NEW YORK MORTGAGE TRUST, INC. AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

June 30, 2018

(unaudited)

1. Organization

New York Mortgage Trust, Inc., together with its consolidated subsidiaries ("NYMT," "we," "our," or the "Company"), is a real estate investment trust, or REIT, in the business of acquiring, investing in, financing and managing mortgage-related and residential housing-related assets. Our objective is to deliver long-term stable distributions to our stockholders over changing economic conditions through a combination of net interest margin and net realized capital gains from a diversified investment portfolio. Our portfolio includes, without limitation, residential mortgage loans, including distressed residential and second mortgage loans, multi-family CMBS, preferred equity and joint venture equity investments in, and mezzanine loans to, owners of multi-family properties, equity and debt securities issued by entities that invest in residential and commercial real estate, non-Agency RMBS, Agency RMBS consisting of fixed-rate, adjustable-rate and hybrid adjustable-rate RMBS and Agency IOs consisting of interest only and inverse interest-only RMBS.

The Company conducts its business through the parent company, New York Mortgage Trust, Inc., and several subsidiaries, including special purpose subsidiaries established for residential loan, distressed residential loan and CMBS securitization purposes, taxable REIT subsidiaries ("TRSs") and qualified REIT subsidiaries ("QRSs"). The Company consolidates all of its subsidiaries under generally accepted accounting principles in the United States of America ("GAAP").

The Company is organized and conducts its operations to qualify as a REIT for federal income tax purposes. As such, the Company will generally not be subject to federal income taxes on that portion of its income that is distributed to stockholders if it distributes at least 90% of its REIT taxable income to its stockholders by the due date of its federal income tax return and complies with various other requirements.

Table of Contents

2.Summary of Significant Accounting Policies

Definitions – The following defines certain of the commonly used terms in these financial statements:

“RMBS” refers to residential mortgage-backed securities comprised of adjustable-rate, hybrid adjustable-rate, fixed-rate, interest only and inverse interest only and principal only securities;

“Agency RMBS” refers to RMBS representing interests in or obligations backed by pools of mortgage loans issued or guaranteed by a government sponsored enterprise (“GSE”), such as the Federal National Mortgage Association (“Fannie Mae”) or the Federal Home Loan Mortgage Corporation (“Freddie Mac”), or an agency of the U.S. government, such as the Government National Mortgage Association (“Ginnie Mae”);

“non-Agency RMBS” refers to RMBS backed by prime jumbo residential mortgage loans, including performing, re-performing and non-performing mortgage loans;

"IO RMBS" refers to RMBS comprised of IOs;

“IOs” refers collectively to interest only and inverse interest only mortgage-backed securities that represent the right to the interest component of the cash flow from a pool of mortgage loans;

“POs” refers to mortgage-backed securities that represent the right to the principal component of the cash flow from a pool of mortgage loans;

“Agency IOs” refers to Agency RMBS comprised of IO RMBS;

“ARMs” refers to adjustable-rate residential mortgage loans;

“prime ARM loans” and “residential securitized loans” each refer to prime credit quality residential ARM loans held in our securitization trusts;

“Agency ARMs” refers to Agency RMBS comprised of adjustable-rate and hybrid adjustable-rate RMBS;

“Agency fixed-rate RMBS” refers to Agency RMBS comprised of fixed-rate RMBS;

“CMBS” refers to commercial mortgage-backed securities comprised of commercial mortgage pass-through securities, as well as IO or PO securities that represent the right to a specific component of the cash flow from a pool of commercial mortgage loans;

“Multi-family CMBS” refers to CMBS backed by commercial mortgage loans on multi-family properties;

“CDOs” refers to collateralized debt obligations; and

“CLO” refers to collateralized loan obligations.

Basis of Presentation – The accompanying condensed consolidated balance sheet as of December 31, 2017 has been derived from audited financial statements. The accompanying condensed consolidated balance sheet as of June 30, 2018, the accompanying condensed consolidated statements of operations for the three and six months ended June 30, 2018 and 2017, the accompanying condensed consolidated statements of comprehensive income for the three and six months ended June 30, 2018 and 2017, the accompanying condensed consolidated statement of changes in stockholders’ equity for the six months ended June 30, 2018 and the accompanying condensed consolidated statements of cash flows for the six months ended June 30, 2018 and 2017 are unaudited. In our opinion, all adjustments (which include only normal recurring adjustments) necessary to present fairly the Company’s financial position, results of operations and cash flows have been made. Certain information and footnote disclosures normally included in financial statements prepared in accordance with GAAP have been condensed or omitted in accordance with Article 10 of Regulation S-X and the instructions to Form 10-Q. These condensed consolidated financial statements should be read in conjunction with the audited consolidated financial statements and notes thereto included in our Annual Report on Form 10-K for the year ended December 31, 2017, as filed with the U.S. Securities and Exchange Commission (“SEC”). The results of operations for the three and six months ended June 30, 2018 are not necessarily indicative of the operating results for the full year.

The accompanying condensed consolidated financial statements have been prepared on the accrual basis of accounting in accordance with GAAP. The preparation of financial statements in conformity with GAAP requires management to

make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Management has made significant estimates in several areas, including valuation of its CMBS investments, multi-family loans held in securitization trusts and multi-family CDOs, as well as, income recognition on distressed residential mortgage loans purchased at a discount. Although the Company's estimates contemplate current conditions and how it expects them to change in the future, it is reasonably possible that actual conditions could be different than anticipated in those estimates, which could materially impact the Company's results of operations and its financial condition.

Reclassifications – Certain prior period amounts have been reclassified in the condensed consolidated financial statements to conform to current period presentation.

Table of Contents

Principles of Consolidation and Variable Interest Entities – The accompanying condensed consolidated financial statements of the Company include the accounts of all its subsidiaries which are majority-owned, controlled by the Company or a variable interest entity ("VIE") where the Company is the primary beneficiary. All significant intercompany accounts and transactions have been eliminated in consolidation.

A VIE is an entity that lacks one or more of the characteristics of a voting interest entity. A VIE is defined as an entity in which equity investors do not have the characteristics of a controlling financial interest or do not have sufficient equity at risk for the entity to finance its activities without additional subordinated financial support from other parties. The Company consolidates a VIE when it is the primary beneficiary of such VIE, herein referred to as a "Consolidated VIE". As primary beneficiary, the Company has both the power to direct the activities that most significantly impact the economic performance of the VIE and a right to receive benefits or absorb losses of the entity that could be potentially significant to the VIE. The Company is required to reconsider its evaluation of whether to consolidate a VIE each reporting period, based upon changes in the facts and circumstances pertaining to the VIE.

Business Combinations – The Company evaluates each purchase transaction to determine whether the acquired assets meet the definition of a business. The Company accounts for business combinations by applying the acquisition method in accordance with Accounting Standards Codification ("ASC") 805, Business Combinations ("ASC 805"). Transaction costs related to acquisition of a business are expensed as incurred and excluded from the fair value of consideration transferred. The identifiable assets acquired, liabilities assumed and non-controlling interests, if any, in an acquired entity are recognized and measured at their estimated fair values. The excess of the fair value of consideration transferred over the fair values of identifiable assets acquired, liabilities assumed and non-controlling interests, if any, in an acquired entity, net of fair value of any previously held interest in the acquired entity, is recorded as goodwill. Such valuations require management to make significant estimates and assumptions, especially with respect to intangible assets and liabilities.

Contingent consideration is classified as a liability or equity, as applicable. Contingent consideration in connection with the acquisition of a business is measured at fair value on acquisition date, and unless classified as equity, is remeasured at fair value each reporting period thereafter until the consideration is settled, with changes in fair value included in net income.

Net cash paid to acquire a business is classified as investing activities on the accompanying condensed consolidated statements of cash flows.

On March 31, 2017, the Company determined that it became the primary beneficiary of 200 RHC Hoover, LLC ("Riverchase Landing") and The Clusters, LLC ("The Clusters"), two VIEs that each own a multi-family apartment community and in which the Company held preferred equity investments. Accordingly, on this date, the Company consolidated both Riverchase Landing and The Clusters into its condensed consolidated financial statements in accordance with ASC 810, Consolidation ("ASC 810"). These transactions were accounted for by applying the acquisition method for business combinations under ASC 805 (see Note 10). In March 2018, Riverchase Landing completed the sale of its multi-family apartment community and redeemed the Company's preferred equity investment. The Company de-consolidated Riverchase Landing as of the date of the sale.

Investment Securities Available for Sale – The Company's investment securities, where the fair value option has not been elected and which are reported at fair value with unrealized gains and losses reported in Other Comprehensive Income ("OCI"), include Agency RMBS, non-Agency RMBS and CMBS. The Company has elected the fair value option for its Agency IOs and certain Agency ARMs and Agency fixed-rate RMBS which were transferred from our Agency IO portfolio, which measures unrealized gains and losses through earnings in the accompanying condensed consolidated statements of operations. The fair value option was elected for these investment securities to better match

the accounting for these investment securities with the related derivative instruments within the Agency IO portfolio, which are not designated as hedging instruments for accounting purposes. As of June 30, 2018, the Company has fully exited its Agency IO strategy.

The Company generally intends to hold its investment securities until maturity; however, from time to time, it may sell any of its securities as part of the overall management of its business. As a result, our investment securities are classified as available for sale securities. Realized gains and losses recorded on the sale of investment securities available for sale are based on the specific identification method and included in realized gain (loss) on investment securities and related hedges in the accompanying condensed consolidated statements of operations.

Interest income on our investment securities available for sale is accrued based on the outstanding principal balance and their contractual terms. Purchase premiums or discounts on investment securities are amortized or accreted to interest income over the estimated life of the investment securities using the effective yield method. Adjustments to amortization are made for actual prepayment activity.

Table of Contents

Interest income on certain of our credit sensitive securities, such as our CMBS that were purchased at a discount to par value, is recognized based on the security's effective yield. The effective yield on these securities is based on management's estimate of the projected cash flows from each security, which are estimated based on assumptions related to fluctuations in interest rates, prepayment speeds and the timing and amount of credit losses. On at least a quarterly basis, management reviews and, if appropriate, adjusts its cash flow projections based on input and analysis received from external sources, internal models, and its judgment about interest rates, prepayment rates, the timing and amount of credit losses, and other factors. Changes in cash flows from those originally projected, or from those estimated at the last evaluation, may result in a prospective change in the yield (or interest income) recognized on these securities.

A portion of the purchase discount on the Company's first loss PO multi-family CMBS is designated as non-accretable purchase discount or credit reserve, which is intended to partially mitigate the Company's risk of loss on the mortgages collateralizing such multi-family CMBS, and is not expected to be accreted into interest income. The amount designated as a credit reserve may be adjusted over time, based on the actual performance of the security, its underlying collateral, actual and projected cash flow from such collateral, economic conditions and other factors. If the performance of a security with a credit reserve is more favorable than forecasted, a portion of the amount designated as credit reserve may be accreted into interest income over time. Conversely, if the performance of a security with a credit reserve is less favorable than forecasted, the amount designated as credit reserve may be increased, or impairment charges and write-downs of such securities to a new cost basis could be required.

The Company accounts for debt securities that are of high credit quality (generally those rated AA or better by a Nationally Recognized Statistical Rating Organization, or NRSRO) at date of acquisition in accordance with ASC 320-10, Investments - Debt and Equity Securities ("ASC 320-10"). The Company accounts for debt securities that are not of high credit quality (i.e., those whose risk of loss is less than remote) or securities that can be contractually prepaid such that we would not recover our initial investment at the date of acquisition in accordance with ASC 325-40, Investments - Beneficial Interests in Securitized Financial Assets ("ASC 325-40"). The Company considers credit ratings, the underlying credit risk and other market factors in determining whether the debt securities are of high credit quality; however, securities rated lower than AA or an equivalent rating are not considered of high credit quality and are accounted for in accordance with ASC 325-40. If ratings are inconsistent among NRSROs, the Company uses the lower rating in determining whether the securities are of high credit quality.

The Company assesses its impaired securities on at least a quarterly basis and designates such impairments as either "temporary" or "other-than-temporary" by applying the guidance prescribed in ASC 320-10. When the fair value of an investment security is less than its amortized cost as of the reporting balance sheet date, the security is considered impaired. If the Company intends to sell an impaired security, or it is more likely than not that it will be required to sell the impaired security before its anticipated recovery, the Company recognizes an other-than-temporary impairment through earnings equal to the entire difference between the investment's amortized cost and its fair value as of the balance sheet date. If the Company does not expect to sell an other-than-temporarily impaired security, only the portion of the other-than-temporary impairment related to credit losses is recognized through earnings with the remainder recognized as a component of other comprehensive income (loss) on the accompanying condensed consolidated balance sheets. Impairments recognized through other comprehensive income (loss) do not impact earnings. Following the recognition of an other-than-temporary impairment through earnings, a new cost basis is established for the security, which may not be adjusted for subsequent recoveries in fair value through earnings. However, other-than-temporary impairments recognized through earnings may be accreted back to the amortized cost basis of the security on a prospective basis through interest income. The determination as to whether an other-than-temporary impairment exists and, if so, the amount considered other-than-temporarily impaired is subjective, as such determinations are based on both factual and subjective information available at the time of assessment as well the Company's estimates of the future performance and cash flow projections. As a result, the

timing and amount of other-than-temporary impairments constitute material estimates that are susceptible to significant change.

In determining the other-than temporary impairment related to credit losses for securities that are not of high credit quality, the Company compares the present value of the remaining cash flows expected to be collected at the prior reporting date or purchase date, whichever is most recent, against the present value of the cash flows expected to be collected at the current financial reporting date. The Company considers information available about the past and expected future performance of underlying mortgage loans, including timing of expected future cash flows, prepayment rates, default rates, loss severities and delinquency rates.

Table of Contents

Residential Mortgage Loans Held in Securitization Trusts – Residential mortgage loans held in securitization trusts are comprised of certain ARM loans transferred to Consolidated VIEs that have been securitized into sequentially rated classes of beneficial interests. The Company accounted for these securitization trusts as financings which are consolidated into the Company's financial statements. Residential mortgage loans held in securitization trusts are carried at their unpaid principal balances, net of unamortized premium or discount, unamortized loan origination costs and allowance for loan losses. Interest income is accrued and recognized as revenue when earned according to the terms of the mortgage loans and when, in the opinion of management, it is collectible. The accrual of interest on loans is discontinued when, in management's opinion, the interest is not collectible in the normal course of business, but in all cases when payment becomes greater than 90 days delinquent. Loans return to accrual status when principal and interest become current and are anticipated to be fully collectible.

The Company establishes an allowance for loan losses based on management's judgment and estimate of credit losses inherent in our portfolio of residential mortgage loans held in securitization trusts. Estimation involves the consideration of various credit-related factors, including but not limited to, macro-economic conditions, current housing market conditions, loan-to-value ratios, delinquency status, historical credit loss severity rates, purchased mortgage insurance, the borrower's current economic condition and other factors deemed to warrant consideration. Additionally, management looks at the balance of any delinquent loan and compares that to the current value of the collateralizing property. Management utilizes various home valuation methodologies including appraisals, broker pricing opinions, internet-based property data services to review comparable properties in the same area or consults with a broker in the property's area.

Residential Mortgage Loans, at fair value – Certain of the Company's acquired residential mortgage loans, including distressed residential mortgage loans and second mortgage loans, are presented at fair value on its condensed consolidated balance sheets as a result of a fair value election made at the time of acquisition pursuant to ASC 825, Financial Instruments. Changes in fair value are recorded in current period earnings in net gain (loss) on residential mortgage loans at fair value in the Company's condensed consolidated statements of operations.

Premiums and discounts associated with the purchase of residential mortgage loans, at fair value are amortized or accreted into interest income over the life of the related loan using the effective interest method. Any premium amortization or discount accretion is reflected as a component of interest income, residential mortgage loans in the Company's condensed consolidated statements of operations.

Residential mortgage loans at fair value are considered past due when they are 30 days past their contractual due date, and are placed on nonaccrual status when delinquent for more than 90 days. Interest accrued but not yet collected at the time loans are placed on nonaccrual is reversed and subsequently recognized only to the extent it is received in cash or until it qualifies for return to accrual status. Loans are restored to accrual status only when contractually current or the collection of future payments is reasonably assured.

Acquired Distressed Residential Mortgage Loans – Distressed residential mortgage loans are comprised of pools of fixed- and adjustable-rate residential mortgage loans acquired by the Company at a discount, with evidence of credit deterioration since their origination and where it is probable that the Company will not collect all contractually required principal payments. Distressed residential mortgage loans held in securitization trusts are distressed residential mortgage loans transferred to Consolidated VIEs that have been securitized into beneficial interests. The Company accounted for these securitization trusts as financings which are consolidated into the Company's financial statements.

Acquired distressed residential mortgage loans that have evidence of deteriorated credit quality at acquisition are accounted for under ASC 310-30, Loans and Debt Securities Acquired with Deteriorated Credit Quality ("ASC

310-30"). Management evaluates whether there is evidence of credit quality deterioration as of the acquisition date using indicators such as past due or modified status, risk ratings, recent borrower credit scores and recent loan-to-value percentages. Acquired distressed residential mortgage loans are recorded at fair value at the date of acquisition, with no allowance for loan losses. Under ASC 310-30, the acquired loans may be accounted for individually or aggregated and accounted for as a pool of loans if the loans being aggregated have common risk characteristics. A pool is accounted for as a single asset with a single composite interest rate and an expectation of aggregate cash flows. Once a pool is assembled, it is treated as if it was one loan for purposes of applying the accounting guidance.

Table of Contents

Under ASC 310-30, the excess of cash flows expected to be collected over the carrying amount of the loans, referred to as the “accretable yield,” is accreted into interest income over the life of the loans in each pool or individually using a level yield methodology. Accordingly, our acquired distressed residential mortgage loans accounted for under ASC 310-30 are not subject to classification as nonaccrual classification in the same manner as our residential mortgage loans that were not distressed when acquired by us. Rather, interest income on acquired distressed residential mortgage loans relates to the accretable yield recognized at the pool level or on an individual loan basis, and not to contractual interest payments received at the loan level. The difference between contractually required principal and interest payments and the cash flows expected to be collected, referred to as the “nonaccretable difference,” includes estimates of both the impact of prepayments and expected credit losses over the life of the individual loan, or the pool (for loans grouped into a pool).

Management monitors actual cash collections against its expectations, and revised cash flow estimates are prepared as necessary. A decrease in expected cash flows in subsequent periods may indicate that the loan pool or individual loan, as applicable, is impaired, thus requiring the establishment of an allowance for loan losses by a charge to the provision for loan losses. An increase in expected cash flows in subsequent periods initially reduces any previously established allowance for loan losses by the increase in the present value of cash flows expected to be collected, and results in a recalculation of the amount of accretable yield for the loan pool. The adjustment of accretable yield due to an increase in expected cash flows is accounted for prospectively as a change in estimate. The additional cash flows expected to be collected are reclassified from the nonaccretable difference to the accretable yield, and the amount of periodic accretion is adjusted accordingly over the remaining life of the loans in the pool or individual loan, as applicable. The impacts of (i) prepayments, (ii) changes in variable interest rates, and (iii) any other changes in the timing of expected cash flows are recognized prospectively as adjustments to interest income.

A distressed residential mortgage loan disposal, which may include a loan sale, receipt of payment in full from the borrower or foreclosure, results in removal of the loan from the loan pool at its allocated carrying amount. In the event of a sale of the loan and receipt of payment (in full or partial) from the borrower, a gain or loss on sale is recognized and reported based on the difference between the sales proceeds or payment from the borrower and the allocated carrying amount of the acquired distressed residential mortgage loan. In the case of a foreclosure, an individual loan is removed from the pool and a loss on sale is recognized if the carrying value exceeds the fair value of the collateral less costs to sell. A gain is not recognized if the fair value of collateral less costs to sell exceeds the carrying value.

The Company uses the specific allocation method for the removal of loans as the estimated cash flows and related carrying amount for each individual loan are known. In these cases, the remaining accretable yield is unaffected and any material change in remaining effective yield caused by the removal of the loan from the pool is addressed by the re-assessment of the estimate of cash flows for the pool prospectively.

Acquired distressed residential mortgage loans subject to modification are not removed from the pool even if those loans would otherwise be considered troubled debt restructurings because the pool, and not the individual loan, represents the unit of account.

For individual loans not accounted for in pools that are sold or satisfied by payment in full, a gain or loss on sale is recognized and reported based on the difference between the sales proceeds and the carrying amount of the acquired distressed residential mortgage loan. In the case of a foreclosure, a loss is recognized if the carrying value exceeds the fair value of the underlying collateral less costs to sell. A gain is not recognized if the fair value of the underlying collateral less costs to sell exceeds the carrying value.

Multi-Family Loans Held in Securitization Trusts – Multi-family loans held in securitization trusts are comprised of multi-family mortgage loans held in Freddie Mac-sponsored multi-family K-Series securitizations of which we, or one

of our "special purpose entities," or "SPEs," own the first loss POs and certain IOs and mezzanine securities and that we consolidate (the "Consolidated K-Series"). Based on a number of factors, management determined that the Company was the primary beneficiary of each VIE within the Consolidated K-Series, met the criteria for consolidation and, accordingly, has consolidated these securitizations, including their assets, liabilities, income and expenses in our financial statements. The Company has elected the fair value option on each of the assets and liabilities held within the Consolidated K-Series, which requires that changes in valuations be reflected in the Company's accompanying consolidated statements of operations. In accordance with ASC 810, the Company measures both the financial assets and financial liabilities of a qualifying consolidated collateralized financing entity ("CFE") using the fair value of either the CFE's financial assets or financial liabilities, whichever is more observable. As the Company's multi-family securitization trusts are considered qualifying CFEs, the Company determines the fair value of multi-family loans held in securitization trusts based on the fair value of its multi-family collateralized debt obligations and its retained interests from these securitizations (eliminated in consolidation in accordance with GAAP), as the fair value of these instruments is more observable.

Table of Contents

Interest income is accrued and recognized as revenue when earned according to the terms of the multi-family loans and when, in the opinion of management, it is collectible. The accrual of interest on multi-family loans is discontinued when, in management's opinion, the interest is not collectible in the normal course of business, but in all cases when payment becomes greater than 90 days delinquent. The multi-family loans return to accrual status when principal and interest become current and are anticipated to be fully collectible.

Preferred Equity and Mezzanine Loan Investments - The Company invests in preferred equity of and mezzanine loans to entities that have significant real estate assets.

A preferred equity investment is an equity investment in the entity that owns the underlying property. Preferred equity is not secured by the underlying property, but holders have priority relative to common equity holders on cash flow distributions and proceeds from capital events. In addition, preferred equity holders may be able to enhance their position and protect their equity position with covenants that limit the entity's activities and grant the holder the exclusive right to control the property after an event of default.

Mezzanine loans are secured by a pledge of the borrower's equity ownership in the property. Unlike a mortgage, this loan does not represent a lien on the property. Therefore, it is always junior and subordinate to any first lien as well as second liens, if applicable, on the property. These loans are senior to any preferred equity or common equity interests in the entity that owns the property.

Preferred equity, where the risks and payment characteristics are equivalent to mezzanine loans, and mezzanine loan investments are accounted for as loans and are stated at unpaid principal balance, adjusted for any unamortized premium or discount, deferred fees or expenses, net of valuation allowances. The Company has evaluated its preferred equity and mezzanine loan investments for accounting treatment as loans versus equity investment utilizing the guidance provided by the ADC Arrangements Subsection of ASC 310, Receivables.

For preferred equity and mezzanine loan investments where the characteristics, facts and circumstances indicate that loan accounting treatment is appropriate, the Company accretes or amortizes any discounts or premiums and deferred fees and expenses over the life of the related asset utilizing the effective interest method or straight line-method, if the result is not materially different.

Management evaluates the collectibility of both interest and principal of each of these loans, if circumstances warrant, to determine whether they are impaired. A loan is impaired when, based on current information and events, it is probable that we will be unable to collect all amounts due according to the existing contractual terms. When a loan is impaired, the amount of the loss accrual is calculated by comparing the carrying amount of the investment to the estimated fair value of the loan or, as a practical expedient, to the value of the collateral if the loan is collateral dependent. Interest income is accrued and recognized as revenue when earned according to the terms of the loans and when, in the opinion of management, it is collectible. The accrual of interest on loans is discontinued when, in management's opinion, the interest is not collectible in the normal course of business, but in all cases when payment becomes greater than 90 days delinquent. Loans return to accrual status when principal and interest become current and are anticipated to be fully collectible.

Preferred equity and mezzanine loan investments where the risks and payment characteristics are equivalent to an equity investment are accounted for using the equity method of accounting. See "Investment in Unconsolidated Entities".

Mortgage Loans Held for Investment – Mortgage loans held for investment are stated at unpaid principal balance, adjusted for any unamortized premium or discount, deferred fees or expenses, net of valuation allowances, and are

included in receivables and other assets. Interest income is accrued on the principal amount of the loan based on the loan's contractual interest rate. Amortization of premiums and discounts is recorded using the effective yield method. Interest income, amortization of premiums and discounts and prepayment fees are reported in interest income. A loan is considered to be impaired when it is probable that based upon current information and events, the Company will be unable to collect all amounts due under the contractual terms of the loan agreement. Based on the facts and circumstances of the individual loans being impaired, loan specific valuation allowances are established for the excess carrying value of the loan over either: (i) the present value of expected future cash flows discounted at the loan's original effective interest rate, (ii) the estimated fair value of the loan's underlying collateral if the loan is in the process of foreclosure or otherwise collateral dependent, or (iii) the loan's observable market price.

Table of Contents

Investment in Unconsolidated Entities – Non-controlling, unconsolidated ownership interests in an entity may be accounted for using the equity method or the cost method. In circumstances where the Company has a non-controlling interest but either owns a significant interest or is able to exert influence over the affairs of the enterprise, the Company utilizes the equity method of accounting. Under the equity method of accounting, the initial investment is increased each period for additional capital contributions and a proportionate share of the entity’s earnings or preferred return and decreased for cash distributions and a proportionate share of the entity’s losses. Management periodically reviews its investments for impairment based on projected cash flows from the entity over the holding period. When any impairment is identified, the investments are written down to recoverable amounts.

The Company may elect the fair value option for an investment in an unconsolidated entity that is accounted for using the equity method. The Company elected the fair value option for certain investments in unconsolidated entities that own interests (directly or indirectly) in commercial and residential real estate assets because the Company determined that such presentation represents the underlying economics of the respective investment. The Company records the change in fair value of its investment in other income in the condensed consolidated statements of operations (see Note 8).

Operating Real Estate Held in Consolidated Variable Interest Entities, Net – The Company recorded its initial investments in income-producing real estate at fair value at the acquisition date in accordance with ASC 805. The purchase price of acquired properties was apportioned to the tangible and identified intangible assets and liabilities acquired at their respective estimated fair values. In making estimates of fair values for purposes of allocating purchase price, the Company utilized a number of sources, including independent appraisals that may be obtained in connection with the acquisition or financing of the respective real estate, its own analysis of recently-acquired and existing comparable properties, property financial results, and other market data. The Company also considered information obtained about the real estate as a result of its due diligence, including marketing and leasing activities, in estimating the fair value of the tangible and intangible assets acquired. The Company considered the value of acquired in-place leases and utilized an amortization period that is the average remaining term of the acquired leases. The Company has reclassified its operating real estate held in consolidated variable interest entities to real estate held for sale in consolidated variable interest entities as of June 30, 2018.

Real Estate - Depreciation – The Company depreciates on a straight-line basis the building component of its real estate over a 30-year estimated useful life, building and improvements over a 10-year to 30-year estimated useful life, and furniture, fixtures and equipment over a 5-year estimated useful life, all of which are judgmental determinations. Betterments and certain costs directly related to the improvement of real estate are capitalized. Expenditures for ordinary maintenance and repairs are expensed to operations as incurred.

Real Estate Held for Sale in Consolidated Variable Interest Entities - The Company classifies its long-lived assets as held for sale in accordance with ASC 360, Property, Plant, and Equipment. When real estate assets are identified as held for sale, the Company discontinues depreciating (amortizing) the assets and estimates the fair value, net of selling costs, of such assets. Real estate held for sale in consolidated variable interest entities is recorded at the lower of the net carrying amount of the assets or the estimated net fair value. If the estimated net fair value of the real estate held for sale is less than the net carrying amount of the assets, an impairment charge is recorded in the condensed consolidated statements of operations with an allocation to non-controlling interests in the respective VIEs, if any.

The Company assesses the net fair value of real estate held for sale each reporting period the assets remain classified as held for sale. Subsequent changes, if any, in the net fair value of the real estate assets held for sale that require an adjustment to the carrying amount are recorded in the condensed consolidated statements of operations with an allocation to non-controlling interests in the respective VIEs, if any, unless the adjustment causes the carrying amount of the assets to exceed the net carrying amount upon initial classification as held for sale.

If circumstances arise that the Company previously considered unlikely and, as a result, the Company decides not to sell real estate assets previously classified as held for sale, the real estate assets are reclassified to another real estate classification. Real estate assets that are reclassified are measured at the lower of (a) their carrying amount before they were classified as held for sale, adjusted for any depreciation (amortization) expense that would have been recognized had the assets remained in their previous classification, or (b) their fair value at the date of the subsequent decision not to sell.

Table of Contents

Real Estate Sales – The Company accounts for its real estate sales in accordance with ASC 360-20, Property, Plant and Equipment - Real Estate Sales. When real estate is sold, the nature of the entire real estate component being sold is considered in relation to the entire transaction to determine whether the substance of the transaction is the sale of real estate. Profit is recognized on the date of the real estate sale provided that a) a sale is consummated, b) the buyer's initial and continuing investments are adequate to demonstrate commitment to pay for the property, c) the seller's receivable is not subject to future subordination, and d) the seller has transferred to the buyer the usual risks and rewards of ownership and does not have a substantial continuing involvement with the sold property. Sales value is calculated based off of the stated sales price plus any other proceeds that are additions to the sales price subtracting any discount needed to reduce a receivable to its present value and any services the seller commits to perform without compensation. See Note 11 for further discussion regarding sales of real estate by consolidated VIEs.

Real Estate Under Development – The Company's expenditures which directly relate to the acquisition, development, construction and improvement of properties are capitalized at cost. During the development period, which culminates once a property is substantially complete and ready for intended use, operating and carrying costs such as interest expense, real estate taxes, insurance and other direct costs are capitalized. Advertising and general administrative costs that do not relate to the development of a property are expensed as incurred. Real estate under development as of June 30, 2018 and December 31, 2017 of \$20.3 million and \$22.9 million, respectively, is included in receivables and other assets on the condensed consolidated balance sheets.

Real Estate - Impairment – The Company periodically evaluates its real estate assets for indicators of impairment. The judgments regarding the existence of impairment indicators are based on factors such as operational performance, market conditions and legal and environmental concerns, as well as the Company's ability to hold and its intent with regard to each asset. Future events could occur which would cause the Company to conclude that impairment indicators exist and an impairment is warranted. If impairment indicators exist for long-lived assets to be held and used, and the expected future undiscounted cash flows are less than the carrying amount of the asset, then the Company will record an impairment loss for the difference between the fair value of the asset and its carrying amount. If the asset is to be disposed of, then an impairment loss is recognized for the difference between the estimated fair value of the asset, net of selling costs, and its carrying amount. The Company, through one of its consolidated VIEs, recorded a \$2.1 million impairment loss on real estate under development during the three months ended June 30, 2018. The impairment loss is included in other income in the Company's condensed consolidated statements of operations. \$1.0 million of this impairment loss is included in net income attributable to non-controlling interest in consolidated variable interest entities on the accompanying condensed consolidated statements of operations, resulting in a net loss to the Company of \$1.1 million. See Note 10 for further discussion regarding impairment.

Cash and Cash Equivalents – Cash and cash equivalents include cash on hand, amounts due from banks and overnight deposits. The Company maintains its cash and cash equivalents in highly rated financial institutions, and at times these balances exceed insurable amounts.

Goodwill – Goodwill represents the excess of the fair value of consideration transferred in a business combination over the fair values of identifiable assets acquired, liabilities assumed and non-controlling interests, if any, in an acquired entity, net of fair value of any previously held interest in the acquired entity. Goodwill of \$25.2 million as of June 30, 2018 and December 31, 2017 relates to the Company's multi-family investment reporting unit.

Goodwill is not amortized but is evaluated for impairment on an annual basis, or more frequently if the Company believes indicators of impairment exist, by initially performing a qualitative screen and, if necessary, then comparing fair value of the reporting unit to its carrying value, including goodwill. If the fair value of the reporting unit is less than the carrying value, an impairment charge for the amount by which the carrying amount exceeds the reporting unit's fair value (in an amount not to exceed the total amount of goodwill allocated to the reporting unit) is recognized.

The Company evaluated goodwill as of October 1, 2017 and no impairment was indicated.

Intangible Assets – Intangible assets consisting of acquired trade name, acquired technology, employment/non-compete agreements, and acquired in-place leases with useful lives ranging from 6 months to 10 years are included in receivables and other assets on the condensed consolidated balance sheets. Intangible assets with estimable useful lives are amortized on a straight-line basis over their respective estimated useful lives and reviewed for impairment whenever events or changes in circumstances indicate that the carrying value may not be recoverable. The useful lives of intangible assets are evaluated on an annual basis to determine whether events and circumstances warrant a revision to the remaining useful life. See "Operating Real Estate Held in Consolidated Variable Interest Entities, Net" for further discussion of acquired in-place lease intangible assets.

Table of Contents

Receivables and Other Assets – Receivables and other assets as of June 30, 2018 and December 31, 2017 include restricted cash held by third parties of \$5.7 million and \$11.0 million, respectively. Included in restricted cash is \$0.5 million held in our Agency IO portfolio to be used for trading purposes and \$0.7 million held by counterparties as collateral for TBAs as of December 31, 2017. Interest receivable on multi-family loans held in securitization trusts is also included in the amounts of \$32.2 million and \$33.6 million as of June 30, 2018 and December 31, 2017, respectively.

Financing Arrangements, Portfolio Investments – The Company finances the majority of its investment securities available for sale using repurchase agreements. Under a repurchase agreement, an asset is sold to a counterparty to be repurchased at a future date at a predetermined price, which represents the original sales price plus interest. The repurchase agreements are treated as collateralized financing transactions and carried at the contractual amounts, as specified in the respective agreements. Borrowings under repurchase agreements generally bear interest rates of a specified margin over LIBOR.

Financing Arrangements, Residential Mortgage Loans – The Company finances a portion of its residential mortgage loans, including its distressed residential mortgage loans, through repurchase agreements (see Note 14). The borrowing under the repurchase agreements bear an interest rate of a specified margin over one-month LIBOR. The repurchase agreements are treated as collateralized financing transactions and carried at the contractual amounts, as specified in the respective agreements. Costs related to the establishment of the repurchase agreements which include underwriting, legal, accounting and other fees are reflected as deferred charges. Such costs are presented as a deduction from the corresponding debt liability on the Company's accompanying condensed consolidated balance sheets in the amount of \$0.3 million as of June 30, 2018 and \$0.7 million as of December 31, 2017. These deferred charges are amortized as an adjustment to interest expense using the effective interest method, or straight line-method, if the result is not materially different.

Residential Collateralized Debt Obligations ("Residential CDOs") – We use Residential CDOs to permanently finance our residential mortgage loans held in securitization trusts. For financial reporting purposes, the ARM loans held as collateral are recorded as assets of the Company and the Residential CDOs are recorded as the Company's debt. The Company completed four securitizations in 2005 and 2006. The first three were accounted for as a permanent financing while the fourth was accounted for as a sale and accordingly, is not included in the Company's accompanying condensed consolidated financial statements.

Multi-Family Collateralized Debt Obligations ("Multi-Family CDOs") – The Consolidated K-Series including their debt are referred to as Multi-Family CDOs in our condensed consolidated financial statements. The Multi-Family CDOs permanently finance the multi-family mortgage loans held in the Consolidated K-Series securitizations. For financial reporting purposes, the loans held as collateral are recorded as assets of the Company and the Multi-Family CDOs are recorded as the Company's debt. We refer to the Residential CDOs and Multi-Family CDOs collectively as "CDOs" in this report.

Securitized Debt – Securitized debt represents third-party liabilities of Consolidated VIEs and excludes liabilities of the VIEs acquired by the Company that are eliminated on consolidation. The Company has entered into several financing transactions that resulted in the Company consolidating as VIEs the SPEs that were created to facilitate the transactions and to which underlying assets in connection with the financing were transferred. The Company engaged in these transactions primarily to obtain permanent or longer term financing on a portion of its multi-family CMBS and acquired distressed residential mortgage loans.

Costs related to issuance of securitized debt which include underwriting, rating agency, legal, accounting and other fees are reflected as deferred charges. Such costs are presented as a deduction from the corresponding debt liability on

the Company's accompanying condensed consolidated balance sheets in the amount of \$0.4 million and \$0.7 million as of June 30, 2018 and December 31, 2017, respectively. These deferred charges are amortized as an adjustment to interest expense using the effective interest method, or straight line-method, if the result is not materially different.

Convertible Notes – On January 23, 2017, the Company issued convertible notes (the "Convertible Notes") to finance the acquisition of targeted assets and for general working capital purposes. The Company evaluated the conversion features of the Convertible Notes for embedded derivatives in accordance with ASC 815, Derivatives and Hedging ("ASC 815") and determined that the conversion features should not be bifurcated from the notes.

The Convertible Notes were issued at a 4% discount. Costs related to issuance of the Convertible Notes which include underwriting, legal, accounting and other fees are reflected as deferred charges. The discount and deferred charges are amortized as an adjustment to interest expense using the effective interest method. The discount and deferred issuance costs, net of amortization, are presented as a deduction from the corresponding debt liability on the Company's accompanying condensed consolidated balance sheets in the amount of \$8.3 million and \$9.3 million as of June 30, 2018 and December 31, 2017, respectively.

Table of Contents

Derivative Financial Instruments – In accordance with ASC 815, the Company records derivative financial instruments on its condensed consolidated balance sheets as assets or liabilities at fair value. Changes in fair value are accounted for depending on the use of the derivative instruments and whether they qualify for hedge accounting treatment.

The Company uses interest rate swaps to hedge the variable cash flows associated with our variable rate borrowings. We typically pay a fixed rate and receive a floating rate, based on one or three month LIBOR, on the notional amount of the interest rate swaps. The floating rate we receive under our swap agreements has the effect of offsetting the repricing characteristics and cash flows of our financing arrangements. At the inception of an interest rate swap agreement, the Company determines whether the instrument will be part of a qualifying hedge accounting relationship or whether the Company will account for the contract as a trading instrument. The Company has elected to treat all current interest swaps as trading instruments due to volatility and difficulty in effectively matching cash flows. Changes in fair value for interest rate swaps designated as trading instruments are reported in the condensed consolidated statements of operations as unrealized gain (loss) on investment securities and related hedges.

All of the Company's interest rate swaps outstanding are cleared through a central clearing house. The Company exchanges variation margin for swaps based upon daily changes in fair value. As a result of amendments to rules governing certain central clearing activities, the exchange of variation margin is treated as a legal settlement of the exposure under the swap contract. Previously such payments were treated as cash collateral pledged against the exposure under the swap contract. Accordingly, the Company accounted for the receipt or payment of variation margin as a direct increase of or reduction to the carrying value of the interest rate swap asset or liability on the Company's consolidated balance sheets.

Manager Compensation – We are a party to an investment management agreement with Headlands Asset Management LLC (“Headlands”) pursuant to which Headlands provides investment management services with respect to our investments in certain distressed residential mortgage loans. From 2011 to December 2017, we were a party to an investment management agreement with the Midway Group, LP (“Midway”), pursuant to which Midway provided investment management services with respect to our investments in Agency IOs. These investment management agreements provide for the payment to our investment managers of a management fee, incentive fee and reimbursement of certain operating expenses, which are accrued and expensed during the period for which they are earned or incurred. On August 2, 2018, the Company provided Headlands with written notice that it will not renew its management agreement at the end of the current term, which is set to expire on June 30, 2019 (see Note 23). The Midway agreement was terminated effective December 31, 2017.

Other Comprehensive Income (Loss) – The Company’s comprehensive income/(loss) attributable to the Company's common stockholders includes net income, the change in net unrealized gains/(losses) on its available for sale securities and its derivative hedging instruments, comprised of interest rate swaps until October 2017 (to the extent that such changes are not recorded in earnings), adjusted by realized net gains/(losses) reclassified out of accumulated other comprehensive income/(loss) for available for sale securities, reduced by dividends declared on the Company’s preferred stock and increased/decreased for net loss/income attributable to non-controlling interest.

Employee Benefits Plans – The Company sponsors a defined contribution plan (the “Plan”) for all eligible domestic employees. The Plan qualifies as a deferred salary arrangement under Section 401(k) of the Internal Revenue Code of 1986, as amended (the “Internal Revenue Code”). The Company made no contributions to the Plan for the six months ended June 30, 2018 and 2017.

Stock Based Compensation – The Company has awarded restricted stock to eligible employees and officers as part of their compensation. Compensation expense for equity based awards and stock issued for services are recognized over the vesting period of such awards and services based upon the fair value of the award at the grant date.

In May 2015, the Company granted Performance Share Awards (“PSAs”) which cliff vest after a three-year period, subject to the achievement of certain performance criteria based on a formula tied to the Company’s achievement of three-year total shareholder return (“TSR”) and the Company’s TSR relative to the TSR of certain peer companies. The feature in this award constitutes a “market condition” which impacts the amount of compensation expense recognized for these awards. The grant date fair values of PSAs were determined through Monte-Carlo simulation analysis.

Table of Contents

In March 2018 and June 2018, the Company granted Performance Stock Units ("PSUs") to the Chief Executive Officer, Chief Financial Officer and certain other employees. The awards were issued pursuant to and are consistent with the terms and conditions of the Company's 2017 Equity Incentive Plan (the "2017 Plan"). The PSUs are subject to performance-based vesting under the 2017 Plan pursuant to a form of PSU award agreement (the "PSU Agreement"). Vesting of the PSUs will occur after a three-year period based on the Company's relative TSR percentile ranking as compared to an identified performance peer group. The feature in this award constitutes a "market condition" which impacts the amount of compensation expense recognized for these awards. The grant date fair values of PSUs were determined through Monte-Carlo simulation analysis.

Income Taxes – The Company operates in such a manner so as to qualify as a REIT under the requirements of the Internal Revenue Code. Requirements for qualification as a REIT include various restrictions on ownership of the Company's stock, requirements concerning distribution of taxable income and certain restrictions on the nature of assets and sources of income. A REIT must distribute at least 90% of its taxable income to its stockholders, of which 85% plus any undistributed amounts from the prior year must be distributed within the taxable year in order to avoid the imposition of an excise tax. Distribution of the remaining balance may extend until timely filing of the Company's tax return in the subsequent taxable year. Qualifying distributions of taxable income are deductible by a REIT in computing taxable income.

Certain activities of the Company are conducted through TRSs and therefore are subject to federal and various state and local income taxes. Accordingly, deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date.

ASC 740, Income Taxes ("ASC 740"), provides guidance for how uncertain tax positions should be recognized, measured, presented, and disclosed in the financial statements. ASC 740 requires the evaluation of tax positions taken or expected to be taken in the course of preparing the Company's tax returns to determine whether the tax positions are "more-likely-than-not" of being sustained by the applicable tax authority. In situations involving uncertain tax positions related to income tax matters, we do not recognize benefits unless it is more likely than not that they will be sustained. ASC 740 was applied to all open taxable years as of the effective date. Management's determinations regarding ASC 740 may be subject to review and adjustment at a later date based on factors including, but not limited to, an ongoing analysis of tax laws, regulations and interpretations thereof. The Company will recognize interest and penalties, if any, related to uncertain tax positions as income tax expense in our condensed consolidated statements of operations.

Earnings Per Share – Basic earnings per share excludes dilution and is computed by dividing net income attributable to the Company's common stockholders by the weighted-average number of shares of common stock outstanding for the period. Diluted earnings per share reflects the potential dilution that could occur if securities or other contracts to issue common stock were exercised or converted into common stock or resulted in the issuance of common stock that then shared in the earnings of the Company.

Segment Reporting – ASC 280, Segment Reporting, is the authoritative guidance for the way public entities report information about operating segments in their annual financial statements. We are a REIT focused on the business of acquiring, investing in, financing and managing mortgage-related and residential housing-related assets, and currently operate in only one reportable segment.

Summary of Recent Accounting Pronouncements

Revenue Recognition (Topic 606)

In May 2014, the FASB issued ASU 2014-09, Revenue from Contracts with Customers (“ASU 2014-09”). This guidance created a new, principle-based revenue recognition framework that affects nearly every revenue-generating entity. ASU 2014-09 also created a new topic in the Codification, Topic 606 (“ASC 606”). In addition to superseding and replacing nearly all existing GAAP revenue recognition guidance, including industry-specific guidance, ASC 606 does the following: (1) establishes a new control-based revenue recognition model; (2) changes the basis for deciding when revenue is recognized over time or at a point in time; (3) provides new and more detailed guidance on specific aspects of revenue recognition; and (4) expands and improves disclosures about revenue.

Table of Contents

ASC 606 applies to all contracts with customers with exceptions for financial instruments and other contractual rights or obligations that are within the scope of other ASC Topics. Exclusions from the scope of ASC 606 include investment securities available for sale (subject to ASC 320, Investments - Debt and Equity Securities or ASC 325, Investments - Other); residential mortgage loans, distressed residential mortgage loans, multi-family loans, and preferred equity and mezzanine loan investments (subject to either ASC 310, Receivables or ASC 825, Financial Instruments); derivative assets and derivative liabilities (subject to ASC 815, Derivatives and Hedging); and investment in unconsolidated entities (subject to either ASC 323, Investments- Equity Method and Joint Ventures or ASC 825, Financial Instruments). In adopting the ASU effective January 1, 2018, the Company evaluated the applicability of this ASU with respect to its investment portfolio and, considering the scope exceptions listed above, the adoption of this ASU did not have a material impact on the Company's financial condition or results of operations.

Financial Instruments —Credit Losses (Topic 326)

In June 2016, the FASB issued ASU 2016-13, Financial Instruments —Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments ("ASU 2016-13"). The amendments require the measurement of all expected credit losses for financial assets held at the reporting date based on historical experience, current conditions, and reasonable and supportable forecasts. Financial institutions and other organizations will now use forward-looking information to better inform their credit loss estimates. In addition, the ASU amends the accounting for credit losses on available-for-sale debt securities and purchased financial assets with credit deterioration. The amendments are effective for all entities for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2019. Early adoption as of the fiscal years, and interim periods within those fiscal years, beginning after December 15, 2018 is permitted. The Company is currently assessing the impact of this guidance as the ASU will have an effect on the Company's estimation of credit losses on distressed residential mortgage loans, residential mortgage loans held in securitization trusts, residential mortgage loans, and preferred equity and mezzanine loan investments that are accounted for as loans.

(1) Included in CMBS is \$50.1 million and \$47.9 million of investment securities available for sale held in securitization trusts as of June 30, 2018 and December 31, 2017, respectively.

Realized Gain or Loss Activity

During the three and six months ended June 30, 2018, the Company received total proceeds of approximately \$16.8 million and \$26.9 million, respectively, from the sale of investment securities available for sale, realizing a net loss of approximately \$8.8 million and \$12.3 million, respectively. During the three and six months ended June 30, 2017, the Company received total proceeds of approximately \$15.4 million and \$52.7 million, respectively, from the sale of investment securities available for sale, realizing a net loss of approximately \$0.6 million and \$2.3 million, respectively.

Weighted Average Life

Actual maturities of our available for sale securities are generally shorter than stated contractual maturities (with maturities up to 30 years), as they are affected by periodic payments and prepayments of principal on the underlying mortgages. As of June 30, 2018 and December 31, 2017, the weighted average life of the Company's available for sale

securities portfolio was approximately 5.9 years and 7.1 years, respectively.

Table of Contents

The following table sets forth the weighted average lives of our investment securities available for sale as of June 30, 2018 and December 31, 2017 (dollar amounts in thousands):

Weighted Average Life	June 30, 2018	December 31, 2017
0 to 5 years	\$314,907	\$426,061
Over 5 to 10 years	951,455	970,336
10+ years	23,653	16,684
Total	\$1,290,015	\$1,413,081

Portfolio Interest Reset Periods

The following tables set forth the stated reset periods of our investment securities available for sale at June 30, 2018 and December 31, 2017 at carrying value (dollar amounts in thousands):

	June 30, 2018				December 31, 2017			
	Less than 6 months	6 to 24 months	More than 24 months	Total	Less than 6 months	6 to 24 months	More than 24 months	Total
Agency RMBS	\$10,170	\$15,516	\$1,075,658	\$1,101,344	\$26,876	\$24,726	\$1,117,934	\$1,169,536
Non-Agency RMBS	7,526	—	46,531	54,057	84,461	—	17,664	102,125
CMBS	62,038	—	72,576	134,614	70,791	—	70,629	141,420
Total investment securities available for sale	\$79,734	\$15,516	\$1,194,765	\$1,290,015	\$182,128	\$24,726	\$1,206,227	\$1,413,081

Unrealized Losses in OCI

The following tables present the Company's investment securities available for sale in an unrealized loss position reported through OCI, aggregated by investment category and length of time that individual securities have been in a continuous unrealized loss position at June 30, 2018 and December 31, 2017 (dollar amounts in thousands):

June 30, 2018	Less than 12 months		Greater than 12 months		Total	
	Carrying Value	Gross Unrealized Losses	Carrying Value	Gross Unrealized Losses	Carrying Value	Gross Unrealized Losses
Agency RMBS	\$794,830	\$(26,721)	\$305,579	\$(17,916)	\$1,100,409	\$(44,637)
Non-Agency RMBS	—	—	181	(10)	181	(10)
Total investment securities available for sale	\$794,830	\$(26,721)	\$305,760	\$(17,926)	\$1,100,590	\$(44,647)

At June 30, 2018, the Company does not intend to sell any of its investments that were in an unrealized loss position, and it is "more likely than not" that the Company will not be required to sell these securities before recovery of their amortized cost basis, which may be at their maturity.

Gross unrealized losses on the Company's Agency RMBS were \$44.6 million at June 30, 2018. Agency RMBS are issued by GSEs and enjoy either the implicit or explicit backing of the full faith and credit of the U.S. Government. While the Company's Agency RMBS are not rated by any rating agency, they are currently perceived by market participants to be of high credit quality, with risk of default limited to the unlikely event that the U.S. Government would not continue to support the GSEs. Given the credit quality inherent in Agency RMBS, the Company does not consider any of the current impairments on its Agency RMBS to be credit related. In assessing whether it is more

likely than not that it will be required to sell any impaired security before its anticipated recovery, which may be at its maturity, the Company considers for each impaired security, the significance of each investment, the amount of impairment, the projected future performance of such impaired securities, as well as the Company's current and anticipated leverage capacity and liquidity position. Based on these analyses, the Company determined that at June 30, 2018 any unrealized losses on its Agency RMBS were temporary.

Table of Contents

December 31, 2017	Less than 12 months		Greater than 12 months		Total	
	Carrying Value	Gross Unrealized Losses	Carrying Value	Gross Unrealized Losses	Carrying Value	Gross Unrealized Losses
Agency RMBS	\$511,313	\$(1,807)	\$342,963	\$(13,390)	\$854,276	\$(15,197)
Non-Agency RMBS	—	—	193	(18)	193	(18)
Total investment securities available for sale	\$511,313	\$(1,807)	\$343,156	\$(13,408)	\$854,469	\$(15,215)

Other than Temporary Impairment

For the three and six months ended June 30, 2018 and 2017, the Company recognized no other-than-temporary impairment through earnings.

4. Residential Mortgage Loans Held in Securitization Trusts, Net and Real Estate Owned

Residential mortgage loans held in securitization trusts, net consist of the following as of June 30, 2018 and December 31, 2017, respectively (dollar amounts in thousands):

	June 30, 2018	December 31, 2017
Unpaid principal balance	\$69,451	\$ 77,519
Deferred origination costs – net	440	492
Reserve for loan losses	(3,844)	(4,191)
Total	\$66,047	\$ 73,820

Allowance for Loan Losses - The following table presents the activity in the Company's allowance for loan losses on residential mortgage loans held in securitization trusts for the six months ended June 30, 2018 and 2017, respectively (dollar amounts in thousands):

	Six Months Ended June 30,	
	2018	2017
Balance at beginning of period	\$4,191	\$3,782
(Recovery of) provision for loan losses	(110)	207
Transfer to real estate owned	—	(6)
Charge-offs	(237)	—
Balance at the end of period	\$3,844	\$3,983

On an ongoing basis, the Company evaluates the adequacy of its allowance for loan losses. The Company's allowance for loan losses as of June 30, 2018 was \$3.8 million, representing 554 basis points of the outstanding principal balance of residential loans held in securitization trusts, as compared to 541 basis points as of December 31, 2017. As part of the Company's allowance for loan loss adequacy analysis, management will assess an overall level of allowances while also assessing credit losses inherent in each non-performing residential mortgage loan held in securitization trusts. These estimates involve the consideration of various credit related factors, including but not limited to, current housing market conditions, current loan to value ratios, delinquency status, the borrower's current economic and credit status and other relevant factors.

Real Estate Owned – The Company had real estate owned held in residential securitization trusts of \$0.1 million at June 30, 2018 and December 31, 2017. Real estate owned held in residential securitization trusts are included in receivables and other assets on the accompanying condensed consolidated balance sheets and write downs are included in recovery of (provision for) loan losses in the accompanying condensed consolidated statements of operations for reporting purposes.

Table of Contents

All of the Company's mortgage loans and real estate owned held in residential securitization trusts are pledged as collateral for the Residential CDOs issued by the Company. The Company's net investment in the residential securitization trusts, which is the maximum amount of the Company's investment that is at risk to loss and represents the difference between (i) the carrying amount of the mortgage loans, real estate owned and receivables held in residential securitization trusts and (ii) the amount of Residential CDOs outstanding, was \$4.9 million and \$4.4 million as of June 30, 2018 and December 31, 2017, respectively.

Delinquency Status of Our Residential Mortgage Loans Held in Securitization Trusts

As of June 30, 2018, we had 24 delinquent loans with an aggregate principal amount outstanding of approximately \$15.0 million categorized as residential mortgage loans held in securitization trusts, net, of which \$6.7 million, or 45%, are under some form of temporary modified payment plan. The table below shows delinquencies in our portfolio of residential mortgage loans held in securitization trusts, including real estate owned (REO) through foreclosure, as of June 30, 2018 (dollar amounts in thousands):

June 30, 2018

Days Late	Number of Delinquent Loans	Total Unpaid Principal	% of Loan Portfolio
30 - 60	1	\$ 311	0.45 %
61 - 90	1	\$ 170	0.24 %
90 +	22	\$ 14,481	20.82 %
Real estate owned through foreclosure	1	\$ 118	0.17 %

As of December 31, 2017, we had 26 delinquent loans with an aggregate principal amount outstanding of approximately \$16.5 million categorized as residential mortgage loans held in securitization trusts, net, of which \$10.2 million, or 62%, are under some form of temporary modified payment plan. The table below shows delinquencies in our portfolio of residential mortgage loans held in securitization trusts, including REO through foreclosure, as of December 31, 2017 (dollar amounts in thousands):

December 31, 2017

Days Late	Number of Delinquent Loans	Total Unpaid Principal	% of Loan Portfolio
30 - 60	1	\$ 203	0.26 %
61 - 90	1	\$ 173	0.22 %
90 +	24	\$ 16,147	20.80 %
Real estate owned through foreclosure	1	\$ 118	0.15 %

The geographic concentrations of credit risk exceeding 5% of the total loan balances in our residential mortgage loans held in securitization trusts and REO held in residential securitization trusts as of June 30, 2018 and December 31, 2017 are as follows:

	June 30, 2018	December 31, 2017
New York	31.9 %	31.8 %
Massachusetts	19.5 %	20.7 %
New Jersey	13.0 %	11.9 %
Florida	9.4 %	8.8 %

Connecticut	7.7	%	7.3	%
Maryland	4.9	%	5.2	%

Table of Contents

5. Residential Mortgage Loans, At Fair Value

Certain of the Company's residential mortgage loans, including distressed residential mortgage loans and second mortgages, are presented at fair value on its condensed consolidated balance sheets as a result of a fair value election made at time of acquisition. Subsequent changes in fair value are reported in current period earnings and presented in net gain (loss) on residential mortgage loans at fair value on the Company's condensed consolidated statements of operations.

The Company's residential mortgage loans at fair value consist of the following as of June 30, 2018 and December 31, 2017, respectively (dollar amounts in thousands):

	Principal	Premium/(Discount)	Unrealized Gains/(Losses)	Carrying Value
June 30, 2018	\$ 175,275	\$ (5,598)	\$ (480)	\$ 169,197
December 31, 2017	92,105	(4,911)	(41)	87,153

As of June 30, 2018, the Company is committed to purchase \$1.9 million of second mortgage loans from originators.

The following table presents the components of net gain (loss) on residential mortgage loans at fair value for the six months ended June 30, 2018 and 2017, respectively (dollar amounts in thousands):

	June 30, 2018	June 30, 2017
Net realized gain on payoff and sale of loans	\$ 369	\$ —
Net unrealized losses	(439)	—

The geographic concentrations of credit risk exceeding 5% of the unpaid principal balance of residential mortgage loans at fair value as of June 30, 2018 and December 31, 2017, respectively, are as follows:

	June 30, 2018	December 31, 2017
California	28.4 %	35.9 %
Florida	8.5 %	6.6 %
New Jersey	6.4 %	7.7 %

The following table presents the difference between the fair value and the aggregate unpaid principal balance of the Company's residential mortgage loans at fair value greater than 90 days past due and in non-accrual status as of June 30, 2018 and December 31, 2017, respectively (dollar amounts in thousands):

	Fair Value	Unpaid Principal Balance	Difference
June 30, 2018	\$ 2,212	\$ 2,649	\$ (437)
December 31, 2017	1,048	1,214	(166)

Distressed residential mortgage loans and second mortgages with a fair value of approximately \$117.4 million and \$44.2 million at June 30, 2018 and December 31, 2017, respectively, are pledged as collateral for master repurchase agreements with Deutsche Bank AG, Cayman Islands Branch (see Note 14).

6. Distressed Residential Mortgage Loans

As of June 30, 2018 and December 31, 2017, the carrying value of the Company's distressed residential mortgage loans, including distressed residential mortgage loans held in securitization trusts, amounts to approximately \$290.6 million and \$331.5 million, respectively.

Table of Contents

The Company considers its purchase price for the distressed residential mortgage loans, including distressed residential mortgage loans held in securitization trusts, to be at fair value at the date of acquisition. The Company only establishes an allowance for loan losses subsequent to acquisition.

The following table presents information regarding the estimates of the contractually required payments, the cash flows expected to be collected, and the estimated fair value of the distressed residential mortgage loans acquired during the six months ended June 30, 2017 (dollar amounts in thousands):

	June 30, 2017
Contractually required principal and interest	\$76,529
Nonaccretable yield	(6,467)
Expected cash flows to be collected	70,062
Accretable yield	(58,767)
Fair value at the date of acquisition	\$11,295

Distressed residential mortgage loans purchased during the six months ended June 30, 2018 are presented in the accompanying condensed consolidated balance sheets at fair value (see Note 5).

The following table details activity in accretable yield for the distressed residential mortgage loans, including distressed residential mortgage loans held in securitization trusts, for the six months ended June 30, 2018 and 2017, respectively (dollar amounts in thousands):

	June 30, 2018	June 30, 2017
Balance at beginning of period	\$303,949	\$530,511
Additions	3,314	88,391
Disposals	(37,665)	(206,166)
Accretion	(8,074)	(12,711)
Balance at end of period ⁽¹⁾	\$261,524	\$400,025

Accretable yield is the excess of the distressed residential mortgage loans' cash flows expected to be collected over the purchase price. The cash flows expected to be collected represents the Company's estimate of the amount and timing of undiscounted principal and interest cash flows. Additions include accretable yield estimates for purchases made during the period and reclassification to accretable yield from nonaccretable yield. Disposals include distressed residential mortgage loan dispositions, which include refinancing, sale and foreclosure of the underlying collateral and resulting removal of the distressed residential mortgage loans from the accretable yield, and reclassifications from accretable to nonaccretable yield. The reclassifications between accretable and nonaccretable yield and the accretion of interest income is based on various estimates regarding loan performance and the value of the underlying real estate securing the loans. As the Company continues to update its estimates regarding the loans and the underlying collateral, the accretable yield may change. Therefore, the amount of accretable income recorded in each of the six month periods ended June 30, 2018 and 2017 is not necessarily indicative of future results.

⁽¹⁾ The distressed residential mortgage loans from the accretable yield, and reclassifications from accretable to nonaccretable yield. The reclassifications between accretable and nonaccretable yield and the accretion of interest income is based on various estimates regarding loan performance and the value of the underlying real estate securing the loans. As the Company continues to update its estimates regarding the loans and the underlying collateral, the accretable yield may change. Therefore, the amount of accretable income recorded in each of the six month periods ended June 30, 2018 and 2017 is not necessarily indicative of future results.

Table of Contents

The geographic concentrations of credit risk exceeding 5% of the unpaid principal balance of our distressed residential mortgage loans, including distressed residential mortgage loans held in securitization trusts, as of June 30, 2018 and December 31, 2017, respectively, are as follows:

	June 30, December			
	2018	%	31, 2017	%
Florida	11.2	%	11.2	%
North Carolina	8.5	%	8.3	%
California	6.9	%	6.9	%
Georgia	6.0	%	5.8	%
New York	5.9	%	5.7	%
South Carolina	5.3	%	5.0	%
Ohio	5.0	%	5.1	%

The Company's distressed residential mortgage loans held in securitization trusts with a carrying value of approximately \$105.9 million and \$121.8 million at June 30, 2018 and December 31, 2017, respectively, are pledged as collateral for certain of the Securitized Debt issued by the Company (see Note 10). In addition, distressed residential mortgage loans with a carrying value of approximately \$160.6 million and \$182.6 million at June 30, 2018 and December 31, 2017, respectively, are pledged as collateral for a master repurchase agreement with Deutsche Bank AG, Cayman Islands Branch (see Note 14).

7. Consolidated K-Series

The Company has elected the fair value option on the assets and liabilities held within the Consolidated K-Series, which requires that changes in valuations in the assets and liabilities of the Consolidated K-Series be reflected in the Company's condensed consolidated statements of operations. Our investment in the Consolidated K-Series is limited to the multi-family CMBS comprised of first loss POs, certain IOs and mezzanine securities issued by certain Freddie Mac K-Series securitizations with an aggregate net carrying value of \$506.5 million and \$468.0 million at June 30, 2018 and December 31, 2017, respectively (see Note 10). The Consolidated K-Series is comprised of seven multi-family CMBS investments as of June 30, 2018 and December 31, 2017.

The condensed consolidated balance sheets of the Consolidated K-Series at June 30, 2018 and December 31, 2017, respectively, are as follows (dollar amounts in thousands):

	June 30, 2018	December 31, 2017
Balance Sheets		
Assets		
Multi-family loans held in securitization trusts	\$9,345,360	\$9,657,421
Receivables	32,246	33,562
Total Assets	\$9,377,606	\$9,690,983
Liabilities and Equity		
Multi-family CDOs	\$8,838,841	\$9,189,459
Accrued expenses	31,818	33,136
Total Liabilities	8,870,659	9,222,595
Equity	506,947	468,388
Total Liabilities and Equity	\$9,377,606	\$9,690,983

The multi-family loans held in securitization trusts had aggregate unpaid principal balances of approximately \$9.3 billion and \$9.4 billion at June 30, 2018 and December 31, 2017, respectively. The multi-family CDOs had aggregate

unpaid principal balances of approximately \$9.3 billion and \$9.4 billion at June 30, 2018 and December 31, 2017, respectively. As of June 30, 2018 and December 31, 2017, the current weighted average interest rate on these multi-family CDOs was 4.05% and 3.92%, respectively.

Table of Contents

The Company does not have any claims to the assets or obligations for the liabilities of the Consolidated K-Series (other than those securities represented by our first loss and mezzanine securities). We have elected the fair value option for the Consolidated K-Series. The net fair value of our investment in the Consolidated K-Series, which represents the difference between the carrying values of multi-family loans held in securitization trusts less the carrying value of multi-family CDOs, approximates the fair value of our underlying securities. The fair value of our underlying securities is determined using the same valuation methodology as our CMBS investments available for sale (see Note 18).

The condensed consolidated statements of operations of the Consolidated K-Series for the three and six months ended June 30, 2018 and 2017, respectively, are as follows (dollar amounts in thousands):

	Three Months Ended June 30,		Six Months Ended June 30,	
	2018	2017	2018	2017
Statements of Operations				
Interest income	\$85,629	\$75,752	\$170,721	\$137,056
Interest expense	74,686	66,873	149,165	120,805
Net interest income	10,943	8,879	21,556	16,251
Unrealized gain on multi-family loans and debt held in securitization trusts, net	12,019	1,447	19,564	2,831
Net income	\$22,962	\$10,326	\$41,120	\$19,082

The geographic concentrations of credit risk exceeding 5% of the total loan balances related to our CMBS investments included in investment securities available for sale and multi-family loans held in securitization trusts as of June 30, 2018 and December 31, 2017, respectively, are as follows:

	June 30, 2018		December 31, 2017	
		%		%
California	14.7	%	14.7	%
Texas	12.7	%	12.7	%
New York	6.5	%	6.5	%
Maryland	5.5	%	5.5	%

8. Investment in Unconsolidated Entities

The Company's investments in unconsolidated entities accounted for under the equity method consist of the following as of June 30, 2018 and December 31, 2017 (dollar amounts in thousands):

Investment Name	June 30, 2018		December 31, 2017	
	Ownership Interest	Carrying Amount	Ownership Interest	Carrying Amount
BBA-EP320 II, L.L.C., BBA-Ten10 II, L.L.C., and Lexington on the Green Apartments, L.L.C. (collectively)	45%	\$ 8,519	45%	\$ 8,320
Total - Equity Method		\$ 8,519		\$ 8,320

The Company's investments in unconsolidated entities accounted for under the equity method using the fair value option consist of the following as of June 30, 2018 and December 31, 2017 (dollar amounts in thousands):

Investment Name	June 30, 2018			December 31, 2017		
	Ownership Interest	Carrying Amount	Ownership Interest	Carrying Amount		
Morrocroft Neighborhood Stabilization Fund II, LP	11%	\$ 13,302	11%	\$ 12,623		
Evergreens JV Holdings, LLC	85%	4,420	85%	4,220		
The Preserve at Port Royal Venture, LLC	77%	13,430	77%	13,040		
WR Savannah Holdings, LLC	90%	14,000	90%	12,940		
Total - Fair Value Option		\$ 45,152		\$ 42,823		

The following table presents income from investments in unconsolidated entities for the three and six months ended June 30, 2018 and June 30, 2017 (dollar amounts in thousands):

Investment Name	Three Months Ended	Six Months Ended
	June 30, 2018	June 30, 2017
Autumnwood Investments LLC	\$ -73	\$ -73
200 RHC Hoover, LLC	—	275
BBA-EP320 II, L.L.C., BBA-Ten10 II, L.L.C., and Lexington on the Green Apartments, L.L.C. (collectively)	25247	51288

Table of Contents

9. Preferred Equity and Mezzanine Loan Investments

Preferred equity and mezzanine loan investments consist of the following as of June 30, 2018 and December 31, 2017 (dollar amounts in thousands):

	June 30, 2018	December 31, 2017
Investment amount	\$ 178,372	\$ 140,560
Deferred loan fees, net	(1,631)	(1,640)
Total	\$ 176,741	\$ 138,920

There were no delinquent preferred equity and mezzanine loan investments as of June 30, 2018 and December 31, 2017. As of June 30, 2018, the Company is committed to fund \$2.8 million of preferred equity on an existing investment.

The geographic concentrations of credit risk exceeding 5% of the total preferred equity and mezzanine loan investment amounts as of June 30, 2018 and December 31, 2017 are as follows:

	June 30, 2018	December 31, 2017
New York	23.9 %	24.1 %
Texas	15.7 %	24.3 %
Florida	13.5 %	3.9 %
Virginia	8.5 %	10.8 %
Tennessee	6.2 %	—
Alabama	5.7 %	7.1 %
South Carolina	5.6 %	7.0 %

10. Use of Special Purpose Entities and Variable Interest Entities

The Company uses SPEs to facilitate transactions that involve securitizing financial assets or re-securitizing previously securitized financial assets. The objective of such transactions may include obtaining non-recourse financing, obtaining liquidity or refinancing the underlying securitized financial assets on improved terms. Securitization involves transferring assets to an SPE to convert all or a portion of those assets into cash before they would have been realized in the normal course of business through the SPE's issuance of debt or equity instruments. Investors in an SPE usually have recourse only to the assets in the SPE and depending on the overall structure of the transaction, may benefit from various forms of credit enhancement, such as over-collateralization in the form of excess assets in the SPE, priority with respect to receipt of cash flows relative to holders of other debt or equity instruments issued by the SPE, or a line of credit or other form of liquidity agreement that is designed with the objective of ensuring that investors receive principal and/or interest cash flow on the investment in accordance with the terms of their investment agreement.

The Company has entered into resecuritization and financing transactions which required the Company to analyze and determine whether the SPEs that were created to facilitate the transactions are VIEs in accordance with ASC 810, and if so, whether the Company is the primary beneficiary requiring consolidation. The Company evaluated the following resecuritization or financing transactions: 1) its Residential CDOs; 2) its multi-family CMBS re-securitization transaction and 3) its distressed residential mortgage loan securitization transaction (each a "Financing VIE" and collectively, the "Financing VIEs") and concluded that the entities created to facilitate each of the transactions are VIEs and that the Company is the primary beneficiary of these VIEs. Accordingly, the Company continues to consolidate the Financing VIEs as of June 30, 2018.

Table of Contents

The Company invests in multi-family CMBS consisting of PO securities that represent the first loss of the securitizations from which they were issued, and certain IOs and mezzanine CMBS securities issued from Freddie Mac-sponsored multi-family K-Series securitization trusts. The Company has evaluated these CMBS investments in Freddie Mac-sponsored K-Series securitization trusts to determine whether they are VIEs and if so, whether the Company is the primary beneficiary requiring consolidation. The Company has determined that seven Freddie Mac-sponsored multi-family K-Series securitization trusts are VIEs as of June 30, 2018 and December 31, 2017. The Company also determined that it is the primary beneficiary of each VIE within the Consolidated K-Series and, accordingly, has consolidated its assets, liabilities, income and expenses in the accompanying condensed consolidated financial statements (see Notes 2 and 7). Of the Company's multi-family CMBS investments included in the Consolidated K-Series, six of these investments are not included as collateral to any Financing VIE as of June 30, 2018 and December 31, 2017.

In analyzing whether the Company is the primary beneficiary of the Consolidated K-Series and the Financing VIEs, the Company considered its involvement in each of the VIEs, including the design and purpose of each VIE, and whether its involvement reflected a controlling financial interest that resulted in the Company being deemed the primary beneficiary of the VIEs. In determining whether the Company would be considered the primary beneficiary, the following factors were assessed:

- whether the Company has both the power to direct the activities that most significantly impact the economic performance of the VIE; and
- whether the Company has a right to receive benefits or absorb losses of the entity that could be potentially significant to the VIE.

RB Development Holding Company, LLC ("RBDHC"), a wholly-owned subsidiary of the Company, owns 50% of Kiawah River View Investors LLC ("KRVI"), a limited liability company that owns developed land and residential homes under development in Kiawah Island, SC, for which RiverBanc LLC ("RiverBanc"), a wholly-owned subsidiary of the Company, is the manager. The Company has evaluated KRVI to determine if it is a VIE and if so, whether the Company is the primary beneficiary requiring consolidation. The Company has determined that KRVI is a VIE for which RBDHC is the primary beneficiary as the Company, collectively through RiverBanc and RBDHC, has both the power to direct the activities that most significantly impact the economic performance of KRVI and has a right to receive benefits or absorb losses of KRVI that could be potentially significant to KRVI. Accordingly, the Company has consolidated KRVI in its condensed consolidated financial statements with a non-controlling interest for the third-party ownership of KRVI membership interests.

During the three months ended June 30, 2018, the Company evaluated the home pricing and lot values of the real estate under development that is owned by KRVI, which is included in other assets on the Company's condensed consolidated balance sheets. Based on the evaluation, the Company determined that the real estate under development with a carrying amount of \$22.4 million was no longer recoverable and was impaired. The Company wrote down the assets to \$20.3 million and recognized a \$2.1 million impairment loss included in other income in the Company's condensed consolidated statements of operations. \$1.0 million of this impairment loss is included in net income attributable to non-controlling interest in consolidated variable interest entities on the accompanying condensed consolidated statements of operations, resulting in a net loss to the Company of \$1.1 million. Fair value was determined based on the sales comparison approach which derives a value indication by comparing the subject property to similar properties that have been recently sold and assumes a purchaser will not pay more for a particular property than a similar substitute property.

On March 31, 2017, (the "Changeover Date"), the Company reconsidered its evaluation of its variable interests in Riverchase Landing and The Clusters, two VIEs that each own a multi-family apartment community and in which the

Company held a preferred equity investment. The Company determined that it gained the power to direct the activities, and became primary beneficiary, of Riverchase Landing and The Clusters on the Changeover Date. Prior to the Changeover Date, the Company accounted for Riverchase Landing as an investment in an unconsolidated entity and for The Clusters as a preferred equity investment.

On the Changeover Date, the Company consolidated Riverchase Landing and The Clusters into its condensed consolidated financial statements. These transactions were accounted for by applying the acquisition method for business combinations.

The estimated Changeover Date fair value of the consideration transferred totaled \$12.5 million, which consisted of the estimated fair value of the Company's preferred equity investments in both Riverchase Landing and The Clusters. The Company determined the estimated fair value of its preferred equity investments in Riverchase Landing and The Clusters using assumptions for the timing and amount of expected future cash flows from the underlying multi-family apartment communities and a discount rate.

Table of Contents

The following table summarizes the estimated fair values of the assets and liabilities of Riverchase Landing and The Clusters at the Changeover Date (dollar amounts in thousands).

Cash	\$ 112
Operating real estate ⁽¹⁾	62,322
Lease intangibles ⁽¹⁾	5,340
Receivables and other assets	2,260
Total assets	70,034

Mortgages payable	51,570
Accrued expenses and other liabilities	1,519
Total liabilities	53,089

Non-controlling interest ⁽²⁾	4,462
Net assets consolidated	\$ 12,483

⁽¹⁾ Reclassified to real estate held for sale in consolidated variable interest entities on the condensed consolidated balance sheets in 2017 (see Note 11).

Represents third party ownership of membership interests in Riverchase Landing and The Clusters. The fair value ⁽²⁾ of the non-controlling interests in Riverchase Landing and The Clusters, both private companies, was estimated using assumptions for the timing and amount of expected future cash flows from the underlying multi-family apartment communities and a discount rate.

In March 2018, Riverchase Landing completed the sale of its multi-family apartment community and redeemed the Company's preferred equity investment. The Company de-consolidated Riverchase Landing as of the date of the sale. Prior to March 2018, the Company did not have any claims to the assets or obligations for the liabilities of Riverchase Landing. As of June 30, 2018, the Company does not have any claims to the assets or obligations for the liabilities of The Clusters.

The Consolidated K-Series, the Financing VIEs, KRVI, Riverchase Landing (as of December 31, 2017) and The Clusters are collectively referred to in this footnote as "Consolidated VIEs".

Table of Contents

The following tables present a summary of the assets and liabilities of these Consolidated VIEs as of June 30, 2018 and December 31, 2017, respectively. Intercompany balances have been eliminated for purposes of this presentation.

Assets and Liabilities of Consolidated VIEs as of June 30, 2018 (dollar amounts in thousands):

	Financing VIEs			Other VIEs		Total
	Multi-family CMBS Re- securitization (1)	Distressed Residential Mortgage Loan Securitization (2)	Residential Mortgage Loan Securitization	Multi- family CMBS (3)	Other

Total liabilities	\$1,087,553	\$ 31,455	\$ 62,212	\$7,812,882	\$33,631	\$9,027,733

The Company classified the multi-family CMBS issued by two K-Series securitizations and held by this Financing VIE as available for sale securities as the purpose is not to trade these securities. The Financing VIE consolidated one K-Series securitization that issued certain of the multi-family CMBS owned by the Company, including its assets, liabilities, income and expenses, in its financial statements, as based on a number of factors, the Company determined that it was the primary beneficiary and has a controlling financial interest in this particular K-Series securitization (see Note 7).

(2) The Company engaged in this transaction for the purpose of financing distressed residential mortgage loans acquired by the Company. The distressed residential mortgage loans serving as collateral for the financing are comprised of performing, re-performing and, to a lesser extent, non-performing, fixed- and adjustable-rate, fully-amortizing, interest only and balloon, seasoned mortgage loans secured by first liens on one- to four- family properties. Balances as of June 30, 2018 are related to a securitization transaction that closed in April 2016 that involved the issuance of \$177.5 million of Class A Notes representing the beneficial ownership in a pool of performing and re-performing seasoned mortgage loans. The Company holds 5% of the Class A Notes issued as

part of the securitization transaction, which were eliminated in consolidation.

- (3) Six of the Company's Freddie Mac-sponsored multi-family K-Series securitizations included in the Consolidated K-Series were not held in a Financing VIE as of June 30, 2018.

The Company classified the multi-family CMBS issued by two K-Series securitizations and held by this Financing VIE as available for sale securities as the purpose is not to trade these securities. The Financing VIE consolidated one K-Series securitization that issued certain of the multi-family CMBS owned by the Company, including its assets, liabilities, income and expenses, in its financial statements, as based on a number of factors, the Company determined that it was the primary beneficiary and has a controlling financial interest in this particular K-Series securitization (see Note 7).

The Company engaged in this transaction for the purpose of financing distressed residential mortgage loans acquired by the Company. The distressed residential mortgage loans serving as collateral for the financing are comprised of performing, re-performing and, to a lesser extent, non-performing, fixed- and adjustable-rate, fully-amortizing, interest only and balloon, seasoned mortgage loans secured by first liens on one- to four- family properties. Balances as of December 31, 2017 are related to a securitization transaction that closed in April 2016 that involved the issuance of \$177.5 million of Class A Notes representing the beneficial ownership in a pool of performing and re-performing seasoned mortgage loans. The Company holds 5% of the Class A Notes issued as part of the securitization transaction, which have been eliminated in consolidation.

Six of the Company's Freddie Mac-sponsored multi-family K-Series securitizations included in the Consolidated K-Series were not held in a Financing VIE as of December 31, 2017.

Table of Contents

The following table summarizes the Company's securitized debt collateralized by multi-family CMBS and distressed residential mortgage loans (dollar amounts in thousands):

	Multi-family CMBS Re-securitization ⁽¹⁾	Distressed Residential Mortgage Loan Securitizations
Principal Amount at June 30, 2018	\$ 33,262	\$ 31,827
Principal Amount at December 31, 2017	\$ 33,350	\$ 53,089
Carrying Value at June 30, 2018 ⁽²⁾	\$ 29,628	\$ 31,398
Carrying Value at December 31, 2017 ⁽²⁾	\$ 29,164	\$ 52,373
Pass-through rate of Notes issued	5.35%	4.00%

The Company engaged in the re-securitization transaction primarily for the purpose of obtaining non-recourse financing on a portion of its multi-family CMBS portfolio. As a result of engaging in this transaction, the Company remains economically exposed to the first loss position on the underlying multi-family CMBS transferred to the

(1) Consolidated VIE. The holders of the Note issued in this re-securitization transaction have no recourse to the general credit of the Company, but the Company does have the obligation, under certain circumstances, to repurchase assets upon the breach of certain representations and warranties. The Company will receive all remaining cash flow, if any, through its retained ownership.

(2) Classified as securitized debt in the liability section of the Company's accompanying condensed consolidated balance sheets.

The following table presents contractual maturity information about the Financing VIEs' securitized debt as of June 30, 2018 and December 31, 2017, respectively (dollar amounts in thousands):

Scheduled Maturity (principal amount)	June 30, 2018	December 31, 2017
Within 24 months	\$31,827	\$53,089
Over 24 months to 36 months	—	—
Over 36 months	33,262	33,350
Total	65,089	86,439
Discount	(3,615)	(4,232)
Debt issuance cost	(448)	(670)
Carrying value	\$61,026	\$81,537

There is no guarantee that the Company will receive any cash flows from these securitization trusts.

Residential Mortgage Loan Securitization Transaction

The Company has completed four residential mortgage loan securitizations (other than the distressed residential mortgage loan securitizations discussed above) since inception; the first three were accounted for as permanent financings and have been included in the Company's accompanying condensed consolidated financial statements. The fourth was accounted for as a sale and, accordingly, is not included in the Company's accompanying condensed consolidated financial statements.

Table of Contents

Unconsolidated VIEs

The Company has evaluated its multi-family CMBS investments in two Freddie Mac-sponsored K-Series securitizations and its preferred equity, mezzanine loan and other equity investments as of June 30, 2018 and December 31, 2017, respectively, to determine whether they are VIEs and should be consolidated by the Company. Based on a number of factors, the Company determined that, except for The Clusters as of June 30, 2018 and both Riverchase Landing and The Clusters as of December 31, 2017, it does not have a controlling financial interest and is not the primary beneficiary of these VIEs. The following tables present the classification and carrying value of unconsolidated VIEs as of June 30, 2018 and December 31, 2017 (dollar amounts in thousands):

June 30, 2018

	Investment securities, available for sale, at fair value, held in securitization trusts	Receivable and other assets	Preferred equity and mezzanine loan investments	Investment in unconsolidated entities	Total
Multi-family CMBS	\$50,134	\$ 72	\$ —	\$ —	\$50,206
Preferred equity investments in multi-family properties	—	—	170,110	8,519	178,629
Mezzanine loan on multi-family properties	—	—	6,631	—	6,631
Equity investments in entities that invest in multi-family properties	—	—	—	27,302	27,302
Total assets	\$50,134	\$ 72	\$ 176,741	\$ 35,821	\$262,768

December 31, 2017

	Investment securities, available for sale, at fair value, held in securitization trusts	Receivable and other assets	Preferred equity and mezzanine loan investments	Investment in unconsolidated entities	Total
Multi-family CMBS	\$47,922	\$ 73	\$ —	\$ —	\$47,995
Preferred equity investments in multi-family properties	—	—	132,009	8,320	140,329
Mezzanine loan on multi-family properties	—	—	6,911	—	6,911
Equity investments in entities that invest in multi-family properties	—	—	—	25,562	25,562
Total assets	\$47,922	\$ 73	\$ 138,920	\$ 33,882	\$220,797

Our maximum loss exposure on the multi-family CMBS investments, preferred equity, mezzanine loan and equity investments is approximately \$262.8 million and \$220.8 million at June 30, 2018 and December 31, 2017, respectively. The Company's maximum exposure does not exceed the carrying value of its investments.

Table of Contents

11. Real Estate Held for Sale in Consolidated VIEs

On March 31, 2017, the Company determined that it became the primary beneficiary of Riverchase Landing and The Clusters, two VIEs that each own a multi-family apartment community and in which the Company held preferred equity investments. Accordingly, on this date, the Company consolidated both Riverchase Landing and The Clusters into its condensed consolidated financial statements (see Note 10).

During the second quarter of 2017, Riverchase Landing determined to actively market its multi-family apartment community for sale. Accordingly, the Company classified the real estate assets in Riverchase Landing as held for sale as of December 31, 2017 in the accompanying condensed consolidated balance sheets. The Company also ceased depreciation of the operating real estate assets and amortization of the related lease intangible asset in Riverchase Landing as of June 5, 2017. In March 2018, Riverchase Landing completed the sale of its multi-family apartment community and redeemed the Company's preferred equity investment. Riverchase Landing recognized a net gain on sale of approximately \$2.3 million which is included in other income and is allocated to net income attributable to non-controlling interest in consolidated variable interest entities on the accompanying condensed consolidated statements of operations. The Company de-consolidated Riverchase Landing as of the date of the sale.

During the third quarter of 2017, The Clusters determined to actively market its multi-family apartment community for sale. The Company anticipates completing a sale to a third party buyer in 2018. Accordingly, the Company classified the real estate assets in The Clusters as held for sale as of June 30, 2018 and December 31, 2017 in the accompanying condensed consolidated balance sheets. The Company also ceased depreciation of the operating real estate assets and amortization of the related lease intangible asset in The Clusters as of September 1, 2017.

The following is a summary of the real estate held for sale in consolidated variable interest entities as of June 30, 2018 and December 31, 2017 (dollar amounts in thousands):

	June 30, 2018	December 31, 2017
Land	\$2,650	\$ 7,000
Building and improvements	25,944	53,468
Furniture, fixtures and equipment	860	2,150
Lease intangible	2,802	5,340
Real estate held for sale before accumulated depreciation and amortization	32,256	67,958
Accumulated depreciation ⁽¹⁾	(418)	(647)
Accumulated amortization of lease intangible ⁽¹⁾	(2,336)	(3,109)
Real estate held for sale in consolidated variable interest entities	\$29,502	\$ 64,202

- ⁽¹⁾ There were no depreciation and amortization expenses for the three and six months ended June 30, 2018.
⁽¹⁾ Depreciation and amortization expense for the three and six months ended June 30, 2017 totaled \$0.5 million and \$2.2 million, respectively.

No gain or loss was recognized by the Company or allocated to non-controlling interests related to the initial classification of the real estate assets as held for sale.

12. Derivative Instruments and Hedging Activities

The Company enters into derivative instruments in connection with its risk management activities. These derivative instruments may include interest rate swaps, swaptions, futures and options on futures. The Company may also

purchase or sell TBAs, purchase options on U.S. Treasury futures or invest in other types of mortgage derivative securities. The Company's derivative instruments are currently comprised of interest rate swaps, which are designated as trading instruments.

38

Table of Contents

The following table presents the fair value of derivative instruments and their location in our condensed consolidated balance sheets at June 30, 2018 and December 31, 2017, respectively (dollar amounts in thousands):

Type of Derivative Instrument	Balance Sheet Location	June 30, 2018	December 31, 2017
Interest rate swaps ⁽¹⁾	Derivative assets	\$ 10,543	\$ 10,101

(1) Variation margin payable of \$4.4 million and variation margin receivable of \$9.3 million is included as an adjustment to the carrying value of the derivative assets at June 30, 2018 and December 31, 2017, respectively.

The tables below summarize the volume activity of derivative instruments for the six months ended June 30, 2018 and 2017, respectively (dollar amounts in thousands):

Type of Derivative Instrument	Notional Amount For the Six Months Ended June 30, 2018			Settlement, Expiration or Exercise June 30, 2018
	December 31, 2017	Additions		
Interest rate swaps	\$ 345,500	\$ 50,000	\$	—\$ 395,500

Type of Derivative Instrument	Notional Amount For the Six Months Ended June 30, 2017			Settlement, Expiration or Exercise June 30, 2017
	December 31, 2016	Additions		
TBA securities ⁽¹⁾	\$ 149,000	\$ 1,011,000	\$ (994,000)	\$ 166,000
U.S. Treasury futures	17,100	108,000	(111,800)	13,300
Interest rate swap futures	(151,700)	315,200	(259,400)	(95,900)
Eurodollar futures	(2,575,000)	4,790,000	(4,001,000)	(1,786,000)
Swaptions	154,000	—	—	154,000
Interest rate swaps	15,000	—	—	15,000

(1) Open TBA purchases and sales involving the same counterparty, same underlying deliverable and the same settlement date are reflected in our condensed consolidated financial statements on a net basis.

Table of Contents

The following table presents the components of realized and unrealized gains and losses related to our derivative instruments included in other income category in our condensed consolidated statements of operations for the three and six months ended June 30, 2018 and 2017 (dollar amounts in thousands):

	Three Months Ended June 30,		
	2018	2017	
	Realized	Realized	Unrealized
	Gains	Gains	Gains
	(Losses)	(Losses)	(Losses)

Swaptions	—	—	68
U.S. Treasury and interest rate swap futures and options	—	(416)	193
Total	\$—14,103	\$2,186	\$(1,405)

The following table presents information about our interest rate swaps whereby we receive floating rate payments in exchange for fixed rate payments as of June 30, 2018 and December 31, 2017, respectively (dollar amounts in thousands):

Swap Maturities	June 30, 2018				December 31, 2017			
	Notional Amount	Weighted Average Fixed Interest Rate	Weighted Average Variable Interest Rate		Notional Amount	Weighted Average Fixed Interest Rate	Weighted Average Variable Interest Rate	
2024	\$98,000	2.18 %	2.35 %		\$98,000	2.18 %	1.36 %	
2027	247,500	2.39 %	2.35 %		247,500	2.39 %	1.39 %	
2028	50,000	3.13 %	2.32 %		—	—	—	
Total	\$395,500	2.43 %	2.35 %		\$345,500	2.33 %	1.38 %	

The use of derivatives exposes the Company to counterparty credit risks in the event of a default by a counterparty. If a counterparty defaults under the applicable derivative agreement, the Company may be unable to collect payments to which it is entitled under its derivative agreements and may have difficulty collecting the assets it pledged as collateral against such derivatives. The Company has in place with all counterparties bi-lateral margin agreements requiring a party to post collateral to the Company for any valuation deficit. This arrangement is intended to limit the Company's

exposure to losses in the event of a counterparty default. Currently, all of the Company's interest rate swaps outstanding are cleared through CME Group Inc. ("CME Clearing") which is the parent company of the Chicago Mercantile Exchange Inc. CME Clearing serves as the counterparty to every cleared transaction, becoming the buyer to each seller and the seller to each buyer, limiting the credit risk by guaranteeing the financial performance of both parties and netting down exposures.

40

Table of Contents

13. Financing Arrangements, Portfolio Investments

The Company has entered into repurchase agreements with third party financial institutions to finance its investment portfolio. These financing arrangements are short-term borrowings that bear interest rates typically based on a spread to LIBOR, and are secured by the securities which they finance. At June 30, 2018, the Company had repurchase agreements with an outstanding balance of \$1.2 billion and a weighted average interest rate of 2.76%. At December 31, 2017, the Company had repurchase agreements with an outstanding balance of \$1.3 billion and a weighted average interest rate of 2.18%.

The following table presents detailed information about the Company's borrowings under financing arrangements and associated assets pledged as collateral at June 30, 2018 and December 31, 2017 (dollar amounts in thousands):

	June 30, 2018			December 31, 2017		
	Outstanding of Financing Arrangements	Fair Value of Collateral Pledged	Amortized Cost of Collateral Pledged	Outstanding of Financing Arrangements	Fair Value of Collateral Pledged	Amortized Cost of Collateral Pledged
Agency ARMs RMBS	\$65,173	\$67,923	\$70,385	\$86,349	\$90,343	\$92,586
Agency Fixed-rate RMBS	809,744	856,397	892,262	842,474	890,359	902,744
Non-Agency RMBS	9,750	11,885	11,751	38,160	51,841	50,693
CMBS ⁽¹⁾	295,294	425,527	303,056	309,935	421,156	322,092
Balance at end of the period	\$1,179,961	\$1,361,732	\$1,277,454	\$1,276,918	\$1,453,699	\$1,368,115

(1) Includes first loss PO and mezzanine CMBS securities with a fair value amounting to \$385.6 million and \$377.5 million included in the Consolidated K-Series as of June 30, 2018 and December 31, 2017, respectively.

As of June 30, 2018 and December 31, 2017, the average days to maturity for financing arrangements were 57 days and 44 days, respectively. The Company's accrued interest payable on outstanding financing arrangements at June 30, 2018 and December 31, 2017 amounts to \$4.2 million and \$2.5 million, respectively, and is included in accrued expenses and other liabilities on the Company's condensed consolidated balance sheets.

The following table presents contractual maturity information about the Company's outstanding financing arrangements, at June 30, 2018 and December 31, 2017 (dollar amounts in thousands):

Contractual Maturity	June 30, 2018	December 31, 2017
Within 30 days	\$441,200	\$1,081,911
Over 30 days to 90 days	638,761	95,007
Over 90 days	100,000	100,000
Total	\$1,179,961	\$1,276,918

As of June 30, 2018, the outstanding balance under our financing arrangements was funded at a weighted average advance rate of 90.2% that implies an average haircut of 9.8%. As of June 30, 2018, the weighted average "haircut" related to our repurchase agreement financing for our Agency RMBS, non-Agency RMBS, and CMBS was approximately 5%, 25%, and 25%, respectively.

In the event we are unable to obtain sufficient short-term financing through existing financings arrangements, or our lenders start to require additional collateral, we may have to liquidate our investment securities at a disadvantageous time, which could result in losses. Any losses resulting from the disposition of our investment securities in this

manner could have a material adverse effect on our operating results and net profitability. At June 30, 2018 and December 31, 2017, the Company had financing arrangements with nine and ten counterparties, respectively. As of June 30, 2018, the Company's only exposures where the amount at risk was in excess of 5% of the Company's stockholders' equity was to Deutsche Bank AG, London Branch and Jefferies & Company, Inc. at 6.8% and 5.2%, respectively. At December 31, 2017, the Company's only exposure where the amount at risk was in excess of 5% of the Company's stockholders' equity was to Deutsche Bank AG, London Branch at 5.0%. The amount at risk is defined as the fair value of securities pledged as collateral to the financing arrangement in excess of the financing arrangement liability.

Table of Contents

As of June 30, 2018, our available liquid assets included unrestricted cash and cash equivalents and unencumbered securities that we believe may be posted as margin. The Company had \$84.7 million in cash and cash equivalents and \$318.0 million in unencumbered investment securities to meet additional haircuts or market valuation requirements. The unencumbered securities that we believe may be posted as margin as of June 30, 2018 included \$177.0 million of Agency RMBS, \$98.8 million of CMBS and \$42.2 million of non-Agency RMBS and other investment securities. The cash and unencumbered securities, which collectively represent 34.1% of our financing arrangements, are liquid and could be monetized to pay down or collateralize a liability immediately.

14. Financing Arrangements, Residential Mortgage Loans

The Company has a master repurchase agreement with Deutsche Bank AG, Cayman Islands Branch with a maximum aggregate committed principal amount of \$100.0 million and a maximum uncommitted principal amount of \$150.0 million to fund distressed residential mortgage loans, expiring on June 8, 2019. The outstanding balance on this master repurchase agreement as of June 30, 2018 and December 31, 2017 amounts to approximately \$154.6 million and \$123.6 million, respectively, bearing interest at one-month LIBOR plus 2.40% and 2.50%, respectively (4.49% and 4.05% at June 30, 2018 and December 31, 2017, respectively). The Company expects to roll outstanding borrowings under this master repurchase agreement into a new repurchase agreement or other financing prior to or at maturity.

The Company also has a master repurchase agreement with Deutsche Bank AG, Cayman Islands Branch with a maximum aggregate committed principal amount of \$25.0 million and a maximum uncommitted principal amount of \$25.0 million to fund the purchase of residential mortgage loans, expiring on November 24, 2018. The outstanding balance on this master repurchase agreement as of June 30, 2018 and December 31, 2017 amounts to approximately \$37.9 million and \$26.1 million, respectively, bearing interest at one-month LIBOR plus 3.50% (5.59% and 5.05% at June 30, 2018 and December 31, 2017, respectively). The Company expects to roll outstanding borrowings under this master repurchase agreement into a new repurchase agreement or other financing prior to or at maturity.

During the terms of the master repurchase agreements, proceeds from the residential mortgage loans, including the Company's distressed residential mortgage loans, will be applied to pay any price differential and to reduce the aggregate repurchase price of the collateral. The financings under the master repurchase agreements are subject to margin calls to the extent the market value of the residential mortgage loans falls below specified levels and repurchase may be accelerated upon an event of default under the master repurchase agreements. The master repurchase agreements contain various covenants, including among other things, the maintenance of certain amounts of net worth, liquidity and leverage ratios. The Company is in compliance with such covenants as of August 6, 2018.

15. Residential Collateralized Debt Obligations

The Company's Residential CDOs, which are recorded as liabilities on the Company's condensed consolidated balance sheets, are secured by ARM loans pledged as collateral, which are recorded as assets of the Company. As of June 30, 2018 and December 31, 2017, the Company had Residential CDOs outstanding of \$62.2 million and \$70.3 million, respectively. As of June 30, 2018 and December 31, 2017, the current weighted average interest rate on these Residential CDOs was 2.70% and 2.16%, respectively. The Residential CDOs are collateralized by ARM loans with a principal balance of \$69.5 million and \$77.5 million at June 30, 2018 and December 31, 2017, respectively. The Company retained the owner trust certificates, or residual interest, for three securitizations, and, as of June 30, 2018 and December 31, 2017, had a net investment in the residential securitization trusts of \$4.9 million and \$4.4 million, respectively.

Table of Contents

16. Debt

Convertible Notes

On January 23, 2017, the Company issued \$138.0 million aggregate principal amount of its 6.25% Senior Convertible Notes due 2022, including \$18.0 million aggregate principal amount of the Convertible Notes issued upon exercise of the underwriter's over-allotment option, in an underwritten public offering. The net proceeds to the Company from the sale of the Convertible Notes, after deducting the underwriter's discounts, commissions and offering expenses, were approximately \$127.0 million with the total cost to the Company of approximately 8.24%.

The Convertible Notes were issued at 96% of the principal amount, bear interest at a rate equal to 6.25% per year, payable semi-annually in arrears on January 15 and July 15 of each year, and are expected to mature on January 15, 2022, unless earlier converted or repurchased. The Company does not have the right to redeem the Convertible Notes prior to maturity and no sinking fund is provided for the Convertible Notes. Holders of the Convertible Notes will be permitted to convert their Convertible Notes into shares of the Company's common stock at any time prior to the close of business on the business day immediately preceding January 15, 2022. The conversion rate for the Convertible Notes, which is subject to adjustment upon the occurrence of certain specified events, initially equals 142.7144 shares of the Company's common stock per \$1,000 principal amount of Convertible Notes, which is equivalent to a conversion price of approximately \$7.01 per share of the Company's common stock, based on a \$1,000 principal amount of the Convertible Notes. The Convertible Notes are senior unsecured obligations of the Company that rank senior in right of payment to the Company's subordinated debentures and any of its other indebtedness that is expressly subordinated in right of payment to the Convertible Notes.

During the six months ended June 30, 2018, none of the Convertible Notes were converted. As of August 6, 2018, the Company has not been notified, and is not aware, of any event of default under the covenants for the Convertible Notes.

Subordinated Debentures

Subordinated debentures are trust preferred securities that are fully guaranteed by the Company with respect to distributions and amounts payable upon liquidation, redemption or repayment. The following table summarizes the key details of the Company's subordinated debentures as of June 30, 2018 and December 31, 2017 (dollar amounts in thousands):

	NYM Preferred Trust I	NYM Preferred Trust II
Principal value of trust preferred securities	\$ 25,000	\$ 20,000
	Three month LIBOR	Three month LIBOR
Interest rate	plus 3.75%, resetting quarterly	plus 3.95%, resetting quarterly
Scheduled maturity	March 30, 2035	October 30, 2035

As of August 6, 2018, the Company has not been notified, and is not aware, of any event of default under the covenants for the subordinated debentures.

Mortgages and Notes Payable in Consolidated VIEs

On March 31, 2017, the Company consolidated both Riverchase Landing and The Clusters into its condensed consolidated financial statements (see Note 10). In March 2018, Riverchase Landing completed the sale of its multi-family apartment community and redeemed the Company's preferred equity investment. The Company de-consolidated Riverchase Landing as of the date of the sale. The Clusters' real estate investment is subject to a mortgage payable and the Company has no obligation for this liability as of June 30, 2018.

The Company also consolidates KRVI into its condensed consolidated financial statements (see Note 10). KRVI's real estate under development is subject to a note payable of \$5.0 million that has an unused commitment of \$3.4 million as of June 30, 2018. The Company has not been notified, and is not aware, of any event of default under the covenants of KRVI's note payable as of August 6, 2018.

Table of Contents

The mortgages and notes payable in the consolidated VIEs are described below (dollar amounts in thousands):

	Assumption/Origination Date	Mortgage Note Amount as of June 30, 2018	Maturity Date	Interest Rate	Net Deferred Finance Costs
The Clusters	6/30/2014	\$ 27,554	7/6/2024	4.49 %	\$ 60
KRVI	12/16/2016	\$ 5,026	12/16/2019	6.50 %	\$ —

As of June 30, 2018, maturities for debt on the Company's condensed consolidated balance sheet are as follows (dollar amounts in thousands):

Fiscal Year Total	
2018	\$—
2019	5,026
2020	—
2021	—
2022	138,000
2023	—
Thereafter	72,554
	\$215,580

17. Commitments and Contingencies

Loans Sold to Third Parties – In the normal course of business, the Company is obligated to repurchase loans based on violations of representations and warranties in the loan sale agreements. The Company did not repurchase any loans during the six months ended June 30, 2018.

Outstanding Litigation – The Company is at times subject to various legal proceedings arising in the ordinary course of business. As of June 30, 2018, the Company does not believe that any of its current legal proceedings, individually or in the aggregate, will have a material adverse effect on the Company's operations, financial condition or cash flows.

Table of Contents

18. Fair Value of Financial Instruments

The Company has established and documented processes for determining fair values. Fair value is based upon quoted market prices, where available. If listed prices or quotes are not available, then fair value is based upon internally developed models that primarily use inputs that are market-based or independently-sourced market parameters, including interest rate yield curves.

A financial instrument's categorization within the valuation hierarchy is based upon the lowest level of input that is significant to the fair value measurement. The three levels of valuation hierarchy are defined as follows:

Level 1 - inputs to the valuation methodology are quoted prices (unadjusted) for identical assets or liabilities in active markets.

Level 2 - inputs to the valuation methodology include quoted prices for similar assets and liabilities in active markets, and inputs that are observable for the asset or liability, either directly or indirectly, for substantially the full term of the financial instrument.

Level 3 - inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The following describes the valuation methodologies used for the Company's financial instruments measured at fair value, as well as the general classification of such instruments pursuant to the valuation hierarchy.

Investment Securities Available for Sale – Fair value for the investment securities in our portfolio, except the CMBS held in securitization trusts, are valued using a third-party pricing service or are based on quoted prices provided by dealers who make markets in similar financial instruments. Dealer valuations typically incorporate common market pricing methods, including a spread measurement to the Treasury curve or interest rate swap curve as well as underlying characteristics of the particular security including coupon, periodic and life caps, collateral type, rate reset period and seasoning or age of the security. If quoted prices for a security are not reasonably available from a dealer, the security will be classified as a Level 3 security and, as a result, management will determine fair value by modeling the security based on its specific characteristics and available market information. Management reviews all prices used in determining fair value to ensure they represent current market conditions. This review includes surveying similar market transactions, comparisons to interest pricing models as well as offerings of like securities by dealers. The Company's investment securities, except the CMBS held in securitization trusts, are valued based upon readily observable market parameters and are classified as Level 2 fair values.

The Company's CMBS held in securitization trusts are comprised of securities for which there are not substantially similar securities that trade frequently. The Company classifies these securities as Level 3 fair values. Fair value of the Company's CMBS investments held in securitization trusts is based on an internal valuation model that considers expected cash flows from the underlying loans and yields required by market participants. The significant unobservable inputs used in the measurement of these investments are projected losses of certain identified loans within the pool of loans and a discount rate. The discount rate used in determining fair value incorporates default rate, loss severity and current market interest rates. The discount rate ranges from 4.5% to 10.0%. Significant increases or decreases in these inputs would result in a significantly lower or higher fair value measurement.

b. Multi-Family Loans Held in Securitization Trusts – Multi-family loans held in securitization trusts are carried at fair value as a result of a fair value election and classified as Level 3 fair values. The Company determines the fair value of multi-family loans held in securitization trusts based on the fair value of its Multi-Family CDOs and its retained interests from these securitizations (eliminated in consolidation in accordance with GAAP), as the fair value of these

instruments is more observable.

c. Derivative Instruments – The fair value of interest rate swaps are based on dealer quotes and are presented net of variation margin payments pledged or received. The Company’s derivatives are classified as Level 2 fair values.

45

Table of Contents

Multi-Family CDOs – Multi-Family CDOs are recorded at fair value and classified as Level 3 fair values. The fair value of Multi-Family CDOs is determined using a third party pricing service or are based on quoted prices provided by dealers who make markets in similar financial instruments. The dealers will consider contractual cash payments and yields expected by market participants. Dealers also incorporate common market pricing methods, including a spread measurement to the Treasury curve or interest rate swap curve as well as underlying characteristics of the particular security including coupon, periodic and life caps, collateral type, rate reset period and seasoning or age of the security.

Investment in Unconsolidated Entities – Fair value for investments in unconsolidated entities is determined based on a valuation model using assumptions for the timing and amount of expected future cash flow for income and realization events for the underlying assets in the unconsolidated entities and a discount rate. This fair value measurement is generally based on unobservable inputs and, as such, is classified as Level 3 in the fair value hierarchy.

Residential Mortgage Loans - Certain of the Company's acquired residential mortgage loans, including distressed residential mortgage loans and second mortgages, are recorded at fair value and classified as Level 3 in the fair value hierarchy. The fair value for first lien mortgages is determined using prices obtained from a third party pricing service. The fair value is based upon cash flow models that primarily use market-based inputs such as current interest and discount rates but also include unobservable market data inputs such as prepayment speeds, default rates and loss severities. The fair value for second mortgage residential loans is based upon an internal cash flow model that considers current interest rates, prepayment speeds, default rates, and loss severities.

Any changes to the valuation methodology are reviewed by management to ensure the changes are appropriate. As markets and products develop and the pricing for certain products becomes more transparent, the Company continues to refine its valuation methodologies. The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Company believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies, or assumptions, to determine the fair value of certain financial instruments could result in a different estimate of fair value at the reporting date. The Company uses inputs that are current as of each reporting date, which may include periods of market dislocation, during which time price transparency may be reduced. This condition could cause the Company's financial instruments to be reclassified from Level 2 to Level 3 in future periods.

Table of Contents

The following table presents the Company's financial instruments measured at fair value on a recurring basis as of June 30, 2018 and December 31, 2017, respectively, on the Company's condensed consolidated balance sheets (dollar amounts in thousands):

	Measured at Fair Value on a Recurring Basis at							
	June 30, 2018			December 31, 2017				
	Level 1	Level 2	Level 3	Total	Level 1	Level 2	Level 3	Total
Assets carried at fair value

Table of Contents

The following table details changes in valuation for the Level 3 assets for the six months ended June 30, 2018 and 2017, respectively (amounts in thousands):

Level 3 Assets:

	Six Months Ended June	
	2018	2017
Balance at beginning of period	\$9,835,319	\$7,061,842
Total (losses)/gains (realized/unrealized)		
Included in earnings ⁽¹⁾	(239,166)	62,607
Included in other comprehensive income (loss)	297	(144)
Contributions	—	1,300
Paydowns/Distributions	(78,497)	(71,778)
Sales	(2,185)	—
Purchases ⁽²⁾	94,075	1,554,450
Balance at the end of period	\$9,609,843	\$8,608,277

- Amounts included in interest income from multi-family loans held in securitization trusts, interest income from residential mortgage loans, realized gain on distressed residential mortgage loans, net gain on residential mortgage loans at fair value, unrealized gain on multi-family loans and debt held in securitization trusts, and other income. During the six months ended June 30, 2017, the Company purchased PO securities, certain IOs and mezzanine CMBS securities issued from a Freddie Mac-sponsored multi-family K-Series securitization trust. The Company determined that the securitization trust is a VIE and that the Company is the primary beneficiary of the VIE. As a result, the Company consolidated assets of this Freddie Mac sponsored multi-family K-Series securitization trust in the amount of \$1.5 billion (see Notes 2 and 7).

The following table details changes in valuation for the Level 3 liabilities for the six months ended June 30, 2018 and 2017, respectively (amounts in thousands):

Level 3 Liabilities:

	Six Months Ended June	
	2018	2017
Balance at beginning of period	\$9,189,459	\$6,624,896
Total gains (realized/unrealized)		
Included in earnings ⁽¹⁾	(282,738)	39,113
Purchases ⁽²⁾	—	1,472,073
Paydowns	(67,880)	(66,144)
Balance at the end of period	\$8,838,841	\$8,069,938

- (1) Amounts included in interest expense on Multi-Family CDOs and unrealized gain on multi-family loans and debt held in securitization trusts. During the six months ended June 30, 2017, the Company purchased PO securities, certain IOs and mezzanine CMBS securities issued from a Freddie Mac-sponsored multi-family K-Series securitization trust. The Company determined that the securitization trust is a VIE and that the Company is the primary beneficiary of the VIE. As a result, the Company consolidated liabilities of this Freddie Mac sponsored multi-family K-Series securitization trust in the amount of \$1.5 billion (see Notes 2 and 7).

Table of Contents

The following table details the changes in unrealized gains (losses) included in earnings for our Level 3 multi-family loans and debt held in securitization trusts for the three and six months ended June 30, 2018 and 2017, respectively (dollar amounts in thousands):

	Three Months Ended June 30,		Six Months Ended June 30,	
	2018	2017	2018	2017
Change in unrealized (losses) gains – assets	\$(47,200)	\$66,642	\$(219,746)	\$76,762
Change in unrealized gains (losses) – liabilities	59,219	(65,195)	239,310	(73,931)
Net change in unrealized gains included in earnings for assets and liabilities	\$12,019	\$1,447	\$19,564	\$2,831

The following table presents assets measured at fair value on a non-recurring basis as of June 30, 2018 and December 31, 2017, respectively, on the Company's condensed consolidated balance sheets (dollar amounts in thousands):

	Assets Measured at Fair Value on a Non-Recurring Basis at							
	June 30, 2018				December 31, 2017			
	Level 1	Level 2	Level 3	Total	Level 1	Level 2	Level 3	
	1	2	3	Total	1	2	Level 3	
Residential mortgage loans held in securitization trusts – impaired loans, net	\$—	\$—	—\$8,959	\$8,959	\$—	\$—	—\$10,317	\$10,317
Real estate owned held in residential securitization trusts	—	—	111	111	—	—	111	111

The following table presents gains (losses) incurred for assets measured at fair value on a non-recurring basis for the three and six months ended June 30, 2018 and 2017, respectively, on the Company's condensed consolidated statements of operations (dollar amounts in thousands):

	Three Months Ended June 30,		Six Months Ended June 30,	
	2018	2017	2018	2017
Residential mortgage loans held in securitization trusts – impaired loans, net	\$(189)	\$110	\$(205)	
Real estate owned held in residential securitization trusts	—(6)	—	—(6)	

Residential Mortgage Loans Held in Securitization Trusts – Impaired Loans, net – Impaired residential mortgage loans held in securitization trusts are recorded at amortized cost less specific loan loss reserves. Impaired loan value is based on management's estimate of the net realizable value taking into consideration local market conditions of the property, updated appraisal values of the property and estimated expenses required to remediate the impaired loan.

Real Estate Owned Held in Residential Securitization Trusts – Real estate owned held in the residential securitization trusts are recorded at net realizable value. Any subsequent adjustment will result in the reduction in carrying value with the corresponding amount charged to earnings. Net realizable value is based on an estimate of disposal taking into consideration local market conditions of the property, updated appraisal values of the property and estimated expenses required to sell the property.

Table of Contents

The following table presents the carrying value and estimated fair value of the Company's financial instruments at June 30, 2018 and December 31, 2017, respectively (dollar amounts in thousands):

	Fair Value Hierarchy Level	June 30, 2018		December 31, 2017	
		Carrying Value	Estimated Fair Value	Carrying Value	Estimated Fair Value
Financial Assets:					
Cash and cash equivalents	Level 1	\$84,717	\$84,717	\$95,191	\$95,191
Investment securities available for sale ⁽¹⁾	Level 2 or 3	1,290,015	1,290,015	1,413,081	1,413,081
Residential mortgage loans held in securitization trusts, net	Level 3	66,047	65,118	73,820	72,131
Distressed residential mortgage loans, at carrying value, net ⁽²⁾	Level 3	290,645	292,592	331,464	334,765
Residential mortgage loans, at fair value ⁽³⁾	Level 3	169,197	169,197	87,153	87,153
Multi-family loans held in securitization trusts	Level 3	9,345,360	9,345,360	9,657,421	9,657,421
Derivative assets	Level 2	10,543	10,543	10,101	10,101
Mortgage loans held for sale, net ⁽⁴⁾	Level 3	4,750	5,090	5,507	5,598
Mortgage loans held for investment ⁽⁴⁾	Level 3	1,760	1,900	1,760	1,900
Preferred equity and mezzanine loan investments ⁽⁵⁾	Level 3	176,741	178,848	138,920	140,129
Investments in unconsolidated entities ⁽⁶⁾	Level 3	53,671	53,737	51,143	51,212
Financial Liabilities:					
Financing arrangements, portfolio investments	Level 2	1,179,961	1,179,961	1,276,918	1,276,918
Financing arrangements, residential mortgage loans	Level 2	192,233	192,233	149,063	149,063
Residential collateralized debt obligations	Level 3	62,198	59,635	70,308	66,865
Multi-family collateralized debt obligations	Level 3	8,838,841	8,838,841	9,189,459	9,189,459
Securitized debt	Level 3	61,026	65,894	81,537	87,891
Subordinated debentures	Level 3	45,000	45,000	45,000	45,002
Convertible notes	Level 2	129,738	137,338	128,749	140,060

(1) Includes \$50.1 million and \$47.9 million of investment securities for sale held in securitization trusts as of June 30, 2018 and December 31, 2017, respectively.

(2) Includes distressed residential mortgage loans held in securitization trusts with a carrying value amounting to approximately \$105.9 million and \$121.8 million at June 30, 2018 and December 31, 2017, respectively, and distressed residential mortgage loans with a carrying value amounting to approximately \$184.7 million and \$209.7 million at June 30, 2018 and December 31, 2017, respectively.

(3) Includes distressed residential mortgage loans with a carrying value amounting to \$96.9 million and \$36.9 million at June 30, 2018 and December 31, 2017, respectively, and second mortgages with a carrying value amounting to \$72.3 million and \$50.2 million at June 30, 2018 and December 31, 2017, respectively.

(4) Included in receivables and other assets in the accompanying condensed consolidated balance sheets.

(5) Includes preferred equity and mezzanine loan investments accounted for as loans (see Note 9).

(6) Includes investments in unconsolidated entities accounted for under the fair value option with a carrying value of \$45.2 million and \$42.8 million at June 30, 2018 and December 31, 2017, respectively (see Note 8).

In addition to the methodology to determine the fair value of the Company's financial assets and liabilities reported at fair value on a recurring basis and non-recurring basis, as previously described, the following methods and assumptions were used by the Company in arriving at the fair value of the Company's other financial instruments in the table immediately above:

a. Cash and cash equivalents – Estimated fair value approximates the carrying value of such assets.

Residential mortgage loans held in securitization trusts, net – Residential mortgage loans held in the securitization trusts are recorded at amortized cost, net of allowance for loan losses. Fair value is based on an internal valuation model that considers the aggregated characteristics of groups of loans such as, but not limited to, collateral type, index, interest rate, margin, length of fixed-rate period, life cap, periodic cap, underwriting standards, age and credit estimated using the estimated market prices for similar types of loans.

Table of Contents

c. Distressed residential mortgage loans, net – Fair value is estimated using pricing models taking into consideration current interest rates, loan amount, payment status and property type, and forecasts of future interest rates, home prices and property values, prepayment speeds, default, loss severities, and actual purchases and sales of similar loans.

d. Mortgage loans held for sale, net – The fair value of mortgage loans held for sale, net are estimated by the Company based on the price that would be received if the loans were sold as whole loans taking into consideration the aggregated characteristics of the loans such as, but not limited to, collateral type, index, interest rate, margin, length of fixed interest rate period, life time cap, periodic cap, underwriting standards, age and credit.

e. Preferred equity and mezzanine loan investments – Estimated fair value is determined by both market comparable pricing and discounted cash flows. The discounted cash flows are based on the underlying contractual cash flows and estimated changes in market yields. The fair value also reflects consideration of changes in credit risk since the origination or time of initial investment.

f. Financing arrangements – The fair value of these financing arrangements approximates cost as they are short term in nature.

g. Residential collateralized debt obligations – The fair value of these CDOs is based on discounted cash flows as well as market pricing on comparable obligations.

h. Securitized debt – The fair value of securitized debt is based on discounted cash flows using management's estimate for market yields.

i. Subordinated debentures – The fair value of these subordinated debentures is based on discounted cash flows using management's estimate for market yields.

j. Convertible notes – The fair value is based on quoted prices provided by dealers who make markets in similar financial instruments.

Table of Contents

19. Stockholders' Equity

(a) Dividends on Preferred Stock

The Company had 200,000,000 authorized shares of preferred stock, par value \$0.01 per share, with 12,000,000 shares issued and outstanding as of June 30, 2018 and December 31, 2017.

On June 4, 2013, the Company issued 3,000,000 shares of 7.75% Series B Cumulative Redeemable Preferred Stock ("Series B Preferred Stock"), with a par value of \$0.01 per share and a liquidation preference of \$25 per share, in an underwritten public offering, for net proceeds of approximately \$72.4 million, after deducting underwriting discounts and offering expenses. As of June 30, 2018 and December 31, 2017, there were 6,000,000 shares of Series B Preferred Stock authorized. The Series B Preferred Stock is entitled to receive a dividend at a rate of 7.75% per year on the \$25 liquidation preference and is senior to the common stock with respect to dividends and distribution of assets upon liquidation, dissolution or winding up.

On April 22, 2015, the Company issued 3,600,000 shares of 7.875% Series C Cumulative Redeemable Preferred Stock ("Series C Preferred Stock"), with a par value of \$0.01 per share and a liquidation preference of \$25 per share, in an underwritten public offering, for net proceeds of approximately \$86.9 million, after deducting underwriting discounts and offering expenses. As of June 30, 2018 and December 31, 2017, there were 4,140,000 shares of Series C Preferred Stock authorized. The Series C Preferred Stock is entitled to receive a dividend at a rate of 7.875% per year on the \$25 liquidation preference and is senior to the common stock with respect to dividends and distribution of assets upon liquidation, dissolution or winding up.

On October 13, 2017, the Company issued 5,400,000 shares of 8.00% Series D Fixed-to-Floating Rate Cumulative Redeemable Preferred Stock ("Series D Preferred Stock"), with a par value of \$0.01 per share and a liquidation preference of \$25 per share, in an underwritten public offering, for net proceeds of approximately \$130.5 million, after deducting underwriting discounts and offering expenses. As of June 30, 2018 and December 31, 2017, there were 5,750,000 shares of Series D Preferred Stock authorized. The Series D Preferred Stock is entitled to receive a dividend at a fixed rate from and including the issue date to, but excluding, October 15, 2027 of 8.00% per year on the \$25 liquidation preference. Beginning October 15, 2027, the Series D Preferred Stock is entitled to receive a dividend at a floating rate equal to three-month LIBOR plus a spread of 5.695% per year on the \$25 liquidation preference. The Series D Preferred Stock is senior to the common stock with respect to dividends and distribution of assets upon liquidation, dissolution or winding up.

The Series B Preferred Stock, Series C Preferred Stock, and Series D Preferred Stock generally do not have any voting rights, subject to an exception in the event the Company fails to pay dividends on such stock for six or more quarterly periods (whether or not consecutive). Under such circumstances, holders of the Series B Preferred Stock, Series C Preferred Stock, and Series D Preferred Stock voting together as a single class with the holders of all other classes or series of our preferred stock upon which like voting rights have been conferred and are exercisable and which are entitled to vote as a class with the Series B Preferred Stock, Series C Preferred Stock, and Series D Preferred Stock will be entitled to vote to elect two additional directors to the Company's Board of Directors (the "Board") until all unpaid dividends have been paid or declared and set apart for payment. In addition, certain material and adverse changes to the terms of the Series B Preferred Stock, Series C Preferred Stock, and Series D Preferred Stock cannot be made without the affirmative vote of holders of at least two-thirds of the outstanding shares of Series B Preferred Stock, Series C Preferred Stock, or Series D Preferred Stock.

The Series B Preferred Stock, Series C Preferred Stock, and Series D Preferred Stock are not redeemable by the Company prior to June 4, 2018, April 22, 2020, and October 15, 2027, respectively, except under circumstances

intended to preserve the Company's qualification as a REIT and except upon the occurrence of a Change of Control (as defined in the Articles Supplementary designating the Series B Preferred Stock, Series C Preferred Stock, and Series D Preferred Stock, respectively). On and after June 4, 2018, April 22, 2020, and October 15, 2027, the Company may, at its option, redeem the Series B Preferred Stock, Series C Preferred Stock, and Series D Preferred Stock, respectively, in whole or in part, at any time or from time to time, for cash at a redemption price equal to \$25.00 per share, plus any accumulated and unpaid dividends.

In addition, upon the occurrence of a Change of Control, the Company may, at its option, redeem the Series B Preferred Stock, Series C Preferred Stock, and Series D Preferred Stock in whole or in part, within 120 days after the first date on which such Change of Control occurred, for cash at a redemption price of \$25.00 per share, plus any accumulated and unpaid dividends.

Each of the Series B Preferred Stock, Series C Preferred Stock, and Series D Preferred Stock has no stated maturity, is not subject to any sinking fund or mandatory redemption and will remain outstanding indefinitely unless repurchased or redeemed by the Company or converted into the Company's common stock in connection with a Change of Control.

Table of Contents

Upon the occurrence of a Change of Control, each holder of Series B Preferred Stock, Series C Preferred Stock, and Series D Preferred Stock will have the right (unless the Company has exercised its right to redeem the Series B Preferred Stock, Series C Preferred Stock, or Series D Preferred Stock, respectively) to convert some or all of the Series B Preferred Stock, Series C Preferred Stock, or Series D Preferred Stock held by such holder into a number of shares of our common stock per share of Series B Preferred Stock, Series C Preferred Stock or Series D Preferred Stock determined by a formula, in each case, on the terms and subject to the conditions described in the applicable Articles Supplementary for such series.

From the time of original issuance of the Series B Preferred Stock, Series C Preferred Stock, and Series D Preferred Stock through June 30, 2018, the Company has declared and paid all required quarterly dividends on such series of stock. The following table presents the relevant dates with respect to such quarterly cash dividends on the Series B Preferred Stock and Series C Preferred Stock commencing January 1, 2017 through June 30, 2018 and on the Series D Preferred Stock from its time of original issuance through June 30, 2018:

Declaration Date	Record Date	Payment Date	Cash Dividend Per Share		
			Series B Preferred Stock	Series C Preferred Stock	Series D Preferred Stock
June 18, 2018	July 1, 2018	July 15, 2018	\$ 0.484375	\$ 0.4921875	\$ 0.50
March 19, 2018	April 1, 2018	April 15, 2018	0.484375	0.4921875	0.50
December 7, 2017	January 1, 2018	January 15, 2018	0.484375	0.4921875	0.51111 (1)
September 14, 2017	October 1, 2017	October 15, 2017	0.484375	0.4921875	—
June 14, 2017	July 1, 2017	July 15, 2017	0.484375	0.4921875	—
March 16, 2017	April 1, 2017	April 15, 2017	0.484375	0.4921875	—

(1) Cash dividend for the partial quarterly period that began on October 13, 2017 and ended on January 14, 2018.

(b) Dividends on Common Stock

The following table presents cash dividends declared by the Company on its common stock with respect to each of the quarterly periods commencing January 1, 2017 and ended June 30, 2018:

Period	Declaration Date	Record Date	Payment Date	Cash Dividend Per Share
Second Quarter 2018	June 18, 2018	June 28, 2018	July 26, 2018	\$ 0.20
First Quarter 2018	March 19, 2018	March 29, 2018	April 26, 2018	0.20
Fourth Quarter 2017	December 7, 2017	December 18, 2017	January 25, 2018	0.20
Third Quarter 2017	September 14, 2017	September 25, 2017	October 25, 2017	0.20
Second Quarter 2017	June 14, 2017	June 26, 2017	July 25, 2017	0.20
First Quarter 2017	March 16, 2017	March 27, 2017	April 25, 2017	0.20

(c) Public Offering of Common Stock

The Company did not issue any shares of its common stock through underwritten public offerings during the three and six months ended June 30, 2018.

(d)Equity Distribution Agreements

On August 10, 2017, the Company entered into an equity distribution agreement (the “Equity Distribution Agreement”) with Credit Suisse Securities (USA) LLC (“Credit Suisse”), as sales agent, pursuant to which the Company may offer and sell shares of its common stock, par value \$0.01 per share, having a maximum aggregate sales price of up to \$100.0 million, from time to time through Credit Suisse. The Company has no obligation to sell any of the shares of common stock issuable under the Equity Distribution Agreement and may at any time suspend solicitations and offers under the Equity Distribution Agreement.

Table of Contents

During the three and six months ended June 30, 2018, the Company issued 12,145,144 shares under the Equity Distribution Agreement, at an average sales price of \$6.17 per share, resulting in total net proceeds to the Company of \$73.8 million after deducting the placement fees. As of June 30, 2018, approximately \$24.7 million of securities remains available for issuance under the Equity Distribution Agreement.

20. Earnings Per Share

The Company calculates basic earnings per common share by dividing net income attributable to the Company's common stockholders for the period by weighted-average shares of common stock outstanding for that period. Diluted earnings per common share takes into account the effect of dilutive instruments, such as convertible notes and performance share awards, and the number of incremental shares that are to be added to the weighted-average number of shares outstanding.

During the three and six months ended June 30, 2018, the Company's Convertible Notes were determined to be dilutive and were included in the calculation of diluted earnings per common share under the "if-converted" method. Under this method, the periodic interest expense (net of applicable taxes) for dilutive notes is added back to the numerator and the number of shares that the notes are entitled to (if converted, regardless of whether they are in or out of the money) are included in the denominator. During the three and six months ended June 30, 2017, the Company's Convertible Notes were determined to be anti-dilutive and were not included in the calculation of diluted earnings per common share. During the three and six months ended June 30, 2018, the Company's PSUs awarded under the 2018 Long-Term Equity Incentive Program ("2018 Long-Term EIP") (see Note 21) were also determined to be dilutive and were included in the calculation of diluted earnings per common share under the treasury stock method. Under this method, common equivalent shares are calculated assuming that target PSUs vest according to the PSU Agreements and unrecognized compensation cost is used to repurchase shares of the Company's outstanding common stock at the average market price during the reported period.

The following table presents the computation of basic and diluted earnings per common share for the periods indicated (dollar and share amounts in thousands, except per share amounts):

	Three Months Ended June 30,		Six Months Ended June 30,	
	2018	2017 ⁽¹⁾	2018	2017 ⁽¹⁾
Basic Earnings per Common Share				
Net income attributable to Company	\$29,694	\$14,336	\$59,311	\$33,517
Less: Preferred stock dividends	(5,925)	(3,225)	(11,850)	(6,450)
Net income attributable to Company's common stockholders	\$23,769	\$11,111	\$47,461	\$27,067
Basic weighted average common shares outstanding	115,211	111,863	113,623	111,792
Basic Earnings per Common Share	\$0.21	\$0.10	\$0.42	\$0.24
Diluted Earnings per Common Share:				
Net income attributable to Company	\$29,694	\$14,336	\$59,311	\$33,517
Less: Preferred stock dividends	(5,925)	(3,225)	(11,850)	(6,450)
Add back: Interest expense on convertible notes for the period, net of tax	2,633	—	5,267	—
Net income attributable to Company's common stockholders	\$26,402	\$11,111	\$52,728	\$27,067
Weighted average common shares outstanding	115,211	111,863	113,623	111,792
Net effect of assumed PSUs vested	258	—	152	—
Net effect of assumed convertible notes conversion to common shares	19,695	—	19,695	—
Diluted weighted average common shares outstanding	135,164	111,863	133,470	111,792
Diluted Earnings per Common Share	\$0.20	\$0.10	\$0.40	\$0.24

For the three and six months ended June 30, 2017, the Company's Convertible Notes were determined to be
(1) anti-dilutive and were not included in the calculation of diluted earnings per common share. There were no dilutive PSU awards during the three and six months ended June 30, 2017.

54

21. Stock Based Compensation

In May 2017, the Company's stockholders approved the 2017 Plan, with such stockholder action resulting in the termination of the Company's 2010 Stock Incentive Plan (the "2010 Plan"). The terms of the 2017 Plan are substantially the same as the 2010 Plan. However, any outstanding awards under the 2010 Plan will continue in accordance with the terms of the 2010 Plan and any award agreement executed in connection with such outstanding awards. At June 30, 2018, there were 217,163 shares of non-vested restricted stock outstanding under the 2010 Plan.

Pursuant to the 2017 Plan, eligible employees, officers and directors of the Company are offered the opportunity to acquire the Company's common stock through the award of restricted stock and other equity awards under the 2017 Plan. The maximum number of shares that may be issued under the 2017 Plan is 5,570,000. Of the common stock authorized at June 30, 2018, 4,237,065 shares are available for issuance under the 2017 Plan. The Company's non-employee directors have been issued 131,975 shares under the 2017 Plan as of June 30, 2018. The Company's employees have been issued 209,264 of restricted stock under the 2017 Plan as of June 30, 2018. At June 30, 2018, there were 207,178 shares of non-vested restricted stock outstanding and 991,696 common shares reserved for issuance in connection with outstanding PSUs under the 2017 Plan.

(a) Restricted Common Stock Awards

During the three and six months ended June 30, 2018, the Company recognized non-cash compensation expense on its restricted common stock awards of \$0.3 million and \$0.6 million, respectively. During the three and six months ended June 30, 2017, the Company recognized non-cash compensation expense on its restricted common stock awards of \$0.4 million and \$0.7 million, respectively. Dividends are paid on all restricted common stock issued, whether those shares have vested or not. In general, non-vested restricted stock is forfeited upon the recipient's termination of employment.

A summary of the activity of the Company's non-vested restricted stock collectively under the 2010 Plan and 2017 Plan for the six months ended June 30, 2018 and 2017, respectively, is presented below:

	2018		2017	
	Number of Non-vested Restricted Shares	Weighted Average Per Share Grant Date Fair Value ⁽¹⁾	Number of Non-vested Restricted Shares	Weighted Average Per Share Grant Date Fair Value ⁽¹⁾
Non-vested shares at January 1	422,928	\$ 6.36	319,058	\$ 6.40
Granted	206,597	5.57	332,921	6.54
Vested	(200,064)	6.55	(150,209)	6.74
Forfeited	(5,120)	6.25	—	—
Non-vested shares as of June 30	424,341	5.90	501,770	6.39
Weighted-average of restricted stock granted during the period	206,597	\$ 5.57	332,921	\$ 6.54

⁽¹⁾ The grant date fair value of restricted stock awards is based on the closing market price of the Company's common stock at the grant date.

At June 30, 2018 and 2017, the Company had unrecognized compensation expense of \$2.1 million and \$2.7 million, respectively, related to the non-vested shares of restricted common stock under the 2010 Plan and 2017 Plan. The unrecognized compensation expense at June 30, 2018 is expected to be recognized over a weighted average period of

2.1 years. The total fair value of restricted shares vested during the six months ended June 30, 2018 and 2017 was approximately \$1.1 million and \$1.0 million, respectively. The requisite service period for restricted shares at issuance is three years.

(b) Performance Share Awards

In May 2015, the Compensation Committee of the Board of Directors approved a PSA under the 2010 Plan to the Company's Chairman and Chief Executive Officer. At the time of grant, the target number of shares pursuant to the PSA consisted of 89,629 shares of common stock. The PSA had a grant date fair value of approximately \$0.4 million. The grant date fair value of the PSA was determined through a Monte-Carlo simulation of the Company's common stock total shareholder return and the common stock total shareholder return of its peer companies to determine the total shareholder return of the Company's common stock relative to its peer companies over a future period of three years. For the PSA granted in 2015, the inputs used by the model to determine the fair value were (i) historical stock return volatilities of the Company and its peer companies over the most recent three year period, (ii) a risk free rate based on the three year U.S. Treasury rate on grant date, and (iii) historical pairwise stock return correlations between the Company and its peer companies over the most recent three year period.

Under the terms of the agreement pursuant to which the PSA was granted, vesting of the PSA would occur at the end of three years based on three-year total shareholder return in April 2018. As of June 30, 2018, no shares were issued under the PSA award.

(c) Performance Stock Units

During the six months ended June 30, 2018, the Compensation Committee and the Board of Directors approved the grant of PSUs to the Chief Executive Officer, Chief Financial Officer and certain other employees as part of our 2018 Long-Term EIP. The awards were issued pursuant to and are consistent with the terms and conditions of the 2017 Plan.

The PSU awards are subject to performance-based vesting under the 2017 Plan pursuant to the PSU Agreements. At the time of grant, the target number of shares pursuant to the PSU awards totaled 653,365 shares of common stock. The PSU awards had a grant date fair value of approximately \$2.7 million. Vesting of the PSUs will occur at the end of three years based on the following:

If three-year TSR performance relative to the Company's identified performance peer group (the "Relative TSR") is less than 30th percentile, then 0% of the target PSUs will vest;

If three-year Relative TSR performance is equal to the 30th percentile, then Threshold % (as defined in the individual PSU Agreements) of the target PSUs will vest;

If three-year Relative TSR performance is equal to the 50th percentile, then 100% of the target PSUs will vest; and

If three-year Relative TSR performance is greater than or equal to the 80th percentile, then Maximum % (as defined in the individual PSU Agreements) of the target PSUs will vest.

The percentage of target PSUs that vest for performance between the 30th, 50th, and 80th percentiles will be calculated using linear interpolation.

Total shareholder return for the Company and each member of the peer group will be determined by dividing (i) the sum of the cumulative amount of such entity's dividends per share for the performance period and the arithmetic average per share volume weighted average price (the "VWAP") of such entity's common stock for the last thirty (30) consecutive trading days of the performance period minus the arithmetic average per share VWAP of such entity's common stock for the last thirty (30) consecutive trading days immediately prior to the performance period by (ii) the arithmetic average per share VWAP of such entity's common stock for the last thirty (30) consecutive trading days

immediately prior to the performance period. Each PSU represents an unfunded promise to receive one share of the Company's common stock once the performance condition has been satisfied.

The grant date fair value of the PSUs was determined through a Monte-Carlo simulation of the Company's common stock total shareholder return and the common stock total shareholder return of its identified performance peer companies to determine the Relative TSR of the Company's common stock over a future period of three years. For the PSUs granted in 2018, the inputs used by the model to determine the fair value are (i) historical stock price volatilities of the Company and its identified performance peer companies over the most recent three year period and correlation between each company's stock and the identified performance peer group over the same time series and (ii) a risk free rate for the period interpolated from the U.S. Treasury yield curve on grant date.

Compensation expense related to the PSUs was \$0.2 million and \$0.2 million for the three and six months ended June 30, 2018, respectively. As of June 30, 2018, there was \$2.4 million of unrecognized compensation cost related to the non-vested portion of the PSUs.

22. Income Taxes

For the three and six months ended June 30, 2018 and June 30, 2017, the Company qualified to be taxed as a REIT under the Internal Revenue Code for U.S. federal income tax purposes. As long as the Company qualifies as a REIT, the Company generally will not be subject to U.S. federal income taxes on its taxable income to the extent it annually distributes at least 100% of its taxable income to stockholders and does not engage in prohibited transactions. Certain activities the Company performs may produce income that will not be qualifying income for REIT purposes. The Company has designated its TRSs to engage in these activities. The tables below reflect the taxes accrued at the TRS level and the tax attributes included in the consolidated financial statements.

The income tax provision for the three and six months ended June 30, 2018 and June 30, 2017 is comprised of the following components (dollar amounts in thousands):

	Three Months Ended June 30, 2018		Six Months Ended June 30, 2017	
Current income tax expense	\$7	\$522	\$7	\$1,739
Deferred income tax benefit	(20)	(80)	(99)	(59)
Total provision	\$(13)	\$442	\$(92)	\$1,680

Deferred Tax Assets and Liabilities

The major sources of temporary differences included in the deferred tax assets and their deferred tax effect as of June 30, 2018 and December 31, 2017 are as follows (dollar amounts in thousands):

	June 30, December 31, 2018 2017	
Deferred tax assets		
Net operating loss carryforward	\$2,127	\$ 295
Net capital loss carryforward	—	—
GAAP/Tax basis differences	3,106	2,237
Total deferred tax assets ⁽¹⁾	5,233	2,532
Deferred tax liabilities		
Deferred tax liabilities	11	144
Total deferred tax liabilities ⁽²⁾	11	144
Valuation allowance ⁽¹⁾	(4,916)	(2,182)
Total net deferred tax asset	\$306	\$ 206

⁽¹⁾ Included in receivables and other assets in the accompanying condensed consolidated balance sheets.

⁽²⁾ Included in accrued expenses and other liabilities in the accompanying condensed consolidated balance sheets.

As of June 30, 2018, the Company, through wholly owned TRSs, had incurred net operating losses in the aggregate amount of approximately \$6.3 million. The Company's carryforward net operating losses can be carried forward

indefinitely until they are offset by future taxable income. At June 30, 2018, the Company has recorded a valuation allowance against certain deferred tax assets as management does not believe that it is more likely than not that these deferred tax assets will be realized.

The Company files income tax returns with the U.S. federal government and various state and local jurisdictions. The Company's federal, state and city income tax returns are subject to examination by the Internal Revenue Service and related tax authorities generally for three years after they were filed. The Company has assessed its tax positions for all open years and concluded that there are no material uncertainties to be recognized.

In addition, based on the Company's evaluation, the Company has concluded that there are no significant uncertain tax positions requiring recognition in the Company's financial statements.

On December 22, 2017, H.R.1, informally known as the Tax Cuts and Jobs Act (the "TCJA") was signed into law. The TCJA makes major changes to the Internal Revenue Code, including several provisions of the Internal Revenue Code that may affect the taxation of real estate investment trusts and holders of their securities. The most significant of these changes, among other things, include lowering U.S. corporate income tax rates, net operating loss utilization rules, limitation on the deduction of business interest, and income recognition rules.

We have recognized the tax effects of the TCJA in the three and six months ended June 30, 2018 and the year ended December 31, 2017 through the measurement of deferred tax assets at the reduced corporate tax rate. We will continue to analyze and monitor the application of TCJA to our business and continue to assess our provision for income taxes as future guidance is issued.

23. Subsequent Events

On August 2, 2018, the Company provided Headlands with written notice that it will not renew its management agreement (the "Management Agreement") at the end of the current term, which is set to expire on June 30, 2019. Headlands has provided investment management services to the Company with respect to its investments in distressed residential loans since 2010. Pursuant to the terms of the Management Agreement, Headlands will continue to manage the loans sourced by it and currently owned by the Company (the "Headlands Loans") and will be entitled to continue to receive a base management fee, incentive fees (to the extent earned) and certain ancillary fees on such assets until such assets have been liquidated.

In addition, in accordance with the Management Agreement, Headlands has an exclusive right of first refusal on an ongoing basis to purchase or arrange for purchase any of the Headlands Loans. As of June 30, 2018, Headlands managed approximately \$404.4 million of Assets (as defined in the Management Agreement) and approximately \$218.1 million of Equity (as defined in the Management Agreement) under the terms of the Management Agreement.

Item 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations

CAUTIONARY NOTE REGARDING FORWARD-LOOKING STATEMENTS

When used in this Quarterly Report on Form 10-Q, in future filings with the SEC or in press releases or other written or oral communications issued or made by us, statements which are not historical in nature, including those containing words such as “believe,” “expect,” “anticipate,” “estimate,” “plan,” “continue,” “intend,” “should,” “would,” “could,” “goal,” “may” or similar expressions, are intended to identify “forward-looking statements” within the meaning of Section 27A of the Securities Act of 1933, as amended, or Securities Act, and Section 21E of the Securities Exchange Act of 1934, as amended or Exchange Act, and, as such, may involve known and unknown risks, uncertainties and assumptions.

Forward-looking statements are based on our beliefs, assumptions and expectations of our future performance, taking into account all information currently available to us. These beliefs, assumptions and expectations are subject to risks and uncertainties and can change as a result of many possible events or factors, not all of which are known to us. If a change occurs, our business, financial condition, liquidity and results of operations may vary materially from those expressed in our forward-looking statements. The following factors are examples of those that could cause actual results to vary from our forward-looking statements: changes in interest rates and the market value of our securities, changes in credit spreads, the impact of a downgrade of the long-term credit ratings of the U.S., Fannie Mae, Freddie Mac, or Ginnie Mae; market volatility; changes in the prepayment rates on the mortgage loans underlying our investment securities; increased rates of default and/or decreased recovery rates on our assets; delays in identifying and acquiring our targeted assets; our ability to borrow to finance our assets and the terms thereof; changes in government laws, regulations or policies affecting our business; our ability to maintain our qualification as a REIT for federal tax purposes; our ability to maintain our exemption from registration under the Investment Company Act; and risks associated with investing in real estate assets, including changes in business conditions and the general economy. These and other risks, uncertainties and factors, including the risk factors described in Part I, Item 1A – “Risk Factors” of our Annual Report on Form 10-K for the year ended December 31, 2017 and as updated by our subsequent filings with the SEC under the Exchange Act, could cause our actual results to differ materially from those projected in any forward-looking statements we make. All forward-looking statements speak only as of the date on which they are made. New risks and uncertainties arise over time and it is not possible to predict those events or how they may affect us. Except as required by law, we are not obligated to, and do not intend to, update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

Table of Contents

Defined Terms

In this Quarterly Report on Form 10-Q we refer to New York Mortgage Trust, Inc., together with its consolidated subsidiaries, as “we,” “us,” “Company,” or “our,” unless we specifically state otherwise or the context indicates otherwise, and refer to our wholly-owned taxable REIT subsidiaries as “TRSs” and our wholly-owned qualified REIT subsidiaries as “QRSs.” In addition, the following defines certain of the commonly used terms in this report:

•“Agency ARMs” refers to Agency RMBS comprised of adjustable-rate and hybrid adjustable-rate RMBS;

•“Agency fixed-rate” refers to Agency RMBS comprised of fixed-rate RMBS;

•“Agency IOs” refers to Agency RMBS comprised of IO RMBS;

•“Agency RMBS” refers to RMBS representing interests in or obligations backed by pools of mortgage loans issued or guaranteed by a government sponsored enterprise (“GSE”), such as the Federal National Mortgage Association (“Fannie Mae”) or the Federal Home Loan Mortgage Corporation (“Freddie Mac”), or an agency of the U.S. government, such as the Government National Mortgage Association (“Ginnie Mae”);

•“ARMs” refers to adjustable-rate residential mortgage loans;

•“CLO” refers to collateralized loan obligation;

•“CMBS” refers to commercial mortgage-backed securities comprised of commercial mortgage pass-through securities, as well as IO or PO securities that represent the right to a specific component of the cash flow from a pool of commercial mortgage loans;

•“Consolidated K-Series” refers to Freddie Mac-sponsored multi-family loan K-Series securitizations, of which we, or one of our “special purpose entities,” or “SPEs,” own the first loss POs and certain IOs and mezzanine securities;

•“Consolidated VIEs” refers to VIEs where the Company is the primary beneficiary, as it has both the power to direct the activities that most significantly impact the economic performance of the VIE and a right to receive benefits or absorb losses of the entity that could be potentially significant to the VIE;

•“distressed residential loans” refers to pools of performing and re-performing, fixed-rate and adjustable-rate, fully amortizing, interest-only and balloon, seasoned mortgage loans secured by first liens on one- to four-family properties;

•“IOs” refers collectively to interest only and inverse interest only mortgage-backed securities that represent the right to the interest component of the cash flow from a pool of mortgage loans;

•“IO RMBS” refers to RMBS comprised of IOs;

•“multi-family CMBS” refers to CMBS backed by commercial mortgage loans on multi-family properties;

•“CDO” refers to collateralized debt obligation;

•“non-Agency RMBS” refers to RMBS backed by prime jumbo residential mortgage loans, including performing, re-performing and non-performing mortgage loans;

• "non-QM loans" refers to residential mortgage loans that are not deemed "qualified mortgage" or "QM" loans under the rules of the Consumer Financial Protection Bureau;

• "POs" refers to mortgage-backed securities that represent the right to the principal component of the cash flow from a pool of mortgage loans;

• "prime ARM loans" and "residential securitized loans" each refer to prime credit quality residential ARM loans held in our securitization trusts;

60

Table of Contents

- “RMBS” refers to residential mortgage-backed securities comprised of adjustable-rate, hybrid adjustable-rate, fixed-rate, interest only and inverse interest only, and principal only securities;

• “second mortgages” and “second mortgage loans” each refer to liens on residential properties that are subordinate to more senior mortgages or loans; and

• “Variable Interest Entity” or “VIE” refers to an entity in which equity investors do not have the characteristics of a controlling financial interest or do not have sufficient equity at risk for the entity to finance its activities without additional subordinated financial support from other parties.

General

We are a real estate investment trust, or REIT, for federal income tax purposes, in the business of acquiring, investing in, financing and managing primarily mortgage-related and residential-housing related assets. Our objective is to deliver long-term stable distributions to our stockholders over changing economic conditions through a combination of net interest margin and net realized capital gains from a diversified investment portfolio. Our investment portfolio includes certain credit sensitive assets and investments sourced from distressed markets that create the potential for capital gains, as well as more traditional types of mortgage-related investments that generate interest income.

Our investment portfolio includes (i) structured multi-family property investments such as multi-family CMBS and preferred equity in, and mezzanine loans to, owners of multi-family properties, (ii) distressed residential assets such as residential mortgage loans sourced from distressed markets and non-Agency RMBS, (iii) second mortgages, (iv) Agency RMBS and (v) certain other mortgage-related and residential housing-related assets. Subject to maintaining our qualification as a REIT and the maintenance of our exclusion from registration as an investment company under the Investment Company Act of 1940, as amended (the “Investment Company Act”), we also may opportunistically acquire and manage various other types of mortgage-related and residential housing-related assets that we believe will compensate us appropriately for the risks associated with them, including, without limitation, non-QM loans, collateralized mortgage obligations and securities issued by newly originated residential securitizations, including credit sensitive securities from these securitizations.

We intend to maintain our focus on residential and multi-family credit assets, which we believe will benefit from improving credit metrics. Consistent with this approach to capital allocation, we acquired an additional \$139.8 million of residential and multi-family credit assets during the six months ended June 30, 2018. In periods where we have working capital in excess of our short-term liquidity needs, we may invest the excess in more liquid assets, such as Agency RMBS, until such time as we are able to re-invest that capital in credit assets that meet our underwriting requirements. Our investment and capital allocation decisions depend on prevailing market conditions, among other factors, and may change over time in response to opportunities available in different economic and capital market environments.

We seek to achieve a balanced and diverse funding mix to finance our assets and operations. We currently rely primarily on a combination of short-term borrowings, such as repurchase agreements with terms typically of 30 days, longer term repurchase agreement borrowings with terms between one year and 18 months and longer term structured financings, such as securitizations and convertible notes, with terms longer than one year.

We internally manage the assets in our investment portfolio, with the exception of certain distressed residential loans that are managed by Headlands Asset Management LLC (“Headlands”) pursuant to a management agreement. As part of our investment strategy, we may, from time to time, utilize one or more external investment managers to manage specific asset types that we target or own.

Table of Contents

Key Second Quarter 2018 Developments

Common Stock Issuance

We issued and sold 12,145,144 shares of common stock during the quarter ended June 30, 2018 under our at-the-market equity offering program, resulting in net proceeds to the Company of \$73.8 million, after deducting the placement fees.

Residential Mortgage Loan Activity

We acquired residential mortgage loans, including distressed residential mortgage loans and second mortgages, for an aggregate cost of approximately \$78.1 million during the quarter ended June 30, 2018.

Multi-Family Activity

We funded \$27.4 million in preferred equity investments in owners of multi-family properties during the second quarter of 2018.

Second Quarter 2018 Common Stock and Preferred Stock Dividends

On June 18, 2018, our Board of Directors declared a regular quarterly cash dividend of \$0.20 per share of common stock for the quarter ended June 30, 2018. The dividend was paid on July 26, 2018 to our common stockholders of record as of June 28, 2018.

On June 18, 2018, in accordance with the terms of our 7.75% Series B Cumulative Redeemable Preferred Stock ("Series B Preferred Stock"), our Board of Directors declared a Series B Preferred Stock quarterly cash dividend of \$0.484375 per share of Series B Preferred Stock. The dividend was paid on July 15, 2018 to holders of record of our Series B Preferred Stock as of July 1, 2018.

Also on June 18, 2018, in accordance with the terms of our 7.875% Series C Cumulative Redeemable Preferred Stock ("Series C Preferred Stock"), our Board of Directors declared a Series C Preferred Stock quarterly cash dividend of \$0.4921875 per share of Series C Preferred Stock. The dividend was paid on July 15, 2018 to holders of record of our Series C Preferred Stock as of July 1, 2018.

Also on June 18, 2018, in accordance with the terms of our 8.00% Series D Fixed-to-Floating Rate Cumulative Redeemable Preferred Stock ("Series D Preferred Stock"), our Board of Directors declared a Series D Preferred Stock quarterly cash dividend of \$0.50 per share of Series D Preferred Stock. The dividend was paid on July 15, 2018 to holders of record of our Series D Preferred Stock of record as of July 1, 2018.

Subsequent Developments

Internalization of Re-performing and Non-performing Loan Strategy

On August 2, 2018, the Company announced that it had begun the process to internalize the management of its distressed residential loan strategy as part of an effort to expand its capabilities in self managing, sourcing and creating single family residential credit assets. The Company has recently hired ten investment professionals to build and expand its single family residential credit asset platform. The Company expects that the single family residential credit team will ultimately be comprised of 15 to 20 professionals in total. The Company believes the internalization

of the management of the distressed residential loans, as well as expanded capabilities in sourcing and originating will strengthen the Company's ability to capitalize on future credit investment opportunities. As a result of the internalization, the Company expects the nature and amount of its corporate level general and administrative expenses will change substantially. Although the Company believes that expenses related to the increase in employee headcount in connection with the internalization will be substantially offset over time by a reduction in base management and incentive fees, the Company is providing no assurances that the internalization will be successful or that corporate level general and administrative expenses will not be materially adversely affected.

Table of Contents

In connection with the internalization, the Company also announced it provided Headlands with written notice on August 2, 2018 (the “Notice”) that it will not renew its management agreement with Headlands (the “Management Agreement”) at the end of the current term, which is set to expire on June 30, 2019. Headlands has provided investment management services to the Company with respect to its investments in distressed residential loans since 2010. Pursuant to the terms of the Management Agreement, Headlands will continue to manage the loans sourced by it and currently owned by the Company (the “Headlands Loans”) and will be entitled to continue to receive a base management fee, incentive fees (to the extent earned) and certain ancillary fees on such assets until such assets have been liquidated. In addition, in accordance with the Management Agreement, Headlands has an exclusive right of first refusal on an ongoing basis to purchase or arrange for purchase any of the Headlands Loans. The Company anticipates working directly with Headlands in future months to finalize the details around the transition of its services to the Company. As of June 30, 2018, Headlands managed approximately \$404.4 million of Assets (as defined in the Management Agreement) and approximately \$218.1 million million of Equity (as defined in the Management Agreement) under the terms of the Management Agreement.

The internalization represents a continuation of steps taken in recent years by the Company to fully internalize its investment management operations. In May 2016, the Company announced the internalization of its multi-family credit investment platform through the acquisition of RiverBanc LLC. During the second quarter of 2018, the Company completely exited out of its Agency IO strategy, which had been managed externally prior to January 1, 2018.

Table of Contents

Current Market Conditions and Commentary

General. Global and U.S. equity markets performed well during the second quarter of 2018, despite continued volatility and investors' concerns regarding U.S. interest rate increases and global trade restrictions. Consumer confidence remained strong during the quarter. However, emerging markets declined during the quarter, largely as a result of the strength of the U.S. dollar. U.S. economic data released over the past quarter suggests that the U.S. economy has continued to expand, with U.S. gross domestic product ("GDP") estimated to have grown by 4.1% (advance estimate) in the second quarter of 2018, up from GDP growth of 2.0% (revised) for the first quarter of 2018 and 2.9% for the quarter ended December 31, 2017.

The U.S. labor market continued to expand during the second quarter of 2018. According to the U.S. Department of Labor, the U.S. unemployment rate decreased slightly over the quarter, ending at 4.0% as of the end of June 2018. Total nonfarm payroll employment posted an average monthly increase of 206,000 and 211,000 jobs during the three and six months ended June 30, 2018, respectively, as compared to an average monthly increase of 147,000 jobs in 2017.

Federal Reserve and Monetary Policy. In June 2018, in view of realized and expected labor market conditions and inflation, the Federal Reserve again raised the target range for the federal funds rate by 25 basis points to 1.75% to 2.00% and indicated its expectations for additional rate hikes in 2018. The Federal Reserve indicated that in determining the size and timing of future adjustments to the target range for the federal funds rate, it will aim to support strong labor market conditions and medium-term inflation of 2%. Significant uncertainty with respect to the speed at which the Federal Reserve will tighten its monetary policy continues to persist and may result in significant volatility in 2018 and future periods. Greater uncertainty frequently leads to wider asset spreads or lower prices and higher hedging costs.

Single-Family Homes and Residential Mortgage Market. The residential real estate market continued to improve during 2017 and the first quarter of 2018, and initial data from the second quarter of 2018 suggests that trend continued. Data released by S&P Indices for its S&P/Case-Shiller Home Price Indices for May 2018 showed that, on average, home prices increased 6.51% for the 20-City Composite over May 2017. In addition, according to data provided by the U.S. Department of Commerce, privately-owned housing starts for single-family homes averaged a seasonally adjusted annual rate of approximately 900,000 and 895,000 during the three and six months ended June 30, 2018, respectively, as compared to an annual rate of 849,000 for the year ended December 31, 2017. Continued improvement in single-family housing fundamentals is generally expected to have a positive impact on the overall credit profile of our existing portfolio of distressed residential loans.

Multi-Family Housing. Apartments and other residential rental properties performed well in 2017 and have continued to perform solidly to date in 2018. According to data provided by the U.S. Department of Commerce, starts on multi-family homes containing five units or more averaged a seasonally adjusted annual rate of approximately 347,000 and 380,000 during the three and six months ended June 30, 2018, respectively, as compared to 345,000 for the year ended December 31, 2017. Moreover, even with the supply expansion in recent years and concerns that such expansion will lead to higher vacancy rates, vacancy sentiment among multi-family industry participants appears to remain stable. According to the Multifamily Vacancy Index ("MVI"), which is produced by the National Association of Home Builders and surveys the multi-family housing industry's perception of vacancies, the MVI was at 42 for the first quarter of 2018, which is largely in-line with index scores over the prior two years. Strength in the multi-family housing sector has contributed to valuation improvements for multi-family properties and, in turn, many of the multi-family CMBS that we own.

Credit Spreads. Credit spreads continued to tighten during the second quarter of 2018 and this had a positive impact on the value of many of our credit sensitive assets while also resulting in a more challenging current return environment for new investment in many of these asset classes. Tightening credit spreads generally increase the value of many of our credit sensitive assets while widening credit spreads generally decrease the value of these assets.

Financing Markets. During the second quarter of 2018, the bond market experienced moderate volatility with the closing yield of the ten-year U.S. Treasury Note trading between 2.73% and 3.11% during the quarter, closing the

quarter at 2.85%. During the second quarter of 2018, the Treasury curve continued to flatten with the spread between the 2-Year U.S. Treasury yield and the 10-Year U.S. Treasury yield closing to 33 basis points, down 14 basis points from March 31, 2018. This spread is important as it is indicative of opportunities for investing in levered assets.

Table of Contents

Developments at Fannie Mae and Freddie Mac. Payments on the Agency fixed-rate and Agency ARMs RMBS in which we invest are guaranteed by Fannie Mae and Freddie Mac. In addition, although not guaranteed by Freddie Mac, all of our multi-family CMBS has been issued by securitization vehicles sponsored by Freddie Mac and the Agency IOs we invest in are issued by Fannie Mae, Freddie Mac or Ginnie Mae. As broadly publicized, Fannie Mae and Freddie Mac are presently under federal conservatorship as the U.S. Government continues to evaluate the future of these entities and what role the U.S. Government should continue to play in the housing markets in the future. Since being placed under federal conservatorship, there have been a number of proposals introduced, both from industry groups and by the U.S. Congress, relating to changing the role of the U.S. government in the mortgage market and reforming or eliminating Fannie Mae and Freddie Mac. It remains unclear how the U.S. Congress will move forward on such reform at this time and what impact, if any, this reform will have on mortgage REITs. See “Item 1A. Risk Factors-Risks Related to Our Business and Our Company-The federal conservatorship of Fannie Mae and Freddie Mac and related efforts, along with any changes in laws and regulations affecting the relationship between Fannie Mae, Freddie Mac and Ginnie Mae and the U.S. Government, may materially adversely affect our business, financial condition and results of operations, and our ability to pay dividends to our shareholders” in our Annual Report on Form 10-K for the year ended December 31, 2017.

Significant Estimates and Critical Accounting Policies

A summary of our critical accounting policies is included in Item 8 of our Annual Report on Form 10-K for the year ended December 31, 2017 and under “Note 2 – Summary of Significant Accounting Policies” to the consolidated financial statements included therein.

Revenue Recognition. Interest income on our investment securities available for sale is accrued based on the outstanding principal balance and their contractual terms. Purchase premiums or discounts on investment securities are amortized or accreted to interest income over the estimated life of the investment securities using the effective yield method. Adjustments to amortization are made for actual prepayment activity.

Interest income on certain of our credit sensitive securities, such as our CMBS that were purchased at a discount to par value, is recognized based on the security’s effective interest yield. The effective yield on these securities is based on management’s estimate of the projected cash flows from each security, which are estimated based on assumptions related to fluctuations in interest rates, prepayment speeds and the timing and amount of credit losses. On at least a quarterly basis, management reviews and, if appropriate, adjusts its cash flow projections based on input and analysis received from external sources, internal models, and its judgment about interest rates, prepayment rates, the timing and amount of credit losses, and other factors. Changes in cash flows from those originally projected, or from those estimated at the last evaluation, may result in a prospective change in the yield (or interest income) recognized on these securities.

A portion of the purchase discount on the Company’s first loss PO multi-family CMBS is designated as non-accretable purchase discount or credit reserve, which is intended to partially mitigate the Company’s risk of loss on the mortgages collateralizing such multi-family CMBS, and is not expected to be accreted into interest income. The amount designated as a credit reserve may be adjusted over time, based on the actual performance of the security, its underlying collateral, actual and projected cash flow from such collateral, economic conditions and other factors. If the performance of a security with a credit reserve is more favorable than forecasted, a portion of the amount designated as credit reserve may be accreted into interest income over time. Conversely, if the performance of a security with a credit reserve is less favorable than forecasted, the amount designated as credit reserve may be increased, or impairment charges and write-downs of such securities to a new cost basis could be required.

With respect to interest rate swaps that have not been designated as hedges, any net payments under, or fluctuations in the fair value of, such swaps will be recognized in current earnings.

Fair Value. The Company has established and documented processes for determining fair values. Fair value is based upon quoted market prices, where available. If listed prices or quotes are not available, then fair value is based upon internally developed models that primarily use inputs that are market-based or independently-sourced market parameters, including interest rate yield curves. The Company's interest-only CMBS, principal-only CMBS, multi-family loans held in securitization trusts and multi-family CDOs are considered to be the most significant of its fair value estimates.

The Company's valuation methodologies are described in "Note 18 – Fair Value of Financial Instruments" included in Part I, Item 1 of this Quarterly Report on Form 10-Q.

Table of Contents

Residential Mortgage Loans Held in Securitization Trusts – Impaired Loans, net – Impaired residential mortgage loans held in securitization trusts are recorded at amortized cost less specific loan loss reserves. Impaired loan value is based on management’s estimate of the net realizable value taking into consideration local market conditions of the distressed property, updated appraisal values of the property and estimated expenses required to remediate the impaired loan.

Variable Interest Entities – A VIE is an entity that lacks one or more of the characteristics of a voting interest entity. A VIE is defined as an entity in which equity investors do not have the characteristics of a controlling financial interest or do not have sufficient equity at risk for the entity to finance its activities without additional subordinated financial support from other parties. The Company consolidates a VIE when it is the primary beneficiary of such VIE. As primary beneficiary, it has both the power to direct the activities that most significantly impact the economic performance of the VIE and a right to receive benefits or absorb losses of the entity that could be potentially significant to the VIE. The Company is required to reconsider its evaluation of whether to consolidate a VIE each reporting period, based upon changes in the facts and circumstances pertaining to the VIE.

Loan Consolidation Reporting Requirement for Certain Multi-Family K-Series Securitizations – We owned 100% of the first loss PO securities of the Consolidated K-Series. The Consolidated K-Series represent Freddie Mac-sponsored multi-family K-Series securitizations, respectively, of which we, or one of our special purpose entities, or SPEs, own the first loss PO securities, certain IO securities and mezzanine CMBS securities. We determined that the Consolidated K-Series were VIEs and that we are the primary beneficiary of the Consolidated K-Series. As a result, we are required to consolidate the Consolidated K-Series’ underlying multi-family loans including their liabilities, income and expenses in our consolidated financial statements. We have elected the fair value option on the assets and liabilities held within the Consolidated K-Series, which requires that changes in valuations in the assets and liabilities of the Consolidated K-Series be reflected in our consolidated statement of operations.

Fair Value Option – The fair value option provides an election that allows companies to irrevocably elect fair value for financial assets and liabilities on an instrument-by-instrument basis at initial recognition. Changes in fair value for assets and liabilities for which the election is made will be recognized in earnings as they occur. The Company elected the fair value option for its Agency IO strategy, certain of its investments in unconsolidated entities, the Consolidated K-Series and certain acquired residential mortgage loans, including both first and second mortgage loans.

Acquired Distressed Residential Mortgage Loans – Acquired distressed residential mortgage loans that have evidence of deteriorated credit quality at acquisition are accounted for under Accounting Standards Codification (“ASC”) 310-30, Loans and Debt Securities Acquired with Deteriorated Credit Quality (“ASC 310-30”). Management evaluates whether there is evidence of credit quality deterioration as of the acquisition date using indicators such as past due or modified status, risk ratings, recent borrower credit scores and recent loan-to-value percentages. Acquired distressed residential mortgage loans are recorded at fair value at the date of acquisition, with no allowance for loan losses. Under ASC 310-30, the acquired loans may be accounted for individually or aggregated and accounted for as a pool of loans if the loans being aggregated have common risk characteristics. A pool is accounted for as a single asset with a single composite interest rate and an expectation of aggregate cash flows. Once a pool is assembled, it is treated as if it was one loan for purposes of applying the accounting guidance.

Under ASC 310-30, the excess of cash flows expected to be collected over the carrying amount of the loans, referred to as the “accretable yield,” is accreted into interest income over the life of the loans in each pool or individually using a level yield methodology. Accordingly, our acquired distressed residential mortgage loans accounted for under ASC 310-30 are not subject to classification as nonaccrual classification in the same manner as our residential mortgage loans that were not distressed when acquired by us. Rather, interest income on acquired distressed residential mortgage loans relates to the accretable yield recognized at the pool level or on an individual loan basis, and not to contractual interest payments received at the loan level. The difference between contractually required principal and

interest payments and the cash flows expected to be collected, referred to as the “nonaccretable difference,” includes estimates of both the impact of prepayments and expected credit losses over the life of the individual loan, or the pool (for loans grouped into a pool).

Management monitors actual cash collections against its expectations, and revised cash flow expectations are prepared as necessary. A decrease in expected cash flows in subsequent periods may indicate that the loan pool or individual loan, as applicable, is impaired, thus requiring the establishment of an allowance for loan losses by a charge to the provision for loan losses. An increase in expected cash flows in subsequent periods initially reduces any previously established allowance for loan losses by the increase in the present value of cash flows expected to be collected, and results in a recalculation of the amount of accretable yield for the loan pool. The adjustment of accretable yield due to an increase in expected cash flows is accounted for prospectively as a change in estimate. The additional cash flows expected to be collected are reclassified from the nonaccretable difference to the accretable yield, and the amount of periodic accretion is adjusted accordingly over the remaining life of the loans in the pool or individual loan, as applicable. The impacts of (i) prepayments, (ii) changes in variable interest rates, and (iii) any other changes in the timing of expected cash flows are recognized prospectively as adjustments to interest income.

Table of Contents

Business Combinations - The Company evaluates each purchase transaction to determine whether the acquired assets meet the definition of a business. The Company accounts for business combinations by applying the acquisition method in accordance with ASC 805, Business Combinations. Transaction costs related to acquisition of a business are expensed as incurred and excluded from the fair value of consideration transferred. The identifiable assets acquired, liabilities assumed and non-controlling interests, if any, in an acquired entity are recognized and measured at their estimated fair values. The excess of the fair value of consideration transferred over the fair values of identifiable assets acquired, liabilities assumed and non-controlling interests, if any, in an acquired entity, net of fair value of any previously held interest in the acquired entity, is recorded as goodwill. Such valuations require management to make significant estimates and assumptions, especially with respect to intangible assets and liabilities.

Contingent consideration is classified as a liability or equity, as applicable. Contingent consideration in connection with the acquisition of a business is measured at fair value on acquisition date, and unless classified as equity, is remeasured at fair value each reporting period thereafter until the consideration is settled, with changes in fair value included in net income.

Net cash paid to acquire a business is classified as investing activities on the accompanying condensed consolidated statements of cash flows.

Recent Accounting Pronouncements

A discussion of recent accounting pronouncements and the possible effects on our financial statements is included in “Note 2 — Summary of Significant Accounting Policies” included in Part I, Item 1 of this Quarterly Report on Form 10-Q.

Capital Allocation

The following tables set forth our allocated capital by investment type at June 30, 2018 and December 31, 2017, respectively (dollar amounts in thousands):

At June 30, 2018:

	Agency RMBS ⁽¹⁾	Multi- Family ⁽²⁾	Distressed Residential ⁽³⁾	Other ⁽⁴⁾	Total
Carrying value	\$1,101,344	\$875,563	\$445,353	\$154,405	\$2,576,665
Liabilities:					
Callable ⁽⁵⁾	(874,917)	(295,294)	(164,149)	(37,834)	(1,372,194)
Non-callable	—	(29,628)	(31,398)	(107,198)	(168,224)
Convertible	—	—	—	(129,738)	(129,738)
Hedges (Net) ⁽⁶⁾	10,543	—	—	—	10,543
Cash ⁽⁷⁾	11,015	15,000	5,423	58,973	90,411
Goodwill	—	—	—	25,222	25,222
Other	2,512	(8,219)	17,305	(28,082)	(16,484)
Net capital allocated	\$250,497	\$557,422	\$272,534	\$(64,252)	\$1,016,201
% of capital allocated	24.6	% 54.9	% 26.8	% (6.3)	% 100.0

(1) Includes Agency fixed-rate RMBS and Agency ARMs.

The Company, through its ownership of certain securities, has determined it is the primary beneficiary of the

(2) Consolidated K-Series and has consolidated the Consolidated K-Series into the Company's condensed consolidated financial statements. A reconciliation to our financial statements as of June 30, 2018 follows:

Multi-family loans held in securitization trusts, at fair value	\$9,345,360
Multi-family CDOs, at fair value	(8,838,841)
Net carrying value	506,519
Investment securities available for sale, at fair value	134,614
Total CMBS, at fair value	641,133
Preferred equity investments, mezzanine loans and investments in unconsolidated entities	217,111
Real estate under development	20,337
Real estate held for sale in consolidated variable interest entities	29,502
Mortgages and notes payable in consolidated variable interest entities	(32,520)
Financing arrangements, portfolio investments	(295,294)
Securitized debt	(29,628)
Cash and other	6,781
Net Capital in Multi-Family	\$557,422

(3) Includes \$290.6 million of distressed residential mortgage loans, \$96.9 million of distressed residential mortgage loans, at fair value and \$54.1 million of non-Agency RMBS backed by re-performing and non-performing loans. Other includes residential mortgage loans held in securitization trusts amounting to \$66.0 million, residential second mortgage loans, at fair value of \$72.3 million, investments in unconsolidated entities amounting to \$13.3

(4) million and mortgage loans held for sale and mortgage loans held for investment totaling \$2.8 million. Mortgage loans held for sale and mortgage loans held for investment are included in the Company's accompanying condensed consolidated balance sheets in receivables and other assets. Other non-callable liabilities consist of \$45.0 million in subordinated debentures and \$62.2 million in residential collateralized debt obligations.

(5) Includes repurchase agreements.

(6) Includes derivative assets and variation margin.

Includes \$5.4 million in deposits held in our distressed residential securitization trusts to be used to pay down
(7) outstanding debt. These deposits are included in the Company's accompanying condensed consolidated balance sheets in receivables and other assets.

(1) Includes Agency fixed-rate RMBS, Agency ARMs and Agency IOs.

The Company, through its ownership of certain securities, has determined it is the primary beneficiary of the

(2) Consolidated K-Series and has consolidated the Consolidated K-Series into the Company's condensed consolidated financial statements. A reconciliation to our financial statements as of December 31, 2017 follows:

Multi-family loans held in securitization trusts, at fair value	\$9,657,421
Multi-family CDOs, at fair value	(9,189,459)
Net carrying value	467,962
Investment securities available for sale, at fair value	141,420
Total CMBS, at fair value	609,382
Preferred equity investments, mezzanine loans and investment in unconsolidated entities	177,440
Real estate under development	22,904
Real estate held for sale in consolidated variable interest entities	64,202
Mortgages and notes payable in consolidated variable interest entities	(57,124)
Financing arrangements, portfolio investments	(309,935)
Securitized debt	(29,164)
Cash and other	(2,505)
Net Capital in Multi-family	\$475,200

(3) Includes \$331.5 million of distressed residential mortgage loans, \$36.9 million of distressed residential mortgage loans, at fair value and \$101.9 million of non-Agency RMBS backed by re-performing and non-performing loans.

Other includes residential mortgage loans held in securitization trusts amounting to \$73.8 million, residential second mortgage loans, at fair value of \$50.2 million, investments in unconsolidated entities amounting to \$12.6 million and mortgage loans held for sale and mortgage loans held for investment totaling \$3.5 million. Mortgage loans held for sale and mortgage loans held for investment are included in the Company's accompanying condensed consolidated balance sheets in receivables and other assets. Other non-callable liabilities consist of \$45.0 million in subordinated debentures and \$70.3 million in residential collateralized debt obligations.

(5) Includes repurchase agreements.

(6) Includes derivative assets, derivative liabilities, payable for securities purchased and variation margin.

Includes \$0.5 million held in overnight deposits related to our Agency IO investments and \$9.6 million in deposits

(7) held in our distressed residential securitization trusts to be used to pay down outstanding debt. These deposits are included in the Company's accompanying condensed consolidated balance sheets in receivables and other assets.

Results of Operations

Comparison of the Three and Six Months Ended June 30, 2018 to the Three and Six Months Ended June 30, 2017

For the three and six months ended June 30, 2018, we reported net income attributable to the Company's common stockholders of \$23.8 million and \$47.5 million, respectively, as compared to net income attributable to the Company's common stockholders of \$11.1 million and \$27.1 million for the same respective periods in 2017. The main components of the change in net income for the three and six months ended June 30, 2018 as compared to the same periods in 2017 are detailed in the following table (dollar amounts in thousands, except per share data):

	Three Months Ended			Six Months Ended		
	June 30, 2018	2017	\$ Change	June 30, 2018	2017	\$ Change
Net interest income	\$17,500	\$15,708	\$1,792	\$37,251	\$29,626	\$7,625
Total other income	\$20,007	\$8,172	\$11,835	\$40,961	\$24,877	\$16,084
Total general, administrative and operating expenses	\$8,769	\$11,589	\$(2,820)	\$17,467	\$21,793	\$(4,326)
Income from operations before income taxes	\$28,738	\$12,291	\$16,447	\$60,745	\$32,710	\$28,035
Income tax (benefit) expense	\$(13)	\$442	\$(455)	\$(92)	\$1,680	\$(1,772)
Net income attributable to Company	\$29,694	\$14,336	\$15,358	\$59,311	\$33,517	\$25,794
Preferred stock dividends	\$5,925	\$3,225	\$2,700	\$11,850	\$6,450	\$5,400
Net income attributable to Company's common stockholders	\$23,769	\$11,111	\$12,658	\$47,461	\$27,067	\$20,394
Basic earnings per common share	\$0.21	\$0.10	\$0.11	\$0.42	\$0.24	\$0.18
Diluted earnings per common share	\$0.20	\$0.10	\$0.10	\$0.40	\$0.24	\$0.16

Net Interest Income

The increase in net interest income of approximately \$1.8 million for the three months ended June 30, 2018 as compared to the corresponding period in 2017 was primarily driven by:

An increase in net interest income of approximately \$2.2 million in our multi-family portfolio primarily due to an increase in average interest earning assets to \$639.6 million for the three months ended June 30, 2018 as compared to \$529.3 million for the three months ended June 30, 2017. The increase in average interest earning assets is attributable to new multi-family preferred equity investments and CMBS purchased since June 30, 2017.

An increase in net interest income of approximately \$2.5 million in our Agency RMBS portfolio primarily due to an increase in average interest earning assets to \$1.2 billion for the three months ended June 30, 2018 as compared to \$485.2 million for the three months ended June 30, 2017.

A decrease in net interest income of approximately \$2.7 million in our distressed residential portfolio primarily due to a decrease in average interest earning assets to \$453.4 million for the three months ended June 30, 2018 from \$621.9 million for three months ended June 30, 2017.

The increase in net interest income of approximately \$7.6 million for the six months ended June 30, 2018 as compared to the corresponding period in 2017 was primarily driven by:

An increase in net interest income of approximately \$5.0 million in our multi-family portfolio primarily due to an increase in average interest earning assets to \$630.6 million for the six months ended June 30, 2018 as compared to \$493.6 million for the six months ended June 30, 2017. The increase in average interest earning assets is attributable to new multi-family preferred equity investments and CMBS purchased since June 30, 2017.

An increase in net interest income of approximately \$4.8 million in our Agency RMBS portfolio primarily due to an increase in average interest earning assets to \$1.2 billion for the six months ended June 30, 2018 as compared to \$507.3 million for the six months ended June 30, 2017.

A decrease in net interest income of approximately \$1.6 million in our distressed residential portfolio primarily due to a decrease in average interest earning assets to \$460.7 million for the six months ended June 30, 2018 as compared to \$641.8 million for the six months ended June 30, 2017.

70

Table of Contents

Other Income

The increase in other income of approximately \$11.8 million for the three months ended June 30, 2018 as compared to the corresponding period in 2017 was primarily driven by:

An increase in net unrealized gains on multi-family loans and debt held in securitization trusts of \$10.6 million for the three months ended June 30, 2018 as compared to the corresponding period in 2017, primarily due to an increase in multi-family CMBS owned by us as compared to the corresponding period in 2017 and tightening of credit spreads. An increase in net unrealized gains on investment securities and related hedges of \$13.7 million for the three months ended June 30, 2018 as compared to the prior year period primarily due to unrealized gains on interest rate swaps accounted for as trading instruments and reversal of unrealized losses on Agency IO securities sold during the 2018 period.

An increase in net realized loss on investment securities and related hedges of \$9.8 million primarily related to the continued liquidation of our Agency IO portfolio.

A decrease in income from operating real estate and real estate held for sale in consolidated variable interest entities of \$1.1 million related to the de-consolidation of Riverchase Landing due to its sale in March 2018.

A decrease in other income of \$2.1 million related to the impairment loss recognized on the real estate development property owned through the Company's 50% interest in an entity that owns and develops land and residential homes in Kiawah Island, SC. The Company's \$2.1 million impairment loss is partially offset by \$1.0 million non-controlling interest share of the loss.

The increase in other income of approximately \$16.1 million for the six months ended June 30, 2018 as compared to the corresponding period in 2017 was primarily driven by:

An increase in net unrealized gains on multi-family loans and debt held in securitization trusts of \$16.7 million for the six months ended June 30, 2018 as compared to the corresponding period in 2017, primarily due to the increase in multi-family CMBS owned by us as compared to the corresponding period in 2017 and tightening of credit spreads.

An increase in net unrealized gains on investment securities and related hedges of \$23.8 million for the six months ended June 30, 2018 as compared to the prior period primarily due to unrealized gains on interest rate swaps accounted for as trading instruments and reversal of unrealized losses on Agency IO securities sold during the period.

An increase in net realized loss on investment securities and related hedges of \$12.0 million primarily related to the continued liquidation of our Agency IO portfolio.

A decrease in realized gains on distressed residential mortgage loans of \$13.1 million as a result of limited loan sale activity in the six months ended June 30, 2018 as compared to the corresponding period in 2017.

Table of Contents

For the three months ended June 30, 2018 as compared to the corresponding period in 2017, general, administrative and operating expenses decreased by \$2.8 million. The decrease was primarily driven by a \$3.5 million reduction in expenses related to operating real estate and real estate held for sale in consolidated variable interest entities as a result of cessation of depreciation and amortization expense on real estate held for sale in Consolidated VIEs subsequent to June 30, 2017 and the de-consolidation of Riverchase Landing due to its sale in March 2018.

For the six months ended June 30, 2018 as compared to the corresponding period in 2017, general, administrative and operating expenses decreased by \$4.3 million. The decrease was partially driven by a \$1.9 million reduction in expenses related to operating real estate and real estate held for sale in consolidated variable interest entities as a result of cessation of depreciation and amortization expense on real estate held for sale in Consolidated VIEs subsequent to June 30, 2017 and the de-consolidation of Riverchase Landing due to its sale in March 2018. The decrease was also driven by a \$1.3 million reduction in base management and incentive fees due to a decrease in sales activity related to our distressed residential mortgage loans and termination of an external management agreement related to our Agency IO investments.

The decrease in expenses related to distressed residential mortgage loans for the six months ended June 30, 2018 as compared to the same period in 2017 can be attributed to a decrease in loan count as well as decreases in appraisal costs incurred during the 2018 period as compared to the same period in 2017.

Quarterly Comparative Portfolio Net Interest Margin

Our results of operations for our investment portfolio during a given period typically reflect, in large part, the net interest income earned on our investment portfolio of RMBS, CMBS (including CMBS held in securitization trusts), residential securitized loans, distressed residential mortgage loans (including distressed residential mortgage loans held in securitization trusts), loans held for investment, second mortgages, preferred equity investments and mezzanine loans, where the risks and payment characteristics are equivalent to and accounted for as loans, and loans held for sale (collectively, our "Interest Earning Assets"). The net interest spread is impacted by factors such as our cost of financing, the interest rate that our investments bear and our interest rate hedging strategies. Furthermore, the amount of premium or discount paid on purchased portfolio investments and the prepayment rates on portfolio investments will impact the net interest spread as such factors will be amortized over the expected term of such investments. Realized and unrealized gains and losses on TBAs, Eurodollar and Treasury futures and other derivatives associated with our Agency RMBS investments, which do not utilize hedge accounting for financial reporting purposes, are included in other income in our statement of operations, and therefore, not reflected in the data set forth below.

The following tables set forth certain information about our portfolio by investment type and their related interest income, interest expense, weighted average yield on interest earning assets, average cost of funds and portfolio net interest margin for our interest earning assets (by investment type) for the three and six months ended June 30, 2018 and 2017, respectively (dollar amounts in thousands):

Table of Contents

(1) Includes Agency fixed-rate RMBS, Agency ARMs and Agency IOs.

The Company, through its ownership of certain securities, has determined it is the primary beneficiary of the Consolidated K-Series and has consolidated the Consolidated K-Series into the Company's condensed consolidated financial statements. Interest income amounts represent interest income earned by securities that are actually owned by the Company. A reconciliation of our net interest income in multi-family investments to our condensed consolidated financial statements for the three and six months ended June 30, 2018 and 2017, respectively, is set forth below (dollar amounts in thousands):

	Three Months Ended June 30,		Six Months Ended June 30,	
	2018	2017	2018	2017
Interest income, multi-family loans held in securitization trusts	\$85,629	\$75,752	\$170,721	\$137,056
Interest income, investment securities, available for sale ^(a)	2,474	2,716	4,908	5,226
Interest income, preferred equity investments and mezzanine loans ^(a)	4,862	3,092	9,307	6,162
Interest expense, multi-family collateralized debt obligation	(74,686)	(66,873)	(149,165)	(120,805)
Interest income, Multi-Family, net	18,279	14,687	35,771	27,639
Interest expense, investment securities, available for sale	(3,365)	(1,954)	(6,536)	(3,468)
Interest expense, securitized debt	(724)	(703)	(1,443)	(1,402)
Net interest income, Multi-Family	\$14,190	\$12,030	\$27,792	\$22,769

(a) Included in the Company's accompanying condensed consolidated statements of operations in interest income, investment securities and other.

(3) Average Interest Earning Assets for the periods indicated exclude all Consolidated K-Series assets other than those securities actually owned by the Company.

(4) Our Average Interest Earning Assets is calculated each quarter based on daily average amortized cost for the respective periods.

(5) Our Weighted Average Yield on Interest Earning Assets was calculated by dividing our annualized interest income by our Average Interest Earning Assets for the respective periods.

Our Average Cost of Funds was calculated by dividing our annualized interest expense by our average interest bearing liabilities, excluding our subordinated debentures and convertible notes, for the respective periods. In the three months ended June 30, 2018, our subordinated debentures and convertible notes generated interest expense of approximately \$0.7 million and \$2.7 million, respectively. In the six months ended June 30, 2018, our subordinated debentures and convertible notes generated interest expense of approximately \$1.3 million and \$5.3 million, respectively. In the three months ended June 30, 2017, our subordinated debentures and convertible notes generated interest expense of approximately \$0.6 million and \$2.6 million, respectively. In the six months ended June 30, 2017, our subordinated debentures and convertible notes generated interest expense of approximately \$1.1 million and \$4.6 million, respectively. Our Average Cost of Funds includes interest expense on our interest rate swaps and amortization of premium on our swaptions.

(7) Portfolio Net Interest Margin is the difference between our Weighted Average Yield on Interest Earning Assets and our Average Cost of Funds, excluding the Weighted Average Cost of subordinated debentures and convertible notes.

Table of Contents

Prepayment History

The following table sets forth the actual constant prepayment rates (“CPR”) for selected asset classes, by quarter, for the quarterly periods indicated:

Quarter Ended	Agency Fixed-Rate RMBS	Agency ARMs	Agency IOs	Residential Securizations
June 30, 2018	5.9 %	16.3 %	13.2 %	20.1 %
March 31, 2018	5.4 %	10.2 %	10.2 %	10.8 %
December 31, 2017	6.3 %	12.9 %	17.8 %	22.1 %
September 30, 2017	12.8 %	9.4 %	17.4 %	18.2 %
June 30, 2017	9.6 %	16.5 %	17.5 %	16.8 %
March 31, 2017	10.6 %	8.3 %	15.9 %	5.1 %
December 31, 2016	12.3 %	21.7 %	19.4 %	11.1 %
September 30, 2016	10.0 %	20.7 %	18.2 %	15.9 %
June 30, 2016	10.2 %	17.6 %	15.6 %	17.8 %

When prepayment expectations over the remaining life of assets increase, we have to amortize premiums over a shorter time period resulting in a reduced yield to maturity on our investment assets. Conversely, if prepayment expectations decrease, the premium would be amortized over a longer period resulting in a higher yield to maturity. In addition, the market values and cash flows from Agency IOs can be materially adversely affected during periods of elevated prepayments. During the second quarter of 2018, the Company completely exited out of its Agency IO portfolio. We monitor our prepayment experience on a monthly basis and adjust the amortization rate to reflect current market conditions.

Financial Condition

As of June 30, 2018, we had approximately \$11.6 billion of total assets, as compared to approximately \$12.1 billion of total assets as of December 31, 2017. A significant portion of our assets represents the assets comprising the Consolidated K-Series, which we consolidate in accordance with GAAP. As of June 30, 2018 and December 31, 2017, the Consolidated K-Series assets amounted to approximately \$9.4 billion and \$9.7 billion, respectively. See "Significant Estimates and Critical Accounting Policies—Loan Consolidation Reporting Requirement for Certain Multi-Family K-Series Securitizations" in this Quarterly Report on Form 10-Q.

Balance Sheet Analysis

Investment Securities Available for Sale. At June 30, 2018, our securities portfolio includes Agency RMBS, including Agency fixed-rate and Agency ARMs, CMBS, and non-Agency RMBS, which are classified as investment securities available for sale. At June 30, 2018, we had no investment securities in a single issuer or entity that had an aggregate book value in excess of 10% of our total assets. The decrease in the carrying value of our investment securities available for sale as of June 30, 2018 as compared to December 31, 2017 is primarily related to sales of Agency IOs, principal payments and unrealized losses.

The following tables set forth the balances of our investment securities available for sale by vintage (i.e., by issue year) as of June 30, 2018 and December 31, 2017, respectively (dollar amounts in thousands):

Table of Contents

Residential Mortgage Loans.

Residential Mortgage Loans Held in Securitization Trusts, Net

Included in our portfolio are prime ARM loans that we originated or purchased in bulk from third parties that met our investment criteria and portfolio requirements and that we subsequently securitized in 2005.

At June 30, 2018, residential mortgage loans held in securitization trusts totaled approximately \$66.0 million. The Company's net investment in the residential securitization trusts, which is the maximum amount of the Company's investment that is at risk to loss and represents the difference between the carrying amount of (i) the ARM loans, real estate owned and receivables held in residential securitization trusts and (ii) the amount of Residential CDOs outstanding, was \$4.9 million. Of the residential mortgage loans held in securitization trusts, 100% are traditional ARMs or hybrid ARMs, 81.5% of which are ARM loans that are interest only at the time of origination. With respect to the hybrid ARMs included in these securitizations, interest rate reset periods were predominately five years or less and the interest-only period is typically nine years, which mitigates the "payment shock" at the time of interest rate reset. None of the residential mortgage loans held in securitization trusts are pay option-ARMs or ARMs with negative amortization. As of June 30, 2018, the interest only period for the interest only ARM loans included in these securitizations has ended.

The following table details our residential mortgage loans held in securitization trusts at June 30, 2018 and December 31, 2017, respectively (dollar amounts in thousands):

	Number of Loans	Unpaid Principal	Carrying Value
June 30, 2018	218	\$ 69,451	\$ 66,047
December 31, 2017	240	\$ 77,519	\$ 73,820

Characteristics of Our Residential Mortgage Loans Held in Securitization Trusts:

The following table sets forth the composition of our residential mortgage loans held in securitization trusts as of June 30, 2018 and December 31, 2017, respectively (dollar amounts in thousands):

	June 30, 2018			December 31, 2017

Table of Contents

Residential Mortgage Loans, at Fair Value

Residential mortgage loans, at fair value, include both first lien distressed residential loans and second mortgages that are presented at fair value on the Company's condensed consolidated balance sheets. Subsequent changes in fair value are reported in current period earnings and presented in net gain (loss) on residential mortgage loans at fair value on the Company's condensed consolidated statements of operations.

The following table details our residential mortgage loans, at fair value at June 30, 2018 and December 31, 2017, respectively (dollar amounts in thousands):

	Distressed Residential Loans			Residential Second Mortgages		
	Number of Loans	Unpaid Principal Value	Fair Value	Number of Loans	Unpaid Principal Value	Fair Value
June 30, 2018	538	\$104,145	\$96,903	1,165	\$71,130	\$72,294
December 31, 2017	201	\$42,789	\$36,914	766	\$49,316	\$50,239

Distressed residential mortgage loans and second mortgages with a fair value of approximately \$117.4 million and \$44.2 million at June 30, 2018 and December 31, 2017, respectively, are pledged as collateral for master repurchase agreements with Deutsche Bank AG, Cayman Islands Branch.

Acquired Distressed Residential Mortgage Loans. Distressed residential mortgage loans are comprised of pools of fixed and adjustable rate residential mortgage loans acquired by the Company at a discount, with evidence of credit deterioration since their origination and where it is probable that the Company will not collect all contractually required principal payments. Management evaluates whether there is evidence of credit quality deterioration as of the acquisition date using indicators such as past due or modified status, risk ratings, recent borrower credit scores and recent loan-to-value percentages. Distressed residential mortgage loans held in securitization trusts are distressed residential mortgage loans transferred to Consolidated VIEs that have been securitized into beneficial interests.

The following table details our portfolio of distressed residential mortgage loans at carrying value, including those distressed residential mortgage loans held in securitization trusts, at June 30, 2018 and December 31, 2017, respectively (dollar amounts in thousands):

	Number of Loans	Unpaid Principal	Carrying Value
June 30, 2018	3,381	\$310,498	\$290,645
December 31, 2017	3,729	\$355,998	\$331,464

The Company's distressed residential mortgage loans held in securitization trusts with a carrying value of approximately \$105.9 million and \$121.8 million at June 30, 2018 and December 31, 2017, respectively, are pledged as collateral for certain of the securitized debt issued by the Company. The Company's net investment in these securitization trusts, which is the maximum amount of the Company's investment that is at risk to loss and represents the difference between the carrying amount of the net assets and liabilities associated with the distressed residential mortgage loans held in securitization trusts, was \$85.1 million and \$81.9 million at June 30, 2018 and December 31, 2017, respectively.

In addition, distressed residential mortgage loans with a carrying value of approximately \$160.6 million and \$182.6 million at June 30, 2018 and December 31, 2017, respectively, are pledged as collateral for a master repurchase agreement with Deutsche Bank AG, Cayman Islands Branch.

Table of Contents

Consolidated K-Series. As of June 30, 2018 and December 31, 2017, we owned 100% of the first loss securities of the Consolidated K-Series. The Consolidated K-Series are comprised of multi-family mortgage loans held in seven Freddie Mac-sponsored multi-family K-Series securitizations as of June 30, 2018 and December 31, 2017, of which we, or one of our SPEs, own the first loss securities and, in certain cases, IOs and/or mezzanine securities. We determined that the securitizations comprising the Consolidated K-Series were VIEs and that we are the primary beneficiary of these securitizations. Accordingly, we are required to consolidate the Consolidated K-Series' underlying multi-family loans and related debt, income and expense in our condensed consolidated financial statements.

We have elected the fair value option on the assets and liabilities held within the Consolidated K-Series, which requires that changes in valuations in the assets and liabilities of the Consolidated K-Series be reflected in our condensed consolidated statements of operations. As of June 30, 2018 and December 31, 2017, the Consolidated K-Series were comprised of \$9.3 billion and \$9.7 billion, respectively, in multi-family loans held in securitization trusts and \$8.8 billion and \$9.2 billion, respectively, in multi-family CDOs, with a weighted average interest rate of 4.05% and 3.92%, respectively. As a result of the consolidation of the Consolidated K-Series, our condensed consolidated statements of operations for the three and six months ended June 30, 2018 included interest income of \$85.6 million and \$170.7 million, respectively, and interest expense of \$74.7 million and \$149.2 million, respectively. Also, we recognized a \$12.0 million and a \$19.6 million unrealized gain in the condensed consolidated statements of operations for the three and six months ended June 30, 2018, respectively, as a result of the fair value accounting method election. As a result of the consolidation of the Consolidated K-Series, our condensed consolidated statements of operations for the three and six months ended June 30, 2017 included interest income of \$75.8 million and \$137.1 million, respectively, and interest expense of \$66.9 million and \$120.8 million, respectively. Also, we recognized a \$1.4 million and a \$2.8 million unrealized gain in the condensed consolidated statements of operations for the three and six months ended June 30, 2017, respectively, as a result of the fair value accounting method election.

We do not have any claims to the assets (other than those securities represented by our first loss and mezzanine securities) or obligations for the liabilities of the Consolidated K-Series. Our investment in the Consolidated K-Series is limited to the multi-family CMBS comprised of first loss PO, and, in certain cases, IOs and/or mezzanine securities, issued by these K-Series securitizations with an aggregate net carrying value of \$506.5 million and \$468.0 million as of June 30, 2018 and December 31, 2017, respectively.

Multi-Family CMBS Loan Characteristics:

The following table details the loan characteristics of the loans that back the multi-family CMBS (including the Consolidated K-Series) in our portfolio as of June 30, 2018 and December 31, 2017, respectively (dollar amounts in thousands, except as noted):

	June 30, 2018	December 31, 2017

Table of Contents

Investment in Unconsolidated Entities. Investment in unconsolidated entities is comprised of ownership interests in entities that invest in multi-family or residential real estate and related assets. As of June 30, 2018 and December 31, 2017, we had approximately \$53.7 million and \$51.1 million of investments in unconsolidated entities, respectively.

On March 31, 2017, the Company reconsidered its evaluation of its variable interest in 200 RHC Hoover, LLC ("Riverchase Landing"), a multi-family apartment community in which the Company held a preferred equity investment, and determined that it became the primary beneficiary of Riverchase Landing. Accordingly, on this date, the Company consolidated Riverchase Landing into its condensed consolidated financial statements and decreased its investment in unconsolidated entities by approximately \$9.0 million. In March 2018, Riverchase Landing completed the sale of its multi-family apartment community and redeemed the Company's preferred equity investment. See Note 10 to our condensed consolidated financial statements included in this report for more information on Riverchase Landing.

Preferred Equity and Mezzanine Loan Investments. The Company had preferred equity and mezzanine loan investments in the amount of \$176.7 million and \$138.9 million as of June 30, 2018 and December 31, 2017, respectively.

On March 31, 2017, the Company reconsidered its evaluation of its variable interest in The Clusters, LLC ("The Clusters"), a multi-family apartment community in which the Company holds a preferred equity investment, and determined that it became the primary beneficiary of The Clusters. Accordingly, on this date, the Company consolidated The Clusters into its condensed consolidated financial statements, resulting in a decrease in preferred equity investments of approximately \$3.5 million. See Note 10 to our condensed consolidated financial statements included in this report for more information on The Clusters.

As of June 30, 2018, all preferred equity and mezzanine loan investments were paying in accordance with their contractual terms. During the three and six months ended June 30, 2018, there were no impairments with respect to our preferred equity and mezzanine loan investments. As of June 30, 2018, the Company is committed to fund an additional \$2.8 million of preferred equity on an existing investment.

The following tables summarize our preferred equity and mezzanine loan investments as of June 30, 2018 and December 31, 2017 (dollars in thousands):

	June 30, 2018		Weighted Average Interest or Preferred Return Rate ⁽²⁾	Weighted Average Remaining Life (Years)
	Carrying Amount ⁽¹⁾	Investment Amount ⁽¹⁾		
Preferred equity investments	22 \$170,110	\$ 171,711	12.03 %	6.7
Mezzanine loans	3 6,631	6,661	12.91 %	6.4
Total	25 \$176,741	\$ 178,372	12.06 %	6.7
	December 31, 2017		Weighted Average Interest or Preferred Return Rate ⁽²⁾	Weighted Average Remaining Life (Years)
	Carrying Amount ⁽¹⁾	Investment Amount ⁽¹⁾		
Preferred equity investments	20 \$132,009	\$ 133,618	12.02 %	6.6

Edgar Filing: NEW YORK MORTGAGE TRUST INC - Form 10-Q

Mezzanine loans	3	6,911	6,942	12.95	%	6.8
Total	23	\$138,920	\$140,560	12.07	%	6.6

- (1) The difference between the carrying amount and the investment amount consists of any unamortized premium or discount, deferred fees, or deferred expenses.
- (2) Based upon investment amount and contractual interest or preferred return rate.

Total	100.0 %	100.0 %

Real Estate Held for Sale in Consolidated VIEs. On March 31, 2017, the Company re-evaluated its variable interests in Riverchase Landing and The Clusters and, as a result of the reconsideration, consolidated Riverchase Landing and The Clusters into its condensed consolidated financial statements.

During the second quarter of 2017, Riverchase Landing determined to actively market its multi-family apartment community for sale. Accordingly, the Company classified the real estate assets held by Riverchase Landing in the amount of \$34.9 million as held for sale as of December 31, 2017 in the accompanying condensed consolidated balance sheets. In March 2018, Riverchase Landing completed the sale of its multi-family apartment community and redeemed the Company's preferred equity investment. The Company de-consolidated Riverchase Landing as of the date of the sale.

During the third quarter of 2017, The Clusters determined to actively market its multi-family apartment community for sale, with anticipation of completing a sale to a third party buyer in 2018. As a result, the Company classified the real estate assets held by The Clusters in the amount of \$29.5 million and \$29.3 million as real estate held for sale in consolidated variable interest entities as of June 30, 2018 and December 31, 2017, respectively.

No gain or loss was recognized by the Company or allocated to non-controlling interests related to the classification of the real estate assets to held for sale.

Financing Arrangements, Portfolio Investments. The Company finances its portfolio investments primarily through repurchase agreements with third party financial institutions. These financing arrangements are short-term borrowings that bear interest rates typically based on a spread to LIBOR and are secured by the securities which they finance.

As of June 30, 2018, the Company had repurchase agreements with an outstanding balance of \$1.2 billion and a weighted average interest rate of 2.76%. At December 31, 2017, the Company had repurchase agreements with an outstanding balance of \$1.3 billion and a weighted average interest rate of 2.18%. Our repurchase agreements have a weighted average days to maturity of 57 days.

At June 30, 2018, the Company's only exposures where the amount at risk was in excess of 5% of the Company's stockholders' equity was to Deutsche Bank AG, London Branch and Jefferies & Company, Inc. at 6.8% and 5.2%, respectively. At December 31, 2017, the Company's only exposure where the amount at risk was in excess of 5% of the Company's stockholders' equity was to Deutsche Bank AG, London Branch at 5.0%. The amount at risk is defined as the fair value of securities pledged as collateral to the financing arrangement in excess of the financing arrangement liability.

As of June 30, 2018, the outstanding balance under our repurchase agreements was funded at an advance rate of 90.2% that implies an average haircut of 9.8%. As of December 31, 2017, the outstanding balance under our repurchase agreements was funded at an advance rate of 90.0% that implies an average haircut of 10.0%. The weighted average "haircut" related to our repurchase agreement financing for our Agency RMBS, non-Agency RMBS, and CMBS was approximately 5%, 25%, and 25%, respectively, at June 30, 2018.

The following table details the quarterly average balance, ending balance and maximum balance at any month-end during each quarter in 2018, 2017 and 2016 for our repurchase agreement borrowings (dollar amounts in thousands):

83

Table of Contents

Quarter Ended	Quarterly Average Balance	End of Quarter Balance	Maximum Balance at any Month-End
June 30, 2018	\$1,230,648	\$1,179,961	\$1,279,121
March 31, 2018	\$1,287,939	\$1,287,314	\$1,297,949
December 31, 2017	\$1,224,771	\$1,276,918	\$1,276,918
September 30, 2017	\$624,398	\$608,304	\$645,457
June 30, 2017	\$688,853	\$656,350	\$719,222
March 31, 2017	\$702,675	\$702,309	\$762,382

June 30, 2016	\$615,930	\$618,050	\$642,536
March 31, 2016	\$576,822	\$589,919	\$589,919

Financing Arrangements, Residential Mortgage Loans. The Company has a master repurchase agreement with Deutsche Bank AG, Cayman Islands Branch with a maximum aggregate committed principal amount of \$100.0 million and a maximum uncommitted principal amount of \$150.0 million to fund distressed residential mortgage loans, expiring on June 8, 2019. The outstanding balance on this master repurchase agreement as of June 30, 2018 and December 31, 2017 amounts to approximately \$154.6 million and \$123.6 million, respectively, bearing interest at one-month LIBOR plus 2.40% and 2.50%, respectively (4.49% and 4.05% at June 30, 2018 and December 31, 2017, respectively). Distressed residential mortgage loans with a carrying value of approximately \$214.2 million at June 30, 2018 are pledged as collateral for the borrowings under this master repurchase agreement. The Company expects to roll outstanding borrowings under this master repurchase agreement into a new repurchase agreement or other financing prior to or at maturity.

On November 25, 2015, the Company entered into a master repurchase agreement with Deutsche Bank AG, Cayman Islands Branch in an aggregate principal amount of up to \$100.0 million to fund the purchase of residential mortgage loans, particularly second mortgage loans, expiring on May 25, 2017. On May 24, 2017, the Company entered into an amended master repurchase agreement that reduced the committed principal amount to \$25.0 million and extends the maturity date to November 24, 2018. The outstanding balance on this master repurchase agreement as of June 30, 2018 and December 31, 2017 amounts to approximately \$37.9 million and \$26.1 million, respectively, with the amount in excess of \$25.0 million being uncommitted, bearing interest at one-month LIBOR plus 3.50% (5.59% and 5.05% at June 30, 2018 and December 31, 2017, respectively). Second mortgages with a carrying value of approximately \$63.8 million at June 30, 2018 are pledged as collateral for the borrowings under this master repurchase agreement. The Company expects to roll outstanding borrowings under this master repurchase agreement into a new repurchase agreement or other financing prior to or at maturity.

Residential Collateralized Debt Obligations. As of June 30, 2018 and December 31, 2017, we had Residential CDOs of \$62.2 million and \$70.3 million, respectively. As of June 30, 2018 and December 31, 2017, the weighted average interest rate of these Residential CDOs was 2.70% and 2.16%, respectively. The Residential CDOs are collateralized by ARM loans with a principal balance of \$69.5 million and \$77.5 million at June 30, 2018 and December 31, 2017, respectively. The Company retained the owner trust certificates, or residual interest, for three securitizations, and, had a net investment in the residential securitization trusts of \$4.9 million and \$4.4 million at June 30, 2018 and December 31, 2017, respectively.

Securitized Debt. As of June 30, 2018 and December 31, 2017, we had approximately \$61.0 million and \$81.5 million of securitized debt, respectively. As of June 30, 2018 and December 31, 2017, the weighted average interest rate for our securitized debt was 4.66% and 4.48%, respectively. The Company's securitized debt is collateralized by multi-family CMBS and distressed residential mortgage loans. See Note 10 to our condensed consolidated financial statements included in this report for more information on securitized debt.

Debt. The Company's debt as of June 30, 2018 included Convertible Notes, subordinated debentures and mortgages and notes payable in consolidated variable interest entities.

Table of Contents

Convertible Notes

On January 23, 2017, the Company issued \$138.0 million aggregate principal amount of its 6.25% Senior Convertible Notes due 2022 (the "Convertible Notes") in an underwritten public offering. The net proceeds to the Company from the sale of the Convertible Notes, after deducting the underwriter's discounts and commissions and estimated offering expenses, were approximately \$127.0 million with the total cost to the Company of approximately 8.24%.

Subordinated Debentures

As of June 30, 2018, certain of our wholly owned subsidiaries had trust preferred securities outstanding of \$45.0 million with a weighted average interest rate of 6.19%. The securities are fully guaranteed by us with respect to distributions and amounts payable upon liquidation, redemption or repayment. These securities are classified as subordinated debentures in the liability section of our condensed consolidated balance sheets.

Mortgages and Notes Payable in Consolidated VIEs

On March 31, 2017, the Company determined that it became the primary beneficiary of Riverchase Landing and The Clusters, two VIEs that each own a multi-family apartment community and in which the Company held preferred equity investments. Accordingly, on this date, the Company consolidated both Riverchase Landing and The Clusters into its condensed consolidated financial statements. Both of Riverchase Landing's and The Clusters' real estate investments were subject to a mortgage payable as of December 31, 2017. In March 2018, Riverchase Landing completed the sale of its multi-family apartment community and redeemed the Company's preferred equity investment. The Company de-consolidated Riverchase Landing as of the date of the sale. The Clusters' real estate investment remains subject to a mortgage payable of \$27.6 million and the Company has no obligation for this liability as of June 30, 2018. See Note 10 to our condensed consolidated financial statements included in this report for more information on Riverchase Landing and The Clusters.

The Company also consolidates KRVI into its condensed consolidated financial statements. KRVI's real estate under development is subject to a note payable of \$5.0 million that has an unused commitment of \$3.4 million as of June 30, 2018. See Note 10 to our condensed consolidated financial statements included in this report for more information on KRVI.

Table of Contents

Derivative Assets and Liabilities. The Company enters into derivative instruments in connection with its risk management activities. These derivative instruments may include interest rate swaps, swaptions, interest rate caps, futures, options on futures and mortgage derivatives such as forward-settling purchases and sales of Agency RMBS where the underlying pools of mortgage loans are TBAs.

Our derivative instruments are currently comprised of interest rate swaps. We use interest rate swaps to hedge variable cash flows associated with our variable rate borrowings. We typically pay a fixed rate and receive a floating rate based on one or three month LIBOR, on the notional amount of the interest rate swaps. The floating rate we receive under our swap agreements has the effect of offsetting the repricing characteristics and cash flows of our financing arrangements. Historically, we have accounted for these interest rate swaps under the hedged accounting methodology with changes in value reflected in comprehensive earnings and not through the statement of operations. Beginning the fourth quarter of 2017, the Company did not elect hedge accounting treatment and all changes in fair value are recognized in the statement of operations.

At June 30, 2018 and December 31, 2017, the Company had no outstanding swaps that qualify as cash flow hedges for financial reporting purposes. See Note 12 to our condensed consolidated financial statements included in this Form 10-Q for more information on our derivative instruments and hedging activities.

Derivative financial instruments may contain credit risk to the extent that the institutional counterparties may be unable to meet the terms of the agreements. We minimize this risk by limiting our counterparties to major financial institutions with good credit ratings. In addition, we regularly monitor the potential risk of loss with any one party resulting from this type of credit risk. Currently, all of the Company's interest rate swaps outstanding are cleared through CME Group Inc. ("CME Clearing") which is the parent company of the Chicago Mercantile Exchange Inc. CME Clearing serves as the counterparty to every cleared transaction, becoming the buyer to each seller and the seller to each buyer, limiting the credit risk by guaranteeing the financial performance of both parties and netting down exposures.

Balance Sheet Analysis - Company's Stockholders' Equity

The Company's stockholders' equity at June 30, 2018 was \$1.0 billion and included \$25.5 million of accumulated other comprehensive loss. The accumulated other comprehensive loss at June 30, 2018 consisted of \$44.7 million in unrealized losses related to our Agency RMBS, partially offset by \$18.8 million in net unrealized gains related to our CMBS and \$0.4 million in net unrealized gains related to non-Agency RMBS. The Company's stockholders' equity at December 31, 2017 was \$971.9 million and included \$5.6 million of accumulated other comprehensive income. The accumulated other comprehensive income at December 31, 2017 consisted of \$18.2 million in net unrealized gains related to our CMBS and \$1.8 million in net unrealized gains related to our non-Agency RMBS, partially offset by \$14.5 million in unrealized losses related to our Agency RMBS.

Table of Contents

Analysis of Changes in Book Value

The following table analyzes the changes in book value of our common stock for the three and six months ended June 30, 2018 (amounts in thousands, except per share):

	Three Months Ended June 30, 2018			Six Months Ended June 30, 2018		
	Amount	Shares	Per Share ⁽¹⁾	Amount	Shares	Per Share ⁽¹⁾
Beginning Balance	\$649,046	112,117	\$ 5.79	\$671,865	111,910	\$ 6.00
Common stock issuance, net ⁽²⁾	74,540	12,196		74,929	12,403	
Balance after share issuance activity	723,586	124,313	5.82	746,794	124,313	6.01
Dividends declared	(24,863)		(0.20)	(47,285)		(0.38)
Net change in accumulated other comprehensive income:						
Investment securities ⁽³⁾	(6,525)		(0.05)	(31,003)		(0.25)
Net income attributable to Company's common stockholders	23,769		0.19	47,461		0.38
Ending Balance	\$715,967	124,313	\$ 5.76	\$715,967	124,313	\$ 5.76

(1) Outstanding shares used to calculate book value per share for the ending balance is based on outstanding shares as of June 30, 2018 of 124,312,846.

(2) Includes amortization of stock based compensation.

(3) The decline of \$6.5 million and \$31.0 million related to investment securities for the three and six months ended June 30, 2018, respectively, is primarily due to a decline in the value of the Agency RMBS portfolio.

Liquidity and Capital Resources

General

Liquidity is a measure of our ability to meet potential cash requirements, including ongoing commitments to repay borrowings, fund and maintain investments, comply with margin requirements, fund our operations, pay management and incentive fees, pay dividends to our stockholders and other general business needs. Our investments and assets, excluding the principal only multi-family CMBS we invest in, generate liquidity on an ongoing basis through principal and interest payments, prepayments, net earnings retained prior to payment of dividends and distributions from unconsolidated investments. Our principal only multi-family CMBS are backed by balloon non-recourse mortgage loans that provide for the payment of principal at maturity date, which is typically seven to ten years from the date the underlying mortgage loans are originated, and therefore do not directly contribute to monthly cash flows. In addition, the Company will, from time to time, sell on an opportunistic basis certain assets from its investment portfolio as part of its overall investment strategy and these sales are expected to provide additional liquidity.

During the six months ended June 30, 2018, net cash and restricted cash decreased primarily as a result of \$159.0 million used in financing activities, partially offset by \$132.3 million provided by investing activities and \$10.9 million provided by operating activities. Our financing activities primarily included \$67.9 million in payments made on multi-family CDOs, \$56.7 million in aggregate dividends paid on common stock and preferred stock, net payments made on financing arrangements of \$54.1 million, \$25.7 million in payments made on mortgages and notes payable in Consolidated VIEs, \$21.4 million in payments made on securitized debt, and \$8.1 million in payments made on Residential CDOs, partially offset by \$73.8 million in proceeds from the issuance of common stock and \$1.1 million in advances on mortgages and notes payable in Consolidated VIEs.

Table of Contents

Our investing activities primarily included \$120.5 million in principal paydowns on investment securities available for sale, \$67.9 million in principal repayments received on multi-family loans held in securitization trusts, \$50.1 million in principal repayments and proceeds from sales and refinancings of distressed residential mortgage loans, \$33.2 million in net proceeds from sales of real estate in Consolidated VIEs, \$26.9 million in proceeds from sales of investment securities, \$13.7 million in net proceeds from other derivative instruments settled during the period, \$9.1 million in principal repayments received on preferred equity and mezzanine loan investments, \$7.8 million in principal repayments received on residential mortgage loans held in securitization trusts, \$2.1 million in proceeds from sale of real estate owned and \$1.2 million of return of capital from unconsolidated entities, partially offset by \$94.1 million of purchases of residential mortgage loans and distressed residential mortgage loans, \$60.3 million of purchases of investment securities, and \$45.5 million in the funding of preferred equity, equity and mezzanine loan investments.

We fund our investments and operations through a balanced and diverse funding mix, which includes proceeds from the issuance of common stock and preferred equity and debt securities, including convertible notes, short-term and longer-term repurchase agreement borrowings, CDOs, securitized debt and trust preferred debentures. The type and terms of financing used by us depends on the asset being financed and the financing available at the time of the financing. In those cases where we utilize some form of structured financing, be it through CDOs, longer-term repurchase agreements or securitized debt, the cash flow produced by the assets that serve as collateral for these structured finance instruments may be restricted in terms of its use or applied to pay principal or interest on CDOs, repurchase agreements, or notes that are senior to our interests. At June 30, 2018, we had cash and cash equivalents balances of \$84.7 million, which decreased from \$95.2 million at December 31, 2017. Based on our current investment portfolio, new investment initiatives, leverage ratio and available and future possible borrowing arrangements, we believe our existing cash balances, funds available under our various financing arrangements and cash flows from operations will meet our liquidity requirements for at least the next 12 months.

Liquidity – Financing Arrangements

We rely primarily on short-term repurchase agreements to finance the more liquid assets in our investment portfolio, such as Agency RMBS. In recent years, certain repurchase agreement lenders have elected to exit the repo lending market for various reasons, including new capital requirement regulations. However, as certain lenders have exited the space, other financing counterparties that had not participated in the repo lending market historically have begun to step in to replace a number of the lenders that have elected to exit.

As of June 30, 2018, we have outstanding short-term repurchase agreements, a form of collateralized short-term borrowing, with nine different financial institutions. These agreements are secured by certain of our investment securities and bear interest rates that have historically moved in close relationship to LIBOR. Our borrowings under repurchase agreements are based on the fair value of our investment securities portfolio. Interest rate changes and increased prepayment activity can have a negative impact on the valuation of these securities, reducing the amount we can borrow under these agreements. Moreover, our repurchase agreements allow the counterparties to determine a new market value of the collateral to reflect current market conditions and because these lines of financing are not committed, the counterparty can call the loan at any time. Market value of the collateral represents the price of such collateral obtained from generally recognized sources or most recent closing bid quotation from such source plus accrued income. If a counterparty determines that the value of the collateral has decreased, the counterparty may initiate a margin call and require us to either post additional collateral to cover such decrease or repay a portion of the outstanding borrowing in cash, on minimal notice. Moreover, in the event an existing counterparty elected to not renew the outstanding balance at its maturity into a new repurchase agreement, we would be required to repay the outstanding balance with cash or proceeds received from a new counterparty or to surrender the securities that serve as collateral for the outstanding balance, or any combination thereof. If we are unable to secure financing from a new

counterparty and had to surrender the collateral, we would expect to incur a loss. In addition, in the event one of our lenders under the repurchase agreement defaults on its obligation to “re-sell” or return to us the securities that are securing the borrowings at the end of the term of the repurchase agreement, we would incur a loss on the transaction equal to the amount of “haircut” associated with the short-term repurchase agreement, which we sometimes refer to as the “amount at risk.” As of June 30, 2018, we had an aggregate amount at risk under our repurchase agreements of approximately \$181.8 million, with no more than approximately \$68.6 million at risk with any single counterparty. The Company had short-term repurchase agreement borrowings of \$1.2 billion and \$1.3 billion at June 30, 2018 and December 31, 2017, respectively.

Table of Contents

As of June 30, 2018, our available liquid assets include unrestricted cash and cash equivalents and unencumbered securities we believe may be posted as margin. We had \$84.7 million in cash and cash equivalents and \$318.0 million in unencumbered investment securities to meet additional haircuts or market valuation requirements. The unencumbered securities that we believe may be posted as margin as of June 30, 2018 included \$177.0 million of Agency RMBS, \$98.8 million of CMBS and \$42.2 million of non-Agency RMBS and other investment securities. We believe the cash and unencumbered securities, which collectively represent 34.1% of our financing arrangements, are liquid and could be monetized to pay down or collateralize a liability immediately.

At June 30, 2018, the Company also had two master repurchase agreements with Deutsche Bank AG, Cayman Islands Branch. The outstanding balances under the first master repurchase agreement with a maximum committed principal amount of \$100.0 million and a maximum uncommitted principal amount of \$150.0 million amounted to approximately \$154.6 million and \$123.6 million at June 30, 2018 and December 31, 2017, respectively. This agreement is collateralized by distressed residential mortgage loans with a carrying value of \$214.2 million at June 30, 2018 and expires on June 8, 2019. The outstanding balances under the second master repurchase agreement with a maximum aggregate committed principal amount of \$25.0 million and a maximum uncommitted principal amount of \$25.0 million amounted to approximately \$37.9 million and \$26.1 million at June 30, 2018 and December 31, 2017, respectively. This agreement is collateralized by second mortgages with a carrying value of \$63.8 million at June 30, 2018, and expires on November 24, 2018. The Company expects to roll outstanding borrowings under these master repurchase agreements into new repurchase agreements or other financing prior to or at maturity.

At June 30, 2018, we also had other longer-term debt, including Residential CDOs outstanding of \$62.2 million, multi-family CDOs outstanding of \$8.8 billion (which represent obligations of the Consolidated K-Series), subordinated debt of \$45.0 million and securitized debt of \$61.0 million. The CDOs are collateralized by residential and multi-family loans held in securitization trusts, respectively. The securitized debt as of June 30, 2018 represents the notes issued in (i) our May 2012 multi-family re-securitization transaction and (ii) our April 2016 distressed residential mortgage loan securitization transaction, which is described in Note 10 of our condensed consolidated financial statements in this Quarterly Report on Form 10-Q.

On January 23, 2017, the Company completed the issuance of \$138.0 million aggregate principal amount of Convertible Notes in a public offering. The Convertible Notes were issued at 96% of the principal amount, bear interest at a rate equal to 6.25% per year, payable semi-annually in arrears on January 15 and July 15 of each year, and are expected to mature on January 15, 2022, unless earlier converted or repurchased. The Company does not have the right to redeem the Convertible Notes prior to maturity and no sinking fund is provided for the Convertible Notes. Holders of the Convertible Notes are permitted to convert their Convertible Notes into shares of the Company's common stock at any time prior to the close of business on the business day immediately preceding January 15, 2022. The conversion rate for the Convertible Notes, which is subject to adjustment upon the occurrence of certain specified events, initially equals 142.7144 shares of the Company's common stock per \$1,000 principal amount of Convertible Notes, which is equivalent to a conversion price of approximately \$7.01 per share of the Company's common stock, based on a \$1,000 principal amount of the Convertible Notes.

As of June 30, 2018, our overall leverage ratio, which represents our total debt divided by our total stockholders' equity, was approximately 1.6 to 1. Our overall leverage ratio does not include the mortgage debt of The Clusters or debt associated with the Multi-family CDOs or the Residential CDOs, for which we have no obligation. As of June 30, 2018, our leverage ratio on our short term financings or callable debt, which represents our repurchase agreement borrowings divided by our total stockholders' equity, was approximately 1.4 to 1. We monitor all at risk or short term borrowings to ensure that we have adequate liquidity to satisfy margin calls and have the ability to respond to other market disruptions.

Liquidity – Hedging and Other Factors

Certain of our hedging instruments may also impact our liquidity. We may use interest rate swaps, swaptions, TBAs or other futures contracts to hedge interest rate and market value risk associated with our investments in Agency RMBS.

With respect to interest rate swaps, futures contracts and TBAs, initial margin deposits, which can be comprised of either cash or securities, will be made upon entering into these contracts. During the period these contracts are open, changes in the value of the contract are recognized as unrealized gains or losses by marking to market on a daily basis to reflect the market value of these contracts at the end of each day's trading. We may be required to satisfy variable margin payments periodically, depending upon whether unrealized gains or losses are incurred. In addition, because delivery of TBAs extend beyond the typical settlement dates for most non-derivative investments, these transactions are more prone to market fluctuations between the trade date and the ultimate settlement date, and thereby are more vulnerable to increasing amounts at risk with the applicable counterparties.

Table of Contents

For additional information regarding the Company's derivative instruments and hedging activities for the periods covered by this report, including the fair values and notional amounts of these instruments and realized and unrealized gains and losses relating to these instruments, please see Note 12 to our condensed consolidated financial statements included in this report. Also, please see Item 3. Quantitative and Qualitative Disclosures about Market Risk, under the caption, "Fair Value Risk", for a tabular presentation of the sensitivity of the fair value and net duration changes of the Company's portfolio across various changes in interest rates, which takes into account the Company's hedging activities.

Liquidity — Securities Offerings

In addition to the financing arrangements described above under the caption "Liquidity—Financing Arrangements," we also rely on follow-on equity offerings of common and preferred stock, and may utilize from time to time in the future debt securities offerings, as a source of both short-term and long-term liquidity. We also may generate liquidity through the sale of shares of our common stock in an "at the market" offering program pursuant to an equity distribution agreement (the "ATM Program"), as well as through the sale of shares of our common stock pursuant to our Dividend Reinvestment Plan, or DRIP. Our DRIP provides for the issuance of up to \$20,000,000 of shares of our common stock.

On August 10, 2017, we entered into an equity distribution agreement (the "Equity Distribution Agreement") with Credit Suisse Securities (USA) LLC ("Credit Suisse"), as sales agent, pursuant to which we may offer and sell shares of our common stock, par value \$0.01 per share, having a maximum aggregate sales price of up to \$100.0 million, from time to time through Credit Suisse. The Company has no obligation to sell any of the shares of common stock issuable under the Equity Distribution Agreement and may at any time suspend solicitations and offers under the Equity Distribution Agreement.

During the three and six months ended June 30, 2018, the Company issued 12,145,144 shares of its common stock under the Equity Distribution Agreement, at an average sales price of \$6.17 per share, resulting in total net proceeds to the Company of \$73.8 million after deducting the placement fees. As of June 30, 2018, approximately \$24.7 million of common stock remains available for issuance under the Equity Distribution Agreement.

Management Agreements

We have an investment management agreement with Headlands, pursuant to which we pay Headlands a base management and incentive fee, if earned, quarterly in arrears. On August 2, 2018, the Company notified Headlands that it will allow its management agreement with the manager to expire on June 30, 2019.

Dividends

For information regarding the declaration and payment of dividends on our common and preferred stock for the periods covered by this report, please see Note 19 to our condensed consolidated financial statements included in this report.

We expect to continue to pay quarterly cash dividends on our common stock during the near term. However, our Board of Directors will continue to evaluate our dividend policy each quarter and will make adjustments as necessary, based on a variety of factors, including, among other things, the need to maintain our REIT status, our financial condition, liquidity, earnings projections and business prospects. Our dividend policy does not constitute an obligation to pay dividends.

We intend to make distributions to our stockholders to comply with the various requirements to maintain our REIT status and to minimize or avoid corporate income tax and the nondeductible excise tax. However, differences in timing between the recognition of REIT taxable income and the actual receipt of cash could require us to sell assets or to borrow funds on a short-term basis to meet the REIT distribution requirements and to minimize or avoid corporate income tax and the nondeductible excise tax.

Table of Contents

Inflation

Substantially all our assets and liabilities are financial in nature. As a result, changes in interest rates and other factors impact our performance far more than does inflation. Our consolidated financial statements and corresponding notes thereto have been prepared in accordance with GAAP, which require the measurement of financial position and operating results in terms of historical dollars without considering inflation.

Off-Balance Sheet Arrangements

We did not maintain any relationships with unconsolidated entities or financial partnerships, such as entities often referred to as structured finance or special purpose entities, established for the purpose of facilitating off-balance sheet arrangements or other contractually narrow or limited purposes. Further, we have not guaranteed any obligations of unconsolidated entities nor do we have any commitment or intent to provide funding to any such entities.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

This section should be read in conjunction with “Item 1A. Risk Factors” in our Annual Report on Form 10-K, “Item 1A. Risk Factors” in Part II of our Quarterly Reports on Form 10-Q and in our subsequent periodic reports filed with the SEC.

We seek to manage risks that we believe will impact our business including interest rates, liquidity, prepayments, credit quality and market value. When managing these risks we consider the impact on our assets, liabilities and derivative positions. While we do not seek to avoid risk completely, we believe the risk can be quantified from historical experience. We seek to actively manage that risk, to generate risk-adjusted total returns that we believe compensate us appropriately for those risks and to maintain capital levels consistent with the risks we take.

The following analysis includes forward-looking statements that assume that certain market conditions occur. Actual results may differ materially from these projected results due to changes in our portfolio assets and borrowings mix and due to developments in the domestic and global financial and real estate markets. Developments in the financial markets include the likelihood of changing interest rates and the relationship of various interest rates and their impact on our portfolio yield, cost of funds and cash flows. The analytical methods that we use to assess and mitigate these market risks should not be considered projections of future events or operating performance.

Interest Rate Risk

Interest rates are sensitive to many factors, including governmental, monetary, tax policies, domestic and international economic conditions, and political or regulatory matters beyond our control. Changes in interest rates affect the value of the assets we manage and hold in our investment portfolio and the variable-rate borrowings we use to finance our portfolio. Changes in interest rates also affect the interest rate swaps and caps, Eurodollar and other futures, TBAs and other securities or instruments we use to hedge our portfolio. As a result, our net interest income is particularly affected by changes in interest rates.

For example, we hold RMBS, some of which may have fixed rates or interest rates that adjust on various dates that are not synchronized to the adjustment dates on our repurchase agreements. In general, the re-pricing of our repurchase agreements occurs more quickly than the re-pricing of our variable-interest rate assets. Thus, it is likely that our floating rate borrowings, such as our repurchase agreements, may react to interest rates before our RMBS because the weighted average next re-pricing dates on the related borrowings may have shorter time periods than that of the

RMBS. In addition, the interest rates on our Agency ARMs backed by hybrid ARMs may be limited to a “periodic cap,” or an increase of typically 1% or 2% per adjustment period, while our borrowings do not have comparable limitations. Moreover, changes in interest rates can directly impact prepayment speeds, thereby affecting our net return on RMBS. During a declining interest rate environment, the prepayment of RMBS may accelerate (as borrowers may opt to refinance at a lower interest rate) causing the amount of liabilities that have been extended by the use of interest rate swaps to increase relative to the amount of RMBS, possibly resulting in a decline in our net return on RMBS, as replacement RMBS may have a lower yield than those being prepaid. Conversely, during an increasing interest rate environment, RMBS may prepay more slowly than expected, requiring us to finance a higher amount of RMBS than originally forecast and at a time when interest rates may be higher, resulting in a decline in our net return on RMBS. Accordingly, each of these scenarios can negatively impact our net interest income.

We seek to manage interest rate risk in our portfolio by utilizing interest rate swaps, swaptions, interest rate caps, futures, options on futures and U.S. Treasury securities with the goal of optimizing the earnings potential while seeking to maintain long term stable portfolio values. We continually monitor the duration of our mortgage assets and have a policy to hedge the financing

Table of Contents

of those assets such that the net duration of the assets, our borrowed funds related to such assets, and related hedging instruments, is less than one year.

We utilize a model-based risk analysis system to assist in projecting portfolio performances over a scenario of different interest rates. The model incorporates shifts in interest rates, changes in prepayments and other factors impacting the valuations of our financial securities and derivative hedging instruments.

Based on the results of the model, the instantaneous changes in interest rates specified below would have had the following effect on our net interest income for the next 12 months based on our assets and liabilities as of June 30, 2018 (dollar amounts in thousands):

Changes in Net Interest Income	
Changes in Interest Rates	Changes in Net Interest Income
+200	\$(19,616)
+100	\$(9,655)
-100	\$7,582

Interest rate changes may also impact our net book value as our assets and related hedge derivatives are marked-to-market each quarter. Generally, as interest rates increase, the value of our mortgage assets, decreases, and conversely, as interest rates decrease, the value of such investments will increase. In general, we expect that, over time, decreases in the value of our portfolio attributable to interest rate changes will be offset, to the degree we are hedged, by increases in the value of our interest rate swaps or other financial instruments used for hedging purposes, and vice versa. However, the relationship between spreads on our assets and spreads on our hedging instruments may vary from time to time, resulting in a net aggregate book value increase or decline. That said, unless there is a material impairment in value that would result in a payment not being received on a security or loan, changes in the book value of our portfolio will not directly affect our recurring earnings or our ability to make a distribution to our stockholders.

Liquidity Risk

Liquidity is a measure of our ability to meet potential cash requirements, including ongoing commitments to repay borrowings, fund and maintain investments, pay dividends to our stockholders and other general business needs. The primary liquidity risk we face arises from financing long-maturity assets with shorter-term borrowings primarily in the form of repurchase agreement financings. We recognize the need to have funds available to operate our business. We manage and forecast our liquidity needs and sources daily to ensure that we have adequate liquidity at all times. We plan to meet liquidity through normal operations with the goal of avoiding unplanned sales of assets or emergency borrowing of funds.

We are subject to “margin call” risk under our repurchase agreements. In the event the value of our assets pledged as collateral suddenly decreases, margin calls relating to our repurchase agreements could increase, causing an adverse change in our liquidity position. Additionally, if one or more of our repurchase agreement counterparties chooses not to provide ongoing funding, we may be unable to replace the financing through other lenders on favorable terms or at all. As such, we provide no assurance that we will be able to roll over our repurchase agreements as they mature from time to time in the future. See Item 2, "Management's Discussion and Analysis of Financial Condition and Results of Operations - Liquidity and Capital Resources" in this Quarterly Report on Form 10-Q for further information about our liquidity and capital resource management.

Derivative financial instruments are also subject to “margin call” risk. For example, under our interest rate swaps, typically we pay a fixed rate to the counterparties while they pay us a floating rate. If interest rates drop below the

fixed rate we are paying on an interest rate swap, we may be required to post cash margin.

Prepayment Risk

When borrowers repay the principal on their residential mortgage loans before maturity or faster than their scheduled amortization, the effect is to shorten the period over which interest is earned, and therefore, reduce the yield for residential mortgage assets purchased at a premium to their then current balance, as with our portfolio of Agency RMBS. Conversely, residential mortgage assets purchased for less than their then current balance, such as our distressed residential mortgage loans, exhibit higher yields due to faster prepayments. Furthermore, actual prepayment speeds may differ from our modeled prepayment speed projections impacting the effectiveness of any hedges we have in place to mitigate financing and/or fair value risk. Generally, when market interest rates decline, borrowers have a tendency to refinance their mortgages, thereby increasing prepayments.

Table of Contents

Our modeled prepayments will help determine the amount of hedging we use to off-set changes in interest rates. If actual prepayment rates are higher than modeled, the yield will be less than modeled in cases where we paid a premium for the particular residential mortgage asset. Conversely, when we have paid a premium, if actual prepayment rates experienced are slower than modeled, we would amortize the premium over a longer time period, resulting in a higher yield to maturity.

In an environment of increasing prepayment speeds, the timing difference between the actual cash receipt of principal paydowns and the announcement of the principal paydown may result in additional margin requirements from our repurchase agreement counterparties.

We mitigate prepayment risk by constantly evaluating our residential mortgage assets relative to prepayment speeds observed for assets with similar structures, quantities and characteristics. Furthermore, we stress-test the portfolio as to prepayment speeds and interest rate risk in order to further develop or make modifications to our hedge balances. Historically, we have not hedged 100% of our liability costs due to prepayment risk.

Credit Risk

Credit risk is the risk that we will not fully collect the principal we have invested in our credit sensitive assets, including distressed residential and other mortgage loans, non-Agency RMBS, CMBS, preferred equity and mezzanine loan and joint venture equity investments, due to borrower defaults. In selecting the credit sensitive assets in our portfolio, we seek to identify and invest in assets with characteristics that we believe offset or limit our exposure to borrower defaults.

We seek to manage credit risk through our pre-acquisition or pre-funding due diligence process, and by factoring projected credit losses into the purchase price we pay or loan terms we negotiate for all of our credit sensitive assets. In general, we evaluate relative valuation, supply and demand trends, prepayment rates, delinquency and default rates, vintage of collateral and macroeconomic factors as part of this process. Nevertheless, these procedures do not guarantee unanticipated credit losses which would materially affect our operating results.

With respect to the \$290.6 million of distressed residential mortgage loans and \$96.9 million of distressed residential mortgage loans, at fair value owned by the Company at June 30, 2018, the mortgage loans were purchased at a discount to par reflecting their distressed state or perceived higher risk of default, which may include higher loan to value ratios and, in certain instances, delinquent loan payments.

As of June 30, 2018, we own \$503.4 million of first loss CMBS comprised solely of first loss POs that are backed by commercial mortgage loans on multi-family properties at a weighted average amortized purchase price of approximately 43.9% of current par. Prior to the acquisition of each of our first loss CMBS securities, the Company completed an extensive review of the underlying loan collateral, including loan level cash flow re-underwriting, site inspections on selected properties, property specific cash flow and loss modeling, review of appraisals, property condition and environmental reports, and other credit risk analyses. We continue to monitor credit quality on an ongoing basis using updated property level financial reports provided by borrowers and periodic site inspection of selected properties. We also reconcile on a monthly basis the actual bond distributions received against projected distributions to assure proper allocation of cash flow generated by the underlying loan pool.

As of June 30, 2018, we own approximately \$233.9 million of preferred equity, mezzanine loan and equity investments in owners of residential and multi-family properties. The performance and value of these investments depend upon the applicable operating partner's or borrower's ability to effectively operate the multi-family and

residential properties, that serve as the underlying collateral, to produce cash flows adequate to pay distributions, interest or principal due to us. The Company monitors the performance and credit quality of the underlying assets that serve as collateral for its investments. In connection with these types of investments by us in multi-family properties, the procedures for ongoing monitoring include financial statement analysis and regularly scheduled site inspections of portfolio properties to assess property physical condition, performance of on-site staff and competitive activity in the sub-market. We also formulate annual budgets and performance goals alongside our operating partners for use in measuring the ongoing investment performance and credit quality of our investments. Additionally, the Company's preferred equity and equity investments typically provide us with various rights and remedies to protect our investment. In March 2017, the Company exercised its rights and remedies with respect to Riverchase Landing and The Clusters and effectively assumed control of both entities. In March 2018, the Company successfully resolved its investment in Riverchase Landing with the sale of the entity's multi-family apartment community and full redemption of the Company's preferred equity investment. Additionally, the Company believes it has an asset management team with the experience and expertise necessary to efficiently manage The Clusters while working toward a successful resolution for this investment.

Table of Contents

We are exposed to credit risk in our investments in non-Agency RMBS backed by re-performing or non-performing loans totaling \$54.1 million as of June 30, 2018. The non-Agency RMBS in our investment portfolio were purchased primarily in offerings of new issues of such securities at prices at or around par and represent either the senior or junior securities in the securitizations of the loan portfolios collateralizing such securities. The senior securities are structured with significant credit enhancement (typically approximately 50%, subject to market and credit conditions) to mitigate our exposure to credit risk on these securities, while the junior securities typically have 30% credit enhancement. Both junior and senior securities are subordinated by an equity security that typically receives no cash flow (interest or principal) until the senior and junior securities are paid off. In addition, these deal structures contain an interest rate step-up feature, whereby the coupon on the senior and junior securities increase by 300 to 400 basis points if the securities that we hold have not been redeemed by the issuer after 36 months. We expect that the combination of the priority cash flow of the senior and junior securities and the 36-month step-up will result in these securities' exhibiting short average lives and, accordingly, reduced interest rate sensitivity. Consequently, we believe that non-Agency RMBS provide attractive returns given our assessment of the interest rate and credit risk associated with these securities.

Fair Value Risk

Changes in interest rates also expose us to market value (fair value) fluctuation on our assets, liabilities and hedges. While the fair value of the majority of our assets (when excluding all Consolidated K-Series assets other than the securities we actually own) that are measured on a recurring basis are determined using Level 2 fair values, we own certain assets, such as our first loss principal only CMBS investments, for which fair values may not be readily available if there are no active trading markets for the instruments. In such cases, fair values would only be derived or estimated for these investments using various valuation techniques, such as computing the present value of estimated future cash flows using discount rates commensurate with the risks involved. However, the determination of estimated future cash flows is inherently subjective and imprecise. Minor changes in assumptions or estimation methodologies can have a material effect on these derived or estimated fair values. Our fair value estimates and assumptions are indicative of the interest rate environments as of June 30, 2018 and do not take into consideration the effects of subsequent interest rate fluctuations.

We note that the fair values of our investments in derivative instruments will be sensitive to changes in market interest rates, interest rate spreads, credit spreads and other market factors. The value of these investments can vary and has varied materially from period to period.

The following describes the methods and assumptions we use in estimating fair values of our financial instruments:

Fair value estimates are made as of a specific point in time based on estimates using present value or other valuation techniques. These techniques involve uncertainties and are significantly affected by the assumptions used and the judgments made regarding risk characteristics of various financial instruments, discount rates, estimate of future cash flows, future expected loss experience and other factors.

Changes in assumptions could significantly affect these estimates and the resulting fair values. Derived fair value estimates cannot be substantiated by comparison to independent markets and, in many cases, could not be realized in an immediate sale of the instrument. Also, because of differences in methodologies and assumptions used to estimate fair values, the fair values used by us should not be compared to those of other companies.

The table below presents the sensitivity of the fair value and net duration changes of our portfolio as of June 30, 2018, using a discounted cash flow simulation model assuming an instantaneous interest rate shift. Application of this method results in an estimation of the fair market value change of our assets, liabilities and hedging instruments per

100 basis point (“bp”) shift in interest rates.

The use of hedging instruments is a critical part of our interest rate risk management strategies, and the effects of these hedging instruments on the market value of the portfolio are reflected in the model's output. This analysis also takes into consideration the value of options embedded in our mortgage assets including constraints on the re-pricing of the interest rate of assets resulting from periodic and lifetime cap features, as well as prepayment options. Assets and liabilities that are not interest rate-sensitive such as cash, payment receivables, prepaid expenses, payables and accrued expenses are excluded.

Changes in assumptions including, but not limited to, volatility, mortgage and financing spreads, prepayment behavior, defaults, as well as the timing and level of interest rate changes will affect the results of the model. Therefore, actual results are likely to vary from modeled results.

94

Table of Contents

Fair Value Changes

Changes in Interest Rates (basis points)	Changes in Fair Value (dollar amounts in thousands)	Net Duration
+200	\$(104,105)	2.5
+100	\$(46,503)	2.3
Base		1.3
-100	\$12,702	0.2

It should be noted that the model is used as a tool to identify potential risk in a changing interest rate environment but does not include any changes in portfolio composition, financing strategies, market spreads or changes in overall market liquidity.

Although market value sensitivity analysis is widely accepted in identifying interest rate risk, it does not take into consideration changes that may occur such as, but not limited to, changes in investment and financing strategies, changes in market spreads and changes in business volumes. Accordingly, we make extensive use of an earnings simulation model to further analyze our level of interest rate risk.

Table of Contents

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures. We maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed in the reports that we file or submit under the Securities Exchange Act of 1934, as amended, is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the SEC, and that such information is accumulated and communicated to our management as appropriate to allow timely decisions regarding required disclosures. An evaluation was performed under the supervision and with the participation of our management, including our principal executive officer and principal financial officer, of the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended) as of June 30, 2018. Based upon that evaluation, our principal executive officer and principal financial officer concluded that our disclosure controls and procedures were effective as of June 30, 2018.

Changes in Internal Control Over Financial Reporting. There have been no changes in our internal control over financial reporting during the quarter ended June 30, 2018 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1A. Risk Factors

There have been no material changes from the risk factors disclosed under "Item 1A. Risk Factors" in our Annual Report on Form 10-K for the year ended December 31, 2017.
