|-------------------------------------|---|
| Issuer: | Atlas Air Worldwide Holdings, Inc., a Delaware corporation. |
| Ticker / Exchange for Common Stock: | AAWW / The NASDAQ Global Select Market (NASDAQ). |
| Securities Offered: | 2.25% Convertible Senior Notes due 2022 (the Notes). |
| Aggregate Principal Amount Offered: | \$200,000,000 aggregate principal amount of Notes (or \$230,000,000 aggregate principal amount if the underwriters' over-allotment option to purchase up to an additional \$30,000,000 principal amount of Notes is exercised in full). |
| Maturity Date: | June 1, 2022, unless earlier repurchased or converted. |
| Interest Rate: | 2.25% per annum, accruing from the Settlement Date. |
| Interest Payment Dates: | June 1 and December 1 of each year, beginning on December 1, 2015. |
| Public Offering Price: | 100% of the principal amount of the Notes plus accrued interest, if any, from the Settlement Date. |

Trade Date: May 29, 2015.

Settlement Date: June 3, 2015.

NASDAQ Last Reported Sale Price on May 28, 2015: \$55.89 per share of the Issuer's common stock.

Conversion Premium: Approximately 32.5% above the NASDAQ Last Reported Sale Price on May 28, 2015.

Initial Conversion Price: Approximately \$74.05 per share of the Issuer's common stock.

Initial Conversion Rate: 13.5036 shares of the Issuer's common stock per \$1,000 principal amount of Notes.

Use of Proceeds: The Issuer estimates that the proceeds from the Offering will be approximately \$194.1 million (or \$223.3 million if the underwriters exercise their over-allotment option in full), after deducting fees and estimated expenses. In connection with the pricing of the Notes, the Issuer entered into convertible note hedge transactions with affiliates of Morgan Stanley & Co. LLC and BNP Paribas Securities Corp. (the Option Counterparties). The Issuer also entered into warrant transactions with the Option Counterparties. The Issuer intends to use \$14.8 million of the net proceeds from the Offering to pay the cost of the convertible note hedge transactions (after such cost is partially offset by the proceeds to the Issuer from the sale of the warrants). The Issuer intends to use the remainder of the net proceeds from the Offering to fund the redemption or refunding of enhanced equipment trust certificates as well as for working capital and capital expenditures, repayment or refinancing of debt, and for general corporate purposes. See Use of Proceeds in the Preliminary Prospectus Supplement.

If the underwriters exercise their over-allotment option, the Issuer may sell additional warrants and use a portion of the net proceeds from the sale of the additional Notes, together with the proceeds from the additional warrants, to enter into additional convertible note hedge transactions and for general corporate purposes.

Public Offering Price, Underwriting

Discount and Proceeds:

The following table shows the Public Offering Price, underwriting discounts and commissions and proceeds before expenses to the Issuer in the Offering:

| | Per Note | Total |
|--|----------|----------------|
| Public Offering Price(1) | \$ 1,000 | \$ 200,000,000 |
| Underwriting discounts and commissions | \$ 25 | \$ 5,000,000 |
| Proceeds, before expenses, to the Issuer | \$ 975 | \$ 195,000,000 |

(1) Plus accrued interest, if any, from the Settlement Date.

Convertible Note Hedge and Warrant Transactions:

In connection with the pricing of the Notes, the Issuer entered into convertible note hedge transactions with the Option Counterparties. The Issuer also entered into warrant transactions with the Option Counterparties. The convertible note hedge transactions are expected generally to reduce potential dilution to the Issuer's common stock upon any conversion of Notes and/or offset any cash payments the Issuer is required to make in excess of the principal amount of converted Notes, as the case may be. However, the warrant transactions could separately have a dilutive effect to the extent that the market value per share of the Issuer's common stock exceeds the applicable strike price of the warrants. Accordingly, when the convertible note hedge transactions and the warrant transactions are taken together, the extent to which the convertible note hedge transactions reduce the potential dilution to the Issuer's common stock (or the cash payments in excess of the principal amount of the notes) upon conversion of the notes is effectively capped by the warrant transaction at the strike price of the warrant. If the underwriters exercise their over-allotment option, the Issuer may enter into additional convertible note hedge and warrant transactions.

In connection with establishing their initial hedge of the convertible note hedge and warrant transactions, the Option Counterparties or their respective affiliates expect to enter into various hedging transactions, including (without limitation) derivative transactions with respect to the Issuer's common stock concurrently with or shortly after the pricing of the Notes. This activity could impact the market price of the Issuer's common stock or the Notes at that time.

In addition, the Option Counterparties or their respective affiliates may modify their hedge positions by entering into or unwinding various derivatives with respect to the Issuer's common stock and/or purchasing or selling the Issuer's common stock or other securities of the Issuer's in secondary market transactions following the pricing of the Notes and prior to the maturity of the Notes (and are likely to do so during any observation period related to a conversion of Notes). This activity could also impact the market price of the Issuer's common stock or the Notes, which could affect a holder's ability to convert the Notes and, to the extent the activity occurs during any observation period related to a conversion of Notes, it could affect the number of shares and/or the value of the consideration that a holder will receive upon conversion of the Notes.

See "Description of Convertible Note Hedge and Warrant Transactions" in the Preliminary Prospectus Supplement.

Increase in Conversion Rate Upon

Conversion Upon a Make-Whole

Fundamental Change:

If the effective date (as defined in the Preliminary Prospectus Supplement) of a make-whole fundamental change (as defined in the Preliminary Prospectus Supplement) occurs prior to the Maturity Date and a holder elects to convert its Notes in connection with such make-whole fundamental change, the Issuer will, under certain circumstances, increase the conversion rate for the Notes so surrendered for conversion by a number of additional shares of the Issuer's common stock, as described under Description of Notes Conversion Rights Increase in Conversion Rate upon Conversion upon a Make-Whole Fundamental Change in the Preliminary Prospectus Supplement.

The following table sets forth the number of additional shares, if any, by which the conversion rate will be increased per \$1,000 principal amount of Notes for each hypothetical stock price and effective date set forth below:

The exact stock prices and effective dates may not be set forth in the table above, in which case:

If the stock price is between two stock prices in the table above or the effective date is between two effective dates in the table above, the number of additional shares by which the conversion rate will be increased will be determined by a straight-line interpolation between the number of additional shares set forth for the higher and lower stock prices and the earlier and later effective dates, as applicable, based on a 365-day year.

If the stock price is greater than \$300.00 per share (subject to adjustment in the same manner as the stock prices set forth in the column headings of the table above, as described in the Preliminary Prospectus Supplement), no additional shares will be added to the conversion rate.

If the stock price is less than \$55.89 per share (subject to adjustment in the same manner as the stock prices set forth in the column headings of the table above, as described in the Preliminary Prospectus Supplement), no additional shares will be added to the conversion rate.

Notwithstanding the foregoing, in no event will the conversion rate per \$1,000 principal amount of Notes exceed 17.8922 shares of the Issuer's common stock, subject to adjustment in the same manner as the conversion rate as set forth under Description of Notes Conversion Rights Conversion Rate Adjustments in the Preliminary Prospectus Supplement.
