Change in the Management

On July 27, 2005, the Extraordinary General Meeting dismissed from office the members of the Company s Board of Directors connected with former manager Opportunity. At Board of Directors Meeting held on August, 25, 2005, a new Board of Executive Officers was elected, and the Technical Officer was maintained in his position.

At the Extraordinary General Meeting held on September 30, 2005, the Board of Directors members of Brasil Telecom S.A. were dismissed from office and new members were elected. On the same date, the Board of Directors meeting resolved to dismiss the Chairman and to elect new members for the Board of Executive Officers, and the Network Officer was reelected. Such resolutions were ratified by the Board of Directors of Brasil Telecom S.A. at a meeting held on October 5, 2005.

The process to change the management of the Company and of Brasil Telecom S.A. was litigious, according to various material facts published by the Companies during 2005 and various lawsuits brought by the former manager, aiming at recovering the management of the Companies, which are still under progress.

Agreements as of April 28, 2005 under the Previous Management

On April 28, 2005, still under previous management, Brasil Telecom Participações S.A. and Brasil Telecom S.A. entered into various agreements involving the Opportunity and Telecom Italia Groups (April 28 Agreements).

Among such agreements, Brasil Telecom S.A. and its subsidiary 14 Brasil Telecom Celular S.A. (BTC) executed with TIM International N.V. (TIMI) and TIM Brasil Serviços e Participações S.A. (TIMB) an instrument named as Merger Agreement and a Protocol related thereto.

As mentioned in material facts published, the merger was forbidden by injunctions issued by the Brazilian and U.S. courts. It is also subject-matter of discussion under arbitration involving the controlling shareholders.

The current management of Brasil Telecom Participações S.A. and Brasil Telecom S.A. understands that the Merger Agreement, the respective Protocol, and other April 28 agreements, which included the waiver and transaction in judicial suits involving the Companies, were entered into with conflict of interests, breaching the laws and the Bylaws of the Companies, and also, in opposition to shareholders agreements and without the necessary corporate approvals. In addition, the new management deems that such agreements are contrary to the best interests of the Companies, especially regarding its mobile telephony business.

TIMI and TIMB sent to Brasil Telecom S.A. and to BrT Celular a correspondence dated as of May 2, 2006, terminating unilaterally the referred Merger Agreement , reserving supposed rights.

2. PRESENTATION OF FINANCIAL STATEMENTS

Preparation Criteria

The financial statements have been prepared in accordance with accounting practices adopted in Brazil, in accordance with Brazilian corporation law, rules of the Brazilian Securities Commission (CVM) and rules applicable to telecommunications concessionaires.

As the Company is registered with the Securities and Exchange Commission (SEC), it is subject to its standards, and should prepare financial statements and other information by using criteria that comply with that entity s requirements. For complying with these requirements and aiming at meeting the market s information needs, the Company adopts, as a principle, the practice of publishing information in both markets in their respective languages.

The notes to the financial statements are presented in thousands of reais, unless otherwise evidenced. According to each situation, the notes to the financial statements present information related to the Company and the consolidated financial statements, identified as PARENT COMPANY and CONSOLIDATED , respectively. When the information is common to both situations, it is indicated as PARENT COMPANY AND CONSOLIDATED .

In compliance with the Resolution 489/05, of CVM, as from 2006 the amounts of judicial deposits linked to the provisions for contingencies are presented in a deductive way from the liabilities established. Aiming at providing a better comparison between the data presented in the quarterly information, an identical reclassification of balances belonging to 2005 was promoted, as well as of the amounts referring to the cash flow.

The accounting estimates were based on objective and subjective factors, based on management s judgment to determine the appropriate amount to be recorded in the financial statements. Significant elements subject to these estimates and assumptions include the residual amount of the fixed assets, allowance for doubtful accounts, inventories, deferred income tax and social contribution, provision for contingencies, appreciation of derivative instruments, and assets and liabilities related to benefits for employees. The settlement of transactions involving these estimates may result in significant different amounts due to the inherent imprecision of the process of determining

these amounts. Management reviews its estimates and assumptions at least quarterly.

Consolidated Financial Statements

The consolidation was made in accordance with CVM Instruction 247/96 and includes the companies mentioned in Note 1.

Some of the main consolidation procedures are:

- Elimination of balances of assets and liabilities accounts among consolidated companies, as well as revenue and expenses of transactions among them.
- Elimination of balances of investment accounts and corresponding capital interest, reserves and retained earnings among consolidated companies.
- Segregation of the portions of shareholders equity and result of minority shareholders, indicated in the specific items.

The reconciliation between net income and shareholders equity of the Parent Company and the Consolidated figures is as follows:

	NET INCOME (LOSS)		SHAREHOLDERS EQUITY	
	03/31/06	03/31/05	03/31/06	12/31/05
PARENT COMPANY	32,677	44,215	5,282,772	5,250,095
Entries recorded in the Shareholders Equity of the Subsidiary				
Donations and Subsidies for Investments	(4)			-
Interest Capitalized in Subsidiary	873	873	(3,202)	(4,075)
CONSOLIDATED	33,546	45,088	5,279,570	5,246,020

Supplementary Information

The Company is presenting as supplementary information the statements of cash flows, which were prepared in accordance with Accounting Rules and Procedures - NPC 20 of the Brazilian Institute of Independent Auditors - IBRACON. The statement of cash flow is shown together with Note 17.

Report per Segment

The Company is presenting, supplementary to note 42, the report per business segment. A segment is an identifiable component of the company, destined for service rendering (business segment), or provision of products and services which are subject to different risks and compensations different from those other segments.

3. SUMMARY OF SIGNIFICANT ACCOUNTING PRACTICES

The criteria mentioned in this note refer to the practices adopted by the Company and its subsidiaries which are reflected in the consolidated balance sheet.

a. Cash and Cash Equivalents: Cash equivalents are short-term, high-liquidity investments, with immediate maturity. They are recorded at cost, plus income earned until the quarters closing dates, not exceeding market value. The investment fund quotas are valued by the quota value on March 31, 2006.

b. Trade Accounts Receivable: Receivables from users of telecommunications services are recorded at the amount of the fee or service on the date of the rendering of such services. Receivables from services include credits for services rendered and not billed until the quarters closing dates. Receivables resulting from sales of cell phones and accessories are recorded by the amount of sales made, at the moment in which the goods are delivered and accepted by the customer. The criterion adopted for making the allowance for doubtful accounts takes into account the calculation of the actual percentage losses incurred on each maturity level of accounts receivable. The historic percentages are applied to the current ranges of accounts receivable, also including accounts coming due and the portion yet to be billed, thus composing the amount that could become a future loss, which is recorded as provision.

c. Inventories: Stated at average acquisition cost, not exceeding replacement cost. Inventories are segregated into expansion and maintenance of the plant, and in relation to the consolidated financial statements, goods inventories for resale, mainly composed by cell phones, accessories and electronic cards - chips. The inventories to be used in expansion are classified in property, plant and equipment (construction in progress), and inventories to be used in maintenance are classified as current and long-term assets, in accordance with the period in which they will be used, and the resale inventories are classified as current assets. Obsolete inventories are recorded as allowance for losses. About cell phones and accessories, the subsidiary BrT Celular records the adjustments for the trading prices held as of the balance sheet date, in the cases in which the acquisitions presented higher values.

Composition of inventories is stated in Note 19.

d. Investments: Investments in subsidiaries are valued using the equity accounting method. Goodwill recorded was calculated based on the expectation of future results and its amortization is based on the expected realization/timing over a forecasted period of not more than ten years. Other investments are recorded at acquisition cost less allowance for losses, when applicable. The investments resulting from applications in income tax incentives are recognized at the date of investment, and result in shares of companies with tax incentives or investment fund quotas. In the period between the investment date and receipt of shares or quotas of funds, they remain recorded in long-term assets. The Company adopts the criterion of using the maximum percentage of tax allocation. These investments are periodically valued and the result of comparison between their original cost and the market, when the latter is lower, results in the recording of provisions for probable losses.

e. Property, Plant and Equipment: Stated at cost of acquisition and/or construction, less accumulated depreciation. Financial charges derived from liabilities financing assets and construction in progress are capitalized.

The costs incurred, when they represent improvements (increase in installed capacity or useful life) are capitalized. Maintenance and repair are charged to the profit and losses accounts, observing the accrual basis.

Depreciation is calculated under the straight-line method. Depreciation rates used are based on expected useful lives of the assets and in accordance with the standards of the Public Telecommunications Service. The main rates used are set forth in Note 27.

f. Deferred Charges: Segregated between deferred charges on amortization and formation. Their breakdown is shown in Note 28. Amortization is calculated using the straight-line method, for the period of five years, in accordance with the legislation in force. When benefits are not expected from an asset, it is written off against non-operating income.

g. Income Tax and Social Contribution on Income: Corporate income tax and social contribution on income are accounted for on an accrual basis. These taxes levied on temporary differences, tax losses and the negative social contribution base are recorded under assets or liabilities, as applicable, according to the assumption of realization or future demand, within the parameters established by CVM Instruction 371/02.

h. Loans and Financing: Updated to the balance sheet date for monetary and/or exchange variations and interest incurred to the balance sheet date. Equal restatement is applied to the guarantee contracts to hedge the debt.

i. Provision for Contingencies: Recorded based on management's risk assessment and measured based on economic grounds and legal counselors' opinions on the lawsuits and other contingency factors known as of the quarter closing date. The basis and nature of the provisions are described in Note 7.

j. Revenue Recognition: Revenues from services are recognized when these are rendered. Local and long-distance calls are charged based on time measurement according to the legislation in force. Revenues from sales of payphone cards (Public Use Telephony - TUP), cell phones and accessories are recorded when these are delivered and accepted by client. For prepaid services subject to mobile telephony, the revenue is recognized in accordance with the utilization of services. Revenue is not recognized if there is a significant uncertainty in its realization.

k. Recognition of Expenses: Expenses are recognized on an accrual basis, considering their relation with revenue realizations. Expenses related to other periods are deferred.

l. Financial Income (Expense), Net: Financial income comprises interest earned on overdue accounts receivable from services, gains on financial investments and hedges. Financial expenses comprise interest incurred and other charges on loans, financing and other financial transactions.

Interest on Shareholders' Equity, when credited is included in the financial expenses balance; for financial statement presentation purposes, the amounts recorded are reversed against profit and loss accounts of the year and reclassified as a deduction of retained earnings, in the shareholders' equity.

m. Research and Development: Costs for research and development are recorded as expenses when incurred, except for expenses with projects subject to the generation of future revenue, which are recorded under deferred assets and amortized over a five-year period from the beginning of the operations.

n. Benefits to Employees: Private pension plans and other retirement benefits sponsored by the Company and its subsidiaries for their employees are managed by three Institutions. Contributions are determined on an actuarial basis, when applicable, and accounted for on an accrual basis.

As of December 31, 2001, the subsidiary Brasil Telecom S.A. recorded its actuarial deficit on the balance sheet date against shareholders' equity, net of its tax effects. As from 2002, as new actuarial revaluations show the necessity for adjustments to the provision, they are recognized in the profit and loss accounts of the year.

Complementary information on private pension plans is described in Note 6.

o. Profit Sharing: Provision for employee profit sharing is recognized on an accrual basis, being recorded as operating expense. The determination of the amount, which is paid in the year following the provision accounting, considers the goal program established with the labor union, by means of a collective bargaining agreement, in conformity with the Law 10,101/00 and with the Company's Bylaws.

p. Income or loss per thousand shares: The income or loss per thousand shares is calculated based on the number of outstanding shares on the quarter closing date. The outstanding shares are represented by the totality of shares issued, less treasury stocks.

4. RELATED-PARTY TRANSACTIONS

Related-party transactions refer to existing operations carried out by the Company with its subsidiaries Brasil Telecom S.A., Nova Tarrafa Participações Ltda. and Nova Tarrafa Inc., also comprising transactions with SOLPART, its parent company.

Operations between related parties and the Company are carried out under usual market prices and conditions. The main transactions carried out are:

Brasil Telecom S.A.

Loans with Subsidiary: The outstanding balance derives from the spin-off of Telebrás and it is indexed to exchange variation, to which 1.75% interest p.a. is accrued, amounting to R\$ 51,137 (R\$ 58,798 on 12/31/05). The financial loss recognized against results in the quarter was R\$ 3,926, attributed to the drop of U.S. dollar quotation (R\$ 554 of financial gain in 2005).

Debentures: On January 27, 2001, the subsidiary issued 1,300 private debentures, at the unit price of R\$ 1,000, non-convertible or exchangeable for any type of share, totaling R\$ 1,300,000, for the purpose of financing part of its investment program. All these debentures were acquired by the Company. The nominal value of these debentures will be paid in one installment with maturity on 07/27/06, corresponding to 40% of amount issued. The debenture remuneration is equivalent to 100% of CDI, received semi-annually. The balance of this asset is R\$ 534,070 (R\$ 560,459 on 12/31/05), and the yield recognized in the income statement for the quarter represented R\$ 21,362 (R\$ 37,313 in 2005).

Sureties and Guarantees: (i) The Company renders sureties as guarantee of loans and financing owed by the Parent Company to the lending financial institutions. In the quarter, referring to the guarantee granted, the Company earned income at the amount of R\$ 581 (R\$ 1,055 in 2005); and (ii) the Company renders surety for the Subsidiary, related to the contracting of insurance policies, guarantee of contractual liabilities (GOC) for 2006, which totaled R\$ 220,305 (R\$ 217,142 in 2005). In the quarter, on the account of the remuneration of such surety, the Company recorded an operating revenue of R\$ 66 (R\$ 65 in 2005).

Amounts Receivable and Expenses: resulting from transactions related to the sharing of funds. The balance receivable is R\$ 381 (R\$ 54 payable, on 12/31/05) and the amounts recorded against results in the quarter are represented by operating expenses of R\$ 337 (R\$ 1,056 in 2005).

5. MARKET VALUE OF FINANCIAL ASSETS AND LIABILITIES (FINANCIAL INSTRUMENTS) AND RISK ANALYSIS

The Company and its subsidiaries appraised the book value of its assets and liabilities as compared to market or realizable values (fair value), based on information available and valuation methodologies applicable to each case. The interpretation of market data regarding the choice of methodologies requires considerable judgment and determination of estimates to achieve an amount considered adequate for each case. Accordingly, the estimates presented may not necessarily indicate the amounts, which can be obtained in the current market. The use of different assumptions for calculation of market value or fair value may have material effect on the obtained amounts. The selection of assets and liabilities presented in this note was made based on their materiality. Instruments whose values approximate their fair values, just like cash and cash equivalents, accounts receivable, assets and liabilities of taxes, pension funds, amongst others, and whose risk assessment is not significant are not mentioned.

In accordance with their natures, the financial instruments may involve known or unknown risks; the potential of such risks is important for the best judgment. Thus, there may be risks with or without guarantees, depending on circumstantial or legal aspects. Among the principal market risk factors which can affect the Company's and subsidiaries' business are the following:

a. Credit Risk

The majority of the services provided by the subsidiary Brasil Telecom S.A. are related to the Concession Agreement, and a significant portion of these services is subject to the determination of fees by the regulatory agency. The credit

policy, in case of telecommunications public services, is subject to legal standards established by the concession authority. The risk exists since the subsidiary may incur losses arising from the difficulty in receiving amounts billed to its customers. In the quarter, the amount consolidated of losses with accounts receivable, including allowance for doubtful accounts, corresponded to 3.09% of the gross revenue (3.02% in the same period in 2005). By means of internal controls, the level of accounts receivable is constantly monitored, thus limiting the risk of past due accounts by cutting the access to the service (out phone traffic) if the bill is overdue for over 30 days. Exceptions are made for telephone services, which should be maintained for national security or defense.

The subsidiary Brasil Telecom S.A. operates in co-billing, related to long distance calls with the use of its CSP (Operator Selection Code) originated by subscribers of other fixed and mobile telephony operators. The accounts receivable in co-billing are managed by such operators, based on operating agreements executed and in accordance with rules set forth by ANATEL. Blocking rules established by the regulating agency are the same for fixed and mobile telephony companies, co-billing suppliers. The subsidiary separately monitors receivables of such nature and maintains provision for losses, which may occur, due to risks of not receiving such amounts.

Concerning mobile telephony, credit risk in cell phones sales and in service rendering in the postpaid category is minimized with the adoption of a credit pre-analysis. Still in relation to postpaid service, whose client base at the end of the quarter was 33.4% (31.3% in 2005), the receivable accounts are also monitored in order to limit default and to block the service (out of phone traffic) if the bill is overdue for over fifteen days.

b. Exchange Rate Risk

Assets

The Company has loan agreements in foreign currency, and, therefore, subject to exchange rate fluctuation. The assets exposed to exchange rate risk are as follows:

	PARENT COMPANY		CONSOLIDATED	
	Book Value		Book Value	
	03/31/06	12/31/05	03/31/06	12/31/05
Assets

Total	152,049	159,896	100,912	101,098
Long-term	152,049	159,896	100,912	101,098

The loans receivable in U.S. dollars were transferred to the Company at the time of the spin-off of Telebrás. Due to their original characteristics, no financing is available on the market under similar conditions, which led to the presentation of the book value only.

Liabilities

The Company and the subsidiary Brasil Telecom S.A. has loans and financing contracted in foreign currency. The risk related to these liabilities arises from possible exchange rate fluctuations, which may increase these liabilities balances. Loans subject to this risk represent approximately 23.1% (23.8% on 12/31/05) of the total liabilities of borrowings and consolidated financing, minus the contracted hedge balances. In order to minimize this kind of risk, the Company enters into exchange hedge agreements with financial institutions. Out of the installment of the debt consolidated in foreign currency, 71.7% (69.8% on 12/31/05) is covered by hedge operations and financial investments in foreign currency, resulting in an effective exposure of only 11.5%. Unrealized positive or negative effects of these operations are recorded in the results as gain or loss. Until the end of the quarter, the consolidated negative adjustments of such operations totaled R\$ 64,517 (R\$ 47,771 of negative adjustments in 2005).

Net exposure as per book and market values, at exchange rate risk, is as follows:

PARENT COMPANY

	03/31/06		12/31/05

Long-term	1,098,642	1,140,800	1,198,428	1,232,513

The method used for calculation of market value (fair value) of loans and financing in foreign currency and hedge instruments was future cash flows associated to each contracted instruments, discounted at market rates effective on the quarter closing date.

c. Interest Rate RiskAssets

The Company's assets derive from the full subscription of private debentures issued by the subsidiary Brasil Telecom S.A. For the Consolidated there are loans paid by the rates mentioned below, as well as income securities (CDB's) invested with Banco de Brasília S.A., relating to the guarantee to tax incentive granted by the Federal District Government, whose program is called Program for the Sustainable and Economic Development Promotion of the Federal District PRO-DF, and the compensation of these securities is equivalent to 95% of the SELIC rate.

Current	-	-	5,805	3,962
Long-term	534,070	560,459	6,088	7,815

The book values are equal to market values since the current conditions for contracting this type of financial instrument are similar to those in which they come from or do not have parameters for quotation or contracting.

Liabilities

In 2000, the Company issued private debentures convertible into preferred shares. This liability was contracted at the interest rate subject to TJLP. The risk subject to this liability arises from possible increase in this rate.

The subsidiary Brasil Telecom S.A. has loans and financing contracted in local currency subject to interest rates subject to indexing units (TJLP, UMBNDES, CDI etc.). The risk inherent in these liabilities arises from possible variations in these rates. The Subsidiary has contracted derivative contracts to hedge 20.4 (22.7% on December 31, 2005) of the liabilities subject to the UMBNDES rate, using exchange rate swap contracts. However, the other market rates are continually monitored to evaluate the need to contract derivatives to protect against the risk of volatility of these rates. The subsidiary also issued non-convertible or exchangeable private and public debentures. These liabilities were contracted at interest rates tied to the CDI, and the risk linked with this liability is the result of the possible increase in the rate.

The aforementioned liabilities on the quarter closing date are as follows:

PARENT COMPANY

Long-term	1,983,525	2,009,555	2,168,972	2,156,213

Some of the agreements mentioned have the market values equal to book values because the current contractual conditions for these types of financial instruments are similar to those in which they were originated or they did not present parameters for quotation or contraction.

d. Risk of Not Linking Monetary Restatement Indexes of Loans and Financing to Accounts Receivable

Loan and financing rates contracted by subsidiary Brasil Telecom S.A. are not subject to amounts of accounts receivable. Telephony fee adjustments do not necessarily follow increases in local interest rates which affect the subsidiary's debts.

e. Contingency Risks

Contingency risks are assessed according to loss hypotheses, as probable, possible or remote. Contingencies considered as probable risk are recorded in liabilities. Details on this risk are presented in Note 7.

f. Risks Related to Investments

The Company has investments, which are valued using the equity accounting method and stated at acquisition cost. Brasil Telecom S.A., Nova Tarrafa Participações Ltda. and Nova Tarrafa Inc. are subsidiaries, the investments of which are carried under the equity accounting.

Investments valued at cost are immaterial in relation to total assets. The risks related to them would not cause significant impacts to the Company's results if losses were to occur on these investments.

The amounts related to the investments are as follows:

	03/31/06		12/31/05	
	Book Value	Market Value	Book Value	Market Value
Investments	3,746,517	5,933,595	3,745,018	5,547,050

Not Listed in Stock Exchange	37,940	37,940	39,957	39,957
Other investments	7,215	7,215	7,070	7,070

The investment quoted on the stock exchange refers to the interest in Brasil Telecom S.A., and its market value estimated based on the market quotations in trading between minority shareholders.

g. Financial Investments Risks

The Company has high-liquid financial investments in exclusive financial investment funds (FIFs), whose assets are constituted by post-fixed, pre-fixed and exchange rate federal securities, indexed to CDI, through the spread of these securities or future contracts with the Futures and Commodities Exchange - BM&F, exclusive financial investment funds (FIF), indexed to the exchange rate variation through US dollar future contracts with BM&F, overnight financial investments abroad, in own portfolio of Bank Deposit Certificates (CDB) issued by national financial institutions and in own portfolio of Deposit Certificates (CD) issued by financial institution abroad. Overnight investments, in the foreign exchange fund and in deposit certificates are subject to exchange rate risk. CDB investments, as well as overnight investments, which are backed in this type of certificate, are subject to the credit risk of the issuing financial institution. The Company holds financial investments in the amount of R\$ 833,388 (R\$ 883,482 on 12/31/05). Earnings accrued until the end of the quarter are accounted as financial income and amounted to R\$ 34,297 (R\$ 38,167 in 2005). Amounts attributed to the consolidated statements are as follows: financial

investments in the amount of R\$ 1,850,706 (R\$ 2,550,490 on 12/31/05) and earnings accrued in the amount of R\$ 70,895 (R\$ 97,861 in 2005).

h. Risk of Advanced Maturities of Loans and Financing

The liabilities stemming from financing mentioned in Note 34, related to BNDES agreements, public debentures and the majority referring to financial institutions, contain clauses providing for advanced maturities of liabilities or retention of amounts pegged to debt installments (covenants), in cases certain minimum amounts are not reached for certain indicators, such as ratios of indebtedness, liquidity, cash generation and others.

Considering the provisions recognized in the financial statements as of 12/31/05 of Brasil Telecom S.A., provisions of which were informed to the market by means of Material Fact as of 01/04/06, all the loan and hedge agreements were renegotiated, in February 2006 which contained financial covenants related to Earnings Before Interest, Income Taxes, Depreciation and Amortization EBITDA and, in the case of BNDES, the negotiation are still ongoing aiming at the adequacy of these covenants.

As set forth in the financing agreements maintained with BNDES, Brasil Telecom S.A. must comply with a set of financial indices and in the event of non-compliance with some of these indices, BNDES is allowed to request the temporary block of amounts, given as guarantee in a linked account. In view of the non-compliance with this clause, the total estimated retention amount is approximately R\$ 247,442, made operational through the partial block of the Company's financial investments, without prejudice of the remuneration to be received by it. After the end of the quarter, blocks in the investment fund of Brasil Telecom S.A. and Freelance in the amount of R\$ 91,439 and R\$ 100,000, respectively, representing R\$ 191,439 for the Consolidated, took place, which were reclassified for the item of contractual retentions, mentioned in note 24, for purposes of presentation of this quarterly information. The release of the blocked amounts will take place when Brasil Telecom S.A. returns to complying with the financial relations set forth in the agreements or it is successful in the adequacy of financial covenants negotiated. BNDES granted a renouncement in relation to the possible declaration of early maturity in view of the new non-compliance with the financial indices.

i. Risk Related to Rules

Brasil Telecom S.A. signed on 12/22/05, new domestic local and long distance concession agreements, which shall take effect from January 1, 2006 to December 31, 2025. These new concession agreements, which provide for five-year reviews, in general, contain a higher level of intervention in the business management and various provisions related to consumer's interests defense, as realized by the regulating agency. Among other issues, we point out:

- The burden of concession defined as 2% of taxes net revenues, calculated every two years, assuming as initiation the fiscal year of 2006, the initial payment of which falls on 04/30/07 and thus successively until the end of concession. Such calculation method, concerning the accrual basis, corresponds to 1% for each fiscal year;
- The definition of new universalization targets, especially the AICE Special Class Individual Access of mandatory offer and Telecommunications Service Centers - PST, with entire burden to the Concessionaire;
- The possibility of Regulating Agency imposing mandatory alternative plans;
- The introduction of Regulating Agency's right to intervene and modify concessionaire's agreements with third parties;
- The inclusion of parent company, subsidiary, affiliated company and third parties' assets, indispensable to concession, as reversible assets;
- The creation of Users' Council in each concession:

In addition, the regulation associated with new concession agreement provides for changes in local calls tariff system, changing from pulse to minute during regular hours, in tariff amounts of public and adjustment criteria, which had the individual excursion factor reduced from 9% to 5% and shall start to have a definition by a sector index - IST, in which composition the highest weight is IPCA.

On their turn, the interconnection tariffs, as provided for, are then defined as a percentage public tariff until the implementation of cost model by service/modality, estimated for 2008, as defined in the Regulation for Separation and Accounting Allocation (Resolution 396/05).

ANATEL, on February 23, 2006, issued the Resolution 432, postponing for a twelve-month period the dates mentioned in Rule 423, as of 12/06/05, which deals with the Amendment to the Tariff System of STFC Basic Plan in the Local Modality Rendered under Public Scheme.

It is not possible to assess, on the date this quarterly information were prepared, the future impacts to be generated by such regulating change.

Legislative Bill of Change in Telecommunications Act (LGT)

At the beginning of March 2006, the Executive Branch sent to the Brazilian Congress the Legislative Bill 6,677 to amend LGT 9,472, as of 7/16/97, whose content is essentially to enable the adoption of distinctive criteria based on the social-economic condition of the aspirant-user, with the purpose of reducing the social disparities and facilitate the access to telecommunications services publicly provided.

Due to the lack of objective elements it is not possible to evaluate, on the date of the preparation of this quarterly information, the future impacts which will be produced in the businesses of Brasil Telecom S.A., if the referred legislative bill is approved at the Brazilian Congress.

Overlapping of Licenses

When Brasil Telecom S.A. received the certification of achievement of universalization targets for 2003, established by ANATEL, it already rendered fixed telephone services (STFC) at domestic local and long distance modalities (LDN) intra-regional in Region II of General Concession Plan (PGO). After the achievement of said targets, ANATEL, in January 2004, issued authorizations enlarging the possibilities of subsidiary's operation: STFC local and LDN in Regions I and III of PGO (and in a few sectors of Region II); International Long Distance Call (LDI) in Regions I, II and III of PGO; mobile telephony, by means of the subsidiary 14 Brasil Telecom Celular S.A. (BrT Celular), in Region II of Personal Mobile Service (SMP). Concession agreements already existing were also expanded, allowing the LDN calls destined to any spot of the Brazilian territory. If Telecom Italia International N.V. (TII) acquired an indirect controlling interest in the Company or in Brasil Telecom S.A., these and TIM Brasil Serviços e Participações S.A. (TIM) could be considered as affiliated companies under the Brazilian telecommunications law. This would imply that the ability to render domestic (LDN) and international (LDI) fixed telephony services, as well as mobile telephony services, in same regions that TIM, would be at risk of being partially closed by ANATEL. On January 16, 2004, ANATEL issued the Act 41,780, establishing a period of 18 months during which TII could reacquire an indirect controlling interest in the Company, as long as TII does neither participate or vote any issues related to the overlapping of services offered by Brasil Telecom S.A. and TIM, such as domestic and international long distance calls and mobile telephony services. On June 30, 2004, the Administrative Council for Economic Defense - CADE, in the records of Writ of Prevention 08700.000018/2004 -68, set forth restriction to the exercise of control rights by Telecom Italia International N.V. and its representatives in the Boards of Directors of Solpart Participações S.A., Brasil Telecom Participações S.A. and Brasil Telecom S.A.

On April 28, 2005, TII and TIM and Brasil Telecom S.A. and BrT Celular entered into various corporate agreements, including an instrument called Merger Agreement and a Protocol related thereto. Among other reasons alleged, this merger operation was justified by the management of that time as possible solution to overlapping of regulatory licenses and authorizations with TIM, to remove sanctions and penalties, which could be imposed by ANATEL. The operation was prohibited by an injunction issued by the North American Court. It is also the purpose of discussion in the Brazilian Court and in arbitration involving controlling shareholders. Whether or not confirming the validity of April 2005 agreements, there is the possibility of assets related to fixed and mobile segments (see Note 42) eventually lose their value, as a result of overlapping of operations or sanctions from ANATEL. On the other hand, it is also possible that corporate agreements as of April 28, 2005 are declared null and void by courts or arbitration, which would remove TII from the control block of Brasil Telecom group, eliminating the overlapping of concession and consequently, the regulatory risk. Nevertheless, at this moment, it is not possible to anticipate such legal developments and their future effects on the financial statements.

On July 7, 2005, ANATEL declared, by means of Act 51,450, that the counting of 18 month-term to solve the overlapping of licenses would start on the date of effective return of TII to the control group of Brasil Telecom S.A. On July 26, 2005, ANATEL, by means of Order 576/2005, declared that the counting of term will start on April 28, 2005. Therefore, according to ANATEL, the interested companies shall adopt the measures necessary to eliminate the overlapping of the concession until the end of referred term in October 2006, under the penalty of applying legal sanctions, which may affect either companies or both of them.

Depending on final decision of ANATEL, these sanctions may have an adverse and material effect on businesses and operations attributed to the Company, conducted through its subsidiary Brasil Telecom S.A. and 14 Brasil Telecom Celular S.A.

Regarding the Merger Agreement mentioned in this note, the subsidiary Brasil Telecom S.A. and BrT Celular started on March 15, 2006 arbitration against TII and TIM, aiming at annulling it. The Subsidiary disclosed material fact about this matter on March 16, 2006.

TII and TIM sent to the Company and to BrT Celular a correspondence dated as of May 2, 2006, unilaterally terminating the referred Merger Agreement, reserving supposed rights. The Company published a material fact about it on May 2, 2006.

6. BENEFITS TO EMPLOYEES

The benefits described in this note are offered to the employees of the Company, its subsidiary Brasil Telecom S.A. and companies controlled thereby. These companies are better described together, and can be referred to as Brasil Telecom (Group) and, for the purpose of the supplementary pension plan mentioned in this note, are also denominated Sponsor or Sponsors.

a. Supplementary Pension Plan

Supplementary pension plans are sponsored, related to retirement for its employees and assisted members, and in the case of the latter, medical assistance in some cases. These plans are managed by the following foundations: (i) Fundação 14 de Previdência Privada (Fundação 14); (ii) Fundação BrTPREV (FBrTPREV), former CRT, a company merged by the Company on 12/28/00; and (iii) Fundação SISTEL de Seguridade Social (SISTEL), which originated from certain companies of the former Telebrás System.

The Company's Bylaws stipulate approval of the supplementary pension policy and the joint liability attributed to the defined benefit plans is subject to the acts signed with the foundations, with the consent of the Supplementary Pension Plan Department - SPC, where applicable to the specific plans.

The plans sponsored are appraised by independent actuaries on the fiscal year closing date. For defined benefit plans mentioned in this note, the immediate recognition of actuarial gains and losses is adopted when the total liabilities for the plans that show a deficient condition are constituted. This measure has been applied since the 2001 fiscal year, when the regulations of CVM Resolution 371/00 were adopted. For the plans showing positive actuarial situations, no assets are recorded due to the legal impossibility of reimbursing the surpluses.

The characteristics of the supplementary pension plans sponsored are described below.

FUNDAÇÃO 14

Since the split of the only pension plan managed by SISTEL, PBS, in January 2000, the evolution tendency for a new stage was already estimated. Such stage would result in an own and independent management model for TCSPREV pension plan, by means of a specific entity to manage and to operate them, and this fact has become more and more evident throughout the years. This tendency also occurred in the main SISTEL pension plan sponsoring companies, which created their respective supplementary pension plan foundations. In this scenario, Fundação 14 de Previdência Privada was created in 2004, with the purpose of taking over the management and operation of the TCSPREV pension plan, which started as from March 10, 2005, whose process was backed by the segment's specific legislation and properly approved by the Supplementary Pension Plan Department - SPC.

In accordance with the Transfer Agreement entered into between Fundação Sistel de Seguridade Social and Fundação 14 de Previdência Privada, SISTEL, by means of the Management Agreement, it will provide management and operation services of TCSPREV and PAMEC-BrT plans to Fundação 14, after the transferring of these plans, which took place on March 10, 2005, for a period of up to 18 months, while Fundação 14 organizes itself to take over the management and operation services of its plans.

Plans

TCSPREV (Defined Contribution, Settled Benefit and Defined Benefit)

This defined contribution and settled benefit plan was introduced on February 28, 2000. On December 31, 2001, all the pension plans sponsored by the Company with SISTEL were merged, being exceptionally and provisionally approved by the Supplementary Pension Plan Department SPC of document sent to that agency due to the need for adjustments to the regulations. Thus, TCSPREV is constituted of defined contribution groups with settled and defined benefits. The plans that were merged into the TCSPREV were the PBS-TCS, PBT-BrT, BrT Management Agreement and the Unusual Contractual Relation Instrument, and the conditions established in the original plans were maintained. In March 2003, this plan was no longer offered to new sponsors contracted ones. Nevertheless, this plan referring to defined contribution was offered again as from March 2005. TCSPREV currently assists to around 62.5% of the staff.

PAMEC-BrT Health Care Plan for Supplementary Pension Beneficiaries (Defined Benefit)

Destined for health care of retirees and pensioners subject to PBT-BrT Group, which was merged to TCSPREV on 12/31/01.

Contributions Established for the Plans

TCSPREV

Contributions to this plan, by group of participants, are established based on actuarial studies prepared by independent actuaries according to regulations in force in Brazil, using the capitalization system to determine the costs. Currently contributions are made by the participants and the sponsor only for the internal groups PBS-TCS (defined benefit) and TCSPREV (defined contribution). In the TCSPREV group, the contributions are credited in individual accounts of each participant, equally by the employee and the Company, and the basic contribution percentages vary between 3% and 8% of the participant's salary, according to participant's age and limited to R\$ 19,520.40 for 2006. Participants have the option to contribute voluntarily or sporadically to the plan above the basic contribution, but without equal payments from the Company. In the case of the PBS-TCS group, the sponsor's contribution in the quarter was 12% of the payroll of the participants; while the employees' contribution varies according to the age, service time and salary. An entry fee may also be payable depending on the age of entering the plan. The sponsors are responsible for the cost of all administrative expenses and risk benefits. Until the quarter, the sponsors' contributions to TCSPREV represented 5.03% of plan participants' payroll. For employees linked to the plan, the contributions represented 4.90%

The contributions of the party-company in the quarter added up to R\$ 4,206 (R\$ 3,750 in 2005).

PAMEC-BrT

The contributions for this plan were fully paid in July 1998, through a single payment. New contributions are limited to future necessity to cover expenses, if that occurs.

FUNDAÇÃO SISTEL DE SEGURIDADE SOCIAL

The supplementary pension plan which remains under SISTEL's management comes from the period before the Telebrás Spin-off and assists participants who had the status of beneficiaries in January 2000 (PBS-A). SISTEL also manages the PAMA/PAMA-PCE pension plan, formed by participants assisted by the PBS-A Plan, the PBS's plans segregated by sponsor in January 2000 and PBS-TCS Internal Group, merged into the TCSPREV plan in December 2001.

Plans

PBS-A (Defined Benefit)

Maintained jointly with other sponsors subject to the provision of telecommunications services and destined for participants that had the status of beneficiaries on January 31, 2000.

PAMA - Health Care Plan for Retired Employees/ PCE - Special Coverage Plan (Defined Contribution)

Maintained jointly with other sponsors subject to the provision of telecommunications services and destined for participants that had the status of beneficiaries on January 31, 2000, and also for the beneficiaries of the PBS-TCS Group, incorporated into the TCSPREV on December 31, 2001 and beneficiaries of the plans of definite benefits PBS s sponsored by other companies. According to a legal and actuarial appraisal, the Company s liability is exclusively limited to future contributions. During 2004, an optional migration of retirees and pensioners of PAMA took place for new coverage conditions (PCE). The participants who opted for the migration began to contribute to PCE.

Contributions Established for the Plans

PBS-A

Contributions may occur in case of accumulated deficit. On December 31, 2005, the actuarial appraisal date, the plan presented a surplus.

PAMA/PCE

This plan is sponsored with contributions of 1.5% on payroll of active participants subject to PBS plans, segregated and sponsored by several sponsors. In the case of Brasil Telecom, the PBS-TCS was incorporated into the TCSPREV plan on December 31, 2001, and began to constitute an internal group of the plan. Contributions by retirees and pensioners who migrated to PCE are also carried out.

The contributions to PAMA, in the part attributed to the Sponsor, in the quarter added up to R\$ 37 (R\$ 29 in 2005).

FUNDAÇÃO BrTPREV

It is the manager originated from the plans sponsored by former CRT, company incorporated by the Brasil Telecom S.A. at the end of 2000. The main purpose of the Company sponsoring BrTPREV is to maintain the supplementary retirement, pension plans and other provisions in addition to those provided by the official social security system to participants.

Plans

BrTPREV

Defined contribution plan and benefits settled, recorded in October 2002 destined to grant supplementary pension plan benefits in addition to those of the official social security and that initially assisted only employees subject to the branch of Rio Grande do Sul. This pension plan has remained open to new employees of the Company and its subsidiaries from March 2003 to February 2005, when its offering was interrupted. Nowadays, this plan assists around 33.2% of the staff.

Fundador - Brasil Telecom and Alternativo - Brasil Telecom

Defined benefit plans, destined to provide supplementary social security benefits in addition to those of the official social security, now closed to the entry of new participants. Currently, these plans assist around 0.1% of the staff.

Contributions Established for the Plans

BrTPREV

The contributions to this plan are established based on actuarial studies prepared by independent actuaries according to the regulations in force in Brazil, using the capitalization system to determine the costs. Contributions are credited in individual accounts of each participant, the employee s and Company s contributions being equal, the basic percentage contribution varying between 3% and 8% of the participation salary, according to age and limited to R\$ 20,193.00 for 2006. Optionally, the participant could also contribute whether on a voluntary basis or sporadically to

the plan, above the basic contribution, however without the parity of the sponsor. It is responsible for the costs of all administrative expenses and risk benefits. The Company's contributions in 2005 corresponded to 8.41% of participants' payroll linked to such plan, whereas for employees' contributions, these accounted for 4.83%.

The contributions of the party-company in the quarter added up to R\$ 3,420 (R\$ 2,252 in 2005).

Fundador - Brasil Telecom and Alternativo - Brasil Telecom

The regular contribution by the sponsor in the year in the quarter was of 4.13% on the payroll of plan participants, who contributed at variable rates according to age, service time and salary; the average rate was 4.13%. With the Alternative-Brasil Telecom, the participants also pay an entry fee depending on the age of entering the plan.

The normal contributions of the Sponsor in the quarter added up to R\$ 4 (R\$ 4 in 2005).

The amortizable mathematical reserve, related to the current amount of the sponsor's supplementary contribution, in view of the actuarial failure of the plans managed by FBrTPREV, has the maximum settlement period of 20 years as from January 2002, according to Circular 66/SPC/GAB/COA from the Supplementary Pension Plan Department, dated January 25, 2002. Out of the maximum period established, there are 15 years and nine months for total settlement, and in the quarter the amount of R\$ 34,179 (R\$ 25,440 in 2005) was amortized.

b. Stock Option Plan for Management and Employees

The Extraordinary Shareholders' Meeting from the subsidiary Brasil Telecom S.A. held on April 28, 2000, approved the general plan to grant stock purchase options to officers and employees of the Company and its subsidiaries. The plan authorizes a maximum limit of 10% of the shares of each kind of Company stock. Shares derived from exercising options guarantee the beneficiaries the same rights granted to other Company shareholders. The administration of this plan was entrusted to a management committee appointed by the Board of Directors, which decided only to grant preferred stock options. The plan is divided into two separate programs:

Program A

This program is granted as an extension of the performance objectives achieved, established by the Board of Directors for a five-year period. Up to March 31, 2006, no stock had been granted.

Program B

The exercise price is established by the management committee based on the market price of 1000 shares at the date of the grant of option and will be monetarily restated by the IGP-M between the date of signing the contracts and the payment date.

The right to exercise the option will take place in the manner and terms presented as follows:

	First Grant		Second Grant		Third Grant	
	From	End of period	From	End of period	From	End of period
33%	01/01/04	12/31/08	12/19/05	12/31/10	12/21/05	12/31/11
33%	01/01/05	12/31/08	12/19/06	12/31/10	12/21/06	12/31/11
34%	01/01/06	12/31/08	12/19/07	12/31/10	12/21/07	12/31/11

The acquisition periods can be anticipated as a result of the occurrence of events or special conditions established in the concession agreement. Until March 31, 2006, options were not granted.

The information related to the general plan to grant stock options is summarized below:

	03/31/2006	
	Preferred Shares Options (Thousand)	Average Exercise Price R\$
Balance on 12/31/05	410,737	13.00
Extinguished Options	81,779	13.00
Balance on 03/31/06	328,958	13.00

There was no granting of call options exercised until the balance sheet closing date and the representation of balance of options before the total of outstanding shares of the subsidiary Brasil Telecom S.A. is 0.06% (0.08% on 12/31/05).

Considering the hypothesis that the options will be fully exercised, the opportunity cost of the premiums of the respective options, calculated by the Black&Scholes method, for the Company would be R\$ 527 (R\$ 390 in 2005).

c. Other Benefits to Employees

Other benefits are granted to employees, such as: health care/dental care, meal allowance, group life insurance, occupational accident allowance, sickness allowance, transportation allowance, and other.

7. PROVISIONS FOR CONTINGENCIES

a. Contingent Liabilities

The Company and its subsidiaries periodically performs an assessment of its contingency risks, and also reviews its lawsuits taking into consideration the legal, economic, tributary and accounting aspects. The assessment of these risks aims to classifying them according to the chances of unfavorable outcome among the alternatives of probable, possible or remote, taking into account, as applicable, the opinion of the legal advisors.

For those contingencies, which the risks are classified as probable, provisions are recognized. Contingencies classified as possible or remote are discussed in this note. In certain situations, due to legal requirements or precautionary measures, judicial deposits are made to guarantee the continuity of the cases in litigation. Such lawsuits are being discussed under administrative and judicial scopes and in various levels, from preliminary to extraordinary ones.

It is also worth mentioning that the following shows in some cases, subject-matter identical to different risk level classifications, fact of which is justified by factual and procedural status related to each lawsuit.

Labor Claims

The provision for labor claims includes an estimate by the Company's management, supported by the opinion of its legal counselors, of the losses related to lawsuits filed by employees, former employees and of service companies, related to labor issue.

Tax Suits

The provision for tax contingencies refers principally to matters related to tax collections due to differences in interpretation of the tax legislation on the account of the legal advisors of the Company, its subsidiaries and tax authorities.

Civil Suits

The provision for civil contingencies refers to cases related to contractual adjustments arising from Federal Government economic plans, and other cases related to community telephone plans and indemnification and consumer

lawsuits.

Classification by Risk Level

Contingencies of Probable Risk

Contingencies classified as having a probable risk of loss, for which provisions are recorded under liabilities, have the following balances:

As follows, the tax claims promoted by the Company and Brasil Telecom S.A. are shown, through which the recovery of tax paid is claimed, calculated differently from interpretation sustained by its legal advisors, the assessment of success in future filing of appeals is assessed as probable:

PIS/COFINS: judicial dispute about the application of Law 9,718/98, which increased the calculation basis for PIS and COFINS. The period comprised by Law was from February 1999 to November 2002 for PIS and from February 1999 to January 2004 for COFINS. The amount estimated recoverable is R\$ 130,449 (R\$ 126,268 on 12/31/05) for the Company and R\$ 255,661 (R\$ 242,488 on 12/31/05 for the Consolidated). In November 2005, STF (Federal Supreme Court) concluded the judgment of certain lawsuits dealing with such issue and considered unconstitutional the increase of calculation basis introduced by said Law.

We are awaiting the judgments of lawsuits brought by the Company and its Subsidiary and the amounts attributed to contingent assets were not recognized in the financial statements.

8. SHAREHOLDERS EQUITY

a. Capital Stock

The Company is authorized to increase its capital stock by means of a resolution of the Board of Directors to a total limit of 700,000,000,000 (seven hundred billion) common or preferred shares, observing the legal limit of 2/3 (two thirds) for the issue of new preferred shares without voting rights.

By means of a resolution of the General Shareholders Meeting or the Board of Directors, the Company's capital can be increased by the capitalization of retained earnings or prior reserves allocated by the General Shareholders Meeting. Under these conditions, the capitalization can be effected without modifying the number of shares.

The capital is represented by common and preferred stocks, with no par value, and it is not mandatory to maintain the proportion between the shares in the case of capital increases.

By means of a resolution of the General Shareholders Meeting or the Board of Directors, the preemptive right for the issue of shares, subscription bonuses or debentures convertible into shares can be excluded, in the cases stipulated in article 172 of Corporation Law.

The preferred shares do not have voting rights, except in the cases specified in the sole paragraph of articles 11 and 14 of the bylaws, but are assured priority in receiving the minimum non-cumulative dividend of 6% per annum, calculated on the amount resulting from dividing the capital by the total number of the Company's shares or 3% per annum, calculated on the amount resulting from dividing the net book shareholders equity by the total number of the Company's shares, whichever is greater.

Subscribed and paid-up capital on the quarter closing date is R\$ 2,596,272 (R\$ 2,596,272 on December 31, 2005) and represented by shares without par value as follows:

Weighted Average	14.08	14.08
Minimum	12.40	12.40
Maximum	17.00	17.00

The unit cost of acquisition considers the totality of stock repurchase programs.

Until the quarter closing date, no disposal of common shares acquired occurred.

Market value of Treasury Stock

The market value of treasury stocks on the quarter closing date was the following:

	03/31/06	12/31/05
Number of common shares held in treasury (thousand shares)	1,480,800	1,480,800
Quote per one thousand shares on BOVESPA (R\$)	23.20	23.76
Market value	34,355	35,184

The Company maintains the balance of treasury stock in a separate account. For presentation purposes, the value of the treasury stock is deducted from the reserves that gave rise to it, and is presented as follows:

	03/31/06	12/31/05
Book Value	2,115,501	2,082,824
Treasury Stock	(20,846)	(20,846)
Balance of Retained Earnings, net of Treasury Stock	2,094,655	2,061,978

c. Capital Reserves

Capital reserves are recognized in accordance with the following practices:

Goodwill Reserve in the Subscription of Shares: results from the difference between the amount paid on subscription, and the portion allocated to capital.

Other Capital Reserves: formed by the contra entry of the funds invested in income tax incentives.

d. Profit Reserves

The profit reserves are recognized in accordance with the following practices:

Legal Reserve: allocation of five percent of the annual net income, up to twenty percent of paid-up capital or thirty percent of capital plus capital reserves. The Legal Reserve is only used to increase capital, or to offset losses.

Unrealized Profit Reserve: recognized in the year in which the amount of the mandatory dividend, calculated in accordance with the statutory provisions or with article 202 of Law 6,404/76, exceeds the realized portion of net income. The reserve can offset losses in subsequent years or, when realized, comprise the calculation of net income adjusted for dividend payments. According to the restatement required by Law 10,303/01, the income recorded under the unrealized profit reserve as from 2002 fiscal year should be considered at the value of the dividend postponed. However the unrealized profit reserve formed under the previous regulations, when realized, will continue to form part of the calculation base for the dividends, this case of unrealized profit reserves existed in the Company.

Retained Earnings: Comprises the remaining balances of net income, adjusted according to the terms of article 202 of Law 6,404/76, or by the recording of adjustments from prior years, if applicable.

e. Dividends and Interest on Shareholders Equity

Dividends are calculated at the end of the fiscal year. Mandatory minimum dividends are calculated in accordance with article 202 of Law 6,404/76, and the preferred or priority dividends are calculated in accordance with the Company's bylaws.

As a result of a resolution by the Board of Directors, the Company may pay or credit, as dividends, interest on shareholders' equity (JSCP), under the terms of article 9, paragraph 7, of Law number 9,249, dated December 26, 1995. The interests paid or credited will be offset against the minimum statutory dividend, in accordance with article 44 of the Bylaws.

The recoverable amount foreseen after the year 2015 is a result of a provision to cover an actuarial insufficiency of the pension plan, which is being settled by Brasil Telecom S.A. according to the maximum period established by the Supplementary Pensions Department (SPC), which is 15 years and 9 months. Despite the time limit stipulated by the SPC and according to the estimated future taxable income, the subsidiary presents conditions to fully offset the deferred taxes in a period lower than ten years, if it opts to fully anticipate the payment of the debt. Tax credits in the amount of R\$ 133,759, attributed to the Consolidated were not recorded, due to the history of losses or uncertainties of future taxable income in VANT, BrT, Multimidia, BrT CSH and BrT CS Ltda, indirect subsidiaries.

Other Tax Recoverable

It is comprised of Federal withholding taxes and payments made, calculated based on legal estimates, which will be offset against future tax obligations. The ICMS recoverable arises, for the most part, from credits recorded in the acquisition of fixed assets, whose compensation with ICMS payable may occur in up to 48 months, according to Complementary Law 102/00.

Represented by the terms signed in 2002 and 2004 by the subsidiary 14 Brasil Telecom Celular S.A. along with ANATEL, to offer SMP Services for the next fifteen years in the same area of operation where Brasil Telecom S.A. has a concession for fixed telephony. Of the contracted value, 10% was paid at the time of signing the contract, and the remaining balance was fully recognized in the BrT Celular's liabilities to be paid in equal, consecutive annual installments, with maturities foreseen for the years 2006 to 2010 (balance of five installments) and 2007 to 2012 (balance of six installments) depending of the fiscal year the terms were signed. The remaining balance is adjusted by the variation of IGP-DI, plus 1% per month.

The concession of STFC refers to the provision established by Brasil Telecom S.A., according to the accrual basis, taking as basis the application of 1% on the net revenue of taxes. According to the current concession agreement, the payment in favor of ANATEL will have a maturity every two years, defined for April of the odd years and will be equivalent to 2% of the net revenue estimated in the immediately previous year. The first payment is estimated for April 2007.

The amount of other authorizations in the quarter closing date belonged to VANT and refers to the authorization granted to the use of radiofrequency blocks associated to the exploration of multimedia communication service, obtained from ANATEL. In April 2006 the transfer registration of such granting to BrT Multimídia was made, which assumed the debit balance, with a variation of the IGP-M, plus 1% a month. The settlement of this obligation will be paid in six equal, consecutive and annual installments, counted as from May 2006.

36. PROVISIONS FOR PENSION PLAN

These refer to the recognition by Brasil Telecom S.A. from actuarial liability of pension plans of defined benefit managed by FBrTPREV and Fundação 14, appraised by independent actuaries at the end of each fiscal year pursuant to CVM Resolution 371/00.

To minimize the effects to be determined in the actuarial revaluation of the end of the year, the effects of the variation of INPC and pro-rata interest of 6% p.a. on the liabilities of the plans are monthly recognized, deduced from earnings of assets belonging to them. These charges recorded in the result in the quarter represented R\$ 3,985. In the quarter, R\$ 2,401 was also recognized, resulting from administrative costs and non-actuarial variation which took place in the liabilities of the foundations. Additionally, aiming to follow the increase expectation of the longevity of the participants of the sponsored plans, the Company contracted with its independent actuaries a study to enable to add to the recognized provision the economic effects of this trend, resulting in the complement of R\$ 4,781 to the provision established.

The amount paid to Fundação BrTPREV in the quarter totaled R\$ 34,179 (R\$ 25,440 in 2005) and refers to the amortizing contributions and administrative costs.

The sponsored supplementary pension plan funds are detailed in the Note 6.

Self-financing funds

They correspond to the credits of capital participation, paid by engaged subscribers, for acquisition of the right of use of switched fixed phone service, still under the elapsed self-financing modality. It happened that, as the shareholders of the subsidiary Brasil Telecom S.A. - Rio Grande do Sul branch (former CRT) had fully subscribed the capital increase made to repay in shares the credits for capital participation, there were no unsold shares to be delivered to the engaged subscribers. Part of these engaged subscribers, who did not accept the Company's Public Offering for return of the referred credits in cash, as established in article 171, paragraph 2, of Law 6,404/76, are awaiting resolution of the ongoing lawsuit, filed by the Public Prosecution Service and Other, aiming at reimbursement in shares.

Self-financing Installment Reimbursement - PCT

This refers to the payment, either in cash or as offset installments in invoices for services of engaged subscribers derived from the Community Telephony Program - PCT, in return to the obligation of repayment in shares. For these cases, there is settlement or judicial decision.

39. FUNDS FOR CAPITALIZATION

The expansion plans (self-financing) were the means by which the telecommunications companies financed part of the network investments. With the issue of Administrative Rule 261/97 by the Ministry of Communications, this mechanism for raising funds was eliminated, and the consolidated existing amount of R\$ 7,974 (R\$ 7,974 on 12/31/05) is derived from plans negotiated previous to the issue of the aforementioned Administrative Rule, the corresponding assets of which are already incorporated in the Company's fixed assets through the Community Telephony Program PCT. For reimbursement in shares, it is necessary to await the judicial ruling on the suits brought by the interested parties.

40. EARNINGS BEFORE INTEREST, TAXES, DEPRECIATION AND AMORTIZATION - EBITDA

(1) It does not include the amortization of special goodwill of incorporation registered in account of the deferred asset, in the permanent assets, whose amortization expense composes the non-operating income.

41. COMMITMENTS

Services Rendered due to Acquisition of Assets

BrT SCS Bermuda acquired fixed assets from an already existing company. Together with the assets of underwater cables acquired, it assumed the obligation of providing data traffic services, initially contracted with the company that sold the assets, which was a beneficiary of the financial resources of the respective advances. The time remaining for the providing of such assumed services is around eighteen years.

42. INFORMATION BY BUSINESS SEGMENT - CONSOLIDATED

Information by segments is presented in relation to the Company and its subsidiaries' businesses, which was identified based on its performance and management structure, as well as the internal management information.

The operations carried out among the business segments presented were based on conditions equivalent to the market. The income by segment, as well as the equity items presented, takes into consideration the items directly attributable to the segment, also taking into account those which can be allocated on a reasonable basis.

Retention of Cash and Cash Equivalents

As from April 11, 2006 Banco do Brasil made retentions in the investment funds accounts, integrating the high-liquid investments of Brasil Telecom S.A. and Freelance S.A., in the amounts of R\$ 91,439 and R\$ 100,000, respectively, resulting in the consolidated retained amount of R\$ 191,439. The retention arises from the non-compliance with certain financial indices set forth in the financing agreements that Brasil Telecom S.A. maintains with BNDES, as mentioned in note 5.h. The retained amounts were the purpose of reclassification of the item cash and cash equivalents to the item of contractual retentions, note 24.

The retained amount will be normally remunerated while it remains in the block condition. The release will take place from the moment the Company resets the financial indices defined in the agreements entered into with BNDES or is successful in the adequacy of the financial covenants entered into.

Material Fact

Below there is the material fact published after March 31, 2006 concerning the Merger Agreement mentioned in note 5.i:

I Material Fact as of May 2, 2006:

BRASIL TELECOM PARTICIPAÇÕES S.A. and **BRASIL TELECOM S.A.**, (jointly denominated Brasil Telecom Group), based on Article 157 of Law 6,404/76 and on the Instruction 358/02 of CVM Brazilian Securities and Exchange Commission, inform the reception of a correspondence via facsimile, dated as of May 2, 2006, signed by TIM International N.V. (TIMINT) and TIM Brasil Serviços e Participações S.A. (TIMB).

By means of this correspondence, Brasil Telecom S.A. and 14 Brasil Telecom Celular S.A. (jointly denominated Companies), were informed about the termination, by TIMINT and TIMB, of the Merger Agreement , entered into on April 28, 2005, among the Companies, TIMINT and TIMB. In the same correspondence, TIMINT and TIMB pointed out their supposed rights under clauses 10.3 and 11.10 of the Merger Agreement .

The Merger Agreement is the purpose of arbitration initiated by the Companies against TIMINT and TIMB, according to the Material Fact published on March 16, 2006.

Brasil Telecom Group reaffirms its commitment to maintain high transparency and corporate governance standards, as well to continue to value its investors, customers, employees and partners.

Brasília, May 2, 2006.

Fixed Plant **The utilization rate was steady during 1Q06 and reached 88.2% in March.** BrT has a technical reserve of nearly 1.3 million lines installed in order to immediately meet a demand increase, without the need of additional investments. **At the end of 1Q06, Brasil Telecom's plant was comprised of 10.8 million lines installed, 9.5 million of which were in service.**

The participation of the hybrid terminal LigMix in the plant in service reached 8.7% by the end of March, compared to 8.2% in December. The hybrid terminal is available in the centers with idle capacity upon verification of customer's default, or in marketing campaigns targeted at low income customers.

Exceeding Local Pulses **In 1Q06, Brasil Telecom reached 2.3 billion exceeding pulses,** representing a 4.2% reduction compared to 4Q05. This variation results from the seasonality, once the first quarter coincides with vacation and carnival period and the weighing of business days is lower than the average presented in other quarters of the year. The increase in the plant of

ADSL accesses and the expansion of the mobile plant also contributed to this performance.

Long-Distance Traffic Long-distance traffic decreased 0.8% compared to the 4Q05 and **totaled 1.4 billion minutes in 1Q06**. The factors that explain this reduction are the seasonality and the higher competition.

LD Market Share **Brasil Telecom closed 1Q06 with a 61.3% market share in the inter-regional segment and a 34.9% share in the international segment** (quarterly average).

Brasil Telecom ended March with an average quarterly market share of 84.9% in the intra-regional segment, 2.0 p.p. higher than the 82.9% recorded in 1Q05. In the inter-regional and international segments, Brasil Telecom conquered 10.3 p.p. and 5.8 p.p., respectively, of market share in 12 months. .

Mobile Accesses **BrT Móvel reached 2,460.0 thousand mobile accesses in service**, representing a net addition of 247.2 thousand accesses in the quarter. This figure represents 31.4% of the target estimated for December 2006. At the end of 1Q06, **BrT Móvel's customer portfolio was 11.2% higher than that of 4Q05** and, compared to the same quarter of 2005, **there was a 145.1% increase**. During 12 months, BrT Móvel sold 1.9 million accesses.

Customer Base Mix By the end of March, **the mobile plant was composed of 820.2 thousand postpaid plan subscribers (33.3% of the BrT Móvel's customer base)** which showed the highest share in

postpaid among the operators present in Brazil which disclose information.

Coverage During 1Q06, BrT Móvel increased to **3,333** the number of points of sale and maintained its coverage area in **782** locations, reaching **86%** of the population in the Region II.

Market Share By the end of 1Q06, **BrT Móvel reached a 9.4% market share** in its operating area, compared to 4.8% in 1Q05. In the Midwest and North Regions, BrT Móvel reached an 11.9% share, surpassing the third operator.

DATA

Broadband

**ADSL
Accesses** During 1Q06, **Brasil Telecom added 70.2 thousand accesses to its plant, amounting to 1,084.1 thousand broadband accesses in service by the end of March 2006**, a 6.9% and 73.4% increase compared to 4Q05 and 1Q05, respectively.

The residential market had a 93.7% share in the total broadband accesses at the end of 1Q06, and the corporate market had a 6.3% share.

Internet Providers

**BrTurbo, iG and
iBest** **Brasil Telecom Internet is a leader in the provision of dialed internet access in the Brazilian market and generated, by means of its three providers, 9 billion minutes in 1Q06.** There are approximately 1 million customers of paid services, which include the provision of broadband access and value-added services.

iBest consolidated its position as the largest dialed access provided in the Region II, with a market share estimated at 52% in 1Q06. It is present in more than 1,800 cities, it has approximately 11 million registered users and 1.5 million active users.

iG generated, in 1Q06, a traffic of 4.6 billion minutes, being the leader in this concept in the Regions I and III. It is present in more than 1,200 cities, it has 16.2 registered users and 2.0 million active users. **The customer base of broadband access of iG grew 16% compared to 2005, reaching 209 thousand customers at the end of 1Q06.**

BrTurbo reached 580 thousand customers in the Region II at the end of 1Q06, a 6% growth compared to the 2005 base. Approximately 57% of broadband access customers of Brasil Telecom were subscribers of BrTurbo.

At the end of **1Q06, Brasil Telecom counted on 793 thousand broadband customers all over Brazil.**

ECONOMIC-FINANCIAL PERFORMANCE

Revenues

Local Service

The local service gross revenue reached R\$ 1,769.1 million in 1Q06, 2.8% lower than that recorded in 4Q05. Out of the total of the local service revenue, 70.6% came from subscription and service measured revenue, and 28.5% represented revenues with VC-1 calls.

Gross revenue with VC-1 calls reached R\$ 503.5 million in 1Q06, 3.2% lower than the one in 4Q05, reflecting the traffic drop. The fall trend of VC-1 traffic has been proved since the second half of 2005, as a reflection of the aggressive promotional campaigns of mobile operators focused on mobile-mobile traffic. **Compared to 1Q05, the gross revenue with VC-1 calls was 2.4% lower**, in spite of the 7.99% readjustment in the VC-1 fee applied as from July 12, 2005.

In the first quarter, subscription gross revenue reached R\$ 893.3 million, a 0.9% reduction compared to the R\$ 901.2 million recorded in 4Q05, due to the reduction of 17 thousand lines in the service plant, as well as due to the increase of 42.6 thousand hybrid lines, whose monthly subscription of R\$ 28.00 is 27.4% lower than the fee charged in the basic plan, taking as basis the Federal District. **It is important to mention a reclassification promoted by Brasil Telecom in 1Q06, which transferred from the subscription revenue, the revenue coming from the Additional Franchise plan the service measured.**

The gross revenue with service measured totaled R\$ 355.6 million in 1Q06, 5.9% lower than the one in 4Q05, reflecting the seasonal effect of the period and the commercialization of ADSL accesses, which caused a 4.2% drop in the volume of exceeding pulses, and the average fee lower than the Local Basic Plan practiced in the Additional Franchise plans. **Compared to 1Q05, the gross revenue with service measured was 4.5% higher**, mainly due to the 7.27% fee readjustment applied as from July 3, 2005.

Public Telephony

Public telephony gross revenue reached R\$ 127.9 million in 1Q06, 12.2% lower than the revenue reached in 4Q05 and 47.1% higher than the revenue of 1Q05. The variation compared to 4Q05 is mainly explained by the 8.4% reduction in credits sales. **The increase against 1Q05 was influenced by the fee readjustment of 7.37% in the credit rate of payphone card and by the launch of Brasil Virtual Cel**, which transferred, in that quarter, R\$ 42.6 million from the public telephony revenue to BrT Móvel. Brasil Virtual Cel was discontinued in April 2005.

Long Distance

Gross revenue from LD services amounted to R\$ 703.9 million in 1Q06, representing a 0.3% reduction compared to 4Q05. This performance was affected by the 0.8% drop in traffic. Compared to 1Q05, LD revenue was 6.8% lower due to the 11.7% reduction in traffic, offset by the 2.94% fee readjustment applied as from July 3, 2005.

Interconnection

Interconnection revenue in 1Q06 was R\$ 108.5 million, a 26.9% and 34.1% reduction compared to 4Q05 and to 1Q05, which was due to the TU-RL drop. This fee started corresponding to 50% of the value of the local minute of the Basic Plan as from January 1, 2006. TU-RL is R\$ 0.03679, against R\$ 0.04548 in 4Q05.

Data Communication

In 1Q06, gross revenue from data communication and other services of the main activity added up to R\$ 538.4 million, a 2.6% reduction compared to the previous quarter and a 28.0% increase compared to 1Q05. Compared to 4Q05 the performance reflects the reduction of R\$ 23.9 million in the revenue coming from traffic fomentation in internet

providers, which had their agreements with the other telecommunications operators renegotiated at the end of 2005. With the drop of TU- RL, the risk resulting from the interconnection regime was reduced, generating a pressure in the prices practiced. On the other hand, we point out the growth of network formation services (IP Turbo, Serviço Plus, IP Dedicado) and the 6.9% raise in ADSL accesses in service.

Mobile Telephony **In 1Q06, mobile telephony consolidated gross revenue totaled R\$ 227.6 million**, of which R\$ 173 million referred to services and R\$ 54.6 million to handsets and accessories sales. This performance represents a 9.8% reduction compared to 4Q05 and a 54.8% increase compared to 1Q05.

Compared to 4Q05 and 1Q05, the mobile telephony services gross revenue of 1Q06 surpassed by 26.6% and 73.7%, respectively, due to the increase in the customer portfolio. The gross revenue with handsets and accessories sales was 52.8% lower than the one recorded in 4Q05, for sales channels were provided by purchases made at the end of 2005.

Mobile Telephony ARPU **Total mobile telephony ARPU recorded in 1Q06 was R\$ 26.6**. ARPU referring to postpaid accesses was R\$ 40.0 and ARPU related to prepaid was R\$ 20.1. Compared to 4Q05, postpaid ARPU decreased by 7.5% due to the higher representativeness of the Control Plan in the total of postpaid accesses.

Consolidated Net Revenue **The consolidated net revenue of Brasil Telecom reached R\$ 2,476.9 million in 1Q06**, 4.4% lower than in 4Q05 and 1.2% higher than the one in 1Q05.

Costs and Expenses

Operating Costs and Expenses **In 1Q06, operating costs and expenses totaled R\$ 2,321.7 million, against R\$ 2,952.5 million in 4Q05 and R\$ 2,294.8 million in 1Q05**. The items that considerably influenced the variation of 1Q06 compared to 4Q05 were: provisions and losses (-61.8%), other (-53.4%), material (-49.2%), advertising and marketing (-68.1%) and personnel (+18.2%).

Number of Employees **At the end of 1Q06, 5,420 employees worked in the fixed telephony segment of Brasil Telecom**, compared to 5,803 in the previous quarter. **BrT Móvel ended 1Q06 with 735 employees**, against 1,069 in 4Q05. By the end of March, 6,155 people worked in the Group, a **10.4% reduction compared to December**.

Personnel **In 1Q06, personnel costs and expenses reached R\$ 190.2 million, an 18.2% increase compared to the previous quarter**. This variation results from indemnities due to the reduction in the staff which totaled R\$ 44.1 million. In addition, personnel costs and expenses were influenced by Collective Bargaining Agreement in force as from January 2006, which resulted in an average salary adjustment of 6.0%.

Third-party Services **Costs and expenses with third-party services**, excluding interconnection and advertising & marketing, **totaled R\$ 544.0 million in 1Q06**, 10.9% lower than the amounts assessed in the previous quarter. The variation in third-party costs and services in 1Q06 compared to 4Q05, results from:

Reduction of R\$ 28.3 million in costs and expenses with **negotiation and intermediation**, due to the 39.7% drop in the volume of handsets sold in 1Q06, which generated expenses with commission of sales lower than the ones recorded in 4Q05;

Reduction of R\$ 4.3 million in costs and expenses with **consulting**; and
Reduction of R\$ 5.0 million in costs and expenses with **call center services**.

Interconnection	Interconnection costs totaled R\$ 498.5 million in 1Q06 , a 3.1% and 13.5% reduction compared to 4Q05 and 1Q05, respectively. This better performance reflects the scale gain of BrT Móvel, the 19.1% drop in TU-RL and the change in the profile of VC traffic, in which VC-1 calls, responsible for the larger portion of the interconnection cost (VU-M), reduced their share compared to the total traffic.
Advertising and Marketing	Advertising & marketing expenses totaled R\$ 20.4 million in 1Q06, a 68.1% reduction compared to 4Q05 resulting from the integrated communication strategy between the fixed and mobile operations and the seasonality observed in the last quarter of the year due to Christmas advertising campaigns.
Accounts Receivable Losses (PCCR)/Operating Gross Revenue (ROB)	The Accounts Receivable Losses (PCCR) and the gross revenue ratio in 1Q06 was 3.1% , against 4.1% in 4Q05. The accounts receivable losses totaled R\$ 112.8 million in 1Q06, 28.4% lower than in 4Q05. In December, Brasil Telecom made additional provisions in the amount of R\$ 74 million, relating to risks of losses in accounts of customers submitted to co-billing. Not considering the extraordinary effect, PCCR of 1Q06 would have surpassed by R\$ 29.4 million PCCR of 4Q05.
Provisions for Contingencies	In 1Q06, provisions for contingencies totaled R\$ 75.2 million , a R\$ 259.8 million reduction compared to 4Q05, when extraordinary adjustments of R\$ 275 million were recorded: (i) R\$ 198 million relating to probable risks resulting from judicial and administrative proceedings and (ii) R\$ 77 million resulted from reversal of tax credits, specially ICMS on consumption of electric power and materials used in the plant maintenance. Not considering the extraordinary effect, the provisions for contingencies accounted in 1Q06 surpassed by R\$ 15.2 million the ones of the previous quarter, reflecting updates in the judicial proceedings in course.
Materials	Material costs and expenses totaled R\$ 83.9 million in 1Q06 , a 49.2% reduction compared to 4Q05, mainly explained by the 39.7% reduction in the number of cell phones sold in the period. Material costs and expenses of BrT Móvel totaled R\$ 60.8 million, representing 72.6% of the total material costs and expenses recorded by the Group.
Other Operating Costs and Expenses/Revenues	Other operating costs and expenses amounted to R\$ 126.7 million in 1Q06 , a 53.4% reduction compared to 4Q05. In 4Q05, provisions which totaled R\$ 210 million were made, R\$ 171 million of which was related to adjustments in actuarial calculations and R\$ 39.4 million referring, mainly, to provisions related to the change in the calculation base of FUST (Fund for Universalization of Telecommunications Service). Not considering the extraordinary effect, other operating costs and expenses in 1Q06 were R\$ 64.9 million worse compared to the previous quarter. This difference results from agreements entered into in 4Q05 with operators of the sector, as well from the reception of bonus arising from the achievement of cell phone sales targets in the same quarter. In 1Q06, R\$ 17.0 million referring to burden resulting from the postponement of concession agreements was recorded , equivalent to 2%, every two years, of the STFC revenue, net of taxes and social contributions.

EBITDA

R\$ 825.3 million EBITDA **Brasil Telecom's consolidated EBITDA was R\$ 825.3 million in 1Q06** (see Appendix VII). **The consolidated EBITDA margin reached 33.3% in 1Q06.** In 4Q05, the adjusted EBITDA reached R\$ 871.8 million, representing an adjusted EBITDA margin of 33.6%.

EBITDA of BrT Móvel stood negative at R\$ 40.3 million in 1Q06, representing a negative EBITDA margin of 18.1%. Despite of not being a mature operation yet, the performance of BrT Móvel in 1Q06 was a lot higher than the one observed in the previous quarter, due to the increase in the subscriber base, lower customer acquisition cost and lower negotiation, intermediation, advertising and marketing expenses.

Indebtedness

Total Debt **By the end of March 2006, Brasil Telecom's consolidated gross debt totaled R\$ 4,339.4 million,** 5.0% lower than that registered by the end of December.

Net Debt Brasil Telecom closed 1Q06 with a cash of R\$ 1,865.0 million, against R\$ 2,613.8 million at the end of December. **The variation results, mainly, from the payment of interest on shareholders' equity (JSCP) in the amount of R\$ 352.4 million on January 13, 2006 and from the payment of R\$ 408.8 million to suppliers. The consolidated net debt totaled R\$ 2,474.4 million,** 26.6% higher than that recorded in December 2005.

Long-term debt **In March, 71.0% of the total debt was allocated in the long term.**

Accumulated Cost of Debt The Company's consolidated debt had in 1Q06 an **accumulated cost of 9.3% p.a. equivalent to 55.9% of the CDI.**

Financial Leverage **At the end of March 2006, Brasil Telecom's financial leverage,** represented by the ratio of its net debt to shareholders' equity, **was equal to 46.9%,** against 37.3% in the previous quarter.

17.01 SPECIAL REVIEW REPORT UNQUALIFIED

(Convenience Translation into English from the Original Previously Issued in Portuguese)

INDEPENDENT ACCOUNTANTS REVIEW REPORT

To the Management and Shareholders of Brasil Telecom Participações S.A. Brasília DF

1. We have performed a special review of the accompanying interim financial statements of Brasil Telecom Participações S.A. and subsidiaries (Company and Consolidated), consisting of the balance sheets as of March 31, 2006, and the related statements of income for the quarter then ended and the performance report, all expressed in Brazilian reais and prepared in accordance with Brazilian accounting practices under the responsibility of the Company's management.
2. We conducted our review in accordance with specific standards established by the Brazilian Institute of Independent Auditors (IBRACON), together with the Federal Accounting Council, which consisted principally of: (a) inquiries of and discussions with persons responsible for the accounting, financial and operating areas as to the criteria adopted in preparing the interim financial statements, and (b) review of the information and subsequent events that had or might have had material effects on the financial position and results of operations of the Company and its subsidiaries.
3. Based on our special review, we are not aware of any material modifications that should be made to the interim financial statements referred to in paragraph 1 for them to be in conformity with Brazilian accounting practices and standards established by the Brazilian Securities Commission (CVM), specifically applicable to the preparation of mandatory interim financial statements.
4. We conducted our special review for the purpose of issuing a special review report on the mandatory interim financial statements. Supplemental disclosure of cash flow information is presented for purposes of additional analysis. Such supplemental information for the quarter ended March 31, 2006 has been subjected to the same review procedures applied to the interim financial statements and, based on our special review, is fairly presented, in all material respects, in relation to the interim financial statements taken as a whole.
5. The balance sheets as of December 31, 2005, presented for comparative purposes, were audited by other independent auditors, whose report thereon, dated March 27, 2006, was unqualified and contained an emphasis of matter paragraph regarding the agreement entered into on April 28, 2005, establishing the merger of the indirect subsidiary 14 Brasil Telecom Celular S.A. into Tim Brasil Serviços e Participações S.A. In addition, the statements of income and cash flows for the quarter ended March 31, 2005, presented for comparative purposes, were reviewed by other independent auditors, whose special review report thereon, dated May 5, 2005, was unqualified and contained an emphasis of matter paragraph regarding the publication in the Official Gazette on April 14, 2005 of the decision rendered by the Board of Directors of the National Telecommunications Agency (ANATEL), which approved (i) the replacement of fund managers and administrators, who have an indirect interest in the entity that controls Brasil Telecom Participações S.A. and its subsidiary Brasil Telecom S.A., and (ii) changes arising from shareholders' agreements entered into by the controlling group's investors, under dispute by investors that belong to the controlling group of Brasil Telecom Participações S.A. and its subsidiary Brasil Telecom S.A., as well as an emphasis of matter paragraph related to the same matter mentioned in the emphasis of matter paragraph of the independent auditors' report on the balance sheet as of December 31, 2005.
6. The accompanying interim financial statements have been translated into English for the convenience of readers outside Brazil.
