ITEM 2.02. RESULTS OF OPERATIONS AND FINANCIAL CONDITION.

Edgar Filing: BAXTER INTERNATIONAL INC - Form 8-K

On July 20, 2006, Baxter International Inc. issued an earnings press release for the quarterly period ended June 30, 2006. The press release, including attachments, is furnished as Exhibit 99 to this report.

The press release contains several non-GAAP financial measures as defined by the Securities and Exchange Commission. These measures are used in addition to results presented in accordance with generally accepted accounting principles (GAAP). The non-GAAP financial measures reflect an additional way of viewing aspects of the company's operations that, when viewed with GAAP results and the accompanying reconciliations to corresponding GAAP financial measures, may provide a more complete understanding of factors and trends affecting the company's business. Management strongly encourages investors to review the company's consolidated financial statements and publicly filed reports in their entirety.

The non-GAAP financial measures include adjusted income from continuing operations and adjusted earnings per diluted share, each excluding special items and the impact of stock-option expense under SFAS No. 123-R. Special items are excluded because they are unusual or nonrecurring and accordingly can be highly variable, difficult to predict, and of a size that may substantially impact the company's reported operations for a period. Stock-option expense under SFAS No. 123-R is excluded to provide a comparison to prior periods that have not been restated to include such expenses. Management believes that these non-GAAP earnings measures facilitate a fuller analysis of the company's results of operations, particularly in evaluating performance from one period to another. Accordingly, management uses these non-GAAP measures internally in financial planning, to monitor performance, and in setting performance compensation targets.

The press release also uses "free cash flow," which is defined as cash flow from operations less capital expenditures and is not a measure defined in accordance with GAAP. This measure is used internally to evaluate the company's cash performance, and management believes that free cash flow is a useful measure to investors in that it provides a representation of the company's cash level available to reduce debt outstanding, pay common stock dividends, repurchase common stock or make strategic investments and acquisitions.

ITEM 9.01. FINANCIAL STATEMENTS AND EXHIBITS.

(d) The following exhibit is furnished herewith:

99--Press Release dated July 20, 2006
