ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended December 31, 2012

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

COMMISSION FILE NO. 000-52139

TAGLIKEME CORP.
(Name of small business issuer in its charter)

NEVADA
(State or other jurisdiction of
incorporation or organization)

20-1777817
(I.R.S. Employer Identification No.)

Third Floor, 7-8 Conduit Street, Mayfair, London, UK W1S 2XF
(Address of principal executive offices)

44-207-290-6919
(Issuer's telephone number)

Securities registered pursuant to
Section 12(b) of the Act:
NONE

Name of each exchange on which registered:

Securities registered pursuant to Section 12(g) of the Act:

COMMON STOCK, \$0.001
(Title of Class)

Check whether the issuer is not required to file reports pursuant to Section 13 or 15(d) of the Exchange Act.

Indicate by check mark if the registration is a well-known seasoned issuer as defined in Rule 403 of the Securities Act.
 Yes No

Edgar Filing: TagLikeMe Corp. - Form 10-K

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the registrant has (i) filed all reports required to be filed by Section 13 or 15(d) of the Exchange Act during the past 12 months (or for such shorter period that the registrant was required to file such reports), and (ii) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Website, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained in this form, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated file, or a smaller reporting company. See the definitions of "large accelerated filer", "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer	<input type="checkbox"/>	Accelerated filer	<input type="checkbox"/>
Non-accelerated filer	<input type="checkbox"/>	Smaller reporting company	<input checked="" type="checkbox"/>

Indicate by checkmark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

State the aggregate market value of the voting and non-voting common equity held by non-affiliates computed by reference to the price at which the common equity was sold, or the average bid and asked price of such common equity, as of the last business of the registrant's most recently completed second fiscal quarter: June 30, 2012: \$ 1,449,737.

ISSUERS INVOLVED IN BANKRUPTCY PROCEEDINGS DURING THE PAST FIVE YEARS

N/A

Check whether the issuer has filed all documents and reports required to be filed by Section 12, 13 and 15(d) of the Securities Exchange Act of 1934 after the distribution of securities under a plan confirmed by a court. Yes No

APPLICABLE ONLY TO CORPORATE REGISTRANTS

State the number of shares outstanding of each of the issuer's classes of common equity, as of the latest practicable date.

Class Outstanding as of April 30, 2013 Common Stock, \$0.001

Outstanding as of April 30, 2013: 330,940,630

DOCUMENTS INCORPORATED BY REFERENCE

If the following documents are incorporated by reference, briefly describe them and identify the part of the Form 10-K (e.g., Part I, Part II, etc.) into which the document is incorporated: (i) any annual report to security holders; (ii) any proxy or information statement; and (iii) any prospectus filed pursuant to Rule 424(b) or (c) of the Securities Act of 1933 (the "Securities Act"). The listed documents should be clearly described for identification purposes (e.g. annual reports to security holders for fiscal year ended December 24, 1990).

Statements made in this Form 10-K that are not historical or current facts are "forward-looking statements" made pursuant to the safe harbor provisions of Section 27A of the Securities Act of 1933 (the "Act") and Section 21E of the Securities Exchange Act of 1934. These statements often can be identified by the use of terms such as "may," "will," "expect," "believe," "anticipate," "estimate," "approximate" or "continue," or the negative thereof. We intend that such forward-looking statements be subject to the safe harbors for such statements. We wish to caution readers not to place undue reliance on any such forward-looking statements, which speak only as of the date made. Any forward-looking statements represent management's best judgment as to what may occur in the future. However, forward-looking statements are subject to risks, uncertainties and important factors beyond our control that could cause actual results and events to differ materially from historical results of operations and events and those presently anticipated or projected. We disclaim any obligation subsequently to revise any forward-looking statements to reflect events or circumstances after the date of such statement or to reflect the occurrence of anticipated or unanticipated events.

Available Information

Taglikeme Corp. files annual, quarterly, current reports, proxy statements, and other information with the Securities and Exchange Commission (the "Commission"). You may read and copy documents referred to in this Annual Report on Form 10-K that have been filed with the Commission at the Commission's Public Reference Room, 450 Fifth Street, N.W., Washington, D.C. You may obtain information on the operation of the Public Reference Room by calling the Commission at 1-800-SEC-0330. You can also obtain copies of our Commission filings by going to the Commission's website at <http://www.sec.gov>

PART I

ITEM 1. BUSINESS

BUSINESS DEVELOPMENT

We were incorporated under the laws of the State of Nevada on October 19, 2004 under the name "Morgan Creek Energy Corp." and since our inception engaged in the business of exploration of oil and gas bearing properties in the United States. Our Board of Directors approved the execution of a share exchange agreement dated effective as of May 14, 2012 as fully executed on May 21, 2012 (the "Share Exchange Agreement"), among us, Glob Media Works Inc., a private company organized under the laws of the State of Washington ("Glob Media") and the shareholders of Glob Media (the "Glob Media Shareholders"). In accordance with the terms and provisions of the Share Exchange Agreement, we acquired approximately 5,317,033 shares of common stock from the Glob Media Shareholders, which represented all of the issued and outstanding shares of Glob Media, in exchange for the issuance by us to the Glob Media Shareholders on a pro rata basis of approximately 45,378,670 shares of our restricted common stock at the rate of \$0.006 per share. This resulted in Glob Media becoming our wholly-owned subsidiary. Glob Media is the legal, beneficial and registered owner of certain intellectual property rights for certain software and internet applications (the "Intellectual Property"). On May 29, 2012, we filed with the Nevada Secretary of State Articles of Merger pursuant to which we merged into our wholly-owned subsidiary, TagLikeMe Corp., and the surviving corporation. Thus, our name was changed to "TagLikeMe Corp.," pursuant to the Articles of Merger (the "Name Change"). The Name Change was approved by our Board of Directors pursuant to written consent resolutions dated May 30, 2012. We filed the appropriate documentation with FINRA in order to effectuate the Name Change in the OTC Markets. The Name Change was effected on the OTC Markets June 15, 2012. Our new CUSIP number is 87378P 105. Our trading symbol is "TAGG". Our management deemed it appropriate to change our name to TagLikeMe Corp. in furtherance of and to better reflect the nature of our new business operations.

Please note that throughout this Annual Report, and unless otherwise noted, the words "we," "our," "us," the "Company," or "Taglikeme," refers to Taglikeme Corp.

TRANSFER AGENT

Our transfer agent is Transfer Online, Inc., 512 S.E. Salmon Street, Portland, Oregon 97214

CURRENT BUSINESS OPERATIONS

TagLikeMe

After consummation of the Share Exchange Agreement, we are in the business of connecting online users with others while looking for online information and make it easier for them to collect and share that information. In turn, the Company creates population centers of topic specific audiences that it plans to make available to third party ad publishers and information content providers. The Company is not a search engine nor does it intend to become one. It's a hybrid site the Company calls a "Common Information Network" where the Company leverages the existing search capabilities of major search engines, cross references the search information with real population remarks from major social and wiki networks, while giving its users the capability to collect, publish, share or collaborate their search information with whomever they choose in a public or private manner. As more and more users collect and tag search results, management believes that the Company will ultimately become a destination where people can look for already filtered and shared web information as well as connect, message and interact with other people searching for the same information as them.

The Company's planned business model will encompass three fundamental stages of growth:

- A. Population. As the beta product matures from user feedback and ongoing general development, the business will require additional funding to pursue additional marketing and support personnel. Significant cross marketing, advertisement placement and general awareness campaigns will have to be implemented on a constant basis in order to maintain general awareness and overall activities growth;
- B. Thoroughly position the development of the product toward mobile and portable device style applications. This will require additional resources in development and the overall first phase plan is to deploy a mobile platform for iOS phones and ipads (Apple operating system products) and tablets for users to take advantage of the Company's Tag search, bookmarking, and collaboration tools for the "on-the-go" user. ("Tags" or "metadata" in information systems are non-hierarchical keyword or term assigned to a piece of information such as an Internet bookmark, digital image, or computer file). This kind of metadata helps describe an item and allows it to be found again by browsing or searching. Tags are generally chosen informally and personally by the item's creator or by its viewer, depending on the system.); and
- C. In addition to desktop user activities which management feels will decline over the next two to three years, the Company intends to focus on monitoring and building on its expected mobile and tablet user population, and from their activities, generate a specific advertising or localized product offerings that users can respond to within their immediate location.

Industry - Today's Search Environment

Major search engines such as Google, Yahoo and Bing display approximately 30 billion search pages each day. There are approximately 1.8 billion global internet users that are growing at a rate of almost 30% annually. The primary function of search engines is to deliver mass quantities of information related to a specific topic or key word. The primary business of search engines is to deliver and provide advertising and other business services to mass populations of internet traffic in order to quantify their business model. The average internet user between the ages of 30 to 45 spends approximately 2.5 hours per day, while heavy internet users between the ages of 13 to 29 spend approximately 4.0 hours per day. Of these statistics, approximately 57% of their daily internet use is performing search related functions and remaining time is spent on various social networking and other online interests.

Today, the new phrase of "Web 3.0" is all about sorting, deciphering and making sense of all the information made available to people over the internet. Moreover, the internet has become a vast space of floating information with tens of millions of different destinations that may reflect the same topic.

Where would one start? Search engines are excellent in assembling key topics, words and search results. There are advanced search functions that the typical internet user would not normally find or know how to do. Typically, a person would abandon their search within 5 to 15 minutes but if they are absolutely insistent on finding information relevant to this topic, it could take them several hours without any significant results. So is the lack of finding accurate information a dysfunction of the search engine, or the lack of searching skills of the individual? The Company believes it's a bit of both. Though the user interface of giant search engines are welcoming and simple to use, to gain complex search results you must understand how to perform advanced queries and instructions are often hidden or outright confusing to the simple user. The majority of common search users don't clearly know how to articulate their search therefore they are not maximizing the true usefulness of their search engines. The cycle begins.

Today's Social and Other Information Networks

There are over 100+ different social networks with over 1 billion plus members and giant Facebook alone represents over 800 million + of that social interaction space. For business networks and other curate information sites such as Twitter, LinkedIn, Plaxo, Digg, Delicious, Quora, Aardvark and over 200 other sites are visited by over 200+ million worldwide users annually.

Social Networks are primarily large pockets of users congregating to interact based on specific interests such as family, friends, dating, shopping, business networking and general socialization. These replicate in much larger masses what real world social circles conduct on a daily basis. Today social networks are the largest online population. These sites cater to two very fundamental real world activities, social communication and human interaction.

Search Sites such as Blekko, Surfcanyon, Carrotsearch, Canoe, and a myriad of other search firms seeking to claim their stake at the increasingly growing numbers of online users have entered the scene. These search or search related sites all offer various feature combinations that eliminate results “clutter” and claim some new or better way of searching, analyzing and acquiring information. However noble, the Company strongly believes that a better engine to search for information is not the solution to the increasing “information overload” problem that plagues the online universe today. Current search engines have spent billions in enhancing a user’s search experience and already perform exceptionally well in gathering, filtering, analyzing and presenting online information to its users.

Product

The Company strongly believes the problem isn’t with the math or means behind search engines, it’s the overabundance of information generated daily by online users and picked up by search engines that makes search itself more challenging regardless of which search engine is used. The online universe continues to become the largest and most crowded information space we know today. Search engines are merely innovating to catch up and the information space is a self-multiplying universe. The more online users, the more users seek and add information exponentially. The more readily and easily technology becomes to share information, the more information becomes available to users regardless of quality. Again, the cycle continues and on a minute by minute basis. As an example according to futurepredictions.com, there will be about 1 billion websites by 2012 and over 4.5 million domain names are created each month or 54 million a year for various uses.

As an information network, TagLikeMe uses location and common interest methods to attract and connect users using their similar interests and by allowing them to communicate directly in real time. The Company does not ask for personal information and use of its personal workspace can be accessed using existing email or social network memberships. The Company does not share its user behaviors and allows users to “opt” out of displaying their location or identity when communicating with other users or posting public tagboards on the Company's site.

Value Proposition

1. Gathers results from all major search engines, select social networks and provides interactive information analysis to users;
2. Enables users to connect and communicate openly or discreetly with others while looking for information on the internet; and
3. Enables users to collect, share, and collaborate on web information from a single destination.

What makes TagLikeMe unique from its competitors is in its proprietary methods, and innovative architectures in combining existing search, online social networks with real person to person networking. Unlike our competitors we do not rely on a registered member base as a means for other users to interact.

We've modified very commonly known social features with unique techniques that enable the user to have direct control over their information gathering, sharing and interactive activities. Our methods include behind the scenes semantic functions to display simplified content recommendations on search results from all major search engines including the various social networks that we have included so that our users receive the best possible combination of information from their activities.

Revenue

The Company intends to introduce an advertisement placement model to third party ad publishers as traffic increases and it reaches its bench mark growth of approximately 1.0 million visitors and 5-10% active recurring users on an annualized basis. The Company expects to focus on significantly increasing user recurring measurements as its mobile applications become available and as its desktop product becomes thoroughly tuned from continuous development. Since the Company does not rely on registered members to generate its site activities, the Company primarily refers to its users as visitors whether they are simply conducting search functions or performing more complex interactions within its site. As the Company generates a measurable benchmark of population activities from desktop and mobile, the Company expects to form alliances and relationships with national and localized advertising publishers on a “special ad offer” basis. This will result in users being able to receive special promotional offerings on services or products within their local area or receive immediate special promotions specific to user interest based on their bookmarking criteria and collaboration projects with other users.

Remaining within the focus of being an “Open Information Network” managed by its users, the Company expects to expand its services to value-add a subscription or pay-per-use content service for its users. The Company is currently exploring relationships with various third party content providers in the areas of academic and other published research material. This would be a value add to users of the product to be able to find and retrieve for a small fee, hard to find research or other online materials in diverse categories.

Competition

The open information network market is characterized by rapidly evolving technology and intense competition. Many companies of all sizes, including a number of large technology companies, such as Google, Yahoo, and Bing, as well as several specialized companies, are developing various products and services. There may be products on the market that do or will compete directly with the products and services that we are seeking to develop. These companies may also compete with us in recruiting qualified personnel. Many of our potential competitors have substantially greater financial, research and development, human and other resources than we do.

Furthermore, the larger companies may have significantly more experience than we do in developing such products and services. Such competitors may: (i) develop more efficient and effective products and services; (ii) obtain patent protection or intellectual property rights that may limit our ability to commercialize our products or services; or (iii) commercialize products and services earlier than we do. The Company expects technology developments in the open information network industry to continue to occur at a rapid pace. Commercial developments by any competitors may render some or all of our potential products or services obsolete or non-competitive, which could materially harm our business and financial condition.

Intellectual Property

As of the date of this Current Report, the Company has not filed patents on any of its proprietary technology developed. The Company may consider filing a patent applications with respect to its system technologies and any novel aspects of its technology to protect its intellectual property. Future patents, if issued, may be challenged, invalidated or circumvented. Thus, any patent that the Company may own may not provide adequate protection against competitors. Any patent applications that the Company may file in the future may not result in issued patents. Also, patents may not provide the Company with adequate proprietary protection or advantages against competitors with similar or competing technologies. As a result of potential conflicts with the proprietary rights of others, the Company may in the future have to prove that it is not infringing the patent rights of others or be required to obtain a license to the patent.

The Company may rely on trade secrets and unpatentable know-how that it seeks to protect, in part, by confidentiality agreements. However, it is possible that parties may breach those agreements, and the Company may not have adequate remedies for any breach. It is also possible that its trade secrets or unpatentable know-how will otherwise become known or be independently developed by competitors. There can be no assurance that third parties will not assert infringement or other claims against the Company with respect to any existing or future systems or products, Litigation to protect the

Company's proprietary information or to determine the validity of any third-party claims could result in significant expense to the Company and divert the efforts of its technical and management personnel, whether or not the Company is successful in such litigation.

Oil and Gas Properties

After consummation of the Share Exchange Agreement, we remain holding title to certain oil and gas properties as previously disclosed; however, all oil and gas properties discussed have been fully impaired.

OIL GAS PROPERTIES

The acreage and location of our oil and gas properties is summarized as follows:

	Net Acres(*)
Mississippi	21,000
New Mexico	13,339
Total:	34,339

(*)Certain of our interests in our oil and gas properties may be less than 100%. Accordingly, we have presented the acreage of our oil and gas properties on a net acre basis.

Quachita Prospect

As of the date of this Annual Report, we lease approximately 1,971 net acres within the Quachita Trend in the State of Texas for a three-year term in consideration of approximately \$338,000. We have a 100% working interest and a 77% net revenue interest in the Quachita Prospect leases. During 2009, the balances of the leases within the Quachita trend were allowed to lapse without renewal by us. Accordingly, during the year ended December 31, 2009, we wrote off the original cost of these leases totaling \$338,353. As allowed for under the lease which included the Boggs #1 well, we have paid a nominal fee to maintain our rights and access to the Boggs #1 well.

Boggs #1 Well. We completed the drilling portion of the Boggs #1 well on July 13, 2007. Subsequently, we began production testing and evaluation of the well. Of the five tested zones, four produced significant volumes of natural gas. As formation water was also produced with the natural gas in the tested zones, the Boggs #1 is currently under evaluation.

The Boggs #1 had been privately funded with the funding investors receiving a 75% working interest and a 54% net revenue interest in exchange for providing 100% of all drilling and completion costs. Therefore, we initially retained a 25% working interest and a 23% net revenue interest in the Boggs #1 well. As of June 30, 2009, we incurred \$1,336,679 in drilling and completion costs. As of June 30, 2009, we had received a total of \$759,000 in funding from private investors. On March 24, 2008, we negotiated with the funding investors to acquire their interest in the Boggs #1 for \$759,000 (which amount is equal to the total amount of the funding investors' initial investment) and forgiveness of any additional amounts owing. Effective on March 24, 2008, we completed the acquisition and settlement of related party advances totaling \$962,980 through the issuance of 3,057,076 shares of our restricted common stock at \$0.315 per share. The difference between the estimated fair value of the common shares at issuance and the amount of the debt settled totaling \$45,857 was recorded as a finance cost.

As formation water was also produced with the natural gas in the tested zones, the Boggs #1 was partially impaired as of December 31, 2010. While there is potential to exploit lower zones or to recomplete the well under an improved gas pricing environment, an impairment charge of \$891,119 was recorded against the well in 2010 and a further impairment charge of \$445,560 was recorded against the well in fiscal 2011. We follow the full cost method of accounting for our oil and gas properties whereby all costs related to the acquisition of methane, petroleum and natural gas interests are capitalized. Such costs include land and lease acquisition costs, annual carrying charges of non-producing properties, geological and geophysical costs, costs of drilling and equipping productive and non-productive wells, and direct exploration salaries and related benefits. Certain of these costs are reviewed by management periodically for impairment regarding our unproved oil and gas properties. Management's assessment of these costs and results of exploration activities, potential commodity price outlooks or expiration of all or a portion of leaseholds resulted in its decision to impair the Boggs #1 and may further impact the timing and amount of other impairments on our properties.

As of the date of this Annual Report, we intend to plug and abandon the Boggs #1 well and have accrued \$50,000 for related costs. No further work is planned on being conducted and the leases will eventually expire.

New Mexico Prospect

As of the date of this Annual Report, we have leased various properties in the New Mexico Prospect totaling approximately 7,576 net acres within the State of New Mexico for a five year term expiring in 2013. in consideration for \$112,883. We have a 100% working interest and an 84.5% net revenue interest in the leases comprising the New Mexico Prospect.

Westrock Land Corp. Option Agreement.

Effective on October 31, 2008, our Board of Directors authorized the execution of an option agreement (the "Option Agreement") with Westrock Land Corp, a private Texas corporation ("Westrock"). In accordance with the terms and provisions of the Option Agreement: (i) Westrock owns all right, title and interest in and to approximately 7,763 net acres of property within the State of New Mexico with a net revenue interest of 81.5% pertaining to 5,763 of the net acres (the "New Mexico Leases"); (b) Westrock ; (iii) we desire to acquire a 100% working interest in the New Mexico Leases for a total purchase price of approximately \$388,150; and (iv) we had until April 16, 2009 to complete our due diligence (the "Option Period").

The Option Agreement was subsequently extended on March 31, 2009 and June 1, 2009 whereby the option period was extended to September 15, 2009. We exercised our option with Westrock and acquired the approximate 5,763 net acres in New Mexico.

Formcap Corporation Option Agreement.

Effective on July 14, 2009, our Board of Directors, pursuant to unanimous vote at a special meeting of the Board, authorized the execution of a letter agreement dated July 9, 2009 (the "Option Agreement") with Formcap Corporation ("Formcap"), to purchase a 50% working interest (40.75% net revenue interest) of our 81.5% leasehold interest in and to certain leases located in Curry County, State of New Mexico (the "Frio Draw Prospect Interest").

In accordance with the terms and provisions of the Option Agreement: (i) Formcap agreed to pay us a \$100,000 initial payment (the "Initial Payment") within five business days from the completion of its due diligence; (ii) the balance of funds for the initial well would be advanced by FormCap to us within five business days from receipt of a mutually agreed upon approval for expenditure, which balance of such funds for the initial well were to be received by us no later than September 8, 2009; and (iii) the Initial Payment would be applied towards the total consideration to be paid by FormCap to us, which would include the cost of drilling and completing two wells at a total estimated cost of approximately \$1,300,000.

In accordance with the further terms and provisions of the Option Agreement: (i) FormCap would provide to us the dry hole and completion costs estimated at \$650,000 in advance of drilling the first well; (ii) upon drilling and completion of the first well, we would assign to FormCap a 25% working interest (20.375% net revenue interest) in the Frio Draw Prospect Interest; and (iii) upon receipt by us of the funds from Formcap in advance of drilling the second well, we would assign to FormCap the additional 25% working interest (20.375% net revenue interest). Costs associated with the drilling of all subsequent wells were to be shared on an equal basis between us and FormCap.

We granted to FormCap the time period between the date of execution of the Option Agreement and August 15, 2009 to complete its due diligence (the "Option Period"). During the period FormCap advanced a non-refundable \$100,000 deposit under the terms of the Option to secure the project in connection with which we paid a finders' fee of \$20,000. On September 24, 2009, we announced that FormCap could not meet the requirements of the Option Agreement and thus forfeited its rights to the project. We retained the \$100,000 non-refundable deposit and recorded it as a gain on expired option. Due to current market conditions, management decided to fully impair the Frio Draw Prospect during fiscal year ended December 31, 2011 and, thus, an impairment charge of \$541,646 was recorded.

Oklahoma Prospect

Effective on June 2, 2009, our Board of Directors, pursuant to unanimous vote at a special meeting of the Board, authorized the execution of a letter agreement dated May 28, 2009, as amended (the "Option Agreement") with Bonanza Resources (Texas) Inc., the wholly owned subsidiary of Bonanza Resources Corporation ("Bonanza Resources"), to purchase a certain percentage of Bonanza Resources' eighty-five percent (85%) leasehold interest (the "Bonanza Resources Interest") in and to certain leases located in Beaver County, State of Oklahoma, known as the North Fork 3-D Prospect (the "Prospect"). In accordance with the terms and provisions of the Option Agreement: (i) we agreed to make a non-refundable payment to Bonanza Resources of \$150,000 within sixty (60) days from the date of the Option Agreement; and (ii) Bonanza Resources agreed to grant to us an option having an exercise period of one year (the "Option Period") to purchase a sixty percent (60%) partial interest (the "Partial Interest") in the Bonanza Resources Prospect. In further accordance with the terms and provisions of the Option Agreement, in the event we do not pay the \$150,000 to Bonanza Resources within sixty days from the date of the Option Agreement, the Option Agreement will terminate.

The Bonanza Resources Interest is held by Bonanza Resources pursuant to that certain letter agreement between Bonanza Resources, Ryan Petroleum LLC and Radian Energy L.C. dated February 25, 2009 (the "Original Agreement"). In accordance with the terms and provisions of the Original Agreement, Bonanza Resources acquired the Bonanza Resources Interest and subsequently represented to us that the acreage of the Bonanza Resources Interest consisted of 8,555 acres. Therefore, the Option Agreement reflected the acreage of the Bonanza Resources Interest to consist of 8,555 acres, which has been subsequently disclosed by us in numerous filings with the Securities and Exchange Commission.

Furthermore, in the event we pay the \$150,000 to Bonanza Resources within the sixty day period from the date of the Option Agreement, and in accordance with the further terms and provisions of the Option Agreement: (i) we shall assume that amount of Bonanza Resources' right, title and interest and obligations under the Original Agreement as is

proportionate to the Partial Interest; and (ii) we must incur \$2,400,000 in exploration and drilling expenditures (the "Exploration Expenditures") during the Option Period. In the event that we do not exercise the Option Agreement, Bonanza Resources shall retain the \$150,000 as liquidated damages for our failure to incur the Exploration Expenditures.

During the course of our due diligence, we discovered that the size of the Bonanza Resources Interest is not the original represented 8,555 acres but approximately 5,600 acres, which we alleged was materially less than represented by Bonanza Resources and contracted for under the Option Agreement. Bonanza Resources has stated to us that the actual lesser amount of acreage forming the Bonanza Resources Interest was due to certain leases not being renewed by the operator of the Prospect, thus expiring prior to the date of the Option Agreement, without first advising Bonanza Resources either orally or in writing of the operator's intention to allow those leases to expire. Bonanza Resources further stated to us that it discovered the facts regarding the acreage on approximately November 26, 2009. We in good faith relied on the representations of Bonanza Resources when we entered into the Option Agreement and now know that such representations were not correct.

Therefore, as of November 30, 2009, we entered into an amendment of the Option Agreement with Bonanza Resources (the "Amendment"). In accordance with the terms and provisions of the Amendment, Bonanza Resources granted to us an option to acquire a 75% interest in the Bonanza Resources Interest (a 59.50% working interest) by incurring the full costs of drilling one well to completion on the Prospect, which will deem us as having earned an interest in that well and in the balance of the Prospect. In the event we incur the full cost of drilling the first well which results in a dry hole, we will then have the exclusive right and option to participate in any and all further drilling programs on the Prospect and to incur the full costs of drilling a second well to completion on the Prospect. This will deem us as having earned its option to acquire the 75% interest of the Bonanza Resources Interest in both that well and the balance of the Prospect.

Therefore, in light of the fact that the Bonanza Resources Interest is actually comprised of a number of acres materially less than originally represented by Bonanza Resources, we: (i) advised the public that we believed the accurate number of acres forming the Bonanza Resources Interest is approximately 5,600 acres and that our website has been amended accordingly; and (ii) advised the public of the Amendment.

During fiscal year ended December 31, 2009, we paid to Bonanza \$115,000. The balance of \$35,000 was due by December 31, 2009. Subsequently on January 12, 2010, the non-refundable payment was amended from \$150,000 to \$125,000. On January 15, 2010, we made the final payment of \$10,000.

On January 15, 2010, we entered into a participation agreement to finance drilling and completion costs with two partners who will pay 67% of the costs of the first well in the Prospect. We were to pay 33% of the drilling and completion costs. To December 31, 2009, we had accrued the entire estimated cost of the first well of \$475,065, of which \$316,690 was paid to us during fiscal year ended December 31, 2009 by the new participants. Also during fiscal year ended December 31, 2009, we received a reduction in the well cost from the operator totaling \$189,413, which resulted in amounts payable by the new participants being reduced to \$190,530. Of the excess paid during fiscal year ended December 31, 2009 by the new participants, \$63,022 remains payable as of June 30, 2010 and has been included in accounts payable and accrued liabilities.

Our management decided to prioritize the exploration drilling program on the North Fork 3D prospect in Beaver County. We completed a multi-component interpretive 3-D survey on approximately 8,500 acres to image the Morrow A and B sands. Management believed that the 3-D interpretive survey identified approximately forty drill ready target locations. On February 1, 2010, we were informed by our operator that it had drilled the Nowlin #1-19 well to a depth of 8,836 feet. After review of the drilling logs, we have determined that oil is not producible in the targeted Morrow A and B sand formations. As of the date of this Annual Report, the well has been plugged and abandoned and we have written off our share of the dry hole costs of the well of \$230,524.

Mississippi Prospect

Effective on August 26, 2010, our Board of Directors authorized the execution of an option agreement dated August 26, 2010 (the "Option Agreement") with Westrock Land Corp. ("Westrock"), to purchase approximately 21,000 net acres of mineral oil and gas leases on lands located in Lamar, Jones and Forrest counties in the State of Mississippi (the "Acquired Properties"). The Company has entered into the Option Agreement with Westrock, as the mineral leaseholder, and has received representations that Westrock owns all right, title and interest to all depths, including the Haynesville Shale Formation pursuant to the oil and gas leases with a minimum 75% net revenue interest.

In accordance with the terms and provisions of the Option Agreement: (i) we agreed to issue to Westrock an aggregate of 15,000,000 restricted shares of our common stock by November 30, 2010; (ii) Westrock granted us a period to conduct due diligence to October 31, 2010; and (iii) at closing, Westrock would convey to us the Acquired Properties by assignment and bill of sale and other associated documentation.

We subsequently completed due diligence on the Acquired Properties and issued 75,000,000 restricted common shares to Westrock on October 21, 2010 with an estimated fair value of \$3,000,000. Due to current market conditions, management decided to fully impair these properties during fiscal year ended December 31, 2011 and, thus, an impairment charge of \$3,000,000 was recorded.

DRILLING ACTIVITY

As of the date of this Annual Report, we have not commenced drilling on any of our wells.

GROSS WELLS			NET WELLS		
Total	Producing	Dry	Total	Producing	Dry
-0-	-0-	-0-	-0-	-0-	-0-

PRODUCTION INFORMATION

During fiscal year ended December 31, 2011 and previously, we had no oil and gas production.

GROSS AND NET PRODUCTIVE GAS WELLS, DEVELOPED ACREAGE

PRODUCTIVE WELLS AND DEVELOPED ACRES

As of the date of this Annual Report, the tables below set forth our leasehold interest in productive and shut-in gas wells, and in developed acres:

PROSPECT	GROSS (1)	NET (2)
New Mexico Prospect	-	-
Oklahoma Prospect	-	-
Total	-	-

(1) A gross well is a well in which a working interest is owned. The number of gross wells is the total number of wells in which a working interest is owned.

(2) A net well is deemed to exist when the sum of fractional ownership working interest in gross wells equals one. The number of net wells is the sum of the fractional working interests owned in gross wells expressed as whole numbers and fractions thereof.

DEVELOPED ACREAGE TABLE(1)

PROSPECT	GROSS (2)	NET (3)
New Mexico Prospect	-	-
Oklahoma Prospect	-	-
Total	-	-

(1) Consists of acres spaced or assignable to productive wells.

(2) A gross acre is an acre in which a working interest is owned. The number of gross acres is the total number of acres in which a working interest is owned.

(3) A net acre is deemed to exist when the sum of fractional ownership working interests in gross acres equals one. The number of net acres is the sum of the fractional working interests owned in gross acres expressed as whole numbers and fractions thereof.

PROPOSED FUTURE BUSINESS OPERATIONS

The Company's business to date has been to develop product and test the market. It now seems likely that the target markets will be educational and groups of people that collaborate around their respective subject areas. Funding of approximately \$300,000 will be required over the next 12 months to complete the commenced product development for said markets, and online marketing to promote the service.

While we retain some oil and gas exploration leases, there are no current plans to conduct any exploration on these leases over the next 12 months and all oil and gas properties have been fully impaired.

RESEARCH AND DEVELOPMENT ACTIVITIES

The Company, through Glob Media, has incurred approximately \$638,000 on software development and \$37,025 on research and development during the past two fiscal years for its products. None of these software development or research or development costs are borne by the customer.

EMPLOYEES

We do not employ any persons on a full-time or on a part-time basis. Richard Elliot-Square is our President/Chief Executive Officer and Peter Karsten is our Chief Financial Officer/Treasurer. These individuals are primarily responsible for all of our day-to-day operations. Other services are provided by outsourcing and consultant and special purpose contracts.

ITEM 1A. RISK FACTORS

An investment in our common stock involves a number of very significant risks. You should carefully consider the following risks and uncertainties in addition to other information in evaluating our company and its business before purchasing shares of our common stock. Our business, operating results and financial condition could be seriously harmed due to any of the following risks. The risks described below are all of the material risks that we are currently aware of that are facing our company. Additional risks not presently known to us may also impair our business operations. You could lose all or part of your investment due to any of these risks.

RISKS RELATED TO OUR BUSINESS

An investment in the shares of common stock involves a number of very significant risks. You should carefully consider the following risks and uncertainties in addition to other information in evaluating the Company and its business before purchasing any shares. The Company's business, operating results, and financial condition could be seriously harmed due to any of the following risks. The risks described below are all of the material risks that management is currently aware of that the Company is facing. Additional risks not presently known to management may also impair the Company's business operations. You could lose all or part of your investment due to any of these risks.

Business Risks

Our Business is Difficult to Evaluate Because We Have a Limited Operating History.

In considering whether to invest in our common stock, you should consider that there is only limited historical financial and operating information available on which to base your evaluation of our performance. Our inception was October 19, 2004 and, as a result, we have a limited operating history.

We Have a History of Operating Losses and There Can Be No Assurance We Will Be Profitable in the Future.

We have a history of operating losses, expect to continue to incur losses, and may never be profitable, and we must be considered to be in the exploration stage. Further, we have been dependent on sales of our equity securities and debt financing to meet our cash requirements. We have incurred losses totaling approximately \$15,134,271 from October 19, 2004 (inception) to December 31, 2012 and had incurred losses of approximately \$481,734 during fiscal year ended December 31, 2012. Further, we do not expect positive cash flow from operations in the near term. There is no assurance that actual cash requirements will not exceed our estimates. The Company will require approximately \$300,000 during the next twelve months of operation to become a revenue generating company.

The uncertainty and factors described throughout this section may impede our ability to economically find, develop, produce, and acquire natural gas and oil reserves. As a result, we may not be able to achieve or sustain profitability or positive cash flows from operating activities in the future.

We Have Received a Going Concern Opinion From Our Independent Auditors' Report Accompanying Our December 31, 2012 and December 31, 2011 Financial Statements.

The independent auditor's report accompanying our December 31, 2012 and 2011 audited financial statements contains an explanatory paragraph expressing substantial doubt about our ability to continue as a going concern. The financial statements have been prepared "assuming that the Company will continue as a going concern." Our ability to continue as a going concern is dependent on raising additional capital to fund our operations and ultimately on generating future profitable operations. There can be no assurance that we will be able to raise sufficient additional capital or eventually have positive cash flow from operations to address all of our cash flow needs. If we are not able to find alternative sources of cash or generate positive cash flow from operations, our business and shareholders will be materially and adversely affected.

We are a Developmental Company.

Since inception, the Company's activities have been limited to organizational efforts, obtaining working capital and acquiring and developing a very limited number of properties involved in the oil and gas business. Glob Media is an early stage company, recently organized, and may face various challenges confronting such companies, including, for example, limited financial and other resources, inability to penetrate markets and recognize sufficient revenues, and the ability to attain profitability.

Moreover, the Company has a history of operating losses, expects to continue to incur losses, and may never be profitable, and the Company must be considered to be in the developmental stage. Further, in the past, the Company has been dependent on sales of its equity securities and debt financing to meet its cash requirements. The Company has incurred losses totaling approximately \$15,134,271 from October 19, 2004 (inception) to December 31, 2012 and incurred losses of approximately \$4,278,352 during fiscal year ended December 31, 2011. Further, we do not expect positive cash flow from operations in the near term. There is no assurance that actual cash requirements will not exceed our estimates. In particular, additional capital may be required in the event that: (i) the costs to develop the Company's products and services in the open information network industry may be more than management currently anticipates; and (ii) the Company encounters greater costs associated with general and administrative expenses.

The Company's business will depend on a strong brand name, and failing to maintain and enhance its brand name would hurt its ability to expand its base of users, advertisers, and network users.

The brand identity that the Company intends to develop will have significantly contributed to the success of its business. Maintaining and enhancing the "TagLikeMe" brand is critical to expanding its base of users, advertisers and any other partners. The Company believes that the importance of brand recognition will increase due to the relatively low barriers to entry in the internet market. Its brand name may be negatively impacted by a number of factors, including data privacy and security issues, service outages, and product malfunctions. If the Company fails to maintain and enhance the "TagLikeMe" brand name, or if the Company incurs excessive expenses in this effort, its business, operating results, and financial condition will be materially and adversely affected. Maintaining and enhancing its brand will depend largely on its ability to be a technology leader and continue to provide high-quality search products and services, which the Company may not do successfully.

A variety of new and existing U.S. and foreign laws, if applicable, could subject the Company to claims or otherwise harm its business.

The Company is subject to numerous U.S. laws and regulations covering a wide variety of subject matters. New laws and regulations (or new interpretations of existing laws and regulations) may also impact its business. The costs of compliance with these laws and regulations are high and are likely to increase in the future. Any failure on the

Company's part to comply with these laws and regulations can result in negative publicity and diversion of management time and effort and may subject the Company to significant liabilities and other penalties.

Furthermore, many of these laws were adopted prior to the advent of the internet and related technologies and, as a result, do not contemplate or address the unique issues of the internet and related technologies. The laws that do reference the internet are being interpreted by the courts, but their applicability and scope remain uncertain. For example, the laws relating to the liability of providers of online services are currently unsettled both within the U.S. and abroad. Claims may be threatened and filed against the Company under both U.S. and foreign laws for defamation, invasion of privacy and other tort claims, unlawful activity, patent, copyright and trademark infringement, or other theories based on the nature and content of the materials searched and the ads posted by the Company's users, its products and services, or content generated by the Company's users. Moreover, recent amendments to U.S. patent laws became effective in 2012 and may affect the Company's ability to protect its innovations and defend against claims of patent infringement.

In addition, the Digital Millennium Copyright Act has provisions that limit, but do not necessarily eliminate, the Company's liability for caching or hosting, or for listing or linking to, third-party websites that include materials that infringe copyrights or other rights, so long as the Company complies with the statutory requirements of this act. Any future legislation impacting these safe harbors may adversely impact the Company. Various U.S. and international laws restrict the distribution of materials considered harmful to children and impose additional restrictions on the ability of online services to collect information from minors. In the area of data protection, many states have passed laws requiring notification to users when there is a security breach for personal data, such as California's Information Practices Act. The Company faces similar risks and costs as its products and services will be offered in international markets and may be subject to additional regulations.

The Company may in the future be subject to intellectual property or other claims, which are costly to defend, could result in significant damage awards, and could limit the Company's ability to use certain technologies in the future.

Internet, technology, and media companies own large numbers of patents, copyrights, trademarks, and trade secrets and frequently enter into litigation based on allegations of infringement or other violations of intellectual property rights. In addition, patent holding companies may seek to monetize patents they have purchased or otherwise obtained. As the Company grows, the intellectual property rights claims, including patent, copyright and trademark infringement lawsuits, against the Company may be filed and may increase as the Company develops new products, services, and technologies. Adverse results in these lawsuits may include awards of substantial monetary damages, costly royalty or licensing agreements, or orders preventing the Company from offering certain features, functionalities, products, or services, and may also cause the Company to change its business practices, and require development of non-infringing products or technologies, which could result in a loss of revenues for the Company and otherwise harm its business.

In addition, agreements with the Company's potential customers and partners may require the Company to indemnify them for certain intellectual property infringement claims against them, which would increase the Company's costs as a result of defending such claims, and may require that the Company pay significant damages if there were an adverse ruling in any such claims. Furthermore, such customers and partners may discontinue the use of the Company's products, services, and technologies, as a result of injunctions or otherwise, which could result in loss of revenues and adversely impact the Company's business.

Regardless of the merits of the claims, intellectual property claims are often time consuming, expensive to litigate or settle, and cause significant diversion of management attention. To the extent such intellectual property infringement claims are successful, they may have an adverse effect on the Company's business, consolidated financial position, results of operations, or cash flows.

The Company's intellectual property rights are valuable, and any inability to protect them could reduce the value of the Company's products, services, and brandname.

The Company's trademarks, trade secrets, proprietary programming code and other intellectual property rights are important assets for the Company. Various events outside of the Company's control may pose a threat to its intellectual property rights, as well as to its products, services and technologies. For example, effective intellectual property protection may not be available in every country in which the Company's products and services may be distributed or made available through the internet. Also, the efforts the Company have taken and will take to protect its proprietary rights may not be sufficient or effective.

Although the Company may seek to obtain patent protection for its innovations, it is possible the Company may not be able to protect some of these innovations. Moreover, because of the Company's long-term interests in open source, the Company may not have adequate patent protection for certain innovations that later turn out to be important. Furthermore, there is always the possibility, despite the Company's efforts, that the scope of the protection gained will be insufficient or that an issued patent may be deemed invalid or unenforceable.

The Company will also seek to maintain certain intellectual property as trade secrets. The secrecy could be compromised by outside parties, or by its employees, which would cause the Company to lose the competitive advantage resulting from these trade secrets.

The Company also faces risks associated with its trademarks. For example, there is a risk that the word "TagLikeMe" could become commonly used so that it becomes synonymous with the word "expanded search." If this happens, the Company could lose protection for this trademark, which could result in other people using the word "TagLikeMe" to refer to their own products, thus diminishing the Company's brandname.

Any significant impairment of the Company's intellectual property rights could harm its business and its ability to compete. Also, protecting the Company's intellectual property rights is costly and time consuming. Any increase in the unauthorized use of its intellectual property could make it more expensive to do business and harm the Company's operating results.

The Company may be subject to legal liability associated with providing online services or content.

The Company will host and provide a wide variety of services and products that enable users to exchange information, advertise products and services, conduct business, and engage in various online activities both domestically and internationally. The law relating to the liability of providers of these online services and products for activities of their users is still somewhat unsettled both within the U.S. and internationally. Claims could be threatened and brought against us for defamation, negligence, breaches of contract, copyright or trademark infringement, unfair competition, unlawful activity, tort, including personal injury, fraud, or other theories based on the nature and content of information which the Company publishes or to which the Company provides links or that may be posted online or generated by the Company or by third parties, including its users. In addition, the Company may in the future be subject to domestic or international actions alleging that certain content the Company generated or third-party content that the Company made available within its services violates laws in domestic and international jurisdictions.

The Company will also arrange for the distribution of third-party advertisements to third-party publishers and advertising networks, and will offer third-party products, services, or content. The Company may be subject to claims concerning these products, services, or content by virtue of its involvement in marketing, branding, broadcasting, or providing access to them, even if the Company does not itself host, operate, provide, or provide access to these products, services, or content. Defense of any such actions could be costly and involve significant time and attention of the Company's management and other resources, may result in monetary liabilities or penalties, and may require the Company to change its business in an adverse manner.

More people are using devices other than personal computers to access the internet. If users do not widely adopt versions of the Company's web search technology, products, or operating systems developed for these devices, the Company's business could be adversely affected.

The number of people who access the internet through devices other than personal computers, including mobile phones, smart phones, handheld computers such as net books and tablets, video game consoles, and television set-top devices, has increased dramatically in the past few years. The lower resolution, functionality, and memory associated with some alternative devices may make the use of the Company's products and services through such devices more

difficult and the versions of the Company's products and services developed for these devices may not be compelling to users, manufacturers, or distributors of

alternative devices. Each manufacturer or distributor may establish unique technical standards for its devices, and the Company's products and services may not work or be viewable on these devices as a result. The Company has limited experience to date in operating versions of its products and services developed or optimized for users of alternative devices or in designing alternative devices. As new devices and new platforms are continually being released, it is difficult to predict the problems the Company may encounter in developing versions of its products and services for use on these alternative devices and the Company may need to devote significant resources to the creation, support, and maintenance of such devices. If the Company is unable to attract and retain a substantial number of alternative device manufacturers, distributors, and users to its products and services, or if the Company is slow to develop products and technologies that are more compatible with alternative devices, the Company will fail to capture a significant share of an increasingly important portion of the market for online services, which could adversely affect its business.

Privacy concerns relating to the Company's technology could damage its reputation and deter current and potential users from using its products and services.

Concerns may be expressed about whether the Company's products and services compromise the privacy of users and others. Concerns about the Company's practices with regard to the collection, use, disclosure, or security of personal information or other privacy related matters, even if unfounded, could damage its reputation and operating results. While the Company will strive to comply with all applicable data protection laws and regulations, as well as its own posted privacy policies, any failure or perceived failure to comply may result in proceedings or actions against the Company by government entities or others, or could cause the Company to lose users and customers, which could potentially have an adverse effect on its business.

In addition, as all of the Company's products and services are and will be web-based, the amount of data the Company stores for its users on its servers (including personal information) will be increasing. Any systems failure or compromise of the Company's security that results in the release of its users' data could seriously limit the adoption of the Company's products and services, as well as harm its reputation and brandname and, therefore, its business. The Company expects to expend significant resources to protect against security breaches. The risk that these types of events could seriously harm the Company's business is likely to increase as it expands the number of web-based products and services the Company offers and operates in more countries.

Regulatory authorities around the world are considering a number of legislative and regulatory proposals concerning data protection. In addition, the interpretation and application of consumer and data protection laws in the U.S., Europe and elsewhere are often uncertain and in flux. It is possible that these laws may be interpreted and applied in a manner that will be inconsistent with the Company's data practices. If so, in addition to the possibility of fines, this could result in an order requiring that the Company changes its data practices, which could have an adverse effect on its business and results of operations. Complying with these various laws could cause the Company to incur substantial costs or require the Company to change its business practices in a manner adverse to its business.

If the Company's security measures are breached, or if its services are subject to attacks that degrade or deny the ability of users to access its products and services, the Company's products and services may be perceived as not being secure, users and customers may curtail or stop using its products and services, and the Company may incur significant legal and financial exposure.

The Company's products and services involve the storage and transmission of users' and customers' proprietary information, and security breaches could expose the Company to a risk of loss of this information, litigation, and potential liability. The Company's security measures may be breached due to the actions of outside parties, employee error, malfeasance, or otherwise, and, as a result, an unauthorized party may obtain access to its data or its users' or customers' data. Additionally, outside parties may attempt to fraudulently induce employees, users, or customers to disclose sensitive information in order to gain access to the Company's data or its users' or customers' data. Any such breach or unauthorized access could result in significant legal and financial exposure, damage to the Company's reputation, and a loss of confidence in the security of its products and services that could potentially have an adverse effect on its business. Because the techniques used to obtain unauthorized access, disable or degrade service, or sabotage systems change frequently and often are not recognized until launched against a target, the Company may be unable to anticipate these techniques or to implement adequate preventative measures. If an actual or perceived breach of the Company's security occurs, the market perception of the effectiveness of its security measures could be harmed and the Company could lose users and customers.

Web spam and content farms could decrease the Company's search quality, which could damage its reputation and deter its current and potential users from using the Company's products and services.

“Web spam” refers to websites that attempt to violate a search engine’s quality guidelines or that otherwise seek to rank higher in search results than a search engine’s assessment of their relevance and utility would rank them. Although English-language web spam in the Company’s search results will be significantly reduced, and web spam in most other languages is limited, the Company expects web spammers will continue to seek ways to improve their rankings inappropriately. The Company will continuously combat web spam, including through indexing technology that makes it harder for spam-like, less useful web content to rank highly. The Company will also improve its ability to detect hacked websites, a major source of web spam in 2010. The Company will face new challenges from low-quality and irrelevant content websites, including “content farms,” which are websites that generate large quantities of low-quality content to help them improve their search rankings. We intend to launch several algorithmic changes focused on low-quality websites. If web spam and content farms continue to increase, this could hurt the Company’s reputation for delivering relevant information or reduce user traffic to its websites.

The Company's products rely on the services provided by other firms. Changes in the way other companies conduct business may negatively change the Company's business model and the way the Company can potentially generate revenues.

The Company's developed software products depend upon, and utilize the search engines of other companies. The cost structure and business model of the search engines is under constant review and change as they continue to attract consumers and revenue. As a result, costs and operating procedures relating to the use of these search engines by the Company is also subject to change which made adversely affect and limit potential revenue models of the Company and as well as change the development cycle and relating costs of the Company's software products themselves. The Company may need to constantly evolve its products and services in conjunction with the unknown actions of associated software and search engine related companies and their evolving business strategies.

The Company's products rely on the achievement of users and traffic to effectively create a platform for a revenue model. Timing to create a revenue model depends on repeat user and site traffic.

The Company's software and internet search and tagging products attempt to create a more efficient and effective method of assimilating and sharing information collected on the internet. The TagLikeMe user interface and product/service offering must achieve return users and a vast repeat usage following in order to gain business momentum capable of supporting a revenue platform at a future point in time. It is unknown how long it may take to create an internet site with a growing user base to support revenue generation techniques. As such, timing to potential profitability may not be determinable and is ultimately dependent on site function, ease of use, value to the consumer, and other dynamics.

Interruption or failure of the Company's information technology and communications systems could hurt its ability to effectively provide the Company's products and services, which could damage its reputation and harm its operating results.

The availability of the Company's products and services depends on the continuing operation of its information technology and communications systems. The Company's systems are vulnerable to damage or interruption from earthquakes, terrorist attacks, floods, fires, power loss, telecommunications failures, computer viruses, computer denial of service attacks, or other attempts to harm our systems. Some of the Company's data centers may be located in areas with a high risk of major earthquakes. The Company's data centers may also be subject to break-ins, sabotage, and intentional acts of vandalism, and to potential disruptions if the operators of these facilities have financial difficulties. Some of the Company's systems are not fully redundant, and the Company's disaster recovery planning cannot account for all eventualities. The occurrence of a natural disaster, a decision to close a facility the Company is using without adequate notice for financial reasons, or other unanticipated problems at its data centers could result in lengthy interruptions in its service. In addition, the Company's products and services are highly technical and complex and may contain errors or vulnerabilities. Any errors or vulnerabilities in the Company's products and services, or damage to or failure of its systems, could result in interruptions in its services, which could reduce its revenues and profits, and damage its brandname.

The Company relies on highly skilled personnel and, if the Company is unable to retain or motivate key personnel, hire qualified personnel, or maintain its corporate culture, the Company may not be able to grow effectively.

The Company's performance largely depends on the talents and efforts of highly skilled individuals. The Company's future success depends on its continuing ability to identify, hire, develop, motivate, and retain highly skilled personnel for all areas of its organization. Competition in the Company's industry for qualified employees is intense, and certain of its competitors will direct-target its employees. In addition, the Company's proposed compensation arrangements, such as its equity award programs, may not always be successful in attracting new employees and skilled contactors

and retaining and motivating existing employees/contractors. The Company's continued ability to compete effectively depends on its ability to attract new employees and to retain and motivate its existing employees. In addition, the Company's corporate culture will foster innovation, creativity, and teamwork. As the Company's organization grows, and the Company is required to implement more complex organizational management structures, the Company may find it increasingly difficult to maintain the beneficial aspects of its corporate culture. This could negatively impact its future success.

The Company's business depends on continued and unimpeded access to the internet by the Company and its users. Internet access providers may be able to block, degrade, or charge for access to certain of the Company's products and services, which could lead to additional expenses and the loss of users and advertisers.

The Company's products and services depend on the ability of its users to access the internet, and certain of its products require significant bandwidth to work effectively. This access will be provided by companies that have significant market power in the broadband and internet access marketplace, including incumbent telephone companies, cable companies, mobile communications companies, and government-owned service providers. Some of these providers may take measures that could degrade, disrupt, or increase the cost of user access to certain of the Company's products by restricting or prohibiting the use of their infrastructure to support or facilitate the Company's offerings, or by charging increased fees to the Company or its users to provide its offerings. Such interference could result in a loss of existing users and advertisers, and increased costs, and could impair the Company's ability to attract new users and advertisers, thereby harming its revenues and growth.

New technologies could block the Company's ads, which would harm our business.

Technologies have been developed that could block the display of the Company's advertisements and that provide tools to users to opt out of its advertising products. Most of the Company's revenues will be derived from fees paid to the Company by advertisers in connection with the display of ads on web pages for the Company's users. As a result, such technologies and tools could adversely affect the Company's operating results.

The Company's operating results may fluctuate, which will make its results difficult to predict and could cause the Company's results to fall short of expectations.

The Company's operating results may fluctuate as a result of a number of factors, many outside of its control. As a result, comparing the Company's operating results on a period-to-period basis may not be meaningful in the future, and you should not rely on the Company's results as an indication of future performance. The Company's quarterly and annual expenses as a percentage of its revenues may differ significantly in the future. The Company's operating results in future quarters may fall below expectations. Any of these events could cause the Company's stock price to fall. Each of the risk factors listed in this section and the following factors may affect the Company's operating results:

- The Company's ability to continue to attract users to its websites and satisfy existing users on its websites.
- The Company's ability to monetize (or generate revenues from) traffic on its websites and network websites.
- The Company's ability to attract advertisers to its program, and its ability to attract websites to its advertising program.
- The generation of revenue on the Company's network websites and its own website.
- The amount of revenues and expenses generated and incurred in currencies other than U.S. dollars, and the Company's ability to manage the resulting risk through foreign exchange risk management.

- The amount and timing of operating costs and expenses and capital expenditures related to the maintenance and expansion of the Company's businesses, operations, and infrastructure.
- The Company's focus on long-term goals over short-term results.
- The results of the Company's investments in risky projects, including new business strategies and new products, services, and technologies.
- The Company's ability to keep its websites operational at a reasonable cost and without service interruptions.
- The Company's ability to generate significant revenues from other services in which the Company may invest considerable time and resources

Risks Related to the Company's Common Stock

Sales of a Substantial Number of Shares of Common Stock Into the Public Market by Certain Stockholders May Result in Significant Downward Pressure on the Price of the Company's Common Stock and Could Affect Your Ability to Realize the Current Trading Price of the Company's Common Stock.

Sales of a substantial number of shares of the Company's common stock in the public market by certain stockholders could cause a reduction in the market price of its common stock. As of the date of this Current Report, the Company has 330,940,630 shares of common stock issued and outstanding. Of the total number of shares of common stock issued and outstanding, certain stockholders are able to resell shares pursuant to the Registration Statement declared effective on February 14, 2006.

As of the date of this Current Report, there are 88,817,840 outstanding shares of common stock that are restricted securities as that term is defined in Rule 144 under the Securities Act of 1933, as amended (the "Securities Act"). Although the Securities Act and Rule 144 place certain prohibitions on the sale of restricted securities, restricted securities may be sold into the public market under certain conditions. See "Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities." Any significant downward pressure on the price of our common stock as the selling stockholders sell their shares of our common stock could encourage short sales by the selling stockholders or others. Any such short sales could place further downward pressure on the price of our common stock.

The Trading Price of Our Common Stock on the OTC Bulletin Board Will Fluctuate Significantly and Stockholders May Have Difficulty Reselling Their Shares.

As of the date of this Current Report, our common stock trades on the Over-the-Counter Bulletin Board. There is a volatility associated with Bulletin Board securities in general and the value of your investment could decline due to the impact of any of the following factors upon the market price of our common stock: (i) disappointing results from our development efforts; (ii) failure to meet our revenue or profit goals or operating budgets; (iii) decline in demand for our common stock; (iv) downward revisions in securities analysts' estimates or changes in general market conditions; (v) technological innovations by competitors or in competing technologies; (vi) lack of funding generated for operations; (vii) investor perception of our industry or our prospects; and (viii) general economic trends.

In addition, stock markets have experienced price and volume fluctuations and the market prices of securities have been highly volatile. These fluctuations are often unrelated to operating performance and may adversely affect the market price of our common stock. As a result, investors may be unable to sell their shares at a fair price and you may

lose all or part of your investment.

21

Additional Issuance of Equity Securities May Result in Dilution to the Company's Existing Stockholders.

The Company's Articles of Incorporation, as amended, authorize the issuance of 1,000,000,000 shares of common stock. Common stock is our only authorized class of stock. The board of directors has the authority to issue additional shares of our capital stock to provide additional financing in the future and the issuance of any such shares may result in a reduction of the book value or market price of the outstanding shares of our common stock. If we do issue any such additional shares, such issuance may also cause a reduction in the proportionate ownership and voting power of all other stockholders. As a result of such possible dilution, your proportionate ownership interest and voting power will be decreased accordingly. Further, any such issuance could result in a change of control.

The Company's Common Stock is Classified as a "Penny Stock" Under SEC Rules Which Limits the Market for Our Common Stock.

The SEC has adopted rules that regulate broker-dealer practices in connection with transactions in "penny stocks." Penny stocks generally are equity securities with a price of less than \$5.00 (other than securities registered on certain national securities exchanges or quoted on the NASDAQ system, provided that current price and volume information with respect to transactions in such securities is provided by the exchange or system). Penny stock rules require a broker-dealer, prior to a transaction in a penny stock not otherwise exempt from those rules, to deliver a standardized risk disclosure document prepared by the SEC, which specifies information about penny stocks and the nature and significance of risks of the penny stock market. A broker-dealer must also provide the customer with bid and offer quotations for the penny stock, the compensation of the broker-dealer, and sales person in the transaction, and monthly account statements indicating the market value of each penny stock held in the customer's account. In addition, the penny stock rules require that, prior to a transaction in a penny stock not otherwise exempt from those rules, the broker-dealer must make a special written determination that the penny stock is a suitable investment for the purchaser and receive the purchaser's written agreement to the transaction. These disclosure requirements may have the effect of reducing the trading activity in the secondary market for stock that becomes subject to those penny stock rules. If a trading market for our common stock develops, our common stock will probably become subject to the penny stock rules, and shareholders may have difficulty in selling their shares.

The Company's Sole Officer and Director is Outside the United States With the Result That it May Be Difficult for Investors to Enforce Within the United States Any Judgments Obtained Against the Company or Its Director or Officer.

The Company's sole officer and director is a national and/or resident of a country other than the United States, and all or a substantial portion of such person's assets are located outside the United States. As a result, it may be difficult for investors to effect service of process on the Company's director or officer, or enforce within the United States or Canada any judgments obtained against the Company or its officer or director, including judgments predicated upon the civil liability provisions of the securities laws of the United States or any state thereof. Consequently, you may be effectively prevented from pursuing remedies under U.S. federal securities laws against them. In addition, investors may not be able to commence an action in a Canadian court predicated upon the civil liability provisions of the securities laws of the United States.

Additional Issuance of Equity Securities May Result in Dilution to Our Existing Stockholders.

Our Articles of Incorporation, as amended, authorize the issuance of 1,000,000,000 shares of common stock, which authorized capital was increased simultaneously in accordance with the Forward Stock Split effective July 18, 2012. Common stock is our only authorized class of stock. The board of directors has the authority to issue additional shares of our capital stock to provide additional financing in the future and the issuance of any such shares may result in a reduction of the book value or market price of the outstanding shares of our common stock. If we do issue any such

additional shares, such issuance also will cause a reduction in the proportionate ownership and voting power of all other stockholders. As a result of such dilution, your proportionate ownership interest and voting power will be decreased accordingly. Further, any such issuance could result in a change of control.

Our Common Stock is Classified as a “Penny Stock” Under SEC Rules Which Limits the Market for Our Common Stock.

The SEC has adopted rules that regulate broker-dealer practices in connection with transactions in "penny stocks." Penny stocks generally are equity securities with a price of less than \$5.00 (other than securities registered on certain national securities exchanges or quoted on the NASDAQ system, provided that current price and volume information with respect to transactions in such securities is provided by the exchange or system). Penny stock rules require a broker-dealer, prior to a transaction in a penny stock not otherwise exempt from those rules, to deliver a standardized risk disclosure document prepared by the SEC, which specifies information about penny stocks and the nature and significance of risks of the penny stock market. A broker-dealer must also provide the customer with bid and offer quotations for the penny stock, the compensation of the broker-dealer, and sales person in the transaction, and monthly account statements indicating the market value of each penny stock held in the customer's account. In addition, the penny stock rules require that, prior to a transaction in a penny stock not otherwise exempt from those rules, the broker-dealer must make a special written determination that the penny stock is a suitable investment for the purchaser and receive the purchaser's written agreement to the transaction. These disclosure requirements may have the effect of reducing the trading activity in the secondary market for stock that becomes subject to those penny stock rules. If a trading market for our common stock develops, our common stock will probably become subject to the penny stock rules, and shareholders may have difficulty in selling their shares.

A Majority of Our Directors and Officers are Outside the United States With the Result That it May Be Difficult for Investors to Enforce Within the United States Any Judgments Obtained Against Us or Any of Our Directors or Officers.

A majority of our directors and officers are nationals and/or residents of countries other than the United States, and all or a substantial portion of such persons' assets are located outside the United States. As a result, it may be difficult for investors to effect service of process on our directors or officers, or enforce within the United States or Canada any judgments obtained against us or our officers or directors, including judgments predicated upon the civil liability provisions of the securities laws of the United States or any state thereof. Consequently, you may be effectively prevented from pursuing remedies under U.S. federal securities laws against them. In addition, investors may not be able to commence an action in a Canadian court predicated upon the civil liability provisions of the securities laws of the United States.

ITEM 1B. UNRESOLVED STAFF COMMENTS

As of the date of this Annual Report, there are no unresolved comments pending from the Securities and Exchange Commission.

ITEM 2. PROPERTIES

We lease our principal office space located at Third Floor, 7-8 Conduit Street, Mayfair, London, UK W1S 2XF. The office costs us approximately \$600 monthly. The office and services related thereto are on a month to month basis.

ITEM 3. LEGAL PROCEEDINGS

Management is not aware of any legal proceedings other than disclosed below contemplated by any governmental authority or any other party involving us or our properties. As of the date of this Annual Report, no director, officer or affiliate is (i) a party adverse to us in any legal proceeding, or (ii) has an adverse interest to us in any legal proceedings. Other than discussed below, management is not aware of any other legal proceedings pending or that have been threatened against us or our properties.

ITEM 4. MINE SAFETY DISCLOSURES

PART II

ITEM 5. MARKET FOR COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

MARKET FOR COMMON EQUITY

Shares of our common stock commenced trading on the OTC Bulletin Board under the symbol “MCKE:OB” on approximately May 24, 2006. The market for our common stock is limited, and can be volatile. The following table sets forth the high and low bid prices relating to our common stock on a quarterly basis for the periods indicated as quoted by the NASDAQ stock market. These quotations reflect inter-dealer prices without retail mark-up, mark-down, or commissions, and may not reflect actual transactions.

Quarter Ended	High Bid	Low Bid
December 31, 2012	\$ 0.44	\$ 0.04
September 30, 2012	\$ 0.47	\$ 0.03
June 30, 2012	\$ 0.05	\$ 0.01
March 31, 2012	\$ 0.01	\$ 0.01
December 31, 2011	\$ 0.03	\$ 0.01
September 30, 2011	\$ 0.03	\$ 0.02
June 30, 2011	\$ 0.03	\$ 0.02
March 31, 2011	\$ 0.04	\$ 0.02

As of April 3, 2013, we had 27 shareholders of record, which does not include shareholders whose shares are held in street or nominee names.

DIVIDEND POLICY

No dividends have ever been declared by the Board of Directors on our common stock. Our losses do not currently indicate the ability to pay any cash dividends, and we do not indicate the intention of paying cash dividends on our common stock in the foreseeable future.

SECURITIES AUTHORIZED FOR ISSUANCE UNDER COMPENSATION PLANS

We have one equity compensation plan, the Morgan Creek Energy Corp. 2006 Stock Option Plan (the “2006 Plan”). The table set forth below presents information relating to our equity compensation plans as of the date of this Annual Report:

Plan Category	Number of Securities to be Issued Upon Exercise of Outstanding Options, Warrants and Rights (a)	Weighted-Average Exercise Price of Outstanding Options, Warrants and Rights (b)	Number of Securities Remaining Available for Future Issuance Under Equity Compensation Plans (excluding column (a))
Equity Compensation Plans Approved by Security Holders (2006 Stock Option Plan)	-0-	\$ 0.066	50,000,000
Equity Compensation Plans Not Approved by Security Holders			
Warrants	-	-	-
Total	-0-		

2006 Stock Option Plan

On April 3, 2006, the Board of Directors of the Company ratified, approved and adopted a Stock Option Plan for the Company in the amount of 16,666,670 shares with an exercisable period up to 10 years. In the event an optionee ceases to be employed by or to provide services to the Company for reasons other than cause, any Stock Option that is vested and held by such optionee may be exercisable within up to ninety calendar days after the effective date that his position ceases. No Stock Option granted under the Stock Option Plan is transferable. Any Stock Option held by an optionee at the time of his death may be exercised by his estate within one year of his death or such longer period as the Board of Directors may determine. On April 28, 2008, the Board of Directors deemed it necessary to approve an amendment to the Stock Option Plan to an aggregate of 25,000,000 shares. On August 3, 2009, we effected the Forward Stock Split, which increased the number of shares issuable under the Stock Option Plan from 25,000,000 shares to 50,000,000 shares.

The purpose of the 2006 Plan is to enhance our long-term stockholder value by offering opportunities to our directors, officers, employees and eligible consultants to acquire and maintain stock ownership in order to give these persons the opportunity to participate in our growth and success, and to encourage them to remain in our service.

The 2006 Plan is to be administered by our Board of Directors or a committee appointed by and consisting of one or more members of the Board of Directors, which shall determine (i) the persons to be granted Stock Options under the 2006 Plan; (ii) the number of shares subject to each option, the exercise price of each Stock Option; and (iii) whether the Stock Option shall be exercisable at any time during the option period up to ten (10) years or whether the Stock Option shall be exercisable in installments or by vesting only. The 2006 Plan provides authorization to the Board of Directors to grant Stock Options to purchase a total number of shares of Common Stock of the Company, not to exceed 25,000,000 shares as at the date of adoption by the Board of Directors of the 2006 Plan (as increased to 50,000,000 shares in accordance with the Forward Stock Split). At the time a Stock Option is granted under the 2006 Plan, the Board of Directors shall fix and determine the exercise price at which shares of our common stock may be acquired.

In the event an optionee ceases to be employed by or to provide services to us for reasons other than cause, retirement, disability or death, any Stock Option that is vested and held by such optionee generally may be exercisable within up to ninety (90) calendar days after the effective date that his position ceases, and after such 90-day period any unexercised Stock Option shall expire. In the event an optionee ceases to be employed by or to provide services to us

for reasons of retirement, disability or death, any Stock Option that is vested and held by such optionee generally may be exercisable within up to one-year after the effective date that his position ceases, and after such one-year period any unexercised Stock Option shall expire.

No Stock Options granted under the Stock Option Plan will be transferable by the optionee, and each Stock Option will be exercisable during the lifetime of the optionee subject to the option period up to ten (10) years or limitations described above. Any Stock Option held by an optionee at the time of his death may be exercised by his estate within one (1) year of his death or such longer period as the Board of Directors may determine.

The exercise price of a Stock Option granted pursuant to the 2006 Plan shall be paid in full to us by delivery of consideration equal to the product of the Stock Option in accordance with the requirements of the Nevada Revised Statutes. Any Stock Option settlement, including payment deferrals or payments deemed made by way of settlement of pre-existing indebtedness may be subject to such conditions, restrictions and contingencies as may be determined.

Grant of Stock Options During Fiscal Years Ended December 31, 2008 and December 31, 2009

We had adopted the Stock Option Plan pursuant to which there was an aggregate of 25,000,000 shares available for issuance under the Stock Option Plan, reduced to 16,666,670 shares in accordance with a reverse stock split effective April 22, 2008, and subsequently increased to 25,000,000 shares by Board of Director approval and resolution on April 28, 2008. On December 12, 2006 our Board of Directors authorized the grant of an aggregate 6,166,680 Stock Options under the Stock Option Plan to certain officers, directors and consultants, at an exercise price of \$0.33 per share expiring on December 12, 2016, taking into effect the reverse stock split (collectively, the "2006 Stock Options"). On April 30, 2008, our Board of Directors authorized the grant of an aggregate 12,500,000 Stock Options under the Stock Option Plan to certain officers, directors and consultants, at an exercise price of \$0.10 per share expiring on April 30, 2018 (collectively, the "2008 Stock Options").

On July 14, 2009, our Board of Directors approved the cancellation of certain of the 2006 Stock Options and the 2008 Stock Options, which aggregated 17,833,350 Stock Options thus leaving a balance of 833,330 Stock Options. Effective July 14, 2009, our Board of Directors then approved the re-issuance of 15,000,000 Stock Options (the "2009 Stock Options") to certain of our officers, directors and consultants at an exercise price of \$0.05 for a period of ten years.

On September 1, 2009, our Board of Directors approved the further grant of 1,000,000 stock options to one of our directors exercisable at \$0.078 for a period of ten years;

On December 8, 2009, our Board of Directors approved the further grant of 1,000,000 Stock Options to one of our directors exercisable at \$0.116 per share for a period of ten years.

During fiscal year ended December 31, 2011, an aggregate 833,330 Stock Options expired.

Effective June 15, 2012, the Board of directors ratified the cancellation of 15,000,000 stock options previously granted under the Company's Stock Option Plan.

Thus, as of the date of this Annual Report, an aggregate 2,000,000 Stock Options are outstanding.

Incentive Stock Options

The 2006 Plan further provides that, subject to the provisions of the Stock Option Plan and prior shareholder approval, the Board of Directors may grant to any key individuals who are our employees eligible to receive options one or more incentive stock options to purchase the number of shares of common stock allotted by the Board of Directors (the "Incentive Stock Options"). The option price per share of common stock deliverable upon the exercise of an Incentive Stock Option shall be at least 100% of the fair market value of the common shares of the Company, and in the case of an Incentive Stock Option granted to an optionee who owns more than 10% of the total combined voting power of all classes of our stock, shall not be less than 100% of the fair market value of our common shares. The option term of each Incentive Stock Option shall be determined by the Board of Directors, which shall not commence sooner than from the date of grant and shall terminate no later than ten (10) years from the date of grant of the Incentive Stock Option, subject to possible early termination as described above.

Common Stock Purchase Warrants

During fiscal year ended December 31, 2009, we issued 18,000,000 warrants and an aggregate of 12,240,000 warrants expired. The 18,000,000 warrants to purchase shares of common stock and the shares of common stock underlying the warrants were issued in a private placement by us during fiscal year 2009 at an exercise price of \$0.05 per share exercisable for a period of twelve months from the date of share issuance, which expiration date is July 20, 2010. This left a balance of 18,000,000 warrants as of December 31, 2009.

During fiscal year ended December 31, 2010, we issued a further 8,950,000 Warrants and an aggregate 18,000,000 warrants expired. The 8,950,000 warrants to purchase shares of common stock underlying the warrants were issued in a private placement by us during fiscal year 2010 at an exercise price of \$0.10 per share exercisable for a period of twelve months from the date of share issuance which expiration date is June 11, 2011. This left a balance of 8,950,000 warrants as of December 31, 2010.

During fiscal year ended December 31, 2011, an aggregate 8,950,000 warrants expired. Thus, as of the date of this Annual Report, there are no warrants issued and outstanding (the "Warrants").

RECENT SALES OF UNREGISTERED SECURITIES

On June 15, 2012, the Company agreed to settle \$135,000 of notes and accounts payable debts by issuing 22,500,000 common shares fair valued at \$135,000 or \$0.006 per share.

On June 29, 2012, the Company issued 45,378,670 shares of restricted common stock with a value of \$272,272 related to the acquisition of Glob Media.

SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS - SPECIAL MEETING OF SHAREHOLDERS

There were no matters submitted to a vote of the security holders during the year ended December 31, 2012.

ITEM 6. SELECTED FINANCIAL DATA

The following selected financial information is qualified by reference to, and should be read in conjunction with our financial statements and the notes thereto, and "Management's Discussion and Analysis of Financial Condition and Results of Operation" contained elsewhere herein. The selected income statement data for fiscal years ended December 31, 2012 and 2011 and the selected balance sheet data as of December 31, 2012 and 2011 are derived from our audited financial statements which are included elsewhere herein.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATION

The summarized financial data set forth in the table above is derived from and should be read in conjunction with our audited financial statements for the period from inception (October 19, 2004) to fiscal year ended December 31, 2012, including the notes to those financial statements which are included in this Annual Report. The following discussion should be read in conjunction with our audited financial statements and the related notes that appear elsewhere in this Annual Report. The following discussion contains forward-looking statements that reflect our plans, estimates and beliefs. Our actual results could differ materially from those discussed in the forward looking statements. Factors that could cause or contribute to such differences include, but are not limited to those discussed below and elsewhere in this Annual Report, particularly in the section entitled "Risk Factors". Our audited financial statements are stated in United States Dollars and are prepared in accordance with United States Generally Accepted Accounting Principles.

We a development stage company and have not generated any revenue to date. The above table sets forth selected financial information for the periods indicated. We have incurred recurring losses to date. Our financial statements have been prepared assuming that we will continue as a going concern and, accordingly, do not include adjustments relating to the recoverability and realization of assets and classification of liabilities that might be necessary should we be unable to continue in operation.

We expect we will require additional capital to meet our long term operating requirements. We expect to raise additional capital through, among other things, the sale of equity or debt securities.

RESULTS OF OPERATION

Fiscal Year Ended December 31, 2012 Compared to Fiscal Year Ended December 31, 2011.

For the years ended December 31, 2012 and 2011, the Company reported \$623,878 and \$4,264,609, respectively, for general and administrative expense, a decrease of \$3,640,731, or 85%. This decrease is primarily attributable to a decrease in impairment charges of \$3,987,206 (there were no impairment charges in 2011), partially offset by an increase of \$13,675, an increase of \$190,804, and an increase of \$29,035 in consulting fees, office and general expenses, and professional fees, respectively. General and administrative expenses generally include corporate overhead, financial and administrative contracted services, marketing, and consulting cost.

For the year ended December 31, 2012, we reported other income of \$142,144, compared to other expenses of \$13,743 reported for the year ended December 31, 2011, an increase of in other income of \$155,887. This increase in other income resulted from a \$229,423 gain on forgiveness of debt, partially offset by abandonment expense of \$50,000 and a \$23,536 increase in interest expense. The forgiveness of debt of \$229,423 represented an amount due to a former officer and director of the Company.

As a result of the above, the Company reported a net loss of \$481,733 (\$0.00 per share), for the year ended December 31, 2012, a decrease of \$3,799,619, or 89%, from the \$4,278,352 (\$0.02 per share), net loss reported for the year ended December 31, 2011. For the years ended December 31, 2012 and 2011, the Company reported weighted average number of share outstanding of 298,515,200 and 263,061,690, respectively.

LIQUIDITY AND CAPITAL RESOURCES

Fiscal Year Ended December 31, 2012

As at fiscal year ended December 31, 2012, our current assets were \$7,599 and our current liabilities were \$1,220,618, which resulted in a working capital deficit of \$1,213,019. As at fiscal year ended December 31, 2012, current assets were comprised of: (i) \$7,575 in cash; and (ii) \$24 in prepaid expense. As at fiscal year ended December 31, 2012, current liabilities were comprised of: (i) \$455,001 in accounts payable and accrued liabilities; (ii) \$9,518 in amounts due to related parties; and (iii) \$756,100 in loans payable.

As at December 31, 2012, our total assets were \$357,807 comprised of (i) current assets of \$7,599; (ii) equipment of \$2,906; and (iii) goodwill of \$347,302. The increase in total assets during fiscal year ended December 31, 2012 from fiscal year ended December 31, 2011 was primarily due to the increase in goodwill related to the acquisition of Glob Media Inc.

At December 31, 2012, our total liabilities were \$1,220,618 comprised entirely of current liabilities. The increase in liabilities during fiscal year ended December 31, 2012 from fiscal year ended December 31, 2011 was primarily due to an increase in loans payable.

Stockholders' Equity/Deficit decreased from a deficit of (\$788,349) for fiscal year ended December 31, 2011 to Stockholders' deficit of (\$862,811) for fiscal year ended December 31, 2012.

Cash Flows from Operating Activities

We have not generated positive cash flows from operating activities. For fiscal year ended December 31, 2012, net cash flows used in operating activities was (\$520,428), consisting primarily of a net loss of (\$481,734). Net cash flows used in operating activities was adjusted by \$236 for amortization, (\$229,423) for forgiveness of debt and 50,000 for abandonment expenses. Net cash flows used in operating activities was further changed by an increase of \$37,279 in accrued interest, \$7,766 in decreased prepaid expenses, an decrease of \$343,264 in accounts payable and accrued liabilities and a decrease of (\$247,816) in due to related parties. For fiscal year ended December 31, 2011, net cash flows used in operating activities was (\$92,050), consisting primarily of a net loss of (\$4,278,352). Net cash flows used in operating activities was adjusted by \$3,987,206 in impairment of oil and gas properties. Net cash flows used in operating activities was further changed by an increase of \$8,522 in accrued interest, a decrease of (\$102,885) in accounts payable and accrued liabilities, an increase of \$257,637 in due to related parties and a decrease of \$35,822 in prepaid expenses and deposits.

Cash Flows from Investing Activities

For fiscal year ended December 31, 2012, net cash flows from in investing activities was (\$2,654) consisting of (\$2,841) in goodwill and \$187 in the acquisition of Glob Media, net of cash received. For fiscal year ended December 31, 2011, net cash flows from investing activities was \$-0-.

Cash Flows from Financing Activities

We have financed our operations primarily from either advancements or the issuance of equity and debt instruments. For fiscal year ended December 31, 2012, net cash flows provided from financing activities was \$526,538 compared to \$95,833 for fiscal year ended December 31, 2011. Cash flows from financing activities for fiscal year ended December 31, 2012 consisted of \$526,538 in loans payable. Cash flows from financing activities for fiscal year ended December 31, 2011 was \$95,833 consisting of \$375,000 in loans payable and \$80,000 in advances from related parties which was offset by (\$159,167) in payments to related parties.

We expect that working capital requirements will continue to be funded through a combination of our existing funds and further issuances of securities. Our working capital requirements are expected to increase in line with the growth of our business.

PLAN OF OPERATION AND FUNDING

We intend to introduce an ad placement model to third party ad publishers as traffic increases and it reaches its benchmark growth of approximately 1.0 million visitors and 5-10% active recurring users on an annualized basis. We expect to focus on significantly increasing user recurring measurements as its mobile applications become available and as its desktop product becomes thoroughly tuned from continuous development. Since we do not rely on registered members to generate its site activities, we primarily refer to our users as visitors whether they are simply conducting search functions or performing more complex interactions within its site. As we generate a measurable benchmark of population activities from desktop and mobile, we expect to form alliances and relationships with national and localized advertising publishers on a "special ad offer" basis. This will result in users being able to receive special promotional offerings on services or products within their local area or receive immediate special promotions specific to user interest based on their bookmarking criteria and collaboration projects with other users.

Remaining within the focus of being an "Open Information Network" managed by its users, we expect to expand our services to value-add a subscription or pay-per-use content service for our users. We are currently exploring relationships with various third party content providers in the areas of academic and other published research material.

This would be a value add to users of the product to be able to find and retrieve for a small fee, hard to find research or other online materials in diverse categories.

Existing working capital, further advances and debt instruments, and anticipated cash flow are expected to be adequate to fund our operations over the next six months. We have no lines of credit or other bank financing arrangements. Generally, we have financed operations to date through the proceeds of the private placement of equity and debt instruments. We may expect to need to raise additional capital and generate revenues to meet long-term operating requirements. Additional issuances of equity or convertible debt securities will result in dilution to our current shareholders. Further, such securities might have rights, preferences or privileges senior to our common stock. Additional financing may not be available upon acceptable terms, or at all. If adequate funds are not available or are not available on acceptable terms, we may not be able to take advantage of prospective new business endeavors or opportunities, which could significantly and materially restrict our business operations.

MATERIAL COMMITMENTS

During 2011, a shareholder advanced the Company \$80,000, at 8% per annum, due on demand. A total of \$65,000 of this advance was repaid in 2011, leaving a balance of \$15,000 at December 31, 2011. In addition to this repayment, the Company also repaid this shareholder \$94,167 plus accrued interest for advances made in 2010.

During 2012, the Company received loan proceeds of \$245,000 from an unrelated party pursuant to an unsecured promissory note agreement. The promissory note is due on demand and bears interest at 10% per annum. Total accrued interest was \$8,690, leaving a total of \$253,690, principal and interest, due against this loan at December 30, 2012.

During fiscal year ended December 31, 2011, we received loan proceeds of \$175,000 from an unrelated third party. The loan was evidenced in a promissory note dated May 15, 2011 and maturing November 15, 2011. The promissory note bears interest at the rate of 10% per annum of which a total of \$28,479 has accrued for interest as of December 31, 2012. This note is due on demand.

During 2012, the Company received loan proceeds of \$25,000 from an unrelated third party pursuant to an unsecured promissory note. The promissory note is due on demand and bears interest at a rate of 10% per annum of which a total of \$1,913 has been accrued for interest as of December 31, 2012.

During 2012, the Company received loan proceeds of \$60,000 from an unrelated third party pursuant to an unsecured promissory note. The promissory note is due on demand and bears interest at a rate of 10% per annum of which a total of \$2,643 has been accrued for interest as of December 31, 2012.

During 2012, the Company received loan proceeds of \$99,953 from an unrelated third party pursuant to an unsecured promissory note. The promissory note is due on demand and bears interest at a rate of 10% per annum of which a total of \$986 has been accrued for interest as of December 31, 2012.

During 2012, the Company received loan proceeds of \$39,500 from an unrelated third party pursuant to an unsecured promissory note agreement. The promissory note is due on demand and bears interest at 10% per annum. Total accrued interest was \$3,530 leaving a total of \$43,030 due against this promissory note at December 31, 2012.

During 2012, Glob Media received loan proceeds of \$50,865 from an unrelated third party pursuant to an unsecured promissory note agreement. The promissory note is due on demand and bears interest at 10% per annum. Total accrued interest was \$2,319 leaving a total of \$53,184 owing on this promissory note at December 31, 2012.

PURCHASE OF SIGNIFICANT EQUIPMENT

We do not intend to purchase any significant equipment during the next twelve months.

OFF-BALANCE SHEET ARRANGEMENTS

As of the date of this Annual Report, we do not have any off-balance sheet arrangements that have or are reasonably likely to have a current or future effect on our financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources that are material to investors.

GOING CONCERN

The independent auditors' report accompanying our December 31, 2012 and December 31, 2011 financial statements contains an explanatory paragraph expressing substantial doubt about our ability to continue as a going concern. The financial statements have been prepared "assuming that we will continue as a going concern," which contemplates that we will realize our assets and satisfy our liabilities and commitments in the ordinary course of business.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Stockholders and Board of Directors
TagLikeMe Corp

I have audited the accompanying balance sheets of TagLikeMe Corp as of December 31, 2012 and the statements of operations, stockholders' equity, and cash flows for the year ended December 31, 2012. These financial statements are the responsibility of the Company's management. My responsibility is to express an opinion on these financial statements based on my audit. The financial statements of the Company as of December 31, 2011, were audited by other auditors whose report dated April 5, 2012, expressed an unqualified opinion on these statements.

I conducted my audit in accordance with standards of the Public Company Accounting Oversight Board (United States). Those standards require that I plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Company is not required to have, nor was I engaged to perform, an audit of its internal control over financial reporting. My audit included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, I express no such opinion. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. I believe that my audit provides a reasonable basis for my opinion.

In my opinion, the financial statements referred to above present fairly, in all material respects, the financial position of TagLikeMe Corp as of December 31, 2012 and the results of its operations and its cash flows for the year period ended December 31, 2012 in conformity with accounting principles generally accepted in the United States.

The accompanying financial statements have been prepared assuming the Company will continue as a going concern. As discussed in Note 1 to the financial statements, the Company has a minimum cash balance available for payment of ongoing operating expenses, has experienced losses from operations since inception, and it does not have a source of revenue sufficient to cover its operating costs. These factors raise substantial doubt about the Company's ability to continue as a going concern. Management's plans in this regard are described in Note 1. The financial statements do not include any adjustments that might result from the outcome of this uncertainty.

/s/ Patrick Rodgers, CPA, PA
Altamonte Springs, Florida
May 4, 2013

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To The Board of Directors and Stockholders
Morgan Creek Energy Corp.

We have audited, before the effects of the adjustments to retrospectively apply the change in accounting described in Note 8 relating to the forward stock split, the accompanying consolidated balance sheet of TAGLIKEME CORP. (formerly Morgan Creek Energy, Corp.) (the "Company") (An Exploration Stage Company) as of December 31, 2011 and the related consolidated statements of operations, cash flows and stockholders' equity for the year ended December 31, 2011 (the 2011 financial statements before the effects of the adjustments discussed in Note 8 are not presented therein) and for the period from inception (October 19, 2004) to December 31, 2011 (the 2011 financial statements before the effects of the adjustments discussed in Note 8 are not presented therein). These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audits in accordance with standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audit included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above, before the effects of the adjustments to retrospectively apply the effect of the forward stock split described in Note 8, present fairly, in all material respects, the financial position of the Company as of December 31, 2011, and the results of its operations and its cash flows for the year then ended and from inception (October 19, 2004) to December 31, 2011, in conformity with accounting principles generally accepted in the United States of America.

The accompanying financial statements have been prepared assuming the Company will continue as a going concern. As discussed in Note 1 to the financial statements, the Company has suffered recurring losses from operations, which raise substantial doubt about its ability to continue as a going concern. Management's plans in regard to these matters are also described in Note 1. The financial statements do not include any adjustments that might result from the outcome of this uncertainty.

TAGLIKEME CORP.
(formerly Morgan Creek Energy Corp.)
(A Development Stage Company)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
DECEMBER 31, 2012

NOTE 1 – NATURE OF OPERATIONS AND BASIS OF PRESENTATION

Effective June 15, 2012, Morgan Creek Energy Corp. effected a name change on the OTC Bulletin Board to TagLikeMe Corp. (the “Company”). The Company is a development stage company that was organized to enter into the oil and gas industry. The Company intended to locate, explore, acquire and develop oil and gas properties in the United States and within North America. In May 2012, the Company changed its business focus and plan to developing online and mobile content using search and sharing technology.

Effective June 29, 2012, the Company completed and consummated a share exchange agreement dated May 14, 2012, as fully executed on May 24, 2012 (the "Share Exchange Agreement") with Glob Media Works Inc., a company incorporated under the laws of the State of Washington ("Glob Media"), and each of the shareholders of Glob Media (collectively the "Glob Media Shareholders"), whereby the Corporation has acquired all of the issued and outstanding shares of Glob Media in exchange for the issuance of 45,378,670 shares of its restricted common stock to the Glob Media Shareholders on a pro rata basis in accordance with each Glob Media Shareholder's respective percentage equity ownership in Glob Media (Note 3). Glob Media owns intellectual property rights to its internet cloud based software application related to online search and social media developed by Glob Media. As a result of the closing of the Share Exchange Agreement, Glob Media has become the Company's direct wholly-owned subsidiary.

Effective July 18, 2012, the Company completed a forward stock split by the issuance of 5 new shares for each 1 outstanding share of the Company's common stock (Note 8). Unless otherwise noted, all references herein to number of shares, price per share or weighted average shares outstanding have been adjusted to reflect this stock split on a retroactive basis.

Going concern

The Company commenced operations on October 19, 2004 and has not realized any revenues since inception. As of December 31, 2012, the Company has an accumulated deficit of \$15,091,584. The ability of the Company to continue as a going concern is dependent on raising capital to fund ongoing operations and carry out its business plan and ultimately to attain profitable operations. Accordingly, these factors raise substantial doubt as to the Company's ability to continue as a going concern. The financial statements do not include any adjustments relating to the recoverability and classification of recorded assets, or the amounts of and classification of liabilities that might be necessary in the event the Company cannot continue in existence. To date the Company has funded its initial operations by way of private placements of common stock and advances from related parties.

NOTE 2 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Organization

The Company was incorporated on October 19, 2004 in the State of Nevada. The Company's fiscal year end is December 31.

Basis of presentation

These financial statements are presented in United States dollars and have been prepared in accordance with United States generally accepted accounting principles.

The consolidated financial statements include the accounts of the Company and its wholly-owned subsidiary, Glob Media Works Inc., from the date of acquisition on June 29, 2012. All significant inter-company transactions and account balances have been eliminated upon consolidation.
