Item 2.06. Material Impairments

On June 30, 2016, executive management of First Solar, Inc. (“First Solar” or the “Company”) elected to reallocate First Solar’s crystalline silicon module production capacity to support a new assembly line dedicated to the Company’s recently announced Series 5 cadmium telluride (“CdTe”) module offering. As a result, First Solar will end production of its crystalline silicon modules to focus on its core CdTe module technology and utility-scale photovoltaic solar power systems. In connection with this reallocation, First Solar expects to incur charges of \$90 million to \$110 million primarily related to the impairment of certain long-lived and intangible assets (including equipment, intellectual property, and goodwill) associated with its crystalline silicon manufacturing operations. The above-referenced charges will be incurred primarily in the second quarter of 2016 with the remaining amounts being incurred throughout the second half of 2016, including approximately \$10 million of cash expenditures. The majority of the Company’s crystalline silicon manufacturing associates are expected to be redeployed to the new Series 5 assembly line, which is expected to be operational in early 2017.

Item 7.01. Regulation FD Disclosure

On July 5, 2016, First Solar issued a press release regarding the above-referenced initiatives. A copy of the press release is furnished as Exhibit 99.1 to this Form 8-K.

The information in this Item 7.01 of Form 8-K and in Exhibit 99.1 attached hereto shall not be deemed “filed” for purposes of Section 18 of the Securities Exchange Act of 1934, as amended (the “Exchange Act”), or otherwise subject to the liability of that Section, nor shall it be deemed incorporated by reference in any filing under the Securities Act of 1933, as amended, or the Exchange Act, except as shall be expressly set forth by specific reference in such filing.
