## JA Solar Appoints Ming Yang as Vice President of Business Development and Corporate Communications

SHANGHAI, China, Jan. 15, 2009 – JA Solar Holdings Co., Ltd. (Nasdaq: JASO - News), a manufacturer of high-performance solar products, today announced the appointment of Mr. Ming Yang as vice president of business development and corporate communications. He will be responsible for the company's strategic communications, including investor and public relations, as well as business development, strategic marketing and market assessment activities.

Mr. Yang has more than six years of experience working as a Wall Street buy-side and sell-side analyst, specializing in the renewable energy and semiconductor materials sectors. Most recently, he was an analyst covering the renewable energy sector at Coatue Management, a \$2 billion hedge fund based in New York. Before that, he was vice president at Piper Jaffray for four years, as senior China research analyst covering solar energy and semiconductor materials, based in Shanghai. Mr. Yang started his Wall Street career as an analyst at Dreman Value Management.

"We are very pleased to add Ming to our team, as he will help to re-energize our corporate communications and marketing activities using his deep industry knowledge and Wall Street experience," said Samuel Yang, CEO of JA Solar. "His unique market intelligence and understanding of our business will be a great value to our customers, partners and investors."

Yang earned his master of business administration degree from Cornell University and a bachelor's degree in electrical engineering and computer science from the University of California at Berkeley.

### About JA Solar Holdings Co., Ltd.

Based in Shanghai, JA Solar Holdings Co., Ltd. is a leading manufacturer and marketer of high-performance solar cells. The company sells its products to solar manufacturers worldwide, who assemble and integrate solar cells into modules and systems that convert sunlight into electricity for residential, commercial and utility-scale power generation.
