SECURITIES REGISTERED PURSUANT TO SECTION 12(g) OF THE ACT:

NONE

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. YES NO

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. YES NO

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. YES NO

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). YES NO

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer, and smaller reporting company in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer

Non-accelerated filer (Do not check if a smaller reporting company) Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). YES NO

The aggregate market value of the common equity held by non-affiliates of the registrant, computed by reference to the price of the registrant's A ordinary shares as of the last business day of the registrant's most recently completed second fiscal quarter (based on the last reported sale price on the Nasdaq Global Select Market as of such date), was \$232,260,659. There are no B ordinary shares held by non-affiliates of the registrant.

As of March 4, 2016, the registrant had outstanding 13,404,386 A ordinary shares and 4,133,366 B ordinary shares.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the Registrant's Proxy Statement relating to the 2016 Annual Meeting of Shareholders to be filed with the SEC within 120 days of the fiscal year ended December 31, 2015 are incorporated by reference into Part III of this report.

PART I

Item 1. BUSINESS

Some of the information contained in this Item 1 or set forth elsewhere in this report, including information with respect to the Company's plans and strategy, constitutes forward-looking statements that involve risks and uncertainties. Please see **Cautionary Note Regarding Forward-Looking Statements** at the end of Item 7 of Part II and **Risk Factors** in Item 1A of Part I for a discussion of important factors that could cause actual results to differ materially from the results described in or implied by the forward-looking statements contained herein.

References to the acquisition of American Reliable refer to the January 1, 2015 acquisition of American Reliable Insurance Company (**American Reliable**).

History

Global Indemnity plc (**Global Indemnity** or the **Company**) was incorporated on March 9, 2010 and is domiciled in Ireland as a public limited company. In July 2010, Global Indemnity replaced the Company's predecessor, United America Indemnity, Ltd., a Cayman Island company, as the ultimate parent company as a result of a re-domestication transaction. The Company's A Ordinary shares are publicly traded on the NASDAQ Global Select Market under the trading symbol **GBLI**.

On January 1, 2015, Global Indemnity Group, Inc., a subsidiary of the Company, acquired 100% of the voting equity interest of American Reliable Insurance Company (**American Reliable**) from American Bankers Insurance Group, Inc., a subsidiary of Assurant, Inc., by paying \$113.7 million in cash and assuming \$283.9 million of customary insurance related liabilities, obligations, and mandates. Per the American Reliable Stock Purchase Agreement (**American Reliable SPA**), the ultimate purchase price is subject to (i) accounting procedures that were performed in 2015 to determine GAAP book value and (ii) indemnification on future development on recorded loss and loss adjustment expenses as of December 31, 2014. In accordance with the American Reliable SPA, on the third calendar year following the calendar year of the closing, if loss and loss adjustment expenses for accident years 2014 and prior are lower than recorded unpaid loss and loss adjustment expenses as of December 31, 2014, Global Indemnity Group, Inc. will pay the variance to American Bankers Group, Inc. Conversely, if loss and loss adjustment expenses for accident years 2014 and prior exceed recorded unpaid loss and loss adjustment expenses as of December 31, 2014, American Bankers Group, Inc. will pay the variance to Global Indemnity Group, Inc. In accordance with a dispute resolution agreement between Global Indemnity Group, Inc. and American Bankers Group, Inc., any variance paid related to the loss indemnification will be subject to interest of 5% compounded semi-annually. The Company's current estimate of the purchase price, based on available financial information, is approximately \$99.8 million.

Please see **Recent Developments** in Item 7 of Part II of this report and Note 3 of the notes to consolidated financial statements in Item 8 of Part II of this report for additional information on the acquisition of American Reliable.

General

Global Indemnity, one of the leading specialty property and casualty insurers in the industry, provides its insurance products across a distribution network that includes binding authority, program, brokerage, and reinsurance. Starting in the 1st quarter of 2015, the Company manages the distribution of these products through three reportable business segments: Commercial Lines, managed in Bala Cynwyd, PA, offers specialty property and casualty products designed for product lines such as Small Business Binding Authority, Property Brokerage, and Programs; Personal Lines, managed in Scottsdale, AZ, offers specialty personal lines and agricultural coverage; and Reinsurance Operations, managed in Bermuda, provides reinsurance solutions through brokers and primary writers including insurance and reinsurance companies. The Commercial Lines and Personal Lines segments comprise the Company's U.S. Insurance Operations (**Insurance Operations**).

Table of Contents

Prior to 2015, the Commercial Lines segment was known as Insurance Operations segment. With the acquisition of American Reliable, the Insurance Operations segment was renamed to Commercial Lines segment. The newly acquired American Reliable became the Company's Personal Lines segment. For segment reporting, the values for 2013 and 2014 did not change for Commercial Lines and Reinsurance Operations.

Business Segments

See Note 19 of the notes to consolidated financial statements in Item 8 of Part II of this report for gross and net premiums written, income and total assets of each operating segment for the years ended December 31, 2015, 2014 and 2013. For a discussion of the variances between years, see "Results of Operations" in Item 7 of Part II of this report.

Personal Lines

The Company's Personal Lines distribute property and casualty insurance products and operate primarily in the admitted markets. In the standard property and casualty insurance market, insurance rates and forms are highly regulated; products and coverage are largely uniform and have relatively predictable exposures. In the standard market, policies must be written by insurance companies that are admitted to transact business in the state in which the policy is issued. As a result, in the standard property and casualty insurance market, insurance companies tend to compete for customers primarily on the basis of price, coverage, value-added service, and financial strength.

The Company's Personal Lines writes specialty products such as agriculture, mobile homes, manufactured homes, homeowners, and watersports via American Reliable. These products are distributed through retail agents, wholesale general agents, and brokers. The insurance products are either underwritten via specific binding authority or by internal personnel.

See "Underwriting" below for additional discussion on how the Company's insurance products are underwritten.

Gross premiums written for the Personal Lines were \$326.3 million in 2015. Personal lines is a new business segment in 2015 resulting from the acquisition of American Reliable on January 1, 2015.

Commercial Lines

The Company's Commercial Lines distribute property and casualty insurance products and operate predominantly in the excess and surplus lines marketplace. The excess and surplus lines market differs significantly from the standard property and casualty insurance market.

The excess and surplus lines market provides coverage for businesses that often do not fit the underwriting criteria of an insurance company operating in the standard markets due to their relatively greater unpredictable loss patterns and unique niches of exposure requiring rate and policy form flexibility. Without the excess and surplus lines market, certain businesses would have to self-insure their exposures, or seek coverage outside the U.S. market.

Competition in the excess and surplus lines market tends to focus less on price and more on availability, service, and other considerations. While excess and surplus lines market exposures may have higher perceived insurance risk than their standard market counterparts, excess and surplus lines market underwriters historically have been able to generate underwriting profitability superior to standard market underwriters.

A portion of the Company's Commercial Lines is written on a specialty admitted basis. When writing on a specialty admitted basis, the Company's focus is on writing insurance for insureds that engage in similar but often highly specialized types of activities. The specialty admitted market is subject to greater state regulation

Table of Contents

than the surplus lines market, particularly with regard to rate and form filing requirements and the ability to enter and exit lines of business. Insureds purchasing coverage from specialty admitted insurance companies do so because the insurance product is not otherwise available from standard market insurers. Yet, for regulatory or marketing reasons, these insureds require products that are written by an admitted insurance company.

The Commercial Lines insurance products target specific, defined groups of insureds with customized coverage to meet their needs. To manage operations, the Commercial Lines segment differentiates its products by product classification. These product classifications are as follows:

Penn-America Group distributes property and general liability products for small commercial businesses through a select network of wholesale general agents with specific binding authority;

United National Group distributes property, general liability, and professional lines products through program administrators with specific binding authority; and

Diamond State Group distributes property, casualty, and professional lines products through wholesale brokers that are underwritten by the Company's personnel and selected brokers with specific binding authority.

These product classifications comprise the Commercial Lines business segment and are not considered individual business segments because each product has similar economic characteristics, distribution, and coverage.

The Company's Commercial Lines provide property, casualty, and professional liability products utilizing customized guidelines, rates, and forms tailored to the Company's risk and underwriting philosophy. See *Underwriting* below for a discussion on how the Company's insurance products are underwritten.

In 2015, gross premiums written for the Commercial Lines were \$214.2 million compared to \$230.0 million for 2014. For 2015, surplus lines business accounts for approximately 77.7% of the business written while specialty admitted business accounts for the remaining 22.3%.

Reinsurance Operations

Global Indemnity Reinsurance Company, Ltd. (Global Indemnity Reinsurance) is a Bermuda based treaty reinsurer of specialty property and casualty insurance and reinsurance companies. The Company's Reinsurance Operations segment provides reinsurance solutions through brokers and primary writers including insurance and reinsurance companies, and consists solely of the operations of Global Indemnity Reinsurance.

The reinsurance markets face many of the same issues confronted in the primary insurance markets including excess capital capacity, low investment returns and increased pressure on generating acceptable return on investment.

The limited number of catastrophic events in recent years and an increase in the available capacity has continued to put pressure on pricing levels. Global Indemnity Reinsurance is focused on using its capital capacity to write catastrophe-oriented placements and other niche or specialty-focused excess of loss contracts meeting the Company's risk tolerance and return thresholds.

In 2015, gross premiums written from third parties were \$49.7 million compared to \$61.3 million for 2014.

Products and Product Development

The Company's U.S. Insurance Operations distribute property and casualty insurance products. Its Personal Lines operate primarily in the admitted marketplace; whereas, its Commercial Lines operate predominantly in the excess and surplus lines marketplace. To manage its operations, the Company seeks to differentiate its products

Table of Contents

by product classification. See Personal Lines and Commercial Lines above for a description of these product classifications. The U.S. Insurance Operations are licensed to write on a surplus lines (non-admitted) basis and/or an admitted basis in all 50 U.S. States, the District of Columbia, Puerto Rico, and the U.S. Virgin Islands, which provides the Company with flexibility in designing products and programs, and in determining rates to meet emerging risks and discontinuities in the marketplace.

The Company's Reinsurance Operations offer third party treaty reinsurance for specialty property and casualty insurance companies and reinsurance companies as well as professional liability products to companies. The Company's Reinsurance Operations also provide reinsurance to its Insurance Operations in the form of quota share and stop-loss arrangements.

Geographic Concentration

The following table sets forth the geographic distribution of gross premiums written for the periods indicated:

(Dollars in thousands)	For the Years Ended December 31,					
	2015		2014 (1)		2013 (1)	
	Amount	Percent	Amount	Percent	Amount	Percent
California	\$ 56,142	9.5%	\$ 27,711	9.5%	\$ 26,358	9.1%
Texas	52,913	9.0	26,170	9.0	29,565	10.1
Florida	37,725	6.4	29,371	10.2	32,170	11.0
New York	28,329	4.8	16,326	5.6	16,600	5.7
Louisiana	28,274	4.8	6,474	2.2	8,392	2.9
North Carolina	26,245	4.4	2,954	1.0	2,872	1.0
Arizona	21,199	3.6	1,653	0.6	1,693	0.6
New Jersey	16,602	2.8	7,121	2.4	8,208	2.8
Oklahoma	16,433	2.8	2,651	0.9	3,442	1.2
Minnesota	15,387	2.6	1,854	0.6	1,950	0.7
Subtotal	299,249	50.7	122,285	42.0	131,250	45.1
All other states	241,251	40.9	107,693	37.0	101,123	34.8
Reinsurance Operations	49,733	8.4	61,275	21.0	58,350	20.1
Total	\$ 590,233	100.0%	\$ 291,253	100.0%	\$ 290,723	100.0%

Marketing and Distribution

The Company provides its insurance products across a full distribution network binding authority, program, brokerage, direct, and reinsurance. For its binding authority and program product classifications, the Company distributes its insurance products primarily through a group of wholesale general agents and program administrators that have specific quoting and binding authority. For its brokerage business, the Company distributes its insurance products through wholesale insurance brokers who in turn sell the Company's insurance products to insureds through retail insurance brokers. For its reinsurance business, the Company distributes its products through reinsurance brokers and on a direct basis.

The Company's Commercial Lines distributes its insurance products primarily through a group of approximately 120 wholesale general agents and program administrators. Of the Commercial Lines non-affiliated professional wholesale general agents and program administrators, the top five accounted for 34.3% of the Commercial Lines gross premiums written for the year ended December 31, 2015. One agency represented 10.6% of the Commercial Lines gross premiums written.

The Company's Personal Lines distributes specialty personal and agricultural insurance products through a group of approximately 290 agents primarily comprised of wholesale general agents. It also distributes its specialty personal insurance products on a retail basis in New Mexico and Arizona. Of the Personal Lines

Table of Contents

non-affiliated professional wholesale general agents and retail agents, the top five accounted for 20.5% of the Personal Lines gross premiums written for the year ended December 31, 2015. No one agency represented more than 10% of the Personal Lines gross premiums written.

There is no agency which accounts for more than 10% of the Company's consolidated revenues for the year ended December 31, 2015.

Global Indemnity Reinsurance assumed premiums on three treaties accounted for 95% of the Reinsurance Operations 2015 gross premiums written. There is no treaty that accounted for 10% or more of the Company's consolidated revenues for the year ended December 31, 2015.

The Company's primary distribution strategy is to seek to maintain strong relationships with a limited number of high-quality wholesale professional general agents and wholesale insurance brokers. The Company carefully selects distribution sources based on their expertise, experience and reputation. The Company believes that its distribution strategy enables it to effectively access numerous markets at a relatively low cost structure through the marketing, underwriting, and administrative support of the Company's professional general agencies and wholesale insurance brokers. The Company believes these wholesale general agents and wholesale insurance brokers have local market knowledge and expertise that enables them to access business in these markets more effectively.

Underwriting

For Commercial Lines, the Company's insurance products are primarily underwritten via specific binding authority in which the Company grants underwriting authority to its wholesale general agents and program administrators and via brokerage in which the Company's internal personnel underwrites business submitted by wholesale insurance brokers. Some of the Company's specialized property business is submitted by retail agents or directly from insureds and is also underwritten by internal personnel.

For Personal Lines, the Company's insurance products are distributed through retail agents, wholesale general agents, and brokers. The insurance products are either underwritten via specific binding authority or by internal personnel.

Specific Binding Authority The Company's wholesale general agents, retail agents, and program administrators for both Commercial Lines and Personal Lines have specific quoting and binding authority with respect to a single insurance product and some have limited quoting and binding authority with respect to multiple products.

The Company's wholesale general agents, retail agents, and program administrators will either utilize company administered policy systems with the Company's underwriting guidelines embedded within the system or the agents will use their own proprietary systems. When the agents use their own proprietary systems, the Company provides its wholesale general agents, retail agents, and program administrators with a comprehensive, regularly updated underwriting manual that specifically outlines risk eligibility which is developed based on the type of insured, nature of exposure and overall expected profitability. This manual also outlines (a) premium pricing, (b) underwriting guidelines, including but not limited to policy forms, terms and conditions, and (c) policy issuance instructions.

The Company's wholesale general agents, retail agents, and program administrators are appointed to underwrite submissions received in accordance with the Company's underwriting manual. Risks that are not within the specific binding authority must be submitted to the Company's underwriting personnel directly for underwriting review and approval or denial of the application of the insured. The Company's wholesale general agents provide all policy issuance services in accordance with the Company's underwriting manuals.

Table of Contents

Agricultural partners are not provided with underwriting manuals. Rather, they are provided with letters of authority; whereby, policies and endorsement issuance rights are extended.

The Company regularly monitors the underwriting quality of its wholesale general agents, retail agents, and program administrators through a disciplined system of controls, which includes the following:

automated system criteria edits and exception reports;

individual policy reviews to measure adherence to the Company's underwriting manual including: risk selection, underwriting compliance, policy issuance and pricing;

periodic on-site comprehensive audits to evaluate processes, controls, profitability and adherence to all aspects of the Company's underwriting manual including: risk selection, underwriting compliance, policy issuance and pricing;

internal quarterly actuarial analysis of loss ratios produced by business underwritten by the Company's wholesale general agents, retail agents, and program administrators; and

internal quarterly analysis of financial results, including premium growth and overall profitability of business produced by the Company's wholesale general agents, retail agents, and program administrators.

The Company provides incentives to certain of its wholesale general agents and program administrators to produce profitable business through contingent profit commission structures that are tied directly to the achievement of profitability targets.

Brokerage There are only three wholesale insurance brokers with specific binding authority. These brokers are within the Company's Commercial Lines and are subject to the same guidelines and monitoring as discussed above. The majority of the Company's wholesale insurance brokers do not have specific binding authority; therefore, these risks are submitted to the Company's underwriting personnel for review and processing.

The Company provides its underwriters with a comprehensive, regularly updated underwriting manual that outlines risk eligibility which is developed based on the type of insured, nature of exposure and overall expected profitability. This manual also outlines (a) premium pricing, (b) underwriting guidelines, including but not limited to policy forms, terms and conditions.

The Company's underwriting personnel review submissions, issue all quotes and perform all policy issuance functions. The Company regularly monitors the underwriting quality of its underwriters through a disciplined system of controls, which includes the following:

individual policy reviews to measure the Company's underwriters' adherence to the underwriting manual including: risk selection, underwriting compliance, policy issuance and pricing;

periodic underwriting review to evaluate adherence to all aspects of the Company's underwriting manual including: risk selection, underwriting compliance, policy issuance and pricing;

internal quarterly actuarial analysis of loss ratios produced by business underwritten by the Company's underwriters; and

Edgar Filing: Global Indemnity plc - Form 10-K

internal quarterly analysis of financial results, including premium growth and overall profitability of business produced by the Company's underwriters.

Reinsurance The Company's Global Indemnity Reinsurance subsidiary primarily offers retrocessional coverage to Bermuda based reinsurance companies. The business assumed is primarily quota share treaties on property catastrophe and marine business. The Company also writes a small amount of professional lines excess liability business. Prior to entering into any agreement, the Company evaluates a number of factors for each cedent including, but not limited to, reputation and financial condition, underwriting and claims practices and historical claims experience. The Company also models proposed treaties for both the catastrophe exposure and the marginal impact on the Company's existing catastrophe portfolio.

Table of Contents

Contingent Commissions

Certain professional general agencies of the U.S. Insurance Operations are paid special incentives, referred to as contingent commissions, when results of business produced by these agencies are more favorable than predetermined thresholds. Similarly, in some circumstances, companies that cede business to the Reinsurance Operations are paid a profit commission based on the profitability of the ceded portfolio. These commissions are charged to other underwriting expenses when incurred.

Pricing

The Company's pricing actuaries establish pricing tailored to each specific product it underwrites, taking into account historical loss experience, historical rate level changes, and individual risk and coverage characteristics. The Company generally uses the actuarial loss costs promulgated by the Insurance Services Office as a benchmark in the development of pricing for most of the Company's products. Specific products will utilize proprietary rating when deemed appropriate. The Company will seek to only write business if it believes it can achieve an adequate rate of return.

Reinsurance of Underwriting Risk

The Company's philosophy is to purchase reinsurance from third parties to limit its liability on individual risks and to protect against property catastrophe and casualty clash losses. Reinsurance assists the Company in controlling exposure to severe losses and protecting capital resources. The type, cost and limits of reinsurance it purchases can vary from year to year based upon the Company's desired retention levels and the availability of quality reinsurance at an acceptable price. Although reinsurance does not legally discharge an insurer from its primary liability for the full amount of limits on the policies it has written, it does make the assuming reinsurer liable to the insurer to the extent of the insurance ceded. The Company's reinsurance contracts renew throughout the year and all of its reinsurance is purchased following guidelines established by management. The Company primarily utilizes treaty reinsurance products made up of proportional and excess of loss reinsurance. Additionally, the Company may purchase facultative reinsurance protection on single risks when deemed necessary.

The Company purchases specific types and structures of reinsurance depending upon the characteristics of the lines of business and specialty products underwritten. The Company will typically seek to place proportional reinsurance for umbrella and excess products, certain specialty products, or in the development stages of a new product. The Company believes that this approach allows it to control net exposure in these product areas most cost effectively.

The Company purchases reinsurance on an excess of loss basis to cover individual risk severity. These structures are utilized to protect the Company's primary positions on property and casualty products. The excess of loss structures allow the Company to maximize underwriting profits over time by retaining a greater portion of the risk in these products, while helping to protect against the possibility of unforeseen volatility.

The Company analyzes its reinsurance contracts to ensure that they meet the risk transfer requirements of applicable accounting guidance, which requires that the reinsurer must assume significant insurance risk under the reinsured portions of the underlying insurance contracts and that there must be a reasonably possible chance that the reinsurer may realize a significant loss from the transaction.

The Company continually evaluates its retention levels across its entire line of business and specialty product portfolio seeking to ensure that the ultimate reinsurance structures are aligned with the Company's corporate risk tolerance levels associated with such products. Any decision to decrease the Company's reliance upon proportional reinsurance or to increase the Company's excess of loss retentions could increase the Company's earnings volatility. In cases where the Company decides to increase its excess of loss retentions, such decisions will be a result of a change or progression in the Company's risk tolerance level. The Company endeavors to

Table of Contents

purchase reinsurance from financially strong reinsurers with which it has long-standing relationships. In addition, in certain circumstances, the Company holds collateral, including letters of credit, under reinsurance agreements.

The Company's Insurance Operations' primary reinsurance treaties are as follows:

Property Catastrophe Excess of Loss The Company's current property writings create exposure to catastrophic events. To protect against these exposures, the Company purchases a property catastrophe treaty. Effective June 1, 2015, the Company purchased a property catastrophe excess of loss treaty which provides occurrence coverage for losses of \$280 million in excess of \$20 million. This treaty is made up of three layers: \$20 million in excess of \$20 million, which the Company participated on 25% of the placement, \$60 million in excess of \$40 million, and \$200 million in excess of \$100 million. This treaty provides for one full reinstatement of coverage at 100% additional premium as to time and pro rata as to amount of limit reinstated. This replaced the treaty which expired on May 31, 2015, which provided occurrence coverage for losses of \$70 million in excess of \$20 million. This treaty excluded business underwritten by American Reliable. The Company participated on 60% of the \$20 million in excess of \$20 million layer and 40% of the \$50 million in excess of \$40 million layer. This treaty provided for one full reinstatement of coverage at 100% additional premium as to time and pro rata as to amount of limit reinstated.

Earthquake Property Catastrophe Excess of Loss Effective January 1, 2015, the Company purchased an earthquake property catastrophe excess of loss treaty which provided occurrence coverage for earthquake catastrophe losses of \$30 million in excess of \$5 million for American Reliable property business. This treaty provided for one full reinstatement of coverage at 100% additional premium as to time and pro rata as to amount of limit reinstated. This treaty was cancelled on May 31, 2015 and rolled into a new combined master catastrophe treaty which was effective June 1, 2015.

Property Per Risk Excess of Loss Effective January 1, 2016, the Company renewed its property per risk excess of loss treaty. This treaty provides coverage in three sections: 80% of \$9 million per risk in excess of \$1 million per risk for all business except the Property Brokerage unit and business written by American Reliable, 100% of \$4 million per risk in excess of \$1 million per risk for American Reliable business, and 75% of \$8 million per risk in excess of \$2 million per risk for Property Brokerage business. This treaty also provides coverage of 100% of \$20 million per risk in excess of \$10 million per risk for Property Brokerage business. The treaty's liability is limited to twice the named per risk limit by section and layer for all risks involved in one loss occurrence. This replaced the treaty which expired December 31, 2015, which excluded business underwritten by American Reliable. This treaty provided coverage in two sections: 50% of \$9 million per risk in excess of \$1 million per risk for all business with the exception of the Property Brokerage unit, and 50% of \$8 million per risk in excess of \$2 million per risk for Property Brokerage business. This treaty also provides coverage of 100% of \$20 million per risk in excess of \$10 million per risk for Property Brokerage business. The treaty's liability was limited to twice the named per risk limit by section and layer for all risks involved in one loss occurrence.

American Reliable Property Per Risk Excess of Loss Effective January 1, 2015, American Reliable renewed its property per risk excess of loss treaty covering business underwritten by American Reliable. This treaty provides coverage in two layers: \$1 million per risk in excess of \$1 million per risk, and \$3 million per risk in excess of \$2 million per risk. The first layer is subject to a \$2 million limit of liability for all risks involved in one loss occurrence, and the second layer is subject to a \$6 million limit for all risks involved in one loss occurrence. This treaty expired on December 31, 2015 and the American Reliable business was added to the Property Per Risk Excess of Loss treaty described above.

Casualty and Professional Liability Excess of Loss Effective May 1, 2015, the Company renewed its casualty and professional liability excess of loss treaty. The casualty section provides coverage for 50% of \$2 million per occurrence in excess of \$1 million per occurrence for general liability and auto liability. The professional liability section provides coverage for 50% of \$4 million per policy/occurrence in excess of \$1 million per policy/occurrence. For both sections, allocated loss adjustment expenses are included within limits. This replaced the casualty and professional liability treaty that expired April 30, 2015 which provided for 100% of the identical coverage limits and retentions.

Table of Contents

Casualty Clash Excess of Loss Effective May 1, 2015, the Company renewed its casualty clash excess of loss treaty which provides coverage of \$10 million per occurrence in excess of \$3 million per occurrence, subject to a \$20 million limit for all loss occurrences. The casualty clash treaty that expired April 30, 2015 provided identical coverage.

100% Ceded Quota Share to American Bankers Effective December 1, 2014, American Reliable entered into four treaties to cede 100% of its liabilities related to certain businesses to American Bankers Insurance Company that were not included in the acquisition of American Reliable. For the year ended December 31, 2015, American Reliable recorded ceded written premiums and ceded earned premiums of \$55.8 million and \$59.5 million, respectively, to American Bankers Insurance Company.

100% Assumed Quota Share from American Bankers Effective December 1, 2014, American Reliable entered into two treaties to assume 100% of its liabilities from various insurers owned by Assurant, Inc. for business included in the acquisition but not written directly by American Reliable. For the year ended December 31, 2015, American Reliable recorded assumed written premiums and assumed earned premiums of \$82.3 million and \$92.7 million, respectively, from insurance companies owned by Assurant, Inc.

To the extent that there may be an increase or decrease in catastrophe or casualty clash exposure in the future, the Company may increase or decrease its reinsurance protection for these exposures commensurately. There were no other significant changes to any of the Company's Insurance Operations reinsurance treaties during 2015.

The following table sets forth the ten reinsurers for which the Company has the largest reinsurance receivables as of December 31, 2015. Also shown are the amounts of premiums ceded by the Company to these reinsurers during the year ended December 31, 2015.

(Dollars in millions)	A.M. Best Rating	Gross Reinsurance Receivables	Percent of Total	Ceded Premiums Written	Percent of Total

Collateral held in trust from reinsurers		(6.4)			
Net receivables		\$ 109.2			

Table of Contents

At December 31, 2015, the Company carried reinsurance receivables, net of collateral held in trust, of \$109.2 million. This amount is net of a purchase accounting adjustment and an allowance for uncollectible reinsurance receivables. The purchase accounting adjustment resulted from the Company's acquisition of Wind River Investment Corporation on September 5, 2003 and is related to discounting the acquired loss reserves to their present value and applying a risk margin to the discounted reserves. This adjustment was \$3.0 million at December 31, 2015. The allowance for uncollectible reinsurance receivables was \$9.7 million at December 31, 2015.

Historically, there have been insolvencies following a period of competitive pricing in the industry. While the Company has recorded allowances for reinsurance receivables based on currently available information, conditions may change or additional information might be obtained that may require the Company to record additional allowances. On a quarterly basis, the Company reviews its financial exposure to the reinsurance market and assesses the adequacy of its collateral and allowance for uncollectible reinsurance. The Company continues to take actions to mitigate its exposure to possible loss.

Claims Management and Administration

The Company's approach to claims management is designed to investigate reported incidents at the earliest juncture, to select, manage, and supervise all legal and adjustment aspects of claims, including settlement, for the mutual benefit of the Company, its professional general agents, wholesale brokers, reinsurers and insureds. The Company's professional general agents and wholesale brokers have no authority to settle claims or otherwise exercise control over the claims process, with the exception of one statutory managing general agent and one general agent. The Insurance Operations' claims management staff supervises or processes all claims. The Company's Insurance Operations has a formal claims review process, and all claims greater than \$100,000 for Personal Lines and \$250,000 for Commercial Lines, gross of reinsurance, are reviewed by senior claims management and certain senior executives. Large loss trends and analysis are reviewed by a Large Loss committee.

To handle claims, the Company's Insurance Operations utilizes its own in-house claims department as well as third-party claims administrators (TPAs) and assuming reinsurers, to whom it delegates limited claims handling authority. The Insurance Operations' experienced in-house staff of claims management professionals are assigned to one of five dedicated claim units: casualty and automobile claims, latent exposure claims, property claims, TPA oversight, and a wholly owned subsidiary that administers construction defect claims. The dedicated claims units meet regularly to communicate current developments within their assigned areas of specialty.

As of December 31, 2015, the Company has \$175 million of direct outstanding loss and loss adjustment expense case reserves at its Insurance Operations. Claims relating to approximately 89% of those reserves are handled by in-house claims management professionals, while claims relating to approximately 3% of those reserves are handled by TPAs, which send the Company detailed financial and claims information on a monthly basis. The Company also individually supervises in-house any significant or complicated TPA handled claims, and conducts on-site audits of material TPAs at least twice a year. Approximately 8% of its reserves are handled by the Company's assuming reinsurers. The Company reviews and supervises the claims handled by its reinsurers seeking to protect its reputation and minimize exposure.

Reserves for Unpaid Losses and Loss Adjustment Expenses

Applicable insurance laws require the Company to maintain reserves to cover its estimated ultimate losses under insurance policies and reinsurance treaties that it writes and for loss adjustment expenses relating to the investigation and settlement of claims.

The Company establishes loss and loss adjustment expense reserves for individual claims by evaluating reported claims on the basis of:

knowledge of the circumstances surrounding the claim;

Table of Contents

the severity of injury or damage;

jurisdiction of the occurrence;

the potential for ultimate exposure;

litigation related developments;

the type of loss; and

the Company's experience with the insured and the line of business and policy provisions relating to the particular type of claim. The Company generally estimates such losses and claims costs through an evaluation of individual reported claims. The Company also establishes reserves for incurred but not reported losses (IBNR). IBNR reserves are based in part on statistical information and in part on industry experience with respect to the expected number and nature of claims arising from occurrences that have not been reported. The Company also establishes its reserves based on estimates of future trends in claims severity and other subjective factors. Insurance companies are not permitted to reserve for a catastrophe until it has occurred. Reserves are recorded on an undiscounted basis other than fair value adjustments recorded under purchase accounting. The Company's Insurance Operations reserves are reviewed quarterly by the in-house actuarial staff. Loss reserve estimates for the Company's Reinsurance Operations are developed by independent, external actuaries; however management is responsible for the final determination of loss reserve selections. The data for this analysis is organized by treaty and treaty year. Reviews for both Insurance Operations and Reinsurance Operations are performed both gross and net of reinsurance.

In addition to the Company's internal reserve analysis, independent external actuaries perform a full, detailed review of the Insurance Operations reserves annually. The Company does not rely upon the review by the independent actuaries to develop its reserves; however, the data is used to corroborate the analysis performed by the in-house actuarial staff. The Company's independent external actuaries also perform a full, detailed review of the Reinsurance Operations reserves annually. The results of the detailed reserve reviews by internal and external actuaries were summarized and discussed with the Company's senior management to determine the best estimate of reserves.

With respect to some classes of risks, the period of time between the occurrence of an insured event and the final resolution of a claim may be many years, and during this period it often becomes necessary to adjust the claim estimates either upward or downward. Certain classes of umbrella and excess liability that the Company underwrites have historically had longer intervals between the occurrence of an insured event, reporting of the claim and final resolution. In such cases, the Company must estimate reserves over long periods of time with the possibility of several adjustments to reserves. Other classes of insurance that the Company underwrites, such as most property insurance, historically have shorter intervals between the occurrence of an insured event, reporting of the claim and final resolution. Reserves with respect to these classes are therefore inherently less likely to be adjusted.

The loss and loss expense reserving process is intended to reflect the impact of inflation and other factors affecting loss payments by taking into account changes in historical payment patterns and perceived trends. However, there is no precise method for the subsequent evaluation of the adequacy of the consideration given to inflation, or to any other specific factor, or to the way one factor may affect another.

The loss and loss adjustment expense development table that follows shows changes in the Company's reserves in subsequent years from the prior loss and loss expense estimates based on experience as of the end of each succeeding year and in conformity with United States of America generally accepted accounting principles (GAAP). The estimate is increased or decreased as more information becomes known about the frequency and severity of losses for individual years. A redundancy means the original estimate was higher than the current estimate; a deficiency means that the current estimate is higher than the original estimate.

Table of Contents

The first line of the loss and loss adjustment expense development table shows, for the years indicated, the Company's net reserve liability including the reserve for IBNR. The first section of the table shows, by year, the cumulative amounts of losses and loss adjustment expenses paid as of the end of each succeeding year. The second section sets forth the re-estimates in later years of incurred losses and loss expenses, including payments, for the years indicated. The cumulative redundancy/(deficiency) represents, as of the date indicated, the difference between the latest re-estimated liability and the reserves as originally estimated.

On January 1, 2015, the acquisition of American Reliable was completed. Consequently, American Reliable's loss and loss adjustment expense reserves are only in the 2015 year in the table below.

The following table shows development in Global Indemnity's loss and loss adjustment expense reserves on a net basis:

(Dollars in thousands)	2005	2006	2007	2008	2009	2010	2011	2012	2013	2014	2015

Edgar Filing: Global Indemnity plc - Form 10-K

See Note 10 of the notes to consolidated financial statements in Item 8 of Part II of this report for a reconciliation of the Company's liability for losses and loss adjustment expenses, net of reinsurance ceded, as well as further discussion surrounding changes to reserves for prior accident years.

Asbestos and Environmental Exposure

The Company's environmental exposure arises from the sale of general liability and commercial multi-peril insurance. Currently, the Company's policies continue to exclude classic environmental contamination claims. In some states the Company is required, however, depending on the circumstances, to provide coverage for certain bodily injury claims, such as an individual's exposure to a release of chemicals. The Company has also issued policies that were intended to provide limited pollution and environmental coverage. These policies were specific to certain types of products underwritten by the Company. The Company has also received a number of asbestos-

Table of Contents

related claims, the majority of which are declined based on well-established exclusions. In establishing the liability for unpaid losses and loss adjustment expenses related to A&E exposures, management considers facts currently known and the current state of the law and coverage litigations. Estimates of these liabilities are reviewed and updated continually.

Uncertainty remains as to the Company's ultimate liability for asbestos-related claims due to such factors as the long latency period between asbestos exposure and disease manifestation and the resulting potential for involvement of multiple policy periods for individual claims, the increase in the volume of claims made by plaintiffs who claim exposure but who have no symptoms of asbestos-related disease, and an increase in claims subject to coverage under general liability policies that do not contain aggregate limits of liability.

The liability for unpaid losses and loss adjustment expenses, inclusive of A&E reserves, reflects the Company's best estimates for future amounts needed to pay losses and related adjustment expenses as of each of the balance sheet dates reflected in the financial statements herein in accordance with GAAP. As of December 31, 2015, the Company has \$15.8 million of net loss reserves for asbestos-related claims and \$14.7 million for environmental claims. The Company attempts to estimate the full impact of the A&E exposures by establishing specific case reserves on all known losses. See Note 10 of the notes to the consolidated financial statements in Item 8 of Part II of this report for tables showing the Company's gross and net reserves for A&E losses.

In addition to the factors referenced above, establishing reserves for A&E and other mass tort claims involves considerably more judgment than other types of claims due to, among other things, inconsistent court decisions, an increase in bankruptcy filings as a result of asbestos related liabilities, and judicial interpretations that often expand theories of recovery and broaden the scope of coverage.

In 2009, one of the Company's insurance companies entered into a settlement agreement to resolve asbestos related coverage litigation related to approximately 3,900 existing asbestos-related bodily injury claims and future claims. The settlement was approved by the Court and a final order was issued in September 2014. As of December 31, 2015, the Company has no outstanding obligations as it relates to this settlement agreement.

See Note 10 of the notes to the consolidated financial statements in Item 8 of Part II of this report for the survival ratios on a gross and net basis for the Company's open A&E claims.

Investments

The Company's investment policy is determined by the Investment Committee of the Board of Directors. The Company engages third-party investment advisors to oversee its investments and to make recommendations to the Investment Committee. The Company's investment policy allows it to invest in taxable and tax-exempt fixed income investments including corporate bonds as well as publicly traded and private equity investments. With respect to fixed income investments, the maximum exposure per issuer varies as a function of the credit quality of the security. The allocation between taxable and tax-exempt bonds is determined based on market conditions and tax considerations, including the applicability of the alternative minimum tax. The maximum allowable investment in equity securities under the Company's investment policy is 30% of the Company's GAAP equity, or \$225.0 million at December 31, 2015. As of December 31, 2015, the Company had \$1,516.3 million of investments and cash and cash equivalent assets, including \$142.9 million of equity and limited partnership investments plus a \$0.2 million receivable for securities sold.

Insurance company investments must comply with applicable statutory regulations that prescribe the type, quality and concentration of investments. These regulations permit investments, within specified limits and subject to certain qualifications, in federal, state, and municipal obligations, corporate bonds and loans, and preferred and common equity securities.

Table of Contents

The following table summarizes by type the estimated fair value of Global Indemnity's investments and cash and cash equivalents as of December 31, 2015, 2014, and 2013:

(Dollars in thousands)	December 31, 2015		December 31, 2014		December 31, 2013	
	Estimated Fair Value	Percent of Total	Estimated Fair Value	Percent of Total	Estimated Fair Value	Percent of Total

U.S. treasury and agency obligations	107,122	7.1	80,767	5.4	81,674	5.2
Obligations of states and political subdivisions	205,240	13.5	191,473	12.8	180,936	11.5
Mortgage-backed securities (1)	159,123	10.5	208,759	13.9	229,910	14.8
Asset-backed securities	260,022	17.2	178,263	11.9	168,436	10.7
Commercial mortgage-backed securities	140,390	9.3	133,158	8.9	53,975	3.4
Corporate bonds and loans	332,111	21.9	383,416	25.6	435,392	27.9
Foreign corporate bonds	102,141	6.7	107,639	7.2	54,041	3.4
Total fixed maturities	1,306,149	86.2	1,283,475	85.7	1,204,364	76.9
Common stock	110,315	7.3	122,048	8.2	254,070	16.2
Other invested assets	32,592	2.1	33,663	2.2	3,489	0.2
Total investments and cash and cash equivalents (2)	\$ 1,516,093	100.0%	\$ 1,498,009	100.0%	\$ 1,567,415	100.0%

(1) Includes collateralized mortgage obligations of \$57,330, \$49,322, and \$63,322 for 2015, 2014, and 2013, respectively.

(2) Does not include net receivable for securities sold of \$172, \$60, and \$723 for 2015, 2014, and 2013, respectively.

Although the Company generally intends to hold fixed maturities to recovery and/or maturity, the Company regularly re-evaluates its position based upon market conditions. As of December 31, 2015, the Company's fixed maturities, excluding the mortgage-backed, commercial mortgage-backed and collateralized mortgage obligations, had a weighted average maturity of 3.9 years and a weighted average duration, excluding mortgage-backed, commercial mortgage-backed and collateralized mortgage obligations and including cash and short-term investments, of 1.9 years. The Company's financial statements reflect a net unrealized loss on fixed maturities available for sale as of December 31, 2015 of \$2.2 million on a pre-tax basis.

The following table shows the average amount of fixed maturities, income earned on fixed maturities, and the book yield thereon, as well as unrealized gains for the periods indicated:

(Dollars in thousands)	Years Ended December 31,		
	2015	2014	2013
Average fixed maturities at book value	\$ 1,290,641	\$ 1,230,317	\$ 1,187,390
Gross income on fixed maturities (1)	32,091	26,788	35,669
Book yield	2.49%	2.18%	3.00%
Fixed maturities at book value	\$ 1,308,333	\$ 1,272,948	\$ 1,187,685
Unrealized gain (loss)	(2,184)	10,527	16,679

(1) Represents income earned by fixed maturities, gross of investment expenses and excluding realized gains and losses.

The Company has sought to structure its portfolio to reduce the risk of default on collateralized commercial real estate obligations and asset-backed securities. Of the \$159.1 million of mortgage-backed securities, \$101.8 million is invested in U.S. agency paper and \$57.3 million is invested in collateralized mortgage obligations, of

Table of Contents

which \$56.6 million, or 98.8%, are rated AA+ or better. In addition, the Company holds \$260.0 million in asset-backed securities, of which 85.0% are rated AA or better and \$140.4 million in commercial mortgaged-backed securities, of which 98.0% are rated A- or better. The weighted average credit enhancement for the Company's asset-backed securities is 23.4. The Company also faces liquidity risk. Liquidity risk is when the fair value of an investment is not able to be realized due to lack of interest by outside parties in the marketplace. The Company attempts to diversify its investment holdings to minimize this risk. The Company's investment managers run periodic analysis of liquidity costs to the fixed income portfolio. The Company also faces credit risk. 97.4% of the Company's fixed income securities are investment grade securities. 17.0% of the Company's fixed maturities are rated AAA. See "Quantitative and Qualitative Disclosures about Market Risk" in Item 7A of Part II of this report for a more detailed discussion of the credit market and the Company's investment strategy.

The following table summarizes, by Standard & Poor's rating classifications, the estimated fair value of Global Indemnity's investments in fixed maturities, as of December 31, 2015 and 2014:

(Dollars in thousands)	December 31, 2015		December 31, 2014	
	Estimated Fair Value	Percent of Total	Estimated Fair Value	Percent of Total
AAA	\$ 222,381	17.0%	\$ 162,649	12.7%

The expected weighted average duration of the Company's asset-backed, mortgage-backed and commercial mortgage-backed securities is 1.6 years.

The value of the Company's portfolio of bonds is inversely correlated to changes in market interest rates. In addition, some of the Company's bonds have call or prepayment options. This could subject the Company to

Table of Contents

reinvestment risk should interest rates fall and issuers call their securities and the Company is forced to invest the proceeds at lower interest rates. The Company seeks to mitigate its reinvestment risk by investing in securities with varied maturity dates, so that only a portion of the portfolio will mature, be called, or be prepaid at any point in time.

As of December 31, 2015, the Company has aggregate equity securities of \$110.3 million that consisted entirely of common stocks.

The Company's investments in other invested assets is comprised of a limited liability partnership investment where the partnership invests in distressed securities and assets, which was valued at \$32.6 million at December 31, 2015, and a limited liability partnership investment that invests in real estate, which was valued at zero at December 31, 2015. There is no readily available independent market price for these limited liability partnership investments. The Company does not have access to daily valuations, therefore the estimated fair value of these limited partnerships is based on the net asset value as a practical expedient for each limited partnership. The Company receives annual audited financial statements from each of the partnership investments it owns.

Realized losses, including other than temporary impairments, for the year ended December 31, 2015 were \$3.4 million compared with gains of \$35.9 million and \$27.4 million for the years ended December 31, 2014 and 2013, respectively.

Competition

The Company competes with numerous domestic and international insurance and reinsurance companies, mutual companies, specialty insurance companies, underwriting agencies, diversified financial services companies, Lloyd's syndicates, risk retention groups, insurance buying groups, risk securitization products and alternative self-insurance mechanisms. In particular, the Company competes against insurance subsidiaries of the groups in the specialty insurance market noted below, insurance companies, and others, including:

American International Group;

American Modern Insurance Group

Argo Group International Holdings, Ltd.;

Berkshire Hathaway;

Everest Re Group, Ltd.;

Foremost Insurance Group

Great American Insurance Group;

HCC Insurance Holdings, Inc.;

IFG Companies;

Markel Corporation;

Nationwide Insurance;

Navigators Insurance Group;

RLI Corporation;

Selective Insurance Group, Inc.;

The Travelers Companies, Inc.;

Validus Group; and

W.R. Berkley Corporation.

Table of Contents

In addition to the companies mentioned above, the Company is facing competition from standard line companies who are continuing to write risks that traditionally had been written by excess and surplus lines carriers, Bermuda companies who are establishing relationships with wholesale brokers and purchasing carriers, and other excess and surplus lines competitors.

Competition may take the form of lower prices, broader coverage, greater product flexibility, higher quality services, reputation and financial strength or higher ratings by independent rating agencies. In all of the Company's markets, it competes by developing insurance products to satisfy well-defined market needs and by maintaining relationships with brokers and insureds that rely on the Company's expertise. For its program and specialty wholesale products, offerings and underwriting products that are not readily available is the Company's principal means of differentiating itself from its competition. Each of the Company's products has its own distinct competitive environment. The Company seeks to compete through innovative products, appropriate pricing, niche underwriting expertise, and quality service to policyholders, general agencies and brokers.

Employees

At December 31, 2015, the Company had approximately 460 employees. None of the Company's employees are covered by collective bargaining agreements as of December 31, 2015.

Ratings

A.M. Best ratings for the industry range from A++ (Superior) to F (In Liquidation) with some companies not being rated. The Company's Insurance Operations, which consist of its United States based insurance companies, and Global Indemnity Reinsurance are currently rated A (Excellent) by A.M. Best, the third highest of sixteen rating categories.

Publications of A.M. Best indicate that A (Excellent) ratings are assigned to those companies that, in A.M. Best's opinion, have an excellent ability to meet their ongoing obligations to policyholders. In evaluating a company's financial and operating performance, A.M. Best reviews its profitability, leverage and liquidity, as well as its spread of risk, the quality and appropriateness of its reinsurance, the quality and diversification of its assets, the adequacy of its policy and loss reserves, the adequacy of its surplus, its capital structure and the experience and objectives of its management. These ratings are based on factors relevant to policyholders, general agencies, insurance brokers and intermediaries and are not directed to the protection of investors.

Regulation

General

The business of insurance is regulated in most countries, although the degree and type of regulation varies significantly from one jurisdiction to another. As a holding company, Global Indemnity is not subject to any insurance regulation in the Republic of Ireland. However, Global Indemnity is subject to various Irish laws and regulations, including, but not limited to, laws and regulations governing interested directors, mergers and acquisitions, takeovers, shareholder lawsuits, and indemnification of directors.

U.S. Regulation

At December 31, 2015, the Company had seven operating insurance subsidiaries domiciled in the United States; United National Insurance Company, Penn-America Insurance Company, and Penn-Star Insurance Company, which are domiciled in Pennsylvania; Diamond State Insurance Company which is domiciled in Indiana; United National Specialty Insurance Company, which is domiciled in Wisconsin; Penn-Patriot Insurance Company, which is domiciled in Virginia; and American Reliable Insurance Company, which is domiciled in Arizona.

Table of Contents

As the indirect parent of these U.S. insurance companies, Global Indemnity is subject to the insurance holding company laws of Pennsylvania, Indiana, Wisconsin, Virginia, and Arizona. These laws generally require each of the U.S. insurance companies to register with its respective domestic state insurance department and to annually furnish financial and other information about the operations of the companies within the insurance holding company system. Generally, all material transactions among affiliated companies in the holding company system to which any of the U.S. insurance companies is a party must be fair, and, if material or of a specified category, require prior notice and approval or absence of disapproval by the insurance department where the subsidiary is domiciled. Material transactions include sales, loans, reinsurance agreements, certain types of dividends, and service agreements with the non-insurance companies within Global Indemnity's family of companies, the Insurance Operations, or the Reinsurance Operations.

Changes of Control

Before a person can acquire control of a U.S. insurance company, prior written approval must be obtained from the insurance commissioner of the state where the insurer is domiciled. Prior to granting approval of an application to acquire control of a domestic insurer, the state insurance commissioner will consider factors such as the financial strength of the applicant, the integrity and management of the applicant's Board of Directors and executive officers, the acquirer's plans for the management, Board of Directors and executive officers of the company being acquired, the acquirer's plans for the future operations of the domestic insurer and any anti-competitive results that may arise from the consummation of the acquisition of control. Generally, state statutes provide that control over a domestic insurer is presumed to exist if any person, directly or indirectly, owns, controls, holds with the power to vote, or holds proxies representing 10% or more of the voting securities of the domestic insurer. Because a person acquiring 10% or more of the Company's ordinary shares would indirectly control the same percentage of the stock of the U.S. insurance companies, the insurance change of control laws of Pennsylvania, Indiana, Wisconsin, Virginia and Arizona would likely apply to such a transaction. While the Company's articles of association limit the voting power of any U.S. shareholder to less than 9.5%, there can be no assurance that the applicable state insurance regulator would agree that any shareholder did not control the applicable insurance company.

These laws may discourage potential acquisition proposals and may delay, deter or prevent a change of control of Global Indemnity, including through transactions, and in particular unsolicited transactions, that some or all of the shareholders of Global Indemnity might consider desirable.

Federal Insurance Regulation

The Dodd-Frank Wall Street Reform and Consumer Protection Act (the Dodd-Frank Act) includes a number of provisions having a direct impact on the insurance industry, most notably, the creation of a Federal Insurance Office to monitor the insurance industry, streamlining of surplus lines insurance, credit for reinsurance, and systemic risk regulation. The Federal Insurance Office is empowered to gather data and information regarding the insurance industry and insurers, including conducting a study for submission to the U.S. Congress on how to modernize and improve insurance regulation in the United States. With respect to surplus lines insurance, the Dodd-Frank Act gives exclusive authority to regulate surplus lines transactions to the home state of the insured, and the requirement that a surplus lines broker must first attempt to place coverage in the admitted market is substantially softened with respect to large commercial policyholders. Significantly, the Dodd-Frank Act provides that a state may not prevent a surplus lines broker from placing surplus lines insurance with a non-U.S. insurer that appears on the quarterly listing of non-admitted insurers maintained by the International Insurers Department of the National Association of Insurance Commissioners (NAIC). Regarding credit for reinsurance, the Dodd-Frank Act generally provides that the state of domicile of the ceding company (and no other state) may regulate financial statement credit for the ceded risk. The Dodd-Frank Act also provides the U.S. Federal Reserve with supervisory authority over insurance companies that are deemed to be systemically important. Regulations to implement the Dodd-Frank Act continue to be developed and the Company continues to monitor the impact the Dodd-Frank Act may have on operations.

Table of Contents

State Insurance Regulation

State insurance authorities have broad regulatory powers with respect to various aspects of the business of U.S. insurance companies, including, but not limited to, licensing companies to transact admitted business or determining eligibility to write surplus lines business, accreditation of reinsurers, admittance of assets to statutory surplus, regulating unfair trade and claims practices, establishing reserve requirements and solvency standards, management of enterprise risk, regulating investments and dividends, approving policy forms and related materials in certain instances and approving premium rates in certain instances. State insurance laws and regulations may require the Company's U.S. insurance companies to file financial statements with insurance departments everywhere they will be licensed or eligible or accredited to conduct insurance business, and their operations are subject to review by those departments at any time. The Company's U.S. insurance companies prepare statutory financial statements in accordance with statutory accounting principles (SAP) and procedures prescribed or permitted by these departments. State insurance departments also conduct periodic examinations of the books and records, financial reporting, policy filings and market conduct of insurance companies domiciled in their states, generally once every three to five years, although market conduct examinations may take place at any time. These examinations are generally carried out in cooperation with the insurance departments of other states under guidelines promulgated by the NAIC. In addition, admitted insurers are subject to targeted market conduct examinations involving specific insurers by state insurance regulators in any state in which the insurer is admitted. The insurance departments for the states of Pennsylvania, Indiana, Wisconsin, and Virginia completed their most recent financial examinations of the Company's U.S. insurance subsidiaries, excluding American Reliable, for the period ended December 31, 2012. Their final reports were issued in 2014, and there were no materially adverse findings. The insurance department for the state of Arizona completed its most recent financial examination of American Reliable for the period ending December 31, 2013. Their final report was issued in 2015, and there were no materially adverse findings.

Insurance Regulatory Information System Ratios

The NAIC Insurance Regulatory Information System (IRIS) was developed by a committee of the state insurance regulators and is intended primarily to assist state insurance departments in executing their statutory mandates to oversee the financial condition of insurance companies operating in their respective states. IRIS identifies twelve industry ratios and specifies usual values for each ratio. Departure from the usual values of the ratios can lead to inquiries from individual state insurance commissioners as to certain aspects of an insurer's business. Insurers that report four or more ratios that fall outside the range of usual values are generally targeted for increased regulatory review.

The Company's U.S. insurance subsidiaries have acceptable results for the IRIS ratios with the exception of the following:

Change in policyholder's surplus and adjusted liabilities of United National Insurance Company were outside of the IRIS range primarily due to ordinary dividend to its parent, Global Indemnity Group, Inc.

Investment yields were lower than the IRIS range for Diamond State Insurance Company, United National Specialty Insurance Company, Penn-Star Insurance Company and Penn-Patriot Insurance Company. The investment portfolios of these companies are invested in high quality short duration bonds.

The following ratios were outside of the IRIS range due to the acquisition of American Reliable Insurance Company on January 1, 2015 and the addition of American Reliable Insurance Company to the intercompany pooling arrangements:

Changes in net written premiums for American Reliable Insurance Company, United National Insurance Company, Diamond State Insurance Company, United National Specialty Insurance Company, Penn-Star Insurance Company and Penn-Patriot Insurance Company

Asset to liability liquidity ratios for United National Insurance Company, Penn-America Insurance Company and American Reliable Insurance Company

Table of Contents

Estimated current reserve deficiency for United National Insurance Company, Diamond State Insurance Company, United National Specialty Insurance Company, Penn-America Insurance Company and Penn-Star Insurance Company

Two-year overall operating ratio for Penn-Patriot Insurance Company and American Reliable Insurance Company

Risk-Based Capital Regulations

The state insurance departments of Pennsylvania, Indiana, Wisconsin, Virginia and Arizona require that each domestic insurer report its risk-based capital based on a formula calculated by applying factors to various asset, premium and reserve items. The formula takes into account the risk characteristics of the insurer, including asset risk, insurance risk, interest rate risk and business risk. The respective state insurance regulators use the formula as an early warning regulatory tool to identify possible inadequately capitalized insurers for purposes of initiating regulatory action, and generally not as a means to rank insurers. State insurance laws impose broad confidentiality requirements on those engaged in the insurance business (including insurers, general agencies, brokers and others) and on state insurance departments as to the use and publication of risk-based capital data. The respective state insurance regulators have explicit regulatory authority to require various actions by, or to take various actions against, insurers whose total adjusted capital does not exceed certain company action level risk-based capital levels.

Based on the standards currently adopted, the U.S. insurance companies reported in their 2015 statutory filings that their capital and surplus are above the prescribed company action level risk-based capital requirements. See Note 18 of the notes to the consolidated financial statements in Item 8 of Part II of this report for additional information on the NAIC's risk-based capital model for determining the levels of statutory capital and surplus an insurer must maintain.

Statutory Accounting Principles

SAP is a basis of accounting developed to assist insurance regulators in monitoring and regulating the solvency of insurance companies. SAP is primarily concerned with measuring an insurer's surplus. Accordingly, statutory accounting focuses on valuing assets and liabilities of insurers at financial reporting dates in accordance with appropriate insurance laws, regulatory provisions, and practices prescribed or permitted by each insurer's domiciliary state.

GAAP is concerned with a company's solvency, but it is also concerned with other financial measurements, such as income and cash flows. As a direct result, different line item groupings of assets and liabilities and different amounts of assets and liabilities are reflected in financial statements prepared in accordance with GAAP than financial statements prepared in accordance with SAP.

Statutory accounting practices established by the NAIC and adopted in part by the Pennsylvania, Indiana, Wisconsin, Virginia, and Arizona regulators determine, among other things, the amount of statutory surplus and statutory net income of the U.S. insurance companies and thus determine, in part, the amount of funds these subsidiaries have available to pay dividends.

State Dividend Limitations

The U.S. insurance companies are restricted by statute as to the amount of dividends that they may pay without the prior approval of the applicable state regulatory authorities. Dividends may be paid without advanced regulatory approval only out of unassigned surplus. The dividend limitations imposed by the applicable state laws are based on the statutory financial results of each company within the Insurance Operations that are determined using statutory accounting practices that differ in various respects from accounting principles used in

Table of Contents

financial statements prepared in conformity with GAAP. See Regulation Statutory Accounting Principles. Key differences relate to, among other items, deferred acquisition costs, limitations on deferred income taxes, reserve calculation assumptions and surplus notes, if any.

See the Liquidity and Capital Resources section in Item 7 of Part II of this report for a more complete description of the state dividend limitations. See Note 18 of the notes to consolidated financial statements in Item 8 of Part II of this report for the dividends declared and paid by Global Indemnity's U.S. insurance companies in 2015 and the maximum amount of distributions that U.S. insurance companies could pay as dividends in 2016.

Guaranty Associations and Similar Arrangements

Most of the jurisdictions in which the U.S. insurance companies are admitted to transact business require property and casualty insurers doing business within that jurisdiction to participate in guaranty associations. These associations are organized to pay contractual benefits owed pursuant to insurance policies issued by impaired, insolvent or failed insurers. These associations levy assessments, up to prescribed limits, on all member insurers in a particular state on the basis of the proportionate share of the premiums written by member insurers in the lines of business in which the impaired, insolvent, or failed insurer is engaged. Some states permit member insurers to recover assessments paid through full or partial premium tax offsets or in limited circumstances by surcharging policyholders.

Operations of Global Indemnity Reinsurance

The insurance laws of the United States regulate or prohibit the sale of insurance and reinsurance within their jurisdictions by non-domestic insurers and reinsurers that are not admitted to do business within such jurisdictions. Global Indemnity Reinsurance is not admitted to do business in the United States. The Company does not intend for Global Indemnity Reinsurance to maintain offices or solicit, advertise, settle claims or conduct other insurance and reinsurance underwriting activities in any jurisdiction in the United States where the conduct of such activities would require that Global Indemnity Reinsurance be admitted or authorized.

As a reinsurer that is not licensed, accredited, or approved in any state in the United States, Global Indemnity Reinsurance is required to post collateral security with respect to the reinsurance liabilities it assumes from the Company's Insurance Operations as well as other U.S. ceding companies. The posting of collateral security is generally required in order for U.S. ceding companies to obtain credit on their U.S. statutory financial statements with respect to reinsurance liabilities ceded to unlicensed or unaccredited reinsurers. Under applicable United States credit for reinsurance statutory provisions, the security arrangements generally may be in the form of letters of credit, reinsurance trusts maintained by third-party trustees or funds-withheld arrangements whereby the ceded premium is held by the ceding company. If credit for reinsurance laws or regulations are made more stringent in Pennsylvania, Indiana, Wisconsin, Virginia and Arizona or other applicable states or any of the U.S. insurance companies re-domesticate to one of the few states that do not allow credit for reinsurance ceded to non-licensed reinsurers, the Company may be unable to realize some of the benefits expected from its business plan. Accordingly, Global Indemnity Reinsurance could be adversely affected.

Global Indemnity Reinsurance generally is not subject to regulation by U.S. jurisdictions. Specifically, rate and form regulations otherwise applicable to authorized insurers generally do not apply to Global Indemnity Reinsurance's surplus lines transactions.

Bermuda Insurance Regulation

The Bermuda Insurance Act 1978 and related regulations, as amended (the Insurance Act), regulates the insurance business of Global Indemnity Reinsurance and provides that no person may carry on any such business in or from within Bermuda unless registered as an insurer by the Bermuda Monetary Authority (the BMA).

Table of Contents

under the Insurance Act. Global Indemnity Reinsurance, which is incorporated to carry on general insurance and reinsurance business, is registered as a Class 3B insurer in Bermuda. A corporate body is registrable as a Class 3B insurer if it intends to carry on insurance business in circumstances where 50% or more of the net premiums written or 50% or more of the loss and loss expense provisions represent unrelated business, or its total net premiums written from unrelated business are \$50.0 million or more. The continued registration of an applicant as an insurer is subject to it complying with the terms of its registration and such other conditions as the BMA may impose from time to time. An insurer's registration may be canceled by the BMA on certain grounds specified in the Insurance Act, including failure of the insurer to comply with its obligations under the Insurance Act.

The Insurance Act imposes solvency and liquidity standards, auditing and reporting requirements, and grants the BMA powers to supervise, investigate, require information and the production of documents, and to intervene in the affairs of Bermuda insurance companies. The BMA continues to make amendments to the Insurance Act with a view to enhancing Bermuda's insurance regulatory regime.

The BMA utilizes a risk-based approach when it comes to licensing and supervising insurance companies. As part of the BMA's risk-based system, an assessment of the inherent risks within each particular class of insurer is used to determine the limitations and specific requirements which may be imposed. Thereafter the BMA keeps its analysis of relative risk within individual institutions under review on an ongoing basis, including through the scrutiny of regular audited statutory financial statements, and, as appropriate, meeting with senior management during onsite visits.

Certain significant aspects of the Bermuda insurance regulatory framework are set forth as follows:

Cancellation of Insurer's Registration

An insurer's registration may be canceled by the BMA on certain grounds specified in the Bermuda Insurance Act, including failure of the insurer to comply with its obligations under the Bermuda Insurance Act or if, in the opinion of the BMA, the insurer has not been carrying on business in accordance with sound insurance principles.

Principal Representative and Principal Office

Every registered insurer or reinsurer is required to maintain a principal office in Bermuda and to appoint and maintain a principal representative in Bermuda, subject to certain prescribed requirements under the Bermuda Insurance Act. Further, any registered insurer that is a Class 3A insurer or above is required to maintain a head office in Bermuda and direct and manage its insurance business from Bermuda. The recent amendments to the Bermuda Insurance Act provide that in considering whether an insurer satisfies the requirements of having its head office in Bermuda, the BMA may consider (a) where the underwriting, risk management, and operational decision making occurs; (b) whether the presence of senior executives who are responsible for, and involved in, the decision making are located in Bermuda; and (c) where meetings of the board of directors occur. The BMA will also consider (a) the location where management meets to effect policy decisions; (b) the residence of the officers, insurance managers or employees; and (c) the residence of one or more directors in Bermuda.

Global Indemnity Reinsurance maintains its principal office in Hamilton, Bermuda and its external management firm has been appointed as its principal representative.

It is the duty of the principal representative upon reaching the view that there is a likelihood of the insurer for which the principal representative acts becoming insolvent or that a reportable event has, to the principal representative's knowledge, occurred or is believed to have occurred, to immediately notify the BMA and to make a report in writing to the BMA within 14 days of the prior notification setting out all the particulars of the case that are available to the principal representative.

Table of Contents

Where there has been a significant loss which is reasonably likely to cause the insurer to fail to comply with its enhanced capital requirement (in respect of its general business, as described below under the Enhanced Capital Requirement (ECR) and Minimum Solvency Margin (MSM) section), the principal representative must also furnish the BMA with a capital and solvency return reflecting an enhanced capital requirement prepared using post-loss data. The principal representative must provide this within 45 days of notifying the BMA regarding the loss.

Furthermore, where a notification has been made to the BMA regarding a material change to an insurer's business or structure (including a merger or amalgamation), the principal representative has 30 days from the date of such notification to furnish the BMA with unaudited interim statutory financial statements in relation to such period if so requested by the BMA, together with a general business solvency certificate in respect to those statements.

Independent Approved Auditor

Every registered insurer, such as Global Indemnity Reinsurance, must appoint an independent auditor who will audit and report annually on the statutory financial statements and the statutory financial return of the insurer, both of which are required to be filed annually with the BMA.

Loss Reserve Specialist

As a registered Class 3B insurer, Global Indemnity Reinsurance is required to submit an opinion of its approved loss reserve specialist in respect of its losses and loss expense provisions with its statutory financial return.

Statutory Financial Statements

Global Indemnity Reinsurance must prepare annual statutory financial statements in accordance with the Bermuda Insurance Act 1978. These statutory financial statements are not prepared in accordance with GAAP or SAP. The Insurance Act prescribes rules for the preparation and substance of these statutory financial statements (which include, in statutory form, a balance sheet, an income statement, a statement of capital and surplus and notes thereto).

Annual Statutory Financial Return

Global Indemnity Reinsurance is required to file with the BMA a statutory financial return no later than four months after its financial year end (unless specifically extended upon application to the BMA). The statutory financial return for a Class 3B insurer includes, among other matters, a report of the approved independent auditor on the statutory financial statements of the insurer, solvency certificates, schedules of ceded reinsurance, the statutory financial statements, a declaration of statutory ratios and the opinion of the loss reserve specialist. Pursuant to the Bermuda Insurance (Prudential Standards) (Class 4 and 3B Solvency Requirement) rules 2008, Global Indemnity Reinsurance is required to give detailed information and analyses regarding premiums, claims, reinsurance, and investments and is also required to provide audited annual financial statements prepared in accordance with GAAP or International Financial Reporting Standards.

Enhanced Capital Requirement (ECR) and Minimum Solvency Margin (MSM)

The BMA has promulgated the Insurance (Prudential Standards) (Class 4 and Class 3B Solvency Requirement) Amendment Rules 2008, as amended (the Rules) which, among other things, mandate that a Class 3B insurer's ECR be calculated by either (a) the model set out in Schedule I to the Rules, or (b) an internal capital model which the BMA has approved for use for this purpose. These measures are an integral part of the BMA's ongoing Solvency II equivalence program for Class 3B insurance companies. For 2015, Global Indemnity Reinsurance used the BMA's model to calculate its capital and solvency requirements.

Table of Contents

The risk-based regulatory capital adequacy and solvency requirements implemented with effect from December 31, 2008 (termed the Bermuda Solvency Capital Requirement or BSCR) provide a risk-based capital model as a tool to assist the BMA both in measuring risk and in determining appropriate levels of capitalization. BSCR employs a standard mathematical model that correlates the risk underwritten by Bermuda insurers to the capital that is dedicated to their business. The framework that has been developed applies a standard measurement format to the risk associated with an insurer's assets, liabilities and premiums, including a formula to take account of catastrophe risk exposure.

Where an insurer believes that its own internal model for measuring risk and determining appropriate levels of capital better reflects the inherent risk of its business, it may apply to the BMA for approval to use its internal capital model in substitution for the BSCR model. The BMA may approve an insurer's internal model, provided certain conditions have been established, and may revoke approval of an internal model in the event that the conditions are no longer met or where it feels that the revocation is appropriate. The BMA will review the internal model regularly to confirm that the model continues to meet the conditions.

In order to minimize the risk of a shortfall in capital arising from an unexpected adverse deviation, the BMA seeks that insurers operate at or above a threshold capital level (termed the Target Capital Level or TCL), which exceeds the BSCR or approved internal model minimum amounts. The Rules provide prudential standards in relation to the ECR and Capital and Solvency Return (CSR). The ECR is determined using the BSCR or an approved internal model, provided that at all times the ECR must be an amount equal to, or exceeding the MSM. The CSR is the return setting out the insurer's risk management practices and other information used by the insurer to calculate its approved internal model ECR. The capital requirements require Class 3B insurers to hold available statutory capital and surplus equal to, or exceeding ECR and set TCL at 120% of ECR. In circumstances where an insurer has failed to comply with an ECR given by the BMA, such insurer is prohibited from declaring or paying any dividends until the failure is rectified.

The risk-based solvency capital framework referred to above represents a modification of the minimum solvency margin test set out in the Insurance Returns and Solvency Amendment Regulations 1980 (as amended). While it must calculate its ECR annually by reference to either the BSCR or an approved internal model, Global Indemnity Reinsurance must also ensure at all times that its ECR is at least equal to the MSM for a Class 3B insurer in respect of its general business, which is the greater of:

- (i) \$1.0 million;
- (ii) 50% of net premiums written;
- (iii) 15% of net loss and loss adjustment expense reserves and other general business insurance reserves.
- (iv) 25% of the insurer's enhanced capital requirement.

The BMA has also introduced a three-tiered capital system for Class 3B insurers designed to assess the quality of capital resources that an insurer has available to meet its capital requirements. The tiered capital system classifies all capital instruments into one of three tiers based on their loss absorbency characteristics, with the highest quality capital classified as Tier 1 Capital and lesser quality capital classified as either Tier 2 or Tier 3 Capital. Only Tier 1 and Tier 2 Capital may be used to support an insurer's MSM. Certain percentages of each of Tier 1, 2 and 3 Capital may be used to satisfy an insurer's ECR. Any combination of Tier 1, 2 or 3 Capital may be used to meet the TCL.

The Rules introduced a regime that requires Class 3B insurers to perform an assessment of their own risk and solvency requirements, referred to as a Commercial Insurer's Solvency Self Assessment (CISSA). The CISSA will allow the BMA to obtain an insurer's view of the capital resources required to achieve its business objectives and to assess the company's governance, risk management and controls surrounding this process. The Rules also introduced a Catastrophe Risk Return, which must be filed with the BMA, which assesses an insurer's reliance on vendor models in assessing catastrophe exposure.

Table of Contents

Economic Balance Sheet Framework

The Economic Balance Sheet (EBS) framework is an accounting balance sheet approach using market consistent values for all current assets and current obligations relating to in-force business which applies to Class 3B and 4 insurers effective for the 2016 financial year end. The EBS framework is embedded as part of the Capital and Solvency Return and forms the basis for the insurer's ECR. There is a mandatory trial run of the EBS for all insurers and insurance groups for the 2015 year end and the EBS will be in full effect as of 2016 year end.

Minimum Liquidity Ratio

The Insurance Act provides a minimum liquidity ratio for general business insurers, such as Global Indemnity Reinsurance. An insurer engaged in general business is required to maintain the value of its relevant assets at not less than 75% of the amount of its relevant liabilities; as such terms are defined in the Insurance Act.

Restrictions on Dividends and Distributions

Global Indemnity Reinsurance is prohibited from declaring or paying any dividends during any financial year if it is in breach of its minimum solvency margin or minimum liquidity ratio or if the declaration or payment of such dividends would cause it to fail to meet such margin or ratio. In addition, if it has failed to meet its minimum solvency margin or minimum liquidity ratio on the last day of any financial year, Global Indemnity Reinsurance will be prohibited, without the approval of the BMA, from declaring or paying any dividends during the next financial year.

Global Indemnity Reinsurance is prohibited, without the approval of the BMA, from reducing by 15% or more its total statutory capital as set out in its previous year's financial statements, and any application for such approval must include such information as the BMA may require. In addition, if at any time it fails to meet its minimum margin of solvency, Global Indemnity Reinsurance is required within 30 days after becoming aware of such failure or having reason to believe that such failure has occurred, to file with the BMA a written report containing certain information.

Additionally, under the Companies Act, Global Indemnity Reinsurance may not declare or pay a dividend, or make a distribution from contributed surplus, if there are reasonable grounds for believing that it is, or would after the payment be, unable to pay its liabilities as they become due, or if the realizable value of its assets would be less than the aggregate of its liabilities and its issued share capital and share premium accounts.

Supervision, Investigation and Intervention

The BMA has wide powers of investigation and document production in relation to Bermuda insurers under the Insurance Act. For example, the BMA may appoint an inspector with extensive powers to investigate the affairs of Global Indemnity Reinsurance if the BMA believes that such an investigation is in the best interests of its policyholders or persons who may become policyholders. Further, the BMA has the power to appoint a professional person to prepare a report on any aspect of any matter about which the BMA has or could require information. If it appears to the BMA that there is a risk of Global Indemnity Reinsurance becoming insolvent, or that Global Indemnity Reinsurance is in breach of the Insurance Act or any conditions imposed upon its registration, the BMA may, among other things, direct Global Indemnity Reinsurance not to take on any new business, not to vary any current treaties if the effect would be to increase its liabilities, not to make certain investments, to realize or not realize certain investments, to maintain in, or transfer to, the custody of a specified bank, certain assets, not to declare or pay any dividends or other distributions or to restrict the making of such payments, or to limit its premium income or remove an officer.

The BMA may also make additional rules prescribing prudential standards in relation to ECR, CSR's, insurance reserves and eligible capital which Global Indemnity Reinsurance must comply with.

Bermuda Code of Conduct

The BMA has implemented the Insurance Code of Conduct (the *Bermuda Code of Conduct*) which came into effect on July 1, 2010. The BMA established July 1, 2011 as the date of compliance for commercial insurers. The Bermuda Code of Conduct is divided into six categories: (i) Proportionality Principal, (ii) Corporate Governance, (iii) Risk Management, (iv) Governance Mechanism, (v) Outsourcing, and (vi) Market Discipline and Disclosure. These categories contain the duties, requirements and compliance standards to which all insurers must adhere. It stipulates that in order to achieve compliance with the Bermuda Code of Conduct, insurers are to develop and apply policies and procedures capable of assessment by the BMA. Global Indemnity Reinsurance is in compliance with the Bermuda Code of Conduct.

Group Supervision

Emerging international norms in the regulation of global insurance groups are trending increasingly towards the imposition of group-wide supervisory regimes by one principal home regulator over all the legal entities in the group, no matter where incorporated. Amendments to the Insurance Act in 2010 introduced such a regime into Bermuda insurance regulation.

The Insurance Act contains provisions regarding group supervision, the authority to exclude specified entities from group supervision, the power for the BMA to withdraw as a group supervisor, the functions of the BMA as group supervisor and the power of the BMA to make rules regarding group supervision.

The BMA has issued the Insurance (Group Supervision) Rules 2011 (the *Group Supervision Rules*) and the Insurance (Prudential Standards) (Insurance Group Solvency Requirement) Rules 2011 (the *Group Solvency Rules*) each effective December 31, 2011. The Group Supervision Rules set out the rules in respect of the assessment of the financial situation and solvency of an insurance group, the system of governance and risk management of the insurance group, and supervisory reporting and disclosures of the insurance group. The Group Solvency Rules set out the rules in respect of the capital and solvency return and enhanced capital requirements for an insurance group. The BMA also intends to publish an insurance code of conduct in relation to group supervision.

Global Indemnity Reinsurance was notified by the BMA that, having considered the matters set out in the 2010 amendments to the Insurance Act, it had determined that it would not be Global Indemnity Reinsurance's group supervisor.

Notifications to the BMA

In the event that the share capital of an insurer (or its parent) is traded on any stock exchange recognized by the BMA, then any shareholder must notify the BMA within 45 days of becoming a 10%, 20%, 33% or 50% shareholder of such insurer. An insurer must also provide written notice to the BMA that a person has become, or ceased to be, a *Controller* of that insurer. A *Controller* for this purpose means a managing director, chief executive or other person in accordance with whose directions or instructions the Directors of Global Indemnity Reinsurance are accustomed to act, including any person who holds, or is entitled to exercise, 10% or more of the voting shares or voting power or is otherwise able to exercise significant influence over the management of Global Indemnity Reinsurance.

Global Indemnity Reinsurance is also required to notify the BMA in writing in the event any person has become or ceased to be an officer of it, an officer being a director, chief executive or senior executive performing duties of underwriting, actuarial, risk management, compliance, internal audit, finance or investment matters. Failure to give required notice is an offense under the Insurance Act.

Table of Contents

An insurer, or designated insurer in respect of the group of which it is a member, must notify the BMA in writing that it proposes to take measures that are likely to be of material significance for the discharge, in relation to the insurer or the group, of the BMA's functions under the Insurance Act. Measures that are likely to be of material significance include:

acquisition or transfer of insurance business being part of a scheme falling within section 25 of the Insurance Act or section 99 of the Companies Act;

amalgamation with or acquisition of another firm; and

a material change in the insurer's business plan not otherwise reported to the BMA.

In respect of the forgoing, the BMA will typically object to the material change unless it is satisfied that:

the interest of the policyholders and potential policyholders of the insurer or the group would not in any manner be threatened by the material change; and

without prejudice to the first point, that, having regard to the material change, the requirements of the Insurance Act would continue to be complied with, or, if any of those requirements are not complied with, that the insurer concerned is likely to undertake adequate remedial action.

Failure to give such notice constitutes an offence under the Insurance Act. It is possible to appeal a notice of objection served by the BMA.

Disclosure of Information

The BMA may assist other regulatory authorities, including foreign insurance regulatory authorities, with their investigations involving insurance and reinsurance companies in Bermuda, but subject to restrictions. For example, the BMA must be satisfied that the assistance being requested is in connection with the discharge of regulatory responsibilities of the foreign regulatory authority. Further, the BMA must consider whether cooperation is in the public interest. The grounds for disclosure are limited and the Insurance Act provides sanctions for breach of the statutory duty of confidentiality.

Under the Companies Act, the Minister of Finance may assist a foreign regulatory authority that has requested assistance in connection with inquiries being carried out by it in the performance of its regulatory functions. The Minister of Finance's powers include requiring a person to furnish information to the Minister of Finance, to produce documents to the Minister of Finance, to attend and answer questions and to give assistance to the Minister of Finance in relation to inquiries. The Minister of Finance must be satisfied that the assistance requested by the foreign regulatory authority is for the purpose of its regulatory functions and that the request is in relation to information in Bermuda that a person has in his possession or under his control. The Minister of Finance must consider, among other things, whether it is in the public interest to give the information sought.

Certain Other Bermuda Law Considerations

Although Global Indemnity Reinsurance is incorporated in Bermuda, it is classified as a non-resident of Bermuda for exchange control purposes by the BMA. Pursuant to the non-resident status, Global Indemnity Reinsurance may engage in transactions in currencies other than Bermuda dollars, and there are no restrictions on its ability to transfer funds (other than funds denominated in Bermuda dollars) in and out of Bermuda or to pay dividends to United States residents that are holders of its ordinary shares.

Under Bermuda law, exempted companies are companies formed for the purpose of conducting business outside Bermuda from a principal place of business in Bermuda. As an exempted company, Global Indemnity Reinsurance may not, without the express authorization of the Bermuda legislature or under a license or consent granted by the Minister of Finance, participate in certain business transactions, including transactions involving Bermuda landholding rights and the carrying on of business of any kind for which it is not licensed in Bermuda.

Table of Contents

Taxation of Global Indemnity and Subsidiaries

Ireland

Global Indemnity is a public limited company incorporated under the laws of Ireland. The Company is a resident taxpayer fully subject to Ireland corporate income tax of 12.5% on trading income and 25.0% on non-trading income, including interest and dividends from foreign companies. The capital gains tax rate is 33.0%. Currently, Global Indemnity has only non-trading income, so it is subject to corporate income tax of 25.0%.

United America Indemnity, Ltd., a direct wholly-owned subsidiary, is a private limited liability company incorporated under the laws of the Cayman Islands. The company is an Irish tax resident fully subject to Ireland corporate income tax laws. Currently, United America Indemnity, Ltd. has only non-trading income, so it is subject to corporate income tax of 25.0%.

Global Indemnity Services Ltd., a direct wholly-owned subsidiary, is a company limited by shares incorporated under the laws of Ireland. The company is a resident taxpayer fully subject to Ireland corporate income tax laws. Currently, Global Indemnity Services Ltd. has only trading income, so it is subject to corporate income tax of 12.5%.

U.A.I. (Ireland) Limited, an indirect wholly-owned subsidiary, is a company limited by shares incorporated under the laws of Ireland. The company is a resident taxpayer fully subject to Ireland corporate income tax laws. Currently, U.A.I. (Ireland) Limited has only non-trading income, so it is subject to corporate income tax of 25.0%.

U.A.I. (Ireland) II Unlimited Company, an indirect wholly-owned subsidiary, is a private unlimited company incorporated under the laws of Ireland. The company is a resident taxpayer fully subject to Ireland corporate income tax laws. Currently, U.A.I. (Ireland) II Unlimited Company has only non-trading income, so it is subject to corporate income tax of 25.0%.

Cayman Islands

United America Indemnity, Ltd., a direct wholly-owned subsidiary, and Global Indemnity (Cayman) Ltd., an indirect wholly-owned subsidiary, are private limited liability companies incorporated under the laws of the Cayman Islands. Under current Cayman Islands law, the Company is not required to pay any taxes in the Cayman Islands on its income or capital gains. United America Indemnity, Ltd. obtained an undertaking on September 2, 2003 from the Governor in Council of the Cayman Islands substantially that, for a period of 20 years from the date of such undertaking, no law that is enacted in the Cayman Islands imposing any tax to be levied on profit or income or gains or appreciation shall apply to it and no such tax and no tax in the nature of estate duty or inheritance tax will be payable, either directly or by way of withholding, on its shares. Given the limited duration of the undertaking, the Company cannot be certain that it will not be subject to Cayman Islands tax after the expiration of the 20 year period.

Bermuda

Under current Bermuda law, the Company and its Bermuda subsidiaries are not required to pay any taxes in Bermuda on income or capital gains. Currently, there is no Bermuda income, corporation or profits tax, withholding tax, capital gains tax, capital transfer tax, estate duty or inheritance tax payable by Global Indemnity Reinsurance or its shareholders, other than shareholders ordinarily resident in Bermuda, if any. Currently, there is no Bermuda withholding or other tax on principal, interest, or dividends paid to holders of the ordinary shares of Global Indemnity Reinsurance, other than holders ordinarily resident in Bermuda, if any. There can be no assurance that Global Indemnity Reinsurance or its shareholders will not be subject to any such tax in the future.

Table of Contents

The Company has received a written assurance from the Bermuda Minister of Finance under the Exempted Undertakings Tax Protection Act of 1966 of Bermuda, that if any legislation is enacted in Bermuda that would impose tax computed on profits or income, or computed on any capital asset, gain or appreciation, or any tax in the nature of estate duty or inheritance tax, then the imposition of that tax would not be applicable to Global Indemnity Reinsurance or to any of its operations, shares, debentures or obligations through March 31, 2035; provided that such assurance is subject to the condition that it will not be construed to prevent the application of such tax to people ordinarily resident in Bermuda, or to prevent the application of any taxes payable by Global Indemnity Reinsurance in respect of real property or leasehold interests in Bermuda held by them. Given the limited duration of the assurance, the Company cannot be certain that the Company will not be subject to any Bermuda tax after March 31, 2035.

Gibraltar

Global Indemnity (Gibraltar) Ltd., an indirect wholly-owned subsidiary, is a private limited liability company incorporated under the laws of Gibraltar. The Company received a tax ruling from the Ministry of Finance Income Tax Office of Gibraltar that dividends and distributions received by Global Indemnity (Gibraltar) Ltd. from Global Indemnity (Cayman) Ltd. would not be subject to tax in Gibraltar, provided that Global Indemnity (Gibraltar) Ltd. continues to indirectly hold a relevant participation in U.A.I. (Luxembourg) I S.à.r.l.

Luxembourg

U.A.I. (Luxembourg) I S.à.r.l., U.A.I. (Luxembourg) II S.à.r.l., U.A.I. (Luxembourg) III S.à.r.l., U.A.I. (Luxembourg) IV S.à.r.l., U.A.I. (Luxembourg) Investment S.à.r.l., Wind River (Luxembourg) S.à.r.l., and Global Indemnity (Luxembourg) S.à.r.l. (the Luxembourg Companies) are indirect wholly-owned subsidiaries and private limited liability companies incorporated under the laws of Luxembourg. These are taxable companies, which may carry out any activities that fall within the scope of their corporate object clause. In accordance with Luxembourg regulations, the companies are resident taxpayers fully subject to Luxembourg corporate income tax at a rate of 29.22% and net worth tax at a rate of 0.5%. The companies are entitled to benefits of the tax treaties concluded between Luxembourg and other countries and European Union Directives.

Profit distributions (not in respect to liquidations) by the companies are generally subject to Luxembourg dividend withholding tax at a rate of 15%, unless a domestic law exemption or a lower tax treaty rate applies. Dividends paid by any of the Luxembourg Companies to their Luxembourg resident parent company are exempt from Luxembourg dividend withholding tax, provided that at the time of the dividend distribution, the resident parent company has held (or commits itself to continue to hold) 10% or more of the nominal paid up capital of the distributing entity or, in the event of a lower percentage participation, a participation having an acquisition price of Euro 1.2 million or more for a period of at least 12 months.

The Luxembourg Companies have received advance tax confirmations (ATCs) from the Luxembourg Administration des Contributions Directes (the Luxembourg tax authorities) that the financing activities of the Luxembourg Companies does not lead to taxation in Luxembourg except for the taxation as provided in the ATCs. Based on these confirmations, the current financing activities of the Luxembourg Companies should not lead to taxation in Luxembourg other than for such tax as provided for in the financial statements. The Luxembourg Companies have in their files transfer pricing documentation substantiating the arm's length nature of the financing activities. It is however not guaranteed that the Luxembourg Companies cannot be subject to higher Luxembourg taxes.

Dividends by Global Indemnity (Luxembourg) S.à.r.l. to United America Indemnity, Ltd., an Irish tax resident, are exempt from withholding tax in Luxembourg, provided that as of the date on which the income is made available, United America Indemnity, Ltd. has held or undertakes to hold, directly, for an uninterrupted period of at least 12 months, a relevant participation in the share capital of Global Indemnity (Luxembourg) S.à.r.l. United America Indemnity, Ltd. has held such participation since April, 2010.

Table of Contents

Global Indemnity (Luxembourg) S.à.r.l. benefits from the Luxembourg participation exemption regime for its participation in Global Indemnity (Gibraltar) Ltd. with respect to dividends and capital gains derived there from, provided Global Indemnity (Luxembourg) S.à.r.l. has held or commits to hold a participation in the share capital of Global Indemnity (Gibraltar) Ltd. for an uninterrupted period of at least 12 months. Global Indemnity (Luxembourg) S.à.r.l. has held such participation since June, 2010.

United States

The following discussion is a summary of the material U.S. federal income tax considerations relating to the Company's operations. The Company manages its business in a manner that seeks to mitigate the risk that either Global Indemnity or Global Indemnity Reinsurance will be treated as engaged in a U.S. trade or business for U.S. federal income tax purposes. However, whether business is being conducted in the United States is an inherently factual determination. Because the United States Internal Revenue Code (the Code), regulations and court decisions fail to identify definitively activities that constitute being engaged in a trade or business in the United States, the Company cannot be certain that the IRS will not contend successfully that Global Indemnity or Global Indemnity Reinsurance is or has been engaged in a trade or business in the United States. A non-U.S. corporation deemed to be so engaged would be subject to U.S. income tax at regular corporate rates, as well as the branch profits tax, on its income that is treated as effectively connected with the conduct of that trade or business unless the corporation is entitled to relief under the permanent establishment provision of an applicable tax treaty, as discussed below. Such income tax, if imposed, would be based on effectively connected income computed in a manner generally analogous to that applied to the income of a U.S. corporation, except that a non-U.S. corporation is generally entitled to deductions and credits only if it timely files a U.S. federal income tax return. Global Indemnity and Global Indemnity Reinsurance are filing protective U.S. federal income tax returns on a timely basis in order to preserve the right to claim income tax deductions and credits if it is ever determined that it is subject to U.S. federal income tax. All of the Company's other non-U.S. entities are considered disregarded entities for federal income tax purposes. The highest marginal federal income tax rates as of 2015 are 39.6% for a corporation's effectively connected income and 30% for the branch profits tax.

If Global Indemnity Reinsurance is entitled to the benefits under the tax treaty between Bermuda and the United States (the Bermuda Treaty), Global Indemnity Reinsurance would not be subject to U.S. income tax on any business profits of its insurance enterprise found to be effectively connected with a U.S. trade or business, unless that trade or business is conducted through a permanent establishment in the United States. No regulations interpreting the Bermuda Treaty have been issued. Global Indemnity Reinsurance currently conducts its activities to reduce the risk that it will have a permanent establishment in the United States, although the Company cannot be certain that it will achieve this result.

An insurance enterprise resident in Bermuda generally will be entitled to the benefits of the Bermuda Treaty if (1) more than 50% of its shares are owned beneficially, directly or indirectly, by individual residents of the United States or Bermuda or U.S. citizens and (2) its income is not used in substantial part, directly or indirectly, to make disproportionate distributions to, or to meet certain liabilities to, persons who are neither residents of either the United States or Bermuda nor U.S. citizens. The Company cannot be certain that Global Indemnity Reinsurance will be eligible for Bermuda Treaty benefits in the future because of factual and legal uncertainties regarding the residency and citizenship of the Company's shareholders.

Foreign insurance companies carrying on an insurance business within the United States have a certain minimum amount of effectively connected net investment income, determined in accordance with a formula that depends, in part, on the amount of U.S. risk insured or reinsured by such companies. If Global Indemnity Reinsurance is considered to be engaged in the conduct of an insurance business in the United States and it is not entitled to the benefits of the Bermuda Treaty in general (because it fails to qualify under the limitations on treaty benefits discussed above), the Code could subject a significant portion of Global Indemnity Reinsurance's investment income to U.S. income tax. In addition, while the Bermuda Treaty clearly applies to premium income, it is uncertain whether the Bermuda Treaty applies to other income such as investment income. If Global Indemnity

Table of Contents

Reinsurance is considered engaged in the conduct of an insurance business in the United States and is entitled to the benefits of the Bermuda Treaty in general, but the Bermuda Treaty is interpreted to not apply to investment income, a significant portion of Global Indemnity Reinsurance's investment income could be subject to U.S. federal income tax.

The United States also imposes an excise tax on insurance and reinsurance premiums paid to foreign insurers or reinsurers with respect to risks located in the United States. The rates of tax applicable to premiums paid to Global Indemnity Reinsurance on such business are 4% for direct insurance premiums and 1% for reinsurance premiums. Foreign corporations not engaged in a trade or business in the United States are subject to 30% U.S. income tax imposed by withholding on the gross amount of certain fixed or determinable annual or periodic gains, profits and income derived from sources within the United States (such as dividends and certain interest on investments), subject to exemption under the Code or reduction by applicable treaties. The Bermuda Treaty does not reduce the rate of tax in such circumstances. Global Indemnity Group, Inc. is a Delaware corporation wholly owned by U.A.I. (Luxembourg) Investment S.à.r.l. Under U.S. federal income tax law, dividends and interest paid by a U.S. corporation to a non-U.S. shareholder are generally subject to a 30% withholding tax, unless reduced by treaty. The income tax treaty between Luxembourg and the United States (the Luxembourg Treaty) reduces the rate of withholding tax on interest payments to 0% and on dividends to 15%, or 5% (if the shareholder owns 10% or more of the company's voting stock). There is a risk that interest paid by the Company's U.S. subsidiary to a Luxembourg affiliate may be subject to a 30% withholding tax.

The Company's U.S. subsidiaries are each subject to taxation in the United States at regular corporate rates.

Available Information

The Company maintains a website at www.globalindemnity.ie. The information on the Company's website is not incorporated herein by reference. The Company will make available, free of charge on its website, the most recent annual report on Form 10-K and subsequently filed quarterly reports on Form 10-Q, current reports on Form 8-K and amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934, as amended, as soon as reasonably practicable after the Company files such material with, or furnishes it to, the United States Securities and Exchange Commission.

The public may also read and copy any materials the Company files with the U.S. Securities and Exchange Commission (SEC) at the SEC's Public Reference Room at 100 F Street, NE, Washington, DC 20549 or by calling the SEC at 1-800-SEC-0330. The SEC maintains, free of charge, an Internet site (www.sec.gov) that contains reports, proxy and information statements, and other information regarding issuers that file electronically with the SEC.

Item 1A. RISK FACTORS

The risks and uncertainties described below are those the Company believes to be material. If any of the following actually occur, the Company's business, prospects, financial condition, results of operations and cash flows could be materially and adversely affected.

Risks Related to the Company's Business

The benefits of acquiring American Reliable may not be realized which could have a material adverse effect on the Company's business operations and financial results.

There may be difficulties in the continued integration of American Reliable business, which could result in a failure to realize the potential benefits of the acquisition. Achieving the anticipated benefits of the acquisition will depend in part upon whether the common aspects of the business can continue to be integrated in an efficient and effective manner with Global Indemnity's existing businesses. Furthermore, the risk that the Company's or

Table of Contents

American Reliable's prospective insurance premiums, investment yield, or net earnings are less than anticipated (including as a result of unexpected events, competition, costs, charges or outlays whether as a consequence of the transaction or otherwise) could negatively impact the Company's profitability and results of operations.

If actual claims payments exceed the Company's reserves for losses and loss adjustment expenses, the Company's financial condition and results of operations could be adversely affected.

The Company's success depends upon its ability to accurately assess the risks associated with the insurance and reinsurance policies that it writes. The Company establishes reserves on an undiscounted basis to cover its estimated liability for the payment of all losses and loss adjustment expenses incurred with respect to premiums earned on the insurance policies that it writes. Reserves do not represent an exact calculation of liability. Rather, reserves are estimates of what the Company expects to be the ultimate cost of resolution and administration of claims under the insurance policies that it writes. These estimates are based upon actuarial and statistical projections, the Company's assessment of currently available data, as well as estimates and assumptions as to future trends in claims severity and frequency, judicial theories of liability and other factors. The Company continually refines its reserve estimates in an ongoing process as experience develops and claims are reported and settled. The Company's insurance subsidiaries obtain an annual statement of opinion from an independent actuarial firm on the reasonableness of these reserves.

Establishing an appropriate level of reserves is an inherently uncertain process. The following factors may have a substantial impact on the Company's future actual losses and loss adjustment experience:

claim and expense payments;

frequency and severity of claims;

legislative and judicial developments; and

changes in economic conditions, including the effect of inflation.

For example, as industry practices and legal, judicial, social and other conditions change, unexpected and unintended exposures related to claims and coverage may emerge. Examples include claims relating to mold, asbestos and construction defects, as well as larger settlements and jury awards against professionals and corporate directors and officers. In addition, there is a growing trend of plaintiffs targeting property and casualty insurers in purported class action litigations relating to claims handling, insurance sales practices and other practices. These exposures may either extend coverage beyond the Company's underwriting intent or increase the frequency or severity of claims. As a result, such developments could cause the Company's level of reserves to be inadequate.

Actual losses and loss adjustment expenses the Company incurs under insurance policies that it writes may be different from the amount of reserves it establishes, and to the extent that actual losses and loss adjustment expenses exceed the Company's expectations and the reserves reflected on its financial statements, the Company will be required to immediately reflect those changes by increasing its reserves. In addition, regulators could require that the Company increase its reserves if they determine that the reserves were understated in the past. When the Company increases reserves, pre-tax income for the period in which it does so will decrease by a corresponding amount. In addition to having an effect on reserves and pre-tax income, increasing or strengthening reserves causes a reduction in the Company's insurance companies' surplus and could cause the rating of its insurance company subsidiaries to be downgraded or placed on credit watch. Such a downgrade could, in turn, adversely affect the Company's ability to sell insurance policies.

Catastrophic events can have a significant impact on the Company's financial and operational condition.

Results of operations of property and casualty insurers are subject to man-made and natural catastrophes. The Company has experienced, and expects to experience in the future, catastrophe losses. It is possible that a

Table of Contents

catastrophic event or a series of multiple catastrophic events could have a material adverse effect on the Company's operating results and financial condition. The Company's operating results could be negatively impacted if it experiences losses from catastrophes that are in excess of the catastrophe reinsurance coverage of its Insurance Operations. The Company's Reinsurance Operations also have exposure to losses from catastrophes as a result of the reinsurance treaties that it writes. Operating results could be negatively impacted if losses and expenses related to property catastrophe events exceed premiums assumed. Catastrophes include windstorms, hurricanes, typhoons, floods, earthquakes, tornadoes, tsunamis, hail, severe winter weather, fires and may include terrorist events such as the attacks of September 11, 2001. The Company cannot predict how severe a particular catastrophe may be until after it occurs. The extent of losses from catastrophes is a function of the total amount and type of losses incurred, the number of insureds affected, the frequency of the events and the severity of the particular catastrophe. Most catastrophes occur in small geographic areas. However, some catastrophes may produce significant damage in large, heavily populated areas.

A failure in the Company's operational systems or infrastructure or those of third parties, including security breaches or cyber-attacks, could disrupt the Company's business, its reputation, and / or cause losses which would have a material effect on the Company's business operations and financial results.

The Company's business is dependent upon the secure processing, storage, and transmission of information over computer networks using applications, systems and other technologies. The business depends on effective information security and systems to perform accounting, policy administration, claims, underwriting, actuarial and all aspects of day to day operations necessary to service the Company's customers and agents, to value the Company's investments and to timely and accurately report the Company's financial results.

The information systems the Company relies upon must ensure confidentiality, integrity and availability of the data, including systems maintained by the Company as well as data in and assets held through third-party service providers and systems. The Company employs various measures, systems, applications and software to address the data security. The Company reviews its existing security measures and systems on a continuing basis through internal and independent evaluations. The Company has implemented administrative and technical controls and takes protective actions in an attempt to reduce the risk of cyber incidents.

The Company's internal and external controls, processes, and the vendors used to protect networks, systems and applications, individually or together, may be insufficient to prevent a security incident. Employee or third party vendor errors, malicious acts, unauthorized access, computer viruses, malware, the introduction of malicious code, system failures and disruptions and or cyber-attacks can result in business interruption, compromise of data and loss of assets and that could have security consequences. Availability and complexity of the Company's technology increases regularly and the number of users grew, especially with the acquisition of American Reliable. This has increased the risk of a security incident involving data, network, systems and applications.

The Company has, from time to time, experienced security incidents, none of which had a material adverse impact on the Company's business, results of operations, or financial condition. Security incidents have the potential to interrupt business, cause delays in processes and procedures directly affecting the Company, and jeopardize the Company's, insureds, claimants, agents and others confidential data resulting in data loss and loss of assets and reputational damages. If this occurs it could have a material adverse effect on the Company's business operations and financial results.

Security incidents could require significant resources, both internal and external, to resolve or remediate and could result in financial losses that may not be covered by insurance or not fully recoverable under any insurance. The Company may be subject to litigation and damages or regulatory action under data protection and privacy laws and regulations enacted by federal, state and foreign governments, or other regulatory bodies. As a result, the Company's ability to conduct its business and its results of operations might be materially and adversely affected.

Table of Contents***The Company's failure to adequately protect personal information could have a material adverse effect on its business.***

A wide variety of local, state, national, and international laws and regulations apply to the collection, use, retention, protection, disclosure, transfer and other processing of personal data, including laws mandating the privacy and security of personal health and financial data. These data protection and privacy-related laws and regulations are evolving and may result in ever-increasing regulatory and public scrutiny and escalating levels of enforcement and sanctions. The Company's failure to comply with applicable laws and regulations, or to protect such data, could result in enforcement action against it, including fines, imprisonment of company officials and public censure, claims for damages by customers and other affected individuals, damage to the Company's reputation and loss of goodwill (both in relation to existing customers and prospective customers), any of which could have a material adverse effect on its operations, financial performance and business.

Evolving and changing definitions of personal data and personal information within the European Union, the United States, and elsewhere may limit or inhibit the Company's ability to operate or expand its business, including limiting technology alliance partners that may involve the sharing of data. Additionally, there is a risk that failures in systems designed to protect private, personal or proprietary data held by the Company will allow such data to be disclosed to or acquired or seen by others, resulting in potential regulatory investigations, enforcement actions, or penalties, remediation obligations and/or private litigation by parties whose data were improperly disclosed. There is also a risk that the Company could be found to have failed to comply with U.S. or foreign laws or regulations regarding the collection, consent, handling, transfer, or disposal of such privacy, personal or proprietary data, which could subject it to fines or other sanctions, as well as adverse reputational impact. Even the perception of privacy concerns, whether or not valid, may harm the Company's reputation, inhibit adoption of its products by current and future customers, or adversely impact its ability to attract and retain workforce talent.

A decline in rating for any of the Company's insurance or reinsurance subsidiaries could adversely affect its position in the insurance market; making it more difficult to market its insurance products and cause premiums and earnings to decrease.

If the rating of any of the companies in its Insurance Operations or Reinsurance Operations is reduced from its current level of A (Excellent) by A.M. Best, the Company's competitive position in the insurance industry could suffer, and it could be more difficult to market its insurance products. A downgrade could result in a significant reduction in the number of insurance contracts the Company writes and in a substantial loss of business; as such business could move to other competitors with higher ratings, thus causing premiums and earnings to decrease.

Ratings have become an increasingly important factor in establishing the competitive position for insurance companies. A.M. Best ratings currently range from A++ (Superior) to F (In Liquidation), with a total of 16 separate ratings categories. A.M. Best currently assigns the companies in the Insurance Operations and Reinsurance Operations a financial strength rating of A (Excellent), the third highest of their 16 rating categories. The objective of A.M. Best's rating system is to provide potential policyholders an opinion of an insurer's financial strength and its ability to meet ongoing obligations, including paying claims. In evaluating a company's financial and operating performance, A.M. Best reviews its profitability, leverage and liquidity, its spread of risk, the quality and appropriateness of its reinsurance, the quality and diversification of its assets, the adequacy of its policy and loss reserves, the adequacy of its surplus, its capital structure, and the experience and objectives of its management. These ratings are based on factors relevant to policyholders, general agencies, insurance brokers, reinsurers, and intermediaries and are not directed to the protection of investors. These ratings are not an evaluation of, nor are they directed to, investors in the Company's A ordinary shares and are not a recommendation to buy, sell or hold the Company's A ordinary shares. Publications of A.M. Best indicate that companies are assigned A (Excellent) ratings if, in A.M. Best's opinion, they have an excellent ability to meet their ongoing obligations to policyholders. These ratings are subject to periodic review by, and may be revised downward or revoked at the sole discretion of A.M. Best.

Table of Contents

The Company cannot guarantee that its reinsurers will pay in a timely fashion, if at all, and as a result, the Company could experience losses.

The Company cedes a portion of gross premiums written to third party reinsurers under reinsurance contracts. Although reinsurance makes the reinsurer liable to the Company to the extent the risk is transferred, it does not relieve the Company of its liability to its policyholders. Upon payment of claims, the Company will bill its reinsurers for their share of such claims. The reinsurers may not pay the reinsurance receivables that they owe to the Company or they may not pay such receivables on a timely basis. If the reinsurers fail to pay it or fail to pay on a timely basis, the Company's financial results would be adversely affected. Lack of reinsurer liquidity, perceived improper underwriting, or claim handling by the Company, and other factors could cause a reinsurer not to pay. See **Business Reinsurance of Underwriting Risk** in Item 1 of Part I of this report.

See Note 8 of the notes to consolidated financial statements in Item 8 of Part II of this report for further information surrounding the Company's reinsurance receivable balances as of December 31, 2015 and 2014.

The Company's investment performance may suffer as a result of adverse capital market developments or other factors, which would in turn adversely affect its financial condition and results of operations.

The Company derives a significant portion of its income from its invested assets. As a result, the Company's operating results depend in part on the performance of its investment portfolio. The Company's operating results are subject to a variety of investment risks, including risks relating to general economic conditions, market volatility, interest rate fluctuations, liquidity risk and credit and default risk. The fair value of fixed income investments can fluctuate depending on changes in interest rates and the credit quality of underlying issuers. Generally, the fair market value of these investments has an inverse relationship with changes in interest rates, while net investment income earned by the Company from future investments in fixed maturities will generally increase or decrease with changes in interest rates. Additionally, with respect to certain of its investments, the Company is subject to pre-payment or reinvestment risk.

Credit tightening could negatively impact the Company's future investment returns and limit the ability to invest in certain classes of investments. Credit tightening may cause opportunities that are marginally attractive to not be financed, which could cause a decrease in the number of bond issuances. If marginally attractive opportunities are financed, they may be at higher interest rates, which would cause credit risk of such opportunities to increase. If new debt supply is curtailed, it could cause interest rates on securities that are deemed to be credit-worthy to decline. Funds generated by operations, sales, and maturities will need to be invested. If the Company invests during a tight credit market, investment returns could be lower than the returns the Company is currently realizing and/or it may have to invest in higher risk securities.

With respect to its longer-term liabilities, the Company strives to structure its investments in a manner that recognizes liquidity needs for its future liabilities. However, if the Company's liquidity needs or general and specific liability profile unexpectedly changes, it may not be successful in continuing to structure its investment portfolio in that manner. To the extent that the Company is unsuccessful in correlating its investment portfolio with its expected liabilities, the Company may be forced to liquidate its investments at times and prices that are not optimal, which could have a material adverse effect on the performance of its investment portfolio. The Company refers to this risk as liquidity risk, which is when the fair value of an investment is not able to be realized due to low demand by outside parties in the marketplace.

The Company is also subject to credit risk due to non-payment of principal or interest. Several classes of securities that the Company holds have default risk. As interest rates rise for companies that are deemed to be less creditworthy, there is a greater risk that they will be unable to pay contractual interest or principal on their debt obligations.

Interest rates are highly sensitive to many factors, including governmental monetary policies, domestic and international economic and political conditions and other factors beyond the Company's control. Although the Company attempts to take measures to manage the risks of investing in a changing interest rate environment, the

Table of Contents

Company may not be able to mitigate interest rate sensitivity effectively. A significant increase in interest rates could have a material adverse effect on the market value of the Company's fixed maturities securities.

The Company also has an equity portfolio. The performance of the Company's equity portfolio is dependent upon a number of factors, including many of the same factors that affect the performance of its fixed income investments, although those factors sometimes have the opposite effect on the performance of the equity portfolio. Individual equity securities have unsystemic risk. The Company could experience market declines on these investments. The Company also has systemic risk, which is the risk inherent in the general market due to broad macroeconomic factors that affect all companies in the market. If the market indexes were to decline, the Company anticipates that the value of its portfolio would be negatively affected.

The Company has investments in limited partnerships which are not liquid. The Company does not have the contractual option to redeem its limited partnership interests but receives distributions based on the liquidation of the underlying assets. The Company does not have the ability to sell or transfer its limited partnership interests without consent from the general partner. The Company's returns could be negatively affected if the market value of the partnership declines. If the Company needs liquidity, it might be forced to liquidate other investments at a time when prices are not optimal.

See Note 4 of the notes to consolidated financial statements in Item 8 of Part II of this report for further information surrounding the Company's investments as of December 31, 2015 and 2014.

Deterioration in the debt and equity markets could result in a margin call which could have a material adverse effect on the Company's financial condition and/or results of operations.

The collateral backing the Company's margin borrowing facilities currently consist of equity securities but could also include fixed income securities in the future. Declines in financial markets could negatively impact the value of the Company's collateral. Adverse changes in market value could result in a margin call which would require the posting of additional collateral thereby reducing liquidity. Additionally, if such a margin call is not met, the Company could be required to liquidate securities and incur realized losses.

Borrowings under the Company's margin borrowing facilities are based upon a variable rate of interest, which could result in higher expense in the event of increases in interest rates.

As of December 31, 2015, \$75.6 million of the Company's outstanding indebtedness bore interest at a rate that varies depending upon the London Interbank Offered Rate (LIBOR). If LIBOR rises, the interest rates on outstanding debt will increase resulting in increased interest payment obligations under the Company's margin borrowing facilities. This could have a negative effect on the Company's cash flow and financial condition.

The Company's outstanding indebtedness could adversely affect its financial flexibility and a failure to make periodic payments related to the Subordinated Notes could adversely affect the Company.

The Company sold \$100 million aggregate principal amount of its 7.75% Subordinated Notes due in 2045. The level of debt outstanding could adversely affect the Company's financial flexibility, including:

increasing vulnerability to changing economic, regulatory and industry conditions;

limiting the ability to borrow additional funds; and

requiring the Company to dedicate a substantial portion of cash flow from operations to debt payments, thereby, reducing funds available for working capital, capital expenditures, acquisitions and other purposes.

Furthermore, failure by the Company to make periodic payments related to the Subordinated Notes could impact rating agencies and regulators assessment of the Company's capital position, adequacy and flexibility and therefore, the financial strength ratings of rating agencies, and regulators' assessment of the solvency of the Company and its subsidiaries.

Table of Contents

The Company is dependent on its senior executives and the loss of any of these executives or the Company's inability to attract and retain other key personnel could adversely affect its business.

The Company's success depends upon its ability to attract and retain qualified employees and upon the ability of senior management and other key employees to implement the Company's business strategy. The Company believes there are a limited number of available, qualified executives in the business lines in which it competes. The success of the Company's initiatives and future performance depend, in significant part, upon the continued service of the senior management team. The future loss of any of the services of members of the Company's senior management team or the inability to attract and retain other talented personnel could impede the further implementation of the Company's business strategy, which could have a material adverse effect on its business. In addition, the Company does not currently maintain key man life insurance policies with respect to any of its employees.

Employee error and misconduct may be difficult to detect and prevent and could adversely affect the Company's business, results of operations, financial condition and reputation.

Losses may result from, among other things, fraud, errors, failure to document transactions properly, failure to obtain proper internal authorization, or failure to comply with regulatory requirements. It is not always possible to deter or prevent employee misconduct and the precautions the Company takes to prevent and detect this activity may not be effective in all cases. Resultant losses could adversely affect the Company's business, results of operations, financial condition and reputation.

Since the Company depends on professional general agencies, brokers, other insurance companies and other reinsurance companies for a significant portion of its revenue, a loss of any one of them could adversely affect the Company.

The Company markets and distributes its insurance products through a group of approximately 427 professional general agencies that have specific quoting and binding authority and that in turn sell the Company's insurance products to insureds through retail insurance brokers. The Company also markets and distributes its reinsurance products through third-party brokers, insurance companies and reinsurance companies. A loss of all or substantially all of the business produced by any one of these general agencies, brokers, insurance companies or reinsurance companies could have an adverse effect on the Company's results of operations.

If market conditions cause reinsurance to be more costly or unavailable, the Company may be required to bear increased risks or reduce the level of its underwriting commitments.

As part of the Company's overall strategy of risk and capacity management, it purchases reinsurance for a portion of the risk underwritten by its insurance subsidiaries. Market conditions beyond the Company's control determine the availability and cost of the reinsurance it purchases, which may affect the level of its business and profitability. The Company's third party reinsurance facilities are generally subject to annual renewal. The Company may be unable to maintain its current reinsurance facilities or obtain other reinsurance facilities in adequate amounts and at favorable rates. If the Company is unable to renew expiring facilities or obtain new reinsurance facilities, either the net exposure to risk would increase or, if the Company is unwilling to bear an increase in net risk exposures, it would have to reduce the amount of risk it underwrites.

The Company's financial and business results may fluctuate as a result of many factors, including cyclical changes in the insurance industry.

Historically, the results of companies in the property and casualty insurance industry have been subject to significant fluctuations and uncertainties. The industry's profitability can be affected significantly by:

competition;

capital capacity;

rising levels of actual costs that are not foreseen by companies at the time they price their products;

Table of Contents

volatile and unpredictable developments, including man-made, weather-related and other natural catastrophes or terrorist attacks;

changes in loss reserves resulting from the general claims and legal environments as different types of claims arise and judicial interpretations relating to the scope of insurers' liability develop; and

fluctuations in interest rates, inflationary pressures and other changes in the investment environment, which affect returns on invested assets and may affect the ultimate payout of losses.

The demand for property and casualty insurance and reinsurance can also vary significantly, rising as the overall level of economic activity increases and falling as that activity decreases. The property and casualty insurance industry historically is cyclical in nature. These fluctuations in demand and competition could produce underwriting results that would have a negative impact on the Company's consolidated results of operations and financial condition.

The Company faces significant competitive pressures in its business that could cause demand for its products to fall and adversely affect the Company's profitability.

The Company competes with a large number of other companies in its selected lines of business. The Company competes, and will continue to compete, with major U.S. and non-U.S. insurers and other regional companies, as well as mutual companies, specialty insurance companies, reinsurance companies, underwriting agencies and diversified financial services companies. The Company's competitors include, among others: American International Group, American Modern Insurance Group, Argo Group International Holdings, Ltd., Berkshire Hathaway, Everest Re Group, Ltd., Foremost Insurance Group, Great American Insurance Group, HCC Insurance Holdings, Inc., IFG Companies, Markel Corporation, Nationwide Insurance, Navigators Insurance Group, RLI Corporation, Selective Insurance Group, Inc., The Travelers Companies, Inc., Validus Group, and W.R. Berkley Corporation. Some of the Company's competitors have greater financial and marketing resources than the Company does. The Company's profitability could be adversely affected if it loses business to competitors offering similar products at or below the Company's prices.

The Company's general agencies typically pay the insurance premiums on business they have bound to the Company on a monthly basis. This accumulation of balances due to the Company exposes it to credit risk.

Insurance premiums generally flow from the insured to their retail broker, then into a trust account controlled by the Company's professional general agencies. The Company's professional general agencies are typically required to forward funds, net of commissions, to the Company following the end of each month. Consequently, the Company assumes a degree of credit risk on the aggregate amount of these balances that have been paid by the insured but have yet to reach the Company.

Brokers, insurance companies and reinsurance companies typically pay premiums on reinsurance treaties written with the Company on a quarterly basis. This accumulation of balances due to the Company exposes it to credit risk.

Assumed premiums on reinsurance treaties generally flow from the ceding companies to the Company on a quarterly basis. In some instances, the reinsurance treaties allow for funds to be withheld for longer periods as specified in the treaties. Consequently, the Company assumes a degree of credit risk on the aggregate amount of these balances that have been collected by the reinsured but have yet to reach the Company.

Because the Company provides its general agencies with specific quoting and binding authority, if any of them fail to comply with pre-established guidelines, the Company's results of operations could be adversely affected.

The Company markets and distributes its insurance products through professional general agencies that have limited quoting and binding authority and that in turn sell the Company's insurance products to insureds through

Table of Contents

retail insurance brokers. These professional general agencies can bind certain risks without the Company's initial approval. If any of these wholesale professional general agencies fail to comply with the Company's underwriting guidelines and the terms of their appointment, the Company could be bound on a particular risk or number of risks that were not anticipated when it developed the insurance products or estimated loss and loss adjustment expenses. Such actions could adversely affect the Company's results of operations.

The Company's holding company structure and regulatory constraints limit its ability to receive dividends from subsidiaries in order to meet its cash requirements.

Global Indemnity is a holding company and, as such, has no substantial operations of its own. The Company's assets primarily consist of cash and ownership of the shares of its direct and indirect subsidiaries. Dividends and other permitted distributions from insurance subsidiaries, which include payment for equity awards granted by Global Indemnity to employees of such subsidiaries, are expected to be Global Indemnity's sole source of funds to meet ongoing cash requirements, including debt service payments and other expenses.

Due to its corporate structure, most of the dividends that Global Indemnity receives from its subsidiaries must pass through Global Indemnity Reinsurance. The inability of Global Indemnity Reinsurance to pay dividends in an amount sufficient to enable Global Indemnity to meet its cash requirements at the holding company level could have a material adverse effect on its operations.

Bermuda law does not permit payment of dividends or distributions of contributed surplus by a company if there are reasonable grounds for believing that the company, after the payment is made, would be unable to pay its liabilities as they become due, or the realizable value of the company's assets would be less, as a result of the payment, than the aggregate of its liabilities and its issued share capital and share premium accounts. Furthermore, pursuant to the Bermuda Insurance Act 1978, an insurance company is prohibited from declaring or paying a dividend during the financial year if it is in breach of its minimum solvency margin or minimum liquidity ratio or if the declaration or payment of such dividends would cause it to fail to meet such margin or ratio. See Regulation Bermuda Insurance Regulation in Item 1 of Part I of this report.

In addition, the Company's U.S. insurance subsidiaries, which are indirect subsidiaries of Global Indemnity Reinsurance, are subject to significant regulatory restrictions limiting their ability to declare and pay dividends, which must first pass through Global Indemnity Reinsurance before being paid to Global Indemnity. See Regulation U.S. Regulation in Item 1 of Part I of this report. Also, see Note 18 of the notes to consolidated financial statements in Item 8 of Part II of this report for the maximum amount of dividends that could be paid by the Company's U.S. insurance subsidiaries in 2016.

The Company's businesses are heavily regulated and changes in regulation may limit the way it operates.

The Company is subject to extensive supervision and regulation in the U.S. states in which the Insurance Operations operate. This is particularly true in those states in which the Company's insurance subsidiaries are licensed, as opposed to those states where its insurance subsidiaries write business on a surplus lines basis. The supervision and regulation relate to numerous aspects of the Company's business and financial condition. The primary purpose of the supervision and regulation is the protection of the Company's insurance policyholders and not its investors. The extent of regulation varies, but generally is governed by state statutes. These statutes delegate regulatory, supervisory, and administrative authority to state insurance departments. This system of regulation covers, among other things:

standards of solvency, including risk-based capital measurements;

restrictions on the nature, quality and concentration of investments;

restrictions on the types of terms that the Company can include or exclude in the insurance policies it offers;

Table of Contents

restrictions on the way rates are developed and the premiums the Company may charge;

standards for the manner in which general agencies may be appointed or terminated;

credit for reinsurance;

certain required methods of accounting;

reserves for unearned premiums, losses and other purposes; and

potential assessments for the provision of funds necessary for the settlement of covered claims under certain insurance policies provided by impaired, insolvent or failed insurance companies.

The statutes or the state insurance department regulations may affect the cost or demand for the Company's products and may impede the Company from obtaining rate increases or taking other actions it might wish to take to increase profitability. Further, the Company may be unable to maintain all required licenses and approvals and its business may not fully comply with the wide variety of applicable laws and regulations or the relevant authority's interpretation of the laws and regulations. Also, regulatory authorities have discretion to grant, renew or revoke licenses and approvals subject to the applicable state statutes and appeal process. If the Company does not have the requisite licenses and approvals (including in some states the requisite secretary of state registration) or do not comply with applicable regulatory requirements, the insurance regulatory authorities could stop or temporarily suspend the Company from carrying on some or all of its activities or monetarily penalize the Company.

In recent years, the U.S. insurance regulatory framework has come under increased federal scrutiny, and some state legislators have considered or enacted laws that may alter or increase state regulation of insurance and reinsurance companies and holding companies. Moreover, the NAIC, which is an association of the insurance commissioners of all 50 U.S. States and the District of Columbia, and state insurance regulators regularly re-examine existing laws and regulations. Changes in these laws and regulations or the interpretation of these laws and regulations could have a material adverse effect on the Company's business.

Although the U.S. federal government has not historically regulated the insurance business, there have been proposals from time to time to impose federal regulation on the insurance industry. In 2010, the President signed into law the Dodd-Frank Act. Among other things, the Dodd-Frank Act establishes a Federal Insurance Office within the U.S. Department of the Treasury. The Federal Insurance Office initially has limited regulatory authority and is empowered to gather data and information regarding the insurance industry and insurers, including conducting a study for submission to the U.S. Congress on how to modernize and improve insurance regulation in the U.S. Further, the Dodd-Frank Act gives the Federal Reserve supervisory authority over a number of financial services companies, including insurance companies, if they are designated by a two-thirds vote of a Financial Stability Oversight Council as systemically important. While the Company does not believe that it is systemically important, as defined in the Dodd-Frank Act, it is possible that the Financial Stability Oversight Council may conclude that it is. If the Company were designated as systemically important, the Federal Reserve's supervisory authority could include the ability to impose heightened financial regulation and could impact requirements regarding the Company's capital, liquidity, leverage, business and investment conduct. As a result of the foregoing, the Dodd-Frank Act, or other additional federal regulation that is adopted in the future, could impose significant burdens on the Company, including impacting the ways in which it conducts business, increasing compliance costs and duplicating state regulation, and could result in a competitive disadvantage, particularly relative to smaller insurers who may not be subject to the same level of regulation.

The interests of holders of A ordinary shares may conflict with the interests of the Company's controlling shareholder.

Fox Paine & Company, LLC (Fox Paine & Company) beneficially owns shares having approximately 84% of the Company's total voting power. The percentage of the Company's total voting power that Fox Paine & Company may exercise is greater than the percentage of the Company's total shares that Fox Paine & Company

Table of Contents

beneficially owns because Fox Paine & Company beneficially owns all of the Company's B ordinary shares, which have ten votes per share as opposed to A ordinary shares, which have one vote per share. The A ordinary shares and the B ordinary shares generally vote together as a single class on matters presented to the Company's shareholders. Based on the ownership structure of the affiliates of Fox Paine & Company that own these shares, these affiliates are not subject to the voting restriction contained in the Company's articles of association. As a result, Fox Paine & Company has and will continue to have control over the outcome of certain matters requiring shareholder approval, including the power to, among other things:

elect all of the Company's directors;

amend the Company's articles of association (as long as their voting power is greater than 75%);

ratify the appointment of the Company's auditors;

increase the Company's share capital;

resolve to pay dividends or distributions; and

approve the annual report and the annual financial statements.

Subject to certain exceptions, Fox Paine & Company may also be able to prevent or cause a change of control. Fox Paine & Company's control over the Company, and Fox Paine & Company's ability in certain circumstances to prevent or cause a change of control, may delay or prevent a change of control, or cause a change of control to occur at a time when it is not favored by other shareholders. As a result, the trading price of the Company's A ordinary shares could be adversely affected.

In addition, the Company has agreed to pay Fox Paine & Company an annual management fee of \$1.9 million, adjusted annually to reflect change in the consumer price index published by the US Department of Labor Bureau of Labor Statistics' CPI-U, in exchange for management services. The Company has also agreed to pay a termination fee of cash in an amount to be agreed upon, plus reimbursement of expenses, upon the termination of Fox Paine & Company's management services in connection with the consummation of a change of control transaction that does not involve Fox Paine & Company and its affiliates. The Company has also agreed to pay Fox Paine & Company a transaction advisory fee of cash in an amount to be agreed upon, plus reimbursement of expenses upon the consummation of a change of control transaction that does not involve Fox Paine & Company and its affiliates in exchange for advisory services to be provided by Fox Paine & Company in connection therewith. Fox Paine & Company may in the future make significant investments in other insurance or reinsurance companies. Some of these companies may compete with the Company or its subsidiaries. Fox Paine & Company is not obligated to advise the Company of any investment or business opportunities of which they are aware, and they are not prohibited or restricted from competing with the Company or its subsidiaries.

The Company's controlling shareholder has the contractual right to nominate a certain number of the members of the Board of Directors and also otherwise controls the election of Directors due to its ownership.

While Fox Paine & Company has the right under the terms of the memorandum and articles of association to nominate a certain number of directors of the Board of Directors, dependent on Fox Paine & Company's percentage ownership of voting shares in the Company for so long as Fox Paine & Company hold an aggregate 25% or more of the voting power in the Company, it also controls the election of all directors to the Board of Directors due to its controlling share ownership. The Company's Board of Directors currently consists of nine directors, all of whom were identified and proposed for consideration for the Board of Directors by Fox Paine & Company.

The Company's Board of Directors, in turn, and subject to its fiduciary duties under Irish law, appoints the members of the Company's senior management, who also have fiduciary duties to the Company. As a result, Fox Paine & Company effectively has the ability to control the appointment of the members of the Company's senior management and to prevent any changes in senior management that other shareholders or other members of the Board of Directors may deem advisable.

Table of Contents

Because the Company relies on certain services provided by Fox Paine & Company, the loss of such services could adversely affect its business.

Fox Paine & Company provides certain management services to the Company. To the extent that Fox Paine & Company is unable or unwilling to provide similar services in the future, and the Company is unable to perform those services itself or is unable to secure replacement services, the Company's business could be adversely affected.

The U.S. and global economic and financial industry downturns could harm the Company's business, its liquidity and financial condition, and its stock price.

In past years, global market and economic conditions were severely disrupted. While conditions appear to be improving, there is continued uncertainty regarding the timing and strength of any economic recovery. The trend may not continue or may continue at a slow rate for an extended period of time, or conditions may worsen. These conditions may potentially affect (among other aspects of the Company's business) the demand for and claims made under the Company's products, the ability of customers, counterparties and others to establish or maintain their relationships with the Company, its ability to access and efficiently use internal and external capital resources, the availability of reinsurance protection, the risks the Company assumes under reinsurance programs, and the Company's investment performance. Continued volatility in the U.S. and other securities markets may adversely affect the Company's stock price.

The Company previously identified a material weakness in internal control over financial reporting which has been remediated, and the Company's business may be adversely affected if it fails to maintain effective controls over financial reporting.

Global Indemnity identified a material weakness in internal control over financial reporting at December 31, 2014 related to an element of the design of its estimation process for Unpaid Losses and Loss Adjustment Expenses. Specifically, the design of the Company's control relating to Unpaid Losses and Loss Adjustment Expenses that exceeded the central estimates of both the internal and external actuaries in the process of establishing management's final determination of loss reserve selections was not adequate. This deficiency did not result in a material misstatement in the consolidated financial statements; however, this deficiency could have resulted in a material misstatement of the aforementioned accounts and disclosures of the annual or interim consolidated financial statements that would not have been prevented or detected.

The Company has completed its testing of both the design and operating effectiveness of the controls over the estimation process and concluded that the material weakness identified at December 31, 2014 was remediated as of March 31, 2015. Global Indemnity faces the risk that, notwithstanding efforts to date to identify and remedy the material weakness in internal control over financial reporting, the Company may discover other material weaknesses in the future and the cost of remediating the material weakness could be high and could cause investors to lose confidence in the accuracy and completeness of the Company's financial reports, negatively affect the market price of the Company's common stock, result in regulatory scrutiny (which could require additional financial and management resources), and otherwise materially adversely affect the Company's business and financial condition.

The Company's operating results and shareholders' equity may be adversely affected by currency fluctuations.

The Company's functional currency is the U.S. dollar. The Reinsurance Operations conducts business with some customers in foreign currencies and several of the Company's U.S. and non-U.S. subsidiaries maintains investments and cash accounts in foreign currencies. At period-end, the Company re-measures non-U.S. currency financial assets to their current U.S. dollar equivalent. The resulting gain or loss for foreign denominated investments is reflected in accumulated other comprehensive income in shareholders' equity; whereas, the gain or loss on foreign denominated cash accounts is reflected in income during the period. Financial liabilities, if any,

Table of Contents

are generally adjusted within the reserving process. However, for known losses on claims to be paid in foreign currencies, the Company re-measures the liabilities to their current U.S. dollar equivalent each period end with the resulting gain or loss reflected in income during the period. Foreign exchange risk is reviewed as part of the Company's risk management process. The Company may experience losses resulting from fluctuations in the values of non-U.S. currencies relative to the strength of the U.S. dollar, which could adversely impact the Company's results of operations and financial condition.

The Company is incorporated in Ireland and some of its assets are located outside the United States. As a result, it might not be possible for shareholders to enforce civil liability provisions of the federal or state securities laws of the United States.

The Company is organized under the laws of Ireland, and some of its assets are located outside the United States. A shareholder who obtains a court judgment based on the civil liability provisions of U.S. federal or state securities laws may be unable to enforce the judgment against the Company in Ireland or in countries other than the United States where the Company has assets. In addition, there is some doubt as to whether the courts of Ireland and other countries would recognize or enforce judgments of U.S. courts obtained against the Company or its Directors or officers based on the civil liabilities provisions of the federal or state securities laws of the United States or would hear actions against the Company or those persons based on those laws. The Company has been advised that the United States and Ireland do not currently have a treaty providing for the reciprocal recognition and enforcement of judgments in civil and commercial matters. The laws of Ireland do however, as a general rule, provide that the judgments of the courts of the United States have the same validity in Ireland as if rendered by Irish Courts. Certain important requirements must be satisfied before the Irish Courts will recognize the United States judgment. The originating court must have been a court of competent jurisdiction and the judgment may not be recognized if it was obtained by fraud or its recognition would be contrary to Irish public policy.

Any judgment obtained in contravention of the rules of natural justice or that is irreconcilable with an earlier foreign judgment would not be enforced in Ireland. Similarly, judgments might not be enforceable in countries other than the United States where the Company has assets.

Irish law differs from the laws in effect in the United States and might afford less protection to shareholders.

The Company's shareholders could have more difficulty protecting their interests than would shareholders of a corporation incorporated in a jurisdiction of the United States. As an Irish company, the Company is governed by the Irish Companies Act 2014 (the Companies Acts 2014) and other Irish statutes. The Companies Act 2014 and other Irish statutes differ in some significant, and possibly material, respects from laws applicable to U.S. corporations and shareholders under various state corporation laws, including the provisions relating to interested Directors, mergers and acquisitions, takeovers, shareholder lawsuits and indemnification of Directors.

Under Irish law, the duties of Directors and officers of a company are generally owed to the company only. Shareholders of Irish companies do not generally have rights to take action against Directors or officers of the company under Irish law, and may only exercise such right of action on behalf of the Company in limited circumstances. Directors of an Irish company must, in exercising their powers and performing their duties, act with due care and skill, honestly and in good faith with a view to the best interests of the company. Directors have a duty not to put themselves in a position in which their duties to the company and their personal interests might conflict and also are under a duty to disclose any personal interest in any contract or arrangement with the company or any of its subsidiaries. If a Director or officer of an Irish company is found to have breached his duties to that company, he could be held personally liable to the company in respect of that breach of duty.

A future transfer of ordinary shares, other than one effected by means of the transfer of book entry interests in Depository Trust Company (DTC), may be subject to Irish stamp duty.

A transfer of the Company's A ordinary shares by a seller who holds A ordinary shares beneficially through DTC to a buyer who holds the acquired A ordinary shares beneficially through DTC will not be subject to Irish stamp

Table of Contents

duty. A transfer of the Company's ordinary shares by a seller who holds shares directly to any buyer, or by a seller who holds the shares beneficially through DTC to a buyer who holds the acquired shares directly, may be subject to Irish stamp duty. Stamp duty is a liability of the buyer or transferee and is currently levied at the rate of 1% of the price paid or the market value of the shares acquired, if higher. The potential for stamp duty could adversely affect the price of the Company's ordinary shares.

Risks Related to Taxation

Legislative and regulatory action by the U.S. Congress could materially and adversely affect the Company.

The Company's tax position could be adversely impacted by changes in tax laws, tax treaties or tax regulations or the interpretation or enforcement thereof. Legislative action may be taken by the U.S. Congress which, if ultimately enacted, could override tax treaties upon which the Company relies or could broaden the circumstances under which the Company would be considered a U.S. resident, each of which could materially and adversely affect the Company's effective tax rate and cash tax position.

The Organization for Economic Cooperation and Development (OECD) and the European Union (EU) are considering measures that might encourage countries to change their tax laws which could have a negative impact on the Company.

The OECD has published an action plan to address base erosion and profit shifting (BEPS) impacting its member countries and other jurisdictions. It is possible that jurisdictions in which the Company does business could react to the BEPS initiative or their own concerns by enacting tax legislation that could adversely affect the Company or its shareholders.

A number of multilateral organizations, including the EU and the OECD have, in recent years, expressed concern about some countries not participating in adequate tax information exchange arrangements and have threatened those that do not agree to cooperate with punitive sanctions by member countries. It is as yet unclear what all of these sanctions might be, which countries might adopt them, and when or if they might be imposed. The Company cannot assure, however, that the Tax Information Exchange Agreements (TIEAs) that have been or will be entered into by the countries where the Company and its subsidiaries are located will be sufficient to preclude all of the sanctions described above, which, if ultimately adopted, could adversely affect the Company or its shareholders.

The Company may become subject to taxes in the Cayman Islands or Bermuda in the future, which may have a material adverse effect on its results of operations.

The Company has subsidiaries which have been incorporated under the laws of the Cayman Islands as exempted companies and, as such, obtained an undertaking on September 2, 2003 from the Governor in Council of the Cayman Islands substantially that, for a period of 20 years from the date of such undertaking, no law that is enacted in the Cayman Islands imposing any tax to be levied on profit or income or gains or appreciation shall apply to the Company and no such tax and no tax in the nature of estate duty or inheritance tax will be payable, either directly or by way of withholding, on the Company's ordinary shares. This undertaking would not, however, prevent the imposition of taxes on any person ordinarily resident in the Cayman Islands or any company in respect of its ownership of real property or leasehold interests in the Cayman Islands. Given the limited duration of the undertaking, the Company cannot be certain that it will not be subject to Cayman Islands tax after the expiration of the 20-year period.

Global Indemnity Reinsurance was formed in 2006 through the amalgamation of the Company's non-U.S. operations. The Company received an assurance from the Bermuda Minister of Finance, under the Bermuda Exempted Undertakings Tax Protection Act of 1966, as amended, that if any legislation is enacted in Bermuda that would impose tax computed on profits or income, or computed on any capital asset, gain or appreciation, or any tax in the nature of estate duty or inheritance tax, then the imposition of any such tax will not be applicable

Table of Contents

to Global Indemnity Reinsurance or any of its operations, shares, debentures or other obligations through March 31, 2035. Given the limited duration of the assurance, the Company cannot be certain that it will not be subject to any Bermuda tax after March 31, 2035.

Following the expiration of the periods described above, the Company may become subject to taxes in the Cayman Islands or Bermuda, which may have a material adverse effect on its results of operations.

Global Indemnity or Global Indemnity Reinsurance may be subject to U.S. tax that may have a material adverse effect on Global Indemnity's or Global Indemnity Reinsurance's results of operations.

Global Indemnity is an Irish company and Global Indemnity Reinsurance is a Bermuda company. The Company seeks to manage its business in a manner designed to reduce the risk that Global Indemnity and Global Indemnity Reinsurance will be treated as being engaged in a U.S. trade or business for U.S. federal income tax purposes. However, because there is considerable uncertainty as to the activities that constitute being engaged in a trade or business within the United States, the Company cannot be certain that the U.S. Internal Revenue Service will not contend successfully that Global Indemnity or Global Indemnity Reinsurance is or has been engaged in a trade or business in the United States. If Global Indemnity or Global Indemnity Reinsurance were considered to be engaged in a business in the United States, the Company could be subject to U.S. corporate income and branch profits taxes on the portion of its earnings effectively connected to such U.S. business, in which case its results of operations could be materially adversely affected.

The impact of the Letters of Commitment by the Cayman Islands and Bermuda or other concessions to the Organization for Economic Co-operation and Development to eliminate harmful tax practices is uncertain and could adversely affect the tax status of the Company's subsidiaries in the Cayman Islands or Bermuda.

The Organization for Economic Co-operation and Development, which is commonly referred to as the OECD, has published reports and launched a global dialogue among member and non-member countries on measures to limit harmful tax competition. These measures are largely directed at counteracting the effects of tax havens and preferential tax regimes in countries around the world. The Cayman Islands and Bermuda are not listed as uncooperative tax haven jurisdictions because each had previously committed itself to eliminate harmful tax practices and to embrace international tax standards for transparency, exchange of information and the elimination of any aspects of the regimes for financial and other services that attract business with no substantial domestic activity. The Company is not able to predict what changes will arise from the OECD in the future or whether such changes will subject it to additional taxes.

There is a risk that interest paid by the Company's U.S. subsidiary to a Luxembourg affiliate may be subject to 30% U.S. withholding tax.

U.A.I. (Luxembourg) Investment, S.à.r.l., an indirectly owned Luxembourg subsidiary of Global Indemnity Reinsurance, owns two notes and two loans issued by Global Indemnity Group, Inc., a Delaware corporation. Under U.S. federal income tax law, interest paid by a U.S. corporation to a non-U.S. shareholder is generally subject to a 30% withholding tax, unless reduced by treaty. The income tax treaty between the United States and Luxembourg (the Luxembourg Treaty) generally eliminates the withholding tax on interest paid to qualified residents of Luxembourg. Were the IRS to contend successfully that U.A.I. (Luxembourg) Investment, S.à.r.l. is not eligible for benefits under the Luxembourg Treaty, interest paid to U.A.I. (Luxembourg) Investment, S.à.r.l. by Global Indemnity Group, Inc. would be subject to the 30% withholding tax. Such tax may be applied retroactively to all previous years for which the statute of limitations has not expired, with interest and penalties. Such a result may have a material adverse effect on the Company's financial condition and results of operation.

There is a risk that interest income imputed to the Company's Irish affiliates may be subject to 25% Irish income tax.

U.A.I. (Ireland) Limited and U.A.I. (Ireland) II Unlimited Company are companies incorporated under the laws of Ireland. The companies are resident taxpayers fully subject to Ireland corporate income tax of 12.5% on

Table of Contents

trading income and 25.0% on non-trading income, including interest and dividends from foreign companies. The Company intends to manage its operations in such a way that there will not be any material taxable income generated in Ireland under Irish law. However, there can be no assurance from the Irish authorities that a law may not be enacted that would impute income to U.A.I. (Ireland) Limited and U.A.I. (Ireland) II Unlimited Company in the future or retroactively arising out of the Companies' current operations.

Item 1B. UNRESOLVED STAFF COMMENTS

None.

Item 2. PROPERTIES

At December 31, 2015, the Company leased office space in Bala Cynwyd, Pennsylvania which holds the Commercial Lines' principal executive offices and headquarters. The Company also leased additional office space in California, Georgia, Illinois, and Texas, which serves as office space for field offices for Commercial Lines. Some of the office space in California also serves as office space for the Company's claims operations for Commercial Lines. As part of Global Indemnity Reinsurance's agreement with one of its service providers, the Company shares office space in Hamilton, Bermuda, which is used by Reinsurance Operations. The Company leased office space in Arizona, Nebraska, and Florida, which is used by Personal Lines. The Company leased office space in Cavan, Ireland, which is used to support the operating needs of the Insurance and Reinsurance Operations. The Company believes the properties listed are suitable and adequate to meet its needs.

Item 3. LEGAL PROCEEDINGS

The Company is, from time to time, involved in various legal proceedings in the ordinary course of business. The Company purchased insurance and reinsurance coverage for risks in amounts that it considers adequate. However, there can be no assurance that the insurance and reinsurance coverage that the Company maintains is sufficient or will be available in adequate amounts or at a reasonable cost. The Company does not believe that the resolution of any currently pending legal proceedings, either individually or taken as a whole, will have a material adverse effect on its business, results of operations, cash flows, or financial condition.

There is a greater potential for disputes with reinsurers who are in runoff. Some of the Company's reinsurers have operations that are in runoff, and therefore, the Company closely monitors those relationships. The Company anticipates that, similar to the rest of the insurance and reinsurance industry, it will continue to be subject to litigation and arbitration proceedings in the ordinary course of business.

Item 4. MINE SAFETY DISCLOSURES

None.

Table of Contents**PART II****Item 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES****Market for the Company's A Ordinary Shares**

The Company's A ordinary shares, par value \$0.0001 per share, began trading on the NASDAQ Global Select Market, formerly the NASDAQ National Market, under the symbol UNGL on December 16, 2003. On March 14, 2005 the Company changed its symbol to INDM. On July 6, 2010, the Company changed its symbol to GBLI as part of a re-domestication transaction whereby all shares of INDM were replaced with shares of GBLI on a one-for-two basis. The following table sets forth, for the periods indicated, the high and low intraday sales prices of the Company's A ordinary shares as reported by the NASDAQ Global Select Market.

	High	Low
Fiscal Year Ended December 31, 2015:		
First Quarter	\$ 29.93	\$ 22.96
Second Quarter	29.73	26.60
Third Quarter	29.20	25.22
Fourth Quarter	29.92	25.05
Fiscal Year Ended December 31, 2014:		
First Quarter	\$ 26.98	\$ 23.16
Second Quarter	27.78	24.44
Third Quarter	27.23	24.68
Fourth Quarter	29.50	25.15

There is no established public trading market for the Company's B ordinary shares, par value \$0.0001 per share.

As of March 4, 2016, there were 9 holders of record of the Company's B ordinary shares, all of whom are affiliates of Fox Paine & Company, LLC. The number of holders of record, including individual owners of the Company's A ordinary shares, was 708 as of March 4, 2016. The Company believes that the actual number of beneficial owners of the Company's A ordinary shares is much higher than the number of record holders as shares are held in street name by brokers and others on behalf of individual owners.

See Note 15 to the consolidated financial statements in Item 8 of Part II of this report for information regarding securities authorized under the Company's equity compensation plans.

Table of Contents**Performance of the Company's A Ordinary Shares**

The following graph represents a five-year comparison of the cumulative total return to shareholders for the Company's A ordinary shares and stock of companies included in the NASDAQ Insurance Index and NASDAQ Composite Index, which the Company believes are the most comparative indexes.

Company Purchases of Ordinary Shares

The Company's Share Incentive Plan allows employees to surrender A ordinary shares as payment for the tax liability incurred upon the vesting of restricted stock that was issued under the Share Incentive Plan. During 2015, the Company purchased an aggregate 11,895 of surrendered A ordinary shares from employees for \$0.3 million. All shares purchased from employees are held as treasury stock and recorded at cost.

On October 29, 2015, Global Indemnity entered into a redemption agreement with certain affiliates of Fox Paine & Company and agreed to redeem 8,260,870 of its ordinary shares for \$190 million in the aggregate from affiliates of Fox Paine & Company. Global Indemnity also acquired rights, expiring December 31, 2019, to redeem an additional 3,397,031 ordinary shares for \$78.1 million, which is subject to an annual 3% increase.

See Note 12 to the consolidated financial statements in Item 8 of Part II of this report for tabular disclosure of the Company's share repurchases by month.

Dividend Policy

The Company did not declare or pay cash dividends on any class of its ordinary shares in 2015 or 2014. Payment of dividends is subject to future determinations by the Board of Directors based on the Company's results, financial conditions, amounts required to grow the Company's business, and other factors deemed relevant by the Board.

Table of Contents

The Company is a holding company and has no direct operations. The ability of Global Indemnity plc to pay dividends is subject to Irish regulations and depends, in part, on the ability of its subsidiaries to pay dividends. Global Indemnity Reinsurance and the U.S. insurance subsidiaries are subject to significant regulatory restrictions limiting their ability to declare and pay dividends. See Management's Discussion and Analysis of Financial Condition Liquidity and Capital Resources Sources and Uses of Funds in Item 7 of Part II of this report for dividend limitation and Note 18 of the notes to the consolidated financial statement in Item 8 of Part II of this report for the dividends declared and paid by the U.S. insurance subsidiaries in 2015 and the maximum amount of distributions that they could pay as dividends in 2016.

Under the Companies Act, Global Indemnity Reinsurance may only declare or pay a dividend if it has no reasonable grounds for believing that it is, or would after the payment be, unable to pay its liabilities as they become due, or if the realizable value of its assets would not be less than the aggregate of its liabilities and its issued share capital and share premium accounts.

For 2016, the Company believes that Global Indemnity Reinsurance should have sufficient liquidity and solvency to pay dividends. In the future, the Company anticipates using dividends from Global Indemnity Reinsurance to fund obligations of Global Indemnity. Global Indemnity Reinsurance is prohibited, without the approval of the BMA, from reducing by 15% or more its total statutory capital as set out in its previous year's statutory financial statements, and any application for such approval must include such information as the BMA may require. Based upon the total statutory capital plus the statutory surplus as set out in its 2015 statutory financial statements that will be filed in 2016, Global Indemnity Reinsurance could pay a dividend of up to \$234.8 million without requesting BMA approval. Global Indemnity Reinsurance is dependent on receiving distributions from its subsidiaries in order to pay the full dividend in cash.

In 2015, profit distributions (not in respect to liquidations) by the Luxembourg Companies were generally subject to Luxembourg dividend withholding tax at a rate of 15%, unless a domestic law exemption or a lower tax treaty rate applies. Dividends paid by any of the Luxembourg Companies to their Luxembourg resident parent company are exempt from Luxembourg dividend withholding tax, provided that at the time of the dividend distribution, the resident parent company has held (or commits itself to continue to hold) 10% or more of the nominal paid up capital of the distributing entity or, in the event of a lower percentage participation, a participation having an acquisition price of Euro 1.2 million or more for a period of at least twelve months.

For a discussion of factors affecting the Company's ability to pay dividends, see Business Regulation in Item 1 of Part I, Management's Discussion and Analysis of Financial Condition and Results of Operations Liquidity and Capital Resources Sources and Uses of Funds in Item 7 of Part II, and Note 18 of the notes to the consolidated financial statements in Item 8 of Part II of this report.

Table of Contents**Item 6. SELECTED FINANCIAL DATA**

The following table sets forth selected consolidated historical financial data for Global Indemnity and should be read together with the consolidated financial statements and accompanying notes and Management's Discussion and Analysis of Financial Condition and Results of Operations included elsewhere in this report. No cash dividends were declared on common stock in any year presented in the table.

(Dollars in thousands, except shares and per share data)	For the Years Ended December 31,				
	2015	2014	2013	2012	2011

Unpaid losses and loss adjustment expenses	680,047	675,472	779,466	879,114	971,377
Total shareholders' equity	749,926	908,290	873,280	806,618	839,063
Base Value per share	42.98	35.86	34.65	32.15	27.06

- (1) The Company's insurance operating ratios are GAAP financial measures that are generally viewed in the insurance industry as indicators of underwriting profitability. The loss ratio is the ratio of net losses and loss adjustment expenses to net premiums earned. The expense ratio is the ratio of acquisition costs and other underwriting expenses to net premiums earned. The combined ratio is the sum of the loss and expense ratios. The ratios presented here represent the consolidated results of the Company's Commercial Lines, Personal Lines, and Reinsurance Operations.
- (2) A summary of prior accident year adjustments is summarized as follows:
- 2015 loss and combined ratios reflect a \$34.7 million reduction of net losses and loss adjustment expenses
 - 2014 loss and combined ratios reflect a \$16.4 million reduction of net losses and loss adjustment expenses
 - 2013 loss and combined ratios reflect a \$7.9 million reduction of net losses and loss adjustment expenses
 - 2012 loss and combined ratios reflect a \$4.4 million increase of net losses and loss adjustment expenses
 - 2011 loss and combined ratios reflect a \$3.4 million increase of net losses and loss adjustment expenses
- See Results of Operations in Item 7 of Part II of this report for details of these items and their impact on the loss and combined ratios.
- (3) The Company's loss and combined ratios for 2015, 2014, 2013, 2012, and 2011 include \$45.0 million, \$14.0 million, \$10.0 million, \$14.2 million, and \$20.6 million, respectively, of catastrophic losses from the Insurance Operations. See Results of Operations in Item 7 of Part II of this report for a discussion of the impact of these losses on the loss and combined ratios.

Table of Contents

Item 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion and analysis of the Company's financial condition and results of operations should be read in conjunction with the consolidated financial statements and accompanying notes of Global Indemnity included elsewhere in this report. Some of the information contained in this discussion and analysis or set forth elsewhere in this report, including information with respect to the Company's plans and strategy, constitutes forward-looking statements that involve risks and uncertainties. Please see "Cautionary Note Regarding Forward-Looking Statements" at the end of this Item 7 and "Risk Factors" in Item 1A above for more information. You should review "Risk Factors" in Item 1A above for a discussion of important factors that could cause actual results to differ materially from the results described in or implied by the forward-looking statements contained herein.

Recent Developments

Effective December 6, 2015, Bruce Lederman, Raphael de Balmann, and Joseph W. Brown were appointed to the Company's Board of Directors. On May 27, 2015, Larry N. Port was elected to the Company's Board of Directors.

On October 29, 2015, Global Indemnity entered into a redemption agreement with certain affiliates of Fox Paine & Company and agreed to redeem 8,260,870 of its ordinary shares for \$190 million in the aggregate from affiliates of Fox Paine & Company. Global Indemnity also acquired rights, expiring December 31, 2019, to redeem an additional 3,397,031 ordinary shares for \$78.1 million, which is subject to an annual 3% increase. After giving effect to the share redemptions and regardless of whether or not the additional redemption rights are exercised, affiliates of Fox Paine & Company will continue to have the ability to cast a majority of votes on matters submitted to Global Indemnity shareholders for approval. The Company reimbursed Fox Paine & Company \$1.15 million for expenses related to the redemption of the Company's ordinary shares. In connection with the redemption, the Company sold \$279.9 million of securities from its consolidated investment portfolio during October, 2015. \$102.0 million was used to pay down margin debt, with the remainder being used to fund a portion of the redemption transaction.

On August 12, 2015, the Company issued \$100.0 million in aggregate principal amount of its 2045 Subordinated Notes through an underwritten public offering. See Note 11 of the notes to the consolidated financial statements in Item 8 of Part II of this report for additional information on this debt issuance.

On June 12, 2015, A.M. Best affirmed the financial strength rating of A (Excellent) for Global Indemnity Reinsurance and its U.S. insurance subsidiaries.

On January 1, 2015, Global Indemnity Group, Inc. completed its acquisition of American Reliable. The results of American Reliable's operations are included in the Company's consolidated financial statements since the date of acquisition on January 1, 2015. The business acquired from American Reliable is considered to be a separate segment, Personal Lines. For additional information related to the acquisition of American Reliable, see Note 3 and Note 19 of the notes to the consolidated financial statements in Item 8 of Part II of this report for additional information as well as the "Overview" and "Results of Operations" sections below.

Overview

In connection with the acquisition of American Reliable, the Company reevaluated segment classifications and determined that the Company will operate and manage its business through three reportable business segments: Commercial Lines, Personal Lines, and Reinsurance Operations.

Table of Contents

The Company's Commercial Lines segment distribute property and casualty insurance products through a group of approximately 120 professional general agencies that have limited quoting and binding authority, as well as a number of wholesale insurance brokers who in turn sell the Company's insurance products to insureds through retail insurance brokers. Commercial Lines operates predominantly in the excess and surplus lines marketplace. The Company manages its Commercial Lines segment via product classification. These product classifications are: 1) Penn-America, which includes property and general liability products for small commercial businesses distributed through a select network of wholesale general agents with specific binding authority; 2) United National, which includes property, general liability, and professional lines products distributed through program administrators with specific binding authority; and 3) Diamond State, which includes property, casualty, and professional lines products distributed through wholesale brokers and program administrators with specific binding authority.

The Company's Personal Lines segment, via American Reliable, offers specialty personal lines and agricultural coverage through a group of approximately 290 agents, primarily comprised of wholesale general agents, with specific binding authority in the admitted marketplace.

The Company's Reinsurance Operations consisting solely of the operations of Global Indemnity Reinsurance, provides reinsurance solutions through brokers and on a direct basis. In prior years, the Company provided reinsurance solutions through program managers and primary writers, including regional insurance companies. Global Indemnity Reinsurance is a Bermuda based treaty reinsurer for specialty property and casualty insurance and reinsurance companies. Global Indemnity Reinsurance conducts business in Bermuda and is focused on using its capital capacity to write catastrophe-oriented placements and other niche or specialty-focused treaties meeting the Company's risk tolerance and return thresholds.

The Company derives its revenues primarily from premiums paid on insurance policies that it writes and from income generated by its investment portfolio, net of fees paid for investment management services. The amount of insurance premiums that the Company receives is a function of the amount and type of policies it writes, as well as prevailing market prices.

The Company's expenses include losses and loss adjustment expenses, acquisition costs and other underwriting expenses, corporate and other operating expenses, interest, investment expenses, and income taxes. Losses and loss adjustment expenses are estimated by management and reflect the Company's best estimate of ultimate losses and costs arising during the reporting period and revisions of prior period estimates. The Company records its best estimate of losses and loss adjustment expenses considering both internal and external actuarial analyses of the estimated losses the Company expects to incur on the insurance policies it writes. The ultimate losses and loss adjustment expenses will depend on the actual costs to resolve claims. Acquisition costs consist principally of commissions and premium taxes that are typically a percentage of the premiums on the insurance policies the Company writes, net of ceding commissions earned from reinsurers. Other underwriting expenses consist primarily of personnel expenses and general operating expenses related to underwriting activities. Corporate and other operating expenses are comprised primarily of outside legal fees, other professional and accounting fees, directors' fees, management fees, and salaries and benefits for company personnel whose services relate to the support of corporate activities. In 2015, corporate expenses also included \$8.3 million of expenses related to the acquisition of American Reliable. Interest expense is primarily comprised of amounts due on outstanding debt.

Critical Accounting Estimates and Policies

The Company's consolidated financial statements are prepared in conformity with GAAP, which require it to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. See Note 2 of the notes to consolidated financial statements contained in Item 8 of Part II of this report. Actual results could differ from those estimates and assumptions.

Table of Contents

The Company believes that of the Company's significant accounting policies, the following may involve a higher degree of judgment and estimation.

Liability for Unpaid Losses and Loss Adjustment Expenses

Although variability is inherent in estimates, the Company believes that the liability for unpaid losses and loss adjustment expenses reflects its best estimate for future amounts needed to pay losses and related loss adjustment expenses and the impact of its reinsurance coverage with respect to insured events.

In developing loss and loss adjustment expense (loss or losses) reserve estimates for the Company's Insurance Operations, its actuaries perform detailed reserve analyses each quarter. To perform the analysis, the data is organized at a reserve category level. Management is responsible for the final determination of loss reserve selections. A reserve category can be a line of business such as commercial automobile liability, or it can be a particular type of claim such as construction defect. The reserves within a reserve category level are characterized as short-tail and long-tail. For long-tail business, it will generally be several years between the time the business is written and the time when all claims are settled. The Company's long-tail exposures include general liability, professional liability, products liability, commercial automobile liability, and excess and umbrella. Short-tail exposures include property, commercial automobile physical damage, and equine mortality. To manage its insurance operations, the Company differentiates by product classifications, which are Penn-America, United National, Diamond State, and American Reliable. For further discussion about the Company's product classifications, see General Business Segments Insurance Operations in Item 1 of Part I of this report. Each of the Company's product classifications contain both long-tail and short-tail exposures. Every reserve category is analyzed by the Company's actuaries each quarter. The analyses generally include reviews of losses gross of reinsurance and net of reinsurance.

Loss reserve estimates for the Company's Reinsurance Operations are developed by independent, external actuaries; however, management is responsible for the final determination of loss reserve selections. The data for this analysis is organized by treaty and treaty year. As with the Company's reserves for its Insurance Operations, reserves for its Reinsurance Operations are characterized as short-tail and long-tail. Long-tail exposures include workers compensation, professional liability, and excess and umbrella liability. Short-tail exposures are primarily catastrophe exposed property and marine accounts.

In addition to the Company's internal reserve analysis, independent external actuaries perform a full, detailed review of the Insurance Operations and Reinsurance Operations reserves annually. The Company reviews both the internal and external actuarial analyses in determining its reserve position.

The methods used to project ultimate losses for both long-tail and short-tail exposures include, but are not limited to, the following:

Paid Development method;

Incurred Development method;

Expected Loss Ratio method;

Bornhuetter-Ferguson method using premiums and paid loss;

Bornhuetter-Ferguson method using premiums and incurred loss; and

Average Loss method.

The Paid Development method estimates ultimate losses by reviewing paid loss patterns and applying them to accident years with further expected changes in paid loss. Selection of the paid loss pattern requires analysis of several factors including the impact of inflation on claims costs, the rate at which claims professionals make claim payments and closed claims, the impact of judicial decisions, the impact of underwriting

changes, the

Table of Contents

impact of large claim payments and other factors. Claim cost inflation itself requires evaluation of changes in the cost of repairing or replacing property, changes in the cost of medical care, changes in the cost of wage replacement, judicial decisions, legislative changes and other factors. Because this method assumes that losses are paid at a consistent rate, changes in any of these factors can impact the results. Since the method does not rely on case reserves, it is not directly influenced by changes in the adequacy of case reserves.

For many reserve categories, paid loss data for recent periods may be too immature or erratic for accurate loss projections. This situation often exists for long-tail exposures. In addition, changes in the factors described above may result in inconsistent payment patterns. Finally, estimating the paid loss pattern subsequent to the most mature point available in the data analyzed often involves considerable uncertainty for long-tail reserve categories.

The Incurred Development method is similar to the Paid Development method, but it uses case incurred losses instead of paid losses. Since this method uses more data (case reserves in addition to paid losses) than the Paid Development method, the incurred development patterns may be less variable than paid development patterns. However, selection of the incurred loss pattern requires analysis of all of the factors listed in the description of the Paid Development method. In addition, the inclusion of case reserves can lead to distortions if changes in case reserving practices have taken place and the use of case incurred losses may not eliminate the issues associated with estimating the incurred loss pattern subsequent to the most mature point available.

The Expected Loss Ratio method multiplies premiums by an expected loss ratio to produce ultimate loss estimates for each accident year. This method may be useful if loss development patterns are inconsistent, losses emerge very slowly, or there is relatively little loss history from which to estimate future losses. The selection of the expected loss ratio requires analysis of loss ratios from earlier accident years or pricing studies and analysis of inflationary trends, frequency trends, rate changes, underwriting changes, and other applicable factors.

The Bornhuetter-Ferguson method using premiums and paid losses is a combination of the Paid Development method and the Expected Loss Ratio method. This method normally determines expected loss ratios similar to the method used for the Expected Loss Ratio method and requires analysis of the same factors described above. The method assumes that only future losses will develop at the expected loss ratio level. The percent of paid loss to ultimate loss implied from the Paid Development method is used to determine what percentage of ultimate loss is yet to be paid. The use of the pattern from the Paid Development method requires consideration of all factors listed in the description of the Paid Development method. The estimate of losses yet to be paid is added to current paid losses to estimate the ultimate loss for each year. This method will react very slowly if actual ultimate loss ratios are different from expectations due to changes not accounted for by the expected loss ratio calculation.

The Bornhuetter-Ferguson method using premiums and incurred losses is similar to the Bornhuetter-Ferguson method using premiums and paid losses except that it uses case incurred losses. The use of case incurred losses instead of paid losses can result in development patterns that are less variable than paid development patterns. However, the inclusion of case reserves can lead to distortions if changes in case reserving practices have taken place. The method requires analysis of all the factors that need to be reviewed for the Expected Loss Ratio and Incurred Development methods.

The Average Loss method multiplies a projected number of ultimate claims by an estimated ultimate average loss for each accident year to produce ultimate loss estimates. Since projections of the ultimate number of claims are often less variable than projections of ultimate loss, this method can provide more reliable results for reserve categories where loss development patterns are inconsistent or too variable to be relied on exclusively. In addition, this method can more directly account for changes in coverage that impact the number and size of claims. However, this method can be difficult to apply to situations where very large claims or a substantial number of unusual claims result in volatile average claim sizes. Projecting the ultimate number of claims requires analysis of several factors including the rate at which policyholders report claims to the Company, the impact of

Table of Contents

judicial decisions, the impact of underwriting changes and other factors. Estimating the ultimate average loss requires analysis of the impact of large losses and claim cost trends based on changes in the cost of repairing or replacing property, changes in the cost of medical care, changes in the cost of wage replacement, judicial decisions, legislative changes and other factors.

For many exposures, especially those that can be considered long-tail, a particular accident year may not have a sufficient volume of paid losses to produce a statistically reliable estimate of ultimate losses. In such a case, the Company's actuaries typically assign more weight to the Incurred Development method than to the Paid Development method. As claims continue to settle and the volume of paid losses increases, the actuaries may assign additional weight to the Paid Development method. For most of the Company's reserve categories, even the incurred losses for accident years that are early in the claim settlement process will not be of sufficient volume to produce a reliable estimate of ultimate losses. In these cases, the Company will not assign any weight to the Paid and Incurred Development methods and will use the Bornhuetter-Ferguson and Expected Loss Ratio methods. For short-tail exposures, the Paid and Incurred Development methods can often be relied on sooner primarily because the Company's history includes a sufficient number of years to cover the entire period over which paid and incurred losses are expected to change. However, the Company may also use the Expected Loss Ratio, Bornhuetter-Ferguson and Average Loss methods for short-tail exposures.

Generally, reserves for long-tail lines give more weight to the Expected Loss Ratio method in the more recent immature years. As the accident years mature, weight shifts to the Bornhuetter-Ferguson methods and eventually to the Incurred and/or Paid Development method. Claims related to umbrella business are usually reported later than claims for other long-tail lines. For umbrella business, the shift from the Expected Loss Ratio method to the Bornhuetter-Ferguson methods to the Loss Development method may be more protracted than for most long-tailed lines. Reserves for short-tail lines tend to make the shift across methods more quickly than the long-tail lines.

For other more complex reserve categories where the above methods may not produce reliable indications, the Company uses additional methods tailored to the characteristics of the specific situation. Such reserve categories include losses from construction defects and A&E.

For construction defect losses, the Company's actuaries organize losses by the year in which they were reported to develop an IBNR provision for development on known cases. To estimate losses from claims that have not been reported (pure IBNR), various extrapolation techniques are applied to the pattern of claims that have been reported to estimate the number of claims yet to be reported. This process requires analysis of several factors including the rate at which policyholders report claims to the Company, the impact of judicial decisions, the impact of underwriting changes and other factors. An average claim size is determined from past experience and applied to the number of unreported claims to estimate reserves for these claims.

Establishing reserves for A&E and other mass tort claims involves considerably more judgment than other types of claims due to, among other things, inconsistent court decisions, an increase in bankruptcy filings as a result of asbestos-related liabilities, and judicial interpretations that often expand theories of recovery and broaden the scope of coverage. The insurance industry continues to receive a substantial number of asbestos-related bodily injury claims, with an increasing focus being directed toward other parties, including installers of products containing asbestos rather than against asbestos manufacturers. This shift has resulted in significant insurance coverage litigation implicating applicable coverage defenses or determinations, if any, including but not limited to, determinations as to whether or not an asbestos-related bodily injury claim is subject to aggregate limits of liability found in most comprehensive general liability policies. The Company continues to closely monitor its asbestos exposure and make adjustments where they are warranted.

In 2009, one of the Company's insurance companies entered into a settlement agreement to resolve asbestos related coverage litigation related to approximately 3,900 existing asbestos-related bodily injury claims and

Table of Contents

future claims. The settlement was approved by the Court and a final order was issued in September 2014. As of December 31, 2015, the Company has no outstanding obligations as it relates to this settlement agreement.

In addition, the Company has exposure to other asbestos related matters. In 2013, three claims were reported on an excess policy that was written in 1985. These claims were settled in April, 2014. Management will continue to monitor the developments of the litigation noted above as well as the new claims that have been reported to determine if any additional financial exposure is present.

Reserve analyses performed by the Company's internal and external actuaries result in actuarial point estimates. The results of the detailed reserve reviews were summarized and discussed with the Company's senior management to determine the best estimate of reserves. This group considered many factors in making this decision. The factors included, but were not limited to, the historical pattern and volatility of the actuarial indications, the sensitivity of the actuarial indications to changes in paid and incurred loss patterns, the consistency of claims handling processes, the consistency of case reserving practices, changes in the Company's pricing and underwriting, and overall pricing and underwriting trends in the insurance market.

Management's best estimate at December 31, 2015 was recorded as the loss reserve. Management's best estimate is as of a particular point in time and is based upon known facts, the Company's actuarial analyses, current law, and the Company's judgment. This resulted in carried gross and net reserves of \$680.0 million and \$571.9 million, respectively, as of December 31, 2015. A breakout of the Company's gross and net reserves, excluding the effects of the Company's intercompany pooling arrangements and intercompany stop loss and quota share reinsurance agreements, as of December 31, 2015 is as follows:

(Dollars in thousands)	Case	Gross Reserves	
		IBNR (1)	Total
Commercial Lines	\$ 143,876	\$ 380,731	\$ 524,607
Personal Lines	37,252	57,107	94,359
Reinsurance Operations	15,954	45,127	61,081
Total	\$ 197,082	\$ 482,965	\$ 680,047

(Dollars in thousands)	Case	Net Reserves (2)	
		IBNR (1)	Total
Commercial Lines	\$ 110,327	\$ 318,549	\$ 428,876
Personal Lines	32,002	50,292	82,294
Reinsurance Operations	15,954	44,793	60,747
Total	\$ 158,283	\$ 413,634	\$ 571,917

(1) Losses incurred but not reported, including the expected future emergence of case reserves.

(2) Does not include reinsurance receivable on paid losses.

The Company continually reviews these estimates and, based on new developments and information, includes adjustments of the estimated ultimate liability in the operating results for the periods in which the adjustments are made. The establishment of loss and loss adjustment expense reserves makes no provision for the possible broadening of coverage by legislative action or judicial interpretation, or the emergence of new types of losses not sufficiently represented in the Company's historical experience or that cannot yet be quantified or estimated. The Company regularly analyzes its reserves and reviews reserving methodologies so that future adjustments to prior year reserves can be minimized. However, given the complexity of this process, reserves require continual updates and the ultimate liability may be higher or lower than previously indicated. Changes in estimates for loss and loss adjustment expense reserves are recorded in the period that the change in these estimates is made. See Note 10 to the consolidated financial statements in Item 8 of Part II of this report for details concerning the changes in the estimate for incurred loss and loss adjustment expenses related to prior accident years.

Table of Contents

The detailed reserve analyses that the Company's internal and external actuaries complete use a variety of generally accepted actuarial methods and techniques to produce a number of estimates of ultimate loss. The Company determines its best estimate of ultimate loss by reviewing the various estimates provided by its actuaries and other relevant information. The reserve estimate is the difference between the estimated ultimate loss and the losses paid to date. The difference between the estimated ultimate loss and the case incurred loss (paid loss plus case reserve) is considered to be IBNR. IBNR calculated as such includes a provision for development on known cases (supplemental development) as well as a provision for claims that have occurred but have not yet been reported (pure IBNR).

In light of the many uncertainties associated with establishing the estimates and making the assumptions necessary to establish reserve levels, the Company reviews its reserve estimates on a regular basis and makes adjustments in the period that the need for such adjustments is determined. In general, loss emergence has been reflective of historical patterns and the selected development patterns have not changed significantly from prior years.

The key assumptions fundamental to the reserving process are often different for various reserve categories and accident years. Some of these assumptions are explicit assumptions that are required of a particular method, but most of the assumptions are implicit and cannot be precisely quantified. An example of an explicit assumption is the pattern employed in the Paid Development method. However, the assumed pattern is itself based on several implicit assumptions such as the impact of inflation on medical costs and the rate at which claim professionals close claims. Loss frequency is a measure of the number of claims per unit of insured exposure, and loss severity is a measure of the average size of claims. Each reserve segment has an implicit frequency and severity for each accident year as a result of the various assumptions made.

Previous reserve analyses have resulted in the Company's identification of information and trends that have caused it to increase or decrease frequency and severity assumptions in prior periods and could lead to the identification of a need for additional material changes in loss and loss adjustment expense reserves, which could materially affect results of operations, equity, business and insurer financial strength and debt ratings. Factors affecting loss frequency include, among other things, the effectiveness of loss controls and safety programs and changes in economic activity or weather patterns. Factors affecting loss severity include, among other things, changes in policy limits and deductibles, rate of inflation and judicial interpretations. Another factor affecting estimates of loss frequency and severity is the loss reporting lag, which is the period of time between the occurrence of a loss and the date the loss is reported to the Company. The length of the loss reporting lag affects the Company's ability to accurately predict loss frequency (loss frequencies are more predictable for short-tail lines) as well as the amount of reserves needed for IBNR.

Table of Contents

If the actual levels of loss frequency and severity are higher or lower than expected, the ultimate losses will be different than management's best estimate. For most of its reserve categories, the Company believes that frequency can be predicted with greater accuracy than severity. Therefore, the Company believes management's best estimate is more sensitive to changes in severity than frequency. The following table, which the Company believes reflects a reasonable range of variability around its best estimate based on historical loss experience and management's judgment, reflects the impact of changes (which could be favorable or unfavorable) in frequency and severity on the Company's current accident year net loss estimate of \$310.1 million for claims occurring during the year ended December 31, 2015:

(Dollars in thousands)	Severity Change					
		-10%	-5%	0%	5%	10%
Frequency Change	-5%	\$ (44,965)	\$ (30,235)	\$ (15,505)	\$ (775)	\$ 13,955
	-3%	(39,383)	(24,343)	(9,303)	5,737	20,777
	-2%	(36,592)	(21,397)	(6,202)	8,993	24,188
	-1%	(33,801)	(18,451)	(3,101)	12,249	27,599
	0%	(31,010)	(15,505)		15,505	31,010
	1%	(28,219)	(12,559)	3,101	18,761	34,421
	2%	(25,428)	(9,613)	6,202	22,017	37,832
	3%	(22,637)	(6,667)	9,303	25,273	41,243
	5%	(17,056)	(775)	15,505	31,785	48,066

The Company's net reserves for losses and loss adjustment expenses of \$571.9 million as of December 31, 2015 relate to multiple accident years. Therefore, the impact of changes in frequency and severity for more than one accident year could be higher or lower than the amounts reflected above.

Recoverability of Reinsurance Receivables

The Company regularly reviews the collectability of its reinsurance receivables, and includes adjustments resulting from this review in earnings in the period in which the adjustment arises. A.M. Best ratings, financial history, available collateral, and payment history with the reinsurers are several of the factors that the Company considers when judging collectability. Changes in loss reserves can also affect the valuation of reinsurance receivables if the change is related to loss reserves that are ceded to reinsurers. Certain amounts may be uncollectible if the Company's reinsurers dispute a loss or if the reinsurer is unable to pay. If its reinsurers do not pay, the Company remains legally obligated to pay the loss.

See Note 8 of the notes to consolidated financial statements in Item 8 of Part II of this report for further information surrounding the Company's reinsurance receivable balances and collectability as of December 31, 2015 and 2014. For a listing of the ten reinsurers for which the Company has the largest reinsurance asset amounts as of December 31, 2015, see "Reinsurance of Underwriting Risk" in Item 1 of Part I of this report.

Investments

The carrying amount of the Company's investments approximates their fair value. The Company regularly performs various analytical valuation procedures with respect to investments, including reviewing each fixed maturity security in an unrealized loss position to determine the amount of unrealized loss related to credit loss and the amount related to all other factors, such as changes in interest rates. The credit loss represents the portion of the amortized book value in excess of the net present value of the projected future cash flows discounted at the effective interest rate implicit in the debt security prior to impairment. The credit loss component of the other than temporary impairment is recorded through earnings, whereas the amount relating to factors other than credit losses are recorded in other comprehensive income, net of taxes. During its review, the Company considers credit rating, market price, and issuer specific financial information, among other factors, to assess the likelihood of collection of all principal and interest as contractually due. Securities for which the Company determines that a

Table of Contents

credit loss is likely are subjected to further analysis to estimate the credit loss to be recognized in earnings, if any. See Note 2 of the notes to consolidated financial statements in Item 8 of Part II of this report for the specific methodologies and significant assumptions used by asset class. Upon identification of such securities and periodically thereafter, a detailed review is performed to determine whether the decline is considered other than temporary. This review includes an analysis of several factors, including but not limited to, the credit ratings and cash flows of the securities, and the magnitude and length of time that the fair value of such securities is below cost.

For an analysis of the Company's securities with gross unrealized losses as of December 31, 2015 and 2014, and for other than temporary impairment losses that the Company recorded for the years ended December 31, 2015, 2014, and 2013, please see Note 4 of the notes to the consolidated financial statements in Item 8 of Part II of this report.

Fair Value Measurements

The Company categorizes its invested assets and derivative instruments that are accounted for at fair value in the consolidated statements into a fair value hierarchy. The fair value hierarchy is directly related to the amount of subjectivity associated with the inputs utilized to determine the fair value of these assets. The reported value of financial instruments not carried at fair value, principally cash and cash equivalents and margin borrowing facility approximate fair value. See Note 6 of the notes to the consolidated financial statements in Item 8 of Part II of this report for further information about the fair value hierarchy and the Company's assets that are accounted for at fair value.

Goodwill and Intangible Assets

The Company tests for impairment of goodwill at least annually and more frequently as circumstances warrant in accordance with applicable accounting guidance. Accounting guidance allows for the testing of goodwill for impairment using both qualitative and quantitative factors. Impairment of goodwill is recognized only if the carrying amount of the reporting unit, including goodwill, exceeds the fair value of the reporting unit. The amount of the impairment loss would be equal to the excess carrying value of the goodwill over the implied fair value of the reporting unit goodwill. Based on the qualitative assessment performed, there was no impairment of goodwill as of December 31, 2015.

Impairment of intangible assets with indefinite useful lives is tested at least annually and more frequently as circumstances warrant in accordance with applicable accounting guidance. Accounting guidance allows for the testing of intangible assets for impairment using both qualitative and quantitative factors. Impairment of indefinite lived intangible assets is recognized only if the carrying amount of the intangible assets exceeds the fair value of said assets. The amount of the impairment loss would be equal to the excess carrying value of the assets over the fair value of said assets. Based on the qualitative assessment performed, there were no impairments of indefinite lived intangible assets as of December 31, 2015.

Intangible assets that are not deemed to have an indefinite useful life are amortized over their estimated useful lives. The carrying amounts of definite lived intangible assets are regularly reviewed for indicators of impairment in accordance with applicable accounting guidance. Impairment is recognized only if the carrying amount of the intangible asset is in excess of its undiscounted projected cash flows. The impairment is measured as the difference between the carrying amount and the estimated fair value of the asset. As of December 31, 2015, there were no triggering events that occurred during the year that would result in an impairment of definite lived intangible assets.

See Note 7 of the notes to the consolidated financial statements in Item 8 of Part II of this report for more details concerning the Company's goodwill and intangible assets.

Table of Contents

Deferred Acquisition Costs

The costs of acquiring new and renewal insurance and reinsurance contracts include commissions, premium taxes and certain other costs that are directly related to the successful acquisition of new and renewal insurance and reinsurance contracts. The excess of the Company's costs of acquiring new and renewal insurance and reinsurance contracts over the related ceding commissions earned from reinsurers is capitalized as deferred acquisition costs and amortized over the period in which the related premiums are earned.

In accordance with accounting guidance for insurance enterprises, the method followed in computing such amounts limits them to amounts recoverable from premium to be earned, related investment income, losses and loss adjustment expenses, and certain other costs expected to be incurred as the premium is earned. A premium deficiency is recognized if the sum of expected loss and loss adjustment expenses and unamortized acquisition costs exceeds related unearned premium. This evaluation is done at a product line level in Insurance Operations and at a treaty level in Reinsurance Operations. Any future expected loss on the related unearned premium is recorded first by impairing the unamortized acquisition costs on the related unearned premium followed by an increase to loss and loss adjustment expense reserves on additional expected loss in excess of unamortized acquisition costs. The Company calculates deferred acquisition costs for Insurance Operations separately by product lines and for its Reinsurance Operations separately for each treaty.

Taxation

The Company provides for income taxes in accordance with applicable accounting guidance. The Company's deferred tax assets and liabilities primarily result from temporary differences between the amounts recorded in the consolidated financial statements and the tax basis of the Company's assets and liabilities.

At each balance sheet date, management assesses the need to establish a valuation allowance that reduces deferred tax assets when it is more likely than not that all, or some portion, of the deferred tax assets will not be realized. A valuation allowance would be based on all available information including the Company's assessment of uncertain tax positions and projections of future taxable income from each tax-paying component in each jurisdiction, principally derived from business plans and available tax planning strategies. There are no valuation allowances as of December 31, 2015 and 2014. The deferred tax asset balance is analyzed regularly by management. This assessment requires significant judgment and considers, among other matters, the nature, frequency and severity of current and cumulative losses, forecasts of future profitability, the duration of carryforward periods, and tax planning strategies and/or actions. Based on these analyses, the Company has determined that its deferred tax asset is recoverable. Projections of future taxable income incorporate several assumptions of future business and operations that are apt to differ from actual experience. If, in the future, the Company's assumptions and estimates that resulted in the forecast of future taxable income for each tax-paying component prove to be incorrect, a valuation allowance may be required. This could have a material adverse effect on the Company's financial condition, results of operations, and liquidity.

The Company applies a more likely than not recognition threshold for all tax uncertainties, only allowing the recognition of those tax benefits that have a greater than 50% likelihood of being sustained upon examination by the taxing authorities. Please see Note 9 of the notes to the consolidated financial statements in Item 8 of Part II of this report for a discussion of the Company's tax uncertainties.

Business Segments

The Company manages its business through three reportable business segments: Personal Lines, Commercial Lines, and Reinsurance Operations. The Personal Lines and Commercial Lines segments comprise the Company's U.S. Insurance Operations, which currently includes the operations of United National Insurance Company, Diamond State Insurance Company, United National Specialty Insurance Company, Penn-America Insurance Company, Penn-Star Insurance Company, Penn-Patriot Insurance Company, American Reliable

Table of Contents

Insurance Company, American Insurance Adjustment Agency, Inc., Collectibles Insurance Services, LLC, Global Indemnity Insurance Agency, LLC, J.H. Ferguson & Associates, LLC, and U.S. Insurance Services, Inc. Reinsurance Operations includes the operations of Global Indemnity Reinsurance Company, Ltd.

The Company evaluates the performance of these three segments based on gross and net premiums written, revenues in the form of net premiums earned, and expenses in the form of (1) net losses and loss adjustment expenses, (2) acquisition costs, and (3) other underwriting expenses.

Prior to 2015, the Commercial Lines segment was known as Insurance Operations segment. With the acquisition of American Reliable, the Insurance Operations segment was renamed to Commercial Lines segment. The newly acquired American Reliable became the Company's Personal Lines segment. For segment reporting, the values for 2013 and 2014 did not change for Commercial Lines and Reinsurance Operations.

See Business Segments in Item 1 of Part I of this report for a description of the Company's segments.

Table of Contents

The following table sets forth an analysis of financial data for the Company's segments during the periods indicated:

(Dollars in thousands)	Years Ended December 31,		
	2015	2014	2013 (6)
Personal Lines premium written:			
Gross premiums written	\$ 326,282	\$	\$
Ceded premiums written	72,247		
Net premiums written	\$ 254,035	\$	\$
Commercial Lines premiums written:			
Gross premiums written	\$ 214,218	\$ 229,978	\$ 232,373
Ceded premiums written	16,692	17,013	18,668
Net premiums written	\$ 197,526	\$ 212,965	\$ 213,705
Reinsurance Operations premiums written:			
Gross premiums written	\$ 49,733	\$ 61,275	\$ 58,350
Ceded premiums written	50	1,059	71
Net premiums written	\$ 49,683	\$ 60,216	\$ 58,279
Revenues: (1)			
Personal Lines	\$ 255,920	\$	\$
Commercial Lines	199,925	211,785	202,097
Reinsurance Operations	51,698	57,289	52,416
Total revenues	\$ 507,543	\$ 269,074	\$ 254,513
Expenses: (2)			
Personal Lines (3)	\$ 263,126	\$	\$
Commercial Lines (4)	180,700	206,569	204,197
Reinsurance Operations	32,845	40,611	34,445

Income (loss) from segments:			
Personal Lines	\$ (7,206)	\$	\$
Commercial Lines	19,225	5,216	(2,100)
Reinsurance Operations	18,853	16,678	17,971
Total income (loss) from segments	\$ 30,872	\$ 21,894	\$ 15,871
Insurance combined ratio analysis: (5)			
Personal Lines			
Loss ratio	64.8		
Expense ratio	39.2		
Combined ratio	104.0		
Commercial Lines			
Loss ratio	48.9	55.7	59.5
Expense ratio	41.7	42.1	44.5
Combined ratio	90.6	97.8	104.0

Edgar Filing: Global Indemnity plc - Form 10-K

Reinsurance Operations			
Loss ratio	26.8	34.8	30.8
Expense ratio	36.7	36.0	34.9
Combined ratio	63.5	70.8	65.7
Consolidated			
Loss ratio	54.6	51.2	53.5
Expense ratio	39.9	40.8	42.5
Combined ratio	94.5	92.0	96.0

Table of Contents

- (1) Excludes net investment income and net realized investment gains, which are not allocated to the Company's segments.
- (2) Excludes corporate and other operating expenses and interest expense, which are not allocated to the Company's segments.
- (3) Includes excise tax of \$1,265 related to cessions from the Company's Personal Lines to the Company's Reinsurance Operations for 2015.
- (4) Includes excise tax of \$1,051, \$1,114, and \$1,026 related to cessions from the Company's Commercial Lines to its Reinsurance Operations for 2015, 2014, and 2013, respectively.
- (5) The Company's insurance combined ratios are GAAP financial measures that are generally viewed in the insurance industry as indicators of underwriting profitability. The loss ratio is the ratio of net losses and loss adjustment expenses to net premiums earned. The expense ratio is the ratio of acquisition costs and other underwriting expenses to net premiums earned. The combined ratio is the sum of the loss and expense ratios.
- (6) On December 31, 2013, Diamond State Insurance Company sold all the outstanding shares of capital stock of one of its wholly owned subsidiaries, United National Casualty Insurance Company. Financial results for 2013 include United National Casualty Insurance Company. This was an asset sale which did not have a significant impact on the Company's ongoing business operations.

Table of Contents**Results of Operations****Year Ended December 31, 2015 Compared with the Year Ended December 31, 2014**

Management's discussion and analysis of financial condition and results of operation references various non-GAAP measures related to combined ratio, loss ratio, expense ratio, net losses and loss adjustment expenses, and acquisition cost and other underwriting expenses throughout the discussion and should be read in conjunction with GAAP measures and the reconciliations of non-GAAP measures.

Personal Lines

The components of income from the Company's Personal Lines segment and corresponding underwriting ratios are as follows:

(Dollars in thousands)	Years Ended		Increase / (Decrease)	
	December 31, 2015	December 31, 2014 (1)	\$	%
Gross premiums written	\$ 326,282	\$ 339,248	\$ (12,966)	(3.8%)
Net premiums written	\$ 254,035	\$ 255,182	\$ (1,147)	(0.4%)
Net premiums earned	\$ 253,048	\$ 254,641	\$ (1,593)	(0.6%)
Other income	2,872	1,912	960	50.2%
Total revenues	255,920	256,553	(633)	(0.2%)
Losses and expenses:				
Net losses and loss adjustment expenses	163,986	154,856	9,130	5.9%
Acquisition costs and other underwriting expenses (2)	99,140	106,131	(6,991)	(6.6%)
Income (loss) from segment	\$ (7,206)	\$ (4,434)	\$ (2,772)	(62.5%)
Underwriting Ratios:				
Loss ratio:				
Current accident year	64.8	56.8	8.0	
Prior accident year	0.0	4.0	(4.0)	
Calendar year loss ratio	64.8	60.8	4.0	
Expense ratio	39.2	41.7	(2.5)	
Combined ratio	104.0	102.5	1.5	
Reconciliation of Non-GAAP Measures				
Loss ratio excluding the effect of prior accident year (3) (8)	64.8	56.8

Catastrophe losses	\$ 33,983	\$ 16,245

Table of Contents

- (1) Represent unaudited pro forma results of operation for the year ended December 31, 2014 as if the acquisition had occurred on January 1, 2014 as opposed to January 1, 2015.
- (2) Includes excise tax of \$1,265 and \$1,273 related to cessions from the Company's Personal Lines to its Reinsurance Operations for the years ended December 31, 2015 and 2014, respectively.
- (3) This is a non-GAAP ratio that excludes the impact of prior accident year adjustments. The most directly comparable GAAP measure is the loss ratio.
- (4) This is a non-GAAP ratio that excludes the impact of prior accident year adjustments. The most directly comparable GAAP measure is the non-catastrophe loss ratio.
- (5) This is a non-GAAP measure that excludes the impact of prior accident year adjustments. The most directly comparable GAAP measure is the non-catastrophe losses.
- (6) This is a non-GAAP ratio that excludes the impact of prior accident year adjustments. The most directly comparable GAAP measure is the catastrophe loss ratio.
- (7) This is a non-GAAP measure that excludes the impact of prior accident year adjustments. The most directly comparable GAAP measure is the catastrophe losses.
- (8) The Company's management believes that this non-GAAP ratio or measure is useful to investors when evaluating the Company's underwriting performance as trends in the Company's Personal Lines may be obscured by prior accident year adjustments. This non-GAAP ratio should not be considered as a substitute for its most directly comparable GAAP measure and does not reflect the overall underwriting profitability of the Company.

Gross premiums written, which represent the amount received or to be received for insurance policies written without reduction for reinsurance costs or other deductions, were \$326.3 million for the year ended December 31, 2015, compared with \$339.2 million for year ended December 31, 2014, a decrease of \$13.0 million or 3.8%. The decrease is primarily due to a reduction in premiums on business written by American Reliable that is ceded to insurance entities owned by Assurant under a 100% quota share reinsurance agreement.

Net premiums written, which equal gross premiums written less ceded premiums written, were \$254.0 million for the year ended December 31, 2015, compared with \$255.2 million for the year ended December 31, 2014, a decrease of \$1.1 million or 0.4%. The ratio of net premiums written to gross premiums written was 77.9% for the year ended December 31, 2015 and 75.2% for the year ended December 31, 2014, an increase of 2.7 points.

Net premiums earned were \$253.0 million for the year ended December 31, 2015, compared with \$254.6 million for the year ended December 31, 2014, a decrease of \$1.6 million or 0.6%. Property net premiums earned for the year ended December 31, 2015 and 2014 were \$216.7 million and \$217.0 million, respectively. Casualty net premiums earned were \$36.3 million and \$37.6 million for the years ended December 31, 2015 and 2014, respectively.

Other Income

Other income was \$2.9 million and \$1.9 million for the years ended December 31, 2015 and 2014, respectively. Other income is primarily comprised of fee income on installments, commission income and accrued interest on the anticipated indemnification of unpaid loss and loss adjustment expense reserves. In accordance with a dispute resolution agreement between Global Indemnity Group, Inc. and American Bankers Group, Inc., any variance paid related to the loss indemnification will be subject to interest of 5% compounded semi-annually. See note 3 for additional information pertaining to the loss indemnification.

Net Losses and Loss Adjustment Expenses

The loss ratio for the Company's Personal Lines was 64.8% for the year ended December 31, 2015 compared with 60.8% for the year ended December 31, 2014. The loss ratio is a GAAP financial measure that is generally viewed in the insurance industry as an indicator of underwriting profitability and is calculated by dividing net losses and loss adjustment expenses by net premiums earned.

Table of Contents

The current accident year loss ratio for the year ended December 31, 2015 was 64.8%, an increase of 8.0 points from 56.8%, for the year ended December 31, 2014:

The non-catastrophe loss ratio increased 1.0 points from 50.4% in the year ended December 31, 2014 to 51.4% in the year ended December 31, 2015. Non-catastrophe losses were \$130.0 million and \$128.3 million for the years ended December 31, 2015 and 2014, respectively.

The catastrophe loss ratio increased 7.0 points from 6.4% in the year ended December 31, 2014 to 13.4% in the year ended December 31, 2015 mainly due to wild fires in California. Catastrophe losses were \$34.0 million and \$16.2 million for the years ended December 31, 2015 and 2014, respectively.

For the years ended December 31, 2015, the Company had no changes to prior accident year losses. In 2014, losses related to prior years resulted in an increase in the loss ratio by 4.0 points. When analyzing loss reserves and prior year development, the Company considers many factors, including the frequency and severity of claims, loss trends, case reserve settlements that may have resulted in significant development, and any other additional or pertinent factors that may impact reserve estimates.

Acquisition Costs and Other Underwriting Expenses

Acquisition costs and other underwriting expenses were \$99.1 million for the year ended December 31, 2015, compared with \$106.1 million for the year ended December 31, 2014, a decrease of \$7.0 million or 6.6%. The decrease is primarily due to impact on underwriting expenses from the acquisition date adjustments to fair value of deferred acquisition costs and intangible assets.

Expense and Combined Ratios

The expense ratio for the Company's Personal Lines was 39.2% for the year ended December 31, 2015, compared with 41.7% for the year ended December 31, 2014. The decrease in the expense ratio is primarily due to impact on underwriting expenses from the acquisition date adjustments to fair value of deferred acquisition costs and intangible assets. The expense ratio is a GAAP financial measure that is calculated by dividing the sum of acquisition costs and other underwriting expenses by net premiums earned.

The combined ratio for the Company's Personal Lines was 104.0% for the year ended December 31, 2015, compared with 102.5% for the year ended December 31, 2014. The combined ratio is a GAAP financial measure and is the sum of the Company's loss and expense ratios. See discussion of loss ratio included in "Net Losses and Loss Adjustment Expenses" above and discussion of expense ratio in preceding paragraph for an explanation of the increase.

Income (loss) from Segment

The factors described above resulted in loss from the Company's Personal Lines of 7.2 million for the year ended December 31, 2015, compared to a loss of \$4.4 million in the year ended December 31, 2014.

Table of Contents**Commercial Lines**

The components of income from the Company's Commercial Lines segment and corresponding underwriting ratios are as follows:

(Dollars in thousands)	Years Ended December 31,		Increase / (Decrease)	
	2015	2014	\$	%
Gross premiums written	\$ 214,218	\$ 229,978	\$ (15,760)	(6.9%)
Net premiums written	\$ 197,526	\$ 212,965	\$ (15,439)	(7.2%)

Net losses and loss adjustment expenses	97,530	117,586

Table of Contents

- (1) Includes excise tax of \$1,051 and \$1,114 related to cessions from the Company's Commercial Lines to its Reinsurance Operations for 2015 and 2014, respectively.
- (2) This is a non-GAAP ratio that excludes the impact of prior accident year adjustments. The most directly comparable GAAP measure is the combined ratio.
- (3) This is a non-GAAP ratio that excludes the impact of prior accident year adjustments. The most directly comparable GAAP measure is the loss ratio.
- (4) This is a non-GAAP ratio that excludes the impact of prior accident year adjustments. The most directly comparable GAAP measure is the property loss ratio.
- (5) This is a non-GAAP ratio that excludes the impact of prior accident year adjustments. The most directly comparable GAAP measure is the non-catastrophe property loss ratio.
- (6) This is a non-GAAP measure that excludes the impact of prior accident year adjustments. The most directly comparable GAAP measure is the non-catastrophe property losses.
- (7) This is a non-GAAP ratio that excludes the impact of prior accident year adjustments. The most directly comparable GAAP measure is the catastrophe loss ratio.
- (8) This is a non-GAAP measure that excludes the impact of prior accident year adjustments. The most directly comparable GAAP measure is the catastrophe losses.
- (9) This is a non-GAAP ratio that excludes the impact of prior accident year adjustments. The most directly comparable GAAP measure is the casualty loss ratio.
- (10) This is a non-GAAP measure that excludes the impact of prior accident year adjustments. The most directly comparable GAAP measure is the net losses and loss adjustment expenses.
- (11) The Company's management believes that this non-GAAP ratio or measure is useful to investors when evaluating the Company's underwriting performance as trends in the Company's Commercial Lines may be obscured by prior accident year adjustments. This non-GAAP ratio or measure should not be considered as a substitute for its most directly comparable GAAP measure and does not reflect the overall underwriting profitability of the Company.

Premiums

The Company's Commercial Lines' gross written, net written, and net earned premiums by product line are as follows:

(Dollars in thousands)	Year Ended December 31, 2015			Year Ended December 31, 2014		
	Gross Written	Net Written	Net Earned	Gross Written	Net Written	Net Earned
Small Business Binding Authority	\$ 112,339	\$ 107,615	\$ 108,203	\$ 122,387	\$ 116,510	\$ 109,222
Property Brokerage Programs	40,178	33,012	33,647	40,822	35,100	33,297
Other	57,676	53,050	53,000	61,225	56,379	56,114
	4,025	3,849	4,454	5,544	4,976	12,532
Total	\$ 214,218	\$ 197,526	\$ 199,304	\$ 229,978	\$ 212,965	\$ 211,165

Gross premiums written were \$214.2 million for 2015, compared with \$230.0 million for 2014, a decrease of \$15.8 million or 6.9%. The decrease is the result of underwriting actions taken to improve profitability.

Net premiums written were \$197.5 million for 2015, compared with \$213.0 million for 2014, a decrease of \$15.4 million or 7.2%. The decrease was primarily due to the reduction in gross premiums written as noted above. The ratio of net premiums written to gross premiums written was 92.2% for 2015 and 92.6% for 2014, a decrease of 0.4%.

Net premiums earned were \$199.3 million for 2015, compared with \$211.2 million for 2014, a decrease of \$11.9 million or 5.6%. The decline in net premiums earned was primarily due to a reduction of gross premiums written as noted above. Property net premiums earned for 2015 and 2014 were \$119.4 million and \$126.6 million, respectively. Casualty net premiums earned for 2015 and 2014 were \$79.9 million and \$84.5 million, respectively.

Table of Contents

Other Income

Other income was \$0.6 million for each of the years ended December 31, 2015 and 2014, respectively. Other income is primarily comprised of fee income.

Net Losses and Loss Adjustment Expenses

Net losses and loss adjustment expenses were \$97.5 million for 2015, compared with \$117.6 million for 2014, a decrease of \$20.1 million or 17.1%. Excluding the impact of prior year adjustments, the current accident year net losses and loss adjustment expenses were \$123.2 million and \$130.1 million for the years ended December 31, 2015 and 2014, respectively. This decrease is primarily attributable to underwriting actions taken to reduce exposure in the commercial automobile book. In addition, catastrophe losses are lower in 2015 due to a decrease in the severity of the storms compared to 2014.

The loss ratio for the Company's Commercial Lines was 48.9% for 2015 compared with 55.7% for 2014.

The current accident year loss ratio increased 0.2 points to 61.8 in 2015 from 61.6% in 2014.

The current accident year property loss ratio increased 3.5 points from 51.8% in 2014 to 55.3% in 2015.

The non-catastrophe property loss ratio increased 5.3 points from 40.8% in 2014 to 46.1% in 2015 which is mainly attributable to one large fire loss in Florida. Non-catastrophe property losses were \$55.1 million and \$51.7 million for the years ended December 31, 2015 and 2014, respectively.

The catastrophe loss ratio decreased 1.8 points from 11.0% in 2014 to 9.2% in 2015. Catastrophe losses were \$11.0 million and \$14.0 million for the years ended December 31, 2015 and 2014, respectively.

The current accident year casualty loss ratio decreased 4.8 points from 76.2% in 2014 to 71.4% in 2015. During the last several years, rates were increased and unprofitable business was not renewed contributing to this improvement.

In 2015, the Company reduced its prior accident year loss reserves by \$25.6 million, which primarily consisted of the following:

General Liability: A \$20.4 million reduction in aggregate with \$5.9 million of favorable development in the construction defect reserve category and \$14.5 million of favorable development in the other general liability reserve categories. In the construction defect reserve category, a reduction in both claims frequency and severity was observed across several accident years which contributed to the recognition of favorable development primarily in accident years 2008 through 2014. For general liability excluding construction defect, lower than expected claims severity was experienced across multiple accident years leading to the recognition of favorable development in accident years 2004 through 2014.

Professional: A \$6.2 million decrease in aggregate primarily related to better than anticipated claims frequency and severity in accident years 2006 through 2011.

In 2014, the Company reduced its prior accident year loss reserves by \$12.5 million, which primarily consisted of the following:

Property: A \$2.1 million increase due to higher than expected emergence on non-catastrophe claims primarily in accident years 2007, 2012, and 2013.

General Liability: A \$3.1 million reduction due to less than anticipated frequency in accident year 2001 and less than anticipated frequency and severity on claims from accident years 2007 through 2010 partially offset by greater than anticipated loss emergence in accident year 2013.

Table of Contents

Asbestos and Environmental: A \$7.1 million increase related to policies written prior to 1990 as a result of recent severity being higher than expected due to faster erosion of underlying policy limits.

Professional: A \$19.4 million reduction primarily due to expected loss emergence being much less than anticipated for accident years 2007 through 2011.

Umbrella: A \$2.7 million decrease primarily driven by less than anticipated frequency in accident years 2002 through 2007.

Commercial Auto: A \$3.6 million increase primarily related to accident years 2011 through 2013. Larger vehicles were written prior to 2014 and industry loss development factors were used to project losses.

Acquisition Costs and Other Underwriting Expenses

Acquisition costs and other underwriting expenses were \$83.2 million for 2015, compared with \$89.0 million for 2014, a decrease of \$5.8 million or 6.5%. This decrease is primarily due to certain costs which were allocated solely to Commercial Lines in 2014 now being allocated to both Commercial Lines and Personal Lines. In addition, commission expense is slightly lower due to a reduction in net premiums earned as noted above.

Expense and Combined Ratios

The expense ratio for the Company's Commercial Lines was 41.7% for 2015, compared with 42.1% for 2014. This decrease is primarily due to certain costs which were allocated solely to Commercial Lines in 2014 now being allocated to both Commercial Lines and Personal Lines.

The combined ratio for the Company's Commercial Lines was 90.6% for 2015, compared with 97.8% for 2014. Excluding the impact of prior accident year adjustments, the current accident year combined ratio decreased from 103.7% in 2014 to 103.5% in 2015. See discussion of loss ratio included in *Net Losses and Loss Adjustment Expenses* above and discussion of expense ratio in preceding paragraph above for an explanation of this decrease.

Income from Segment

The factors described above resulted in income from the Company's Commercial Lines of \$19.2 million for 2015, compared with income of \$5.2 million for 2014, an improvement of \$14.0 million.

Table of Contents**Reinsurance Operations**

The components of income from the Company's Reinsurance Operations segment and corresponding underwriting ratios are as follows:

(Dollars in thousands)	Years Ended December 31,		Increase / (Decrease)	
	2015	2014	\$	%
Gross premiums written	\$ 49,733	\$ 61,275	\$ (11,542)	(18.8%)

Loss ratio excluding the effect of prior accident year (2) (4)	44.3	41.7		
Effect of prior accident year	(17.5)	(6.9)		
Loss ratio	26.8	34.8		
Net losses and loss adjustment expenses excluding the effects of prior accident year (3) (4)	22,922	23,917		
Effect of prior accident year	(9,070)	(3,942)		
Net losses and loss adjustment expenses	13,852	19,975		

(1) This is a non-GAAP ratio that excludes the impact of prior accident year adjustments. The most directly comparable GAAP measure is the combined ratio.

(2)

Edgar Filing: Global Indemnity plc - Form 10-K

This is a non-GAAP ratio that excludes the impact of prior accident year adjustments. The most directly comparable GAAP measure is the loss ratio.

- (3) This is a non-GAAP measure that excludes the impact of prior accident year adjustments. The most directly comparable GAAP measure is the net losses and loss adjustment expenses.
- (4) The Company's management believes that this non-GAAP ratio or measure is useful to investors when evaluating the Company's underwriting performance as trends in the Company's reinsurance operations may be obscured by prior accident year adjustments. This non-GAAP ratio or measure should not be considered as a substitute for its most directly comparable GAAP measure and does not reflect the overall underwriting profitability of the Company.

Table of Contents

Premiums

Gross premiums written were \$49.7 million for 2015, compared \$61.3 million for 2014, a decrease of \$11.5 million or 18.8%. This decrease is mainly due to competition in the property catastrophe reinsurance marketplace. The market is still very competitive due to excess capital resulting in property rates declining and smaller portfolios. One of the treaties was non-renewed in 2016 to reduce catastrophe exposure. In addition, due to the nature of the property catastrophe reinsurance marketplace, gross written premiums within the Companies' Reinsurance Operations might continue to decline in 2016.

Net premiums written were \$49.7 million for 2015, compared with \$60.2 million for 2014, a decrease of \$10.5 million or 17.5%. This decrease is due to a decline in gross premiums written as noted above.

Net premiums earned were \$51.8 million for 2015, compared with \$57.4 million for 2014, a decrease of \$5.6 million or 9.7%. The decrease is primarily due to a decline in gross premiums written as noted above. Property net premiums earned for 2015 and 2014 were \$49.5 million and \$55.3 million, respectively. Casualty net premiums earned for 2015 and 2014 were \$2.3 million and \$2.0 million, respectively.

Other Loss

The Company recognized an other loss of less than \$0.1 million for both 2015 and 2014. Other loss is comprised of foreign exchange gains and losses.

Net Losses and Loss Adjustment Expenses

Net losses and loss adjustment expenses were \$13.9 million for 2015, compared with \$20.0 million for 2014, a decrease of \$6.1 million or 30.7%. Excluding the impact of prior year adjustments, the current accident year net losses and loss adjustment expenses decreased from \$23.9 million for 2014 to \$22.9 million for 2015.

The loss ratio for the Company's Reinsurance Operations was 26.8% for 2015 compared with 34.8% for 2014.

The current accident year loss ratio increased 2.6 points from 41.7% for 2014 to 44.3% for 2015 primarily due to slightly higher premium volume in professional lines which generally has a higher loss ratio than property as well as increased marine property losses due to the Tianjin explosion in China.

There was a decrease in net losses and loss adjustment expenses for prior accident years of \$9.1 million in 2015 which decreased the loss ratio by 17.5 points compared to a decrease in net losses and loss adjustment expenses for prior accident years of \$3.9 million in 2014 which decreased the loss ratio by 6.9 points.

The \$9.1 million decrease in prior accident year loss reserves in 2015 was driven by \$6.8 million of favorable development in property primarily from accident years 2011 through 2014 and \$2.8 million of favorable development in the marine product primarily from accident years 2010 and 2011, partially offset by adverse development of \$1.0 million in workers compensation primarily due to accident year 2010. Ultimate losses from quota share underwriting years 2013 & prior were booked to the amount reported from cedants and reserve releases on legacy contracts due to better than anticipated case incurred emergence led to the recognition of favorable development.

The \$3.9 million decrease in prior accident year loss reserves in 2014 was primarily due to better than anticipated loss emergence on property lines partially offset by adverse development related to commercial auto and higher than anticipated severity on the Company's marine product.

Table of Contents***Acquisition Costs and Other Underwriting Expenses***

Acquisition costs and other underwriting expenses were \$19.0 million for 2015, compared with \$20.6 million for 2014, a decrease of \$1.6 million or 8.0%. The decrease is primarily due to a lower premium base and a reduction in contingent commissions due to lower reserve release on contracts with contingent commission.

Expense and Combined Ratios

The expense ratio for the Company's Reinsurance Operations was 36.7% for 2015, compared with 36.0% for 2014. The increase is primarily due to consulting fees incurred and bonuses awarded during 2015 offset by a reduction in current accident year contingent commissions due to lower premium earned on one of the property catastrophe contracts.

The combined ratio for the Company's Reinsurance Operations was 63.5% for 2015, compared 70.8% for 2014. Excluding the impact of prior accident year adjustments, the combined current accident year ratio increased from to 77.7% in 2014 to 81.0% in 2015. See discussion of loss ratio included in "Net Losses and Loss Adjustment Expenses" above and discussion of expense ratio in preceding paragraph above for an explanation of this increase.

Income from Segment

The factors described above resulted in income from the Company's Reinsurance Operations of \$18.9 million in 2015, compared to \$16.7 million in 2014, an increase of \$2.2 million or 13.0%.

Unallocated Corporate Items

The following items are not allocated to the Company's Commercial Lines, Personal Lines, or Reinsurance Operations segments:

(Dollars in thousands)	Year Ended December 31,		Increase / (Decrease)	
	2015	2014	\$	%
Net investment income	\$ 34,609	\$ 28,821	\$ 5,788	20.1%
Net realized investment gains (losses)	(3,374)	35,860	(39,234)	(109.4%)
Corporate and other operating expenses	(24,448)	(14,559)	9,889	67.9%
Interest expense	(4,913)	(822)	4,091	497.7%
Income tax (expense) benefit	8,723	(8,338)	(17,061)	(204.6%)

Net Investment Income

Net investment income, which is gross investment income less investment expenses, was \$34.6 million for 2015, compared with \$28.8 million for 2014, an increase of \$5.8 million or 20.1%.

Gross investment income, which excludes realized gains and losses, was \$37.9 million for 2015, compared with \$32.4 million for 2014, an increase of \$5.5 million or 17.0%. The increase was primarily due to the acquisition of American Reliable.

Investment expenses were \$3.3 million for 2015, compared with \$3.6 million for 2014, a decrease of \$0.3 million or 8.1%. The decrease is primarily due to a reduction of the Company's equity portfolio during 2014.

As of December 31, 2015, the Company held agency mortgage-backed securities with a book value of \$100.4 million. Excluding the agency mortgage-backed securities, the average duration of the Company's fixed maturities portfolio was 2.4 years as of December 31, 2015, compared with 2.0 years as of December 31, 2014.

Table of Contents

Including cash and short-term investments, the average duration of the Company's fixed maturities portfolio, excluding agency mortgage-backed securities was 2.3 years as of December 31, 2015, compared with 1.9 years as of December 31, 2014. Changes in interest rates can cause principal payments on certain investments to extend or shorten which can impact duration. At December 31, 2015, the Company's embedded book yield on its fixed maturities, not including cash, was 2.2% compared with 2.1% at December 31, 2014. As of December 31, 2015, the Company's investment portfolio held \$93.5 million in tax-free municipal bonds with an embedded book yield of 2.7% compared with an embedded book yield of 3.3% on \$69.5 million in tax-free municipal bonds as of December 31, 2014.

Net Realized Investment Gains (Losses)

Net realized investment losses were \$3.4 million for 2015, compared with a net realized investment gains of \$35.9 million for 2014. The net realized investment loss for 2015 consist primarily of net gains of \$1.4 million related to the Company's fixed maturities and \$9.5 million related to its equity securities, offset by losses of \$7.0 million related to its interest rate swaps and other than temporary impairment losses of \$7.3 million. The net realized investment gains for 2014 consist primarily of net gains of \$2.2 million related to the Company's fixed maturities and \$55.0 million related to its equity securities, offset by losses of \$20.8 million related to its interest rate swaps and other than temporary impairment losses of \$0.5 million.

See Note 4 of the notes to the consolidated financial statements in Item 8 of Part II of this report for an analysis of total investment return on a pre-tax basis for the years ended December 31, 2015, 2014, and 2013.

Corporate and Other Operating Expenses

Corporate and other operating expenses consist of outside legal fees, other professional fees, directors' fees, management fees, salaries and benefits for holding company personnel, development costs for new products, and taxes incurred which are not directly related to operations. Corporate and other operating expenses were \$24.4 million for 2015, compared with \$14.6 million for 2014, an increase of \$9.9 million or 67.9%. The increase is primarily due to incurring costs as a result of the acquisition of American Reliable.

Interest Expense

Interest expense was \$4.9 million for 2015 compared with \$0.8 million for 2014, an increase of \$4.1 million. This is primarily due to the new debt offering in August, 2015 as well as higher balances outstanding under the margin borrowing facilities in 2015 as compared to 2014. See Note 11 of the notes to the consolidated financial statements in Item 8 of Part II of this report for details on the Company's debt.

Income Tax Expense (Benefit)

Income tax benefit was \$8.7 million for 2015 compared with income tax expense of \$8.3 million for 2014. See Note 9 of the notes to the consolidated financial statements in Item 8 of Part II of this report for an analysis of income tax expense (benefit) between periods.

Net Income

The factors described above resulted in net income of \$41.5 million in 2015, compared with net income of \$62.9 million in 2014, a decrease of \$21.4 million.

Year Ended December 31, 2014 Compared with the Year Ended December 31, 2013

Prior to January 1, 2015, the Company did not have a Personal Lines business.

Table of Contents**Commercial Lines**

The components of income from the Company's Commercial Lines segment and corresponding underwriting ratios are as follows:

(Dollars in thousands)	Years Ended December 31,		Increase / (Decrease)	
	2014	2013	\$	%

- (11) The Company's management believes that this non-GAAP ratio or measure is useful to investors when evaluating the Company's underwriting performance as trends in the Company's U.S. Commercial Lines may be obscured by premium deficiency charges. This non-GAAP ratio or measure should not be considered as a substitute for its most directly comparable GAAP measure and does not reflect the overall underwriting profitability of the Company.
- (12) This is a non-GAAP ratio that excludes the impact of prior accident year adjustments. The most directly comparable GAAP measure is the loss ratio.

Table of Contents**Premiums**

The Company's Commercial Lines' gross written, net written, and net earned premiums by product line are as follows:

(Dollars in thousands)	Year Ended December 31, 2014			Year Ended December 31, 2013		
	Gross Written	Net Written	Net Earned	Gross Written	Net Written	Net Earned
Small Business Binding Authority	\$ 122,387	\$ 116,510	\$ 109,222	\$ 110,412	\$ 103,726	\$ 95,070
Property Brokerage	40,822	35,100	33,297	40,313	34,469	30,294
Programs	61,225	56,379	56,114	60,347	55,524	53,094
Other	5,544	4,976	12,532	21,301	19,986	17,844
Total	\$ 229,978	\$ 212,965	\$ 211,165	\$ 232,373	\$ 213,705	\$ 196,302

Gross premiums written, which represents the amount received or to be received for insurance policies written without reduction for reinsurance costs or other deductions, was \$230.0 million for 2014, compared with \$232.4 million for 2013, a decrease of \$2.4 million or 1.0%. The decrease was due to a reduction in other which was primarily due to the culling of unprofitable business within the Company's commercial automobile lines. Excluding commercial automobile, which is included in the other category in the table above, gross written premiums increased by \$13.1 million or 6.1% due to growth in small business driven by both higher retention rates and rate increases.

Net premiums written, which equals gross premiums written less ceded premiums written, was \$213.0 million for 2014, compared with \$213.7 million for 2013, a decrease of \$0.7 million or 0.3%. As noted above, the decrease was primarily due to a reduction in gross premium written for commercial automobile partially offset by an increase in gross written premiums due to growth in small business. The ratio of net premiums written to gross premiums written was 92.6% for 2014 and 92.0% for 2013.

Net premiums earned were \$211.2 million for 2014, compared with \$196.3 million for 2013, an increase of \$14.9 million or 7.6%. The growth in net premiums earned was primarily due to increases in net premiums written within the previous year. Property net premiums earned for 2014 and 2013 were \$126.6 million and \$114.1 million, respectively. Casualty net premiums earned for 2014 and 2013 were \$84.5 million and \$82.2 million, respectively.

Other Income

Other income was \$0.6 million and \$5.8 million for the years ended December 31, 2014 and 2013, respectively. In 2014, other income is primarily comprised of fee income. In 2013, other income is primarily comprised of the net gain on the asset sale of the Company's wholly owned subsidiary, United National Casualty Insurance Company of \$5.2 million and fee income.

Net Losses and Loss Adjustment Expenses

Net losses and loss adjustment expenses were \$117.6 million for 2014, compared with \$116.8 million for 2013, an increase of \$0.7 million or 0.6%. Excluding the impact of prior year adjustments, the current accident year net losses and loss adjustment expenses were \$130.1 million and \$124.5 million for the years ended December 31, 2014 and 2013, respectively. This increase is primarily attributable to growth in earned premium volume, as noted above, as well as an increase in catastrophe losses in 2014.

The loss ratio for the Company's Commercial Lines was 55.7% for 2014 compared with 59.5% for 2013.

The current accident year loss ratio decreased 1.8 points to 61.6% in 2014 from 63.4% in 2013.

The current accident year property loss ratio increased 1.4 points from 50.4% in 2013 to 51.8% in 2014.

Edgar Filing: Global Indemnity plc - Form 10-K

The non-catastrophe property loss ratio decreased 0.8 points from 41.6% in 2013 to 40.8% in 2014. Non-catastrophe property losses were \$51.7 million and \$47.5 million for the years ended December 31, 2014 and 2013, respectively.

Table of Contents

The catastrophe loss ratio increased 2.3 points from 8.7% in 2013 to 11.0% in 2014. Catastrophe losses were \$14.0 million and \$10.0 million for the years ended December 31, 2014 and 2013, respectively.

The current accident year casualty loss ratio decreased 5.3 points from 81.5% in 2013 to 76.2% in 2014. During the last several years, rates were increased and unprofitable business was not renewed contributing to this decrease. In 2014, the Company reduced its prior accident year loss reserves by \$12.5 million, which primarily consisted of the following:

Property: A \$2.1 million increase due to higher than expected emergence on non-catastrophe claims primarily in accident years 2007, 2012, and 2013.

General Liability: A \$3.1 million reduction due to less than anticipated frequency in accident year 2001 and less than anticipated frequency and severity on claims from accident years 2007 through 2010 partially offset by greater than anticipated loss emergence in accident year 2013.

Asbestos and Environmental: A \$7.1 million increase related to policies written prior to 1990 as a result of recent severity being higher than expected due to faster erosion of underlying policy limits.

Professional: A \$19.4 million reduction primarily due to expected loss emergence being much less than anticipated for accident years 2007 through 2011.

Umbrella: A \$2.7 million decrease primarily driven by less than anticipated frequency in accident years 2002 through 2007.

Commercial Auto: A \$3.6 million increase primarily related to accident years 2011 through 2013. Larger vehicles were written prior to 2014 and industry loss development factors were used to project losses. In 2013, the Company reduced its prior accident year loss reserves by \$7.6 million, which primarily consisted of the following:

Property: A \$9.2 million reduction primarily driven by better than expected development from accident years 2010, 2011, and 2012 related primarily to lower than expected non-catastrophe severity.

General Liability: A \$6.7 million reduction primarily due to better than expected emergence in nearly all accident years between 2003 through 2011 partially offset by an increase to accident years 1998 through 2002 and 2012 due to higher than anticipated loss emergence.

Asbestos and Environmental: A \$6.8 million increase primarily related to policies written prior to 1990.

Professional: A \$0.7 million increase primarily driven by \$2.2 million increase in aggregate from unexpected loss emergence in accident years 2006 to 2008 and 2010 offset by \$1.5 million of favorable emergence from accident years 1998 and 2011.

Edgar Filing: Global Indemnity plc - Form 10-K

Umbrella: A \$1.1 million decrease primarily driven by better than expected loss emergence in accident years 2002 to 2010 offset by increases in 2011 and 2012.

Commercial Auto: A \$0.9 million increase primarily related to accident year 2011.

Marine: A \$0.9 million increase primarily related to accident years 2011 and 2012.

Acquisition Costs and Other Underwriting Expenses

Acquisition costs and other underwriting expenses were \$89.0 million for 2014, compared with \$87.4 million for 2013, an increase of \$1.6 million or 1.9%. The increase is primarily due to increased commissions as a result of growth in net premiums earned offset by the impact of the premium deficiency charge recognized in 2013.

Expense and Combined Ratios

The expense ratio for the Company's Commercial Lines was 42.1% for 2014, compared with 44.5% for 2013. The decrease in the expense ratio is primarily due to the growth in earned premium volume as well as the impact of the premium deficiency charge recognized in 2013 as noted above.

Table of Contents

The combined ratio for the Company's Commercial Lines was 97.8% for 2014, compared with 104.0% for 2013. Excluding the impact of prior accident year adjustments, the current accident year combined ratio decreased from 107.9% in 2013 to 103.7% in 2014. See discussion of loss ratio included in Net Losses and Loss Adjustment Expenses above and discussion of expense ratio in preceding paragraph above for an explanation of this decrease.

Income (Loss) from Segment

The factors described above resulted in income from the Company's Commercial Lines of \$5.2 million for 2014, compared with a loss of \$2.1 million for 2013, an improvement of \$7.3 million.

Reinsurance Operations

The components of income from the Company's Reinsurance Operations segment and corresponding underwriting ratios are as follows:

(Dollars in thousands)	Years Ended December 31,		Increase / (Decrease)	
	2014	2013	\$	%
Gross premiums written	\$ 61,275	\$ 58,350	\$ 2,925	5.0%

Premiums

Gross premiums written was \$61.3 million for 2014, compared \$58.4 million for 2013, an increase of \$2.9 million or 5.0%. This increase is mainly due to a change in the Company's quota share participation on several property treaties as well as several new professional liability placements.

Net premiums written was \$60.2 million for 2014, compared with \$58.3 million for 2013, an increase of \$1.9 million or 3.3%. The increase is mainly due to a change in the Company's quota share participation on several property treaties as well as several new professional liability placements.

Net premiums earned were \$57.4 million for 2014, compared with \$52.4 million for 2013, an increase of \$4.9 million or 9.4%. The increase is primarily due to premiums resulting from new treaties written during 2013. Property net premiums earned for 2014 and 2013 were \$55.3 million and \$48.8 million, respectively. Casualty net premiums earned for 2014 and 2013 were \$2.1 million and \$3.6 million, respectively.

Other Income (Loss)

The Company recognized a loss of less than \$0.1 million for both 2014 and 2013. Other income or loss is comprised of foreign exchange gains and losses.

Net Losses and Loss Adjustment Expenses

Net losses and loss adjustment expenses were \$20.0 million for 2014, compared with \$16.2 million for 2013, an increase of \$3.8 million or 23.7%. Excluding the impact of prior year adjustments, the current accident year net losses and loss adjustment expenses increased from \$16.4 million for 2013 to \$23.9 million for 2014. This increase is primarily attributable to an increase in net premiums earned and an increase in property line losses as noted above.

The loss ratio for the Company's Reinsurance Operations was 34.8% for 2014 compared with 30.8% for 2013.

The current accident year loss ratio increased 10.4 points from 31.3% for 2013 to 41.7% for 2014 primarily due to an increase in losses for property lines. The property lines current accident year loss ratio increased to 39.7% for 2014 from 28.7% for 2013.

There was a decrease in net losses and loss adjustment expenses for prior accident years of \$3.9 million in 2014 which decreased the loss ratio by 6.9 points compared to a decrease in net losses and loss adjustment expenses for prior accident years of \$0.3 million in 2013 which decreased the loss ratio by 0.5 points.

Table of Contents

In 2014, the Company decreased its prior accident year loss reserves for its Reinsurance Operations by \$3.9 million primarily due to better than anticipated loss emergence on property lines partially offset by adverse development related to commercial auto and higher than anticipated severity on the Company's marine product.

In 2013, the Company decreased its prior accident year loss reserves by \$0.3 million primarily due to better than anticipated loss emergence on property lines partially offset by adverse development on director and officer, general liability, automobile, and marine.

Acquisition Costs and Other Underwriting Expenses

Acquisition costs and other underwriting expenses were \$20.6 million for 2014, compared with \$18.3 million for 2013, an increase of \$2.3 million or 12.8%. The increase is primarily due to higher commission expense as a result of growth in premiums earned in 2014 as well as increased profit commission charges due to a reduction of prior accident year loss reserves for property. These increases were offset by a reduction in current accident year contingent commissions as a result of higher losses on one of the property catastrophe contracts.

Expense and Combined Ratios

The expense ratio for the Company's Reinsurance Operations was 36.0% for 2014, compared with 34.9% for 2013. The increase is mainly related to an increase in profit commission charges as a result of reduction of prior accident year loss reserves for property offset by a reduction in current accident year contingent commissions due to higher losses on one of the property catastrophe contracts.

The combined ratio for the Company's Reinsurance Operations was 70.8% for 2014, compared 65.7% for 2013. Excluding the impact of prior accident year adjustments, the combined current accident year ratio increased from to 66.2% in 2013 to 77.7% in 2014. See discussion of loss ratio included in Net Losses and Loss Adjustment Expenses above and discussion of expense ratio in preceding paragraph above for an explanation of this increase.

Income from Segment

The factors described above resulted in income from the Company's Reinsurance Operations of \$16.7 million in 2014, compared to \$18.0 million in 2013, a decrease of \$1.3 million.

Unallocated Corporate Items

The following items are not allocated to the Company's Commercial Lines, Personal Lines, or Reinsurance Operations segments:

(Dollars in thousands)	Year Ended December 31,		Increase / (Decrease)	
	2014	2013	\$	%
Net investment income	\$ 28,821	\$ 37,209	\$ (8,388)	(22.5%)
Net realized investment gains	35,860	27,412	8,448	30.8%
Corporate and other operating expenses	(14,559)	(11,614)	2,945	25.4%
Interest expense	(822)	(6,169)	(5,347)	(86.7%)
Income tax (expense) benefit	(8,338)	(1,019)	7,319	718.3%

Table of Contents

Net Investment Income

Net investment income, which is gross investment income less investment expenses, was \$28.8 million for 2014, compared with \$37.2 million for 2013, a decrease of \$8.4 million or 22.5%.

Gross investment income, which excludes realized gains and losses, was \$32.4 million for 2014, compared with \$41.4 million for 2013, a decrease of \$9.0 million or 21.7%. The decrease was primarily due to the redemption of the Company's corporate loans portfolio during the first quarter of 2014 and lower reinvestment yields.

Investment expenses were \$3.6 million for 2014, compared with \$4.2 million for 2013, a decrease of \$0.6 million or 13.9%. The decrease is primarily due to the sale of the corporate loan portfolio and a reduction in trust fees which is partially offset by an increase in internal management fees.

As of December 31, 2014, the Company held agency mortgage-backed securities with a book value of \$156.3 million. Excluding the agency mortgage-backed securities, the average duration of the Company's fixed maturities portfolio was 2.0 years as of December 31, 2014, compared with 1.9 years as of December 31, 2013. Including cash and short-term investments, the average duration of the Company's fixed maturities portfolio, excluding agency mortgage-backed securities was 1.9 years as of December 31, 2014 and December 31, 2013. Changes in interest rates can cause principal payments on certain investments to extend or shorten which can impact duration. At December 31, 2014, the Company's embedded book yield on its fixed maturities, not including cash, was 2.1% compared with 2.6% at December 31, 2013. As of December 31, 2014, the Company's investment portfolio held \$69.5 million in tax-free municipal bonds with an embedded book yield of 3.3% compared with an embedded book yield of 3.0% on \$98.7 million in tax-free municipal bonds as of December 31, 2013.

Net Realized Investment Gains

Net realized investment gains were \$35.9 million for 2014, compared with \$27.4 million for 2013. The net realized investment gains for 2014 consist primarily of net gains of \$2.2 million related to the Company's fixed maturities and \$55.0 million related to its equity securities, offset by losses of \$20.8 million related to its interest rate swaps and other than temporary impairment losses of \$0.5 million. The net realized investment gains for 2013 consist primarily of net gains of \$1.4 million related to the Company's fixed maturities, \$25.8 million related to its equity securities, and \$1.4 million related to its interest rate swaps, offset by other than temporary impairment losses of \$1.2 million.

See Note 4 of the notes to the consolidated financial statements in Item 8 of Part II of this report for an analysis of total investment return on a pre-tax basis for the years ended December 31, 2014 and 2013.

Corporate and Other Operating Expenses

Corporate and other operating expenses consist of outside legal fees, other professional fees, directors' fees, management fees, salaries and benefits for holding company personnel, development costs for new products, and taxes incurred which are not directly related to operations. Corporate and other operating expenses were \$14.6 million for 2014, compared with \$11.6 million for 2013, an increase of \$2.9 million or 25.4%. The increase is primarily due to incurring cost of approximately \$3.4 million in connection with the acquisition of American Reliable offset by a reduction in salary expense of \$0.7 million.

Interest Expense

Interest expense was \$0.8 million and \$6.2 million for 2014 and 2013, respectively. This reduction was primarily due to the repayment of the Company's senior notes payable and junior subordinated debentures in 2013. See Note 11 of the notes to the consolidated financial statements in Item 8 of Part II of this report for details on the Company's debt.

Table of Contents

Income Tax Expense (Benefit)

Income tax expense was \$8.3 million and \$1.0 million for 2014 and 2013, respectively. See Note 9 of the notes to the consolidated financial statements in Item 8 of Part II of this report for an analysis of income tax expense between periods.

Net Income (Loss)

The factors described above resulted in net income of \$62.9 million in 2014, compared with net income of \$61.7 million in 2013, an increase of \$1.2 million.

Liquidity and Capital Resources

Sources and Uses of Funds

Global Indemnity is a holding company. Its principal asset is its ownership of the shares of its direct and indirect subsidiaries, including those of its U.S. insurance companies: United National Insurance Company, Diamond State Insurance Company, United National Specialty Insurance Company, Penn-America Insurance Company, Penn-Star Insurance Company, Penn-Patriot Insurance Company, and American Reliable Insurance Company; and its Reinsurance Operations: Global Indemnity Reinsurance.

The principal sources of cash that Global Indemnity needs to meet its short term and long term liquidity needs, including the payment of corporate expenses, debt service payments, and share repurchases, includes dividends, other permitted disbursements from its direct and indirect subsidiaries, reimbursement for equity awards granted to employees and intercompany borrowings. The principal sources of funds at these direct and indirect subsidiaries include underwriting operations, investment income, and proceeds from sales and redemptions of investments. Funds are used principally by these operating subsidiaries to pay claims and operating expenses, to make debt payments, fund margin requirements on interest rate swap agreements, to purchase investments, and to make dividend payments. The future liquidity of Global Indemnity is dependent on the ability of its subsidiaries to pay dividends.

On August 12, 2015, the Company issued \$100.0 million in aggregate principal amount of its 2045 Subordinated Notes through an underwritten public offering. The notes bear interest at an annual rate equal to 7.75%, payable quarterly in arrears on February 15, May 15, August 15, and November 15 of each year, commencing November 15, 2015. The notes mature on August 15, 2045. The Company has the right to redeem the notes in \$25 increments, in whole or in part, on and after August 15, 2020, or on any interest payment date thereafter, at a redemption price equal to 100% of the principal amount of the notes being redeemed plus accrued and unpaid interest to, but not including, the date of redemption. See note 11 of the notes to the consolidated financial statements in Item 8 of Part II of this report for additional information on the 2045 Subordinated Notes.

On October 29, 2015, Global Indemnity entered into a redemption agreement with certain affiliates of Fox Paine & Company and agreed to redeem 8,260,870 of its ordinary shares for \$190 million in the aggregate from affiliates of Fox Paine & Company. Global Indemnity also acquired rights, expiring December 31, 2019, to redeem an additional 3,397,031 ordinary shares for \$78.1 million, which is subject to an annual 3% increase. Other than these redemption requirements and the Company's debt service payments as noted above, Global Indemnity has no commitments that could have a material impact on its short-term or long-term liquidity needs.

Global Indemnity's U.S. insurance companies are restricted by statute as to the amount of dividends that they may pay without the prior approval of regulatory authorities. The dividend limitations imposed by state laws are based on the statutory financial results of each insurance company within the Insurance Operations that are determined by using statutory accounting practices that differ in various respects from accounting principles used in financial statements prepared in conformity with GAAP. See Regulation Statutory Accounting Principles. Key differences relate to, among other items, deferred acquisition costs, limitations on deferred income taxes, reserve calculation assumptions and surplus notes.

Table of Contents

Under Indiana law, Diamond State Insurance Company may not pay any dividend or make any distribution of cash or other property, the fair market value of which, together with that of any other dividends or distributions made within the 12 consecutive months ending on the date on which the proposed dividend or distribution is scheduled to be made, exceeds the greater of (1) 10% of its surplus as of the 31st day of December of the last preceding year, or (2) its net income for the 12 month period ending on the 31st day of December of the last preceding year, unless the commissioner approves the proposed payment or fails to disapprove such payment within 30 days after receiving notice of such payment. An additional limitation is that Indiana does not permit a domestic insurer to declare or pay a dividend except out of unassigned surplus unless otherwise approved by the commissioner before the dividend is paid.

Under Pennsylvania law, United National Insurance Company, Penn-America Insurance Company, and Penn-Star Insurance Company may not pay any dividend or make any distribution that, together with other dividends or distributions made within the preceding 12 consecutive months, exceeds the greater of (1) 10% of its surplus as shown on its last annual statement on file with the commissioner or (2) its net income for the period covered by such statement, not including pro rata distributions of any class of its own securities, unless the commissioner has received notice from the insurer of the declaration of the dividend and the commissioner approves the proposed payment or fails to disapprove such payment within 30 days after receiving notice of such payment. An additional limitation is that Pennsylvania does not permit a domestic insurer to declare or pay a dividend except out of unassigned funds (surplus) unless otherwise approved by the commissioner before the dividend is paid. Furthermore, no dividend or other distribution may be declared or paid by a Pennsylvania insurance company that would reduce its total capital and surplus to an amount that is less than the amount required by the Insurance Department for the kind or kinds of business that it is authorized to transact. Pennsylvania law allows loans to affiliates up to 10% of statutory surplus without prior regulatory approval.

Under Virginia law, Penn-Patriot Insurance Company may not pay any dividend or make any distribution of cash or other property, the fair market value of which, together with that of any other dividends or distributions made within the preceding 12 consecutive months exceeds the lesser of either (1) 10% of its surplus as of the 31st day of December of the last preceding year, or (2) its net income, not including net realized capital gains, for the 12 month period ending on the 31st day of December of the last preceding year, not including pro rata distributions of any class of its securities, unless the commissioner approves the proposed payment or fails to disapprove such payment within 30 days after receiving notice of such payment. In determining whether the dividend must be approved, undistributed net income from the second and third preceding years, not including net realized capital gains, may be carried forward.

Under Wisconsin law, United National Specialty Insurance Company may not pay any dividend or make any distribution of cash or other property, other than a proportional distribution of its stock, the fair market value of which, together with that of other dividends paid or credited and distributions made within the preceding 12 months, exceeds the lesser of (1) 10% of its surplus as of the preceding 31st day of December, or (2) the greater of (a) its net income for the calendar year preceding the date of the dividend or distribution, minus realized capital gains for that calendar year or (b) the aggregate of its net income for the three calendar years preceding the date of the dividend or distribution, minus realized capital gains for those calendar years and minus dividends paid or credited and distributions made within the first two of the preceding three calendar years, unless it reports the extraordinary dividend to the commissioner at least 30 days before payment and the commissioner does not disapprove the extraordinary dividend within that period. Additionally, under Wisconsin law, all authorizations of distributions to shareholders, other than stock dividends, shall be reported to the commissioner in writing and no payment may be made until at least 30 days after such report.

Under Arizona law, American Reliable Insurance Company may not pay any dividend or make any distribution of cash or other property, the fair market value of which, together with that of any other dividends or distributions made within the preceding 12 months exceeds the lesser of either (1) 10% of its surplus as of the 31st day of December of the last preceding year, or (2) its net income for the 12 month period ending on the 31st day of December of the last preceding year, not including pro rata distributions of any class of its securities, unless the commissioner approves the proposed payment or fails to disapprove such payment within 30 days after receiving notice of such payment.

Table of Contents

See Note 18 of the notes to consolidated financial statements in Item 8 of Part II of this report for the dividends declared and paid by Global Indemnity's U.S. insurance companies in 2015 and the maximum amount of distributions that U.S. insurance companies could pay as dividends in 2016.

Global Indemnity Reinsurance is prohibited, without the approval of the BMA, from reducing by 15% or more its total statutory capital as set out in its previous year's statutory financial statements, and any application for such approval must include such information as the BMA may require. Based upon the total statutory capital plus the statutory surplus as set out in its 2015 statutory financial statements that will be filed in 2016, the Company believes Global Indemnity Reinsurance could pay a dividend of up to \$234.8 million without requesting BMA approval. Global Indemnity Reinsurance did not declare or pay any dividends during 2015. For 2016, the Company believes that Global Indemnity Reinsurance, including distributions it could receive from its subsidiaries, should have sufficient liquidity and solvency to pay dividends.

Surplus Levels

Global Indemnity's U.S. insurance companies are required by law to maintain a certain minimum level of policyholders' surplus on a statutory basis. Policyholders' surplus is calculated by subtracting total liabilities from total assets. The NAIC has risk-based capital standards that are designed to identify property and casualty insurers that may be inadequately capitalized based on the inherent risks of each insurer's assets and liabilities and mix of net premiums written. Insurers falling below a calculated threshold may be subject to varying degrees of regulatory action. Based on the standards currently adopted, the policyholders' surplus of each of the U.S. insurance companies is in excess of the prescribed minimum company action level risk-based capital requirements.

Cash Flows

Sources of operating funds consist primarily of net premiums written and investment income. Funds are used primarily to pay claims and operating expenses and to purchase investments.

The Company's reconciliation of net income to cash provided from operations is generally influenced by the following:

the fact that the Company collect premiums, net of commission, in advance of losses paid;

the timing of the Company's settlements with its reinsurers; and

the timing of the Company's loss payments.

Net cash provided by (used for) operating activities in 2015, 2014, and 2013 was \$3.8 million, \$12.0 million and \$4.9 million, respectively.

In 2015, the increase in operating cash flows of approximately \$15.8 million from the prior year was primarily a net result of the following items:

	2015	2014	Change
Net premiums collected	\$ 527,123	\$ 255,053	\$ 272,070
Net losses paid	(336,316)	(169,386)	(166,930)
Underwriting and corporate expenses	(229,738)	(121,302)	(108,436)
Net investment income	46,709	38,298	8,411
Net federal income taxes recovered (paid)	(102)	(13,861)	13,759
Interest paid	(3,926)	(804)	(3,122)
Net cash provided by (used for) operating activities	\$ 3,750(1)	\$ (12,002)	\$ 15,752

Table of Contents

(1) The net cash used for operating activities for the year ended December 31, 2015 was negatively impacted in the amount of \$23.8 million due to the commutation of a policy with one of Global Indemnity Reinsurance cedants. The commutation of this policy had no impact on net income.

In 2014, the decrease in operating cash flows of approximately \$7.1 million from the prior year was primarily a net result of the following items:

	2014	2013	Change
Net premiums collected	\$ 255,053	\$ 250,987	\$ 4,066
Net losses paid	(169,386)	(188,690)	19,304
Underwriting and corporate expenses	(121,302)	(111,358)	(9,944)
Net investment income	38,298	44,367	(6,069)
Net federal income taxes recovered (paid)	(13,861)	7,451	(21,312)
Interest paid	(804)	(7,678)	6,874
Net cash used for operating activities	\$ (12,002)	\$ (4,921)	\$ (7,081)

See the consolidated statement of cash flows in the financial statements in Item 8 of Part II of this report for details concerning the Company's investing and financing activities.

Liquidity

Currently, the Company believes each company in its Insurance Operations and Reinsurance Operations maintains sufficient liquidity to pay claims through cash generated by operations and liquid investments. The holding companies also maintain sufficient liquidity to meet their obligations. The Company monitors its investment portfolios to assure liability and investment durations are closely matched.

Prospectively, as fixed income investments mature and new cash is obtained, the cash available to invest will be invested in accordance with the Company's investment policy. The Company's investment policy allows the Company to invest in taxable and tax-exempt fixed income investments as well as publicly traded and private equity investments. With respect to bonds, the Company's credit exposure limit for each issuer varies with the issuer's credit quality. The allocation between taxable and tax-exempt bonds is determined based on market conditions and tax considerations. The fixed income portfolio currently has a duration of 1.99 years which allows the Company to defensively position itself during the current low interest rate environment.

The Company has access to various capital sources including dividends from insurance subsidiaries, invested assets in its non-U.S. subsidiaries, and access to the debt and equity capital markets. The Company believes it has sufficient liquidity to meet its capital needs. See Note 18 of the notes to the consolidated financial statements in Item 8 of Part II of this report for a discussion of the Company's dividend capacity. However, the Company's future capital requirements depend on many factors, including the incurring of significant net catastrophe losses, its ability to write new business successfully and to establish premium rates and reserves at levels sufficient to cover losses. To the extent that the Company needs to raise additional funds, any equity or debt financing for this purpose, if available at all, may be on terms that are not favorable to the Company. If the Company cannot obtain adequate capital, its business, results of operations and financial condition could be adversely affected.

On August 12, 2015, the Company issued Subordinated Notes due in 2045 in the aggregate principal amount of \$100.0 million through an underwritten public offering. See Note 11 of the notes to consolidated financial statements in Item 8 of Part II of this report for additional information on this debt issuance.

On October 29, 2015, Global Indemnity entered into a redemption agreement with certain affiliates of Fox Paine & Company and agreed to redeem 8,260,870 of its ordinary shares for \$190 million in the aggregate from

Table of Contents

affiliates of Fox Paine & Company. Global Indemnity also acquired rights, expiring December 31, 2019, to redeem an additional 3,397,031 ordinary shares for \$78.1 million, which is subject to an annual 3% increase.

In connection with the redemption, the Company sold \$279.9 million of securities from its consolidated investment portfolio during October, 2015. \$102.0 million was used to pay down margin debt which freed up collateral which was used to partially fund the redemption.

Stop Loss Agreement, Quota Share Arrangements and Intercompany Pooling Arrangement

Global Indemnity's U.S. insurance companies, excluding Personal Lines, and Global Indemnity Reinsurance currently participate in a stop loss agreement that provides protection to the U.S. insurance companies, excluding Personal Lines, in a loss corridor from 70% to 90% subject to certain restrictions.

The Company's U.S. insurance companies participate in quota share reinsurance agreements with Global Indemnity Reinsurance whereby 50% of the net retained business of the U.S. insurance companies is ceded to Global Indemnity Reinsurance. These agreements exclude named storms. Global Indemnity Reinsurance is an unauthorized reinsurer. As a result, any losses and unearned premiums that are ceded to Global Indemnity Reinsurance by the U.S. insurance companies must be collateralized. To satisfy this requirement, Global Indemnity Reinsurance has set up custodial trust accounts on behalf of the U.S. insurance companies.

Global Indemnity Reinsurance also has established trust accounts to collateralize exposure it has to third party ceding companies. The Company invests the funds in securities that have durations that closely match the expected duration of the liabilities assumed. The Company believes that Global Indemnity Reinsurance will have sufficient liquidity to pay claims prospectively.

Global Indemnity's U.S. insurance companies participate in an intercompany pooling arrangement whereby premiums, losses, and expenses are shared pro rata amongst the U.S. insurance companies. United National Insurance Company is not an authorized reinsurer in all states. As a result, any losses and unearned premiums that are ceded to United National Insurance Company are collateralized. The state insurance departments that regulate the parties to the intercompany pooling agreements require United National Insurance Company to place assets on deposit subject to trust agreements for the protection of the other members of the U.S. insurance companies.

Capital Resources

On January 18, 2006, U.A.I. (Luxembourg) Investment S.à.r.l. loaned \$6.0 million to United America Indemnity, Ltd. The loan was used to pay operating expenses that arise in the normal course of business. The loan is a demand loan and bears interest at 4.38%. At December 31, 2015, there was \$1.0 million outstanding on this loan with accrued interest of \$1.9 million. United America Indemnity, Ltd. is dependent on its subsidiaries to pay its dividends and operating expenses.

On November 12, 2007, Global Indemnity Reinsurance issued a \$50.0 million demand line of credit to United America Indemnity, Ltd. which bore interest at 5.25%. The proceeds of the line were used to fund purchases of the Company's A ordinary shares as part of two \$50.0 million share buyback programs that were initiated in November 2007 and February 2008, respectively. On February 13, 2008, the demand line of credit was amended. The interest rate was decreased to 3.75% per annum, and the loan amount was increased to \$100.0 million. In June 2008, Global Indemnity Reinsurance declared and paid a dividend of \$50.0 million to United America Indemnity, Ltd. United America Indemnity, Ltd. used proceeds from the dividend to repay a portion of the line of credit. In February, 2010 the line of credit was converted to a non-interest bearing note payable for the full amount of principal and accrued interest to date. In May, 2014, United America Indemnity, Ltd. repaid \$20 million of the outstanding balance due under this note. As of December 31, 2015, there was \$33.0 million outstanding on the note payable.

Table of Contents

U.A.I. (Luxembourg) Investment S.à.r.l. holds two promissory notes in the amounts of \$175.0 million and \$110.0 million and two loans in the amount of \$125.0 million and \$100.0 million from Global Indemnity Group, Inc. The \$175.0 million and \$110.0 million notes bear interest at a rate of 6.64% and 6.20%, respectively, and mature in 2018 and 2020, respectively. The \$125.0 million and the \$100.0 million loan bears interest at 5.78% and 8.06%, respectively, and matures in 2024 and 2045, respectively. Interest on these agreements is paid annually. Other than its investment portfolio, Global Indemnity Group, Inc. has no income producing operations. The ability of Global Indemnity Group, Inc. to generate cash to repay the notes and loan is dependent on dividends that it receives from its subsidiaries or using other assets it holds.

In November, 2011, U.A.I. (Luxembourg) Investment S.à.r.l. issued a \$100.0 million demand line of credit to Global Indemnity (Cayman) Ltd. which bears interest at 1.2%. The proceeds of the line were loaned from Global Indemnity (Cayman) Ltd. to Global Indemnity plc, bearing interest at 1.2%, to fund purchases of the Company's ordinary shares as part of the \$100.0 million share repurchase program announced in September, 2011. In August, 2012, the demand line of credit was increased to \$125.0 million to fund additional purchases under the Company's \$25.0 million share repurchase authorization. In September, 2015, U.A.I. (Luxembourg) Investment S.à.r.l. increased the demand line of credit that it previously issued to Global Indemnity (Cayman) Limited from \$125.0 million to \$225.0 million. As of December 31, 2015, Global Indemnity plc owed Global Indemnity (Cayman) Ltd. \$108.0 million under this arrangement, with accrued interest of \$4.8 million, and Global Indemnity (Cayman) Ltd. had \$181.5 million outstanding on the line of credit with U.A.I. (Luxembourg) Investment S.à.r.l., with accrued interest of \$4.8 million.

In November, 2012, American Insurance Service, Inc. (AIS) issued a \$35.0 million loan to Global Indemnity Reinsurance, bearing interest at the six month London Interbank Offered Rate (LIBOR) plus 3.5%. The proceeds of the loan were used to fund trust accounts in the normal course of business. Effective October 31, 2013, American Insurance Service, Inc. (AIS) assigned all of its rights, obligations, duties, and liabilities under the note to Global Indemnity Group, Inc. As of December 31, 2015, there was \$5.0 million outstanding on the note payable, with accrued interest of \$0.2 million payable to AIS and \$0.8 million payable to Global Indemnity Group, Inc.

The Company has available two margin borrowing facilities. The borrowing rate is tied to LIBOR and was approximately 1.3% as of December 31, 2015. These facilities are due on demand. The borrowings are subject to maintenance margin, which is a minimum account balance that must be maintained. A decline in market conditions could require an additional deposit of collateral. As of December 31, 2015, approximately \$95.6 million in collateral was deposited to support the borrowings. The amount borrowed against the margin accounts may fluctuate as routine investment transactions, such as dividends received, investment income received, maturities and pay-downs, impact cash balances. The margin facilities contains customary events of default, including, without limitation, insolvency, failure to make required payments, failure to comply with any representations or warranties, failure to adequately assure future performance, and failure of a guarantor to perform under its guarantee. The amount outstanding on the Company's margin borrowing facilities was \$75.6 million and \$174.7 million as of December 31, 2015 and 2014, respectively.

On May 12, 2014, Global Indemnity Group, Inc. entered into an agreement to loan \$200 million to Global Indemnity (Cayman) Limited which bears interest at 0.28% and matures in 2017. In December, 2014, Global Indemnity (Cayman) Limited repaid \$125.0 million of the outstanding principal. As of December 31, 2015, Global Indemnity (Cayman) Limited owed \$75.0 million under this loan agreement with accrued interest of \$0.6 million.

In December, 2014, Global Indemnity Group, Inc. declared and paid a dividend of \$125 million to U.A.I. (Luxembourg) Investment S.à.r.l. and U.A.I. (Luxembourg) Investment S.à.r.l. declared and paid a dividend of \$125 million to U.A.I. (Luxembourg) IV S.à.r.l. In accordance with the Luxembourg Treaty, the \$125 million dividend from Global Indemnity Group, Inc. to U.A.I. (Luxembourg) Investment S.à.r.l. was subject to a 5% U.S. withholding tax amounting to \$6.3 million.

Table of Contents

In August, 2015, Global Indemnity plc advanced an interest free loan to Global Indemnity (Cayman) Limited in the amount of \$96.9 million which was repaid during the 4th quarter of 2015.

Global Indemnity (Cayman) Limited made a capital contribution in the amount of \$100.0 million during the fourth quarter of 2015. Through a series of capital contributions, the ultimate recipient of this capital contribution of \$100.0 million was U.A.I. (Luxembourg) IV S.à.r.l. who loaned \$100.0 million to U.A.I. (Luxembourg) Investment S.à.r.l. who loaned \$100.0 million to Global Indemnity Group, Inc.

The Company entered into two \$100 million derivative instruments. Due to declines in interest rates, the Company has paid \$6.6 million and \$20.6 million in connection with these derivative instruments for the years ended December 31, 2015 and 2014, respectively.

Contractual Obligations

The Company has commitments in the form of operating leases, commitments to fund limited partnerships, subordinated notes, and unpaid losses and loss expense obligations. As of December 31, 2015, contractual obligations related to Global Indemnity's commitments, including any principal and interest payments, were as follows:

(Dollars in thousands)	Total	2016	Payment Due by Period		Thereafter
			2017 and 2018	2019 and 2020	
Operating leases (1)	\$ 11,828	\$ 3,263	\$ 6,329	\$ 2,236	\$
Commitments to fund limited partnerships	20,014	20,014			
Subordinated notes due 2045 (2)	330,563	7,750	15,500	15,500	291,813
Unpaid losses and loss adjustment expenses obligations (3)	680,047	233,185	243,296	108,758	94,808
Total	\$ 1,042,452	\$ 264,212	\$ 265,125	\$ 126,494	\$ 386,621

- (1) The Company leases office space and equipment as part of its normal operations. The amounts shown above represent future commitments under such operating leases.
- (2) On August 12, 2015, the Company issued Subordinated Note due in 2045 in the aggregate principal amount of \$100.0 million through an underwritten public offering. The notes bear interest at an annual rate equal to 7.75% payable quarterly. The notes mature on August 15, 2045. The Company has the right to redeem the notes in \$25 increments, in whole or in part, on and after August 15, 2020, or on any interest payments date thereafter, at a redemption price equal to 100% of the principal amount of the notes being redeemed plus accrued and unpaid interest to, but not including, the date of redemption.
- (3) These amounts represent the gross future amounts needed to pay losses and related loss adjustment expenses and do not reflect amounts that are expected to be recovered from the Company's reinsurers. See discussion in Liability for Unpaid Losses and Loss Adjustment Expenses for more details. See note 11 of the notes to the consolidated financial statements in Item 8 of Part II of this report for additional information on the 2045 Subordinated Notes.

Off Balance Sheet Arrangements

The Company has no off balance sheet arrangements.

Inflation

Property and casualty insurance premiums are established before the Company knows the amount of losses and loss adjustment expenses or the extent to which inflation may affect such amounts. The Company attempts to anticipate the potential impact of inflation in establishing its reserves.

Table of Contents

Future increases in inflation could result in future increases in interest rates, which in turn are likely to result in a decline in the market value of the investment portfolio and resulting in unrealized losses and reductions in shareholders' equity.

Cautionary Note Regarding Forward-Looking Statements

Some of the statements under "Business," "Management's Discussion and Analysis of Financial Condition and Results of Operations" and elsewhere in this report may include forward-looking statements within the meaning of Section 21E of the Security Exchange Act of 1934, as amended, that reflect the Company's current views with respect to future events and financial performance. Forward-looking statements are statements that are not historical facts. These statements can be identified by the use of forward-looking terminology such as "believe," "expect," "may," "will," "should," "project," "plan," "seek," "intend," or "anticipate" or the negative thereof or comparable terminology, and include discussions of strategy, financial projections and estimates and their underlying assumptions, statements regarding plans, objectives, expectations or consequences of identified transactions or natural disasters, and statements about the future performance, operations, products and services of the companies.

The Company's business and operations are and will be subject to a variety of risks, uncertainties and other factors. Consequently, actual results and experience may materially differ from those contained in any forward-looking statements. See "Risk Factors" in Item 1A of Part I of this report for risks, uncertainties and other factors that could cause actual results and experience to differ from those projected.

The Company's forward-looking statements speak only as of the date of this report or as of the date they were made. The Company undertake no obligation to publicly update or review any forward-looking statement, whether as a result of new information, future developments or otherwise.

Table of Contents**Item 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK****Market Risk**

Market risk is the risk of economic losses due to adverse changes in the estimated fair value of a financial instrument as the result of changes in interest rates, equity prices, credit risk, illiquidity, foreign exchange rates and commodity prices. The Company's consolidated balance sheet includes the estimated fair values of assets that are subject to market risk. The Company's primary market risks are interest rate risk and credit risks associated with investments in fixed maturities, equity price risk associated with investments in equity securities, and foreign exchange risk associated with premium received that is denominated in foreign currencies. Each of these risks is discussed in more detail below. The Company has no commodity risk.

Interest Rate Risk

The Company's primary market risk exposure is to changes in interest rates. The Company's fixed income investments are exposed to interest rate risk. Fluctuations in interest rates have a direct impact on the market valuation of these securities. As interest rates rise, the market value of the Company's fixed income investments fall, and the converse is also true. The Company seeks to manage interest rate risk through an active portfolio management strategy that involves the selection, by the Company's managers, of investments with appropriate characteristics, such as duration, yield, currency, and liquidity that are tailored to the anticipated cash outflow characteristics of the Company's liabilities. The Company's strategy for managing interest rate risk also includes maintaining a high quality bond portfolio with a relatively short duration to reduce the effect of interest rate changes on book value. A significant portion of the Company's investment portfolio matures each year, allowing for reinvestment at current market rates.

As of December 31, 2015, assuming identical shifts in interest rates for securities of all maturities, the table below illustrates the sensitivity of market value in Global Indemnity's bonds to selected hypothetical changes in basis point increases and decreases:

Basis Point Change	(Dollars in thousands)		Change in Market Value	
	Market Value	\$	%	
(200)	\$ 1,338,101	\$ 31,952	2.4%	
(100)	1,329,674	23,525	1.8%	
No change	1,306,149		0.0%	
100	1,282,706	(23,443)	(1.8%)	
200	1,259,209	(46,940)	(3.6%)	

The Company's interest rate swaps are also exposed to interest rate risk. Fluctuations in interest rates have a direct impact on the market valuation of these financial instruments. As interest rates decline, the market value of the Company's interest rate swaps fall, and the converse is also true. Since the Company has designated the interest rate swaps as non-hedge instruments, the changes in the fair value is recognized as net realized investment gains in the consolidated statement of operations. Therefore, changes in interest rates will have a direct impact to the Company's results of operations. In addition, on a daily basis, a margin requirement is calculated. If interest rates decline, the Company is required to pay a margin call equal to the change in the fair market value of the interest rate swap. When interest rates rise, the counterparty is required to pay to the Company a margin call equal to the change in fair market value of the interest rate swap.

Table of Contents

As of December 31, 2015, the table below illustrates the sensitivity of market value of the Company's interest rate swaps as well as the impact on the consolidated statement of operation to selected hypothetical changes in basis point increases and decreases:

(Dollars in thousands)		Change in Market Value and Impact to Consolidated Statement of Income
Basis Point Change	Market Value	
(200)	\$ (48,906)	\$ (33,650)
(100)	(31,371)	(16,115)
No change	(15,256)	
100	(441)	14,815
200	13,182	28,438

Credit Risk

The Company's investment policy requires that its investments in debt instruments are of high credit quality issuers and limit the amount of credit exposure to any one issuer based upon the rating of the security.

As of December 31, 2015, the Company had approximately \$47.7 million worth of investment exposure to subprime and Alt-A investments. As of December 31, 2015, approximately \$46.8 million of those investments have been rated BBB+ to AAA by Standard & Poor's and \$0.9 million were rated below investment grade. As of December 31, 2014, the Company had approximately \$38.7 million worth of investment exposure to subprime and Alt-A investments. As of December 31, 2014, approximately \$38.1 million of those investments have been rated BBB+ to AAA by Standard & Poor's and \$0.6 million were rated below investment grade. There were no impairments recognized on these investments during the years ended December 31, 2015 or 2014.

In addition, the Company has credit risk exposure to its general agencies and reinsurers. The Company seeks to mitigate and control its risks to producers by typically requiring its general agencies to render payments within no more than 45 days after the month in which a policy is effective and including provisions within the Company's general agency contracts that allow it to terminate a general agency's authority in the event of non-payment.

With respect to its credit exposure to reinsurers, the Company seeks to mitigate and control its risk by ceding business to only those reinsurers having adequate financial strength and sufficient capital to fund their obligation. In addition, the Company seeks to mitigate credit risk to reinsurers through the use of trusts and letters of credit for collateral.

Equity Price Risk

In 2015, the strategy for the Company's equity portfolio followed a large cap value approach. This investment style placed primary emphasis on selecting the best relative values from those issues having a projected normalized price-earnings ratio at a discount to the market multiple.

The Company compares the results of the Company's equity portfolio to a customized benchmark which is the S&P 500 Value excluding financials. To protect against equity price risk, the sector exposures within the Company's equity portfolio closely correlate to the sector exposures within the custom benchmark index. In 2015, the Company's common stock portfolio returned a net loss of 6.0%, not including investment advisor fees, compared to the benchmark loss of 3.5%.

The carrying values of investments subject to equity price risk are based on quoted market prices as of the balance sheet dates. Market prices are subject to fluctuation and thus the amount realized in the subsequent sale of an investment may differ from the reported market value. Fluctuation in the market price of an equity security results from perceived changes in the underlying economic makeup of a stock, the price of alternative investments and overall market conditions.

Table of Contents

The Company attempts to mitigate its unsystemic risk, which is the risk that is associated with holding a particular security, by holding a large number of securities in that market. At year end, no security represented more than 4.7% of the market value of the equity portfolio. The Company continues to have systemic risk, which is the risk inherent in the general market due to broad macroeconomic factors that affect all companies in the market.

As of December 31, 2015, the table below summarizes the Company's equity price risk and reflects the effect of a hypothetical 10% and 20% increase or decrease in market prices. The selected hypothetical changes do not indicate what could be the potential best or worst scenarios.

(Dollars in thousands)		
Hypothetical Price Change	Estimated Fair Value after Hypothetical Change in Prices	Hypothetical Percentage Increase (Decrease) in Shareholders Equity(1)
(20%)	\$ 88,252	(1.9%)
(10%)	99,284	(1.0%)
No change	110,315	
10%	121,347	1.0%
20%	132,378	1.9%

(1) Net of 35% tax

Foreign Currency Exchange Risk

The Company has foreign currency exchange risk associated with a portion of the business written at Global Indemnity Reinsurance, as well as a small portion of expenses related to corporate overhead in its Ireland and Luxembourg offices. The Company also maintains investments in foreign denominated securities and cash accounts in foreign currencies in order to pay expenses in foreign countries. At period-end, the Company re-measures those non-U.S. currency financial assets to their current U.S. dollar equivalent. Financial liabilities, if any, are generally adjusted within the reserving process. However, for known losses on claims to be paid in foreign currencies, the Company re-measures the liabilities to their current U.S. dollar equivalent each period end.

Report of Independent Registered Public Accounting Firm

The Board of Directors and

Shareholders of Global Indemnity plc

We have audited the accompanying consolidated balance sheet of Global Indemnity plc and subsidiaries as of December 31, 2015, and the related consolidated statements of operations, comprehensive income, shareholders' equity and cash flows for the year then ended. Our audit also included the financial statement schedules listed in the Index at Item 15. These financial statements and schedules are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and schedules based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Global Indemnity plc and subsidiaries at December 31, 2015, and the consolidated results of their operations and their cash flows for the year then ended in conformity with U.S. generally accepted accounting principles. Also, in our opinion, the related financial statement schedules, when considered in relation to the basic financial statements taken as a whole, present fairly in all material respects the information set forth therein.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Global Indemnity plc's internal control over financial reporting as of December 31, 2015, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework), and our report dated March 14, 2016, expressed an unqualified opinion thereon.

Report of Independent Registered Public Accounting Firm

To the Board of Directors and

Shareholders of Global Indemnity, plc

In our opinion, the consolidated balance sheet as of December 31, 2014 and the related consolidated statements of operations, comprehensive income, changes in shareholders' equity and cash flows for each of two years in the period ended December 31, 2014 present fairly, in all material respects, the financial position of Global Indemnity, plc and its subsidiaries at December 31, 2014, and the results of their operations and their cash flows for each of the two years in the period ended December 31, 2014, in conformity with accounting principles generally accepted in the United States of America. In addition, in our opinion, the financial statement schedule for each of the two years in the period ended December 31, 2014 presents fairly, in all material respects, the information set forth therein when read in conjunction with the related consolidated financial statements. These financial statements and financial statement schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and financial statement schedule based on our audits. We conducted our audits of these statements in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

GLOBAL INDEMNITY PLC

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. Principles of Consolidation and Basis of Presentation

Global Indemnity plc (Global Indemnity or the Company) was incorporated on March 9, 2010 and is domiciled in Ireland. Global Indemnity replaced the Company's predecessor, United America Indemnity, Ltd., as the ultimate parent company as a result of a re-domestication transaction in July, 2010. The Company's A ordinary shares are publicly traded on the NASDAQ Global Select Market under the trading symbol GBLI.

Starting in the 1st quarter of 2015, the Company manages its business through three reportable business segments: Commercial Lines, Personal Lines, and Reinsurance Operations. The Company's Commercial Lines, managed in Bala Cynwyd, PA, offers specialty property and casualty insurance products in the excess and surplus lines marketplace. The Company manages its Commercial Lines by differentiating them into three product classifications: Penn-America, which markets property and general liability products to small commercial businesses through a select network of wholesale general agents with specific binding authority; United National, which markets insurance products for targeted insured segments, including specialty products, such as property, general liability, and professional lines through program administrators with specific binding authority; and Diamond State, which markets property, casualty, and professional lines products, which are developed by the Company's underwriting department by individuals with expertise in those lines of business, through wholesale brokers and also markets through program administrators having specific binding authority. These product classifications comprise the Company's Commercial Lines business segment and are not considered individual business segments because each product has similar economic characteristics, distribution, and coverage. The Company's Personal Lines segment, via the American Reliable product classification, offers specialty personal lines and agricultural coverage through general and specialty agents with specific binding authority on an admitted basis and is managed in Scottsdale, AZ. Collectively, the Company's U.S. insurance subsidiaries are licensed in all 50 states and the District of Columbia. The Company's Reinsurance Operations consist solely of the operations of its Bermuda-based wholly-owned subsidiary, Global Indemnity Reinsurance. Global Indemnity Reinsurance is a treaty reinsurer of specialty property and casualty insurance and reinsurance companies. The Company's Reinsurance Operations segment provides reinsurance solutions through brokers and primary writers including insurance and reinsurance companies.

The consolidated financial statements have been prepared in conformity with United States of America generally accepted accounting principles (GAAP), which differs in certain respects from those principles followed in reports to insurance regulatory authorities. The preparation of consolidated financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

The consolidated financial statements include the accounts of Global Indemnity and its wholly owned subsidiaries. All intercompany balances and transactions have been eliminated in consolidation.

The Consolidated Statement of Cash Flows for the year ended December 31, 2013 that was included in the Form 10-K for the annual period ended December 31, 2013 classified \$3.0 million as Other assets and liabilities, net within the Cash flows from operating activities section. These amounts were properly reclassified to the line item Amortization and depreciation in the Consolidated Statement of Cash Flows for the year ended December 31, 2013 as included in this Form 10-K for the annual period ended December 31, 2015 (the December 31, 2015 10K). These reclassifications do not impact Net cash flows used for operating activities nor does it impact any other financial metric or disclosure within the December 31, 2015 10K. The Company does not believe that these adjustments are material to the current or to any prior years consolidated financial statements.

Certain other prior period amounts have been reclassified to conform to the current period presentation.

GLOBAL INDEMNITY PLC

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

2. Summary of Significant Accounting Policies

Restricted Cash

At December 31, 2014, the Company had \$113.7 million of cash in escrow to fund the acquisition of American Reliable on January 1, 2015. The funds were released from escrow when the transaction settled on January 1, 2015. See note 3 for further information on the acquisition of American Reliable.

Investments

The Company's investments in fixed maturities and equity securities are classified as available for sale and are carried at their fair value. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair values of the Company's available for sale portfolio, excluding limited partnership interests, are determined on the basis of quoted market prices where available. If quoted market prices are not available, the Company uses third party pricing services to assist in determining fair value. In many instances, these services examine the pricing of similar instruments to estimate fair value. The Company purchases bonds with the expectation of holding them to their maturity; however, changes to the portfolio are sometimes required to assure it is appropriately matched to liabilities. In addition, changes in financial market conditions and tax considerations may cause the Company to sell an investment before it matures. The difference between amortized cost and fair value of the Company's available for sale investments, net of the effect of deferred income taxes, is reflected in accumulated other comprehensive income in shareholders' equity and, accordingly, has no effect on net income other than for the credit loss component of impairments deemed to be other than temporary.

For investments in limited liability partnerships where the ownership interest is less than 3%, the Company carries these investments at fair value, and the change in the difference between cost and the fair value of the partnership interests, net of the effect of deferred income taxes, is reflected in accumulated other comprehensive income in shareholders' equity and, accordingly, has no effect on net income other than for impairments deemed to be other than temporary. The Company uses the equity method to account for an investment in a limited partnership where its ownership interest exceeds 3%. The equity method of accounting for an investment in a limited partnership requires that its cost basis be updated to account for the income or loss earned on the investment. The income or loss associated with the partnerships is reflected in the Statement of Operations and the adjusted cost basis approximates fair value.

The Company's investments in other invested assets were valued at \$32.6 million and \$33.7 million as of December 31, 2015 and 2014, respectively. Both of these amounts relate to investments in limited partnerships. The Company does not have access to daily valuations, therefore; the estimated fair value of the limited partnerships are based on net asset value as a practical expedient for the limited partnerships.

Net realized gains and losses on investments are determined based on the first-in, first-out method.

The Company regularly performs various analytical valuation procedures with respect to its investments, including reviewing each fixed maturity security in an unrealized loss position to assess whether the security has a credit loss. Specifically, the Company considers credit rating, market price, and issuer specific financial information, among other factors, to assess the likelihood of collection of all principal and interest as contractually due. Securities for which the Company determines that a credit loss is likely are subjected to further analysis through discounted cash flow testing to estimate the credit loss to be recognized in earnings, if any. The specific methodologies and significant assumptions used by asset class are discussed below. Upon identification of such securities and periodically thereafter, a detailed review is performed to determine whether the decline is considered other than temporary. This review includes an analysis of several factors, including but not limited to, the credit ratings and cash flows of the securities and the magnitude and length of time that the fair value of such

Table of Contents

GLOBAL INDEMNITY PLC

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

securities is below cost.

For fixed maturities, the factors considered in reaching the conclusion that a decline below cost is other than temporary include, among others, whether:

- (1) the issuer is in financial distress;
- (2) the investment is secured;
- (3) a significant credit rating action occurred;
- (4) scheduled interest payments were delayed or missed;
- (5) changes in laws or regulations have affected an issuer or industry;
- (6) the investment has an unrealized loss and was identified by the Company's investment manager as an investment to be sold before recovery or maturity; and
- (7) the investment failed cash flow projection testing to determine if anticipated principal and interest payments will be realized.

According to accounting guidance for debt securities in an unrealized loss position, the Company is required to assess whether it has the intent to sell the debt security or more likely than not will be required to sell the debt security before the anticipated recovery. If either of these conditions is met the Company must recognize an other than temporary impairment with the entire unrealized loss being recorded through earnings. For debt securities in an unrealized loss position not meeting these conditions, the Company assesses whether the impairment of a security is other than temporary. If the impairment is deemed to be other than temporary, the Company must separate the other than temporary impairment into two components: the amount representing the credit loss and the amount related to all other factors, such as changes in interest rates. The credit loss represents the portion of the amortized book value in excess of the net present value of the projected future cash flows discounted at the effective interest rate implicit in the debt security prior to impairment. The credit loss component of the other than temporary impairment is recorded through earnings, whereas the amount relating to factors other than credit losses is recorded in other comprehensive income, net of taxes.

For equity securities, management carefully reviews all securities with unrealized losses to determine if a security should be impaired and further focuses on securities that have either:

- (1) persisted with unrealized losses for more than twelve consecutive months or

Edgar Filing: Global Indemnity plc - Form 10-K

(2) the value of the investment has been 20% or more below cost for six continuous months or more. The amount of any write-down, including those that are deemed to be other than temporary, is included in earnings as a realized loss in the period in which the impairment arose.

For an analysis of other than temporary losses that were recorded for the years ended December 31, 2015, 2014, and 2013, please see Note 4 below.

Table of Contents

GLOBAL INDEMNITY PLC

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Variable Interest Entities

The Company has variable interest in a Variable Interest Entity (VIE) for which it is not the primary beneficiary and accounts for this VIE under the equity method since its ownership interest exceeds 3%. This partnership is deemed to be a VIE because the equity holders invest as passive limited partners and as a group lack power to direct the activities that most significantly impact the respective entity's economic performance. The VIE generates variability from investment portfolio performance and that variability is passed to the equity holders. For this VIE, the Company absorbs a portion, but not the majority of this variability, based on its proportional equity interest. The fair value of the non-consolidated VIE, in which the Company has a significant variable interest, was \$32.6 million and \$30.3 million as of December 31, 2015 and 2014, respectively. The Company's maximum exposure to loss was \$52.6 million and \$50.3 million as of December 31, 2015 and 2014, respectively. Maximum exposure to loss includes the fair value of the Company's investment in this VIE and its unfunded commitment to the VIE. The Company's investment in this VIE is included in other invested assets on the consolidated balance sheet with changes in fair value recorded in the statement of operations.

Cash and Cash Equivalents

For the purpose of the statements of cash flows, the Company considers all liquid instruments with an original maturity of three months or less to be cash equivalents. The Company has a cash management program that provides for the investment of excess cash balances primarily in short-term money market instruments. Generally, bank balances exceed federally insured limits. The carrying amount of cash and cash equivalents approximates fair value.

At December 31, 2015, the Company had approximately \$61.8 million of cash and cash equivalents that was invested in a diversified portfolio of high quality short-term debt securities.

Valuation of Premium Receivable

The Company evaluates the collectability of premium receivable based on a combination of factors. In instances in which the Company is aware of a specific circumstance where a party may be unable to meet its financial obligations to the Company, a specific allowance for bad debts against amounts due is recorded to reduce the net receivable to the amount reasonably believed by management to be collectible. For all remaining balances, allowances are recognized for bad debts based on the length of time the receivables are past due. The allowance for bad debts was \$1.6 million and \$1.5 million as of December 31, 2015 and 2014, respectively.

Goodwill and Intangible Assets

The Company tests for impairment of goodwill at least annually and more frequently as circumstances warrant in accordance with applicable accounting guidance. Accounting guidance allows for the testing of goodwill for impairment using both qualitative and quantitative factors. Impairment of goodwill is recognized only if the carrying amount of the reporting unit, including goodwill, exceeds the fair value of the reporting unit. The amount of the impairment loss would be equal to the excess carrying value of the goodwill over the implied fair value of the reporting unit goodwill. Based on the qualitative assessment performed, there was no impairment of goodwill as of December 31, 2015.

Impairment of intangible assets with an indefinite useful life is tested at least annually and more frequently as circumstances warrant in accordance with applicable accounting guidance. Accounting guidance allows for the testing of indefinite lived intangible assets for impairment using both qualitative and quantitative factors. Impairment of indefinite lived intangible assets is recognized only if the carrying amount of the intangible assets

Table of Contents

GLOBAL INDEMNITY PLC

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

exceeds the fair value of said assets. The amount of the impairment loss would be equal to the excess carrying value of the assets over the fair value of said assets. Based on the qualitative assessment performed, there were no impairments of indefinite lived intangible assets as of December 31, 2015.

Intangible assets that are not deemed to have an indefinite useful life are amortized over their estimated useful lives. The carrying amounts of definite lived intangible assets are regularly reviewed for indicators of impairment in accordance with applicable accounting guidance. Impairment is recognized only if the carrying amount of the intangible asset is in excess of its undiscounted projected cash flows. The impairment is measured as the difference between the carrying amount and the estimated fair value of the asset. As of December 31, 2015, there were no triggering events that occurred during the year that would result in an impairment of definite lived intangible assets.

See note 7 for additional information on goodwill and intangible assets.

Reinsurance

In the normal course of business, the Company seeks to reduce the loss that may arise from events that cause unfavorable underwriting results by reinsuring certain levels of risk from various areas of exposure with reinsurers. Amounts receivable from reinsurers are estimated in a manner consistent with the reinsured policy and the reinsurance contract.

The Company regularly reviews the collectability of reinsurance receivables. An allowance for uncollectible reinsurance receivable is recognized based on the financial strength of the reinsurers and the length of time any balances are past due. Any changes in the allowance resulting from this review are included in net losses and loss adjustment expenses on the statement of operations during the period in which the determination is made. The allowance for uncollectible reinsurance was \$9.7 million and \$9.4 million as of December 31, 2015 and 2014, respectively.

The applicable accounting guidance requires that the reinsurer must assume significant insurance risk under the reinsured portions of the underlying insurance contracts and that there must be a reasonably possible chance that the reinsurer may realize a significant loss from the transaction. The Company has evaluated its reinsurance contracts and concluded that each contract qualifies for reinsurance accounting treatment pursuant to this guidance.

Income Taxes

Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date.

A valuation allowance is provided when it is more likely than not that some portion of the deferred tax assets will not be realized. The deferred tax asset balance is analyzed regularly by management. This assessment requires significant judgment and considers, among other matters, the nature, frequency and severity of current and cumulative losses, forecasts of future profitability, the duration of carryforward periods, and tax planning strategies and/or actions. Management believes that it is more likely than not that the results of future operations will generate sufficient taxable income to realize the remaining deferred income tax assets, and accordingly, the Company has not established any valuation allowances.

Table of Contents

GLOBAL INDEMNITY PLC

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Deferred Acquisition Costs

The costs of acquiring new and renewal insurance and reinsurance contracts include commissions, premium taxes and certain other costs that are directly related to the successful acquisition of new and renewal insurance and reinsurance contracts. The excess of the Company's costs of acquiring new and renewal insurance and reinsurance contracts over the related ceding commissions earned from reinsurers is capitalized as deferred acquisition costs and amortized over the period in which the related premiums are earned.

The amortization of deferred acquisition costs for the years ended December 31, 2015, 2014, and 2013 was \$86.2 million, \$57.1 million, and \$53.8 million, respectively.

Premium Deficiency

A premium deficiency is recognized if the sum of expected loss and loss adjustment expenses and unamortized acquisition costs exceeds related unearned premium after consideration of investment income. This evaluation is done at a product line level in Insurance Operations and at a treaty level in Reinsurance Operations. Any future expected loss on the related unearned premium is recorded first by impairing the unamortized acquisition costs on the related unearned premium followed by an increase to loss and loss adjustment expense reserves on additional expected loss in excess of unamortized acquisition costs.

For the years ended December 31, 2015, 2014, and 2013, the total premium deficiency charges were \$0.2 million, \$0.4 million, and \$1.7 million, respectively, comprised solely of reductions to unamortized deferred acquisition costs within the commercial automobile lines in the Commercial Lines Segment. Based on the Company's analysis, the Company expensed acquisition cost as incurred for the remainder of 2013, 2014 and 2015 for the commercial automobile lines in the Commercial Lines Segment. As the charges were a reduction of unamortized deferred acquisition costs in each respective period, no premium deficiency reserve existed as of December 31, 2015 or 2014.

Derivative Instruments

The Company uses derivative instruments to manage its exposure to cash flow variability from interest rate risk. The derivative instruments are carried on the balance sheet at fair value and included in other assets or other liabilities. Changes in the fair value of the derivative instruments and the periodic net interest settlements under the derivatives instruments are recognized as net realized investment gains on the consolidated statement of operations.

Margin Borrowing Facilities

The carrying amounts reported in the balance sheet represent the outstanding borrowings. The outstanding borrowings are due on demand; therefore, the cash receipts and cash payments related to the margin borrowing facilities are shown net in the consolidated statement of cash flows.

Subordinated Notes

The carrying amounts reported in the balance sheet represent the outstanding balances, net of deferred issuance cost. See note 11 for details.

Notes and Debentures Payable

In 2013, the Company repaid the entire outstanding principal due on the junior subordinated debentures. The Company's business trust subsidiaries were cancelled in the 4th quarter of 2013.

Table of Contents

GLOBAL INDEMNITY PLC

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Unpaid Losses and Loss Adjustment Expenses

The liability for unpaid losses and loss adjustment expenses represents the Company's best estimate of future amounts needed to pay losses and related settlement expenses with respect to events insured by the Company. This liability is based upon the accumulation of individual case estimates for losses reported prior to the close of the accounting period with respect to direct business, estimates received from ceding companies with respect to assumed reinsurance, and estimates of unreported losses.

The process of establishing the liability for unpaid losses and loss adjustment is complex, requiring the use of informed actuarially based estimates and management's judgment. In some cases, significant periods of time, up to several years or more, may elapse between the occurrence of an insured loss and the reporting of that loss to the Company. To establish this liability, the Company regularly reviews and updates the methods of making such estimates and establishing the resulting liabilities. Any resulting adjustments are recorded in statement of operations during the period in which the determination is made.

Premiums

Premiums are recognized as revenue ratably over the term of the respective policies and treaties. Unearned premiums are computed on a pro rata basis to the day of expiration.

Contingent Commissions

Certain professional general agencies of the Insurance Operations are paid special incentives, referred to as contingent commissions, when results of business produced by these agencies are more favorable than predetermined thresholds. Similarly, in some circumstances, companies that cede business to the Reinsurance Operations are paid profit commissions based on the profitability of the ceded portfolio. These commissions are charged to other underwriting expenses when incurred.

Share-Based Compensation

The Company accounts for stock options and other equity based compensation using the modified prospective application of the fair value-based method permitted by the appropriate accounting guidance. See Note 15 for details.

Earnings per Share

Basic earnings per share have been calculated by dividing net income available to common shareholders by the weighted-average ordinary shares outstanding. Diluted earnings per share has been calculated by dividing net income available to common shareholders by the sum of the weighted-average ordinary shares outstanding and the weighted-average common share equivalents outstanding, which include options and other equity awards. See Note 17 for details.

Foreign Currency

The Company maintains investments and cash accounts in foreign currencies related to the operations of its business. At period-end, the Company re-measures non-U.S. currency financial assets to their current U.S. dollar equivalent. The resulting gain or loss for foreign denominated investments is reflected in accumulated other comprehensive income in shareholders' equity; whereas, the gain or loss on foreign denominated cash accounts is reflected in income during the period. Financial liabilities, if any, are generally adjusted within the reserving process. However, for known losses on claims to be paid in foreign currencies, the Company re-measures the liabilities to their current U.S. dollar equivalent each period end with the resulting gain or loss reflected in

Table of Contents

GLOBAL INDEMNITY PLC

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

income during the period. Net transaction gains, primarily comprised of re-measurement of known losses on claims to be paid in foreign currencies, were \$0.4 million, \$0.5 million and \$0.3 million for the years ended December 31, 2015, 2014, and 2013, respectively.

Other income

On December 31, 2013, Diamond State Insurance Company sold all the outstanding shares of capital stock of one of its wholly owned subsidiaries, United National Casualty Insurance Company to an unrelated party. Diamond State Insurance Company received a one-time payment of \$26.6 million and recognized a pretax gain of \$5.2 million which is reflected in other income in 2013. Management deemed this transaction to be an asset sale with the assets primarily comprised of investments and insurance licenses. This transaction did not have a significant impact on the ongoing business operations of the Company.

In addition, other income is comprised of fee income on policies issued, commission income, accrued interest on the anticipated indemnification of unpaid loss and loss adjustment expense reserve, and foreign exchange gains and losses.

3. Acquisition

On January 1, 2015, Global Indemnity Group, Inc., a subsidiary of the Company, acquired 100% of the voting equity interest of American Reliable from American Bankers Insurance Group, Inc. by paying \$113.7 million in cash and assuming \$283.9 million of customary insurance related liabilities, obligations, and mandates. Per the American Reliable SPA, the ultimate purchase price is subject to (i) accounting procedures that were performed in 2015 to determine GAAP book value and (ii) indemnification on future development on recorded loss and loss adjustment expenses as of December 31, 2014. In accordance with the American Reliable SPA, on the third calendar year following the calendar year of the closing, if loss and loss adjustment expenses for accident years 2014 and prior are lower than recorded unpaid loss and loss adjustment expenses as of December 31, 2014, Global Indemnity Group, Inc. will pay the variance to American Bankers Group, Inc. Conversely, if loss and loss adjustment expenses for accident years 2014 and prior exceed recorded unpaid loss and loss adjustment expenses as of December 31, 2014, American Bankers Group, Inc. will pay the variance to Global Indemnity Group, Inc. In accordance with a dispute resolution agreement between Global Indemnity Group, Inc. and American Bankers Group, Inc., any variance paid related to the loss indemnification will be subject to interest of 5% compounded semi-annually. The Company's current estimate of the purchase price, based on available financial information, is approximately \$99.8 million.

The results of American Reliable's operations have been included in the Company's consolidated financial statements since the date of the acquisition on January 1, 2015.

The purchase of American Reliable expanded Global Indemnity's product offerings. American Reliable is a specialty company that distributes personal lines products written on an admitted basis that are unusual and harder to place. It complements Global Indemnity's existing US Insurance Operations that primarily distribute commercial lines products on an excess and surplus lines basis.

American Reliable is domiciled in Arizona and as such is subject to its state insurance department regulations.

For the year ended December 31, 2015, American Reliable had total revenues of \$259.0 million and pre-tax loss of \$4.2 million. These amounts are included in the Company's results of operations for the year ended December 31, 2015.

Table of Contents**GLOBAL INDEMNITY PLC****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The following table presents the Company's unaudited pro forma consolidated results of operations for the years December 31, 2015 and 2014 as if the acquisition had occurred on January 1, 2014 instead of January 1, 2015.

(Dollars in thousands except per share data)	Pro Forma Years Ended December 31,	
	2015	2014
Total Revenue	\$ 538,778	\$ 597,583
Net Income (Loss)	\$ 46,864	\$ 63,053
Net Income (Loss) per share (diluted)	\$ 1.91	\$ 2.46

The pro forma results were calculated by applying the Company's accounting policies and adjusting the result of American Reliable to reflect (i) the impact of intercompany reinsurance with Global Indemnity Reinsurance, (ii) the impact on interest expense resulting from changes to the Company's capital structure in connection with the acquisition, (iii) the impact on investment income from the acquisition date adjustments to fair value of investments, (iv) the impact on underwriting expenses from the acquisition date adjustments to fair value of deferred acquisition costs and intangible assets, (v) the impact of excluding transaction costs related to the acquisition and (vi) the tax effects of the above adjustments.

The pro forma results do not include any anticipated cost synergies or other effects of the integration of American Reliable. Such pro forma amounts are not indicative of the results that actually would have occurred had the acquisition been completed on January 1, 2014, nor are they indicative of the future operating results of the combined company.

The Company has finalized its process of valuing the assets acquired and liabilities assumed. The following table summarizes the estimated fair value of the assets acquired and liabilities assumed at the date of the acquisition as of December 31, 2015 compared to September 30, 2015 along with changes in estimates made during the quarter.

(Dollars in thousands)	December 31, 2015	As of September 30, 2015	Change
ASSETS:			
Investments	\$ 226,458	\$ 226,458	\$
Cash and cash equivalents	21,360	21,360	
Premiums receivables, net	26,102	25,941	161
Accounts receivable	11,311	11,311	
Reinsurance receivables	13,842	13,842	
Prepaid reinsurance premiums	43,506	43,506	
Intangible assets	32,000	32,000	
Deferred federal income taxes	915	1,139	(224)
Other assets	6,473	6,550	(77)
Total assets	381,967	382,107	(140)
LIABILITIES:			
Unearned premiums	172,234	172,234	
Unpaid losses and loss adjustment expenses	89,489	89,489	
Reinsurance balances payable	13,219	13,219	
Contingent commissions	3,903	3,876	27
Other liabilities	5,026	5,608	(582)

Edgar Filing: Global Indemnity plc - Form 10-K

Total liabilities	283,871	284,426	(555)
Estimated fair value of net assets acquired	98,096	97,681	415
Purchase price	99,797	99,797	
Goodwill	\$ 1,701	\$ 2,116	\$ (415)

Table of Contents**GLOBAL INDEMNITY PLC****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The transaction is being accounted for using the purchase method of accounting. The assets and liabilities acquired by the Company were adjusted to estimated fair value. The \$1.7 million excess of cash and acquisition cost over the estimated fair value of assets acquired was recognized as goodwill. Under the purchase method of accounting, goodwill is not amortized but is tested for impairment at least annually.

Goodwill of \$1.7 million, arising from the acquisition, consists largely of the synergies and economies of scales expected from combining the operations of Global Indemnity and American Reliable. The Company has determined that the goodwill of \$1.7 million will be assigned to the Personal Lines segment. There is no tax goodwill.

An identification and valuation of intangible assets was performed that resulted in the recognition of intangible assets of \$32.0 million with values assigned as follows:

(Dollars in thousands)

Description	Useful Life	Amount
State insurance licenses	Indefinite	\$ 5,000
Value of business acquired	< 1 year	25,500
Agent relationships	10 years	900
Trade name	7 years	600
		\$ 32,000

Intangible assets arising from the acquisition will be deductible for income tax purposes over 15 years.

The following table presents details of the Company's intangible assets arising from the American Reliable acquisition as of December 31, 2015:

(Dollars in thousands)

Description	Useful Life	Cost	Accumulated Amortization	Net Value
State insurance licenses	Indefinite	\$ 5,000	\$	\$ 5,000
Value of business acquired	< 1 year	25,500	25,500	0
Agent relationships	10 years	900	90	810
Trade name	7 years	600	86	514
		\$ 32,000	\$ 25,676	\$ 6,324

Amortization related to the Company's definite lived intangible assets resulting from American Reliable acquisition was \$25.7 million for the year ended December 31, 2015.

The Company expects that amortization expense for the next five years related to the American Reliable acquisition will be as follows:

(Dollars in thousands)

2016	\$ 176
------	--------

Edgar Filing: Global Indemnity plc - Form 10-K

2017	176
2018	176
2019	176
2020	176

Table of Contents**GLOBAL INDEMNITY PLC****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The fair value, gross contractual amounts due, and contractual cash flows not expected to be collected of acquired receivables are as follows:

(Dollars in thousands)	Fair Value	Gross Contractual Amounts Due	Contractual cash flows not expected to be collected
Premium receivables	\$ 26,102	\$ 26,896	\$ 794
Accounts receivable	11,311	11,311	
Reinsurance receivables	13,842	13,842	

In connection with the acquisition, the Company agreed to pay to Fox Paine & Company an investment banking fee of 3% of the amount paid plus the additional capital required to operate American Reliable on a standalone basis and a \$1.5 million investment advisory fee, which in the aggregate, totaled \$6.5 million. This amount is included in corporate and other operating expenses on the Company's Consolidated Statements of Operations during the year ended December 31, 2015. As payment for these fees, 267,702 A ordinary shares of Global Indemnity were issued under the Global Indemnity plc Share Incentive Plan in May, 2015. These shares will be registered but cannot be sold until the earlier of five years or a change of control. See Note 15 for additional information on the Global Indemnity plc Share Incentive Plan.

Additional costs, mainly professional fees, of \$5.1 million were incurred in connection with the acquisition of American Reliable. Of this amount, \$1.8 million and \$3.3 million was recorded as corporate and other operating expenses on the Company's Consolidated Statements of Operations during the years ended December 31, 2015 and 2014, respectively. No acquisition costs were incurred during the year ended December 31, 2013.

During the year ended December 31, 2015, the Company paid approximately \$1.6 million in employee compensation related cost, which were related to periods prior to the Acquisition. These costs were accrued by American Reliable and were included in the fair value of net assets acquired by Global Indemnity Group, Inc. on January 1, 2015.

4. Investments

The amortized cost and estimated fair value of investments were as follows as of December 31, 2015 and 2014:

(Dollars in thousands)	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value	Other than temporary impairments recognized in AOCI (1)
As of December 31, 2015

Table of Contents**GLOBAL INDEMNITY PLC****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

(1) Fixed maturities in a gross unrealized loss position for twelve months or longer are primarily comprised of non-credit losses on investment grade securities where management does not intend to sell, and it is more likely than not that the Company will not be forced to sell the security before recovery. The Company has analyzed these securities and has determined that they are not other than temporarily impaired. Subject to the risks and uncertainties in evaluating the potential impairment of a security's value, the impairment evaluation conducted by the Company as of December 31, 2015 concluded the unrealized losses discussed above are not other than temporary impairments. The impairment evaluation process is discussed in the Investment section of Note 2 (Summary of Significant Accounting Policies).

The following is a description, by asset type, of the methodology and significant inputs that the Company used to measure the amount of credit loss recognized in earnings, if any:

U.S. treasury and agency obligations As of December 31, 2015, gross unrealized losses related to U.S. treasury and agency obligations were \$0.321 million. All unrealized losses have been in an unrealized loss position for less than 12 months and are rated AA+ or better. Macroeconomic and market analysis is conducted in evaluating these securities. The analysis is driven by moderate interest rate anticipation, yield curve management, and security selection.

Obligations of states and political subdivisions As of December 31, 2015, gross unrealized losses related to obligations of states and political subdivisions were \$0.457 million. Of this amount, \$0.084 million have been in an unrealized loss position for twelve months or greater and are rated A or better. All factors that influence performance of the municipal bond market are considered in evaluating these securities. The aforementioned factors include investor expectations, supply and demand patterns, and current versus historical yield and spread relationships. The analysis relies on the output of fixed income credit analysts, as well as dedicated municipal bond analysts who perform extensive in-house fundamental analysis on each issuer, regardless of their rating by the major agencies.

Mortgage-backed securities (MBS) As of December 31, 2015, gross unrealized losses related to mortgage-backed securities were \$0.743 million. All unrealized losses have been in an unrealized loss position for less than 12 months and are rated investment grade. Mortgage-backed securities are modeled to project principal losses under downside, base, and upside scenarios for the economy and home prices. The primary assumption that drives the security and loan level modeling is the Home Price Index (HPI) projection. The model first projects HPI at the national level, then at the zip-code level based on the historical relationship between the individual zip code HPI and the national HPI. The model utilizes loan level data and borrower characteristics including FICO score, geographic location, original and current loan size, loan age, mortgage rate and type (fixed rate / interest-only / adjustable rate mortgage), issuer / originator, residential type (owner occupied / investor property), dwelling type (single family / multi-family), loan purpose, level of documentation, and delinquency status as inputs. The model also includes the explicit treatment of silent second liens, utilization of loan modification history, and the application of roll rate adjustments.

Asset backed securities (ABS) As of December 31, 2015, gross unrealized losses related to asset backed securities were \$1.421 million. Of this amount, \$0.017 million have been in an unrealized loss position for twelve months or greater and are rated AAA. The weighted average credit enhancement for the Company's asset backed portfolio is 23.4. This represents the percentage of pool losses that can occur before an asset backed security will incur its first dollar of principal losses. Every ABS transaction is analyzed on a stand-alone basis. This analysis involves a thorough review of the collateral, prepayment, and structural risk in each transaction. Additionally, the analysis includes an in-depth credit analysis of the originator and servicer of the collateral. The analysis projects an expected loss for a deal given a set of assumptions specific to the asset type. These assumptions are used to calculate at what level of losses the deal will incur its first dollar of principal loss. The major assumptions used to calculate this ratio are loss severities, recovery lags, and no advances on principal and interest.

Table of Contents

GLOBAL INDEMNITY PLC

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Commercial mortgage-backed securities (CMBS) As of December 31, 2015, gross unrealized losses related to the CMBS portfolio were \$2.352 million. Of this amount, \$0.347 million have been in an unrealized loss position for twelve months or greater and are rated AA or better. The weighted average credit enhancement for the Company's CMBS portfolio is 35.6. This represents the percentage of pool losses that can occur before a mortgage-backed security will incur its first dollar of principal loss. For the Company's CMBS portfolio, a loan level analysis is utilized where every underlying CMBS loan is re-underwritten based on a set of assumptions reflecting expectations for the future path of the economy. In the analysis, the focus is centered on stressing the significant variables that influence commercial loan defaults and collateral losses in CMBS deals. These variables include: (1) a projected drop in occupancies; (2) capitalization rates that vary by property type and are forecasted to return to more normalized levels as the capital markets repair and capital begins to flow again; and (3) property value stress testing using projected property performance and projected capitalization rates. Term risk is triggered if the projected debt service coverage rate falls below 1x. Balloon risk is triggered if a property's projected performance does not satisfy new, tighter mortgage standards.

Corporate bonds As of December 31, 2015, gross unrealized losses related to corporate bonds were \$3.294 million. Of this amount, \$0.025 million have been in an unrealized loss position for twelve months or greater and are rated BBB or better. The analysis for this sector includes maintaining detailed financial models that include a projection of each issuer's future financial performance, including prospective debt servicing capabilities, capital structure composition, and the value of the collateral. The analysis incorporates the macroeconomic environment, industry conditions in which the issuer operates, the issuer's current competitive position, its vulnerability to changes in the competitive and regulatory environment, issuer liquidity, issuer commitment to bondholders, issuer creditworthiness, and asset protection. Part of the process also includes running downside scenarios to evaluate the expected likelihood of default as well as potential losses in the event of default.

Foreign bonds As of December 31, 2015, gross unrealized losses related to foreign bonds were \$0.739 million. Of this amount, \$0.042 million have been in an unrealized loss position for twelve months or greater and are rated A. For this sector, detailed financial models are maintained that include a projection of each issuer's future financial performance, including prospective debt servicing capabilities, capital structure composition, and the value of the collateral. The analysis incorporates the macroeconomic environment, industry conditions in which the issuer operates, the issuer's current competitive position, its vulnerability to changes in the competitive and regulatory environment, issuer liquidity, issuer commitment to bondholders, issuer creditworthiness, and asset protection. Part of the process also includes running downside scenarios to evaluate the expected likelihood of default as well as potential losses in the event of default.

Common stock As of December 31, 2015, gross unrealized losses related to common stock were \$5.960 million. All unrealized losses have been in an unrealized loss position for less than 12 months. To determine if an other than temporary impairment of an equity security has occurred, the Company considers, among other things, the severity and duration of the decline in fair value of the equity security. The Company also examines other factors to determine if the equity security could recover its value in a reasonable period of time.

Table of Contents**GLOBAL INDEMNITY PLC****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The Company recorded the following other than temporary impairments (OTTI) on its investment portfolio for the years ended December 31, 2015, 2014, and 2013:

(Dollars in thousands)	Years Ended December 31,		
	2015	2014	2013
Fixed maturities:			
OTTI losses, gross	\$ (24)	\$ (31)	\$ (280)

Insurance Enhanced Asset-Backed and Credit Securities

As of December 31, 2015, the Company held insurance enhanced asset-backed and credit securities with a market value of approximately \$39.3 million. Approximately \$18.6 million of these securities were tax-free municipal bonds, which represented approximately 1.2% of the Company's total cash and invested assets, net of payable/ receivable for securities purchased and sold. These securities had an average rating of A+. Approximately \$8.5 million of these bonds are pre-refunded with U.S. treasury securities, of which \$0.5 million are backed by financial guarantors, meaning that funds have been set aside in escrow to satisfy the future interest and principal obligations of the bond. Of the remaining \$10.1 million of insurance enhanced municipal bonds, \$0.5 million would have carried a lower credit rating had they not been insured. The following table provides a breakdown of the ratings for these municipal bonds with and without insurance.

(Dollars in thousands)	Ratings with Insurance	Ratings without Insurance
Rating		
AA	\$ 507	\$
BB		507
Total	\$ 507	\$ 507

A summary of the Company's insurance enhanced municipal bonds that are backed by financial guarantors, including the pre-refunded bonds that are escrowed in U.S. government obligations, as of December 31, 2015, is as follows:

(Dollars in thousands)	Total	Pre-refunded Securities	Government Guaranteed Securities	Exposure Net of Pre-refunded & Government
Financial Guarantor				

Edgar Filing: Global Indemnity plc - Form 10-K

				Guaranteed Securities
Ambac Financial Group	\$ 1,541	\$ 469	\$	\$ 1,072
Assured Guaranty Corporation	3,616			3,616
Municipal Bond Insurance Association	4,865			4,865
Gov t National Housing Association	551		551	
Total backed by financial guarantors	10,573	469	551	9,553
Other credit enhanced municipal bonds	7,982	7,982		
Total	\$ 18,555	\$ 8,451	\$ 551	\$ 9,553

Table of Contents**GLOBAL INDEMNITY PLC****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

In addition to the tax-free municipal bonds, the Company held \$20.7 million of insurance enhanced asset-backed and taxable municipal bonds, which represented approximately 1.4% of the Company's total invested assets, net of receivable/payable for securities purchased and sold. The financial guarantors of the Company's \$20.7 million of insurance enhanced asset-backed and taxable municipal securities include Municipal Bond Insurance Association (\$5.0 million), Ambac Financial Group (\$1.3 million), Assured Guaranty Corporation (\$14.2 million), and Financial Guaranty Insurance Group (\$0.2 million).

The Company had no direct investments in the entities that have provided financial guarantees or other credit support to any security held by the Company at December 31, 2015.

Bonds Held on Deposit

Certain cash balances, cash equivalents, equity securities, and bonds available for sale were deposited with various governmental authorities in accordance with statutory requirements, were held as collateral pursuant to borrowing arrangements, or were held in trust pursuant to intercompany reinsurance agreements. The fair values were as follows as of December 31, 2015 and 2014:

(Dollars in thousands)	Estimated Fair Value	
	December 31, 2015	December 31, 2014
On deposit with governmental authorities	\$ 38,815	\$ 32,790
Intercompany trusts held for the benefit of U.S. policyholders	643,216	495,301
Held in trust pursuant to third party requirements	66,544	95,828
Letter of credit held for third party requirements	5,598	9,340
Securities held as collateral for borrowing arrangements (1)	95,647	222,809
Total	\$ 849,820	\$ 856,068

(1) Amount required to collateralize margin borrowing facilities.

5. Derivative Instruments

Interest rate swaps are used by the Company primarily to reduce risks from changes in interest rates. Under the terms of the interest rate swaps, the Company agrees with another party to exchange, at specified intervals, the difference between fixed rate and floating rate interest amounts as calculated by reference to an agreed notional amount.

The Company accounts for the interest rate swaps as non-hedge instruments and recognizes the fair value of the interest rate swaps in other assets or other liabilities on the consolidated balance sheets with the changes in fair value recognized as net realized investment gains in the consolidated statement of operations. The Company is ultimately responsible for the valuation of the interest rate swaps. To aid in determining the estimated fair value of the interest rate swaps, the Company relies on the forward interest rate curve and information obtained from a third party financial institution.

The following table summarizes information on the location and the gross amount of the derivatives' fair value on the consolidated balance sheets as of December 31, 2015 and 2014:

Edgar Filing: Global Indemnity plc - Form 10-K

(Dollars in thousands)

December 31, 2015

December 31, 2014

Derivatives Not Designated as Hedging

	Balance Sheet Location	Notional Amount	Fair Value	Notional Amount	Fair Value
Instruments under ASC 815					
Interest rate swap agreements	Other liabilities	\$ 200,000	\$ (15,256)	\$ 200,000	\$ (13,675)

Table of Contents**GLOBAL INDEMNITY PLC****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The following table summarizes the net gains (losses) included in the consolidated statement of operations for changes in the fair value of the derivatives and the periodic net interest settlements under the derivatives for the years ended December 31, 2015, 2014, and 2013:

(Dollars in thousands)	Statement of Operations Line	Years Ended December 31,		
		2015	2014	2013
Interest rate swap agreements	Net realized investment gains (losses)	\$ (6,988)	\$ (20,836)	\$ 1,427

As of December 31, 2015 and 2014, the Company is due \$4.5 million and \$5.4 million, respectively, for funds it needed to post to execute the swap transaction and \$17.3 million and \$15.3 million, respectively, for margin calls made in connection with the interest rate swaps. These amounts are included in other assets on the consolidated balance sheets.

6. Fair Value Measurements

The accounting standards related to fair value measurements define fair value, establish a framework for measuring fair value, outline a fair value hierarchy based on inputs used to measure fair value, and enhance disclosure requirements for fair value measurements. These standards do not change existing guidance as to whether or not an instrument is carried at fair value. The Company has determined that its fair value measurements are in accordance with the requirements of these accounting standards.

The Company's invested assets and derivative instruments are carried at their fair value and are categorized based upon a fair value hierarchy:

Level 1 inputs utilize quoted prices (unadjusted) in active markets for identical assets that the Company has the ability to access at the measurement date.

Level 2 inputs utilize other than quoted prices included in Level 1 that are observable for similar assets, either directly or indirectly.

Level 3 inputs are unobservable for the asset, and include situations where there is little, if any, market activity for the asset. In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, the level in the fair value hierarchy within which the fair value measurement falls has been determined based on the lowest level input that is significant to the fair value measurement in its entirety. The Company's assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment, and considers factors specific to the asset.

Effective October 1, 2015, the Company retrospectively adopted new accounting guidance that no longer requires investments measured at fair value using the net asset value per share practical expedient to be categorized within the fair value hierarchy. Therefore, the Company no longer includes its investments in limited partnerships within the fair value hierarchy disclosed below. Prior period amounts within the fair value hierarchy disclosures contained in this section have been revised to conform to the current period presentation.

Table of Contents**GLOBAL INDEMNITY PLC****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The following table presents information about the Company's invested assets and derivative instruments measured at fair value on a recurring basis as of December 31, 2015 and 2014, and indicates the fair value hierarchy of the valuation techniques utilized by the Company to determine such fair value.

As of December 31, 2015 (Dollars in thousands)	Fair Value Measurements			Total
	Level 1	Level 2	Level 3	
Assets:				
Fixed maturities:				
U.S. treasury and agency obligations	\$ 101,264	\$ 5,858	\$	\$ 107,122

Liabilities:				
Derivative instruments	\$	\$ 15,256	\$	\$ 15,256
Total liabilities measured at fair value	\$	\$ 15,256	\$	\$ 15,256

(1) Excluded from the table above are limited partnerships of \$32.6 million at December 31, 2015 whose fair value is based on net asset value as a practical expedient. Based on new accounting guidance adopted this quarter, these investments are excluded from the hierarchy table.

As of December 31, 2014 (Dollars in thousands)	Fair Value Measurements			Total
	Level 1	Level 2	Level 3	
Assets:				
Fixed maturities:				
U.S. treasury and agency obligations	\$ 74,765	\$ 6,002	\$	\$ 80,767
Obligations of states and political subdivisions		191,473		191,473
Mortgage-backed securities		208,759		208,759
Commercial mortgage-backed securities		133,158		133,158
Asset-backed securities		178,263		178,263
Corporate bonds		383,416		383,416
Foreign corporate bonds		107,639		107,639
Total fixed maturities	74,765	1,208,710		1,283,475
Common stock	122,048			122,048

Edgar Filing: Global Indemnity plc - Form 10-K

Total assets measured at fair value	\$ 196,813	\$ 1,208,710	\$	\$ 1,405,523
Liabilities:				
Derivative instruments	\$	\$ 13,675	\$	\$ 13,675
Total liabilities measured at fair value	\$	\$ 13,675	\$	\$ 13,675

- (1) Excluded from the table above are limited partnerships of \$33.7 million at December 31, 2014 whose fair value is based on net asset value as a practical expedient. Based on new accounting guidance adopted this quarter, these investments are excluded from the hierarchy table.

Table of Contents**GLOBAL INDEMNITY PLC****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The securities classified as Level 1 in the above table consist of U.S. Treasuries and equity securities actively traded on an exchange.

The securities classified as Level 2 in the above table consist primarily of fixed maturity securities and derivative instruments. Based on the typical trading volumes and the lack of quoted market prices for fixed maturities, security prices are derived through recent reported trades for identical or similar securities making adjustments through the reporting date based upon available market observable information. If there are no recent reported trades, matrix or model processes are used to develop a security price where future cash flow expectations are developed based upon collateral performance and discounted at an estimated market rate. Included in the pricing of asset-backed securities, collateralized mortgage obligations, and mortgage-backed securities are estimates of the rate of future prepayments of principal over the remaining life of the securities. Such estimates are derived based on the characteristics of the underlying structure and prepayment speeds previously experienced at the interest rate levels projected for the underlying collateral. The estimated fair value of the interest rate swaps is obtained from a third party financial institution who utilizes observable inputs such as the forward interest rate curve.

For the Company's material debt arrangements, the current fair value of the Company's debt at December 31, 2015 and 2014 was as follows:

(Dollars in thousands)	December 31, 2015		December 31, 2014	
	Carrying Value	Fair Value	Carrying Value	Fair Value
Margin Borrowing Facilities	\$ 75,646	\$ 75,646	\$ 174,673	\$ 174,673
7.75% Subordinated Notes due 2045 (1)	96,388	91,748		
Total	\$ 172,034	\$ 167,394	\$ 174,673	\$ 174,673

(1) As of December 31, 2015, the carrying value and fair value of the 7.75% Subordinated Notes due 2045 are net of unamortized debt issuance cost of \$3.6 million.

The fair value of the margin borrowing facilities approximates its carrying value due to the facilities being due on demand. The 7.75% subordinated notes due 2045 are publicly traded instruments and are classified as Level 1 in the fair value hierarchy.

There were no transfers between Level 1 and Level 2 during the years ended December 31, 2015, 2014, and 2013.

Fair Value of Alternative Investments

Other invested assets consist of limited liability partnerships whose fair value is based on net asset value per share practical expedient. In accordance with the accounting guidance adopted this quarter, these investments have been excluded from the fair value hierarchy listed above. The following table provides the fair value and future funding commitments related to these investments at December 31, 2015 and 2014.

(Dollars in thousands)	December 31, 2015		December 31, 2014	
	Fair Value	Future Funding Commitment	Fair Value	Future Funding Commitment

GLOBAL INDEMNITY PLC

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

- (1) Prior to November 9, 2015, this limited partnership invested in companies, from various business sectors, whereby the partnership had acquired control of the operating business as a lead or organizing investor. The Company did not have the ability to sell or transfer its limited partnership interest without consent from the general partner. The Company did not have the contractual option to redeem its limited partnership interest but received distributions based on the liquidation of the underlying assets. As of November 10, 2015, the Company no longer holds an interest in this limited partnership. In connection with the Company's share redemption, Global Indemnity Reinsurance elected to redeem its shares. See Note 12 and 13 for further information regarding the redemption.
- (2) This limited partnership invests in real estate assets through a combination of direct or indirect investments in partnerships, limited liability companies, mortgage loans, and lines of credit. The Company does not have the contractual option to redeem its limited partnership interest but receives distributions based on the liquidation of the underlying assets. The Company does not have the ability to sell or transfer its limited partnership interest without consent from the general partner. The Company continues to hold an investment in this limited partnership and has written the fair value down to zero.
- (3) This limited partnership invests in distressed securities and assets through senior and subordinated, secured and unsecured debt and equity, in both public and private large-cap and middle-market companies. The Company does not have the ability to sell or transfer its limited partnership interest without consent from the general partner. The Company does not have the contractual option to redeem its limited partnership interest but receives distributions based on the liquidation of the underlying assets. Based on the terms of the partnership agreement, the Company anticipates its interest in this partnership to be redeemed in 2020.

Limited Partnerships with ownership interest exceeding 3%

The Company uses the equity method to account for an investment in a limited partnership where its ownership interest exceeds 3%. The equity method of accounting for an investment in a limited partnership requires that its cost basis be updated to account for the income or loss earned on the investment. The income or loss associated with the partnership is reflected in the statement of operations, and the adjusted cost basis approximates fair value.

The income or loss associated with this limited partnership, which was included in investment income, was \$2.5 million during the year end December 31, 2015. No income or loss associated with this limited partnership was recorded during the years ended December 31, 2014 and 2013.

Pricing

The Company's pricing vendors provide prices for all investment categories except for investments in limited partnerships whose fair value is based on net asset values as a practical expedient. Two vendors provide prices for equity and fixed maturity securities.

The following is a description of the valuation methodologies used by the Company's pricing vendors for investment securities carried at fair value:

Common stock prices are received from all primary and secondary exchanges.

Corporate and agency bonds are evaluated by utilizing a multi-dimensional relational model. For bonds with early redemption options, an option adjusted spread model is utilized. Both asset classes use standard inputs and incorporate security set up, defined sector breakdown, benchmark yields, apply base spreads, yield to maturity, and adjust for corporate actions.

Data from commercial vendors is aggregated with market information, then converted into a prepayment/spread/LIBOR curve model used for commercial mortgage obligations (CMO). CMOs

Table of Contents

GLOBAL INDEMNITY PLC

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

are categorized with mortgage-backed securities in the tables listed above. For asset-backed securities, data derived from market information along with trustee and servicer reports is converted into spreads to interpolated swap yield curve. For both asset classes, evaluations utilize standard inputs plus new issue data, monthly payment information, and collateral performance. The evaluated pricing models incorporate discount rates, loan level information, prepayment speeds, treasury benchmarks, and LIBOR and swap curves.

For obligations of state and political subdivisions, a multi-dimensional relational model is used to evaluate securities. The pricing models incorporate security set-up, benchmark yields, apply base spreads, yield to worst or market convention, ratings updates, prepayment schedules and adjustments for material events notices.

U.S. treasuries are evaluated by obtaining feeds from a number of live data sources including active market makers and inter-dealer brokers.

For mortgage-backed securities, a matrix model correlation to TBA (a forward MBS trade) or benchmarking is utilized to value a security.

The Company performs certain procedures to validate whether the pricing information received from the pricing vendors is reasonable, to ensure that the fair value determination is consistent with accounting guidance, and to ensure that its assets are properly classified in the fair value hierarchy. The Company's procedures include, but are not limited to:

Reviewing periodic reports provided by the Investment Manager that provide information regarding rating changes and securities placed on watch. This procedure allows the Company to understand why a particular security's market value may have changed or should potentially change.

Understanding and periodically evaluating the various pricing methods and procedures used by the Company's pricing vendors to ensure that investments are properly classified within the fair value hierarchy.

On a quarterly basis, the Company corroborates investment security prices received from its pricing vendors by obtaining pricing from a second pricing vendor for a sample of securities.

During 2015 or 2014, the Company has not adjusted quotes or prices obtained from the pricing vendors.

7. Goodwill and Intangible Assets

Goodwill

As a result of acquisitions in 2015 and 2010, the Company has goodwill of \$6.5 million and \$4.8 million as of December 31, 2015 and 2014, respectively, which represents the excess purchase price over the Company's best estimate of the fair value of the assets acquired. Impairment testing performed in 2015 and 2014 did not result in impairment of the goodwill acquired.

Table of Contents**GLOBAL INDEMNITY PLC****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The changes in the carrying amount of goodwill, by segment, for the years ended December 31, 2014 and 2015 are as follows:

(Dollars in thousands)	Commercial Lines	Personal Lines	Total
Balance at January 1, 2014	\$ 4,820	\$	\$ 4,820
Acquisitions			
Balance at December 31, 2014	4,820		4,820
Acquisition of American Reliable		1,701	1,701
Balance at December 31, 2015	\$ 4,820	\$ 1,701	\$ 6,521

Intangible assets

The following table presents details of the Company's intangible assets as of December 31, 2015:

(Dollars in thousands)				
Description	Useful Life	Cost	Accumulated Amortization	Net Value
Trademarks	Indefinite	\$ 4,800	\$	\$ 4,800
Trade names	Indefinite	4,200		4,200
State insurance licenses	Indefinite	10,000		10,000
Customer relationships	15 years	5,300	2,017	3,283
Agent relationships	10 years	900	90	810
Trade names	7 years	600	86	514
Value of business added (VOBA)	< 1 year	25,500	25,500	
		\$ 51,300	\$ 27,693	\$ 23,607

The following table presents details of the Company's intangible assets as of December 31, 2014:

(Dollars in thousands)				
Description	Useful Life	Cost	Accumulated Amortization	Net Value
Trademarks	Indefinite	\$ 4,800	\$	\$ 4,800
Trade names	Indefinite	4,200		4,200
State insurance licenses	Indefinite	5,000		5,000
Customer relationships	15 years	5,300	1,664	3,636
Non-compete agreements	2 years	50	50	
		\$ 19,350	\$ 1,714	\$ 17,636

Edgar Filing: Global Indemnity plc - Form 10-K

As a result of the acquisition of American Reliable, the cost basis of intangible assets increased from \$19.4 million at December 31, 2014 to \$51.3 million at December 31, 2015.

Amortization related to the Company's definite lived intangible assets, other than VOBA, was \$0.5 million, \$0.4 million, and \$0.4 million for the years ended December 31, 2015, 2014 and 2013, respectively. Amortization related to VOBA was \$25.5 million for the year ended December 31, 2015.

Table of Contents**GLOBAL INDEMNITY PLC****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The Company expects that amortization expense for the next five years will be as follows:

(Dollars in thousands)	
2016	\$ 529
2017	529
2018	529
2019	529
2020	529

Intangible assets with indefinite lives

As of December 31, 2015 and 2014, indefinite lived intangible assets, which are comprised of trade names, trademarks, and state insurance licenses, were \$19.0 million and \$14.0 million, respectively. The Company reviewed internal business unit results, the growth of competitors and the overall property and casualty insurance market for indicators of impairment of its indefinite lived intangible assets. Impairment testing performed in 2015 and 2014 indicated that there was no impairment of these assets.

Intangible assets with definite lives

As of December 31, 2015 and 2014, definite lived intangible assets were \$4.6 million and \$3.6 million, net of accumulated amortization, and were comprised of customer relationships, agent relationships, trade names, and non-compete agreements. VOBA of \$25.5 million, which was related to the American Reliable acquisition, was fully amortized in 2015. The Company reviewed internal business unit results, the growth of competitors and the overall property and casualty insurance market for indicators of impairment of its definite lived intangible assets. There was no impairment of these assets in 2015 or 2014.

8. Reinsurance

The Company cedes risk to unrelated reinsurers on a pro rata (quota share) and excess of loss basis in the ordinary course of business to limit its net loss exposure on insurance contracts. Reinsurance ceded arrangements do not discharge the Company of primary liability. Moreover, reinsurers may fail to pay the Company due to a lack of reinsurer liquidity, perceived improper underwriting, and losses for risks that are excluded from reinsurance coverage and other similar factors, all of which could adversely affect the Company's financial results.

The Company had the following reinsurance balances as of December 31, 2015 and 2014:

(Dollars in thousands)	December 31, 2015	December 31, 2014
Reinsurance receivables, net	\$ 115,594	\$ 125,718
Collateral securing reinsurance receivables	(6,445)	(8,701)
Reinsurance receivables, net of collateral	\$ 109,149	\$ 117,017
Allowance for uncollectible reinsurance receivables	\$ 9,675	\$ 9,350
Prepaid reinsurance premiums	44,363	4,725

The reinsurance receivables above are net of a purchase accounting adjustment related to discounting acquired loss reserves to their present value and applying a risk margin to the discounted reserves. This adjustment was \$3.0 million and \$4.0 million at December 31, 2015 and 2014, respectively.

Table of Contents**GLOBAL INDEMNITY PLC****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

As of December 31, 2015, the Company had one aggregate unsecured reinsurance receivable that exceeded 3% of shareholders' equity from the following reinsurer. Unsecured reinsurance receivables include amounts receivable for paid and unpaid losses and loss adjustment expenses, less amounts secured by collateral.

(Dollars in thousands)	Reinsurance Receivables	A.M. Best Ratings (As of December 31, 2015)
Munich Re America Corporation	\$ 53,381	A+

The effect of reinsurance on premiums written and earned is as follows:

(Dollars in thousands)	Written	Earned
For the year ended December 31, 2015:		
Direct business	\$ 458,185	\$ 452,441
Reinsurance assumed	132,048	144,554
Reinsurance ceded (1)	(88,989)	(92,852)
Net premiums	\$ 501,244	\$ 504,143
For the year ended December 31, 2014:		
Direct business	\$ 229,978	\$ 228,652
Reinsurance assumed	61,275	58,414
Reinsurance ceded	(18,072)	(18,547)
Net premiums	\$ 273,181	\$ 268,519
For the year ended December 31, 2013:		
Direct business	\$ 232,373	\$ 215,713
Reinsurance assumed	58,350	52,494
Reinsurance ceded	(18,739)	(19,485)
Net premiums	\$ 271,984	\$ 248,722

- (1) Includes ceded written premiums and ceded earned premiums of \$55.8 million and \$59.5 million, respectively, to American Bankers Insurance Company.

9. Income Taxes

The statutory income tax rates of the countries where the Company does business are 35% in the United States, 0% in Bermuda, 0% in the Cayman Islands, 0% in Gibraltar, 29.22% in the Duchy of Luxembourg, and 25% on non-trading income, 33% on capital gains and 12.5% on trading income in the Republic of Ireland. The statutory income tax rate of each country is applied against the annual taxable income of each country to calculate the annual income tax expense.

Table of Contents**GLOBAL INDEMNITY PLC****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The Company's income before income taxes from its non-U.S. subsidiaries and U.S. subsidiaries, including the results of the quota share and stop-loss agreements between Global Indemnity Reinsurance and the Insurance Operations, for the years ended December 31, 2015, 2014, and 2013 were as follows:

Year Ended December 31, 2015:

(Dollars in thousands)	Non-U.S. Subsidiaries	U.S. Subsidiaries	Eliminations	Total
Revenues:				
Gross premiums written	\$ 345,392	\$ 540,500	\$ (295,659)	\$ 590,233

Net realized investment gains	175	27,237		27,412
Other income (loss)	(4)	5,795		5,791
Total revenues	190,908	147,831	(19,605)	319,134
Losses and Expenses:				
Net losses and loss adjustment expenses	65,337	67,654		132,991
Acquisition costs and other underwriting expenses	64,822	40,829		105,651
Corporate and other operating expenses	4,745	6,869		11,614
Interest expense	1,165	24,609	(19,605)	6,169
Income (loss) before income taxes	\$ 54,839	\$ 7,870	\$	\$ 62,709

The following table summarizes the components of income tax expense (benefit):

(Dollars in thousands)	Years Ended December 31,		
	2015	2014	2013
Current income tax expense (benefit):			
Non-resident withholding	\$	\$ 6,250	\$
Foreign	263	129	163
U.S. Federal	(1,785)	2,787	859
Total current income tax expense (benefit)	(1,522)	9,166	1,022
Deferred income tax benefit:			
U.S. Federal	(7,201)	(828)	(3)
Total deferred income tax benefit	(7,201)	(828)	(3)
Total income tax expense (benefit)	\$ (8,723)	\$ 8,338	\$ 1,019

The weighted average expected tax provision has been calculated using income (loss) before income taxes in each jurisdiction multiplied by that jurisdiction's applicable statutory tax rate.

Table of Contents**GLOBAL INDEMNITY PLC****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The following table summarizes the differences between the tax provision for financial statement purposes and the expected tax provision at the weighted average tax rate:

(Dollars in thousands)	2015		Years Ended December 31, 2014		2013	
	Amount	% of Pre-Tax Income	Amount	% of Pre-Tax Income	Amount	% of Pre-Tax Income
Expected tax provision at weighted average	\$ (6,434)	(19.6%)	\$ 3,465	4.9%	\$ 2,954	4.7%
Adjustments:						
Non-resident withholding			6,250	8.8		
Tax exempt interest	(441)	(1.3)	(472)	(0.7)	(1,009)	(1.6)
Dividend exclusion	(784)	(2.4)	(1,340)	(1.9)	(1,135)	(1.8)
Other	(1,064)	(3.3)	435	0.6	209	0.3
Actual taxes on continuing operations	\$ (8,723)	(26.6%)	\$ 8,338	11.7%	\$ 1,019	1.6%

The effective income tax benefit rate for 2015 was 26.6%, compared with an effective income tax rate of 11.7% for 2014 and an effective income tax rate of 1.6% for 2013. The decrease in the effective income tax rate in 2015 compared to 2014 is primarily due to incurring acquisition expenses related to American Reliable, a decrease in capital gains in 2015, and a \$6.3 million withholding tax paid in 2014 in connection with the \$125 million dividend from Global Indemnity Group Inc. to U.A.I. Luxembourg S.à.r.l. The increase in the effective income tax rate in 2014 compared with 2013 is primarily due to an increase in capital gains in 2014 and a \$6.3 million withholding tax paid in 2014 in connection with the \$125 million dividend from Global Indemnity Group Inc. to U.A.I. Luxembourg S.à.r.l.

Table of Contents**GLOBAL INDEMNITY PLC****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The tax effects of temporary differences that give rise to significant portions of the net deferred tax assets at December 31, 2015 and 2014 are presented below:

(Dollars in thousands)	2015	2014
Deferred tax assets:		
Discounted unpaid losses and loss adjustment expenses	\$ 8,222	\$ 7,492
Unearned premiums	7,884	3,409
Section 163(j) carryforward	3,135	
Alternative minimum tax credit carryover	10,868	10,473
Net operating loss carryforward	1,934	
Partnership K1 basis differences	245	145
Capital gain on derivative instruments	5,340	4,786
Investment impairments	2,635	379
Stock options	2,635	2,048
Deferred acquisition costs		187
Stat-to-GAAP reinsurance reserve	1,364	1,424
Intercompany transfers	1,612	1,919
Depreciation and amortization	36	
Other	4,545	3,050
Total deferred tax assets	50,455	35,312
Deferred tax liabilities:		
Purchase accounting adjustment for American Reliable	6,095	
Intangible assets	3,893	3,220
Unrealized gain on securities available-for-sale and investments in limited partnerships included in accumulated other comprehensive income	3,896	10,263
Investment basis differences	1,034	692
Deferred acquisition costs	642	
Depreciation and amortization		16
Other	208	871
Total deferred tax liabilities	15,768	15,062
Total net deferred tax assets	\$ 34,687	\$ 20,250

Management believes it is more likely than not that the deferred tax assets will be completely utilized in future years. As a result, the Company has not recorded a valuation allowance at December 31, 2015 and 2014.

The Company has an alternative minimum tax (AMT) credit carryforward of \$10.9 million and \$10.5 million as of December 31, 2015 and 2014, respectively, which can be carried forward indefinitely. As of December 31, 2015, the Company has a net operating loss (NOL) carryforward of \$1.9 million which will expire in 2035. The Company had no NOL carryforward as of December 31, 2014. The Company has a Section 163(j) (163(j)) carryforward of \$3.1 million as of December 31, 2015 which can be carried forward indefinitely. The Company had no 163(j) carryforward as of December 31, 2014. The 163(j) carryforward is for disqualified interest paid or accrued to a related entity that is not subject to U.S. tax.

Edgar Filing: Global Indemnity plc - Form 10-K

The Company and some of its subsidiaries file income tax returns in the U.S. federal jurisdiction, and various states and foreign jurisdictions. The Company is no longer subject to U.S. federal tax examinations by tax authorities for tax years before 2010.

Table of Contents**GLOBAL INDEMNITY PLC****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Should the Company's subsidiaries that are subject to income taxes imposed by the U.S. authorities pay a dividend to their foreign affiliates, withholding taxes would apply. The Company has not recorded deferred taxes for potential withholding tax on undistributed earnings. The Company believes, although there can be no assurances, that it qualifies for treaty benefits under the Tax Convention with Luxembourg and would be subject to a 5% withholding tax if it were to pay a dividend. Determination of the unrecognized deferred tax liability related to these undistributed earnings is not practicable because of the complexities with its hypothetical calculation. In December, 2014, Global Indemnity Group, Inc. paid a dividend of \$125 million to U.A.I. (Luxembourg) S.à.r.l. and paid a 5% withholding tax of \$6.3 million. The Company did not pay any dividends from a U.S. subsidiary to a foreign affiliate during 2015.

The Company applies a more-likely-than-not recognition threshold for all tax uncertainties whereby it only recognizes those tax benefits that have a greater than 50% likelihood of being sustained upon examination by the taxing authorities. The Company had no unrecognized tax benefits during 2015 or 2014.

The Company classifies all interest and penalties related to uncertain tax positions as income tax expense. The Company did not incur any interest and penalties related to uncertain tax positions during the years ended December 31, 2015, 2014 and 2013. As of December 31, 2015, the Company did not record any liabilities for tax-related interest and penalties on its consolidated balance sheets.

10. Liability for Unpaid Losses and Loss Adjustment Expenses

Activity in the liability for unpaid losses and loss adjustment expenses is summarized as follows:

(Dollars in thousands)	Years Ended December 31,		
	2015	2014	2013
Balance at beginning of period	\$ 675,472	\$ 779,466	\$ 879,114
Less: Ceded reinsurance receivables	123,201	192,491	240,566
Net balance at beginning of period	552,271	586,975	638,548
Purchased reserves, gross	89,489		
Less: Purchased reserves ceded	12,800		
Purchase reserves, net	76,689		
Incurred losses and loss adjustment expenses related to:			
Current year	310,066	153,994	140,873
Prior years	(34,698)	(16,433)	(7,882)
Total incurred losses and loss adjustment expenses	275,368	137,561	132,991
Paid losses and loss adjustment expenses related to:			
Current year	164,058	55,485	50,732
Prior years	168,353	116,780	133,832
Total paid losses and loss adjustment expenses	332,411	172,265	184,564
Net balance at end of period	571,917	552,271	586,975
Plus: Ceded reinsurance receivables	108,130	123,201	192,491

Edgar Filing: Global Indemnity plc - Form 10-K

Balance at end of period	\$ 680,047	\$ 675,472	\$ 779,466
--------------------------	------------	------------	------------

When analyzing loss reserves and prior year development, the Company considers many factors, including the frequency and severity of claims, loss trends, case reserve settlements that may have resulted in significant development, and any other additional or pertinent factors that may impact reserve estimates.

Table of Contents

GLOBAL INDEMNITY PLC

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

During 2015, the Company reduced its prior accident year loss reserves by \$34.7 million, which consisted of a \$25.6 million decrease related to Commercial Lines and a \$9.1 million decrease related to Reinsurance Operations.

The \$25.6 million reduction of prior accident year loss reserves related to Commercial Lines primarily consisted of the following:

General Liability: A \$20.4 million reduction in aggregate with \$5.9 million of favorable development in the construction defect reserve category and \$14.5 million of favorable development in the other general liability reserve categories. In the construction defect reserve category, a reduction in both claims frequency and severity was observed across several accident years which contributed to the recognition of favorable development primarily in accident years 2008 through 2014. For general liability excluding construction defect, lower than expected claims severity was experienced across multiple accident years leading to the recognition of favorable development in accident years 2004 through 2014.

Professional: A \$6.2 million decrease in aggregate primarily related to better than anticipated claims frequency and severity in accident years 2006 through 2011.

The \$9.1 million reduction of prior accident year loss reserves related to Reinsurance Operations was primarily driven by \$6.8 million of favorable development in property mainly due to accident years 2011 through 2014 and \$2.8 million of favorable development in the marine product mainly due to accident years 2010 and 2011, partially offset by adverse development of \$1.0 million in workers compensation mainly due to accident year 2010. Ultimate losses from quota share underwriting years 2013 and prior were booked to the amount reported from cedants and reserve releases on legacy contracts due to better than anticipated case incurred emergence led to the recognition of favorable development.

During 2014, the Company reduced its prior accident year loss reserves by \$16.4 million, which consisted of a \$12.5 million decrease related to Commercial Lines and a \$3.9 million decrease related to Reinsurance Operations.

The \$12.5 million reduction of prior accident year loss reserves related to Commercial Lines primarily consisted of the following:

Property: A \$2.1 million increase due to higher than expected emergence on non-catastrophe claims primarily in accident years 2007, 2012, and 2013.

General Liability: A \$3.1 million reduction due to less than anticipated frequency in accident year 2001 and less than anticipated frequency and severity on claims from accident years 2007 through 2010 partially offset by greater than anticipated loss emergence in accident year 2013.

Asbestos and Environmental: A \$7.1 million increase related to policies written prior to 1990 as a result of recent severity being higher than expected due to faster erosion of underlying policy limits.

Professional: A \$19.4 million reduction primarily due to expected loss emergence being much less than anticipated for accident years 2007 through 2011.

Edgar Filing: Global Indemnity plc - Form 10-K

Umbrella: A \$2.7 million decrease primarily driven by less than anticipated frequency in accident years 2002 through 2007.

Commercial Auto: A \$3.6 million increase primarily related to accident years 2011 through 2013. Larger vehicles were written prior to 2014 and industry loss development factors were used to project losses.

Table of Contents

GLOBAL INDEMNITY PLC

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The \$3.9 million reduction of prior accident year loss reserves related to Reinsurance Operations was primarily due to better than anticipated loss emergence on property lines partially offset by adverse development related to commercial auto and higher than anticipated severity on the Company's marine product.

During 2013, the Company reduced its prior accident year loss reserves by \$7.9 million, which consisted of a \$7.6 million decrease related to Commercial Lines and a \$0.3 million decrease related to Reinsurance Operations.

The \$7.6 million reduction of prior accident year loss reserves related to Commercial Lines primarily consisted of the following:

Property: A \$9.2 million reduction primarily driven by better than expected development from accident years 2010, 2011, and 2012 related primarily to lower than expected non-catastrophe severity.

General Liability: A \$6.7 million reduction primarily due to better than expected emergence in nearly all accident years between 2003 through 2011 partially offset by an increase to accident years 1998 through 2002 and 2012 due to higher than anticipated loss emergence.

Asbestos and Environmental: A \$6.8 million increase primarily related to policies written prior to 1990.

Professional: A \$0.7 million increase primarily driven by \$2.2 million increase in aggregate from unexpected loss emergence in accident years 2006 to 2008 and 2010 offset by \$1.5 million of favorable emergence from accident years 1998 and 2011.

Umbrella: A \$1.1 million decrease primarily driven by better than expected loss emergence in accident years 2002 to 2010 offset by increases in 2011 and 2012.

Commercial Auto: A \$0.9 million increase primarily related to accident year 2011.

Marine: A \$0.9 million increase primarily related to accident years 2011 and 2012.

The \$0.3 million reduction of prior accident year loss reserves related to Reinsurance Operations was primarily due to better than anticipated loss emergence on property lines partially offset by adverse development on director and officer, general liability, automobile, and marine.

Prior to 2001, the Company underwrote multi-peril business insuring general contractors, developers, and sub-contractors primarily involved in residential construction that has resulted in significant exposure to construction defect (CD) claims. The Company's reserves for CD claims (\$62.2 million and \$69.8 million as of December 31, 2015 and 2014, net of reinsurance, respectively) are established based upon management's best estimate in consideration of known facts, existing case law and generally accepted actuarial methodologies. However, due to the inherent uncertainty concerning this type of business, the ultimate exposure for these claims may vary significantly from the amounts currently recorded.

The Company has exposure to asbestos and environmental (A&E) claims. The asbestos exposure primarily arises from the sale of product liability insurance, and the environmental exposure arises from the sale of general liability and commercial multi-peril insurance. In establishing the liability for unpaid losses and loss adjustment expenses related to A&E exposures, management considers facts currently known and the

Edgar Filing: Global Indemnity plc - Form 10-K

current state of the law and coverage litigation. Liabilities are recognized for known claims (including the cost of related litigation) when sufficient information has been developed to indicate the involvement of a specific insurance policy, and management can reasonably estimate its liability. In addition, liabilities have been established to cover additional exposures on both known and unasserted claims. Estimates of the liabilities are reviewed and updated regularly. Case law continues to evolve for such claims, and uncertainty exists about the outcome of coverage litigation and

Table of Contents**GLOBAL INDEMNITY PLC****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

whether past claim experience will be representative of future claim experience. Included in net unpaid losses and loss adjustment expenses as of December 31, 2015, 2014, and 2013 were IBNR reserves of \$26.0 million, \$26.4 million, and \$18.2 million, respectively, and case reserves of approximately \$4.5 million, \$4.8 million, and \$4.8 million, respectively, for known A&E-related claims.

The following table shows the Company's gross reserves for A&E losses:

(Dollars in thousands)	Years Ended December 31,		
	2015	2014	2013
Gross reserve for A&E losses and loss adjustment expenses beginning of period	\$ 56,535	\$ 50,155	\$ 44,767
Plus: Incurred losses and loss adjustment expenses case reserves	2,666	4,333	2,154
Plus: Incurred losses and loss adjustment expenses IBNR	(2,663)	7,340	5,961
Less: Payments	2,714	5,293	2,727
Gross reserves for A&E losses and loss adjustment expenses end of period	\$ 53,824	\$ 56,535	\$ 50,155

The following table shows the Company's net reserves for A&E losses:

(Dollars in thousands)	Years Ended December 31,		
	2015	2014	2013
Net reserve for A&E losses and loss adjustment expenses beginning of period	\$ 31,185	\$ 23,038	\$ 20,134
Plus: Incurred losses and loss adjustment expenses case reserves	395	2,754	1,351
Plus: Incurred losses and loss adjustment expenses IBNR	(394)	8,241	3,506
Less: Payments	657	2,848	1,953
Net reserves for A&E losses and loss adjustment expenses end of period	\$ 30,529	\$ 31,185	\$ 23,038

Establishing reserves for A&E and other mass tort claims involves more judgment than other types of claims due to, among other things, inconsistent court decisions, an increase in bankruptcy filings as a result of asbestos-related liabilities, and judicial interpretations that often expand theories of recovery and broaden the scope of coverage. The insurance industry continues to receive a substantial number of asbestos-related bodily injury claims, with an increasing focus being directed toward other parties, including installers of products containing asbestos rather than against asbestos manufacturers. This shift has resulted in significant insurance coverage litigation implicating applicable coverage defenses or determinations, if any, including but not limited to, determinations as to whether or not an asbestos-related bodily injury claim is subject to aggregate limits of liability found in most comprehensive general liability policies.

In 2009, one of the Company's insurance companies entered into a settlement agreement to resolve asbestos related coverage litigation related to approximately 3,900 existing asbestos-related bodily injury claims and future claims. The settlement was approved by the Court and a final order was issued in September 2014. As of December 31, 2015, the Company has no outstanding obligations as it relates to this settlement agreement.

As of December 31, 2015, 2014, and 2013, the survival ratio on a gross basis for the Company's open A&E claims was 15.0 years, 10.8 years, and 11.3 years, respectively. As of December 31, 2015, 2014, and 2013, the survival ratio on a net basis for the Company's open A&E claims was 16.8 years, 8.4 years, and 6.7 years, respectively. The survival ratio, which is the ratio of gross or net reserves to the 3-year average of annual paid claims, is a financial measure that indicates how long the current amount of gross or net reserves are expected to last based on the current rate of paid claims.

Table of Contents**GLOBAL INDEMNITY PLC****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****11. Debt**

The Company's outstanding debt consisted of the following at December 31, 2015 and 2014:

(Dollars in thousands)	December 31,	
	2015	2014
Margin Borrowing Facilities	\$ 75,646	\$ 174,673
7.75% Subordinated Notes due 2045	96,388	
Total	\$ 172,034	\$ 174,673

Margin Borrowing Facilities

The Company has available two margin borrowing facilities. The borrowing rate for each facility is tied to LIBOR and was approximately 1.3% and 1% at December 31, 2015 and 2014, respectively. These facilities are due on demand. The borrowings are subject to maintenance margin, which is a minimum account balance that must be maintained. A decline in market conditions could require an additional deposit of collateral. As of December 31, 2015, approximately \$95.6 million in securities were deposited as collateral to support borrowings. The amount borrowed against the margin accounts may fluctuate as routine investment transactions, such as dividends received, investment income received, maturities and pay-downs, impact cash balances. The margin facilities contain customary events of default, including, without limitation, insolvency, failure to make required payments, failure to comply with any representations or warranties, failure to adequately assure future performance, and failure of a guarantor to perform under its guarantee. The amount outstanding on the Company's margin borrowing facilities was \$75.6 million and \$174.7 million as of December 31, 2015 and 2014, respectively.

The Company recorded interest expense related to the Margin Borrowing Facilities of approximately \$1.9 million, \$0.7 million, and \$0.3 million for the years ended December 31, 2015, 2014, and 2013, respectively.

7.75% Subordinated Notes due 2045

On August 12, 2015, the Company issued \$100.0 million in aggregate principal amount of its 2045 Subordinated Notes through an underwritten public offering.

The notes bear interest at an annual rate equal to 7.75%, payable quarterly in arrears on February 15, May 15, August 15, and November 15 of each year, commencing November 15, 2015. The notes mature on August 15, 2045. The Company has the right to redeem the notes in \$25 increments, in whole or in part, on and after August 15, 2020, or on any interest payment date thereafter, at a redemption price equal to 100% of the principal amount of the notes being redeemed plus accrued and unpaid interest to, but not including, the date of redemption.

The notes are subordinated unsecured obligations and rank (i) senior to the Company's existing and future capital stock, (ii) senior in right of payment to future junior subordinated debt, (iii) equally in right of payment with any unsecured, subordinated debt that the Company incurs in the future that ranks equally with the notes, and (iv) subordinate in right of payment to any of the Company's existing and future senior debt. In addition, the notes are structurally subordinated to all existing and future indebtedness, liabilities and other obligations of the Company's subsidiaries.

The subordinated notes do not require the maintenance of any financial ratios or specified levels of net worth or liquidity, and do not contain provisions that would afford holders of the subordinated notes protection in the event of a sudden and dramatic decline in the Company's credit quality resulting from any highly leveraged

Table of Contents**GLOBAL INDEMNITY PLC****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

transaction, reorganization, restructuring, merger or similar transaction involving the Company that may adversely affect holders. The subordinated notes do not restrict the Company in any way, now or in the future, from incurring additional indebtedness, including senior indebtedness that would rank senior in right of payment to the subordinated notes. There is no right of acceleration of maturity of the subordinated notes in the case of default in the payment of principal, premium, if any, or interest on, the subordinated notes or in the performance of any other obligation of the Company under the notes or if the Company defaults on any other debt securities. Holders may accelerate payment of indebtedness on the notes only upon the Company's bankruptcy, insolvency or reorganization. AM Best, which provides the Company's industry rating, is giving the Company a 30% equity credit on the notes due to their 30 year maturity, as opposed to treating the notes entirely as debt.

The Company incurred \$3.7 million in deferred issuance costs associated with the notes, which is being amortized over the term of the notes. Interest expense, including amortization of deferred issuance costs, recognized on the notes was \$3.0 million for the year ended December 31, 2015.

The following table represents the amounts recorded for the 7.75% subordinated notes as of December 31, 2015:

	Outstanding Principal	December 31, 2015 Unamortized Debt Issuance Costs	Net Carrying Amount
7.75% Subordinated Notes due 2045	100,000	(3,612)	96,388

12. Shareholders Equity**Dividends**

The ability of Global Indemnity plc to pay dividends is subject to Irish regulations. Under Irish law, dividends and distributions may only be made from distributable reserves. As of December 31, 2015, the Company's distributable reserves were \$931.5 million.

Since the Company is a holding company and has no direct operations, its ability to pay dividends depends, in part, on the ability of its subsidiaries to pay dividends. Global Indemnity Reinsurance and the U.S. insurance subsidiaries are subject to significant regulatory restrictions limiting their ability to declare and pay dividends. See Note 18 for additional information regarding dividend limitations imposed on Global Indemnity Reinsurance and the U.S. insurance subsidiaries.

Repurchases and Redemptions of the Company's Ordinary Shares

The Company allows employees to surrender A ordinary shares as payment for the tax liability incurred upon the vesting of restricted stock that was issued under the Share Incentive Plan. During 2015, 2014, and 2013, the Company purchased an aggregate of 11,895, 5,444 and 2,370, respectively, of surrendered A ordinary shares from its employees for \$0.3 million, \$0.1 million and \$0.1 million, respectively. All shares purchased from employees by the Company are held as treasury stock and recorded at cost.

On October 29, 2015, Global Indemnity entered into a redemption agreement with certain affiliates of Fox Paine & Company and agreed to redeem 8,260,870 of its ordinary shares for \$190.0 million in the aggregate from affiliates of Fox Paine & Company. Global Indemnity also acquired rights, expiring December 31, 2019, to redeem an additional 3,397,031 ordinary shares for \$78.1 million, which is subject to an annual 3% increase. After giving effect to the share redemptions and regardless of whether or not the additional redemption rights are exercised, affiliates of Fox Paine & Company will continue to have the ability to cast a majority of votes on matters submitted to Global Indemnity shareholders for approval.

Table of Contents**GLOBAL INDEMNITY PLC****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The following table provides information with respect to ordinary shares that were surrendered, repurchased, or redeemed in 2015:

Period (1)	Total Number of Shares Purchased or Redeemed	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plan or Program	Approximate Dollar Value of Shares that May Yet Be Purchased Under the Plans or Programs
A ordinary shares:				
January 1 31, 2015	9,009(2)	\$ 28.37		
March 1 31, 2015	2,290(2)	\$ 26.98		
May 1 31, 2015	596(2)	\$ 27.01		
November 1 30, 2015	8,260,870(3)	\$ 23.00		
Total	8,272,765	\$ 23.01		

(1) Based on settlement date.

(2) Surrendered by employees as payment of taxes withheld on the vesting of restricted stock.

(3) Of these shares, 7,928,004 shares were converted from B ordinary shares to A ordinary shares. Of the 7,928,004 converted shares, 4,555,061 were redeemed and 3,372,943 went into a liquidating trust.

Other than the 7,928,004 B ordinary shares that were converted to A ordinary shares as noted above, no additional B ordinary shares were surrendered, repurchased or redeemed in 2015.

The following table provides information with respect to the ordinary shares that were surrendered or repurchased in 2014:

Period (1)	Total Number of Shares Purchased	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plan or Program	Approximate Dollar Value of Shares that May Yet Be Purchased Under the Plans or Programs
A ordinary shares:				
January 1 31, 2014	3,644(2)	\$ 25.30

13. Related Party Transactions
Fox Paine & Company

As of December 31, 2015, Fox Paine & Company beneficially owned shares having approximately 84% of the Company's total outstanding voting power. Fox Paine & Company has the right to appoint a number of the Company's Directors equal in aggregate to the pro rata percentage of the voting shares of the Company beneficially held by Fox Paine & Company for so long as Fox Paine & Company holds an aggregate of 25% or

Table of Contents

GLOBAL INDEMNITY PLC

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

more of the voting power in the Company. Fox Paine & Company controls the election of all of the Company's Directors due to its controlling share ownership. The Company's Chairman is a member of Fox Paine & Company. The Company relies on Fox Paine & Company to provide management services and other services related to the operations of the Company.

Global Indemnity Reinsurance was a limited partner in Fox Paine Capital Fund, II, which was managed by Fox Paine & Company. This investment was originally made by United National Insurance Company in June 2000 and pre-dates the September 5, 2003 acquisition by Fox Paine & Company of Wind River Investment Corporation, which was the predecessor holding company for United National Insurance Company. The Company's investment in Fox Paine Capital Fund, II was valued at \$3.4 million at December 31, 2014. In connection with the Company's share redemption, Global Indemnity Reinsurance elected to redeem its shares in Fox Paine Capital Fund II, and as a result, the Company no longer held an interest in Fox Paine Capital Fund II as of November 10, 2015. All of Global Indemnity Reinsurance's allocable Global Indemnity plc shares that were held by Fox Paine Capital Fund, II were transferred into a new liquidating partnership. Global Indemnity Reinsurance's allocation of these shares totaled 116,973 shares. Of these shares, 82,888 shares were redeemed for \$1.9 million and 34,085 shares are still being held by the new partnership, which also holds shares on behalf of other limited partners who elected to participate in the redemption. See note 12 for additional information on the share redemption.

During the year ended December 31, 2015, the Company received a distribution of \$0.8 million from Fox Paine Capital Fund II. There were no distributions received from Fox Paine Capital Fund II during 2014 and 2013.

The Company relies on Fox Paine & Company to provide management services and other services related to the operations of the Company. Starting in 2014, this fee is adjusted annually to reflect the percentage change in the CPI-U. In addition, the payment of the annual management fee will be deferred until a change of control or September, 2018, whichever occurs first, and is subject to an annual adjustment equal to the rate of return the Company earns on its investment portfolio. Management fee expense of \$1.9 million was incurred during each of the years ended December 31, 2015, 2014, and 2013. As of December 31, 2015 and 2014, unpaid management fees, which were included in other liabilities on the consolidated balance sheets, were \$2.6 million and \$0.6 million, respectively.

In connection with the acquisition of American Reliable, the Company agreed to pay to Fox Paine & Company an investment banking fee of 3% of the amount paid plus the additional capital required to operate American Reliable on a standalone basis and a \$1.5 million investment advisory fee, which in the aggregate, totaled \$6.5 million. This amount is included in corporate and other operating expenses on the Company's Consolidated Statements of Operations during the year ended December 31, 2015. As payment for these fees, 267,702 A ordinary shares of Global Indemnity were issued under the Global Indemnity plc Share Incentive Plan in May, 2015. These shares will be registered but cannot be sold until the earlier of five years or a change of control. See Note 15 for additional information on the Global Indemnity plc Share Incentive Plan.

During 2015, the Company reimbursed Fox Paine & Company \$1.2 million for expenses related to the redemption of the Company's ordinary shares. See Note 12 for additional information on the share redemption.

Cozen O Connor

The Company incurred \$0.7 million, \$0.2 million, and \$0.02 million for legal services rendered by Cozen O Connor during the years ended December 31, 2015, 2014, and 2013, respectively. Stephen A. Cozen, the chairman of Cozen O Connor, was a member of the Company's Board of Directors until he resigned on December 31, 2015.

Table of Contents**GLOBAL INDEMNITY PLC****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)*****Crystal & Company***

During each of the years ended December 31, 2015, 2014 and 2013, the Company incurred \$0.2 million in brokerage fees to Crystal & Company, an insurance broker. In January of 2016, a subsidiary of the Company entered into an agency relationship with Crystal & Company in which Crystal & Company will be paid a commission on net premiums written and collected consistent with those paid to other agencies in the Company's ordinary course of business. James W. Crystal, the chairman and chief executive officer of Crystal & Company, is a member of the Company's Board of Directors.

Hiscox Insurance Company (Bermuda) Ltd.

Global Indemnity Reinsurance is a participant in two reinsurance agreements with Hiscox Insurance Company (Bermuda) Ltd. (Hiscox Bermuda) while Steve Green, the President of Global Indemnity Reinsurance, was a member of Hiscox Bermuda's Board of Directors. Steve Green was a member of the Hiscox Bermuda's Board of Directors until May, 2014. The Company estimated that the following earned premium and incurred losses related to these agreements have been assumed by Global Indemnity Reinsurance from Hiscox Bermuda:

(Dollars in thousands)	Years Ended December 31,		
	2015	2014	2013
Assumed earned premium	\$ 2,266	\$ 6,383	\$ 3,053
Assumed losses and loss adjustment expenses	509	763	987

Net balances due to Global Indemnity Reinsurance under this agreement are as follows:

(Dollars in thousands)	As of December 31.	
	2015	2014
Net receivable (payable) balance	\$ (110)	\$ 2,897

14. Commitments and Contingencies***Commitments***

In 2014, the Company entered into a \$50 million commitment to purchase an alternative investment vehicle which is comprised of European non-performing loans. As of December 31, 2015, the Company has funded \$30.0 million of this commitment leaving \$20.0 million as unfunded.

Lease Commitments

Total rental expense under operating leases for the years ended December 31, 2015, 2014, and 2013 was \$3.5 million, \$2.6 million, and \$2.4 million, respectively. Rent expense was net of sublease income of \$0.07 million, \$0.04 million, and \$0.01 million for the years ended December 31, 2015, 2014, 2013, respectively. At December 31, 2015, future minimum cash payments under non-cancelable operating leases were as follows:

(Dollars in thousands)	
2016	\$ 3,263
2017	3,180

Edgar Filing: Global Indemnity plc - Form 10-K

2018	3,149
2019	2,122
2020 and thereafter	114
Total (1)	\$ 11,828

(1) Minimum payments have not been reduced by minimum sublease rentals of \$24 due in the future under non-cancelable subleases.

GLOBAL INDEMNITY PLC

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Legal Proceedings

The Company is, from time to time, involved in various legal proceedings in the ordinary course of business. The Company maintains insurance and reinsurance coverage for such risks in amounts that it considers adequate. However, there can be no assurance that the insurance and reinsurance coverage that the Company maintains is sufficient or will be available in adequate amounts or at a reasonable cost. The Company does not believe that the resolution of any currently pending legal proceedings, either individually or taken as a whole, will have a material adverse effect on its business, results of operations, cash flows, or financial condition.

There is a greater potential for disputes with reinsurers who are in runoff. Some of the Company's reinsurers have operations that are in runoff, and therefore, the Company closely monitors those relationships. The Company anticipates that, similar to the rest of the insurance and reinsurance industry, it will continue to be subject to litigation and arbitration proceedings in the ordinary course of business.

Other Commitments

The Company is party to a Management Agreement, as amended, with Fox Paine & Company, whereby in connection with certain management services provided to it by Fox Paine & Company, the Company agreed to pay an annual management fee to Fox Paine & Company. See Note 13 above for additional information pertaining to this management agreement.

15. Share-Based Compensation Plans

The fair value method of accounting recognizes share-based compensation to employees and non-employee directors in the statements of operations using the grant-date fair value of the stock options and other equity-based compensation expensed over the requisite service and vesting period.

For the purpose of determining the fair value of stock option awards, the Company uses the Black-Scholes option-pricing model. An estimation of forfeitures is required when recognizing compensation expense which is then adjusted over the requisite service period should actual forfeitures differ from such estimates. Changes in estimated forfeitures are recognized through a cumulative adjustment to compensation in the period of change.

The prescribed accounting guidance also requires tax benefits relating to excess stock-based compensation deductions to be prospectively presented in the statement of cash flows as financing cash inflows. The tax benefit resulting from stock-based compensation deductions in excess of amounts reported for financial reporting purposes was \$0.05 million and \$0.04 million for the years ended December 31, 2015 and 2014, respectively. There was no tax benefit resulting from stock-based compensation deductions in excess of amounts reported for financial reporting purposes during 2013.

Share Incentive Plan

On June 11, 2014, the Company's Shareholders approved the Global Indemnity plc Share Incentive Plan (the Plan). The previous share incentive plan, which became effective in 2003, expired per its terms on September 5, 2013. The purpose of the Plan is to give the Company a competitive advantage in attracting and retaining officers, employees, consultants and non-employee directors by offering stock options, restricted shares and other stock-based awards. Under the Plan, the Company may grant up to 2.0 million A ordinary shares pursuant to grants under the Plan.

Table of Contents**GLOBAL INDEMNITY PLC****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Options**

Award activity for stock options granted under the Plan and the weighted average exercise price per share are summarized as follows:

	Time-Based Options	Performance- Based Options	Total Options	Weighted Average Exercise Price Per Share
Options outstanding at January 1, 2013	464,743		464,743	\$ 19.87
Options issued				
Options forfeited	(5,000)		(5,000)	\$ 29.24
Options exercised	(14,292)		(14,292)	\$ 20.00
Options expired	(32,951)		(32,951)	\$ 34.00
Options purchased by the Company				
Options outstanding at December 31, 2013	412,500		412,500	\$ 18.62
Options issued	325,000		325,000	\$ 31.74
Options forfeited	(125,000)		(125,000)	\$ 19.60
Options exercised				
Options expired				
Options purchased by the Company				
Options outstanding at December 31, 2014	612,500		612,500	\$ 25.38
Options issued		200,000	200,000	\$ 28.37
Options forfeited				
Options exercised				
Options expired	(12,500)		(12,500)	\$ 37.70
Options purchased by the Company				
Options outstanding at December 31, 2015	600,000	200,000	800,000	\$ 25.94
Options exercisable at December 31, 2015	360,000		360,000	\$ 20.29

During the year ended December 31, 2015, the Company awarded 200,000 options with a strike price of \$28.37 per share which vest one third on each of December 31, 2015, 2016, and 2017 based on achievement of Board approved performance targets. 66,667 of the options were due to vest on December 31, 2015 but did not meet the performance criteria for vesting. During the year ended December 31, 2014, the Company granted 325,000 Time-Based Options under the Plan. Of these options, 25,000 were forfeited during 2014. The remaining 300,000 stock options were issued to the Company's Chief Executive Officer. See below for vesting schedule related to this stock award. No stock options were awarded in the year ended December 31, 2013.

The Company recorded \$0.4 million, \$0.3 million, and \$1.2 million of compensation expense for stock options outstanding under the Plan in each of the years ended December 31, 2015, 2014, and 2013, respectively.

The Company did not receive any proceeds from the exercise of options during 2015 or 2014 under the Plan. In 2013, the Company received \$0.3 million from the issuance of 14,292 A ordinary shares at a weighted average grant date value of \$20.00 per share exercised by a former employee of the Company under the previous share incentive plan.

Amortization expense related to options outstanding is anticipated to be \$0.4 million in 2016 and 2017.

Table of Contents**GLOBAL INDEMNITY PLC****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Option intrinsic values, which are the differences between the fair value of \$29.02 at December 31, 2015 and the strike price of the option, are as follows:

	Number of Shares	Weighted Average Strike Price	Intrinsic Value
Outstanding	800,000	\$ 25.94	\$ 3.5 million
Exercisable	360,000	\$ 20.29(1)	\$ 3.3 million
Exercised (2)		N/A	N/A

- (1) Includes the weighted average strike price on 60,000 of options which are excluded from the intrinsic value calculation of \$3.3 million due to the strike price of the options exceeding the fair value of \$29.02 at December 31, 2015.
- (2) The intrinsic value of the exercised options is the difference between the fair market value at time of exercise and the strike price of the option.

The options exercisable at December 31, 2015 include the following:

Option Price	Number of options exercisable
\$17.87	300,000
\$32.38	60,000
Options exercisable at December 31, 2015	360,000

The weighted average fair value of options granted under the Plan was \$8.69 and \$7.92 in 2015 and 2014, respectively, using a Black-Scholes option-pricing model and the following weighted average assumptions. There were no options granted under the Plan in 2013.

	2015	2014
Dividend yield	0.0%	0.0%
Expected volatility	31.59%	37.7%
Risk-free interest rate	1.7%	1.7%
Expected option life	5.0 years	6.9 years

The following tables summarize the range of exercise prices of options outstanding at December 31, 2015, 2014, and 2013:

Ranges of Exercise Prices	Outstanding at December 31, 2015	Weighted Average Per Share Exercise Price	Weighted Average Remaining Life
\$17.87 \$19.99	300,000	\$ 17.87	5.7 years
\$20.00 \$29.99	200,000	\$ 28.37	9.0 years
\$30.00 \$37.70	300,000(1)	\$ 32.38	8.1 years

Edgar Filing: Global Indemnity plc - Form 10-K

Total

800,000

Restricted Shares

In addition to stock option grants, the Plan also provides for the granting of restricted shares to employees and non-employee Directors. The Company recognized compensation expense for restricted stock of \$3.5 million, \$2.6 million and \$2.1 million for 2015, 2014, and 2013, respectively. The total unrecognized compensation expense for the non-vested restricted stock is \$6.2 million at December 31, 2015, which will be recognized over a weighted average life of 1.9 years.

The following table summarizes the restricted stock grants since the 2003 inception of the previous share incentive plan.

Year	Restricted Stock Awards		
	Employees	Directors	Total
Inception through 2012	629,481	354,859	984,340
2013	81,587	50,421	132,008
2014	95,694	36,608	132,302
2015	138,507	36,321	174,828
	945,269	478,209	1,423,478

Table of Contents**GLOBAL INDEMNITY PLC****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The following table summarizes the non-vested restricted shares activity for the years ended December 31, 2015, 2014, and 2013:

	Number of Shares	Weighted Average Price Per Share
Non-vested Restricted Shares at January 1, 2013	34,504	\$ 17.87
Shares issued	132,008	\$ 22.78
Shares vested	(67,937)	\$ 22.17
Shares forfeited	(454)	\$ 22.13
Non-vested Restricted Shares at December 31, 2013	98,121	\$ 21.48
Shares issued	132,302	\$ 25.67
Shares vested	(57,017)	\$ 24.29
Shares forfeited	(1,131)	\$ 22.13
Non-vested Restricted Shares at December 31, 2014	172,275	\$ 23.76
Shares issued	174,828	\$ 28.24
Shares vested	(70,503)	\$ 25.31
Shares forfeited	(16,695)	\$ 24.11
Non-vested Restricted Shares at December 31, 2015	259,905	\$ 26.33

Based on the terms of the Restricted Share grants, all forfeited shares revert back to the Company.

During 2013, the Company granted an aggregate of 81,587 A ordinary shares to key employees at a weighted average grant date fair value of \$22.13 per share. Of the A ordinary shares granted in 2013, 11,296 were granted to the Company's Chief Executive Officer and vest 33 1/3% on each subsequent anniversary date of the grant for a period of three years subject to an accident year true-up of bonus year underwriting results as of the third anniversary of the grant. The remaining 70,291 shares were granted to key employees and will vest as follows:

16.5%, 16.5%, and 17.0% of the granted stock vest on the first, second, and third anniversary of the grant, respectively.

50.0% of granted stock vests 100% on the third anniversary of the grant subject to accident year true-up of bonus year underwriting results and are subject to Board approval.

During 2013, the Company granted an aggregate of 50,421 A ordinary shares, at a weighted average grant date fair value of \$23.83 per share, to non-employee directors under the previous share incentive plan.

Included in the 50,421A ordinary shares are 18,838 A ordinary shares earned by the non-employee directors of the Company during 2013 which have a weighted average grant date fair value of \$25.38 per share. As of December 31, 2013, these shares were not granted but were considered issued and outstanding for purposes of the financial statement and were subject to shareholder approval of the Plan at the Company's June 11, 2014 annual shareholder meeting. The shareholders approved the plan at the June 11, 2014 annual shareholder meeting.

Edgar Filing: Global Indemnity plc - Form 10-K

During 2014, the Company granted an aggregate of 95,694 A ordinary shares to key employees at a weighted average grant date fair value of \$25.37 per share under the Plan. Of the shares granted in 2014, 5,671 were granted to a key employee and vest 33 1/3% on each subsequent anniversary date of the award for a period of three years and 11,857 were granted to the Company's Chief Executive Officer and vest 33 1/3% on each

Table of Contents

GLOBAL INDEMNITY PLC

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

subsequent anniversary date of the grant for a period of three years subject to an accident year true-up of bonus year underwriting results as of the third anniversary of the grant. The remaining 78,166 shares were granted to key employees and will vest as follows:

16.5%, 16.5%, and 17.0% of the granted stock vest on the first, second, and third anniversary of the grant, respectively.

50% of granted stock vests 100% on the third anniversary of the grant subject to accident year true-up of bonus year underwriting results and are subject to Board approval.

During 2014, the Company granted 36,608 A ordinary shares, at a weighted average grant date fair value of \$26.46 per share, to non-employee directors of the Company under the Plan. As noted above, an additional 18,838 A ordinary shares were issued to non-employee directors on June 12, 2014. These shares were earned by non-employee directors prior to January 1, 2014 and were conditioned on shareholders' approval of the Plan at the Company's June 11, 2014 annual shareholder meeting. The shareholders approved the plan at the June 11, 2014 annual shareholder meeting.

During 2015, the Company granted an aggregate of 138,507 A ordinary shares to key employees at a weighted average grant date fair value of \$28.37 per share under the Plan. Of the shares granted in 2015, 10,574 were granted to the Company's Chief Executive Officer and vest 33 1/3% on each subsequent anniversary date of the grant for a period of three years subject to an accident year true-up of bonus year underwriting results as of the third anniversary of the grant and an additional 44,058 shares were granted to the Company's Chief Executive Officer and other key employees which vest 100% on January 1, 2018. The remaining 83,875 shares were granted to key employees and will vest as follows:

16.5%, 16.5%, and 17.0% of the granted stock vest on the first, second, and third anniversary of the grant, respectively.

50% of granted stock vests 100% on the third anniversary of the grant subject to calendar year true-up of bonus year underwriting results and are subject to Board approval.

During 2015, the Company granted 36,321 A ordinary shares, at a weighted average grant date fair value of \$27.73 per share, to non-employee directors of the Company under the Plan.

All of the shares granted to non-employee directors in 2015, 2014, and 2013 were fully vested but subject to certain restrictions.

Chief Executive Officer

Effective September 19, 2011, Cynthia Y. Valko was hired as the Company's Chief Executive Officer.

Ms. Valko's terms of employment included two equity components including the granting of 300,000 stock options with a strike price equal to the closing price of the Company's shares on the trading day preceding the start date, or \$17.87 per share, and an annual bonus opportunity of which 50% shall be paid in restricted shares based on the market value of the Company's shares as of December 31 of the subject bonus year. The stock options vested 33 1/3% on December 31, 2012, 2013, and 2014 pending Board approval at the time of vesting. The restricted shares vest 33 1/3% on each anniversary of the subject bonus year. All equity components based on performance are subject to accident year true-up of bonus year underwriting results and are subject to Board approval.

In 2014, Ms. Valko was awarded an additional 300,000 stock options. The stock options vest as follows: 20% on December 31, 2015, 30% on December 31, 2016, and the remaining 50% on December 31, 2017 and are based on achieving underwriting income, premium volume, and underwriting profitability targets, subject to an

Table of Contents**GLOBAL INDEMNITY PLC****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

accident year true up on the 3rd anniversary of each such year. Vesting of the stock options is subject to continued employment. The exercise price applicable to the Stock Options is \$25.00 subject to adjustment based on the Company's average year-end tangible book value per share, the average interest rate of certain Treasury bonds and the time period elapsed between January 1, 2014 and the date the stock options are exercised. The stock options were granted under and are subject to the terms of the Plan, as amended, subject to shareholder approval of such plan to the extent required to affect such grant under the plan.

16. 401(k) Plan

The Company maintains a 401(k) defined contribution plan that covers all eligible U.S. employees. Under this plan, the Company matches 100% of the first 6% contributed by an employee. Vesting on contributions made by the Company is immediate. Total expenses for the plan were \$2.0 million, \$1.2 million, and \$1.2 million for the years ended December 31, 2015, 2014, and 2013, respectively.

17. Earnings Per Share

Earnings per share have been computed using the weighted average number of ordinary shares and ordinary share equivalents outstanding during the period.

The following table sets forth the computation of basic and diluted earnings per share.

(Dollars in thousands, except share and per share data)	Years Ended December 31,		
	2015	2014	2013
Net income	\$ 41,469	\$ 62,856	\$ 61,690
<i>Basic earnings per share:</i>			
Weighted average shares outstanding - basic	24,253,657	25,131,811	25,072,712
Net income per share	\$ 1.71	\$ 2.50	\$ 2.46
<i>Diluted earnings per share:</i>			
Weighted average shares outstanding - diluted	24,505,851	25,331,420	25,174,015
Net income per share	\$ 1.69	\$ 2.48	\$ 2.45

A reconciliation of weighted average shares for basic earnings per share to weighted average shares for diluted earnings per share is as follows:

	Years Ended December 31,		
	2015	2014	2013
Weighted average shares for basic earnings per share	24,253,657	25,131,811	25,072,712
Non-vested restricted stock	148,669	100,546	53,876
Options	103,525	99,063	47,427
Weighted average shares for diluted earnings per share	24,505,851	25,331,420	25,174,015

Edgar Filing: Global Indemnity plc - Form 10-K

The weighted average shares outstanding used to determine dilutive earnings per share for the years ended December 31, 2015, 2014 and 2013 do not include 500,000, 312,500 and 12,500 options, respectively, which were deemed to be anti-dilutive.

Table of Contents**GLOBAL INDEMNITY PLC****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The following table summarizes options which are deemed to be anti-dilutive at December 31, 2015:

Grant Date	Expiration Date	Outstanding Options	Strike Price
February 9, 2014	February 10, 2024	300,000	\$ 32.38
January 1, 2015	January 1, 2025	200,000	\$ 28.37
		500,000	

18. Statutory Financial Information

GAAP differs in certain respects from Statutory Accounting Principles (SAP) as prescribed or permitted by the various U.S. state insurance departments. The principal differences between SAP and GAAP are as follows:

Under SAP, investments in debt securities are primarily carried at amortized cost, while under GAAP the Company records its debt securities at estimated fair value.

Under SAP, policy acquisition costs, such as commissions, premium taxes, fees and other costs of underwriting policies are charged to current operations as incurred, while under GAAP such costs are deferred and amortized on a pro rata basis over the period covered by the policy.

Under SAP, certain assets designated as Non-admitted assets (such as prepaid expenses) are charged against surplus.

Under SAP, net deferred income tax assets are admitted following the application of specified criteria, with the resulting admitted deferred tax amount being credited directly to surplus.

Under SAP, certain premium receivables are non-admitted and are charged against surplus based upon aging criteria.

Under SAP, the costs and related receivables for guaranty funds and other assessments are recorded based on management's estimate of the ultimate liability and related receivable settlement, while under GAAP such costs are accrued when the liability is probable and reasonably estimable and the related receivable amount is based on future premium collections or policy surcharges from in-force policies.

Under SAP, unpaid losses and loss adjustment expenses and unearned premiums are reported net of the effects of reinsurance transactions, whereas under GAAP, unpaid losses and loss adjustment expenses and unearned premiums are reported gross of reinsurance.

Under SAP, a provision for reinsurance is charged to surplus based on the authorized status of reinsurers, available collateral, and certain aging criteria, whereas under GAAP, an allowance for uncollectible reinsurance is established based on management's best estimate of the collectability of reinsurance receivables.

The National Association of Insurance Commissioners (NAIC) issues model laws and regulations, many of which have been adopted by state insurance regulators, relating to: (a) risk-based capital (RBC) standards; (b) codification of insurance accounting principles; (c) investment restrictions; and (d) restrictions on the ability of insurance companies to pay dividends.

The Company's U.S. insurance subsidiaries are required by law to maintain certain minimum surplus on a statutory basis, and are subject to regulations under which payment of a dividend from statutory surplus is restricted and may require prior approval of regulatory authorities. Applying the current regulatory restrictions as of December 31, 2015, the maximum amount of distributions that could be paid in 2016 by the United National

Table of Contents**GLOBAL INDEMNITY PLC****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

insurance companies, the Penn-America insurance companies, and American Reliable as dividends under applicable laws and regulations without regulatory approval is approximately \$17.3 million, \$8.3 million and \$7.8 million, respectively. The Penn-America insurance companies limitation includes \$2.7 million that would be distributed to United National Insurance Company or its subsidiary Penn Independent Corporation based on the December 31, 2015 ownership percentages. For 2015, the Penn-America insurance companies declared and paid dividends of \$8.4 million, the United National insurance companies declared dividends of \$35.0 million and American Reliable did not declare or pay any dividends.

The NAIC's RBC model provides a tool for insurance regulators to determine the levels of statutory capital and surplus an insurer must maintain in relation to its insurance and investment risks, as well as its reinsurance exposures, to assess the potential need for regulatory attention. The model provides four levels of regulatory attention, varying with the ratio of an insurance company's total adjusted capital to its authorized control level RBC (ACLRBC). If a company's total adjusted capital is:

- (a) less than or equal to 200%, but greater than 150% of its ACLRBC (the Company Action Level), the company must submit a comprehensive plan to the regulatory authority proposing corrective actions aimed at improving its capital position;
- (b) less than or equal to 150%, but greater than 100% of its ACLRBC (the Regulatory Action Level), the regulatory authority will perform a special examination of the company and issue an order specifying the corrective actions that must be followed;
- (c) less than or equal to 100%, but greater than 70% of its ACLRBC (the Authorized Control Level), the regulatory authority may take any action it deems necessary, including placing the company under regulatory control; and
- (d) less than or equal to 70% of its ACLRBC (the Mandatory Control Level), the regulatory authority must place the company under its control.

Based on the standards currently adopted, the Company reported in its 2015 statutory filings that the capital and surplus of the U.S. insurance companies are above the prescribed Company Action Level RBC requirements.

The following is selected information for the Company's U.S. insurance companies, net of intercompany eliminations, where applicable, as determined in accordance with SAP:

(Dollars in thousands)	Years Ended December 31,		
	2015	2014	2013
Statutory capital and surplus, as of end of period (1)	\$ 318,101	\$ 253,362	\$ 251,464
Statutory net income (loss)	48,633	36,003	31,781

(1) Includes extraordinary dividend declared in 2013 for an aggregate of \$200 million.

Global Indemnity Reinsurance must also prepare annual statutory financial statements. The Bermuda Insurance Act 1978 (the Insurance Act) prescribes rules for the preparation and substance of these statutory financial statements which include, in statutory form, a balance sheet, an income statement, a statement of capital and surplus and notes thereto. The statutory financial statements are not prepared in accordance with GAAP or SAP and are distinct from the financial statements prepared for presentation to Global Indemnity Reinsurance's shareholders and under the Bermuda Companies Act 1981 (the Companies Act), which financial statements will be prepared in accordance with GAAP.

Table of Contents**GLOBAL INDEMNITY PLC****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The principal differences between statutory financial statements prepared under the Insurance Act and GAAP are as follows:

Under the Insurance Act, policy acquisition costs, such as commissions, premium taxes, fees and other costs of underwriting policies are charged to current operations as incurred, while under GAAP such costs are deferred and amortized on a pro rata basis over the period covered by the policy.

Under the Insurance Act, prepaid expenses and intangible assets are charged to current operations as incurred, while under GAAP such costs are deferred and amortized on a pro rata basis.

Under the Insurance Act, unpaid losses and loss adjustment expenses and unearned premiums are reported net of the effects of reinsurance transactions, whereas under GAAP, unpaid losses and loss adjustment expenses and unearned premiums are reported gross of reinsurance.

Under the Companies Act, Global Indemnity Reinsurance may only declare or pay a dividend if it has no reasonable grounds for believing that it is, or would after the payment be, unable to pay its liabilities as they become due, or if the realizable value of its assets would not be less than the aggregate of its liabilities and its issued share capital and share premium accounts. Global Indemnity Reinsurance is also prohibited, without the approval of the BMA, from reducing by 15% or more its total statutory capital as set out in its previous year's statutory financial statements, and any application for such approval must include such information as the BMA may require. Based upon the total statutory capital plus the statutory surplus as set out in its 2015 statutory financial statements that will be filed in 2016, Global Indemnity Reinsurance could pay a dividend of up to \$234.8 million without requesting BMA approval. Global Indemnity Reinsurance is dependent on receiving distributions from its subsidiaries in order to pay the full dividend in cash.

The following is selected information for Global Indemnity Reinsurance, net of intercompany eliminations, where applicable, as determined in accordance with the Bermuda Insurance Act 1978:

(Dollars in thousands)	Years Ended December 31,		
	2015	2014	2013
Statutory capital and surplus, as of end of period	\$ 713,842	\$ 923,862	\$ 913,401
Statutory net income (loss)	864	44,593	31,697

19. Segment Information

The acquisition of American Reliable has impacted the way the Company manages and analyzes its operating results. The business acquired from American Reliable is considered to be a separate segment, Personal Lines. The Company now manages its business through three reportable business segments: Commercial Lines, managed in Bala Cynwyd, PA, offers specialty property and casualty products designed for product lines such as Small Business Binding Authority, Property Brokerage, and Programs; Personal Lines, managed in Scottsdale, AZ, offers specialty personal lines and agricultural coverage; and Reinsurance Operations, managed in Bermuda, provides reinsurance solutions through brokers and primary writers including insurance and reinsurance companies.

All three segments follow the same accounting policies used for the Company's consolidated financial statements. For further disclosure regarding the Company's accounting policies, please see Note 2.

Edgar Filing: Global Indemnity plc - Form 10-K

Prior to 2015, the Commercial Lines segment was known as Insurance Operations segment. With the acquisition of American Reliable, the Insurance Operations segment was renamed to Commercial Lines segment. The newly acquired American Reliable became the Company's Personal Lines segment. For segment reporting, the values for 2013 and 2014 did not change for Commercial Lines and Reinsurance Operations.

Table of Contents**GLOBAL INDEMNITY PLC****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The following are tabulations of business segment information for the years ended December 31, 2015, 2014, and 2013. Corporate information is included to reconcile segment data to the consolidated financial statements.

2015:

20. Supplemental Cash Flow Information**Taxes and Interest Paid**

The Company paid the following net federal income taxes and interest for 2015, 2014, and 2013:

(Dollars in thousands)	Years Ended December 31,		
	2015	2014	2013

Edgar Filing: Global Indemnity plc - Form 10-K

Federal income taxes paid	\$ 104	\$ 13,997	\$ 162
Federal income taxes recovered	2	136	7,613
Interest paid	3,926	804	7,678

Table of Contents**GLOBAL INDEMNITY PLC****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)*****Non-Cash Activities***

On January 1, 2015, Global Indemnity Group, Inc. acquired 100% of the voting equity interest of American Reliable. In conjunction with the acquisition, fair value of assets acquired and liabilities assumed by the Company were as follows:

(Dollars in thousands)	
Fair value of assets acquired (including goodwill)	\$ 383,668
Liabilities assumed	283,871

21. New Accounting Pronouncements

In September, 2015, the Financial Accounting Standards Board (FASB) issued new accounting guidance surrounding business combinations. The new guidance requires an acquirer to recognize adjustments to provisional amounts that are identified during the measurement period in the reporting period in which the adjustment is determined. It also requires that the acquirer record, in the same period's financial statements, the effect on earnings of changes in depreciation, amortization, or other income effects, if any, as a result of the change to the provisional amounts, calculated as if the accounting had been completed at the acquisition date. This guidance is effective for public entities for fiscal years beginning after December 15, 2015, including interim periods within those fiscal years. This guidance should be applied prospectively to adjustments to provisional amounts that occur after the effective date of this guidance with earlier application permitted for financial statements that have not been issued. This guidance will be applicable to the Company if there is any material adjustments to amounts previously recorded during the measurement period related to the American Reliable acquisition. This guidance may also be applicable to future acquisitions. The Company plans to adopt this guidance in the first quarter of 2016.

In May, 2015, the FASB issued new accounting guidance surrounding investments in certain entities that calculate net asset value per share. The new guidance removes the requirement to categorize within the fair value hierarchy all investments for which fair value is measured using the net asset value per share practical expedient. It also removes the requirement to make certain disclosures for all investments that are eligible to be measured at fair value using the net asset value per share practical expedient. This guidance is effective for public business entities for fiscal years beginning after December 15, 2015, and interim periods within those fiscal years. Early adoption is permitted. The Company adopted this guidance in the fourth quarter of 2015 which resulted in the Company's other invested assets, that are measured utilizing net asset value, being removed from the fair value hierarchy. The adoption of this guidance only impacted the Company's fair value disclosures and had no impact on the Company's financial condition, results of operations, or cash flows.

In May, 2015, the FASB issued new accounting guidance regarding short-duration contracts. The new guidance requires additional disclosure regarding the liability for unpaid claims and claim adjustment expenses. This guidance is effective for public business entities for annual periods beginning after December 15, 2015 and interim periods within annual periods beginning after December 15, 2016. Early adoption is permitted. The Company plans to include these disclosures in its year ended December 31, 2016 financial statements.

In April 2015, the FASB issued new accounting guidance which requires that debt issuance costs be presented in the balance sheet as a direct reduction from the carrying amount of the recognized debt liability, consistent with the treatment of debt discounts or premiums. Amortization of debt issuance costs is to be reported as interest expense. The recognition and measurement guidance for debt issuance costs are not affected by this new guidance. For public entities, the guidance is effective for financial statements issued for fiscal years beginning after December 15, 2015 and interim periods within those fiscal years. Early adoption is permitted. The Company adopted this guidance in the third quarter, 2015.

Table of Contents**GLOBAL INDEMNITY PLC****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

In May, 2014, the FASB issued new accounting guidance regarding the recognition of revenue from customers arising from the transfer of goods and services. New and enhanced disclosures will also be required. Long and short duration insurance contracts, which comprise the majority of the Company's revenues, are excluded from this accounting guidance. This guidance is effective for public entities for annual reporting periods beginning after December 15, 2016, including interim periods within that reporting period. Early application is not permitted. Although the Company is still evaluating the impact of this new guidance, the Company does not anticipate it will have a material impact on its financial condition, results of operations, and cash flows.

In February, 2013, the FASB issued new accounting guidance regarding other comprehensive income. The new guidance requires additional disclosure regarding amounts reclassified out of accumulated other comprehensive by component. This guidance was effective for reporting periods beginning after December 15, 2012. The Company adopted this guidance effective January 1, 2013.

The Company does not expect any of these new accounting pronouncements to have a material impact on the Company's consolidated statements of financial position or results of operations.

22. Summary of Quarterly Financial Information (Unaudited)

An unaudited summary of the Company's 2015 and 2014 quarterly performance is as follows:

(Dollars in thousands, except per share data)	Year Ended December 31, 2015			
	First Quarter	Second Quarter	Third Quarter	Fourth Quarter
Net premiums earned	\$ 127,337	\$ 128,877	\$ 124,707	\$ 123,222
Net investment income	8,241	9,141	8,852	8,375
Net realized investment gains (losses)	(2,970)	6,532	(10,778)	3,842

Item 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None

Item 9A. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

The Company maintains disclosure controls and procedures (as that term is defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the Exchange Act)) that are designed to ensure that information required to be disclosed in the Company s reports under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission s rules and forms, and that such information is accumulated and communicated to the Company s management, including its Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosures. Any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives. The Company s management, with the participation of its Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of the design and operation of disclosure controls and procedures as of December 31, 2015. Based upon that evaluation and subject to the foregoing, the Chief Executive Officer and Chief Financial Officer concluded that, as of December 31, 2015, the design and operation of the Company s disclosure controls and procedures were effective to accomplish their objectives at the reasonable assurance level.

Management s Report on Internal Control over Financial Reporting

Management of the Company is responsible for establishing and maintaining adequate internal control over financial reporting. The Company s internal control over financial reporting is designed to provide reasonable assurances regarding the reliability of financial reporting and the preparation of the consolidated financial statements of the Company in accordance with U.S. generally accepted accounting principles.

The Company s internal control over financial reporting includes those policies and procedures that:

pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company;

provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with U.S. generally accepted accounting principles, and that receipts and expenditures are being made only in accordance with authorizations of the Company s management and Directors; and

provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Management has assessed the Company s internal control over financial reporting as of December 31, 2015. The standard measures adopted by management in making its evaluation are the measures in the Internal Control Integrated Framework published by the Committee of Sponsoring Organizations of the Treadway Commission in 2013.

Based upon its assessment, management has concluded that the Company s internal control over financial reporting was effective at December 31, 2015, and that there were no material weaknesses in the Company s internal control over financial reporting as of that date.

Table of Contents

Ernst & Young, LLP, an independent registered public accounting firm, which has audited and reported on the consolidated financial statements contained in this Form 10-K, has issued its report on the effectiveness of the Company's internal control over financial reporting. See "Report of Independent Registered Public Accounting Firm" on page 162.

Changes in Internal Control over Financial Reporting

There have been no changes in the Company's internal controls over financial reporting that occurred during the quarter ended December 31, 2015 that have materially affected, or are reasonably likely to materially affect, the Company's internal controls over financial reporting.

Table of Contents

Report of Independent Registered Public Accounting Firm

The Board of Directors and

Shareholders of Global Indemnity plc

We have audited Global Indemnity plc's (the "Company") internal control over financial reporting as of December 31, 2015, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework) (the "COSO criteria"). The Company's management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the Corporation's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Global Indemnity plc maintained, in all material respects, effective internal control over financial reporting as of December 31, 2015, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheet of Global Indemnity plc as of December 31, 2015, and the related consolidated statements of operations, comprehensive income, shareholders' equity and cash flows for the year then ended, and our report dated March 14, 2016 expressed an unqualified opinion thereon.
