Review report of independent registered public accounting firm

To the Board of Directors and Shareholders
Petróleo Brasileiro S.A. - Petrobras

We have reviewed the accompanying condensed consolidated balance sheet of Petróleo Brasileiro S.A. - Petrobras (and subsidiaries) as of March 31, 2008, the related condensed consolidated statements of income, cash flows and changes in shareholders' equity for the three-month periods ended March 31, 2008 and 2007. These condensed consolidated financial statements are the responsibility of the Company's management.

We conducted our review in accordance with the standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States), the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our review, we are not aware of any material modifications that should be made to the condensed consolidated financial statements referred to above for them to be in conformity with accounting principles generally accepted in the United States.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Expressed in Millions of United States Dollars

(except when specifically indicated)

(unaudited)

1. Basis of Financial Statements Preparation

The accompanying unaudited consolidated financial statements of Petróleo Brasileiro S.A. - Petrobras (the Company) have been prepared in accordance with U.S. generally accepted accounting principles (U.S. GAAP) and the rules and regulations of the Securities and Exchange Commission (SEC) for interim financial statements. Accordingly they do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. These unaudited consolidated financial statements and the accompanying notes should be read in conjunction with the consolidated financial statements for the year ended December 31, 2007 and the notes thereto.

The balance sheet at December 31, 2007 has been derived from the audited financial statements at that date but does not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements.

The consolidated financial statements as of March 31, 2008 and for the three-month periods ended March 31, 2008 and 2007, included in this report, are unaudited. However, in management's opinion, such consolidated financial statements reflect all normal recurring adjustments that are necessary for a fair presentation. The results for the interim periods are not necessarily indicative of trends or of results expected for the full year ending December 31, 2008.

The preparation of these financial statements requires the use of estimates and assumptions that reflect the assets, liabilities, revenues and expenses reported in the financial statements, as well as amounts included in the notes thereto.

Pursuant to Rule 436 (c) under the Securities Act of 1933 (the Act), this is not a report and should not be considered a part of any registration statement prepared or certified within the meanings of Sections 7 and 11 of the Act and therefore, the independent accountant's liability under section 11 does not extend to the information included herein.

2. Recently Adopted Accounting Standards

FASB Statement N° 157, Fair Value Measurements (SFAS 157)

In September 2006, the FASB issued SFAS 157, which became effective for the Company on January 1, 2008. This standard defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements. SFAS 157 does not require any new fair value measurements but would apply to assets and liabilities that are required to be recorded at fair value under other accounting standards.

2. Recently Adopted Accounting Standards (Continued)

FASB Statement N° 157, Fair Value Measurements (SFAS 157) (Continued)

In February 2008, the FASB issued FASB Staff Position (FSP) FSP 157-2, "Effective Date of FASB Statement N° 157", which became effective for the Company on January 1, 2008. This FSP delays the effective date of FASB Statement 157, for nonfinancial assets and nonfinancial liabilities, except for items that are recognized or disclosed at fair value in the financial statements on a recurring basis (at least annually).

The Company implemented SFAS 157 and FSP 157-2 effective on January 1, 2008 with no material impact due to the implementation, other than additional disclosures.

SFAS 157 and FSP 157-2 requires disclosures that categorize assets and liabilities measured at fair value on a recurring basis into one of three different levels depending on the observability of the inputs applied in the measurement. Level 1 inputs are quoted prices in active markets for identical assets or liabilities. Level 2 inputs are observable inputs other than quoted prices included within Level 1 for the asset or liability, either directly or indirectly through market-corroborated inputs. Level 3 inputs are unobservable inputs for the asset or liability reflecting our assumptions about pricing by market participants.

The disclosure requirements of SFAS 157 and FSP 157-2 were applied to the Company's derivative instruments and certain equity and debt securities recognized in accordance with SFAS 115.

The Company's commodities derivatives and marketable and government securities fair values were recognized in accordance with exchanged quoted prices as the balance sheet date for identical assets in active markets, and, therefore, were classified as level 1.

The fair values of Company's forward contracts of US dollars and cross currency swaps were calculated using observable interest rates in JPY, USD and BRL for the full term of the contracts, and, therefore, were classified as level 2.

2. Recently Adopted Accounting Standards (Continued)**FASB Statement N° 157, Fair Value Measurements (SFAS 157) (Continued)**

The fair value hierarchy for our financial assets and liabilities accounted for at fair value on a recurring basis at March 31, 2008, was:

	Millions of Dollars			
	Level 1	Level	Level	Total
Assets				
Marketable securities	2,028	-	-	2,028
Government securities	685	-	-	685
Commodity derivatives	1	-	-	1
Foreign exchange derivatives	-	38	-	38
Total assets	2,714	38	-	2,752
Liabilities				
Commodity derivatives	11	-	-	11
Total liabilities	11	-	-	11

3. Derivative Instruments, Hedging and Risk Management Activities

The Company is exposed to a number of market risks arising from its normal course of business. Such market risks principally involve the possibility that changes in interest rates, foreign currency exchange rates or commodity prices will adversely affect the value of the Company's financial assets and liabilities or future cash flows and earnings. The Company maintains a corporate risk management policy that is executed under the direction of the Company's executive officers.

3. Derivative Instruments, Hedging and Risk Management Activities (Continued)

The Company may use derivative and non-derivative instruments to implement its corporate risk management strategy. However, by using derivative instruments, the Company exposes itself to credit and market risk. Credit risk is the failure of a counterparty to perform under the terms of the derivative contract. Market risk is the possible adverse effect on the value of an asset or liability, including financial instruments that results from changes in interest rates, currency exchange rates, or commodity prices. The Company addresses credit risk by restricting the counterparties to such derivative financial instruments to major financial institutions. Market risk is managed by the Company's executive officers. The Company does not hold or issue financial instruments for trading purposes.

a) Foreign currency risk management

The Company's foreign currency risk management strategy may involve the use of derivative instruments to protect against foreign exchange rate volatility which may impact the value of certain of the Company's obligations.

The table below provides information about our foreign exchange derivative contracts.

Foreign Currency	Notional Amount	Fair value	
		March 31, 2008	December 31, 2007
Maturing in 2008			
Forwards			
Sell USD/Pay BRL	129	-	2
Average Contractual Exchange rate	1.8	-	-
Total	129	-	2

3. Derivative Instruments, Hedging and Risk Management Activities (Continued)**a) Foreign currency risk management** (Continued)**Cash flow hedge**

In September, 2006, PifCo entered into cross currency swap under which it swaps principal and interest payments on Yen denominated funding into U.S. dollar amounts. The assessment of hedge effectiveness indicates that the change in fair value of the designated hedging instrument is highly effective.

b) Commodity price risk management

Petroleum and oil products

The Company is exposed to commodity price risks as a result of the fluctuation of crude oil and oil product prices. The Company's commodity risk management activities are primarily undertaken through the uses of future contracts traded on stock exchanges; and options and swaps entered into with major financial institutions. The futures contracts provide economic hedges for anticipated crude oil purchases and sales, generally forecasted to occur within a 30 to 360 day period, and reduce the Company's exposure to volatility of such prices.

The Company's exposure from these contracts is limited to the difference between the contract value and market value on the volumes contracted. Crude oil future contracts are marked-to-market and related gains and losses are recognized in currently period earnings, irrespective of when the physical crude sales occur. For the three-month periods ended March 31, 2008 and 2007, the Company entered into commodity derivative transactions for 60.1% and 41.2%, respectively, of its total import and export trade volumes.

b) Commodity price risk management (Continued)

The open positions in the futures market, compared to spot market value, resulted in recognized gains of US\$3 and losses of US\$22 during the three-month periods ended March 31, 2008 and 2007, respectively.

c) Interest rate risk management

The Company's interest rate risk is a function of the Company's long-term debt and to a lesser extent, its short-term debt. The Company's foreign currency floating rate debt is principally subject to fluctuations in LIBOR and the Company's floating rate debt denominated in Reais is principally subject to fluctuations in the Brazilian long-term interest rate (TJLP) as fixed by the National Monetary Council. The Company currently does not utilize derivative financial instruments to manage its exposure to fluctuations in interest rates.

4. Income Taxes

The Company's taxable income is substantially generated in Brazil and is therefore subject to the Brazilian statutory tax rate.

Marketable securities are comprised primarily of amounts that the Company has invested in an exclusive fund, excluding the Company's own securities, which are considered repurchased. The exclusive fund is consolidated, and the equity and debt securities within the portfolio are classified as trading or available-for-sale under SFAS 115 based on management's intent. Trading securities are principally Brazilian bonds, which are bought and sold frequently with the objective of making short-term-profits on market price changes. Available-for-sale securities are, principally, LCN (Credit Liquid Note) agreements and certain other bonds for which the Company does not have current expectations to trade actively. Trading securities are presented as current assets, as they are expected to be used in the near term for cash funding requirements. Available-for-sale securities are presented as Other assets, as they are not expected to be sold or liquidated within the next twelve months.

As of March 31, 2008 Petrobras had a balance of US\$1,950 linked to B Series National Treasury Notes, which are accounted for as available-for-sale securities in accordance with SFAS 115. The B Series National Treasury Notes may be used in the future to guarantee future long term agreements entered into with Petros, Petrobras' pension plan (see Note 14 (b)). The nominal value of the NTN-Bs is restated based on variations in the Amplified Consumer Price Index (IPCA). The due dates of these notes are 2024 and 2035 and interest coupons will be paid at half-yearly intervals based on the set rates for buy transactions and range from 6.12% to 7.20% p.a.

Bank and corporate securities have maturity dates until 2014 and an interest yield of 8.50% p.a.

The Company has been evaluating and negotiating alternatives and arrangements for the settlement of actuarial deficits of Petros Plan.

On April 19, 2006, the Company, aiming to achieve an agreement regarding its Supplementary Pension Plan, presented to employee participants and retirees a proposal to bring equilibrium to the actual Petros Plan and to implement a new plan, denominated Petros Plan 2.

Execution of the proposal presented by the Company's Executive Board was subject to a number of conditions, including the renegotiation of the Petros Plan Regulations, in relation to the means of readjusting the benefits and pensions, considering a significant rate of individual accession of employees and dependants.

14. Employees Postretirement Benefits and Other Benefits (Continued)**(b) Funded status of the plans** (Continued)

The target for the minimum accession number to the renegotiation was set at 2/3 (two-thirds) of the members and the final deadline for them to make their choice was February 28, 2007. The target was met and the proposal submitted by the Company became effective, which changed two conditions of the plan: i) salary increases of active employees will no longer be passed to retired employees, who will be entitled to inflation indexation (IPCA); and ii) eventual decreases in pensions provided by the governmental plan will no longer be absorbed by Petros Plan.

In return for accepting the renegotiation, the participants, retired members and pensioners received the financial incentive of US\$523 that was recorded as component of Other operating expenses .

On August 17, 2007, the Company's Executive Board approved changes in Petros Plan regulations in relation to the agreement presented on April 19, 2006, which will not materially affect the projected benefit obligation. Also, the Executive Board approved changes in the Plan regulations to include the assumptions related to the two judicial proceedings taken by some participants against Petros, which are: i) the lowering of age for employees who joined Petrobras in 1978/1979 and; ii) same coverage of governmental pension for widows, that increased Employees postretirement benefit obligations - Pension in the amount of US\$443 and Accumulated other comprehensive income, Postretirement benefit reserves adjustments, net of tax - pension cost , in the amount of US\$314.

On September 12, 2007 Petrobras and the subsidiaries sponsoring the Petros Plan, trade union organizations and Petros signed an Agreement that will cover commitments with pension plans in the amount of US\$2,380, which will be paid in installments over the next 20 years, as previously agreed during the renegotiation process, also providing guarantees to such amount, which is already accrued in the consolidated financial statements.

As of March 31, 2008, Petrobras had a balance of US\$1,950 linked to B Series National Treasury Notes, classified as non-current asset, which may be used in the future as a guarantee for the above mentioned Settlement Agreement (see Note 6).

New benefit plan (Petros Plan 2)

On June 22, 2007, the Supplementary Pensions Office approved the introduction of a new supplementary pension plan called Petros Plan 2 to the new employees as well as those who have joined the Company after September 2002 and had no Pension Plan.

This Plan was formulated according to the Variable Contribution - VC, or mixed model, with the resources capitalized through particular accounts, retirement pensions established according to the account balances, in addition to the coverage for social security risks (disability and mortality before retirement) and the benefit payment options in case of perpetual assistance system, with estimated pension reversal for dependents after the death of the holder, or the quotas receiving regiment, for an unlimited period, in addition to the guarantee of a minimum benefit.

Petrobras and the other sponsors will fully assume the contributions corresponding to the period in which the new participants had no plan. This past service shall consider the period from August 2002 or the date of admission up to August 29, 2007.

The disbursements will be conducted over the first months for contributions up to the total months the participant had no plan, and shall cover the portion relating to the participants and sponsor.

15. Shareholders Equity

The Company's subscribed and fully paid-in capital at March 31, 2008 and at December 31, 2007 consisted of 5,073,347,344 common shares and 3,700,729,396 preferred shares as retroactively restated for the stock split discussed below. The preferred shares do not have any voting rights and are not convertible into common shares and vice-versa. Preferred shares have priority in the receipt of dividends and return of capital.

The Extraordinary General Meeting held on March 24, 2008, decided to effect a split of each Company's share into two, resulting: (a) in a free distribution of 1 (one) new share of the same type for each original share and based on the shareholding structure at April 25, 2008; (b) in a free distribution of 1 (one) new American Depositary Shares (ADS) of the same type for each original ADS and based on the shareholding structure at April 25, 2008. At the same date, an amendment to article 4 of the Company's by-laws to cause capital be divided into 8,774,076,740 shares, of which 5,073,347,344 are common shares and 3,700,729,396 are preferred shares, with no nominal value, was approved. This amendment to the Company's bylaws is effective from April 25, 2008. The relation between the ADS and shares of each class remains of 2 (two) shares for one ADS. All share, ADS, per share and per ADS information in the accompanying financial statements and notes have been adjusted to reflect the result of the share split.

Current Brazilian law requires that the Federal Government retain ownership of 50% plus one share of the Company's voting shares.

On May 11, 2007, the Board of Directors approved the change in the ratio of underlying shares issued in the Company's name and the ADS's from 4 (four) shares for each ADS to 2 (two) shares for each ADS. The purpose of this change in the ratio between the shares and ADS's is to facilitate the purchase of ADS's on the New York Stock Exchange - NYSE by small investors, consequently broadening the Company's shareholder base. This decision also reflects Petrobras' confidence in its future results. This change came into effect on July 2, 2007. All per ADS information in the accompanying financial statements and notes has been adjusted to reflect the result of the change in the ratio of underlying shares issued in the Company's name and the ADS's.

The Extraordinary General Meeting, held together with the Ordinary General Meeting on April 4, 2008, approved the increase of the Company's capital from US\$24,623 (R\$52,644 million) to US\$45,147 (R\$78,967 million), through the capitalization of part of retained earnings accrued during previous financial years in the amount of US\$ 14,466 (R\$25,302 million) and part of the capital reserves, in the amount of US\$583 (R\$1,020 million), consisting of US\$97 (R\$169 million) of the Merchant Navy AFRMM subsidy reserve and US\$486 (R\$851 million) from the tax incentives reserve, and without issuing any new shares, in accordance with article 169, paragraph 1 of Law N° 6404/76.

At an Extraordinary General Meeting held together with the General Ordinary Meeting, on April 2, 2007, the shareholders of Petrobras approved an increase in the Company's capital to US\$24,623 (R\$52,644) through the capitalization of revenue reserves accrued during previous financial years, in the amount of US\$1,647 (R\$3,372), and of statutory reserve, in the amount of US\$492 (R\$1,008), and without the issuance of new shares, in accordance with article 169, paragraph 1, Law N° 6.404/76.

On April 04, 2008, the Ordinary General Meeting approved dividends referring to the year ended December 31, 2007, in the amount of US\$3,715, conforms to the by-laws in regard to guaranteed rights of preferred shares (article 5), include interest on capital, already approved by the Board of Directors. The dividends are monetarily restated in accordance with the SELIC rate variation as from December 31, 2007 to the initial date of payment. The dividends and interest on shareholder's equity are being distributed as follows:

Approval date by the Board of Directors	Shareholding position date	Amount paid - US\$ million	Initial date of payment
July 25, 2007	August 17, 2007	1,238	January 23, 2008

March 3, 2008	April 4, 2008	495	By June 3, 2008
		3,715	

These amounts have already been accrued in the consolidated financial statements as of March 31, 2008, which represents less than the minimum obligation related to the dividend required by the Company's by-laws.

Interest on shareholders' equity is subject to withholding tax at the rate of 15%, except for untaxed or exempt shareholders, as established by Law N° 9.249/95.

Interest on shareholders' equity was included with the proposed dividend for the year, as established in the Company's By-laws.

Additionally, the operations and earnings of the Company have been, and may be in the future, affected from time to time in varying degrees by political developments and laws and regulations, such as the Federal Government's continuing role as the controlling shareholder of the Company, the status of the Brazilian economy, forced divestiture of assets, tax increases and retroactive tax claims, and environmental regulations. The likelihood of such occurrences and their overall effect upon the Company are not readily predictable.

In order to unify the criterion for the allocation of safety, health and environment expenses, we opted to allocate these expenses in their entirety to other operating expenses.

Expenditure related to the training of new Petrobras employees is now allocated in line with the area of each employee and are no longer wholly allocated to corporate administrative expenses.

In order to maintain comparability between the periods, we are presenting the previous statements in accordance with the new criteria above.

18. Hydrocarbons Law of Bolivia

As of May 1, 2006, Supreme Decree 28,701 came into force in Bolivia, which nationalized all natural hydrocarbon resources, obliging companies currently producing gas and oil to transfer ownership of the entire hydrocarbon production to YPFB.

On October 28, 2006, Petrobras Bolivia and its partners signed operating agreements with YPFB for the operations of the San Alberto, San Antonio, Rio Hondo and Ingre blocks, that are operated by Petrobras, which were registered and came into effect on May 02, 2007. These contracts establish that the revenues, royalties, shareholdings, IDH, transportation and compression will be absorbed by YPFB, reimbursing the production costs and investments made by the Company to the titleholder (Petrobras), and paying remuneration calculated in accordance with the variable participation table, specified in the contracts.

18. Hydrocarbons Law of Bolivia (Continued)

On June 25, 2007, a share purchase agreement for the shares of PBR was signed, transferring all the shares to YPFB for the amount of US\$112 in 2 installments, which were settled on June 11, 2007 and August 13, 2007. The capital gain made by Petrobras in the sale of the shares of PBR was recorded in Other expenses, net in the amount of US\$37, on December 31, 2007.

On August 31, 2007, saw the enactment of Law N° 3,740 on Sustainable Development of the Hydrocarbons Sector, revoking the *Impuesto a las Utilidades Extraordinarias por Extracción de Recursos Naturales no Renovables* and enabling YPFB to participate in the revenues originated by the abovementioned operating contracts.

In addition, the contract stipulates that the net income calculated by PBR for the period from April 1, 2007 to June 25, 2007 is to be paid to the seller by May 31, 2008, a receivable has been recorded in the approximate amount of US\$21.

Petrobras is currently in the process of closing down its distribution operations of oil and gas products in Bolivia.

On December 18, 2007, Petrobras and YPFB signed a joint announcement informing of new investments to increase natural gas production in Bolivia. The joint announcement also established the general lines for a series of projects to be carried out jointly, with the possibility of the incorporation of a Semi-Public Corporation. By means of another agreement, Petrobras and YPFB determined that for volumes delivered to the domestic market above 18% of the production derived from new projects, there will be a 50% price guarantee relative to the exports price. YPFB and Petrobras also reached an agreement regarding the formula for the payment for the liquids contained in the natural gas purchased by Petrobras through the GSA agreement, for an amount between US\$100 and US\$180 per year, pursuant to the Brasília Minutes of the Meeting in Brasilia on February 14, 2007, which will be paid by Petrobras from May 2007 onwards.

19. Review of Operating Agreements in Venezuela

In March, 2006, through its subsidiaries and affiliated companies in Venezuela, PESA executed with PDVSA and Corporación Venezolana del Petróleo S.A. (CVP), Memoranda of Understanding (MOU) for the purpose of completing the migration of the operating partnerships to the form of mixed capital companies. The MOU establish that the interest held by the private partners in the mixed capital companies is 40%, with the Venezuelan government holding an interest of 60%. According to the terms of the MOU, CVP recognized divisible credits transferable to the private companies with an interest in the mixed capital companies, which shall not be charged interest and may be used as payment of the acquisition bonus for any new mixed capital company project, to develop oil exploration and production activities or to license the development of gas exploration and production operations in Venezuela. The credits assigned to PESA correspond to US\$88.5, which were not booked in the accounting records.

The migration of the contracts produced economic effects as from April 01, 2006. In August 2006, the conversion contracts for Oritupano Leona, La Concepción, Acema and Mata had been executed and the companies Petroritupano S.A., Petrowayú S.A., Petrovenbras S.A. and Petrokariña S.A. were formed, which each operate in the abovementioned areas, respectively.

According to the corporate and governance structure specified for the mixed capital companies, as from April 01, 2006, PESA no longer recorded the assets, liabilities and results referring to the aforesaid operations in consolidated statements, presenting them as corporate investments in associated companies appraised according to the equity method. Recovery of these investments is strongly tied to the volatility of oil prices, social, economic and regulatory conditions in Venezuela and, in particular, to shareholders' interest in developing the oil reserves. Consequently a provision for loss on investments was made in the amount of US\$61 in the year ended December 31, 2007.

20. Acquisitions

a) Ipiranga Group

On April 18, 2007, Ultrapar (the Commissioner), having Braskem S.A. and Petróleo Brasileiro S.A. - Petrobras (through a commission agreement) as intervening parties, acquired control of companies comprising Ipiranga Group for the amount of US\$2,694 (R\$5,486 million) to be disbursed in three installments. On April 18, 2007, Ultrapar, Petrobras and Braskem effected payment of the first installment, as established in the purchase and sale agreement signed on March 18, 2007, in the amount of US\$1,017 (R\$2,071 million) relative to the controlling shareholders portion of the Ipiranga Group, of which US\$365 (R\$743 million) was paid by Petrobras.

Under the agreement signed by Ultrapar, Braskem and Petrobras, Ultrapar took control over the fuel and lubricant distribution businesses in the South and SouthEast regions (Southern Distribution Assets), Petrobras will assume control over the fuel and lubricant distribution businesses in the North, North-East and Central-West regions (Northern Distribution Assets), and Braskem will obtain control over the petrochemical assets, represented by Ipiranga Química S.A.(IQ), Ipiranga Petroquímica S.A. (IPQ) and over this company's interests in Companhia Petroquímica do Sul (Copesul), with Petrobras also holding an interest in the petrochemical assets. The oil refinery assets held by Refinaria de Petróleo Ipiranga S.A (RPI) are shared equally by Petrobras, Ultrapar and Braskem.

Ultrapar is responsible for the corporate reorganization of the companies acquired in order to segregate the assets set aside for each company.

The transaction was submitted to the approval of Brazilian antitrust authorities (the Council for Economic Defense (CADE), the Office of Economic Law (SDE), the Economic Monitoring Agency (SEAE)).

A CADE document entitled Agreement to Preserve Reversibility of Transaction (APRO) allowed Petrobras to select a manager and negotiate the implementation of a governance policy that ensures the preservation of the assets and the rights of the minority shareholders. With the APRO, the management of the distribution assets purchased by Petrobras becomes separate from the management of the assets purchased by Ultrapar. The APRO will be in force until CADE approves the acquisition of the Northern Distribution Assets by Petrobras.

20. Acquisitions (Continued)**a) Ipiranga Group** (Continued)

With regard to the petrochemical businesses, on May 18, 2007, Petrobras and Braskem filed a request to register a Tag-Along PO of IPQ, allowing private parties to purchase shares held by the minority shareholders as at June 28, 2007. The value of the transaction was US\$60 (R\$118 million). On July 04, 2007, the CVM granted the application to waive this PO and, on July 18, 2007, IPQ's registration as a quoted company was cancelled.

On February 27, 2008, in fulfillment of the Investment Agreement signed on March 18, 2007, Ultrapar transferred an interest of 40% of the shares comprising the share capital of Ipiranga Química S.A. to Petrobras.

The CVM granted the registration of the PO to close the capital of Copesul on August 10, 2007, and the auction to purchase common shares of Copesul was held on October 05, 2007. The value of the operation was US\$731 (R\$1,294 million).

On March 28, 2008, the Extraordinary General Meeting of Petroquisa approved the share capital increase of Petroquisa, subscribed and paid up by Petrobras, through the contribution of its interest of 40% of the total share capital of Ipiranga Química S.A.

In October and November of 2007, there were Public Offerings (PO) of the minority shareholders of RPI, DPPI and CBPI. Petrobras paid out US\$119 (R\$211 million) for those acquisitions.

The RPI, DPPI, CBPI and Ultrapar Extraordinary General Meetings held on December 18, 2007, decided in favor of the Incorporation of Shares and the Ipiranga Group preferred shareholders received shares of Ultrapar in accordance with the pre-established ratio of exchange.

The operation to acquire the Ipiranga Group is in the final stage, in which Ultrapar finalizing the process of corporate reorganization of the companies of the Ipiranga Group, with the objective to enable the separation and transfer of the Petrochemical Assets, Northern Distribution Assets, Southern Distribution Assets and Refinery Assets, in accordance with that agreed by the parties.

20. Acquisitions (Continued)**a) Ipiranga Group** (Continued)

As such, the spinoff of Companhia Brasileira de Petróleo Ipiranga - C.B.P.I. took effect on April 30, 2008 and, consequently, Alvo Distribuidora de Combustíveis Ltda and Ipiranga Asfaltos S.A. - IASA began operating independently from that company.

After this corporate reorganization, Petrobras will receive the company created solely to receive the Northern Distribution Assets (Alvo Distribuidora de Combustíveis Ltda.), Ipiranga Asfaltos - IASA, and each one of the companies (Petrobras, Ultrapar and Braskem) will also receive 1/3 of the refinery assets.

These transfers, which characterize the completion of the operation, foresee a disbursement by Petrobras estimated in US\$398 (R\$706 million).

Petrobras has not consolidated the Northern Distribution Assets in its financial statements, as the APRO's agreement signed with CADE restricts the control over such assets, including obtaining formal approval for certain administrative, sales and operational decisions.

The purchase price of the Northern Distribution Assets has been allocated US\$52, net of tax, to property, plant and equipment and US\$229 to goodwill.

The purchase price of the petrochemical assets has been allocated US\$154, net of tax, to property, plant and equipment and US\$194 to goodwill.

The excess of allocation made to property, plant and equipment will be amortized over their remaining useful life.

In the current phase, with the incorporation of these shares, in the fuel distribution businesses, Petrobras now has the right to receive from Ultrapar 100% of the Northern Distribution Assets (including IASA).

The equity adjustment was determined on the basis of the Balance Sheet of the Northern Distribution Assets as at January 31, 2008, as established by the APRO (60 day gap).

20. Acquisitions (Continued)**a) Ipiranga Group** (Continued)

In the refinery businesses, in the current phase with the incorporation of the shares, Petrobras now has the right to receive from Ultrapar 33,33% of RPI, recorded according to equity method.

a.1) Braskem Investment Agreement

On November 30, 2007, an investment agreement was signed between Braskem, Odebrecht, Petrobras, Petroquisa and Norquisa, by which it was agreed that the petrochemical assets held by Petrobras and Petroquisa would be integrated in Braskem. With the integration of these assets, occurred on May 15, 2008, the joint interest of Petrobras and Petroquisa in the voting capital of Braskem will increase from 8.1% to 30% and, in the total share capital, from 6.8% to 25%.

The petrochemical assets that will be contributed by Petrobras and Petroquisa in Braskem are: (i) 37.30% of the voting and total capital of Copesul; (ii) 40% of the voting capital and total capital of IPQ; (iii) 40% of the voting and total capital of IQ; (iv) 100% of the voting and total capital of Petroquímica Triunfo (Triunfo); and (v) 40% of the voting and total capital of Petroquímica Paulínia (PPSA).

Petrobras and Petroquisa will have the option to make a capital contribution in Braskem up to 100% of the voting and total capital of Triunfo. If this event does not occur, Petrobras and Petroquisa may contribute by the amount in cash related to the economic value of the assets.

Petrobras, Petroquisa, Odebrecht and Norquisa, with Braskem as the intermediary, have already agreed the terms of the new shareholder's agreement for Braskem shareholders, which will be signed at the same time as the agreement on the integration of the petrochemical assets, which will be effected at Extraordinary General Meetings held by Braskem, IQ, IPQ, Copesul, PPSA and Triunfo, call specifically for this purpose, within up to 6 (six) months as counted from November 30, 2007.

The purchase price has been allocated US\$72, net of tax to property, plant and equipment and US\$5, net of tax, to inventories and the remaining US\$602 to goodwill.

The allocation made to property, plant and equipment will be amortized over its remaining useful life and the allocation to inventories has been fully amortized given the turn over.

On the same date, Petrobras and Unipar entered into an Investment Agreement, in order to create CPS-Companhia Petroquímica do Sudeste encompassing the shares of Suzano Petroquímica S.A and certain interest ownerships owned by Unipar. At the end of the structuring process, Petrobras will hold 40% of interest in CPS and Unipar 60%.

The Investment Agreement granted Unipar, during the structuring process of CPS, certain veto rights that preclude Petrobras to govern the financial and operating policies of the Suzano Petroquímica S.A.. The rights include rights to veto operating policies, expense budgets, financing and investment plans, management compensation and termination and distribution of dividends. Taking into consideration the lack of controlling power of Petrobras during the structuring process, Suzano Petroquímica S.A was accounted for by the equity method.

20. Acquisitions (Continued)**b) Acquisition of Suzano Petroquímica S.A.** (Continued)
