1 Ratios have been annualized and total return and portfolio turnover have not been annualized.

2 Total investment return is calculated assuming a purchase of common stock on the opening of the first day and a sale on the closing of the last day of each period reported. Dividends and distributions, if any, are assumed for the purposes of this calculation to be reinvested at prices obtained under the Fund's dividend reinvestment plan. Generally, total investment return based on net asset value will be higher than total investment return based on market value in periods where there is an increase in the discount or a decrease in the premium of the market value to the net asset value from the beginning to the end of such periods. Conversely, total investment return based on net asset value will be lower than total investment return based on market there is a decrease in the discount or an increase in the premium of the market value to the net asset value from the beginning to the end of such periods.

3 Ratios do not reflect the effect of dividend payments to preferred shareholders, if applicable.

4 Ratio reflects total net investment income less dividends paid to preferred shareholders, if applicable, divided by average net assets applicable to common shareholders.

5 In 2008, the Fund redeemed all of its preferred shares at par plus accumulated dividends amounting to \$25,024,395. See Note 7 in "Notes to financial statements." 6 Excluding any accumulated but unpaid dividends.
