NetScout assumes no obligation to update any forward-looking information contained in the announcements described herein.

Regulation G Disclosure:

This presentation makes reference to certain non-GAAP measures such as non-GAAP revenue and non-GAAP earnings per share. These non-GAAP measures are not in accordance with GAAP, should not be considered an alternative for measures prepared in accordance with GAAP (such as net income and diluted net income per share), and may have limitations in that they do not reflect all of NetScout's results of operations with GAAP. These non-GAAP measures should only be used to evaluate NetScout's results of operations in conjunction with GAAP. The presentation of non-GAAP information is not meant to be considered superior to, in isolation from or as a substitute for GAAP. NetScout believes these non-GAAP financial measures will enhance the reader's overall understanding of NetScout's business and NetScout's prospects for the future by providing a higher degree of transparency for certain financial measures and providing a level of disclosure that helps investors understand

how  
the  
Company  
plans  
and  
measures  
its  
own  
business.  
NetScout  
believes  
that  
providing  
these

non-GAAP  
measures  
affords  
investors  
a  
view  
of

NetScout's operating results that may be more easily compared to peer companies and also enables investors to consider NetScout's operating results on a GAAP and non-GAAP basis during and following the integration period of NetScout's acquisitions. Presenting the GAAP measures alongside the non-GAAP measures indicative of NetScout's core operating results. Furthermore, NetScout believes that the presentation of non-GAAP measures alongside the corresponding GAAP measures provide useful information to management and investors regarding present and future business condition and results of operations. NetScout management regularly uses supplemental non-GAAP financial measures internal to its business and to make operating decisions.

These non-GAAP measures are among the primary factors that management uses in planning and forecasting.

The reconciliation of these non-GAAP metrics to the comparable GAAP metrics are set forth in the

accompanying  
tables  
in  
the  
index  
of  
this  
presentation  
and  
are
