Deferred Tax Asset Section 382 generally provides that after an “ownership change”, the amount of taxable income that may be offset by pre-ownership change losses (excluding timing differences) will be limited annually. Annual limitation is generally equal to the corporation’s equity value immediately before the change multiplied by the applicable long-term tax exempt rate and under certain circumstances, built in gains within five years after the change may increase the annual limitation. Built in gains within five years after the change may increase the annual limitation because pre-ownership change net operating losses could have been offset by built in gains recognized prior to an ownership change. Timing differences in Anchor’s deferred tax asset are not subject to Section 382 ONB management, as well as a third-party, has reviewed the federal pre-ownership change losses and believes that Old National should generate adequate future taxable income to absorb these pre-ownership change losses before they expire.
