NOTE 1 - BUSINESS, BASIS OF PRESENTATION AND SIGNIFICANT ACCOUNTING POLICIES

Organization

Mount Knowledge Holdings, Inc. (MKHD) (the Company or Successor Company) was incorporated as Auror Capital Corp. under the laws of the State of Nevada on March 16, 2006. On January 25, 2010, the Company filed an amendment and restatement to the Articles of Incorporation of the Company with the State of Nevada, which were approved by the Board of Directors on October 20, 2009 by written consent in lieu of a special meeting in accordance with the Nevada Corporation Law, changing its name to Mount Knowledge Holdings, Inc. and increasing the number of authorized common and preferred shares.

The Company began as an exploration stage company engaged in the acquisition and exploration of mineral properties. On January 23, 2009, the Company decided to abandon its mineral claim due to unsuccessful explorations to date and inability to attract investment capital to proceed with further exploration on the claim.

On July 27, 2009, the Company changed its business purpose from a mining and exploration to an educational software development and sales company offering innovative and proprietary learning software products and teaching services. The Company's principal executive offices are now in Novi, Michigan.

On January 21, 2010, the Company executed a new exclusive Master Software License Agreement with Mount Knowledge Inc, a corporation owned by the Company's founder and present Chairman and director based in Ontario, Canada, wherein the Company was granted the exclusive world-wide license rights to promote, market and sell any and all of Mount Knowledge Inc's products, both existing and future. These existing products consist of patent pending Real Time Learning and Self Improvement Educational System and Method software application referred to as Syntality. During December 2010, Company acquired 100% ownership interest in the intellectual property and the license agreement was cancelled.

On October 19, 2010, the Company formed Mount Knowledge Asia Ltd, a Hong Kong corporation (wholly owned by the Company) for the purposes of facilitating the acquisition of Language Key Asia Ltd and to acquire other Business-to-Business (B2B) and Business-to-Consumer (B2C) business interests throughout Asia.

(MTK Tech) for a purchase price of \$490, representing 49% ownership interest in MTK Tech with the remaining 51% ownership interest of MTK Tech owned and held by Ucandu Learning Centres Inc., an Ontario corporation, controlled by a director of the Company. MTK Tech provides software development services for the Company pursuant to an executed Services Agreement dated December 1, 2010 with Mount Knowledge USA, Inc., a subsidiary of the Company.

On December 31, 2010, the Company acquired, via Mount Knowledge Asia, 100% ownership of Language Key Asia Ltd. (LKA or Predecessor Company), a Hong Kong corporation formed in October 2010 as a holding company for ownership interests in Business-to-Business operations in Asia.

LKA was established to centralize the administrative, governance, management, and financing for the Language Key Group of companies (LK Group), all of which are wholly-owned by LKA, which consists of Language Key Corporate Training Solutions Ltd. (a Hong Kong corporation, and formerly The Language Key China Ltd., established on August 21, 2002, LKCTS), The Language Key Training Ltd. (a Hong Kong corporation established on March 21,

2003, LKTR), and The Language Key China Ltd. (a Wholly Owned Foreign Enterprise registered in Shanghai, China established on October 11, 2002, LKCH), and Language Key Publishing Ltd. (established on January 11, 2011, LKPUB).

LKA was further established to enable the efficient acquisition of the LK Group by Mount Knowledge Holdings Inc. a U.S publicly traded (OTCBB: MKHD) corporation and to be the vehicle into which to receive equity capital contributions from the Company. On December 31, 2010, the shareholders of LKA executed a share exchange agreement with the Company and Mount Knowledge Asia Ltd. (MKA), a wholly owned Hong Kong regional holding company established by the Company on November 15, 2010, to hold the 100% ownership interest of LKA after the acquisition.

These first quarter financial statements should be read in conjunction with the Company's financial statements and notes thereto included in the Company's December 31, 2010 Form 10-K/A. The Company assumes that the users of the interim financial information herein have read, or have access to, the audited financial statements for the preceding period, and that the adequacy of additional disclosure needed for a fair presentation may be determined in that context. Accordingly, footnote disclosures which would substantially duplicate that contained in the Company's December 31, 2010 financial statements, have been omitted. The results of operations for the three-month period ended March 31, 2011 are not necessarily indicative of the results for the entire year ending December 31, 2011.

Plan of Operations

Over the 12-month of 2011, we must raise capital and complete certain milestones as described below:

Milestones

First Quarter - 2011

In the first quarter of 2011, we completed the integration of the Company's newly acquired subsidiaries, Language Key Asia Ltd (LKA) and its operational subsidiaries in Hong Kong and China and Mount Knowledge USA, Inc. (MTK USA) in the US, acquired on December 31, 2010. As a result of the integration, the Company now has operations in Novi, Michigan, Toronto, Canada, Hong Kong, Beijing, Guangzhou, Shanghai and Shenzhen, China. Additionally, the U.S. GAAP audited financial statements for MTK USA and LKA, individually, were filed in the Current Report on Form 8-K/A dated March 25, 2011 and March 29, 2011, respectively, and consolidated financials were filed in the Current Report on Form 10K/A dated April 15, 2011.

Furthermore, during the first quarter of 2011, MTK USA, a Company controlled subsidiary, raised approximately \$391,705 in equity and converted approximately \$719,354 in debt into equity in MTK USA, a Company controlled subsidiary.

Second Quarter - 2011

In the second quarter of operations, our focus will be to, complete additional administrative functions, obtain new financing to finance committed growth capital and acquire certain existing marketing and sales agreements in order to properly position the Company execute its business plan. Following represents objectives for the next 90 days in 2011:

1. Accelerated Acquisition Strategy. As of January 2011, the Company's management implemented an accelerated acquisition strategy to acquire synergistic companies in the language learning and training business sector. The Company will first target the vast English learning China market and other Asian territories in 2011, with a long-term vision of expanding into other world markets in 2012. The estimated costs initially of research and due diligence of suitable acquisitions targets is \$150,000. There can be no assurance that we will be able to successfully negotiate and consummation and such acquisition with any target that we identify.
2. Secondary Offering and/or Other Financings. We intend to raise between \$2,500,000 and \$5,000,000 within the second quarter of the 2011 to finance our current operations and acquisition strategy and to complete our commitment to fund a total of \$1,000,000 in additional growth capital to Language Key Asia (LKA) for 2011. To date, we have funded a total of approximately \$165,500 to LKA against the funding commitment in addition to other advances or loans totaling approximately \$250,000 in 2010.

Such future offerings or financings may take the form of equity or debt. Besides, the original amount of financing anticipated, the Company might seek additional funding as deemed necessary by our management.

There can be no assurance that such financing will be available to us on terms that are acceptable or at all.

Third and Fourth Quarters - 2011

In the third and fourth quarters of 2011, we plan to expand our objectives to include new product enhancements, the development of new partnerships and distribution channels, and direct sales opportunities in the form of infomercials and online membership programs, including the option of bundling our product with potential technology partners to increase brand awareness and product reach as follows:

1. *Business Enterprise Applications (Corporations, Schools and Government Agencies)*. With the acquisition of LKA, we foresee the use of our products and services as a learning solution for schools, government agencies, healthcare facilities, and corporations to provide an enhanced, interactive learning program to facilitate new job skills training and continual education programs. Therefore, we intend to develop product-specific enhancements to our existing products and services for use in various business applications. It is likely that most of the product enhancements for business applications will be in the form of client-specific modifications based upon requests for customized specifications and functionality. As such, we anticipate that some of the costs for these modifications will be borne by each respective client. Therefore, it is difficult to accurately determine the upfront costs attributable to us for any research and development of business enterprise applications.
2. *Product Enhancements, Membership Program and Technology Partners*. Subject to the successful launch of our products and services in the US, Canada, China and Hong Kong, we plan to provide product enhancements consistent with perceived customer requirements for other world markets. Most of these enhancements are believed by management to be in the form of updated graphics, to enhance the fluidity of the user experience and interface, and some market-specific content. In addition, we foresee a web-based e-learning membership program with recurring monthly fee based revenues as being one of the more important and lucrative long-term revenue models for us. It is difficult to accurately estimate the total cost involved in the design and development of this program, including the time required to implement such a program. Furthermore, we will seek to identify and develop relationships with globally recognized technology providers and OEM's to pursue the possibility of bundling the Mount Knowledge™ products and services with established product platforms, including mobile applications (PDA) to provide the Company with an ancillary revenue stream. We see this as a potentially significant opportunity to generate revenues, if the Company can successfully demonstrated the desirability of the Knowledge Generator™ product with its initial audience and market(s).
3. *New Business Development and Marketing (Additional Partnerships and Distribution Channels)*. We will also pursue our business development and marketing efforts in other territories of Asia, and in the North American and European markets.

The milestones outlined above represent our objectives for the purpose of obtaining revenues from the marketing and sales of our products and services through various marketing and distribution channels.

Although, we have arranged and specified each respective milestone in a defined order, or timeline, over the next 12 months, as evident in the first quarter of 2011, we may find the need to modify any or all of the milestones listed in subsequent yearly quarters, subject to unforeseen circumstances and other contingences which may require us to alter, in whole, or in part, certain aspects of each respective milestone in order for us to successfully realize revenue and ultimately attempt to achieve profitability.

Each milestone may begin at a different time than indicated and may continue for a shorter or longer period of time than suggested, depending upon if such milestones have successfully resulted in generating revenues for us. Also, each milestone may require more or less capital than anticipated and may need to be adjusted from time to time. Furthermore, any adjustments made to the proposed milestones may adversely affect the revenue potential of each milestone and overall revenues and/or our profitability.

Requirements and Utilization of Funds

To implement our plan of operations, including some or all of the above described milestones (objectives), we will need to raise capital in an amount between \$2.5 and \$5.0 million over the remaining 9 months of 2011 on terms and conditions to be determined. Management intends to raise such capital through the issuance of equity securities. Management may elect to seek subsequent interim or "bridge" financing in the form of debt (corporate loans) as may be necessary.

We anticipate the need to raise additional capital beyond the first 6 months of operations, subject to the successful implementation of our initial milestones over the first 180 days of operations and our revenue growth cycle thereafter. At this time, management is unable to determine the specific amounts and terms of such future financings.

We foresee the proceeds from capital raised to be allocated as follows: (a) consolidation and integration; (b) growth capital; (c) acquisition research and due diligence; (d) business enterprise applications; (e) product enhancements, membership programs and technology partners; (f) new business development and marketing; (g) legal, audit, SEC filings and compliance fees; (h) financing costs; (i) working capital (general and administrative); (j) reserve capital for costs of acquisition and market expansion.

Financial Condition, Liquidity and Capital Resources

As of March 31, 2011, we had \$170,302 in cash, \$198,044 in accounts receivables, and \$248,726 in unbilled revenue. We had revenues of \$440,285 during the three-month period ended March 31, 2011. We are illiquid and need cash infusions from investors and/or current shareholders to support our proposed marketing and sales operations.

Management believes this amount may not satisfy our cash requirements for the next 12 months and as such we will need to either raise additional proceeds and/or our officers and/or directors will need to make additional financial commitments to our company, neither of which is guaranteed. We plan to satisfy our future cash requirements, primarily the working capital required to execute on our objectives, including marketing and sales of our product, and to offset legal and accounting fees, through financial commitments from future debt/equity financings, if and when possible.

Management believes that the Company will continue to generate sales revenue comparable to 2010 within the next twelve (12) months, but that these sales revenues will not satisfy our cash requirements during that period. We have no committed source for funds as of this date. No representation is made that any funds will be available when needed. In the event that funds cannot be raised when needed, we may not be able to carry out our business plan, may never achieve sales, and could fail to satisfy our future cash requirements as a result of these uncertainties.

If we are unsuccessful in raising the additional proceeds from officers and/or directors, we may then have to seek additional funds through debt financing, which would be extremely difficult for an early stage company to secure and may not be available to us. However, if such financing is available, we would likely have to pay additional costs associated with high-risk loans and be subject to above market interest rates.

At such time as these funds are required, management would evaluate the terms of such debt financing and determine whether the business could sustain operations and growth and manage the debt load. If we cannot raise additional proceeds via a private placement of our common stock or secure debt financing we might be required to cease business operations. As a result, investors in our common stock would lose all of their investment.

Other than engaging and/or retaining independent consultants to assist the Company in various administrative and marketing related needs, we do not anticipate a significant change in the number of our employees, if any, unless we are able to obtain adequate financing and grow the Company organically or through subsequent acquisitions.

The following table represents sales of our products and services for the three months ended March 31, 2011 and 2010:

Revenues

The Company generates revenue, through its wholly owned subsidiary, LKA. Revenue for the three months ended March 31, 2011 was \$440,285 compared to revenue for the three months ended March 31, 2010 of \$328,928, an increase of \$111,357, or 34%. The increase is mainly due to corporate initiatives and incentives offered to our employees during the third and fourth quarters, resulting in higher sales in the first quarter of 2011 compared to sales in the first quarter of 2010.

Cost of goods sold is primarily composed of the costs of the Company's trainers as well as materials and transportation expenses associated with delivering training courses. Cost of goods sold for the three months ended March 31, 2011 was \$240,826 compared to cost of goods sold for the three months ended March 31, 2010 of \$171,064, an increase of 41%. Gross margin is calculated by deducting cost of goods sold from revenues and ranges from 40% to 50%, depending on the nature of the specific courses sold and the contract terms negotiated. Gross margin for the three months ended March 31, 2011 was 45.3% compared to gross margin for the three months ended on March 31, 2010 of 48.0%, a decrease of 2.7%.

Operating costs and expenses

Selling, general, and administrative expenses for the quarter ended March 31, 2011 were \$979,115 compared to \$223,577 for the quarter ended March 31, 2010, an increase of 338%. This increase is due to both the impact of corporate decisions made in the third and fourth quarters of 2010 for expansion in 2011 and beyond, as well as additional costs incurred during the quarter ended March 31, 2011. The increase in selling, general, and administrative expenses was primarily attributable to audit fees, maintaining compliance as a publicly reporting company, and the development of the ECO-Learning platform. In addition, the increase in operating expenses in the first quarter of 2011 compared to the first quarter of 2010, reflects expenses related to initiatives and changes at LKA that became effective after the first quarter of 2010. Specifically, during the third and fourth quarters of 2010, LKA opened a new office in Guangzhou, hired additional key staff in each of its offices, increasing the salaries of key personnel, outsourced its monthly bookkeeping and accounting functions, and invested in systems and personnel to develop the content for ECO-Learning. The costs related to aforementioned are expected to be ongoing as LKA builds out its infrastructure for growth. Also, during the quarter ended March 31, 2011, LKA incurred costs related to the initial launch of ECO learning, including technical, promotional, and legal. LKA expects to incur future costs related to ECO as it builds the business unit going forward.

Liquidity and Capital Resources

Our main sources of liquidity and capital resources for fiscal 2011 will be cash on hand, internally generated cash flows from operations. As of March 31, 2011, we had cash on hand of \$170,302, \$198,044 in accounts receivables, and \$248,726 in unbilled revenue and negative working capital as a result of added operational expenses due to acquisition integration costs and the development and release of a new product line.

Cash Flows

The following table summarizes the cash flows for the three month periods ended March 31, 2011 and 2010:

	SUCCESSOR COMPANY THREE MONTHS ENDED MARCH 31, 2011	PREDECESSOR COMPANY THREE MONTHS ENDED MARCH 31, 2010
Net cash used in operating activities	\$ (568,206)	\$ (99,563)
Net cash provided by (used in) investing activities	(6,093)	9,279
Net cash provided by (used in) financing activities	402,214	(456)
Net decrease in cash	\$ (118,570)	\$ (100,674)

We anticipate that we will incur approximately \$250,000 for operating expenses. Accordingly, we will need to obtain additional financing in order to complete our business plan.

Cash Used In Operating Activities

We used cash in operating activities in the amount of \$568,206 during the three month period ended March 31, 2011 and \$99,563 during the three month period ended March 31, 2010. Cash used in operating activities was funded by cash from operating revenues and financing activities.

Cash From Investing Activities

We used cash in investment activities in the amount of \$6,093 during the three month period ended March 31, 2011 and generated \$9,279 cash from investing activities during the three month period ended March 31, 2010.

Cash from Financing Activities

We generated \$402,214 cash from financing activities during the three month period ended March 31, 2011 and used \$456 during the three months ended March 31, 2010.

For the period from January 1, 2009 through March 31, 2011, the Company incurred net losses aggregating \$854,339. We do not have sufficient working capital to enable us to carry out our stated plan of operation for the next twelve months. These financial statements do not include any adjustments to the recoverability and classification of recorded asset amounts and classification of liabilities that might be necessary should our company be unable to continue as a going concern.

Due to the uncertainty of our ability to meet our future operating expenses and the capital expenses in their report on the financial statements for the year period ended December 31, 2010, our independent auditors included an explanatory paragraph regarding concerns about our ability to continue as a going concern. Our financial statements contain additional note disclosures describing the circumstances that lead to this disclosure by our independent auditors.

The continuation of our business is dependent upon us raising additional financial support. The issuance of additional equity securities by us could result in a significant dilution in the equity interests of our current stockholders. Obtaining commercial loans, assuming those loans would be available, will increase our liabilities and future cash commitments.

Future Financings

We anticipate continuing to rely on equity sales of our common shares in order to continue to fund our business operations. Issuances of additional shares will result in dilution to our existing stockholders. There is no assurance that we will achieve any additional sales of our equity securities or arrange for debt or other financing to fund our planned activities. There is no assurance that the Company will be able to obtain financing to carry on our legal, accounting and reporting needs.

Off-Balance Sheet Arrangements

We have no significant off-balance sheet arrangements that have or are reasonably likely to have a current or future effect on our financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources that are material to stockholders.

Application of Critical Accounting Estimates

The financial statements of our company have been prepared in accordance with generally accepted accounting principles in the United States (GAAP). Because a precise determination of many assets and liabilities is dependent upon future events, the preparation of financial statements for a period necessarily involves the use of estimates, which have been made using careful judgment.

The financial statements have been prepared within the framework of the significant accounting policies summarized below:

a) Exploration Stage Activities and Mineral Property Interests

Until abandonment of its mineral property on January 23, 2009, the Company was an exploration stage mining company and had not realized any revenue from its operations. It was primarily engaged in the acquisition, exploration and development of mining properties.

b) Financial Instruments and Concentration of Risk

The fair value of financial instruments, which consist of cash, and accounts payable and accrued liabilities, were estimated to approximate their carrying values due to the immediate or relatively short maturity of these instruments.

Unless otherwise noted, it is management's opinion that this Company is not exposed to significant interest or credit risks arising from these financial instruments.

c) Basic and Diluted Loss Per Share

In accordance with ASC Topic 260, Earnings Per Share (formerly SFAS 128), the basic loss per common share is computed by dividing net loss available to common stockholders by the weighted average number of common shares outstanding. Diluted loss per common share is computed similar to basic loss per common share except that the denominator is increased to include the number of additional common shares that would have been outstanding if the potential common shares had been issued and if the additional common shares were dilutive. Diluted earnings per share excludes all dilutive potential shares if their effect is anti-dilutive.

The Company accounts for common stock purchase warrants at fair value in accordance with EITF 00-19, Accounting for Derivative Financial Instruments Indexed to and Practically Settled in, a Company's Own Stock, (codified in ASC 815, *Derivatives and Hedging*). The Black-Scholes option pricing valuation method is used to determine fair value of these warrants. Use of this method requires that the Company make assumptions regarding stock volatility, dividend yields, expected term of the warrants and risk-free rates.

d) Foreign Currency Translation

The Company's functional currency is now the U.S. dollar. In the fiscal year 2009, the functional currency was the Canadian dollar.

Transactions in Canadian currency are translated into U.S. dollars as follows:

- i) monetary items at the exchange rate prevailing at the balance sheet date;
- ii) non-monetary items at the historical exchange rate;
- iii) revenue and expense at the average rate in effect during the applicable accounting period.

Translation adjustments resulting from this process are recorded in Stockholders' Equity as a component of Accumulated Other Comprehensive Income (Loss). Gains and losses arising on translation or settlement of foreign currency denominated transactions or balances are recorded in the Statement of Operations.

g) Use of Estimates

The preparation of financial statements, in conformity with generally accepted accounting principles, requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying disclosures. Actual results may differ from the estimates.

h) Impairment of Long-Lived Assets

Impairment losses on long-lived assets used in operations are recorded when indicators of impairment are present and the undiscounted cash flows estimated to be generated by those assets are less than the assets' carrying amount. In such cases, the amount of the impairment is determined based on the relative fair values of the impaired assets.

i) Treasury Stock

Common stock repurchases are recorded as treasury stock at cost.

On forward stock split-ups, the number of all common shares disclosed in the financial statements is adjusted to give retroactive effect to such recapitalizations.

Recent Accounting Pronouncements

In June 2009, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standards (SFAS) No. 166, Accounting for Transfers of Financial Assets (ASC Topic 860) which will require more information about transfers of financial assets in situations where companies have continuing exposure to the risk related to transferred financial assets. It eliminates the concept of a qualifying special purpose entity, changes the requirements for derecognizing financial assets, and requires additional disclosure. This guidance is effective for interim and annual periods ending after November 15, 2009. The Company does not expect the adoption of the guidance to have a material impact on its financial statements.

In June 2009, the FASB issued SFAS No. 167, Amendments to FASB Interpretation No. 46(R) (ASC Topic 810). The guidance is intended to improve financial reporting by providing additional guidance to companies involved with variable interest entities and by requiring additional disclosures about a company s involvement in variable interest entities. This guidance is effective for interim and annual periods ending after November 15, 2009. The Company does not expect the adoption of the new accounting guidance to have a material impact on its financial statements.

In June 2009, the FASB issued its final Statement of Financial Accounting Standards (SFAS) No. 168, The FASB Accounting Standards Codification and the Hierarchy of Generally Accepted Accounting Principles, a replacement of FASB Statement No. 162 (SFAS 168). SFAS 168 establishes the FASB Accounting Standards Codification (Codification), which officially launched July 1, 2009, to become the source of authoritative U.S. generally accepted accounting principles (GAAP) recognized by the FASB to be applied by non-governmental entities, superseding existing FASB, American Institute of Certified Public Accountants (AICPA), Emerging Issues Task Force (EITF), and related accounting literature.

Rules and interpretive releases of the Securities and Exchange Commission (SEC) under authority of federal securities laws are also sources of authoritative U.S. GAAP for SEC registrants. SFAS 168 recognizes the previously issued GAAP pronouncements into accounting topics and displays them using a consistent structure.

In January 2010, the FASB issued ASU No. 2010-6, Improving Disclosures About Fair Value Measurements, that amends existing disclosure requirements under ASC 820 by adding required disclosures about items transferring into and out of levels 1 and 2 in the fair value hierarchy; adding separate disclosures about purchase, sales, issuances, and settlements relative to level 3 measurements; and clarifying, among other things, the existing fair value disclosures about the level of disaggregation. This ASU is effective for the first quarter of 2010, except for the requirement to provide level 3 activities of purchases, sales, issuances, and settlements on a gross basis, which is effective beginning the first quarter of 2011. Since this standard impacts disclosure requirements only, its adoption does not have a material impact on the Company s consolidated results of operations or financial condition.

Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by us in the reports that we file under the Exchange Act is accumulated and communicated to our management, as appropriate to allow timely decisions regarding required disclosure. Based on his evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were not effective as of March 31, 2011 due to the following:
