### **Item 8.01 Other Events.**

As previously announced in a press release dated April 21, 2016, Nephros, Inc. (the “Company”) submitted a Special 510(k) application to the U.S. Food and Drug Administration (“FDA”) for its EndoPur™ ultrafilter designed to provide hemodialysis quality water. On April 28, 2016, the Company received a response from FDA, in which FDA noted that it had determined that the Special 510(k) should be converted to a Traditional 510(k). FDA requested additional information on the 20”, 30” and 40” filter sizes and on the reusable external filter housing. Following discussions with FDA, the Company converted the Special 510(k) submission to a Traditional 510(k) submission for the 20”, 30” and 40” filter sizes. The Company intends to file a separate Special 510(k) for the EndoPur™ 10” filter size in the near term.

Due to the longer FDA review process associated with a Traditional 510(k) submission, the Company aims to launch the 20”, 30” and 40” filter sizes early in the fourth quarter of 2016, subject to completion of the FDA clearance process. As the 10” filter size still qualifies for the Special 510(k) process, the Company aims to launch the 10” filter size early in the third quarter of 2016, subject to completion of the FDA clearance process.

### **Forward-Looking Statements**
