

MOBIVITY HOLDINGS CORP.

Form 424B3

September 15, 2015

Filed Pursuant to Rule 424(b)(3)

Under Securities Act of 1933, as amended

Registration No. 333-203751

PROSPECTUS

26,651,321 Shares Mobivity Holdings Corp.

#### Common Stock

This prospectus relates to shares of common stock of Mobivity Holdings Corp. that may be offered for sale for the account of the selling stockholders identified in this prospectus. The selling stockholders may offer and sell from time to time up to 26,651,321 shares of our common stock, which amount includes 8,551,168 shares to be issued to the selling stockholders only if and when they exercise warrants held by them.

The shares owned by the selling stockholders may be sold in the over-the-counter market, or otherwise, at prices and terms then prevailing or at prices related to the then-current market price, or in negotiated transactions. Although we will incur expenses in connection with the registration of the common stock, we will not receive any of the proceeds from the sale of the shares of common stock by the selling stockholders. We will receive gross proceeds of up to \$10,217,433 from the exercise of the warrants, if and when they are exercised.

Our common stock is quoted on the OTC Markets under the symbol "MFON". The last reported sale price of our common stock as reported by the OTC Markets on August 21, 2015 was \$0.80 per share.

We may amend or supplement this prospectus from time to time by filing amendments or supplements as required. You should read this entire prospectus and any amendments or supplements carefully before you make your investment decision.

---

The shares of common stock offered under this prospectus involve a high degree of risk. See "Risk Factors" beginning at page 2.

---

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities or passed upon the accuracy or adequacy of this prospectus. Any representation to the contrary is a criminal offense.

---

The date of this prospectus is September 10, 2015

We have not authorized any person to give you any supplemental information or to make any representations for us. You should not rely upon any information about our company that is not contained in this prospectus. Information contained in this prospectus may become stale. You should not assume that the information contained in this prospectus or any prospectus supplement is accurate as of any date other than their respective dates, regardless of the time of delivery of this prospectus, any prospectus supplement or of any sale of the shares. Our business, financial condition, results of operations and prospects may have changed since those dates. The selling stockholders are offering to sell, and seeking offers to buy, shares of our common stock only in jurisdictions where offers and sales are permitted.

In this prospectus, "Mobivity," the "company," "we," "us," and "our" refer to Mobivity Holdings Corp., a Nevada corporation, and its wholly- owned subsidiary, Mobivity, Inc., a Nevada corporation.

Table of Contents

SUMMARY

You should read this summary in conjunction with the more detailed information and financial statements appearing elsewhere in this prospectus.

On November 12, 2013, we effected a 1 for 6 reverse stock split of our outstanding common shares. All share amounts and share prices, including the exercise price and the number of common shares issuable under our outstanding options and warrants, have been adjusted to give effect to the reverse stock split.

Our Company

Mobivity Holdings Corp. (the “Company” or “we”) is in the business of developing and operating proprietary platforms over which brands and enterprises can conduct national and localized, data-driven mobile marketing campaigns. Our proprietary platforms, consisting of software available to phones, tablets PCs, and Point of Sale (POS) systems, allow resellers, brands and enterprises to market their products and services to consumers through text messages sent directly to the consumers’ via mobile phones, mobile smartphone applications, and dynamically printed receipt content. We generate revenue by charging the resellers, brands and enterprises a per-message transactional fee, through fixed or variable software licensing fees, or via advertising fees. Our customers include national franchisers, professional sports teams and associations and other national brands such as the Sonic Drive-In, Subway, Jamba Juice, Chick-Fil-A, and others.

Our executive offices are located at 55 N. Arizona Place, Suite 310, Chandler, Arizona 85225. Our phone number is (877) 282-7660. Our website address is [www.mobivity.com](http://www.mobivity.com). Information contained in, or accessible through, our website does not constitute part of this prospectus.

The Offering

This offering relates to the offer and sale of our common stock by the selling stockholders identified in this prospectus. The selling stockholders will offer and sell the shares of our common stock at prices related to the then-current market price or in negotiated transactions. Although we have agreed to pay the expenses related to the registration of the shares being offered, we will not receive any proceeds from the sale of the shares by the selling stockholders.

Summary Financial Information

The following summary financial data for the fiscal years ended December 31, 2014 and 2013 is derived from our audited consolidated financial statements included elsewhere in this prospectus. The summary financial data as of and for the six months ended June 30, 2015 has been derived from our unaudited financial statements and the related notes thereto included elsewhere in this prospectus. This information is only a summary and does not provide all of the information contained in our financial statements and related notes. You should read “Management’s Discussion and Analysis of Financial Condition and Results of Operations” beginning on page 16 of this prospectus and our financial statements and related notes included elsewhere in this prospectus.

Table of Contents

RISK FACTORS

You should carefully consider the following risk factors before investing in our common stock. Our business and results of operations could be seriously harmed by any of the following risks. The trading price of our common stock could decline due to any of these risks, and you may lose part or all of your investment.

Risks Relating to Our Business

We may need additional financing to execute our business plan and fund operations, which additional financing may not be available on reasonable terms or at all. As of June 30, 2015, we had working capital of \$1,933,396. Current liabilities as of June 30, 2015 included an estimated earn-out in the amount of \$838,000 and derivative liabilities in the amount of \$49,474, all of which are payable in shares of our common stock. Giving no effect to the estimated earn-out and derivative liabilities, we had pro forma working capital as of June 30, 2015 in the amount of \$2,820,870. While we believe that our working capital on hand will be sufficient to fund our operations through the end of the current fiscal year, there can be no assurance that we will not require significant additional capital prior to year end. Also, we expect that we will require additional capital beyond December 31, 2015, unless we are able to achieve and maintain a profitable operation. In the event we require additional capital we will endeavor to raise additional funds through various financing sources, including the sale of our equity and debt securities and the procurement of commercial debt financing. However, there can be no guarantees that such funds will be available on commercially reasonable terms, if at all. If such financing is not available on satisfactory terms, we may be unable to expand or continue our business as desired and operating results may be adversely affected. Any debt financing will increase expenses and must be repaid regardless of operating results and may involve restrictions limiting our operating flexibility. If we issue equity securities to raise additional funds, the percentage ownership of our existing stockholders will be reduced and our stockholders may experience additional dilution in net book value per share.

Our ability to obtain needed financing may be impaired by such factors as the capital markets, both generally and specifically in our industry, and the fact that we are not yet profitable, which could impact the availability or cost of future financings. If the amount of capital we are able to raise from financing activities, together with our revenues from operations, is not sufficient to satisfy our capital needs, we may be required to reduce or even cease operations.

Our sales efforts to large enterprises require significant time and effort and could hinder our ability to expand our customer base and increase revenue. Attracting new customers to our large enterprise division requires substantial time and expense, especially in an industry that is so heavily dependent on personal relationships with executives. We cannot assure that we will be successful in establishing new relationships, or maintaining or advancing our current relationships. For example, it may be difficult to identify, engage and market to customers who do not currently perform mobile marketing or advertising or are unfamiliar with our current services or platform. Further, many of our customers typically require input from one or more internal levels of approval. As a result, during our sales effort, we must identify multiple people involved in the purchasing decision and devote a sufficient amount of time to presenting our products and services to those individuals. The complexity of our services often requires us to spend substantial time and effort assisting potential customers in evaluating our products and services including providing demonstrations and benchmarking against other available technologies. We expect that our sales process will become less burdensome as our products and services become more widely known and used. However, if this change does not occur, we will not be able to expand our sales effort as quickly as anticipated and our sales will be adversely affected.

Table of Contents

We may not be able to enhance our mobile marketing and advertising platform to keep pace with technological and market developments, or to remain competitive against potential new entrants in our markets. The market for mobile marketing and advertising services is emerging and is characterized by rapid technological change, evolving industry standards, frequent new product introductions and short product life cycles. Our current platform and services may not in the future be acceptable to marketers and advertisers. To keep pace with technological developments, satisfy increasing customer requirements and achieve acceptance of our marketing and advertising campaigns, we will need to enhance our current mobile marketing solutions and continue to develop and introduce on a timely basis new, innovative mobile marketing services offering compatibility, enhanced features and functionality on a timely basis at competitive prices. Our inability, for technological or other reasons, to enhance, develop, introduce and deliver compelling mobile marketing services in a timely manner, or at all, in response to changing market conditions, technologies or customer expectations could have a material adverse effect on our operating results or could result in our mobile marketing services platform becoming obsolete. Our ability to compete successfully will depend in large measure on our ability to maintain a technically skilled development and engineering staff and to adapt to technological changes and advances in the industry, including providing for the continued compatibility of our mobile marketing services platform with evolving industry standards and protocols.

In addition, as we believe the mobile marketing market is likely to grow substantially, other companies which are larger and have significantly more capital to invest than us may emerge as competitors. For example, in May 2010, Google, Inc. acquired Admob, Inc. Similarly, in January 2010, Apple, Inc. acquired Quattro Wireless, Inc. New entrants could seek to gain market share by introducing new technology or reducing pricing. This may make it more difficult for us to sell our products and services, and could result in increased pricing pressure, reduced profit margins, increased sales and marketing expenses or the loss of market share or expected market share, any of which may significantly harm our business, operating results and financial condition.

Our services are provided on mobile communications networks that are owned and operated by third parties who we do not control and the failure of any of these networks would adversely affect our ability to deliver our services to our customers. Our mobile marketing and advertising platform is dependent on the reliability of mobile operators who maintain sophisticated and complex mobile networks. Such mobile networks have historically, and particularly in recent years, been subject to both rapid growth and technological change. If the network of a mobile operator with which we are integrated should fail, including because of new technology incompatibility, the degradation of network performance under the strain of too many mobile consumers using it, or a general failure from natural disaster or political or regulatory shut-down, we will not be able provide our services to our customers through such mobile network. This in turn, would impair our reputation and business, potentially resulting in a material, adverse effect on our financial results.

If our mobile marketing and advertising services platform does not scale as anticipated, our business will be harmed. We must be able to continue to scale to support potential ongoing substantial increases in the number of users in our actual commercial environment, and maintain a stable service infrastructure and reliable service delivery for our mobile marketing and advertising campaigns. In addition, we must continue to expand our service infrastructure to handle growth in customers and usage. If our mobile marketing services platform does not efficiently and effectively scale to support and manage a substantial increase in the number of users while maintaining a high level of performance, the quality of our services could decline and our business will be seriously harmed. In addition, if we are unable to secure data center space with appropriate power, cooling and bandwidth capacity, we may not be able to efficiently and effectively scale our business to manage the addition of new customers and overall mobile marketing campaigns.

Table of Contents

The success of our business depends, in part, on wireless carriers continuing to accept our customers' messages for delivery to their subscriber base. We depend on wireless carriers to deliver our customers' messages to their subscriber base. Wireless carriers often impose standards of conduct or practice that significantly exceed current legal requirements and potentially classify our messages as "spam," even where we do not agree with that conclusion. In addition, the wireless carriers use technical and other measures to attempt to block non-compliant senders from transmitting messages to their customers; for example, wireless carriers block short codes or Internet Protocol addresses associated with those senders. There can be no guarantee that we, or short codes registered to us, will not be blocked or blacklisted or that we will be able to successfully remove ourselves from those lists. Although our services typically require customers to opt-in to a campaign, minimizing the risk that our customers' messages will be characterized as spam, blocking of this type could interfere with our ability to market products and services of our customers and communicate with end users and could undermine the effectiveness of our customers' marketing campaigns. To date we have not experienced any material blocking of our messages by wireless carriers, but any such blocking could have an adverse effect on our business and results of operations.

We depend on third party providers for a reliable Internet infrastructure and the failure of these third parties, or the Internet in general, for any reason would significantly impair our ability to conduct our business. We outsource all of our data center facility management to third parties who host the actual servers and provide power and security in multiple data centers in each geographic location. These third party facilities require uninterrupted access to the Internet. If the operation of our servers is interrupted for any reason, including natural disaster, financial insolvency of a third party provider, or malicious electronic intrusion into the data center, our business would be significantly damaged. As has occurred with many Internet-based businesses, on occasion in the past, we have been subject to "denial-of-service" attacks in which unknown individuals bombarded our computer servers with requests for data, thereby degrading the servers' performance. While we have historically been successful in relatively quickly identifying and neutralizing these attacks, we cannot be certain that we will be able to do so in the future. If either a third party facility failed, or our ability to access the Internet was interfered with because of the failure of Internet equipment in general or we become subject to malicious attacks of computer intruders, our business and operating results will be materially adversely affected.

Failure to adequately manage our growth may seriously harm our business. We operate in an emerging technology market and have experienced, and may continue to experience, significant growth in our business. If we do not effectively manage our growth, the quality of our products and services may suffer, which could negatively affect our brand and operating results. Our growth has placed, and is expected to continue to place, a significant strain on our managerial, administrative, operational and financial resources and our infrastructure. Our future success will depend, in part, upon the ability of our senior management to manage growth effectively. This will require us to, among other things:

implement additional management information systems;

further develop our operating, administrative, legal, financial and accounting systems and controls;

hire additional personnel;

develop additional levels of management within our company;

locate additional office space in various countries; and

maintain close coordination among our engineering, operations, legal, finance, sales and marketing and customer service and support organizations.

Moreover, as our sales increase, we may be required to concurrently deploy our services infrastructure at multiple additional locations or provide increased levels of customization. As a result, we may lack the resources to deploy our mobile marketing services on a timely and cost-effective basis. Failure to accomplish any of these requirements would seriously harm our ability to deliver our mobile marketing services platform in a timely fashion, fulfill existing customer commitments or attract and retain new customers.

## Table of Contents

The gathering, transmission, storage and sharing or use of personal information could give rise to liabilities or additional costs of operation as a result of governmental regulation, legal requirements, civil actions or differing views of personal privacy rights. We transmit and store a large volume of personal information in the course of providing our services. Federal, state and international laws and regulations govern the collection, use, retention, sharing and security of data that we receive from our customers and their users. Any failure, or perceived failure, by us to comply with U.S. federal, state, or international privacy or consumer protection-related laws, regulations or industry self-regulatory principles could result in proceedings or actions against us by governmental entities or others, which could potentially have an adverse effect on our business, operating results and financial condition. Additionally, we may also be contractually liable to indemnify and hold harmless our customers from the costs or consequences of inadvertent or unauthorized disclosure of their customers' personal data which we store or handle as part of providing our services.

The interpretation and application of privacy, data protection and data retention laws and regulations are currently unsettled in the U.S. and internationally, particularly with regard to location-based services, use of customer data to target advertisements and communication with consumers via mobile devices. Such laws may be interpreted and applied inconsistently from country to country and inconsistently with our current data protection policies and practices. Complying with these varying international requirements could cause us to incur substantial costs or require us to change our business practices in a manner adverse to our business, operating results or financial condition.

As privacy and data protection have become more sensitive issues, we may also become exposed to potential liabilities as a result of differing views on the privacy of personal information. These and other privacy concerns, including security breaches, could adversely impact our business, operating results and financial condition.

In the U.S., we have voluntarily agreed to comply with wireless carrier technological and other requirements for access to their customers' mobile devices, and also trade association guidelines and codes of conduct addressing the provision of location-based services, delivery of promotional content to mobile devices and tracking of users or devices for the purpose of delivering targeted advertising. We could be adversely affected by changes to these requirements, guidelines and codes, including in ways that are inconsistent with our practices or in conflict with the rules or guidelines in other jurisdictions.

Our management team has limited experience in public company matters, which could impair our ability to comply with legal and regulatory requirements. Our management team has only limited public company management experience or responsibilities, which could impair our ability to comply with legal and regulatory requirements and applicable federal securities laws including filing required reports and other information required on a timely basis. There can be no assurance that our management will be able to implement and affect programs and policies in an effective and timely manner that adequately respond to increased legal, regulatory compliance and reporting requirements imposed by such laws and regulations. Our failure to comply with such laws and regulations could lead to the imposition of fines and penalties and further result in the deterioration of our business.

### Risks Related to our Common Stock

There has been a limited trading market for our common stock. There has been a limited trading market for our common stock on the Over-the-Counter Bulletin Board. The lack of an active market may impair the ability to sell your shares at the time you wish to sell them or at a price that you consider reasonable. The lack of an active market may also reduce the fair market value of your shares. An inactive market may also impair our ability to raise capital by selling shares of capital stock and may impair our ability to acquire other companies or technologies by using common stock as consideration.

The market price of our common stock may be, and is likely to continue to be, highly volatile and subject to wide fluctuations. The market price of our common stock is likely to be highly volatile and could be subject to wide fluctuations in response to a number of factors that are beyond our control, including:

dilution caused by our issuance of additional shares of common stock and other forms of equity securities, which we expect to make in connection with future acquisitions or capital financings to fund our operations and growth, to attract and retain valuable personnel and in connection with future strategic partnerships with other companies;

Table of Contents

announcements of new acquisitions or other business initiatives by our competitors;

our ability to take advantage of new acquisitions or other business initiatives;

quarterly variations in our revenues and operating expenses;

changes in the valuation of similarly situated companies, both in our industry and in other industries;

changes in analysts' estimates affecting us, our competitors and/or our industry;

changes in the accounting methods used in or otherwise affecting our industry;

additions and departures of key personnel;

announcements by relevant governments pertaining to additional quota restrictions; and

fluctuations in interest rates and the availability of capital in the capital markets.

Some of these factors are beyond our control, and the impact of these risks, singly or in the aggregate, may result in material adverse changes to the market price of our common stock and/or our results of operations and financial condition.

We do not expect to pay dividends in the foreseeable future. We do not intend to declare dividends for the foreseeable future, as we anticipate that we will reinvest any future earnings in the development and growth of our business. Therefore, investors will not receive any funds unless they sell their common stock, and stockholders may be unable to sell their shares on favorable terms or at all. Investors cannot be assured of a positive return on investment or that they will not lose the entire amount of their investment in the common stock.

The offering of up to 26,651,321 shares of our common stock by selling stockholders could depress our common stock price. Certain of our stockholders are offering pursuant to this prospectus up to 26,651,321 shares of our common stock in a secondary offering, which amount includes 8,551,168 shares of common stock issuable upon exercise of outstanding warrants. Sales of a substantial number of shares of our common stock in the public market could adversely affect the market for our common shares and make it more difficult for us to sell equity securities at times and prices that we determine to be appropriate. None of our shareholders are subject to any lock-up or other agreement that contractually restricts their ability to publicly resell their common shares.

Our common stock may be considered to be a "penny stock" and, as such, any the market for our common stock may be further limited by certain SEC rules applicable to penny stocks. To the extent the price of our common stock remains below \$5.00 per share or we have a net tangible assets of \$2,000,000 or less, our common shares will be subject to certain "penny stock" rules promulgated by the SEC. Those rules impose certain sales practice requirements on brokers who sell penny stock to persons other than established customers and accredited investors (generally institutions with assets in excess of \$5,000,000 or individuals with net worth in excess of \$1,000,000). For transactions covered by the penny stock rules, the broker must make a special suitability determination for the purchaser and receive the purchaser's written consent to the transaction prior to the sale. Furthermore, the penny stock rules generally require, among other things, that brokers engaged in secondary trading of penny stocks provide customers with written disclosure documents, monthly statements of the market value of penny stocks, disclosure of the bid and asked prices and disclosure of the compensation to the brokerage firm and disclosure of the sales person working for the brokerage firm. These rules and regulations adversely affect the ability of brokers to sell our common shares and limit the liquidity of our securities.

## Table of Contents

We are a “smaller reporting company” and, as such are allowed to provide less disclosure than larger public companies. We are currently a “smaller reporting company,” meaning that we are not an investment company, an asset-backed issuer, or a majority-owned subsidiary of a parent company that is not a smaller reporting company and have a public float of less than \$75 million and annual revenues of less than \$50 million during the most recently completed fiscal year. As a “smaller reporting company”, we are able to provide simplified executive compensation disclosures in our SEC filings, are exempt from the provisions of Section 404(b) of the Sarbanes-Oxley Act requiring that independent registered public accounting firms provide an attestation report on the effectiveness of internal control over financial reporting, and have certain other decreased disclosure obligations in their SEC filings, including, among other things, only being required to provide two years of audited financial statements in annual reports. Decreased disclosures in our SEC filings due to our status as a “smaller reporting company” may make it harder for investors to analyze our results of operations and financial prospects.

We have identified material weaknesses in our internal control over financial reporting, and our business and stock price may be adversely affected if we do not adequately address those weaknesses or if we have other material weaknesses or significant deficiencies in our internal control over financial reporting. We conducted an evaluation of the effectiveness of our internal control over financial reporting as of December 31, 2014 using the criteria established in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission. This evaluation included review of the documentation of controls, evaluation of the design effectiveness of controls, testing of the operating effectiveness of controls and a conclusion on this evaluation. Based on this evaluation, our management concluded that we had “material weaknesses” in our internal control over financial reporting. The material weaknesses in controls were primarily due to a lack of resources and number of employees resulting in the inadequate segregation of duties required for effective reconciliation and control procedures.

Proper systems of internal controls over financial reporting are critical to the operation of a public company. As we are a young company that has been operating as a public company for a relatively short period of time, we are at the early stages of establishing, and we may be unable to effectively establish, such systems. Due to our size and nature, segregation of all duties may not always be possible and may not be economically feasible, although we intend to hire internal financial and accounting personnel as our company grows. Failure to effectively establish such systems would leave us without the ability to reliably assimilate and compile financial information about our company and significantly impair our ability to prevent error and detect fraud, all of which would have a negative impact on our company from many perspectives. If we cannot produce reliable financial reports, investors could lose confidence in our reported financial information, the market price of our stock could decline significantly, we may be unable to obtain additional financing to operate and expand our business, and our business and financial condition could be harmed.

## CAUTIONARY STATEMENT CONCERNING FORWARD LOOKING INFORMATION

This prospectus and the documents to which we refer you contain forward-looking statements. In addition, from time to time, we or our representatives may make forward-looking statements orally or in writing. We base these forward-looking statements on our expectations and projections about future events, which we derive from the information currently available to us. Such forward-looking statements relate to future events or our future performance. You can identify forward-looking statements by those that are not historical in nature, particularly those that use terminology such as “may,” “will,” “should,” “expects,” “anticipates,” “contemplates,” “estimates,” “believes,” “plans,” “projected,” “predicts,” “potential” or “continue” or the negative of these or similar terms. In evaluating these forward-looking statements, you should consider various factors, including those described in this prospectus under the heading “Risk Factors” beginning on page 2. These and other factors may cause our actual results to differ materially from any forward-looking statement. Forward-looking statements are only predictions. The forward-looking events discussed in this prospectus, the documents to which we refer you and other statements made from time to time by us or our representatives, may not occur, and actual events and results may differ materially and are subject to risks,

uncertainties and assumptions about us.

Table of Contents

OUR COMPANY

We were incorporated in the State of Nevada on September 25, 2008 under the names Ares Ventures Corporation for purposes of engaging in the acquisition, exploration and development of natural resource properties. From our organization and until November 2010, we were an exploration stage company with no revenues and a limited operating history.

Acquisitions

On November 2, 2010, we completed the acquisition of Mobivity, Inc., a Nevada corporation engaged in the business of mobile marketing, which at the time was known as CommerceTel, Inc., in exchange for 1,666,667 shares of our common stock. In anticipation of the transaction, on October 5, 2010, we changed our name from Ares Ventures Corporation to CommerceTel Corporation. Upon our acquisition of Mobivity, Inc., we ceased all operations related to the acquisition, exploration and development of natural resource properties and since that time have engaged exclusively in our current business, the development and operation of proprietary platforms over which brands and enterprises can conduct mobile marketing campaigns.

In April 2011, we acquired substantially all of the assets of the Txtstation interactive mobile marketing platform and services business from Adsparg Limited. The purchase price for the acquisition was 354,167 shares of our common stock and \$300,000 in cash, which was paid over an 11 month period.

In April 2011, we entered into an acquisition agreement with Mobivity, LLC and Mobile Visions, Inc. pursuant to which we acquired the assets of their Mobivity interactive mobile marketing platform and services business. The purchase price for the acquisition was 166,667 shares of our common stock, \$64,969 in cash paid at closing and a secured subordinated promissory note in the principal amount of \$606,054. The promissory note accrued interest on the unpaid principal amount at the rate of 6.25% per annum and principal and interest were paid in six quarterly installments of \$105,526 starting May 1, 2011. The note was paid in full on May 31, 2012.

In connection with the Mobivity acquisition, in June 2012 we changed our corporate name to Mobivity Holdings Corp.

In August 2011, we acquired substantially all of the assets of the BoomText interactive mobile marketing services business from Digimark, LLC. The purchase price for the acquired assets consisted of:

86,590 shares of our common stock issued at closing;

\$120,514 in cash paid at closing;

our secured subordinated promissory note in the principal amount of \$175,000. This note earned interest at 6.25% per annum and was paid in full on May 31, 2012;

our unsecured subordinated promissory note in the principal amount of \$194,658 due and payable on October 1, 2012. The note does not bear interest and was paid in full in 2013; and

an earn-out payment (payable 20 months after closing of the transaction) of a number of shares of our common stock equal to (a) 1.5, multiplied by our net revenue from acquired customers and customer prospects for the twelve-month period beginning six months after the closing date, divided by (b) the average of the volume-weighted average trading prices of our common stock for the 25 trading days immediately preceding the earn-out payment (subject to a collar of \$1.49 and \$2.01 per share). The final value of the earn-out payment was \$2,210,667 and was satisfied through our

issuance of 247,279 shares of our common stock.

---

## Table of Contents

In May 2013, we acquired the assets of Sequence, LLC related to a mobile customer loyalty application. The acquired assets include all application software, URL's, websites, trademarks, brands, customers and customer lists. The purchase price consisted of: \$300,000 in cash which was paid prior to closing; 125,000 shares of our common stock which were issued at closing valued, based on the closing price of our common stock on May 13, 2013, at \$183,750; and our agreements to pay 24 monthly earn-out payments consisting of 10% of the eligible monthly revenue subsequent to closing.

Also in May 2013, we acquired certain assets of Front Door Insights, LLC. The assets acquired from Front Door Insights consisted of cash on hand, accounts receivable, all rights under all contracts other than excluded contracts, prepaid expenses, all technology and intellectual property rights, accounts payable, and obligations under a commercial lease. The purchase price consisted of: \$100,000 in cash; (2) our promissory note in the principal amount of \$1,400,000; and (3) 1,666,667 shares of our common stock valued, based on the closing price of our common stock on May 20, 2013, at \$1,034,310.

In March 2014, we acquired all of the assets of SmartReceipt, Inc., a Delaware corporation in exchange for:

Our payment at closing of \$2.212 million of cash, net of a \$150,000 loan made by us to SmartReceipt in January 2014;

Our issuance of 504,884 shares of our common stock; and

Our earn-out payment of 200% of the "eligible revenue" over the 12 month period following the close of the transaction ("earn-out period"). The "eligible revenue" will consist of: 100% of our revenue derived during the earn out period from the sale of SmartReceipt products and services to certain SmartReceipt clients as of the close (the "designated SmartReceipt clients"); plus 50% of our revenue derived during the earn out period from the sale of our products and services to the designated SmartReceipt clients, plus 50% of our revenue derived during the earn out period from the sale of SmartReceipt products and services to our clients who are not designated SmartReceipt clients. The earn-out payment will be payable in our common shares (valued at the closing VWAP) no later than the 90th day following the end of the earn-out period. For purposes of the foregoing, the "closing VWAP" means the volume weighted average trading price of our common stock for the 90 trading days preceding the close of our acquisition of SmartReceipt.

Pursuant to our agreement with SmartReceipt, SmartReceipt has agreed that 50% of the shares issuable to it or its shareholders at the initial closing will be held back by us for a period of 12 months and will be subject to cancellation based on indemnification claims on our part. These shares were released to SmartReceipt in April 2015.

## Financing Transactions

Between March 2011 to November 2011, we conducted the private placement sale of 114,778 shares of our common stock at a price of \$9.00 per share for the gross proceeds of \$1,033,003. Each investor also received warrants to purchase an equivalent number of shares at an exercise price of \$12.00. In October 2012, the exercise price of the warrants was reduced from \$12.00 to \$3.00 as a result of certain anti-dilution provisions contained in the warrant agreement. As a result of the June 2013 private placement described below, the exercise price of the warrants was further reduced to \$1.20 per share in June 2013.

Table of Contents

Between November 2010 and June 2012, we conducted the private placement sale of our 10% Senior Secured Convertible Bridge Notes. The bridge notes accrued interest on the unpaid principal amount at the rate of 10% per annum. The entire principal amount of the bridge notes, plus all accrued and unpaid interest, was due on the earlier of (i) the date we completed a financing transaction for the offer and sale of shares of our common stock in an aggregate amount of no less than 125% of the principal amounts evidenced by the bridge notes (a “qualifying financing”), or (ii) a fixed maturity date, which initially was set at November 3, 2011 and later amended to October 15, 2013. On the maturity date of the bridge notes, in addition to the repayment of the principal amount and all accrued and unpaid interest, we agreed to issue to each holder of the bridge notes, at each such holder’s option, either (i) a three year warrant to purchase that number of shares of our common stock equal to the principal amount of (plus all accrued and unpaid interest on) the bridge notes held by the holder divided by the per share purchase price of the common stock offered and sold in the qualifying financing (the “offering price”) which warrants shall be exercisable at the offering price, or (ii) that number of shares of common stock equal to the product arrived at by multiplying (x) the principal amount of (plus all accrued and unpaid interest on) the bridge notes held by the holder, divided by the offering price and (y) 1.98. Our obligations under the bridge notes were secured by all of our assets.

As of May 31, 2013, the outstanding principal amount and accrued interest under the bridge notes was \$4,984,721 and \$441,973, respectively. As described below, all of the principal and substantially all of the accrued interest under the bridge notes were converted into shares of our common stock and warrants to purchase our common stock in June 2013.

On June 17, 2013, we entered into a securities purchase agreement and a registration rights agreement with certain accredited investors in connection with our private placement sale of 6,250,000 shares of our common stock at a price of \$1.20 per share, for aggregate gross proceeds of \$7.5 million. Pursuant to the terms of the registration rights agreement, we agreed to file with the SEC a resale registration statement covering the shares. Emerging Growth Equities, Ltd. acted as placement agent for the private placement and received \$493,300 in commissions from us. In addition, for its services as placement agent, we issued to EGE warrants to purchase an aggregate of 605,910 shares of our common stock, exercisable for a period of five years from the closing date, at an exercise price of \$1.20 per share.

In connection with the private placement, we also entered into a convertible secured promissory note conversion agreement on June 17, 2013, with the holders of our bridge notes. Pursuant to the note conversion agreement, we agreed to issue to the holders of our bridge notes 4,462,089 shares of our common stock, at the conversion price of \$1.20 per share, for the cancellation of outstanding principal of \$4,984,721 and accrued interest of \$369,786 under the notes. Certain holders elected to receive, and we made, cash payments on the accrued interest on their notes in lieu of shares of common stock. Each note holder also received a warrant to purchase that number of shares of our common stock calculated by dividing the outstanding principal amount plus accrued and unpaid interest of such note by the conversion price. We issued warrants to purchase a total of 4,541,592 shares of our common stock to the note holders. The warrants are exercisable for a period of five years at an exercise price of \$1.20 per share. In connection the sale of the bridge notes, we agreed to file with the SEC a resale registration statement covering the securities issued upon conversion of the Bridge Notes.

In March 2014, we conducted the private placement to certain accredited investors of 5,413,000 units of our securities at a price of \$1.00 per unit for the gross proceeds of up to \$5,413,000. Each unit consisted of one share of our common stock and a common stock purchase warrant to purchase one- quarter share of our common stock, over a five year period, at an exercise price of \$1.20 per share. In connection with the placement, we entered into a registration rights agreement with the investors, pursuant to which we agreed to cause a resale registration statement covering the common shares made part of the units to be filed by May 15, 2014. The registration rights agreement also provides that we must make certain payments as liquidated damages to the investors if we fail to timely file the registration statement and cause it to become effective. Emerging Growth Equities, Ltd. acted as placement agent for the private placement and received \$370,685 in commissions from us. In addition, for its services as placement agent, we issued

to EGE warrants to purchase an aggregate of 370,685 units, as defined above, exercisable for a period of five years from the closing date, at an exercise price of \$1.00 per unit. The warrants had a fair value on date of issuance of \$461,598.

In March 2015, we conducted the private placement to certain accredited investors of 4,805,000 units of our securities at a price of \$1.00 per unit for the gross proceeds of \$4,805,000. Each unit consisted of one share of our common stock and a common stock purchase warrant to purchase one-quarter share of our common stock, over a five year period, at an exercise price of \$1.20 per share. In connection with the placement, we entered into a registration rights agreement with the investors, pursuant to which we agreed to cause a resale registration statement covering the common shares made part of the units to be filed by April 30, 2015. The registration rights agreement also provides that we must make certain payments as liquidated damages to the investors if we fail to timely file the registration statement and cause it to become effective. Emerging Growth Equities, Ltd. acted as placement agent for the private placement and received \$234,500 in commissions from the us. In addition, for its services as placement agent, we issued to Emerging Growth Equities warrants to purchase an aggregate of 234,500 units, exercisable over a period of five years from the closing date, at an exercise price of \$1.00 per unit.
