Item 8.01 Other Events.

On January 11, 2016, Cytokinetics, Incorporated issued a press release outlining Vision 2020: Empowering Our Future, a strategic initiative designed to deepen and expand its pipeline over the next five years as well as advance a portfolio of muscle-biology directed drug candidates toward late-stage development and commercialization to address urgent unmet needs of people living with conditions characterized by impaired muscle function.

The key components of Vision 2020: Empowering Our Future are:

- Progress proprietary research programs focused on muscle contractility, growth and energetics into development under new collaborations;
- Advance next-generation skeletal and cardiac muscle activator compounds into clinical development by leveraging existing research collaborations;
- Conduct late-stage clinical development of novel, first-in-class muscle activators for the potential treatment of amyotrophic lateral sclerosis (ALS), spinal muscular atrophy (SMA), heart failure and other diseases impacting muscle function;
- Collaborate with patient communities to support the urgent development of new medicines for diseases of impaired muscle function with pressing unmet medical needs; and
- Mature company operations to enable development, registration and commercialization of muscle biology drug candidates across North America and Europe.

Over the next five years, Cytokinetics envisions expanding its portfolio of novel muscle activators by leveraging proprietary and partnered programs, as the company transitions into a mature, commercial-ready organization with multiple, first-in-class compounds for the potential treatment of people living with diseases of impaired muscle function who have few if any treatment options.

Item 9.01 Financial Statements and Exhibits.

A copy of the press release is filed as Exhibit 99.1 to this Current Report on Form 8-K, and is incorporated herein by reference.
