Item 8.01 Other Events.

On May 17, 2011, Genta Incorporated announced that data from clinical trials of the Company's late-stage compounds, Genasense® (oblimersen sodium) Injection and tesetaxel, will be presented at the 2011 annual meeting of the American Society of Clinical Oncology (ASCO). The meeting will be held from June 3-7 in Chicago, IL.

Highlights of the presentations include final results, including overall survival and durable response rate, from AGENDA -- the Phase 3 trial of Genasense® in advanced melanoma. In addition, final survival results from a trial in advanced melanoma that combined Genasense® plus temozolomide and Abraxane® will be presented, including data from patients who received Genasense as a 1-hour, twice-weekly, intravenous infusion.

Reports on clinical trials using tesetaxel, the leading oral taxane in clinical development, will also be presented, including Phase 2 studies as 1st-line therapy for patients with hormone-refractory breast cancer and as 2nd-line therapy using a flat (non weight-based) dose in patients with advanced gastric cancer. Additional reports include results of a clinical study that showed no effect of food on tesetaxel pharmacokinetics, which has eliminated overnight fasting requirements prior to dosing.

Item 9.01 Financial Statements and Exhibits.

(d) Exhibits.
