Notes to Schedule of Investments:

- (1) Floating or variable rate security. The interest shown reflects the rate in effect at March 31, 2016.
- (2) Security exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be resold, normally only to qualified institutional buyers. At March 31, 2016, the value of these securities amounted to \$51,242,788 or 18.6% of net assets. These securities are determined to be liquid by the Advisor, unless otherwise noted, under procedures established by and under the general supervision of the Fund's Board of Directors.
- (3) Restricted security (Note 3).
- (4) A portion of the principal balance has been written-off during the period due to defaults in the underlying loans.
- (5) Non-income producing security.
- (6) Rate disclosed is the 7-day net yield as of March 31, 2016.
- (7) Rate shown represents yield-to-maturity.
- (8) All or a portion of this security is held as collateral for open futures contracts.

ABS - Asset-Backed Securities.

ACES - Alternative Credit Enhancement Securities.

CLO - Collateralized Loan Obligation.

EETC - Enhanced Equipment Trust Certificate.

I/F - Inverse Floating rate security whose interest rate moves in the opposite direction of prevailing interest rates.

I/O - Interest Only Security.

PAC - Planned Amortization Class.

TAC - Target Amortization Class.

See accompanying Notes to Schedule of Investments.

Notes to Schedule of Investments (Unaudited)**March 31, 2016****Note 1 Security Valuation**

Securities traded on national exchanges are valued at the last reported sales price. Securities traded on the NASDAQ Stock Market (NASDAQ) are valued using the NASDAQ Official Closing Price, which may not be the last reported sales price. Other securities including short-term investments which are traded on the over-the-counter (OTC) market are valued at the mean of the current bid and asked prices as furnished by independent pricing services or by dealer quotations. S&P 500 Index futures contracts are valued at the first sale price after 4 p.m. ET on the Chicago Mercantile Exchange. The U.S. Treasury Note Futures Contracts are valued at the official settlement price of the exchange where they are traded.

Securities for which market quotations are not readily available, including circumstances under which it is determined by the Advisor that prices received are not reflective of a security's market value, are valued by TCW Investment Management Company (the Advisor) in good faith under procedures established by and under the general supervision of TCW Strategic Income Funds's (the Fund) Board of Directors (the Board).

Fair value is defined as the price that a fund would receive upon selling an investment in a timely transaction to an independent buyer in the principal or most advantageous market for the investment. In accordance with the authoritative guidance on fair value measurements and disclosures under the accounting principles generally accepted in the United States of America (GAAP), the Fund discloses investments in a three-tier hierarchy. This hierarchy is utilized to establish classification of fair value measurements based on inputs. Inputs that go into fair value measurement refer broadly to the assumptions that market participants would use in pricing the asset or liability, including assumptions about risk. Inputs may be observable or unobservable. Observable inputs are inputs that reflect the assumptions market participants would use in pricing the asset or liability developed based on market data obtained from sources independent of the reporting entity. Unobservable inputs are inputs that reflect the reporting entity's own assumptions about the inputs market participants would use in pricing the asset or liability developed based on the best information available in the circumstances. The three-tier hierarchy of inputs is summarized in the three broad levels listed below.

Level 1 quoted prices in active markets for identical investments

Level 2 other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.)

Level 3 significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)

Changes in valuation techniques may result in transfers in or out of an investment's assigned level within the hierarchy. The inputs or methodology used for valuing investments are not necessarily an indication of the risk associated with investing in those investments and the determination of the significance of a particular input to the fair value measurement in its entirety requires judgment and consideration of factors specific to each security.

The availability of observable inputs can vary from security to security and is affected by a wide variety of factors, including, for example, the type of security, whether the security is new and not yet established in the marketplace, the liquidity of markets, and other characteristics particular to the security. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised in determining fair value is greatest for instruments categorized in Level 3.

In periods of market dislocation, the observability of prices and inputs may be reduced for many instruments. This condition, as well as changes related to liquidity of investments, could cause a security to be reclassified between Level 1, Level 2, or Level 3.

In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, for disclosure purposes the level in the fair value hierarchy within which the fair value measurement falls in its entirety is determined based on the lowest level input that is significant to the fair value measurement.

Fair Value Measurements: A description of the valuation techniques applied to the Fund's major categories of assets and liabilities measured at fair value on a recurring basis follows:

Asset-backed securities and mortgage-backed securities. The fair value of asset-backed securities and mortgage-backed securities is estimated based on models that consider the estimated cash flows of each debt tranche of the issuer, establish a benchmark yield, and develop an estimated tranche specific spread to the benchmark yield based on the unique attributes of the tranche including, but not limited to, the prepayment speed assumptions and attributes of the collateral. To the extent the inputs are observable and timely, the values would be categorized in Level 2 of the fair value hierarchy; otherwise, they would be categorized in Level 3.

Corporate bonds. The fair value of corporate bonds is estimated using recently executed transactions, market price quotations (where observable), bond spreads, or credit default swap spreads adjusted for any basis difference between cash and derivative instruments. Corporate bonds are generally categorized in Level 2 of the fair value hierarchy; in instances where prices, spreads, or any of the other aforementioned key inputs are unobservable, they are categorized in Level 3 of the hierarchy.

Equity securities. Securities are generally valued based on quoted prices from the applicable exchange. To the extent these securities are actively traded and valuation adjustments are not applied, they are categorized in Level 1 of the fair value hierarchy. Restricted securities issued by publicly held companies are generally categorized in Level 2 of the fair value hierarchy; if the discount is applied and significant, they are categorized in Level 3. Restricted securities held in non-public entities are included in Level 3 of the fair value hierarchy because they trade infrequently, and therefore, the inputs are unobservable.

Futures contracts. Futures contracts are generally valued at the settlement price established at the close of business each day by the exchange on which they are traded. As such, they are categorized in Level 1.

Government and agency securities. Government and agency securities are normally valued using a model that incorporates market observable data such as reported sales of similar securities, broker quotes, yields, bids, offers, quoted market prices, and reference data. Accordingly, U.S. government and agency securities are normally categorized in Level 1 or 2 of the fair value hierarchy depending on the liquidity and transparency of the market.

Money market funds. Money market funds are open-ended mutual funds that invest in short-term debt securities. To the extent that these funds are valued based upon the reported net asset value, they are categorized in Level 1 of the fair value hierarchy.

Municipal bonds. Municipal bonds are fair valued based on pricing models that take into account, among other factors, information received from market makers and broker-dealers, current trades, bid wants lists, offerings, market movements, callability of the bond, state of issuance, benchmark yield curves, and bond insurance. To the extent that these inputs are observable and timely, the fair values of municipal bonds would be categorized in Level 2; otherwise, the fair values would be categorized in Level 3.

Restricted securities. Restricted securities, including illiquid Rule 144A securities, issued by non-public entities are included in Level 3 of the fair value hierarchy because they trade infrequently, and therefore, the inputs are unobservable. Any other restricted securities valued similar to publicly traded securities may be categorized in Level 2 or 3 of the fair value hierarchy depending on whether a discount is applied and significant to the fair value.

Short-term investments. Short-term investments are valued using market price quotations, and are reflected in Level 2 of the fair value hierarchy.

The following is a summary of the inputs used as of March 31, 2016 in valuing the Fund's investments:

Edgar Filing: TCW STRATEGIC INCOME FUND INC - Form N-Q

Description	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Total
Fixed Income Securities				
Asset-Backed Securities	\$	\$ 39,404,073	\$ 1,281,320	\$ 40,685,393
Collateralized Mortgage Obligations				
Commercial Mortgage-Backed Securities Agency		3,025,827		3,025,827
Commercial Mortgage-Backed Securities Non-Agency		4,044,048	633,057	4,677,105
Residential Mortgage-Backed Securities Agency		5,688,387		5,688,387
Residential Mortgage-Backed Securities Non-Agency		140,255,705	3,365,268	143,620,973
Total Collateralized Mortgage Obligations		153,013,967	3,998,325	157,012,292
Corporate Bonds*		45,143,140		45,143,140
Municipal Bonds		3,313,930		3,313,930
U.S. Treasury Securities	2,998,682			2,998,682
Total Fixed Income Securities	2,998,682	240,875,110	5,279,645	249,153,437
Common Stock*	2,512,926		26,821	2,539,747
Money Market Investments	3,045,223			3,045,223
Short-Term Investments	22,166,730	968,982		23,135,712

Asset Derivatives				
Futures				
Equity Risk	128,181			128,181
Interest Rate Risk	14,870			14,870
Total	\$ 30,866,612	\$ 241,844,092	\$ 5,306,466	\$ 278,017,170

* See Schedule of Investments for corresponding industries.

The Fund did not have any transfers in and out of Level 1 and Level 2 of the fair value hierarchy during the period ended March 31, 2016.

The following is a reconciliation of investments in which significant unobservable inputs (Level 3) were used in determining value:

	Asset- Backed Securities	Commercial Mortgage-Backed Securities Non- Agency	Residential Mortgage-Backed Securities Non- Agency	Common Stock	Total
Balance as of December 31, 2015	\$ 1,281,305	\$ 675,801	\$ 3,495,274	\$ 51,524	\$ 5,503,904
Accrued Discounts (Premiums)		(4,080)	(130,434)		(134,514)
Realized Gain (Loss)					
Change in Unrealized Appreciation	15	(38,664)	428	4,442	(33,779)
Purchases				58,290	58,290
Sales				(87,435)	(87,435)
Transfers in to Level 3 ⁽¹⁾					
Transfers out of Level 3 ⁽¹⁾					
Balance as of March 31, 2016	\$ 1,281,320	\$ 633,057	\$ 3,365,268	\$ 26,821	\$ 5,306,466
	\$ 15	\$ (38,664)	\$ 428	\$ 4,442	(33,779)

Edgar Filing: TCW STRATEGIC INCOME FUND INC - Form N-Q

Change in Unrealized Appreciation (Depreciation) from
Investments Still Held at March 31, 2016

- (1) The Fund recognizes transfers in and out at the beginning of the period.
Significant unobservable valuations inputs for Level 3 investments as of March 31, 2016 are as follows:

Description	Fair Value at March 31, 2016	Valuation Techniques*	Unobservable Input	Price or Price Range
Asset-Backed Securities	\$ 1,281,320	Third-party Broker	Broker Quotes	\$ 98.001
Commercial Mortgage -Backed Securities Non-Agency	\$ 633,057	Third-party Vendor	Vendor Prices	\$ 7.657
Residential Mortgage-Backed Securities Non-Agency	\$ 776,257	Third-party Vendor	Vendor Prices	\$ 19.727
Residential Mortgage-Backed Securities Non-Agency (Interest Only Collateral Strip Rate Securities)	\$ 2,589,011	Third-party Vendor	Vendor Prices	\$ 0.882-\$3.065
Common Stock -Electric	\$ 26,821	Third-party Vendor	Vendor Prices	\$ 2.375

* The valuation technique employed on the Level 3 securities involves the use of third-party broker quotes and vendor prices. The Advisor monitors the reasonability of third-party brokers and vendor prices.

Level 3 Valuation Process: Investments classified within Level 3 of the fair value hierarchy may be fair valued by the Advisor with consent of the Pricing Committee in accordance with the guidelines established by the Board and under the general oversight of the Board. The Pricing Committee employs various methods to determine fair valuations, including a regular review of key inputs and assumptions and review of any related market activity. The Pricing Committee reports to the Board at their regularly scheduled meetings. It is possible that fair value prices will be used by the Fund to a significant extent. The value determined for an investment using the Fund's fair value procedures may differ from recent market prices for the investment and may be significantly different from the value realized upon the sale of such investment. The Advisor, as part of the daily process, conducts back-testing of prices based on daily trade activities.

The Pricing Committee consists of the Fund's President, General Counsel, Chief Compliance Officer, Assistant Treasurer, Secretary, and a representative from the portfolio management team, as well as alternate members as the Board may from time to time designate. The Pricing Committee reviews and makes recommendations concerning the fair valuation of portfolio securities and the Fund's pricing procedures in general.

Derivative Instruments: Derivatives are financial instruments whose values are based on the values of one or more indicators, such as a security, asset, currency, interest rate, or index. Derivative transactions can create investment leverage and may be highly volatile. It is possible that a derivative transaction will result in a loss greater than the principal amount invested. The Fund may not be able to close out a derivative transaction at a favorable time or price.

At March 31, 2016, the Fund had the following derivatives grouped in the following risk categories:

Schedule of Investments

	Equity Risk	Interest Rate Risk	Total
Futures Contracts	\$ 128,181	\$ 14,870	\$ 143,051
Total Value	\$ 128,181	\$ 14,870	\$ 143,051
Number of Contracts			
Futures Contracts ⁽¹⁾	32	39	71

(1) Amount represents the number of contracts outstanding at the end of the period.

Futures Contracts: The Fund may seek to manage a variety of different risks or obtain exposure through the use of futures contracts. The Fund may use index futures to hedge against broad market risks to its portfolio or to gain broad market exposure when it holds uninvested cash or as an inexpensive substitute for cash investments directly in securities or other assets. Securities index futures contracts are contracts to buy or sell units of a securities index at a specified future date at a price agreed upon when the contract is made and are settled in cash. Positions in futures may be closed out only on an exchange or board of trade which provides a secondary market for such futures. Because futures contracts are exchange-traded, they typically have minimal exposure to counterparty risk. Parties to a futures contract are not required to post the entire notional amount of the contract, but rather a small percentage of that amount (by way of margin), both at the time they enter into futures transactions, and then on a daily basis if their positions decline in value; as a result, futures contracts are highly leveraged. Such payments are known as variation margin and are recorded by the Fund as unrealized gains or losses. Because futures markets are highly leveraged, they can be extremely volatile, and there can be no assurance that the pricing of a futures contract will correlate precisely with the pricing of the asset or index underlying it or the asset or liability of the Fund that is the subject of the hedge. It may not always be possible for the Fund to enter into a closing transaction with respect to a futures contract it has entered into at a favorable time or price. When the Fund enters into a futures transaction, it is subject to the risk that the value of the futures contract will move in a direction unfavorable to it.

When the Fund uses futures contracts for hedging purposes, it is likely that the Fund will have an asset or liability that will offset any loss (or gain) on the transactions, at least in part. When a futures contract is closed, the Fund records a realized gain or loss equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed. The Fund used S&P 500 Index futures to gain exposure to the equity market. The Fund also utilized Treasury futures to help manage interest rate duration and credit market exposure. Futures contracts outstanding at March 31, 2016 are listed in the Fund's Schedule of Investments.

Options: The Fund may purchase and write call and put options on securities and securities indices. The Fund may purchase put options on securities to seek to protect holdings in an underlying or related security against a substantial decline in market value. The Fund may purchase call options on securities to seek to protect against substantial increases in prices of securities the Fund intends to purchase pending its ability to invest in such securities in an orderly manner. The Fund may write a call or put option only if the option is covered by the Fund holding a position in the underlying securities or by other means which would permit immediate satisfaction of the Fund's obligation as writer of the option. The purchase and writing of options involves certain risks. During the option period, the covered call writer has, in return for the premium on the option, given up the opportunity to profit from a price increase in the underlying securities above the sum of the premium and exercise price. The writer of an option has no control over the time when it may be required to fulfill its obligation as a writer of the option. Once an option writer has received an exercise notice, it cannot effect a closing purchase transaction in order to terminate its obligation under the option and must deliver the underlying securities at the exercise price. If a put or call option purchased by the Fund is not sold when it has remaining value, and if the market price of the underlying security, in the case of a put, remains equal to or greater than the exercise price or, in the case of a call, remains less than or equal to the exercise price, the Fund will lose its entire investment in the option. There can be no assurance that a liquid market will exist when the Fund seeks to close out an option position. Furthermore, if trading restrictions or suspensions are imposed on the options markets, the Fund may be unable to close out a position.

The Fund may execute transactions in both listed and OTC options. Listed options involve minimal counterparty risk since listed options are guaranteed against default by the exchange on which they trade. Transactions in certain OTC options may expose the Fund to the risk of default by the counterparty to the transaction. In the event of default by the counterparty to the OTC option transaction, the Fund's maximum amount of loss as purchaser is the premium paid plus any unrealized gain. During the period ended March 31, 2016, the Fund did not purchase or write any option contracts.

Swap Agreements: The Fund may enter into swap agreements. Swap agreements are typically two-party contracts entered into primarily by institutional investors. In a standard swap transaction, two parties agree to exchange the returns (or differentials in rates of return) earned or realized on particular predetermined investments or instruments, which may be adjusted for an interest factor. The gross returns to be exchanged or swapped between the parties are generally calculated with respect to a notional amount (i.e., the return on or increase in value of a particular dollar amount invested at a particular interest rate or in a basket of securities representing a particular index).

The Fund may enter into credit default swap transactions as a buyer or seller of credit protection. In a credit default swap, one party provides what is in effect insurance against a default or other adverse credit event affecting an issuer of debt securities (typically referred to as a reference entity). In general, the buyer of credit protection is obligated to pay the protection seller an upfront amount or a periodic stream of payments over the term of the swap. If a credit event occurs, the buyer has the right to deliver to the seller bonds or other obligations of the reference entity (with a value up to the full notional value of the swap), and to receive a payment equal to the par value of the bonds or other obligations. Credit events that would trigger a request that the seller make payment are specific to each credit default swap agreement, but generally include bankruptcy, failure to pay, restructuring, obligation acceleration, obligation default, or repudiation/moratorium. When the Fund buys protection, it may or may not own securities of the reference entity. When the Fund sells protection under a credit default swap, the position may have the effect of creating leverage in the Fund's portfolio through the Fund's indirect long exposure to the issuer or securities on which the swap is written. When the Fund sells protection, it may do so either to earn additional income or to create such a synthetic long position.

During the term of a swap transaction, changes in the value of the swap are recognized as unrealized gains or losses by marking to market to reflect the market value of the swap. When the swap is terminated, the Fund will record a realized gain or loss equal to the difference, if any, between the proceeds from (or cost of) the closing transaction and the Fund's basis in the agreement. Upfront swap premium payments paid or received by the Fund, if any, are recorded within the value of the open swap agreement on the Fund's Statement of Assets and Liabilities and represent payments paid or received upon entering into the swap agreement to compensate for differences between stated terms of the swap agreement and prevailing market conditions (credit spreads, currency exchange rates, and other relevant factors). These upfront payments are recorded as realized gain or loss on the Fund's Statement of Operations upon termination or maturity of the swap agreement.

During the term of a swap transaction, the periodic net payments can be made for a set period of time or may be triggered by a predetermined credit event. The net periodic payments may be based on a fixed or variable interest rate, the change in market value of a specified security, basket of securities or index, or the return generated by a security. These periodic payments received or made by the Fund are recorded as realized gains and losses, respectively. During the period ended March 31, 2016, the Fund did not enter into such agreements.

Mortgage-Backed Securities: The Fund may invest in mortgage pass-through securities which represent interests in pools of mortgages in which payments of both principal and interest on the securities are generally made monthly, in effect passing through monthly payments made by borrowers on the residential or commercial mortgage loans which underlie the securities (net of any fees paid to the issuer or guarantor of the securities). Mortgage pass-through securities differ from other forms of debt securities, which normally provide for periodic payment of interest in fixed amounts with principal payments at maturity or specified call dates. The Fund may also invest in Collateralized Mortgage Obligations (CMOs). CMOs are debt obligations collateralized by residential or commercial mortgage loans or residential or commercial mortgage pass-through securities. Interest and principal are generally paid monthly. CMOs may be collateralized by whole mortgage loans or private mortgage pass-through securities but are more typically collateralized by portfolios of mortgage pass-through securities guaranteed by Ginnie Mae, Freddie Mac or Fannie Mae. The issuer of a series of CMOs may elect to be treated for tax purposes as a Real Estate Mortgage Investment Conduit. CMOs are structured into multiple classes, each bearing a different stated maturity. Monthly payment of principal received from the pool of underlying mortgages, including prepayments, is first returned to investors holding the shortest maturity class. Investors holding the longer maturity classes usually receive principal only after shorter classes have been retired. An investor may be partially protected against a sooner than desired return of principal because of the sequential payments. The Fund may invest in stripped mortgage-backed securities. Stripped mortgage-backed securities are usually structured with two classes that receive different proportions of the interest and principal distributions on a pool of mortgage assets. In certain cases, one class will receive all of the interest (the interest-only or IO class), while the other class will receive all of the principal (the principal-only or PO class). The yield to maturity on IOs is sensitive to the rate of principal prepayments (including prepayments) on the related underlying mortgage assets, and principal payments may have a material effect on yield to maturity. If the underlying mortgage assets experience greater than anticipated prepayments of principal, the Fund may not fully recoup its initial investment in IOs.

When-Issued, Delayed-Delivery, and Forward Commitment Transactions: The Fund may enter into when issued, delayed-delivery or forward commitment transactions in order to lock in the purchase price of the underlying security or to adjust the interest rate exposure of the Fund's existing portfolios. In when-issued, delayed-delivery, or forward

commitment transactions, the Fund commits to purchase particular securities, with payment and delivery to take place at a future date. Although the Fund does not pay for the securities or start earning interest on them until they are delivered, it immediately assumes the risks of ownership, including the risk of price fluctuation. If the Fund's counterparty fails to deliver a security purchased on a when-issued, delayed-delivery or forward commitment basis, there may be a loss, and that the Fund may have missed an opportunity to make an alternative investment.

Prior to settlement of these transactions, the value of the subject securities will fluctuate. In addition, because the Fund is not required to pay for when-issued, delayed-delivery or forward commitment securities until the delivery date, they may result in a form of leverage. To guard against this deemed leverage, the Fund monitors the obligations under these transactions and ensures that the Fund has sufficient liquid assets to cover them.

Repurchase Agreements: The Fund may enter into repurchase agreements, under the terms of Master Repurchase Agreements (MRA). The MRA permits the Fund, under certain circumstances, including an event of default (such as bankruptcy or insolvency), to offset payables and/or receivables under the MRA with collateral held and/or posted to the counterparty and create one single net payment due to or from the Fund. However, bankruptcy or insolvency laws of a particular jurisdiction may impose restrictions on or prohibitions against such a right of offset in the event of MRA counterparty's bankruptcy or insolvency. Pursuant to the terms of the MRA, the Fund receives securities as collateral with a market value in excess of the repurchase price to be received by the Fund upon the maturity of the repurchase transaction. Upon a bankruptcy or insolvency of the MRA counterparty, the Fund recognizes a liability with respect to such excess collateral to reflect the Fund's obligation under bankruptcy law to return the excess to the counterparty. There were no repurchase agreements outstanding at the period ended March 31, 2016.

Security Lending: The Fund may lend its securities to qualified brokers. The loans must be collateralized at all times primarily with cash although the Fund can accept money market instruments or U.S. government securities with a market value at least equal to the market value of the securities on loan. As with any extensions of credit, the Fund may bear the risk of delay in recovery or even loss of rights in the collateral if the borrowers of the securities fail financially. The Fund earns additional income for lending its securities by investing the cash collateral in short-term investments. The Fund did not lend any securities during the period ended March 31, 2016.

Note 2 Federal Income Taxes

It is the policy of the Fund to comply with the requirements of the Internal Revenue Code applicable to regulated investment companies and distribute all of its net taxable income, including any net realized gains on investments, to its shareholders. Therefore, no federal income tax provision is required.

At March 31, 2016, net unrealized appreciation on investments for federal income tax purposes was as follows:

Unrealized Appreciation	\$ 17,817,658
Unrealized (Depreciation)	(5,360,255)
Net Unrealized Appreciation	\$ 12,457,403
Cost of Investments for Federal Income Tax Purposes	\$ 265,416,716

Note 3 Restricted Securities

The Fund is permitted to invest in securities that have legal or contractual restrictions on resale. Disposal of these securities may involve time consuming negotiations and expense, and prompt sale at an acceptable price may be difficult. There were two restricted securities at March 31, 2016.

Issuer Description	Acquisition Date	Aggregate Cost	Aggregate Value	Value as Percentage of Fund's Net Assets
Citigroup Commercial Mortgage Trust, (12-GC8-XA), (144A), 2.174%, due 09/10/45	2/13/15-2/26/15	\$819,002	\$633,057	0.23%
Mach Gen, LLC	11/12/15	58,290	26,821	0.01%
		877,292	659,878	0.24%

Item 2. Controls and Procedures.

(a) The Registrant's Chief Executive Officer and Chief Financial Officer concluded that the Registrant's disclosure controls and procedures (as defined in Rule 30a-3(c) under the Investment Company Act of 1940) are effective as of a date within 90 days prior to the filing date of this report (the Evaluation Date), based on their evaluation of the effectiveness of the Registrant's disclosure controls and procedures as of the Evaluation Date.

(b) There were no changes in the Registrant's internal control over financial reporting (as defined in Rule 30a-3(d) under the 1940 Act (17 CFR 270.30a-3(d))) that occurred during the Registrant's last fiscal quarter that has materially affected, or is reasonably likely to materially affect, the Registrant's internal control over financial reporting.

Item 3. Exhibits.

(a) Certification of Chief Executive Officer and Chief Financial Officer of the Registrant as required by Rule 30a-2(a) under the Investment Company Act of 1940 (17 CFR 270.30a-2(a)) is attached hereto as Exhibit 99CERT.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934 and the Investment Company Act of 1940, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.
