þ	QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended September 30, 2013
OR

o	TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from to
COMMISSION FILE NUMBER 000-50667
INTERMOUNTAIN COMMUNITY BANCORP
(Exact name of registrant as specified in its charter)

Idaho	82-0499463
(State or other jurisdiction of incorporation or organization)	(IRS Employer Identification No.)

414 Church Street, Sandpoint, ID 83864
(Address of principal executive offices) (Zip code)
Registrant’s telephone number, including area code:
(208) 263-0505

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes þ No o
Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes þ No o
Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of “large accelerated filer,” “accelerated filer” and “smaller reporting company” in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer o	Accelerated filer o	Non-accelerated filer o (Do not check if a smaller reporting company)	Smaller reporting company þ

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes o No þ
The number of shares outstanding of the registrant’s Voting Common Stock, no par value per share, as of November 8, 2013 was 2,603,606 and the number of outstanding shares of Non-Voting Common Stock, no par value per share, was 3,839,688.

Table of Contents

Intermountain Community Bancorp
Notes to Consolidated Financial Statements (Unaudited)

1. Basis of Presentation:
The foregoing unaudited interim consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X as promulgated by the Securities and Exchange Commission. Accordingly, these financial statements do not include all of the disclosures required by accounting principles generally accepted in the United States of America for complete financial statements. These unaudited interim consolidated financial statements should be read in conjunction with the audited consolidated financial statements for the year ended December 31, 2012. In the opinion of management, the unaudited interim consolidated financial statements furnished herein include adjustments, all of which are of a normal recurring nature, necessary for a fair statement of the results for the interim periods presented.
The preparation of financial statements in accordance with accounting principles generally accepted in the United States of America requires the use of estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities known to exist as of the date the financial statements are published, and the reported amounts of revenues and expenses during the reporting period. Uncertainties with respect to such estimates and assumptions are inherent in the preparation of Intermountain Community Bancorp's ("Intermountain's" or "the Company's") consolidated financial statements; accordingly, it is possible that the actual results could differ from these estimates and assumptions, which could have a material effect on the reported amounts of Intermountain's consolidated financial position and results of operations.
During the fourth quarter of 2012, the Company identified a misstatement related to the elimination of cash deposited by the parent company with the subsidiary bank. The misstatement increased the unrestricted cash and deposit balances in the Consolidated Balance Sheet and the amount of cash received from financing activities reported in the Consolidated Statement of Cash Flows for the quarters ended March 31, June 30 and September 30, 2012. In accordance with the SEC Staff Accounting Bulletin (SAB) No. 99, "Materiality," and SAB No. 108, "Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements," management evaluated the materiality of the error from qualitative and quantitative perspectives and concluded that the error was immaterial to these prior interim periods. Consequently, the Consolidated Balance Sheet and Consolidated Statement of Cash Flows contained in this Report have been revised for the nine months ended September 30, 2012. This change resulted in a corresponding decrease of $9.5 million from non-interest bearing and vault cash and deposit liabilities on the balance sheet and from cash flows from financing activities on the statement of cash flows. This change did not affect net income or shareholders' equity for any period.

2. Cash & Cash Equivalents:

The balances of the Company's cash and cash equivalents are as follows (in thousands):

	9/30/2013	12/31/2012
Unrestricted interest-bearing cash and cash equivalents	$ 17,795	$ 53,403
Unrestricted non interest-bearing and vault cash	$ 7,972	$ 13,536
Restricted non-interest bearing cash	$ 12,236	$ 13,146

In September 2013 and December 2012, unrestricted interest bearing cash was deposited at the Federal Reserve ("FRB") and Federal Home Loan Bank of Seattle ("FHLB"). Unrestricted non-interest bearing cash includes overnight cash deposited at several of the Company's correspondent banks and balances kept in the vaults of its various offices.
At September 30, 2013 restricted non-interest bearing cash consisted of the following:

- $1.1 million in reserve balances to meet FRB reserve requirements;
- $572,000 pledged to various correspondent banks to secure interest rate swap transactions and foreign currency exchange lines;

- $1.1 million held at the Company's subsidiary Bank to be used for future tenant improvements of the Sandpoint Center, as required by the agreement executed to sell the Sandpoint Center in 2009;
- $9.5 million held at the Company's subsidiary Bank as required by an intercompany agreement signed by the Company and the Bank as part of the Company's January 2012 capital raise, which represents a pledge of funds to the Bank to partially secure the loan made by the Bank to the third party who bought and subsequently leased the Sandpoint Center back to the Bank.

Table of Contents

At December 31, 2012, restricted cash consisted of $1.1 million to meet FRB reserve requirements, $572,000 to secure interest swap transactions, $877,000 deposited in escrow for the payment of deferred interest on the Company's Trust II debenture and foreign currency exchange lines, $1.1 million to fund future tenant improvements at the Sandpoint Center, and $9.5 million as required by the intercompany agreement discussed above.

3. Investments:

The amortized cost and fair values of investments are as follows (in thousands):

	Available-for-Sale				
	Amortized Cost	Cumulative Non-Credit OTTI (Losses) Recognized in OCI	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value/ Carrying Value

Mortgage-backed securities - Non Agency CMO's (below investment grade)	10,889	(1,661)	1,401	(387)	10,242
	$274,339	$(1,661)	$9,016	$(1,525)	$280,169

	Held-to-Maturity				
	Carrying Value / Amortized Cost	Cumulative Non-Credit OTTI (Losses) Recognized in OCI	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
September 30, 2013					
State and municipal securities	$26,241	$—	$1,237	$(19)	$27,459
December 31, 2012					
State and municipal securities	$14,826	$—	$1,518	$—	$16,344

Table of Contents

The following table summarizes the duration of Intermountain's unrealized losses on available-for-sale and held-to-maturity securities as of the dates indicated (in thousands).

	Less Than 12 Months		12 Months or Longer		Total	
September 30, 2013	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
Corporate Bonds	$3,998	$(14)	$—	$—	$3,998	$(14)
Residential mortgage-back securities	65,571	(1,567)	23,792	(624)	89,363	(2,191)
SBA Pools	4,420	(39)	—	—	4,420	(39)
State and municipal securities	30,949	(1,097)	—	—	30,949	(1,097)
Total	$104,938	$(2,717)	$23,792	$(624)	$128,730	$(3,341)
December 31, 2012	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
Residential mortgage-back securities	$57,180	$(785)	$11,408	$(582)	$68,588	$(1,367)
State and municipal securities	12,019	(158)	—	—	12,019	(158)
Total	$69,199	$(943)	$11,408	$(582)	$80,607	$(1,525)

At September 30, 2013, the amortized cost and fair value of available-for-sale and held-to-maturity debt securities, by contractual maturity, are as follows (in thousands):

	Available-for-Sale		Held-to-Maturity	
	Amortized Cost	Fair Value	Amortized Cost	Fair Value
One year or less	$—	$—	$1,381	$1,422
After one year through five years	3,567	3,578	2,619	2,691
After five years through ten years	6,716	6,607	18,127	19,002
After ten years	46,105	45,721	4,114	4,344
Subtotal	56,388	55,906	26,241	27,459
Mortgage-backed securities	185,029	184,740	—	—
SBA Pools	23,872	24,354	—	—
Total Securities	$265,289	$265,000	$26,241	$27,459

Expected maturities may differ from contractual maturities because issuers may have the right to call or prepay obligations with or without call or prepayment penalties.

Intermountain's investment portfolios are managed to provide and maintain liquidity; to maintain a balance of high quality, diversified investments to minimize risk; to offset other asset portfolio elements in managing interest rate risk; to provide collateral for pledging; and to maximize returns. At September 30, 2013, the Company does not intend to sell any of its available-for-sale securities that have a loss position and it is not likely that it will be required to sell the available-for-sale securities before the anticipated recovery of their remaining amortized cost or maturity date. The unrealized losses on residential mortgage-backed securities without other-than-temporary impairment ("OTTI") were considered by management to be temporary in nature.

Table of Contents

The following table presents the OTTI losses for the nine months ended September 30, 2013 and 2012:

	2013		2012	
	Held To Maturity	Available For Sale	Held To Maturity	Available For Sale
Total other-than-temporary impairment losses	$—	$—	$—	$7
Portion of other-than-temporary impairment losses transferred from other comprehensive income (1)	—	63	—	350
Net impairment losses recognized in earnings (2)	$—	$63	$—	$357

____

(1) Represents other-than-temporary impairment losses related to all other factors.
(2) Represents other-than-temporary impairment losses related to credit losses.

The OTTI recognized on investment securities available for sale in 2013 relates to one non-agency collateralized mortgage obligation. Another security for which OTTI had been recognized in 2012 was sold in the first quarter of 2013. Each of these securities held various levels of credit subordination. These securities were valued by third-party pricing services using matrix or model pricing methodologies and were corroborated by broker indicative bids. We estimated the cash flows of the underlying collateral for each security considering credit, interest and prepayment risk models that incorporate management’s estimate of projected key assumptions including prepayment rates, collateral default rates and loss severity. Assumptions utilized vary from security to security, and are influenced by factors such as underlying loan interest rates, geographic location, borrower characteristics, vintage, and historical experience. We then used a third party to obtain information about the structure of each security, including subordination and other credit enhancements, in order to determine how the underlying collateral cash flows will be distributed to each security issued in the structure. These cash flows were then discounted at the interest rate equal to the yield anticipated at the time the security was purchased. We review the actual collateral performance of these securities on a quarterly basis and update the inputs as appropriate to determine the projected cash flows.

On June 30, 2013, six securities with an amortized cost of $8,512,039 were transferred from the available-for-sale category to the held-to-maturity category of the portfolio. The fair market value of the securities at the time of transfer was $8,234,244. The unrealized loss of $277,795 will continue to be reported as a component of accumulated other comprehensive income, net of tax, and amortized over the remaining life of the securities as an adjustment to yield. Upon transfer to the held-to-maturity category, premium and discount accounts were adjusted to reflect the fair market value of the security. The resulting premiums and discounts will also be amortized as an adjustment to yield.

See Note 9 “Fair Value of Financial Instruments” for more information on the calculation of fair or carrying value for the investment securities.

As of September 30, 2013, the Company had specific reserves of $531,000 on TDRs, and there were no TDRs in default.

The allowance for loan losses and reserve for unfunded commitments are maintained at levels considered adequate by management to provide for probable loan losses as of the reporting dates. The allowance for loan losses and reserve for unfunded commitments are based on management's assessment of various factors affecting the loan portfolio, including problem loans, business conditions and loss experience, and an overall evaluation of the quality of the underlying collateral. Changes in the allowance for loan losses and the reserve for unfunded commitments during the

three and nine month periods ended September 30, 2013 and 2012 are as follows:

	Allowance for Loan Losses for the three months ended September 30, 2013

Adjustment	—	(2)	—	—
Allowance — Unfunded Commitments at end of period	$ 15	$ 13	$ 15	$ 13

Management's policy is to charge off loans or portions of loans as soon as an identifiable loss amount can be determined from evidence obtained, such as current cash flow information, updated appraisals or similar real estate

evaluations, equipment, inventory or similar collateral evaluations, accepted offers on loan sales or negotiated discounts, and/or guarantor asset valuations. In situations where problem loans are dependent on collateral liquidation for repayment, management obtains updated independent valuations, such as appraisals or broker opinions, generally no less frequently than once every twelve months and more frequently for larger or more troubled loans. In the time period between these independent valuations, the Company monitors market conditions for any significant event or events that would materially change the valuations, and updates them as appropriate. If the valuations

Table of Contents

suggest an increase in collateral values, the Company does not recover prior amounts charged off until the assets are actually sold and the increase realized. However, if the updated valuations suggest additional loss, the Company charges off the additional amount.

The following tables summarize impaired loans:

(*) Interest Income on individually impaired loans is calculated using the cash-basis method, using year to date interest on loans outstanding at 9/30.

Loan Risk Factors

The following is a recap of the risk characteristics associated with each of the Company's major loan portfolio segments.

Commercial Loans: Although the impacts of the soft recovery continue to heighten risk in the commercial portfolio, management does not consider the portfolio to present “concentration risk” at this time. Management believes there is adequate diversification by type, industry, and geography to mitigate excessive risk. The commercial portfolio includes a mix of term loan facilities and operating loans and lines made to a variety of different business types in the markets it serves. The Company utilizes SBA, USDA and other government-assisted or guaranteed financing programs whenever advantageous to further mitigate risk in this area. With the exception of the agricultural portfolio discussed in more detail below, there is no other significant concentration of industry types in its loan portfolio, and

no dominant employer or industry across all the markets it serves. Underwriting focuses on the evaluation of potential future cash flows to cover debt requirements, sufficient collateral margins to buffer against devaluations, credit history of the business and its principals, and additional support from willing and capable guarantors.

Commercial Real Estate Loans: Recovering economic conditions and stabilizing commercial property values have reduced risk in this segment from prior recent quarters. In comparison to its national peer group, the Company has less overall exposure to commercial real estate and a stronger mix of owner-occupied (where the borrower occupies and operates in at least part of the building) versus non-owner occupied loans. The loans represented in this category are spread across the Company's footprint, and there are no significant concentrations by industry type or borrower. The most significant property types represented in the portfolio are office 21.3%, industrial 15.7%, health care 14.4% and retail 14.1%. The other 34.5% is a mix of property types with smaller concentrations, including religious facilities, auto-related properties, restaurants, convenience stores, storage units, motels and commercial investment land.

While 68.3% of the Company's commercial real estate portfolio is in its Northern Idaho/Eastern Washington region, this region is a large and diverse region with differing local economies and real estate markets. Given this diversity, and the diversity of property types and industries represented, management does not believe that this concentration represents a significant concentration risk.

Non-owner occupied commercial real estate loans are made only to projects with strong debt-service-coverage and lower loan-to-value ratios and/or to borrowers with established track records and the ability to fund potential project cash flow shortfalls from other income sources or liquid assets. Project due diligence is conducted by the Bank, to help provide for adequate contingencies, collateral and/or government guaranties. The Company has largely avoided speculative financing of investment properties, particularly of the types most vulnerable in the recent downturn, including investment office buildings and retail strip developments. Management believes geographic, borrower and property-type diversification, and prudent underwriting and monitoring standards applied by seasoned commercial lenders mitigate concentration risk in this segment.

Construction and Development Loans: After the aggressive reduction efforts of the past few years, the land development and commercial construction loan components pose much lower concentration risk for the total loan portfolio, and now total $40.5 million, or 7.7% of the loan portfolio. The substantial portfolio reduction, combined with stabilizing real estate values, has reduced risk in this portfolio to a level where it no longer represents a significant concentration risk.

Agricultural Loans: The agricultural portfolio represents a larger percentage of the loans in the Bank's southern Idaho region. At the end of the period, agricultural loans and agricultural real estate loans totaled $97.5 million or 18.4% of the total loan portfolio. The agricultural portfolio consists of loans secured by livestock, crops and real estate. Agriculture has typically been a cyclical industry with periods of both strong and weak performance. Current conditions remain strong but may weaken in the next few years because of rising input costs, weaker commodity prices, and potential water shortages. To mitigate credit risk, specific underwriting is applied to retain only borrowers that have proven track records in the agricultural industry. Many of Intermountain's agricultural borrowers are third or fourth generation farmers and ranchers with limited real estate debt, which reduces overall debt coverage requirements and provides extra flexibility and collateral for equipment and operating borrowing needs. In addition, the Bank has hired senior lenders with significant experience in agricultural lending to administer these loans. Further mitigation is provided through frequent collateral inspections, adherence to farm operating budgets, and annual or more frequent review of financial performance.

Multifamily: The multifamily segment comprises $15.8 million or 3.0% of the total loan portfolio at the end of the period. This portfolio represents relatively low risk for the Company, as a result of the strong current market for multifamily properties and low vacancy rates across the Company's footprint.

Residential Real Estate, Residential Construction and Consumer: Residential real estate, residential construction and consumer loans total $72.0 million or 13.6% of the total loan portfolio. Management does not believe they represent significant concentration risk. However, continuing soft employment conditions and reduced home equity is putting

pressure on some borrowers in this portfolio.

Municipal loans: Municipal loans comprise $6.1 million or 1.1% of the total loan portfolio. The small size of the portfolio and careful underwriting of the loans within it limit overall concentration risk in this segment.

Table of Contents

Credit quality indicators

The risk grade analyses included as part of the Company's credit quality indicators for loans and leases are developed through review of individual borrowers on an ongoing basis. Each loan is evaluated at the time of origination and each subsequent renewal. Loans with principal balances exceeding $500,000 are evaluated on a more frequent basis. Trigger events (such as loan delinquencies, customer contact, and significant collateral devaluation) also require an updated credit quality review. Loans with risk grades four through eight are evaluated at least annually with more frequent evaluations often done as borrower, collateral or market conditions change. In situations where problem loans are dependent on collateral liquidation for repayment, management obtains updated independent valuations, generally no less frequently than once every twelve months and more frequently for larger or more troubled loans.

Other measurements used to assess credit quality, including delinquency statistics, nonaccrual and OREO levels, net chargeoff activity, and classified asset trends, are updated and evaluated monthly.

These risk grades are defined as follows:

Satisfactory — A satisfactory rated loan is not adversely classified because it does not display any of the characteristics for adverse classification.

Watch — A watch loan has a solid but vulnerable repayment source. There is loss exposure only if the primary repayment source and collateral experience prolonged deterioration. Loans in this risk grade category are subject to frequent review and change due to the increased vulnerability of repayment sources and collateral valuations.

Special mention — A special mention loan has potential weaknesses that deserve management’s close attention. If left uncorrected, such potential weaknesses may result in deterioration of the repayment prospects or collateral position at some future date. Special mention loans are not adversely classified and do not warrant adverse classification.

Substandard — A substandard loan is inadequately protected by the current net worth and paying capacity of the obligor or of the collateral pledged, if any. Loans classified as substandard generally have a well-defined weakness, or weaknesses, that jeopardize the liquidation of the debt. These loans are characterized by the distinct possibility of loss if the deficiencies are not corrected.

Doubtful — A loan classified doubtful has all the weaknesses inherent in a loan classified substandard with the added characteristic that the weaknesses make collection or liquidation in full highly questionable and improbable, on the basis of currently existing facts, conditions, and values.

Loss — Loans classified loss are considered uncollectible and of such little value that their continuing to be carried as an asset is not warranted. This classification does not necessarily mean that there is to no potential for recovery or salvage value, but rather that it is not appropriate to defer a full write-off even though partial recovery may be realized in the future.

Credit quality indicators by loan segment are summarized as follows:

Table of Contents

Loan Portfolio Credit Grades by Type
September 30, 2013

	Satisfactory Grade 1-3	Internal Watch Grade 4	Special Mention Grade 5	Substandard Grade 6	Doubtful Grade 7	Total
	(Dollars in thousands)					
Commercial	$77,509	$26,461	$804	$6,464	$—	$111,238
Commercial real estate	142,546	39,171	—	3,399	—	185,116

The following table summarizes non-performing assets and classified loans at the dates indicated:

	September 30, 2013	December 31, 2012
	(Dollars in thousands)	
Loans past due in excess of 90 days and still accruing	$42	$—
Non-accrual loans	2,808	6,529
Total non-performing loans	2,850	6,529
Other real estate owned (“OREO”)	4,236	4,951
Total non-performing assets (“NPAs”)	$7,086	$11,480
Classified loans (1)	$23,098	$24,933

1)

Classified loan totals are inclusive of non-performing loans and may also include troubled debt restructured loans, depending on the grading of these restructured loans.

Table of Contents

5. Other Borrowings:
The components of other borrowings are as follows (in thousands):

	September 30, 2013	December 31, 2012
Term note payable (1)	$8,279	$8,279
Term note payable (2)	8,248	8,248
Total other borrowings	$16,527	$16,527

(1) In January 2003, the Company issued $8.0 million of Trust Preferred securities through its subsidiary, Intermountain Statutory Trust I. The debt associated with these securities bears interest on a variable basis tied to the 90-day LIBOR (London Inter-Bank Offering Rate) index plus 3.25%, with interest only paid quarterly. The rate on this borrowing was 3.50% at September 30, 2013. The debt is callable by the Company quarterly and matures in March 2033. See Note A below.

(2) In March 2004, the Company issued $8.0 million of Trust Preferred securities through its subsidiary, Intermountain Statutory Trust II. The debt associated with these securities bears interest on a variable basis tied to the 90-day LIBOR index plus 2.8%, with interest only paid quarterly. The rate on this borrowing was 3.07% at September 30, 2013. The debt is callable by the Company quarterly and matures in April 2034. During the third quarter of 2008, the Company entered into an interest rate swap contract with Pacific Coast Bankers Bank. The purpose of the $8.2 million notional value swap is to convert the variable rate payments made on our Trust Preferred I obligation to a series of fixed rate payments at 7.38% for five years, as a hedging strategy to help manage the Company's interest-rate risk. This swap terminates in the fourth quarter of 2013. See Note A below:

A) Intermountain's obligations under the debentures issued to the trusts referred to above constitute a full and unconditional guarantee by Intermountain of the Statutory Trusts' obligations under the Trust Preferred Securities. In accordance with ASC 810, Consolidation, the trusts are not consolidated and the debentures and related amounts are treated as debt of Intermountain.

6. Earnings Per Share:
The following table presents the basic and diluted earnings per share computations (numbers in thousands):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2013	2012	2013	2012
Numerator:				
Net income - basic and diluted	$1,932	$825	$5,399	$2,408
Preferred stock dividend	461	482	1,380	1,430
Net income applicable to common stockholders	$1,471	$343	$4,019	$978
Denominator:				
Weighted average shares outstanding - basic	6,443,294	6,441,986	6,443,193	5,593,487
Dilutive effect of common stock options, warrants, restricted stock awards	54,592	16,241	44,901	16,539
Weighted average shares outstanding — diluted	6,497,886	6,458,227	6,488,094	5,610,026
Earnings per share — basic and diluted:				
Earnings per share — basic	$0.23	$0.05	$0.62	$0.17
Effect of dilutive common stock options, warrants, restricted stock awards	—	—	—	—
Earnings per share — diluted	$0.23	$0.05	$0.62	$0.17

All shares in the table above have been adjusted to reflect the impact of a 10-for-1 reverse stock split, effective, October 5, 2012.

Table of Contents

At September 30, 2013 and September, 2012, there were 6,141 and 14,550 anti-dilutive common stock options, respectively, not included in diluted earnings per share. At September 30, 2013, and September 30, 2012, there were 65,323 anti-dilutive common stock warrants-Series A not included in diluted earnings per share.
As part of the Company's January 2012 capital raise (see Note 7 "Stockholders' Equity"), warrants were issued for 1,700,000 shares, and on a reverse-split adjusted basis, 170,000 shares of non-voting common stock. The impacts of these warrants were included in diluted earnings per share, and were calculated using the treasury stock method.

7. Stockholders' Equity:
On December 19, 2008, the Company issued 27,000 shares of Fixed Rate Cumulative Perpetual Preferred Stock, no par value with a liquidation preference of $1,000 per share (“Preferred Stock”) a 10-year warrant to purchase up to 653,226 shares, and on a reverse-split adjusted basis, 65,323 shares, of Common Stock, no par value, as part of the Troubled Asset Relief Program Capital Purchase Program of the U.S. Department of Treasury (“U.S. Treasury”). The $27.0 million cash proceeds were allocated between the Preferred Stock and the warrant to purchase common stock based on the relative estimated fair values at the date of issuance, and the estimated value of the warrants was included in equity. The fair value of the warrants was determined under the Black-Scholes model. The model includes assumptions regarding the Company’s common stock prices, dividend yield, and stock price volatility as well as assumptions regarding the risk-free interest rate. The strike price for the warrant, as adjusted for the 10-for-1 reverse stock split, is $62.00 per share.
Dividends on the Series A Preferred Stock will accrue and be paid quarterly at a rate of 5% per year for the first 5 years and thereafter at a rate of 9% per year. The dividend rate will increase to 9% in December 2013. The shares of Series A Preferred Stock have no stated maturity, do not have voting rights except in certain limited circumstances and are not subject to mandatory redemption or a sinking fund.
The Series A Preferred Stock has priority over the Company’s common stock with regard to the payment of dividends and liquidation distributions. The Series A Preferred Stock qualifies as Tier 1 capital. The agreement with the U.S. Treasury contains limitations on certain actions of the Company, including the payment of quarterly cash dividends on the Company’s common stock in excess of current cash dividends paid in the previous quarter and the repurchase of its common stock during the first 3 years of the agreement. In addition, the Company agreed that, while the U.S. Treasury owns the Series A Preferred Stock, the Company’s employee benefit plans and other executive compensation arrangements for its senior executive officers must comply with Section 111(b) of the Emergency Economic Stabilization Act of 2008.
As part of the Company's capital raise in January, 2012, the Company authorized up to 864,600 shares of Mandatorily Convertible Cumulative Participating Preferred Stock, Series B, no par value with a liquidation preference of $0.01 per share (“Series B Preferred Stock”), 698,993 of which were issued. Each of these shares automatically converted into 50 shares of a new series of non-voting common stock at a conversion price of $1.00 per share (the “Non-Voting Common Stock”) in May, 2012 after shareholder approval of such Non-Voting Common Stock. The Non-Voting Common Stock has equal rights in terms of dividends and liquidation preference to the Company's Voting Common Stock, but does not provide holders with voting rights on shareholder matters. The reverse stock split reduced the number of non-voting shares outstanding.
In addition, as part of the Company's January 2012 capital raise, warrants to purchase 1,700,000 shares, and on a reverse-split adjusted basis, 170,000 shares of the Company's Voting Common or Non-Voting Common were issued to two of the shareholders participating in the raise. The cash proceeds of the January offering were allocated between the warrants, the Common Stock and the Series B Preferred Stock based on the relative estimated fair values at the date of issuance. The fair value of the warrants was determined using common valuation modeling. The modeling includes assumptions regarding the Company’s common stock prices, dividend yield, and stock price volatility as well as assumptions regarding the risk-free interest rate. The strike price for the warrant, on a reverse-split adjusted basis, is $10 per share, but is adjusted down if the Company recorded or otherwise issues shares at a price lower than the strike price. As such, the warrants are accounted for as a liability and listed at fair value on the Company's financial statements. Adjustments to the fair value are measured quarterly and any changes are recorded through non-interest income.

In May 2012, the Company successfully completed an $8.7 million Common Stock rights offering, including the purchase of unsubscribed shares by investors in the Company's January private placement. As a result of the raise, the Company, issued, on a reverse-split adjusted basis, 525,000 shares of Voting Common stock and 345,000 shares of Non-Voting Common Stock.

8. Income Taxes:

For the three and nine month periods ended September 30, 2013 and September 30, 2012, respectively, the Company recorded no income tax provision. In each of these periods, the Company generated positive net income before income taxes, but recorded no provision as it offset current income against carryforward losses from prior years. The Company maintained a net deferred tax asset of $14.9 million and $12.3 million as of September 30, 2013 and December 31, 2012, net of a valuation allowance

Table of Contents

of $6.8 million and $8.5 million, respectively. The increase in the deferred tax asset at September 30, 2013 from December 31, 2012 reflected the potential tax impacts associated with a reduction in the fair value of the Company's investments available for sale during the quarter.

Intermountain uses an estimate of future earnings, future reversal of taxable temporary differences, and tax planning strategies to determine whether it is more likely than not that the benefit of the deferred tax asset will be realized. At September 30, 2013, Intermountain assessed whether it was more likely than not that it would realize the benefits of its deferred tax asset. Intermountain determined that the negative evidence associated with a three-year cumulative loss for the period ended December 31, 2011, and soft economic conditions continued to outweigh the positive evidence, although improvements in both the economy and the Company's income in recent quarters are providing stronger positive evidence. While Intermountain maintained the valuation allowance of $6.8 million against its deferred tax asset at September 30, as compared to an $8.5 million valuation allowance at the end of 2012, it analyzes the deferred tax asset on a quarterly basis and may increase the allowance or release a portion or all of this allowance depending on actual results and estimates of future profitability. Including the valuation allowance, Intermountain had a net deferred tax asset of $14.9 million as of September 30, 2013, compared to a net deferred tax asset of $12.3 million as of December 31, 2012. The increase in the deferred tax asset at September 30, 2013 from prior periods reflected the potential tax impacts associated with a reduction in the fair value of the Company's investments available for sale during the quarter.

In conducting its valuation allowance analysis, the Company developed an estimate of future earnings to determine both the need for a valuation allowance and the size of the allowance. In conducting this analysis, management has assumed economic conditions will continue to be challenging in 2013, followed by gradual improvement in the ensuing years. As such, its estimates include lower credit losses in 2013 and ensuing years as the Company’s loan portfolio continues to turn over. It also assumes: (1) a compressed net interest margin in 2013 and 2014, with gradual improvement in future years, as the Company is able to convert some of its cash position to higher yielding instruments; and (2) reductions in operating expenses as credit costs abate and its other cost reduction strategies continue.

The completion of the $47.3 million capital raise in January 2012 triggered Internal Revenue Code Section 382 limitations on the amount of tax benefit from net operating loss carryforwards that the Company can utilize annually, because of the level of investment by several of the larger investors. This could impact the amount and timing of the release of the valuation allowance, largely depending on the level of market interest rates and the fair value of the Company’s balance sheet at the time the offering was completed. The evaluation of this impact is still being completed and will likely not be known until the fourth quarter of 2013. Based on its preliminary analysis, the Company believes that it should be able to recapture most or all of its tax benefit from the net operating loss carryforwards in the 20-year carryforward period, even given the Section 382 limitations. As with other future estimates, the Company cannot guarantee these future results.

Intermountain has performed an analysis of its uncertain tax positions and has not recorded any potential penalties, interest or additional tax in its financial statements as of September 30, 2013. If Intermountain did incur penalties or interest, they would be reported in the income tax provision. Intermountain’s tax positions for the years 2009 through 2012 remain subject to review by the Internal Revenue Service. Intermountain does not expect unrecognized tax benefits to significantly change within the next twelve months.

9. Fair Value of Financial Instruments:

Intermountain is required to disclose the estimated fair value of financial instruments, both assets and liabilities on and off the balance sheet, for which it is practicable to estimate fair value. These fair value estimates are made at June 30, 2013 based on relevant market information and information about the financial instruments. Fair value estimates are intended to represent the price an asset could be sold at or the price a liability could be settled for. However, given there is no active market or observable market transactions for many of the Company's financial instruments, the Company has made estimates of many of these fair values which are subjective in nature, involve uncertainties and matters of significant judgment and therefore cannot be determined with precision. Changes in assumptions could significantly affect the estimated values.

24

Table of Contents

The estimated fair value of the instruments as of September 30, 2013 and December 31, 2012 are as follows (in thousands):

	Fair Value Measurements as of				
		September 30, 2013		December 31, 2012	
	Level	Carrying Amount	Fair Value	Carrying Amount	Fair Value
Financial assets:					
Cash, cash equivalents, restricted cash and federal funds sold	1	$38,003	$38,003	$80,085	$80,085
Available-for-sale securities	2 & 3	265,000	265,000	280,169	280,169
Held-to-maturity securities	2	26,241	27,459	14,826	16,344
Loans held for sale	2	721	721	1,684	1,684
Loans receivable, net	3	520,239	530,669	520,768	536,003
Accrued interest receivable	2	4,310	4,310	4,320	4,320
BOLI	1	9,725	9,725	9,472	9,472
Other assets	2	2,081	2,081	2,024	2,024
Financial liabilities:					
Deposit liabilities	3	711,072	669,358	748,934	751,808
Borrowings	3	84,936	85,638	97,265	94,673
Accrued interest payable	2	307	307	1,185	1,185
Unexercised warrants	3	1,004	1,004	828	828
Other liabilities	2	90	90	328	328

Fair value is defined under ASC 820-10 as the price that would be received for an asset or paid to transfer a liability (an exit price) in the principal market for the asset or liability in an orderly transaction between market participants on the measurement date. Fair value estimates are based on quoted market prices, if available. If quoted market prices are not available, fair value estimates are based on quoted market prices of similar assets or liabilities, or the present value of expected future cash flows and other valuation techniques. These valuations are significantly affected by discount rates, cash flow assumptions, and risk and other assumptions used. Therefore, fair value estimates may not be substantiated by comparison to independent markets and are not intended to reflect the proceeds that may be realizable in an immediate settlement of the instruments.

Fair value is determined at one point in time and is not representative of future value. These amounts do not reflect the total value of a going concern organization. Management does not have the intention to dispose of a significant portion of its assets and liabilities and therefore, the unrealized gains or losses should not be interpreted as a forecast of future earnings and cash flows.

In support of these representations, ASC 820-10 establishes a fair value hierarchy that prioritizes the information used to develop those assumptions. The fair value hierarchy is as follows:

Level 1 inputs — Unadjusted quoted prices in active markets for identical assets or liabilities that the entity has the ability to access at the measurement date.

Level 2 inputs — Inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. These might include quoted prices for similar assets and liabilities in active markets, and inputs other than quoted prices that are observable for the asset or liability, such as interest rates and yield curves that are observable at commonly quoted intervals.

Level 3 inputs — Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities. Level 3 assets and liabilities include financial instruments whose value is determined using pricing models, discounted cash flow methodologies, or similar techniques, as well as instruments for which the determination of fair values requires significant management judgment or estimation.

The methods and assumptions used to estimate the fair values of each class of financial instruments are as follows:

Cash, Cash Equivalents, Federal Funds and Certificates of Deposit

The carrying value of cash, cash equivalents, federal funds sold and certificates of deposit approximates fair value due to the relatively short-term nature of these instruments.

Securities

25

Table of Contents

The fair values of securities, other than those categorized as level 3 described below, are based principally on market prices and dealer quotes. Certain fair values are estimated using pricing models or are based on comparisons to market prices of similar securities. Securities totaling $257.8 million classified as available for sale are reported at fair value utilizing Level 2 inputs. For these securities, the Company obtained fair value measurements from an independent pricing service and internally validated these measurements. The fair value measurements consider observable data that may include dealer quotes, market spreads, cash flows, the U.S. Treasury yield curve, live trading levels, trade execution data, market consensus, prepayment speeds, credit information and the bond's terms and conditions, among other things.

The available for sale portfolio also includes $7.2 million in super senior or senior tranche collateralized mortgage obligations not backed by a government or other agency guarantee. These securities are valued using Level 3 inputs. These securities are collateralized by fixed rate prime or Alt A mortgages, are structured to provide credit support to the senior tranches, and are carefully analyzed and monitored by management. Because of disruptions in the current market for mortgage-backed securities and collateralized mortgage obligations, an active market did not exist for these securities at September 30, 2013. This is evidenced by a significant widening in the bid-ask spread for these types of securities and the limited volume of actual trades made. As a result, less reliance can be placed on easily observable market data, such as pricing on transactions involving similar types of securities, in determining their current fair value. As such, significant adjustments were required to determine the fair value at the September 30, 2013 measurement date.

In valuing these securities, the Company utilized the same independent pricing service as for its other available-for-sale securities and internally validated these measurements. In addition, it utilized FHLB indications, which are backed by significant experience in whole-loan collateralized mortgage obligation valuation and another market source to derive independent valuations, and used this data to evaluate and adjust the original values derived. In addition to the observable market-based input including dealer quotes, market spreads, live trading levels and execution data, both the pricing service and the FHLB pricing also employed a present-value income model that considered the nature and timing of the cash flows and the relative risk of receiving the anticipated cash flows as agreed. The discount rates used were based on a risk-free rate, adjusted by a risk premium for each security. In accordance with the requirements of ASC 820-10, the Company has determined that the risk-adjusted discount rates utilized appropriately reflect the Company's best estimate of the assumptions that market participants would use in pricing the assets in a current transaction to sell the asset at the measurement date. Risks include nonperformance risk (that is, default risk and collateral value risk) and liquidity risk (that is, the compensation that a market participant receives for buying an asset that is difficult to sell under current market conditions). To the extent possible, the pricing services and the Company validated the results from these models with independently observable data.

BOLI

The fair value of BOLI is equal to the cash surrender value of the life insurance policies.

Other Assets

Other assets include FHLB stock and an interest rate swap. The fair value of stock in the FHLB equals its carrying amount since such stock is only redeemable at its par value. The fair value of the interest rate swap is discussed below.

Loans Receivable and Loans Held For Sale

The fair value of performing mortgage loans, commercial real estate, construction, consumer and commercial loans is estimated by discounting the cash flows using interest rates that consider the interest rate risk inherent in the loans and current economic and lending conditions. See the discussion below for fair valuation of impaired loans. Non-accrual loans are assumed to be carried at their current fair value and therefore are not adjusted.

Deposits

The fair values for deposits subject to immediate withdrawal such as interest and non-interest bearing checking, savings and money market deposit accounts are discounted using market rates for replacement dollars and using Company and industry statistics for decay/maturity dates. The carrying amounts for variable-rate certificates of deposit approximate their fair value at the reporting date. Fair values for fixed-rate certificates of deposit are estimated by discounting future cash flows using interest rates currently offered on time deposits with similar remaining maturities.

Borrowings

The fair value of short-term borrowing under repurchase agreements is calculated using market rates for replacements and using the Bank's funding migration analysis.

Table of Contents

The fair value of long-term FHLB Seattle advances and other long-term borrowings is estimated using discounted cash flow analyses based on the Company's current incremental borrowing rates for similar types of borrowing arrangements with similar remaining terms. The carrying amounts of variable rate Trust Preferred instruments approximate their fair values due to the relatively short period of time between repricing dates.

Accrued Interest

The carrying amounts of accrued interest payable and receivable approximate their fair value.

Interest Rate Swaps

The Company holds several interest rate swaps as a hedging strategy to help manage the Company's interest-rate-risk. Derivative contracts are valued by the counter party and are periodically validated by management. The counter-party determines the fair value of interest rate swaps using a discounted cash flow method based on current incremental rates for similar types of arrangements.

Unexercised Warrant Liability

A liability for unexercised warrants was created as part of the Company's capital raise in January, 2012 (see Note 7--Stockholders' Equity). The liability is carried at fair value and adjustments are made periodically through non-interest income to record changes in the fair value. The fair value is measured using warrant valuation modeling techniques, which seek to estimate the market price that the unexercised options would bring if sold. Assumptions used in calculating the value include the volatility of the underlying stock, the risk-free interest rate, the expected term of the warrants, the market price of the underlying stock and the dividend yield on the stock.

Assets and Liabilities Measured at Fair Value on a Recurring Basis

The following tables present information about the Company's assets measured at fair value on a recurring basis as of September 30, 2013, and December 31, 2012, and indicate the fair value hierarchy of the valuation techniques utilized by the Company to determine such fair value (in thousands).

Description	Total	Level 1	Level 2	Level 3
Balance, 09/30/2013				
Available-for-Sale Securities:				
Corporate Bonds	$5,998	$—	$5,998	$—
State and municipal bonds	49,908	—	49,908	—
Residential mortgage backed securities and SBA Pools	209,094	—	201,896	7,198
Other Assets — Derivative	(147)	—	—	(147)

Table of Contents

The following tables present additional quantitative information about assets and liabilities measured at fair value on a recurring basis and for which the company has utilized Level 3 inputs to determine fair value, as of September 30, 2013:

	Valuation Techniques	Unobservable Input	Range of Inputs
Residential mortgage-backed securities	Discounted cash flow and consensus pricing	Prepayment	9.9% to 52.73% CPR (1)
		Default rates	(0.15)% to 15.88% CDR (2)
		Loss severities	0% to 85.09%
Interest Rate Derivatives	Discounted cash flow modeling and market indications	Cash flows of underlying instruments	Various payment mismatches based on characteristics of underlying loans
		Swap rates	0.50% to 1.00%
		LIBOR rates	0.19% to 0.42%
Unexercised Warrants	Warrant valuation models	Estimated underlying stock price volatility	60% to 100%
		Duration	1.25 to 2.0 years
		Risk-free rate	0.30% to 0.50%

(1) CPR: Constant prepayment rate
(2) CDR: Constant default rate

Assets and Liabilities Measured at Fair Value on a Non-Recurring Basis
Intermountain may be required, from time to time, to measure certain other financial assets at fair value on a non-recurring basis. The following table presents the carrying value for these financial assets as of dates indicated (in thousands):

Description	Total	Level 1	Level 2	Level 3
Balance, 09/30/2013				
Loans(1)	$15,537	$—	$—	$15,537
OREO	4,236	—	—	4,236
Total Assets Measured at Fair Value	$19,773	$—	$—	$19,773
Balance, 12/31/2012				
Loans(1)	$14,629	$—	$—	$14,629
OREO	4,951	—	—	4,951
Total Assets Measured at Fair Value	$19,580	$—	$—	$19,580

(1) Represents impaired loans, net of allowance for loan loss, which are included in loans.

The following table presents additional quantitative information about assets measured at fair value on a nonrecurring basis and for which the company has utilized Level 3 inputs to determine fair value at September 30, 2013:

Table of Contents

	Valuation Techniques	Unobservable Input	Range of Inputs
Impaired Loans	Discounted cash flows and appraisal of collateral	Amount and timing of cash flows	No payment deferral to indefinite payment deferral
		Discount Rate	4% to 9%
		Appraisal adjustments	10% to 35%
		Liquidation Expenses	10% to 15%
OREO	Appraisal of collateral	Appraisal adjustments	10% to 35%
		Liquidation Expenses	10% to 15%

Impaired Loans

Periodically, the Company records nonrecurring adjustments to the carrying value of loans based on fair value measurements for partial charge-offs of the uncollectible portions of those loans. Nonrecurring adjustments also include certain impairment amounts for impaired loans when establishing the allowance for credit losses. Such amounts are generally based on either the estimated fair value of the cash flows to be received or the fair value of the underlying collateral supporting the loan less selling costs. Real estate collateral on these loans and the Company’s OREO is typically valued using appraisals or other indications of value based on recent comparable sales of similar properties or assumptions generally observable in the marketplace. Management reviews these valuations and makes additional valuation adjustments, as necessary, including subtracting estimated costs of liquidating the collateral or selling the OREO. If the value of the impaired loan is determined to be less than the recorded investment in the loans, the impairment is recognized and the carrying value of the loan is adjusted to fair value through the allowance for loan and lease losses. The carrying value of loans fully charged off is zero. The related nonrecurring fair value measurement adjustments have generally been classified as Level 3 because of the significant assumptions required in estimating future cash flows on these loans, and the uncertain collateral values underlying the loans. Volatility and the lack of relevant and current sales data in the Company’s market areas for various types of collateral create additional uncertainties and require the use of multiple sources and management judgment to make adjustments. Loans subject to nonrecurring fair value measurement were $15.5 million at September 30, 2013 all of which were classified as Level 3.

OREO

OREO represents real estate which the Company has taken control of in partial or full satisfaction of loans. At the time of foreclosure, Generally Accepted Accounting Principles (“GAAP”) states that OREO is recorded at its fair value less cost to sell. Any write-downs based on the asset’s fair value at the date of acquisition are charged to the allowance for loan and lease losses. After foreclosure, management periodically performs valuations such that the real estate is carried at the lower of its new cost basis or fair value, net of estimated costs to sell. Fair value adjustments on other real estate owned are recognized within net loss on real estate owned as a component of non-interest expense. Fair value is determined from external appraisals and other valuations using judgments and estimates of external professionals. Many of these inputs are not observable and, accordingly, these measurements are classified as Level 3. The Company’s OREO at September 30, 2013 totaled $4.2 million, all of which was classified as Level 3.

10. New Accounting Pronouncements:

In January 2013, the FASB issued ASU No. 2013-01, "Clarifying the Scope of Disclosures about Offsetting Assets and Liabilities." ASU No. 2013-01 clarifies that ASU No. 2011-11 applies only to derivatives, including bifurcated embedded derivatives, repurchase agreements and reverse repurchase agreements, and securities borrowing and securities lending transactions that are either offset or subject to an enforceable master netting arrangement or similar agreement. The amendments are effective for annual and interim reporting periods beginning on or after January 1, 2013. The adoption of ASU No. 2013-01 did not have a material impact on the Company's consolidated financial statements.

In February 2013, the FASB issued ASU No. 2013-02, "Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income." ASU No. 2013-02 requires an entity to provide information about the amounts reclassified out of accumulated other comprehensive income. The amendments are effective for annual and interim reporting periods beginning on or after December 15, 2012. The adoption of ASU No. 2013-02 did not have a material impact on the Company's consolidated financial statements.

Table of Contents

In July 2013, the FASB issued ASU 2013-10, "Inclusion of the Fed Funds Effective Swap Rate (or Overnight Index Swap Rate) as a Benchmark Interest Rate for Hedge Accounting Purposes." ASU No. 2013-10 provides for the inclusion of the Fed Funds Effective Swap Rate as a US. benchmark interest rate for hedge accounting purposes, in addition to US Treasury obligations and LIBOR. ASU No. 2013-10 is effective for qualifying new or redesignated hedging relationships entered into on or after July 17, 2013 and is not expected to have a material impact on the Company's consolidated financial statements.
In July 2013, the FASB issued ASU 2013-11, "Presentation of an Unrecognized Tax Benefit When a Net Operating Loss Carryforward, a Similar Tax Loss, or a Tax Credit Carryforward Exists." ASU 2013-11 provides guidance on the presentation of unrecognized tax benefits related to any disallowed portion of net operating loss carryforwards, similar tax losses, or tax credit carryforwards, if they exist. ASU 2013-11 is effective for fiscal years beginning after December 15, 2013, and is not expected to have a material impact on the Company's consolidated financial statements.

Item 2 — Management’s Discussion and Analysis of Financial Condition and Results of Operations

This report contains forward-looking statements. For a discussion about such statements, including the risks and uncertainties inherent therein, see “Forward-Looking Statements.” Management’s Discussion and Analysis of Financial Condition and Results of Operations should be read in conjunction with the Consolidated Financial Statements and Notes presented elsewhere in this report and in Intermountain’s Form 10-K for the year ended December 31, 2012.

General (Overview & History)

Intermountain Community Bancorp (“Intermountain” or the “Company”) is a bank holding company registered under the Bank Holding Company Act of 1956, as amended. The Company was formed as Panhandle Bancorp in October 1997 under the laws of the State of Idaho in connection with a holding company reorganization of Panhandle State Bank (the “Bank”) that was approved by the stockholders on November 19, 1997 and became effective on January 27, 1998. In September 2000, Panhandle Bancorp changed its name to Intermountain Community Bancorp.
Panhandle State Bank, a wholly owned subsidiary of the Company, was first opened in 1981 to serve the local banking needs of Bonner County, Idaho. Panhandle State Bank is regulated by the Idaho Department of Finance, the State of Washington Department of Financial Institutions, the Oregon Division of Finance and Corporate Securities and by the Federal Deposit Insurance Corporation (“FDIC”), its primary federal regulator and the insurer of its deposits. Since opening in 1981, the Bank grew by opening additional branch offices throughout Idaho and has also expanded into the states of Oregon and Washington. Intermountain also operates Trust and Investment Services divisions, which provide investment, insurance, wealth management and trust services to its clients.
The national economic recession and soft local markets slowed the Company’s growth during the past several years. In response, Company management shifted its priorities to improving asset quality, raising additional capital, maintaining a conservative balance sheet and improving the efficiency of its operations. After achieving its objectives in these areas and with stronger local economies, management is now exploring prudent growth opportunities in its market areas.
Intermountain offers banking and financial services that fit the needs of the communities it serves. Lending activities include consumer, commercial, commercial real estate, construction, mortgage and agricultural loans. A full range of deposit services are available including checking, savings and money market accounts as well as various types of certificates of deposit. Trust and wealth management services, investment and insurance services, business cash management and electronic banking solutions round out the Company’s product offerings.

Business Strategy & Opportunities

Intermountain seeks to differentiate itself by attracting, retaining and motivating highly experienced employees who are local market leaders, and supporting them with advanced technology, training and compensation systems. This

approach allows the Bank to provide local marketing and decision-making to respond quickly to customer opportunities and build leadership in its communities. Simultaneously, the Bank has focused on standardizing and centralizing administrative and operational functions to improve risk management, efficiency and the ability of the branches to serve customers effectively.

The Company's strengths include a strong, committed team of experienced banking officers, a loyal and low-cost deposit base, a sophisticated risk management system, and a strong operational and compliance infrastructure. In the current slow-growth

environment, the Company is leveraging these strengths to seek prudent growth opportunities while continuing to improve operating efficiency. In particular, Company management is focused on the following:

- Increasing and diversifying its loan origination activity by pursuing attractive small and mid-market commercial credits in its markets, originating commercial real estate loans to strong borrowers, originating mortgage loans to strong borrowers at conservative loan-to-values in rural and smaller suburban areas, expanding and diversifying its agricultural portfolio, and expanding its already strong government-guaranteed loan marketing efforts.
- Maintaining a conservative balance sheet and effectively managing Company risk amidst a still uncertain economic and regulatory environment.
- Increasing the efficiency of its operations by continuing to restructure processes, re-negotiate contracts and rationalize various business functions and units.
- Increasing local, transactional deposit balances while continuing to minimize interest expense by increasing referral activity and targeting specific business and non-profit groups.
- Offsetting regulatory pressures on current non-interest income streams by expanding its trust, investment and insurance sales, and pursuing opportunities to diversify into new fee-based programs serving both its existing clientele and new potential markets.

The Company successfully completed two capital raises in 2012, raising a net total of $50.3 million. The completion of these offerings allows the Company additional flexibility to pursue the above goals. In addition, management believes that disruption and consolidation in the market may lead to other opportunities as well, either through direct acquisition of other banks or by capitalizing on opportunities created by market disruption to attract strong new employees and customers.

Critical Accounting Policies

The accounting and reporting policies of Intermountain conform to Generally Accepted Accounting Principles (“GAAP”) and to general practices within the banking industry. The preparation of the financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates. Intermountain’s management has identified the accounting policies described below as those that, due to the judgments, estimates and assumptions inherent in those policies, are critical to an understanding of Intermountain’s Consolidated Financial Statements and Management’s Discussion and Analysis of Financial Condition and Results of Operations.

Investments. Assets in the investment portfolio are initially recorded at cost, which includes any premiums and discounts. Intermountain amortizes premiums and discounts as an adjustment to interest income using the interest yield method over the life of the security. The cost of investment securities sold, and any resulting gain or loss, is based on the specific identification method.

Management determines the appropriate classification of investment securities at the time of purchase.

Held-to-maturity securities are those securities that Intermountain has the intent and ability to hold to maturity, and are recorded at amortized cost. Available-for-sale securities are those securities that would be available to be sold in the future in response to liquidity needs, changes in market interest rates, and asset-liability management strategies, among others. Available-for-sale securities are reported at fair value, with unrealized holding gains and losses reported in stockholders’ equity as a separate component of other comprehensive income, net of applicable deferred income taxes.

During the quarter ended June 30, 2013, the Company transferred $8.5 million in securities from its available-for-sale portfolio to its held-to-maturity portfolio, based on management's intent and ability to hold these securities to maturity. This transfer was recorded at fair market value and the unrealized loss at the date of transfer continues to be reported as accumulated other comprehensive income, net of applicable deferred income taxes, and will be amortized over the remaining life of the securities as an adjustment to yield. Upon transfer to the held-to-maturity category, premium and discount accounts were adjusted to reflect the fair market value of the security. The resulting premiums and discounts will also be amortized as an adjustment to yield.

Management evaluates investment securities for other-than-temporary declines in fair value on a periodic basis. If the fair value of an investment security falls below its amortized cost and the decline is deemed to be other-than-temporary, the security's fair value will be analyzed based on market conditions and expected cash flows on the investment security. The unrealized loss is considered an other-than-temporary impairment. The Company then calculates a credit loss charge against earnings by subtracting the estimated present value of estimated future cash flows on the security from its amortized cost. The other-than-temporary impairment less the credit loss charge against earnings is a component of other comprehensive income.

Allowance For Loan Losses. In general, determining the amount of the allowance for loan losses requires significant judgment and the use of estimates by management. This analysis is designed to determine an appropriate level and allocation of the allowance

for losses among loan types and loan classifications by considering factors affecting loan losses, including: specific losses; levels and trends in impaired and nonperforming loans; historical bank and industry loan loss experience; current national and local economic conditions; volume, growth and composition of the portfolio; regulatory guidance; and other relevant factors. Management monitors the loan portfolio to evaluate the adequacy of the allowance. The allowance can increase or decrease based upon the results of management’s analysis.

The amount of the allowance for the various loan types represents management’s estimate of probable incurred losses inherent in the existing loan portfolio based upon historical bank and industry loan loss experience for each loan type. The allowance for loan losses related to impaired loans is based on the fair value of the collateral for collateral dependent loans, and on the present value of expected cash flows for non-collateral dependent loans. For collateral dependent loans, this evaluation requires management to make estimates of the value of the collateral and any associated holding and selling costs, and for non-collateral dependent loans, estimates on the timing and risk associated with the receipt of contractual cash flows.

Management believes the allowance for loan losses was adequate at September 30, 2013. While management uses available information to provide for loan losses, the ultimate collectability of a substantial portion of the loan portfolio and the need for future additions to the allowance will be based on changes in economic conditions and other relevant factors. A slowdown in economic activity could adversely affect cash flows for both commercial and individual borrowers, as a result of which the Company could experience increases in nonperforming assets, delinquencies and losses on loans. The allowance requires considerable judgment on the part of management, and material changes in the allowance can have a significant impact on the Company's financial position and results of operations.

Fair Value Measurements. ASC 820 “Fair Value Measurements” establishes a standard framework for measuring fair value in GAAP, clarifies the definition of “fair value” within that framework, and expands disclosures about the use of fair value measurements. A number of valuation techniques are used to determine the fair value of assets and liabilities in Intermountain’s financial statements. These include quoted market prices for securities, interest rate swap valuations based upon the modeling of termination values adjusted for credit spreads with counterparties, and appraisals of real estate from independent licensed appraisers, among other valuation techniques. Fair value measurements for assets and liabilities where there exists limited or no observable market data are based primarily upon estimates, and are often calculated based on the economic and competitive environment, the characteristics of the asset or liability and other factors. Therefore, the results cannot be determined with precision and may not be realized in an actual sale or immediate settlement of the asset or liability. Additionally, there are inherent weaknesses in any calculation technique, and changes in the underlying assumptions used, including discount rates and estimates of future cash flows, could significantly affect the results of current or future values. Significant changes in the aggregate fair value of assets and liabilities required to be measured at fair value or for impairment will be recognized in the income statement under the framework established by GAAP. If impairment is determined, it could limit the ability of Intermountain’s banking subsidiaries to pay dividends or make other payments to the Holding Company. See Note 9 to the Consolidated Financial Statements for more information on fair value measurements.

Income Taxes. Income taxes are accounted for using the asset and liability method. Under this method a deferred tax asset or liability is determined based on the enacted tax rates which will be in effect when the differences between the financial statement carrying amounts and tax basis of existing assets and liabilities are expected to be reported in the Company’s income tax returns. The effect on deferred taxes of a change in tax rates is recognized in income in the period that includes the enactment date. Valuation allowances are established to reduce the net carrying amount of deferred tax assets if it is determined to be more likely than not, that all or some portion of the potential deferred tax asset will not be realized. The Company uses an estimate of future earnings, an evaluation of its loss carryback ability and tax planning strategies to determine whether or not the benefit of its net deferred tax asset may be realized. The analysis used to determine whether a valuation allowance is required and if so, the amount of the allowance, is based on estimates of future taxable income and the effectiveness of future tax planning strategies. These estimates require significant management judgment about future economic conditions and Company performance.

Note 10, “New Accounting Pronouncements” in the Notes to the Consolidated Financial Statements, discusses new accounting pronouncements adopted by Intermountain and the expected impact of accounting pronouncements recently issued or proposed, but not yet required to be adopted.

Results of Operations

Overview. Intermountain recorded net income applicable to common stockholders of $4.0 million, or $0.62 per diluted share for the nine months ended September 30, 2013, compared with net income of $978,000, or $0.17 per diluted share for the nine months ended September 30, 2012. All earnings per share numbers reflect the impact of the 10-for-1 reverse stock split completed in October 2012. The improvement in net income for the period indicated over the comparable period last year resulted from decreases in the loan loss provision, interest expense and operating expense, and an increase in other income. These factors offset a decrease in interest income. For the quarter ended September 30, 2013, Intermountain recorded net income applicable to common stockholders of $1.5 million, or $0.23 per diluted share, compared with net income of $1.5 million, or $0.23 per diluted share, and $343,000, or $0.05 per diluted share for the quarters ended June 30, 2013 and September 30, 2012, respectively. Lower interest

Table of Contents

and operating expense and a modest recovery of loan loss provision expense in the third quarter of 2013 offset lower interest and other income to produce comparable results to the second quarter. Reductions in interest, operating and loan loss provision expenses also drove the improvement over the third quarter of last year.

The annualized return on average assets (“ROAA”) was 0.77% for the nine months ended September 30, 2013, as compared to 0.34% in the same period last year, and the annualized return on average common tangible equity (“ROAE”) was 6.12% in 2013 and 2.05% in 2012, respectively.

Net Interest Income. The most significant component of earnings for the Company is net interest income, which is the difference between interest income from the Company’s loan and investment portfolios, and interest expense on deposits, repurchase agreements and other borrowings. During the nine months ended September 30, 2013 and September 30, 2012, net interest income was $22.3 million and $23.1 million, respectively. The decrease in net interest income from last year reflects lower interest income on both loans and investments resulting primarily from declines in rates earned on these assets. Very low market rates and intense competition for strong borrowers continue to pressure both the Company's and its competitors' loan yields. Investment portfolio yields are also down, reflecting the impacts of Federal Reserve purchases of mortgage-backed securities, strong general demand for fixed income securities, and rapid prepayment speeds on the Company's mortgage-backed securities. Lower investment income also reflects a reduction in overall investment balances as the Company has been cautious in reinvesting the proceeds from prepayments on mortgage backed securities given the challenging rate environment. Interest expense on deposits continued to decrease as deposit rates declined in response to lower market rates, and CD volumes continued to contract. The decrease in interest expense on other borrowings from the same nine-month period last year reflected both lower average borrowing volumes and lower rates paid.

Average interest-earning assets decreased by 1.7% to $851.7 million for the nine months ended September 30, 2013 compared to $866.1 million for the nine months ended September 30, 2012. Average loans increased $10.4 million during this period, but were offset by a $24.8 million decrease in average investments and cash. Higher loan volumes reflect modestly stronger local market conditions and marketing efforts by Company lending staff.

Average interest-bearing liabilities decreased by $25.6 million, or 3.1%, for the nine month period ended September 30, 2013 compared to September 30, 2012. Average deposit balances decreased $10.4 million, or 1.5%, average Federal Home Loan Bank ("FHLB") advances decreased $24.1 million, or 83.2%, and average other borrowings increased $8.9 million, or 10.9%. The decrease in deposits primarily reflects payoffs of higher rate wholesale and retail CDs and the loss of savings balances associated with a terminated contract for secured credit cards. The decrease in FHLB advances reflects management’s focus on lowering interest expense and reducing higher rate or non-relationship funding, while the increase in other borrowings resulted from stronger repurchase demand by the Company's municipal customers.

The net interest margin was 3.49% for the nine months ended September 30, 2013 as compared to 3.56% in the comparable period of 2012. Decreases in the average yields on both loans and investments more than offset lower deposit and borrowing costs.

The Company continues to operate in an unprecedented low rate environment, in which the Fed Funds target rate is less than 0.25% and the Federal Reserve continues to purchase mortgage assets to reduce longer rates. After increasing about 1% in the second quarter of 2013, yields on the 10-year US Treasury bond stabilized in the third quarter, as the Federal Reserve decided not to reduce its bond purchases amidst strong speculation that it would. Recent market rate movements had a negligible impact on the Company's earnings during the quarter, as the increase in longer yields from the prior quarter did not translate directly into higher yields on the Company's earning assets. The Company's short-term variable rate loans are tied primarily to the national prime rate or the overnight or one-month London Interbank Offering Rate (LIBOR), which did not move. In addition, excess industry liquidity and continuing strong competition for quality borrowers dampened any short-term impact higher long-term market rates had on the loan portfolio.

Higher market rates could improve yields and earnings in the Company's investment portfolio in future quarters by slowing prepayment speeds on mortgage-backed securities and increasing yields on new investments. However, this potential positive impact may be offset by the Company repositioning its investment portfolio to shorten duration and reduce price risk from the impact of further market rate increases on the value of the portfolio.

Management continues to work diligently to redeploy cash assets into higher yielding loans and investments, and in particular is now focused on more rapid expansion of the loan portfolio to offset some of the pressure on yields. The Company also continues to focus on lowering its overall cost of funds, while maintaining transaction deposit balances from core relationship customers. The cost on interest-bearing liabilities dropped from 0.65% for the first nine months of 2012 to 0.47% for the same period in 2013. Management believes that some opportunities still remain to further lower funding costs. However, given the already low level of market rates and the Company's cost of funds, any future gains are likely to be less than those already experienced.

Provision for Losses on Loans & Credit Quality. Management's policy is to establish valuation allowances for estimated losses by charging corresponding provisions against income. This evaluation is based upon management's assessment of various

Table of Contents

factors including, but not limited to, current and anticipated future economic trends, historical loan losses, delinquencies, underlying collateral values, and current and potential risks identified in the portfolio.
The provision for losses on loans totaled $344,000 for the nine months ended September 30, 2013, compared to a provision of $3.7 million for the comparable period last year. Lower provision costs reflect continued improvements in the quality of the Company's loan portfolio as reflected by the reduction in non-performing assets to 0.8% of assets as of September 30, 2013. For more information on provision and loan loss allowance activity for the periods indicated, see Note 4 to the Consolidated Financial Statements, "Loans and Allowance for Loan Losses."

Net chargeoffs dramatically declined to $258,000 in the first nine months of 2013, compared to $7.3 million in the first nine months of 2012. The Company has now experienced two straight quarters of net recoveries, leading it to recover $82,000 of previously recorded loan loss provision in the third quarter. In general, portfolio losses are no longer concentrated in any particular industry or loan type, as prior efforts to reduce exposure in construction, land development and commercial real estate loans have decreased the exposure in these segments considerably. The Company continues to resolve or liquidate its problem loans aggressively, particularly those with higher loss exposures, and now believes that the risk of future large losses is significantly reduced. The loan loss allowance to total loans ratio was 1.52% at September 30, 2013, compared to 1.79% at September 30, 2012 as the company charged off loans against the higher reserve previously established to absorb potential loss exposure in the portfolio. At the end of September 2013, the allowance for loan losses totaled 281.8% of non-performing loans compared to 161.3% at September 30, 2012. The increase in this coverage ratio despite a lower total dollar allowance for loan loss reflects the reduction of non-performing loans over the prior period.

Given current economic uncertainty, management continues to evaluate and adjust the loan loss allowance carefully and frequently to reflect the most current information available concerning the Company’s markets and loan portfolio. In its evaluation, management considers current economic and borrower conditions in both the pool of loans subject to specific impairment, and the pool subject to a more generalized allowance based on historical and other factors. When a loan is characterized as impaired, the Company performs a specific evaluation of the loan, focusing on potential future cash flows likely to be generated by the loan, current collateral values underlying the loan, and other factors such as government guarantees or guarantor support that may impact repayment. Based on this evaluation, it sets aside a specific reserve for this loan and/or charges down the loan to its net realizable value (selling price less estimated closing costs) if it is unlikely that the Company will receive any cash flow beyond the amount obtained from liquidation of the collateral. If the loan continues to be impaired, management periodically re-evaluates the loan for additional potential impairment, and charges it down or adds to reserves if appropriate. On the pool of loans not subject to specific impairment, management evaluates regional, bank and loan-specific historical loss trends to develop its base reserve level on a loan-by-loan basis. It then modifies those reserves by considering the risk grade of the loan, current economic conditions, the recent trend of defaults, trends in collateral values, underwriting and other loan management considerations, and unique market-specific factors such as water shortages or other natural phenomena.

General trending information with respect to non-performing loans, non-performing assets, and other key portfolio metrics is as follows (dollars in thousands):

Table of Contents

Credit Quality Trending

	9/30/2013	6/30/2013	12/31/2012	9/30/2012
	(Dollars in thousands)			
Loans past due in excess of 90 days and still accruing	$42	$—	$—	$—
Non-accrual loans	2,808	4,799	6,529	5,636
Total non-performing loans ("NPLs")	$2,850	$4,799	$6,529	$5,636
OREO	4,236	4,512	4,951	5,636
Total non-performing assets ("NPAs")	$7,086	$9,311	$11,480	$11,272
Classified loans (1)	$23,098	$26,288	$24,933	$32,748
Troubled debt restructured loans (2)	$9,212	$11,791	$6,719	$2,873
Total allowance related to non-accrual loans	$561	$121	$536	$401
Interest income recorded on non-accrual loans (3)	$144	$119	$424	$195
Non-accrual loans as a percentage of net loans receivable	0.54 %	0.92 %	1.25 %	1.12 %
Total non-performing loans as a % of net loans receivable	0.55 %	0.92 %	1.25 %	1.12 %
Allowance for loan losses ("ALLL") as a percentage of non-performing loans	281.8 %	167.6 %	121.7 %	161.3 %
Total NPAs as a % of total assets (4)	0.77 %	1.00 %	1.18 %	1.18 %
Total NPAs as a % of tangible capital + ALLL ("Texas Ratio") (4)	5.76 %	7.69 %	9.39 %	9.20 %
Loan delinquency ratio (30 days and over)	0.31 %	0.22 %	0.13 %	0.21 %

(1) Classified loan totals are inclusive of non-performing loans and may also include troubled debt restructured loans, depending on the grading of these restructured loans.
(2) Includes accruing restructured loans of $9.1 million and non-accruing restructured loans of $88,000. No other funds are available for disbursement on restructured loans.
(3) Interest income on non-accrual loans based on year-to-date interest totals
(4) NPAs include both nonperforming loans and OREO

The decrease in NPLs from year end reflects continued loan resolution activity. The Company's special assets team continues to migrate loans through the collections process through multiple management strategies, including borrower workouts and individual asset sales to local and regional investors. The Company continues to monitor its non-accrual loans closely and revalue the collateral on a periodic basis. This re-evaluation may create the need for additional write-downs or additional loss reserves on these assets. Loan delinquencies (30 days or more past due) continue at very low levels, although at 0.31%, they are up slightly from year end.
The following table summarizes NPAs by type and provides trending information over the past year:

Nonperforming Asset Trending By Category

	9/30/2013	6/30/2013	9/30/2012
	(Dollars in thousands)		
Commercial loans	$1,066	$1,417	$3,400
Commercial real estate loans	261	2,728	1,021
Land and land development loans	4,415	4,626	6,204
Agriculture loans	527	276	26
Residential real estate loans	814	173	609
Consumer loans	3	91	12
Total NPAs by Categories	$7,086	$9,311	$11,272

36

Table of Contents

Land development assets continue to represent the highest segment of non-performing assets, and primarily reflect one large $4.2 million OREO property. The totals for the other segments are relatively small and overall have declined since last year. The majority of NPAs are in northern Idaho, reflecting the OREO property noted above and the stronger market presence the Company holds in Northern Idaho. The overall level of NPAs remains below the average of the Company’s peer group.
At September 30, 2013 and December 31, 2012 classified loans (loans with risk grades 6, 7 or 8) by loan type are as follows:

	September 30, 2013			December 31, 2012		
	Amount	% of Total		Amount	% of Total	
	(Dollars in thousands)					
Commercial loans	$6,464	28.0	%	$7,693	30.9	%
Commercial real estate loans	3,399	14.7		5,156	20.7	
Land and land development loans	1,516	6.6		1,515	6.1	
Agriculture loans	4,639	20.1		2,143	8.6	
Multifamily loans	3,954	17.1		5,118	20.5	
Residential real estate loans	3,009	13.0		3,045	12.2	
Consumer loans	117	0.5		262	1.0	
Total classified loans	$23,098	100.0	%	$24,932	100.0	%

Classified loans are loans for which management believes it may experience some problems in obtaining repayment under the contractual terms of the loan, and are inclusive of the Company’s non-accrual loans. However, categorizing a loan as classified does not necessarily mean that the Company will experience any or significant loss of expected principal or interest.
Classified loans decreased from December 31, 2012 as the Company resolved several credits during the third quarter without any significant additional loss. As with NPAs, the geographical distribution of the Company’s classified loans reflects the distribution of the Company’s loan portfolio, with higher distributions in the “North Idaho/Eastern Washington” region, and decreased levels in southern Idaho. The Company worked rapidly to reduce its exposure in the Greater Boise area, and the other southern Idaho regions have strong agribusiness components, a sector of the economy that is performing well.
Local economies continue to improve, but are still subject to risk from various world and national events, particularly as they impact local confidence and business investment. Within the local economies, there are relatively wide variations in the strength of different industry segments. Manufacturing, technology, and health-care businesses are strong and improving. Housing and commercial real estate are also improving, assisted by relatively strong price affordability and low mortgage rates. Agriculture continues to be strong overall, although risks are increasing as a result of moderating prices, increasing input costs and concerns over adequate water in 2014. The Company has enhanced its monitoring of this portfolio and added to the loan loss reserves tied to this segment. Although conditions are better than a year ago, the government and retail sectors remain relatively weak.
Full economic recovery in the region is likely to occur slowly and over a multi-year period. As such, management believes that classified loans will likely remain elevated through the remainder of 2013, but at levels lower than those experienced in recent periods. In addition, loss exposure from these loans appears to have decreased significantly, and should continue to be lower than the heavy losses experienced in prior years. Given market volatility and future uncertainties, as with all forward-looking statements, management cannot assure nor guarantee the accuracy of these future forecasts.
Management continues to work towards reducing the level of non-performing assets, classified loans and loss exposures. It uses a variety of analytical tools and an integrated stress testing program involving both qualitative and quantitative modeling to assess the current and projected state of its credit portfolio. The results of this program are integrated with the Company’s capital and liquidity modeling programs to manage and mitigate future risk in these areas as well.

Other Income.

The following tables detail dollar amount and percentage changes of certain categories of other income for the three and nine month periods ended September 30, 2013 and September 30, 2012.

Table of Contents

Other Income - Three Months Ended	September 30, 2013	September 30, 2012	Change	Percent Change
	(Dollars in thousands)			
Fees and service charges	$ 1,858	$ 1,620	$ 238	15 %
Loan related fee income	506	768	(262)	(34)
Net gain on sale of securities	180	—	180	100
Net (loss) gain on sale of other assets	(8)	(7)	(1)	14
Other-than-temporary credit impairment on investment securities ("OTTI")	—	(34)	34	(100)
Bank-owned life insurance	83	86	(3)	(3)
Fair value adjustment on cash flow hedge	89	(6)	95	(1,583)
Unexercised warrant liability fair value adjustment	(179)	(49)	(130)	265
Other income	(4)	174	(178)	(102)
Total	$ 2,525	$ 2,552	$ (27)	(1)%

Other Income - Nine Months Ended	September 30, 2013	September 30, 2012	Change	Percent Change
	(Dollars in thousands)			
Fees and service charges	$ 5,429	$ 4,744	$ 685	14 %
Loan related fee income	1,768	2,129	(361)	(17)
Net gain on sale of securities	384	585	(201)	(34)
Net gain on sale of other assets	(2)	15	(17)	(113)
Other-than-temporary credit impairment on investment securities ("OTTI")	(63)	(357)	294	(82)
Bank-owned life insurance	252	260	(8)	(3)
Fair value adjustment on cash flow hedge	235	(300)	535	(178)
Unexercised warrant liability fair value adjustment	(177)	108	(285)	(264)
Other income	149	572	(423)	(74)
Total	$ 7,975	$ 7,756	$ 219	3 %

Total other income was $2.5 million and $2.6 million for the three months ended September 30, 2013 and September 30, 2012, respectively. For the comparable nine-month periods, total other income was $8.0 million in 2013 and $7.8 million in 2012. For the three-month comparable periods, increases in fees and service charges and a net gain on the sale of securities were offset by reductions in mortgage origination fees, the fair value of unexercised warrants, and other income. The increase in income for the comparable nine-month period reflects higher fees and service charges, lower credit impairment on impaired investment securities, and a positive adjustment on hedge fair values. These offset lower mortgage origination income, lower gains on security sales, a negative adjustment on the value of unexercised warrants and lower other income.

Fees and service charges earned on deposit, trust and investment accounts continue to be the Company’s primary sources of other income. Fees and service charges in the first nine months of 2013 increased by $685,000 from the comparable 2012 period as changes in the Company's deposit account pricing and increased investment services income offset reductions in overdraft fee income.

Loan related fee income was down from the same period last year, as a result of weaker mortgage refinance activity. Higher mortgage rates are having a significant impact on both refinance and purchase activity, which will likely lead to additional reductions in this source of income in future periods.

The Company recognized $384,000 in gains on the sale of securities during the first nine months of 2013 as it repositioned some of its investment portfolio to reduce price risk. This more than offset a smaller credit loss impairment on impaired securities for the period. The Company also recorded a positive $235,000 fair value adjustment related to a cash flow hedge on one of the Company's trust preferred obligations. The negative $300,000 adjustment in 2012 resulted from the loss of hedge effectiveness on the instrument and is being recovered as the hedge

reaches maturity later in 2013.
The Company recognized a negative fair value adjustment taken on the Company's unexercised warrant liability in 2013, as an increase in the Company's stock price increased this liability. The liability was created by the issuance of three-year warrants

---

Table of Contents

for 1,700,000 shares, and on a reverse-split adjusted basis, 170,000 shares, to investors as part of the Company's January 2012 capital raise and must be fair-valued every quarter. As such, there are likely to be fluctuating adjustments in future periods.
BOLI income was down slightly from the prior year as yields declined modestly and the Company did not purchase or liquidate BOLI assets. Other non-interest income totaled $149,000 for the nine-month period, compared to $572,000 for the comparable prior period. The reduction reflects continued decreases in the Company's secured card contract as this contract terminated in the first quarter of 2013. The Company is seeking to replace the lost income from this contract with other card or payment-based initiatives.

Operating Expenses.

The following tables detail dollar amount and percentage changes of certain categories of other expense for the three and nine month periods ended September 30, 2013 and September 30, 2012.

Other Expense - Three Months Ended	September 30, 2013	September 30, 2012	Change	Percent Change
	(Dollars in thousands)			
Salaries and employee benefits	$4,133	$4,103	$30	1%
Occupancy expense	1,120	1,230	(110)	(9)%
Technology	982	894	88	10%
Advertising	194	178	16	9%
Fees and service charges	88	141	(53)	(38)%
Printing, postage and supplies	176	178	(2)	(1)%
Legal and accounting	350	507	(157)	(31)%
FDIC assessment	145	306	(161)	(53)%
OREO operations(1)	139	39	100	256%
Other expense	766	666	100	15%
Total	$8,093	$8,242	$(149)	(2)%

Other Expense - Nine Months Ended	September 30, 2013	September 30, 2012	Change	Percent Change
	(Dollars in thousands)			
Salaries and employee benefits	$12,591	$12,110	$481	4%
Occupancy expense	3,479	3,688	(209)	(6)%
Technology	2,783	2,688	95	4%
Advertising	488	459	29	6%
Fees and service charges	267	466	(199)	(43)%
Printing, postage and supplies	566	779	(213)	(27)%
Legal and accounting	1,181	1,292	(111)	(9)%
FDIC assessment	495	927	(432)	(47)%
OREO operations(1)	281	263	18	7%
Other expense	2,359	2,090	269	13%
Total	$24,490	$24,762	$(272)	(1)%

(1) Amount includes chargedowns and gains and losses on sale of OREO

Operating expenses for the third quarter of 2013 totaled $8.1 million compared to $8.2 million for the same quarter last year. Lower occupancy, legal and accounting, FDIC assessment, and armored car expenses offset increased technology, OREO and other expenses. For the comparable nine month periods of 2013 and 2012, operating expense decreased $272,000, or 1.1%. Decreases in occupancy, armored car, printing, supply, FDIC assessment, legal and accounting expenses offset higher compensation and other expenses.

At $12.6 million, compensation and benefits expense increased from the same nine-month period in 2012. After large staff reductions in prior years, staffing levels stabilized over the past year, and the compensation increase primarily

reflects higher commission and bonus income, and the payment of severance and other one-time expenses. Although the Company has largely

39

completed its staff restructuring efforts, it continues to evaluate opportunities to improve staff efficiency while positioning itself for balance sheet growth.

Occupancy expenses decreased $209,000 from the prior nine-month period, reflecting lower depreciation and other maintenance expenses as the Company continued to exercise caution in purchasing new fixed assets. The modest increase in technology expenses reflects one-time termination and installation expenses incurred by the Company in upgrading its core data processing system during the second quarter of 2013. It anticipates the full completion of this conversion will result in significant savings in future years. The Company continues to review asset and software purchases carefully and re-negotiate contracts to further lower expense in this area.

Advertising expense was up modestly from the prior year, reflecting stronger marketing activity in the Company's branches. Reductions in collection activity resulted in lower fee and service charge expenses, while decreases in mailed statements, leased printing equipment and office supply usage have lowered printing, postage and supply expenses. Legal and accounting fees decreased modestly over last year as a result of lower accounting, audit and consulting expenses.

FDIC expenses decreased significantly over the same nine-month period last year because of changes in the FDIC assessment formula and a lower assessment rate.

OREO expenses increased $18,000 over the prior year reflecting the payment of some current property-related expenses that will likely result in higher future sales prices. Other expenses increased $269,000 from the same nine-month period in 2012, primarily as a result of increased operational losses relating to electronic banking and debit card fraud activity and the settlement of claims for losses incurred on several mortgage loans that had been sold several years ago. The increase in operating losses offset decreases in insurance, armored car and telecommunications expense. While the Company believes its future exposure to further sold-mortgage claims is limited, increasing fraud activity and changes in VISA's liability rules will likely lead to increased operating losses from electronic banking and debit card activity in future periods. The Company continues to implement new tools and systems to reduce its exposure in this area.

Annualized operating expense as a percentage of average assets was 3.48% and 3.46% for the nine-month periods ending September 30, 2013 and September 30, 2012, respectively. The Company’s efficiency ratio (noninterest expense divided by the sum of net interest income and non-interest income) was 81.0% for the nine months ended September 30, 2013, compared to 80.2% for the comparable period one year ago. With economic conditions likely to remain challenging in the near future, the Company continues to develop and implement additional efficiency and cost-cutting efforts to offset constrained asset and revenue growth.

Income Tax Provision.

For the three and nine month periods ended September 30, 2013 and September 30, 2012, respectively, the Company recorded no income tax provision. In each of these periods, the Company generated positive net income before income taxes, but recorded no provision as it offset current income against carryforward losses from prior years. The effective tax rates were 0.0% for each of these periods. The Company maintained a net deferred tax asset of $14.9 million and $12.3 million as of September 30, 2013 and December 31, 2012, net of a valuation allowance of $6.8 million and $8.5 million, respectively. The increase in the deferred tax asset at September 30, 2013 from prior periods reflected the potential tax impacts associated with a reduction in the fair value of the Company's investments available for sale during the period.

Intermountain uses an estimate of future earnings, future reversal of taxable temporary differences, and tax planning strategies to determine whether it is more likely than not that the benefit of the deferred tax asset will be realized. At September 30, 2013, Intermountain assessed whether it was more likely than not that it would realize the benefits of its deferred tax asset. Intermountain determined that the negative evidence associated with a three-year cumulative loss for the period ended December 31, 2011, and soft economic conditions continued to outweigh the positive evidence, although improvements in both the economy and the Company's income in recent quarters are providing stronger positive evidence. While Intermountain maintained the valuation allowance of $6.8 million against its deferred tax asset at September 30, 2013, it analyzes the deferred tax asset on a quarterly basis and may increase the allowance or release a portion or all of this allowance depending on actual results and estimates of future profitability.

In conducting its valuation allowance analysis, the Company developed an estimate of future earnings to determine both the need for a valuation allowance and the size of the allowance. In conducting this analysis, management has assumed economic conditions will continue to be challenging in 2013, followed by gradual improvement in the ensuing years. As such, its estimates include lower credit losses in 2013 and ensuing years as the Company's loan portfolio continues to turn over. It also assumes: (1) a compressed net interest margin in 2013 and 2014, with gradual improvement in future years, as the Company is able to convert some of its cash position to higher yielding instruments; and (2) reductions in operating expenses as credit costs abate and its other cost reduction strategies continue.

Table of Contents

The completion of the $47.3 million capital raise in January 2012 triggered Internal Revenue Code Section 382 limitations on the amount of tax benefit from net operating loss carryforwards that the Company can utilize annually, because of the level of investment by several of the larger investors. This could impact the amount and timing of the release of the valuation allowance, largely depending on the level of market interest rates and the fair value of the Company's balance sheet at the time the offering was completed. The evaluation of this impact is still being completed and will likely not be known until the fourth quarter of 2013. Based on its preliminary analysis, the Company believes that it should be able to recapture most or all of its tax benefit from the net operating loss carryforwards in the 20-year carryforward period, even given the Section 382 limitations. As with other future estimates, the Company cannot guarantee these future results.

Financial Position

Assets. At September 30, 2013, Intermountain's assets were $923.8 million, down $29.5 million from $953.3 million at December 31, 2012. The decrease in assets reflected reductions in available-for-sale investments and cash used to reduce various deposit liabilities.

Investments. Intermountain's investment portfolio at September 30, 2013 was $293.5 million, a decrease of $3.8 million, or 1.3% from the December 31, 2012 balance of $297.3 million. The decrease was primarily due to reductions in the fair value of the available-for-sale investment portfolio as a result of rising market rates. Management remains cautious about the volatile investment environment and is working to further shorten the duration of its available-for-sale investment portfolio. As of September 30, 2013, the balance of the unrealized loss on investment securities, net of federal income taxes, was $331,000, compared to an unrealized gain at December 31, 2012 of $3.5 million. The decrease reflected the negative impact on the value of the portfolio resulting from an approximate one percent increase in market interest rates.

The Company currently holds one residential MBS, with a current face value totaling $5.8 million that is determined to have an other than temporary impairment ("OTTI"), as detailed in the table below (dollars in thousands):

	Principal Balance	Fair Value	Unrealized (Loss) Gain	Cumulative OTTI Credit Loss Recorded in Income	Cumulative OTTI Impairment Loss Recorded in OCI
Security 1	5,403	4,535	576	(901)	(864)

As indicated in the table above, impairment for this security totals $1.8 million, of which $901,000 has been recorded as credit loss impairment in income and the remainder in other comprehensive income. The Company recorded additional credit loss impairment for this security in 2013 of $63,000. At this time, the Company anticipates holding the security until its value is recovered or until maturity, and will continue to adjust its net income (loss) and other comprehensive income (loss) to reflect potential future credit loss impairments and the security's market value. The Company calculated the credit loss charges against earnings each quarter by subtracting the estimated present value of future cash flows on the securities from their amortized cost less the total of previous credit loss impairment at the end of each period. The Company sold the only other security for which OTTI had been recognized in the first quarter of 2013, recognizing a $40,000 gain on the sale.

Loans Receivable. At September 30, 2013 net loans receivable totaled $520.2 million, down $529,000 from $520.8 million at December 31, 2012.

The following table sets forth the composition of Intermountain's loan portfolio at the dates indicated. Loan balances exclude deferred loan origination costs and fees and allowances for loan losses.

Table of Contents

	September 30, 2013		December 31, 2012	
	Amount	%	Amount	%
	(Dollars in thousands)			
Commercial loans	$111,238	21.1 %	$121,307	23.0 %
Commercial real estate loans	185,116	35.1	186,844	35.4
Commercial construction loans	6,305	1.2	3,832	0.7
Land and land development loans	34,172	6.5	31,278	5.9
Agriculture loans	97,453	18.4	85,967	16.3
Multifamily loans	15,802	3.0	16,544	3.1

Residential construction loans	1,721	0.3	940	0.2
Consumer loans	9,084	1.7	9,626	1.8
Municipal loans	6,107	1.1	12,267	2.3
Total loans	528,183	100.0 %	528,625	100.0 %
Allowance for loan losses	(8,030)		(7,943)	
Deferred loan fees, net of direct origination costs	86		86	
Loans receivable, net	$520,239		$520,768	
Weighted average interest rate	5.22 %		5.28 %	

Increases in agricultural, commercial construction and development loans largely offset decreases in commercial and municipal loans, as farmers increased seasonal borrowing and commercial project activity heated up in the Company's market areas. Commercial customers remain cautious about expansion, however, and are relying more on cash than in years prior to the recession. The reduction in municipal loans resulted from the payoff of a larger municipal construction loan as the project was completed. Most other loan categories were relatively stable from year end.

The commercial portfolio is diversified by industry with a variety of small business customers that have held up relatively well during this economic downturn. As soft economic conditions continue, however, the Company continues to experience some stress in this portfolio. Most of the commercial credits are smaller, however, and Intermountain carries a higher proportion of SBA and USDA guaranteed loans than many of its peers, reducing the overall risk in this portfolio. As noted above, commercial customers continue to watch economic conditions very closely, and have turned to cash more often to pay ongoing costs than borrowing. Quality commercial borrowers are highly sought after, resulting in keen competition and competitive pricing for these customers.

The commercial real estate portfolio is also well-diversified and consists of a mix of owner and non-owner occupied properties, with relatively few truly non-owner-occupied investment properties. The Company has lower concentrations in this segment than most of its peers, and has underwritten these properties cautiously. In particular, it has limited exposure to speculative investment office buildings and retail strip malls, two of the higher risk segments in this category. This portfolio continues to perform well with relatively low delinquency and loss rates. The Company believes it has some opportunity to increase prudent lending in this area, but again competition is keen for these borrowers.

Commercial construction and development activity has picked up recently, as the survivors of the building recession are capitalizing on opportunities created by the lack of inventory resulting from five years of limited construction activity. The Company is approaching these loans cautiously, lending only to strong borrowers with substantial equity positions and backup liquidity. In addition, the Company is watching concentrations closely and carefully selecting its areas of focus.

Most agricultural markets continue to perform well. In fact, the sector has performed so well that many of its best borrowing customers are using excess cash generated over the past couple of years to reduce their overall borrowing position. As noted above, though, risks appear to be increasing in this portfolio as prices moderate, input costs rise and

concerns increase over adequate water supplies in 2014.

The residential and consumer portfolios consist primarily of first and second mortgage loans, unsecured loans to individuals, and auto, boat and RV loans. These portfolios have generally performed well with limited delinquencies and defaults. While these loans have generally been underwritten with relatively conservative loan-to-values and strong debt-to-income ratios, the continued soft economy and lower home prices have resulted in some losses in this loan type.

Table of Contents

Economic conditions and property values are demonstrating slow but steady improvement in most of the Company's markets. Management expects that credit losses will continue to decrease, but that new borrowing activity will also remain muted over the next few quarters.

Geographic Distribution

As of September 30, 2013, the Company’s loan portfolio by loan type and geographical market area was:

Loan Portfolio by Location	North Idaho — Eastern Washington	Magic Valley Idaho	Greater Boise Area	E. Oregon, SW Idaho, excluding Boise	Other	Total	% of Loan type to total Loans
	(Dollars in thousands)						
Commercial loans	$80,249	$4,880	$9,741	$15,111	$1,257	$111,238	21.1 %
Commercial real estate loans	126,447	10,191	9,401	17,943	21,134	185,116	35.1 %
Commercial construction loans	5,124	—	145	—	1,036	6,305	1.2 %
Land and land development loans	25,120	1,412	5,652	1,327	661	34,172	6.5 %
Agriculture loans	1,946	4,513	24,383	62,771	3,840	97,453	18.4 %
Multifamily loans	9,803	150	4,630	30	1,189	15,802	3.0 %
Residential real estate loans	43,910	3,435	4,564	6,809	2,467	61,185	11.6 %
Residential construction loans	1,608	—	—	113	—	1,721	0.3 %
Consumer loans	5,399	1,100	748	1,540	297	9,084	1.7 %
Municipal loans	4,784	1,323	—	—	—	6,107	1.1 %
Total	$304,390	$27,004	$59,264	$105,644	$31,881	$528,183	100.0 %

Table of Contents

As of December 31, 2012, the Company’s loan portfolio by loan type and geographical market area was:

Loan Portfolio by Location	North Idaho — Eastern Washington	Magic Valley Idaho	Greater Boise Area	E. Oregon, SW Idaho, excluding Boise	Other	Total	% of Loan type to total Loans
	(Dollars in thousands)						
Commercial loans	$87,387	$4,606	$9,252	$13,852	$6,210	$121,307	23.0 %
Commercial real estate loans	123,451	11,330	10,651	18,895	22,517	186,844	35.4 %
Commercial construction loans	503	—	2,819	—	510	3,832	0.7 %
Land and land development loans	20,710	1,748	6,298	1,500	1,022	31,278	5.9 %
Agriculture loans	1,670	3,269	16,886	60,479	3,663	85,967	16.3 %
Multifamily loans	10,396	151	5,947	30	20	16,544	3.1 %
Residential real estate loans	41,624	3,734	3,808	7,083	3,771	60,020	11.3 %
Residential construction loans	387	—	240	313	—	940	0.2 %
Consumer loans	5,716	1,026	517	2,053	314	9,626	1.8 %
Municipal loans	10,880	1,387	—	—	—	12,267	2.3 %
Total	$302,724	$27,251	$56,418	$104,205	$38,027	$528,625	100.0 %
Percent of total loans in geographic area	57.3 %	5.2 %	10.7 %	19.7 %	7.1 %	100.0 %	
Percent of total loans where real estate is the primary collateral	65.5 %	67.4 %	54.5 %	43.3 %	74.8 %	60.7 %	

As indicated, 57.7% of the Company’s loans are in northern Idaho and eastern Washington, with the next highest percentage in the rural markets of southwest Idaho outside of Boise. Economic trends and real estate valuations are showing consistent improvement in all the Company's markets now, after a four-year decline. The southwest Idaho and Magic Valley markets are largely agricultural areas which have not seen levels of price appreciation or depreciation as steep as other areas over the last few years. The “Other” category noted above largely represents loans made to local borrowers where the collateral is located outside the Company’s communities. The mix in this category is relatively diverse, with the highest proportions in Oregon, Washington, California, Nevada and Arizona, but no single state comprising more than 2.85% of the total loan portfolio.
Participation loans where Intermountain purchased part of the loan and was not the lead bank totaled $16.0 million at September 30, 2013. $4.0 million of the total is a condominium project in Boise that is currently classified, but is being managed very closely, and for which no loss is expected. The remaining loans are all within the Company’s footprint and management believes they do not present significant risk at this time.

Table of Contents

The following table sets forth the composition of Intermountain's loan originations for the periods indicated.

	Three Months Ended September 30,			Nine Months Ended September 30,		
	2013	2012	% Change	2013	2012	% Change
	(Dollars in thousands)					
Commercial loans	$5,862	$17,465	(66.4)%	$29,030	$46,568	(37.7)%
Commercial real estate loans	9,262	1,932	379.4	31,381	16,314	92.4
Commercial construction loans	320	1,284	(75.1)	6,961	2,138	225.6
Land and land development loans	3,412	675	405.5	5,615	3,201	75.4
Agriculture loans	10,426	8,464	23.2	29,522	39,938	(26.1)
Multifamily loans	1,200	—	—	1,200	1,191	0.8
Residential real estate loans	16,904	21,297	(20.6)	53,138	66,378	(19.9)
Residential construction loans	2,463	156	1,478.8	3,956	945	318.6
Consumer loans	1,052	557	88.9	2,692	1,780	51.2
Municipal loans	104	183	(43.2)	481	3,303	(85.4)
Total loans originated	$51,005	$52,013	(1.9)%	$163,976	$181,756	(9.8)%
Renewed loans	$24,150	$52,729	(54.2)%	$129,019	$158,402	(18.5)%

Overall, 2013 origination activity continues to reflect the muted borrowing demand from virtually all sectors in the current environment, as commercial borrowers remain cautious and agricultural customers experience strong cash flows, reducing their borrowing needs. Activity is strongest in the real estate sectors, as record low interest rates continue to spur refinance activity and encourage stronger borrowers to expand. Overall origination activity is likely to improve from earlier totals as the economy rebounds, but will still be under pressure from slow employment growth and aggressive industry competition for strong borrowers. Residential real estate activity is also likely to slow down, as higher mortgage rates reduce refinance activity. The Company has chosen not to purchase loan pools or pursue out-of-market participation loans in order to maintain a more conservative credit position. Management believes that those banks that have low-cost funding structures and pursue loan growth through strong relationship networks will perform relatively better in the long run.

Office Properties and Equipment. Office properties and equipment decreased $33,000 from year end to $35.4 million at September 30, 2013 as the Company continued to limit new purchase activity.

Other Real Estate Owned. Other real estate owned decreased by $715,000, or 14.4% from year end. The Company sold six properties totaling $1.1 million in the first nine months of 2013, had net negative valuation adjustments of $31,000 and added three properties totaling $413,000. A total of three properties remained in the OREO portfolio at quarter end, consisting of $4.2 million in land and land development.

Overall, the Company's current OREO portfolio is lower than most of its peer group and management anticipates additional reductions in the total in the coming year. The following table details OREO activity during the first nine months of 2013 and 2012.

Other Real Estate Owned Activity

	2013	2012
	(Dollars in thousands)	
Balance, beginning of period, January 1	$4,951	$6,650
Additions to OREO	413	1,595
Proceeds from sale of OREO	(1,097)	(2,628)
Valuation Adjustments in the period(1)	(31)	19
Balance, end of period, September 30	$4,236	$5,636

(1) Amount includes chargedowns and gains/losses on sale of OREO

Table of Contents

Intangible Assets. Intangible assets now consist only of a small core deposit intangible derived from prior acquisitions that is amortizing down as time progresses.
Deferred Tax Asset. At September 30, 2013, the Company’s deferred tax asset, net of the valuation allowance noted above, totaled $14.9 million, up from $12.3 million at year end 2012. The increase in the deferred tax asset at September 30, 2013 from the prior period reflected the potential tax impacts associated with a reduction in the fair value of the Company's investments available for sale during the period. At September 30, 2013, Intermountain assessed whether it was more-likely-than-not that it would realize the benefits of its deferred tax asset. Intermountain determined that the negative evidence associated with a three-year cumulative loss for the period ended December 31, 2011, and soft economic conditions continued to outweigh the positive evidence, although improvements in both the economy and the Company's income in recent quarters are providing stronger positive evidence. While Intermountain maintained the valuation allowance of $6.8 million against its deferred tax asset, it analyzes the deferred tax asset on a quarterly basis and may increase the allowance or release a portion or all of this allowance depending on actual results and estimates of future profitability. See the Income Tax Provision section above for more information.
BOLI and Other Assets. Bank-owned life insurance (“BOLI”) and other assets decreased to $16.8 million at September 30, 2013 from $19.6 million at year end, 2012. The decrease reflected lower prepaid expenses as the FDIC released the remaining amount of prepaid insurance assessments that the Company had previously forwarded to it.
Deposits. Total deposits decreased $37.9 million to $711.1 million at September 30, 2013 from $748.9 million at December 31, 2012. The decrease from year end reflects additional reductions in higher-cost brokered and retail CDs, the release of savings balances from the termination of a contract to maintain savings balances securing credit cards held by another company, and tax and operating payments made by clients. The Company continues to focus on managing relationship customers closely, lowering its cost of funds, and moving CD customers seeking higher yields into our investment products. Overall, transaction account deposits comprised 78.4% of total deposits at September 30, 2013, up from 75.8% at the prior year end.
The following table sets forth the composition of Intermountain’s deposits at the dates indicated.

	September 30, 2013			December 31, 2012		
	Amount	% of total deposits		Amount	% of total deposits	
	(Dollars in thousands)					
Non-interest bearing demand accounts	$240,116	33.8	%	$254,979	34.0	%
Interest bearing demand accounts	100,572	14.1	%	99,623	13.3	%
Money market 0.0% to 2.00%	217,110	30.5	%	213,155	28.5	%
Savings and IRA 0.0% to 4.91%	66,683	9.4	%	75,788	10.1	%
Certificate of deposit accounts (CDs)	35,827	5.0	%	43,535	5.8	%
Jumbo CDs	50,613	7.1	%	56,228	7.5	%
Brokered CDs	—	—	%	5,200	0.7	%
CDARS CDs to local customers	151	0.1	%	426	0.1	%
Total deposits	$711,072	100.0	%	$748,934	100.0	%
Weighted average interest rate on certificates of deposit		1.20	%		1.28	%
Core Deposits as a percentage of total deposits (1)		92.9	%		91.7	%
Deposits generated from the Company’s market area as a % of total deposits		100.0	%		99.3	%

(1) Core deposits consist of non-interest and interest bearing demand accounts, money market accounts, savings accounts, and certificate of deposit accounts of less than $100,000 (excluding public deposits).

The Company’s strong local, core funding base, high percentage of checking, money market and savings balances and careful management of its wholesale CD funding provide lower-cost, more reliable funding to the Company than many of its peers and add to the liquidity strength of the Bank. Maintaining the local funding base at a reasonable cost remains a critical priority for the Company’s management and production staff.

Deposits by location are as follows (dollars in thousands):

Table of Contents

Deposits by Location	9/30/2013	% of total deposits		12/31/2012	% of total deposits		9/30/2012	% of total deposits	
North Idaho — Eastern Washington	$367,496	51.7	%	$372,772	49.9	%	$347,316	47.4	%
Magic Valley Idaho	65,890	9.3	%	72,254	9.6	%	69,580	9.5	%
Greater Boise Area	61,216	8.6	%	67,585	9.0	%	64,191	8.8	%
Southwest Idaho — Oregon, excluding Boise	166,561	23.4	%	172,509	23.0	%	156,300	21.4	%
Administration, Secured Savings	49,909	7.0	%	63,814	8.5	%	94,197	12.9	%
Total	$711,072	100.0	%	$748,934	100.0	%	$731,584	100.0	%

The Company attempts to, and has been successful in balancing loan and deposit balances in each of the market areas it serves. Northern Idaho and eastern Washington deposits currently exceed those in the Company’s southern Idaho and eastern Oregon markets, reflecting the longer presence it has had in these markets. The Company’s deposit market share has grown significantly over the past ten years, and it now ranks third in overall market share in its core markets. During the first quarter of 2013, the contract that the Company maintained to hold the savings deposit balances for secured credit cards was terminated after a number of extensions. The overall impact of this termination will reduce savings balances by approximately $13 million, most of which has already been released. The Company has long anticipated this termination and absorbed the decrease by reducing its current cash position.

Borrowings. Deposit accounts are Intermountain’s primary source of funds. Intermountain also relies upon advances from the Federal Home Loan Bank of Seattle, repurchase agreements and other borrowings to supplement its funding, reduce its overall cost of funds, and to meet deposit withdrawal requirements. These borrowings totaled $84.9 million and $97.3 million at September 30, 2013 and December 31, 2012, respectively. The decrease from year end reflects fluctuations in municipal repurchase activity.

Interest Rate Risk

The results of operations for financial institutions may be materially and adversely affected by changes in prevailing economic conditions, including rapid changes in interest rates, declines in real estate market values and the monetary and fiscal policies of the federal government. Like all financial institutions, Intermountain’s net interest income and its NPV (the net present value of financial assets, liabilities and off-balance sheet contracts), are subject to fluctuations in interest rates. Intermountain utilizes various tools to assess and manage interest rate risk, including an internal income simulation model that seeks to estimate the impact of various rate changes on the net interest income and net income of the bank. This model is validated by comparing results against various third-party estimations. Currently, the model and third-party estimates indicate that Intermountain’s interest rate profile is neutral to slightly asset-sensitive. An asset-sensitive bank generally sees improved net interest income and net income in a rising rate environment, as its assets reprice more rapidly and/or to a greater degree than its liabilities. The opposite is true in a falling interest rate environment. When market rates fall, an asset-sensitive bank tends to see declining income. The Company has become less asset-sensitive over the preceding year, as many of its variable-rate loans have hit contractual floors and the duration of its liability portfolio has shortened.

The current highly unusual market and rate conditions have heightened interest rate risk for the Company and most other financial institutions. Continued very low market rates, keen competition for quality borrowers, rapid mortgage prepayments, and high demand for fixed income securities is negatively impacting net interest income and could continue to do so for a relatively long period of time. In addition, market values on the Company's available-for-sale securities portfolio are susceptible to potentially large negative impacts in the future should market rates increase, as they did in the second quarter of this year.

To minimize the long-term impact of fluctuating interest rates on net interest income, Intermountain promotes a loan pricing policy of utilizing variable interest rate structures that associates loan rates to Intermountain’s internal cost of funds and to the nationally recognized prime or London Interbank Offered (“LIBOR”) lending rates. While this strategy

has had adverse impacts in the current unusually low rate environment, the approach historically has contributed to a relatively consistent interest rate spread over the long-term and reduces pressure from borrowers to renegotiate loan terms during periods of falling interest rates. Intermountain currently maintains over fifty percent of its loan portfolio in variable interest rate assets.

Additionally, the extent to which borrowers prepay loans is affected by prevailing interest rates. When interest rates increase, borrowers are less likely to prepay loans. When interest rates decrease, borrowers are generally more likely to prepay loans. Prepayment speeds have been unusually high over the past few years and particularly in the past year, as borrowers refinanced into lower rates, paid down debt to improve their financial position, or liquidated assets as part of problem loan work-out strategies. Prepayments may affect the levels of loans retained in an institution's portfolio, as well as its net interest income. Prepayments

on loans and mortgage-backed securities are likely to continue over the next year at a higher pace than long-term averages as a result of continuing low interest rates and government-sponsored refinance programs, but did slow in the third quarter after mortgage rates increased about one percent in the latter part of the second quarter.

On the liability side, Intermountain generally seeks to manage its interest rate risk exposure by maintaining a relatively high percentage of non-interest bearing demand deposits, interest-bearing demand deposits, savings and money market accounts. These instruments tend to lag changes in market rates and may afford the Bank more protection in increasing interest rate environments than other short-term borrowings, but can also be changed relatively quickly in a declining rate environment. The Bank utilizes various deposit pricing strategies and other borrowing sources to manage its rate risk. As noted above, the duration of the Company’s liabilities has shortened considerably over the past two years, as customers have preferred shorter-term deposit products and the Company has not replaced longer-term brokered and wholesale funding instruments as they have come due. This presents some additional risk in a rising rate environment. The Company is evaluating various alternatives to mitigate this risk, including the assumption of some longer-term fixed wholesale funding and the use of off-balance sheet interest rate swaps and caps.

Intermountain maintains an asset and liability management program intended to manage net interest income through interest rate cycles and to protect its income by controlling its exposure to changing interest rates. As part of this program, Intermountain uses a simulation model designed to measure the sensitivity of net interest income and net income to changes in interest rates. This simulation model is designed to enable Intermountain to generate a forecast of net interest income and net income given various interest rate forecasts and alternative strategies. The model is also designed to measure the anticipated impact that prepayment risk, basis risk, customer maturity preferences, volumes of new business and changes in the relationship between long-term and short-term interest rates have on the performance of the Company. The results of modeling indicate that the estimated impact of changing rates on net interest income in a 100 and 300 basis point upward adjustment are within the guidelines established by management. The estimated impact of changing rates on net interest income in a 100 basis point downward adjustment in market interest rates is just outside of the Company's guidelines over both a 12-month and 24-month period. The impacts of changing rates on the Company's modeled economic value of equity ("EVE") are within the Company's guidelines for both rising and falling rates. The Company has chosen not to take action to resolve the falling rate guideline exceptions, because of the current low level of market rates and the negative impact actions it could take would have on its exposure to rising rates.

The continuing low level of market rates, and particularly the Federal Funds target range of between 0.00 and 0.25% is unprecedented. This has created significant challenges for interest rate risk management over the past several years, and is reflected in the significant reduction in net interest income during this period. Given the unusual current market rate conditions and the potential for either a prolonged low-rate environment or rapidly rising rates at some point in the future, Company management continues to refine and expand its interest rate risk modeling, and is responding to the results by proactively managing both its on-balance sheet and off-balance sheet positions. Based on the results of its continuing evaluations, management believes that its interest rate risk position is relatively neutral, but that current economic and market conditions heighten overall interest rate risk for both the Company and the industry as a whole.

Intermountain is continuing to pursue strategies to manage the level of its interest rate risk while increasing its long-term net interest income and net income: 1) through the origination and retention of a diversified mix of variable and fixed-rate consumer, business, commercial real estate, and residential loans which generally have higher yields than alternative investments; 2) by prudently managing its investment portfolio to provide relative earnings stability in the face of changing rate environments; and 3) by increasing the level of its core deposits, which are generally a lower-cost, less rate-sensitive funding source than wholesale borrowings. There can be no assurance that Intermountain will be successful implementing any of these strategies or that, if these strategies are implemented, they will have the intended effect of reducing interest rate risk or increasing net interest income.

Liquidity and Sources of Funds

As a financial institution, Intermountain's primary sources of funds from assets include the collection of loan principal and interest payments, cash flows from various investment securities, and sales of loans, investments or other assets. Liability financing sources consist primarily of customer deposits, repurchase obligations with local customers, advances from FHLB Seattle and correspondent bank borrowings.

Deposits decreased to $711.1 million at September 30, 2013 from $748.9 million at December 31, 2012, as decreases in non-interest bearing demand, savings and CD balances offset increases in interest-bearing demand and money market balances. The decrease from December reflects additional planned reductions in higher-cost brokered and retail CDs, the release of savings balances from the termination of a contract to maintain savings balances securing credit cards held by another company, and tax and operating payments made by clients. Repurchase agreements decreased by $12.3 million, reflecting seasonal reductions in local municipal balances. The liability reductions were partially offset by a decrease in investments available-for-sale of $15.2 million from year end, as the Company repositioned a part of this portfolio. The combined impact of liability and other asset

changes resulted in an overall decrease of $41.2 million in the Company’s unrestricted cash position from December 31, 2012 to September 30, 2013.

During the nine months ended September 30, 2013, cash used by investing activities consisted primarily of purchases of available-for-sale and held-to maturity investment securities, which more than offset sales of investment securities and principal payments on mortgage-back securities. During the same period, cash used by financing activities consisted primarily of decreases in checking, savings and CD deposit balances and repurchase agreements.

Securities sold subject to repurchase agreements totaled $64.4 million at September 30, 2013. These borrowings are required to be collateralized by investments with a market value exceeding the face value of the borrowings. Under certain circumstances, Intermountain could be required to pledge additional securities or reduce the borrowings.

Intermountain’s credit line with FHLB Seattle provides for borrowings up to a percentage of its total assets subject to general collateralization requirements. At September 30, 2013, the Company’s FHLB Seattle credit line represented a total borrowing capacity of approximately $127.3 million, of which $4.9 million was being utilized. Additional collateralized funding availability at the Federal Reserve totaled $21.9 million. Both of these collateral secured lines could be expanded more with the placement of additional collateral. Overnight-unsecured borrowing lines have been established at US Bank, Wells Fargo Bank, and Pacific Coast Bankers Bank (“PCBB”). At September 30, 2013, the Company had approximately $45.0 million of overnight funding available from its unsecured correspondent banking sources.

Intermountain and its subsidiary Bank maintain an active liquidity monitoring and management plan, and have worked aggressively over the past several years to expand sources of alternative liquidity. Given continuing volatile economic conditions, the Bank has taken additional protective measures to enhance liquidity, including issuance of new capital, movement of funds into more liquid assets and increased emphasis on relationship deposit-gathering efforts. Because of its relatively low reliance on non-core funding sources and the additional efforts undertaken to improve liquidity discussed above, management believes that the subsidiary Bank’s current liquidity risk is moderate and manageable.

Management continues to monitor its liquidity position carefully and conducts periodic stress tests to evaluate future potential liquidity concerns in the subsidiary Bank. It has established contingency plans for potential liquidity shortfalls. Longer term, the Company intends to fund asset growth primarily with core deposit growth, and it has initiated a number of organizational changes and programs to spur this growth when needed.

Liquidity for the parent Company depends substantially on dividends from the Bank. The other primary sources of liquidity for the parent Company are capital or borrowings. Management projects that available resources will be sufficient to meet the parent Company’s projected funding needs.

Capital Resources

Intermountain’s total stockholders’ equity was $115.0 million at September 30, 2013, compared with $114.4 million at December 31, 2012, as the negative impact of higher market rates on the value of the Company's investment portfolio offset improved earnings. Stockholders’ equity and tangible stockholders' equity was 12.4% of total assets at September 30, 2013 and 11.8% at December 31, 2012, respectively. Tangible common equity as a percentage of tangible assets was 9.5% at September 30, 2013 and 9.0% for December 31, 2012.

At September 30, 2013, Intermountain had unrealized losses of $331,000 (including cumulative OTTI recognized through other comprehensive income), net of related income taxes, on investments classified as available-for-sale, as compared to unrealized gains of $3.5 million, net of related income taxes, on investments classified as available-for-sale at December 31, 2012. The change from an unrealized gain on investments to an unrealized loss during this time period reflected the negative impact of an approximately one percent increase in market interest rates on the value of the Company's securities portfolio.

During 2012, the Company conducted two separate successful capital raises, issuing a mix of voting and non-voting stock and warrants. See Note 7 in the Notes to Consolidated Financial Statements for additional information on these

raises. The Company has used the $50.3 million net proceeds after expenses from both offerings to strengthen its balance sheet, reinvest in its communities and for other general corporate purposes, and may use some of the proceeds, subject to regulatory approval, to redeem its Series A Preferred Stock held by the U.S. Treasury as part of the TARP Capital Purchase Program.

On December 19, 2008, the Company entered into a definitive agreement with the U.S. Treasury. Pursuant to this Agreement, the Company sold 27,000 shares of Series A Preferred Stock, no par value, having a liquidation amount equal to $1,000 per share, including a warrant (“The Warrant”) to purchase 653,226 shares, and on a reverse-split adjusted basis, 65,323 shares of the Company’s common stock, no par value, to the U.S. Treasury. The Warrant has a 10-year term and has an exercise price, subject to anti-dilution adjustments, equal to $62.00 per share of common stock on a reverse-split adjusted basis.

Table of Contents

The Series A Preferred Stock qualifies as Tier 1 capital and provides for cumulative dividends at a rate of 5% per year, for the first five years, and 9% per year thereafter. The Series A Preferred Stock may be redeemed with the approval of the U.S. Treasury in the first three years with the proceeds from the issuance of certain qualifying Tier 1 capital or after three years at par value plus accrued and unpaid dividends. The original terms governing the Series A Preferred Stock prohibited the Company from redeeming the shares during the first three years other than from proceeds received from a qualifying equity offering. However, subsequent legislation was passed that would now permit the Company to redeem the shares of Series A Preferred Stock upon the approval of Treasury and the Company's primary federal regulator.

As discussed in Note 7 in the Notes to Consolidated Financial Statements above, the Company executed a 10-for-1 reverse stock split, effective October 5, 2012, which reduced the number of voting and non-voting common shares outstanding and shares that would be issued if the outstanding warrants are exercised.

Intermountain issued and has outstanding $16.5 million of Trust Preferred Securities. The indenture governing the Trust Preferred Securities limits the ability of Intermountain under certain circumstances to pay dividends or to make other capital distributions. The Trust Preferred Securities are treated as debt of Intermountain. These Trust Preferred Securities can be called for redemption by the Company at 100% of the aggregate principal plus accrued and unpaid interest. See Note 5 of "Notes to Consolidated Financial Statements."

Intermountain and the Bank are required by applicable regulations to maintain certain minimum capital levels and ratios of total and Tier 1 capital to risk-weighted assets, and of Tier I capital to average assets. Intermountain and the Bank plan to maintain their capital resources and regulatory capital ratios through the retention of earnings and the management of the level and mix of assets. At September 30, 2013, Intermountain exceeded the minimum published regulatory capital requirements to be considered "well-capitalized" pursuant to Federal Financial Institutions Examination Council "FFIEC" regulations. The Company has also evaluated its projected capital position in relation to new higher capital standards issued by federal regulators in 2013, but effective over a phased time period from 2015 through 2020. Based on its initial evaluation, the Company would continue to meet the new higher requirements to be considered "well capitalized" after full phase-in. As with other future estimates, the Company cannot guarantee these future results.

	Actual			Capital Requirements			Well-Capitalized Requirements		
	Amount	Ratio		Amount	Ratio		Amount	Ratio	
Total capital (to risk-weighted assets):									
The Company	$126,607	21.13	%	$47,928	8	%	$59,910	10	%
Panhandle State Bank	120,260	20.08	%	47,911	8	%	59,889	10	%
Tier I capital (to risk-weighted assets):									
The Company	119,111	19.88	%	23,964	4	%	35,946	6	%

Off Balance Sheet Arrangements and Contractual Obligations

The Company, in the conduct of ordinary business operations routinely enters into contracts for services. These contracts may require payment for services to be provided in the future and may also contain penalty clauses for the

early termination of the contracts. The Company is also party to financial instruments with off-balance sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments include commitments to extend credit and standby letters of credit. Management does not believe that these off-balance sheet arrangements have a material current effect on the Company’s financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources, but there is no assurance that such arrangements will not have a future effect. There have not been any material changes to the Off Balance Sheet Arrangements or Contractual Obligations since the filing of the 2012 10-K.

New Accounting Pronouncements

Table of Contents

The “Summary of Significant Accounting Policies, Recently Issued Accounting Pronouncements” in the Notes to the Consolidated Financial Statements, which is included in Note 10 of this Report, discusses new accounting pronouncements adopted by Intermountain and the expected impact of accounting pronouncements recently issued or proposed.

Forward-Looking Statements

CAUTIONARY NOTE REGARDING FORWARD-LOOKING STATEMENTS

This report contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. These forward-looking statements include, but are not limited to, statements about our plans, objectives, expectations and intentions that are not historical facts, such as the statements in this report regarding expected or projected growth, asset quality and losses, other income and operating expenses, and other statements identified by words such as “expects,” “anticipates,” “intends,” “plans,” “believes,” “will likely," “should,” “projects,” “seeks,” “estimates” similar meaning. These forward-looking statements are based on current beliefs and expectations of management and are inherently subject to significant business, economic and competitive uncertainties and contingencies, many of which are beyond our control. In addition, these forward-looking statements are subject to assumptions with respect to future business strategies and decisions that are subject to change. In addition to the factors set forth in the sections titled “Risk Factors,” “Business” and “Management’s Discussion and Analysis of Financial Condition and Results of Operations”, as applicable, in this report, the following factors, among others, could cause actual results to differ materially from the anticipated results:

- deterioration in economic conditions that could result in increased loan and lease losses;
- inflation and interest rate levels, and market and monetary fluctuations;
- changes in market interest rates and spreads, which could adversely affect our net interest income and profitability, and the value of our investment securities portfolio;
- trade, monetary and fiscal policies and laws, including interest rate and income tax policies of the federal government;
- growth and acquisition strategies;
- applicable laws and regulations and legislative or regulatory changes, including the ultimate financial and operational burden of financial regulatory reform legislation and related regulations;
- the restrictions imposed on participants in the Troubled Asset Relief Program (“TARP”) Capital Purchase Program, including the impact of executive compensation restrictions, which may affect our ability to retain and recruit executives in competition with other firms who do not operate under those restrictions;
- our ability to attract new deposits and loans and leases;
- competitive market pricing factors;
- the effects of any adverse regulatory action;
- our ability to raise capital or incur debt on reasonable terms;
- the risks associated with lending and potential adverse changes in credit quality;
- risks associated with concentrations in real estate-related loans;
- declines in real estate values supporting loan collateral;
- increased loan delinquency rates;
- the timely development and acceptance of our new products and services;
- the willingness of customers to substitute competitors’ products and services for our products and services;
- technological and management changes;
- our ability to recruit and retain key management and staff;
- changes in estimates and assumptions used in financial accounting;
- our critical accounting policies and the implementation of such policies;
- potential interruption or breach in the security of our systems;
- lower-than-expected revenue or cost savings or other issues in connection with mergers and acquisitions;

Table of Contents

- changes in consumer spending, saving and borrowing habits;
- the strength of the United States economy in general and the strength of the local economies in which Intermountain conducts its operations;
- the stability of funding sources and continued availability of borrowings;
- our success in gaining regulatory approvals, when required;
- results of regulatory examinations that could restrict growth; and
- our success at managing the risks involved in the foregoing.

Please take into account that forward-looking statements speak only as of the date of this report. We do not undertake any obligation to publicly correct or update any forward-looking statement whether as a result of new information, future events or otherwise.

Item 3 —Quantitative and Qualitative Disclosures About Market Risk

There have not been any material changes to the information set forth under the caption "Item 7A. Quantitative and Qualitative Disclosures about Market Risk" included in the Company's Annual Report on Form 10-K for the year ended December 31, 2012.

Item 4 —Controls and Procedures

(a) Evaluation of Disclosure Controls and Procedures: Intermountain's management, with the participation of Intermountain's principal executive officer and principal financial officer, has evaluated the effectiveness of Intermountain's disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934 (the "Exchange Act")) as of the end of the period covered by this report. Based on such evaluation, Intermountain's principal executive officer and principal financial officer have concluded that, as of the end of such period, Intermountain's disclosure controls and procedures are effective in recording, processing, summarizing and reporting, on a timely basis, information required to be disclosed by Intermountain in the reports that it files or submits under the Exchange Act.

(b) Changes in Internal Control over Financial Reporting: In the nine months ended September 30, 2013, there were no changes in Intermountain's internal control over financial reporting that materially affected, or are reasonably likely to materially affect, Intermountain's internal control over financial reporting.

PART II — Other Information

Item 1. LEGAL PROCEEDINGS

Intermountain and Panhandle are parties to various claims, legal actions and complaints in the ordinary course of business. In Intermountain's opinion, all such matters are adequately covered by insurance, are without merit or are of such kind, or involve such amounts, that unfavorable disposition would not have a material adverse effect on the consolidated financial position or results of operations of Intermountain.

Item 1A. RISK FACTORS

The Company believes that there have been no material changes from risk factors previously discussed under "Part I - Item A - Risk Factors" in our Form 10-K for the year ended December 31, 2012 (the "2012 Annual Report") and under Part I - Item 4 in our 10-Q for the quarter ended June 30, 2013 ("2013 10-Q Report"). In addition to the other information set forth in this report, you should carefully consider the risks and uncertainties discussed in our 2012 Annual Report and 2013 10-Q Report. These factors, as well as those that we do not know about, that we currently believe are immaterial, or that we have not predicted, could materially and adversely affect our business, financial condition, liquidity, results of operations and capital position, and could cause our actual results to differ materially from our historical results or the results contemplated by the forward-looking statements contained in this report.

Item 2 —Unregistered Sales of Equity Securities and Use of Proceeds

Not applicable.

Item 3 —Defaults Upon Senior Securities

Not applicable.
