monoprice is included in our financial results from August 22, 2013, the acquisition date, through December 31, 2013.

TaxACT: On January 31, 2012, we acquired TaxACT for \$287.5 million in cash, less certain transaction expenses, and subject to certain specified working capital adjustments. TaxACT is included in our financial results from January 31, 2012, the acquisition date, through December 31, 2013. Accordingly, the results discussed below were impacted by the timing of this acquisition, in which 2013 included twelve months of results while 2012 included eleven months. In addition, on October 4, 2013, TaxACT acquired Balance Financial.

Mercantila: We sold Mercantila, Inc., an e-commerce company, to Zoo Stores, Inc. on June 22, 2011 for \$0.3 million upon completion of the sale plus the right to receive additional consideration of up to \$3.0 million contingent on liquidity or other events.

Seasonality

Our Tax Preparation segment is highly seasonal, with the significant majority of its annual revenue earned in the first four months of our fiscal year. During the third and fourth quarters, the Tax Preparation segment typically reports losses because revenue from the segment is minimal while core operating expenses continue at relatively consistent levels. Revenue from our E-Commerce segment also is seasonal, with revenues

Edgar Filing: BLUCORA, INC. - Form 10-K

historically being the lowest in the second quarter, a period that does not include consumer back-to-school or holiday-related spending. We anticipate that these seasonal effects will continue in the foreseeable future.

Comparability

We revised certain amounts for the year ended December 31, 2012 from the amounts previously reported in that period's annual report on Form 10-K. We reclassified credit card fees previously reported in Services cost of revenue to Sales and marketing expense. The reclassification had no effect on our reported revenues, operating income, or cash flows for the year ended December 31, 2012. The comparable amount in 2011 was not material and, as a result, was not reclassified. Refer to Note 1: The Company and Basis of Presentation of the Notes to Consolidated Financial Statements in Part II Item 8 of this report.

Table of Contents**RESULTS OF OPERATIONS****Summary****(In thousands, except percentages)**

	Years ended December 31,				
	2013	Percentage Change	2012	Percentage Change	2011
Services revenue	\$ 519,677	28%	\$ 406,919	78%	\$ 228,813
Product revenue, net	\$ 54,303	100%			
Total revenues	\$ 573,980	41%	\$ 406,919	78%	\$ 228,813
Operating income	\$ 74,449	68%	\$ 44,205	106%	\$ 21,479

Year ended December 31, 2013 compared with year ended December 31, 2012

Total revenues increased \$167.1 million due to an increase of \$83.7 million in revenue related to our Search business driven by increases in revenue from distribution partners and owned and operated web properties, an increase of \$29.1 million in our Tax Preparation business primarily due to the timing of the acquisition and, to a lesser extent, revenue growth in 2013, and the addition of \$54.3 million in product revenue related to Monoprice.

Operating income increased \$30.2 million due to the \$167.1 million increase in revenue, partially offset by a \$136.9 million increase in operating expenses. Key changes in operating expenses were:

\$63.3 million increase in the Search segment's operating expenses primarily as a result of higher Search distribution revenue in that segment and the resulting revenue share to our distribution partners and spending on our online marketing.

\$18.6 million increase in the Tax Preparation segment's operating expenses primarily due to the timing of the TaxACT acquisition.

\$49.3 million increase in the E-Commerce segment's operating expenses due to the acquisition of Monoprice in 2013.

\$5.7 million increase in corporate-level expense activity, primarily as a result of amortization expense associated with the acquisitions of Monoprice and TaxACT and higher personnel expenses due to increased headcount to support operations. This was offset by lower stock-based compensation due to \$5.2 million in expense recognized in 2012 related to the modification of the Warrant and the vesting of non-employee stock options upon completion of the TaxACT acquisition (for further detail on both items see Note 11: Stock-Based Compensation of the Notes to Consolidated Financial Statements in Part II Item 8 of this report).

Year ended December 31, 2012 compared with year ended December 31, 2011

Total revenues increased \$178.1 million due to an increase of \$116.0 million in revenue related to our Search business primarily due to growth in revenue from distribution partners and the addition of \$62.1 million of revenue related to our acquisition of TaxACT.

Edgar Filing: BLUCORA, INC. - Form 10-K

Operating income increased \$22.7 million due to the \$178.1 million increase in revenue, partially offset by a \$155.4 million increase in operating expenses. Key changes in operating expenses were:

\$100.0 million increase in the Search segment's operating expenses primarily as a result of higher Search revenue generated from distribution partners in that segment and the resulting revenue share to our distribution partners.

\$32.1 million increase in the Tax Preparation segment's operating expenses due to the acquisition of TaxACT in 2012.

Table of Contents

\$23.3 million increase in corporate-level expense activity, primarily as a result of increased stock-based compensation and amortization expense associated with the TaxACT acquisition.

SEGMENT REVENUE/OPERATING INCOME

The revenue and operating income amounts in this section are presented on a basis consistent with accounting principles generally accepted in the U.S. (*GAAP*) and include certain reconciling items attributable to each of the segments. Segment information appearing in Note 12: Segment Information of the Notes to Consolidated Financial Statements in Part II Item 8 of this report is presented on a basis consistent with our current internal management financial reporting. We do not allocate certain general and administrative costs (including personnel and overhead costs), stock-based compensation, depreciation, amortization of intangible assets, other loss, net, and income tax expense to segment operating results. We analyzed these separately.

Following the acquisitions of TaxACT and Monoprice, we determined that we have three reportable segments: Search, Tax Preparation, and E-Commerce.

Search

(In thousands, except percentages)

	Years Ended December 31,				
	2013	Percentage Change	2012	Percentage Change	2011
Revenue	\$ 428,464	24%	\$ 344,814	51%	\$ 228,813
Operating income	\$ 82,504	33%	\$ 62,185	35%	\$ 46,206
Segment margin	19%		18%		20%

Search revenue: Our ability to increase search revenue is dependent on our ability to attract and retain distribution partners and users of our owned and operated properties, which relies on providing a satisfying end user experience. In addition, providing an attractive monetization proposition, as well as support and service, for distribution partners, continues to be a key driver in our ability to grow distribution revenue.

Search operating income: Because we share revenue with our distribution partners, the Search segment's cost of revenue will increase if search services revenue generated through our distribution partners' web properties increases. The cost of revenue also can be impacted by the mix of revenue generated by our distribution partners. In addition, we manage our online marketing by projecting a desired return on our marketing expenditures and attempting to market according to that projected return.

The following table presents our Search revenue by source and as a percentage of total Search revenue (in thousands, except for percentages):

	Years ended December 31,					
	2013	Percent of Revenue	2012	Percent of Revenue	2011	Percent of Revenue
Revenue from existing distribution partners (launched prior to the then-current year)	\$ 321,954	75%	\$ 265,709	77%	\$ 169,745	75%

Edgar Filing: BLUCORA, INC. - Form 10-K

Revenue from new distribution partners (launched during the then-current year)	34,332	8%	38,272	11%	11,808	5%
Revenue from distribution partners	356,286	83%	303,981	88%	181,553	80%
Revenue from owned and operated properties	72,178	17%	40,833	12%	47,260	20%
Total Search revenue	\$ 428,464		\$ 344,814		\$ 228,813	

Table of Contents

Year ended December 31, 2013 compared with year ended December 31, 2012

Search revenue increased \$83.7 million primarily due to revenue generated by our distribution partners which increased by \$52.3 million, or 17%, driven by a \$56.2 million increase in revenue from existing partners (defined in table above). The increase in revenue from existing partners was offset by a \$3.9 million decrease in revenue from new partners (defined in table above). We generated 33% and 47% of our search revenue through our top five distribution partners in 2013 and 2012, respectively. The web properties of our top five distribution partners for 2013 generated 42% of our search revenue in 2012. Further contributing to the increase was a \$31.3 million, or 77%, increase in Search revenue generated from our owned and operated properties. The increase was primarily due to continued investment in online marketing to drive end users to our owned and operated properties.

Search operating income increased \$20.3 million primarily due to the increase in revenue, offset by an increase of \$63.3 million in operating expenses. Search services cost of revenue increased \$35.7 million, or 15%, primarily driven by the increase in distribution revenue and the resulting revenue share to our distribution partners. The remaining increase in Search segment operating expenses was primarily due to a \$26.7 million increase in spending on our online marketing, a \$0.9 million increase in data center operations primarily related to moving the data center, and a \$0.7 million increase in sales and marketing personnel expenses in support of our continued marketing initiatives.

Beginning on April 1, 2014, we will no longer display advertisements provided by Google's AdSense for Search for search traffic that originates from mobile and tablet devices. For this mobile and tablet traffic, we instead intend to display mobile advertisements from other sources, including Yahoo!'s ad network. While the impact of this change is limited to a relatively small subset of our current Search business and may be offset partially by the alternative advertising sources, we expect this change will result in slowing of our Search revenue growth rate in 2014.

Year ended December 31, 2012 compared with year ended December 31, 2011

Search revenue increased \$116.0 million primarily due to revenue generated by our distribution partners which increased by \$122.5 million, or 67%, driven by a \$96.0 million increase in revenue from existing partners and by a \$26.5 million increase in revenue from new partners. We generated 47% of our search revenue through our top five distribution partners in both 2012 and 2011. The web properties of our top five distribution partners for 2012 generated 46% of our search services revenue in 2011. Offsetting the increase was a \$6.5 million, or 14%, decrease in Search revenue generated from our owned and operated properties. This decrease was primarily a result of the expected attrition in the installed user base from our 2010 acquisition of Make The Web Better, resulting in fewer paid clicks.

Search operating income increased \$16.0 million primarily due to the increase in revenue, offset by an increase of \$100.0 million in operating expenses. Search services cost of revenue increased \$101.2 million, or 70%, primarily driven by the increase in distribution revenue and the resulting revenue share to our distribution partners. Offsetting the increase in Search services cost of revenue was a net decrease in the remaining operating expenses associated with the Search segment, primarily driven by a \$0.6 million decrease in business taxes.

Table of Contents**Tax Preparation**

The Tax Preparation segment was new in 2012 due to our acquisition of TaxACT. Unless otherwise indicated, figures for the year ended December 31, 2012 reflect the results from January 31, 2012, the acquisition date, through December 31, 2012.

(In thousands, except percentages)	Years ended December 31,		
	2013	Percentage Change	2012
Revenue	\$ 91,213	47%	\$ 62,105
Operating income	\$ 40,599	35%	\$ 30,052
Segment margin	45%		48%

Our ability to generate tax preparation revenue is largely driven by our ability to acquire new users of the service, retain existing users, and upsell users to paid products and services. We also generate revenue through the professional tax preparer software that we sell to professional tax preparers who use it to prepare and file individual returns for their clients. Revenue from the professional tax preparation product is derived in two ways: from per-unit licensing fees for the software and from amounts that we charge to e-file through the software. Revenue from professional tax preparers historically has constituted a relatively small percentage of the overall revenue for the TaxACT business.

We measure our individual tax preparation customers using the number of accepted federal tax e-filings made through our software and services. We refer to such tax filings as e-files. We consider growth in the number of e-files to be the most important non-financial metric in measuring the performance of the tax preparation business. Overall revenue is driven more by growth in e-files than by growth in revenue per user, which historically has grown modestly, because we have not made significant pricing adjustments. Because we acquired the TaxACT business on January 31, 2012, during the course of the 2012 tax season, we believe that presenting e-file metrics covering the same time periods as the financial results presented (and comparable period) would be misleading. Accordingly, we are presenting these metrics for e-filings made during each tax season's filing year through the end of the calendar year as follows (in thousands, except percentages):

	Years ended December 31,				
	2013	Percentage Change	2012	Percentage Change	2011
TaxACT desktop e-files	282	6%	267	0%	267
TaxACT online e-files	5,037	8%	4,661	9%	4,295
TaxACT sub-total e-files	5,319	8%	4,928	8%	4,562
TaxACT Free File Alliance e-files ⁽¹⁾	155	-7%	167	-9%	183
TaxACT total e-files ⁽²⁾	5,474	7%	5,095	7%	4,745

- (1) Free File Alliance e-files are provided as part of an IRS partnership that provides free electronic tax filing services to taxpayers meeting certain guidelines, based on income.
- (2) We redefined e-files in our Form 10-Q for the quarter ended March 31, 2013 to exclude e-filed extensions as we believe this is a more accurate metric in evaluating performance of the Tax Preparation segment. The figures set forth above for 2012 and 2013 reflect this change.

Year ended December 31, 2013 compared with year ended December 31, 2012

Edgar Filing: BLUCORA, INC. - Form 10-K

Tax Preparation revenue increased \$29.1 million primarily due to the timing of the TaxACT acquisition. In addition, consumer tax preparation revenue increased in 2013 due to an increase in e-filings for the year.

Tax Preparation operating income increased \$10.5 million primarily due to the increase in revenue, offset by an increase of \$18.6 million in operating expenses that primarily were related to the timing of the TaxACT acquisition. The increase in operating expenses was amplified further by the fact that a relatively high percentage

Table of Contents

of tax season advertising occurs in January, a month that was included in 2013 results but not in 2012 results due to the timing of the TaxACT acquisition. In addition, personnel expenses increased mainly due to higher headcount supporting sales and marketing and general and administrative functions, while data center expenses grew primarily to support our online service offerings. These operating expense increases were offset by a \$2.4 million decrease in Tax Preparation services cost of revenue primarily related to decreased bank service fees on our bank card product and royalties.

E-Commerce

The E-Commerce segment was new in 2013 due to our acquisition of Monoprice. Unless otherwise indicated, figures for the year ended December 31, 2013 reflect the results from August 22, 2013, the acquisition date, through December 31, 2013.

(In thousands, except percentages)	Year ended December 31, 2013	
Revenue	\$	54,303
Operating income	\$	4,967
Segment margin		9%

The E-Commerce segment generates revenue by importing and selling self-branded consumer electronics and accessories for both consumers and businesses. Substantially all of our products are sold via the internet at www.monoprice.com. E-Commerce revenue growth largely is driven by our ability to increase the number of orders to new and existing consumer and business customers. Because we acquired the Monoprice business during the course of the year, we believe that presenting the percentage increase in the number of orders covering the same time period as the financial results presented (and comparable period) would not accurately reflect segment results of operations. Accordingly, we are presenting this metric for the entire calendar year and the comparable prior period as follows:

	Years ended December 31,	
	2013	2012
Order Number Growth	15%	13%

Our gross profit consists of net sales less the cost of sales. Our cost of sales includes the product cost, outbound shipping and handling costs, packaging supplies, and provisions for inventory obsolescence. Shipping charges to receive products from our suppliers are included in our inventory and recognized as cost of revenues upon sale of products to our customers. Our gross profit margin has been consistent historically, and we expect it to continue to remain consistent based primarily on our efficient product cost structure enabled by a direct import supply solution.

The remaining operating expenses primarily consist of personnel expenses (which include salaries, stock-based compensation, benefits, and other employee-related costs) related to personnel engaged in sales and marketing (including fulfillment which includes purchasing, customer and technical support, receiving, inspection, and warehouse functions) and general and administrative activities, as well as marketing costs, credit card fees, temporary help, contractors, and facility costs.

The pro forma segment margin, excluding the impacts of purchase accounting, for fiscal year 2013 and 2012 was 12% and 11%, respectively.

Table of Contents**Corporate-Level Activity**

(In thousands)	Years ended December 31,				
	2013	Change	2012	Change	2011
Operating expenses	\$ 13,829	\$ 2,031	\$ 11,798	\$ 2,215	\$ 9,583
Stock-based compensation	11,527	(1,696)	13,223	5,535	7,688
Depreciation	4,476	664	3,812	(1,049)	4,861
Amortization of intangible assets	23,789	4,590	19,199	16,604	2,595
Total corporate-level activity	\$ 53,621	\$ 5,589	\$ 48,032	\$ 23,305	\$ 24,727

Certain corporate-level activity is not allocated to our segments, including certain general and administrative costs (including personnel and overhead costs), stock-based compensation, depreciation, and amortization of intangible assets. For further detail, refer to segment information appearing in Note 12: Segment Information of the Notes to Consolidated Financial Statements in Part II Item 8 of this report.

Year ended December 31, 2013 compared with year ended December 31, 2012

Operating expenses included in corporate-level activity increased primarily due to a \$1.5 million increase in personnel expenses mainly related to increased headcount to support operations.

Stock-based compensation decreased primarily due to \$5.2 million in expense recognized in 2012 related to the modification of the Warrant and the vesting of non-employee stock options upon completion of the TaxACT acquisition, offset by expense of \$0.5 million in 2013 related to stock options that vested upon completion of the Monoprice acquisition (for further detail on both items see Note 11: Stock-Based Compensation of the Notes to Consolidated Financial Statements in Part II Item 8 of this report) as well as higher expense in 2013 related to increased equity award activity, including the issuance of equity awards to Monoprice employees.

Depreciation increased due to depreciation expense on fixed assets attributable to Monoprice.

Amortization of intangible assets increased primarily due to amortization expense related to intangibles acquired as part of the Monoprice acquisition and, to a lesser extent, amortization expense related to TaxACT intangibles due to the timing of the TaxACT acquisition.

Year ended December 31, 2012 compared with year ended December 31, 2011

Operating expenses included in corporate-level activity increased primarily due to a \$1.4 million increase in personnel expenses mainly related to increased headcount to support operations and a combined increase of \$0.9 million in professional service fees mainly related to the TaxACT acquisition, contractor fees to augment our staff, and public relations fees.

Edgar Filing: BLUCORA, INC. - Form 10-K

Stock-based compensation increased primarily due to expenses of \$4.3 million and \$0.9 million recorded in the first quarter of 2012 related to the modification of the Warrant and the vesting of non-employee stock options, respectively, upon completion of the TaxACT acquisition. Stock-based compensation of \$1.9 million was recorded in 2011 related to the Warrant issuance. For further detail see Note 11: Stock-Based Compensation of the Notes to Consolidated Financial Statements in Part II Item 8 of this report. The remaining difference is primarily due to stock-based compensation associated with grants to TaxACT employees subsequent to the acquisition.

Depreciation decreased primarily due to a decrease in depreciation associated with the data center.

Amortization of intangible assets increased primarily due to amortization expense of \$18.4 million related to TaxACT intangibles acquired, offset by a \$1.8 million decrease in amortization expense associated with our installed code base technology for Make The Web Better (which we acquired in 2010), which is amortized proportional to expected revenue.

Table of Contents**OPERATING EXPENSES****Cost of Revenues**

(In thousands, except percentages)

	Years Ended December 31,				
	2013	Change	2012	Change	2011
Services cost of revenue	\$ 302,279	\$ 36,334	\$ 265,945	\$ 110,983	\$ 154,962
Product cost of revenue	38,181	38,181			
Total cost of revenues	\$ 340,460	\$ 74,515	\$ 265,945	\$ 110,983	\$ 154,962
Percentage of revenues	59%		65%		68%

We record the cost of revenues for services and products when the related revenue is recognized. Services cost of revenue consists of costs related to Search and Tax Preparation segments, which includes revenue sharing arrangements with our distribution partners, usage-based content fees, royalties, and bank product service fees. In addition, services cost of revenue includes costs associated with the operation of the data centers that serve our Search and Tax Preparation businesses, which include personnel expenses (including salaries, stock-based compensation, benefits, and other employee-related costs), depreciation, and amortization of intangibles. Product cost of revenue consists of costs related to our E-Commerce segment, which includes product costs, inbound and outbound shipping and handling costs, packaging supplies, and provisions for inventory obsolescence.

Year ended December 31, 2013 compared with year ended December 31, 2012

Services cost of revenue increased primarily due to increased Search services cost of revenue of \$35.7 million driven by the increase in revenue generated from distribution partners and the resulting revenue share to our distribution partners, \$2.8 million increase in data center operations primarily due to the timing of the TaxACT acquisition and higher personnel expenses from increased headcount to support our online service offering, and, to a lesser extent, increased data center expenses related to the migration of the Search data center to the cloud in 2013. These increases were offset by a \$2.4 million decrease in Tax Preparation services cost of revenue primarily related to decreased bank service fees on our bank card product and royalties.

Product cost of revenue represents costs related to Monoprice.

Year ended December 31, 2012 compared with year ended December 31, 2011

Services cost of revenue increased primarily due to increased Search services cost of revenue of \$101.2 million driven by the increase in revenue generated from distribution partners and the resulting revenue share to our distribution partners, in addition to increases in Tax Preparation services cost of revenue of \$3.2 million and data center operations of \$2.5 million, related to the TaxACT acquisition. In addition, amortization expense increased \$5.0 million of which \$6.8 million related to TaxACT intangibles acquired, offset by a \$1.8 million decrease in amortization expense associated with our installed code base technology for Make The Web Better which is amortized proportional to expected revenue. The above increases were offset by a \$1.0 million decrease in depreciation expense related to the Search data center.

Engineering and Technology

(In thousands, except percentages)

	2013	Years ended December 31,		2011
		Change	2012	Change
Engineering and technology	\$ 11,682	\$ 1,713	\$ 9,969	\$ 7,158
Percentage of revenues	2%		3%	3%

Engineering and technology expenses are associated with the research, development, support, and ongoing enhancements of our offerings, including personnel expenses (which include salaries, stock-based compensation,

Table of Contents

benefits, and other employee-related costs), as well as the cost of temporary help and contractors to augment our staffing, software support and maintenance, bandwidth and hosting, and professional service fees.

Year ended December 31, 2013 compared with year ended December 31, 2012

Engineering and technology expenses increased, of which \$1.4 million was attributable to Monoprice, the majority of which was personnel-related.

Year ended December 31, 2012 compared with year ended December 31, 2011

Engineering and technology expenses increased primarily due to a \$2.5 million increase in personnel expenses attributable to TaxACT.

Sales and Marketing

(In thousands, except percentages)

	Years ended December 31,				
	2013	Change	2012	Change	2011
Sales and marketing	\$ 98,682	\$ 53,038	\$ 45,644	\$ 24,134	\$ 21,510
Percentage of revenues	17%		11%		9%

Sales and marketing expenses consist principally of marketing expenses associated with our TaxACT and Monoprice websites (which include television, radio, online display, text, and email channels), our owned and operated web search properties (which consist of traffic acquisition, including our online marketing fees paid to search engines to drive traffic to an owned and operated website, agency fees, brand promotion expense, and market research expense), personnel expenses (which include salaries, stock-based compensation, benefits, and other employee-related costs) for personnel engaged in marketing and selling activities, and fulfillment expenses primarily associated with our E-Commerce business. Fulfillment expenses include direct operating expenses (including personnel) relating to our purchasing, customer and technical support, receiving, inspection and warehouse functions, as well as the cost of temporary help and contractors, and credit card processing fees.

Year ended December 31, 2013 compared with year ended December 31, 2012

Sales and marketing expenses increased primarily due to a \$44.3 million increase in marketing expenses, a \$6.0 million increase in personnel expenses, and a \$2.2 million increase in credit card processing fees. The increase in marketing expenses was driven by increased online marketing by our Search segment, the timing of the TaxACT acquisition further amplified by the fact that a relatively high percentage of tax season marketing occurs in January, a month that was included in 2013 results but not in 2012 results, and, to a lesser extent, the sales and marketing expense of Monoprice. Personnel expenses increased primarily due to Monoprice and, to a lesser extent, increased headcount in support of our Search and Tax Preparation businesses. Lastly, the increase in credit card processing fees was primarily attributable to Monoprice and, to a lesser extent, the timing of the TaxACT acquisition.

Edgar Filing: BLUCORA, INC. - Form 10-K

Year ended December 31, 2012 compared with year ended December 31, 2011

Sales and marketing expenses increased primarily due to a \$17.5 million increase in marketing expenses, a \$3.2 million increase in personnel expenses, and a \$1.5 million increase in credit card processing fees, mainly attributable to TaxACT. In addition, personnel expenses increased \$1.3 million primarily due to increased headcount as well as bonuses due to revenue generated by our distribution partners.

Table of Contents**General and Administrative**

(In thousands, except percentages)

	Years ended December 31,				
	2013	Change	2012	Change	2011
General and administrative	\$ 29,847	\$ 2,429	\$ 27,418	\$ 5,876	\$ 21,542
Percentage of revenues	5%		7%		9%

General and administrative (**G&A**) expenses consist primarily of personnel expenses (which include salaries, stock-based compensation, benefits, and other employee-related costs), as well as the cost of temporary help and contractors to augment our staffing, professional service fees (which include legal, audit, and tax fees), general business development and management expenses, occupancy and general office expenses, and taxes and insurance expenses.

Year ended December 31, 2013 compared with year ended December 31, 2012

G&A expenses increased primarily due to a \$0.5 million increase in personnel expenses, consisting of a \$2.9 million increase in salaries, benefits, and other employee-related costs attributable to increased corporate and TaxACT headcount in the current year to support operations as well as increased headcount with the Monoprice acquisition, offset by a \$2.4 million net decrease in stock-based compensation. The \$2.4 million net decrease in stock-based compensation included \$5.2 million in expense recognized in 2012 related to the modification of the Warrant and the vesting of non-employee stock options upon completion of the TaxACT acquisition, offset by expense of \$0.5 million in 2013 related to stock options that vested upon completion of the Monoprice acquisition (for further detail on both items see Note 11: Stock-Based Compensation of the Notes to Consolidated Financial Statements in Part II Item 8 of this report) as well as higher expense in 2013 related to increased equity award activity, including the issuance of equity awards to Monoprice employees. The remaining increase in G&A expenses related to non-personnel expenses attributable to Monoprice, increases in professional services, and, to a lesser extent, non-personnel expenses attributable to TaxACT due to the timing of the TaxACT acquisition.

Year ended December 31, 2012 compared with year ended December 31, 2011

G&A expenses increased primarily due to a \$5.4 million increase in personnel expenses attributable to increased stock-based compensation of \$3.3 million, consisting of \$4.3 million and \$0.9 million recorded in the first quarter of 2012 related to modification of the Warrant and the vesting of non-employee stock options, respectively, due to the TaxACT acquisition. Stock-based compensation of \$1.9 million was recorded in 2011 related to the Warrant issuance. For further detail see Note 11: Stock-Based Compensation of the Notes to Consolidated Financial Statements in Part II Item 8 of this report. The remaining increase in personnel expenses was primarily due to a \$1.2 million increase in personnel costs related to the TaxACT acquisition and a \$0.9 million increase in salaries and benefits due to an increase in headcount and bonus related expenses.

Depreciation and Amortization of Intangible Assets

(In thousands, except percentages)

	Years ended December 31,				
	2013	Change	2012	Change	2011
Depreciation	\$ 2,739	\$ 620	\$ 2,119	\$ (43)	\$ 2,162
Amortization of intangible assets	16,121	4,502	11,619	11,619	

Edgar Filing: BLUCORA, INC. - Form 10-K

Total depreciation and amortization of intangible assets	\$ 18,860	\$ 5,122	\$ 13,738	\$ 11,576	\$ 2,162
Percentage of revenues	3%		3%		1%

Depreciation of property and equipment includes depreciation of computer equipment and software, office equipment and furniture, and leasehold improvements not recognized in cost of revenues. Amortization of definite-lived intangible assets primarily includes the amortization of customer relationships, which are amortized over their estimated lives.

Table of Contents

Year ended December 31, 2013 compared with year ended December 31, 2012

Depreciation increased due to depreciation expense on fixed assets attributable to Monoprice.

Amortization of intangible assets increased primarily due to amortization expense related to intangibles acquired as part of the Monoprice acquisition and, to a lesser extent, amortization expense related to TaxACT intangibles due to the timing of the TaxACT acquisition.

Year ended December 31, 2012 compared with year ended December 31, 2011

Amortization of intangible assets increased due to the amortization of intangible assets acquired as part of the TaxACT acquisition.

Other Loss, Net

(In thousands)	Years ended December 31,				
	2013	Change	2012	Change	2011
Interest income	\$ (300)	\$ (169)	\$ (131)	\$ 238	\$ (369)
Interest expense	9,463	5,941	3,522	3,522	
Amortization of debt issuance costs	1,108	288	820	820	
Accretion of debt discounts	2,838	2,513	325	325	
Loss on debt extinguishment and modification expense	1,593	1,593			
Loss on derivative instrument	11,652	9,306	2,346	2,346	
Impairment of equity investment in privately-held company	3,711	3,711			
Increase (decrease) in fair value of earn-out contingent liability	(300)	(300)		(3,000)	3,000
Gain on contingency resolution				1,500	(1,500)
Other	(142)	63	(205)	(320)	115
Other loss, net	\$ 29,623	\$ 22,946	\$ 6,677	\$ 5,431	\$ 1,246

Year ended December 31, 2013 compared with year ended December 31, 2012

The increases in interest expense, amortization of debt issuance costs, and accretion of debt discounts were primarily related to the Monoprice credit facility entered into on November 22, 2013 and the Convertible Senior Notes issued on March 15, 2013, offset by slight decreases in the same categories related to the TaxACT credit facilities.

Loss on debt extinguishment and modification expense was related to the refinancing of the TaxACT credit facility on more favorable terms.

Edgar Filing: BLUCORA, INC. - Form 10-K

On November 21, 2013, the Warrant was exercised to purchase 1.0 million shares of Blucora common stock. The increase in the fair value of the Warrant, driven primarily by an increase in the value of our common stock, during 2013 through the exercise date was \$11.7 million, resulting in a loss on derivative instrument. Refer to Note 5: Fair Value Measurements, Note 7: Derivative Instruments and Hedging Activities, and Note 11: Stock-Based Compensation of the Notes to Consolidated Financial Statements in Part II Item 8 of this report for more information.

In 2013, in connection with a review of our equity method investments for other-than-temporary impairment, we determined that our equity investment in a privately-held company had experienced an other-than-temporary decline in value, due to recurring losses from operations, significant personnel reductions, and a change in the underlying business model. Accordingly, we wrote down the \$3.7 million carrying value of the investment to zero, resulting in a loss.

Table of Contents

Year ended December 31, 2012 compared with year ended December 31, 2011

Interest expense, amortization of debt issuance costs, and accretion of debt discounts related to the 2012 credit facility entered into by TaxACT to finance the TaxACT acquisition. The loss on derivative instrument related to the increase in the fair value of the Warrant, which was classified as a derivative instrument subsequent to its modification triggered on the date of the TaxACT acquisition on January 31, 2012 (see Note 11: Stock-Based Compensation of the Notes to Consolidated Financial Statements in Part II Item 8 of this report).

The financial performance of Make The Web Better, acquired on April 1, 2010, was greater than expected. As a result, the fair value of the related contingent consideration increased, and an additional charge of \$3.0 million was recorded in 2011. Also in 2011, we recorded a gain of \$1.5 million related to the resolution of a contingent liability.

Income Taxes

During 2013, we recorded an income tax expense on continuing operations of \$20.4 million. Income tax differed from the taxes at the statutory rates primarily due to the non-deductible loss on the Warrant derivative (see Note 10: Stockholders Equity of the Notes to Consolidated Financial Statements in Part II Item 8 of this report) and an increase in the valuation allowance against deferred tax assets that were capital in nature.

During 2012, we recorded an income tax expense on continuing operations of \$15.0 million. Income tax differed from the taxes at the statutory rates primarily due to the non-deductible loss on the Warrant derivative and non-deductible stock-based compensation.

During 2011, we recorded an income tax benefit on continuing operations of \$11.3 million. Income tax differed from the taxes at the statutory rates primarily due to a release of the valuation allowance against deferred tax assets not attributable to stock-based compensation.

At December 31, 2013, we had gross temporary differences representing future tax deductions of \$709.2 million, primarily comprised of \$643.3 million of net operating loss carryforwards, which represented deferred tax assets. We applied a valuation allowance against the net operating loss carryforwards and certain other deferred tax assets. If, in the future, we determine that the realization of any additional portion of the deferred tax assets is more likely than not to be realized, we will record a benefit to the income statement or additional paid-in-capital, as appropriate.

Loss from Discontinued Operations and Loss on Sale of Discontinued Operations

On June 22, 2011, we sold our Mercantila e-commerce business to Zoo Stores, Inc. The results of operations from that business are reflected as discontinued operations for all periods presented (in thousands):

Edgar Filing: BLUCORA, INC. - Form 10-K

	Year ended December 31, 2011
Revenue from discontinued operations	\$ 16,894
Loss from discontinued operations before taxes	\$ (3,506)
Income tax benefit	1,253
Loss from discontinued operations, net of taxes	\$ (2,253)
Loss on sale of discontinued operations, net of an income tax benefit of \$5,092	\$ (7,674)

Loss from discontinued operations includes previously unallocated depreciation, amortization, stock-based compensation, income taxes, and other corporate expenses that were attributable to Mercantila.

Table of Contents**NON-GAAP FINANCIAL MEASURES**

Adjusted EBITDA: We define Adjusted EBITDA as net income, determined in accordance with GAAP, excluding the effects of discontinued operations (which includes loss from discontinued operations and loss on sale of discontinued operations, both net of taxes), income taxes, depreciation, amortization of intangible assets, stock-based compensation, and other loss, net (which primarily includes items such as interest income, interest expense, amortization of debt issuance costs, accretion of debt discount, losses on debt extinguishment and modification expense, gains or losses on derivative instrument, other-than-temporary impairment losses on equity investments, and adjustments to the fair values of contingent liabilities related to business combinations).

We believe that Adjusted EBITDA provides meaningful supplemental information regarding our performance. We use this non-GAAP financial measure for internal management and compensation purposes, when publicly providing guidance on possible future results, and as a means to evaluate period-to-period comparisons. We believe that Adjusted EBITDA is a common measure used by investors and analysts to evaluate our performance, that it provides a more complete understanding of the results of operations and trends affecting our business when viewed together with GAAP results, and that management and investors benefit from referring to this non-GAAP financial measure. Items excluded from Adjusted EBITDA are significant and necessary components to the operations of our business and, therefore, Adjusted EBITDA should be considered as a supplement to, and not as a substitute for or superior to, GAAP net income. Other companies may calculate Adjusted EBITDA differently and, therefore, our Adjusted EBITDA may not be comparable to similarly titled measures of other companies. A reconciliation of our Adjusted EBITDA to net income, which we believe to be the most comparable GAAP measure, is presented below (in thousands):

	Years ended December 31,		
	2013	2012	2011
Net income	\$ 24,399	\$ 22,526	\$ 21,594
Discontinued operations			9,927
Depreciation and amortization of intangible assets	28,265	23,011	7,456
Stock-based compensation	11,527	13,223	7,688
Other loss, net	29,623	6,677	1,246
Income tax (benefit) expense	20,427	15,002	(11,288)
Adjusted EBITDA	\$ 114,241	\$ 80,439	\$ 36,623

Year ended December 31, 2013 compared with year ended December 31, 2012

The increase in Adjusted EBITDA was due to increases in segment operating income of \$20.3 million and \$10.5 million related to our Search and Tax Preparation segments, respectively, driven by growth in the Search segment and the timing of the TaxACT acquisition, as well as segment operating income of \$5.0 million for our E-Commerce segment which was new in 2013 due to the Monoprice acquisition. Offsetting the increases in segment operating income was a \$1.5 million increase in corporate personnel expenses not allocated to the segments mainly related to increased headcount to support operations.

Year ended December 31, 2012 compared with year ended December 31, 2011

The increase in Adjusted EBITDA was due to an increase in segment operating income of \$16.0 million related to our Search segment, driven by growth in that segment, as well as segment operating income of \$30.1 million for our Tax Preparation segment which was new in 2012 due to

Edgar Filing: BLUCORA, INC. - Form 10-K

the TaxACT acquisition. Offsetting the increases in segment operating income was a \$1.4 million increase in corporate personnel expenses not allocated to the segments mainly related to increased headcount to support operations and a combined increase of \$0.9 million in professional service fees mainly related to the TaxACT acquisition, contractor fees to augment our staff, and public relations expenses.

Table of Contents

Non-GAAP net income: We define non-GAAP net income differently for this report than we have defined it in the past, due to the refinance of the 2012 credit facility and impairment of equity investment in a privately-held company. For this report, we define non-GAAP net income as net income, determined in accordance with GAAP, excluding the effects of discontinued operations (which includes loss from discontinued operations and loss on sale of discontinued operations, both net of taxes), stock-based compensation, amortization of acquired intangible assets, accretion of debt discount on the Convertible Senior Notes, loss on debt extinguishment and modification expense, gains or losses on derivative instrument, other-than-temporary impairment losses on equity investment, the related cash tax impact of those adjustments, and non-cash income taxes from continuing operations. Non-cash income tax expense represents a reduction to cash taxes payable associated with the utilization of deferred tax assets, which primarily consist of U.S. federal net operating losses. The majority of these deferred tax assets will expire, if unutilized, between 2020 and 2024. Our new definition of non-GAAP net income does not impact presentation of this non-GAAP financial measure for prior periods.

We believe that non-GAAP net income and non-GAAP net income per share provide meaningful supplemental information to management, investors, and analysts regarding our performance and the valuation of our business by excluding items in the statement of operations that we do not consider part of our ongoing operations or have not been, or are not expected to be, settled in cash. Additionally, we believe non-GAAP net income and non-GAAP net income per share are common measures used by investors and analysts to evaluate our performance and the valuation of our business. Non-GAAP net income should be evaluated in light of our financial results prepared in accordance with GAAP and should be considered as a supplement to, and not as a substitute for or superior to, GAAP net income. Other companies may calculate non-GAAP net income differently, and, therefore, our non-GAAP net income may not be comparable to similarly titled measures of other companies. A reconciliation of our non-GAAP net income to net income, which we believe to be the most comparable GAAP measure, is presented below (in thousands, except per share amounts):

	Years ended December 31,		
	2013	2012	2011
Net income	\$ 24,399	\$ 22,526	\$ 21,594
Discontinued operations			9,927
Income from continuing operations	24,399	22,526	31,521

Non-cash income tax (benefit) expense from continuing operations - diluted	0.43	0.32	(0.34)
Non-GAAP net income per share - diluted	\$ 2.25	\$ 1.70	\$ 0.74
Weighted average shares outstanding used in computing non-GAAP diluted net income per share and its components	43,480	41,672	38,621

Year ended December 31, 2013 compared with year ended December 31, 2012

The increase in non-GAAP net income was primarily due to a \$20.3 million and \$10.5 million increase in Search and Tax Preparation segment income, respectively, driven by growth in the Search segment and the timing of the TaxACT acquisition, as well as \$5.0 million in segment operating income for our new E-Commerce segment due to the Monoprice acquisition. Offsetting the increases in segment operating income was an \$8.7 million increase in interest expense and associated debt costs related to the Monoprice credit facility entered into in November 2013 and the Convertible Senior Notes issued in March 2013, partially offset by decreased interest expense and associated debt costs on TaxACT's credit facilities, and a \$1.5 million increase in corporate personnel expenses not allocated to the segments primarily related to increased headcount to support operations.

Year ended December 31, 2012 compared with year ended December 31, 2011

The increase in non-GAAP net income was primarily due to a \$16.0 million and \$30.1 million increase in Search and Tax Preparation segment income, respectively, driven by growth in the Search segment and the TaxACT acquisition. In addition, there was a decrease in data center asset depreciation of \$1.0 million and a 2011 charge of \$3.0 million related to the increase in the fair value of contingent consideration associated with the greater than expected financial performance of Make The Web Better. Offsetting the increases in segment operating income was a \$4.6 million increase in interest expense and associated debt costs related to the TaxACT 2012 credit facility, a gain of \$1.5 million related to the resolution of a contingent liability in 2011, a \$1.4 million increase in corporate personnel expenses not allocated to the segments primarily related to increased headcount to support operations, and a \$0.9 million combined increase in professional service fees mainly related to the TaxACT acquisition, contractor fees to augment our staff, and public relations expenses.

LIQUIDITY AND CAPITAL RESOURCES**Cash, Cash Equivalents, and Short-Term Investments**

Edgar Filing: BLUCORA, INC. - Form 10-K

Our principal source of liquidity is our cash, cash equivalents, and short-term investments. As of December 31, 2013, we had cash and marketable investments of \$333.7 million, consisting of cash and cash equivalents of \$130.2 million and available-for-sale short-term investments of \$203.5 million. We generally invest our excess cash in high quality marketable investments. These investments include securities issued by U.S. government agencies, commercial paper, money market funds, municipal bonds, and time deposits. All of our financial instrument investments held at December 31, 2013 had minimal default risk and short-term maturities.

Table of Contents

We have financed our operations primarily from cash provided by operating activities. Accordingly, we believe that the cash generated from our operations and the cash and cash equivalents we have on hand will be sufficient to meet our operating, working capital, and capital expenditure requirements for at least the next 12 months. However, the underlying levels of revenues and expenses that we project may not prove to be accurate. For further discussion of the risks to our business related to liquidity, see the paragraph in our Risk Factors (Part I Item 1A of this report) under the heading Existing cash and cash equivalents, short-term investments, and cash generated from operations may not be sufficient to meet our anticipated cash needs for working capital and capital expenditures.

Use of Cash

We may use our cash, cash equivalents, and short-term investments balance in the future on investment in our current businesses, in acquiring new businesses or assets, for repayment of debt, or for stock repurchases. Such businesses or assets may not be related to Search, Tax Preparation, or E-Commerce, and such acquisitions will result in further transaction-related costs. We currently are focused on the following areas: improving the search services and tax preparation services and products offered to our end users, maintaining our current search distribution partners and tax preparation customers, adding new search distribution partners and tax preparation customers, expanding our tax preparation product offerings, increasing the number of e-commerce orders through existing and new consumer and business customers, e-commerce product category expansion and diversification, e-commerce revenue expansion into new geographic areas, continuing to build our e-commerce brand recognition, and seeking opportunities to use our resources to acquire and integrate new businesses and assets. Within our Search, Tax Preparation, and E-Commerce businesses, engineering, operations, and product management personnel remain paramount to our ability to enhance our current technology, increase our distribution network and customer reach for the Search business, deliver high quality tax preparation services for the Tax Preparation business, and provide superior product value and customer service for the E-Commerce business. As a result, we expect to continue to invest in our workforce and research and development operations.

On August 22, 2013, we acquired Monoprice for \$182.9 million in cash. The acquisition of Monoprice was funded from our available cash. On November 22, 2013, Monoprice entered into a \$70.0 million credit facility agreement for the purposes of post-transaction financing of the Monoprice acquisition and providing future working capital flexibility for Monoprice. The final maturity date of the credit facility is November 22, 2018. The interest rate is variable, based upon choices from which Monoprice elects. The credit facility includes financial and operating covenants with respect to certain ratios, including leverage ratio and fixed charge coverage ratio, which are defined further in the agreement. We were in compliance with these covenants as of December 31, 2013. Monoprice initially borrowed \$50.0 million under the credit facility, receiving net proceeds of approximately \$49.3 million. For further detail, see Note 8: Debt of the Notes to Consolidated Financial Statements in Part II Item 8 of this report.

On March 15, 2013, we issued \$201.25 million principal amount of 4.25% Convertible Senior Notes (the *Notes*). The Notes are due April 1, 2019, unless earlier purchased, redeemed, or converted in accordance with their terms. The Notes bear interest at a rate of 4.25% per year, payable semi-annually on April 1 and October 1 of each year beginning on October 1, 2013. We received net proceeds from the offering of approximately \$194.8 million. There are no financial or operating covenants relating to the Notes. As of May 2013, we are permitted to settle any conversion obligation under the Convertible Senior Notes in cash, shares of our common stock, or a combination of cash and shares of our common stock, at our election. We intend to satisfy any conversion premium by issuing shares of our common stock. For further detail, see Note 8: Debt of the Notes to Consolidated Financial Statements in Part II Item 8 of this report.

On January 31, 2012, we acquired TaxACT for \$287.5 million in cash. The TaxACT acquisition was funded from our cash reserves and from the net proceeds of borrowings under a \$105.0 million credit facility. TaxACT initially borrowed \$100.0 million under this credit facility, receiving net proceeds of approximately \$96.7 million. During 2012, we repaid \$25.5 million. In April 2013, we repaid an additional \$10.0 million of the

Table of Contents

debt outstanding. On August 30, 2013, TaxACT refinanced its obligations under the original credit facility for the purpose of obtaining more favorable terms. The new credit facility consists of a \$100.0 million revolving credit commitment that reduces to \$90.0 million on August 30, 2014, to \$80.0 million on August 30, 2015, and to \$70.0 million on August 30, 2016. The final maturity date of the new credit facility is August 30, 2018. The interest rate is variable, based upon choices from which TaxACT elects. The new credit facility includes financial and operating covenants with respect to certain ratios, including leverage ratio and fixed charge coverage ratio, which are defined further in the agreement, as well as certain restrictions on TaxACT's payments to the Company. We were in compliance with these covenants as of December 31, 2013. TaxACT borrowed approximately \$71.4 million under the new credit facility, of which \$65.4 million was used to pay off the previous credit facility and \$6.0 million was an additional draw in October 2013. For further detail, see Note 8: Debt of the Notes to Consolidated Financial Statements in Part II Item 8 of this report.

Pursuant to a stock repurchase program approved by our board of directors, we may purchase up to \$50.0 million of our common stock in open-market transactions through February 6, 2015. During the year ended December 31, 2013, we purchased 417,159 shares of our common stock in open market transactions at a total cost of \$10.0 million. As of December 31, 2013, we may repurchase an additional \$40.0 million of our common stock under our repurchase program. For further detail, see Note 10: Stockholders' Equity of the Notes to Consolidated Financial Statements in Part II Item 8 of this report.

Contractual Obligations and Commitments

Our contractual obligations and commitments are as follows for years ending December 31 (in thousands):

	2014	2015	2016	2017	2018	Thereafter	Total
Operating lease commitments	\$ 2,687	\$ 2,413	\$ 1,894	\$ 1,933	\$ 1,783	\$ 2,546	\$ 13,256
Purchase commitments	646	437	92	62			1,237
Debt commitments	8,000	8,000	8,000	8,000	89,384	201,250	322,634
Interest on Convertible Senior Notes	8,553	8,553	8,553	8,553	8,553	4,277	47,042
Escrow for acquisition-related indemnifications		735					735
Total	\$ 19,886	\$ 20,138	\$ 18,539	\$ 18,548	\$ 99,720	\$ 208,073	\$ 384,904

For further detail see Note 9: Commitments and Contingencies of the Notes to Consolidated Financial Statements in Part II Item 8 of this report.

Off-balance Sheet Arrangements

We have no off-balance sheet arrangements other than operating leases.

Unrecognized Tax Benefits

Edgar Filing: BLUCORA, INC. - Form 10-K

The above table does not reflect unrecognized tax benefits of approximately \$0.6 million, the timing of which is uncertain. For additional discussion on unrecognized tax benefits see "Note 14: Income Taxes" of the Notes to Consolidated Financial Statements in Part II Item 8 of this report.

Table of Contents*Cash Flows*

Our cash flows were comprised of the following (in thousands):

	Years ended December 31,		
	2013	2012	2011
Net cash provided by operating activities	\$ 95,056	\$ 48,831	\$ 25,263
Net cash used by investing activities	(303,693)	(165,073)	(115,473)
Net cash provided by financing activities	270,584	102,623	23,256
Net cash used by discontinued operations			(6,794)
Net increase (decrease) in cash and cash equivalents	\$ 61,947	\$ (13,619)	\$ (73,748)

Net cash from operating activities: Net cash from operating activities consists of net income, offset by certain non-cash adjustments, and changes in our working capital.

Net cash provided by operating activities was \$95.1 million, \$48.8 million, and \$25.3 million for the years ended December 31, 2013, 2012, and 2011, respectively. The activity in 2013 included \$48.3 million of net income (offset by non-cash adjustments) and a \$46.7 million working capital contribution. The working capital contribution continued to be driven by accrued expenses and the impact of excess tax benefits from stock-based activity primarily due to utilizing equity net operating loss carryforwards from prior years. The contribution from deferred revenue was attributable to TaxACT revenue arrangements. The amounts from accounts receivable and accounts payable reflected balances assumed in the Monoprice acquisition and higher Search distribution revenue and the resulting revenue share to our distribution partners.

The activity in 2012 included \$30.3 million of net income (offset by non-cash adjustments) and an \$18.5 million working capital contribution. The working capital contribution was driven by accrued expenses and the impact of excess tax benefits from stock-based activity. The contribution from deferred revenue was attributable mainly to TaxACT revenue arrangements. While amounts from accounts receivable and accounts payable were influenced by higher Search distribution revenue and the resulting revenue share to our distribution partners, these were offset by balances assumed in the TaxACT acquisition.

The activity in 2011 included \$28.0 million of net income (offset by non-cash adjustments) and a working capital reduction of \$2.7 million. The amounts from accounts receivable and accounts payable (net of accrued expenses) were influenced by higher Search distribution revenue and the resulting revenue share to our distribution partner.

Net cash from investing activities: Net cash from investing activities primarily consists of cash outlays for business acquisitions, transactions (purchases, as well as proceeds from sales and maturities) related to our investments, and purchases of property and equipment. Our investing activities tend to fluctuate from period to period primarily based upon the level of acquisition activity.

Net cash used by investing activities was \$303.7 million, \$165.1 million, and \$115.5 million for the years ended December 31, 2013, 2012, and 2011, respectively. The activity in 2013 primarily consisted of the acquisitions of Monoprice and Balance Financial for a combined \$185.0 million (net of cash acquired of \$2.8 million) and net cash outlays on our available-for-sale investments of \$112.5 million. The activity in 2012

Edgar Filing: BLUCORA, INC. - Form 10-K

primarily consisted of the acquisition of TaxACT for \$279.4 million (net of cash acquired of \$8.1 million) offset by net cash inflows on our available-for-sale investments of \$117.8 million. The activity in 2011 primarily consisted of net cash outlays on our available-for-sale investments of \$113.4 million.

Net cash from financing activities: Net cash from financing activities primarily consists of transactions related to the issuance of debt and stock. Our financing activities tend to fluctuate from period to period based

Table of Contents

upon our financing needs due to the level of acquisition activity and market conditions that present favorable financing opportunities.

Net cash provided by financing activities was \$270.6 million, \$102.6 million, and \$23.3 million for the years ended December 31, 2013, 2012, and 2011, respectively. The activity for 2013 primarily consisted of \$250.1 million in combined net proceeds from the Convertible Senior Notes, Monoprice credit facility, and TaxACT 2013 credit facility, \$29.4 million in excess tax benefits from stock-based activity primarily due to utilizing equity net operating loss carryforwards from prior years, and \$13.5 million in combined proceeds from the issuance of common stock related to stock option exercises, the employee stock purchase plan, and the Warrant exercise. These cash inflows were offset by a \$10.0 million payment on the TaxACT 2012 credit facility and stock repurchases of \$10.0 million.

The activity for 2012 primarily consisted of \$96.7 million in net proceeds from the TaxACT 2012 credit facility, \$23.0 million in excess tax benefits from stock-based activity primarily due to utilizing equity net operating loss carryforwards from prior years, and \$9.7 million in combined proceeds from the issuance of common stock related to stock option exercises and the employee stock purchase plan. These cash inflows were offset by a \$25.5 million payment on the TaxACT 2012 credit facility.

The activity for 2011 primarily consisted of \$24.4 million in combined proceeds from the issuance of common stock related to stock option exercises, the employee stock purchase plan, and a stock sale agreement (for further detail see Note 10: Stockholders' Equity of the Notes to Consolidated Financial Statements in Part II Item 8 of this report) and \$1.3 million in excess tax benefits generated by stock-based award activity.

Net cash used by discontinued operations: Net cash used by operating activities attributable to discontinued operations in 2011 was \$6.8 million and was related to the sale of Mercantila to Zoo Stores, Inc. on June 22, 2011.

Critical Accounting Policies and Estimates

This Management's Discussion and Analysis of Financial Condition and Results of Operations, as well as the disclosures included elsewhere in this Annual Report on Form 10-K, is based upon our consolidated financial statements, which have been prepared in accordance with GAAP. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues, expenses and disclosures of contingencies. In some cases, we could have reasonably used different accounting policies and estimates.

The SEC has defined a company's most critical accounting policies as the ones that are the most important to the portrayal of the company's financial condition and results of operations and which require the company to make its most difficult and subjective judgments, often as a result of the need to make estimates of matters that are inherently uncertain. On an ongoing basis, we evaluate the estimates used. We base our estimates on historical experience, current conditions, and on various other assumptions that we believe to be reasonable under the circumstances and, based on information available to us at that time, we make judgments about the carrying values of assets and liabilities that are not readily apparent from other sources as well as identify and assess our accounting treatment with respect to commitments and contingencies. Actual results may differ significantly from these estimates under different assumptions, judgments, or conditions. We believe the following critical accounting policies involve the more significant judgments and estimates used in the preparation of our consolidated financial statements. We also have other accounting policies that involve the use of estimates, judgments, and assumptions that are significant to understanding our results. For additional information, see Note 2: Summary of Significant Accounting Policies of the Notes to Consolidated Financial Statements in Part II Item 8 of this report.

Edgar Filing: BLUCORA, INC. - Form 10-K

Search services revenue recognition: The majority of our revenues are generated from our web search services. The Search business does not generate its own search content for its web search services but instead

Table of Contents

aggregates search content from a number of content providers. Some of these content providers, such as Google and Yahoo!, pay us to distribute their content, and those providers are referred to as Search Customers. We generate search services revenue when an end user of such services clicks on a paid search link provided by a Search Customer and displayed on a distribution partners web property or on one of our owned and operated web properties. The Search Customer that provided the paid search link receives a fee from the advertiser who paid for the click and the Search Customer pays us a portion of that fee. Revenue is recognized in the period in which the services are provided (i.e., when a paid search occurs) and is based on the amounts earned by and ultimately remitted to us. This revenue is recorded in the Search segment.

Under our agreements with our Search Customers and our distribution partners, we are the primary obligor, separately negotiate each revenue or unit pricing contract independent of any revenue sharing arrangements, and assume the credit risk for amounts invoiced to our Search Customers. For search services, we determine the paid search results, content, and information directed to our owned and operated websites and our distribution partners web properties.

We earn revenue from our Search Customers by providing paid search results generated from our owned and operated web properties and from our distribution partners web properties based on separately negotiated and agreed-upon terms with each distribution partner. Consequently, we record search services revenue on a gross basis.

Tax preparation revenue recognition: We derive service revenue from the sale of tax preparation online services, ancillary service offerings, packaged tax preparation software, and multiple element arrangements that may include a combination of these items. Ancillary service offerings include tax preparation support services, data archive services, bank or reloadable pre-paid debit card services, e-filing services, and other value-added services. This revenue is recorded in the Tax Preparation segment.

Our Tax Preparation segment revenue consists primarily of hosted tax preparation online services, tax preparation support services, data archive services, and e-filing services. We recognize revenue from these services as the services are performed and the four revenue recognition criteria as described in Note 2: Summary of Significant Accounting Policies of the Notes to Consolidated Financial Statements in Part II Item 8 of this report are met.

We recognize revenue from the sale of our packaged software when legal title transfers. This is generally when our customers download the software from the Web or when the software ships.

The bank or reloadable prepaid debit card services are offered to taxpayers as an option to receive their tax refunds in the form of a prepaid bank card or to have the fees for the software and/or services purchased by the customers deducted from their refunds. Other value-added service revenue consists of revenue from revenue sharing and royalty arrangements with third party partners. Revenue for these transactions is recognized when the four revenue recognition criteria described above are met; for some arrangements that is upon filing and for other arrangements that is upon our determination of when collectability is probable.

For software and/or services that consist of multiple elements, we must: (1) determine whether and when each element has been delivered; (2) determine the fair value of each element using the selling price hierarchy of vendor-specific objective evidence (*VSOE*) of fair value if available, third-party evidence (*TPE*) of fair value if VSOE is not available, and estimated selling price (*ESP*) if neither VSOE nor TPE is available; and (3) allocate the total price among the various elements based on the relative selling price method. Once we have allocated the total price among the various elements, we recognize revenue when the revenue recognition criteria described above are met for each element.

Edgar Filing: BLUCORA, INC. - Form 10-K

VSOE generally exists when we sell the deliverable separately. When VSOE cannot be established, we attempt to establish a selling price for each element based on TPE. TPE is determined based on competitor prices

Table of Contents

for similar deliverables when sold separately. When we are unable to establish selling price using VSOE or TPE, we use ESP in our allocation of arrangement consideration. ESP is the estimated price at which we would sell the software or service if it were sold on a stand-alone basis. We determine ESP for the software or service by considering multiple factors including, but not limited to, historical stand-alone sales, pricing practices, market conditions, competitive landscape, internal costs, and gross margin objectives.

In some situations, we receive advance payments from our customers. We defer revenue associated with these advance payments and recognize the allocated consideration for each element when we ship the software or perform the services, as appropriate. Advance payments related to data archive services are deferred and recognized over the related contractual term.

E-Commerce revenue recognition: We derive product revenue from online sales of self-branded electronics and accessories to both consumers and businesses. We recognize product revenue from product sales when all four revenue recognition criteria, as outlined in Note 2: Summary of Significant Accounting Policies of the Notes to Consolidated Financial Statements in Part II Item 8 of this report, have been met. Because we either (i) have a general practice of refunding customer losses for products damaged while in-transit despite selling terms indicating title transfers at the point of shipment or (ii) have FOB-destination shipping terms specifically set out in certain arrangements, delivery is deemed to have occurred at the point in time when the product is received by the customer. All amounts billed to a customer in a sale transaction related to shipping and handling, if any, represents revenues earned for the goods provided, and these amounts have been classified as Product revenue. Costs related to such shipping and handling billings are classified as Product cost of revenue.

We provide our customers with a thirty-day right of return. Return allowances, which reduce revenue, are estimated using historical experience.

Cost of revenues: We record the cost of revenues for sales of products and services when the related revenue is recognized. Services cost of revenue consists of costs related to revenue sharing arrangements with our distribution partners, usage-based content fees, certain costs associated with the operation of our data centers that serve our Search and Tax Preparation businesses, including amortization of intangible assets, depreciation, personnel expenses (which include salaries, benefits, stock-based compensation, and other employee-related costs), bandwidth costs, bank service fees, and royalties. Product cost of revenue includes product costs, inbound and outbound shipping and handling costs, packaging supplies, and provisions for inventory obsolescence. Shipping charges to receive products from our suppliers are included in inventory and recognized as product cost of revenue upon sale of products to customers.

Sales and marketing expenses: Sales and marketing expenses consist principally of marketing expenses associated with our TaxACT and Monoprice websites (which include the following channels: television, radio, online display and text, and email), our owned and operated web search properties (which consist of traffic acquisition, including our online marketing, which includes fees paid to search engines to drive traffic to an owned and operated website, agency fees, brand promotion expense and market research expense), personnel costs (which include salaries, benefits, other employee-related costs, and stock-based compensation) for personnel engaged in marketing and selling activities, and fulfillment expenses primarily associated with our E-Commerce business. Fulfillment includes direct operating expenses (including personnel costs) relating to our purchasing, customer and technical support, receiving, inspection and warehouse functions, as well as the cost of temporary help and contractors, and credit card processing fees.

Stock-based compensation: We measure stock-based compensation at the grant date based on the fair value of the award and recognize it as expense, net of estimated forfeitures, over the vesting or service period, as applicable, of the stock award using the straight-line method. We recognize stock-based compensation over the vesting period for each separately vesting portion of a share-based award as if they were individual share-based awards. We estimate forfeitures at the time of grant and revise those estimates, if necessary, in subsequent periods if actual forfeitures differ from those estimates.

Table of Contents

Calculating stock-based compensation relies upon certain assumptions, including the expected term of the stock-based awards, expected stock price volatility, expected interest rate, number and types of stock-based awards, and the pre-vesting forfeiture rate. If we use different assumptions due to changes in our business or other factors, our stock-based compensation could vary materially in the future.

Income taxes: We account for income taxes under the asset and liability method, under which deferred tax assets, including net operating loss carryforwards, and liabilities are determined based on temporary differences between the book and tax bases of assets and liabilities. We periodically evaluate the likelihood of the realization of deferred tax assets and reduce the carrying amount of the deferred tax assets by a valuation allowance to the extent we believe a portion will not be realized. We consider many factors when assessing the likelihood of future realization of the deferred tax assets, including the recent cumulative earnings experience by taxing jurisdiction, expectations of future taxable income, the carryforward periods available for tax reporting purposes, and other relevant factors. There is a wide range of possible judgments relating to the valuation of our deferred tax assets.

For additional information about the realization of our deferred tax assets and our valuation allowance, see Note 14: Income Taxes of the Notes to Consolidated Financial Statements in Part II Item 8 of this report. For additional information about our net operating loss carryforwards, see the Risk Factor If there is a change in our ownership within the meaning of Section 382 of the Internal Revenue Code, our ability to use our NOLs may be severely limited or potentially eliminated in Part I Item 1A of this report. For additional information about expectations of future taxable income, see the Risk Factor Our financial results may fluctuate, which could cause our stock price to be volatile or decline in Part I Item 1A of this report.

Supplier concentration risk: A material part of Monoprice's business is dependent on two vendors. During the period from August 22, 2013, the date of the acquisition, to December 31, 2013, these unrelated vendors accounted for \$6.7 million or 19% of Monoprice's inventory purchases and at December 31, 2013 accounted for \$2.4 million or 20% of Monoprice's related accounts payable.

Inventories: Inventories, consisting of merchandise available for sale in the E-Commerce business, are accounted for using the first-in-first-out (*FIFO*) method of accounting and are valued at the lower of cost or market. Inventory quantities on hand are reviewed regularly, and allowances are maintained for obsolete, slow moving, and nonsalable inventory.

Business combinations and intangible assets including goodwill: We account for business combinations using the acquisition method, and, accordingly, the identifiable assets acquired and liabilities assumed are recorded at their acquisition date fair values. Goodwill is calculated as the excess of the purchase price over the fair value of net assets, including the amount assigned to identifiable intangible assets. Identifiable intangible assets with finite lives are amortized over their useful lives on a straight-line basis, except for the installed code base technology which is amortized proportional to expected revenue. Acquisition-related costs, including advisory, legal, accounting, valuation, and other similar costs, are expensed in the periods in which the costs are incurred. The results of operations of acquired businesses are included in the consolidated financial statements from the acquisition date.

Goodwill and intangible assets: We evaluate goodwill for impairment annually or more frequently when an event occurs or circumstances change to indicate that the carrying value may not be recoverable. We test goodwill for impairment by first comparing the book value of net assets to the fair value of the reporting units. If the fair value is determined to be less than the book value or qualitative factors indicate that it is more likely than not that goodwill is impaired, a second step is performed to compute the amount of impairment as the difference between the estimated fair value of goodwill and the carrying value. The fair value of the reporting units is estimated using discounted cash flows. Forecasts of future cash flows are based on best estimates of future net sales and operating expenses.

Table of Contents

Intangible assets, other than goodwill, are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of the assets might not be recoverable. Conditions that would necessitate an impairment assessment include a significant decline in the observable market value of an asset, a significant change in the extent or manner in which an asset is used, or any other significant adverse change that would indicate that the carrying amount of an asset or group of assets may not be recoverable.

Impairment losses are recorded if the asset's carrying amount is not recoverable through its undiscounted, probability-weighted future cash flows. We measure the impairment loss based on the difference between the carrying amount and estimated fair value.

In the dynamic search, tax preparation and e-commerce industries, there is significant uncertainty about the future. Unforeseen events such as market disruptions and deterioration of the macroeconomic environment, or internal challenges such as reorganizations, employee and management turnover, operational cash flows, and other trends that could have material negative impacts on our key assumptions in determining fair values, could lead to a decision to impair goodwill and/or intangible assets in future periods.

Equity method investments: We currently hold equity securities and warrants to purchase equity securities in companies whose securities are not publicly traded. The equity method is used to account for investments in these companies, if the investment provides us with the ability to exercise significant influence over operating and financial policies of the investees. We record our proportionate share of the net earnings or losses of equity method investees and a corresponding increase or decrease to the investment balances. We evaluate our equity method investments for impairment whenever events or changes in circumstances indicate, in management's judgment, that the carrying value of such investment may have experienced a decline in value. See "Note 13: Other Loss, Net" of the Notes to Consolidated Financial Statements in Part II Item 8 of this report.

Debt issuance costs and debt discounts: Debt issuance costs and debt discounts are deferred and amortized as interest expense under the effective interest method over the contractual term of the related debt, adjusted for prepayments in the case of our credit facilities.

Debt issuance costs related to the Convertible Senior Notes issued in 2013 were allocated to the liability and equity components of the instrument. The debt issuance costs allocated to the liability component are amortized to interest expense through the earlier of the maturity date of the Notes or the date of conversion, if any. The debt issuance costs allocated to the equity component of the Notes were recorded as an offset to Additional paid-in capital.

Derivative instruments and hedging: We recognize derivative instruments as either assets or liabilities at their fair value. We record changes in the fair value of the derivative instruments as gains or losses either in "Other loss, net" on the consolidated statements of comprehensive income or in "Accumulated other comprehensive loss" on the consolidated balance sheets.

Regarding hedging, the Company used a derivative financial instrument in the form of an interest rate swap agreement for the purpose of minimizing exposure to changes in interest rates, until the swap was terminated at break-even on September 10, 2013. The Company had no other swap agreements outstanding as of December 31, 2013. This swap agreement was accounted for as a cash flow hedge and changes in the fair value of the hedge instrument were included in "Other comprehensive income (loss)". The hedge was perfectly effective through termination, and no ineffectiveness was recorded to "Other loss, net" in the consolidated statements of comprehensive income.

Recent Accounting Pronouncements

Edgar Filing: BLUCORA, INC. - Form 10-K

See "Note 2: Summary of Significant Accounting Policies" of the Notes to Consolidated Financial Statements in Part II Item 8 of this report.

Table of Contents**Quarterly Results of Operations (Unaudited)**

The following table presents a summary of our unaudited consolidated results of operations for the eight quarters ended December 31, 2013. The information for each of these quarters has been prepared on a basis consistent with our annual audited consolidated financial statements. You should read this information in conjunction with our consolidated financial statements and notes thereto in Part II Item 8. The operating results for any quarter are not necessarily indicative of results for any future period.

Table of Contents**ITEM 7A. Quantitative and Qualitative Disclosures About Market Risk**

We are exposed to financial market risks, including changes in the market values of our debt investments and interest rates.

Financial market risk: We do not invest in financial instruments or their derivatives for trading or speculative purposes. By policy, we limit our credit exposure to any one issuer, other than securities issued by the U.S. federal government and its agencies, and do not have any derivative instruments in our investment portfolio. The three primary goals that guide our investment decisions, with the first being the most important, are: preserve capital, maintain ease of conversion into immediate liquidity, and achieve a rate of return over a pre-determined benchmark. Our investment portfolio at December 31, 2013 included debt instruments issued by the U.S. federal government and its agencies, publicly-held corporations, municipalities, insured time deposits with commercial banks, and money market funds invested in securities issued by agencies of the U.S. federal government. As of December 31, 2013, we invested exclusively in debt instruments with minimal default risk and maturity dates of less than one year from the end of any of our quarterly accounting periods. We consider the market value, default, and liquidity risks of our investments to be low at December 31, 2013.

Interest rate risk: As of December 31, 2013, all of the debt securities that we held were fixed-rate earning instruments that carry a degree of interest rate risk. Fixed-rate securities may have their fair market value adversely impacted due to a rise in interest rates. We may suffer losses in principal if we are forced to sell securities that have declined in market value due to changes in interest rates. At December 31, 2013, our cash equivalent balances of \$55.5 million were primarily held in commercial paper and taxable municipal bonds, and our short-term investment balances of \$203.5 million were primarily held in U.S. government securities and taxable municipal bonds. We consider the interest rate risk for our cash equivalent and marketable fixed-income securities held at December 31, 2013 to be low. For further detail on our cash equivalent and short-term investment holdings, please see Note 5: Fair Value Measurements of the Notes to Consolidated Financial Statements in Part II Item 8 of this report.

In addition, as of December 31, 2013, we have \$121.4 million of debt outstanding under the Monoprice and TaxACT 2013 credit facilities, which carries a degree of interest rate risk. These debts have a floating portion of their interest rates tied to the London Interbank Offered Rate (LIBOR). For further information on our outstanding debt, see Note 8: Debt of the Notes to Consolidated Financial Statements in Part II Item 8 of this report. A hypothetical 100 basis point increase in LIBOR on December 31, 2013 would result in a \$4.9 million increase in our interest expense until the scheduled maturity dates in 2018.

The following table provides information about our cash equivalent and marketable fixed-income securities as of December 31, 2013, including principal cash flows for 2014 and thereafter and the related weighted average interest rates. The change in fair values during 2013 was less than \$0.1 million for our cash equivalent and marketable fixed-income securities and was recorded in other comprehensive income. Principal amounts and weighted average interest rates by expected year of maturity are as follows (in thousands, except percentages):

	2014		Thereafter	Total		Fair Value
U.S. government securities	\$ 64,385	0.15%		\$ 64,385	0.15%	\$ 64,514
Commercial paper	32,500	0.14%		32,500	0.14%	32,495
Money market funds	9,391	0.00%		9,391	0.00%	9,391
Time deposits	10,374	0.33%		10,374	0.33%	10,379
Taxable municipal bonds	139,875	0.32%		139,875	0.32%	142,205
Cash equivalents and marketable fixed-income securities	\$ 256,525			\$ 256,525		\$ 258,984

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Stockholders

Blucora, Inc.

We have audited the accompanying consolidated balance sheets of Blucora, Inc. as of December 31, 2013 and 2012 and the related consolidated statements of comprehensive income, stockholders' equity and cash flows for each of the two years in the period ended December 31, 2013. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Blucora, Inc. at December 31, 2013 and 2012, and the consolidated results of its operations and its cash flows for each of the two years in the period ended December 31, 2013, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Blucora, Inc.'s internal control over financial reporting as of December 31, 2013, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (1992 framework) and our report dated February 27, 2014 expressed an unqualified opinion thereon.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of

Blucora, Inc.

Bellevue, Washington

We have audited the accompanying consolidated statements of comprehensive income, stockholders' equity, and cash flows of Blucora, Inc. and subsidiaries (the Company) for the year ended December 31, 2011. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such consolidated financial statements present fairly, in all material respects, the results of Blucora, Inc. and its subsidiaries operations and their cash flows for the year ended December 31, 2011, in conformity with accounting principles generally accepted in the United States of America.

BLUCORA, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Years Ended December 31, 2013, 2012, and 2011

Note 1: The Company and Basis of Presentation

Description of the business: Blucora, Inc. (the *Company* or *Blucora*) operates three primary businesses: an internet search business, an online tax preparation business, and an e-commerce business. The Company's Search business, InfoSpace, provides search services to distribution partners' web properties as well as to the Company's owned and operated properties. The Tax Preparation business consists of the operations of TaxACT, Inc. (*TaxACT*), which the Company acquired on January 31, 2012, and provides online tax preparation service for individuals, tax preparation software for individuals and professional tax preparers, and ancillary services. The E-Commerce business consists of the operations of Monoprice, Inc. (*Monoprice*), which the Company acquired on August 22, 2013, and provides self-branded electronics and accessories to both consumers and businesses.

On August 22, 2013, the Company acquired Monoprice pursuant to the terms of the Stock Purchase Agreement dated as of July 31, 2013. As a result of the acquisition, the Company owns 100% of Monoprice. Monoprice generates revenue primarily through its website, www.monoprice.com.

On January 31, 2012, the Company acquired TaxACT. As a result of the acquisition, the Company owns 100% of TaxACT. TaxACT generates revenue primarily through its online service at www.taxact.com. Further, on October 4, 2013, TaxACT acquired all of the equity of Balance Financial, Inc. (*Balance Financial*), a provider of web and mobile-based financial management software through its website www.balancefinancial.com.

Segments: The Company has three reporting segments: Search, Tax Preparation, and E-Commerce. The Search segment is the InfoSpace business, the Tax Preparation segment is the TaxACT business, and the E-Commerce segment is the Monoprice business. Unless the context indicates otherwise, the Company uses the term *Search* to represent search services, the term *Tax Preparation* to represent services and products sold through the TaxACT business, and the term *E-Commerce* to represent products sold through the Monoprice business (see Note 12: Segment Information).

Principles of consolidation: The consolidated financial statements include the accounts of the Company and its subsidiaries. Intercompany accounts and transactions have been eliminated.

Reclassification: As a result of the Monoprice acquisition in August 2013, the Company reclassified credit card fees previously reported in Services cost of revenue to Sales and marketing for the year ended December 31, 2012 to conform with the 2013 presentation. The comparable amount in 2011 was not material and, as a result, was not reclassified. The Company assessed the related materiality of the reclassification and

Edgar Filing: BLUCORA, INC. - Form 10-K

concluded that it was immaterial to any of its previously issued financial statements. The reclassification had no effect on reported revenues, operating income, or cash flows for the periods presented.

Use of estimates: The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America (**GAAP**) requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Estimates include those used for impairment of goodwill and other intangible assets, useful lives of other intangible assets, purchase accounting, valuation of investments, valuation of the Warrant and interest rate swap derivatives, revenue recognition, the estimated allowance for sales returns and doubtful accounts, the estimated allowance for obsolete, slow moving, and nonsalable inventory, internally developed software, accrued contingencies, stock option valuation, and valuation allowance for deferred tax assets. Actual amounts may differ from estimates.

Table of Contents

BLUCORA, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Years Ended December 31, 2013, 2012, and 2011

Seasonality: Blucora's Tax Preparation segment is highly seasonal, with the significant majority of its revenue earned in the first four months of the Company's fiscal year. During the third and fourth quarters, the Tax Preparation segment typically reports losses because revenue from the segment is minimal while core operating expenses continue at relatively consistent levels. Revenue from the E-Commerce segment also is seasonal, with revenues historically being the lowest in the second quarter, a period that does not include consumer back-to-school or holiday-related spending.

Note 2: Summary of Significant Accounting Policies

Cash equivalents: The Company considers all highly liquid debt instruments with an original maturity of ninety days or less at date of acquisition to be cash equivalents, which are carried at fair value.

Short-term investments: The Company principally invests its available cash in investment-grade income securities, AAA-rated money market funds, and insured time deposits with commercial banks. Such investments are included in Cash and cash equivalents and Short-term investments, available for sale, on the consolidated balance sheets, and reported at fair value with unrealized gains and losses included in "Accumulated other comprehensive loss" on the consolidated balance sheets.

The Company reviews the impairments of its available-for-sale investments and classifies the impairment of any individual available-for-sale investment as either temporary or other-than-temporary. The differentiating factors between temporary and other-than-temporary impairments are primarily the length of the time and the extent to which the fair value has been less than cost, the financial condition and near-term prospects of the issuer, and the intent and ability of the Company to retain its investment in the issuer for a period of time sufficient to allow for any anticipated recovery in fair value.

Accounts receivable: Accounts receivable are stated at amounts due from customers net of an allowance for doubtful accounts.

Inventories: Inventories, consisting of merchandise available for sale in the E-Commerce business, are accounted for using the first-in-first-out (*FIFO*) method of accounting and are valued at the lower of cost or market and include the related inbound shipping and handling costs. Inventory quantities on hand are reviewed regularly, and allowances are maintained for obsolete, slow moving, and nonsalable inventory.

Edgar Filing: BLUCORA, INC. - Form 10-K

Property and equipment: Property and equipment are stated at cost. Depreciation is computed under the straight-line method over the following estimated useful lives:

Computer equipment and software	3 years
Data center servers	3 years
Internally developed software	3 years
Office equipment	7 years
Office furniture	7 years
Heavy equipment	10 years
Leasehold improvements	Shorter of lease term or economic life

The Company capitalizes certain internal-use software development costs, consisting primarily of employee salaries and benefits allocated on a project or product basis. The Company capitalized \$1.2 million, \$1.0 million, and \$1.2 million of internal-use software costs in the years ended December 31, 2013, 2012, and 2011, respectively.

Table of Contents

BLUCORA, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Years Ended December 31, 2013, 2012, and 2011

Business combinations and intangible assets including goodwill: The Company accounts for business combinations using the acquisition method, and, accordingly, the identifiable assets acquired and liabilities assumed are recorded at their acquisition date fair values. Goodwill is calculated as the excess of the purchase price over the fair value of net assets, including the amount assigned to identifiable intangible assets. Identifiable intangible assets with finite lives are amortized over their useful lives on a straight-line basis, except for the installed code base technology which is amortized proportional to expected revenue. Acquisition-related costs, including advisory, legal, accounting, valuation, and other similar costs, are expensed in the periods in which the costs are incurred. The results of operations of acquired businesses are included in the consolidated financial statements from the acquisition date.

Goodwill and intangible assets: The Company evaluates goodwill for impairment annually or more frequently when an event occurs or circumstances change to indicate that the carrying value may not be recoverable. The Company tests goodwill for impairment by first comparing the book value of net assets to the fair value of the reporting units. If the fair value is determined to be less than the book value or qualitative factors indicate that it is more likely than not that goodwill is impaired, a second step is performed to compute the amount of impairment as the difference between the estimated fair value of goodwill and the carrying value. The fair value of the reporting units is estimated using discounted cash flows. Forecasts of future cash flows are based on best estimates of future net sales and operating expenses.

The Company conducts its annual goodwill impairment test as of November 30 of each year and has determined there to be no goodwill impairment for any of the periods presented. There were no triggering events identified from the date of our assessment through December 31, 2013 that would require an update to our annual impairment test. See Note 4: Goodwill and Other Intangible Assets.

Intangible assets, other than goodwill, are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of the assets might not be recoverable. Indefinite-lived intangible assets are reviewed for impairment at least annually. Conditions that would necessitate an impairment assessment include a significant decline in the observable market value of an asset, a significant change in the extent or manner in which an asset is used, or any other significant adverse change that would indicate that the carrying amount of an asset or group of assets may not be recoverable.

Impairment losses are recorded if the asset's carrying amount is not recoverable through its undiscounted, probability-weighted future cash flows. We measure the impairment loss based on the difference between the carrying amount and estimated fair value.

Equity method investments: The Company currently holds equity securities and warrants to purchase equity securities, for business and strategic purposes, in companies whose securities are not publicly traded. The equity method is used to account for investments in these companies, if the investment provides the Company with the ability to exercise significant influence over operating and financial policies of the investees. The Company records its proportionate share of the net earnings or losses of equity method investees and a corresponding increase or decrease to the investment balances. The Company evaluates its equity method investments for impairment whenever events or changes in circumstances indicate, in management's judgment, that the carrying value of such investments may have experienced a decline in value (see

Edgar Filing: BLUCORA, INC. - Form 10-K

Note 13: Other Loss, Net). The Company's equity investments were carried at a fair value of \$0 at December 31, 2013 and 2012.

Debt issuance costs and debt discounts: Debt issuance costs and debt discounts are deferred and amortized as interest expense under the effective interest method over the contractual term of the related debt, adjusted for prepayments in the case of the Company's credit facilities (see Note 8: Debt).

Table of Contents

BLUCORA, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Years Ended December 31, 2013, 2012, and 2011

Debt issuance costs related to the Company's Convertible Senior Notes (the *Notes*) issued in 2013 were allocated to the liability and equity components of the instrument. The debt issuance costs allocated to the liability component are amortized to interest expense through the earlier of the maturity date of the Notes or the date of conversion, if any. The debt issuance costs allocated to the equity component of the Notes were recorded as an offset to Additional paid-in capital (See Note 8: Debt).

Derivative instruments and hedging: The Company recognizes derivative instruments as either assets or liabilities at their fair value. The Company records changes in the fair value of the derivative instruments as gains or losses either in Other loss, net on the consolidated statements of comprehensive income or in Accumulated other comprehensive loss on the consolidated balance sheets.

Regarding hedging, the Company used a derivative financial instrument in the form of an interest rate swap agreement for the purpose of minimizing exposure to changes in interest rates, until the swap was terminated at break-even on September 10, 2013. The Company had no other swap agreements outstanding at December 31, 2013. This swap agreement was accounted for as a cash flow hedge, and changes in the fair value of the hedge instrument were included in Other comprehensive income (loss). The hedge was perfectly effective through termination, and no ineffectiveness was recorded to Other loss, net in the consolidated statements of comprehensive income.

Fair value of financial instruments: The Company measures its cash equivalents, available-for-sale investments, and derivative instruments at fair value. The Company considers the carrying values of accounts receivable, other receivables, inventory, prepaid expenses, other current assets, accounts payable, accrued expenses, and other current liabilities to approximate fair values primarily due to their short-term natures.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Cash equivalents and available-for-sale investments are classified within Level 2 of the fair value hierarchy, because the Company values its cash equivalents and available-for-sale investments utilizing market observable inputs. The Company classified its interest rate swap derivative within Level 2 as the valuation inputs were based on quoted prices and market observable data of similar instruments. As more fully discussed in Note 8: Debt, the interest rate swap was terminated at break-even on September 10, 2013. The Company classified the Warrant derivative within Level 3, because it was valued using the Black-Scholes-Merton valuation model, which has significant unobservable inputs related to historical stock price volatility. This unobservable input reflected the Company's assumptions, consistent with reasonably available assumptions made by other market participants. This valuation required significant judgment. As more fully discussed in Note 10: Stockholders' Equity, the Warrant was exercised in November 2013.

Revenue recognition: The Company recognizes revenue when all four revenue recognition criteria have been met: persuasive evidence of an arrangement exists, the Company has delivered the product or performed the service, the fee is fixed or determinable, and collectability is probable. Determining whether and when these criteria have been satisfied involves exercising judgment and using estimates and assumptions that can have an impact on the timing and amount of revenue that the Company recognizes.

The Company evaluates whether revenue should be presented on a gross basis, which is the amount that a customer pays for the service or product, or on a net basis, which is the customer payment less amounts the Company pays to suppliers. In making that evaluation, the Company considers indicators such as whether the Company is the primary obligor in the arrangement and assumes the risks and rewards as a principal in the

Table of Contents

BLUCORA, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Years Ended December 31, 2013, 2012, and 2011

customer transaction, including the credit risk, and whether the Company can set the sales price and select suppliers. GAAP clearly indicates that the evaluations of these factors, which at times can be contradictory, are subject to significant judgment and subjectivity.

Search services revenue recognition: The majority of the Company's revenues are generated from its web search services. The Search business does not generate its own search content for its web search services but instead aggregates search content from a number of content providers. Some of these content providers, such as Google and Yahoo!, pay us to distribute their content, and those providers are referred to as Search Customers. The Company generates search services revenue when an end user of such services clicks on a paid search link provided by a Search Customer and displayed on a distribution partner's web property or on one of the Company's owned and operated web properties. The Search Customer that provided the paid search link receives a fee from the advertiser who paid for the click and the Search Customer pays the Company a portion of that fee. Revenue is recognized in the period in which the services are provided (i.e., when a paid search occurs) and is based on the amounts earned by and ultimately remitted to the Company. This revenue is recorded in the Search segment.

Under the Company's agreements with its Search Customers and its distribution partners, the Company is the primary obligor, separately negotiates each revenue or unit pricing contract independent of any revenue sharing arrangements, and assumes the credit risk for amounts invoiced to its Search Customers. For search services, the Company determines the paid search results, content, and information directed to its owned and operated websites and its distribution partner's web properties. Consequently, the Company records search services revenue on a gross basis.

Tax preparation revenue recognition: The Company derives service revenue from the sale of tax preparation online services, ancillary service offerings, packaged tax preparation software, and multiple element arrangements that may include a combination of these items. Ancillary service offerings include tax preparation support services, data archive services, bank or reloadable pre-paid debit card services, e-filing services, and other value-added services. This revenue is recorded in the Tax Preparation segment.

The Company's Tax Preparation segment revenue consists primarily of hosted tax preparation online services, tax preparation support services, data archive services, and e-filing services. The Company recognizes revenue from these services as the services are performed and the four revenue recognition criteria described above are met.

The Company recognizes revenue from the sale of its packaged software when legal title transfers. This is generally when its customers download the software from the Web or when the software ships.

Edgar Filing: BLUCORA, INC. - Form 10-K

The bank or reloadable prepaid debit card services are offered to taxpayers as an option to receive their tax refunds in the form of a prepaid bank card or to have the fees for the software and/or services purchased by the customers deducted from their refunds. Other value-added service revenue consists of revenue from revenue sharing and royalty arrangements with third party partners. Revenue for these transactions is recognized when the four revenue recognition criteria described above are met; for some arrangements that is upon filing and for other arrangements that is upon the Company's determination of when collectability is probable.

For software and/or services that consist of multiple elements, the Company must: (1) determine whether and when each element has been delivered; (2) determine the fair value of each element using the selling price hierarchy of vendor-specific objective evidence (*VSOE*) of fair value if available, third-party evidence

Table of Contents

BLUCORA, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Years Ended December 31, 2013, 2012, and 2011

(*TPE*) of fair value if VSOE is not available, and estimated selling price (*ESP*) if neither VSOE nor TPE is available; and (3) allocate the total price among the various elements based on the relative selling price method. Once the Company has allocated the total price among the various elements, it recognizes revenue when the revenue recognition criteria described above are met for each element.

VSOE generally exists when the Company sells the deliverable separately. When VSOE cannot be established, the Company attempts to establish a selling price for each element based on TPE. TPE is determined based on competitor prices for similar deliverables when sold separately. When the Company is unable to establish selling price using VSOE or TPE, it uses ESP in its allocation of arrangement consideration. ESP is the estimated price at which the Company would sell the software or service if it were sold on a stand-alone basis. The Company determines ESP for the software or service by considering multiple factors including, but not limited to, historical stand-alone sales, pricing practices, market conditions, competitive landscape, internal costs, and gross margin objectives.

In some situations, the Company receives advance payments from its customers. The Company defers revenue associated with these advance payments and recognizes the allocated consideration for each element when the Company ships the software or performs the services, as appropriate. Advance payments related to data archive services are deferred and recognized over the related contractual term.

E-Commerce revenue recognition: The Company derives product revenue from online sales of self-branded electronics and accessories to both consumers and businesses. The Company recognizes product revenue from product sales when all four revenue recognition criteria, as outlined above, have been met. Because the Company either (i) has a general practice of refunding customer losses for products damaged while in-transit despite selling terms indicating title transfers at the point of shipment or (ii) has FOB-destination shipping terms specifically set out in certain arrangements, delivery is deemed to have occurred at the point in time when the product is received by the customer. All amounts billed to a customer in a sale transaction related to shipping and handling, if any, represent revenues earned for the goods provided, and these amounts have been classified as Product revenue . Costs related to such shipping and handling billings are classified as Product cost of revenue .

The Company provides its customers with a thirty-day right of return. Return allowances, which reduce revenue, are estimated using historical experience.

Cost of revenues: The Company records the cost of revenues for sales of products and services when the related revenue is recognized. Services cost of revenue consists of costs related to revenue sharing arrangements with our distribution partners, usage-based content fees, certain costs associated with the operation of our data centers that serve the Company's Search and Tax Preparation businesses, including amortization of intangible assets, depreciation, personnel expenses (which include salaries, stock-based compensation, benefits, and other employee-related costs), bandwidth costs, bank service fees, and royalties. Product cost of revenue includes product costs, inbound and outbound shipping and handling costs, packaging supplies, and provisions for inventory obsolescence. Shipping charges to receive products from the Company's suppliers are included in inventory and recognized as product cost of revenue upon sale of products to customers.

Engineering and technology expenses: Engineering and technology expenses are associated with the research, development, support, and ongoing enhancements of the Company's offerings, including personnel expenses (which include salaries, stock-based compensation, benefits, and other employee-related costs), software support and maintenance, and professional service fees. Research and development expenses were \$7.3 million in 2013, \$6.1 million in 2012, and \$4.1 million in 2011.

Table of Contents

BLUCORA, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Years Ended December 31, 2013, 2012, and 2011

Sales and marketing expenses: Sales and marketing expenses consist principally of marketing expenses associated with the Company's TaxACT and Monoprice websites (which include the following channels: television, radio, online display and text, and email), the Company's owned and operated web search properties (which consist of traffic acquisition, including the Company's online marketing, which includes fees paid to search engines to drive traffic to an owned and operated website, agency fees, brand promotion expense and market research expense), personnel costs (which include salaries, stock-based compensation, benefits, and other employee-related costs) for personnel engaged in marketing and selling activities, and fulfillment expenses primarily associated with the Company's E-Commerce business. Fulfillment includes direct operating expenses (including personnel costs) relating to the Company's purchasing, customer and technical support, receiving, inspection and warehouse functions, as well as the cost of temporary help and contractors, and credit card processing fees.

Costs for advertising are recorded as expense when the advertisement appears or electronic impressions are recorded. Advertising expense totaled \$75.9 million, \$31.8 million, and \$14.4 million for the years ended December 31, 2013, 2012, and 2011, respectively. Prepaid advertising costs were \$0.8 million and \$2.5 million at December 31, 2013 and 2012, respectively.

General and administrative expenses: General and administrative expenses consist primarily of personnel expenses (which include salaries, stock-based compensation, benefits, and other employee-related costs), professional service fees (which include legal, audit, and tax fees), general business development and management expenses, occupancy and general office expenses, taxes, and insurance expenses.

Stock-based compensation: The Company measures stock-based compensation at the grant date based on the fair value of the award and recognizes it as expense, net of estimated forfeitures, over the vesting or service period, as applicable, of the stock award using the straight-line method. The Company recognizes stock-based compensation over the vesting period for each separately vesting portion of a share-based award as if they were individual share-based awards. The Company estimates forfeitures at the time of grant and revises those estimates, if necessary, in subsequent periods if actual forfeitures differ from those estimates.

Employee benefit plan: The Company has a 401(k) savings plan covering its employees. Eligible employees may contribute through payroll deductions. The Company may match the employees' 401(k) contributions at the discretion of the Company's Board of Directors. Pursuant to a continuing resolution, in 2013, 2012, and 2011, the Company has matched a portion of the 401(k) contributions made by its employees. The amount contributed by the Company is equal to a maximum of 50% of employee contributions up to a maximum of 3% of an employee's salary. For the years ended December 31, 2013, 2012, and 2011, the Company contributed \$0.6 million, \$0.4 million, and \$0.3 million, respectively, for employees.

Leases: The Company leases office space and computer equipment used in its data centers. These leases are classified as either capital leases or operating leases, as appropriate. For the year ended December 31, 2011, \$0.2 million of amortization for assets acquired under capital leases, which terminated in 2011, was included in depreciation expense.

Income taxes: The Company accounts for income taxes under the asset and liability method, under which deferred tax assets, including net operating loss carryforwards, and liabilities are determined based on temporary differences between the book and tax bases of assets and liabilities. The Company periodically evaluates the likelihood of the realization of deferred tax assets and reduces the carrying amount of the deferred tax assets by a valuation allowance to the extent the Company believes a portion will not be realized. The Company considers

Table of Contents**BLUCORA, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Years Ended December 31, 2013, 2012, and 2011**

many factors when assessing the likelihood of future realization of the deferred tax assets, including the recent cumulative earnings experience by taxing jurisdiction, expectations of future taxable income, the carryforward periods available for tax reporting purposes, and other relevant factors. There is a wide range of possible judgments relating to the valuation of the Company's deferred tax assets.

Loss from discontinued operations and loss on sale of discontinued operations: On June 22, 2011, the Company sold its Mercantila e-commerce business to Zoo Stores, Inc. The results of operations from that business are reflected as discontinued operations for all periods presented (in thousands):

	Year ended December 31, 2011
Revenue from discontinued operations	\$ 16,894
Loss from discontinued operations before taxes	\$ (3,506)
Income tax benefit	1,253
Loss from discontinued operations, net of taxes	\$ (2,253)
Loss on sale of discontinued operations, net of an income tax benefit of \$5,092	\$ (7,674)

Loss from discontinued operations includes previously unallocated depreciation, amortization, stock-based compensation, income taxes, and other corporate expenses that were attributable to the e-commerce business.

Other comprehensive income: Comprehensive income includes net income plus items that are recorded directly to stockholders' equity, including the net change in unrealized gains and losses on cash equivalents, short-term and long-term investments, and certain derivative instruments. Included in the net change in unrealized gains and losses are realized gains or losses included in the determination of net income in the period realized. Amounts reclassified out of other comprehensive income into net income were determined on the basis of specific identification.

Concentration of credit risk: Financial instruments that potentially subject the Company to concentrations of credit risk consist primarily of cash equivalents, short-term investments, and trade receivables. These instruments are generally unsecured and uninsured. The Company places its cash equivalents and investments with major financial institutions. Accounts receivable are typically unsecured and are derived from revenues earned from customers primarily located in the United States operating in a variety of industries and geographic areas. The Company

Edgar Filing: BLUCORA, INC. - Form 10-K

performs ongoing credit evaluations of its customers and maintains allowances for potential credit losses.

The Company attempts to manage exposure to counterparty credit risk by only entering into agreements with major financial institutions which are expected to be able to fully perform under the terms of the agreement.

Supplier concentration risk: A material part of Monoprice's business is dependent on two vendors. These unrelated vendors accounted for \$6.7 million, or 19%, of Monoprice's inventory purchases during the period from August 22, 2013, the acquisition date, to December 31, 2013 and \$2.4 million, or 20%, of Monoprice's related accounts payable at December 31, 2013.

Revenue concentration: The Company derives a significant portion of its revenues from two Search Customers. Revenues from the top two Search Customers represented 74%, 84%, and 99% of revenues in each of

Table of Contents**BLUCORA, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Years Ended December 31, 2013, 2012, and 2011**

the years ended December 31, 2013, 2012, and 2011, respectively. At December 31, 2013, 2012, and 2011, two Search Customers accounted for more than 90% of the Company's accounts receivable balance.

Geographic revenue information, as determined by the location of the customer, is presented below (in thousands):

	Years ended December 31,		
	2013	2012	2011
United States	\$ 558,601	\$ 402,656	\$ 226,229
International	15,379	4,263	2,584
Total	\$ 573,980	\$ 406,919	\$ 228,813

Recent accounting pronouncements: Changes to GAAP are established by the Financial Accounting Standards Board (*FASB*) in the form of Accounting Standards Updates (*ASUs*) to the FASB's Accounting Standards Codification. The Company considers the applicability and impact of all recent ASUs. ASUs not listed below were assessed and determined to be either not applicable or are expected to have minimal impact on the Company's consolidated financial position and results of operations.

In February 2013, the FASB issued an update to the authoritative guidance related to the reporting of amounts reclassified out of accumulated other comprehensive income. This update required that significant reclassifications out of accumulated other comprehensive income and their corresponding effect on net income be reported and, in some cases, cross-referenced to related footnote disclosures. The Company adopted this guidance in the first quarter of 2013, and the adoption of these disclosure requirements did not have a material impact on its consolidated financial statements.

In July 2013, the FASB issued guidance on the presentation of unrecognized tax benefits when a net operating loss carryforward, a similar tax loss, or a tax credit carryforward exists at the reporting date. This new guidance is effective on a prospective basis for fiscal years and interim reporting periods within those years, beginning after December 15, 2013. The adoption of this guidance is not expected to have a material impact on the Company's consolidated financial statements.

Note 3: Business Combinations

Edgar Filing: BLUCORA, INC. - Form 10-K

Presented below is information regarding the Company's business combinations during the years ended December 31, 2013, 2012, and 2011, including information about the purchase price accounting from these transactions.

Balance Financial: On October 4, 2013, TaxACT acquired all of the equity of Balance Financial, a provider of web and mobile-based financial management software, for \$4.9 million in cash which includes a \$0.7 million escrow amount recorded in Other long-term liabilities for indemnifications related to general representations and warranties. The escrow period expires on June 3, 2015, at which time the amount, net of any losses, will be released. The acquisition of the Balance Financial business is strategic to TaxACT and was funded from the revolving credit loan under the TaxACT 2013 credit facility. See Note 8: Debt for further discussion of the TaxACT 2013 credit facility. The identifiable net assets acquired amounted to \$1.0 million, consisting primarily of deferred tax assets, and intangible assets acquired amounted to \$0.8 million, consisting primarily of internally-developed software and customer relationships both of which have finite lives. Goodwill amounted to

Table of Contents

BLUCORA, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Years Ended December 31, 2013, 2012, and 2011

\$3.1 million. Pro forma results of operations have not been presented because the effects of this acquisition were not material to the Company's consolidated results of operations.

Monoprice: On August 22, 2013, the Company acquired all of the outstanding stock of Monoprice, an online provider of self-branded electronics and accessories for both consumers and businesses (see Note 1: The Company and Basis of Presentation). The Company paid \$182.9 million, which was funded from available cash, after a \$0.4 million working capital adjustment in the fourth quarter of 2013. The acquisition was intended to diversify the Company's business model and expand its operations.

Preliminary valuations are as follows (in thousands):

	Fair Value
Tangible assets acquired	\$ 49,714
Liabilities assumed	(23,623)
Identifiable net assets acquired	\$ 26,091
Fair value adjustments to intangible assets:	
Customer relationships	\$ 30,900
Trade name	38,000
Fair value of intangible assets acquired	\$ 68,900
Purchase price:	
Cash paid	\$ 182,909
Less identifiable net assets acquired	(26,091)
Plus deferred tax liability related to intangible assets	27,683
Less fair value of intangible assets acquired	(68,900)
Excess of purchase price over net assets acquired, allocated to goodwill	\$ 115,601

The preliminary fair value determinations for assets acquired and liabilities assumed for this acquisition were based upon a preliminary valuation. Certain of our estimates and assumptions are subject to change as we obtain additional information for our estimates in future periods. The primary areas of the acquisition accounting that are not yet finalized relate to income and non-income based taxes, indemnification assets, and residual goodwill.

The Company incurred acquisition costs of \$0.7 million in 2013, which were recognized in General and administrative expense. The Company did not assume any equity awards or plans from Monoprice. Following the completion of the acquisition, the Company issued 27,152 options and 126,259 restricted stock units (*RSUs*), which are at levels consistent with other awards to Blucora subsidiary employees, and 243,750 performance-based RSUs to Monoprice's employees (see Note 11: Stock-Based Compensation). In addition, the sellers of Monoprice are entitled to federal and state tax refunds related to pre-acquisition tax periods pursuant to the purchase agreement (see Note 6: Balance Sheet Components).

The Company's estimates of the economic lives of the acquired assets are two years for the business-to-consumer customer relationships, seven years for the business-to-business customer relationships, approximately six years for the personal property assets, and the trade name is estimated to have an indefinite life. Goodwill consists largely of the ability to attract new customers and develop new technologies post-acquisition, which do not qualify for separate recognition. The Company does not expect that any of the goodwill arising from the Monoprice acquisition will be deductible for income tax purposes.

Table of Contents**BLUCORA, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Years Ended December 31, 2013, 2012, and 2011**

The gross contractual amount of trade accounts receivable acquired was \$3.2 million, which the Company has substantially collected. The Company recorded deferred revenue at a fair value of \$1.3 million as of the acquisition date. Prior to the acquisition, Monoprice had recorded deferred revenue at \$2.0 million.

For the period from the acquisition date to December 31, 2013, the Company's total revenues included \$54.3 million in revenue and a \$5.0 million operating income contribution from the Monoprice business.

Pro Forma Financial Information of Monoprice Acquisition (unaudited)

The financial information in the table below summarizes the combined results of operations of Blucora and Monoprice on a pro forma basis, for the period in which the acquisition occurred and the prior reporting period as though the companies had been combined as of the beginning of each period presented. This pro forma financial information is presented for informational purposes only and is not necessarily indicative of the results of operations that would have been achieved had the acquisition occurred at the beginning of each period presented. The pro forma condensed combined statement of operations for the year ended December 31, 2013 combines the historical results of operations of the Company and Monoprice for the year ended December 31, 2013 with the results of Monoprice for the period from January 1, 2013 to the acquisition date. The following amounts are in thousands:

	Years ended December 31,	
	2013	2012
Revenues	\$ 663,900	\$ 525,027
Net income (loss)	\$ 25,637	\$ 22,874

TaxACT: On January 31, 2012, the Company acquired all of the outstanding stock of TaxACT, which operates the TaxACT tax preparation online service and software business (see Note 1: The Company and Basis of Presentation). The Company paid \$287.5 million in cash, less certain transaction expenses. The TaxACT acquisition was funded from the Company's cash reserves and from the TaxACT 2012 credit facility, of which \$100.0 million was drawn at the transaction's close. See Note 8: Debt for further discussion of the TaxACT 2012 credit facility. The acquisition was intended to diversify the Company's business model and expand its operations.

BLUCORA, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Years Ended December 31, 2013, 2012, and 2011

Final valuations are as follows (in thousands):

	Fair Value
Tangible assets acquired	\$ 22,465
Liabilities assumed	(17,759)
Identifiable net assets acquired	\$ 4,706
Fair value adjustments to intangible assets:	
Customer relationships	\$ 101,400
Proprietary technology	29,800
Trade name	19,499
Fair value of intangible assets acquired	\$ 150,699
Purchase price:	
Cash paid	\$ 287,500
Less identifiable net assets acquired	(4,706)
Plus deferred tax liability related to intangible assets	53,380
Less fair value of intangible assets acquired	(150,699)
Excess of purchase price over net assets acquired, allocated to goodwill	\$ 185,475

The Company recorded acquisition costs of \$1.1 million in 2012 and \$0.3 million in 2011, which were recognized in General and administrative expense. The Company incurred \$2.3 million of debt origination costs related to the credit facility used to fund the acquisition, a portion of which was recorded as loss on debt extinguishment and modification expense in Other loss, net and the remainder of which is being amortized to interest expense over the term of the credit facility. The Company did not assume any equity awards or plans from TaxACT. Following the completion of the acquisition, the Company issued 380,000 options and 167,000 RSUs to TaxACT's employees as an incentive for future services and at levels consistent with other employee awards (see Note 11: Stock-Based Compensation). In addition, the sellers of TaxACT are entitled to certain federal tax refunds related to pre-acquisition tax periods pursuant to the purchase agreement (see Note 6: Balance Sheet Components).

The Company's estimates of the economic lives of the acquired assets are eight years for the customer relationships, four years for the proprietary technology, approximately three years for the personal property assets, and the trade name is estimated to have an indefinite life. Goodwill consists largely of the ability to attract new customers and develop new technologies post acquisition, which do not qualify for separate recognition. The Company determined that no portion of the goodwill arising from the TaxACT acquisition will be deductible for income tax purposes.

Edgar Filing: BLUCORA, INC. - Form 10-K

The gross contractual amount of trade accounts receivable acquired was \$9.4 million, all of which has been collected. The Company recorded deferred revenue associated with the TaxACT business's data storage and retrieval service at a fair value of \$0.3 million as of the acquisition date. Prior to the acquisition, TaxACT had recorded deferred revenue at \$5.1 million.

For the period from the acquisition date to December 31, 2012, the Company's total revenues included \$62.1 million in revenue and a \$30.1 million operating income contribution from the TaxACT business.

Table of Contents**BLUCORA, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Years Ended December 31, 2013, 2012, and 2011***Pro Forma Financial Information of TaxACT Acquisition (unaudited)*

The financial information in the table below summarizes the combined results of operations of Blucora and TaxACT on a pro forma basis, for the period in which the acquisition occurred and the prior reporting period as though the companies had been combined as of the beginning of each period presented. This pro forma financial information is presented for informational purposes only and is not necessarily indicative of the results of operations that would have been achieved had the acquisition occurred at the beginning of each period presented. The pro forma condensed combined statement of operations for the year ended December 31, 2012 combines the historical results of the Company for the year ended December 31, 2012 with the results of TaxACT for the month ended January 31, 2012. The following amounts are in thousands:

	Years ended December 31,	
	2012	2011

Total assets and liabilities at fair value	\$ 122,697	\$	\$ 131,261	\$ (8,564)

The Company also had financial instruments that were not measured at fair value. See Note 8: Debt for details.

As discussed in Note 10: Stockholders Equity, the Warrant was exercised on November 21, 2013. The change in the fair value of the Warrant during 2013 through the exercise date was \$11.7 million, which was recorded in Other loss, net. The derivative instrument liability balance of \$20.2 million as of the exercise date was settled through Additional paid-in capital. As discussed in Note 8: Debt, the interest rate swap was

terminated at break-even on September 10, 2013 and had no effect on income as it did not have any hedging ineffectiveness.

Table of Contents**BLUCORA, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Years Ended December 31, 2013, 2012, and 2011**

As of December 31, 2013 and 2012, all investments classified as available-for-sale had maturity dates of within one year as follows (in thousands):

	Amortized Cost	Gross unrealized gains	Gross unrealized losses	Fair value
As of December 31, 2013	\$ 203,479	\$ 24	\$ (23)	\$ 203,480
As of December 31, 2012	\$ 94,029	\$ 36	\$ (55)	\$ 94,010

Note 6: Balance Sheet Components

Prepaid expenses and other current assets, net consisted of the following as of December 31, 2013 and 2012 (in thousands):

	2013	2012
Prepaid expenses and other current assets, net		
Prepaid expenses	\$ 4,370	\$ 5,268
Other current assets, net	5,404	5,643
Total prepaid expenses and other current assets, net	\$ 9,774	\$ 10,911

Property and equipment consisted of the following as of December 31, 2013 and 2012 (in thousands):

	2013	2012
Property and equipment		
Computer equipment and data center	\$ 10,792	\$ 13,262
Purchased software	6,153	5,046
Internally developed software	7,166	4,691

	33,090	28,769

Edgar Filing: BLUCORA, INC. - Form 10-K

Accumulated depreciation	(17,985)	(22,636)
	15,105	6,133
Capital projects in progress	1,003	1,400
Total property and equipment	\$ 16,108	\$ 7,533

Total depreciation expense was \$4.5 million, \$3.8 million, and \$4.9 million for the years ended December 31, 2013, 2012, and 2011, respectively.

At December 31, 2013 and 2012, unamortized internally-developed software was \$3.2 million and \$1.4 million, respectively, and for each of the years ended December 31, 2013, 2012, and 2011, the Company recorded depreciation expense for internally-developed software of \$0.9 million.

Table of Contents**BLUCORA, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Years Ended December 31, 2013, 2012, and 2011**

Accrued expenses and other current liabilities consisted of the following as of December 31, 2013 and 2012 (in thousands):

	2013	2012
Accrued expenses and other current liabilities		
Salaries and related expenses	\$ 7,708	\$ 5,185
Accrued content costs	4,132	3,017
Accrued advertising	6,155	1,886
Accrued interest on Notes (see Note 8)	2,138	
Tax refunds payable to sellers	6,814	925
Earn-out contingent liability	194	1,101
Other	3,968	1,166
Total accrued expenses and other current liabilities	\$ 31,109	\$ 13,280

Pursuant to the Monoprice and TaxACT purchase agreements, the sellers of Monoprice and TaxACT are entitled to certain tax refunds related to pre-acquisition tax periods. The Company determined that federal and/or state tax refunds were due and, as a result, recorded Tax refunds payable to sellers and offsetting receivables in Other receivables on the consolidated balance sheets.

Note 7: Derivative Instruments and Hedging Activities

Derivative instruments on the consolidated balance sheets consisted of the following (in thousands):

	Balance sheet location	December 31,	
		2013	2012
Derivative liabilities			
Derivative designated as a hedging instrument:			
Interest rate contract (interest rate swap, see Note 8)	Current liabilities - derivative instruments	\$	\$ 410
Derivative not designated as a hedging instrument:			
Equity contract (the Warrant, see Note 10)	Current liabilities - derivative instruments		8,564
Total derivative liabilities		\$	\$ 8,974

Edgar Filing: BLUCORA, INC. - Form 10-K

The derivative instrument in a hedging relationship (the interest rate swap) had no effect on income for any and all periods presented, as it did not have any hedging ineffectiveness. As discussed in Note 8: Debt, the interest rate swap was terminated at break-even on September 10, 2013.

The effect on income of the derivative instrument not designated as a hedging instrument (the Warrant) is summarized below (in thousands):

	Statement of comprehensive income location	Years ended December 31,	
		2013	2012
Equity contract (the Warrant, see Note 10)	Other loss, net	\$ (11,652)	\$ (2,346)

Table of Contents**BLUCORA, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Years Ended December 31, 2013, 2012, and 2011**

As discussed in Note 10: Stockholders' Equity, the Warrant was exercised on November 21, 2013. Other loss, net for the year ended December 31, 2013 included changes in the fair value of the Warrant through the exercise date. The derivative instrument liability balance of \$20.2 million as of the exercise date was settled through Additional paid-in capital.

Note 8: Debt

The Company's debt consisted of the following (in thousands):

	December 31, 2013			December 31, 2012		
	Principal amount	Unamortized discount	Net carrying value	Principal amount	Unamortized discount	Net carrying value
Monoprice 2013 credit facility	\$ 50,000	\$ (288)	\$ 49,712	\$	\$	\$
TaxACT 2013 credit facility	71,384		71,384			
Convertible Senior Notes	201,250	(19,667)	181,583			
TaxACT 2012 credit facility				74,496	(628)	73,868
Total debt	\$ 322,634	\$ (19,955)	\$ 302,679	\$ 74,496	\$ (628)	\$ 73,868

Monoprice 2013 credit facility: On November 22, 2013, Monoprice and Monoprice Holdings, Inc. entered into an agreement with a syndicate of lenders for the purposes of post-transaction financing of the Monoprice acquisition and providing future working capital flexibility for Monoprice. The Monoprice credit facility consists of a \$30.0 million revolving credit loan which includes up to \$5.0 million under a letter of credit and up to \$5.0 million in swingline loans and a \$40.0 million term loan for an aggregate \$70.0 million credit facility. The final maturity date of the credit facility is November 22, 2018. Monoprice's obligations under the credit facility are guaranteed by Monoprice Holdings and are secured by the assets of the Monoprice business.

Monoprice initially borrowed \$50.0 million under the credit facility, which was used to pay a dividend to Blucora and to pay certain expenses and fees related to the credit facility. Monoprice has the right to permanently reduce, without premium or penalty, the entire credit facility at any time or portions of the credit facility in an aggregate principal amount not less than \$1.0 million or any whole multiple of \$1.0 million in excess thereof (for swingline loans, the aggregate principal amount is not less than \$0.1 million and any whole multiple of \$0.1 million in excess thereof). The interest rate on amounts borrowed under the credit facility is variable, based upon, at the election of Monoprice, either LIBOR plus a margin of between 2.75% and 3.25%, payable as of the end of each interest period, or a variable rate plus a margin of between 1.75% and 2.25%, payable quarterly in arrears. In each case, the applicable margin within the range depends upon Monoprice's ratio of leverage to EBITDA over the previous four quarters. The credit facility includes financial and operating covenants with respect to certain ratios, including leverage

Edgar Filing: BLUCORA, INC. - Form 10-K

ratio and fixed charge coverage ratio, which are defined further in the agreement. As of December 31, 2013, Monoprice was in compliance with all of the financial and operating covenants. As of December 31, 2013, the credit facility's gross carrying value of \$50.0 million approximated its fair value as it is a variable rate instrument and the current applicable margin approximates current market conditions.

TaxACT 2013 credit facility: On August 30, 2013, TaxACT entered into an agreement with a syndicate of lenders for the purpose of refinancing the 2012 credit facility on more favorable terms. The new credit facility consists of revolving credit loans, up to \$10.0 million in swingline loans, and up to \$5.0 million under a letter of credit, which in the aggregate represent a \$100.0 million revolving credit commitment that reduces to

Table of Contents**BLUCORA, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Years Ended December 31, 2013, 2012, and 2011**

\$90.0 million on August 30, 2014, to \$80.0 million on August 30, 2015, and to \$70.0 million on August 30, 2016. The final maturity date of the credit facility is August 30, 2018. TaxACT's obligations under the credit facility are guaranteed by TaxACT Holdings, Inc. and are secured by the assets of the TaxACT business and the TaxACT equity owned by TaxACT Holdings.

TaxACT borrowed approximately \$71.4 million under the credit facility, of which \$65.4 million was used to pay off the 2012 credit facility (as described below), accrued interest, and certain expenses and fees related to the agreement and an additional \$6.0 million was borrowed in October 2013. The Company has the right to permanently reduce, without premium or penalty, the entire credit facility at any time or portions of the credit facility in an aggregate principal amount not less than \$3.0 million or any whole multiple of \$1.0 million in excess thereof. The interest rate on amounts borrowed under the credit facility is variable and payable as of the end of each interest period, based upon, at the election of TaxACT, either LIBOR plus a margin of between 1.75% and 2.5%, or a Base Rate plus a margin of between 0.75% and 1.5%, in each case with the applicable margin within the range dependent upon TaxACT's ratio of leverage to EBITDA over the previous four quarters. The credit facility includes financial and operating covenants with respect to certain ratios, including leverage ratio and fixed charge coverage ratio, which are defined further in the agreement, as well as certain restrictions on TaxACT's payments to the Company. As of December 31, 2013, the Company was in compliance with all of the financial and operating covenants. As of December, 2013, the credit facility's gross carrying value of \$71.4 million approximated its fair value as it is a variable rate instrument and the current applicable margin approximates current market conditions.

The Company performed an analysis by creditor to determine whether the refinancing would be recorded as an extinguishment or a modification of debt and, as a result of this analysis, recognized a loss on partial extinguishment of debt comprised of the following (in thousands):

Fees paid to creditors in connection with the refinance, including arrangement fee, classified as extinguishment	\$ 567
Deferred financing costs on extinguished debt	726
Debt discount on extinguished debt	300
Total	\$ 1,593

In connection with amounts classified as an extinguishment, the Company recorded \$28,000 in deferred debt issuance costs, which are being amortized over the term of the new credit facility using the effective interest method as an adjustment to interest expense. The Company also determined that the remaining portion of the refinancing was a modification, and the Company determined a new effective interest rate based on the carrying amount of the original debt and the revised cash flows. Approximately \$0.6 million, which is comprised of \$0.4 million in deferred financing costs and \$0.2 million in unamortized debt discount related to the prior credit agreement, are being amortized as an adjustment to interest expense over the remaining term of the new credit facility using the effective interest method. Similarly, additional creditor-related fees incurred of \$0.1 million related to the modification are being amortized over the term of the new credit facility using the effective interest method.

Edgar Filing: BLUCORA, INC. - Form 10-K

Convertible Senior Notes: On March 15, 2013, the Company issued \$201.25 million aggregate principal amount of its 4.25% Notes, inclusive of the underwriters' exercise in full of their over-allotment option of \$26.25 million. The Notes mature on April 1, 2019, unless earlier purchased, redeemed, or converted in accordance with the terms, and bear interest at a rate of 4.25% per year, payable semi-annually in arrears on April 1 and October 1 beginning on October 1, 2013. The Company received net proceeds from the offering of approximately \$194.8 million after adjusting for debt issuance costs, including the underwriting discount.

Table of Contents

BLUCORA, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Years Ended December 31, 2013, 2012, and 2011

The Notes were issued under an indenture dated March 15, 2013 (the *Indenture*) by and between the Company and The Bank of New York Mellon Trust Company, N.A., as Trustee. There are no financial or operating covenants relating to the Notes.

Beginning July 1, 2013 and prior to the close of business on September 28, 2018, holders may convert all or a portion of the Notes at their option, in multiples of \$1,000 principal amount, under the following circumstances:

during any fiscal quarter commencing July 1, 2013, if the last reported sale price of the Company's common stock for at least 20 trading days during a period of 30 consecutive trading days ending on the last trading day of the immediately preceding calendar quarter is greater than or equal to 130% of the conversion price on each applicable trading day, and based on this, as of December 31, 2013, the Notes were convertible;

during the five business day period after any five consecutive trading day period (the *measurement period*) in which the trading price per \$1,000 principal amount of the Notes for each trading day of the measurement period was less than 98% of the product of the last reported sales price of the Company's common stock and the conversion rate on each trading day;

if the Company calls any or all of the Notes for redemption;

upon the occurrence of specified corporate events, including a merger or a sale of all or substantially all of the Company's assets.

On or after October 1, 2018 and until the close of business on March 28, 2019, holders may convert their Notes, in multiples of \$1,000 principal amount, at the option of the holder.

The conversion ratio for the Notes is initially 0.0461723, equivalent to an initial conversion price of approximately \$21.66 per share of the Company's common stock. The conversion ratio is subject to customary adjustment for certain events as described in the Indenture.

At the time the Company issued the Notes, the Company was only permitted to settle conversions with shares of its common stock. The Company received shareholder approval at its annual meeting in May 2013 to allow for flexible settlement, which provided the Company with the option to settle conversions in cash, shares of common stock, or any combination thereof. The Company's intention is to satisfy conversion of the Notes with cash for the principal amount of the debt and shares of common stock for any related conversion premium. As of December 31, 2013, the conversion premium amounted to approximately \$67.3 million, based on the 25-day volume weighted average price methodology dictated by the Indenture.

Beginning April 6, 2016, the Company may, at its option, redeem for cash all or part of the Notes plus accrued and unpaid interest. If the Company undergoes a fundamental change (as described in the Indenture), holders may require the Company to repurchase for cash all or part of their Notes in principal amounts of \$1,000 or an integral multiple thereof. The fundamental change repurchase price will be equal to 100% of the principal amount of the Notes to be repurchased, plus accrued and unpaid interest. However, if a fundamental change occurs and a holder elects to convert the Notes, the Company will, under certain circumstances, increase the applicable conversion rate for the Notes surrendered for conversion by a number of additional shares of common stock based on the date on which the fundamental change occurs or becomes effective and the price paid per share of the Company's common stock in the fundamental change as specified in the Indenture.

Table of Contents**BLUCORA, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Years Ended December 31, 2013, 2012, and 2011**

The Notes are unsecured and unsubordinated obligations of the Company and rank senior in right of payment to any of the Company's indebtedness that is expressly subordinated in right of payment to the Notes, and equal in right of payment to any of the Company's existing and future unsecured indebtedness that is not subordinated. The Notes are effectively junior in right of payment to any of the Company's secured indebtedness (to the extent of the value of assets securing such indebtedness) and structurally junior to all existing and future indebtedness and other liabilities, including trade payables, of the Company's subsidiaries. The Indenture does not limit the amount of debt that the Company or its subsidiaries may incur, including senior secured indebtedness.

The Notes may be settled in combination of cash or shares of common stock given the flexible settlement option. As a result, the Notes contain liability and equity components, which were bifurcated and accounted for separately. The liability component of the Notes, as of the issuance date, was calculated by estimating the fair value of a similar liability issued at a 6.5% effective interest rate, which was determined by considering the rate of return investors would require in the Company's debt structure. The amount of the equity component was calculated by deducting the fair value of the liability component from the principal amount of the Notes, resulting in the initial recognition of \$22.3 million as the debt discount recorded in additional paid-in capital for the Notes. The carrying amount of the Notes is being accreted to the principal amount over the remaining term to maturity, and the Company is recording corresponding interest expense. The Company incurred debt issuance costs of \$6.4 million related to the Notes and allocated \$5.7 million to the liability component of the Notes. These costs are being amortized to interest expense over the six-year term of the Notes or the date of conversion, if any.

The following table sets forth total interest expense for the year ended December 31, 2013 related to the Notes (in thousands):

Contractual interest expense (Cash)	\$ 6,795
Amortization of debt issuance costs (Non-cash)	684
Accretion of debt discount (Non-cash)	2,674
Total interest expense	\$ 10,153
Effective interest rate of the liability component	7.32%

The fair value of the principal amount of the Notes as of December 31, 2013 was \$298.8 million, based on the last quoted active trading price, a Level 1 fair value measurement, as of that date.

TaxACT 2012 credit facility: On January 31, 2012, in conjunction with the TaxACT acquisition, TaxACT entered into an agreement with a syndicate of lenders for a \$105.0 million credit facility, consisting of a \$95.0 million term loan and up to \$10.0 million under a revolving credit facility. On January 31, 2012, TaxACT borrowed \$95.0 million of term debt with an original maturity of January 31, 2017 and \$5.0 million under the revolving credit facility. A portion of any excess cash flows, as the term was defined in the credit agreement, were to be used to make a mandatory prepayment on the term loan. Amounts outstanding under the term loan could be prepaid without penalty. During 2012, TaxACT

Edgar Filing: BLUCORA, INC. - Form 10-K

repaid an aggregate of \$25.5 million of the debt, including the balance of the revolving credit facility. In April 2013, TaxACT repaid an additional \$10.0 million of the outstanding debt, and in August 2013, the remaining amount of \$64.5 million was repaid in connection with the refinancing of this credit agreement as discussed in TaxACT 2013 credit facility above.

The interest rate on amounts borrowed under the term loan and the revolving loan was variable and payable as of the end of each interest period, based upon, at the election of TaxACT, the Alternate Base Rate or the

Table of Contents**BLUCORA, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Years Ended December 31, 2013, 2012, and 2011**

LIBOR, plus the Applicable Margin (as such terms were defined in the credit agreement). The Applicable Margin was dependent on the consolidated Total Leverage Ratio (as defined in the credit agreement) of TaxACT and ranged from 2.0% to 3.5% for borrowings tied to the Alternative Base Rate and 3.0% to 4.5% for borrowings tied to the LIBOR.

Additionally, the Company was required to hedge a portion of the interest rate risk associated with the term debt, and that requirement was met on May 1, 2012 by the purchase of an interest rate swap with a financial institution which fixed the LIBOR portion at 0.85% for \$37.5 million of the amount outstanding under the term loan. The swap was terminated at break-even on September 10, 2013.

Note 9: Commitments and Contingencies

The Company's contractual commitments were as follows for years ending December 31 (in thousands):

	2014	2015	2016	2017	2018	Thereafter	Total
Operating lease commitments	\$ 2,687	\$ 2,413	\$ 1,894	\$ 1,933	\$ 1,783	\$ 2,546	\$ 13,256
Purchase commitments	646	437	92	62			1,237
Debt commitments						201,250	
	8,000	8,000	8,000	8,000	89,384		322,634
Interest on Notes	8,553	8,553	8,553	8,553	8,553	4,277	47,042
Escrow for acquisition-related indemnifications		735					735
Total	\$ 19,886	\$ 20,138	\$ 18,539	\$ 18,548	\$ 99,720	\$ 208,073	\$ 384,904

Operating lease commitments: The Company has non-cancelable operating leases for its facilities. The leases run through 2020. Rent expense under operating leases totaled \$2.0 million, \$1.8 million, and \$1.8 million for the years ended December 31, 2013, 2012, and 2011, respectively.

Purchase commitments: The Company's purchase commitments consist primarily of non-cancelable service agreements for its data centers.

Debt commitments and interest on Notes: The Company's debt commitments are based upon contractual payment terms and consist of the outstanding principal related to the Monoprice credit facility, the TaxACT credit facility, and the Notes. The Company may repay the amounts

Edgar Filing: BLUCORA, INC. - Form 10-K

outstanding under the Monoprice and TaxACT credit facilities before their terms are complete, depending upon the cash generated by the respective businesses, and under the Notes based upon holders exercising their conversion option. For further detail regarding the credit facilities and the Notes, see Note 8: Debt.

Escrow for acquisition-related indemnifications: The Company holds escrow for acquisition-related indemnifications around general representations and warranties in connection with the Balance Financial acquisition. See Note 3: Business Combinations for further discussion of the escrow.

Collateral pledged: The Company has pledged a portion of its cash as collateral for certain of its property lease-related banking arrangements. At December 31, 2013, the total amount of collateral pledged under these standby letters of credit was \$0.9 million.

Off-balance sheet arrangements: The Company has no off-balance sheet arrangements other than operating leases.

Table of Contents

BLUCORA, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Years Ended December 31, 2013, 2012, and 2011

Litigation: From time to time, the Company is subject to various legal proceedings or claims that arise in the ordinary course of business. Although the Company cannot predict the outcome of these matters with certainty, the Company's management does not believe that the disposition of these ordinary course matters will have a material adverse effect on the Company's financial position, results of operations, or cash flows.

Note 10: Stockholders' Equity

Stock incentive plan: The Company may grant non-qualified stock options, stock, RSUs, and stock appreciation rights to employees, non-employee directors, and consultants.

The Company granted options and RSUs during 2013, 2012, and 2011 under the Company's Restated 1996 Flexible Stock Incentive Plan. Options and RSUs generally vest over a period of three years, with one-third vesting one year from the date of grant and the remainder vesting ratably thereafter on a semi-annual basis, and expire seven years from the date of grant. There are a few exceptions to this vesting schedule, which provide for vesting at different rates or based on achievement of performance or market targets (the latter are known as market stock units or *MSUs*).

The Company issues new shares upon the exercise of options and upon the vesting of RSUs. If an option or RSU is surrendered or otherwise unused, the related shares will continue to be available.

Stock sale and warrant: On August 23, 2011, the Company added Andrew M. Snyder to its Board of Directors and entered into agreements to sell stock and issue a warrant to Cambridge Information Group I LLC (*CIG*), the investment entity of which Mr. Snyder is President. In connection with those agreements, Blucora sold to CIG 764,192 newly-issued shares of unregistered Blucora common stock at a purchase price of \$9.16 per share and issued to CIG a warrant to purchase 1.0 million shares of Blucora common stock, exercisable at a price of \$9.62 per share. The Warrant originally was considered stock-based compensation and was scheduled to expire on August 23, 2014, but the completion of the TaxACT acquisition on January 31, 2012 was an event under the Warrant's terms that extended the expiration date to the earlier of August 23, 2017 or the effective date of a change of control of Blucora. Subsequent to the extension, the Company treated the award as a derivative instrument (see Note 7: Derivative Instruments and Hedging Activities). The modification date fair value previously recognized in Additional paid-in capital of \$6.2 million was classified as a current liability, and the Warrant's fair value was determined each reporting period with gains or losses related to the change in fair value recorded in Other loss, net. The Company recorded \$6.6 million in total expense relating to the modification and subsequent change in fair value for the Warrant for the year ended December 31, 2012. On November 21, 2013, CIG exercised the Warrant and purchased 1.0 million shares of Blucora common stock for an aggregate exercise price of \$9.6 million. As discussed more fully in Note 5: Fair Value Measurements and Note 7: Derivative Instruments and Hedging Activities, the related derivative instrument liability balance of \$20.2 million was settled through Additional paid-in capital.

1998 Employee Stock Purchase Plan (ESPP): The ESPP permits eligible employees to contribute up to 15% of their base earnings toward the twice-yearly purchase of Company common stock, subject to an annual maximum dollar amount. The purchase price is the lesser of 85% of the fair market value of common stock on the first day or on the last day of an offering period. An aggregate of 1,360,000 shares of common stock are authorized for issuance under the ESPP. Of this amount, 379,236 shares were available for issuance. The Company issues new shares upon purchase through the ESPP.

Table of Contents**BLUCORA, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Years Ended December 31, 2013, 2012, and 2011**

Stock repurchase program: In February 2013, the Company's Board of Directors approved a stock repurchase plan whereby the Company may purchase up to \$50.0 million of its common stock in open-market transactions through February 2015. Repurchased shares will be retired and resume the status of authorized but unissued shares of common stock. During the year ended December 31, 2013, the Company purchased 417,159 shares in open-market transactions at a total cost, exclusive of purchase and administrative costs, of \$10.0 million and an average price of \$23.95 per share. As of December 31, 2013, the Company may repurchase up to an additional \$40.0 million of its common stock under the repurchase program.

Other comprehensive income: The following table provides information about activity in other comprehensive income during the period from January 1, 2011 to December 31, 2013 (in thousands):

	Unrealized gain (loss) on investments	Unrealized gain (loss) on derivative instrument	Total
Balance as of January 1, 2011	\$ (2)	\$	\$ (2)
Other comprehensive income	34		34
Balance as of December 31, 2011	32		32
Other comprehensive loss	(42)	(266)	(308)
Balance as of December 31, 2012	(10)	(266)	(276)
Other comprehensive income	10	266	276
Balance as of December 31, 2013	\$	\$	\$

Note 11: Stock-Based Compensation

A summary of the general terms of stock options, RSUs, and MSUs at December 31, 2013 was as follows:

Number of shares authorized for awards	8,816,797
Options, RSUs, and MSUs outstanding	4,905,167
Options, RSUs, and MSUs expected to vest	4,534,038
Options, RSUs, and MSUs available for grant	3,911,630

Edgar Filing: BLUCORA, INC. - Form 10-K

During 2013, the following activity occurred under the Company's stock incentive plans:

	Options	Weighted average exercise price	Intrinsic value (in thousands)	Weighted average remaining contractual term (in years)
<i>Stock options:</i>

Table of Contents**BLUCORA, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Years Ended December 31, 2013, 2012, and 2011**

The Company has included the following amounts for stock-based compensation expense in the consolidated statements of comprehensive income for the years ended December 31, 2013, 2012, and 2011 (amounts in thousands):

	2013	2012	2011
Services cost of revenues	\$ 662	\$ 558	\$ 286
Engineering and technology	1,351	1,180	821
Sales and marketing	2,335	1,909	1,002
General and administrative	7,179	9,576	5,579
Total	\$ 11,527	\$ 13,223	\$ 7,688
Discontinued operations	\$	\$	\$ (159)
Excluded and capitalized as part of internal-use software	115	121	206

In May 2012, the Company granted 190,000 stock options to certain employees who perform acquisition-related activities. The awards' vestings were predicated on completing qualified acquisitions under the terms of the awards. No expense was recognized in 2012, as a qualified acquisition did not occur. The completion of the Monoprice acquisition on August 22, 2013 constituted a qualified acquisition under the terms of the awards. The vestings of the awards resulted in a charge of \$0.5 million to stock-based compensation expense in 2013, which was classified in General and administrative expense.

In October 2011, the Company granted 200,000 stock options to a non-employee consultant who performed acquisition-related activities. The award's vesting was predicated on completing a qualified acquisition under the terms of the award. No expense was recognized in 2011, as a qualified acquisition did not occur. The completion of the TaxACT acquisition on January 31, 2012 constituted a qualified acquisition under the terms of the award. The vesting of the award resulted in a charge of \$0.9 million to stock-based compensation expense in 2012, which was classified in General and administrative expense.

Stock-based compensation expense for the year ended December 31, 2011 included \$1.9 million in General and administrative expense for the Warrant issued in August 2011. As discussed in Note 10: Stockholders' Equity, the acquisition of the TaxACT business on January 31, 2012 fulfilled the Warrant agreement's remaining performance condition and extended the Warrant's expiration date. The extension of the Warrant's term was a modification that resulted in a \$4.3 million charge to stock-based compensation expense, equal to the increase in the Warrant's fair value, and was recognized in General and administrative expense in the first quarter of 2012. Subsequent to the modification, the Company treated the Warrant as a derivative instrument.

Table of Contents**BLUCORA, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Years Ended December 31, 2013, 2012, and 2011**

To estimate stock-based compensation expense, the Company used the Black-Scholes-Merton valuation method for all but the MSUs, for which the Monte Carlo valuation method was used, with the following assumptions for equity awards granted:

	Years ended December 31,		
	2013	2012	2011
Stock option grants:			
Risk-free interest rate	0.25% - 1.06%	0.26% - 1.57%	0.25% - 1.58%
Expected dividend yield	0%	0%	0%
Expected volatility	40% - 46%	40% - 48%	40% - 50%
Expected life	3.2 years	3.3 years	3.0 years
Non-employee stock option grant:			
Risk-free interest rate		0.26%	
Expected dividend yield		0%	
Expected volatility		38% - 41%	
Expected life		1.6 - 2.2 years	
MSU grants:			
Risk-free interest rate			0.15%
Blucora expected dividend yield			0%
iShares Russell 2000 Index expected dividend yield			1.08%
Blucora closing stock price			\$8.74
iShares Russell 2000 Index closing price			\$82.29
Blucora expected volatility			37.4%
iShares Russell 2000 Index expected volatility			20.3%
Measurement period			1.0 years
Warrant grant:			
Risk-free interest rate		0.95%	0.46%
Expected dividend yield		0%	0%
Expected volatility		46%	39%
Expected life		5.6 years	2.0 years

The risk-free interest rate was based on the implied yield available on U.S. Treasury issues with an equivalent remaining term. The Company last paid a dividend in 2008 but does not expect to pay recurring dividends. The expected volatility was based on historical volatility of the Company's stock for the related expected life of the award. The expected life of the award was based on historical experience, including historical post-vesting termination behavior.

Table of Contents**BLUCORA, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Years Ended December 31, 2013, 2012, and 2011**

As of December 31, 2013, total unrecognized stock-based compensation expense related to unvested stock awards is as follows:

	Expense (in thousands)	Weighted average period over which to be recognized (in years)
Stock options	\$ 2,192	1.3
RSUs	5,756	1.3
MSUs	28	0.4
	\$ 7,976	1.3

Note 12: Segment Information

The Company changed its segment reporting structure as a result of the TaxACT acquisition on January 31, 2012 and again as a result of the Monoprice acquisition on August 22, 2013. The Search segment is the InfoSpace business, the Tax Preparation segment is the TaxACT business, and the E-Commerce segment is the Monoprice business. The Company's chief executive officer is its chief operating decision maker and reviews financial information presented on a disaggregated basis. This information is used for purposes of allocating resources and evaluating financial performance.

The Company does not allocate certain general and administrative costs (including personnel and overhead costs), stock-based compensation, depreciation, and amortization of intangible assets to the reportable segments. Such amounts are reflected in the table under the heading Corporate-level activity. In addition, the Company does not allocate other loss, net and income tax benefit (expense) to the reportable segments. The Company does not account for, and does not report to management, its assets or capital expenditures by segment other than goodwill and intangible assets used for impairment analysis purposes.

Information on reportable segments currently presented to the Company's chief operating decision maker and a reconciliation to consolidated net income for 2013, 2012, and 2011 are presented below (in thousands):

Years ended December 31,		
2013	2012	2011

Edgar Filing: BLUCORA, INC. - Form 10-K

Revenues:

Income from continuing operations	24,399	22,526	31,521
Loss from discontinued operations, net of tax			(9,927)
Net income	\$ 24,399	\$ 22,526	\$ 21,594

Table of Contents**BLUCORA, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Years Ended December 31, 2013, 2012, and 2011****Note 13: Other Loss, Net**

Other loss, net for the years ended December 31, 2013, 2012, and 2011 consisted of the following (in thousands):

	2013	2012	2011
Interest income	\$ (300)	\$ (131)	\$ (369)
Interest expense (see Note 8)	9,463	3,522	
Amortization of debt issuance costs (see Note 8)	1,108	820	
Accretion of debt discounts (see Note 8)	2,838	325	
Loss on debt extinguishment and modification expense (see Note 8)	1,593		
Loss on derivative instrument (see Note 7)	11,652	2,346	
Impairment of equity investment in privately-held company	3,711		
Increase (decrease) in fair value of earn-out contingent liability	(300)		3,000
Gain on contingency resolution			(1,500)
Other	(142)	(205)	115
Other loss, net	\$ 29,623	\$ 6,677	\$ 1,246

In 2013, in connection with the Company's review of its equity method investments for other-than-temporary impairment, the Company determined that its equity investment in a privately-held company had experienced a decline in value which was other-than-temporary, due to recurring losses from operations, significant personnel reductions, and a change in the underlying business model. Accordingly, the Company wrote down the \$3.7 million carrying value of the investment to zero, resulting in a loss.

The financial performance of Make The Web Better, acquired on April 1, 2010, was greater than expected. As a result, the fair value of the related contingent consideration increased, and an additional charge of \$3.0 million was recorded in the year ended December 31, 2011. Also in 2011, the Company recorded a gain of \$1.5 million related to the resolution of a contingent liability.

Note 14: Income Taxes

Income tax expense (benefit) from continuing operations consisted of the following for the years ended December 31, 2013, 2012, and 2011 (in thousands):

Edgar Filing: BLUCORA, INC. - Form 10-K

	2013	2012	2011

Table of Contents**BLUCORA, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Years Ended December 31, 2013, 2012, and 2011**

At December 31, 2013, the Company evaluated the need for a valuation allowance for certain deferred tax assets based upon its assessment of whether it is more likely than not that the Company will generate sufficient future taxable income necessary to realize the deferred tax benefits. The Company considered all available evidence, both positive and negative, in assessing the need for a valuation allowance, such as the profitability of each of the Company's businesses, the reversal of deferred tax liabilities, and forecasted future taxable income. The Company weighed each piece of evidence in a qualitative and quantitative analysis and, based upon its judgment, determined that the weight of the positive evidence was sufficient to conclude that the Company will more likely than not realize its U.S. deferred tax assets of an ordinary nature. The Company's most relevant positive evidence was its recent history of profitability and its projections of sufficient taxable income to offset deductible temporary differences and non-equity based carryforwards. The financial projections supporting the Company's conclusion contain significant assumptions and estimates of future operations.

The Company has equity-based deferred tax assets related to net operating losses that arose from excess tax benefits for stock-based compensation and minimum tax credits that arose from the corresponding alternative minimum tax paid for those excess tax benefits. The Company must apply a valuation allowance against these deferred tax assets until the Company utilizes the deferred tax assets to reduce taxes payable. Accordingly, the Company does not consider these deferred tax assets when evaluating changes in the valuation allowance.

The Company does not forecast income of a capital nature. The lack of forecasted capital gains represents negative evidence as to the realizability of the deferred tax assets of a capital nature. The Company weighed each piece of evidence and judged that the weight of the negative evidence was sufficient to retain the valuation allowance against its U.S. deferred tax assets of a capital nature.

The changes in the valuation allowance for deferred tax assets during the years ended December 31, 2013 and 2012 are shown below (in thousands):

	2013	2012
Balance at beginning of year	\$ 262,353	\$ 283,000
Net changes to deferred tax assets, subject to a valuation allowance	(26,623)	(20,647)
Balance at end of year	\$ 235,730	\$ 262,353

For the year ended December 31, 2013, income tax expense included a \$1.1 million increase in the valuation allowance for an increase during the year in deferred tax assets that were capital in nature. For the years ended December 31, 2013 and 2012, the decrease in the valuation allowance pertained to utilization of equity-based deferred tax assets used to reduce taxes payable in the amounts of \$27.7 million and \$20.6 million, respectively. As of December 31, 2013, \$233.1 million of the valuation allowance pertained to equity-based deferred tax assets. The consolidated balance sheets reflect an increase in equity upon the release of this valuation allowance. Accordingly, income tax expense does not reflect a benefit for the release of the valuation allowance.

Edgar Filing: BLUCORA, INC. - Form 10-K

As of December 31, 2013, the Company's U.S. federal net operating loss carryforwards were \$643.3 million, which primarily related to tax deductions for stock-based compensation. When the net operating loss carryforwards related to stock-based compensation are recognized, the income tax benefit of those losses is accounted for as a credit to stockholders' equity on the consolidated balance sheets rather than on the consolidated statements of comprehensive income. If not utilized, the Company's federal net operating loss carryforwards will expire between 2020 and 2031, with the majority of them expiring between 2020 and 2024. Additionally, changes in ownership, as defined by Section 382 of the Internal Revenue Code, may limit the amount of net operating loss carryforwards used in any one year.

Table of Contents**BLUCORA, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Years Ended December 31, 2013, 2012, and 2011**

A reconciliation of the unrecognized tax benefit balances is as follows (in thousands):

Balance at December 31, 2011	\$ 18,267
Gross increases for tax positions of prior years	1,208
Gross decreases for tax positions of prior years	(216)
Lapse of statute of limitations	(171)
Balance at December 31, 2012	19,088
Gross increases for tax positions of prior years	219
Gross decreases for tax positions of prior years	(101)
Settlements	(562)
Lapse of statute of limitations	(107)
Balance at December 31, 2013	\$ 18,537

The total amount of unrecognized tax benefits that would affect the Company's effective tax rate if recognized was \$0.6 million and \$1.2 million as of December 31, 2013 and 2012, respectively. The remaining \$17.9 million as of December 31, 2013 and 2012, if recognized, would create a deferred tax asset subject to a valuation allowance. The Company and certain of its subsidiaries file income tax returns in the U.S. federal jurisdiction and various state jurisdictions. In previous years, the Company also filed in various foreign jurisdictions. With few exceptions, the Company is no longer subject to U.S. federal, state and local, or non-U.S. income tax examinations by tax authorities for years before 2010, although net operating loss carryforwards and tax credit carryforwards from any year are subject to examination and adjustment for at least three years following the year in which they are fully utilized. As of December 31, 2013, no significant adjustments have been proposed relative to the Company's tax positions.

The Company recognizes interest and penalties related to uncertain tax positions in interest expense and general and administrative expenses, respectively. During the years ended December 31, 2013 and 2012, the Company reversed less than \$0.1 million of previously accrued interest expense related to the uncertain tax positions upon expiration of the statute of limitations on assessments.

Note 15: Net Income Per Share

Basic net income per share is computed using the weighted average number of common shares outstanding during the period. Diluted net income per share is computed using the weighted average number of common shares outstanding plus the number of potentially dilutive common shares outstanding during the period. Potentially dilutive common shares consist of the incremental common shares issuable upon the

Edgar Filing: BLUCORA, INC. - Form 10-K

exercise of outstanding stock options, the Warrant, vesting of unvested RSUs, and the impact of shares that could be issued upon conversion or maturity of the Notes. Potentially dilutive shares are excluded from the computation of earnings per share if their effect is antidilutive.

The weighted average shares were as follows for the periods presented (in thousands):

	Years ended December 31,		
	2013	2012	2011
Weighted average common shares outstanding, basic	41,201	40,279	37,954
Dilutive potential common shares	2,279	1,393	667
Weighted average common shares outstanding, diluted	43,480	41,672	38,621
Antidilutive shares excluded	381	1,172	3,803

Table of Contents

BLUCORA, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Years Ended December 31, 2013, 2012, and 2011

Antidilutive shares related primarily to stock options with an exercise price greater than the average price during the applicable period and awards with performance conditions not completed during the applicable period.

As more fully discussed in Note 10: Stockholders' Equity, on November 21, 2013, the Warrant was exercised and 1.0 million shares of the Company's common stock were issued accordingly. The weighted average of these shares was included in Weighted average common shares outstanding, basic starting in November 2013. Prior to that, the weighted average of the incremental common shares issuable upon the exercise of the Warrant were included in the dilutive potential common shares.

As more fully discussed in Note 8: Debt, in March 2013, the Company issued the Notes, which are convertible and mature in April 2019. The Company intends, upon conversion or maturity of the Notes, to satisfy any conversion premium by issuing shares of its common stock. Due to the cash settlement feature of the principal amount of the Notes, the Company only includes the impact of the premium feature in its dilutive potential common shares when the average stock price for the reporting period exceeds the conversion price of the Notes, which occurred in the fourth quarter of 2013.

ITEM 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

None.

ITEM 9A. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

Our management evaluated, with the participation of our Chief Executive Officer and our Chief Financial Officer, the effectiveness of our disclosure controls and procedures as of the end of the period covered by this Annual Report on Form 10-K. Based on this evaluation, our Chief Executive Officer and our Chief Financial Officer have concluded that our disclosure controls and procedures were effective as of December 31, 2013 to ensure that information we are required to disclose in reports that we file or submit under the Securities Exchange Act of 1934 is accumulated and communicated to our management, including our principal executive and principal financial officers, as appropriate to allow timely decisions regarding required disclosure, and that such information is recorded, processed, summarized, and reported within the time periods specified in the Securities and Exchange Commission rules and forms.

Management's Report on Internal Control over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Exchange Act Rules 13a-15(f). Our internal control over financial reporting is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions or that the degree of compliance with the policies or procedures may deteriorate.

Under the supervision and with the participation of management, including our Chief Executive Officer and Chief Financial Officer, we conducted an evaluation of the effectiveness of our internal control over financial reporting based on the framework in *Internal Control Integrated Framework* (1992 framework) issued by the Committee of the Sponsoring Organizations of the Treadway Commission.

Based on our evaluation under the framework in *Internal Control Integrated Framework* (1992 framework), our management concluded that our internal control over financial reporting was effective as of December 31, 2013.

We acquired Monoprice on August 22, 2013. Management excluded Monoprice from its assessment of the effectiveness of internal control over financial reporting as of December 31, 2013. Monoprice's total assets and net assets amounted to \$240.4 million and \$134.3 million, respectively, as of December 31, 2013 and total revenues amounted to \$54.3 million for the year then ended.

Edgar Filing: BLUCORA, INC. - Form 10-K

Ernst & Young LLP has audited the effectiveness of our internal control over financial reporting as of December 31, 2013 and its report is included below.

Changes in Internal Control over Financial Reporting

There was no change in our internal control over financial reporting that occurred during the fourth quarter of 2013 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders

Blucora, Inc.

We have audited Blucora, Inc.'s internal control over financial reporting as of December 31, 2013, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (1992 framework) (the COSO criteria). Blucora, Inc.'s management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

As indicated in the accompanying Management's Report on Internal Control over Financial Reporting, management's assessment of and conclusion on the effectiveness of internal control over financial reporting did not include the internal controls of Monoprice, Inc., which is included in the December 31, 2013 consolidated financial statements of Blucora, Inc., and constituted \$240.4 million and \$134.3 million of total and net assets, respectively, as of December 31, 2013 and \$54.3 million of revenues for the year then ended. Our audit of internal control over financial reporting of Blucora, Inc. also did not include an evaluation of the internal control over financial reporting of Monoprice, Inc.

In our opinion, Blucora, Inc. maintained, in all material respects, effective internal control over financial reporting as of December 31, 2013, based on the COSO criteria.

Edgar Filing: BLUCORA, INC. - Form 10-K

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets as of December 31, 2013 and 2012 and the related consolidated statements of comprehensive income, stockholders' equity and cash flows for each of the two years in the period ended December 31, 2013 of Blucora, Inc. and our report dated February 27, 2014 expressed an unqualified opinion thereon.
