- Pre-commencement communications pursuant to Rule 13e-4(c) under the Exchange Act (17 CFR 240.13e-4(c))

Top of the Form**Item 8.01. Other Events**

On September 3, 2010, the Federal Energy Regulatory Commission (FERC) issued a Certificate of Public Convenience and Necessity to Eastern Shore Natural Gas Company (ESNG), a subsidiary of Chesapeake Utilities Corporation (CUC), to proceed, subject to certain conditions, with a project to construct, own, operate and maintain approximately eight miles of 16-inch mainline extension in Lancaster and Chester Counties, Pennsylvania. This project would interconnect ESNG's system with Texas Eastern Transmission, LP's (TETLP) mainline facilities in Lancaster County, Pennsylvania. ESNG's shippers would have the opportunity to receive natural gas supplies produced in the Appalachian region and surrounding areas. This new TETLP interconnection would be the third major upstream pipeline interconnection available to ESNG's customers.

With the extension, up to 50,000 dekatherms of natural gas per day could be received and transported from TETLP. The project is estimated to cost \$19.4 million and be completed by December 31, 2010. Currently, two shippers, CUC-Delaware Division and CUC-Maryland Division, have executed Precedent Agreements with ESNG that will result in 17- year firm transportation contracts associated with the project, equaling 40,000 dekatherms per day.

The Precedent Agreements between ESNG and the two shippers currently reflect the following 3-year phase-in schedule, which may vary based upon the actual completion date of the facilities. The annualized margin reflected below is based on ESNG's existing Part 284 Maximum Rate Schedule Firm Transportation Zone 1 monthly rate of \$9.0271 per dekatherm.

Effective Date	Annualized Dekatherms/Day Transported Through TETLP	Estimated Annualized Margin
November 1, 2010	20,000	\$2.2 million
November 1, 2011	15,000	\$1.6 million
November 1, 2012	5,000	\$0.5 million
Total	40,000	\$4.3 million
