Investment description

Linked to the Financial Select Sector SPDR® Fund

Unlike ordinary debt securities, the securities do not pay interest at a specified rate, do not repay a fixed amount of principal at stated maturity and are subject to potential automatic call upon the terms described below. Any return you receive on the securities and whether they are automatically called will depend on the performance of the Fund

If the fund closing price of the Fund on any call date is greater than or equal to the starting price, the securities will be automatically called, and on the related call settlement date, you will receive the principal amount plus the call premium applicable to that call date

Call Date	Call Premium
November 3, 2017	6.80% of the principal amount
November 5, 2018	13.60% of the principal amount
October 28, 2019	20.40% of the principal amount

If the securities are not automatically called prior to the final calculation day, the payment at stated maturity will be based upon the fund closing price of the Fund on the final calculation day as compared to the starting price and could be greater than, equal to or less than the principal amount per security as follows:

If the price of the Fund increases:

The securities will be automatically called for the principal amount plus the call premium applicable to the final calculation day described above

If the price of the Fund decreases, but the decrease is not more than 10%:

You will be repaid the principal amount

If the price of the Fund decreases by more than 10%:

You will receive less than the principal amount and will have 1-to-1 downside exposure to the decrease in the price of the Fund in excess of 10%

Investors may lose up to 90% of the principal amount

All payments on the securities are subject to the credit risk of Canadian Imperial Bank of Commerce, and you will have no ability to pursue the Fund or the securities held by the Fund for payment; if Canadian Imperial Bank of Commerce defaults on its obligations, you could lose some or all of your investment

No periodic interest payments or dividends

No exchange listing; designed to be held to stated maturity

The Issuer's estimated value of the securities on the date of the accompanying pricing supplement, based on the Issuer's internal pricing models, is \$954.30 per security. The estimated value of the securities is not an indication of actual profit to the Issuer or to any of the Issuer's affiliates, nor is it an indication of the price, if any, at which Wells Fargo Securities, LLC or any other person may be willing to buy the securities from you at any time after issuance. See "The Estimated Value of the Securities" in the accompanying pricing supplement.

Investing in the securities involves significant risks. See "Selected Risk Considerations" in this term sheet and "Risk Factors" in the accompanying pricing supplement, the accompanying prospectus supplement and prospectus.

This term sheet does not provide all of the information that an investor should consider prior to making an investment decision.

Investors should carefully review the pricing supplement, prospectus supplement and prospectus before making a decision to invest in the securities.

Hypothetical payout profile

The profile to the right illustrates the potential payment on the securities for a range of hypothetical percentage changes in the fund closing price of the Fund from the pricing date to the applicable call date (including the final calculation day).

This graph has been prepared for purposes of illustration only. Your actual return will depend on (i) whether the securities are automatically called; (ii) if the securities are automatically called, the actual call date on which the securities are called; (iii) if the securities are not automatically called, the actual ending price; and (iv) whether you hold your securities to the call settlement date or stated maturity

Hypothetical returns

If the securities are automatically called:

Hypothetical Call Date on which Securities are Automatically Called	Hypothetical Payment Per Security on Related Call Settlement Date	Hypothetical Pre-Tax Total Rate of Return	Hypothetical Pre-Tax Annualized Rate of Return ⁽¹⁾

2nd call date	\$1,136.00	13.60%	6.39%
3rd call date	\$1,204.00	20.40%	6.28%

(1) The annualized rates of return are calculated on a semi-annual bond equivalent basis with compounding.

If the securities are not automatically called:

(1) The annualized rates of return are calculated on a semi-annual bond equivalent basis with compounding. The above figures are for purposes of illustration only and may have been rounded for ease of analysis. The actual amount you receive upon automatic call or at stated maturity and the resulting pre-tax rate of return will depend on (i) whether the securities are automatically called; (ii) if the securities are automatically called, the actual call date on which the securities are called; and (iii) if the securities are not automatically called, the actual ending price.

Call Dates and Call Premiums

Call Date	Call Premium	Payment per Security upon an Automatic Call
November 3, 2017	6.80%	\$1,068.00
November 5, 2018	13.60%	\$1,136.00
October 28, 2019	20.40%	\$1,204.00

The last call date is the final calculation day, and payment upon an automatic call on the final calculation day, if applicable, will be made on the stated maturity date.

How the payment at stated maturity is calculated

If the fund closing price of the Fund is less than the starting price on each of the three call dates, the securities will not be automatically called, and on the stated maturity date you will receive a payment at stated maturity per security determined as follows:

If the ending price is less than the starting price, but greater than or equal to the threshold price, the payment at stated maturity will be equal to \$1,000

If the ending price is less than the threshold price, the payment at stated maturity will be equal to \$1,000 *minus*

$$\$1,000 \times \frac{\text{Threshold Price} - \text{Ending Price}}{\text{Starting Price}}$$

Any positive return on the securities will be limited to the applicable call premium, even if the fund closing price of the Fund significantly exceeds the starting price on the applicable call date. You will not participate in any appreciation of the Fund beyond the applicable call premium. If the securities are not automatically called prior to the final calculation day and the ending price is less than the threshold price, you will receive less, and possibly 90% less, than the principal amount of your securities at stated maturity.
