Distribution Chemicals

COMPANY PROFILE

Sinopec Corp. is a company established in China and listed in Hong Kong, New York, London and Shanghai with integrated energy and chemical operations. The principal operations of the Company include:

exploring for and developing, producing and trading crude oil and natural gas

processing crude oil into refined oil products, producing refined oil products and trading, transporting, distributing and marketing refined oil products

producing, distributing and trading petrochemical products

The Company’s competitive strengths are mainly reflected in:

its leading market position in the production and sales of refined oil products in China

its status as the largest petrochemical products producer in China

its strategic market position in China’s highest economic growth areas

its well-established, highly efficient and cost effective sales and distribution network

its integrated business structure with strong resistance against industry cyclical risks

its well-recognised brand and excellent reputation

The Company intends to fully implement its development strategies that are well balanced between the Company's development, contribution to the country, return to shareholders, reward to the society and its employees. Leveraging its advantages in vertical integration of upstream and downstream businesses, the Company will make great efforts to expand the market, explore alternative energy and enhance innovation, so as to develop into a multinational energy and chemical corporation with strong competitiveness.

5 ISSUANCE AND LISTING OF SECURITIES

Please refer to “Significant Events” of this annual report.

CHAIRMAN'S STATEMENT

Su Shulin, Chairman

Dear Shareholders:

On behalf of the Board of Directors, I would like to express our sincere gratitude to all our shareholders and the public for their care and support.

In 2009, the global financial crisis and intense market competition posed severe challenges to the Company's production and operations. In particular, the beginning of the year witnessed plummeting price and demand for petroleum and petrochemical products, and a harsh contraction in E&P segment profits, while the refining, petrochemical and marketing businesses were faced with high inventories. Despite the challenges, the Company achieved impressive results by taking a series of proactive measures including vigorous efforts to develop new markets, targeted management for refinement on details, as well as structural adjustments, and so on.

The E&P business maintained crude output volume with reduced costs and expenses while the price of crude remained sluggish. It increased exploration input for potential traps, and also invested resources in technological research and development for tertiary oil recovery from challenging reserves. As the international crude price gradually recover, the E&P segment realized good results and enhanced the sustainability of its business.

Fully leveraging its capability to accommodate various crude feeds, the refineries endeavoured to expand throughput by running at almost full capacity since the second quarter of 2009. In the meantime, the refining segment introduced process optimization initiatives across several functions, from crude procurement and resource allocation, to inventory and logistics management, and product mix adjustment, thus generating better profits.

In the chemicals business, the Company made more efforts to expand the market, and enhanced the integration of R&D throughout the production plan. It also continued to improve customer service and strengthened strategic alliances with key customers. Despite the unfavorable market environment, the majority of chemical plants operated at full capacity since March 2009, delivering excellent performance.

Capitalizing on the well-established marketing network, logistics systems and strong brand, the Company's marketing business successfully expanded its operational scale in an over-supplied domestic market by adopting innovative marketing approaches, flexible promotional programs and customer-oriented after-sales service. In addition, the non-fuel business grew significantly, driving up non-fuel business revenue and realized good operational results.

Over the course of the past year, China's macro-economy gradually recovered, and a fuel pricing policy paired with tax and fee reform were implemented in the domestic market. The Company's four business segments all achieved good operating performance, resulting from our effective counter-measures to the economic crisis, as well as from advantages gained from our integrated upstream, midstream and downstream business model. In 2009, the Company's total turnover, other operating income and other revenues, reached RMB 1,345.052 billion, down 10% year-on-year. In accordance with the Chinese Accounting Standards for Business Enterprises ("ASBE"), net profit attributable to equity holders of the Company was RMB 61.29 billion, up by 115.5% year-on-year. Under the International Financial Reporting Standards ("IFRS"), profit attributable to the equity holders of the Company was RMB 61.76 billion, up by 116.5% year-on-year. Both structure and quality of assets of the Company were constantly improved with the net assets up 14.6% year-on-year. In 2009, taxes and fees paid by the Company to the central and local governments totalled RMB179.05 billion. With the above achievements, both economic returns and social responsibilities have been well fulfilled by the Company. The Board of Directors recommended a full year dividend of RMB 0.18 per share for 2009. The final dividend for 2009 was RMB 0.11 per share after deducting the interim dividend of RMB 0.07 per

share.

In 2009, the Company further improved its corporate governance. The Company successfully completed the rotation and succession of members to the Board of Directors and the Board of Supervisors, and also appointed members to the executive management team. The Company revised the “Articles of Association” and laid a solid foundation for standardized operations. Thanks to the strong support from its independent shareholders, the Company completed adjustment on the continuing connected transactions for the period from 2010 to 2012. In addition, continued efforts were made in strengthening refined management and internal controls to shape a unique management model and push its corporate governance to a higher level. In line with the Company’s strategic targets for corporate development, the Outline of Corporate Culture Development was crafted to establish harmonious corporate values to support the continued sustainable development of the Company.

10

In 2009, in accordance with the strategy focusing on “Resources, Markets, Integration and Internationalization”, the new Board made a three-year development plan for the Company from 2009 to 2011 and established its future development direction and corporate goals. In accordance with the new plan, the Company increased its capital expenditure to RMB 110.013 billion in 2009, which was primarily allocated to expand resources, increase reserve and output and to expand the market as well.

A number of key projects, including Sichuan-to-the-East China Gas Project, Tianjin one-million-ton-per-year ethylene project and Zhenhai one-million-ton-per-year ethylene project, etc., have been completed or put into operation. The building of storage and transportation facilities for oil and chemical products progressed smoothly. These achievements have facilitated structural adjustments and product quality upgrading in major refineries.

Sinopec International Petroleum Exploration & Production Co., Ltd. was established, a concrete step made in the Company’s overseas expansion in the oil and gas business. In addition to enhancing our business position as a supplier of premium clean fuels to the public, the Company also played an important role in domestic industry restructuring and regional economic development by contracting major equipment from and entering into a joint research and development program with domestic manufacturers,

The Company has always attached great importance to social and environmental issues in order to ensure sustainable development. We have fully implemented the HSE management system and adopted a variety of methods in energy saving and emission reduction in particular CO₂ emission reduction, so as to promote a low-carbon economy. Thanks to the company-wide initiatives in producing clean products through clean production processes, the Company’s comprehensive energy consumption per RMB 10,000 turnover came down to 0.72 tonnes of standard coal, realizing the energy saving target in its 11th Five-Year Plan one year ahead of schedule.

In 2009, the Company carried out a series of employee-focused programs with practical steps taken to improve the quality of the employee canteen and the health check system, as well as a general safety campaign called “I Safe”. In addition, we are actively participating in public welfare activities, including poverty relief and Tibet aid programs, sponsorship of “China Lifeline Express Fund,” and donations to Hope schools and disaster relief programs to help local communities recover from recent events and raise the living standards in disaster- and poverty-stricken areas.

We attribute the Company’s achievements to the trust and support of all our shareholders and all walks of society, as well as to the hard work and concerted efforts of the Board of Directors, the Board of Supervisors, the management team and all employees. Therefore, on behalf of the Board of Directors, I would like to express my heartfelt gratitude for the support and perseverance of all parties involved.

Looking into 2010, the world economy is anticipated to continue its recovery from the crisis, while the Chinese economy is expected to continue to grow at a relatively fast rate driving up the demand for petroleum and petrochemical products, all these present opportunities for the development of the Company. However, we are still confronted with challenges from the high international crude price, and incremental refining and chemical capacities at home and abroad which may lead to fierce competition in the marketplace.

Nevertheless, we are gratified to see that through years of development, the Company has continuously reinforced its reserve basis with natural gas business becoming a new area of profit growth. We are also gratified to see that the structure of refineries and chemical complexes have been constantly optimized with extended marketing networks. At the same time our business in overseas markets are expanding significantly. Additionally, our people, management team and individuals alike, are positive and well-prepared for market competitions, through continuous innovation and savvy management tactics. Therefore, this session of the Board of Directors is confident about our future growth.

In accordance with the market conditions and the strategic development goals of the Company, our capital expenditure for 2010 is expected to reach approximately RMB 112 billion. We'll make more efforts in exploration and development activities to enhance the upstream reserve base. We'll invest in further optimization of the locations of our refining capacities, promote structural adjustment, produce high value-added products and increase their proportion in the refining business. Moreover, we'll enhance our competitive advantage and improve our capabilities in expanding markets, and improve our marketing network. The Company will continue to invest in technological innovation conducive to clean energy production and R&D on new energies, and such transform will pave the way for a sustainable development of the Company into the future.

My fellow members of the Board of Directors and I believe that the Company will achieve greater development with the support of all of our shareholders and the concerted efforts of the Board of Directors, the Board of Supervisors, the management team and all employees. We will continuously stride forward to become an internationally competitive energy and chemical company, and to reward our shareholders, employees and the whole society with excellent performance from sustainable and effective growth.

Su Shulin
Chairman

Beijing, China
March 26, 2010

BUSINESS REVIEW AND PROSPECTS

Mr. Wang Tianpu, President

BUSINESS REVIEW

In 2009, Chinese economy was seriously impacted by the global financial crisis. The Chinese government implemented a stimulus package to promote the economic growth and carried out proactive fiscal policy and moderately easy monetary policy, thereby giving an impetus to the growth of Chinese economy and maintaining a GDP growth of 8.7%. The Company's business environment underwent significant and profound changes in 2009. At the beginning of the year, petroleum and petrochemical products witnessed a sharp drop in market demand and prices on a year-on-year basis. However, the market demand gradually recovered and the price went up accordingly after the first quarter. The Company spared no efforts in exploring market, reinforcing precision management and improving structure adjustment according to market condition, which not only guaranteed the stable growth in upstream, mid-stream and downstream production and operation, but also realized satisfactory profits.

1 Review of Market Environment

(1) Crude oil market

In 2009, international crude oil price rebounded after reaching the bottom. In the first quarter, international crude oil price remained low. However, the price climbed substantially since the month of May, fluctuating between US\$ 60/bbl to US\$ 80/bbl. The annual average spot price of Brent was US\$ 61.5/bbl, with a year-on-year drop of 36.6%. Price trend of domestic crude oil was in line with the international markets.

(2) Refined oil products market

Domestic demand in domestic oil products market gradually increased in 2009. However, due to the sufficient supply, the market competition was fierce. With the rapid growth of domestic economy and substantial increase in domestic automobile consumption, the apparent consumption of oil products rose quarter by quarter. According to statistics, in 2009, apparent domestic consumption of oil products (inclusive of gasoline, diesel and kerosene) was 207 million tonnes, with a year-on-year increase of 0.9%.

(3) Chemicals market

Chinese central government's stimulus package promoted the consumption of chemical products in relevant industries in 2009, and boosted the demand in domestic chemical products market. According to the Company's statistics, the apparent domestic consumption of synthetic resin, synthetic fiber and synthetic rubber registered a year-on-year increase of 21.5%, 12.6% and 22.3% respectively. The apparent domestic consumption of ethylene equivalent increased by 8% compared with the previous year. Domestic prices of chemical products gradually recovered from a low level.

2 PRODUCTION AND OPERATION

(1) Exploration and Production

In 2009, the Company further implemented oil-and-gas resource strategy by reducing cost and fees instead of trimming production when oil price was low. The Company increased exploration input and reinforced trap reservoir. New breakthroughs were made in Leikoupo Formation in northeast Sichuan. The exploration in Tuoputai area of Tahe realized great achievement. New findings were acquired through exploring new layers in eastern matured fields and new blocks in the west. In 2009, the Company completed 14,515 kilometers of 2D seismic and 11,069 square kilometers of 3D seismic exploration, and drilled 570 exploration wells with a total footage of 1,643 kilometers. Addition of proved oil and gas reserve was 293.25 mmbbl. As to development, Sichuan-East China Gas Project started trial operation. Construction of Songnan Gas Field with an annual capacity of 1 billion cubic meters was completed and put into operation. Meanwhile, the Company intensified its efforts and input in scientific and technological research of tertiary oil recovery and reserves that are difficult to recover, and enhanced single-well capacity and recovery rate, resulting in stable increase of oil and gas output. In addition to the steady increase in crude oil output in the matured fields in east China, the production in the newly-developed western fields, represented by Tahe Oil Field, increased substantially.

Summary of Operations of Exploration and Production Segment

	2009	2008	2007	Change from 2008 to 2009 (%)
Crude oil production (mmbbls)	301.15	296.80	291.67	1.5
Natural gas production (bcf)	299.01	293.07	282.59	2.0
Newly added proved reserve of crude oil (mmbbls)	280.19	114.02	20.67	145.7
Newly added proved reserve of natural gas (bcf)	78.38	921.60	3,756.67	(91.5)
Proved reserve of crude oil (mmbbls)	2,820	2,841	3,024	(0.7)
Proved reserve of natural gas (bcf)	6,738.70	6,959.31	6,330.81	(3.2)
Proved reserve of oil and gas (mmbbl)	3,943	4,001	4,079	(1.4)

Summary of Production and Operations of Shengli Oil Field

	2009	2008	2007	Change from 2008 to 2009 (%)
Crude oil production (mmbbls)	197.63	196.96	196.68	0.3
Natural gas production (bcf)	24.72	27.19	27.68	(9.1)
Newly added proved reserve of crude oil (mmbbls)	171.29	116.48	75.68	47.4
Newly added proved reserve of natural gas (bcf)	22.06	(36.04)	42.00	—
Proved reserve of crude oil (mmbbls)	2,124	2,151	2,231	(1.3)
Proved reserve of natural gas (bcf)	261.73	264.39	327.63	(1.0)
Proved reserve of oil and gas (mmboe)	2,167	2,195	2,286	(1.3)

Note: Crude oil is converted at 1 tonne to 7.1 barrels, and natural gas is converted at 1 cubic meter to 35.31 cubic feet.

(2) Refining

In 2009, fully tapping its refineries potentials after revamping and upgrading the existing facilities to take in different grades of crude, the Company expanded its refinery throughput and export volumn. Refining facilities had run at full capacity since the second quarter. The Company adhered to diversification of crude oil sources to lower the procurement cost. The Company adjusted the product mix to increase the production of gasoline and jet fuel and expanded sales of asphalt, LPG and petroleum coke. The Company actively expanded its processing business for the third parties. Construction of refining facilities of Fujian and Tianjin refining and chemical integration projects and the oil products quality upgrading projects were completed and brought into production. In 2009, the Company processed 183 million tonnes of crude oil, representing an increase of 6.7% over the previous year, and produced 114 million tonnes of oil products, up 5.9% over the previous year.

	Sources of Crude oil		Unit: million tonnes	
	2009	2008	2007	Change from 2008 to 2009 (%)
Internal supply	31.90	30.88	30.83	3.3
PetroChina Company Ltd.	7.05	6.13	6.89	15.0
CNOOC Ltd.	6.49	7.55	7.42	(14.0)
Import	138.07	127.98	116.87	7.9
Total	183.51	172.54	162.01	6.4

Summary of Production and Operations of Refining Segment

	2009	2008 ^{note 1}	2007	Change from 2008 to 2009 (%)
Crude oil throughput (million tonnes)	182.62	171.14	164.00	6.7
Gasoline, diesel and kerosene production (million tonnes)	113.69	107.37	98.28	5.9
Of which: Gasoline (million tonnes)	34.43	29.65	26.55	16.1
Diesel (million tonnes)	68.86	69.74	63.41	(1.3)
Kerosene (million tonnes)	10.39	7.99	8.32	30.0
Light chemical feedstock (million tonnes)	26.87	23.12	24.00	16.2
Light products yield (%)	75.54	74.75	74.48	0.79
				percentage point
Refinery yield (%)	94.53	94.05	93.95	0.48
				percentage point

Note: 1. The data of 2007 and 2008 was restated for the acquisition of Qingdao Petrochemical.

2. Refinery throughput is converted at 1 tonne to 7.35 barrels.

(3) Marketing and Distribution

In 2009, faced with intense competition in domestic market, the Company gave full play to its matured marketing network, logistics system and brand advantages, took advanced marketing measures and flexible marketing strategy, provided considerate after-sale services, and achieved satisfactory performance. Meanwhile, the Company widely encouraged the use of IC cards and substantially increased non-fuel business. In 2009, the Company sold 124 million tonnes of oil products, a year-on-year increase of 0.8%.

Summary of Operations of Marketing and Distribution Segment

	2009	2008	2007	Change from 2008 to 2009 (%)
Total domestic sales volume of oil products (million tonnes)	124.02	122.98	119.39	0.8
Of which: Retail (million tonnes)	78.90	84.10	76.62	(6.2)
Direct sales (million tonnes)	25.61	19.63	20.17	30.5
Wholesale (million tonnes)	19.52	19.25	22.60	1.4
Average annual throughput per station (tonne/station)	2,715	2,935	2,697	(7.5)
Total number of service stations	29,698	29,279	29,062	1.4
Of which: Company-operated	29,055	28,647	28,405	1.4
Franchised	643	632	657	1.7

(4) Chemicals

In 2009, the Company made tremendous efforts to explore the market, strengthen the connection among production, sales and research, improve customer services and establish the strategic alliances with major clients. The main chemical production facilities had operated at full capacity since March. Fujian ethylene project was completed and put into production. Tianjin ethylene project achieved mechanical completion. In 2009, the Company produced 6.713 million tonnes of ethylene with a year-on-year increase of 6.7%, and sold 40.8 million tonnes of chemical products.

	Summary of Production of Major Chemical Products			Unit: thousand tonnes
	2009	2008	2007	Change from 2008 to 2009 (%)
Ethylene	6,713	6,289	6,534	6.7
Synthetic resin	10,287	9,643	9,660	6.7
Synthetic rubber	884	834	800	6.0
Synthetic fiber monomer and polymer	7,798	7,264	8,018	7.4
Synthetic fiber	1,302	1,260	1,417	3.3
Urea	1,752	1,649	1,565	6.2

Note: 100% production of joint ventures was included.

(5) Research and Development

In 2009, the Company gave full play to the function of scientific and technological innovation as “accelerator” for development and made distinct achievements. Research on exploration target and key technologies for large-scale gas fields in northeast Sichuan substantially contributed to the growth of natural gas reserves. The ultra-low pressure continuous reforming technology won 1st-class prize of National Science and Technology Progress Award, marking that Sinopec Corp. has the ability to construct large-scale refineries with its own technologies. The promotion and application of S-Zorb FCC gasoline adsorptive desulfurization technology and gasoline selective hydro-desulfurization technology guaranteed the successful quality upgrading of GB III standard gasoline. Breakthroughs in large scale gas-phase polyethylene technology and other process packages further improved the Chemicals Segment’s capability to make development on the strength of the Company’s own technologies. The production technologies, including high performance polyethylene fiber dry spinning method, special material for high performance polyethylene town gas pipe and special material for polypropylene bumpers, promoted the adjustment of chemical product mix. New achievements in MTO molecular sieve preparation technology and technology of producing oil from syngas and producing ethylene glycol from syngas rendered new technological support to the strategic development of the Company. Eleven projects were granted National Science and Technology Progress Award, including one for 1st-class prize and 10 for 2nd-class prize. In 2009, the Company applied for 1,570 domestic patents and was granted 605. The Company applied for 135 foreign patents and was granted 37.

(6) Health, Safety and Environment

In 2009, the Company maintained its emphasis on coordinated and sustained development among the Company, the society and the environment. The Company implemented the HSE management system across the entire Company, promoted energy saving and emission reduction, developed low-carbon economy, cut carbon dioxide emission by various means and ensured clean production and production of clean products. Compared with previous year, energy intensity per RMB 10,000 output value was 0.72 tce, fulfilling in advance the energy-saving target of the Eleventh Five-Year Plan; industrial water consumption decreased by 3.3%; COD in waste water declined by 3.6%; sulfur dioxide discharge fell by 14%; and the recycling rate of industrial water stood around 95%. Adopting the people-foremost approach, the Company made efforts to improve working conditions such as canteen services and medical examination, and organized themed activities like “I Safe”. For further information, please refer to the Sustainable Development Report of the Company.

(7) Cost Reduction

In 2009, the Company kept improving management and operation, and took various measures to reduce cost, such as leveraging the existing logistics system, optimizing resource allocation, cutting transportation costs, reducing procurement cost of crude oil and energy intensity and materials consumption in the production process by optimizing the operation of the facilities. In 2009, the Company effectively saved RMB 3.225 billion in cost. Of the total cost saved, Exploration and Production Segment, Refining Segment, Marketing and Distribution Segment and Chemicals Segment achieved cost saving of RMB 687 million, RMB 969 million, RMB 851 million and RMB 718 million respectively.

(8) Capital Expenditure

In 2009, the Company's total capital expenditure registered RMB 110.013 billion, among which RMB 51.55 billion was used in exploration and development for the purpose of enhancing oil and gas exploration, key production capacity buildup and enlarging producing reserve scale. The Sichuan-East China Gas Project progressed steadily. The newly-built crude oil production capacity registered 5.7 million tonnes per year, and newly-built natural gas capacity stood at 1.205 billion cubic meters per year. The capital expenditure for Refining Segment totaled RMB 15.468 billion, which was mainly used in refined oil quality upgrading, crude adaptability restructuring project in some refineries and construction of new storage facilities and pipeline. The expenditure in Marketing & Distribution Segment was RMB 16.283 billion. With such input, the Company added 1,229 petrol and gas stations in key areas including highways, major cities and newly planned regions, and further accelerated the construction of oil products storage facilities and pipeline. The capital expenditure in Chemicals Segment was RMB 25.207 billion. Fujian, Tianjin and Zhenhai ethylene projects is going to be completed one after another. SBR unit of Sinopec Qilu Company and ethylbenzene/styrene complex unit of Sinopec Anqing Company were completed and put into production. The capital expenditure in Corporate and Others totaled RMB 1.505 billion, which was used for scientific research, construction of ancillary projects and further application of information systems focused on ERP.

BUSINESS PROSPECTS

1

Market Analysis

In 2010, along with the recovery of world economy, demand in international oil market will experience recovery and growth. It is anticipated that the overall oil price in 2010 will be higher than that of 2009.

Due to the incremental capacity in the refining and chemical industry, the market competition will remain fierce.

As the basis of Chinese economic recovery is more solid, the policies of boosting domestic demand and improving living standard will continue to take effect. Domestic demand of petroleum, natural gas and chemical products will grow steadily. In coping with the drastic changes caused by the financial crisis, the Company has accumulated valuable experience and considerably enhance its competitiveness.

In 2010, the Company will continue to reinforce internal management, and organize production in line with the market condition, and attach great importance to production and energy conservation. The Company will focus on

the following areas:

2

Production and Operation

Exploration and Production: In terms of exploration, the Company will reinforce the precise exploration in new blocks, new layers, new areas and outlying zones in the matured fields, and promote the integration of exploration and development. Research and study of exploration deployment in newly-discovered western fields (mainly Tahe) will be further conducted. The Company will continue to improve initial evaluation in sea area, and push forward the exploration and development of coal bed methane and shale gas. In terms of development, the Company will make efforts to enhance recovery rate and single-well productivity. It will stress design optimization and construction management of development scheme, and organize key capacity buildup meticulously. Efforts will be put forth to ensure safe production and stable operation of Puguang Gas Field and Sichuan-East China Gas Project. Management on overseas oil fields will also be improved. In 2010, the Company plans domestic production at 42.55 million tonnes of crude oil and 12 billion cubic meters of natural gas.

Refining: Tapping its refineries potentials after the revamping of facilities to take in different grades of crude, the Company will optimize procurement and deployment of crude oil, and reduce crude oil cost. The Company will optimize production process and operation, meticulously organize the operation of new and renovated facilities, and emphasize optimized operation of production units, storage and transportation facilities and public utilities. It will comprehensively reinforce energy efficiency management and further improve economic and technical indicators. Greater efforts will be exerted on product mix adjustment and increase the output of gasoline and light chemical feedstock. The Company will promote the sales of lubricant, asphalt and petroleum coke by leveraging its brand advantages. In 2010, the Company plans to process 203 million tonnes of crude oil and produce 121 million tonnes of oil products.

16

Marketing and Distribution: The Company will rapidly respond to market changes, timely adjust marketing strategy accordingly and strive to enlarge operating scale. Greater efforts will be made to reinforce and expand the end market, and increase the market share of jet fuel and fuel oil. To expand retail sales, the Company will further promote usage of IC card and improve services. It will expand direct sales by perfecting customer service system, and strengthen marketing network by optimizing oil depot arrangement and pushing forward capacity expansion of service stations. Meanwhile, non-fuel business will be promoted. In 2010, the Company plans 129 million tonnes of domestic sales of oil products.

Chemicals: Adopting a market-oriented approach and focused on profitability, the Company will exert great efforts to organize production and expand the market. Production and management will be optimized so as to guarantee safe and stable operation. Particular emphasis will be laid on key projects including, Tianjin and Zhenhai ethylene projects to ensure that these projects progress well and will be commissioned smoothly. The Company will promote development of new products and adjustment of product mix to increase the output of products that are well received by the market and the products with high added value. It will reinforce customer management and substantially improve strategic cooperation. It will enhance its performance in technology services to create higher value for customers. It will deepen integration of production, sales and research to pursue maximize profit. In 2010, the Company plans to produce 8.69 million tonnes of ethylene.

Technology and Development: Following the guideline of seamlessly articulating research, development, commercialization and promotion, the Company will focus on the research of oil and gas exploration and development at home and abroad, and further enhance reserve development rate, recovery rate and single-well productivity. In addition, new technology of processing lower quality crude oil and heavy oil will be developed. The production technology of GB IV standard oil products will be further optimized. The production technology of GB V standard oil products will be accelerated. The Company will render support to the development of production technology of high value-added products, and reinforce the research on processing and application technology of synthetic resin. R&D of alternative energy and low-carbon technologies will be sped up. R&D, production and technological service on catalysts will be intensified. Research on application technology of oil products storage and marketing will be launched.

Capital Expenditure: In 2010, the Company will continue to follow the principle of taking profitability and core projects as the priority of investment. The investment management procedures will be strictly controlled and the project construction will be meticulously managed. The total planned capital expenditure is RMB 112 billion, among which the capital expenditure for Exploration and Production Segment is RMB 53.3 billion. The Company will carefully organize the commissioning of Puguang Gas Field and safe operation of the Sichuan-East China Gas Project. The exploration and capacity buildup of Tahe and Shengli oil fields and Puguang and Erdos gas fields will be the focus of efforts. The capital expenditure for Refining Segment will be RMB 22.3 billion. The emphasis will be put on the strategic locations of refining capacity buildup. The Company will push forward the construction of refining capacity steadily, promote revamping projects focused on taking in lower quality crude oil as feedstock, complete quality upgrading of oil products at low cost, and improve the construction of crude oil dock and transportation & delivery system. The expenditure for Marketing and Distribution Segment will reach RMB 14 billion. Efforts will be concentrated on construction and acquisition of petrol and gas stations in key areas including highways, major cities and newly planned zones. Pipeline construction will be accelerated. Sales network of oil products will be improved. The capital expenditure for Chemicals Segment will be RMB 20 billion. The construction of Zhenhai ethylene project will be completed. The construction of Wuhan ethylene, Yanshan butyl rubber and other projects will be promoted steadily. The capital expenditure for Corporate and Others is planned at RMB 2.4 billion.

In 2010, Sinopec will stick to the scientific outlook of development, improve precision management, actively adjust structure, substantially explore the market, enhance profitability and strive to gain new achievements in production and operation.

MANAGEMENT'S DISCUSSION AND ANALYSIS

THE FOLLOWING DISCUSSION AND ANALYSIS SHOULD BE READ IN CONJUNCTION WITH THE COMPANY'S AUDITED FINANCIAL STATEMENTS AND THE ACCOMPANYING NOTES. PART OF THE FINANCIAL DATA PRESENTED IN THIS SECTION IS DERIVED FROM THE COMPANY'S AUDITED FINANCIAL STATEMENTS THAT WE HAVE PREPARED IN ACCORDANCE WITH THE INTERNATIONAL FINANCIAL REPORTING STANDARDS ("IFRS"), UNLESS OTHERWISE STATED.

1 CONSOLIDATED RESULTS OF OPERATIONS

In 2009, the Company's turnover, other operating revenues and other income were RMB 1345.1 billion, and the operating profit was RMB 84.4 billion, representing a decrease of 10.0%, and an increase of 220.6% respectively over the year of 2008. This was mainly due to positive response to international financial crisis. We strove to expand the market, improve marketing and service, optimize material structure and take the advantage of business scale and Integration, which contributed to a good operational result under the circumstances of implementation of reform on pricing mechanism of oil products and relevant taxation and fees policy, and gradually increased demand for chemical products.

The following table sets forth major revenue and expense items in the consolidated income statement of the Company for the indicated periods:

	Years ended 31 December		
	2009 RMB millions	2008	Change (%)
Turnover, other operating revenues and other income	1,345,052	1,195,148	(10.0)
Of which: Turnover	1,315,915	1,113,203	(6.9)
Other operating revenues	29,137	31,088	(6.3)
Other income		(50,857)	(100.0)
Operating expenses	(1,260,614)	(1,068,812)	(14.2)
Of which: Purchased crude oil, products, and operating supplies and expenses	(990,452)	(816,106)	(23.0)
Selling, general and administrative expenses	(40,500)	(39,392)	2.8
Depreciation, depletion and amortization	(50,487)	(46,321)	9.0
Exploration expenses (including dry holes)	(10,545)	(8,310)	26.9
Personnel expenses	(28,836)	(23,381)	23.3
Taxes other than income tax	(132,884)	(57,214)	132.3
Other operating expenses (net)	(6,910)	(8,088)	(14.6)
Operating profit	84,431	26,336	220.6
Net finance costs	(7,234)	(5,190)	39.4
Investment income and share of profit less losses from associates and jointly controlled entities	3,371	970	247.5
Profit before taxation	80,568	22,116	264.3
Income tax (expense)/benefit	(16,084)	2,840	—
Profit for the year	64,484	24,956	158.4
Attributable to:			
Equity shareholders of the Company	61,760	28,525	116.5
Non-controlling interests	2,724	(3,569)	—

(1) Turnover, other operating revenues and other income

In 2009, the Company's turnover was RMB 1315.9 billion, representing a decrease of 6.9% over 2008. This was mainly due to the decrease in prices of crude oil, refined oil and chemical products over 2008 and expansion of operations of the Company. In addition, the Company received RMB 50.9 billion government subsidy for the strict control of oil products prices in 2008 (listed as other revenues), while no such subsidy has been paid since the reform on pricing, taxation and fees of oil products was put into effect in 2009.

The following table sets forth the Company's external sales volume, average realized prices and the respective rates of change from 2008 to 2009 for the Company's major products:

	Sales volume (thousand tonnes)			Average realised price (RMB/tonne, RMB/thousand cubic meters)		
	Years ended 31 December		Change (%)	Years ended 31 December		Change (%)
	2009	2008		2009	2008	
Crude oil	4,915	4,394	11.9	2,303	4,190	(45.0)
Natural gas (million cubic meters)	6,486	6,283	3.2	933	911	2.4
Gasoline	39,035	37,732	3.5	6,367	6,409	(0.7)
Diesel	82,344	80,236	2.6	5,092	5,629	(9.5)
Kerosene	11,353	9,216	23.2	3,918	6,063	(35.4)
Basic chemical feedstock	13,272	10,667	24.4	4,359	6,238	(30.1)
Monomer and polymer for synthetic fiber	4,650	3,990	16.5	6,530	8,054	(18.9)
Synthetic resin	8,667	7,827	10.7	8,072	10,094	(20.0)
Synthetic fiber	1,418	1,353	4.8	9,140	10,488	(12.9)
Synthetic rubber	1,116	982	13.6	11,448	16,160	(29.2)
Chemical fertiliser	1,769	1,658	6.7	1,657	1,729	(4.2)

Most of crude oil and a small portion of natural gas produced by the Company were internally used for refining and chemical production and the remainings were sold to other customers. In 2009, the total revenue from crude oil, natural gas and other upstream products that were sold externally were RMB 19.3 billion, representing a decrease of 26.7% over 2008. The change was mainly due to the decrease in the price of crude oil.

In 2009, the Company's refining segment and marketing and distribution segment sold petroleum products (mainly consisting of refined oil products and other refined petroleum products) to external parties. The external sales revenue realized by these two segments were RMB 874.2 billion, representing a decrease of 6.5% over 2008, accounting for 65.0% of the Company's turnover, other operating revenues and other income. The decrease was mainly due to the decreased prices of refined oil products. The sales revenue of gasoline, diesel and kerosene was RMB 712.3 billion, representing a decrease of 5.0% over 2008, accounting for 81.5% of the total revenue of petroleum products. Sales revenue of other refined petroleum products was RMB 161.9 billion, representing a decrease of 12.8% over 2008, accounting for 18.5% of the total turnover of petroleum products.

The Company's external sales revenue of chemical products was RMB 192.7 billion, representing a decrease of 12.3% over 2008, accounting for 14.3% of its turnover, other operating revenues and other income. This was mainly due to the decrease in the price of chemical products.

(2) Operating expenses

In 2009, the Company's operating expenses were RMB 1260.6 billion, representing a decrease of 14.2% over 2008. The operating expenses mainly consist of the following:

Purchased crude oil, products and operating supplies and expenses were RMB 990.5 billion, representing a decrease of 23.0% over 2008, accounting for 78.6% of the total operating expenses, among which:

- 1 Crude oil purchase expenses were RMB 405.4 billion, representing a decrease of 41.3% over 2008. In 2009, the total throughput of crude oil that was purchased externally was 135.14 million tonnes (excluding the amount processed for third parties), an increase of 0.2% over 2008; average unit cost for processing crude oil purchased externally was RMB 3,000 per tonne, a decrease of 41.5% over 2008.
- 1 Other purchasing expenses were RMB 585.1 billion, representing a decrease of 1.7% over 2008. This was mainly due to the decrease in the cost of gasoline, diesel, kerosene and other feedstock purchased externally.

Selling, general and administrative expenses totaled RMB 40.5 billion, representing an increase of 2.8% over 2008. This was mainly due to the increase in the expenses of community services and culture, education and healthcare and the increase in rental charges of some gas stations.

Depreciation, depletion and amortization expenses were RMB 50.5 billion, representing an increase of 9.0% over the same period of 2008. This was mainly due to the depreciation resulting from the Company's continuously increased investment in property, plant and equipment.

Exploration expenses were RMB 10.5 billion, representing an increase of 26.9% over 2008, which were mostly spent on enhancing exploration activities in such regions as Northeast and West of Sichuan and Erdos.

Personnel expenses were RMB 28.8 billion, representing an increase of 23.3% compared with 2008. This was mainly because the Company accrued the annuity, performance payroll and the housing subsidy for the personnel who joined the Company after 31 December, 1998 subject to related regulations in 2009, while the performance payroll was not accrued due to the decreased profit in 2008.

Taxes other than income tax was RMB 132.9 billion, an increase of 132.3% compared with 2008, and this was mainly due to domestic reform of prices, taxation and fees for oil products, which led to the increase in the consumption tax, urban construction tax and educational surcharge by RMB 101.4 billion over the same period of 2008. In addition, the special oil income levy decreased by RMB 25.7 billion compared with 2008 as a result of the decrease in the price of crude oil.

Other operating expenses were RMB 6.9 billion, representing a decrease of 14.6%, over 2008.

- (3) Operating profit was RMB 84.4 billion, representing an increase of 220.6% over 2008.
- (4) Net finance costs were RMB 7.2 billion, representing an increase of 39.4% over 2008. Of which, the Company's interest expenses were RMB 7.4 billion, a decrease of RMB 4.5 billion over 2008; the foreign currency exchange gains were RMB 0.4 billion, a decrease of RMB 2.9 billion over 2008. There was also a loss of RMB 0.2 billion arising from the fair value change of embedded financial derivative instruments in convertible bonds as a result of change in H share's stock price, compared with a profit of RMB 3.9 billion caused by the fair value change of embedded financial derivative instruments in convertible bonds in 2008.
- (5) Profit before taxation was RMB 80.6 billion, representing an increase of 264.3% over 2008.
- (6) Income tax was RMB 16.1 billion, increased by RMB 18.9 billion. The increase was mainly due to substantial growth of profit before taxation over 2008.
- (7) Profit attributable to non-controlling interests of the Company was RMB 2.7 billion, an increase of RMB 6.3 billion compared with 2008.
- (8) Profit attributable to equity shareholders of the Company was RMB 61.8 billion, representing an increase of 116.5% over 2008.

2 RESULTS OF SEGMENT OPERATION

The Company manages its operations in four business segments, namely exploration and production segment, refining segment, marketing and distribution segment and chemicals segment, and corporate and others. Unless otherwise specified, the inter-segment transactions have not been eliminated from financial data discussed in this section. In addition, the operating revenue data of each segment include "other operating revenues" and "other income" of the segment.

The following table shows the operating revenues by each segment, the contribution of external sales and inter-segment sales as a percentage of operating revenues before elimination of inter-segment sales, and the contribution of external sales as a percentage of consolidated operating revenues (i.e. after elimination of inter-segment sales) for the periods indicated.

Operating revenues	As a percentage of consolidated operating revenue before elimination of inter-segment sales	As a percentage of consolidated operating revenue after elimination of inter-segment sales

(1) Exploration and Production Segment

Most of the crude oil and a small portion of the natural gas produced by the exploration and production segment were used for the Company's refining and chemical operations. Most of the natural gas and a small portion of crude oil produced by the Company were sold externally to other customers.

In 2009, the operating revenues of this segment were RMB 123.8 billion, representing a decrease of 37.0% over 2008. This is mainly attributable to the decrease in the selling price of crude oil.

In 2009, this segment sold 40.24 million tonnes of crude oil and 7.03 billion cubic meters of natural gas, representing an increase of 2.1% and 2.2% respectively over 2008. The average realized price of crude oil and natural gas were RMB 2,409 per tonne and RMB 959 per thousand cubic meters respectively, representing a decrease of 43.6% and an increase of 1.9% respectively over 2008.

In 2009, the operating expenses of this segment were RMB 104.2 billion, representing a decrease of 19.8% over 2008. This was mainly due to the decrease of special oil income levy by RMB 25.7 billion over 2008 caused by the decrease of the selling price of crude oil.

In 2009, the unit cash operating cost for oil and gas was RMB 642.6 per tonne, representing an increase of 1.9% over 2008.

In 2009, the segment tried its best to stabilize/increase the production. The segment's operating profit was RMB 19.6 billion, representing a decrease of 70.5% over 2008, which was mainly caused by substantial decline in prices of crude oil year on year.

(2) Refining Segment

Business activities of the refining segment include purchasing crude oil from third parties or from the exploration and production segment of the Company and processing crude oil into refined products, selling gasoline, diesel and kerosene to the marketing and distribution segment of the Company, selling a portion of feedstock oil to the chemicals segment of the Company, and selling other refined petroleum products to both domestic and overseas customers.

In 2009, the operating revenues of this segment was RMB 703.6 billion, representing a decrease of 19.2% against 2008. This was mainly attributable to the decrease in prices of the products.

The following table sets forth the sales volumes, average realized prices and the respective rates of change of the Company's major refined oil products of the segment from 2008 to 2009.

	Sales volume (thousand tonnes)			Average realised price (RMB/tonne)		
	Years ended 31			Years ended 31		
	December 2009	2008	Change (%)	December 2009	2008	Change (%)
Gasoline	31,343	28,725	9.1	5,591	5,586	0.1
Diesel	63,095	68,725	(8.2)	4,646	4,934	(5.8)
Chemical feedstock	26,983	23,604	14.3	3,333	5,983	(44.3)
Other refined petroleum products	44,075	41,895	5.2	3,208	4,391	(26.9)

In 2009, the segment's sales revenues of gasoline were RMB 175.2 billion, representing an increase of 9.2% over 2008.

In 2009, the sales revenues of diesel were RMB 293.1 billion, representing a decrease of 13.6% against 2008.

In 2009, the sales revenues of chemical feedstock were RMB 89.9 billion, representing a decrease of 36.3% against 2008.

In 2009, the sales revenues of refined petroleum products other than gasoline, diesel and chemical feedstock were RMB 141.4 billion, representing a decrease of 23.1% against 2008.

In 2009, this segment's operating expenses were RMB 680.5 billion, representing a decrease of 27.2% over the same period of 2008, which is mainly attributable to the decrease of crude oil processing cost caused by decrease of crude oil sales price.

In 2009, the average unit cost of crude oil processed was RMB 2,911 per tonne, representing a decrease of 41.9% against 2008. Refining throughput was 167.08 million tonnes (excluding the volume processed for third parties), representing an increase of 0.9% against 2008. And the total costs of crude oil processed were RMB 486.3 billion, representing a decrease of 41.4% against 2008.

In 2009, the refining margin was RMB 309 per tonne, an increase of RMB 722 per tonne over 2008, mainly due to reform on prices, taxation and fees of oil products carried out in China, and the optimization of production scheme by the company, as well as adjustment in product mix, sustained high load operations, which, as a result, reversed the huge losses made in the past.

In 2009, the unit refining cash operating cost (defined as operating expenses less the purchase cost of crude oil and refining feedstock, depreciation and amortization, taxes other than income tax and other operating expenses, and divided by the throughput of crude oil and refining feedstock) was RMB 136 per tonne, representing an increase of RMB 6.4 per tonne, i.e. 4.9% compared with 2008. This was mainly due to lower quality of crude oil and the higher cost in upgrading oil products quality.

In 2009, the segment's operating profit was RMB 23.1 billion, an increase of RMB 86.7 billion compared with 2008.

(3) Marketing and Distribution Segment

The business of marketing and distribution segment includes purchasing refined oil products from the refining segment and third parties, conducting wholesale and direct sales to domestic customers and retailing, distributing oil products through the segment's retail and distribution network, as well as providing related services.

In 2009, the operating revenues of this segment were RMB 783.1 billion, a decrease of 4.1% compared with 2008.

In 2009, the sales revenues of gasoline, diesel and kerosene were RMB 248.7 billion, RMB 421 billion and RMB 44.4 billion, representing an increase of 2.9% and a decrease of 7.3% and 20.3% respectively compared with 2008.

The following table sets forth the sales volumes, average realized prices, and respective rate of changes of the four major refined oil products categories in 2009 and 2008, including detailed information of retail, distribution and wholesale for gasoline and diesel.

	Sales volume (thousand tonnes)			Average realised price (RMB/tonne)		
	Years ended 31 December		Changes (%)	Years ended 31 December		Changes (%)
	2009	2008		2009	2008	
Gasoline	39,067	37,712	3.6	6,366	6,410	(0.7)
Of which: Retail	31,474	29,833	5.5	6,540	6,524	0.3
Distribution	2,377	2,614	(9.1)	5,554	6,013	(7.6)
Wholesale	5,216	5,265	(0.9)	5,687	5,964	(4.6)
Diesel	82,701	80,649	2.5	5,091	5,629	(9.6)
Of which: Retail	41,941	48,894	(14.2)	5,374	5,704	(5.8)
Distribution	28,143	22,313	26.1	4,844	5,561	(12.9)
Wholesale	12,617	9,442	33.6	4,697	5,402	(13.0)
Kerosene	11,330	9,186	23.3	3,919	6,065	(35.4)
Fuel oil	17,894	11,459	56.2	2,952	3,692	(20.1)

The operating expenses of the segment in 2009 was RMB 752.8 billion, representing a decrease of 3.3% over 2008, which was mainly attributable to the reduction of the purchasing costs of gasoline and diesel.

In 2009, the segment's unit cash selling expenses of refined oil products per tonne (defined as the operating expenses less the purchasing costs, taxes other than income tax, depreciation and amortization and divided by the sales volume) was RMB163.6/tonne, an increase of 6.8% over 2008, which was primarily attributable to the repair and maintenance expenses for gas station and increase of rental and storage charges.

In 2009, the operating profit of the segment was RMB 30.3 billion, a decrease of 21.3% over 2008, which was basically attributable to smaller price gap resulting from the domestic reform on pricing, taxation and fees of oil products as well as adequate supply and the severe competition in the refined oil products market.

(4) Chemical segment

The segment was involved in purchasing chemical feedstock from the refining segment and third parties, producing, marketing and distributing petrochemical and inorganic chemical products.

The operating revenue of the chemicals segment in 2009 were RMB 218.5 billion, decreased by 13.8% over 2008, which was mainly attributable to the dramatic drop in chemical product sales prices.

The sales amount of the six major categories of chemical products (namely basic organic chemicals, synthetic fiber monomers and polymers for synthetic fiber, synthetic fiber, synthetic rubber and chemical fertilizer) of the segment in 2009 was approximately RMB 201 billion, reduced by 12.7% compared with the same period of the previous year, accounting for 92.0% of the operating revenues of the segment.

The table indicates the sales volumes, average realized prices and rates of change of the six major chemical products of the segment in 2009 and 2008.

	Sales volume			Average realised price		
	(thousand tonne)(RMB/tonne)					
	Years ended 31			Years ended 31		
	December		Changes	December		Changes
2009	2008	(%)	2009	2008	(%)	
Basic organic chemicals	16,663	13,386	24.5	4,296	6,392	(32.8)
Synthetic resin	8,682	7,845	10.7	8,073	10,097	(20.0)
Monomer and polymers for Synthetic fiber	4,692	4,019	16.7	6,519	8,052	(19.0)
Synthetic fiber	1,418	1,353	4.8	9,140	10,488	(12.9)
Synthetic rubber	1,119	988	13.3	11,448	16,180	(29.3)
Chemical fertilizer	1,769	1,659	6.6	1,657	1,729	(4.2)

The operating expenses of the segment in 2009 was RMB 204.8 billion, representing a decrease of 23.1% over 2008, which was mainly attributable to the decrease of the unit cost of raw materials, resulting in the decrease of raw material costs by RMB 60.1 billion.

The segment proactively expanded the market in 2009, strengthened the integration of manufacturing, sales and research, improved customer services and strengthened strategic alliance with important clients and hence achieved operating profit of RMB 13.6 billion, an increase of RMB26.6 billion over 2008.

(5) Corporate and Others

The business activities of corporate and others mainly consist of import and export business of the Company's Subsidiaries, research and development activities of the Company, and administrative activities of its headquarter.

In 2009, the operating revenue generated from corporate and others was RMB 521.9 billion, representing a decrease of 27.2% over 2008, which was mainly attributable to the decrease in petroleum and petrochemical product prices, leading to the decrease of revenues from crude oil and refined oil trading business of the trading subsidiaries. The operating revenue from trading companies was RMB 520.5 billion.

In 2009, the operating expenses of this segment was RMB 524.1 billion, representing a decrease of 27.1% over 2008, which was mainly attributable to the decrease in its trading companies' purchasing costs. The operating expense from the trading companies was RMB 519.3 billion.

In 2009, the operating losses of this segment were RMB 2.2 billion, flat with that of 2008, of which the operating profit of specialized affiliates like the trading companies amounted to RMB 1.2 billion and the operating loss arising from research affiliates, headquarters and donation activities amounted to RMB 3.4 billion.

3 ASSETS, LIABILITIES, EQUITY AND CASH FLOW

The main fund resources of the Company were operating activities and short and long-term loans, and the fund was primarily used as operating expenditures, capital expenditures and repayment of short and long-term borrowings.

(1) Assets, liabilities and equity

		Unit: RMB millions		
		At 31 December 2009	At 31 December 2008	Amount of Changes
Total assets		877,842	779,172	98,670
	Current assets	201,280	165,398	35,882
	Non-current assets	676,562	613,774	62,788
Total liabilities		478,989	430,630	48,359
	Current liabilities	313,419	286,656	26,763
	Non-current liabilities	165,570	143,974	21,596
Equity attributable to equity shareholders of the Company		375,661	327,889	47,772
	Share capital	86,702	86,702	—
	Reserves	288,959	241,187	47,772
Minority interests		23,192	20,653	2,539
Total equity		398,853	348,542	50,311

At December 31, 2009, the total assets of the Company were RMB 877.8 billion, an increase of RMB 98.7 billion over that at the end of the previous year, of which:

1 The current assets were RMB 201.3 billion, an increase of RMB 35.9 billion over that at the end of the previous year, which was mainly attributable to the dramatic rise in prices of crude oil and other raw materials. The inventories such as crude oil, of the Company increased by RMB 45.6 billion and the accounts receivable of the Company increased by RMB 12.1 billion owing to the rise in prices of oil products and chemical products; in addition, other current assets decreased by RMB 24 billion.

1 The non-current assets were RMB 676.6 billion, an increase of RMB 62.8 billion compared with the end of the previous year, which was primarily attributable to the increase of RMB 53.2 billion in property, plant and equipment as a result of the implementation of the annual investment plan as well as RMB 5.1 billion lease prepayment for land use rights.

The total liabilities were RMB 479 billion, an increase of RMB 48.4 billion compared with the end of the previous year, of which:

1 The current liabilities were RMB 313.4 billion, an increase of RMB 26.8 billion compared with the end of the previous year, which was mostly attributable to the increase of amounts payable of RMB 41.3 billion and bills

payable of RMB 4.4 billion as a result of the rise in prices of raw materials, such as crude oil; and the increase of amounts payables such as accounts received in advance and income tax payable of RMB 17.5 billion; in addition, the Company increased direct financing and cut borrowings by RMB 36.4 billion to adjust debt structure.

1 The non-current liabilities were RMB 165.6 billion, an increase of RMB 21.6 billion compared with the end of the previous year, which was mainly attributable to the factors that the Company further adjusted the debt structure, enlarged direct financing and issued medium-term notes of RMB 30 billion.

The equity attributable to shareholders of the Company was RMB 375.7 billion, an increase of RMB 47.8 billion compared with the end of the previous year, which was a rise in reserves.

(2) Cash flow

The following table shows major items of consolidated cash flow statements of 2009 and 2008

Unit: RMB millions

Main items of cash flow	Years ended 31 December	
	2009	2008
Net cash flow from operating activities	152,075	66,517
Net cash flow from investing activities	(116,039)	(110,035)
Net cash flow from financing activities	(34,294)	42,820
Increase/ (decrease) of cash and equivalents	1,742	(698)

The net cash generated from the operating activities of the Company in 2009 was RMB 152.1 billion, an increase of RMB 85.6 billion compared with the end of the previous year, which was mainly attributable to the facts that: the profits before taxation were RMB 80.6 billion, an increase of RMB 58.5 billion year on year, and depreciation, depletion and amortization were RMB 50.5 billion, an increase of RMB 4.2 billion year on year; income tax paid reduced by RMB 17 billion than that of the same period of the previous year.

The net cash used in the investing activities of the Company in 2009 was RMB 116 billion, an increase of RMB 6 billion year on year, which was mainly attributable to the year-on-year increase of the capital expenditures because of the annual investment plan.

The net cash outflow from the financing activities of the Company in 2009 was RMB 34.3 billion, an increase of RMB 77.1 billion year on year. The reasons were: firstly, the Company took the opportunity of the favorable economic conditions, enhanced centralized management of capital, controlled cash occupation in form of current assets and the scale of debt, reduced fund deposition and accelerated turnover of fund to improve the efficiency via using funds saved to repay the loans timely.

(3) Contingent liabilities

Refer to relevant contents in this report “Significant Events” regarding material guarantees and their executions.

(4) Capital expenditures

Refer to the description on capital expenditures, which is provided in “Business Review and Prospects”.

(5) Research & development and environmental expenses

Research & development expenses refer to the expenses recognized as expenses during the period. The research & development expenses of the Company in 2009 were RMB 3.816 billion.

The environmental expenses refer to the normal pollutant discharge fees paid by the Company, exclusive of capitalized cost on pollutant processing facilities. In 2009, the company’s environmental expenses were RMB 3.196 billion.

(6) Measurement of fair values of financial derivatives and related systems

The Company established and completed a decision-making mechanism, business operation process and internal control regarding financial derivatives accounting and information disclosure.

4 ANALYSIS ON ACCOUNTING STATEMENTS PREPARED UNDER ASBE

The major difference between the Company's financial statements prepared under ASBE and IFRS are set out in Section C of the financial statement of the Company from page 193 of this report.

(1) Operating income and operating profit of the Company by segments under ASBE are as follows:

	Years ended 31 December	
	2009	2008
	RMB millions	RMB millions
Operating income		
Exploration and production segment	123,835	196,501
Refining segment	703,571	829,686
Marketing and Distribution segment	783,091	806,923

Edgar Filing: CHINA PETROLEUM & CHEMICAL CORP - Form 6-K

	Chemicals segment	218,457	253,456
	Others	521,869	716,484
	Elimination of inter-segment sales	(1,005,771)	(1,358,759)
	Consolidated operating income	1,345,052	1,444,291
Operating profit/(loss)			
	Exploration and production segment	19,893	66,839
	Refining segment	23,046	(104,680)
	Marketing and Distribution segment	30,280	28,343
	Chemical segment	13,098	(13,200)
	Others	(2,323)	(2,581)
	Financial expenses, investment income and loss from changes in fare value	(3,792)	(3,487)
	Consolidated operating profit/(loss)	80,202	(28,766)
Net profit attributable to equity shareholders of the Company		61,290	28,445

Operating profit: In 2009 the Company's operating profit was RMB 80.2 billion, representing an increase of RMB109 billion year on year, which was mainly attributable to the facts that the Company took actions to expand the market, improve marketing and services, optimize raw material structure and take full advantages of scale and integration, which resulted in better operating performance on the basis of the domestic reform on pricing, taxation and fees of oil products and the gradual increase of the demand for chemical products.

Net profit: In 2009, the Company realized a net profit of RMB 61.3 billion, representing an increase of RMB 32.8 billion or 115.5% over 2008.

(2) Financial data prepared under ASBE:

	On December 31, 2009 RMB millions	On December 31, 2008 RMB millions	Change of amount
Total assets	866,475	763,297	103,178
Long-term liabilities	164,528	143,062	21,466
Shareholder's equity	400,585	350,166	50,419

Analysis of changes:

Total assets: The total assets of the Company at the end of 2009 was RMB 866.5 billion, an increase of RMB 103.2 billion over that at the end of the previous year, which was mostly attributable to the increment of noncurrent assets investment such as fixed assets and long-term equity investment of RMB 62.8 billion as a result of the implementation of the annual investment plan; because commodity prices such as the price of crude oil increased significantly compared with the end of the previous year, current assets, such as the inventories of the Company increased by RMB 40.4 billion.

Long-term liabilities: The long-term liabilities of the Company at the end of 2009 was RMB 164.5 billion, an increase of RMB 21.5 billion over that at the end of 2008, which was mainly attributable to further adjustment of liability structure, strengthening of direct financing and issuance of medium-term notes of RMB 30 billion.

Shareholder's equity: The equity of the Company at the end of 2009 was RMB400.6 billion, an increase of RMB 50.4 billion over that at the end of the previous year, which was primarily attributable to the increase of its profits.

(3) The results of the principal operations by segment

Segment	Income from principal operations (RMB millions)	Cost of principal operation (RMB millions)	Gross profit margin (%)	Increase/decrease	Increase/decrease	Increase/decrease of gross profit margin with the preceding year (%)
				of income from principal operations compared with the preceding year (%)	of cost of principal operations compared with the preceding year (%)	

Edgar Filing: CHINA PETROLEUM & CHEMICAL CORP - Form 6-K

Exploration and production	123,835	74,470	34.1	(37.0)	5.1	(11.6)
Refining	703,571	540,707	5.3	(15.2)	(39.9)	15.7
Chemicals	218,457	186,565	14.1	(13.8)	(25.6)	13.1
Marketing and distribution	783,091	718,413	8.1	(3.0)	(4.1)	1.1
Others	521,869	518,828	0.6	(27.2)	(27.2)	0.0
Elimination of inter-segment sales	(1,005,771)	(1,003,168)	N/A	N/A	N/A	N/A
Total	1,345,052	1,035,815	13.1	(6.9)	(21.6)	8.5

Note: Gross profit margin = (Income from principal operations-Cost of principal operations ,tax and surcharges)/Income from principal operations

SIGNIFICANT EVENTS

1 MAJOR PROJECTS

- (1) **Sichuan-to-East China Gas Project**
This is a major project under China's 11th Five-Year Plan. The project consists of two parts, namely, exploration and development of Puguang Gas Field as well as gas purification project; natural gas long-distance transportation pipeline project from Puguang Gas Field to Shanghai. The core section was completed and put into operation at the end of 2009.
- (2) **Fujian Refinery & Ethylene Project**
Fujian refinery & ethylene project mainly includes 12 million tpa refinery expansion, 800 thousand tpa ethylene units, and downstream auxiliary utility units. The total investment is expected to be RMB 31.6 billion. With construction starting in July 2005, it was put into commercial operation in November 2009.
- (3) **Tianjin Million Tonnes Ethylene Project**
The project mainly includes 1 million tpa ethylene unit, 12.5 million tpa refinery expansion and downstream auxiliary utility units. The total project investment is about RMB 26.8 billion. With construction starting in June 2006, it was fully completed and put into operation on 16 January 2010.
- (4) **Zhenhai Million Tonnes Ethylene Project**
This project mainly consists of 1 million tpa ethylene unit, downstream auxiliary utility units. The total project investment is about RMB 21.9 billion. Commenced in November 2006, the construction was mechanically completed on 28 December 2009.

2 ISSURANCE OF CORPORATE BONDS AND INTEREST PAYMENTS

On 24 February 2004, Sinopec Corp. issued ten-year-term corporate bonds of RMB 3.5 billion in mainland China. The credit rating of bonds was AAA. The fixed annual interest rate is 4.61%. On 28 September 2004, the bonds were listed on Shanghai Stock Exchange. For details, please see the relevant announcements in China Securities Journal, Shanghai Securities News and Securities Times of mainland China as well as Economy Daily and South China Morning Post of Hong Kong on 24 February 2004 and 28 September 2004. Till 31 December 2009, the balance of principals for the bonds was RMB 3.5 billion. On 24 February 2010, Sinopec Corp. paid in full the interest for the sixth year of interest accrued.

On 20 February 2008, Sinopec Corp. issued bonds with warrants of RMB 30 billion in domestic capital market. The term of bonds was six years and the fixed annual interest rate was 0.8%. On 4 March 2008, the bonds were listed on Shanghai Stock Exchange. Total amount of guarantee for controlled subsidiaries outstanding at the end of the reporting period (B)								None	
Total amount of guarantees of the Company (including those provided for controlled subsidiaries)									
Total amount of guarantees Note 3 (A+B)								10,157	
The proportion of the total amount of guarantees to Sinopec Corp.'s net assets								2.7%	
Guarantees provided for shareholders, de facto controller and related parties (C)								—	
Amount of debt guarantees provided directly or indirectly to the companies with liabilities to assets ratio of over 70% (D)								61	
The amount of guarantees in excess of 50% of the net assets (E)								—	
Total amount of the above three guarantee items Note 4 (C+D+E)								61	
Statement of guarantee undue that might be involved in any joint and several liabilities								None	
Statement of guarantee status								None	

Note As defined in the Stock Listing Rules of Shanghai Stock Exchange.

1:

Note The amount of guarantees provided during the reporting period and the amount of guarantees outstanding at the end of the reporting period include the guarantees provided by the controlled subsidiaries to external parties. The amount of the guarantees provided by these subsidiaries is derived by multiplying the guarantees provided by Sinopec Corp.'s subsidiaries by the percentage of shares held by Sinopec Corp. in such

subsidiaries.

Note Total amount of guarantees is the aggregate of the above “total amount of guarantees outstanding at the end of 3: the reporting period (excluding the guarantees provided for controlled subsidiaries)” and “total amount of guarantees for controlled subsidiaries outstanding at the end of the reporting period”.

Note “Total amount of the above three guarantee items” is the aggregate of “guarantees provided for shareholders, 4: effective controllers and connected parties”, “amount of debt guarantees provided directly or indirectly to the companies with liabilities to assets ratio of over 70%” and “the amount of guarantees in excess of 50% of the net assets”.

Material Guarantees under Performance

The twenty-second meeting of the First Session of the Board of Directors of Sinopec Corp. approved the proposal regarding Sinopec Corp.’s provision of guarantee to Yueyang Sinopec Shell Coal Gasification Co., Ltd., in the amount of RMB 377 million.

The eighth meeting of the Third Session of the Board of Directors of Sinopec Corp. approved the proposal to provide guarantee to Fujian United Petrochemical Company Limited for its Fujian Refining and Ethylene Joint Venture Project in the amount of RMB 9.166 billion.

Specific statement and independent opinions presented by independent directors regarding external guarantees provided by Sinopec Corp. accumulated up to and during 2009:

We, as independent directors of Sinopec Corp., hereby make the following statement after conducting a thorough checking of external guarantees provided by Sinopec Corp. accumulated up to and during 2009 in accordance with requirements of the domestic regulatory authorities:

Sinopec Corp. itself did not incur any additional external guarantee during the reporting period, the external guarantee amount decreased by RMB 184 million compared to last year. External guarantees provided before 2009 have been disclosed in detail in the annual report of 2008. The balance of external guarantees provided by Sinopec Corp. accumulated up to the year of 2009 was RMB 10.157 billion, accounting for 2.7% of net assets approximately.

We hereby present the following opinions:

Sinopec Corp. shall continue to strengthen management and proactively monitor guarantee risk. Sinopec Corp. shall continue to follow the approval and disclosure procedures strictly for new external guarantees incurred thereafter in accordance with relevant provisions for guarantees.

7 GENERAL MEETINGS OF SHAREHOLDERS

Not applicable

16 THE DETAILED IMPLEMENTATION OF THE EQUITY INCENTIVE PROGRAM DURING THE REPORTING PERIOD

Sinopec Corp. didn’t implement any equity incentive program during the reporting period.

CONNECTED TRANSACTIONS

1 AGREEMENTS CONCERNING CONTINUING CONNECTED TRANSACTIONS BETWEEN THE COMPANY AND CHINA PETROCHEMICAL CORPORATION

Prior to overseas listing, in order to ensure the smooth continuation of production and business transacted between the Company and China Petrochemical Corporation, the two parties entered into a number of agreements on continuing connected transactions, details of which are as follows:

- (1) Agreement for the mutual supply of ancillary services for products, production and construction services (“Mutual Supply Agreement”).
- (2) China Petrochemical Corporation provides trademarks, patents and computer softwares to the Company for use free of charge.
- (3) China Petrochemical Corporation provides cultural and educational, hygienic and community services to the Company.
- (4) China Petrochemical Corporation provides leasing service of lands and certain properties to the Company.
- (5) China Petrochemical Corporation provides comprehensive insurance to the Company.
- (6) China Petrochemical Corporation provides shareholders’ loans to the Company.
- (7) The Company provides franchise licences for service stations to China Petrochemical Corporation.

On 31 March 2006, Sinopec Corp. and China Petrochemical Corporation entered into Supplementary Agreement of Connected Transactions. The term– of Mutual Supply Agreement and Cultural, Hygienic and Community Services Agreement was amended to commence on 1 January 2007 and end on 31 December 2009.

On 21 August 2009, Sinopec Corp. and China Petrochemical Corporation entered into new Supplementary Agreement of Connected Transactions. The terms of Mutual Supply Agreement and Cultural, Hygienic and Community Services Agreement were amended to commence on 1 January 2010 and end on 31 December 2012. The term of original Intellectual Property License Agreement was extended to 31 December 2019.

The resolution in relation to the continuing connected transaction for the three years from 2010 to 2012 was approved at the First Extraordinary General Meeting for 2009 held on 15 October 2009. For details of the continuing connected transactions, please refer to relevant announcements published on 24 August 2009 in China Securities Journal, Shanghai Securities News, Securities Times and the websites of Shanghai Stock Exchange (<http://www.sse.com.cn>) and Hong Kong Stock Exchange (<http://www.hkex.com.hk>).

2 DISCLOSURE AND APPROVAL OF CONNECTED TRANSACTIONS BETWEEN THE COMPANY AND CHINA PETROCHEMICAL CORPORATION COMPLY WITH THE LISTING RULES OF THE HONG KONG AND SHANGHAI STOCK EXCHANGES

Pursuant to the Hong Kong and Shanghai Stock Exchanges Listing Rules, the above continuing connected transactions are generally subject to full disclosure of their nature and the value of the transactions, with prior approvals from independent directors and/or independent shareholders. The Hong Kong and Shanghai Stock Exchanges exempted Sinopec Corp. from fully complying with the listing rules regarding the continuing connected transactions above and conditionally exempted Sinopec Corp. from complying with the obligations of continuous disclosure.

There is no substantial change in the above agreements on continuing connected transactions during the reporting period. The accumulated amounts of the connected transactions for the year 2009 of Sinopec Corp. are in compliance with the relevant requirements of the Listing Rules of the Hong Kong and Shanghai Stock Exchanges. For detailed implementation of connected transaction agreements, please refer to Item 3 below.

3 CONNECTED TRANSACTIONS INCURRED ENTERED INTO BY THE COMPANY DURING THE YEAR

The aggregate amount of connected transactions actually incurred of the Company during the year was RMB 297.712 billion, of which, expenses amounted to RMB 134.958 billion, and revenues amounted to RMB 162.754 billion (including RMB 162.671 billion of sales of goods and services, RMB 38 million of interest income, RMB 45 million of agency commission receivable). In 2009, the products and services provided by China Petrochemical Corporation and its subsidiaries (procurement, storage, exploration and production services and production-related services) to the Company were RMB 96.179 billion, representing 7.63% of the Company's operating expenses for the year 2009. The auxiliary and community services provided by China Petrochemical Corporation to the Company were RMB 3.329 billion, representing 0.26% of the operating expenses of the Company for 2009. In 2009, the product sales from the Company to China Petrochemical Corporation amounted to RMB 49.576 billion, representing 3.69% of the Company's operating revenue. With regard to the Leasing Agreement for properties the amount of housing rental paid by the Company for the year 2009 was RMB 419 million.

Sinopec Corp. held the second meeting of Fourth Session of the Board of Directors on 21 August 2009, which approved the adjustment of the annual cap for providing community services by China Petrochemical Corporation to the Company to RMB 3.5 billion and the annual cap to the SPI Fund to Sinopec Corp. to RMB 1.8 billion. In 2009, the SPI Fund payable by the Company was RMB 1,612 billion, and the payable rental of land amounted to RMB 4.225 billion.

The amount of each category of continuing connected transactions between the Company and China Petrochemical Corporation did not exceed its respective cap approved at the general meeting and Board of Directors.

Connected sales and purchases table: Unit: RMB millions

Connected party	Sales of goods and provision of services to connected party		Purchase of goods and services from connected party	
	Transaction amount	Percentage of the total amount of the type of transaction	Transaction amount	Percentage of the total amount of the type of transaction
China Petrochemical Corporation	49,621	3.69%	104,366	8.28%
Other connected parties	113,095	8.41%	29,547	2.34%
Total	162,716	12.10%	133,913	10.62%

Notes: Principle of pricing for connected transactions: (1) Government-prescribed prices and government-guided prices are adopted for products or projects if such prices are available; (2) Where there is no government-prescribed price or government-guided price for products or projects, the market price (inclusive of bidding price) will apply; (3) Where none of the above is applicable, the price will be decided based on the cost incurred plus a reasonable profit of not more than 6% of the price.

Please refer to Note 37 to the financial statements prepared under the IFRS in this annual report for details of the connected transactions actually incurred during this year.

The above mentioned connected transactions in 2009 have been approved at the 5th meeting of the Four Session of the Board of Directors of Sinopec Corp.

The auditors of Sinopec Corp. have confirmed to the Board of Directors in writing that:

- (1) the transactions have been approved by the Board of Directors;
- (2) the considerations for the transactions have been consistent with the pricing policies as stated in the relevant agreements;
- (3) the terms of the transactions have been conducted in accordance with the terms of the respective agreements and documents governing the respective transactions; and
- (4) the relevant actual amounts have not exceeded the relevant proposed caps proposed in the announcements.

After reviewing the above connected transactions, the independent directors of Sinopec Corp. have confirmed that:

- (1) The transactions have been entered into by Sinopec Corp. in its ordinary course of business;
- (2) The transactions have been entered into based on one of the following terms:
 - (a) on normal commercial terms;
 - (b)

on terms not less favorable than those available from/to independent third parties; or

(c) on terms that are fair and reasonable to the shareholders of Sinopec Corp., where there is no available comparison to determine whether item (a) or (b) is applicable; and

(3) The total value of each category of transactions did not exceed its respective cap.

4 OTHER SIGNIFICANT CONNECTED TRANSACTIONS INCURRED DURING THIS YEAR

4.1 The Acquisition of the assets and equity interests of the refined oil product pipelines of China Petrochemical Corporation and its subsidiaries, Qingdao Petrochemical Corporation, and Shijiazhuang Chemical Fiber Corporation and disposal of chemical fertilizer equipments assets of Jinling Branch Company of China Petrochemical Corporation

CORPORATE GOVERNANCE

1 IMPROVEMENT ON CORPORATE GOVERNANCE DURING THE REPORTING PERIOD

During the reporting period, Sinopec Corp. committed itself to standard operation and further enhancement of corporate governance.

The Company improved corporate governance structure. On 22 May 2009, Sinopec Corp. elected the members of the Fourth Session of Board of Directors and the members of the Fourth Session of Board of Supervisors on 2008 Annual General Meeting of the Shareholders. Mr. Su Shulin was elected as the Chairman of the new Board of Directors, and Mr. Wang Tianpu and Mr. Zhang Yaocang were elected as Vice Chairman. The Fourth Session of Board of Directors also appointed senior management and the Strategic Committee, the Audit Committee and the Remuneration & Performance Evaluation Committee of the Fourth Session of Board. The new Board of Supervisors elected Mr. Wang Zuoran as the Chairman and Mr. Zhang Youcai as the Vice Chairman of the Board of Supervisors. The foundation of the scientific management and decision-making of the company was established by intensifying the occupational training and the sense of responsibility of all directors, supervisors and senior management.

Reinforce the building of basic system.

In accordance with the Company's actual conditions as well as the domestic and overseas laws and regulations, Sinopec Corp. revised the "Articles of Association", "Rules and Procedures for Shareholders' Meetings", "Rules and Procedures for Board of Directors' Meetings," and "Rules and Procedures for Board of Supervisors' Meetings" as well as "Rules concerning the Company's Shares held by Directors, Supervisors and Senior Management and the changes of Shares". "Working Rules on Audit Committee to Board of Directors" of the Company defined the Audit Committee's working procedure for annual report formulation and disclosure in detail. The Company's "Information Disclosure Rules" provided for the accountability for information disclosure error, information confidentiality and the obligation of confidentiality of insider information users. Pursuant to "Basic Norms of Internal Control of Enterprise" and the Company's actual situations, the Company further revised the "Internal Control Manual" which was examined and approved on the 4th Meeting of Fourth Session of Board of Directors.

The company further improved information disclosure and the relationship with investors, strengthened communication with the investors and timely reflected the investors' opinions to the management. The Company's transparency is continuously enhanced and reviewed favorably by the capital market.

The Company has fully completed the rectifications to various special corporate governance activities required by the China Securities Regulatory Commission (CSRC). During the reporting period, Sinopec Corp., the Board of Directors and current directors, supervisors, senior management, shareholders and de facto controller of Sinopec Corp. were not inspected by CSRC, or punished or criticized through circular by CSRC, Hong Kong Securities and Futures Commission and Securities and Exchange Commission of the United States, or publicly condemned by Shanghai Stock Exchange, Hong Kong Stock Exchange, New York Stock Exchange and London Stock Exchange.

2 EQUITY INTERESTS OF DIRECTORS, SUPERVISORS AND OTHER SENIOR MANAGEMENT

During the year ended 31 December 2009, the directors, supervisors and other senior management of Sinopec Corp. have not held any shares of Sinopec Corp.

During the reporting period, the directors, supervisors and other senior management of Sinopec Corp. and their associates did not hold shares, bonds or any interest or short position in the shares (including any interest or short

position in shares that is regarded or treated as being held in accordance with the “Securities and Futures Ordinance”) of Sinopec Corp. or any affiliated corporation, (Please refer to definitions of Article 15 of Securities and Futures Ordinance) which, according to Article 7 and 8 of Part 15 of “Securities and Futures Ordinance”, shall be informed to Sinopec Corp. and Hong Kong Stock Exchange, or pursuant to Article 352 of “Securities and Futures Ordinance”, shall be registered on the indicated register as required by the ordinance, or subject to the “Standard Code for Securities Transactions by Directors of Listed Companies” contained in the Listing Rules, shall be informed to Sinopec Corp. or Hong Kong Stock Exchange.

3 CONFIRMATION OF INDEPENDENCE OF THE INDEPENDENT DIRECTORS AND OVERVIEW OF THEIR PERFORMANCE OF DUTIES

As required by the Hong Kong Stock Exchange, Sinopec Corp. makes the following confirmations concerning the independence of its independent directors: Sinopec Corp. has received annual confirmation letters from all the independent non-executive directors acknowledging full compliance with the relevant requirements in respect of their independence pursuant to Rule 3.13 of the Listing Rules. Sinopec Corp. takes the view that all independent non-executive directors are independent.

During the reporting period, the independent directors of Sinopec Corp. were committed to carrying out the working rules of independent directors and fulfilling their duties and fiduciary obligations as specified in the relevant laws, regulations and the Articles of Association and closely monitored the business operation and development of the Company. They inspected the subsidiaries of the Company on-site, reviewed the relevant documents with due care, actively attended meetings of the Board of Directors and the professional committees to the Board of Directors (Please refer to the Report of the Board of Directors in this annual report for detailed information on attendance of meeting), rendered independent opinions on connected transactions, guarantees, appointment and removal of senior management and provided many constructive comments and suggestions relating to the Company’s corporate governance, reform and development, production and operation etc. During the performance of their duties of independent directors, they objectively and independently protected the legal interests of shareholders, in particular, the interests of the minority shareholders.

4 SEPARATION BETWEEN SINOPEC CORP. AND ITS CONTROLLING SHAREHOLDER

The Company is independent of controlling shareholders in terms of, among other things, business, assets and finances. The Company has an independent and complete business and independent capacity of operation.

5 IMPROVEMENT AND IMPLEMENTATION OF INTERNAL CONTROL SYSTEM

For details of this issue, please refer to the Company’s Management Report on Internal Control.

6 SENIOR MANAGEMENT EVALUATION AND INCENTIVE SCHEMES

Sinopec Corp. has established and is continuously improving the fairness and transparency of its performance evaluation standard and incentive and constraint schemes for the directors, supervisors and other senior management. Sinopec Corp. implements various incentive schemes such as “Measures of Sinopec Corp. for the Implementation of Remuneration for Senior Management” and “Interim Measures of Sinopec Corp. for the Management of Annual Performance Evaluation” .

7 CORPORATE GOVERNANCE REPORT (IN ACCORDANCE WITH THE LISTING RULES OF HONG KONG STOCK EXCHANGE)

(1) Compliance with “Code on Corporate Governance Practices”

Sinopec Corp. commits itself to standard operation so as to improve its corporate governance and to achieve sustainable development. Sinopec Corp. has fully complied with the Code on Corporate Governance Practices set out in Appendix 14 of the Listing Rules during the year ended 31 December 2009.

A Board of Directors

A.1 Board of Directors

- a. Board meetings shall be held at least once a quarter. The Board will generally communicate on meeting time and subject matters 14 days in advance. The documents and materials for the meeting will generally be dispatched 10 days in advance to each and every director. In 2009, Sinopec Corp. held 5 Board meetings. For information about attendance, please refer to the Report of the Board of Directors of this annual report.
- b. Each Board member may submit proposals to be included in the agenda for Board meetings, and each and every director is entitled to request other related information.
- c. The Secretary to the Board shall assist the directors in handling the routine tasks of the Board, continuously provide the directors with and keep them informed of any regulation, policy and other requirements as promulgated by domestic and overseas supervisory bodies in relation to corporate governance and ensure that the directors observe domestic and overseas laws and regulations as well as the Articles of Association etc. when performing their duties and responsibilities.

A.2 Chairman and Executive President

Mr. Su Shulin serves as the Chairman of the Board and Mr. Wang Tianpu serves as the President. The Company’s Board Chairman is elected by a simple majority vote, while the President is nominated and appointed by the Board. The duties and responsibilities of the Chairman and the President are separate and the scope of their respective duties and responsibilities are set forth in the Articles of Association.

A.3 Board Composition

- a. The Company’s Board of Directors were re-elected with the approval of 2008 annual general meeting of shareholders. And the new Board of Directors consists of 15 members with extensive professional and management experiences (Please

refer to the Section of Directors, Supervisors, Other Senior Management and Employees in this report for detailed information). Among the 15 members, 5 are executive directors and 10 are non-executive directors, among which, 5 are independent non-executive directors covering one third of the total number. The number of non-executive directors is more than half of the Board.

- b. Sinopec Corp. has received from each independent non-executive director a letter of confirmation for 2009 regarding its compliance with relevant independence requirements set out in rule 3.13 of the Listing Rules. Sinopec Corp. considers that each of the independent non-executive directors is independent.

A.4 Appointment, Re-election and Removal

- a. Term of each session of all the directors (including non-executive directors) is 3 years, and the consecutive terms of office of an independent non-executive director shall not exceed 6 years.
- b. All directors have been elected at the general meeting of shareholders. the Board is not authorised to appoint temporary directors.
- c. For each newly appointed director, Sinopec Corp. arranged for professional consultants, including PRC and Hong Kong lawyers, to conduct relevant training.

A.5 Responsibility of Directors

- a. All the non-executive directors have equal duties and authorities to those of the executive directors. In addition, all the non-executive directors, especially the independent non-executive directors are entitled to certain specific authorities. The Articles of Association and the Rules and Procedures for Board of Directors' Meetings clearly provide the authorities of directors and non-executive directors including independent non-executive directors, which are published on the website of Sinopec Corp. at <http://www.sinopec.com>.
- b. Each of the directors can devote enough time and efforts to the affairs of Sinopec Corp.
- c. Each of the directors confirmed that he has complied with the Model Code during the reporting period. In addition, the Company formulated the Model Code of Securities Transactions by Company Employees and the Rules governing Transactions by Company Directors, Supervisors and Senior Management so as to regulate the activities of Company

personnel in purchase and sale of the securities of the Company.

A.6 Supply of and Access to Information

- a. The meeting agenda as well as other reference documents of the Board and each professional committee will be distributed in advance prior to the meetings, which enables each member to have sufficient time to review them and to discuss about them comprehensively at meetings. Each and every director may procure all related information in a comprehensive and timely manner, and may seek advices from professional consultants if necessary.

- b. The Secretary to the Board is responsible for organising preparation of materials for Board meetings, including preparation of explanations for each proposed agenda to enable thorough understanding by each director. The President shall provide the directors with necessary information and materials. The director may request the President, or request, via the President, relevant departments to provide necessary information and explanation of the Company.

B Remuneration of directors and senior management

- a. A Remuneration and Performance Evaluation Committee has been set up and the relevant rules has been formulated. Its members include director Ye Qing, director Li Deshui, director Chen Xiaojin and director Li Chunguang with Ye Qing as the head. Its main duties and authorities include proposing to the Board remuneration plans for directors, supervisors and other senior management.
- b. The Remuneration and Performance Evaluation Committee has always consulted the Chairman and the President regarding proposed remuneration for other executive directors.
- c. Committee members may obtain independent professional advices when performing their duties and obligations. Costs arising from or in connection with such consultation are borne by Sinopec Corp. Meanwhile, the committee appoints consultants to provide suggestions to the committee. The working expenses of the committee are included in the budget of the Company. In addition, according to the policy of the Company, the senior management and relevant departments of the Company shall actively cooperate with the work of the Remuneration and Performance Evaluation Committee.

C Accountability and Audit

C.1 Financial Reporting

- a. Directors are responsible for supervising the accounts preparation for each fiscal period, to ensure such amounts truly and fairly reflect the condition of business, performance and cash flow of the Group during such period. The Board approved the Financial Report for the Year 2009 and warranted that there were no material omissions, or misrepresentations or misleading statements in the annual report, and jointly and severally accepted responsibility for the authenticity, accuracy and completeness of the content.
- b. Sinopec Corp. has adopted an internal control mechanism to ensure that the management and its relevant departments have provided sufficient financial data and related explanation and materials to the Board and its Audit Committee.
- c. The external auditors of Sinopec Corp. made a statement about their reporting responsibilities in the auditor's report contained in the financial statements.

C.2 Internal control

- a.

In 2003, according to the relevant regulatory requirements on internal control in the place of listing, Sinopec Corp. adopted the internal control framework structure recommended in the internationally prevailing COSO (Committee of Sponsoring Organizations) Report, and based upon the Articles of Association and all management systems currently in effect, as well as in accordance with relevant domestic and overseas supervisory regulations, Sinopec Corp. formulated the Internal Control Manual, in which the process control was employed pursuant to business category as well as the jurisdiction guide and its implementation rules were formulated.

- b. The Board of Directors reviews the updated Internal Control Manual every year; since 2006, the Board reviewed the annual report together with Management's Report on internal Control.
- c. The management of Sinopec Corp. implemented the responsibilities of internal control, paid attention to trainings of employees, promoted the integration of internal control into operation and management, and cultivated the culture of risk control. Sinopec Corp. conducted a comprehensive internal control review every year, and the implementation of internal control was integrated into its performance evaluation system so as to ensure that the long-term effect mechanism of internal control can be established progressively. The Company has sufficient resources in accounting and financial reporting. Its employees in this regard have appropriate qualification and experience. The Company also has enough budget for the trainings of relevant employees.

For detailed information of the internal control system during the reporting period, please refer to the Management Report on Internal Control.

- d. Sinopec Corp. has established its internal audit department and has been equipped with adequate professional personnel, thus the Company has relatively sound internal auditing functions.

C.3 Audit Committee

- a. Members of the Audit Committee include director Liu Zhongli, director Li Deshui and director Xie Zhongyu with director Liu Zhongli as the head. As verified, none of the members had served as a partner or former partner to our current auditor.
- b. Sinopec Corp. has formulated and promulgated the working rules of the Audit Committee. The written terms of reference are available for inspection at the Company.
- c. At every meeting of the Audit Committee, reviewing opinions shall be prepared and submitted to all the members for any suggestion. The reviewing opinions shall be amended according to the suggestions of the members and shall be submitted to all the members for signature. During the reporting period, the Board and Audit Committee did not have any different opinion.
- d. Committee members may obtain independent professional advices when performing their duties and obligations. Costs arising from or in connection with such consultation are borne by Sinopec Corp. The committee appoints consultants to provide suggestions to the committee. The working expenses of the committee are included in the budget of the Company. Meanwhile, according to the policy of the Company, the senior management and relevant departments of the company shall actively cooperate with the work of the Audit Committee.
- e. The Audit Committee has considered the adequacy of the resources in accounting and financial reporting and the experience of the employees as well as the sufficiency of the training courses provided to employees and the relevant budget. The Audit Committee holds the view that the management of Sinopec Corp. has performed its duties and established an effective internal control system during the reporting period.

D Delegation by the Board

- a. The Board, the management and each of the Board committees have clear terms of reference. The Articles of Association and the Rules and Procedures for the General Meetings of Shareholders and the Rules and Procedures for the Meetings of Board of Directors set forth the clear scope of duties, authorities and delegation of power of the Board and the management, which are posted on the website of Sinopec Corp. at <http://www.sinopec.com>.
- b. The Board committees have clear written terms of reference. The working rules of the Board committees require such committees to report to the Board on their decisions or recommendations.

E Communication with shareholders

- a. During the reporting period, a separate resolution has always been proposed for each substantially separate issue at the general meetings. All resolutions were subject to voting to ensure the interests of all shareholders. A meeting circular is given to each shareholder 45 days in advance prior to the general meeting of shareholders (exclusive of the day of the meeting).

- b. Sinopec Corp. arranged for a specific department and personnel to take charge of investors relations, and enhanced communications with investors by way of holding meetings with institutional investors, inviting investors to conduct site visit, setting up investor hotline etc. Sinopec Corp. also offers regulatory provisions of securities and investor recommendations to directors in a timely manner. The shareholders who are entitled to attend the general meeting, their rights, agenda of general meeting and voting procedures etc. were expressly set forth in the circular to shareholders of Sinopec Corp.
- c. The Chairman of the board shall attend and host the annual general meeting as the chairman of such meeting, and arrange the members of Board, senior management to attend the general meeting of shareholders in order to answer the questions of the shareholders.

(2) Nomination of directors

The Board of Sinopec Corp. has not established a Nomination Committee, but the nomination of directors has been expressly stated in detail in the Articles of Association and the Rules and Procedures for the General Meeting of Shareholders respectively. The nomination of director may be proposed by shareholders individually or collectively holding over 3% (1% for nomination of independent director candidate) of the total voting shares of Sinopec Corp., the Board of Directors or the Board of Supervisors and submitted to the general meeting of shareholders for approval by way of a proposal.

(3) Auditors

At the Annual General Meeting of Sinopec Corp. for the year 2008 held on 22 May 2009, KPMG Huazhen and KPMG were re-appointed as the domestic and overseas auditors of Sinopec Corp. for the year 2009, respectively, and the Board of Directors was authorized to determine their remunerations. As approved at the 5th Meeting of the Fourth Session of the Board of Directors of Sinopec Corp., the audit fee for 2009 was HK\$66 million. The financial statements for the year 2009 have been audited by KPMG Huazhen and KPMG. Zhang Jingjing and Zhang Yansheng are Certified Public Accountants in the PRC of KPMG Huazhen.

During the reporting period, both KPMG Huazhen and KPMG did not provide any non-audit service to Sinopec Corp.

KPMG Huazhen and KPMG have provided audit services to Sinopec Corp. for 9.5 years since the second half of 2000, and the first audit engagement letter was entered into in March 2001.

(4) Other information about Sinopec Corp.'s corporate governance

Except for their working relationships with Sinopec Corp., none of the directors, supervisors or other senior management has any financial, business or family relationships or any relationships in

other material aspects with each other. For information regarding changes in share capital and shareholdings of principal shareholders, please refer to page 7 to page 9; for information regarding general meetings of shareholders, please refer to page 36; for information regarding meetings of the Board of Directors and each professional committee, please refer to page 52 to page 53; for information regarding equity interests of directors, supervisors and other senior management, please refer to page 43; for information regarding resume and annual remuneration of directors, supervisors and other senior management, please refer to page 45; for information regarding auditors please refer to page 47.

For details, please refer to the content on the website of Sinopec Corp. at <http://www.sinopec.com/big5/ir/index.shtml>.

MANAGEMENT'S REPORT ON INTERNAL CONTROL

In 2009, with the aim of comprehensive risk management and based on the basic codes of company internal control, China Petroleum & Chemical Corporation (the "Company") revised the Internal Control Manual ("the Manual") and the Detailed Rules for the Implementation of the Manual (the Detailed Rules), and deepened and optimized control contents with the help of informization methods such as ERP system. The Company's internal control system, an integration of the Manual, the Detailed Rules and regulating systems related to internal control, was further improved.

The Company's Board of Directors and the management are responsible for establishing a sound internal control system and effectively carrying it out. The aim of internal control is to reasonably guarantee the compliance of its operation and management with regulations and laws, assets security, and authenticity and integrity of financial report and related information, improve the efficiency and effect of operating activities and promote the realization of development strategy of the Company. The Company's internal control involves such five elements as internal environment, risk assessment, control activities, information and communication and internal supervision.

Due to its inherent limitations, the internal control can only provide reasonable assurance to achieve the above objectives. In addition, the effectiveness of internal control may vary with changes that occur in internal and external environment and business circumstances of the Company. The Company has established the inspection and supervision mechanism for internal control, enabling prompt remedy measures to be implemented once the internal control deficiencies are identified.

The Company's Board of Directors has conducted self-assessment of internal control for 2009, and up to 31 December 2009 there had been no significant deficiencies. As for the internal control of the Company over financial reporting, the overall system had been well established, and the implementation had been effective.

1 INTERNAL ENVIRONMENT

The internal environment of the Company has been continuously improved after several years of internal control practice. Based on its strategic target, it has set up a legal and honest business philosophy and a positive value orientation. By adhering to the tenet of "developing enterprise, contributing to the country, rewarding shareholders, servicing the society and benefiting employees" and the business philosophy of "integrity and standardization, cooperation and mutual benefits", the Company has continuously improved and promoted the -Code of Conduct that guides and regulates behavior of employees with a common conduct code, and issued the outline of corporate cultural construction to further push forward the construction of corporate culture. The Company puts emphasis on the education of employees' morality, clearly defines the qualifications the employees for key positions, establishes incentive and disciplinary mechanism, and through education and training, continuously improves employees' quality and job competence.

2 RISK ASSESSMENT

According to the target of sustainable development and aiming at the business operation risks, financial reporting risks, risks associated with compliance with internal and external laws and regulations, assets safe guarding risks and fraud risks from business operations, the Company established risk assessment and risk control system on the basis of internal control. Based on relevant requirements of internal control, the Company analyzed key aspects which have significant effects on business operation goals and the objectives of financial reporting, and conducted a comprehensive risk assessment by taking into account issues and deficiencies identified in the internal audit and financial checking and referring to findings made

by external auditors. Relevant results of the assessment are used as an important basis for further improving the Manual, perfecting relevant regulatory systems and enhancing internal control. Each branch (subsidiary) supplemented and improved detailed rules for the implementation of internal control and internal management system based on its own risk assessment. These measures gave reasonable guarantee to financial reporting, prevention of internal fraud, assurance of assets security and standardization of management.

3 CONTROL ACTIVITIES

The Company further improved internal control process and control matrix by business category, put process responsible department and the key post of control point in place, and urged employees to perform their duties of internal control. It regularly carries out inspections and tests, and makes rectifications and remedies in time, with internal control increasingly more integrated into daily management. To further the application control of ERP system, the Company sorted out and analyzed current situation of the application of ERP system access. Initial standards for management of ERP access were developed. The requirements for internal control was incorporated into the system. Access checking tools were developed. The Company carried out running tests on a regular basis to ensure system access configuration is under control.

The Company's management holds an analytical meeting of operating activities every month to review and analyze operating results and key financial indicators. It also reports operating results to the Board of Directors every quarter.

4 INFORMATION AND COMMUNICATION

The Company actively promotes information-management to improve efficiency and results. It has established and applied such systems as ERP system, production & operation command system, supply chain management system, fund centralized management system, e-commerce system for material procurement, IC card system, public open system for key business and total budget management system. The Company has worked out a series of management measures and operation processes to regulate information systems, which have been put into use from the overall level, general control and application control. Information system management division is in charge of controlling and maintaining all information systems.

The Company clarified the communication mechanism of the financial report, and all responsibilities relating to the financial report are specified in the Manual and internal accounting system. There has been a smooth communication between Chief Financial Officer and all divisions, financial division of the head office and financial departments of branches (subsidiaries). Meanwhile, smooth communication are kept between the Company's management and external environment, as well as its divisions, divisions and branches (subsidiaries), and the Company's management and the Board of Directors.

As a company that listed on four stock exchanges in and outside China, the Company maintains communication with shareholders and regulatory authorities, and rules and procedures for information disclosure are established for regular information disclosure. The Company received the inspections by regulatory bodies such as China Securities Regulatory Commission, State-owned Assets Supervision and Administration Commission, Board of Supervisors sent by State Council and National Audit Office of the People's Republic of China.

5 MONITORING

The Board of Directors has established the audit committee to review financial report and internal control. The audit division is responsible for conducting independent inspection on branches (subsidiaries) regularly. Annual report and internal audit report would be subject to the review and approval of the audit committee. The Company has established a system to punish and prevent corruption, set up a hotline for whistle-blowing and on-line reporting website in supervision division, and established procedures and standards for the handling of matters reported and protection system of informers. The Company registered in detail and put on record known litigations, and monitored the progress.

The Company established a two-level routine monitoring mechanism for internal control, which combines comprehensive inspection of the headquarters overall inspection, and self-inspection test of internal control by the branches (subsidiaries). In 2009, the Company developed a detailed evaluation plan on internal control inspection, which has been reviewed and approved by the management, and prior to the inspections provides sufficient training and instructions to the employees involved; after the completion of onsite inspection, the Company conducted comprehensive analysis on the internal control inspection results, and reported the identified internal control deficiencies to the Internal Control Steering Committee and the management. The management has formulated the remedying measures, and has communicated with the external auditors on the identified internal control deficiencies. Through the follow-up review by the Company, all internal control deficiencies regarding financial reporting have been remedied prior to 31 December 2009, without significant internal control defects. Other management issues have also been remedied or remedying measures have been formulated. The remedy has met the requirements.

This internal control report was reviewed and approved at the 5th meeting of the Fourth Session of the Board of Directors on 26 March 2010. The Board of Directors and all its members jointly and severally accept responsibility for the authenticity, accuracy and completeness of the report.

As a Chinese company listed on the New York Stock Exchange of the United States of America, the Company engaged KPMG to audit the internal control over financial reporting as of 31 December 2009, pursuant to Sarbanes-Oxley Act of the United States. KPMG carried out an audit on the internal control over financial reporting in accordance with the Auditing Standard No 5 of Public Company Accounting Oversight Board (United States). The report of KMPG stated that the Company maintained, in all material aspects, effective internal control over financial reporting as of 31 December 2009, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organization

REPORT OF THE BOARD OF DIRECTORS

- d. The 2nd meeting of the Fourth Session of the Audit Committee was held by way of written resolution on 29 October 2009, whereby the “Third Quarterly Report of 2009” was reviewed and the “Opinions on Reviewing the Third Quarterly Report of 2009” was issued.

(2) Meeting of the Remuneration and Performance Evaluation Committee

The 4th meeting of the Third Session of the Remuneration and Performance Evaluation Committee was held in Beijing, China on 25 March 2009, whereby the “Report on Implementation of the Rules of the Remuneration of Directors, Supervisors and Other Senior Management for 2008 and Remuneration and Expenses of Directors and Supervisors of the Fourth Session” was reviewed and the “Opinions on Reviewing the Implementation of the Rules of the Remuneration of Directors, Supervisors and Senior Management and Remuneration and Expenses of Directors and Supervisors of the Fourth Session” was issued.

(3) Meeting of Strategy Committee

The 1st meeting of the Fourth Session of Strategy Committee was held in Beijing, China on 19 August 2009, whereby the “Outline on Three-year (from 2009 to 2011) Rolling Development Plan of Sinopec Corp.” was reviewed and the “Opinions on Reviewing the Outline on Three-year (from 2009 to 2011) Rolling Development Plan of Sinopec Corp.” was issued.

5 FINANCIAL PERFORMANCE

The financial results of the Company for the year ended 31 December 2009 prepared in accordance with IFRS and its financial position as at that date and its analysis are set out from page 138 to page 192 in this Annual Report.

6 DIVIDEND

At the 5th meeting of the Fourth Session of the Board of Directors of Sinopec Corp., the Board approved the proposal to declare a dividend of RMB 0.18 per share (including tax) in cash. The final cash dividend per share for distribution would be RMB 0.11 for 2009, the total cash dividend for the year would be RMB 15.606 billion. The distribution proposal will be implemented upon approval by the shareholders at the Annual General Meeting for 2009. The final dividends will be distributed on or before 30 June 2010 (Wednesday) to those shareholders whose names appear on the register of members of Sinopec Corp. at the close of business on 11 June 2010 (Friday). The register of members of Sinopec Corp.’s H share will be closed from 7 June 2010 (Monday) to 11 June 2010 (Friday) (both dates are inclusive). In order to qualify for the final dividend for H shares, the shareholders must lodge all share certificates accompanied by the transfer documents with HKSCC Nominees Limited, at 1712-1716 on 17th Floor, Hopewell Centre, 183 Queen’s Road East, Hong Kong before 4:30 p.m. on 4 June 2010 (Friday of week) for registration.

The dividend will be denominated and declared in RMB, the holders of domestic shares will be paid in RMB and the holders of foreign shares will be paid in Hong Kong dollars. The exchange rate for the dividend to be paid in Hong Kong dollars will be determined based on the average closing exchange rate of RMB against Hong Kong dollars as announced by the People’s Bank of China for the week prior to the date of declaration of dividend.

In accordance with the Notice on Taxation of Dividends and Stock (Stock Rights) Transfer Income obtained by Foreign-invested Companies, Foreign Companies and Foreign Citizens (Guoshuifa No.045 [1993]) published by the State Administration of Taxation, foreign individuals holding H Shares are exempted from paying personal income tax for dividends obtained from companies incorporated in PRC that issue H Shares. As stipulated by the

Notice on Issues Relating to withholding and Paying of Enterprise Income Tax of Dividends Distributable to Their H-Share Holders Who are Overseas Non-resident Enterprises by Chinese Resident Enterprises published by the State Administration of Taxation (Guoshuihan No. 897[2008]), when Chinese resident enterprises distribute annual dividends for the year 2008 and years thereafter to their H-Share holders who are overseas non-resident enterprises, the enterprise income tax shall be withheld and paid at a uniform rate of 10%. Any H Shares of the Company registered in the name of the non-individual registered shareholder, including HKSCC Nominees Limited, other Nominees, Trustees, or other organizations or groups, shall be treated as shares being held by a non-resident enterprise shareholder. As such, the corporate income tax shall be withheld from the dividend payable to such shareholders. Non-resident enterprises may apply for tax refund in accordance with relevant provisions of taxation agreement (arrangement) after receiving dividends. Shareholders should consult their tax advisers regarding the PRC, Hong Kong and other tax consequences of owning and disposing of the Company's H shares. If any investor intends to have his name appear on the H share register of members of the Company, please kindly enquire about the relevant procedures with your nominees or trustees. The company has no responsibility and shall not be responsible for confirming the identities of the shareholders. The Company will strictly comply with the law, and withhold and pay the enterprise income tax on behalf of the relevant shareholders based on the H shares share register of members of the Company on the registration date. The Company will not accept any requests relating to any delay in confirming the identity of the shareholders or any errors in the identity of the shareholders.

As for Qualified Foreign Institutional Investors (QFII) holding A shares without selling conditions of the Company, the Company will withhold corporate income tax as per the tax rate of 10% according to the provisions of the “Notice on Withholding of Corporate Income Tax of Dividend, Bonus and Interest Paid by Chinese Resident Enterprise to QFII “(Guo Shui Han [2009] No. 47) issued by the State Administration of Taxation on January 23, 2009.

Generally speaking, an individual shareholder of H shares or an individual holder of American Depository Shares (ADSs) who is resident and domiciled in the UK will be liable for UK income tax on dividend received from Sinopec Corp. (after deducting relevant pre-tax deductions and tax credit). Where an individual shareholder of H shares receives a dividend from Sinopec Corp. without any deduction of tax, the amount of income as the basis of calculating tax liability is the gross amount of the dividend and this is taxed at the applicable rate (currently 10% in case of a taxpayer subject to a basic rate or a lower rate, and 32.5% in case of a taxpayer subject to a higher rate). Where tax is withheld from the dividend, credit may be claimed against UK income tax for any tax withheld from the dividend up to the amount of the UK income tax liability. If such a withholding is required, Sinopec Corp. will assume responsibility for withholding that tax regarding the income deriving from the PRC. The current China-UK Double Taxation Prevention Agreement provides that the maximum withholding tax on dividend payable by a Chinese-domiciled company to UK residents is generally limited to 10% of the gross dividend.

Individual holders of H Shares or holders of ADSs who are UK resident but are not domiciled in the UK (and have submitted a claim to that effect to the UK Inland Revenue), will generally only be liable for income tax on any dividend received from Sinopec Corp. to the extent that it is repatriated to the UK.

Generally speaking, a shareholder of H shares or a holder of ADSs which is a UK resident for tax purposes will be liable for UK income tax or corporation tax (as appropriate and at the rates of tax applicable to the shareholder or holder) on any dividend received from Sinopec Corp., with double tax relief available for withholding tax imposed. In certain cases (not to be discussed here), a shareholder of H shares or a holder of ADSs which is a UK resident for tax purposes may be entitled to relief for “underlying” tax paid by Sinopec Corp. or its subsidiaries.

The cash dividend declared by the Company in the previous three years

	2009	2008	2007
Cash dividends (RMB/share)	0.18	0.12	0.165
Dividend to net profit ratio of the year (%)	25.5	36.6	25.6

The total cash dividend declared by Sinopec Corp. during the three years from 2007 to 2009 was RMB 0.465 per share, which is equivalent to 83.05% of the annual average net profit per share during the same period. It fulfilled the refinancing conditions in the domestic securities market provided by the “Decisions on Modifying Provisions Concerning Cash Dividends of Listed Companies” issued by China Securities Regulatory Commission (CSRC).

7 MAIN SUPPLIERS AND CUSTOMERS

During the reporting period, the total amount of purchases from the five largest suppliers of Sinopec Corp. represented 42.5% of the total amount of purchase by Sinopec Corp., of which purchases from the largest supplier represented 22.2% of the total. The total amount of sales to the five largest customers of Sinopec Corp. represented 8% of the total amount of sales of Sinopec Corp., of which sales to the largest customer represented 4% of the total.

During the reporting period, except for the connected transactions with the controlling shareholder, China Petrochemical Corporation, and its subsidiaries, as disclosed in Connected Transaction section of this Annual Report, none of the directors, supervisors of Sinopec Corp. and their associates or any shareholders holding over 5% shares of Sinopec Corp. had any interest in any of the above-mentioned major suppliers and customers.

8 BANK LOANS AND OTHER BORROWINGS

Details of bank loans and other borrowings of Sinopec Corp. as of 31 December 2009 are set out in note 30 to the financial statements prepared in accordance with IFRS in this annual report.

9 FIXED ASSETS

During the reporting period, changes to the fixed assets of Sinopec Corp. are set out in note 18 to the financial statements prepared in accordance with IFRS in this annual report.

10 RESERVES

During the reporting period, changes to the reserves of Sinopec Corp. are set out in the Consolidated Statement of Changes in Equity in the financial statements prepared in accordance with IFRS in this annual report.

11 DONATIONS

During the reporting period, the amount of philanthropy donations made by Sinopec Corp. totaled around RMB 170 million.

12 PRE-EMPTIVE RIGHTS

Pursuant to the Articles of Association of Sinopec Corp. and the laws of the PRC, Sinopec Corp. is not subject to any pre-emptive rights requiring it to issue new shares to its existing shareholders in proportion to their shareholdings.

13 PURCHASE, SALES AND REDEMPTION OF SHARES

During the reporting period, neither Sinopec Corp. nor any of its subsidiaries repurchased, sold or redeemed any securities of Sinopec Corp.

14 RISK FACTORS

In the course of its production and operations, Sinopec Corp. actively takes various measures to mitigate operational risks. However, in practice, it may not be possible to prevent the occurrence of all risks and

uncertainties below.

Variation Risks in Macro-economic Situation: The operating results of the Company are closely related to the economic situation of China and the world. Although many countries are adopting macroeconomic policies to eliminate the negative influences resulting from the financial crisis, there still exists uncertainties as to the time and nature of the recovery of the global economy and world financial market. The business of the Company may be adversely affected by such factors as the impact on export due to trade protectionism of some countries, impact on import which is likely to be resulted from regional trade agreements and etc..

Cyclic Effects: The majority of the operational revenue of the Company comes from the sales of refined oil products and petrochemical products, and part of the operation and its related products are cyclic and are sensitive to macro-economy, cyclic changes of regional and global economy, the changes of the production capacity and output, demand of consumers, prices and supply of the raw materials, as well as prices and supply of the alternative products etc. Although the Company is an integrated energy covering up, middle and down stream business it can only counteract the adverse influences of periodicity of the industry to some extent.

Macroeconomic Policies and Government Regulation: Although the government is gradually liberalizing the market entry regulations on petroleum and petrochemicals sector, the petroleum and petrochemical industries in China are still subject to entry regulations to a certain degree, which include: issuing crude oil and natural gas production license, issuing crude oil and refined oil products business license, setting maximum retail, distribution and wholesale prices for gasoline and diesel, and ex-refinery price for jet fuels, the imposing of the special oil income levy and other tax and fees, formulation of import and export quotas and procedures, formulation of safety, quality and environmental protection standards; meanwhile, the changes may also occur to macroeconomic and industry policies such as: further improvement in pricing mechanism of refined oil products, reforming and improvement in pricing mechanism of natural gas, and reforming in resource tax and environmental tax. Such regulations may have material effect on the operations and profitability of the Company.

Change of Environmental Legal Requirements: Our production activities produce waste water, gas and solid. The Company has built up supporting effluent treatment systems to prevent and reduce pollution. The relevant government authorities may issue and implement stricter environmental protection laws and regulations, adopt stricter environment protection standards. Under the aforesaid situation, the Company may incur more expenses in relation to the environment protection accordingly.

Uncertainties with Additional Oil and Gas Reserves: The Company's ability to achieve sustainable development is dependent to a certain extent on our ability in discovering or acquiring additional oil and natural gas reserves. To obtain additional oil and natural gas reserves, the Company faces inherent risks associated with exploration and development and/or with acquiring activities. The Company has to invest a large amount of money with no guarantee of certainty of obtaining additional reserves. If the Company fails to acquire additional reserves through further exploration and development or acquisition activities, the oil and natural gas reserves and production of the Company will decline over time, which will adversely affect the Company's financial situation and operation performance.

Risk of External Purchase of Crude Oil: A significant amount of the Company's demand for crude oil is satisfied through external purchases. In recent years, especially impacted by the international financial crisis, the crude oil prices are subject to wild fluctuations, and the supply of crude oil may even be interrupted due to major incidents. Although the Company has taken flexible counter measures, it may not be fully shielded from risks associated with any wild fluctuation of international crude oil prices and disruption of supply of crude oil.

Operational Risks and Natural Disasters: The process of petroleum chemical production is exposed to risks of inflammation, explosion and environmental pollution and is vulnerable to natural disasters. Such contingencies may cause serious impact to the society, grievous injuries to people and major financial losses to the Company. The Company has implemented a strict HSE management system, in an effort to avoid such risks as much as possible. Meanwhile, the main assets and inventories of the Company have been insured. However, such measures may not shield the Company from financial losses or adverse impact resulting from such contingencies.

Investment Risk: Petroleum and chemical sector is a capital intensive industry. Although the Company adopted a prudent investment strategy and conducted rigorous feasibility study on each investment project, certain investment risk may exist resulting that expected returns may not be achieved due to major changes in factors such as market environment, prices of equipment and raw materials, and construction period during the implementation of the projects.

Exchange Rate: At present, China implements an administered floating exchange rate regime based on market supply and demand with reference to a basket of currencies in terms of the exchange rate of RMB. As the Company outsources a significant portion of crude oil in foreign currency which are based on US dollar-denominated international prices, fluctuations in the value of Renminbi against US dollars and certain other foreign currencies may affect our purchasing costs of crude oil.

REPORT OF THE BOARD OF SUPERVISORS

Mr. Wang Zuoran, Chairman of the Board of Supervisors

Dear shareholders:

During the reporting period, the Board of Supervisors, following the principle of good faith, diligently performed the supervision responsibilities, actively participated in the supervision process, carefully reviewed significant decisions in the shareholders' interests and the Company's interests according to Company Law of the People's Republic of China and "Articles of Association of Sinopec Corp..

During the reporting period, the Board of Supervisors held five meetings in total.

On 27 March 2009, the 13th meeting of the Third Session of the Board of Supervisors was held and the following proposals were reviewed and approved: Annual Financial Report of Sinopec Corp. for 2008, Annual Report of Sinopec Corp. for 2008, Sustainable Development Report of Sinopec Corp. for 2008, Internal Control Report of Sinopec Corp. for 2008, Report on the Work of Board of Supervisors of Sinopec Corp. for 2008 and Report on the Work of Third Session of the Board of Supervisors of Sinopec Corp.. Relative resolutions were passed at the meeting.

On 28 April 2009, the 14th meeting of the Third Session of the Board of Supervisors was held and First Quarter Report of Sinopec Corp. for 2009 was reviewed and approved.

On 22 May 2009, the 1st meeting of the Fourth Session of the Board of Supervisors was held and the Chairman and the Vice Chairman of the Board of Supervisors were elected.

On 21 August 2009, the 2nd meeting of the Fourth Session of the Board of Supervisors was held and the following were reviewed and approved: Interim Financial Statement of Sinopec Corp. for 2009, Interim Report of Sinopec Corp. for 2009 and "the Plan of Sinopec Corp. to Purchase Partial Assets and Equity Interests from Sinopec Group Asset Management Co., Ltd.. Relative resolutions were made at the meeting.

On 29 October 2009, the 3rd meeting of the Fourth Session of the Board of Supervisors was held and Third Quarter Report of Sinopec Corp. for 2009 was reviewed and approved.

Moreover, independent supervisors conducted inspection and research in some branch companies, and provided supervision to the production and operation of some subsidiaries.

Through process supervision on significant decision-makings, routine supervision on the operations and inspection and research: the Board of Supervisors hold the following beliefs. in 2009, facing great changes of business environment resulting from the international financial crisis, the Company, deepened study and implementation of the scientific outlook of development and followed the operation principles of “standardization, preciseness and integrity”, It took measures to expand the market, organize the operations of upstream, refineries, chemical and marketing segments carefully, optimize the operating plans, increase production and revenues, and improve profitability. All the aforesaid measures ensured the steady increase of the production and operation of the Company and achieved good operating results.

First, the Board of Directors diligently fulfilled its obligations and exercised its rights under the PRC Company Law and the Company’s Articles of Association, and made scientific decisions on major issues concerning capital operation, production and operation, reform and development and so on; and the senior management carried out the resolutions made by the Board of the Directors, focused on expanding market, reinforced the precision management, strived to lower the costs and enhance efficiency and strengthened the scientific innovation. All of the efforts achieved remarkable results. The Board did not find any behavior of any directors or senior management that violated laws, regulations, the Articles of Association, or is detrimental to the interest of the Company or the shareholders.

Second, the annual financial statement issued by the Company was prepared respectively in accordance with ASBE and IFRS which truly and fairly reflected the Company’s financial status and operation performance. In accordance with ABSE, the Company’s operating income was RMB 1,345.052 billion, the total profit was RMB 80.076 billion, and the net profit attributable to equity shareholders was RMB 61.29 billion; and in accordance with IFRS, the Company’s turnover and other operating revenue was RMB 1,345.052 billion, the earnings before tax was RMB 80.568 billion, and the net profit attributable to equity shareholders was RMB 61.76 billion.

Third, Sinopec Corp. conducted capital operation lawfully and carefully. During the reporting period, the Company acquired, from Sinopec Group or its subsidiaries, property rights of eight oil product pipeline project divisions, equity interest and partial assets in Qingdao Petrochemical Co., Ltd and Shijiazhuang Chemical Fiber Co., Ltd, and acquired all of the assets of six research institutes and all of the equities of 5 enterprises from Sinopec Group Asset Management Company. Meanwhile, the Company disposed of chemical fertilizer equipments of Jinling Branch Company. The operations were strictly in line with relevant laws and regulations. No behaviors detrimental to the interests of non-connected shareholders and the Company such as insider trading were found.

Fourth, all connected transactions complied with supervisory requirements of domestic and overseas places of listing. All connected transactions between Sinopec Corp. and Sinopec Group were in conformity with the relevant rules and regulations of Hong Kong Stock Exchange and Shanghai Stock Exchange. All the connected transactions were conducted on the basis of fair and reasonable price and in line with the principle of “fairness, justness and openness”. Nothing in these transactions was found to be detrimental to the benefits of Sinopec Corp. or the interests of the non-connected shareholders.

In addition, the Company timely disclosed material information according to the regulations of securities supervisory authorities, and the information disclosed was true, accurate and complete.

In the year ahead, the Board of Supervisors will continue to implement the scientific outlook of development, stick to the principles of honesty and good faith, focus on significant decision-making, internal control, connected transactions and information disclosure. The Board of Supervisors will fulfill its duty of supervision, carefully strive to promote the steady growth of the benefits and continuing healthy development of Sinopec Corp. in 2010, and defend the interests of shareholders and the Company.

Wang Zuoran
The Chairman of the Board of Supervisors

Beijing, China

- Notes: 1) Except for the newly founded Sinopec International Petroleum Exploration and Production Limited and Sinopec Chemical Sales Company Limited which have not employed their auditor(s) yet, the auditor for all of the above subsidiaries in 2009 is KPMG Huazhen or KPMG.
- 2) The above indicated total assets, net assets and net profit has been prepared in accordance with ASBE. Except for Sinopec Kantons Holdings Limited and Sinopec (Hong Kong) Limited which are incorporated in Bermuda and Hong Kong SAR respectively, all of the above wholly-owned and non wholly-owned subsidiaries are incorporated in the PRC. All of the above wholly-owned and non wholly-owned subsidiaries are limited liability companies. The Directors considered that it would be redundant to disclose the particulars of all subsidiaries and, therefore, only those which have a material impact on Sinopec Corp.'s results or net assets are set out above.

REPORT OF THE PRC AUDITOR

All Shareholders of
China Petroleum & Chemical Corporation:

We have audited the accompanying financial statements of China Petroleum & Chemical Corporation (the "Company"), which comprise the consolidated balance sheet and balance sheet as at 31 December 2009, the consolidated income statement and income statement, the consolidated statement of changes in equity and statement of changes in equity, the consolidated cash flow statement and cash flow statement for the year then ended, and notes to the financial statements.

1. MANAGEMENT'S RESPONSIBILITY FOR THE FINANCIAL STATEMENTS

The Company's management is responsible for the preparation of these financial statements in accordance with China Accounting Standards for Business Enterprises issued by the Ministry of Finance of the People's Republic of China. This responsibility includes: (1) designing, implementing and maintaining internal control relevant to the preparation of financial statements that are free from material misstatement, whether due to fraud or error; (2) selecting and applying appropriate accounting policies; and (3) making accounting estimates that are reasonable in the circumstances.

2. AUDITOR'S RESPONSIBILITY

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with China Standards on Auditing for Certified Public Accountants. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance as to whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

3. OPINION

In our opinion, the financial statements comply with the requirements of China Accounting Standards for Business Enterprises issued by the Ministry of Finance of the People's Republic of China and present fairly, in all material respects, the consolidated financial position and financial position of the Company as at 31 December 2009, and the consolidated results of operations and results of operations and the consolidated cash flows and cash flows of the Company for the year then ended.

NOTES TO THE FINANCIAL STATEMENTS

for the year ended 31 December 2009

1 STATUS OF THE COMPANY

China Petroleum & Chemical Corporation (the "Company") was established on 25 February 2000 as a joint stock limited company.

According to the State Council's approval to the "Preliminary Plan for the Reorganisation of China Petrochemical Corporation" (the "Reorganisation"), the Company was established by China Petrochemical Corporation ("Sinopec Group Company"), which transferred its core businesses together with the related assets and liabilities at 30 September 1999 to the Company. Such assets and liabilities had been valued jointly by China United Assets Appraisal Corporation, Beijing Zhong Zheng Appraisal Company, CIECC Assets Appraisal Corporation and Zhong Fa International Properties Valuation Corporation. The net asset value was determined at RMB 98,249,084,000. The valuation was reviewed and approved by the Ministry of Finance (the "MOF") (Cai Ping Zi [2000] No. 20 "Comments on the Review of the Valuation Regarding the Formation of a Joint Stock Limited Company by China Petrochemical Corporation").

In addition, pursuant to the notice Cai Guan Zi [2000] No. 34 "Reply to the Issue Regarding Management of State-Owned Equity by China Petroleum and Chemical Corporation" issued by the MOF, 68.8 billion domestic state-owned shares with a par value of RMB 1.00 each were issued to Sinopec Group Company, the amount of which is equivalent to 70% of the above net asset value transferred from Sinopec Group Company to the Company in connection with the Reorganisation.

Pursuant to the notice Guo Jing Mao Qi Gai [2000] No. 154 "Reply on the Formation of China Petroleum and Chemical Corporation", the Company obtained the approval from the State Economic and Trade Commission on 21 February 2000 for the formation of a joint stock limited company.

The Company took over the exploration, development and production of crude oil and natural gas, refining, chemicals and related sales and marketing business of Sinopec Group Company after the establishment of the Company.

The Company and its subsidiaries (the "Group") engage in the oil and gas and chemical operations and businesses, including:

- (1) the exploration, development and production of crude oil and natural gas;
- (2) the refining, transportation, storage and marketing of crude oil and petroleum product, and
- (3) the production and sale of chemicals.

Pursuant to the resolution passed at the Directors' meeting on 27 March 2009, the Group acquired the entire equity interests of Sinopec Qingdao Petrochemical Company Limited and certain storage and distribution operations (collectively the "Acquired Group") from Sinopec Group Company for total cash considerations of RMB 771 million (hereinafter referred to as the "Acquisition of the Acquired Group").

As the Group and the Acquired Group are under the common control of Sinopec Group Company, the Acquisition of the Acquired Group are considered as "combination of entities under common control". Accordingly, the assets and liabilities of the Acquired Group have been accounted for at historical cost and the consolidated

financial statements of the Company prior to this acquisition have been restated to include the results of operations and the assets and liabilities of the Acquired Group on a combined basis. The difference between the total considerations paid over the amount of the net asset of the Acquired Group was accounted for as an equity transaction.

The financial information of the Acquired Group from 1 January 2009 to 31 March 2009 (acquisition date) are set out below:

The acquiree	Reasons for the judgement that the acquisition is considered as "combination of entities under common control"	Substantial controller of the common control	Revenues from 1 January 2009 to the acquisition date RMB millions	Net profit from 1 January 2009 to the acquisition date RMB millions
The Acquired Group	The acquiree and the Company are under common control of Sinopec Group Company	Sinopec Group Company	2,225	62

2 BASIS OF PREPARATION

- (1) Statement of compliance China Accounting Standards for Business Enterprises (ÒASBEÓ)

The financial statements have been prepared in accordance with the requirements of Accounting Standards for Business Enterprises – Basic Standards and 38 specific standards issued by the MOF on 15 February 2006 and the practice guide of the Accounting Standards for Business Enterprises, the explanations to the Accounting Standards for Business Enterprises and other regulations issued thereafter (collectively, ASBE). These financial statements present truly and completely the consolidated financial position and financial position, the consolidated results of operations and results of operations and the consolidated cash flows and cash flows of the Company.

These financial statements also comply with the disclosure requirements of ÓRegulation on the Preparation of Information Disclosures of Companies Issuing Public Shares, No.15: General Requirements for Financial ReportsÓ as revised by the China Securities Regulatory Commission (ÒCSRCÓ) in 2010.

- (2) Accounting period

The accounting year of the Group is from 1 January to 31 December.

- (3) Measurement basis

The financial statements of the Group have been prepared under the historical cost convention, except for the assets and liabilities set out below:

- Available-for-sale financial assets (see Note 3(11))
- Derivative financial instruments (see Note 3(11))

- Convertible bonds (see Note 3(11))

(4)

Functional currency and presentation currency

The functional currency of the Company's and most of its subsidiaries is Renminbi. The Group's consolidated financial statements are presented in Renminbi. The Company translates the financial statements of subsidiaries from their respective functional currencies into Renminbi (see Note 3(2)) if the subsidiaries' functional currencies are not Renminbi.

74

3 SIGNIFICANT ACCOUNTING POLICIES

(1) Accounting treatment of business combination involving entities under common control and not under common control

(a) Business combination involving entities under common control

A business combination involving entities or businesses under common control is a business combination in which all of the combining entities or businesses are ultimately controlled by the same party or parties both before and after the business combination, and that control is not transitory. The assets and liabilities that the acquirer receives in the acquisition are accounted for at the acquiree's carrying amount on the acquisition date. The difference between the carrying amount of the acquired net assets and the carrying amount of the consideration paid for the acquisition (or the total nominal value of shares issued) is recognised in the share premium of capital reserve, or the retained profits in case of any shortfall in the share premium of capital reserve. The acquisition date is the date on which the acquirer effectively obtains control of the acquiree.

(b) Business combination involving entities not under common control

A business combination involving entities or businesses not under common control is a business combination in which all of the combining entities or businesses are not ultimately controlled by the same party or parties both before and after the business combination. The cost of a business combination paid by the acquirer is the aggregate of the fair value at the acquisition date of assets given, liabilities incurred or assumed, and equity securities issued by the acquirer, in exchange for control of the acquiree plus any cost directly attributable to the business combination. Difference between the fair value and carrying amount of disposed asset is recognised in the income statement for the year. The acquisition date is the date on which the acquirer effectively obtains control of the acquiree.

The acquirer allocates the cost of a business combination on the acquisition date and recognises the fair value of the acquiree's various identifiable assets, liabilities or contingent liabilities as they are acquired.

The excess of the cost of business combination over the fair value of the identifiable net assets acquired is recognised as goodwill (Note 3(9)).

When the cost of business combination is less than the fair value of the identifiable net assets acquired, the difference is charged to the income statement.

(c) Method for preparation of consolidated financial statements

The consolidated financial statements comprise the Company and its subsidiaries. Control is the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities. In assessing control, potential voting rights, such as warrants and convertible bonds, that are currently exercisable or convertible, are taken into account. The financial statements of subsidiaries are included in the consolidated financial statements from the date that control commences until the date that control ceases.

Where the Company combines a subsidiary during the reporting year through a business combination involving entities under common control, the financial statements of the subsidiary are included in the consolidated financial statements as if the combination had occurred at the beginning of the earliest comparative year presented or, if later, at the date that common control was established. Therefore the opening balances and the comparative figures of the consolidated financial statements are restated. In the preparation of the consolidated financial statements, the subsidiary's assets, liabilities and results of operations are included in the consolidated balance sheet and the consolidated income statement, respectively, based on their carrying amounts in the subsidiary's financial statements, from the date that common control was established.

Where the Company acquires a subsidiary during the reporting year through a business combination involving entities not under common control, the identifiable assets, liabilities and results of operations of the subsidiaries are consolidated into consolidated financial statements from the date that control commences, base on the fair value of those identifiable assets and liabilities at the acquisition date.

Where the Company acquired a minority interest from a subsidiary's minority shareholders, the difference between the investment cost and the newly acquired interest into the subsidiary's identifiable net assets is adjusted to the capital reserve in the consolidated balance sheet. Where the Company partially disposed a investment of a subsidiary that do not result in a loss of control, the difference between the proceeds and the corresponding share of the interest into the subsidiary is adjusted to the capital reserve in the consolidated balance sheet. If the credit balance of capital reserve is insufficient, any excess is adjusted to retained profits.

Minority interest is presented separately in the consolidated balance sheet within shareholders' equity. Net profit or loss attributable to minority shareholders is presented separately in the consolidated income statement below the net profit line item.

Where the amount of losses attributable to the minority shareholders of a subsidiary exceeds the minority shareholders' portion of the equity of the subsidiary, the excess, and any further losses attributable to the minority shareholders, are allocated against the equity attributable to the Company except to the extent that the minority shareholders have a binding obligation under the articles of association or an agreement and are able to make additional investment to cover the losses. If the subsidiary subsequently reports profits, such profits are allocated to the equity attributable to the Company until

the minority shareholders' share of losses previously absorbed by the Company has been recovered.

Where the accounting policies and accounting period adopted by the subsidiaries are different from those adopted by the Company, adjustments are made to the subsidiaries' financial statements according to the Company's accounting policies and accounting period. Intra-group balances and transactions, and any unrealised profit or loss arising from intra-group transactions, are eliminated in preparing the consolidated financial statements. Unrealised losses resulting from intra-group transactions are eliminated in the same way as unrealised gains but only to the extent that there is no evidence of impairment.

3 SIGNIFICANT ACCOUNTING POLICIES (Continued)

(2) Transactions in foreign currencies and translation of financial statements in foreign currencies

Foreign currency transactions are, on initial recognition, translated into Renminbi at the spot exchange rates quoted by the People's Bank of China (PBOC rates) at the transaction dates.

Foreign currency monetary items are translated at the PBOC rates at the balance sheet date. Exchange differences, except for those directly related to the acquisition, construction or production of qualified assets, are recognised as income or expenses in the income statement. Non-monetary items denominated in foreign currency measured at historical cost are not translated. Non-monetary items denominated in foreign currency that are measured at fair value are translated using the exchange rates at the date when the fair value was determined. The difference between the translated amount and the original currency amount is recognised as capital reserve, if it is classified as available-for-sale financial assets; or charged to the income statement if it is measured at fair value through profit or loss.

The assets and liabilities of foreign operation are translated to Renminbi at the spot exchange rates at the balance sheet date. The equity items, excluding Retained profits, are translated into Renminbi at the spot exchange rates at the transaction dates. The income and expenses of foreign operation are translated into Renminbi at the spot exchange rates on the transaction dates. The resulting exchange differences are separately presented in the balance sheet within equity. Upon disposal of a foreign operation, the cumulative amount of the exchange differences recognised in which relate to that foreign operation is transferred to income statement in the year in which the disposal occurs.

(3) Cash and cash equivalents

Cash and cash equivalents comprise cash on hand, demand deposits, short-term and highly liquid investments which are readily convertible into known amounts of cash and are subject to an insignificant risk of change in value.

(4) Inventories

Inventories are stated at the lower of cost and net realisable value.

Cost includes the cost of purchase and processing, and other cost. Inventories are stated at cost upon acquisition. The cost of inventories is calculated using the weighted average method. In addition to the cost of purchase of raw material, work in progress and finished goods include direct labour and an appropriate allocation of manufacturing overhead costs.

Any excess of the cost over the net realisable value of each item of inventories is recognised as a provision for diminution in the value of inventories. Net realisable value is the estimated selling price in the normal course of business less the estimated costs to completion and the estimated expenses and related taxes to make the sale.

Inventories include raw materials, work in progress, semi-finished goods, finished goods and reusable materials. Reusable materials include low-value consumables, packaging materials and

other materials, which can be used repeatedly but do not meet the definition of fixed assets. Reusable materials are amortised in full when received for use. The amounts of the amortisation are included in the cost of the related assets or profit or loss.

Inventories are recorded by perpetual method.

(5) Long-term equity investments

(a) Investment in subsidiaries

In the Group's consolidated financial statements, investment in subsidiaries are accounted for in accordance with the principles described in Note 3(1)(c).

In the Company's separate financial statements, investments in subsidiaries are accounted for using the cost method. The cash dividends or profits declared to be distributed by the investee entity are recognised as investment income of the current period based on the Company's proportionate interest in the investee entity, excluding the cash dividends or the profits declared but not distributed in the considerations paid to acquire the investment. The investments are stated at cost less impairment losses (see Note 3(12)) in the balance sheet. At initial recognition, such investments are measured as follows:

The initial investment cost of a long-term equity investment obtained through a business combination involving entities under common control is the book value of the acquired entities' net assets at the combination date. The difference between the initial investment cost and the carrying amounts of the consideration given is adjusted to share premium in capital reserve. If the balance of the share premium is insufficient, any excess is adjusted to retained profits.

The initial investment cost of a long-term equity investment obtained through a business combination involving entities not under common control is the cost of business combination determined at the acquisition date.

An investment in a subsidiary acquired otherwise than through a business combination is initially recognised at actual purchase cost if the Group acquires the investment by cash, or at the fair value of the equity securities issued if an investment is acquired by issuing equity securities, or at the value stipulated in the investment contract or agreement if an investment is contributed by investors.

3 SIGNIFICANT ACCOUNTING POLICIES (Continued)

(5) Long-term equity investments (Continued)

(b) Investment in jointly controlled entities and associates

A jointly controlled entity is an entity of which the Group can exercise joint control with other venturers. Joint control represents the contractual agreement of sharing of control over the entity's economic activities, limited to economic activities related to significant financial and operating policies that require agreement of all venturers.

An associate is an entity of which the Group has significant influence. Significant influence represents the right to participate in the financial and operating policy decisions of the investee but is not control or joint control over the establishment of these policies.

An investment in a jointly controlled entity or an associate is accounted for using the equity method, unless the investment is classified as held for sale (see Note 3(10)).

At the balance sheet date, impairment losses on investment in jointly controlled entities and associates are measured according to Note 3(12).

The initial cost of investment in jointly controlled entities and associates is stated at the consideration paid if the investment is made in cash, or at the fair value of the non-monetary assets exchanged for the investment. The difference between the fair value of the non-monetary assets being exchanged and its carrying amount is charged to the income statement.

The Group's accounting treatments when adopting the equity method include:

Where the initial investment cost of a long-term equity investment exceeds the Group's interest in the fair value of the investee's identifiable net assets at the date of acquisition, the investment is initially recognised at the initial investment cost. Where the initial investment cost is less than the Group's interest in the fair value of the investee's identifiable net assets at the time of acquisition, the investment is initially recognised at the investor's share of the fair value of the investee's identifiable net assets, and the difference is charged to income statement.

After the acquisition of the investment, the Group recognises its share of the investee's net profits or losses, as investment income or losses, and adjusts the carrying amount of the investment accordingly. Once the investee declares any cash dividends or profits distributions, the carrying amount of the investment is reduced by that attributable to the Group.

The Group recognises its share of the investee's net profits or losses after making appropriate adjustments to align the accounting policies or accounting periods with those of the Group based on the fair values of the investee's net identifiable assets at the time of acquisition. Under the equity accounting method, unrealised profits and losses resulting from transactions between the Group and its associates or jointly controlled entities are eliminated to the extent of the Group's interest in the associates or jointly controlled entities. Unrealised losses resulting from transactions between the Group and its associates or jointly controlled entities are fully recognised in the event that there is an evidence of impairment.

The Group discontinues recognising its share of net losses of the investee after the carrying amount of the long-term equity investment and any long-term interest that in substance forms part of the Group's net investment in the associate or the jointly controlled entity is reduced to zero, except to the extent that the Group has an obligation to assume additional losses. Where net profits are subsequently made by the associate or jointly controlled entity, the Group resumes recognising its share of those profits only after its share of the profits equals the share of losses not recognised.

(c) Other long-term equity investments

Other long-term equity investments refer to investments where the Group does not have control, joint control or significant influence over the investees, and for which the investments are not quoted in an active market and their fair value can not be reliably measured.

The initial investment cost in these entities is originally recognised in the same way as the initial investment cost and measurement principles for investment in jointly controlled entities and associates.

Other long-term investments are subsequently accounted for under the cost method. As at the balance sheet date, other long-term investments are assessed for impairment on an individual basis.

For other long-term equity investments, the amount of impairment loss is stated as the difference between the carrying amount of the investment and the present value of estimated future cash flows discounted at the current market rate of return for a similar financial asset. Such impairment loss is not reversed.

3 SIGNIFICANT ACCOUNTING POLICIES (Continued)

(6) Fixed assets and construction in progress

Fixed assets represent the tangible assets held by the Group using in the production of goods, rendering of services and for operation and administrative purposes with useful life over 1 year.

Fixed assets are stated in the balance sheet at cost less accumulated depreciation and impairment losses (see Note 3(12)). Construction in progress is stated in the balance sheet at cost less impairment losses (see Note 3(12)).

The cost of a purchased fixed asset comprises the purchase price, related taxes, and any directly attributable expenditure for bringing the asset to working condition for its intended use. The cost of self-constructed assets includes the cost of materials, direct labour, capitalised borrowing costs (see Note 3(19)), and any other costs directly attributable to bringing the asset to working condition for its intended use. Costs of dismantling and removing the items and restoring the site on which the related assets located are included in the initial cost.

Construction in progress is transferred to fixed assets when the asset is ready for its intended use. No depreciation is provided against construction in progress.

Where the individual component parts of an item of fixed asset have different useful lives or provide benefits to the Group in different patterns thus necessitating use of different depreciation rates or methods, each part is recognised as a separate fixed asset.

The subsequent costs including the cost of replacing part of an item of fixed assets are recognised in the carrying amount of the item if the recognition criteria are satisfied, and the carrying amount of the replaced part is derecognised. The costs of the day-to-day servicing of fixed assets are recognised in income statement as incurred.

The Group terminates the recognition of an item of fixed asset when it is in a state of disposal or it is estimated that it is unable to generate any economic benefits through use or disposal. Gains or losses arising from the retirement or disposal of an item of fixed asset are determined as the difference between the net disposal proceeds and the carrying amount of the item and are recognised in income statement on the date of retirement or disposal.

Fixed assets other than oil and gas properties are depreciated using the straight-line method over their estimated useful lives. The estimated useful lives and the estimated rate of residual values adopted for respective classes of fixed assets are as follows:

	Estimated useful life	Estimated rate of residual value
Plants and buildings	15-45 years	3%-5%
Machinery, equipment, vehicles and others	4-18 years	3%
Oil depots, storage tanks and service stations	8-25 years	3%-5%

Useful lives, residual values and depreciation methods are reviewed at least each year end.

(7) Oil and gas properties

Costs of development wells and related support equipment are capitalised. The cost of exploratory wells is initially capitalised as construction in progress pending determination of whether the well has found proved reserves. Exploratory well costs are charged to expenses upon the determination that the well has not found proved reserves. However, in the absence of a determination of the discovery of proved reserves, exploratory well costs are not carried as an asset for more than one year following completion of drilling. If, after one year has passed, a determination of the discovery of proved reserves cannot be made, the exploratory well costs are impaired and charged to expense. All other exploration costs, including geological and geophysical costs, are charged to the income statement in the year as incurred.

Gains and losses on the disposal of proved oil and gas properties are not recognised unless the disposal encompasses an entire property. The proceeds on such disposals are credited to the carrying amounts of oil and gas properties.

The Group estimates future dismantlement costs for oil and gas properties with reference to engineering estimates after taking into consideration the anticipated method of dismantlement required in accordance with the industry practices. These estimated future dismantlement costs are discounted at credit-adjusted risk-free rate and are capitalised as oil and gas properties, which are subsequently amortised as part of the costs of the oil and gas properties.

Capitalised costs relating to proved properties are amortised on a unit-of-production method.

(8) Intangible assets

Intangible assets, where the estimated useful life is finite, are stated in the balance sheet at cost less accumulated amortisation and provision for impairment losses (see Note 3(12)). For an intangible asset with finite useful life, its cost less residual value and impairment losses is amortised on a straight-line basis over the expected useful lives, unless the intangible assets are classified as held for sale (see Note 3(10)).

An intangible asset is regarded as having an indefinite useful life and is not amortised when there is no foreseeable limit to the year over which the asset is expected to generate economic benefits for the Group.

3 SIGNIFICANT ACCOUNTING POLICIES (Continued)

(9) Goodwill

Goodwill represents the excess of cost of business combination over the acquirer's interest in the fair value of the identifiable net assets of the acquiree under the business combination involving entities not under common control.

When preparing the consolidated financial statements, if the Company acquired a minority interest from a subsidiary's minority shareholders before 7 August 2008, a goodwill is recognised on the consolidated financial statement, whose amount is the excess of the additional long-term equity investment cost on the minority interest acquisition over the fair value on the transaction date of the subsidiary's identifiable net assets of the newly acquired portion. The difference between (i) and (ii) below, less the aforementioned goodwill is adjusted to the capital reserve in the consolidated balance sheet:

- (i) the additional long-term equity investment cost on the minority interest acquisition;
- (ii) the newly acquired interest in the subsidiary's identifiable net assets recorded from the acquisition date (or combination date) of the subsidiary.

If such an acquisition occurred on or after 7 August 2008, no goodwill is recognised. The total difference between the above (i) and (ii) is adjusted to the capital reserve in the consolidated balance sheet. In both cases if the credit balance of capital reserve is insufficient, any excess is adjusted to retained profits.

Goodwill is not amortised and is stated at cost less accumulated impairment losses (see Note 3(12)). On disposal of an asset group or a set of asset groups, any attributable amount of purchased goodwill is written off and included in the calculation of the profit or loss on disposal.

(10) Non-current assets held for sale

A non-current asset is classified as held for sale when the Group has made a decision and signed a non-cancellable agreement on the transfer of the asset with the transferee, and the transfer is expected to be completed within one year. Such non-current assets may be fixed assets, intangible assets, investment property subsequently measured using the cost model, long-term equity investment, etc. but not include deferred tax assets. Non-current assets held for sale are stated at the lower of carrying amount and net realisable value. Any excess of the carrying amount over the net realisable value is recognised as impairment loss.

(11) Financial Instruments

Financial instruments of the Group include cash and cash equivalents, bond investments, equity securities other than long-term equity investments, receivables, derivative financial instruments, payables, loans, bonds payable, and share capital, etc.

- (a) Classification, recognition and measurement of financial instruments

The Group recognises a financial asset or a financial liability on its balance sheet when the Group enters into and becomes a party to the underlining contract of the financial instrument.

The Group classifies financial assets and liabilities into different categories at initial recognition based on the purpose of acquiring assets and assuming liabilities: financial assets and financial liabilities at fair value through profit or loss, loans and receivables, held-to-maturity investments, available-for-sale financial assets and other financial liabilities.

Financial assets and financial liabilities are initially recognised at fair value. For financial asset or financial liability of which the change in its fair value is recognised in income statement, the relevant transaction cost is recognised in the income statement. The transaction costs for other financial assets or financial liabilities are included in the initially recognised amount. Subsequent to initial recognition financial assets and liabilities are measured as follows:

Financial asset or financial liability with change in fair value recognised in the income statement (including financial asset or financial liability held for trading)

Financial assets, financial liabilities and derivative instruments held by the Group for the purpose of selling or repurchasing in short term. These financial instruments are initially measured at fair value with subsequently changes in fair value recognised in income statement.

Receivables

Receivables are non-derivative financial assets with fixed or determinable recoverable amount and with no quoted price in active market. After the initial recognition, receivables are measured at amortised cost using the effective interest method.

Held-to-maturity investment

Held-to-maturity investment includes non-derivative financial assets with fixed or determinable recoverable amount and fixed maturity that the Group has the positive intention and ability to hold to maturity.

After the initial recognition, held-to-maturity investments are stated at amortised cost using the effective interest rate method.

3 SIGNIFICANT ACCOUNTING POLICIES (Continued)

(11) Financial Instruments (Continued)

(a) Classification, recognition and measurement of financial instruments (Continued)

Available-for-sale financial assets

Available-for-sale financial assets include non-derivative financial assets that are designated as available for sales and other financial assets which do not fall into any of the above categories. Investments in equity instruments that do not have quoted market prices in active markets and whose fair value cannot be reliably measured are stated at cost.

Other than the above equity instrument investments whose fair values cannot be measured reliably, other available-for-sale financial assets are initially stated at fair values. The gains or losses arising from changes in the fair value are directly recognised in equity, except for the impairment losses and exchange differences from monetary financial assets denominated in foreign currencies, which are recognised in the income statement. The cumulative gains and losses previously recognised in equity are transferred to the income statement when the available-for-sale financial assets are derecognised. Dividend income from these equity instruments is recognised in profit or loss when the investee declares the dividends. Interest on available-for-sale financial assets calculated using the effective interest method is recognised in profit or loss (see Note 3(17)(c)).

Derivative financial instruments

Derivative financial instruments are recognised initially at fair value. At each balance sheet date the fair value is remeasured. The gain or loss on remeasurement of derivative financial instruments to fair value is charged immediately to the profit or loss, except where the derivatives qualify for cash flow hedge accounting or hedge the net investment in a foreign operation, in which case recognition of any resultant gain or loss depends on the nature of the item being hedged (see Note 3(11)(c)).

Other financial liabilities

Financial liabilities other than the financial liabilities at fair value through profit or loss are classified as other financial liabilities.

Among other financial liabilities, financial guarantees are contracts that require the issuer (i.e. the guarantor) to make specified payments to reimburse the beneficiary of the guarantee (the holder) for a loss the holder incurs because a specified debtor fails to make payment when due in accordance with the terms of a debt instrument. Where the Group issues a financial guarantee, subsequent to initial recognition, the guarantee is measured at the higher of the amount initially recognised less accumulated amortisation and the amount of a provision determined in accordance with the principles of contingent liabilities (see Note 3(16)).

Except for the other financial liabilities described above, subsequent to initial recognition, other financial liabilities are measured at amortised cost using the effective interest method.

(b) Determination of fair value

Fair value of financial asset or financial liability is determined with reference to quoted market price in active market without adjusting for transaction costs that may be incurred upon future disposal or settlement is used to establish the fair value of financial asset or financial liability. For a financial asset held or a financial liability to be assumed, the quoted price is the current bid price and, for a financial asset to be acquired or a financial liability assumed, it is the current asking price.

If no active market exists for a financial instrument, a valuation technique is used to establish the fair value. Valuation techniques include using arm's length market transactions between knowledgeable, willing parties; reference to the current fair value of other instrument that is substantially the same; discounted cash flows and option pricing model. The Group calibrates the valuation technique and tests it for validity periodically.

3 SIGNIFICANT ACCOUNTING POLICIES (Continued)

(11) Financial Instruments (Continued)

(c) Hedge accounting

Hedge accounting is a method which recognises the offsetting effects on profit or loss of changes in the fair values of the hedging instrument and the hedged item in the same accounting period(s).

Hedged items are the items that expose the Group to risks of changes in fair value or future cash flows and that are designated as being hedged. The Group's hedged items include fixed-rate borrowings that expose the Group to risk of changes in fair values, floating rate borrowings that expose the Group to risk of variability in cash flows, and a forecast transaction that is settled with a fixed amount of foreign currency and expose the Group to foreign currency risk.

A hedging instrument is a designated derivative whose changes in fair value or cash flows are expected to offset changes in the fair value or cash flows of the hedged item. For a hedge of foreign currency risk, a non-derivative financial asset or non-derivative financial liability may also be used as a hedging instrument.

The hedge is assessed by the Group for effectiveness on an ongoing basis and determined to have been highly effective throughout the accounting periods for which the hedging relationship was designated. The Group uses a ratio analysis to assess the subsequent effectiveness of a cash flow hedge, And uses a regression analysis to assess the subsequent effectiveness of a fair value hedge.

Cash flow hedges

A cash flow hedge is a hedge of the exposure to variability in cash flows. The portion of the gain or loss on the hedging instrument that is determined to be an effective hedge is recognised directly in shareholders' equity as a separate component. That effective portion is adjusted to the lesser of the following (in absolute amounts):

the cumulative gain or loss on the hedging instrument from inception of the hedge

the cumulative change in present value of the expected future cash flows on the hedged item from inception of the hedge.

The portion of the gain or loss on the hedging instrument that is determined to be an ineffective hedge is recognised in profit or loss.

If a hedge of a forecast transaction subsequently results in the recognition of a non-financial asset or non-financial liability, the associated gain or loss is removed from shareholders' equity, included in the initial cost of the non-financial asset or liability, and recognised in profit or loss in the same year during which the financial asset or financial liability affects profit or loss. However, if the Group expects that all or a portion of a net loss recognised directly in shareholders' equity will not be recovered in future accounting periods, it reclassifies the amount that is not expected to be recovered into profit or loss.

If a hedge of a forecast transaction subsequently results in the recognition of a financial asset or a financial liability, the associated gain or loss is removed from equity and recognised in profit or loss in the same period during which the financial asset or financial liability affects profit or loss. However, if the Group expects that all or a portion of a net loss recognised directly in shareholders' equity will not be recovered in future accounting periods, it reclassifies the amount that is not expected to be recovered into profit or loss.

For cash flow hedges, other than those covered by the preceding two policy statements, the associated gain or loss is removed from shareholders' equity and recognised in profit or loss in the same period or periods during which the hedged forecast transaction affects profit or loss.

When a hedging instrument expires or is sold, terminated or exercised, or the hedge no longer meets the criteria for hedge accounting, the Group will discontinue the hedge accounting treatments prospectively. In this case, the gain or loss on the hedging instrument that remains recognised directly in shareholders' equity from the period when the hedge was effective shall not be reclassified into profit or loss and is recognised in accordance with the above policy when the forecast transaction occurs. If the forecast transaction is no longer expected to occur, the gain or loss on the hedging instrument that remains recognised directly in shareholders' equity from the period when the hedge was effective shall be reclassified into profit or loss immediately.

Fair value hedges

A fair value hedge is a hedge of the exposure to changes in fair value of a recognised asset or liability or an unrecognised firm commitment, or an identified portion of such an asset, liability or unrecognised firm commitment.

The gain or loss from re-measuring the hedging instrument at fair value is recognised in profit or loss. The gain or loss on the hedged item attributable to the hedged risk adjusts the carrying amount of the hedged item and is recognised in profit or loss

When a hedging instrument expires or is sold, terminated or exercised, or no longer meets the criteria for hedge accounting, the Group discontinues prospectively the hedge accounting treatments. If the hedged item is a financial instrument measured at amortised cost, any adjustment to the carrying amount of the hedged item is amortised to profit or loss from the adjustment date to the maturity date using the recalculated effective interest rate at the adjustment date.

Hedge of net investment in foreign operation

A hedge of a net investment in a foreign operation is a hedge of the exposure to foreign exchange risk associated with a net investment in a foreign operation. The portion of the gain or loss on a hedging instrument that is determined to be an effective hedge is recognised directly in equity as a separate component until the disposal of the foreign operation, at which time the cumulative gain or loss recognised directly in equity is recognised in profit or loss. The ineffective portion is recognised immediately in profit or loss.

3 SIGNIFICANT ACCOUNTING POLICIES (Continued)

(11) Financial Instruments (Continued)

(d) Convertible bonds

Convertible bonds that contain an equity component

Convertible bonds that can be converted to equity share capital at the option of the holder, where the number of shares that would be issued on conversion and the value of the consideration that would be received at that time do not vary, are accounted for as compound financial instruments which contain both a liability component and an equity component.

At initial recognition the liability component of the convertible bonds is measured as the present value of the future interest and principal payments, discounted at the market rate of interest applicable at the time of initial recognition to similar liabilities that do not have a conversion option. Any excess of proceeds over the amount initially recognised as the liability component is recognised as the equity component. Transaction costs that relate to the issue of the convertible bonds are allocated to the liability and equity components in proportion to the allocation of proceeds.

The liability component is subsequently carried at amortised cost. The interest expense recognised in the income statement on the liability component is calculated using the effective interest method. The equity component is recognised in the capital reserve until either the bond is converted or redeemed.

If the bond is converted, the capital reserve, together with the carrying amount of the liability component at the time of conversion, is transferred to share capital and share premium as consideration for the shares issued. If the bond is redeemed, the capital reserve is transferred to retained profits.

Other convertible bonds

Convertible bonds issued with a cash settlement option and other embedded derivative features are split into liability and derivative components.

At initial recognition, the derivative component of the convertible bonds is measured at fair value. Any excess of proceeds over the amount initially recognised as the derivative component is recognised as the liability component. Transaction costs that relate to the issue of the convertible bonds are allocated to the liability and derivative components in proportion to the allocation of proceeds. The portion of the transaction costs relating to the liability component is recognised initially as part of the liability. The portion relating to the derivative component is recognised immediately as an expense in the income statement.

The derivative component is subsequently remeasured at each balance sheet date and any gains or losses arising from change in the fair value are recognised in the income statement. The liability component is subsequently carried at amortised cost until extinguished on conversion or redemption. The interest expense recognised in the income statement on the liability component is calculated using the effective interest method. Both the liability and the related derivative components are presented together for financial statements reporting purposes.

If the convertible bonds are converted, the carrying amounts of the derivative and liability components are transferred to share capital and share premium as consideration for the shares issued. If the convertible bonds are redeemed, any difference between the amount paid and the carrying amounts of both components is recognised in the income statement.

(e) Derecognition of financial assets and financial liabilities

The Group derecognises a financial asset when the contractual right to receive cash flows from the financial asset expires, or where the Group transfers substantially all risks and rewards of ownership.

On derecognition of a financial asset, the difference between the following amounts is recognised in income statement:

the carrying amounts, and

the sum of the consideration received and any cumulative gain or loss that had been recognised directly in equity.

Where the obligations for financial liabilities are completely or partially discharged, the entire or part of financial liabilities are derecognised.

3 SIGNIFICANT ACCOUNTING POLICIES (Continued)

(12) Impairment of financial assets and non-financial long-term assets

(a) Impairment of financial assets

The carrying amount of financial assets (except those financial assets stated at fair value with changes in the fair values charged to income statement) are reviewed at each balance sheet date to determine whether there is objective evidence of impairment. If any such evidence exists, impairment loss is provided.

Receivables and held-to-maturity investments

Receivables and held-to-maturity investments are assessed for impairment on an individual basis.

Where impairment is assessed on an individual basis, an impairment loss in respect of a receivable or held-to-maturity investment is calculated as the excess of its carrying amount over the present value of the estimated future cash flows (exclusive of future credit losses that have not been incurred) discounted at the original effective interest rate. All impairment losses are recognised in income statement.

Impairment loss on receivables and held-to-maturity investments is reversed in the income statement if evidence suggests that the financial assets' carrying amounts have increased and the reason for the increase is objectively as a result of an event occurred after the recognition of the impairment loss. The reversed carrying amount shall not exceed the amortised cost if the financial assets had no impairment recognised.

Available-for-sale financial assets

Available-for-sale financial assets are assessed for impairment on an individual basis.

When available-for-sale financial assets are impaired, despite not derecognised, the cumulative losses resulted from the decrease in fair value which had previously been recognised directly in shareholders' equity, are reversed and charged to income statement.

Impairment loss of available-for-sale debt instrument is reversed, if the reason for the subsequent increase in fair value is objectively as a result of an event occurred after

the recognition of the impairment loss. Impairment loss for available-for-sale equity instrument is not reversed through income statement.

(b) Impairment of other non-financial long-term assets

Internal and external sources of information are reviewed at each balance sheet date for indications that the following assets, including fixed assets, construction in progress, goodwill, intangible assets and investments in subsidiaries, associates and jointly controlled entities may be impaired.

Assets are tested for impairment whenever events or changes in circumstances indicate that their carrying amounts may not be recoverable. The recoverable amounts of goodwill and intangible assets with uncertain useful lives are estimated annually no matter there are any indications of impairment. Goodwill is tested for impairment together with related asset units or groups of asset units.

An asset unit is the smallest identifiable group of assets that generates cash inflows largely independent of the cash inflows from other assets or groups of assets. An asset unit comprises related assets that generate associated cash inflows. In identifying an asset unit, the Group primarily considers whether the asset unit is able to generate cash inflows independently as well as the management style of production and operational activities, and the decision for the use or disposal of asset.

The recoverable amount is the greater of the fair value less costs to sell and the present value of expected future cash flows generated by the asset (or asset unit, set of asset units).

Fair value less costs to sell of an asset is based on its selling price in an arm's length transaction less any direct costs attributable to the disposal. Present value of expected future cash flows is the estimation of future cash flows to be generated from the use of and upon disposal of the asset, discounted at an appropriate pre-tax discount rate over the assets remaining useful life.

If the recoverable amount of an asset is less than its carrying amount, the carrying amount is reduced to the recoverable amount. The amount by which the carrying amount is reduced is recognised as an impairment loss in the income statement. A provision for impairment loss of the asset is recognised accordingly. Impairment losses related to an asset unit or a set of asset units first reduce the carrying amount of any goodwill allocated to the asset unit or set of asset units, and then reduce the carrying amount of the other assets in the asset unit or set of asset units on a pro rata basis. However, that the carrying amount of an impaired asset will not be reduced below the higher of its individual fair value less costs to sell (if determinable) and the present value of expected future cash flows (if determinable).

Impairment losses for assets are not reversed.

(13) Long-term deferred expenses

Long-term deferred expenses are amortised on a straight-line basis over their beneficial periods.

3 SIGNIFICANT ACCOUNTING POLICIES (Continued)

(14) Employee benefits

Employee benefits are all forms of considerations given and other related expenses incurred in exchange for services rendered by employees. When an employee has rendered service to the Group during an accounting period, the Group shall recognise the employee benefits payable (other than termination benefits) as a liability and charged to the cost of an asset or as an expense in the same time.

(a) Retirement benefits

Pursuant to the relevant laws and regulations of the PRC, the Group has joined a basic pension insurance for the employees arranged by local Labour and Social Security Bureaus. The Group makes contributions to the pension insurance at the applicable rates based on the amounts stipulated by the government organisation. The contributions are charged to profit or loss on an accrual basis. When employees retire, the local Labour and Social Security Bureaus are responsible for the payment of the basic pension benefits to the retired employees. The Group does not have any other obligations in this respect.

(b) Housing fund and other social insurance

Besides the pension benefits, pursuant to the relevant laws and regulations of the PRC, the Group has joined defined social security contributions for employees, such as a housing fund, basic medical insurance, unemployment insurance, injury insurance and maternity insurance. The Group makes contributions to the housing fund and other social insurances mentioned above at the applicable rate(s) based on the employees' salaries. The contributions are recognised as cost of assets or charged to profit or loss on an accrual basis.

(c) Termination benefits

When the Group terminates the employment relationship with employees before the employment contracts have expired, or provides compensation as an offer to encourage employees to accept voluntary redundancy, a provision for the termination benefits provided, is recognised in profit or loss when both of the following conditions have been satisfied:

The Group has a formal plan for the termination of employment or has made an offer to employees for voluntary redundancy, which will be implemented shortly

The Group is not allowed to withdraw from termination plan or redundancy offer unilaterally.

(15) Deferred tax assets and liabilities

Deferred tax assets and liabilities are recognised based on deductible temporary differences and taxable temporary differences, respectively. Temporary difference is the difference between the carrying amounts of assets and liabilities and their tax bases including unused tax losses and unused tax credits able to be utilised in subsequent years. Deferred tax assets are recognised to the extent that it is probable that future taxable income will be available to offset the deductible temporary differences.

Temporary differences arise in a transaction, which is not a business combination, and at the time of transaction, does not affect accounting profit or taxable profit (or unused tax losses), will not result in deferred tax. Temporary differences arising from the initial recognition of goodwill will not result in deferred tax.

At the balance sheet date, the amounts of deferred tax recognised is measured based on the expected manner of recovery or settlement of the carrying amount of the assets and liabilities, using tax rates that are expected to be applied in the period when the asset is recovered or the liability is settled in accordance with tax laws.

The carrying amount of deferred tax assets is reviewed at each balance sheet date. If it is unlikely to obtain sufficient taxable income to offset against the benefit of deferred tax asset, the carrying amount of the deferred tax assets is written down. Any such write-down should be subsequently reversed where it becomes probable that sufficient taxable income will be available.

At the balance sheet date, deferred tax assets and liabilities are offset if all the following conditions are met:

the taxable entity has a legally enforceable right to set off current tax assets against current tax liabilities, and

they relate to income taxes levied by the same tax authority on either:

the same taxable entity; or

different taxable entities which either to intend to settle the current tax liabilities and assets on a net basis, or to realise the assets and settle the liabilities simultaneously, in each future period in which significant amounts of deferred tax liabilities or assets are expected to be settled or recovered.

(16) Provisions and contingent liabilities

Provisions are recognised when the Group has a present obligation as a result of a contingent event, it is probable that an outflow of economic benefits will be required to settle the obligations and a reliable estimate can be made. Where the effect of time value of money is material, provisions are determined by discounting the expected future cash flows.

Provisions for future dismantlement costs are initially recognised based on the present value of the future costs expected to be incurred in respect of the Group's expected dismantlement and abandonment costs at the end of related oil and gas exploration and development activities. Any subsequent change in the present value of the estimated costs, other than the change due to passage of time which is regarded as interest costs, is reflected as an adjustment to the provision of oil and gas properties.

A provision for onerous contracts is recognised when the economic benefits to be derived by the Group from a contract are lower than the unavoidable cost of meeting its obligations under the contract. The provision is measured at the present value of the lower of the expected cost of terminating the contract and the expected net cost of continuing with the contract.

3 SIGNIFICANT ACCOUNTING POLICIES (Continued)

(17) Revenue recognition

Revenue is the gross inflow of economic benefits arising in the course of the Group's normal activities when the inflows result in increase in shareholder's equity, other than increase relating to contributions from shareholders. Revenue is recognised in profit or loss when it is probable that the economic benefits will flow to the Group, the revenue and costs can be measured reliably and the following respective conditions are met:

(a) Revenues from sales of goods

Revenue from the sales of goods is recognised when all of the general conditions stated above and following conditions are satisfied:

the significant risks and rewards of ownership and title have been transferred to buyers, and

the Group does not retain the management rights, which is normally associated with owner, on goods sold and has no control over the goods sold.

Revenue from the sale of goods is measured at fair value of the considerations received or receivable under the sales contract or agreement.

(b) Revenues from rendering services

The Group determines the revenue from the rendering of services according to the fair value of the received or to-be received price of the party that receives the services as stipulated in the contract or agreement.

At the balance sheet date, when the outcome of a transaction involving the rendering of services can be estimated reliably at the balance sheet date, revenue from rendering of services is recognised in the income statement by reference to the stage of completion of the transaction based on the proportion of services performed to date to the total services to be performed.

When the outcome of rendering the services cannot be estimated reliably, revenues are recognised only to the extent that the costs incurred are expected to be recoverable. If the costs of rendering of services are not expected to be recoverable, the costs are charged to the income statement when incurred, and revenues are not recognised.

(c) Interest income

Interest income is recognised on a time proportion basis with reference to the principal outstanding and the applicable effective interest rate.

(18) Government grants

Government grants are the gratuitous monetary assets or non-monetary assets that the Group receives from the government, excluding capital injection by the government as an investor. Special funds such as investment grants allocated by the government, if clearly defined in official documents as part of capital reserve are dealt with as capital contributions, and not regarded as government grants.

Government grants are recognised when there is reasonable assurance that the grants will be received and the Group is able to comply with the conditions attaching to them. Government grants in the form of monetary assets are recorded based on the amount received or receivable, whereas non-monetary assets are measured at fair value.

Government grants received in relation to assets are recorded as deferred income, and recognised evenly in the income statement over the assets' useful lives. Government grants received in relation to revenue are recorded as deferred income, and recognised as income in future periods as compensation when the associated future expenses or losses arise; or directly recognised as income in the current period as compensation for past expenses or losses.

(19) Borrowing costs

Borrowing costs incurred on borrowings for the acquisition, construction or production of qualified assets are capitalised into the cost of the related assets.

Except for the above, other borrowing costs are recognised as financial expenses in the income statement when incurred.

(20) Repairs and maintenance expenses

Repairs and maintenance (including overhauling expenses) expenses are recognised in the income statement when incurred.

(21) Environmental expenditures

Environmental expenditures that relate to current ongoing operations or to conditions caused by past operations is expensed as incurred.

(22) Research and development costs

Research and development costs are recognised in the income statement when incurred.

(23) Operating leases

Operating lease payments are charged as expenses on a straight-line basis over the period of the respective leases.

(24) Dividends

Dividends and distributions of profits proposed in the profit appropriation plan which will be authorised and declared after the balance sheet date, are not recognised as a liability at the balance sheet date and are separately disclosed in the notes to the financial statements.

3 SIGNIFICANT ACCOUNTING POLICIES (Continued)

(25) Related parties

If a party has the power to control, jointly control or exercise significant influence over another party, or vice versa, or where two or more parties are subject to common control, joint control or significant influence from another party, they are considered to be related parties. Related parties may be individuals or enterprises. Where enterprises are subject to state control but are otherwise unrelated, they are not related parties. Related parties of the Group and the Company include, but not limited to:

- (a) the holding company of the Company;
- (b) the subsidiaries of the Company;
- (c) the parties that are subject to common control with the Company;
- (d) investors that have joint control or exercise significant influence over the Group;
- (e) enterprises or individuals if a party has control, joint control or significant influence over both the enterprises or individuals and the Group;
- (f) jointly controlled entities of the Group;
- (g) associates of the Group;
- (h) the major individual investors of the Group and a close family member of such individuals;
- (i) the member of key management personnel of the Group, and a close family member of such individuals;
- (j) the member of key management personnel of the Company's holding company;
- (k) close family member of key management personnel of the Company's holding company; and
- (l) an entity which is under control, joint control or significant influence of major individual investor, key management personnel or a close family of such individuals.

(26) Segment reporting

Reportable segments are identified based on operating segments which are determined based on the structure of the Group's internal organisation, management requirements and internal reporting system. An operating segment is a component of the Group that meets the following respective conditions:

Engage in business activities from which it may earn revenues and incur expenses;

Whose operating results are regularly reviewed by the Group's management to make decisions about resource to be allocated to the segment and assess its performance; and

For which financial information regarding financial position, results of operations and cash flows are available.

4 CHANGES IN ACCOUNTING POLICIES

In accordance with China Accounting Standards for Business Enterprises Bulletin No.3 (Bulletin No.3) issued in 2009 and the Notice on the Preparation of the 2009 Annual Report of Listed and Non-listed Companies (Cai Kuai [2009]16), which was issued during the year ended 31 December 2009, the Group changed the following significant accounting policies:

- (1) Change in presentation of income statement and statement of change in equity

Additional account captions, other comprehensive income and total comprehensive income, were included in the income statement under earnings per share. Other comprehensive income represents the after tax effect of total gains and losses, which have been not recognised in the net profit according to ASBE. Total comprehensive income represents the aggregate amount of net profit and other comprehensive income. The above changes have also been applied to the Group's consolidated income statement with account captions, total comprehensive income attributable to the equity shareholders of the Company and total comprehensive income attributable to minority interests, presented below the total comprehensive income.

The item of gains and losses recognised directly in equity and its breakdowns are deleted under the item of changes for the year in the statement of changes in equity. An item of other comprehensive income is added to show the changes of other comprehensive income occurred during the year.

Comparative figures have been restated to confirm with the above new change of presentation in the income statement and statement of changes in equity. Please see the income statement and statement of changes in equity for details.

- (2) Segment reporting

Bulletin No.3 requires segment disclosure to be based on the way that the Group's chief operating decision maker manages the Group, with the amounts reported for each reportable segment being the measures reported to the Group's chief operating decision maker for the purposes of assessing segment performance and making decisions about operating matters. This contrasts with the presentation of segment information in prior years which was based on a disaggregation of the Group's financial statements into segments based on related products and services and on geographical areas. However, the adoption of Bulletin No.3 has not resulted in any significant changes to the presentation of segment information since the identification and presentation of reportable segments in prior periods were consistent with Bulletin No.3.

5 TAXATION

Major types of tax applicable to the Group are income tax, consumption tax, resources tax, value added tax, special oil income levy, city construction tax and education surcharge.

The Corporate Income Tax Law of the People's Republic of China (New tax law) took effect on 1 January 2008. According to the new tax law, the income tax rate applicable to the Group is changed to 25% from 1 January 2008; however, certain entities previously taxed at a preferential rate are subject to a transition period during which their tax rate will gradually be increased to the unified rate of 25% over a five-year period starting from 1 January 2008.

Based on the new tax law, the income tax rate applicable to the Group, except for certain entities of the Group, is changed from 33% to 25% from 1 January 2008. Based on a tax notice issued by the State Council on 26 December 2007, the applicable tax rates for foreign investment enterprises operating in special economic zones, which were previously taxed at the preferential rate of 15%, are 18%, 20%, 22%, 24% and 25% for the years ending 31 December 2008, 2009, 2010, 2011 and 2012, respectively. According to the same notice, the applicable tax rate for entities operating in the western region of the PRC which were granted a preferential tax rate of 15% remains at 15% for the years ending 31 December 2008, 2009 and 2010 and will be increased to 25% from 1 January 2011.

Before 1 January 2009, consumption tax is levied on gasoline, diesel, naphtha, solvent oil, lubricant oil, fuel oil and jet fuel oil at a rate of RMB 277.6 per tonne, RMB 117.6 per tonne, RMB 277.0 per tonne, RMB 256.4 per tonne, RMB 225.2 per tonne, RMB 101.5 per tonne and RMB 124.6 per tonne, respectively. Effective from 1 January 2009, the consumption tax rates on gasoline, diesel, naphtha, solvent oil, lubricant oil, fuel oil and jet fuel oil changed to RMB 1,388.0 per tonne, RMB 940.8 per tonne, RMB 1,385.0 per tonne, RMB 1,282.0 per tonne, RMB 1,126.0 per tonne, RMB 812.0 per tonne and RMB 996.8 per tonne, respectively.

Resources tax is levied on crude oil and natural gas at rates ranging from RMB 14 per tonne to RMB 30 per tonne and RMB 7 to RMB 15 per 1000 cubic metre, respectively.

Value added tax rate for liquefied petroleum gas, natural gas and certain agricultural products is 13% and that for other products is 17%.

The Ministry of Finance imposed a special oil income levy on any income derived from the sale by an oil exploration and production enterprise of locally produced crude oil exceeding a standard price. The levy starts at USD 40 per barrel and the imposed rate ranges from 20% to 40%.

The branches and subsidiaries granted with tax concession are set out below:

Name of branches and subsidiaries	Preferential tax rate	Reasons for granting concession
Sinopec National Star Xinan Branch	15%	Tax preferential policy in the western part of China
Sinopec National Star Xibei Branch	15%	Tax preferential policy in the western part of China
Tahe Oilfield Petrochemical Factory	15%	Tax preferential policy in the western part of China
Zhanjiang Dongxing Petrochemical Company Limited	20%	Foreign investment enterprise
Sinopec Hainan Refining and Chemical Company Limited	2-year exemption and 3-year 50% reduction	Foreign investment enterprise

Deposits at related parties represent deposits placed at Sinopec Finance Company Limited and Sinopec Century Bright Capital Investment Limited. Deposits interest is calculated based on market rate.

At 31 December 2009, time deposits with financial institutions of the Group and the Company amounted to RMB 1,236 million (2008: RMB 752 million) and RMB 24 million (2008: RMB 31 million), respectively.

7 BILLS RECEIVABLES

Bills receivable represents mainly the bills of acceptance issued by banks for sales of goods and products.

At 31 December 2009, the Group's and the Company's outstanding endorsed or discounted bills (with recourse) amounted to RMB 10,213 million (2008: RMB 11,074 million) and RMB 9,597 million (2008: RMB 9,118 million), respectively, all of which are due before 31 December 2010.

At 31 December 2009 and 2008, the total amounts of the top five other receivables of the Group are set out below:

	2009	2008
Total amount (RMB millions)	710	2,611
Ageing	From within one year to over three years	From within one year to over three years
Percentage to the total balance of other receivables	10.2%	11.3%

At 31 December 2009, the Group's and the Company's other receivables due from related parties amounted to RMB 762 million and RMB 18,393 million (2008: RMB 3,307 million and RMB 12,678 million), representing 11.0% and 82.7% (2008: 14.3% and 46.5%) of the total of other receivables.

Except for the balances disclosed in Note 47, there is no amount due from shareholders who hold 5% or more voting right of the Company included in the balance of other receivables.

At 31 December 2008, income tax receivable of RMB 9,784 million and RMB 9,768 million are included in the Group's and the Company's other receivables, respectively. At 31 December 2009, there is no income tax receivable included in the Group's and the Company's other receivables.

During the year ended 31 December 2009 and 2008, the Group and the Company had no individually significant other receivables been fully or substantially provided allowance for doubtful accounts.

During the year ended 31 December 2009 and 2008, the Group and the Company had no individually significant write-off or recovery of doubtful debts which had been fully or substantially provided for in prior years.

At 31 December 2009 and 2008, the Group and the Company had no individually significant other receivables that aged over three years.

10 PREPAYMENTS

All prepayments are aged within one year.

Except for the balances disclosed in Note 47, there is no amount due from shareholders who hold 5% or more voting right of the Company included in the balance of prepayments.

11 INVENTORIES

	The Group		The Company	
	2009	2008	2009	2008
	RMB	RMB	RMB	RMB
	millions	millions	millions	millions
Raw materials	87,471	54,085	54,326	44,417
Work in progress	11,609	10,745	8,182	7,187
Finished goods	39,737	35,858	24,782	22,097
Spare parts and consumables	3,832	4,480	2,285	2,887
	142,649	105,168	89,575	76,588
Less: Provision for diminution in value of inventories	1,038	9,189	582	6,342
	141,611	95,979	88,993	70,246

Provision for diminution in value of inventories is mainly against spare parts and consumables. For the year ended 31 December 2009, the provision for diminution in value of inventories of the Group and the Company was primarily due to the costs of inventories of the refining and chemicals segments were higher than their net realisable value.

Balance at 31 December 2008	19,051	143,315	69,321	100,225	331,912

Notes:

(i)

The additions in the exploration and production segment and oil and gas properties of the Group and the Company for year ended 31 December 2009 included RMB 2,013 million (2008: RMB 1,482 million) and RMB 1,897 million (2008: RMB 1,358 million), respectively, relating to the estimated dismantlement costs for site restoration recognised during the year.

(ii)

During the year ended 31 December 2009, the Group acquired certain fixed assets from Sinopec Group Company (Note 47).

The factor resulting in the exploration and production (E&P) segment impairment losses of RMB 1,595 million of fixed assets for the year ended 31 December 2009 was unsuccessful development drilling and high operating and development costs for certain small oil fields. The primary factor resulting in the E&P segment impairment losses of RMB 4,600 million for the year ended 31 December 2008 and was primarily due to downward reserves estimation for certain oil fields resulting from lower oil and gas pricing. The carrying values of these E&P properties were written down to respective recoverable amounts which were determined based on the present values of the expected future cash flows of the assets. The oil and gas pricing was a factor used in the determination of the present values of the expected future cash flows of the assets and had an impact on the recognition of the asset impairment.

Impairment losses recognised on fixed assets of the refining and chemicals segments were RMB 377 million (2008: RMB 270 million) and RMB 3,728 million (2008: RMB 1,511 million) for the year ended 31 December 2009. These impairment losses relate to certain refining and chemicals production facilities that are held for use. The carrying values of these facilities were written down to their recoverable amounts that were primarily determined based on the asset held for use model using the present value of the estimated future cash flows of the production facilities. The primary factor resulting in the impairment losses on fixed assets of the refining and chemicals segments was due to higher operating and production costs caused by the increase in the prices of raw materials that are not expected to be covered through an increase in selling price.

Provision for impairment losses recognised on fixed assets of the marketing and distribution segment of RMB 1,425 million (2008: RMB 698 million) for the year ended 31 December 2009 primarily relate to certain service stations that were closed during the year. In measuring the amounts of impairment charges, the carrying amounts of these assets were compared to the present value of the expected future cash flows of the assets, as well as information about sales and purchases of similar properties in the same geographic area.

At 31 December 2009 and 2008, the Group and the Company had no individually significant fixed assets which were pledged.

At 31 December 2009 and 2008, the Group and the Company had no individually significant fixed assets which were temporarily idle or pending for disposal.

At 31 December 2009 and 2008, the Group and the Company had no individually significant fully depreciated fixed assets which were still in use.

Amortisation charged to the intangible assts of the Company for the year is RMB 676 million.

16 GOODWILL

Goodwill is allocated to the following Group's cash-generating units:

	Balance at 1 January 2009 RMB millions	Increase/ (decrease) for the year RMB millions	Balance at 31 December 2009 RMB millions	Provision for impairment losses RMB millions	Net book value at 31 December 2009 RMB millions
Sinopec Beijing Yanshan Branch	1,157		1,157		1,157
Sinopec Zhenhai Refining and Chemical Branch	4,043		4,043		4,043
Sinopec Qilu Branch	2,159		2,159		2,159
Sinopec Yangzi Petrochemical Company Limited	2,737		2,737		2,737
Sinopec Zhongyuan oil field branch	1,391		1,391	(1,391)	
Sinopec Shengli Oil Field Dynamic Company Limited	1,361		1,361		1,361
Hong Kong service stations	924	2	926		926

Multiple units without individually significant goodwill	1,947	(167)	1,780		1,780
	15,719	(165)	15,554	(1,391)	14,163

Goodwill represents the excess of the cost of purchase over the fair value of the underlying assets and liabilities. The recoverable amounts of Sinopec Beijing Yanshan Branch, Sinopec Zhenhai Refining and Chemical Branch, Sinopec Qilu Branch, Sinopec Yangzi Petrochemical Company Limited, Sinopec Shengli Oil Field Dynamic Company Limited and Hong Kong service stations are determined based on value in use calculations. These calculations use cash flow projections based on financial budgets approved by management covering a one-year period and pre-tax discount rates primarily ranging from 11.2% to 13.6% (2008: 10.0% to 12.8%). Cash flows beyond the one-year period are maintained constant. Management believes any reasonably possible change in the key assumptions on which these entities' recoverable amounts are based would not cause these entities' carrying amounts to exceed their recoverable amounts.

Key assumptions used for the value in use calculations for these entities are the gross margin and sales volume. Management determined the budgeted gross margin based on the gross margin achieved in the period immediately before the budget period and management's expectation on the future trend of the prices of crude oil and petrochemical products. The sales volume was based on the production capacity and/or the sales volume in the period immediately before the budget period.

17 LONG-TERM DEFERRED EXPENSES

Long-term deferred expenses primarily represent prepaid rental expenses over one year and catalysts expenditures.

18 DEFERRED TAX ASSETS AND LIABILITIES

Deferred tax assets / (liabilities)	8,596	7,237	(4,544)	(4,456)	4,052	2,781

At 31 December 2009, certain subsidiaries of the Company did not recognise the tax value of loss carried forward of RMB 5,555 million (2008: RMB 7,975 million), of which RMB 472 million (2008: RMB 3,762 million) was incurred for the year ended 31 December 2009, because it was not probable that the related tax benefit will be realised. The tax value of these losses carried forward of RMB 928 million, RMB 1,231 million, RMB 392 million, RMB 2,532 million and RMB 472 million will expire in 2010, 2011, 2012, 2013 and 2014, respectively.

Periodically, management performed assessment on the probability that taxable profit will be available over the period which the deferred tax assets can be realised or utilised. In assessing the probability, both positive and negative evidence was considered, including whether it is probable that the operations will have future taxable profits over the periods which the deferred tax assets are deductible or utilised and whether the tax losses result from identifiable causes which are unlikely to recur.

19 DETAILS OF IMPAIRMENT LOSSES

At 31 December 2009, impairment losses of the Group are analysed as follows:

	Note	Balance at 1 January 2009 RMB millions	Provision for the year RMB millions	Written back for the year RMB millions	Written off for the year RMB millions	Balance at 31 December 2009 RMB millions
Allowance for doubtful accounts Included:

20 SHORT-TERM LOANS

The Group's and the Company's short-term loans represent:

	The Group		The Company	
	2009	2008	2009	2008
	RMB	RMB	RMB	RMB
	millions	millions	millions	millions
Short-term bank loans	21,587	41,355	5,050	20,392
Loans from Sinopec Group Company and fellow subsidiaries	13,313	33,060	678	14,063
Total	34,900	74,415	5,728	34,455

At 31 December 2009, the Group's and the Company's weighted average interest rates per annum on short-term loans were 2.5% (2008: 4.8%) and 4.6% (2008: 4.7%), respectively. The majority of the above loans are by credit.

Except for the balances disclosed in Note 47, there is no amount due to shareholders who hold 5% or more voting right of the Company included in the balance of short-term loans.

At 31 December 2009 and 2008, the Group and the Company had no significant overdue short-term loan.

21 BILLS PAYABLE

Bills payable primarily represented bank accepted bills for the purchase of material, goods and products. The repayment term is normally within one year.

22 ACCOUNTS PAYABLE

Except for the balances disclosed in Note 47, there is no amount due to shareholders who hold 5% or more voting right of the Company included in the balance of accounts payable.

At 31 December 2009 and 2008, the Group and the Company had no individually significant accounts payable aged over one year.

23 ADVANCES FROM CUSTOMERS

Except for the balances disclosed in Note 47, there is no amount due to shareholders who hold 5% or more voting right of the Company included in the balance of advances from customers.

At 31 December 2009 and 2008, the Group and the Company had no individually significant advances from customers aged over one year.

24 EMPLOYEE BENEFITS PAYABLE

At 31 December 2009 and 2008, the Group's and the Company's employee benefits payable primarily represented wages payable and social insurance payable.

25 TAXES PAYABLE

	The Group		The Company

The maturity analysis of the Group's and the Company's long-term loans is as follows:

	The Group		The Company	
	2009	2008	2009	2008
	RMB	RMB	RMB	RMB
	millions	millions	millions	millions
Between one and two years	4,085	9,991	3,944	4,885
Between two and five years	11,181	15,545	10,885	11,353
After five years	36,799	39,401	36,720	36,836
Total long-term loans	52,065	64,937	51,549	53,074

28 LONG-TERM LOANS (Continued)

At 31 December 2009, the top five long-term loans (including long-term loans due within one year) of the Group are set out below:

Lenders	Borrowing dates	Maturity dates	Currency	Interest rate	Remaining	Remaining
					balance at 31 December 2009	balance at 31 December 2008
					RMB millions	RMB millions
Sinopec Finance Company Limited	18 October 2000	31 December 2020	RMB	interest free	35,561	35,561
China Development Bank	20 January 2005	20 December 2013	RMB	5.35%	13,000	13,000
Industrial and Commercial Bank of china, Hainan Branch	1 September 2005	31 August 2010	RMB	6.97%	1,500	1,500
Industrial and Commercial Bank of China	2 April 2007	1 April 2010	RMB	5.91%	1,000	1,000
Bank of China	3 July 2009	3 July 2012	RMB	4.86%	1,000	

Except for the balances disclosed in Note 47, there is no amount due to shareholders who hold 5% or more voting right of the Company included in the balance of long-term loans.

Long-term loans are primarily unsecured, and carried at amortised costs.

29 DEBENTURES PAYABLE

	The Group		The Company	
	2009	2008	2009	2008
	RMB millions	RMB millions	RMB millions	RMB millions
Short-term corporate bonds (i)	31,000	15,000	30,000	15,000

Convertible Bonds (iii)	10,371	9,870	10,371	9,870
Convertible Bonds with Warrants (iv)	24,892	23,837	24,892	23,837
	93,763	62,207	93,763	62,207

- (i) The Company issued six-month corporate bonds of face value at RMB 15 billion to corporate investors in the PRC debenture market on 22 December 2008 at par value of RMB 100. The effective yield of the six-month corporate bonds is 2.30% per annum. The corporate bonds matured in June 2009.

A subsidiary of the Group issued 330-day corporate bonds of face value at RMB 1 billion to corporate investors in the PRC debenture market on 3 April 2009 at par value of RMB 100. The effective yield of the 330-day corporate bonds is 2.05% per annum. The corporate bonds will mature in March 2010.

The Company issued one-year corporate bonds of face value at RMB 15 billion to corporate investors in the PRC debenture market on 16 July 2009. The effective yield of the one-year corporate bonds is 1.88% per annum and interest is paid annually. The corporate bonds will mature in July 2010.

The Company issued one-year corporate bonds of face value at RMB 15 billion to corporate investors in the PRC debenture market on 12 November 2009. The effective yield of the one-year corporate bonds is 2.30% per annum and interest is paid annually. The corporate bonds will mature in November 2010.

- (ii) The Company issued ten-year corporate bonds of RMB 3.5 billion to PRC citizens as well as PRC legal and non-legal persons on 24 February 2004. The ten-year corporate bond bears a fixed interest rate of 4.61% per annum and interest is paid annually. Interest payable for the current period was included in other payables.

The Company issued ten-year corporate bonds of RMB 5 billion to corporate investors in the PRC on 10 May 2007. The ten-year corporate bond bears a fixed interest rate of 4.20% per annum and interest is paid annually. Interest payable for the current period was included in other payables.

The Company issued five-year corporate bonds of RMB 8.5 billion to corporate investors in the PRC on 13 November 2007. The five-year corporate bond bears a fixed interest rate of 5.40% per annum and interest is paid annually. Interest payable for the current period was included in other payables.

The Company issued ten-year corporate bonds of RMB 11.5 billion to corporate investors in the PRC on 13 November 2007. The ten-year corporate bond bears a fixed interest rate of 5.68% per annum and interest is paid annually. Interest payable for the current period was included in other payables.

The Company issued three-year corporate bonds of RMB 10 billion to corporate investors in the PRC debenture market on 27 March 2009. The three-year corporate bond bears a fixed interest rate of 2.25% per annum and interest is paid annually. Interest payable for the current period was included in other payables.

The Company issued three-year corporate bonds of RMB 20 billion to corporate investors in the PRC debenture market on 26 June 2009. The three-year corporate bond bears a fixed interest rate of 2.48% per annum and interest is paid annually. Interest payable for the current period was included in other payables.

29 DEBENTURES PAYABLE (Continued)

- (iii) On 24 April 2007, the Company issued zero coupon convertible bonds due 2014 with an aggregate principal amount of HK\$11.7 billion (the "Convertible Bonds"). The Convertible Bonds are convertible into shares of the Company from 4 June 2007 onwards at a price of HK\$10.76 per share, subject to adjustment for, amongst other things, subdivision or consolidation of shares, bonus issues, rights issues, capital distribution, change of control and other events, which have a dilutive effect on the issued share capital of the Company (the "Conversion component"). Unless previously redeemed, converted or purchased and cancelled, the Convertible Bonds will be redeemed on the maturity date at 121.069% of the principal amount. The Company has an early redemption option at any time after 24 April 2011 (subject to certain criteria) (the "Early Redemption Option") and a cash settlement option when the holders exercise their conversion right (the "Cash Settlement Option"). The holders also have an early redemption option to require the Company to redeem all or some of the Convertible Bonds on 24 April 2011 at an early redemption amount of 111.544% of the principal amount.

At 31 December 2009, the carrying amounts of liability and derivative components, representing the Conversion component, the Early Redemption Option and the Cash Settlement Option, of the Convertible Bonds were RMB 10,153 million (2008: RMB 9,870 million) and RMB 218 million (2008: RMB nil), respectively. No conversion of the Convertible Bonds has occurred up to 31 December 2009.

At 31 December 2009 and 2008, the fair value of the derivative component of the Convertible Bonds was calculated using the Black-Scholes Model. The following are the major inputs used in the Black-Scholes Model:

	2009	2008
Stock price of underlying shares	HKD 6.91	HKD 4.69
Conversion price	HKD 10.76	HKD 10.76
Option adjusted spread	150 basis points	450 basis points
Average risk free rate	0.87%	1.64%
Average expected life	2.8 years	3.8 years

Any change in the major inputs into the Black-Scholes Model will result in changes in the fair value of the derivative component. The change in the fair value of the conversion option from 31 December 2008 to 31 December 2009 resulted in a loss from changes in fair value of RMB 218 million (2008: gain from changes in fair value of RMB 3,947 million), which has been recorded as (loss)/gain from changes in fair value in the income statement for the year ended 31 December 2009.

The initial carrying amount of the liability component is the residual amount, which is the cash proceeds from issuance of debentures after deducting the allocated issuance cost of the Convertible Bonds relating to the liability component and the fair value of the derivative component as at 24 April 2007. Interest expense is

calculated using the effective interest method by applying the effective interest rate of 4.19% to the adjusted liability component. If the aforesaid derivative component has not been separated out and the entire Convertible Bonds is considered as the liability component, the effective interest rate would have been 3.03%.

- (iv) On 26 February 2008, the Company issued convertible bonds with stock warrants due 2014 with an aggregate principal amount of RMB 30 billion in the PRC (the "Bonds with Warrants"). The Bonds with Warrants with fixed interest rate of 0.8% per annum and interest payable annually, were issued at par value of RMB 100. The Bonds with Warrants were guaranteed by Sinopec Group Company. Each lot of the Bonds with Warrants, comprising ten Bonds with Warrants are entitled to warrants (the "Warrants") to subscribe 50.5 A shares of the Company during the 5 trading days prior to 3 March 2010 at an initial exercise price of RMB 19.68 per share, subject to adjustment for, amongst other things, cash dividends, subdivision or consolidation of shares, bonus issues, rights issues, capital distribution, change of control and other events which have a dilutive effect on the issued share capital of the Company.

As at 31 December 2009, the exercise price of the Warrants was adjusted to RMB 19.15 per share (2008: RMB 19.43 per share) as a result of the final dividend of 2008 and the interim dividend of 2009 declared during the year ended 31 December 2009.

The initial recognition of the liability component of the Bond with Warrants is measured as the present value of the future interest and principal payments, discounted at the market rate of interest applicable at the time of initial recognition to similar liabilities that do not have a conversion option. Interest expense is calculated using the effective interest method by applying the effective interest rate of 5.40% to the liability component. The excess of proceeds from the issuance of the Bonds with Warrants, net of issuance costs, over the amount initially recognised as the liability component is recognised as the equity component in capital reserve until either the Warrants is exercised or expired. If the equity component has not been separated out and the entire Bonds with Warrants is considered as the liability component, the effective interest rate would have been 0.8%. The initial carrying amounts of liability and equity components of the Bonds with Warrants were RMB 22,971 million and RMB 6,879 million upon issuance, respectively.

30 PROVISIONS

Provisions primarily represent provision for future dismantlement costs of oil and gas properties. The Group has committed to the PRC government to establish certain standardised measures for the dismantlement of its retired oil and gas properties by making reference to the industry practices and is thereafter constructively obligated to take dismantlement measures of its retired oil and gas properties. Movement of provision of the Group's obligations for the dismantlement of its retired oil and gas properties is as follow:

	The Group RMB millions	The Company RMB millions
Balance at 1 January 2009	9,234	8,794
Provision for the year	2,013	1,897
Accretion expenses	429	405
Utilised	(218)	(214)
Balance at 31 December 2009	11,458	10,882

31 SHARE CAPITAL

	The Group and the Company 2009 RMB millions	2008 RMB millions
Registered, issued and fully paid:		
69,921,951,000 domestic listed A shares of RMB 1.00 each	69,922	69,922
16,780,488,000 overseas listed H shares of RMB 1.00 each	16,780	16,780
	86,702	86,702

The Company was established on 25 February 2000 with a registered capital of 68.8 billion domestic state-owned domestic shares with a par value of RMB 1.00 each, which were all held by Sinopec Group Company (Note 1).

Pursuant to the resolutions passed at an Extraordinary General Meeting of the Company held on 25 July 2000 and the approval from relevant authorities, the Company issued 15,102,439,000 H shares with a par value of RMB 1.00 each in its initial global offering in October 2000. The shares include 12,521,864,000 H shares and 25,805,750 American Depositary Shares (ADSs), each representing 100 H shares) at prices of HK\$ 1.59 and US\$ 20.645, respectively. As part of the offering, 1,678,049,000 shares were offered in placing to Hong Kong and overseas investors.

In July 2001, the Company issued 2,800,000,000 domestic listed A shares with a par value of RMB 1.00 each at RMB 4.22.

On 25 September 2006, the shareholders of listed A shares accepted the proposal offered by the shareholders of state-owned A shares whereby the shareholders of state-owned A shares agreed to transfer 2.8 state-owned A shares to shareholders of listed A shares for every 10 listed A shares they held, in exchange for the approval for the listing of all state-owned A shares. 66,337,951,000 domestic state-owned A shares have been granted trading right upon settlement of the above consideration. The 784,000,000 state-owned A shares paid to the shareholders of the listed A shares were tradable on 10 October 2006.

All the domestic ordinary shares and H shares rank pari passu in all material aspects.

KPMG Huazhen had verified the above paid-in capital. The capital verification reports, KPMG-C (2000) CV No. 0007, KPMG-C (2001) CV No. 0002 and KPMG-C (2001) CV No. 0006 were issued on 22 February 2000, 27 February 2001 and 23 July 2001, respectively.

32 CAPITAL RESERVE

The movements in capital reserve are as follows:

	The Group RMB millions	The Company RMB millions
Balance at 1 January 2009	40,848	38,464
Changes in fair value of cash flow hedge, net of deferred tax (Note 44)	54	
Changes in fair value of available-for-sale financial assets, net of deferred tax (i)	668	830
Consideration for the combination of entities under common control (Note 1)	(771)	
Acquisition of minority interests of subsidiaries (ii)	(18)	
Distribution to Sinopec Group Company	(49)	(1,600)
Government grants (iii)	580	540
Reclassified to retained profits (iv)	(3,110)	
Balance at 31 December 2009	38,202	38,234

The capital reserve represents mainly: (a) the difference between the total amount of the par value of shares issued and the amount of the net assets transferred from Sinopec Group Company in connection with the Reorganisation; (b) share premiums derived from issuances of H shares and A shares by the Company and excess of cash paid by investors over their proportionate shares in share capital; (c) the equity component of the Bonds with Warrants; (d) difference between consideration paid for the combination of entities under common control over the carrying amount of the net assets acquired; and (e) adjustment for changes in fair value of available-for-sale financial assets.

- (i) The available-for-sale financial assets held by the Group and the Company are carried at fair value with any change in fair value, net of deferred tax, recognised directly in capital reserve.
- (ii) During the current year, the Group acquired minority interests from subsidiaries. The difference between the considerations paid over total amounts of the net assets acquired was recognised in capital reserve.
- (iii) Pursuant to Cai Qi [2009] No.344, the Group received certain government grants, which were accounted for as capital reserve pursuant to relevant government regulations.
- (iv) The Group acquired the Acquired Group from Sinopec Group Company during the current year (Note 1). According to the accounting policy of business combination involving entities under common control (Note 3(1)(a)), the Group's proportionate shares in retained profits' debit balance of the Acquired Group on the acquisition date were transferred out from capital reserve.

33 SURPLUS RESERVES

Movements in surplus reserves are as follows:

	The Group and the Company		
	Statutory surplus reserve	Discretionary surplus reserve	Total
	RMB millions	RMB millions	RMB millions
Balance at 1 January 2009	43,078	47,000	90,078
Appropriation	4,953	20,000	24,953
Balance at 31 December 2009	48,031	67,000	115,031

The Articles of Association of the Company and the PRC Company Law have set out the following profit appropriation plans:

- (a) 10% of the net profit is transferred to the statutory surplus reserve;
- (b) After the transfer to the statutory surplus reserve, a transfer to discretionary surplus reserve can be made upon the passing of a resolution at the shareholders' meeting.

34 OPERATING INCOME AND OPERATING COSTS

	The Group		The Company	
	2009	2008	2009	2008
	RMB	RMB	RMB	RMB
	millions	millions	millions	millions
Income from principal operations	1,315,915	1,413,203	849,049	929,981
Income from other operations	29,137	31,088	27,254	29,483
Total	1,345,052	1,444,291	876,303	959,464
Operating cost	1,035,815	1,321,030	638,169	840,076

The income from principal operations represents revenue from sales of crude oil, natural gas, petroleum and chemical products net of value added tax. Operating costs primarily represents the products cost related to the principal operations. The Group's segmental information is set out in Note 52.

For the year ended 31 December 2009, revenue from sales to top five customers amounted to RMB 104,900 million (2008: RMB 134,000 million) which accounted for 8% (2008: 9%) of total operating income of the Group.

35 SALES TAXES AND SURCHARGES

	The Group		The Company	
	2009	2008	2009	2008

Total	1,275	51,911	1,100	34,578

Note: During the year ended 31 December 2008, the Group recognised grant income of RMB 50,342 million. These government grants were for compensation of losses incurred due to the distortion of the correlation of domestic refined petroleum product prices and the crude oil prices, and the measures taken by the Group to stabilise the supply in the PRC refined petroleum product market during the year. There are no unfulfilled

conditions and other contingencies attached to the receipts of these grants. The Group did not receive such government grant during year ended 31 December 2009.

45 DIVIDENDS

(a) Dividends of ordinary shares declared after the balance sheet date Pursuant to a resolution passed at the Directors' meeting on 26 March 2010, a final dividends in respect of the year ended 31 December 2009 of RMB 0.11 per share totalling RMB 9,537 million was proposed for shareholders' approval at the Annual General Meeting.

(b) Dividends of ordinary shares declared during the year Pursuant to the Company's Articles of Association and a resolution passed at the Directors' meeting on 21 August 2009, an interim dividend for the year ended 31 December 2009 of RMB 0.07 (2008: RMB 0.03) per share totalling RMB 6,069 million (2008: RMB 2,601 million) was declared.

Pursuant to the shareholders' approval at the Annual General Meeting on 22 May 2009, a final dividend of RMB 0.09 per share totalling RMB 7,803 million in respect of the year ended 31 December 2008 was declared and paid on 30 June 2009.

Pursuant to the shareholders' approval at the Annual General Meeting on 26 May 2008, a final dividend of RMB 0.115 per share totaling RMB 9,971 million in respect of the year ended 31 December 2007 was declared and paid on 30 June 2008.

46 SUPPLEMENTAL INFORMATION TO THE CASH FLOW STATEMENT

(a) Reconciliation of net profit to cash flows from operating activities:

		The Group		The Company	
		2009	2008	2009	2008

47 RELATED PARTIES AND RELATED PARTY TRANSACTIONS

(a)	Related parties having the ability to exercise control over the Group
The name of the company	: China Petrochemical Corporation
Organisation code	: 10169286-X
Registered address	: No. 22, Chaoyangmen North Street, Chaoyang District, Beijing
Principal activities	: Exploration, production, storage and transportation (including pipeline transportation), sales and utilisation of crude oil and natural gas; refining; wholesale and retail of gasoline, kerosene and diesel; production, sales, storage and transportation of petrochemical and other chemical products; industrial investment and investment management; exploration, construction, installation and maintenance of petroleum and petrochemical constructions and equipments; manufacturing electrical equipment; research, development, application and consulting services of information technology and alternative energy products; import & export of goods and technology.
Relationship with the Group	: Ultimate holding company
Types of legal entity	: State-owned
Authorised representative	: Su Shulin
Registered capital	: RMB 130,645 million

For the year ended 31 December 2009, Sinopec Group Company held 75.84% shares of the Company and there is no change on percentage shareholding during this reporting period.

(b) Related parties not having the ability to exercise control over the Group

Related parties under common control of a parent company with the Company:

Sinopec Finance Company Limited
 Sinopec Shengli Petroleum Administration Bureau
 Sinopec Zhongyuan Petroleum Exploration Bureau
 Sinopec Assets Management Corporation
 Sinopec Engineering Incorporation
 Sinopec Century Bright Capital Investment Limited
 Sinopec Petroleum Storage and Reserve Limited
 Sonagol Sinopec International Limited

Associates of the Group:

Sinopec Railway Oil Marketing Company Limited
 China Aviation Oil Supply Company Limited
 Sinopec Changjiang Fuel Company Limited
 BPZR (Ningbo) LPG Company Limited
 China Shipping & Sinopec Suppliers Company Limited

Jointly controlled entities of the Group:

Shanghai Secco Petrochemical Company Limited
 BASF-YPC Company Limited
 Fujian Refining and Petrochemical Company Limited

- (c) The principal related party transactions with Sinopec Group Company and fellow subsidiaries, associates and jointly controlled entities, which were carried out in the ordinary course of business, are as follows:

	Note	The Group		The Company	
		2009 RMB millions	2008 RMB millions	2009 RMB millions	2008 RMB millions
Sales of goods	(i)	162,671	186,381	72,924	95,732
Purchases	(ii)	75,521	56,516	44,665	35,951
Transportation and storage	(iii)	1,251	1,206	1,115	1,047
Exploration and development services	(iv)	31,343	33,034	29,936	31,462
Production related services	(v)	17,603	14,133	16,036	12,703
Ancillary and social services	(vi)	3,329	1,611	3,254	1,592
Operating lease charges	(vii)	4,866	4,897	4,703	4,698
Agency commission income	(viii)	45	78	6	
Interest received	(ix)	38	19	20	109
Interest paid	(x)	1,045	1,725	657	937
Net deposits (placed with) /withdrawn					
from related parties	(xi)	(4,640)	(353)	(2,274)	83
Net loans (repaid to)/ obtained from related parties	(xii)	(19,657)	10,754	(12,195)	(2,544)

The amounts set out in the table above in respect of the year ended 31 December 2009 and 2008 represent the relevant costs to the Group and the Company and income from related parties as determined by the corresponding contracts with the related parties.

47 RELATED PARTIES AND RELATED PARTY TRANSACTIONS (Continued)

- (c) The principal related party transactions with Sinopec Group Company and fellow subsidiaries, associates and jointly controlled entities, which were carried out in the ordinary course of business, are as follows: (Continued)

At 31 December 2009 and 31 December 2008, there were no guarantees given to banks by the Group and the Company in respect of banking facilities to Sinopec Group Company and fellow subsidiaries. Guarantees given to banks by the Group and the Company in respect of banking facilities to subsidiaries, associates and jointly controlled entities are disclosed in Note 51(b).

The directors of the Company are of the opinion that the above transactions with related parties were conducted in the ordinary course of business and on normal commercial terms or in accordance with the agreements governing such transactions.

Notes:

- (i) Sales of goods represent the sale of crude oil, intermediate petrochemical products, petroleum products and ancillary materials.
- (ii) Purchases represent the purchase of material and utility supplies directly related to the Group's operations such as the procurement of raw and ancillary materials and related services, supply of water, electricity and gas.
- (iii) Transportation and storage represent the cost for the use of railway, road and marine transportation services, pipelines, loading, unloading and storage facilities.
- (iv) Exploration and development services comprise direct costs incurred in the exploration and development of crude oil such as geophysical, drilling, well testing and well measurement services.
- (v) Production related services represent ancillary services rendered in relation to the Group's operations such as equipment repair and general maintenance, insurance premium, technical research, communications, fire fighting, security, product quality testing and analysis, information technology, design and engineering, construction which includes the construction of oilfield ground facilities, refineries and chemical plants, manufacture of replacement parts and machinery, installation, project management and environmental protection.
- (vi) Ancillary and social services represent expenditures for social welfare and support services such as educational facilities, media communication services, sanitation, accommodation, canteens, property maintenance and management services.

- (vii) Operating lease charges represent the rental paid to Sinopec Group Company for operating leases in respect of land, buildings and equipment.
- (viii) Agency commission income represents commission earned for acting as an agent in respect of sales of products and purchase of materials for certain entities owned by Sinopec Group Company.
- (ix) Interest received represents interest received from deposits placed with Sinopec Finance Company Limited and Sinopec Century Bright Capital Investment Limited, finance companies controlled by Sinopec Group Company. The applicable interest rate is determined in accordance with the market interest rate.
- (x) Interest paid represents interest charges on the loans and advances obtained from Sinopec Group Company and Sinopec Finance Company Limited.
- (xi) Deposits placed with/ withdraw from related parties represent net deposits placed with/ withdraw from Sinopec Finance Company Limited and Sinopec Century Bright Capital Investment Limited.
- (xii) The Group obtained or repaid loans from or to Sinopec Group Company and fellow subsidiaries. The calculated periodic balance of average loan for year ended 31 December 2009, which is based on monthly average balances, was RMB 51,934 million (2008: RMB 60,121 million).

In connection with the Reorganisation, the Company and Sinopec Group Company entered into a number of agreements under which 1) Sinopec Group Company will provide goods and products and a range of ancillary, social and supporting services to the Group and 2) the Group will sell certain goods to Sinopec Group Company. These agreements impacted the operating results of the Group for year ended 31 December 2009. The terms of these agreements are summarised as follows:

- (a) The Company has entered into a non-exclusive Agreement for Mutual Provision of Products and Ancillary Services (‘Mutual Provision Agreement’) with Sinopec Group Company effective from 1 January 2000 in which Sinopec Group Company has agreed to provide the Group with certain ancillary production services, construction services, information advisory services, supply services and other services and products. While each of Sinopec Group Company and the Company is permitted to terminate the Mutual Provision Agreement upon at least six months’ notice, Sinopec Group Company has agreed not to terminate the agreement if the Group is unable to obtain comparable services from a third party. The pricing policy for these services and products provided by Sinopec Group Company to the Group is as follows:
 - 1 the government-prescribed price;
 - 1 where there is no government-prescribed price, the government guidance price;
 - 1 where there is neither a government-prescribed price nor a government guidance price, the market price; or

1 where none of the above is applicable, the price to be agreed between the parties, which shall be based on a reasonable cost incurred in providing such services plus a profit margin not exceeding 6%.

- (b) The Company has entered into a non-exclusive Agreement for Provision of Cultural and Educational, Health Care and Community Services with Sinopec Group Company effective from 1 January 2000 in which Sinopec Group Company has agreed to provide the Group with certain cultural, educational, health care and community services on the same pricing terms and termination conditions as agreed to in the above Mutual Provision Agreement.

47 RELATED PARTIES AND RELATED PARTY TRANSACTIONS (Continued)

- (c) The principal related party transactions with Sinopec Group Company and fellow subsidiaries, associates and jointly controlled entities, which were carried out in the ordinary course of business, are as follows: (Continued)
- (c) The Company has entered into a number of lease agreements with Sinopec Group Company to lease certain land and buildings at a rental of approximately RMB 4,225 million (2008: RMB 4,234 million) and RMB 568 million (2008: RMB 568 million), respectively, per annum. The Company and Sinopec Group Company can renegotiate the rental amount every three years for land and every year for buildings, however, such amount can not exceed the market price as determined by an independent third party. The Group has the option to terminate these leases upon six months notice to Sinopec Group Company.
- (d) The Company has entered into agreements with Sinopec Group Company effective from 1 January 2000 under which the Group has been granted the right to use certain trademarks, patents, technology and computer software developed by Sinopec Group Company.
- (e) The Company has entered into a service station franchise agreement with Sinopec Group Company effective from 1 January 2000 under which its service station and retail stores would exclusively sell the refined products supplied by the Group.

Pursuant to the resolutions passed at the Directors' meeting held on 27 March 2009, the Group acquired the entire equity interests of Sinopec Qingdao Petrochemical Company Limited and certain storage and distribution operations from Sinopec Group Company for total cash consideration of RMB 771 million (Note 1), and certain assets of the exploration and production and refining segments from Sinopec Group Company for total cash consideration of RMB 1,068 million.

Pursuant to the resolution passed at the Directors' meeting held on 21 August 2009, the Group acquired certain operating assets related to the others business segment from a subsidiary of Sinopec Group Company for total consideration of RMB 3,946 million.

Pursuant to the resolutions passed at the Directors' meeting held on 26 June 2008, the Group acquired the Downhole Assets from Sinopec Group Company, primarily fixed assets, for a consideration of RMB 1,624 million, which approximated the net carrying value of the assets and liabilities of the Downhole Assets.

- (d) Balances with Sinopec Group Company and fellow subsidiaries, associates and jointly controlled entities

The balances with the Group's related parties at 31 December 2009 and 2008 are as follows:

	The ultimate holding company		Other related companies	
	2009	2008	2009	2008
	RMB millions	RMB millions	RMB millions	RMB millions
Cash and cash equivalents			5,336	696
Accounts receivable	1	340	1,031	3,738
Prepayments and other receivables	27	37	783	4,506
Accounts payable			4,800	3,352
Advances from customers			955	1,875
Other payables	5		10,965	10,865
Short-term loans			13,313	33,060
Long-term loans (including current portion) (Note)			37,330	37,240

Note: The Sinopec Group Company had lent an interest-free loan for 20 years amounted to RMB 35,561 million to the Group through Sinopec Finance Company Limited which was included in the long-term loans.

As at and for the year ended 31 December 2009, and as at and for the year ended 31 December 2008, no individually significant impairment losses for bad and doubtful debts were recorded in respect of amounts due from Sinopec Group Company and fellow subsidiaries, associates and jointly controlled entities.

(e) Key management personnel emoluments

Key management personnel are those persons having authority and responsibility for planning, directing and controlling the activities of the Group, directly or indirectly, including directors and supervisors of the Group. The key management personnel compensations are as follows:

	2009	2008
	RMB thousands	RMB thousands
Short-term employee benefits	7,664	6,530
Retirement scheme contributions	287	198
	7,951	6,728

48 PRINCIPAL ACCOUNTING ESTIMATES AND JUDGEMENTS

The Group's financial condition and results of operations are sensitive to accounting methods, assumptions and estimates that underlie the preparation of the financial statements. The Group bases the assumptions and estimates on historical experience and on various other assumptions that it believes to be reasonable and which form the basis for making judgements about matters that are not readily apparent from other sources. On an on-going basis, management evaluates its estimates. Actual results may differ from those estimates as facts, circumstances and conditions change.

The selection of critical accounting policies, the judgements and other uncertainties affecting application of those policies and the sensitivity of reported results to changes in conditions and assumptions are factors to be considered when reviewing the financial statements. The principal accounting policies are set forth in Note 3. The Group believes the following critical accounting policies involve the most significant judgements and estimates used in the preparation of the financial statements.

(a) Oil and gas properties and reserves

The accounting for the exploration and production segment's oil and gas activities is subject to accounting rules that are unique to the oil and gas industry. There are two methods to account for oil and gas business activities, the successful efforts method and the full cost method. The Group has elected to use the successful efforts method. The successful efforts method reflects the volatility that is inherent in exploring for mineral resources in that costs of unsuccessful exploratory efforts are charged to expense as they are incurred. These costs primarily include dry hole costs, seismic costs and other exploratory costs. Under the full cost method, these costs are capitalised and written-off or depreciated over time.

Engineering estimates of the Group's oil and gas reserves are inherently imprecise and represent only approximate amounts because of the subjective judgements involved in developing such information. There are authoritative guidelines regarding the engineering criteria that have to be met before estimated oil and gas reserves can be designated as "proved". Proved and proved developed reserves estimates are updated at least annually and take into account recent production and technical information about each field. In addition, as prices and cost levels change from year to year, the estimate of proved and proved developed reserves also changes. This change is considered a change in estimate for accounting purposes and is reflected on a prospective basis in related depreciation rates.

Future dismantlement costs for oil and gas properties are estimated with reference to engineering estimates after taking into consideration the anticipated method of dismantlement required in accordance with industry practices in the similar geographic area, including estimation of economic life of oil and gas properties, technology and price level. The present values of these estimated future dismantlement costs are capitalised as oil and gas properties with equivalent amounts recognised as provisions for dismantlement costs.

Despite the inherent imprecision in these engineering estimates, these estimates are used in determining depreciation expense, impairment expense and future dismantlement costs. Depreciation rates are determined based on estimated proved developed reserve quantities (the denominator) and capitalised costs of producing properties (the numerator). Producing properties' capitalised costs are amortised based on the unit-of-production method.

(b)

Impairment for assets

If circumstances indicate that the net book value of a long-lived asset may not be recoverable, the asset may be considered "impaired", and an impairment loss may be recognised in accordance with "ASBE 8 – Impairment of Assets". The carrying amounts of long-lived assets are reviewed periodically in order to assess whether the recoverable amounts have declined below the carrying amounts. These assets are tested for impairment whenever events or changes in circumstances indicate that their recorded carrying amounts may not be recoverable. When such a decline has occurred, the carrying amount is reduced to recoverable amount. For goodwill, the recoverable amount is estimated annually. The recoverable amount is the greater of the net selling price and the value in use. It is difficult to precisely estimate selling price because quoted market prices for the Group's assets or cash-generating units are not readily available. In determining the value in use, expected cash flows generated by the asset or the cash-generating unit are discounted to their present value, which requires significant judgement relating to level of sale volume, selling price and amount of operating costs. The Group uses all readily available information in determining an amount that is a reasonable approximation of recoverable amount, including estimates based on reasonable and supportable assumptions and projections of sale volume, selling price and amount of operating costs.

(c)

Depreciation

Fixed assets are depreciated on a straight-line basis over the estimated useful lives of the assets, after taking into account the estimated residual value. Management reviews the estimated useful lives of the assets regularly in order to determine the amount of depreciation expense to be recorded during any reporting period. The useful lives are based on the Group's historical experience with similar assets and taking into account anticipated technological changes. The depreciation expense for future periods is adjusted if there are significant changes from previous estimates.

(d)

Allowances for doubtful accounts

Management estimates impairment losses for bad and doubtful debts resulting from the inability of the Group's customers to make the required payments. Management bases the estimates on the ageing of the accounts receivable balance, customer credit-worthiness, and historical write-off experience. If the financial condition of the customers were to deteriorate,

actual write-offs would be higher than estimated.

(e)

Allowance for diminution in value of inventories

If the costs of inventories fall below their net realisable values, an allowance for diminution in value of inventories is recognised. Net realisable value represents the estimated selling price in the ordinary course of business, less the estimated costs of completion and the estimated costs necessary to make the sale. Management bases the estimates on all available information, including the current market prices of the finished goods and raw materials, and historical operating costs. If the actual selling prices were to be lower or the costs of completion were to be higher than estimated, the actual allowance for diminution in value of inventories could be higher than estimated.

49 PRINCIPAL SUBSIDIARIES

The Company's principal subsidiaries are limited companies operating in the PRC and have been consolidated into the Group's financial statements for the year ended 31 December 2009. The following list contains only the particulars of subsidiaries which principally affected the results, assets and liabilities of the Group:

Name of enterprise	Principal activities	Registered capital/paid-up capital RMB millions	Actual investment at December 2009 RMB millions	Percentage of equity interest/	Minorityæ interests atæ December 2009 RMB millions
				held by the Group %	
(a)	Subsidiaries acquired through group restructuring:				
China Petrochemical International Company Limited	Trading of petrochemical products and equipments	1,400	1,596	100.00	
Sinopec Sales Company Limited	Marketing and distribution of refined petroleum products	1,700	1,700	100.00	
Sinopec Yangzi Petrochemical Company Limited	Manufacturing of intermediate petrochemical products and petroleum products	16,337	9,027	100.00	
Fujian Petrochemical Company Limited (i)	Manufacturing of plastics, intermediate petrochemical productsæand petroleum products	4,769	2,269	50.00	2,212
Sinopec Shanghai Petrochemical Company Limited	Manufacturing of synthetic fibres, resin and plastics, intermediate petrochemical products and petroleum products	7,200	7,250	55.56	6,820
		HKD 104	HKD 243	72.34	563
					229

Edgar Filing: CHINA PETROLEUM & CHEMICAL CORP - Form 6-K

	Sinopec Kantons Holdings Limited	Trading of crude oil and petroleum products				
	Sinopec Yizheng Chemical Fibre Company Limited (i)	Production and sale of polyester chips and polyester fibres	4,000	3,509	42.00	4,086
	China International United Petroleum and Chemical Company Limited	Trading of crude oil and petrochemical products	3,040	3,381	100.00	
	Sinopec (Hong Kong) Limited	Trading of crude oil and petrochemical products	HKD 5,477	6,167	100.00	
(b)	Subsidiaries established by the Group:					
	Sinopec Shell (Jiangsu) Petroleum Marketing Company Limited	Marketing and distribution of refined petroleum products	830	498	60.00	654
	BP Sinopec (Zhejiang) Petroleum Company Limited	Marketing and distribution of refined petroleum products	800	480	60.00	555
	Sinopec Qingdao Refining and Chemical Company Limited	Manufacturing of intermediate petrochemical products and petroleum products	5,000	4,250	85.00	398
	Sinopec Senmei (Fujian) Petroleum Limited	Marketing and distribution of refined petroleum products	1,840	1,012	55.00	1,556
	Sinopec Chemical Sales Company Limited (ii)	Trading of petrochemical products	1,000	1,102	100.00	
	Sinopec International Petroleum Exploration and Production Limited (ii)	Investment in exploration, production and sales of petroleum and natural gas	4,500	4,500	100.00	
(c)	Subsidiaries acquired through business combination under common control:					
	Sinopec Zhongyuan Petrochemical Company Limited	Manufacturing of petrochemical products	2,400	2,244	93.51	87

Edgar Filing: CHINA PETROLEUM & CHEMICAL CORP - Form 6-K

Sinopec Hainan Refining and Chemical Company Limited	Manufacturing of intermediate petrochemical products and petroleum products	3,986	2,990	75.00	340
Sinopec Qindao Petrochemical Company Limited	Manufacturing of intermediate petrochemical products and petroleum products	1,595	RMB 1 yuan	100.00	

Except for Sinopec Kantons Holdings Limited and Sinopec (Hong Kong) Limited, which are incorporated in Bermuda and Hong Kong, respectively, all of the above principal subsidiaries are incorporated in the PRC.

Notes:

- (i) The Company consolidated the financial statements of the entity because the Company controlled the board of this entity and had the power to govern its financial and operating policies.
- (ii) The Company consolidated the financial statements of newly established Sinopec Chemical Sales Company Limited and Sinopec International Petroleum Exploration and Production Limited since 2009.

50 COMMITMENTS

Operating lease commitments

The Group and the Company lease land and buildings, service stations and other equipment through non-cancellable operating leases. These operating leases do not contain provisions for contingent lease rentals. None of the rental agreements contain escalation provisions that may require higher future rental payments.

At 31 December 2009 and 2008, the future minimum lease payments of the Group and the Company under operating leases are as follows:

	The Group		The Company	
	2009	2008	2009	2008
	RMB	RMB	RMB	RMB
	millions	millions	millions	millions
Within one year	6,084	6,066	5,988	5,983
Between one and two years	5,905	5,750	5,861	5,673
Between two and three years	5,834	5,655	5,803	5,615
Between three and four years	5,722	5,595	5,694	5,562
Between four and five years	5,604	5,519	5,577	5,487
After five years	145,338	149,893	145,116	149,725
Total	174,487	178,478	174,039	178,045

Capital commitments

At 31 December 2009 and 2008, the capital commitments are as follows:

	The Group		The Company	
	2009	2008	2009	2008
	RMB	RMB	RMB	RMB
	millions	millions	millions	millions
Authorised and contracted for	124,403	120,773	119,145	116,327
Authorised but not contracted for	58,959	49,931	50,539	46,027
Total	183,362	170,704	169,684	162,354

These capital commitments relate to oil and gas exploration and development, refining and petrochemical production capacity expansion projects and the construction of service stations and oil depots.

Exploration and production licenses

Exploration licenses for exploration activities are registered with the Ministry of Land and Resources. The maximum term of the Group's exploration licenses is 7 years, and may be renewed twice within 30 days prior to expiration of the original term with each renewal being for a two-year term. The Group is obligated to make progressive annual minimum exploration investment relating to the exploration blocks in respect of which the license is issued. The Ministry of Land and Resources also issues production licenses to the Group on the basis of the reserve reports approved by relevant authorities. The maximum term of a full production license is 30 years unless a special dispensation is given by the State Council. The maximum term of the production licenses issued to

the Group is 80 years as a special dispensation was given to the Group by the State Council. The Group's production license is renewable upon application by the Group 30 days prior to expiration.

The Group is required to make payments of exploration license fees and production right usage fees to the Ministry of Land and Resources annually which are expensed as incurred. Payments incurred were approximately RMB 395 million for the year ended 31 December 2009 (2008: RMB 437 million).

Estimated future annual payments are as follows:

	The Group		The Company	
	2009	2008	2009	2008
	RMB	RMB	RMB	RMB
	millions	millions	millions	millions
Within one year	136	123	136	123
Between one and two years	118	118	118	118
Between two and three years	21	20	21	20
Between three and four years	20	20	20	20
Between four and five years	20	19	20	19
After five years	689	651	689	651
Total	1,004	951	1,004	951

The implementation of commitments in previous year and the Group's commitments did not have material discrepancy.

51 CONTINGENT LIABILITIES

- (a) The Company has been advised by its PRC lawyers that, except for liabilities constituting or arising out of or relating to the business assumed by the Company in the Reorganisation, no other liabilities were assumed by the Company, and the Company is not jointly and severally liable for other debts and obligations incurred by Sinopec Group Company prior to the Reorganisation.
- (b) At 31 December 2009 and 2008, guarantees given by the Group and the Company to banks in respect of banking facilities granted to the parties below are as follows:

	The Group		The Company	
	2009	2008	2009	2008
	RMB	RMB	RMB	RMB
	millions	millions	millions	millions
Subsidiaries				170
Jointly controlled entities	14,815	11,223	9,543	9,543
Associates	181	181	61	75
Total	14,996	11,404	9,604	9,788

At 31 December 2009, the Company and a subsidiary have guaranteed to a jointly controlled entity in relation to the bank loans drawn down by the jointly controlled entity. The guarantees expire on 31 December 2015.

The Group monitors the conditions that are subject to the guarantees to identify whether it is probable that a loss has occurred, and recognises any such losses under guarantees when those losses are estimable. At 31 December 2009 and 2008, it is not probable that the Group will be required to make payments under the guarantees. Thus no liability has been accrued for a loss related to the Group's obligation under these guarantee arrangement.

Environmental contingencies

Under existing legislation, management believes that there are no probable liabilities that will have a material adverse effect on the financial position or operating results of the Group. The PRC government, however, has moved, and may move further towards more rigorous enforcement of applicable laws, and towards the adoption of more stringent environmental standards. Environmental liabilities are subject to considerable uncertainties which affect the Group's ability to estimate the ultimate cost of remediation efforts. These uncertainties include i) the exact nature and extent of the contamination at various sites including, but not limited to refineries, oil fields, service stations, terminals and land development areas, whether operating, closed or sold, ii) the extent of required cleanup efforts, iii) varying costs of alternative remediation strategies, iv) changes in environmental remediation requirements, and v) the identification of new remediation sites. The amount of such future cost is indeterminable due to such factors as the unknown magnitude of possible contamination and the unknown timing and extent of the corrective actions that may be required. Accordingly, the outcome of environmental liabilities under proposed or

future environmental legislation cannot reasonably be estimated at present, and could be material. The Group paid normal routine pollutant discharge fees of approximately RMB 3,196 million for the year ended 31 December 2009 (2008: RMB 2,284 million).

Legal contingencies

The Group is a defendant in certain lawsuits as well as the named party in other proceedings arising in the ordinary course of business. While the outcomes of such contingencies, lawsuits or other proceedings cannot be determined at present, management believes that any resulting liabilities will not have a material adverse effect on the financial position or operating results of the Group.

52 SEGMENT REPORTING

Segment information is presented in respect of the Group's operating segments. The format is based on the Group's management and internal reporting structure. In view of the fact that the Company and its subsidiaries operate mainly in the PRC, no geographical segment information is presented.

In a manner consistent with the way in which information is reported internally to the Group's chief operating decision maker for the purposes of resource allocation and performance assessment, the Group has identified the following five reportable segments. No operating segments have been aggregated to form the following reportable segments.

- (i) Exploration and production – which explores and develops oil fields, produces crude oil and natural gas and sells such products to the refining segment of the Group and external customers.
- (ii) Refining – which processes and purifies crude oil, which is sourced from the exploration and production segment of the Group and external suppliers, and manufactures and sells petroleum products to the chemicals and marketing and distribution segments of the Group and external customers.
- (iii) Marketing and distribution – which owns and operates oil depots and service stations in the PRC, and distributes and sells refined petroleum products (mainly gasoline and diesel) in the PRC through wholesale and retail sales networks.
- (iv) Chemicals – which manufactures and sells petrochemical products, derivative petrochemical products and other chemical products to external customers.
- (v) Others – which largely comprise the trading activities of the import and export companies of the Group and research and development undertaken by other subsidiaries.

The reportable segments are each managed separately because they manufacture and/or distribute distinct products with different production processes and due to their distinct operating and gross margin characteristics.

The Group's chief operating decision maker evaluates the performance and allocates resources to its operating segments on an operating income basis, without considering the effects of finance costs or investment income. Inter-segment transfer pricing is based on cost plus an appropriate margin, as specified by the Group's policy.

Assets dedicated to a particular segment's operations are included in that segment's total assets, which include all tangible and intangible assets, except for cash at bank and on hand, long-term equity investments, deferred tax assets and other non-current assets.

52 SEGMENT REPORTING (Continued)

Reportable information on the Group's operating segments is as follows:

		2009 RMB millions	2008 RMB millions
Income from principal operations			
Exploration and production			
	External sales	19,342	26,403
	Inter-segment sales	87,008	151,393

53 FINANCIAL INSTRUMENTS

Overview

Financial assets of the Group include cash at bank, equity investments, accounts receivable, bills receivable, prepayments, derivative financial instruments and other receivables. Financial liabilities of the Group include short-term and long-term loans, accounts payable, bills payable, advances from customers, debentures payable, derivative financial instruments and other payables.

The Group has exposure to the following risks from its use of financial instruments:

- 1 credit risk;
- 1 liquidity risk;
- 1 market risk; and

1 equity price risk.

The Board of Directors has overall responsibility for the establishment, oversight of the Group's risk management framework, and developing and monitoring the Group's risk management policies.

The Group's risk management policies are established to identify and analyse the risks faced by the Group, to set appropriate risk limits and controls, and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Group's activities. The Group, through its training and management standards and procedures, aims to develop a disciplined and constructive control environment in which all employees understand their roles and obligations. Internal audit department undertakes both regular and ad hoc reviews of risk management controls and procedures, the results of which are reported to the Group's audit committee.

53 FINANCIAL INSTRUMENTS (Continued)

Credit risk

Credit risk is the risk of financial loss to the Group if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from the Group's deposits placed with financial institutions and receivables from customers. To limit exposure to credit risk relating to deposits, the Group primarily places cash deposits only with large financial institution in the PRC with acceptable credit ratings. The majority of the Group's accounts receivable relates to sales of petroleum and chemical products to related parties and third parties operating in the petroleum and chemical industries. The Group performs ongoing credit evaluations of its customers' financial condition and generally does not require collateral on accounts receivable. The Group maintains an impairment loss for doubtful accounts and actual losses have been within management's expectations. No single customer accounted for greater than 10% of total accounts receivable.

The carrying amounts of cash at bank, time deposits with financial institutions, trade accounts and bills receivables, derivative financial instruments and other receivables, represent the Group's maximum exposure to credit risk in relation to financial assets.

Liquidity risk

Liquidity risk is the risk that the Group encounters short fall of capital when meeting its obligation of financial liabilities. The Group's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed capital conditions, without incurring unacceptable losses or risking damage to the Group's reputation. The Group prepares monthly cash flow budget to ensure that they will always have sufficient liquidity to meet its financial obligation as they fall due. The Group arranges and negotiates financing with financial institutions and maintains a certain level of standby credit facilities to reduce the liquidity risk.

At 31 December 2009, the Group has standby credit facilities with several PRC financial institutions which provide the Group to borrow up to RMB 159,500 million (2008: RMB 185,000 million) on an unsecured basis, at a weighted average interest rate of 3.33% (2008: 4.65%). At 31 December 2009, the Group's outstanding borrowings under these facilities were RMB 9,361 million (2008: RMB 33,484 million) and were included in short-term bank loans.

The following table sets out the remaining contractual maturities at the balance sheet date of the Group's and the Company's financial liabilities, which are based on contractual undiscounted cash flows (including interest payments computed using contractual rates or, if floating, based on prevailing rates current at the balance sheet date) and the earliest date the Group and the Company would be required to repay:

The Group

53 FINANCIAL INSTRUMENTS (Continued)

Market risk

Market risk is the risk that changes in market prices, such as foreign exchange rates and interest rates. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return on risk.

(a) Currency risk

Currency risk arises on financial instruments that are denominated in a currency other than the functional currency in which they are measured. The Group's currency risk exposure primarily relates to short-term and long-term debts and loans from Sinopec Group Company and fellow subsidiaries denominated in US Dollars, Japanese Yen and Hong Kong Dollars, and the Group enters into foreign exchange contracts to manage currency risk exposure.

The changes in the fair value of forward exchange contracts that economically hedge monetary assets and liabilities in foreign currencies are recognised as financial expenses. At 31 December 2008, the net fair value of forward exchange contracts used by the Group and the Company as economic hedges of monetary assets and liabilities in foreign currencies were RMB 114 million and RMB 16 million, respectively, and the notional amounts of these contracts held by the Group and the Company were RMB 660 million and USD 100 million, respectively. There was no forward exchange contract held by the Group and the Company at 31 December 2009.

Included in derivative financial instruments, short-term and long-term loans of the Group are the following amounts denominated in a currency other than the functional currency of the entity to which they relate:

	The Group		The Company	
	2009	2008	2009	2008
	millions	millions	millions	millions
Gross exposure arising from loans and borrowings				
US Dollars	USD 1,341	USD 1,232	USD 60	USD 277
Japanese Yen	JPY 22,500	JPY 28,037	JPY 22,500	JPY 28,037
Hong Kong Dollars	HKD 11,779	HKD 11,192	HKD 11,779	HKD 11,192

A 5 percent strengthening of Renminbi against the following currencies at 31 December 2009 and 2008 would have increased net profit for the year and retained profits of the Group by the amounts shown below. This analysis has been determined assuming that the change in foreign exchange rates had occurred at the balance sheet date and had been applied to the foreign currency balances to which the Group has significant exposure as stated above, and that all other variables, in particular interest rates, remain constant. The analysis is performed on the same basis for 2008.

	The Group	
	2009	2008
	RMB	RMB
	millions	millions
US Dollars	343	147
Japanese Yen	62	80
Hong Kong Dollars	389	370

Other than the amounts as disclosed above, the amounts of other financial assets and liabilities of the Group are substantially denominated in the functional currency of respective entity of the Group.

(b) Interest rate risk

The Group's interest rate risk exposure arises primarily from its short-term and long-term loans. Loans carrying interest at variable rates and at fixed rates expose the Group to cash flow interest rate risk and fair value interest rate risk, respectively. The interest rates and terms of repayment of short-term and long-term loans of the Group are disclosed in Note 20 and Note 28, respectively.

As at 31 December 2009, it is estimated that a general increase/decrease of 100 basis points in variable interest rates, with all other variables held constant, would decrease/increase the Group's net profit for the year and retained profits by approximately RMB 194 million (for the year ended 31 December 2008: RMB 263 million). This sensitivity analysis has been determined assuming that the change in interest rates had occurred at the balance sheet date and the change was applied to the Group's loans outstanding at that date with exposure to cash flow interest rate risk. The analysis is performed on the same basis for 31 December 2008.

(c) Commodity price risk

The Group engages in oil and gas operations and is exposed to commodity price risk related to price volatility of crude oil and refined petroleum products. The fluctuations in prices of crude oil and refined petroleum products could have significant impact on the Group. The Group uses derivative financial instruments, including commodity futures and swaps, to manage a portion of such risk. At 31 December 2009, the Group had certain commodity contracts of crude oil and refined oil products designated as qualified cash flow hedges and economic hedges. At 31 December 2009, the net fair value of such derivative hedging financial instruments is derivative financial assets of RMB 142 million (2008: RMB 224 million) recognised in other receivables and derivative financial liabilities of RMB 319 million (2008: RMB 122 million) recognised in other payables. At 31 December 2009 and 2008, the Company does not have any such derivative financial instruments.

As at 31 December 2009, it is estimated that a general increase/decrease of USD 10 per barrel in crude oil and refined petroleum products, with all other variables held constant, would decrease/increase the Group's profit for the year and retained profits by approximately RMB 215 million (2008: RMB nil), and increase/ decrease the Group's capital reserve by approximately RMB 1,991 million (2008: decrease/ increase RMB 200 million). This sensitivity analysis has been determined assuming that the change in prices had occurred at the balance sheet date and the change was applied to the Group's derivative financial instruments at that date with exposure to commodity price risk. The analysis is performed on the same basis for 2008.

53 FINANCIAL INSTRUMENTS (Continued)

Equity price risk

The Group is exposed to equity price risk arising from changes in the Company's own share price to the extent that the Company's own equity instruments underlie the fair values of derivatives of the Group. At 31 December 2009, the Group is exposed to this risk through the derivative embedded in the Convertible Bonds issued by the Company as disclosed in Note 29.

At 31 December 2009, it is estimated that an increase of 20% in the Company's own share price would decrease the Group's profit for the year and retained profits by approximately RMB 306 million (2008: RMB 62 million) while a decrease of 20% in the Company's own share price would increase to the Group's profit for the year and retained profits by approximately RMB 156 million (2008: RMB nil). The sensitivity analysis has been determined assuming that the changes in the Company's own share price had occurred at the balance sheet date and that all other variables remain constant.

Fair values

The fair values of the Group's financial instruments (other than long-term debts and security investments) approximate their carrying amounts due to the short-term maturity of these instruments. The fair values of long-term debts are estimated by discounting future cash flows using current market interest rates offered to the Group for debt with substantially the same characteristics and maturities ranging 4.18% to 5.94% (2008: 3.58% to 5.94%). The following table presents the carrying amount and fair value of the Group's long-term debts other than loans from Sinopec Group Company and fellow subsidiaries at 31 December 2009 and 2008:

	2009 RMB millions	2008 RMB millions
Carrying amount	115,139	109,415
Fair value	114,471	113,060

The Group has not developed an internal valuation model necessary to make the estimate of the fair value of loans from Sinopec Group Company and fellow subsidiaries as it is not considered practicable to estimate their fair value because the cost of obtaining discount and borrowing rates for comparable borrowings would be excessive based on the Reorganisation of the Group, its existing capital structure and the terms of the borrowings.

At 31 December 2009 and 2008, the fair value of the Group's available-for-sale financial assets quoted at market price is RMB 1,461 million. Other unquoted equity investments are individually and in the aggregate not material to the Group's financial position or results of operations. There are no listed market prices for such interests in the PRC and, accordingly, a reasonable estimate of fair value could not be made without incurring excessive costs. The Group intends to hold these unquoted equity investments for long term purpose.

Except for the above items, the financial assets and liabilities of the Group are carried at amounts not materially different from their fair values as at 31 December 2009 and 2008.

54 EXTRAORDINARY GAIN AND LOSS

Edgar Filing: CHINA PETROLEUM & CHEMICAL CORP - Form 6-K

Pursuant to Questions and answers in the prepayment of information disclosures of companies issuing public shares, No.1 – Extraordinary gain and loss (2008), the extraordinary gains and losses of the Group are as follows:

	2009 RMB millions	2008 RMB millions
Extraordinary (gain)/loss for the year:		
Gain on disposal of non-current assets	(211)	(231)
Donations	174	104
Gain on holding and disposal of various investments	(322)	(956)
Net (profit)/loss of subsidiaries generated from a business combination involving entities under common control before acquisition date	(62)	1,244
Other non-operating income and expenses, net	190	499
	(231)	660
Tax effect	42	146
Total	(189)	806
Attributable to:		
Equity shareholders of the Company	(32)	862
Minority interests	(157)	(56)

55 BASIC AND DILUTED EARNINGS PER SHARE

(i) Basic earning per share

Basic earnings per share is calculated by the net profit attributable to equity shareholders of the Company and the weighted average number of outstanding ordinary shares of the Company:

	2009	2008
Net profit attributable of equity shareholders of the Company (RMB millions)	61,290	28,445
Weighted average number of outstanding ordinary shares of the Company (millions)	86,702	86,702
Basic earnings per share (RMB/share)	0.707	0.328

The calculations of the weighted average number of ordinary shares is as follows:

	2009	2008
Weighted average number of outstanding ordinary shares of the Company (millions)	86,702	86,702

(ii) Diluted earnings per share

Diluted earnings per share is calculated by the net profit attributable to equity shareholders of the Company (diluted) and the weighted average number of ordinary shares of the Company (diluted):

	2009	2008
Net profit attributable to equity shareholders of the Company (diluted) (RMB millions)	61,666	25,268
Weighted average number of outstanding ordinary shares of the Company (diluted) (millions)	87,790	87,790
Diluted earnings per share (RMB/share)	0.702	0.288

The calculation of the weighted average number of ordinary shares (diluted) is as follows:

	2009	2008
The weighted average number of the ordinary shares issued at 1 January (millions)	86,702	86,702
Effect of the Convertible Bonds (millions)	1,088	1,088
Weighted average number of the ordinary shares issued at 31 December (diluted) (millions)	87,790	87,790

The calculation of diluted earnings per share for the year ended 31 December 2009 and 2008 excludes the effect of the Warrants (Note 29(iv)), since it did not have any diluted effect.

56 POST BALANCE SHEET EVENTS

Pursuant to the resolution passed at the Directors' meeting on 26 March 2010, the Group entered into an agreement with Sinopec Overseas Oil & Gas Limited (ÒSOOGLÓ), a subsidiary of Sinopec Group Company, to acquire 55% equity interests of Sonangol Sinopec International Limited (ÒSSIÓ) and to acquire the shareholder's loans of USD 779 million provided by SOOGL to SSI, at a total cash consideration of USD2,457 million. SSI is engaged in the oil and gas operations in Angola. The transaction is subject to the approval from the shareholder's meeting, the relevant governmental bodies or the relevant creditor.

REPORT OF THE INTERNATIONAL AUDITOR

To the Shareholders of
China Petroleum & Chemical Corporation
(Established in The People's Republic of China with limited liability)

We have audited the consolidated financial statements of China Petroleum & Chemical Corporation (the "Company") set out on pages 139 to 192, which comprise the consolidated and company balance sheets as at 31 December 2009, and the consolidated income statement, the consolidated statement of comprehensive income, the consolidated statement of changes in equity and the consolidated statement of cash flows for the year then ended, and a summary of significant accounting policies and other explanatory notes.

DIRECTORS' RESPONSIBILITY FOR THE FINANCIAL STATEMENTS

The directors of the Company are responsible for the preparation and the true and fair presentation of these financial statements in accordance with International Financial Reporting Standards issued by the International Accounting Standards Board and the disclosure requirements of the Hong Kong Companies Ordinance. This responsibility includes designing, implementing and maintaining internal control relevant to the preparation and the true and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error; selecting and applying appropriate accounting policies; and making accounting estimates that are reasonable in the circumstances.

AUDITOR'S RESPONSIBILITY

Our responsibility is to express an opinion on these financial statements based on our audit. This report is made solely to you, as a body, and for no other purpose. We do not assume responsibility towards or accept liability to any other person for the contents of this report.

We conducted our audit in accordance with Hong Kong Standards on Auditing issued by the Hong Kong Institute of Certified Public Accountants. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance as to whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and true and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the directors, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

OPINION

In our opinion, the consolidated financial statements give a true and fair view of the state of affairs of the Company and of the Group as at 31 December 2009 and of the Group's profit and cash flows for the year then ended in

accordance with International Financial Reporting Standards issued by the International Accounting Standards Board and have been properly prepared in accordance with the disclosure requirements of the Hong Kong Companies Ordinance.

Notes:

(a) According to the Company's Articles of Association, the Company is required to transfer 10% of its net profit in accordance with the PRC accounting policies adopted by the Group to statutory surplus reserve until the reserve balance reaches 50% of the registered capital. The transfer to this reserve must be made before distribution of a dividend to shareholders. Statutory surplus reserve can be used to make good previous years' losses, if any, and may be converted into share capital by the issue of new shares to shareholders in proportion to their existing shareholdings or by increasing the par value of the shares currently held by them, provided that the balance after such issue is not less than 25% of the registered capital.

Pursuant to the requirement in Cai Kuai [2008] No. 11 "Interpretation of Accounting Standards for Business Enterprises (ASBE) No. 2" issued by the Ministry of Finance of the PRC (MOF) on 7 August 2008, for statutory financial statement purposes, the Group adopted certain PRC accounting policies that were applied retrospectively. The statutory surplus reserve, amounting to RMB 1,189 million, has been adjusted accordingly. The adjustment to statutory surplus reserve was reflected as a movement for the year ended 31 December 2008. During the year ended 31 December 2009, the Company transferred RMB 4,953 million (2008: RMB 4,092 million), being 10% of the current year's net profit determined in accordance with the PRC accounting policies to this reserve.

(b) For the year ended 31 December 2009, the directors authorised the transfer of RMB 20,000 million (2008: RMB 20,000 million), subject to the shareholders' approval at the Annual General Meeting, to the discretionary surplus reserve. The usage of the discretionary surplus reserve is similar to that of statutory surplus reserve.

(c) According to the Company's Articles of Association, the amount of retained earnings available for distribution to equity shareholders of the Company is the lower of the amount determined in accordance with the accounting policies complying with ASBE and the amount determined in accordance with the accounting policies complying with International Financial Reporting Standards (IFRS). At 31 December 2009, the amount of retained earnings available for distribution was RMB 91,772 million (2008: RMB 82,147 million), being the amount determined in accordance with the accounting policies complying with IFRS. Final dividend for the year ended 31 December 2009 of RMB 9,537 million (2008: RMB 7,803 million) proposed after the balance sheet date has not been recognised as a liability at the balance sheet date.

(d) The capital reserve represents (i) the difference between the total amount of the par value of shares issued and the amount of the net assets transferred from Sinopec Group Company in connection with the Reorganisation (ii) the difference between the considerations paid over the amount of the net assets of entities and related operations acquired from Sinopec Group Company and non-controlling interests and (iii) the equity component of the Bonds with Warrants.

(e) During the year ended 31 December 2008, the Group paid additional consideration of RMB 96 million for an acquisition consummated prior to 2008 to Sinopec Group Company, which was accounted for as an equity transaction. In addition, the Group acquired certain assets and liabilities, including the oilfield downhole operation (the Downhole Assets), from Sinopec Group Company. The difference between the consideration paid over the carrying value of these net assets acquired was RMB 106 million, which was accounted for as an equity transaction.

(f) The application of the share premium account is governed by Sections 168 and 169 of the PRC Company Law.

The notes on pages 147 to 192 form part of these financial statements.

CONSOLIDATED STATEMENT OF CASH FLOWS

for the year ended 31 December 2009

(Amounts in millions)

Net cash generated from operating activities	152,075	66,517

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

for the year ended 31 December 2009

1 PRINCIPAL ACTIVITIES, ORGANISATION AND BASIS OF PREPARATION

Principal activities

China Petroleum & Chemical Corporation (the "Company") is an energy and chemical company that, through its subsidiaries (hereinafter collectively referred to as the "Group"), engages in oil and gas and chemical operations in the People's Republic of China (the "PRC"). Oil and gas operations consist of exploring for, developing and producing crude oil and natural gas; transporting crude oil and natural gas by pipelines; refining crude oil into finished petroleum products; and marketing crude oil, natural gas and refined petroleum products. Chemical operations include the manufacture and marketing of a wide range of chemicals for industrial uses.

Organisation

The Company was established in the PRC on 25 February 2000 as a joint stock limited company as part of the reorganisation (the "Reorganisation") of China Petrochemical Corporation ("Sinopec Group Company"), the ultimate holding company of the Group and a ministry-level enterprise under the direct supervision of the State Council of the PRC. Prior to the incorporation of the Company, the oil and gas and chemical operations of the Group were carried on by oil administration bureaux, petrochemical and refining production enterprises and sales and marketing companies of Sinopec Group Company.

As part of the Reorganisation, certain of Sinopec Group Company's core oil and gas and chemical operations and businesses together with the related assets and liabilities were transferred to the Company. On 25 February 2000, in consideration for Sinopec Group Company transferring such oil and gas and chemical operations and businesses and the related assets and liabilities to the Company, the Company issued 68.8 billion domestic state-owned ordinary shares with a par value of RMB 1.00 each to Sinopec Group Company. The shares issued to Sinopec Group Company on 25 February 2000 represented the entire registered and issued share capital of the Company at that date. The oil and gas and chemical operations and businesses transferred to the Company related to (i) the exploration, development and production of crude oil and natural gas, (ii) the refining, transportation, storage and marketing of crude oil and petroleum products, and (iii) the production and sale of chemicals.

Basis of preparation

Pursuant to the resolution passed at the Directors' meeting on 27 March 2009, the Group acquired the entire equity interests of Sinopec Qingdao Petrochemical Company Limited and certain storage and distribution operations (collectively the "Acquired Group") from Sinopec Group Company for total cash considerations of RMB 771 million (hereinafter referred to as the "Acquisition of the Acquired Group").

As the Group and the Acquired Group are under the common control of Sinopec Group Company, the Acquisition of the Acquired Group has been reflected in the accompanying consolidated financial statements as combination of entities under common control in a manner similar to a pooling-of-interests. Accordingly, the assets and liabilities of the Acquired Group have been accounted for at historical cost and the consolidated financial statements of the Company prior to this acquisition have been restated to include the results of operation and the assets and liabilities of the Acquired Group on a combined basis. The difference between the total considerations paid over the amount of the net assets of the Acquired Group was RMB 1,551 million, which was accounted for as an equity transaction.

The financial condition as at 31 December 2008 and the results of operation for the year then ended previously reported by the Group have been restated to include the results of operations of the Acquired Group on a combined basis as set out below.

	The Group, as previously reported RMB millions	The Acquired Group RMB millions	Elimination* RMB millions	The Group, as restated RMB millions
Results of operation for the year ended 31 December 2008:				
Operating revenue	1,452,101	11,781	(19,591)	1,444,291
Profit/(loss) attributable to the equity shareholders of the Company	29,769	(1,244)		28,525
Basic earnings/(loss) per share (RMB)	0.339			0.329
Diluted earnings/(loss) per share (RMB)	0.299			0.289
Financial condition as at 31 December 2008:				
Current assets	164,311	1,549	(462)	165,398
Total assets	767,827	11,807	(462)	779,172
Current liabilities	274,537	12,581	(462)	286,656
Total liabilities	418,505	12,587	(462)	430,630
Total equity attributable to equity shareholders of the Company	328,669	(780)		327,889

* The Acquired Group sold its petroleum products primarily to the Group as well as purchasing crude oil primarily from the Group. These transactions between the Group and the Acquired Group have been eliminated on combination, resulting in a reduction in the operating revenue. All other significant balances and transactions between the Group and the Acquired Group have been eliminated on combination.

The accompanying financial statements have been prepared in accordance with IFRS as issued by the International Accounting Standards Board (IASB). IFRS includes International Accounting Standards (IAS) and related interpretations. These financial statements also comply with the disclosure requirements of the Hong Kong Companies Ordinance and the applicable disclosure provisions of the Rules Governing the Listing of Securities on the Stock Exchange of Hong Kong Limited. A summary of the significant accounting policies adopted by the Group and the Company are set out in Note 2.

1 PRINCIPAL ACTIVITIES, ORGANISATION AND BASIS OF PREPARATION (Continued)

Basis of preparation (Continued)

The IASB has issued certain new and revised IFRS that are first effective for the current accounting period of the Group. The new accounting policies and new disclosures resulting from the initial application of these standards or developments to the extent that they are relevant to the Group are summarised as follows:

- (i) As a result of the adoption of revised IAS 1 'Presentation of Financial Statements' (revised IAS 1), details of changes in equity during the year arising from transactions with equity shareholders in their capacity as such have been presented separately from all other income and expenses in a revised consolidated statement of changes in equity. All other items of income and expense are presented in the consolidated income statement, if they are recognised as part of profit or loss for the year, or otherwise in a new primary statement, the consolidated statement of comprehensive income. Corresponding amounts have been restated to conform to the new presentation.
- (ii) IFRS 8, Operating segments (IFRS 8), requires segment disclosure to be based on the way that the Group's chief operating decision maker manages the Group, with the amounts reported for each reportable segment being the measures reported to the Group's chief operating decision maker for the purposes of allocating resources to, and assessing the performance of the Group's various lines of business. The adoption of IFRS 8 has not resulted in any significant changes to the presentation of segment information since the identification and presentation of reportable segments in prior periods were consistent with IFRS 8.
- (iii) As a result of the adoption of the amendments to IFRS 7, the financial statements include expanded disclosures in Note 41 about the fair value measurement of the Group's financial instruments, categorising these fair value measurements into a three-level fair value hierarchy according to the extent to which they are based on observable market data. The Group has taken advantage of the transitional provisions set out in the amendments to IFRS 7, under which comparative information for the newly required disclosures about the fair value measurements of financial instruments has not been provided.

The adoption of revised IAS 1, IFRS 8 and the amendments to IFRS 7 did not have any impact on the classification, recognition and measurement of the amounts recognised in the consolidated financial statements.

The Group has not adopted any new standard or interpretation that is not yet effective for the current accounting period (Note 43).

In prior years, property, plant and equipment were carried at revalued amount, being the fair value at the date of the revaluation less any subsequent accumulated depreciation and impairment losses. In 2009, property, plant and equipment are accounted for using the cost model, being the cost less any accumulated depreciation and

impairment losses. This change is to align the Group's accounting policy with industry peers to provide more relevant financial information to the users of the Group's financial statements. This change has been applied retrospectively. Other than the elimination of the revaluation reserve by transferring the balance to retained earnings, this change in accounting policy has no effect on the financial condition as at 31 December 2007, 2008 and 2009, and the results of operation for the years then ended. Therefore, no comparative balance sheet as at 1 January 2008 was presented.

The accompanying financial statements are prepared on the historical cost basis except for the remeasurement of available-for-sale securities (Note 2(k)), derivative financial instruments (Note 2(l) and (m)) and derivative component of the convertible bonds (Note 2(q)) to their fair values.

The preparation of the financial statements in accordance with IFRS requires management to make judgements, estimates and assumptions that affect the application of policies and reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the year. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgements about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results could differ from those estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

Key assumptions and estimation made by management in the application of IFRS that have significant effect on the financial statements and the major sources of estimation uncertainty are disclosed in Note 42.

2 SIGNIFICANT ACCOUNTING POLICIES

(a) Basis of consolidation

The consolidated financial statements comprise the Company and its subsidiaries, and interest in associates and jointly controlled entities.

(i) Subsidiaries and non-controlling interests

Subsidiaries are those entities controlled by the Group. Control exists when the Group has the power, directly or indirectly, to govern the financial and operating policies of an entity so as to obtain benefits from its activities.

The financial statements of subsidiaries are included in the consolidated financial statements from the date that control effectively commences until the date that control effectively ceases.

Non-controlling interests at the balance sheet date, being the portion of the net assets of subsidiaries attributable to equity interests that are not owned by the Company, whether directly or indirectly through subsidiaries, are presented in the consolidated balance sheet and consolidated statement of changes in equity within equity, separately from equity attributable to the equity shareholders of the Company. Non-controlling interests in the results of the Group are presented on the face of the consolidated income statement and the consolidated statement of comprehensive income as an allocation of the total profit or loss and total comprehensive income for the year between non-controlling interests and the equity shareholders of the Company.

In the Company's balance sheet, investments in subsidiaries are stated at cost less impairment losses (Note 2(n)).

The particulars of the Group's principal subsidiaries are set out in Note 40.

(ii) Associates and jointly controlled entities

An associate is an entity, not being a subsidiary, in which the Group or the Company exercises significant influence over its management. Significant influence is the power to participate in the financial and operating policy decisions of the investee but is not control or joint control over those policies.

A jointly controlled entity is an entity which operates under a contractual arrangement between the Group or the Company and other parties, where the contractual arrangement establishes that the Group or the Company and one or more of the other parties share joint control over the economic activity of the entity.

Investments in associates and jointly controlled entities are accounted for in the consolidated financial statements using the equity method from the date that significant influence or joint control commences until the date that significant influence or joint control ceases. Under the equity method, the investment is initially recorded at cost and adjusted thereafter for the post acquisition change in the Group's share of the investee's net assets and any impairment loss relating to the investment (Note 2(j) and (n)).

The Group's share of the post-acquisition, post-tax results of the investees and any impairment losses for the year are recognised in the consolidated income statement, whereas the Group's share of the post-acquisition post-tax items of the investees' other comprehensive income is recognised in the consolidated statement of comprehensive income.

In the Company's balance sheet, investments in associates and jointly controlled entities are stated at cost less impairment losses (Note 2(n)).

(iii) Transactions eliminated on consolidation

Inter-company balances and transactions and any unrealised gains arising from inter-company transactions are eliminated on consolidation. Unrealised gains arising from transactions with associates and jointly controlled entities are eliminated to the extent of the Group's interest in the entity. Unrealised losses are eliminated in the same way as unrealised gains, but only to the extent that there is no evidence of impairment.

(b) Translation of foreign currencies

The presentation currency of the Group is Renminbi. Foreign currency transactions during the year are translated into Renminbi at the applicable rates of exchange quoted by the People's Bank of China (PBOC) prevailing on the transaction dates. Foreign currency monetary assets and liabilities are translated into Renminbi at the PBOC's rates at the balance sheet date.

Exchange differences, other than those capitalised as construction in progress, are recognised as income or expense in the finance costs section of the consolidated income statement.

(c) Cash and cash equivalents

Cash equivalents consist of time deposits with financial institutions with an initial term of less than three months when purchased. Cash equivalents are stated at cost, which approximates fair value.

(d) Trade, bills and other receivables

Trade, bills and other receivables are initially recognised at fair value and thereafter stated at amortised cost less impairment losses for bad and doubtful debts (Note 2(n)). Trade, bills and other receivables are derecognised if the Group's contractual rights to the cash flows from these financial assets expire or if the Group transfers these financial assets to another party without retaining control or substantially all risks and rewards of the assets.

(e) Inventories

Inventories, other than spare parts and consumables, are stated at the lower of cost and net realisable value. Cost includes the cost of purchase computed using the weighted average method and, in the case of work in progress and finished goods, direct labour and an appropriate proportion of production overheads. Net realisable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and the estimated costs necessary to make the sale.

Spare parts and consumables are stated at cost less any provision for obsolescence.

2 SIGNIFICANT ACCOUNTING POLICIES (Continued)

(f) Property, plant and equipment

An item of property, plant and equipment is recorded at cost, less accumulated depreciation and impairment losses (Note 2(n)). The cost of an asset comprises its purchase price, any directly attributable costs of bringing the asset to working condition and location for its intended use. The Group recognises in the carrying amount of an item of property, plant and equipment the cost of replacing part of such an item when that cost is incurred, it is probable that the future economic benefits embodied with the item will flow to the Group and the cost of the item can be measured reliably. All other expendi
