EverBank Financial Corp and Subsidiaries

Notes to Condensed Consolidated Financial Statements (unaudited)

(Dollars in thousands, except per share data)

1. Organization and Basis of Presentation

a) Organization — EverBank Financial Corp (the Company) is a thrift holding company with two direct operating subsidiaries, EverBank (EB) and EverBank Funding, LLC (EBF). EB is a federally chartered thrift institution with its home office located in Jacksonville, Florida. Its direct banking services are offered nationwide. In addition, EB operates financial centers in Florida and retail lending centers across the United States. EB (a) accepts deposits from the general public; (b) originates, purchases, services, sells and securitizes residential real estate mortgage loans, commercial real estate loans and commercial loans and leases; (c) originates consumer and home equity loans; and (d) offers full-service securities brokerage and investment advisory services.

EB's subsidiaries are:

- AMC Holding, Inc., the parent of CustomerOne Financial Network, Inc.;
- Tygris Commercial Finance Group, Inc. (Tygris), the parent of EverBank Commercial Finance, Inc.;
- EverInsurance, Inc.;
- Elite Lender Services, Inc.;
- EverBank Wealth Management, Inc. (EWM); and
- Business Property Lending, Inc.

On January 31, 2012, as part of a tax-free reorganization, the assets, liabilities and business activities of EWM were transferred to EB.

On February 14, 2013, the Company formed EverBank Funding, LLC, a Delaware limited liability company, to facilitate the pooling and securitization of mortgage loans for issuance into the secondary market.

b) Reincorporation — In September 2010, EverBank Financial Corp, a Florida corporation (EverBank Florida), formed EverBank Financial Corp, a Delaware corporation (EverBank Delaware). Subsequent to its formation, EverBank Delaware held no assets, had no subsidiaries and did not engage in any business or other activities except in connection with its formation. In May 2012, EverBank Delaware completed an initial public offering with its common stock listed on the New York Stock Exchange (NYSE) under the symbol "EVER". Immediately preceding the consummation of that offering, EverBank Florida merged with and into EverBank Delaware, with EverBank Delaware continuing as the surviving corporation and succeeding to all of the assets, liabilities and business of EverBank Florida. The merger resulted in the following:

• All of the outstanding shares of common stock of EverBank Florida were converted into approximately 77,994,699 shares of EverBank Delaware common stock;

• All of the outstanding shares of Series B Preferred Stock of EverBank Florida were converted into 15,964,644 shares of EverBank Delaware common stock;

• As a result of the reincorporation of EverBank Florida in Delaware, the Company is now governed by the laws of the State of Delaware.

Reincorporation of EverBank Florida in Delaware did not result in any change in the business, management, fiscal year, assets, liabilities or location of the principal offices of the Company.

c) Basis of Presentation — The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America (U.S. GAAP) for interim financial information and the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all information or footnotes necessary for a complete presentation of financial position, results of operations, comprehensive income, and cash flows in conformity with generally accepted accounting principles. The information included in this Quarterly Report on Form 10-Q should be read in conjunction with the audited consolidated financial statements and accompanying notes to the financial statements included in the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2012. Operating results for the interim periods disclosed herein are not necessarily indicative of the results that may be expected for the year ending December 31,

2013.

The accompanying unaudited condensed consolidated financial statements include the accounts of the Company and its majority-owned subsidiaries. All intercompany balances and transactions have been eliminated in consolidation.

The results of operations for acquired companies are included from their respective dates of acquisition. In management's opinion, all adjustments (which include normal recurring adjustments) necessary to present fairly the financial position, results of operations, comprehensive income, and changes in cash flows have been made.

GAAP requires management to make estimates that affect the reported amounts and disclosures of contingencies in the condensed consolidated financial statements. Estimates by their nature are based on judgment and available information. Material estimates relate to the Company's allowance for loan and lease losses, loans and leases acquired with evidence of credit deterioration, repurchase obligations, contingent liabilities, and the fair values of investment securities, loans held for sale, MSR and derivative instruments. Because of the inherent uncertainties associated with any estimation process and future changes in market and economic conditions, it is possible that actual results could differ significantly from those estimates.

## 2. Recent Accounting Pronouncements

**Presentation of Comprehensive Income** — In June 2011, the Financial Accounting Standards Board (FASB) issued Accounting Standard Update (ASU) 2011-05, Comprehensive Income (Topic 220)—Presentation of Comprehensive Income, to require an entity to present the total of comprehensive income, the components of net income, and the components of other comprehensive income either in a single continuous statement of comprehensive income or in two separate but consecutive statements. ASU 2011-05 eliminates the option to present the components of other comprehensive income as part of the statement of shareholders' equity. ASU 2011-05 is effective for the first quarter of 2012 and should be applied retrospectively. Adoption of this standard resulted in the presentation of a new statement of comprehensive income separate from the statement of shareholders' equity but did not have any impact on the Company's results of operations. In December 2011, the FASB issued ASU 2011-12, Comprehensive Income (Topic 220)- Deferral of the Effective Date for Amendments to the Presentation of Reclassifications of Items Out of Accumulated Other Comprehensive Income in ASU 2011-05, to allow time to redeliberate whether to present on the face of the financial statements the effects of reclassifications out of AOCI on the components of net income and other comprehensive income for all periods presented. Adoption of this ASU did not have any impact on the Company's condensed consolidated financial statements or results of operations. In February 2013, the FASB issued ASU 2013-02, Comprehensive Income (Topic 220)—Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income, to require an entity to disaggregate the total change of each component of other comprehensive income and separately present reclassification adjustments and current period other comprehensive income. ASU 2013-02 also requires that entities either (1) present in a single note or parenthetically on the face of the financial statements the effect of significant amounts reclassified from each component of AOCI based on its source and the income line item affected by the reclassification if items are reclassified out of AOCI in their entirety or (2) cross reference to other required, related disclosures for additional information if items are not reclassified out of AOCI in their entirety. ASU 2013-02 is effective prospectively for annual reporting periods beginning after December 15, 2012, and interim periods within those annual periods. The adoption of this standard resulted in the additional disclosure of the lines of income or expense impacted by reclassifications out of AOCI within the statement of comprehensive income but did not have any impact on the Company's condensed consolidated financial statements or results of operations.

**Balance Sheet Offsetting**—In December 2011, the FASB issued ASU 2011-11, Balance Sheet (Topic 210)—Disclosures about Offsetting Assets and Liabilities, which will enhance disclosures by requiring improved information about financial instruments and derivative instruments that are either (1) offset in accordance with either Section 210-20-45 or Section 815-10-45 or (2) subject to an enforceable master netting arrangement or similar agreement. The guidance will require that entities disclose the gross and net information about both instruments that are offset in the balance sheet or are subject to a master netting arrangement. In January 2013, the FASB issued ASU 2013-01, Balance Sheet (Topic 210)—Clarifying the Scope of Disclosures about Offsetting Assets and Liabilities, which limits the scope of the new balance sheet offsetting disclosures to only (1) derivatives, including bifurcated embedded derivatives; (2) repurchase agreements and reverse repurchase agreements; and (3) securities borrowing and securities lending

transactions, to the extent they are offset in the financial statements or are subject to an enforceable master netting arrangement or similar agreement, irrespective of whether they are offset in the statement of financial position. The requirements set forth in both ASU 2011-11 and ASU 2013-01 are effective for annual reporting periods beginning on or after January 1, 2013, and interim periods within those annual periods with retrospective disclosure necessary for all comparative periods presented. The adoption of these standards resulted in additional disclosures as presented in Note 13 but did not have any impact on the Company's condensed consolidated financial statements or results of operations.

#### Updates to Significant Accounting Policies

**Loans Held for Sale**—Loans held for sale represent loans originated or acquired by the Company with the intent to sell. The Company has elected the fair value option of accounting under U.S. GAAP for certain residential mortgage loans. Electing to use the fair value option of accounting allows a better offset of the changes in the fair values of the loans and the derivative instruments used to economically hedge them without the burden of complying with the requirements for hedge accounting. These loans are initially recorded and carried at fair value, with changes in fair value recognized in gain on sale of loans. Loan origination fees are recorded when earned, and related costs are recognized when incurred.

The Company has not elected the fair value option for other residential mortgage loans primarily because the Company expects to hold these loans for a short duration. These loans are carried at the lower of cost or fair value. In determining the lower of cost or fair value adjustment on loans held for sale, the Company pools loans based on similar risk characteristics such as loan type and interest rate. Direct loan origination fees and costs are deferred at loan origination or acquisition. These amounts are recognized as income at the time the loan is sold and included in gain on sale of loans. Gains and losses on sale of these loans are recorded in gain and/or loss on sale of loans. Loans and leases are transferred from loans and leases held for investment to held for sale when the Company no longer has the intent to hold them for the foreseeable future. Loans and leases are transferred from held for sale to held for investment when the Company determines its intent to hold these loans and leases for the foreseeable future. Loans and leases are transferred to loans and leases held for

Table of Contents

investment at the lower of cost or fair value on the date of reclassification with any lower of cost or fair value adjustment recognized as a basis adjustment.

Certain guarantees arise from agreements associated with servicing, securitization and sale of the Company's residential mortgage loans. Under these agreements, the Company may be obligated to repurchase, or otherwise indemnify or reimburse the investor or insurer for losses incurred, due to material breach of contractual representations and warranties with respect to non-GSE purchasers, or breach of contractual representations and warranties with respect to GSEs. These guarantees are accounted for in accordance with ASC 460, Guarantees, when the obligation is both probable and reasonably estimable. The guarantee is calculated at the fair value of the guarantee on the date of the loan sale or securitization. The corresponding provision is recognized as a reduction on net gains on loan sales and securitization, and is reduced, by a credit to earnings, as the guarantor is released from risk under the guarantee. The reserve for repurchase obligations is included in accounts payable and accrued liabilities on the consolidated balance sheets with changes to the reserve made through general and administrative expenses. See Note 5 and Note 15 for further information related to these guarantees.

### 3. Acquisition Activities

Acquisition of Business Property Lending, Inc. - On October 1, 2012, EB, a wholly owned subsidiary of the Company, acquired 100% of the outstanding common shares of Business Property Lending, Inc. (BPL), a wholly owned subsidiary of General Electric Capital Corporation (GECC) for cash consideration of \$2,401,398. The acquisition provided the Company with an established and operating platform for expanding its capacity to originate commercial real estate loans to small and mid-size business clients nationwide. The transaction was accounted for using the acquisition method with the consideration paid allocated to all identifiable assets and liabilities acquired. Under the acquisition method of accounting, the measurement period for a transaction is to extend for a period necessary to obtain all available information to facilitate a complete and accurate recording of the transaction as of the acquisition date. This period, however, may not extend beyond a period of one year from the date of acquisition. In the event information not available at the time of acquisition is obtained during the measurement period that would affect the recording of the transaction, any applicable adjustments are to be performed retrospectively adjusting the initial recording of the acquisition.

The fair value of assets acquired included financing receivables for commercial real estate with a fair value of \$2,337,123 that was comprised of both loans accounted for under ASC 310-20, Receivables, Nonrefundable Fees and Other Costs, as well as loans accounted for under ASC 310-30, Loans and Debt Securities Acquired with Deteriorated Credit Quality. Subsequent to the initial recording of the transaction, additional reviews into the ASC 310-20 population identified that evidence of deteriorated credit quality existed for some of these loans at the date of acquisition based on information not previously available. Upon review of the impact of this updated information to the overall fair value of the acquired loans, it was determined that no retrospective adjustment of the fair value was necessary. Therefore, a prospective adjustment was performed to include these loans in the ASC 310-30 population. The following table presents a bridge from the unpaid principal balance (UPB), or contractual net investment, to carrying value for the acquired financing receivables by method of accounting as presented initially at the acquisition date, as well as, based on the updated loan stratification:

	As Initially Recorded		As Updated	
	ASC 310-20	ASC 310-30	ASC 310-20	ASC 310-30
Unpaid principal balance at acquisition	\$2,229,822	\$89,993	\$2,174,738	\$145,077
Plus: contractual interest due or unearned income	1,176,442	62,517	1,143,748	95,211
Contractual cash flows due	3,406,264	152,510	3,318,486	240,288
Less: cash flows not expected to be collected <sup>(1)</sup>	518,949	42,387	499,602	61,734
Expected cash flows	2,887,315	110,123	2,818,884	178,554
Less: accretable yield	629,788	30,527	617,297	43,018
Carrying value at acquisition	\$2,257,527	\$79,596	\$2,201,587	\$135,536

(1) Cash flows not expected to be collected includes the effects of both credit losses as well as modeled prepayment assumptions.

December 31, 2012					
Available for sale:					
Residential CMO securities - nonagency	\$ 1,577,270	\$ 39,860	\$ 5,355	\$ 1,611,775	\$ 1,611,775
Asset-backed securities	9,461	—	1,935	7,526	7,526
Other	366	211	—	577	577
Total available for sale securities	\$ 1,587,097	\$ 40,071	\$ 7,290	\$ 1,619,878	\$ 1,619,878
Held to maturity:					
Residential CMO securities - agency	\$ 106,346	\$ 3,497	\$ —	\$ 109,843	\$ 106,346
Residential MBS - agency	31,901	1,986	—	33,887	31,901
Corporate securities	4,987	—	2,008	2,979	4,987
Total held to maturity securities	\$ 143,234	\$ 5,483	\$ 2,008	\$ 146,709	\$ 143,234

At September 30, 2013 and December 31, 2012, investment securities with a carrying value of \$169,092 and \$421,209, respectively, were pledged to secure other borrowings, public deposits, securities sold under agreements to repurchase, and for other purposes as required or permitted by law.

For the three and nine months ended September 30, 2013, gross gains of \$4,225 were realized on available for sale investments in other noninterest income. For the three and nine months ended September 30, 2012, there were no gross gains or gross losses realized on available for sale investments.

The gross unrealized losses and fair value of the Company's investments in an unrealized loss position at September 30, 2013 and December 31, 2012, aggregated by investment category and the length of time individual securities have been in a continuous unrealized loss position, are as follows:

	Less Than 12 Months		12 Months or Greater		Total	
	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
September 30, 2013						
Debt securities:

Asset-backed securities	—	—	4,055	1,098	4,055	1,098
Corporate securities	—	—	2,575	2,412	2,575	2,412

Edgar Filing: EverBank Financial Corp - Form 10-Q

Total debt securities December 31, 2012	\$325,080	\$4,401	\$55,080	\$4,324	\$380,160	\$8,725
Debt securities:						
Residential CMO securities - nonagency	\$57,715	\$299	\$183,285	\$5,056	\$241,000	\$5,355
Asset-backed securities	—	—	7,526	1,935	7,526	1,935
Corporate securities	—	—	2,979	2,008	2,979	2,008
Total debt securities	\$57,715	\$299	\$193,790	\$8,999	\$251,505	\$9,298

Table of Contents

The Company had unrealized losses at September 30, 2013 and December 31, 2012 on residential nonagency CMO securities, residential agency CMO securities, residential agency MBS, ABS and corporate securities. These unrealized losses are primarily attributable to weak market conditions. Based on the nature of the impairment, these unrealized losses are considered temporary. The Company does not intend to sell nor is it more likely than not that it will be required to sell these investments before their anticipated recovery.

At September 30, 2013, the Company had 44 debt securities in an unrealized loss position. A total of 32 were in an unrealized loss position for less than 12 months. These 32 securities consisted of 20 residential nonagency CMO securities, three residential agency CMO securities and nine residential agency MBS. The remaining 12 debt securities were in an unrealized loss position for 12 months or longer. These 12 securities consisted of three ABS, one corporate security and 8 residential nonagency CMO securities. Of the \$8,725 in unrealized losses, \$5,024 relate to debt securities that are rated investment grade with the remainder representing securities for which the Company believes it has both the intent and ability to hold to recovery.

At December 31, 2012, the Company had 31 debt securities in an unrealized loss position. A total of 3 were in an unrealized loss position for less than 12 months, all of which were residential CMO securities. The remaining 28 debt securities were in an unrealized loss position for 12 months or longer. These 28 securities consisted of three ABS, one corporate security and 24 residential nonagency CMO securities. Of the \$9,298 in unrealized losses, \$5,355 relate to debt securities that are rated investment grade with the remainder representing securities for which the Company believes it has both the intent and ability to hold to recovery.

When certain triggers indicate the likelihood of an other-than-temporary-impairment (OTTI) or the qualitative evaluation performed cannot support the expectation of recovering the entire amortized cost basis of an investment, the Company performs cash flow analyses that project prepayments, default rates and loss severities on the collateral supporting each security. If the net present value of the investment is less than the amortized cost, the difference is recognized in earnings as a credit-related impairment, while the remaining difference between the fair value and the amortized cost is recognized in AOCI. There were no OTTI losses recognized on available for sale or held to maturity securities during the three and nine months ended September 30, 2013 or 2012.

During the three and nine months ended September 30, 2013 and 2012, interest and dividend income on investment securities was comprised of the following:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2013	2012	2013	2012
Interest income on available for sale securities	\$11,816	\$17,875	\$40,100	\$55,474
Interest income on held to maturity securities	635	2,504	1,917	5,313
Other interest and dividend income	925	500	2,422	1,340
	\$13,376	\$20,879	\$44,439	\$62,127

All investment interest income recognized by the Company during the three and nine months ended September 30, 2013 and 2012 was fully taxable.

#### 5. Loans Held for Sale

Loans held for sale as of September 30, 2013 and December 31, 2012, consist of the following:

	September 30, 2013	December 31, 2012
Mortgage warehouse (carried at fair value)	\$1,020,410	\$1,452,236
Government insured pool buyouts	1,866	96,635
Other	10,995	539,175
Other (carried at fair value)	26,676	—
Total loans held for sale	\$1,059,947	\$2,088,046

The Company typically transfers residential mortgage loans originated or acquired to various financial institutions, government agencies, and GSEs. In addition, the Company enters into loan securitization transactions related to certain conforming residential mortgage loans. In connection with these transactions, loans are converted into mortgage-backed securities issued primarily by the Federal Home Loan Mortgage Corporation (FHLMC or Freddie

Mac), the Federal National Mortgage Association (FNMA or Fannie Mae) and the Government National Mortgage Association (GNMA or Ginnie Mae), and are subsequently sold to third party investors. Typically, the Company accounts for these transfers as sales and either retains or releases the right to service the loans. The servicing arrangement represents the Company's continuing involvement with these transferred loans.

In addition, the Company also may be exposed to limited liability related to recourse agreements and repurchase agreements made to its issuers and purchasers. This liability includes amounts related to loans sold that the Company may be required to repurchase, or otherwise indemnify or reimburse the investor or insurer for losses incurred, due to a material breach of contractual representations and warranties. Refer to Note 15 for the maximum exposure to loss for material breaches of contractual representations and warranties.

Other loans held for sale and carried at fair value of \$26,676 at September 30, 2013 represent preferred jumbo residential mortgage loans that the Company originated with the intent to market and sell in the secondary market either through third party sales or securitizations. The Company has elected the fair value option for these loans to provide a better offset of the changes in the fair values of the loans and the derivative instruments used to economically hedge them without the burden of complying with the requirements for hedge accounting.

Table of Contents

The following is a summary of cash flows related to transfers accounted for as sales for the three and nine months ended September 30, 2013 and 2012:

	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2013	2012	2013	2012
Proceeds received from agency securitizations	\$2,251,809	\$2,476,812	\$7,345,260	\$6,267,169
Proceeds received from nonsecuritization sales	902,441	1,885	1,579,749	20,131
Servicing fees collected	30,928	24,577	86,489	72,477
Repurchased loans from agency securitizations	1,858	2,616	4,028	6,132
Repurchased loans from nonagency sales	6,927	6,773	17,143	16,287

The Company periodically transfers conforming residential mortgages to GNMA in exchange for mortgage-backed securities. As of September 30, 2013 and December 31, 2012, the Company retained \$0 and \$99,121, respectively, of these securities backed by the transferred loans and maintained effective control over these pools of transferred assets. Accordingly, the Company did not record these transfers as sales. These transferred assets were recorded in the condensed consolidated balance sheets as loans held for sale. The remaining securities were sold to unrelated third parties and were recorded as sales.

The gains and losses on transfers which qualify as sales are recorded in the condensed consolidated statements of income in gain on sale of loans, which includes the gain or loss on sale, change in fair value related to fair value option loans, rate lock commitments, and the offsetting hedging positions.

In connection with these transfers, the Company recorded servicing assets in the amount of \$33,025 and \$84,018 for the three and nine months ended September 30, 2013, respectively. All servicing assets are initially recorded at fair value using a Level 3 measurement technique. Refer to Note 8 for information relating to servicing activities and MSR.

During the three and nine months ended September 30, 2013, the Company transferred \$73,988 and \$819,250 in residential mortgage loans from loans held for sale to loans held for investment at lower of cost or market. A majority of these loans were originated preferred jumbo ARM residential mortgages which were intended to be sold in the secondary market. As a result of changing economic conditions and the Company's capacity and desire to hold these loans on the balance sheet, the Company intends to hold these loans for the foreseeable future and has transferred these loans to the held for investment portfolio. During the three and nine months ended September 30, 2012, the Company transferred \$1,899,527 and \$1,928,519 in residential mortgage and commercial real estate loans held for sale to loans held for investment at lower of cost or market as the Company had the intent to hold these loans for the foreseeable future.

During the three and nine months ended September 30, 2013, the Company transferred \$127,674 and \$454,310 of loans held for investment to held for sale at lower of cost or market. The majority of these loans were government insured pool buyouts initially originated for the held for investment portfolio. These loans were transferred to held for sale based upon a change in intent to no longer hold these loans for the foreseeable future.

Table of Contents

6. Loans and Leases Held for Investment, Net

Loans and leases held for investment as of September 30, 2013 and December 31, 2012 are comprised of the following:

	September 30, 2013	December 31, 2012
Residential mortgages	\$6,698,614	\$6,708,748
Commercial and commercial real estate	4,608,487	4,771,768
Lease financing receivables	1,092,866	836,935
Home equity lines	156,977	179,600
Consumer and credit card	6,023	8,038
Total loans and leases held for investment, net of discounts	12,562,967	12,505,089
Allowance for loan and lease losses	(66,991 )	(82,102 )
Total loans and leases held for investment, net	\$12,495,976	\$12,422,987

As of September 30, 2013 and December 31, 2012, the carrying values presented above include net purchased loan and lease discounts and net deferred loan and lease origination costs as follows:

	September 30, 2013	December 31, 2012
Net purchased loan and lease discounts	\$120,321	\$164,132
Net deferred loan and lease origination costs	45,315	25,275

Acquired Credit Impaired (ACI) Loans and Leases — At acquisition, the Company estimates the fair value of acquired loans and leases by segregating the portfolio into pools with similar risk characteristics. Fair value estimates for acquired loans and leases require estimates of the amounts and timing of expected future principal, interest and other cash flows. For each pool, the Company uses certain loan and lease information, including outstanding principal balance, probability of default and the estimated loss in the event of default to estimate the expected future cash flows for each loan and lease pool.

Acquisition date details of loans and leases acquired with evidence of credit deterioration during the nine months ended September 30, 2013 and 2012 are as follows:

	September 30, 2013	September 30, 2012
Contractual payments receivable for acquired loans and leases at acquisition	\$345,890	\$218,750
Expected cash flows for acquired loans and leases at acquisition	193,549	133,627
Basis in acquired loans and leases at acquisition	179,027	117,579

Information pertaining to the ACI portfolio as of September 30, 2013 and December 31, 2012 is as follows:

	Residential	Commercial and Commercial Real Estate	Total
September 30, 2013			
Carrying value, net of allowance	\$749,690	\$410,286	\$1,159,976
Outstanding unpaid principal balance (UPB)	793,009	427,667	1,220,676
Allowance for loan and lease losses, beginning of period	5,175	16,789	21,964
Allowance for loan and lease losses, end of period	5,216	11,344	16,560
December 31, 2012			
Carrying value, net of allowance	\$860,437	\$488,288	\$1,348,725
Outstanding unpaid principal balance	906,421	527,472	1,433,893

Edgar Filing: EverBank Financial Corp - Form 10-Q

Allowance for loan and lease losses, beginning of year	5,464	10,525	15,989
Allowance for loan and lease losses, end of year	5,175	16,789	21,964

The Company recorded a reduction of provision for loan loss of \$667 and provision for loan loss expense of \$863 for the ACI portfolio for the three months ended September 30, 2013 and 2012, respectively. The Company recorded a reduction of provision for loan loss of \$2 and provision for loan loss expense of \$5,192 for the ACI portfolio for the nine months ended September 30, 2013 and 2012, respectively. The adjustments to provision performed are the result of changes in expected cash flows on ACI loans.

Table of Contents

The following is a summary of the accretable yield activity for the ACI loans during the nine months ended September 30, 2013 and 2012:

	Residential	Commercial and Commercial Real Estate	Total
September 30, 2013			
Balance, beginning of period	\$ 111,868	\$ 108,540	\$ 220,408
Additions	12,174	—	12,174
Accretion	(31,906 )	(22,110 )	(54,016 )
Reclassifications to accretable yield	27,249	23,552	50,801
Balance, end of period	\$ 119,385	\$ 109,982	\$ 229,367
September 30, 2012			
Balance, beginning of period	\$ 90,224	\$ 117,499	\$ 207,723
Additions	16,048	—	16,048
Accretion	(22,159 )	(23,175 )	(45,334 )
Reclassifications (from) to accretable yield	2,616	(12,677 )	(10,061 )
Balance, end of period	\$ 86,729	\$ 81,647	\$ 168,376

Covered Loans and Leases — Covered loans and leases are acquired and recorded at fair value at acquisition, exclusive of the loss share agreements with the Federal Deposit Insurance Corporation (FDIC) and the indemnification agreement with former shareholders of Tygris. All loans acquired through the loss share agreement with the FDIC and all loans and leases acquired in the purchase of Tygris are considered covered during the applicable indemnification period. As of September 30, 2013 and December 31, 2012, the Company does not expect to receive cash payments under these indemnification agreements due to the performance of the underlying loans.

The following is a summary of the recorded investment of major categories of covered loans and leases outstanding as of September 30, 2013 and December 31, 2012:

	Bank of Florida	Tygris	Total
September 30, 2013			
Residential mortgages	\$ 46,738	\$ —	\$ 46,738
Commercial and commercial real estate	309,709	—	309,709
Lease financing receivables	—	33,283	33,283
Home equity lines	14,266	—	14,266
Total recorded investment of covered loans and leases	\$ 370,713	\$ 33,283	\$ 403,996
December 31, 2012			
Residential mortgages	\$ 56,390	\$ —	\$ 56,390
Commercial and commercial real estate	441,998	—	441,998

The Company uses a risk grading matrix to monitor credit quality for commercial and commercial real estate loans. Risk grades are continuously monitored and updated quarterly by credit administration personnel based on current information and events. The Company monitors the quarterly credit quality of all other loan types based on performing status.

Table of Contents

The following tables present the recorded investment for loans and leases by credit quality indicator as of September 30, 2013 and December 31, 2012:

	Performing	Non-performing		Total	
		Accrual	Nonaccrual		
September 30, 2013

Total commercial and commercial real estate	\$4,395,608	\$80,344	\$291,411	\$4,405	\$4,771,768

(1) For the periods ended September 30, 2013 and December 31, 2012, performing residential mortgages included \$8,829 and \$14,682, respectively of ACI loans greater than 90 days past due and still accruing.

(2) For the periods ended September 30, 2013 and December 31, 2012, performing government insured pool buyouts included \$439,934 and \$553,902, respectively of ACI loans greater than 90 days past due and still accruing.

(3) Non-performing government insured pool buyouts represent loans that are 90 days or greater past due but remain on accrual status as the interest earned is insured and thus collectible from the insuring governmental agency.

<sup>(1)</sup> Government insured pool buyouts remain on accrual status after 90 days as the interest earned is collectible from the insuring governmental agency.

Impaired Loans — Impaired loans include loans identified as troubled loans as a result of a borrower's financial difficulties and other loans on which the accrual of interest income is suspended. The Company continues to collect payments on certain impaired loan balances on which accrual is suspended.

The following tables present the unpaid principal balance, the recorded investment and the related allowance for impaired loans as of September 30, 2013 and December 31, 2012:

	September 30, 2013			December 31, 2012		
	Unpaid Principal Balance	Recorded Investment (1)	Related Allowance	Unpaid Principal Balance	Recorded Investment (1)	Related Allowance
With an allowance recorded:						
Residential mortgages:

Consumer and credit card	15	—	339	—
Total non-performing loans and leases	\$142,280	\$706,278	\$151,653	\$1,168,732

Troubled Debt Restructurings (TDR) — Modifications considered to be TDRs are individually evaluated for credit loss based on a discounted cash flow model using the loan's effective interest rate at the time of origination. The discounted cash flow model used in this evaluation is adjusted to reflect the modified loan's elevated probability of future default based on the Company's historical redefault rate. These loans are classified as nonaccrual and have been included in the Company's impaired loan disclosures in the tables above. A loan is considered to redefault when it is 30 days past due. Once a modified loan demonstrates a consistent period of performance under the modified terms, generally six months, the Company returns the loan to an accrual classification. If a modified loan defaults under the terms of the

modified agreement, the Company measures the allowance for loan and lease losses based on the fair value of collateral less cost to sell.

Table of Contents

The following is a summary of information relating to modifications considered to be TDRs for the three and nine months ended September 30, 2013 and 2012:

	Three Months Ended September 30, 2013			Nine Months Ended September 30, 2013		
	Number of Contracts	Pre-modification Recorded Investment	Post-modification Recorded Investment	Number of Contracts	Pre-modification Recorded Investment	Post-modification Recorded Investment
Residential mortgages:

Total	11	\$6,620	\$6,623	61	\$ 43,809	\$ 43,831

The Company included 127 loans with an unpaid principal balance of \$17,951 in Chapter 7 bankruptcy as TDRs at September 30, 2013. Modifications made to residential loans during the period included extension of original contractual maturity date, extension of the period of below market rate interest only payments, or contingent reduction of past due interest. Commercial loan modifications made during the period included extension of original contractual maturity date, payment forbearance, reduction of interest rates, or extension of interest only periods.

The number of contracts and recorded investment of loans that were modified during the last 12 months and subsequently defaulted during the three and nine months ended September 30, 2013 and 2012 are as follows:

	Three Months Ended September 30, 2013		Nine Months Ended September 30, 2013	
	Number of Contracts	Recorded Investment	Number of Contracts	Recorded Investment

## 8. Servicing Activities and Mortgage Servicing Rights

A summary of MSR activities for the three and nine months ended September 30, 2013 and 2012 is as follows:

	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2013	2012	2013	2012
Balance, beginning of period	\$462,718	\$415,962	\$375,859	\$489,496
Originated servicing rights capitalized upon sale of loans	33,025	21,034	84,018	58,061
Acquired servicing rights	1,633	—	65,188	—
Amortization	(30,437	) (36,292	) (101,461	) (99,773
Decrease (increase) in valuation allowance	35,132	(18,229	) 80,259	(63,508
Other	(577	) (702	) (2,369	) (2,503
Balance, end of period	\$501,494	\$381,773	\$501,494	\$381,773
Valuation allowance:				
Balance, beginning of period	\$57,836	\$84,734	\$102,963	\$39,455
Increase in valuation allowance	—	21,735	—	67,014
Recoveries	(35,132	) (3,506	) (80,259	) (3,506
Balance, end of period	\$22,704	\$102,963	\$22,704	\$102,963

Components of loan servicing fee income for the three and nine months ended September 30, 2013 and 2012 are presented below:

	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2013	2012	2013	2012
Contractually specified service fees, net	\$40,116	\$32,255	\$110,489	\$101,326
Other ancillary fees	9,987	9,413	27,717	27,279
Other	610	673	1,862	1,775
	\$50,713	\$42,341	\$140,068	\$130,380

## Residential

On April 1, 2013, EverBank purchased the servicing rights to \$12,962,454 of UPB of Fannie Mae residential servicing assets for \$65,188, which transferred on July 1, 2013. The acquired servicing rights are included in the residential class of MSR.

For loans securitized and sold with servicing retained during the three and nine months ended September 30, 2013 and 2012, management used the following assumptions to determine the fair value of residential MSR at the date of securitization:

Edgar Filing: EverBank Financial Corp - Form 10-Q

	Three Months Ended		Nine Months Ended	
	September 30, 2013		September 30, 2013	
Average discount rates	8.57 %	— 9.40%	8.57 %	— 9.85%
Expected prepayment speeds	8.78 %	— 10.60%	7.91 %	— 14.93%
Weighted-average life in years	6.58	— 7.87	5.33	— 7.87

Average discount rates	8.99	% — 9.75%	8.60	% — 9.75%
Expected prepayment speeds	13.23	% — 14.99%	10.13	% — 14.99%
Weighted-average life in years	5.21	— 5.72	5.21	— 6.70

At September 30, 2013 and December 31, 2012, the Company estimated the fair value of its capitalized residential MSR to be approximately \$496,964 and \$363,173, respectively. The carrying value of its residential MSR was \$493,623 and \$363,159 at September 30, 2013 and December 31, 2012, respectively. The unpaid principal balance below excludes \$6,647,000 and \$7,049,000 at September 30, 2013 and December 31, 2012, respectively, for residential loans with no related MSR basis.

The characteristics used in estimating the fair value of the residential MSR portfolio at September 30, 2013 and December 31, 2012 are as follows:

	September 30, 2013		December 31, 2012	
Unpaid principal balance	\$52,967,000		\$42,373,000	
Gross weighted-average coupon	4.51	%	4.66	%
Weighted-average servicing fee	0.29	%	0.30	%
Expected prepayment speed <sup>(1)</sup>	11.68	%	19.73	%

The prepayment speed assumptions include a blend of prepayment speeds that are influenced by mortgage interest (1) rates, the current macroeconomic environment and borrower behaviors and may vary over the expected life of the asset.

A sensitivity analysis of the Company's fair value of residential MSR portfolio to hypothetical adverse changes of 10% and 20% to the weighted-average of certain key assumptions as of September 30, 2013 and December 31, 2012 is presented below.

	September 30, 2013	December 31, 2012
<b>Prepayment Rate</b>		
10% adverse rate change	\$22,847	\$23,100
20% adverse rate change	43,970	44,232
<b>Discount Rate</b>		
10% adverse rate change	18,592	12,696
20% adverse rate change	35,900	24,539

In the previous table, the effect of a variation in a specific assumption on the fair value is calculated without changing any other assumptions. This analysis typically cannot be extrapolated because the relationship of a change in one key assumption to the change in the fair value of the Company's residential mortgage servicing rights usually is not linear. The effect of changing one key assumption will likely result in the change of another key assumption which could impact the sensitivities.

**Commercial**

The carrying value and fair value of our commercial MSR was \$7,870 at September 30, 2013. As of December 31, 2012, the carrying value and fair value of our commercial MSR was \$12,700 and \$15,698, respectively.

**9. Other Borrowings**

Other borrowings at September 30, 2013 and December 31, 2012 are comprised of the following:

	September 30, 2013	December 31, 2012
FHLB advances, including unamortized premium of \$0 and \$262, respectively	\$1,872,700	\$3,030,620
Securities sold under agreements to repurchase, including unamortized premium of \$0 and \$78, respectively	—	142,401
	\$1,872,700	\$3,173,021

Advances from the FHLB at September 30, 2013 and December 31, 2012 are as follows:

Edgar Filing: EverBank Financial Corp - Form 10-Q

	September 30, 2013	December 31, 2012
Fixed-rate advances with a weighted-average interest rate of 2.09% and 2.05%, respectively	\$1,872,700	\$2,412,858
Convertible advances with a weighted-average fixed interest rate of 0.00% and 4.24%, respectively	—	17,000
Overnight advances with a weighted-average floating interest rate of 0.00% and 0.36%, respectively	—	600,500
	\$1,872,700	\$3,030,358

23

---

Table of Contents

Contractual maturity dates for FHLB advances at September 30, 2013 are as follows:

2013	\$ 140,700
2014	100,000
2015	331,000
2016	190,000
2017	380,000
2018	260,000
Thereafter	471,000
	\$ 1,872,700

**FHLB Borrowings**

During September 2013, the Company early extinguished FHLB advances with a principal balance of \$770,000. The consideration paid for the early extinguishment was \$733,969 representing the net settlement of the advance balances. The resulting gain of \$36,031 recognized upon extinguishment was recorded in other noninterest income in the consolidated statements of income. As a result of the extinguishment, the forecasted transactions related to the interest payments associated with this debt were no longer expected to occur which resulted in the reclassification of \$31,036 previously recorded in accumulated other comprehensive income to other noninterest income.

In early October 2013, the Company early extinguished an additional FHLB advance with a principal balance of \$104,000. The consideration paid for this early extinguishment was \$93,600 representing the net settlement of the advance balance. The resulting gain of \$10,400 realized upon extinguishment will be recognized in the fourth quarter of 2013.

Interest expense on FHLB advances for the three months ended September 30, 2013 and 2012 was \$19,037 and \$10,852, respectively. Interest expense on FHLB advances for the nine months ended September 30, 2013 and 2012 was \$55,293 and \$27,681, respectively.

**10. Income Taxes**

For the three and nine months ended September 30, 2013, the Company's effective income tax rate of 38.2% for both periods differs from the statutory federal income tax rate primarily due to state income taxes. The Company's effective income tax rate of 36.9% and 36.7%, for the three and nine months ended September 30, 2012, respectively, differs from the statutory federal income tax rate primarily due to state income taxes.

**11. Share-Based Compensation**

**Option Plans** - On March 6, 2013, the Company granted 537,154 options with a fair value on the grant date of \$7.53. The fair value of each option award was estimated as of the grant date using the Black-Scholes option-pricing model. Significant assumptions used in the Black-Scholes option-pricing model to determine the fair value of stock options are as follows:

Risk-free interest rate	1.76	%
Expected volatility	38.93	%
Expected term (years)	9.10	
Dividend yield	0.55	%

The risk-free interest rate is based on the U.S. Treasury constant maturity yield for treasury securities with maturities approximating the expected life of the options granted on the date of grant. The expected option terms were based on the Company's historical exercise and post-vesting termination behaviors. The Company analyzes a group of publicly-traded peer institutions to determine the expected volatility of its stock. The peer group is assessed for adequacy annually, or as circumstances indicate significant changes to the composition of the peer group are warranted. Volatility for the Company's stock is estimated utilizing the average volatility calculated for the peer group, which is based upon daily price observations over the estimated term of the options granted.

During the nine months ended September 30, 2013, 1,493,750 options were exercised with a total intrinsic value of \$10,631.

**Nonvested Stock** - The Company issued 277,859 nonvested shares of stock to certain employees as an incentive for continued employment and certain directors in lieu of cash payouts for compensation during the nine months ended September 30, 2013. The weighted-average grant date fair value of these shares was \$16.58.

Table of Contents

## 12. Earnings Per Share

The following table sets forth the computation of basic and diluted earnings per common share for the three and nine months ended September 30, 2013 and 2012:

	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2013	2012	2013	2012
Net income	\$33,150	\$22,178	\$118,289	\$45,196
Less dividends on preferred stock	(2,532 )	—	(7,594 )	(5,555 )
Less undistributed net income allocated to participating preferred stock	—	—	—	(3,009 )
Net income allocated to common shareholders	\$30,618	\$22,178	\$110,695	\$36,632
(Units in Thousands)				
Average common shares outstanding	122,509	118,038	122,128	98,387
Common share equivalents:				
Stock options	1,518	1,468	1,617	1,610
Nonvested stock	97	85	76	271
Average common shares outstanding, assuming dilution	124,124	119,591	123,821	100,268
Basic earnings per share	\$0.25	\$0.19	\$0.91	\$0.37
Diluted earnings per share	\$0.25	\$0.19	\$0.89	\$0.37

On January 25, 2012, the Company's Board of Directors approved a special cash dividend of \$4,482 to the holders of the Series A 6% Preferred Stock, which was paid on March 1, 2012, in order to induce conversion to shares of Common Stock. On April 24, 2012, the Company's Board of Directors approved a special cash dividend of \$1,073 to the holders of the Series B 4% Preferred Stock, which was paid on June 19, 2012. In addition, the Company included the Series A 6% Preferred Stock and Series B 4% Preferred Stock as a participating security through the date of conversion and upon conversion, the Company included the shares in common shares outstanding.

Certain securities were antidilutive and were therefore excluded from the calculation of diluted earnings per share.

Common shares attributed to these antidilutive securities had these securities been exercised or converted as of September 30, 2013 and 2012 are as follows:

	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2013	2012	2013	2012
Stock Options	3,881,489	5,905,837	4,516,552	5,905,837

Table of Contents

## 13. Derivative Financial Instruments

The fair values of derivatives are reported in other assets, deposits, or accounts payable and accrued liabilities. The fair values are derived using the valuation techniques described in Note 14. The total notional or contractual amounts and fair values as of September 30, 2013 and December 31, 2012 are as follows:

	Notional Amount	Fair Value Asset Derivatives	Liability Derivatives
September 30, 2013			
Qualifying hedge contracts accounted for under Accounting Standards Codification (ASC) 815, Derivatives and Hedging			
Cash flow hedges:			
Forward interest rate swaps	\$328,000	\$—	\$43,213
Derivatives not designated as hedging instruments under ASC 815, Derivatives and Hedging			
Freestanding derivatives:			
Interest rate lock commitments (IRLCs)	759,609	10,977	217
Forward and optional forward sales commitments	1,553,937	6,811	37,795
Interest rate swaps	54,027	—	725
Foreign exchange contracts	824,072	9,850	5,712
Equity, foreign currency, commodity and metals indexed options	164,155	9,905	—
Options embedded in client deposits	163,178	—	9,886
Indemnification assets	174,438	8,454	—
Total freestanding derivatives		45,997	54,335
Netting and cash collateral adjustments <sup>(1)</sup>		(11,529	) (47,379
Total derivatives		\$34,468	\$50,169
	Notional Amount	Fair Value Asset Derivatives	Liability Derivatives
December 31, 2012			
Qualifying hedge contracts accounted for under ASC 815, Derivatives and Hedging			
Fair value hedges:			
Interest rate swaps	\$31,247	\$—	\$579
Cash flow hedges:			
Forward interest rate swaps	703,000	—	105,166
Derivatives not designated as hedging instruments under ASC 815, Derivatives and Hedging			
Freestanding derivatives:			
IRLCs	1,737,555	10,904	970
Forward and optional forward sales commitments	2,781,788	2,498	6,481
Foreign exchange contracts	963,820	10,368	2,121
Equity, foreign currency, commodity and metals indexed options	150,885	15,880	—
Options embedded in client deposits	150,181	—	15,750
Indemnification assets	273,687	9,092	—
Total freestanding derivatives		48,742	25,322
Netting and cash collateral adjustments <sup>(1)</sup>		(15,481	) (110,641
Total derivatives		\$33,261	\$20,426

(1) Amounts represent the effect of legally enforceable master netting agreements that allow the Company to settle positive and negative positions as well as cash collateral and related accrued interest held or placed with the same

counterparties. Amounts as of September 30, 2013 and December 31, 2012 include derivative positions netted totaling \$351 and \$651, respectively.

#### Cash Flow Hedges

As of September 30, 2013, AOCI included \$17,292 of deferred pre-tax net losses expected to be reclassified into earnings during the next 12 months for derivative instruments designated as cash flow hedges of forecasted transactions. The Company is hedging its exposure to the variability of future cash flows for forecasted transactions of fixed-rate debt for a maximum of 10 years.

Table of Contents

## Freestanding Derivatives

The following table shows the net gains and losses recognized for the three and nine months ended September 30, 2013 and 2012 in the condensed consolidated statements of income related to derivatives not designated as hedging instruments under ASC 815, Derivatives and Hedging. These gains and losses are recognized in other noninterest income, except for the indemnification assets which are recognized in general and administrative expense.

	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2013	2012	2013	2012
Freestanding derivatives				
Gains (losses) on interest rate contracts <sup>(1)</sup>	\$13,206	\$(49,733 )	\$91,265	\$(97,921 )
Gains (losses) on indemnification assets <sup>(2)</sup>	(477 )	441	(638 )	1,285
Other	(8 )	27	(154 )	424
Total	\$12,721	\$(49,265 )	\$90,473	\$(96,212 )

(1) Interest rate contracts include interest rate lock commitments, forward and optional forward sales commitments, and interest rate swaps.

(2) Refer to Note 14 for additional information relating to the indemnification asset.

Interest rate contracts are predominantly used as economic hedges of interest rate lock commitments and loans held for sale. Other derivatives are predominantly used as economic hedges of foreign exchange, commodity, metals and equity risk.

## Credit Risk Contingent Features

Certain of the Company's derivative instruments contain provisions that require the Company to post collateral when derivatives are in a net liability position. The provisions generally are dependent upon the Company's credit rating based on certain major credit rating agencies or dollar amounts in a liability position at any given time which exceed specified thresholds, as indicated in the relevant contracts. In these circumstances, the counterparties could demand additional collateral or require termination or replacement of derivative instruments in a net liability position. The aggregate fair value of all derivative instruments with such credit-risk-related contingent features in a net liability position on September 30, 2013 and December 31, 2012 was \$49,650 and \$107,215, respectively. The Company offsets derivative instruments against the rights to reclaim cash collateral or the obligations to return cash collateral in the balance sheet. As of September 30, 2013 and December 31, 2012, \$47,730 and \$109,990, respectively, in collateral was netted against liability derivative positions subject to master netting agreements. As of September 30, 2013 and December 31, 2012, \$50,960 and \$40,260, respectively, of collateral was posted for positions not subject to master netting agreements.

## Counterparty Credit Risk

The Company is exposed to counterparty credit risk if counterparties to the derivative contracts do not perform as expected. If the counterparty fails to perform, counterparty credit risk equals the amount reported as derivative assets in the balance sheet. The amounts reported as derivative assets are derivative contracts in a gain position, and to the extent subject to master netting arrangements, net of derivatives in a loss position with the same counterparty and cash collateral received. The Company minimizes this risk through obtaining credit approvals, monitoring credit limits, monitoring procedures, and executing master netting arrangements and obtaining collateral, where appropriate. The Company offsets derivative instruments against the rights to reclaim cash collateral or the obligations to return cash collateral in the balance sheet. As of September 30, 2013 and December 31, 2012, \$11,880 and \$14,830, respectively, in collateral was netted against asset derivative positions subject to master netting agreements. As of September 30, 2013 and December 31, 2012, the Company held \$11,880 and \$15,220, respectively, in collateral from its counterparties. Counterparty credit risk related to derivatives is considered in determining fair value.

## 14. Fair Value Measurements

Asset and liability fair value measurements have been categorized based upon the fair value hierarchy described below:

Level 1 – Valuation is based upon quoted market prices for identical instruments in active markets.

Level 2 – Valuation is based upon quoted market prices for similar instruments in active markets, quoted prices for identical or similar instruments in markets that are not active, and model-based valuation techniques for which all significant assumptions are observable in the market.

Level 3 – Valuation is generated from model-based techniques that use significant assumptions not observable in the market. These unobservable assumptions reflect estimates or assumptions that market participants would use in pricing the assets or liabilities. Valuation techniques include use of option pricing models, discounted cash flow models and similar techniques.

Table of Contents

Recurring Fair Value Measurements

As of September 30, 2013 and December 31, 2012, assets and liabilities measured at fair value on a recurring basis, including certain loans held for sale for which the Company has elected the fair value option, are as follows:

	Level 1	Level 2	Level 3	Netting	Total
September 30, 2013					
Financial assets:					
Available for sale securities:					
Residential CMO securities - nonagency	\$—	\$1,200,685	\$—	\$—	\$1,200,685
Asset-backed securities	—	4,055	—	—	4,055
Other	344	256	—	—	600
Total available for sale securities	344	1,204,996	—	—	1,205,340
Loans held for sale	—	1,020,410	26,676	—	1,047,086
Financial liabilities:					
FDIC clawback liability	—	—	51,674	—	51,674
Derivative financial instruments:					
Derivative assets (Note 13)	9,850	16,716	19,431	(11,529)	34,468
Derivative liabilities (Note 13)	5,712	91,619	217	(47,379)	50,169
	Level 1	Level 2	Level 3	Netting	Total
December 31, 2012					
Financial assets:					
Available for sale securities:					
Residential CMO securities - nonagency	\$—	\$1,611,775	\$—	\$—	\$1,611,775
Asset-backed securities	—	7,526	—	—	7,526
Other	267	310	—	—	577
Total available for sale securities	267	1,619,611	—	—	1,619,878

Change in unrealized net gains (losses) included in net income related to assets and liabilities still held as of September 30, 2012	\$107	\$(6,024	) \$1,285

(1) Net realized and unrealized gains on loans held for sale are included in gain on sale of loans.

(2) Changes in fair value of the FDIC clawback liability are recorded in general and administrative expense.

(3) Net realized and unrealized gains (losses) on IRLCs are included in gain on sale of loans. Changes in the fair value of the indemnification assets are recorded in general and administrative expense.

The Company monitors the availability of observable market data to assess the appropriate classification of financial instruments within the fair value hierarchy. Changes in economic conditions or model-based valuation techniques may require the transfer of financial instruments from one fair value level to another. In such instances, the Company reports the transfer at the end of the reporting period.

The following table presents quantitative information about Level 3 fair value measurements for financial instruments measured at fair value on a recurring basis at September 30, 2013 and December 31, 2012:

Level 3 Fair Value Measurement	Fair Value	Valuation Technique	Unobservable Inputs	Significant Unobservable Input Value		
				Min.	Max.	Weighted Avg.
September 30, 2013						
FDIC clawback liability	\$51,674	Discounted cash flow	Servicing cost	\$7,485	- \$15,524	N/A <sup>(1)</sup>
Indemnification asset	8,234	Discounted cash flow	Discount Rate	4.35	%- 4.35%	4.35%
			Reinstatement rate	5.18	%- 68.39%	24.93% <sup>(2)</sup>
			Loss duration (in months)	9	- 82	37 <sup>(2)</sup>
			Loss severity <sup>(3)</sup> <sup>(5)</sup>	1.60	%- 18.67%	6.84% <sup>(2)</sup>
IRLCs, net	10,760	Discounted cash flow	Loan closing ratio	0.00	%- 99.00%	74.60% <sup>(4)</sup>
Loans held for sale	26,676	Discounted cash flow	Cost of Funds	2.44	%- 3.63%	3.16%
			Prepayment rate	5.38	%- 14.78%	8.34%
			Default rate	0.00	%- 0.93%	0.26%

Edgar Filing: EverBank Financial Corp - Form 10-Q

			Weighted average life (in years)	4.76	-	9.85	7.83	
			Cumulative loss	0.00	%-	0.31%	0.08%	
			Loss severity	0.00	%-	38.55%	25.90%	
December 31, 2012								
FDIC clawback liability	\$50,720	Discounted cash flow	Servicing cost	\$6,790	-	\$14,558	N/A	(1)
Indemnification asset	9,092	Discounted cash flow	Reinstatement rate	3.82	%-	79.54%	24.53%	(2)
			Loss duration (in months)	8	-	50	30	(2)
			Loss severity <sup>(3)</sup>	2.42	%-	11.33%	6.23%	(2)

(1) The range represents the sum of the highest and lowest servicing cost values for all tranches that we use in our valuation process. The servicing cost represents 1% of projected UPB of the underlying loans.

(2) The range represents the sum of the highest and lowest values for all tranches that we use in our valuation process.

(3) Loss severity represents the interest loss severity as a percentage of UPB.

Table of Contents

The range represents the highest and lowest loan closing rates used in the IRLC valuation. The range includes the (4) closing ratio for rate locks unclosed at the end of the period, as well as the closing ratio for loans which have settled during the period.

Negative loss severity results from the indemnifying party receiving a debenture rate interest from the insuring (5) agency that more than offsets the lower note rate interest payments due from the indemnifying party under the indemnification agreement.

The significant unobservable input used in the fair value measurement of the FDIC clawback liability is servicing cost. Significant increases (decreases) in this input in isolation could result in a significantly lower (higher) fair value measurement. The Company estimates the fair value of the FDIC clawback liability using a discounted cash flow model. The Company enters observable and unobservable inputs into the model to arrive at fair value. Changes in the estimate are primarily driven by changes in the interpolated discount rate (an observable input) and changes in servicing cost as a result of changes in projected UPB. The assumptions are reviewed and updated on a quarterly basis by management.

The significant unobservable inputs used in the fair value measurement of the indemnification asset are the reinstatement rate, loss severity and duration. Significant increases (decreases) in any of those inputs in isolation could result in a significantly lower (higher) fair value measurement. The reinstatement rate is determined by analyzing historical default activity of similar loans. Loss severity is estimated as the interest rate spread between the note and debenture rate of the government insured loans as well as advance costs that are not reimbursable by the Federal Housing Administration (FHA), which is then extrapolated over the expected duration. In assessing the note to debenture rate spread in estimating severity, an analysis is performed to evaluate the cash flows related to the indemnified loans as experienced by the indemnifying party. In certain situations, the debenture rate interest received by the indemnifying party may exceed the note rate interest guaranteed under the indemnification, which will result in positive cash flows for the indemnifying party and negative severity experienced on any tranches for which the weighted average debenture rate exceeds the weighted average note rate. The Company's portfolio management group is responsible for analyzing and updating the assumptions and cash flow model of the underlying loans on a quarterly basis, which includes corroboration with historical experience.

The significant unobservable input used in the fair value measurement of the Company's IRLCs is the closing ratio, which represents the percentage of loans currently in a lock position which management estimates will ultimately close. Generally, the fair value of an IRLC is positive (negative) if the prevailing interest rate is lower (higher) than the IRLC rate. Therefore, an increase in the loan closing probability (i.e., higher percentage of loans estimated to close) will result in the fair value of the IRLC to increase if in a gain position, or decrease if in a loss position. The loan closing ratio is largely dependent on the loan processing stage that a loan is currently in and the change in prevailing interest rates from the time of the rate lock through the time the loan closes. The closing ratio is computed by our secondary marketing system using historical data and the ratio is reviewed by the Company's secondary marketing department of the portfolio management group for reasonableness on a quarterly basis.

The Company estimates the fair value of Level 3 loans held for sale utilizing a discounted cash flow approach which includes an evaluation of the collateral and underlying loan characteristics, as well as assumptions to determine the discount rate such as credit loss and prepayment forecasts, and servicing costs. In determining the appropriate discount rate, prepayment and credit assumptions, the Company monitors other capital markets activity for similar collateral being traded and/or interest rates currently being offered for similar products. Discussions related to the fair value of these loans held for sale are held between our internal valuation specialists and executive and business unit management to discuss the key assumptions used in arriving at our estimates.

Loans Held for Sale Accounted for under the Fair Value Option

The following table presents information on loans held for sale reported under the fair value option at September 30, 2013 and December 31, 2012:

September 30, 2013

Fair value carrying amount	\$ 1,047,086
Aggregate unpaid principal balance	1,008,313
Fair value carrying amount less aggregate unpaid principal	\$ 38,773

December 31, 2012

Fair value carrying amount	\$1,452,236
Aggregate unpaid principal balance	1,387,423
Fair value carrying amount less aggregate unpaid principal	\$64,813

No loans recorded under the fair value option were on nonaccrual status at September 30, 2013 or December 31, 2012. Differences between the fair value carrying amount and the aggregate unpaid principal balance include changes in fair value recorded at and subsequent to funding, gains and losses on the related loan commitment prior to funding and premiums or discounts on acquired loans.

The net gains from initial measurement of loans accounted for under the fair value option and subsequent changes in fair value for loans outstanding were \$40,474 and \$42,215 for the three and nine months ended September 30, 2013, respectively and are included in gain on sale of loans. The net gains from initial measurement of loans accounted for under the fair value option and subsequent changes in fair value were \$140,254 and \$316,427 for the three and nine months ended September 30, 2012, respectively, and are included in gain on sale of loans. These amounts exclude the impact from offsetting hedging arrangements which are also included in gain on sale of loans in the condensed consolidated statements of income. An immaterial portion of the change in fair value was attributable to changes in instrument-specific credit risk.

Table of Contents

Non-recurring Fair Value Measurements

Certain assets and liabilities are measured at fair value on a non-recurring basis and therefore are not included in the tables above. These measurements primarily result from assets carried at the lower of cost or fair value or from impairment of individual assets. Gains and losses disclosed below represent changes in fair value recognized subsequent to initial classification. The change in the MSR value represents a change due to impairment or recoveries on previous write downs. The carrying value of assets measured at fair value on a non-recurring basis and held at September 30, 2013 and December 31, 2012 and related changes in fair value are as follows:

	Level 1	Level 2	Level 3	Total	Loss (Gain) Due to Change in Fair Value
September 30, 2013					
Collateral-dependent loans	\$—	\$—	\$22,040	\$22,040	\$1,317
Other real estate owned <sup>(1)</sup>	—	—	17,825	17,825	3,350
Mortgage servicing rights <sup>(2)</sup>	—	—	440,203	440,203	(80,259)
Loans held for sale	—	—	10,994	10,994	575
December 31, 2012					
Collateral-dependent loans	\$—	\$—	\$48,048	\$48,048	\$6,163
Other real estate owned <sup>(1)</sup>	—	4,030	26,787	30,817	6,230
Mortgage servicing rights <sup>(2)</sup>	—	—	320,901	320,901	63,508

Gains and losses resulting from subsequent measurement of OREO are included in the condensed consolidated (1) statements of income as general and administrative expense. OREO is included in other assets in the condensed consolidated balance sheets.

(2) The fair value for mortgage servicing rights represents the value of the strata with impairment or recoveries on previous valuation allowances.

The following table presents quantitative information about Level 3 fair value measurements for financial instruments measured at fair value on a non-recurring basis at September 30, 2013 and December 31, 2012:

Level 3 Fair Value Measurement	Fair Value	Valuation Technique	Unobservable Inputs	Significant Unobservable Input Value		
				Min.	Max.	Weighted Avg.
September 30, 2013						
Collateral-dependent loans	\$22,040	Appraised value	Appraised value	NM		N/A <sup>(1)</sup>
Other real estate owned	17,825	Appraised value	Appraised value	NM		N/A <sup>(1)</sup>
Mortgage servicing rights	440,203	Discounted cash flow	Prepayment speed	12.15	%-22.20%	15.04% <sup>(2)</sup>
			Discount rate	9.54	%-9.76%	9.59% <sup>(3)</sup>
Loans held for sale	10,994	Discounted cash flow	Cost of Funds	0.89	%-3.27%	3.16%
			Prepayment rate	6.00	%-16.10%	6.09%
			Default rate	0.31	%-100.00%	51.64%
			Weighted average life (in years)	5.28	-10.43	10.07
			Cumulative loss	0.00	%-81.79%	21.38%
			Loss severity	20.02	%-34.95%	25.30%
December 31, 2012						
Collateral-dependent loans	\$36,609	Sales comparison approach	Appraisal value adjustment	0.00	%-47.00%	N/A
	11,439	Discounted appraisals	Collateral discounts	5.00	%-5.00%	N/A

Collateral-dependent loans

Other real estate owned	23,359	Sales comparison approach	Appraisal value adjustment	0.00	% - 82.00%	N/A
Other real estate owned	3,428	Discounted appraisals	Collateral discounts	5.00	% - 10.00%	N/A
Mortgage servicing rights	320,901	Discounted cash flow	Prepayment speed	16.50	% - 19.80%	19.25% <sup>(2)</sup>
			Discount rate	9.20	% - 9.80%	9.37% <sup>(3)</sup>

(1) NM - Not Meaningful

The prepayment speed assumptions include a blend of prepayment speeds that are influenced by mortgage interest rates, the current macroeconomic environment and borrower behaviors and may vary over the expected life of the asset. The range represents the highest and lowest values for the strata with recoveries on previous valuation allowances.

(3) The discount rate range represents the highest and lowest values for the MSR strata with recoveries on previous valuation allowances.

The Company estimates the fair value of collateral-dependent loans and OREO using appraisal valuation. Appraisals for both collateral-dependent impaired loans and OREO are performed by certified general appraisers (for commercial properties) or certified residential appraisers (for residential properties) whose qualifications and licenses have been reviewed and verified by the Company. Once received, a member of the Company's valuation services group reviews the assumptions and approaches utilized in the appraisal. To assess the reasonableness of the fair value, the Company's valuation services group compares the assumptions to independent data sources such as recent market data or industry-wide statistics. For collateral dependent loans in which a new appraisal is expected in the next quarter, the appraisal is reviewed by an officer and an adjustment may be made based on a review of the property, historical property value changes, and current market rates.

The fair value of mortgage servicing rights is determined by using a discounted cash flow model to calculate the present value of estimated future net servicing income. The assumptions are a combination of market and company-specific data. On a quarterly basis, the portfolio management group compares the Company's estimated fair value of the mortgage servicing rights to a third-party valuation as part of

Table of Contents

the valuation process. Discussions are held between executive management and the independent third-party to discuss the key assumptions used by the respective parties in arriving at those estimates.

The Company estimates the fair value of Level 3 loans held for sale utilizing a discounted cash flow approach which includes an evaluation of the collateral and underlying loan characteristics, as well as assumptions to determine the discount rate such as credit loss and prepayment forecasts, and servicing costs. In determining the appropriate discount rate, prepayment and credit assumptions, the Company monitors other capital markets activity for similar collateral being traded and/or interest rates currently being offered for similar products. Discussions related to the fair value of these loans held for sale are held between our internal valuation specialists and executive and business unit management as necessary to discuss the key assumptions used in arriving at our estimates.

## Disclosures about Fair Value of Financial Instruments

The following table presents the carrying amount, estimated fair value, and placement in the fair value hierarchy of the Company's financial instruments as of September 30, 2013 and December 31, 2012. This table excludes financial instruments with short-term or no stated maturity, prevailing market rates and limited credit risk, where carrying amounts approximate fair value. For financial assets such as cash and due from banks, FHLB restricted stock, and other investments, the carrying amount is a reasonable estimate of fair value. For financial liabilities such as noninterest-bearing demand, interest-bearing demand, and savings and money market deposits, the carrying amount is a reasonable estimate of fair value as these liabilities have no stated maturity.

	Carrying Amount	Estimated Fair Value	Level 1	Level 2	Level 3
September 30, 2013					
Financial assets:					
Investment securities:					
Held to maturity	\$ 109,245	\$ 108,269	\$—	\$ 105,694	\$ 2,575
Loans held for sale <sup>(1)</sup>	12,861	12,839	—	—	12,839
Loans held for investment <sup>(2)</sup>	11,406,786	11,405,718	—	—	11,405,718
Financial liabilities:					
Time deposits	\$ 3,663,515	\$ 3,695,116	\$—	\$ 3,695,116	\$—
Other borrowings	1,872,700	1,846,887	—	1,846,887	—
Trust preferred securities	103,750	86,414	—	—	86,414
December 31, 2012					
Financial assets:					
Investment securities:					
Held to maturity	\$ 143,234	\$ 146,709	\$—	\$ 143,730	\$ 2,979
Loans held for sale <sup>(1)</sup>	635,810	658,091	—	642,437	15,654
Loans held for investment <sup>(2)</sup>	11,589,233	11,716,283	—	—	11,716,283
Financial liabilities:					
Time deposits	\$ 4,123,594	\$ 4,165,065	\$—	\$ 4,165,065	\$—
Other borrowings <sup>(3)</sup>	3,050,698	3,085,174	—	3,085,174	—
Trust preferred securities	103,750	78,112	—	—	78,112

(1) The carrying value of loans held for sale excludes \$1,047,086 and \$1,452,236 in loans measured at fair value on a recurring basis as of September 30, 2013 and December 31, 2012, respectively.

(2) The carrying value of loans held for investment is net of the allowance for loan loss of \$63,315 and \$78,921 as of September 30, 2013 and December 31, 2012, respectively. In addition, the carrying values excludes \$1,089,190 and \$833,754 of lease financing receivables as of September 30, 2013 and December 31, 2012, respectively.

(3) The carrying value of other borrowings excludes \$122,323 in repurchase agreements which have remaining maturities of less than one month as of December 31, 2012.

Following are descriptions of the valuation methodologies used for assets and liabilities recorded at fair value and for estimating fair value for financial instruments not carried at fair value:

Investment Securities — Fair values are derived from quoted market prices and values from third party pricing services for which management understands the methods used to determine fair value and is able to assess the values. The Company also performs an assessment on the pricing of investment securities received from third party pricing services to ensure that the prices represent a reasonable estimate of fair value. The procedures include, but are not limited to, initial and on-going review of pricing methodologies and trends. The Company has the ability to challenge values and discuss its analysis with the third party pricing service provider in order to ensure that investments are recorded or disclosed at the appropriate fair value.

When the level and volume of trading activity for certain securities has significantly declined and/or when the Company believes that third party pricing may be based in part on forced liquidations or distressed sales, the Company analyzes each security for the appropriate valuation methodology based on a combination of the market approach reflecting third party pricing information and a discounted cash flow approach. In calculating the fair value derived from the income approach, the Company makes certain significant assumptions in addition to those discussed above related to the liquidity risk premium, specific non-performance and default experience specific to the collateral underlying the security. The values resulting from each approach (i.e., market and income approaches) are weighted to derive the final fair value for each security trading in an inactive market. As of September 30, 2013 and December 31, 2012, management did not make any adjustments to the prices provided by the third party pricing service as a result of illiquid or inactive markets. In addition, the Company has one corporate security that is valued using the income approach. To determine the price, the Company determines the cash flows based on the contract terms which

Table of Contents

include London Interbank Offered Rate (LIBOR) plus the spread and then discounts those cash flows at a rate that makes the present value of total discounted cash flows of a newly issued security approximate par. The spread to swap curve is interpolated based on the comparable securities that would issue in the market on the valuation date. Industry and rating factors are used to determine the comparable securities. This security has been classified as level 3.

Loans Held for Sale — Fair values for loans held for sale valued under the fair value option were derived from quoted market prices or from models using loan characteristics (product type, pricing features and loan maturity dates) and economic assumptions (prepayment estimates and discount rates) based on prices currently offered in secondary markets for similar loans.

Fair values for loans carried at lower of cost or fair value were derived from models using characteristics of the loans (e.g., product type, pricing features and loan maturity dates) and economic assumptions (e.g., prepayment estimates, discount rates and estimated credit losses). Certain loans are valued using market observable pricing. All other loans are classified as level 3.

Loans Held for Investment — The fair value of loans held for investment is derived from discounted cash flows and includes an evaluation of the collateral and underlying loan characteristics, as well as assumptions to determine the discount rate such as credit loss and prepayment forecasts, and servicing costs. Held for investment loans are classified as level 3.

Impaired Loans — At the time a loan is considered impaired, it is valued at the lower of cost or fair value. Fair value is determined primarily by using an income, cost, or market approach and is normally provided through appraisals. Adjustments are routinely made in the appraisal process by the independent appraisers to adjust for differences between the comparable sales and income data available. For collateral-dependent loans for which a new appraisal is expected in the next quarter, the appraisal is reviewed by an officer and an adjustment may be made based on a review of the property, historical changes, and current market rates. Such adjustments are usually significant and typically result in a level 3 classification of the inputs for determining fair value. Non-real estate collateral may be valued using an appraisal, net book value per the borrower's financial statements, or aging reports, adjusted or discounted based on management's historical knowledge, changes in market conditions from the time of the valuation, and management's expertise and knowledge of the client and client's business, resulting in a level 3 fair value classification. Impaired loans are evaluated at least quarterly for additional impairment and adjusted accordingly. Impaired loans carried at fair value generally receive specific allocations of the allowance for loan losses.

Other Real Estate Owned — Foreclosed assets are carried at the lower of carrying value or fair value. Foreclosed assets are adjusted to fair value less costs to sell upon transfer of the loans to foreclosed assets. Fair value is generally based upon appraisals or independent market prices that are periodically updated subsequent to classification as OREO. Adjustments are routinely made in the appraisal process by the independent appraisers to adjust for differences between the comparable sales and income data available. Such adjustments on OREO are usually significant and typically result in a level 3 classification of the inputs for determining fair value.

Mortgage Servicing Rights — Mortgage servicing rights are evaluated for impairment on a quarterly basis. If the carrying amount of an individual stratum exceeds fair value, a valuation allowance is recorded on that stratum so that the servicing asset is carried at fair value. Additionally, subsequent to the impairment, the MSR asset can recover its value up to the amount of valuation allowance recorded. A third-party valuation is obtained quarterly. The servicing portfolio is valued using all relevant positive and negative cash flows including servicing fees, miscellaneous income and float, costs of servicing, the cost of carry of advances, foreclosure losses, and applying certain prevailing assumptions used in the marketplace. Mortgage servicing rights do not trade in an active, open market with readily observable prices. Due to the nature of the valuation inputs, mortgage servicing rights are classified within level 3 of the hierarchy.

Time Deposits — The fair value of fixed-rate certificates of deposit is estimated using quantitative models, including discounted cash flow models that require the use of multiple market inputs including interest rates and spreads to generate continuous yield or pricing curves, and volatility factors. The majority of market inputs are actively quoted and can be validated through external sources, including brokers, market transactions and third party pricing services. The Company considers the impact of its own credit spreads in the valuation of these liabilities. The credit risk is determined by reference to observable credit spreads in the secondary cash market.

**Other Borrowings** — For advances that bear interest at a variable rate, the carrying amount is a reasonable estimate of fair value. For fixed-rate advances and repurchase agreements, fair value is estimated using quantitative discounted cash flow models that require the use of interest rate inputs that are currently offered for fixed-rate advances and repurchase agreements of similar remaining maturities. The majority of market inputs are actively quoted and can be validated through external sources, including brokers, market transactions and third party pricing services. For hybrid advances, fair value is obtained from an FHLB proprietary model mathematical approximation of the market value of the underlying hedge. The terms of the hedge are similar to the advances.

**Trust Preferred Securities** — Fair value is estimated using quantitative models, including discounted cash flow models that require the use of multiple market inputs including interest rates and spreads to generate pricing curves. The majority of market inputs are actively quoted and can be validated through external sources, including brokers, market transactions and third party pricing services. The Company interpolates its own credit spreads in the valuation of these liabilities. Due to the significance of the credit spread in the valuation inputs, trust preferred securities are classified within level 3 of the hierarchy.

**FDIC Clawback Liability** — The fair value of the FDIC clawback liability represents the net present value of expected true-up payments due 45 days after the fifth and tenth anniversaries of the closing of the Bank of Florida acquisition pursuant to the purchase and assumption agreements between the Company and the FDIC. On the true-up measurement dates, the Company is required to make a true-up payment to the FDIC in an amount equal to 50% of the excess, if any, of (1) 20% of the intrinsic loss estimate (an established figure by the FDIC) less (2) the sum of (a) 25% of the asset discount, (part of the Company's bid) plus (b) 25% of the cumulative loss share payments plus (c) a 1% servicing fee based on the principal amount of the covered assets over the term (calculated annually based on the average principal amount at the beginning and end of each year and then summed up for a total fee included in the calculation). The liability was discounted using an estimated cost of debt capital, based on an interpolated cost of debt capital of banks with credit quality comparable to the Company's (using USD US Bank (BBB) BFV Curve index).

This liability is considered to be contingent consideration as it requires the return of a portion of the initial consideration in the event contingencies are met. Due to the nature of the valuation inputs, FDIC clawback liability is classified within level 3 of the hierarchy.

**Fair Value and Cash Flow Hedges** — The fair value of interest rate swaps is determined by a third party from a derivative valuation model. The inputs for the valuation model primarily include start and end swap dates, swap coupon, interest rate curve and notional amounts. See Note 13 for additional information on fair value and cash flow hedges.

Table of Contents

Freestanding Derivatives — The fair value of forward sales and optional forward sales commitments is determined based upon the difference between the settlement values of the commitments and the quoted market values of the securities. Fair values of foreign exchange contracts are based on quoted prices for each foreign currency at the balance sheet date. For indexed options and embedded options, the fair value is determined by obtaining market or dealer quotes for instruments with similar characteristics. The Company uses a cash flow model to project cash flows for GNMA pool buyouts with and without recourse to determine the fair value for the indemnification asset. As this derivative is based on company-specific assumptions and is not actively traded, the indemnification asset is classified within level 3 of the hierarchy. Fair values of interest rate lock commitments are derived by using valuation models incorporating current market information or by obtaining market or dealer quotes for instruments with similar characteristics, subject to anticipated loan funding probability or fallout. The funding probability is the loan closing ratio. This ratio is estimated based primarily upon historical experience by product. Because of the significance of the closing ratio in the fair value calculation, interest rate locks are classified within level 3 of the hierarchy. Counterparty credit risk is taken into account when determining fair value. See Note 13 for additional information on freestanding derivatives.

## 15. Commitments and Contingencies

Commitments — Commitments to extend credit are agreements to lend to customers in accordance with predetermined contractual provisions. These commitments, predominantly at variable interest rates, are for specific periods or contain termination clauses and may require the payment of a fee. The total amounts of unused commitments do not necessarily represent future credit exposure or cash requirements, as commitments often expire without being drawn upon.

In order to meet the needs of its clients, the Company also issues standby letters of credit, which are conditional commitments generally to provide credit support for some creditors in case of default. The credit risk and potential cash requirements involved in issuing standby letters of credit are essentially the same as those involved in extending loan facilities to clients.

Unfunded credit extension commitments at September 30, 2013 and December 31, 2012 are as follows:

	September 30, 2013	December 31, 2012
Commercial <sup>(1)</sup>	\$1,962,233	\$1,094,900
Leasing	163,605	172,808
Residential	442,127	—
Home equity lines of credit	31,576	40,915
Credit card lines of credit	35,694	32,496
Standby letters of credit	1,140	1,274
Total unfunded credit extension commitments	\$2,636,375	\$1,342,393

Unfunded commercial commitments include \$1,353,847 and \$609,619 of conditional commitments for which (1)certain requirements must be met in order to obtain an advance under the existing commitment as of September 30, 2013 and December 31, 2012, respectively.

Standby letters of credit issued by third party entities, are used to guarantee the Company's performance under various contracts. At September 30, 2013, the Company had approximately \$60,018 in letters of credit outstanding.

During September 2013, EverBank entered into a forward-dated borrowing agreement with the FHLB to borrow \$50,000 as a fixed-rate FHLB advance at an interest rate of 2.10%, which will fund in September 2014 maturing in September 2018. Prior to the funding date, EverBank has the right to terminate the advance subject to a voluntary termination fee.

In the ordinary course of business, the Company enters into commitments to originate residential mortgage loans held for sale at interest rates determined prior to funding. Interest rate lock commitments for loans that the Company intends to sell are considered freestanding derivatives and are recorded at fair value. See Note 13 for information on interest rate lock commitments as they are not included in the table above.

The Company has an agreement with the Jacksonville Jaguars of the National Football League whereby the Company obtained the naming rights to the football stadium in Jacksonville, Florida. Under the agreement, the Company is

obligated to pay \$400 during the remainder of 2013. The amount due in 2014 is \$3,647, which is a 5% increase from the total obligation due in 2013.

Guarantees — The Company sells and securitizes conventional conforming and federally insured single-family residential mortgage loans predominantly to GSEs, such as Fannie Mae and Freddie Mac. The Company also sells residential mortgage loans, primarily those that do not meet criteria for whole loan sales to GSEs, through whole loan sales to private non-GSE purchasers. In doing so, representations and warranties regarding certain attributes of the loans are made to the GSE or the third-party purchaser. Subsequent to the sale, if it is determined that the loans sold are (1) with respect to the GSEs, in breach of these representations or warranties or (2) with respect to non-GSE purchasers, in material breach of these representations and warranties, the Company generally has an obligation to either: (a) repurchase the loan for the UPB, accrued interest and related advances, (b) indemnify the purchaser or (c) make the purchaser whole for the economic benefits of the loan. From 2004 through September 30, 2013, the Company originated and securitized approximately \$57,189,245 of mortgage loans to GSEs and private non-GSE purchasers. A majority of the loans sold to non-GSEs were agency deliverable products that were eventually sold by large aggregators of agency product who eventually securitized and sold to the agencies.

In some cases, the Company also has an obligation to repurchase loans in the event of early payment default (EPD) which is typically triggered if a borrower does not make the first several payments due after the loan has been sold to an investor. The Company's private investors have agreed to waive EPD provisions for conventional conforming and federally insured single-family residential mortgage loans and certain jumbo loan products. However, the Company is subject to EPD provisions on the community reinvestment loans the Company originates and sells under the State of Florida housing program, which represents a minimal amount of total originations.

The Company's obligations vary based upon the nature of the repurchase demand and the current status of the mortgage loan. The Company establishes reserves for estimated losses inherent in the Company's origination of mortgage loans. In estimating the accrued liability for loan repurchase and make-whole obligations, the Company estimates probable losses inherent in the population of all loans sold based on trends in claims requests and actual loss severities experienced. The liability includes accruals for probable contingent losses in addition to

Table of Contents

those identified in the pipeline of repurchase or make-whole requests. There is additional inherent uncertainty in the estimate because the Company historically sold a majority of loans servicing released prior to 2009 and currently does not have servicing performance metrics on a majority of those loans it originated and sold. The estimation process is designed to include amounts based on actual losses experienced from actual repurchase activity. The baseline for the repurchase reserve uses historical loss factors that are applied to loan pools originated in 2003 through September 30, 2013 and sold in years 2004 through September 30, 2013. Loss factors, tracked by year of loss, are calculated using actual losses incurred on repurchase or make-whole arrangements. The historical loss factors experienced are accumulated for each sale vintage (year loan was sold) and are applied to more recent sale vintages to estimate inherent losses not yet realized. The Company's estimated recourse related to these loans was \$19,086 and \$27,000 at September 30, 2013 and December 31, 2012, respectively, and is recorded in accounts payable and accrued liabilities. In the ordinary course of its loan servicing activities, the Company routinely initiates actions to foreclose real estate securing serviced loans. For certain serviced loans, there are provisions in which the Company is either obligated to fund foreclosure-related costs or to repurchase loans in default. Additionally, as servicer, the Company could be obligated to repurchase loans from or indemnify GSEs for loans originated by defunct originators. The outstanding principal balance on loans serviced at September 30, 2013 and December 31, 2012, was \$61,274,075 and \$49,422,104, respectively, including residential mortgage loans held for sale. The amount of estimated recourse recorded in accounts payable and accrued liabilities related to servicing activities at September 30, 2013 and December 31, 2012, was \$22,733 and \$26,026, respectively.

**Federal Reserve Requirement** — The Federal Reserve Board (FRB) requires certain institutions, including EB, to maintain cash reserves in the form of vault cash and average account balances with the Federal Reserve Bank. The reserve requirement is based on average deposits outstanding and was approximately \$148,870 and \$154,706 at September 30, 2013 and December 31, 2012, respectively.

**Legal Actions** — On April 13, 2011, each of the Company and EverBank entered into a consent order with the Office of Thrift Supervision (OTS) with respect to EverBank's mortgage foreclosure practices and the Company's oversight of those practices. The Office of the Comptroller of the Currency (OCC) succeeded the OTS with respect to EverBank's consent order, and the Board of Governors of the FRB succeeded the OTS with respect to the Company's consent order. The consent orders require, among other things, that the Company establish a new compliance program for mortgage servicing and foreclosure operations and that the Company ensure that it has dedicated resources for communicating with borrowers, policies and procedures for outsourcing foreclosure or related functions and management information systems that ensure timely delivery of complete and accurate information. The Company was also required to retain an independent firm as part of an "Independent Foreclosure Review" program to conduct a review of residential foreclosure actions that were pending from January 1, 2009 through December 31, 2010 in order to determine whether any borrowers sustained financial injury as a result of any errors, misrepresentations or deficiencies and to provide remediation as appropriate.

In August 2013, EverBank reached an agreement with the OCC that would end its participation in the Independent Foreclosure Review program mandated by the April 2011 consent order and replace it with an accelerated remediation process. The agreement includes a cash payment of approximately \$37,390 to be made by EverBank to a settlement fund, which would provide relief to qualified borrowers. In addition, EverBank will contribute approximately \$6,344 to organizations certified by the U.S. Department of Housing and Urban Development or other tax-exempt organizations that have as a principal mission providing affordable housing, foreclosure prevention and/or educational assistance to low and moderate income individuals and families. This agreement has not eliminated all of our risks associated with foreclosure-related practices, and it does not protect EverBank from potential individual borrower claims or class action lawsuits, any of which could result in additional expenses. Consistent with the agreement, an amendment to the April 2011 consent order was entered into on October 15, 2013. All terms of the April 2011 consent order that were not explicitly superseded by the amendment remain in effect without modification.

In October 2013, EverBank received a letter from the OCC requesting, in connection with the April 2011 consent order, that EverBank provide the OCC with an action plan, along with other mortgage servicers, to identify errors and

remediate borrowers serviced by EverBank for the period from January 1, 2011 through the present day, that may have been harmed by the same errors identified in the Independent Foreclosure Review. EverBank is presently preparing its action plan for OCC review and will submit that action plan in November 2013. The Company has evaluated subsequent events through the date in which financial statements are available to be issued and currently, the Company is unable to estimate any liabilities that may result from the action plan; therefore, no amounts have been accrued.

In addition, other government agencies, including state attorneys general and the U.S. Department of Justice, continue to investigate various mortgage-related practices of the Company and other major mortgage servicers. The Company continues to cooperate with these investigations. These investigations could result in material fines, penalties, equitable remedies (including requiring default servicing or other process changes), or other enforcement actions, as well as significant legal costs in responding to governmental investigations and additional litigation. The Company has evaluated subsequent events through the date in which financial statements are available to be issued and currently, the Company is unable to estimate any loss that may result from penalties or fines imposed by other governmental agencies; therefore, no amounts have been accrued.

In the ordinary course of business, the Company and its subsidiaries are routinely involved in various claims and legal actions. In light of the uncertainties involved in these government proceedings, there is no assurance that the ultimate resolution of these matters will not significantly exceed the reserves currently accrued by the Company.

#### 16. Variable Interest Entities

The Company, in the normal course of business, engages in certain activities that involve variable interest entities (VIEs), which are legal entities that lack sufficient equity to finance their activities, or the equity investors of the entities as a group lack any of the characteristics of a controlling interest. The primary beneficiary of a VIE is generally the enterprise that has both the power to direct the activities most significant to the economic performance of the VIE and the obligation to absorb losses or receive benefits that could potentially be significant to the VIE. The Company evaluates its interest in certain entities to determine if these entities meet the definition of a VIE and whether the Company is the primary beneficiary and should consolidate the entity based on the variable interests it held both at inception and when there is a change in circumstances that requires a reconsideration. If the Company is determined to be the primary beneficiary of a VIE, it must account for the VIE as a consolidated subsidiary. If the Company is determined not to be the primary beneficiary of a VIE but holds a variable interest in the entity, such variable interests are accounted for under accounting standards as deemed appropriate.

Table of Contents

## Non-consolidated VIEs

The table below summarizes select information related to variable interests held by the Company at September 30, 2013 and December 31, 2012:

	September 30, 2013		December 31, 2012	
	Total Assets	Maximum Exposure	Total Assets	Maximum Exposure
Non-consolidated VIEs				
Loans provided to VIEs	\$159,774	\$159,774	\$185,000	\$185,000
On-balance-sheet securitizations	—	—	99,121	99,121
Debt securities	1,309,254	1,309,254	1,757,858	1,757,858
Loans provided to VIEs				

The Company has provided funding to certain unconsolidated VIEs sponsored by third parties. These VIEs are generally established to finance certain small business loans originated by third parties and are not considered to have significant equity at risk. The entities are primarily funded through the issuance of loans from the Company and a certified development company (CDC). The Company's loan is secured by a first lien. Although the Company retains the servicing rights to the loan, the Company is unable to unilaterally make all decisions necessary to direct the activities that most significantly impact the VIE; therefore, it is not the primary beneficiary. The principal risk to which these entities are exposed is credit risk related to the underlying assets. The loans to these VIEs are included in the Company's overall analysis of the ALLL and reserve for unfunded commitments, respectively. The Company does not provide any implicit or explicit liquidity guarantees or principal value guarantees to these VIEs. The Company records these commercial loans on its condensed consolidated balance sheet as loans held for investment.

## On-balance sheet securitizations

The Company engages in on-balance-sheet securitizations which are securitizations that do not qualify for sales treatment; thus, the assets remain on the Company's condensed consolidated balance sheet. The Company securitizes mortgage loans generally through a GSE, such as GNMA, FNMA or FHLMC (U.S. agency-sponsored mortgages). Occasionally, the Company will transfer conforming residential mortgages to GNMA in exchange for mortgage-backed securities. The Company maintains effective control over pools of transferred assets that remain unsold at the end of the period. Accordingly, the Company has not recorded these transfers as sales. These transferred assets are recorded in the condensed consolidated balance sheet as loans held for sale.

## Debt securities

All MBS, CMO and ABS securities owned by the Company are issued through VIEs. The related VIEs were not consolidated, as the Company was not determined to be the primary beneficiary. See Note 4 for information related to debt securities.

## Mortgage securitizations

The Company provides a variety of mortgage loan products to a diverse customer base. Once originated, the Company often securitizes these loans through the use of VIEs. These VIEs are funded through the issuance of trust certificates backed solely by the transferred assets. These mortgage loan securitizations are non-recourse except in accordance with the Company's standard obligations under representations and warranties. Thereby, the transaction effectively transfers the risk of future credit losses to the purchasers of the securities issued by the trust. The Company generally retains the servicing rights of the transferred assets but does not retain any other interest in the entities.

As noted above, the Company securitizes mortgage loans through government-sponsored entities or through private label (non-agency sponsored) securitizations. The Company is not the primary beneficiary of its U.S. agency-sponsored mortgage securitizations, because the Company does not have the power to direct the activities of the VIE that most significantly impact the entity's economic performance. Therefore, the Company does not consolidate these U.S. agency-sponsored mortgage securitizations. Additionally, the Company does not consolidate VIEs of private label securitizations. Although the Company is the servicer of the VIE, the servicing relationship is deemed to be a fiduciary relationship and, therefore, the Company is not deemed to be the primary beneficiary of the entity. Refer to Note 5 for information related to sales of residential mortgage receivables and Note 8 for information related to mortgage servicing rights.

#### 17. Segment Information

The Company has three reportable segments: Banking and Wealth Management, Mortgage Banking, and Corporate Services. The Company's reportable business segments are strategic business units that offer distinctive products and services marketed through different channels. These segments are managed separately because of their marketing and distribution requirements.

The Banking and Wealth Management segment includes all banking, lending and investing products and services offered to customers either over the web or telephone or through financial centers or financial advisors. Activity relating to recent acquisitions has been included in the Banking and Wealth Management segment.

The Mortgage Banking segment includes the origination and servicing of mortgage loans and focuses primarily on residential loans for purposes of resale to GSEs, institutional investors or for investment by the Banking and Wealth Management segment.

The Corporate Services segment consists of services provided to the Banking and Wealth Management and Mortgage Banking segments including executive management, technology, legal, human resources, marketing, corporate development, treasury, accounting, finance and other services and transaction-related items. Direct expenses are allocated to the operating segments. Unallocated expenses are included in Corporate Services. Certain other expenses, including interest expense on trust preferred debt and transaction-related items, are included in the Corporate Services segment.

The chief operating decision maker's review of each segment's performance is based on segment income, which is defined as income from operations before income taxes and certain corporate allocations. Additionally, total net revenue is defined as net interest income before provision for loan and lease losses and total noninterest income.

Table of Contents

Intersegment revenue among the Company's business units reflects the results of a funds transfer pricing (FTP) process, which takes into account assets and liabilities with similar interest rate sensitivity and maturity characteristics and reflects the allocation of net interest income related to the Company's overall asset and liability management activities. This provides for the creation of an economic benchmark, which allows the Company to determine the profitability of the Company's products and cost centers by calculating profitability spreads between product yields and internal references. However, business segments have some latitude to retain certain interest rate exposures related to customer pricing decisions within guidelines.

FTP serves to transfer interest rate risk to the treasury function through a transfer pricing methodology and cost allocating model. The basis for the allocation of net interest income is a function of the Company's methodologies and assumptions that management believes are appropriate to accurately reflect business segment results. These factors are subject to change based on changes in current interest rates and market conditions.

The results of each segment are reported on a continuing basis. The following table presents financial information of reportable segments as of and for the three and nine months ended September 30, 2013 and 2012. The eliminations column includes intersegment eliminations required for consolidation purposes.

	As of and for the Three Months Ended September 30, 2013				
	Banking and Wealth Management	Mortgage Banking	Corporate Services	Eliminations	Consolidated
Net interest income (expense)	\$125,545	\$14,889	\$(1,578 )	\$—	\$138,856

Total assets	14,696,893	1,838,964	129,141	(155,558 )	16,509,440

Segment earnings in the Mortgage Banking segment included a \$35,132 recovery on the MSR valuation allowance (1) for the three months ended September 30, 2013 and a \$80,259 recovery on the MSR valuation allowance for the nine months ended September 30, 2013.

Segment earnings in the Mortgage Banking segment included a \$18,229 charge for MSR impairment for the three (2) months ended September 30, 2012 and a \$63,508 charge for MSR impairment for the nine months ended September 30, 2012 .

Table of Contents

(3)Income before income taxes includes additional allocation of intersegment expenses beginning in 2013.

18. Subsequent Events

On October 30, 2013, the Company entered into a series of agreements with Green Tree Servicing LLC (GTS), a subsidiary of Walter Investment Management Corp., to sell approximately \$13,400,000 of UPB of FNMA, FHLMC and private investor mortgage servicing rights, subject to changes in the underlying loan population through the date of transfer. The Company also entered into an agreement with GTS to sell the Company's default servicing platform and related fixed assets, and to sub-service the Company's Ginnie Mae servicing portfolio with a UPB of approximately \$6,900,000. The sale of the MSR is expected to close in the fourth quarter of 2013 and the sale of the default platform along with the sub-servicing agreement is expected to occur in the first quarter of 2014. Due to the recent nature of this transaction, the Company is currently evaluating the impact to its financial statements.

Management's Discussion and Analysis of Financial Condition and Results of Operations

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion and analysis is intended to assist readers in understanding the condensed consolidated financial condition and results of operations of the Company during the three and nine month periods ended September 30, 2013 and should be read in conjunction with the condensed consolidated financial statements and notes thereto included in this Quarterly Report on Form 10-Q and the Company's Annual Report on Form 10-K for the period ended December 31, 2012, as filed with the SEC on March 15, 2013.

Forward-Looking Statements

This report contains certain statements that are forward-looking within the meaning of the Private Securities Litigation Reform Act of 1995 and are intended to be protected by the safe harbor provided therein. We generally identify forward-looking statements by terminology such as "outlook," "believes," "expects," "potential," "continues," "may," "will," "should," "seeks," "approximately," "predicts," "intends," "plans," "estimates," "anticipates" or the negative version of those words or other comparable words. These forward-looking statements are not historical facts, and are based on current expectations, estimates and projections about our industry, management's beliefs and certain assumptions made by management, many of which, by their nature, are inherently uncertain and beyond our control. Accordingly, you are cautioned that any such forward-looking statements are not guarantees of future performance and are subject to certain risks, uncertainties and assumptions that are difficult to predict. Although we believe that the expectations reflected in such forward-looking statements are reasonable as of the date made, expectations may prove to have been materially different from the results expressed or implied by such forward-looking statements. Unless otherwise required by law, we also disclaim any obligation to update our view of any such risks or uncertainties or to announce publicly the result of any revisions to the forward-looking statements contained in this report. A number of important factors could cause actual results to differ materially from those indicated by the forward-looking statements, including, but not limited to, those factors described in Part I, Item 1A "Risk Factors" contained in our Annual Report on Form 10-K for the period ended December 31, 2012, as filed with the SEC on March 15, 2013 and in Part II, Item 1A "Risk Factors" contained in this report, and include risks discussed in this Management's Discussion and Analysis of Financial Condition and Results of Operations (MD&A) and in other periodic reports we file with the SEC. These factors include without limitation:

- deterioration of general business and economic conditions, including the real estate and financial markets, in the United States and in the geographic regions and communities we serve;
- risks related to liquidity, including the adequacy of our cash flow from operations and borrowings to meet our short-term liquidity needs;
- changes in interest rates that affect the pricing of our financial products, the demand for our financial services and the valuation of our financial assets and liabilities, mortgage servicing rights and mortgage loans held for sale;
- risk of higher loan and lease charge-offs;
- legislative or regulatory actions affecting or concerning mortgage loan modification, refinancing and foreclosure;
- risk of individual claims or further fines, penalties, equitable remedies, (including default servicing or other process changes) or other enforcement actions relating to our mortgage related practices;
- our ability to comply with any supervisory actions to which we are or become subject as a result of examination by our regulators;
- our ability to comply with the amended consent order and the terms and conditions of our settlement of the Independent Foreclosure Review, including the associated costs;
- concentration of our commercial real estate loan portfolio;
- higher than normal delinquency and default rates affecting our mortgage banking business;
- limited ability to rely on brokered deposits as a part of our funding strategy;
- concentration of mass-affluent clients and jumbo mortgages;
- the effectiveness of the hedging strategies we use to manage our mortgage pipeline;
- the effectiveness of our derivatives to manage interest rate risk;
- delinquencies on our equipment leases and reductions in the resale value of leased equipment;
- increases in loan repurchase requests and our reserves for loan repurchases;

failure to prevent a breach to our Internet-based system and online commerce security;  
soundness of other financial institutions;  
changes in currency exchange rates or other political or economic changes in certain foreign countries;  
disruptions in the credit and financial markets in the United States and globally, including the effects of any  
downgrade in the United States government's sovereign debt rating and the continued effects of the European  
sovereign debt crisis;  
the competitive industry and market areas in which we operate;  
historical growth rate and performance may not be a reliable indicator of future results;  
loss of key personnel;  
fraudulent and negligent acts by loan applicants, mortgage brokers, other vendors and our employees;  
costs of compliance or failure to comply with laws, rules, regulations and orders that govern our operations;  
failure to establish and maintain effective internal controls and procedures;  
impact of current and future legal and regulatory changes, including the Dodd-Frank Wall Street Reform and  
Consumer Protection Act of 2010 (the Dodd-Frank Act) and the capital requirements promulgated by the Basel  
Committee on Banking Supervision ("Basel Committee");  
effects of changes in existing U.S. government or government-sponsored mortgage programs;  
changes in laws and regulations that may restrict our ability to originate or increase our risk of liability with respect to  
certain mortgage loans;

## Table of Contents

### Management's Discussion and Analysis of Financial Condition and Results of Operations

risks related to the continuing integration of acquired businesses and any future acquisitions including, risk that we may not realize anticipated benefits of such acquisitions;

legislative action regarding foreclosures or bankruptcy laws;

changes to generally accepted accounting principles (GAAP);

environmental liabilities with respect to properties that we take title to upon foreclosure; and

inability of EverBank, our banking subsidiary, to pay dividends.

#### Reclassifications

Certain prior period information in this MD&A has been reclassified to conform to current period classifications.

#### Introduction and Overview

We are a thrift holding company which operates primarily through our direct subsidiary, EverBank (EB or EverBank). EB is a federally chartered thrift institution with its home office located in Jacksonville, Florida. References to "we," "our," "us," or the "Company" refer to the holding company and its subsidiaries that are consolidated for financial reporting purposes. We are a diversified financial services company that provides innovative banking, lending and investment products and services to clients nationwide through scalable, low-cost distribution channels. Our business model attracts financially sophisticated, self-directed, mass-affluent clients and a diverse base of small and medium-sized business clients. We market and distribute our products and services primarily through our integrated on-line financial portal, which is augmented by our nationwide network of independent financial advisors, high-volume financial centers in targeted Florida markets and other business offices throughout the country. These channels are connected by technology-driven centralized platforms, which provide operating leverage throughout our business.

We have a suite of asset origination and fee income businesses that individually generate attractive financial returns and collectively leverage our core deposit franchise and client base. We originate, invest in, sell and service residential mortgage loans, equipment leases, and various other consumer and commercial loans, as market conditions warrant. Our organic origination activities are scalable, significant relative to our balance sheet size and provide us with substantial growth potential. Our origination, lending and servicing expertise positions us to acquire assets in the capital markets when risk-adjusted returns available through acquisition exceed those available through origination. Our rigorous analytical approach provides capital markets discipline to calibrate our levels of asset origination, retention and acquisition. These activities diversify our earnings, strengthen our balance sheet and provide us with flexibility to capitalize on market opportunities.

Our deposit franchise fosters strong relationships with a large number of financially sophisticated clients and provides us with a stable and flexible source of low, all-in cost funding. We have a demonstrated ability to grow our client deposit base significantly with short lead time by adapting our product offerings and marketing activities rather than incurring the higher fixed operating costs inherent in more branch-intensive banking models. Our extensive offering of deposit products and services includes proprietary features that distinguish us from our competitors and enhance our value proposition to clients. Our products, distribution and marketing strategies allow us to generate substantial deposit growth while maintaining an attractive mix of high-value transaction and savings accounts.

#### Key Factors Affecting Our Business and Financial Statements

##### Economic and Interest Rate Environment

The results of our operations are highly dependent on economic conditions and market interest rates. Beginning in 2007, turmoil in the financial sector resulted in a reduced level of confidence in financial markets among borrowers, lenders and depositors, as well as extreme volatility in the capital and credit markets. In response to these conditions, the Board of Governors of the Federal Reserve Board (FRB) began decreasing short-term interest rates, with 11 consecutive decreases totaling 525 basis points between September 2007 and December 2008. To stimulate economic activity and stabilize the financial markets, the FRB maintained historically low market interest rates from 2009 to 2013. While market conditions and home prices improved during this period, continued economic uncertainty resulted in high unemployment and low consumer confidence. As part of a sustained effort to spur economic growth, the FRB has reaffirmed their pledge to hold short-term interest rates low into 2014.

Net interest income is our largest source of income and is driven primarily as a function of the average balance of interest-earning assets, the average balance of interest-bearing liabilities and the spread between the contractual yield

on such assets and the contractual cost of such liabilities. These factors are influenced by both the pricing and mix of interest-earning assets and interest-bearing liabilities which, in turn, are impacted by external factors such as the local economy, competition for loans and deposits, the monetary policy of the FRB and market interest rates. The cost of our deposits is largely based on short-term interest rates which are driven primarily by the FRB's actions. However, the yields generated by our loans and securities are typically driven by longer-term interest rates which are set by the market, or, at times by the FRB's actions. Our net interest income is therefore influenced by movements in interest rates and the pace at which these movements occur. Currently, short-term and long-term interest rates are at near historic lows, with overall market and industry margins tightening.

In the latter half of the second quarter of 2013, the FRB indicated their intention to reduce their bond buying activities associated with quantitative easing 3 (QE3) if the economy continued to show improvement. The uncertainty around the FRB's intent created volatility in the capital markets and resulted in a market sell-off which drove the 10-year treasury yield from 1.7% on May 2, 2013 to 2.6% on June 25, 2013. These events had a direct impact on mortgage interest rates which increased sharply from 3.7% at the beginning of the second quarter 2013 to 4.4% at the end of the second quarter. Mortgage interest rates increased to a high of 4.7% in early September, however, decreased 39 basis points to 4.3% as of September 30, 2013. In addition, the spreads over the treasury curve widened to levels experienced earlier in the year. Increases in mortgage rates impacted origination volume as the number of borrowers eligible to refinance into lower rates was reduced. However, we have made substantial investments in our retail platform focusing on purchase business in anticipation of the higher rate environment. Moreover, the expectation of slower prepayments due to refinancing has had a positive impact on the fair value and amortization of our mortgage servicing rights. We continue to monitor the status of the economy as well as the expected interest rate environment both in the near term and over the long term to best position our balance sheet to optimize risk-adjusted returns.

Management's Discussion and Analysis of Financial Condition and Results of Operations

Regulatory Changes

Our financial condition and the results of our operations are dependent upon the composition of our balance sheet and the assets which we originate, sell, and/or retain for investment.

In July 2013, our primary federal regulator, the Federal Reserve, and EverBank's primary federal regulator, the OCC, published final rules (the "Basel III Capital Rules") establishing a new comprehensive capital framework for U.S. banking organizations. The Basel III Capital Rules implement the Basel Committee's December 2010 framework known as "Basel III" for strengthening international capital standards as well as certain provisions of the Dodd-Frank Act. The Basel III Capital Rules substantially revise the risk-based capital requirements applicable to thrift holding companies and depository institutions, including us and EverBank, compared to the current U.S. risk-based capital rules. The Basel III Capital Rules define the components of regulatory capital and address other issues affecting the numerator in banking institutions' regulatory capital ratios. The Basel III Capital Rules also address risk weights and other issues affecting the denominator in banking institutions' regulatory capital ratios and replace the existing risk-weighting approach, which was derived from the Basel I capital accords of the Basel Committee, with a more risk-sensitive approach based, in part, on the standardized approach in the Basel Committee's 2004 "Basel II" capital accords. The Basel III Capital Rules also implement the requirements of Section 939A of the Dodd-Frank Act to remove references to credit ratings from the federal banking agencies' rules. The Basel III Capital Rules will become effective for the Company and EverBank on January 1, 2015 (subject to phase-in periods as discussed below).

The Basel III Capital Rules, among other things, (i) introduce a new capital measure called "Common Equity Tier 1" ("CET1"), (ii) specify that Tier 1 capital consist of CET1 and "Additional Tier 1 capital" instruments meeting specified requirements, (iii) define CET1 narrowly by requiring that most deductions/adjustments to regulatory capital measures be made to CET1 and not to the other components of capital and (iv) expand the scope of the deductions/adjustments from capital as compared to existing regulations. Under the Basel III Capital Rules, for most banking organizations, including the Company, the most common form of Additional Tier 1 capital is non-cumulative perpetual preferred stock, and the most common form of Tier 2 capital is subordinated notes and a portion of the allocation for loan losses, in each case, subject to the Basel III Capital Rules' specific requirements.

Under the Basel III Capital Rules, the initial minimum capital ratios as of January 1, 2015 will be as follows:

- 4.5% CET1 to risk-weighted assets.
- 6.0% Tier 1 capital to risk-weighted assets.
- 8.0% Total capital to risk-weighted assets.

The Basel III Capital Rules provide for a number of deductions from and adjustments to CET1. These include, for example, the requirement that mortgage servicing rights, deferred tax assets arising from temporary differences that could not be realized through net operating loss carrybacks and significant investments in non-consolidated financial entities be deducted from CET1 to the extent that any one such category exceeds 10% of CET1 or all such categories in the aggregate exceed 15% of CET1.

The Basel III Capital Rules also introduce a new "capital conservation buffer", composed entirely of CET1, on top of these minimum risk-weighted asset ratios. The capital conservation buffer is designed to absorb losses during periods of economic stress. Banking institutions with a ratio of CET1 to risk-weighted assets above the minimum but below the capital conservation buffer will face constraints on dividends, equity repurchases and compensation based on the amount of the shortfall. When fully phased in on January 1, 2019, the Basel III Capital Rules will require us and EverBank to maintain (i) a minimum ratio of CET1 to risk-weighted assets of at least 4.5%, plus the 2.5% capital conservation buffer, effectively resulting in a minimum ratio of CET1 to risk-weighted assets of at least 7%, (ii) a minimum ratio of Tier 1 capital to risk-weighted assets of at least 6.0%, plus the capital conservation buffer, effectively resulting in a minimum Tier 1 capital ratio of 8.5%, (iii) a minimum ratio of Total capital (that is, Tier 1 plus Tier 2) to risk-weighted assets of at least 8.0%, plus the capital conservation buffer, effectively resulting in a minimum total capital ratio of 10.5% and (iv) a minimum leverage ratio of 4%, calculated as the ratio of Tier 1 capital to average assets (as compared to a current minimum leverage ratio of 3% for banking organizations that either have the highest supervisory rating or have implemented the appropriate federal regulatory authority's risk-adjusted measure for market risk).

Under current capital standards, the effects of accumulated other comprehensive income items included in shareholders' equity under U.S. GAAP (for example, marks-to-market of securities held in the available for sale portfolio), are excluded for the purposes of determining regulatory capital ratios. Under the Basel III Capital Rules, the effects of certain accumulated other comprehensive items are not excluded; however, certain banking organizations, including us and EverBank, may make a one-time permanent election to continue to exclude these items. This election must be made concurrently with the first filing of certain of the Company's and EverBank's periodic regulatory reports in the beginning of 2015. The Company and EverBank are considering whether to make this election. The Basel III Capital Rules also preclude counting certain hybrid securities, such as trust preferred securities, as Tier 1 capital of bank or thrift holding companies. However for bank or thrift holding companies that had assets of less than \$15 billion as of December 31, 2009 like us, trust preferred securities issued prior to May 19, 2010 can be treated as Tier 1 capital to the extent that they do not exceed 25% of Tier 1 capital after applying all capital deductions and adjustments.

Implementation of the deductions and other adjustments to CET1 will begin on January 1, 2015 and will be phased-in over a three-year period (beginning at 40% on January 1, 2015 and an additional 20% per year thereafter until fully phased-in at January 1, 2018). The implementation of the capital conservation buffer will begin on January 1, 2016 at the 0.625% level and be phased in over a three-year period (increasing by that amount on each subsequent January 1, until it reaches 2.5% on January 1, 2019).

With respect to EverBank, the Basel III Capital Rules also revise the "prompt corrective action" regulations pursuant to Section 38 of the Federal Deposit Insurance Act, by (i) introducing a CET1 ratio requirement at each level (other than critically undercapitalized), with the required CET1 ratio being 6.5% for well-capitalized status; (ii) increasing the minimum Tier 1 capital ratio requirement for each category, with the minimum Tier 1 capital ratio for well-capitalized status being 8% (as compared to the current 6%); and (iii) eliminating the current provision that provides that a bank with a composite supervisory rating of 1 may have a 3% leverage ratio and still be adequately capitalized. The Basel III Capital Rules do not change the total risk-based capital requirement for any "prompt corrective action" category.

The Basel III Capital Rules prescribe a standardized approach for risk weightings that expand the risk-weighting categories from the current four Basel I-derived categories (0%, 20%, 50% and 100%) to a much larger and more risk-sensitive number of categories, depending on

Table of Contents

Management's Discussion and Analysis of Financial Condition and Results of Operations

the nature of the assets, generally ranging from 0% for U.S. government and agency securities to 600% for certain equity exposures, and resulting in higher risk weights for a variety of asset categories. Specific changes to current rules impacting our determination of risk-weighted assets include, among other things:

- Applying a 150% risk weight instead of a 100% risk weight for certain high volatility commercial real estate acquisition, development and construction loans.

- Assigning a 150% risk weight to exposures (other than residential mortgage exposures, which remains at an assigned risk weighting of 100%) that are 90 days past due.

- Providing for a 20% credit conversion factor for the unused portion of a commitment with an original maturity of one year or less that is not unconditionally cancellable (currently set at 0%).

- Providing for a risk weight, generally not less than 20% with certain exceptions, for securities lending transactions based on the risk weight category of the underlying collateral securing the transaction.

- Providing for a 100% risk weight for claims on securities firms.

- Eliminating the current 50% cap on the risk weight for OTC derivatives.

In addition, the Basel III Capital Rules also provide more advantageous risk weights for derivatives and repurchase-style transactions cleared through a qualifying central counterparty and increase the scope of eligible guarantors and eligible collateral for purposes of credit risk mitigation.

Management believes, at September 30, 2013, that we and EverBank would meet all capital adequacy requirements under the Basel III Capital Rules on a fully phased-in basis if such requirements were currently effective. We are also subject to new stress testing requirements that implement provisions of the Dodd-Frank Act requiring financial companies with total consolidated assets of more than \$10 billion but less than \$50 billion to conduct annual company-run stress tests, report the results to their primary federal regulator and the FRB, and publish a summary of certain aspects of the results. Under the rules, we and EverBank will be required to conduct stress tests using certain scenarios that the FRB will publish by November 15 of each year (starting in 2013) and using financial statement data as of September 30 of that year. We will be required to report the results to the OCC and the FRB by March 31 of the year after the stress tests are conducted. In addition, the rules will require us to publicly disclose a summary of certain aspects of the stress test results between June 15 and June 30 of the year after the stress tests are conducted starting in 2015. This process will be repeated in each subsequent year.

Stress testing requirements will include baseline, adverse, and severely adverse economic and financial scenarios to assess potential impacts on our consolidated earnings, losses and capital over a nine quarter planning horizon.

According to regulatory standards, a summary of the results of certain aspects of this stress analysis (initially, only under the severely adverse scenario) will be released publicly and will contain company specific information and results. It is anticipated that our capital ratios reflected in the stress test calculation will be an important factor considered by our regulators in evaluating whether proposed payments of dividends, stock repurchases [or strategic transactions] may be an unsafe or unsound practice.

The planning horizon for the next capital planning and stress testing cycle runs from the fourth quarter of 2013 through the fourth quarter of 2015. Thus, the next capital planning and stress testing cycle, which begins October 1, overlaps with the implementation of the Basel III Capital Rules. On September 30, 2013, the FRB issued an interim final rule to clarify how companies should incorporate the Basel III Capital Rules into their capital and business projections during the next cycle of capital plan submissions and stress tests. The interim final rule provides a one-year transition period for most banking organizations, including the Company and EverBank, with between \$10 billion and \$50 billion in total consolidated assets. Pursuant to the interim final rule, we will be required to calculate our stress test projections using the FRB's current regulatory capital rules during the upcoming stress test to allow time to adjust our internal systems to the revised capital framework.

Performance Highlights

- GAAP diluted earnings per share was \$0.25, a 32% increase from \$0.19 in the third quarter 2012 and a 29% decrease from \$0.35 in the second quarter 2013.

-

## Edgar Filing: EverBank Financial Corp - Form 10-Q

Adjusted diluted earnings per share was \$0.26, a 13% decrease from \$0.30 in the third quarter 2012 and a 7% decrease from \$0.28 in the second quarter 2013.<sup>1</sup>

Tangible common equity per common share of \$11.42 at September 30, 2013, an increase of 11% compared to the third quarter 2012.

Net income of \$33 million, an increase of 49% compared to the third quarter of 2012.

Adjusted net income of \$34 million, a decrease of 5% compared to the third quarter of 2012.

Revenue of \$282 million, an increase of 26% compared to the third quarter of 2012.

Total organic asset generation of \$3.1 billion, a decrease of 2% compared to the third quarter of 2012.

Realized \$35 million of mortgage servicing rights valuation recovery.

Return on equity ("ROE") was 8.7% and adjusted ROE was 9.0%.

Strong liquidity and capital position with bank tier 1 leverage ratio of 8.8% and bank total risked-based capital ratio of 14.5%.

<sup>1</sup> Reconciliations of Non-GAAP financial measures can be found in Table 1, Table 1A, Table 1B, Table 7A, Table 7B, Table 7C, Table 7D and Table 18

Table of Contents

Strategic Business Activities

The Company entered into a series of agreements with Green Tree Servicing LLC (GTS), a subsidiary of Walter Investment Management Corp., on October 30, 2013 which will enable EverBank to position its mortgage servicing business toward prime performing mortgages as well as improve its operating efficiency. The transaction includes the following:

• Sale of \$13.4 billion of UPB of FNMA, FHLMC and private investor mortgage servicing rights. The sale is expected to close in the fourth quarter of 2013.

• Sale of EverBank's default servicing platform. GTS will assume lease obligations on approximately 86,000 square feet of space at EverBank Center in Jacksonville and acquire the fixed assets associated with the default platform. The sale is expected to close in the first quarter of 2014.

• Entered into a subservicing partnership agreement with GTS to sub-service EverBank's Ginnie Mae and government loan servicing portfolio with a UPB of approximately \$6.9 billion. The subservicing agreement will begin in the first quarter of 2014 concurrent with the sale of the default servicing platform.

We expect the above transactions to positively impact the Company's future pre-tax income by \$20 to \$25 million.

One time transaction costs are expected to be \$10 to \$15 million and recognized in the fourth quarter of 2013.

During the quarter, the Company also used excess cash to retire nearly \$800 million in higher-cost wholesale borrowings which will increase net interest income and net interest margin in the future.

The above activities, combined with the exit from our wholesale broker mortgage business and our settlement with the OCC and Federal Reserve, position EverBank to better focus on our core clients and businesses.

Table of Contents

## Balance Sheet

## Loan Portfolio

Total portfolio loans held for investment (HFI) were \$12.6 billion at September 30, 2013, an increase of \$2.5 billion, or 25%, year over year. Compared to the prior quarter, this represents a decrease of \$0.3 billion, or 2%. Loans HFI for the third quarter 2013 were comprised of:

(dollars in millions)	Sep 30, 2013	Jun 30, 2013	Sep 30, 2012
Residential mortgages	\$4,624	\$4,237	\$4,127
Mortgage pool buyouts	2,075	2,349	2,680
Total residential	6,699	6,586	6,807
Commercial real estate	3,243	3,307	1,092
Lease financing receivables	1,093	1,015	742
Commercial	514	491	399
Total commercial finance & commercial real estate	4,850	4,813	2,233
Warehouse finance	851	1,292	824
Other	163	176	193
Total HFI	\$12,563	\$12,867	\$10,057

During the third quarter, residential loans HFI increased by 9% compared to the prior quarter to \$4.6 billion, driven by continued growth in our high quality prime jumbo hybrid ARM portfolio. Our commercial lending and leasing platforms represented approximately 45% of loans HFI in the third quarter compared to approximately 30% a year ago. Continued growth in our commercial finance and leasing portfolios were offset by lower warehouse finance balances experienced at quarter end.

## Loan Origination Activities

Organic asset generation totaled \$3.1 billion and retained organic originations totaled \$1.1 billion for the third quarter of 2013, a decrease of 19% and 3%, respectively, from the prior quarter. Total commercial loans and leases originated during the quarter were \$352 million, including leases of \$177 million and commercial real estate originations of \$122 million. Year to date, commercial originations totaled \$1.3 billion, including leases of \$515 million and commercial real estate originations of \$341 million.

Residential loan originations were \$2.7 billion for the third quarter of 2013, a decrease of 17% compared to the prior quarter and an increase of 7% year over year. Excluding the impact of our previously announced wholesale broker channel exit, origination volume was \$2.4 billion, a decrease of 13% compared to the prior quarter and an increase of 25% year over year. Origination volume from our retail channel was \$1.0 billion in the third quarter, a decrease of 15% from the prior quarter and a 100% increase year over year. Purchase transactions represented 40% of total volumes and 66% of retail volumes, compared to 32% and 49%, respectively, in the prior quarter. HARP volume was approximately 28% of total volume during the quarter compared to 17% in the prior quarter.

Our gain on sale margin decreased by 48 basis points during the quarter to 1.68%. Agency conforming loan originations sold into the secondary market generated a gain on sale margin of 2.86% during the third quarter of 2013 compared to 3.53% in the prior quarter and 3.65% during the third quarter of 2012. While we maintain the flexibility and capability to best execute our nonagency originations according to market conditions, we expect the majority of future nonagency loans will be originated for our portfolio and loans held for sale will consist of GSE-eligible conventional loans.

The following table presents total organic loan and lease origination information by product type:

(dollars in millions)	Sep 30, 2013	Jun 30, 2013	Sep 30, 2012
Residential origination volume			
Conventional loans	\$1,933	\$2,203	\$2,126
Prime jumbo loans	767	1,048	405
Total residential origination volume	2,700	3,251	2,531
Commercial origination volume			

Edgar Filing: EverBank Financial Corp - Form 10-Q

Commercial real estate	122	157	97
Lease financing receivables	177	187	134
Warehouse finance	7	69	192
Commercial	46	114	156
Total commercial origination volume	352	527	579
Total organic originations	\$3,052	\$3,778	\$3,110

Deposits

44

---

Table of Contents

Total deposits were \$13.6 billion at September 30, 2013, flat quarter over quarter, as lower time deposit balances offset higher levels of noninterest-bearing deposits. Year over year, total deposits grew by \$1.8 billion, or 15%, from \$11.8 billion. Time deposits, excluding market-based deposits represented 22% of total deposits in the third quarter compared to 23% in the prior quarter. Business deposits grew 4% compared to the prior quarter and represented 13% of total deposits.

At September 30, 2013, our deposits were comprised of the following:

(dollars in millions)	Sep 30, 2013	Jun 30, 2013	Sep 30, 2012
Noninterest-bearing demand	\$1,366	\$1,205	\$1,475
Interest-bearing demand	2,999	3,082	2,424
Savings and money market accounts	5,186	5,153	4,311
Global market-based accounts	1,041	1,051	1,231
Time, excluding market-based	3,036	3,179	2,375
Total deposits	\$13,628	\$13,670	\$11,816
Consumer deposits	\$11,864	\$11,974	\$10,278
Business deposits	1,764	1,696	1,538
Total deposits	\$13,628	\$13,670	\$11,816

**Other Funding Sources**

Total other borrowings were \$1.9 billion at September 30, 2013, a decrease of 30% quarter over quarter. This decrease resulted from the early extinguishment of \$0.8 billion of Federal Home Loan Bank advances.

Adjusted net income includes adjustments to our net income for certain material items that we believe are not (1) reflective of our ongoing business or operating performance. For a reconciliation of adjusted net income to net income, which is the most directly comparable GAAP measure, see Table 1A.

Both basic and diluted adjusted net earnings per common share are calculated using a numerator based on adjusted net income. Adjusted net earnings per common share, basic is a non-GAAP financial measure and its most directly comparable GAAP measure is net earnings per common share, basic. Adjusted net earnings per common share, diluted is a non-GAAP financial measure and its most directly comparable GAAP measure is net earnings per common share, diluted. For 2012, both basic and diluted adjusted net earnings per common share have been (2) adjusted to exclude the impact of the \$4.5 million special cash dividend paid in March 2012 to holders of the Series A 6% Cumulative Convertible Preferred Stock and the \$1.1 million special cash dividend paid in June 2012 to holders of the Series B 4% Cumulative Convertible Preferred Stock. The special cash dividends were paid in connection with the conversion of all shares of both the Series A 6% Cumulative Convertible Preferred Stock and the Series B 4% Cumulative Convertible Preferred Stock into common stock.

(3) Due to the issuance of non-participating perpetual preferred stock during the fourth quarter of 2012, we amended our calculation for return on average equity. Beginning with the fourth quarter of 2012, return on average equity is calculated as net income less dividends declared on the Series A 6.75% Non-Cumulative Perpetual Preferred Stock divided by average common shareholders' equity (average shareholders' equity less average Series A 6.75% Non-Cumulative Perpetual Preferred Stock). Prior to the fourth quarter of 2012, return on average equity was

calculated as net income divided by average shareholders' equity.

(4) Adjusted return on average assets equals adjusted net income divided by average total assets. Adjusted net income is a non-GAAP measure of our financial performance and its most directly comparable GAAP measure is net income. For a reconciliation of net income to adjusted net income, see Table 1A.

(5) Due to the issuance of non-participating perpetual preferred stock during the fourth quarter of 2012, we amended our calculation for adjusted return on average equity. Beginning with the fourth quarter of 2012, adjusted return on average equity is calculated as adjusted net income less dividends declared on the Series A 6.75% Non-Cumulative Perpetual Preferred Stock divided by average common shareholders' equity. Prior to the fourth quarter of 2012, adjusted return on average equity was calculated as adjusted net income divided by average shareholders' equity.

Adjusted net income is a non-GAAP measure of our financial performance and its most directly comparable GAAP measure is net income. For a reconciliation of net income to adjusted net income, see Table 1A.

(6) The efficiency ratio represents noninterest expense from our Banking and Wealth Management segment as a percentage of total revenues from our Banking and Wealth Management segment. We use the efficiency ratio to measure noninterest costs expended to generate a dollar of revenue. Because of the significant costs we incur and fees we generate from activities related to our mortgage production and servicing operations, we believe the efficiency ratio is a more meaningful metric when evaluated within our Banking and Wealth Management segment.

(7) Calculated as adjusted tangible common shareholders' equity divided by shares of common stock. Adjusted tangible common shareholders' equity equals shareholders' equity less goodwill, other intangible assets, perpetual preferred stock and accumulated other comprehensive loss (see Table 1B). Tangible common equity per common share is calculated using a denominator that includes

Table of Contents

actual period end common shares outstanding and for periods prior to the fourth quarter of 2012, additional common shares assuming conversion of all outstanding convertible preferred stock to common stock. Tangible common equity per common share excluding accumulated other comprehensive loss is a non-GAAP financial measure, and its most directly comparable GAAP financial measure is book value per common share.

Calculated as tangible common shareholders' equity divided by shares of common stock. Tangible common shareholders' equity equals shareholders' equity less goodwill, other intangible assets and perpetual preferred stock (see Table 1B). Tangible common equity per common share is calculated using a denominator that includes actual (8) period end common shares outstanding and for periods prior to the fourth quarter of 2012, additional common shares assuming conversion of all outstanding convertible preferred stock to common stock. Tangible common equity per common share including accumulated other comprehensive loss is a non-GAAP financial measure, and its most directly comparable GAAP financial measure is book value per common share.

A reconciliation of adjusted net income to net income, which is the most directly comparable GAAP measure, is as follows:

Adjusted Net Income	Table 1A			
	Three Months Ended September 30,		Nine Months Ended September 30,	
(dollars in thousands, except per share data)	2013	2012	2013	2012

## Analysis of Statements of Income

The following table sets forth, for the periods indicated, information regarding (i) the total dollar amount of interest income of the Company from earning assets and the resultant average yields; (ii) the total dollar amount of interest expense on interest-bearing liabilities and the resultant average rate; (iii) net interest income; (iv) net interest spread; and (v) net interest margin.

## Average Balance Sheet, Interest and Yield/Rate Analysis

Table 2A

(dollars in thousands)	Three Months Ended September 30, 2013			September 30, 2012

(1)

Edgar Filing: EverBank Financial Corp - Form 10-Q

The average balances are principally daily averages, and for loans, include both performing and non-performing balances.

- (2) Interest income on loans includes the effects of discount accretion and net deferred loan origination costs accounted for as yield adjustments.
- (3) All interest income was fully taxable for all periods presented.
- (4) N.M. indicates not meaningful.

50

---

Table of Contents

Increases and decreases in interest income and interest expense result from changes in average balances (volume) of interest-earning assets and interest-bearing liabilities, as well as changes in average interest rates. The following table shows the effect that these factors had on the interest earned on our interest-earning assets and the interest incurred on our interest-bearing liabilities.

## Analysis of Change in Net Interest Income

Table 3

(dollars in thousands)	Three Months Ended September 30, 2013 Compared to September 30, 2012			Nine Months Ended September 30, 2013 Compared to September 30, 2012

Total change in net interest income	\$27,139	\$(14,477 )	\$12,662	\$115,868	\$(58,780 )	\$57,088

The effect of changes in volume is determined by multiplying the change in volume by the previous period's (1) average yield/cost. Similarly, the effect of rate changes is calculated by multiplying the change in average yield/cost by the previous period's volume. Changes applicable to both volume and rate have been allocated to rate.

## Net Interest Income

## Third Quarter of 2013 compared to Third Quarter of 2012

Net interest income is affected by both changes in interest rates and the amount and composition of earning assets and interest-bearing liabilities. Net interest margin is defined as net interest income as a percentage of average interest-earning assets. Net interest income increased by \$12.7 million, or 10%, in the third quarter of 2013 compared to the same period in 2012 due to an increase in interest income of \$22.7 million, or 14%, partially offset by an

increase in interest expense of \$10.1 million, or 29%. Our net interest margin decreased by 42 basis points in the third quarter of 2013 compared to the same period in 2012, which was led by a decrease in yields in our interest-earning assets.

Yields on our interest-earning assets decreased by 37 basis points in the third quarter of 2013 compared to the same period in 2012, primarily due to a decrease in yields from our investment securities, loans and leases held for investment and loans held for sale. The decrease in yields on our investment securities is due to paydowns of higher yielding investment securities with a weighted average rate of 3.73% offset by the purchase of investment securities at lower yields with a weighted average rate of 2.88%. The lower yields on these securities is consistent with the tightening of spreads as well as the continued low interest rates prevalent in the market.

The decrease in our loans held for investment yields was led by a decrease in our lease financing receivables yield as a result of a decrease in excess accretion as well as continued organic production of lease financing receivables at market interest rates. We define excess accretion as above market yields as a result of the market dislocation in 2008 and 2009. We recognized \$3.2 million, a decrease of \$6.9 million, in excess accretion in the third quarter of 2013 compared to the same period in 2012. Excess accretion is currently limited to our acquired Tygris

Table of Contents

leases which included a significant liquidity discount at acquisition. This decrease was partially offset by an increase in our yields on the commercial and commercial real estate portfolio of 71 basis points, primarily due to the acquisition of BPL on October 1, 2012.

The decrease in yields on our loans held for sale is due primarily to the transfer of \$1.9 billion of mortgage pool buyouts with attractive yields from loans held for sale to loans held for investment during the third quarter of 2012 offset by organic production of mortgages at market interest rates that we intend to sell into the secondary market. Yields on our interest-bearing liabilities remained consistent from the third quarter of 2012 due to an increase in rates on our FHLB advances offset by a decrease in rates on our deposits. The rates on our FHLB advances increased 58 basis points from the third quarter of 2012 as a result of the maturity of lower rate, shorter term advances replaced by newer, longer term advances at higher interest rates. This increase is offset by a reduction of 12 basis points on our deposits from the third quarter of 2012 due to the reduction of bonus rates offered on deposits to new depositors in 2013.

Average balances of our interest-earning assets increased by \$3.3 billion, or 24%, in the third quarter of 2013 compared to the same period in 2012 primarily due to a \$3.9 billion increase in loans and leases held for investment partially offset by a decrease in loans held for sale.

The increase in the average balance of loans held for investment for the three months ended September 30, 2013, compared to the same period in 2012 was primarily due to increases in our commercial and commercial real estate and residential mortgage portfolios. Our fourth quarter 2012 acquisition of BPL contributed to the growth in our commercial and commercial real estate portfolio with a \$2.2 billion increase in our average balance in the third quarter of 2013.

The increase in the average balance of our residential mortgage portfolio is primarily due to the origination and transfer of the preferred jumbo adjustable rate mortgage (ARM) product for investment as a result of our change in intent to hold these loans for the foreseeable future. As the market for fixed rate mortgages declined during the second quarter of 2013, we adjusted our origination strategy to increase preferred jumbo ARM products and the transferred loans were transferred to our portfolio as the credit profile and duration of these loans offer attractive risk adjusted returns. The offsetting decrease in loans held for sale is due to the transfer of \$1.9 billion of mortgage pool buyouts to the residential mortgage portfolio in 2012 along with the sale of \$911.1 million of fixed rate jumbo preferred ARMs in the third quarter of 2013.

Average balances in our interest-bearing liabilities increased by \$3.1 billion, or 26%, in the third quarter of 2013 compared to the same period in 2012 primarily due to an increase in average balances in our interest-bearing deposits and FHLB advances. Average balances in our interest-bearing deposits increased by \$2.4 billion, or 25%, in the third quarter of 2013 compared to the same period in 2012 primarily due to growth in time deposits (excluding market-based), savings and money market accounts (excluding market-based), and interest-bearing demand deposits. The growth in lower-cost deposits was the result of successful sales and marketing efforts and clients' increased preference for more liquid products during 2013. Average balances in our FHLB advances increased by \$0.7 billion in the third quarter of 2013 compared to the same period in 2012 to help fund asset growth.

Nine Months Ended September 30, 2013 compared to Nine Months Ended September 30, 2012

Net interest income increased by \$57.1 million, or 16%, in the first nine months of 2013, compared to the same period in 2012, due to an increase in interest income of \$98.9 million or 21%, and an increase in interest expense of \$41.8 million, or 43%. Our net interest margin decreased by 49 basis points in the first nine months of 2013 compared to the same period in 2012, which was led by a decrease in yields on our interest-earning assets.

Yields on our interest-earning assets decreased by 41 basis points in the first nine months of 2013, compared to the same period in 2012, primarily due to decreases in yields on our investment securities, loans and leases held for investment and our loans held for sale. The decrease in yields on our investment securities is due to paydowns of higher yielding investment securities offset by the purchase of investment securities at lower yields. The lower yields on these securities is consistent with the tightening of spreads as well as the addition of securities balances at lower interest rates prevalent in the market.

Our lease financing receivables portfolio led the decrease in loans and leases held for investment yields as a result of a decrease in excess accretion as well as continued organic production of lease financing receivables at market interest

rates. We define excess accretion as above market yields as a result of the market dislocation in 2008 and 2009. We recognized \$14.5 million, a decrease of \$19.4 million, or 57%, in excess accretion in the first nine months of 2013 compared to the same period in 2012. Excess accretion is currently limited to our acquired Tygris leases which included a significant liquidity discount at acquisition. This decrease was partially offset by an increase in our yields on the commercial and commercial real estate portfolio due to the acquisition of BPL on October 1, 2012. The decrease in yields on our loans held for sale is primarily due to the transfer of \$1.9 billion of mortgage pool buyouts with attractive yields from loans held for sale to loans held for investment during the third quarter of 2012 offset by organic production of mortgages at market interest rates that we intend to sell into the secondary market. Yields on our interest-bearing liabilities remained consistent from the first nine months of 2012 due to an increase in rates on our FHLB advances offset by a decrease in rates on our deposits. The rates on our FHLB advances increased 61 basis points from the first nine months of 2012 as a result of the maturity of lower rate, shorter term advances replaced by newer, longer term advances at higher interest rates. This increase is offset by a reduction of 6 basis points on our deposits from the first nine months of 2012 due to the reduction of bonus rates offered on deposits to new depositors in 2013.

Average balances of our interest-earning assets increased by \$4.2 billion, or 33%, in the first nine months of 2013 compared to the same period in 2012 primarily due to a \$4.6 billion increase in loans and leases held for investment. The year over year increase in the average balance of loans held for investment was due primarily to our commercial and commercial real estate and residential mortgage portfolios. Our fourth quarter 2012 acquisition of BPL contributed to the growth in our commercial and commercial real estate portfolio with a \$2.2 billion increase in our average balance in the first nine months of 2013. Our warehouse finance acquisition, which closed in the second quarter of 2012, contributed \$969.6 million to the increase in our average balance in the first nine months of 2013. The increase in the average balance of our residential mortgage portfolio increased primarily due to the transfer of our preferred jumbo ARM product from loans held for sale to loans held for investment as a result of our change in intent to hold these loans for the foreseeable future. The preferred ARM loans were transferred to our portfolio as the credit profile and duration of these loans offer attractive risk adjusted

Table of Contents

returns.

Average balances in our interest-bearing liabilities increased by \$3.9 billion, or 35%, in the first nine months of 2013, compared to the same period in 2012 primarily due to an increase in average balances in our interest-bearing deposits and FHLB advances. Average balances in our interest-bearing deposits increased by \$3.0 billion, or 32%, in the first nine months of 2013 compared to the same period in 2012 primarily due to growth in time deposits (excluding market-based), savings and money market accounts (excluding market-based), and interest-bearing demand deposits. The growth in lower-cost deposits was the result of successful sales and marketing efforts and clients' increased preference for more liquid products during 2013. We continued to focus on marketing and promoting products in the first nine months of 2013 and expect to replace a portion of our wholesale borrowings with core deposits over time. Average balances in our FHLB advances increased by \$0.9 billion in the first nine months of 2013, compared to the same period in 2012 to fund strategic acquisitions and other asset growth in 2013 and to take advantage of historically low interest rates.

#### Provision for Loan and Lease Losses

We assess the allowance for loan and lease losses and make provisions for loan and lease losses as deemed appropriate in order to maintain the adequacy of the allowance for loan and lease losses. Increases in the allowance for loan and lease losses are achieved through provisions for loan and lease losses that are charged against net interest income. Additional allowance may result from a reduction of the net present value (NPV) of our acquired credit impaired (ACI) loans in the instances where we have a decrease in our cash flow expectations.

#### Third Quarter of 2013 compared to Third Quarter of 2012

We recorded a provision for loan and lease losses of \$3.1 million in the third quarter of 2013, which is a decrease of 30% from \$4.4 million in the same period in 2012. Provision expense decreased \$1.3 million from the third quarter of 2013 as compared to the same period in 2012 primarily due to stabilized and improving loan performance as a result of a more stable market, increasing property values, which continues to decrease severity upon default, as well as an improvement in the portfolio composition that includes higher credit quality EverBank originated loans. The commercial and commercial real estate loan provision decreased due to lower delinquencies on our collectively evaluated for impairment loans as well as a stabilization of the commercial real estate market. The commercial provision also decreased due to favorable property sales, lower charge off amounts and an increase in performing TDRs that resulted in a change in our probability of default assumptions. Our specifically impaired commercial loan provision decreased due to continued stabilization and improvement in estimated residual values on collateral dependent loans. In addition, we recognized a reduction of our valuation allowance of \$1.5 million on our ACI loans due to increases in expected cash flows on certain pools of loans.

The residential provision increased primarily due to increased losses in our government loans along with a provision for adjustable loans resetting at higher interest rates partially offset by sustained performance in preferred product originations and continued loan performance from the portfolio acquisition in early 2012. In addition, our provision related to residential TDRs decreased due to improved expected performance of these loans and lower charge-off amounts.

#### Nine Months Ended September 30, 2013 compared to Nine Months Ended September 30, 2012

We recorded a provision for loan and lease losses of \$5.0 million in the first nine months of 2013, which is a decrease of 77% from \$21.5 million in the same period in 2012. Provision expense decreased \$16.5 million during the first nine months of 2013 as compared to the same period in 2012 due to improved credit performance of our loans and leases held for investment. For the first nine months of 2013, provision for loan and lease losses decreased for our commercial portfolio compared to the same period in 2012. The commercial and commercial real estate loan provision decreased due to lower delinquencies on our collectively evaluated for impairment loans. In addition, the commercial provision also decreased due to favorable property sales and an increase in performing TDRs that resulted in a change in our default assumption. Commercial impairment decreased due to increases in residual values of collateral as well as the increases in expected cash flows.

The residential provision increased primarily due to increased losses in our government loans along with a provision for adjustable loans resetting at higher interest rates partially offset by sustained performance in preferred product originations and continued loan performance from the portfolio acquisition in the first nine months of 2013 and fewer

charge-offs on our home equity lines. In addition, our provision related to residential TDRs decreased due to improved expected performance of these loans and lower charge-off amounts.

Noninterest Income

The following table illustrates the primary components of noninterest income for the periods indicated.

Noninterest Income

Table 4

(dollars in thousands)	Three Months Ended		Nine Months Ended	
	September 30, 2013	September 30, 2012	September 30, 2013	September 30, 2012
Loan servicing fee income	\$50,713	\$42,341	\$140,068	\$130,380
Amortization of MSR	(30,438 )	(36,292 )	(101,461 )	(99,773 )
Recovery (impairment) of MSR	35,132	(18,229 )	80,259	(63,508 )

Third Quarter of 2013 compared to Third Quarter of 2012

Noninterest income increased by \$46.3 million or 48%, in the third quarter of 2013 compared to the same period in 2012. The increase

Table of Contents

in noninterest income was driven primarily by an increase in net loan servicing income and other noninterest income offset by a reduction in gain on sale of loans.

Net loan servicing income increased by \$67.6 million in the third quarter of 2013 compared to the same period in 2012. The increase was primarily due to recoveries recognized on the MSR valuation allowance in the third quarter of 2013 compared to MSR impairment recognized in the third quarter of 2012. The MSR recovery is due to lower projected prepayment speeds as a result of increases in mortgage interest rates. The increase in net loan servicing income is also related to a decrease in amortization of \$5.9 million in the third quarter of 2013 compared to the same period in 2012 due to lower prepayment levels driven by slowed refinancing demand due to higher interest rates. In addition, servicing fees increased by \$8.4 million in the third quarter of 2013 as the UPB of our servicing portfolio increased by \$9.0 billion, or 17%, to \$61.3 billion as of September 30, 2013 due to the acquisition of \$13.0 billion of residential servicing on April 1, 2013.

Gain on sale of loans decreased by \$34.4 million, or 40%, in the third quarter of 2013 compared to the same period in 2012, primarily driven by rising interest rates for most of the period, which resulted in a negative impact to our gain on sale margin as a result of the market sell-off at the end of the second quarter and into the third quarter as well as the spread widening in products such as the Home Affordable Refinance Program (HARP 2.0) specified pools and the non-agency market. In addition, we have a larger portion of loans being retained on our balance sheet. We continued to see strong margins on our agency product in the third quarter as refinancing demand was most notably due to the HARP 2.0 and the low mortgage interest rate environment throughout the period. Our gain on sale margin on our agency product was 2.86% for the three months ended September 30, 2013 with \$1.9 billion in agency sales. Lending volume also benefited from the continued expansion of our retail lending channel and increased lending of some of our preferred products. Mortgage lending volume increased by \$0.2 billion, or 6%, to \$2.7 billion in the third quarter of 2013 compared to the same period in 2012.

Other noninterest income increased by \$13.4 million in the third quarter of 2013 compared to the same period in 2012 primarily due to a \$5.0 million net gain on the early extinguishment of \$770 million of our FHLB advances and a \$4.2 million gain on the sale of \$159.0 million of our available for sale securities as well as \$2.8 million in income related to prepayment fees on certain serviced commercial loans acquired in the BPL acquisition.

Nine Months Ended September 30, 2013 compared to Nine Months Ended September 30, 2012

Noninterest income increased by \$179.1 million, or by 73%, in the first nine months of 2013, compared to the same period in 2012. The increase in noninterest income was driven primarily by net loan servicing income, gain on sale of loans and other noninterest income.

Net loan servicing income increased by \$151.8 million in the first nine months of 2013, compared to the same period in 2012. The increase was primarily due to recoveries recognized on the MSR valuation allowance in the first nine months of 2013 compared to MSR impairment recognized in the same period in 2012. MSR recovery is due to lower projected prepayment speeds as a result of increases in mortgage interest rates. The increase was offset by an increase in amortization of \$1.7 million in the first nine months of 2013, compared to the same period in 2012 due to elevated prepayment levels driven by refinancing demand and government sponsored refinancing programs, such as HARP earlier in 2013 which drove up actual and expected prepayments in the first quarter of 2013 when compared to the same period in 2012. In addition, servicing fees increased by \$9.7 million in the first nine months of 2013, as the UPB of our servicing portfolio increased by \$9.0 billion, to \$61.3 billion as of September 30, 2013 due to the acquisition of \$13.0 billion of residential servicing on April 1, 2013, compared to the same period in 2012.

Gain on sale of loans increased by \$5.7 million, or 3%, in the first nine months of 2013, compared to the same period in 2012, primarily driven by low interest rates for most of the period which resulted in increased lending volume.

Mortgage lending volume increased by \$2.1 billion, or 32%, to \$8.8 billion in the first nine months of 2013 compared to the same period in 2012. This increase was offset by a reduction in our gain on sale margin which was impacted by the volatility in interest rates as well as spread widening in spread products such as HARP 2.0 specified pools and the non-agency market. Refinancing demand was most notably due to the HARP 2.0 and the low mortgage interest rate environment throughout the period. Lending volume also benefited from the continued expansion of our retail lending channel and increased lending of some of our preferred products.

Other noninterest income increased by \$26.1 million in the first nine months of 2013, compared to the same period in 2012 primarily due to \$9.4 million prepayment penalty income related to serviced loans in the business lending trusts (BLTs) acquired with the BPL acquisition as well as \$4.0 million in income related to the recovery of losses experienced on loans and servicing rights previously acquired. In addition, we recognized a \$5.0 million net gain on the early extinguishment of \$770 million of our FHLB advances and a \$4.2 million gain on the sale of \$159.0 million of our available for sale securities during the first nine months of 2013.

Table of Contents

## Noninterest Expense

The following table illustrates the primary components of noninterest expense for the periods indicated.

Noninterest Expense	Table 5			
	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
(dollars in thousands)	2013	2012	2013	2012
Salaries, commissions and other employee benefits expense	\$111,144	\$85,399	\$340,080	\$228,266
Equipment expense	20,609	17,574	61,168	50,411
Occupancy expense	8,675	6,619	23,606	17,985
General and administrative expense:				
Legal and professional fees, excluding consent order expense	7,158	10,379	21,544	33,498
Foreclosure and other real estate owned (OREO) expense	8,224	19,639	24,865	45,567
Other credit-related expenses	3,632	5,425	7,810	23,041
Federal Deposit Insurance Corporation (FDIC) premium assessment and other agency fees	6,708	10,080	28,768	28,693
Advertising and marketing expense	6,516	10,340	23,217	24,893
Loan origination expense, net of deferred cost	1,106	2,834	3,946	7,779
Portfolio expense	3,875	3,843	10,333	10,867
Consent order expense	32,475	1,363	64,698	10,670
Other	15,574	10,474	41,017	36,903
Total general and administrative expense	85,268	74,377	226,198	221,911
Total Noninterest Expense	\$225,696	\$183,969	\$651,052	\$518,573

## Third Quarter of 2013 compared to Third Quarter of 2012

Noninterest expense increased by \$41.7 million, or 23%, in the third quarter of 2013 compared to the same period in 2012. The increase in noninterest expense was driven by increases in salaries, commissions and employee benefits, occupancy and equipment expense, and general and administrative expense.

Salaries, commissions and employee benefits increased by \$25.7 million, or 30%, in the third quarter of 2013 compared to the same period in 2012 due primarily to growth in our Mortgage Banking reporting segment. Mortgage Banking salaries, commissions and employee benefits increased by \$19.8 million in the third quarter of 2013 which included an increase in variable commissions of \$6.2 million. Salary and headcount increases were driven by increased mortgage lending, expansion of our retail and consumer direct production channels, and an increase in the servicing business due to the servicing rights purchase on April 1, 2013. Additional growth was also due to headcount increases in our Corporate Services and Banking and Wealth Management reporting segments due to the acquisitions of warehouse finance on April 1, 2012 and BPL on October 1, 2012, legal and regulatory compliance, as well as general operations growth. Headcount was up 38%, 11%, and 18% in our Mortgage Banking, Banking and Wealth Management and Corporate Services reporting segments, respectively, as of September 30, 2013 compared to the same period in 2012. This increase was partially offset by a decrease in headcount related to the exit from our wholesale broker lending business along with other staffing optimization initiatives company-wide.

Occupancy and equipment expense increased by \$5.1 million, or 21%, in the third quarter of 2013 compared to the same period in 2012. The increase was primarily due to increased costs associated with the expansion of our retail lending channels. Additionally, increased expenses are due to our warehouse finance and BPL acquisitions and overall expansion and growth of the business.

General and administrative expense increased by \$10.9 million, or 15%, in the third quarter of 2013 compared to the same period in 2012 primarily due to increases in consent order expenses of \$31.1 million as a result of the settlement agreement, which was partially offset by decreases in foreclosure and OREO expense, other credit-related expenses, advertising and marketing expense, FDIC premium assessment and other agency fees and other general and administrative expense compared to the same period in 2012.

Foreclosure and OREO expense decreased by \$11.4 million, or 58%, in the third quarter of 2013 compared to the same period in 2012 due primarily to a decrease in foreclosure-related expenses. Foreclosure expenses decreased by

\$8.2 million in the third quarter of 2013 compared to the same period in 2012 due to improved credit quality and the decrease in government insured pool buyout activity over the past year. OREO expense decreased \$3.3 million in the third quarter of 2013, due to stabilizing property values and declining losses incurred on OREO properties as a result. Advertising and marketing expense decreased by \$3.8 million, or 37%, in the third quarter of 2013, compared to the same period in 2012. The decrease in the third quarter of 2013 was due to the reduction in overall marketing spending. FDIC insurance premium assessment and other agency fees decreased by \$3.4 million, or 33%, in the third quarter of 2013 compared to the same period in 2012. This decrease is due to the balance sheet repositioning activities that occurred during the third quarter of 2013 including the sale of non-agency securities with high interest only concentration and the sale of \$911.1 million of fixed rate jumbo preferred ARMs. Professional fees decreased by \$3.2 million, or 31%, in the third quarter of 2013 compared to the same period in 2012 due to a decrease in consultant costs resulting from our settlement with the OCC and the resulting cessation of our foreclosure review.

Table of Contents

Nine Months Ended September 30, 2013 compared to Nine Months Ended September 30, 2012

Noninterest expense increased by \$132.5 million, or 26%, in the first nine months of 2013 compared to the same period in 2012. The increase in noninterest expense was driven by increases in salaries, commissions and employee benefits, occupancy and equipment expense, and general and administrative expenses.

Salaries, commissions and employee benefits increased by \$111.8 million, or 49%, in the first nine months of 2013, compared to the same period in 2012 due primarily to growth in our Mortgage Banking reporting segment. Mortgage Banking salaries, commissions and employee benefits increased by \$73.9 million in the first nine months of 2013, which included an increase in variable commissions of \$27.8 million. Salary and headcount increases were driven by increased mortgage lending and the expansion of our retail and consumer direct production channels. Additional growth was also due to headcount increases in our Corporate Services and Banking and Wealth Management reporting segments due to the acquisitions of warehouse finance and BPL in 2012, legal and regulatory compliance, as well as general operations growth. Headcount growth was 38%, 11%, and 18% in our Mortgage Banking, Banking and Wealth Management and Corporate Services reporting segments, respectively, as of September 30, 2013 compared to the same period in 2012.

Occupancy and equipment expense increased by \$16.4 million, or 24%, in the first nine months of 2013, compared to the same period in 2012. The increase was primarily due to increased costs associated with the expansion of our retail lending channels. Additionally, increased expenses are due to our warehouse finance and BPL acquisitions and overall expansion and growth of the business.

General and administrative expense increased by \$4.3 million, or 2%, in the first nine months of 2013, compared to the same period in 2012 primarily in consent order expenses and other general and administrative expenses, which were offset by decreases in foreclosure and OREO expenses, other credit-related expenses, and legal and professional fees.

Consent order expenses increased by \$54.0 million, or 506%, due to increases in professional fee costs associated with the review and estimated remediation payments as a result of the settlement of the consent orders with the OCC.

Foreclosure and OREO expense decreased by \$20.7 million, or 45%, in the first nine months of 2013, compared to the same period in 2012 due primarily to a decrease in foreclosure-related expenses. Foreclosure expenses decreased by \$13.8 million in the first nine months of 2013, compared to the same period in 2012 due to improved credit quality and the decrease in government insured pool buyout activity over the past year. OREO expense decreased by \$6.9 million in the first nine months of 2013, due to stabilizing property values and declining losses incurred on OREO properties as a result.

Other credit-related expenses decreased by \$15.2 million, or 66%, in the first nine months of 2013, compared to the same period in 2012 primarily due to a decrease in our repurchase reserve expenses related to our originated and serviced loans. We describe our reserves for loans subject to representations and warranties in Note 15 in our condensed consolidated financial statements and in the "Loans Subject to Representations and Warranties" section of this Quarterly Report on Form 10-Q.

Professional fees decreased by \$12.0 million, or 36%, in the first nine months of 2013, compared to the same period in 2012. The decrease was primarily associated with the decrease in consultant costs associated with the consent order remediation process as well as decreases in consulting costs company-wide.

Provision for Income Taxes and Effective Tax Rates

Provision for Income Taxes and Effective Tax Rates

	Table 6			
	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
(dollars in thousands)	2013	2012	2013	2012
Provision for income taxes	\$20,511	\$12,987	\$73,214	\$26,176
Effective tax rates	38.2	% 36.9	% 38.2	% 36.7

For the three and nine months ended September 30, 2013 and 2012, our effective income tax rate differs from the statutory federal income tax rate primarily due to state income taxes.

Segment Results

We evaluate our overall financial performance through three financial reporting segments: Banking and Wealth Management, Mortgage Banking and Corporate Services. To generate financial information by operating segment, we use an internal profitability reporting system which is based on a series of management estimates and allocations. We continually review and refine many of these estimates and allocations, many of which are subjective in nature. Any changes we make to estimates and allocations that may affect the reported results of any business segment do not affect our consolidated financial position or consolidated results of operations. Beginning in 2013, we updated our intersegment allocation of expenses for legal, human resources, and marketing expenses from the Corporate Services segment to the Banking and Wealth Management and Mortgage Banking segments, as applicable.

We use funds transfer pricing in the calculation of the respective operating segment's net interest income to measure the value of funds used in and provided by an operating segment. The difference between the interest income on earning assets and the interest expense on funding liabilities and the corresponding funds transfer pricing charge for interest income or credit for interest expense results in net interest income. We allocate risk-adjusted capital to our segments based upon the credit, liquidity, operating and interest rate risk inherent in the segment's asset and liability composition and operations. These capital allocations are determined based upon formulas that incorporate regulatory, GAAP and economic capital frameworks including risk-weighting assets, allocating noninterest expense and incorporating economic liquidity premiums for assets deemed by management to lower liquidity profiles.

Our Banking and Wealth Management segment often invests in loans originated from asset generation channels contained within our Banking and Wealth Management and Mortgage Banking segments as well as third party loan acquisitions. When intersegment acquisitions take place, we assign an estimate of the market value to the asset and record the transfer as a market purchase. In addition, intersegment cash balances are eliminated in segment reporting. The effects of these intersegment allocations and transfers are eliminated in consolidated reporting.

Table of Contents

The following table summarizes segment income and total assets for each of our segments as of and for each of the periods shown:

Foreclosure and OREO	6,354	17,463	18,216	37,803
Other general and administrative	22,206	28,192	77,476	76,681
Total noninterest expense	67,228	79,868	223,001	215,039
Income before income taxes	\$ 90,038	\$ 51,780	\$ 255,544	\$ 173,432

(1) Other interest income includes interest income from interest-bearing cash and cash equivalents and intersegment interest income.

(2) Other interest expense represents intersegment interest expense.

Third Quarter of 2013 compared to Third Quarter of 2012

Banking and Wealth Management segment earnings increased by \$38.3 million, or 74%, in the third quarter of 2013 compared to the same period in 2012 primarily due to increases in net interest income and noninterest income as well as a decrease in noninterest expense and provision for loan and lease losses.

Net interest income increased by \$11.0 million, or 10%, in the third quarter of 2013 compared to the same period in 2012 due to an increase in interest income of \$19.1 million in the third quarter of 2013 partially offset by an increase in interest expense of \$8.1 million in the third quarter of 2013. The BPL acquisition, completed in the fourth quarter of 2012, contributed \$26.2 million to interest income during the third quarter of 2013. Interest expense increased primarily due to growth in FHLB advances and deposits throughout 2012 to fund a portion of our asset growth and to take advantage of historically low fixed borrowing rates. For a detailed explanation of changes in net interest income, please refer to our volume/rate analysis in Table 3.

Provision for loan and lease losses decreased by \$2.3 million, or 66%, in the third quarter of 2013 compared to the same period in 2012 due primarily to stabilization and improving delinquency and credit performance of our loans that are collectively evaluated for impairment in both our residential and commercial portfolios. Our loan portfolio experienced net charge-offs of \$9.5 million for the three months ended September 30, 2013 compared to \$5.3 million in the same period of 2012. The continued strong credit performance resulted in an annualized net charge-off ratio of 0.30% in the third quarter of 2013 compared to 0.25% in the same period in 2012. For a detailed explanation of

changes in our allowance for loan and lease losses, please refer to "Loan and Lease Quality."

Noninterest income increased by \$12.3 million, or 60%, in the third quarter of 2013 compared to the same period in 2012. This increase is primarily due to a \$5.0 million net gain on the early extinguishment of \$770 million of our FHLB advances and a \$4.2 million gain on the sale of \$159.0 million of our available for sale securities. The BPL acquisition contributed \$2.9 million in the third quarter of 2013. Prepayment penalty income related to commercial loan servicing related to the BPL acquisition drove the noninterest income increase.

Noninterest expense decreased by \$12.6 million, or 16%, in the third quarter of 2013 compared to the same period in 2012. The decrease in the third quarter of 2013 was primarily due to a decrease in our foreclosure and OREO expenses and other general and administrative expenses partially offset by an increase in salaries, commissions, and employee benefits.

Foreclosure and OREO expense decreased by \$11.1 million, or 64%, in the third quarter of 2013 compared to the same period in 2012 primarily due to stabilizing property values and declining losses on OREO properties as a result. OREO related expenses and provisions decreased by \$1.6 million in the third quarter of 2013 compared to the same period in 2012. Additionally, foreclosure expenses decreased by \$8.1 million, or 61%, in the third quarter of 2013 compared to the same period in 2012 due to improved credit quality and home prices and the

Table of Contents

decrease in government insured pool buyout activity.

Other general and administrative expense decreased by \$6.0 million, or 21%, in the third quarter of 2013 compared to the same period in 2012. The decrease in the third quarter of 2013 was driven primarily by decreases in advertising expenses and FDIC insurance assessment, partially offset by an increase in corporate allocations. Advertising expenses decreased \$5.2 million as a result of a decrease in marketing spend during the third quarter 2013. FDIC insurance assessment decreased by \$3.9 million in the third quarter 2013 compared to the same period in 2012.

Corporate allocations increased by \$4.1 million in the third quarter of 2013 compared to the same period in 2012. The increase in corporate allocation was due primarily to the allocation of additional corporate expenses to our business segments to more closely align cost with utilization by the segments.

Salaries, commissions, and employee benefits increased by \$3.7 million, or 17%, in the third quarter of 2013 compared to the same period in 2012 due to the BPL acquisition. Total Banking and Wealth Management headcount increased by 11% as of September 30, 2013, compared to the same period in 2012.

Nine Months Ended September 30, 2013 compared to Nine Months Ended September 30, 2012

Banking and Wealth Management segment earnings increased by \$82.1 million, or 47%, in the first nine months of 2013 compared to the same period in 2012 primarily due to increases in net interest income, noninterest income and a decrease in the provision for loan and lease losses, partially offset by an increase in noninterest expense.

Net interest income increased by \$49.1 million, or 15%, in the first nine months of 2013 compared to the same period in 2012 due to an increase in interest income from acquisitions of \$83.5 million in the first nine months of 2013, partially offset by an increase in interest expense of \$34.4 million in the first nine months of 2013. The warehouse finance acquisition, completed in the second quarter of 2012, and BPL acquisition, completed in the fourth quarter of 2012, contributed \$12.7 million and \$73.1 million, respectively, to interest income during the first nine months of 2013. Interest expense increased primarily due to growth in FHLB advances and deposits throughout 2012 to fund a portion of our asset growth and to take advantage of historically low fixed borrowing rates. For a detailed explanation of changes in net interest income, please refer to our volume/rate analysis in Table 3.

Provision for loan and lease losses decreased by \$19.1 million, or 101%, in the first nine months of 2013 compared to the same period in 2012 due primarily to improving credit performance in our residential and commercial portfolios.

Our loan portfolio experienced net charge-offs of \$20.1 million for the nine months ended September 30, 2013 compared to \$22.8 million in the same period of 2012, a decrease of 12%. The improved credit performance resulted in an annualized net charge-off ratio of 0.22% in the first nine months of 2013 compared to 0.40% in the same period in 2012. For a detailed explanation of changes in our allowance for loan and lease losses, please refer to "Loan and Lease Quality."

Noninterest income increased by \$21.9 million, or 31%, in the first nine months of 2013, compared to the same period in 2012. The warehouse finance and BPL acquisitions contributed \$2.8 million and \$9.5 million, respectively, to noninterest income in the first nine months of 2013. Prepayment penalty income from commercial loan servicing related to loans serviced due to the BPL acquisition drove the noninterest income increase. Additionally, we generated \$4.0 million in the first nine months of 2013, of noninterest income related to the recovery of losses experienced on loans and servicing rights previously acquired. We recognized a \$5.0 million net gain on the early extinguishment of \$770 million of our FHLB advances and a \$4.2 million gain on the sale of \$159.0 million of our available for sale securities. Additionally, there was a \$4.9 million increase in gains on sale of loans for the first nine months of 2013. Increases were offset by a \$5.2 million decrease in lease income for the first nine months of 2013 compared to the same period of 2012, as late fees related to our deferred financing leases are included in net interest income.

Noninterest expense increased by \$8.0 million, or 4%, in the first nine months of 2013 compared to the same period in 2012. The increase was primarily due to an increase in salaries, commissions, and employee benefits and equipment and occupancy partially offset by a decrease in foreclosure and OREO expenses.

Salaries, commissions, and employee benefits increased by \$22.4 million, or 35%, in the first nine months of 2013, compared to the same period in 2012 due to the warehouse finance and BPL acquisitions. Total Banking and Wealth Management headcount increased by 11% as of September 30, 2013, compared to the same period in 2012.

Equipment and occupancy expense increased by \$4.4 million, or 12%, in the first nine months of 2013 compared to the same period in 2012 primarily due to growth within the business segment due to our warehouse finance and BPL

acquisitions. Additional growth is due to our new WorldCurrency® system and overall expansion and growth of the segment.

Foreclosure and OREO expense decreased by \$19.6 million, or 52%, in the first nine months of 2013 compared to the same period in 2012 primarily due to stabilizing property values and declining losses on OREO properties as a result. OREO related expenses and provisions decreased by \$3.0 million, or 39%, in the first nine months of 2013, compared to the same period in 2012. Additionally, foreclosure expenses decreased by \$13.0 million, or 47%, for the first nine months of 2013, compared to the same period in 2012 due to improved credit quality and home prices and the decrease in government insured pool buyout activity in 2013.

## Third Quarter of 2013 compared to Third Quarter of 2012

Mortgage Banking segment earnings decreased by \$31.1 million in the third quarter of 2013 compared to the same period in 2012 primarily due to an increase in noninterest expense partially offset by an increase in noninterest income.

Noninterest income increased by \$33.8 million, or 44%, in the third quarter of 2013 compared to the same period in 2012. The increase was driven by an increase in net loan servicing income of \$68.0 million in the third quarter of 2013 compared to the same period in 2012. Recovery (impairment) of MSR increased by \$53.4 million in the third quarter of 2013. We recognized an \$18.2 million MSR impairment charge recorded during the third quarter of 2012 and a MSR recovery of \$35.1 million of the related valuation allowance in the third quarter of 2013. Impairment during 2012 was due to a combination of a declining rate environment that resulted in higher prepayment speeds including the impact from HARP 2.0. In the third quarter of 2013, expected prepayment speeds decreased due to increased interest rates and a decline in refinance activity due to market penetration of eligible borrowers.

Additionally, loan servicing fees increased by \$7.3 million, or 16%, in the third quarter of 2013 compared to the same period in 2012. The increase in loan servicing fees is due to an increase in the UPB of loans serviced as a result of the residential MSR portfolio acquisition in the second quarter of 2013.

Gain on sale of loans decreased by \$34.9 million in the third quarter of 2013 compared to the same period in 2012 primarily due to rising interest rates for most of the period, which resulted in a decline in lending volumes combined with a larger portion of loans being retained on our balance sheet. In addition, spreads continued to widen on products such as HARP 2.0 and the non-agency market. Refinancing demand was most notably due to the HARP 2.0 and the low mortgage interest rate environment throughout the period.

Noninterest expense increased by \$65.7 million, or 92%, in the third quarter of 2013 compared to the same period in 2012 primarily due to increases in salaries, commissions, and employee benefits, consent order expenses and other

general and administrative costs.

Salaries, commissions, and employee benefits increased \$19.8 million, or 45%, in the third quarter of 2013 compared to the same period in 2012. The increase is primarily due to an increase in headcount of 38% as of September 30, 2013 compared to the same period in 2012 and an increase in variable commissions of \$6.2 million. Salary and headcount increases were driven by increased mortgage lending and the expansion of our retail and consumer direct production channels.

Consent order expenses increased by \$31.0 million due to estimated remediation payments as a result of the settlement of the consent order with the OCC during the third quarter of 2013.

Other general and administrative expenses increased by \$11.3 million, or 84%, in the third quarter of 2013 compared to the same period in 2012. This was due primarily to an increase in corporate allocations of \$7.2 million in the third quarter of 2013. Additional corporate expenses were allocated to our business segments to more closely align cost with utilization by the segments.

Nine Months Ended September 30, 2013 compared to Nine Months Ended September 30, 2012

Mortgage Banking segment earnings increased by \$15.1 million in the first nine months of 2013 compared to the same period in 2012

Table of Contents

primarily due to an increase in net interest income and noninterest income partially offset by an increase in noninterest expense.

Net interest income increased by \$5.6 million, or 17%, in the first nine months of 2013 compared to the same period in 2012. The increase was driven by an increased volume in the amount of loans being carried in our loans held for sale account compared to the same period in 2012. For a detailed explanation of changes in net interest income, please refer to our volume/rate analysis in Table 3.

Noninterest income increased by \$156.7 million, or 91% in the first nine months of 2013 compared to the same period in 2012. The increase was driven by an increase in net loan servicing income of \$153.1 million in the first nine months of 2013 compared to the same period in 2012. This increase is primarily due to a decrease in amortization and impairment of MSR. Recovery (impairment) of MSR decreased by \$143.8 million in the first nine months of 2013, due primarily to an impairment charge of \$63.5 million recorded in the first nine months of 2012 and recoveries of the related valuation allowance recorded of \$80.3 million in the first nine months of 2013. Impairment during 2012 was due to a combination of a declining rate environment that resulted in higher prepayment speeds including the impact from HARP 2.0. In the first nine months of 2013, expected prepayment speeds have decreased due to increased interest rates and a decline in refinance activity due to market penetration of eligible borrowers.

Noninterest expense increased by \$147.2 million, or 70%, in the first nine months of 2013, compared to the same period in 2012 primarily due to increases in salaries, commissions, and employee benefits, equipment and occupancy expense, consent order expenses and other general and administrative costs. These increases were partially offset by decreases in other credit-related expenses due to a decrease in our repurchase reserve expenses.

Salaries, commissions, and employee benefits increased \$73.9 million, or 68%, in the first nine months of 2013 compared to the same period in 2012. The increase is primarily due to an increase in headcount of 38% as of September 30, 2013 compared to the same period in 2012. The increase in headcount is due to the expansion of our retail and consumer direct production channels and our servicing default services. In addition, commissions increased by \$23.5 million in the first nine months of 2013 compared to the same period in 2012.

Equipment and occupancy expense increased by \$10.6 million, or 71%, in the first nine months of 2013 compared to the same period in 2012 primarily due to an increase in headcount of 38% as of September 30, 2013 compared to the same period in 2012. In addition, equipment and occupancy expense increased by \$6.7 million due to the expansion of our retail and consumer direct lending channels.

Consent order expenses increased by \$50.8 million due to estimated remediation payments as a result of the settlement of the consent order with the OCC during the third quarter of 2013.

Other general and administrative expenses increased by \$26.1 million, or 60%, in the first nine months of 2013 compared to the same period in 2012. This was due primarily to an increase in corporate allocations of \$21.4 million in the first nine months of 2013. Additional increases are associated with operational growth within the segment including a \$3.4 million increase in advertising expenses.

Other credit-related expenses decreased by \$14.4 million, or 73%, in the first nine months of 2013, compared to the same period in 2012. This decrease was due to the decrease in repurchase reserve expenses related to our originated and serviced loans. We describe our reserves related to loans subject to representations and warranties in Note 15 in our condensed consolidated financial statements and in our Analysis of Statements of Condition in "Loans Subject to Representations and Warranties."

Third Quarter of 2013 compared to Third Quarter of 2012

Corporate Services segment loss decreased by \$11.4 million, or 33%, in the third quarter of 2013 compared to the same period in 2012. Noninterest expense decreased by \$11.3 million, or 35%, in the third quarter of 2013 compared to the same period in 2012, due to a decrease in general operating costs and an increase in intersegment allocations partially offset by an increase in salaries, commissions, and employee benefits.

Other general and administrative costs decreased by \$6.4 million, or 36%, in the third quarter of 2013 compared to the same period in 2012 partially due to lower advertising expenses as a result of a decrease in marketing spend during the third quarter of 2013. Legal and professional fees also decreased by \$2.3 million, or 40%, in the third quarter of 2013 compared to the same period in 2012, due primarily to decreases in costs associated with strategic business acquisitions and a decrease in consulting fees. Corporate allocations increased by \$7.3 million in the third quarter of 2013 compared to the same period in 2012. Additional corporate expenses were allocated to our business segments to more closely align cost with utilization by the segments.

Salaries, commissions and employee benefits increased by \$2.2 million, or 11%, due to an increase in headcount of 18% as of September 30, 2013 compared to the same period in 2012. The increase is due to continued business development and the need for additional

Table of Contents

support services due to increased governance and regulatory requirements.

Nine Months Ended September 30, 2013 compared to Nine Months Ended September 30, 2012

Corporate Services segment loss decreased by \$23.0 million, or 24%, in the first nine months of 2013, compared to the same period in 2012. Noninterest expense decreased by \$22.7 million, or 24%, in the first nine months of 2013 compared to the same period in 2012, due to a decrease in general operating costs and an increase in intersegment allocations partially offset by increases in salaries, commissions, and employee benefits and occupancy and equipment.

Other general and administrative costs decreased by \$7.3 million, or 15%, in the first nine months of 2013 compared to the same period in 2012 partially due to decreased operating expenses as a result of the settlement of the amounts in escrow related to certain representations made in a previous divestiture during the first quarter of 2013. Professional fees decreased by \$8.4 million, or 42%, in the first nine months of 2013 compared to the same period in 2012, due primarily to decreases in costs associated with strategic business acquisitions as well as costs associated with our initial public offering (IPO) that occurred in 2012. The decreases are offset by increases in costs associated with our risk management functions which have increased to fulfill compliance requirements associated with becoming a public company. Corporate allocations increased by \$32.4 million in the first nine months of 2013, compared to the same period in 2012. Additional corporate expenses were allocated to our business segments to more closely align cost with utilization by the segments.

Salaries, commissions and employee benefits increased \$15.5 million, or 29%, primarily due to headcount increases of 18% in the nine months ended September 30, 2013 compared to the same period in 2012. The growth is due to continued business development and the need for additional support services due to increased governance and regulatory requirements.

Analysis of Statements of Condition

Investment Securities

Our overall investment strategy focuses on acquiring investment-grade senior mortgage-backed securities backed by seasoned loans with high credit quality and credit enhancements to generate earnings in the form of interest and dividends while offering liquidity, credit and interest rate risk management opportunities to support our asset and liability management strategy. Within our investment strategy, we also utilize highly rated structured products including Re-securitized Real Estate Mortgage Investment Conduits (Re-REMICs) for the added protection from credit losses and ratings deteriorations that accompany alternative securities. All securities investments satisfy our internal guidelines for credit profile and have a relatively short duration which helps mitigate interest rate risk arising from historically low market interest rates.

Available for sale securities are used as part of our asset and liability management strategy and may be sold in response to, or in anticipation of, factors such as changes in market conditions and interest rates, changes in security prepayment rates, liquidity considerations and regulatory capital requirements.

Table of Contents

The following tables show the amortized cost and fair value of investment securities as of September 30, 2013 and December 31, 2012:

Investment Securities	Table 11

**Residential — Agency**

At September 30, 2013, our residential agency portfolio consisted of both residential agency CMO securities and residential agency MBS securities. Investments in residential agency CMO securities totaled \$44.8 million, or 3%, of our investment securities portfolio. Our residential agency MBS portfolio totaled \$59.8 million, or 5%, of our investment securities portfolio. The residential agency MBS available for sale securities are included in Other in the table above. Our residential agency portfolio is secured by seasoned first-lien fixed and adjustable rate residential mortgage loans insured by government sponsored entities (GSEs).

Our residential agency CMO securities decreased by \$61.7 million, or 58%, to \$44.8 million at September 30, 2013 from \$106.4 million at December 31, 2012 due to principal payments received and the amortization of premiums and discounts. Our residential agency MBS securities increased by \$27.6 million, or 86%, to \$59.8 million at September 30, 2013, from \$32.1 million at December 31, 2012 primarily due to purchases of additional securities partially offset by principal payments received and the amortization of premiums and discounts.

**Residential — Nonagency**

At September 30, 2013, our residential nonagency portfolio consisted entirely of investments in residential nonagency CMO securities. Investments in residential nonagency CMO securities totaled \$1.2 billion, or 91%, of our investment securities portfolio. Our residential nonagency CMO securities decreased by \$411.1 million, or 26%, to \$1.2 billion, at September 30, 2013, from \$1.6 billion at December 31, 2012 primarily due to principal payments received, the amortization of premiums and discounts and reductions in the fair value of the portfolio driven by macroeconomic factors. Although the overall credit rating of the portfolio remained static, unrealized gains on the portfolio declined

\$25.8 million, due to a depressed bond market in which concerns regarding the timing of the Federal Reserve tapering of its economic stimulus and climbing interest rates resulted in overall bond price declines.

Our residential nonagency CMO securities are secured by seasoned first-lien fixed and adjustable rate residential mortgage loans backed by loan originators other than GSEs. Mortgage collateral is structured into a series of classes known as tranches, each of which contains a different maturity profile and pay-down priority in order to suit investor demands for duration, yield, credit risk and prepayment volatility. We have primarily invested in CMO securities rated in the highest category assigned by a nationally recognized statistical ratings organization. Many of these securities are Re-REMICs, which adds credit subordination to provide protection against future losses and rating downgrades. Re-REMICs constituted \$0.8 billion, or 66%, of our residential nonagency CMO investment securities at September 30, 2013.

We have internal guidelines for the credit quality and duration of our residential nonagency CMO securities portfolio and monitor these on a regular basis. At September 30, 2013, the portfolio carried a weighted average Fair Isaac Corporation, or FICO, score of 730, an amortized loan-to-value ratio, or LTV, of 61%, and were seasoned 106 months. This portfolio includes protection against credit losses through subordination in the securities structures and borrower equity.

Table of Contents

During the three and nine months ended September 30, 2013 we sold residential nonagency CMO securities with a book value of \$154.8 million and recorded net securities gains totaling \$4.2 million. During the first nine months of 2012, there were no sales of residential agency or residential nonagency CMO securities.

## Loans Held for Sale

The following table presents the balance of each major category in our loans held for sale portfolio at September 30, 2013 and December 31, 2012:

Loans Held for Sale (dollars in thousands)	Table 12A	
	September 30, 2013	December 31, 2012
Mortgage warehouse (carried at fair value)	\$ 1,020,410	\$ 1,452,236
Government insured pool buyouts	1,866	96,635
Other	10,995	539,175
Other (carried at fair value)	26,676	—
	\$ 1,059,947	\$ 2,088,046

## Mortgage Warehouse

At September 30, 2013, our fair value, agency mortgage warehouse loans accounted for at fair value totaled \$1.0 billion, or 96%, of our total loans held for sale portfolio. Our mortgage warehouse loans are comprised of agency deliverable products that we typically sell within three months subsequent to origination. We hedge our mortgage warehouse portfolio with forward sales commitments designed to protect against potential changes in fair value. Given the short duration that these loans are present on our balance sheet, we have elected fair value accounting on this portfolio of loans due to the burden of complying with the requirements of hedge accounting. Mortgage warehouse loans accounted for at fair value decreased by \$431.8 million, or 30%, from December 31, 2012 due to a decrease in the amount of agency deliverable loans originated in the quarter compared to the fourth quarter of 2012. The following table represents the length of time the mortgage warehouse loans have been classified as held for sale:

Mortgage Warehouse (dollars in thousands)	Table 12B	
	September 30, 2013	December 31, 2012
30 days or less	\$ 578,045	\$ 898,908
31- 90 days	366,270	486,419
Greater than 90 days	76,095	66,909
	\$ 1,020,410	\$ 1,452,236

Subsequent to September 30, 2013, we sold \$20.9 million of the mortgage warehouse loans classified as held for sale that were held for more than 90 days. The remaining \$1,015.3 million of warehouse loans were made up of conforming or government product and were current at September 30, 2013.

## Government Insured

At September 30, 2013, our government insured pool buyout loans totaled \$1.9 million, or less than 1%, of our total loans held for sale portfolio. During the nine months ended September 30, 2013, we transferred \$270.1 million of conforming mortgages to GNMA in exchange for mortgage-backed securities. At September 30, 2013, there were no GNMA securities that were transferred and included in the loans held for sale balance above for which we retained effective control of the assets. In addition to the ability to work-out these assets and securitize into GNMA pools, we have acquired a significant portion of these assets at a discount to UPB. The UPB and a portion of the interest is government insured which provides an attractive overall return on the underlying delinquent assets.

## Other Loans Held for Sale

Our other loans held for sale totaled \$37.7 million, or 4%, of our total loans held for sale portfolio. Other loans decreased by \$501.5 million from \$539.2 million at December 31, 2012. During the three months ended September 30, 2013, we sold \$911.1 million of our loans held for sale compared to \$178.2 million of our loans held for sale during the three months ended December 31, 2012. We have a history of being able to originate high credit quality loans that are attractive to other market participants depending on demand in the secondary markets for these loans.

During the three and nine months ended September 30, 2013, we transferred \$74.0 million and \$819.3 million in residential mortgage loans from loans held for sale to loans held for investment at lower of cost or market. A majority of these loans were originated preferred jumbo ARM residential mortgages which were intended to be sold in the secondary market. As a result of changing economic conditions and our capacity and desire to hold these loans on the balance sheet, we intend to hold these loans for the foreseeable future and transferred these loans to the held for investment portfolio.

Table of Contents

## Loans and Leases Held for Investment

The following table presents the balance of each major category in our loan and lease held for investment portfolio at September 30, 2013 and at December 31, 2012:

Loans and Leases Held for Investment	Table 13	
(dollars in thousands)	September 30, 2013	December 31, 2012
Residential mortgages:		
Residential	\$4,623,219	\$3,949,284
Government insured pool buyouts	2,075,395	2,759,464
Commercial and commercial real estate	4,608,487	4,771,768
Lease financing receivables	1,092,866	836,935
Home equity lines	156,977	179,600
Consumer and credit card	6,023	8,038
Total loans and leases, net of discounts	12,562,967	12,505,089
Allowance for loan and lease losses	(66,991 )	(82,102 )
Total loans and leases, net	\$12,495,976	\$12,422,987
The balances presented above include:		
Net purchase loan and lease discounts	\$120,321	\$164,132
Net deferred loan and lease origination costs	45,315	25,275

## Residential Mortgage Loans

At September 30, 2013, our residential mortgage loans totaled \$4.6 billion, or 37%, of our total held for investment loan and lease portfolio. We primarily offer our customers residential closed-end mortgage loans typically secured by first liens on one-to-four family residential properties. Additionally, we invest in government-insured GNMA pool buyouts purchased from GNMA pool securities and other loans secured by residential real estate.

Residential mortgage loans increased by \$673.9 million, or 17%, to \$4.6 billion at September 30, 2013 from \$3.9 billion at December 31, 2012. The increase was due primarily to the transfer of loans from held for sale to held for investment as disclosed in Note 5 and retained originations of \$727.3 million partially offset by paydowns and payoffs of existing loans.

## Government Insured Buyouts

At September 30, 2013, our government insured buyout loan portfolio totaled \$2.1 billion, or 17%, of our total loans held for investment portfolio. Government insured pool buyouts decreased by \$684.1 million, or 25%, from \$2.8 billion at December 31, 2012. The decrease was primarily the result of \$456.9 million of loans transferred from loans held for investment to loans held for sale and \$494.4 million of delinquent loans reaching foreclosure partially offset by mortgage pool buyout purchases of \$411.6 million with the remaining decline the product of paydowns and payoffs of existing loans. We continue to acquire government insured pool buyouts for our portfolio. However, the pace of our acquisition activity through the nine months ended September 30, 2013 has been offset entirely by subsequent securitizations through GNMA as well as transfers to foreclosure of delinquent loans.

We have a history of servicing Federal Housing Administration, or FHA, loans. As a servicer, the buyout opportunity is the right to purchase above market rate, government insured loans at par (i.e., the amount that has to be passed through to the GNMA security holder when repurchased). For banks like us, with cost effective sources of short term capital, this strategy represents a very attractive return with limited additional investment risk.

Each loan in a GNMA pool is insured or guaranteed by one of several federal government agencies, including the FHA, Department of Veterans' Affairs or the Department of Agriculture's Rural Housing Service. The loans must at all times comply with the requirements for maintaining such insurance or guarantee. Prior to our acquisition of these loans, we perform due diligence to ensure a valid guarantee is in place; therefore we believe that no principal is at risk. Duration is a potential risk of holding these loans and exposes us to interest rate risk and funding mismatch. In most cases, acquired loans or loans purchased out of our servicing assets are greater than 89 days past due upon purchase. Loans that go through foreclosure have an expected duration of one to two years, depending on the state's servicing timelines. Bankruptcy proceedings and loss mitigation requirements could extend the duration of these loans.

Extensions for these reasons do not impact the insurance or guarantee and are modeled into the acquisition price. Loans can re-perform on their own or through loss mitigation and/or modification. Most loans are 20 to 30 year fixed rate instruments. Re-performing loans earn a higher yield as they can earn an above market note rate rather than a government guaranteed reimbursement rate. In order to mitigate the duration risk on re-performing loans, we have the ability to securitize and sell those loans into the secondary market.

Operational capacity poses a lesser risk to the claim through missed servicing milestones. Servicing operations must comply with the government agencies' servicing requirements in order to avoid interest curtailments (principal is not at risk). For acquired pool buyouts, we minimize operational risk by purchasing loans early in the default cycle to obtain control of the files before processing errors jeopardize claims.

#### Commercial and Commercial Real Estate Loans

At September 30, 2013, our commercial and commercial real estate loans, which include owner-occupied commercial real estate, commercial investment properties, asset-backed commercial and small business commercial loans, totaled \$4.6 billion, or 37%, of our total held for investment loan and lease portfolio.

Table of Contents

Commercial and commercial real estate loans decreased by \$163.3 million, or 3%, to \$4.6 billion at September 30, 2013 from \$4.8 billion at December 31, 2012. The decrease was primarily the result of reductions in utilization by existing customers on lines of credit of \$414.3 million and paydowns of \$477.8 million partially offset by originations of \$757.9 million with the remaining decline the product of charge-offs and transfers of properties into other real estate owned. The exhibited decline in utilization by existing customers was driven largely by the warehouse finance line of business which is impacted negatively by the rising interest rate environment and resulting decline in demand for the mortgages funded by draws on these lines by our borrowers.

**Lease Financing Receivables**

Lease financing receivables increased by \$255.9 million, or 31%, to \$1,092.9 million, or 9%, of our total held for investment loan and lease portfolio at September 30, 2013 from \$836.9 million at December 31, 2012. The increase was the result of lease originations of \$514.8 million, earned income of \$45.9 million and purchase accounting discount adjustments of \$14.7 million partially offset by paydowns of existing leases of \$301.7 million, amortization of deferred origination costs of \$8.0 million, charge-offs of \$2.8 million, and lease expirations and disposals. Our leases generally consist of short-term and medium-term leases and loans secured by essential use office product, healthcare, industrial and technology equipment to small and mid-size lessees and borrowers. All of our lease financing receivables were either purchased as a part of the Tygris acquisition or originated out of the operations of Tygris, which was re-branded ECF.

**Home Equity Lines**

At September 30, 2013, our home equity lines totaled \$157.0 million, or 1%, of our total held for investment loan and lease portfolio. We offer home equity closed-end loans and revolving lines of credit typically secured by junior or senior liens on one-to-four family residential properties. Home equity lines decreased by \$22.6 million, or 13%, to \$157.0 million at September 30, 2013 from \$179.6 million at December 31, 2012, due to paydowns on our existing lines of credit.

**Consumer and Credit Card Loans**

At September 30, 2013, consumer and credit card loans, in the aggregate, totaled \$6.0 million, or less than 1% of our total held for investment portfolio. These loans include direct personal loans, credit card loans and lines of credit, automobile and other loans to our customers which are generally secured by personal property. Lines of credit are generally floating rate loans that are unsecured or secured by personal property.

**Mortgage Servicing Rights**

The following table presents the change in our MSR portfolio for the three and nine months ended September 30, 2013 and 2012:

Change in Mortgage Servicing Rights	Table 14			
	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2013	2012	2013	2012
Balance, beginning of period	\$462,718	\$415,962	\$375,859	\$489,496
Originated servicing rights capitalized upon sale of loans	33,025	21,034	84,018	58,061
Acquired servicing rights	1,633	—	65,188	—
Amortization	(30,437	) (36,292	) (101,461	) (99,773
Decrease (increase) in valuation allowance	35,132	(18,229	) 80,259	(63,508
Other	(577	) (702	) (2,369	) (2,503
Balance, end of period	\$501,494	\$381,773	\$501,494	\$381,773
Valuation allowance:				
Balance, beginning of period	\$57,836	\$84,734	\$102,963	\$39,455
Increase in valuation allowance	—	21,735	—	67,014
Recoveries	(35,132	) (3,506	) (80,259	) (3,506
Balance, end of period	\$22,704	\$102,963	\$22,704	\$102,963

We carry MSR at amortized cost net of any required valuation allowance. We amortize MSR in proportion to and over the period of estimated net servicing income and evaluate MSR quarterly for impairment.

Originated servicing rights increased by \$12.0 million, or 57%, in the third quarter of 2013 compared to the same period in 2012, and by \$26.0 million, or 45%, during the nine months ended September 30, 2013 compared to the same period in 2012. The increase was primarily due to increased mortgage lending volume of \$0.2 billion and \$2.1 billion for the three and nine months ended September 30, 2013 compared to the same periods in 2012. Values have increased as a result of increased interest rates extending the expected duration of the cash flows of the newly originated servicing rights.

Acquired servicing rights increased by \$65.2 million for the nine months ended September 30, 2013 due to the purchase of servicing rights of Fannie Mae residential servicing assets on April 1, 2013. The acquired servicing rights have been included in the residential class of MSR. At July 1, 2013, the transfer date, there were 86,324 loans with a weighted average interest rate of 5.1%. We will earn a weighted average servicing fee of 27 basis points on the acquired UPB allowing us to generate additional servicing income by utilizing our already existing servicing platform.

Amortization expense decreased by \$5.9 million, or 16%, during the three months ended September 30, 2013 compared to the same period in 2012. The decrease in amortization expense was due to lower refinancing activity resulting in lower prepayment speeds compared to the same period in 2012. Amortization expense increased by \$1.7 million, or 2%, during the nine months ended September 30, 2013, compared to the same period in 2012. The increase in amortization expense included additional amortization related to the acquired servicing rights offset

Table of Contents

by lower refinancing activity and slower prepayment speeds compared to the same period in 2012. Annualized amortization rates as of September 30, 2013 and 2012 approximated 22.4% and 29.5%, respectively.

A decrease in actual prepayment speeds as compared to previously expected speeds was the primary driver for the recovery of the MSR valuation allowance during the three and nine months ended September 30, 2013 compared to the same periods in 2012. At September 30, 2013, we estimate that approximately 22.1% of our portfolio was eligible to refinance under the HARP program. As such, near term annualized prepayment speeds were estimated at 16.3% at September 30, 2013. At September 30, 2012, the impact of HARP 2.0 and a further decline in interest rates caused our prepayment speeds to exceed our expectations and resulted in an impairment of \$21.7 million and \$67.0 million for the three and nine months ended September 30, 2012, respectively.

**Other Assets**

The following table sets forth other assets by category as of September 30, 2013 and December 31, 2012:

Other Assets	Table 15	
(dollars in thousands)	September 30, 2013	December 31, 2012
Foreclosure claims receivable, net of allowance of \$13,579 and \$11,721, respectively	\$210,802	\$196,952
Servicing advances, net of allowance of \$9,372 and \$11,518, respectively	197,865	125,118
Accrued interest receivable	72,691	82,965
Other real estate owned (OREO), net of allowance of \$15,427 and \$16,051, respectively	53,348	55,277
Margin receivable, net	50,960	40,260
Corporate advances, net	67,372	47,778
Goodwill	46,859	46,859
Fair value of derivatives, net	34,468	33,261
Prepaid assets	15,081	8,841
Intangible assets, net	6,340	7,921
Other	95,463	57,833
	\$851,249	\$703,065

Other assets increased by \$148.2 million, or 21%, to \$851.2 million at September 30, 2013 from \$703.1 million at December 31, 2012. The increase was driven primarily by an increase in foreclosure claims receivable, servicing advances, margin receivable, corporate advances and the other assets category.

Foreclosure claims receivable increased by \$13.9 million, or 7%, at September 30, 2013 compared to December 31, 2012. This increase is primarily due to growth in the amount of loans that have been transferred to foreclosure, but not conveyed back to the government agencies as a result of loan acquisitions during 2013.

Servicing advances increased \$72.7 million or 58%, from December 31, 2012 to September 30, 2013. The increase was primarily attributable to an increase in servicing escrow advances and the MSR acquisition during the second quarter of 2013.

Margin receivable increased by \$10.7 million, or 27%, during the nine months ended September 30, 2013, compared to December 31, 2012. The increase was primarily attributable to an increase in collateral posted for certain derivative trading activity related to hedging of our pipeline that is not subject to a master netting arrangement. Our forward sales commitments were in loss positions and as a result we were required to pledge more collateral. See Note 13 in our condensed consolidated financial statements for more information related to our netting and cash collateral adjustments.

Corporate advances increased by \$19.6 million, or 41%, at September 30, 2013 compared to December 31, 2012 due to additional advances related to the MSR acquisition that transferred in July 2013.

Other assets category increased by \$37.6 million, or 65%, from December 31, 2012 to September 30, 2013 due to an increase in current income taxes receivable of \$38.2 million. This increase is related to an overpayment in estimated payments as a result of lower than projected income for the period.

Deferred Tax Asset

Our net deferred tax asset decreased by \$78.6 million to \$92.3 million at September 30, 2013, from \$170.9 million at December 31, 2012, primarily due to changes in other comprehensive income related to interest rate swaps and the recovery of MSR impairment during the period.

**Accumulated Other Comprehensive Income**

Accumulated other comprehensive income increased by \$29.9 million to a loss of \$56.9 million at September 30, 2013, from a loss of \$86.8 million at December 31, 2012, primarily due to the reclassifications of unrealized losses during the period and a reduction in net unrealized losses as a result of changes in fair value related to our interest rate swaps partially offset by an increase in net unrealized losses as a result of changes in the fair value of our available for sale securities. We reclassified \$31.0 million in pretax unrealized losses to other income related to the extinguishment of \$770.0 million in principal of our FHLB advances.

Table of Contents

## Loan and Lease Quality

We use a comprehensive methodology to monitor credit quality and prudently manage credit concentration within our portfolio of loans and leases. Our underwriting policies and practices govern the risk profile, credit and geographic concentration of our loan and lease portfolios. We also have a comprehensive methodology to monitor these credit quality standards, including a risk classification system that identifies potential problem loans based on risk characteristics by loan type as well as the early identification of deterioration at the individual loan level. In addition to our ALLL, we have additional protections against potential credit losses, including credit indemnification and similar support agreements with the FDIC and other parties, purchase discounts on acquired loans and leases and other credit-related reserves, such as those on unfunded commitments.

## Discounts on Acquired Loans and Lease Financing Receivables

For ACI loans accounted for under Accounting Standards Codification (ASC) 310-30, we periodically reassess cash flow expectations at a pool or loan level. In the case of improving cash flow expectations for a particular loan or pool of loans, we reclassify an amount of non-accretable difference as accretable yield, thus increasing the prospective yield of the pool. In the case of deteriorating cash flow expectations, we record a provision for loan and lease losses following the allowance for loan loss framework. For more information on ACI loans accounted for under ASC 310-30, see Note 6 in our condensed consolidated financial statements.

The following table presents a bridge from UPB, or contractual net investment, to carrying value for ACI loans accounted for under ASC 310-30 at September 30, 2013 and December 31, 2012:

## Carrying Value of ACI Loans

	Residential		Commercial and Commercial Real Estate	Table 16 Total	
(dollars in thousands)					
Under ASC 310-30					
September 30, 2013					
UPB or contractual net investment	\$793,009		\$427,667		\$1,220,676
Plus: contractual interest due or unearned income	668,871		204,925		873,796
Contractual cash flows due	1,461,880		632,592		2,094,472
Less: nonaccretable difference	587,589		100,980		688,569
Less: Allowance for loan losses	5,216		11,344		16,560
Expected cash flows	869,075		520,268		1,389,343
Less: accretable yield	119,385		109,982		229,367
Carrying value	\$749,690		\$410,286		\$1,159,976
Carrying value as a percentage of UPB or contractual net investment	95	%	96	%	95 %
December 31, 2012					
UPB or contractual net investment	\$906,421		\$527,472		\$1,433,893
Plus: contractual interest due or unearned income	739,447		228,509		967,956
Contractual cash flows due	1,645,868		755,981		2,401,849
Less: nonaccretable difference	666,039		144,713		810,752
Less: Allowance for loan losses	5,175		16,789		21,964
Expected cash flows	974,654		594,479		1,569,133
Less: accretable yield	114,217		106,191		220,408
Carrying value	\$860,437		\$488,288		\$1,348,725
Carrying value as a percentage of UPB or contractual net investment	95	%	93	%	94 %

In our residential ACI portfolio, no significant impairment was recognized for the nine months ended September 30, 2013. Within this portfolio, we also reclassified \$27.2 million from nonaccretable difference to accretable yield due to increases in cash flow expectations on our government insured pool buyouts.

In our commercial and commercial real estate ACI portfolio, no significant impairment was recognized for the nine months ended September 30, 2013, while charge-offs against the allowance for loan loss over the same period totaled

\$5.4 million. Within this portfolio, we reclassified \$23.6 million from nonaccretable difference to accretable yield due to increases in cash flow expectations driven by reduced probability of default on the commercial real estate portfolio acquired from BPL in 2012.

Table of Contents

For non-ACI loans and lease financing receivables accounted for under ASC 310-20, we periodically monitor the accretable purchase discount and recognize an allowance for loan and lease loss if the discount is not sufficient to absorb incurred losses. The following table presents a bridge from UPB, or contractual net investment, to carrying value for non-ACI loans and lease financing receivables accounted for under ASC 310-20 at September 30, 2013 and December 31, 2012:

Recorded Investment of Non-ACI Loans and Leases						Table 17
(dollars in thousands)	Residential	Commercial and Commercial Real Estate	Lease Financing Receivables	Other	Total	
Under ASC 310-20						
September 30, 2013						
UPB or contractual net investment	\$2,191,891	\$1,972,031	\$39,647	\$25,975	\$4,229,544	
Less: net purchase discount (premium)	65,495	(19,517 )	6,364	11,709	64,051	
Recorded investment	\$2,126,396	\$1,991,548	\$33,283	\$14,266	\$4,165,493	
Recorded investment as a percentage of UPB or contractual net investment	97	% 101	% 84	% 55	% 98	%
December 31, 2012						
UPB or contractual net investment	\$3,069,948	\$2,153,674	93,042	\$31,838	\$5,348,502	
Less: net purchase discount (premium)	89,595	(22,859 )	17,841	12,468	97,045	
Recorded investment	\$2,980,353	\$2,176,533	75,201	\$19,370	\$5,251,457	
Recorded investment as a percentage of UPB or contractual net investment	97	% 101	% 81	% 61	% 98	%

Our residential non-ACI portfolio consists of loans we have strategically acquired over the years. During the three and nine months ended September 30, 2013, we recognized \$2.8 million and \$5.2 million, respectively, in related premiums as well as \$10.5 million and \$28.9 million, respectively, in discount accretion through interest income.

Our commercial non-ACI portfolio consists of loans acquired from Bank of Florida and BPL. Loans acquired from Bank of Florida consist of revolving lines of credit that do not fall within the scope of ASC 310-30 due to their revolving nature. Loans acquired from BPL consist of commercial real estate loans to small and mid-size business clients that did not have evidence of credit deterioration since origination at the time we purchased these loans. During the three and nine months ended September 30, 2013, we recognized \$1.5 million and \$4.4 million, respectively, in related premiums as well as \$1.0 million and \$1.1 million, respectively, in discount accretion through interest income. Our lease financing receivables non-ACI portfolio consists of leases acquired from Tygris that did not have evidence of credit deterioration since origination when we purchased these leases. The purchase discount related to the this portfolio is considered to be the additional discount when comparing our carrying value to the contractual net investment of the leases as recorded by Tygris prior to our acquisition and represents additional yield in addition to the normal yield associated with these leases. During the three and nine months ended September 30, 2013, we recognized \$2.5 million and \$11.3 million, respectively, in discount accretion through interest income.

Our other non-ACI portfolio consists of home equity lines and consumer loans acquired from Bank of Florida that either do not fall within the scope of ASC 310-30 due to their revolving nature or that did not have evidence of credit deterioration since origination at the time we purchased these loans. During the three and nine months ended September 30, 2013 there was no significant change in the amount of purchase discount.

**Problem Loans and Leases**

Loans and leases are placed on nonaccrual status when, in the judgment of management, the probability of collection of interest is deemed to be insufficient to warrant further accrual, which is generally when the loan becomes 90 days past due, with the exception of government insured loans and ACI loans. When a loan is placed on nonaccrual status, previously accrued but unpaid interest is reversed from interest income and interest income is recorded as collected. For purposes of disclosure in the table below, we exclude government insured pool buyout loans from our definition of non-performing loans and leases. We also exclude ACI loans from non-performing status because we expect to

fully collect their new carrying value which reflects significant purchase discounts. If our expectation of reasonably estimable future cash flows deteriorates, these loans may be classified as nonaccrual loans and interest income will not be recognized until the timing and amount of future cash flows can be reasonably estimated.

Real estate we acquired as a result of foreclosure or by deed-in-lieu of foreclosure is classified as OREO until sold, and is carried at the balance of the loan at the time of foreclosure or at estimated fair value less estimated costs to sell, whichever is less.

In cases where a borrower experiences financial difficulties and we make certain concessionary modifications to contractual terms, the loan is classified as a TDR. Loans restructured with terms and at a rate equal to or greater than that of a new loan with comparable risk at the time the contract is modified are not considered to be impaired loans in calendar years subsequent to the restructuring.

Table of Contents

The following table sets forth the composition of our non-performing assets (NPA), including nonaccrual, accruing loans and leases past due 90 or more days, TDR and OREO, as of the dates indicated. The balances of NPA reflect the net investment in such assets including deductions for purchase discounts.

Non-Performing Assets <sup>(1)</sup>	Table 18		
(dollars in thousands)	September 30, 2013	December 31, 2012	
Nonaccrual loans and leases:			
Residential mortgages	\$60,066	\$73,752	
Commercial and commercial real estate	76,662	76,289	
Lease financing receivables	4,171	2,010	
Home equity lines	4,164	4,246	
Consumer and credit card	15	332	
Total nonaccrual loans and leases	145,078	156,629	
Accruing loans 90 days or more past due	—	—	
Total non-performing loans (NPL)	145,078	156,629	
Other real estate owned	32,108	40,492	
Total non-performing assets	177,186	197,121	
Troubled debt restructurings less than 90 days past due	79,664	90,094	
Total NPA and TDR <sup>(1)</sup>	\$256,850	\$287,215	
Total NPA and TDR	\$256,850	\$287,215	
Government insured 90 days or more past due still accruing	1,147,795	1,729,877	
Loans and leases accounted for under ASC 310-30:			
90 days or more past due	45,104	79,984	
OREO	21,240	16,528	
Total regulatory NPA and TDR	\$1,470,989	\$2,113,604	
Adjusted credit quality ratios: <sup>(1)</sup>			
NPL to total loans	1.07	% 1.08	%
NPA to total assets	1.01	% 1.08	%
NPA and TDR to total assets	1.46	% 1.57	%
Credit quality ratios including government insured loans and loans and leases accounted for under ASC 310-30 :			
NPL to total loans	9.87	% 13.55	%
NPA to total assets	7.90	% 11.09	%
NPA and TDR to total assets	8.35	% 11.59	%

We define NPA as nonaccrual loans, accruing loans past due 90 days or more and foreclosed property. Our NPA calculation excludes government insured pool buyout loans for which payment is insured by the government. We <sup>(1)</sup> also exclude ACI loans and foreclosed property accounted for under ASC 310-30 because we expect to fully collect the carrying value of such loans and foreclosed property.

Total NPA and TDR decreased by \$30.4 million, or 11%, to \$256.9 million at September 30, 2013 from \$287.2 million at December 31, 2012. This decrease was primarily attributable to a \$11.6 million decrease in nonaccrual loans and leases, a \$8.4 million decrease in OREO and a \$10.4 million decrease in TDRs less than 90 days past due.

Total regulatory NPA and TDR decreased by \$642.6 million, or 30%, to \$1.5 billion at September 30, 2013 from \$2.1 billion at December 31, 2012. This decrease was primarily attributable to a \$582.1 million decrease in governmental insured 90 days or more past due still accruing, a \$34.9 million decrease in 90 days or more past due loans and leases accounted for under ASC 310-30 and a \$11.6 million decrease in nonaccrual loans and leases.

We use an asset risk classification system in compliance with guidelines established by the Office of the Comptroller of Currency (OCC) Handbook as part of our efforts to monitor asset quality. In connection with examinations of insured institutions, examiners have the authority to identify problem assets and, if appropriate, classify them. There

are three classifications for problem assets: “substandard,” “doubtful,” and “loss.” Substandard assets have one or more defined weaknesses and are characterized by the distinct possibility that the insured institution will sustain some loss if the deficiencies are not corrected. Doubtful assets have the weaknesses of substandard assets with the additional characteristic that the weaknesses make collection or liquidation in full questionable and there is a high probability of loss based on currently existing facts, conditions and values. An asset classified as loss is considered uncollectible and of such little value that continuance as an asset is not warranted. Commercial loans with adverse classifications are reviewed by the commercial credit committee of our executive credit committee monthly.

In addition to the problem loans described above, as of September 30, 2013, we had special mention loans and leases totaling \$58.1 million, which are not included in either the non-accrual or 90 days past due loan and lease categories but which, in our opinion, were subject to potential future rating downgrades. Special mention loans and leases decreased by \$32.9 million, or 36%, to \$58.1 million at September 30, 2013, from \$91.0 million at December 31, 2012. Loans and leases rated as special mention totaled \$58.1 million, or 0.4%, of the total loan

Table of Contents

portfolio and 0.4% of the noncovered loan portfolio at September 30, 2013, including \$13.9 million acquired from Bank of Florida and \$31.8 million acquired in the BPL acquisition.

Analysis for the Allowance for Loan and Lease Losses

The tables below set forth the calculation of the ALLL based on the method for determining the allowance.

Analysis for Loan and  
Lease Losses

Table 19

(dollars in thousands)	September 30, 2013			December 31, 2012			
	Excluding ACI Loans	ACI Loans	Total	Excluding ACI Loans	ACI Loans	Total	
Residential mortgages	\$22,477	\$5,216	\$27,693	\$28,456	\$5,175	\$33,631	
Commercial and commercial real estate	20,816	11,344	32,160	23,074	16,789	39,863	
Lease financing receivables	3,676	—	3,676	3,181	—	3,181

Consumer and credit card	129	—	129	162	—	162	
<b>Total ALLL</b>	<b>\$50,431</b>	<b>\$16,560</b>	<b>\$66,991</b>	<b>\$60,138</b>	<b>\$21,964</b>	<b>\$82,102</b>	
ALLL as a percentage of loans and leases held for investment	0.44	% 1.41	% 0.53	% 0.54	% 1.60	% 0.66	%
Residential mortgages	\$5,943,708	\$754,906	\$6,698,614	\$5,843,136	\$865,612	\$6,708,748	
Commercial and commercial real estate	4,186,857	421,630	4,608,487	4,266,691	505,077	4,771,768	
Lease financing receivables	1,092,866	—	1,092,866	836,935	—	836,935	
Home equity lines	156,977	—	156,977	179,600	—	179,600	
Consumer and credit card	6,023	—	6,023	8,038	—	8,038	
<b>Total loans and leases held for investment</b>	<b>\$11,386,431</b>	<b>\$1,176,536</b>	<b>\$12,562,967</b>	<b>\$11,134,400</b>	<b>\$1,370,689</b>	<b>\$12,505,089</b>	

The recorded investment in loans and leases held for investment, excluding ACI loans, increased by \$252.0 million, or 2%, to \$11.4 billion at September 30, 2013 from \$11.1 billion at December 31, 2012. The increase is primarily attributable to new originations within lease financing receivables and residential mortgages and a change in strategy to retain preferred jumbo residential mortgages on our balance sheet partially offset by reductions in utilization by existing customers on commercial lines of credit.

#### Residential

The recorded investment in residential mortgages, excluding ACI loans, increased by \$100.6 million, or 2%, to \$5.9 billion at September 30, 2013, from \$5.8 billion at December 31, 2012. The ALLL for residential mortgages, excluding ACI loans, decreased by \$6.0 million, or 21%, to \$22.5 million at September 30, 2013, from \$28.5 million at December 31, 2012 as a result of the continued performance of our high credit quality residential first portfolio. Charge-off activity for residential mortgages decreased by 23% to \$11.4 million for the nine months ended September 30, 2013 from \$14.7 million for the nine months ended September 30, 2012. Loan performance and historical loss rates are analyzed using the prior 12 months delinquency rates and actual charge-offs.

#### Commercial and Commercial Real Estate

The recorded investment for commercial and commercial real estate, excluding ACI loans, decreased by \$79.8 million, or 2%, to \$4.2 billion at September 30, 2013, from \$4.3 billion at December 31, 2012. The decrease is primarily due to reduced utilization by existing customers within our warehouse finance commercial portfolio during

the nine months ended September 30, 2013. The warehouse finance portfolio is characterized by large revolving lines with current outstanding balances of \$0.9 billion as of September 30, 2013.

The ALLL for commercial and commercial real estate, excluding ACI loans, decreased by 10%, to \$20.8 million at September 30, 2013, from \$23.1 million at December 31, 2012. The reserve on loans collectively evaluated for impairment increased by 2% to \$17.9 million at September 30, 2013 from \$17.5 million at December 31, 2012. The reserves on commercial and commercial real estate loans individually evaluated for impairment decreased by 48% to \$2.9 million at September 30, 2013, from \$5.6 million at December 31, 2012. The outstanding balance of loans individually evaluated for impairment decreased by 9% from December 31, 2012 to September 30, 2013. The ALLL as a percentage of loans and leases held for investment for commercial and commercial real estate, excluding ACI loans, decreased to 0.50% as of September 30, 2013 compared with 0.54% at December 31, 2012. The decreased coverage ratio is due to improvement in the credit quality of our loans and lower delinquencies on our collectively evaluated for impairment loans. Newly originated loans adhere to higher underwriting standards than in previous periods.

For commercial and commercial real estate loans, the most significant historical loss factors include credit quality and charge-off activity. The loss factors used in our allowance calculation have remained consistent over the periods presented. Charge-off activity is analyzed using a 15 quarter time period to determine loss rates consistent with loan segments used in recording the allowance estimate. During periods of more consistent and stable performance, this 15 quarter period is considered the most relevant starting point for analyzing the reserve. During periods of significant volatility and severe loss experience, a shortened time period may be used which is more reflective of expected future losses. At September 30, 2013, two segments that are included in commercial and commercial real estate loans used shortened historical loss periods of 11 and 8 quarters as compared to three segments utilizing shortened historical loss periods of 8, 7 and 5 quarters at December 31, 2012. The difference is due to additional loan history that is more indicative of future expected losses. Charge-off activity for commercial and commercial real estate increased by 55% to \$10.3 million for the nine months ended September 30, 2013, from \$6.6 million for the nine months ended September 30, 2012. Loan delinquency is one of the leading indicators of credit quality. As of September 30, 2013, 0.4% of the recorded investment in commercial and commercial real estate, excluding ACI loans, was past due as compared to 1.8% as of December 31, 2012.

Table of Contents

The following table provides an analysis of the ALLL, provision for loan and lease losses and net charge-offs for the three and nine months ended September 30, 2013 and 2012:

Allowance for Loan and Lease Losses Activity	Table 20			
	Three Months Ended September 30,		Nine Months Ended September 30,	
(dollars in thousands)	2013	2012	2013	2012
ALLL, beginning of period	\$73,469	\$77,393	\$82,102	\$77,765
Charge-offs:				
Residential mortgages	3,038	3,868	11,378	14,701
Commercial and commercial real estate	6,081	2,636	10,309	6,640
Lease financing receivables	746	805	2,442	2,903
Home equity lines	430	1,215	1,546	2,807
Consumer and credit card	28	61	65	112
Total charge-offs	10,323	8,585	25,740	27,163
Recoveries:				
Residential mortgages	70	52	298	357
Commercial and commercial real estate	488	3,023	4,480	3,602
Lease financing receivables	75	159	407	224
Home equity lines	130	52	379	168
Consumer and credit card	14	16	49	45
Total recoveries	777	3,302	5,613	4,396
Net charge-offs	9,546	5,283	20,127	22,767
Provision for loan and lease losses	3,068	4,359	5,016	21,471
ALLL, end of period	\$66,991	\$76,469	\$66,991	\$76,469
Net charge-offs to average loans held for investment	0.30	% 0.25	% 0.22	% 0.40

The level of the ALLL has decreased by \$9.5 million, or 12%, to \$67.0 million at September 30, 2013 from \$76.5 million at September 30, 2012. The decrease is attributable to a reduction in provision for loan and lease losses offset by a reduction in net charge-offs. The provision for loan and lease losses decreased by \$16.5 million, or 77%, to \$5.0 million for the nine months ended September 30, 2013 from \$21.5 million for the nine months ended September 30, 2012. The decrease is attributable to a release of provision for residential mortgages due to improvement of flow rates and delinquency metrics of the general reserve population combined with the improved expected performance of residential TDRs. The commercial and commercial real estate provision for loan and lease losses decreased due to new originations with increased credit quality and an increase in performing TDRs.

The reduction in net charge-offs is due to increased originations in the portfolio of higher credit quality, which resulted in a decrease of charge-offs by 5% to \$25.7 million for the nine months ended September 30, 2013 from \$27.1 million for the nine months ended September 30, 2012. The remaining reduction in net charge-offs is due to an increase in commercial and commercial real estate recoveries on loans previously charged off.

#### Loans Subject to Representations and Warranties

We originate residential mortgage loans, primarily first-lien home loans, through our direct channels with the intent of selling a majority of them in the secondary mortgage market. We sell and securitize conventional conforming and federally insured single-family residential mortgage loans predominantly to GSEs, such as FNMA and FHLMC. A majority of the loans sold to non-GSEs were agency deliverable product that were eventually sold by large aggregators of agency product who securitized and sold the loans to the agencies. We also sell residential mortgage loans that do not meet criteria for whole loan sales to GSEs (nonconforming mortgage loans) and to private non-GSE purchasers through whole loan sales.

Although we structure all of our loan sales as non-recourse sales, the underlying sale agreements require us to make certain market standard representations and warranties at the time of sale, which may vary from agreement to agreement. Such representations and warranties typically include those made regarding the existence and sufficiency of file documentation, credit information, compliance with underwriting guidelines and the absence of fraud by

borrowers or other third parties such as appraisers in connection with obtaining the loan. We have exposure to potential loss because, among other things, the representations and warranties we provide purchasers typically survive for the life of the loan.

Beginning in 2009, higher loan delinquencies, resulting from deterioration in overall economic conditions and trends, particularly those impacting the residential housing sector, caused investors to carefully examine and re-underwrite credit files for those loans in default to determine if there had been a breach of a representation or a warranty in the sale agreement. Investors have most often cited missing documentation and income misrepresentations as the grounds for us to repurchase loans.

Upon receipt of a repurchase demand from an investor, we review the allegations and re-underwrite the loan. We also verify any third-party information included as support for the repurchase demand. In certain cases, we may request the investor to provide additional information to assist us in our determination whether to repurchase the loan.

Upon completion of our own internal investigation as to the validity of a repurchase claim, our findings are discussed by senior management and subject-matter experts as part of our loan repurchase subcommittee. If the subcommittee determines that we are obligated to repurchase a loan, such recommendation is presented to executive management for review and approval.

Table of Contents

If it is determined that the loans sold are (1) with respect to the GSEs, in breach of these representations or warranties, or (2) with respect to non-GSE purchasers, in material breach of these representations and warranties, we generally have an obligation to either: (a) repurchase the loan for the UPB, accrued interest and related advances, which we refer to collectively as the Repurchase Price, (b) indemnify the purchaser or (c) make the purchaser whole for the economic benefits of the loan. Our obligations vary based upon the nature of the repurchase demand and the current status of the mortgage loan. For example, if an investor has already liquidated the mortgage loan, the investor no longer has a mortgage asset that we could repurchase.

Of the three courses of action described above, a loan repurchase is the only remedy where we will place the loan asset that is the subject of the repurchase demand on our balance sheet. In the case of indemnification, the investor still owns the loan asset and we indemnify the investor for losses incurred resulting from our breach of a representation and warranty. In the case of a make-whole payment, the investor or subsequent purchaser of a loan asset has liquidated the loan and there is no loan asset for us to repurchase. We are solely obligated to make the investor whole for losses incurred between the initial purchase price and the liquidation price, and related costs. At the time we repurchase a loan, we determine whether to hold the loan for sale or for investment. If the loan is sellable on the secondary market, we may elect to do so. If the loan is not sellable on the secondary market or there are other reasons why we would elect to retain the loan, we will service the asset to minimize our losses. This may include, depending on the status of the loan at the time of repurchase, modifying the loan, or foreclosure on the loan and subsequent liquidation of the mortgage property.

When we sell residential mortgage loans on the secondary mortgage market, our repurchase obligations are typically not limited to any specific period of time. Rather, the contractual representations and warranties we make on these loans survive indefinitely for the life of the loan.

We also have a limited repurchase exposure for early payment defaults (EPD) which are typically triggered if a borrower does not make the first several payments due after the mortgage loan has been sold to an investor. Certain of our private investors have agreed to waive EPD provisions for conventional conforming and federally insured single-family residential mortgage loans and certain jumbo loan products. However, we are subject to EPD provisions and prepayment protection provisions on non-conforming jumbo loan products and community reinvestment loans. Total non-conforming UPB sold subject to prepayment and default protection was \$1,527.7 million at September 30, 2013. Total originations of community reinvestment loans sold under the State of Florida housing program were minimal.

As of September 30, 2013, we had 251 active repurchase requests. We have summarized the activity for the three and nine months ended September 30, 2013 and 2012 below regarding repurchase requests received, requests successfully defended, and loans that we repurchased or for which we indemnified investors or made investors whole with the corresponding origination years:

Loan Repurchase Activity	Table 21			
	Three Months Ended September 30,		Nine Months Ended September 30,	
(dollars in thousands)	2013	2012	2013	2012
Agency	16	26	91	107

Table of Contents

We have summarized repurchase statistics by vintage below:

Summary Statistics by Vintage				Table 22
Losses to date	2004-2005	2006-2009	2010-2013	Total
(dollars in thousands)				
Total sold UPB	\$11,334,198	\$18,997,792	\$26,857,254	\$57,189,244
Request rate <sup>(1)</sup>	0.37	% 1.73	% 0.24	% 0.78
Requests received	188	1,530	273	1,991
Pending requests	15	208	23	246
Resolved requests	173	1,322	250	1,745
Repurchase rate	42	% 40	% 21	% 38
Loans repurchased	72	535	54	661
Average loan size	\$222	\$215	\$232	\$224
Loss severity	12	% 46	% 9	% 38
Losses realized	\$1,912	\$53,334	\$1,060	\$56,306
Losses realized (bps)	1.7	28.1	0.4	9.8

(1) Request rate is calculated as the number of requests received to date, compared to the total number of loans sold for the period.

The most common reasons for loan repurchases and make-whole payments relate to missing documentation, program violation, and claimed misrepresentations related to falsified employment documents and/or verifications, occupancy, credit and/or stated income. Additionally, we receive requests to repurchase or make whole loans because they did not meet the specified investor guidelines. Repurchase demands relating to early payment defaults generally surface sooner, typically within six months of selling the loan to an investor. Prior to 2009, we sold loans servicing released, therefore the lack of servicing statistics and status of the loans sold is not known. As such, there is additional uncertainty surrounding the reserves for repurchase obligations for loans sold or securitized.

Along with the contingent obligation associated with representations and warranties noted above, the Company also has a noncontingent obligation to stand ready to perform over the term of the representation and warranties. A liability is established when the obligation is both probable and reasonably estimable and is recognized as a reduction on net gains on loan sales and securitizations. When calculating the reserve associated with this noncontingent obligation, we estimate the probable losses inherent in the population of all loans sold based on trends in repurchase requests and actual loss severities experienced.

The following is a rollforward of our reserves for repurchase losses for the three and nine months ended September 30, 2013 and 2012:

Reserves for Loans Sold or Securitized	Table 23	
	Three Months Ended	Nine Months Ended
(dollars in thousands)	September 30, 2013	September 30, 2012
Balance, beginning of period	\$21,960	\$34,000
Provision for new sales/securitizations	1,012	(13)
Provision for changes in estimate of existing reserves	(1,718)	1,703
Net realized losses on repurchases	(2,168)	(4,690)
Balance, end of period	\$19,086	\$31,000
Quarters of coverage ratio <sup>(1)</sup>	5	10

(1) Quarters of coverage ratio is calculated as the current reserve for repurchases divided by the average realized losses over the previous four quarters.

The liability for repurchase losses was \$19.1 million as of September 30, 2013, compared to \$31.0 million as of September 30, 2012. The decrease in the liability since September 30, 2012 is primarily due to the continued run-off of losses that were estimated in the prior periods partially offset by the provisioning for new sales and securitizations as well as changes in estimates due to increased information and clarity into the repurchase loan pipeline. Our provision for new sales/securitizations increased by \$2.4 million for the nine months ended September 30, 2013 compared to the same period in 2012 and our provision for changes in estimate of existing reserves decreased by \$11.8 million for the nine months ended September 30, 2013 compared to the same period in 2012, due to a decreased volume of repurchase requests as well as the stabilization of property values.

Table of Contents

We have summarized the new activity for repurchase requests in UPB as well as a summarized the outstanding UPB within the pending pipeline by vintage for the 2004-2009 vintages as of and for the three months ended September 30, 2013, June 30, 2013 and September 30, 2012:

Repurchase Requests (UPB) Table 24

(dollars in thousands)	2004	2005	2006	2007	2008	2009	Total
September 30, 2012	\$—	\$—	\$4,769	\$6,613	\$7,069	\$1,997	\$20,448
June 30, 2013	318	268	2,774	4,999	2,060	340	10,759
September 30, 2013	514	618	1,646	4,130	3,170	325	10,403

Pending Pipeline (UPB) Table 25

(dollars in thousands)	2004	2005	2006	2007	2008	2009	Total
September 30, 2012	\$973	\$3,238	\$6,444	\$30,058	\$16,288	\$5,817	\$62,818
June 30, 2013	852	1,000	5,362	21,073	13,025	2,007	43,319
September 30, 2013	852	989	5,385	21,359	13,860	1,656	44,101

As noted in the summary table above, repurchase requests for the 2004 - 2009 vintages have been decreasing steadily since September 30, 2012. Along with the decline in recent repurchase requests, we have also experienced a steady decline in the outstanding UPB within the pending pipeline. The decline in pending pipeline is due to higher rescission rates and previous repurchases. Furthermore, we have experienced a lower request rate on vintages post 2009, which leads to a lower reserve requirement.

Our quarters of coverage ratio showed approximately 5 quarters of coverage given our current reserve levels at September 30, 2013. Until 2009, we sold a majority of our loans servicing released and as a result, we have less visibility into the current delinquency status of these populations of loans and thus the elevated coverage ratio. Unlike reserves for loans we service where we have insight into the current delinquency status of the population, the calculated repurchase reserve is based on historical repurchase trends.

We performed a sensitivity analysis on our loan repurchase reserve by varying the frequency and severity assumptions independently for each loan sale vintage year. By increasing the frequency and severity by 20%, the reserve balance as of September 30, 2013 would have increased by 15% from the baseline. Conversely, by decreasing the frequency and the severity 20%, the reserve balance as of September 30, 2013 would have decreased by 13%. Based upon qualitative and quantitative factors, including the number of pending repurchase requests, rescission rates and trends in loss severities, we may make adjustments to the base reserve balance to incorporate recent, known trends.

The sensitivity analysis for the loan repurchase reserve as of September 30, 2013 is as follows:

Sensitivity of Repurchase Reserve	Frequency and Severity				
	Up 20%	Up 10%	Base	Down 10%	Down 20%
(dollars in thousands)					
Reserve for originated loan repurchases	\$22,044	\$20,498	\$19,086	\$17,809	\$16,667

## Loan Servicing

When we service residential mortgage loans where FNMA or FHLMC is the owner of the underlying mortgage loan asset, we are subject to potential repurchase risk for: (1) breaches of loan level representations and warranties even though we may not have originated the mortgage loan; and (2) failure to service such loans in accordance with the applicable GSE servicing guide. If a loan purchased or securitized by FNMA or FHLMC is in breach of an origination representation and warranty, such GSE may look to the loan servicer for repurchase. If we are obligated to repurchase a loan from either FNMA or FHLMC, we seek indemnification from the counterparty that sold us the MSR if the counterparty is a third party, which presents potential counterparty risk if such party is unable or unwilling to satisfy

its indemnification obligations.

Total acquired UPB for counterparties unable or unwilling to satisfy their indemnification obligations subject to repurchase risk was \$6.3 billion at September 30, 2013. At September 30, 2013, we were actively servicing \$1.3 billion of remaining UPB. During 2013, no new counterparties were identified that were unwilling or unable to satisfy their indemnification obligations.

The following is a rollforward of our reserves for servicing repurchase losses related to these counterparties for the three and nine months ended September 30, 2013 and 2012:

Reserves for Repurchase Obligations for Loans Serviced

Table 27

(dollars in thousands)	Three Months Ended		Nine Months Ended	
	September 30, 2013	September 30, 2012	September 30, 2013	September 30, 2012
Balance, beginning of period	\$23,518	\$27,640	\$26,026	\$30,364
Provision for changes in estimate of existing reserves	4,531	3,032	5,820	8,931
Net realized losses on repurchases <sup>(2)</sup>	(5,316)	(3,363)	(9,113)	(11,986)
Balance, end of period	\$22,733	\$27,309	\$22,733	\$27,309
Quarters of coverage ratio <sup>(1)</sup>	8	7	8	7

Table of Contents

(1) Quarters of coverage ratio is calculated as the current reserve for repurchases divided by the average realized losses over the previous four quarters.

We performed a sensitivity analysis on our loan servicing repurchase reserve by varying the frequency and severity assumptions. By increasing the frequency and severity 20%, the reserve balance as of September 30, 2013 would have increased by 39% from the baseline. Conversely, by decreasing the frequency and the severity by 20%, the reserve balance as of September 30, 2013 would have decreased by 38%. Based upon qualitative and quantitative factors, including the number of pending repurchase requests, rescission rates and trends in loss severities, management may make adjustments to the base reserve balance to incorporate recent, observable trends.

The following is a sensitivity analysis as of September 30, 2013 of our reserve related to our estimated servicing repurchase losses based on ASC Topic 460, Guarantees:

Sensitivity of Servicing Repurchase Losses		Table 28			
(dollars in thousands)	Frequency and Severity				
	Up 20%	Up 10%	Base	Down 10%	Down 20%
Reserve for servicing repurchase losses	\$31,502	\$26,471	\$22,733	\$17,720	\$14,001

#### Loans in Foreclosure

Losses can arise from certain government agency agreements which limit the agency's repayment guarantees on foreclosed loans, resulting in certain minimal foreclosure costs being borne by servicers. In particular, government insured loans serviced under GNMA guidelines require servicers to fund any foreclosure claims not otherwise covered by insurance claim funds of the U.S. Department of Housing and Urban Development and/or the U.S. Department of Veterans Affairs.

Other than foreclosure-related costs associated with servicing government insured loans, we have not entered into any servicing agreements that require us as servicer to cover foreclosure-related costs.

#### Funding Sources

Deposits obtained from clients are our primary source of funds for use in lending, acquisitions and other business purposes. We generate deposit client relationships through our consumer direct, financial center and financial intermediary distribution channels. The consumer direct channel includes: Internet, email, telephone and mobile device access to product and customer support offerings. Our differentiated products, integrated online financial portal and value-added account features deepen our interactions and relationships with our clients resulting in high retention rates. Other funding sources include short-term and long-term borrowings and shareholders' equity. FHLB borrowings have become an important funding source as we have grown.

#### Deposits

The following table shows the distribution of our deposits by type of deposit at the dates indicated:

Deposits		Table 29	
(dollars in thousands)	September 30,		December 31,
	2013	2012	2012
Noninterest-bearing demand	\$1,365,655	\$1,445,783	
Interest-bearing demand	2,998,836	2,681,769	
Market-based money market accounts	413,427	439,399	
Savings and money market accounts, excluding market-based	5,186,243	4,451,843	
Market-based time	627,889	736,612	
Time, excluding market-based	3,035,626	3,386,982	
Total deposits	\$13,627,676	\$13,142,388	

Our major source of funds and liquidity is our deposit base, which provides funding for our investment securities, loan and lease portfolios. We carefully manage our interest paid on deposits to control the level of interest expense we incur. The mix and type of interest-bearing and noninterest-bearing deposits in our deposit base changes due to our funding needs, marketing activities and market conditions. We have experienced deposit growth as a result of the increased marketing initiatives we executed as part of our growth plan.

Total deposits increased by \$485.3 million, or 4%, to \$13.6 billion at September 30, 2013, from \$13.1 billion at December 31, 2012. This strong growth in retail deposits during the first nine months of 2013 allowed us to replace a

portion of our more costly wholesale funding sources such as FHLB borrowings and repurchase agreements. During the first nine months of 2013, noninterest-bearing demand deposits decreased by \$80.1 million, to \$1.4 billion, primarily due to decreases in business accounts and escrow deposits. Interest-bearing deposits increased by \$565.4 million to \$12.3 billion, or 5%, at September 30, 2013 from \$11.7 billion at December 31, 2012. This increase in interest-bearing deposits was primarily due to growth in savings and money market accounts and interest-bearing demand accounts due to our marketing efforts to acquire new depositors. The increase in savings and money market accounts and interest-bearing demand accounts was partially offset by a decrease in time deposits.

#### FHLB Borrowings

In addition to deposits, we use borrowings from the FHLB as a source of funds to meet the daily liquidity needs of our clients and fund growth in earning assets. Our FHLB borrowings decreased by \$1.2 billion, or 38%, to \$1.9 billion at September 30, 2013 from \$3.0 billion at December 31, 2012. The decrease in FHLB borrowings were primarily funded by a net decrease in loans held for sale and growth in retail deposits.

Table of Contents

The table below summarizes the average outstanding balance of our FHLB advances, the weighted average interest rate, and the maximum amount of borrowings in each category outstanding at any month end during the three and nine months ended September 30, 2013 and 2012, respectively.

FHLB Borrowings  (dollars in thousands)	Table 30			
	Three Months Ended September 30,		Nine Months Ended September 30,	
	2013	2012	2013	2012
Fixed-rate advances:				
Average daily balance	\$2,511,830	\$1,647,438	\$2,491,148	\$1,392,411
Weighted-average interest rate	1.95 %	1.85 %	1.97 %	1.85 %
Maximum month-end amount	\$2,642,700	\$2,301,286	\$2,642,700	\$2,301,286
Convertible advances:				
Average daily balance	\$—	\$18,957	\$9,963	\$31,029
Weighted-average interest rate	— %	4.30 %	4.24 %	4.41 %
Maximum month-end amount	\$—	\$17,000	\$17,000	\$44,000
Overnight advances:				
Average daily balance	\$—	\$136,674	\$45,311	\$221,182
Weighted-average interest rate	— %	0.40 %	0.39 %	0.39 %
Maximum month-end amount	\$—	\$105,500	\$200,500	\$840,500

During September 2013, the Company early extinguished FHLB advances with a principal balance of \$770.0 million. The consideration paid for the early extinguishment was \$734.0 million representing the net settlement of the advance balances. The resulting gain of \$36.0 million recognized upon extinguishment was recorded in other noninterest income in the consolidated statements of income. As a result of the extinguishment, the forecasted transactions related to the interest payments associated with this debt were no longer expected to occur which resulted in the reclassification of \$31.0 million previously recorded in accumulated other comprehensive income to other noninterest income.

In early October 2013, the Company settled an additional FHLB advance with a principal balance of \$104.0 million that was agreed to be extinguished effective September 30, 2013. The consideration paid for this early extinguishment was \$93.6 million representing the net settlement of the advance balance. The resulting gain realized upon extinguishment was \$10.4 million and will be recognized in the fourth quarter of 2013.

**Repurchase Agreements**

Repurchase agreements decreased by \$142.3 million to \$0 at September 30, 2013 from \$142.3 million at December 31, 2012. The decrease in repurchase agreements was funded by growth in retail deposits.

The table below summarizes the average outstanding balance of our repurchase agreements, the weighted average interest rate, and the maximum amount of repurchase agreements at any month-end during the three and nine months ended September 30, 2013 and 2012.

Repurchase Agreements  (dollars in thousands)	Table 31			
	Three Months Ended September 30,		Nine Months Ended September 30,	
	2013	2012	2013	2012
Repurchase agreements:				
Average daily balance	\$—	\$53,037	\$18,645	\$31,734
Weighted-average interest rate	— %	2.28 %	1.94 %	2.69 %
Maximum month-end amount	\$—	\$504,565	\$20,000	\$504,565

**Liquidity Management**

Liquidity refers to the measure of our ability to meet the cash flow requirements of depositors and borrowers, while at the same time meeting our operating, capital and strategic cash flow needs. We continuously monitor our liquidity position to ensure that assets and liabilities are managed in a manner that will meet all short-term and long-term cash requirements.

Funds invested in short-term marketable instruments, the continuous maturing of other interest-earning assets, cash flows from self-liquidating investments such as mortgage-backed securities, the possible sale of available for sale securities, and the ability to securitize certain types of loans provide sources of liquidity from an asset perspective. The liability base provides sources of liquidity through issuance of deposits and borrowed funds. In addition, equity capital raises provide us with sources of liquidity. To manage fluctuations in short-term funding needs, we utilize borrowings under lines of credit with other financial institutions, such as the Federal Home Loan Bank of Atlanta, securities sold under agreements to repurchase, federal fund lines of credit with correspondent banks, and, for contingent purposes, the Federal Reserve Bank Discount Window. We also have access to term advances with the FHLB, as well as brokered certificates of deposits, for longer term liquidity needs. We believe our sources of liquidity are sufficient to meet our cash flow needs for the foreseeable future.

We continued to maintain a strong liquidity position during the third quarter of 2013. Cash and cash equivalents were \$1.1 billion, available for sale investment securities were \$1.2 billion, and total deposits were \$13.6 billion as of September 30, 2013.

Table of Contents

Management’s Discussion and Analysis of Financial Condition and Results of Operations

As of September 30, 2013, we had a \$4.1 billion line of credit with the FHLB, of which \$1.9 billion was utilized. Based on asset size, the maximum potential line available with the FHLB was \$6.4 billion at September 30, 2013, assuming eligible collateral to pledge. As of September 30, 2013, we pledged collateral with the FRB that provided \$43.8 million of borrowing capacity at the discount window but did not have any borrowings outstanding. The maximum potential borrowing at the FRB is limited only by eligible collateral.

At September 30, 2013, our availability under Promontory Interfinancial Network, LLC’s CDARS® One-Way Buy<sup>SM</sup> deposits was \$2.6 billion with no outstanding balances. Although our availability under Promontory Interfinancial Network, LLC’s CDARS® One-Way Buy<sup>SM</sup> deposits was \$2.6 billion at September 30, 2013, funding from this source is also limited by the overall network volume of CDARS One-Way Buy deposits available in the marketplace. Our treasury function views \$500 million as the practical maximum availability for this type of funding. As of September 30, 2013, our availability under federal funds commitments was \$40.0 million with no outstanding borrowings.

We own certain investment securities that are available for pledging under repurchase agreements. As of September 30, 2013, the principal balance of our repurchase agreements was \$0 and therefore, no securities were currently pledged for this type of borrowing.

We continue to evaluate the ultimate impact of the implementation of the new capital and liquidity standards under the Basel III Capital Rules and the Dodd-Frank Act on the Company's liquidity management functions.

Capital Management

Management, including our Board of Directors, regularly reviews our capital position to help ensure it is appropriately positioned under various operating and market environments.

2013 Capital Actions

On October 22, 2013, the Company's Board of Directors declared a quarterly cash dividend of \$0.03 per common share, payable on November 22, 2013, to stockholders of record as of November 12, 2013. Also on October 22, 2013, the Company's Board of Directors declared a quarterly cash dividend of \$421.875, payable on January 6, 2014, for each share of Series A Preferred Stock held as of December 20, 2013.

On July 23, 2013, the Company's Board of Directors declared a quarterly cash dividend of \$0.03 per common share, payable on August 23, 2013, to stockholders of record as of August 12, 2013. Also on July 23, 2013, the Company's Board of Directors declared a quarterly cash dividend of \$421.875, payable on October 5, 2013, for each share of Series A Preferred Stock held as of September 20, 2013.

On April 23, 2013, the Company's Board of Directors declared a quarterly cash dividend of \$0.02 per common share, which was paid on May 21, 2013, to stockholders of record as of May 9, 2013. Also on April 23, 2013, the Company's Board of Directors declared a quarterly cash dividend of \$421.875, which was paid on July 5, 2013, for each share of Series A Preferred Stock held as of June 20, 2013.

Capital Ratios

As a savings and loan holding company, we are not currently subject to specific statutory capital requirements.

However, we are required to serve as a source of strength for EverBank and must have the ability to provide financial assistance if EverBank experiences financial distress.

As a result of recent regulatory requirements pursuant to the Dodd-Frank Act and Basel III, we will be subject to increasingly stringent regulatory capital requirements. For a discussion of the regulatory capital requirements please see "Regulatory Changes" under Key Factors Affecting our Business and Financial Statements above.

At September 30, 2013, EverBank exceeded all currently effective regulatory capital requirements and is considered to be “well-capitalized” with a Tier 1 leverage ratio of 8.8% and a total risk-based capital ratio of 14.5%. Management believes, at September 30, 2013, that we and EverBank would meet all capital adequacy requirements under the Basel III Capital Rules on a fully phased-in basis if such requirements were currently effective.

The table below shows regulatory capital and risk-weighted assets for EB at September 30, 2013 and December 31, 2012:

Regulatory Capital (bank level)  
(dollars in thousands)

Table 32

Edgar Filing: EverBank Financial Corp - Form 10-Q

	September 30, 2013	December 31, 2012
Shareholders' equity	\$1,648,152	\$1,518,934
Less: Goodwill and other intangibles	(51,436 )	(54,780 )
Disallowed servicing asset	(39,658 )	(32,378 )
Disallowed deferred tax asset	(64,462 )	(67,296 )

Total capital to risk-weighted assets	1,530,059	13.5	907,153	8.0	1,133,942	10.0		
Tier 1 capital to risk-weighted assets	1,447,957	12.8	N/A	N/A	680,365	6.0		

**Restrictions on Paying Dividends**

Federal banking regulations impose limitations upon certain capital distributions by savings banks, such as certain cash dividends, payments to repurchase or otherwise acquire its shares, payments to shareholders of another institution in a cash-out merger and other distributions charged against capital. The OCC regulates all capital distributions by EB directly or indirectly to us, including dividend payments. EB may not pay dividends to us if, after paying those dividends, it would fail to meet the required minimum levels under risk-based capital guidelines and the minimum leverage and tangible capital ratio requirements, or in the event the OCC notifies EB that it is subject to heightened supervision. Under the Federal Deposit Insurance Act, an insured depository institution such as EB is prohibited from making capital distributions, including the payment of dividends, if, after making such distribution, the institution would become "undercapitalized." Payment of dividends by EB also may be restricted at any time at the discretion of the appropriate regulator if it deems the payment to constitute an "unsafe and unsound" banking practice.

**Asset and Liability Management and Market Risk**

Interest rate risk is our primary market risk and results from our investments in interest-earning assets with funds obtained from interest-bearing deposits and borrowings. Interest rate risk is defined as the risk of loss of future earnings or market value due to changes in interest rates. We are subject to this risk because:

- assets and liabilities may mature or re-price at different times or by different amounts;
- short-term and long-term market interest rates may change by different amounts;
- similar term rate indices may exhibit different re-pricing characteristics; and
- the life of assets and liabilities may shorten or lengthen as interest rates change.

Interest rates may also have a direct or indirect effect on loan demand, credit losses, mortgage origination volume, the fair value of MSRs and other items affecting earnings. Our objective is to measure the impact of interest rate changes on our capital and earnings and manage the balance sheet in order to decrease interest rate risk.

Interest rate risk is primarily managed by the Asset and Liability Committee (ALCO), which is composed of certain executive officers and other members of management, in accordance with policies approved by our Board of Directors. ALCO has employed policies that attempt to manage our interest-sensitive assets and liabilities, in order to control interest rate risk and avoid incurring unacceptable levels of credit or concentration risk. We manage our exposure to interest rates by structuring our balance sheet according to these policies in the ordinary course of business. In addition, the ALCO policy permits the use of various derivative instruments to manage interest rate risk or hedge specified assets and liabilities.

Consistent with industry practice, we primarily measure interest rate risk by utilizing the concept of "Economic Value of Equity" (EVE) which is defined as the present value of assets less the present value of liabilities. EVE scenario

analysis estimates the fair value of the balance sheet in alternative interest rate scenarios. The EVE does not consider management intervention and assumes the new rate environment is constant and the change is instantaneous. Further, as this framework evaluates risks to the current balance sheet only, changes to the volumes and pricing of new business opportunities that can be expected in the different interest rate outcomes are not incorporated in this analytical framework. For instance, analysis of our history suggests that declining interest rate levels are associated with higher loan production volumes at higher levels of profitability. While this business hedge historically offsets most, if not all, of the heightened amortization of our MSR portfolio and other identified risks associated with declining interest rate scenarios, these factors fall outside of the EVE framework. As a result, we further evaluate and consider the impact of other business factors in a separate net income sensitivity analysis.

If EVE rises in a different interest rate scenario, that would indicate incremental prospective earnings in that hypothetical rate scenario. A perfectly matched balance sheet would result in no change in the EVE, no matter what the rate scenario. The table below shows the estimated impact on EVE of increases in interest rates of 1%, 2% and 3% and decreases in interest rates of 1%, as of September 30, 2013 and December 31, 2012.

Table of Contents

Interest Rate Sensitivity	Table 34			
	September 30, 2013		December 31, 2012	
(dollars in thousands)	Net Change in	% Change of	Net Change in	% Change of
	EVE	EVE	EVE	EVE
Up 300 basis points	\$6,243	0.3	% \$392,915	17.1
Up 200 basis points	64,712	2.9	% 348,431	15.2
Up 100 basis points	68,052	3.1	% 217,315	9.5
Down 100 basis points	(190,525	) (8.6	)% (300,577	) (13.1

The projected exposure of EVE to changes in interest rates at September 30, 2013 was in compliance with established policy guidelines. Exposure amounts depend on numerous assumptions. Due to historically low interest rates, the table above may not predict the full effect of decreasing interest rates upon our net interest income that would occur under a more traditional, higher interest rate environment because short-term interest rates are near zero percent and facts underlying certain of our modeling assumptions, such as the fact that deposit and loan rates cannot fall below zero percent, distort the model's results.

**Use of Derivatives to Manage Risk****Interest Rate Risk**

An integral component of our interest rate risk management strategy is our use of derivative instruments to minimize significant fluctuations in earnings caused by changes in interest rates. As part of our overall interest rate risk management strategy, we enter into contracts or derivatives to hedge interest rate lock commitments, loans held for sale, certain loans in our held for sale portfolio, trust preferred debt, and forecasted issuances of debt. These derivatives include forward sales commitments, optional forward sales commitments, and forward interest rate swaps. We enter into these derivative contracts with major financial institutions. Credit risk arises from the inability of these counterparties to meet the terms of the contracts. We minimize this risk through collateral arrangements, exposure limits and monitoring procedures.

**Commodity and Equity Market Risk**

Commodity risk represents exposures to deposit instruments linked to various commodity and metals markets. Equity market risk represents exposures to our equity-linked deposit instruments. We offer market-based deposit products consisting of MarketSafe® products, which provide investment capabilities for customers seeking portfolio diversification with respect to commodities and other indices, which are typically unavailable from our banking competitors. MarketSafe® deposits rate of return is based on the movement of a particular market index. In order to manage the risk that may occur from fluctuations in the related markets, we enter into offsetting options with exactly the same terms as the commodity and equity linked MarketSafe® deposits, which provide an economic hedge.

**Foreign Exchange Risk**

Foreign exchange risk represents exposures to changes in the values of deposits and future cash flows denominated in currencies other than the U.S. dollar. We offer WorldCurrency® deposit products which provide investment capabilities to customers seeking portfolio diversification with respect to foreign currencies. The products include WorldCurrency® single-currency certificates of deposit and money market accounts denominated in the world's major currencies. In addition, we offer foreign currency linked MarketSafe® deposits which provide returns based upon foreign currency linked indices. Exposure to loss on these products will increase or decrease over their respective lives as currency exchange rates fluctuate. In addition, we offer foreign exchange contracts to small and medium size businesses with international payment needs. Foreign exchange contract products, which include spot and simple forward contracts, represent agreements to exchange the currency of one country for the currency of another country at an agreed-upon price on an agreed-upon settlement date. Exposure to loss on these contracts will increase or decrease over their respective lives as currency exchange and interest rates fluctuate. These types of products expose us to a degree of risk. To manage the risk that may occur from fluctuations in world currency markets, we enter into offsetting short-term forward foreign exchange contracts with terms that match the amount and the maturity date of each single-currency certificate of deposit, money market deposit instrument, or foreign exchange contract. In addition, we enter into offsetting options with exactly the same terms as the foreign currency linked MarketSafe® deposits, which provide an economic hedge. For more information, including the notional amount and fair value, of

these derivatives, see Note 13 in our condensed consolidated financial statements.

#### Off Balance Sheet Arrangements

During 2013, we created a special purpose wholly-owned subsidiary of the Company, EverBank Funding, LLC (EverBank Funding) to facilitate private securitization transactions. Total securitizations by EverBank Funding through September 30, 2013 were \$610.6 million. These securitization transactions issued certificates that were offered and sold to qualified institutional buyers. Unless so registered, the offered certificates may not be offered or sold in the United States except pursuant to an exemption from the registration requirements of the Securities Act of 1933, as amended.

In connection with both transactions, we sold, on a servicing-retained basis, certain residential mortgage loans we originated to unaffiliated purchasers (the Sellers). The Sellers subsequently sold such mortgage loans to EverBank Funding, which transferred the mortgage loans to the trusts in exchange for the offered certificates and certain non-offered certificates. None of the certificates were retained by EverBank Funding or any affiliate of EverBank Funding.

We retained the servicing rights associated with the mortgages held by the trusts that performed the securitizations, and we will continue to service the loans. Additionally, the creditors of the trusts have no recourse against us except in accordance with our obligations under standard representations and warranties. Neither of the trusts has been consolidated into the financial statements as we are not the primary beneficiary of the trusts.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

See the “Asset and Liability Management and Market Risk” section of Management’s Discussion and Analysis of Financial Condition and Results of Operations.

Item 4. Controls and Procedures

Disclosure Controls and Procedures

The Company’s management, including the Chief Executive Officer and Chief Financial Officer, conducted an evaluation of the effectiveness of the Company’s disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the Exchange Act)) as of September 30, 2013. The Company’s disclosure controls and procedures are designed to ensure that information required to be disclosed by the Company in the reports that it files or submits under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in the U.S. Securities and Exchange Commission’s rules and forms, and that such information is accumulated and communicated to the Company’s management, including the Company’s Chief Executive Officer and Chief Financial Officer, to allow timely decisions regarding required disclosure. Based on this evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the Company’s disclosure controls and procedures were effective as of September 30, 2013.

Changes in Internal Control over Financial Reporting

There were no changes in the Company’s internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) that occurred during the quarter ended September 30, 2013 that have materially affected or are reasonably likely to materially affect the Company’s internal control over financial reporting.

Part II. Other Information

Item 1. Legal Proceedings

We are subject to various claims and legal actions in the ordinary course of our business. Some of these matters include employee-related matters and inquiries and investigations by governmental agencies regarding our employment practices. We are not presently party to any legal proceedings the resolution of which we believe would have a material adverse effect on our business, operating results, financial condition or cash flows.

In addition to the legal proceedings previously disclosed in our Annual Report on Form 10-K as filed with the SEC on March 15, 2013, as updated in our Quarterly Reports on Form 10-Q as filed with the SEC on April 30, 2013 and July 31, 2013, we are currently subject to the following legal proceedings:

Mortgage Electronic Registration Services Related Litigation

MERS, EverHome Mortgage Company, EverBank and other lenders and servicers that have held mortgages through MERS are parties to the following class action lawsuits where the plaintiffs allege improper mortgage assignment and, in some instances, the failure to pay recording fees in violation of state recording statutes: (1) State of Ohio, ex. rel. David P. Joyce, Prosecuting Attorney General of Geauga County, Ohio v. MERSCORP, Inc., Mortgage Electronic Registration Services, Inc. et al. filed in October 2011 in the Court of Common Pleas for Geauga County, Ohio, later removed to federal court and subsequently remanded to state court; (2) State of Iowa, by and through Darren J. Raymond, Plymouth County Attorney v. MERSCORP, Inc., Mortgage Electronic Registration Services, Inc., et al., filed in March 2012 in the Iowa District Court for Plymouth County, later removed to federal court and now on appeal to the United States Court of Appeals for the Eighth Circuit; (3) Boyd County, ex. rel. Phillip Hedrick, County Attorney of Boyd County, Kentucky, et al. v. MERSCORP, Inc., Mortgage Electronic Registration Services, Inc., et al. filed in April 2012 in the United States District Court for the Eastern District of Kentucky; (4) St. Clair County, Illinois v. Mortgage Electronic Registration Systems, Inc., MERSCORP, Inc. et al., filed in May 2012 in the Circuit Court of the Twentieth Judicial Circuit, St. Clair County, Illinois; (5) Macon County, Illinois v. MERSCORP, Inc., Mortgage Electronic Registration Systems, Inc., et al. filed in July 2012 in the Circuit Court of the Sixth Judicial Circuit, Macon County, Illinois and later removed to federal court; (6) County of Multnomah v. Mortgage Electronic Registration Systems, Inc., et al., filed in December 2012 in an Oregon state court, later removed to federal court and subsequently remanded to state court; (7) County of Union Illinois, et al. v. MERSCORP, Inc., Mortgage Electronic Registration Services, Inc., et al. filed in April 2012 in the Circuit Court for the First Judicial Circuit, Union County, Illinois, later removed to federal court and now pending on appeal in the United States Court of Appeals for the Seventh Circuit; (8) County of Ramsey and County of Hennepin, Minnesota v. MERSCORP Holdings, Inc., et al. filed in February 2013 in the Second Judicial District Court, subsequently removed to the U.S. District Court, District of Minnesota and now on appeal to the United States Court of Appeals for the Eighth Circuit; and (9) Jackson County, Missouri v. MERSCORP, Inc., Mortgage Electronic Registrations Systems, Inc., et al., filed in April 2012 in the Circuit Court of Jackson County, Missouri and later removed to federal court where the court granted the defendants' motion to dismiss, and now stayed due to the bankruptcy filing of defendant GMAC. In these class action lawsuits, the plaintiffs in each case generally seek judgment from the courts compelling the defendants to record all assignments, restitution, compensatory and punitive damages, and appropriate attorneys' fees and costs. We believe the plaintiff's claims are without merit and intend to contest all such claims vigorously. EverBank was previously subject to one additional lawsuit: (1) Christian County Clerk, et al. v. MERS and EverHome Mortgage Company filed in April 2011 in the United States District Court for the Western District of Kentucky, which was the subject of an appeal in the United States Court of Appeals for the Sixth Circuit that upheld the lower court's dismissal of the complaint.

Item 1A. Risk Factors

Our operations and financial results are subject to various risks and uncertainties, which could adversely affect our business, financial condition, results of operations, cash flows, and the trading price of our common stock. You should carefully consider the risks and uncertainties described below and in our prior filings. Additional risks not presently known to us or that we currently believe are immaterial may also significantly impair our business, financial condition and results of operation. The following discussion of risk factors should be considered in addition to the risk factors previously disclosed in Part I, Item 1A, "Risk Factors" in our Annual Report on Form 10-K for the year ended

December 31, 2012, as filed with the SEC on March 15, 2013. The Risk Factors set forth the material factors that could affect our financial condition and operations. Readers should not consider any descriptions of such factors to be a complete set of all potential risks that could affect the Company.

Downgrades of the U.S. sovereign credit rating or its perceived credit worthiness could have a material adverse effect on our business, financial position and results of operations.

The current uncertainty over U.S. fiscal policy could lead to future or further downgrades of the U.S. sovereign credit rating by one or more of the major credit rating agencies. The impact of any future or further downgrade of the U.S. sovereign credit rating or negative perception of the U.S. government's creditworthiness could adversely affect the U.S. and global financial markets and economic conditions which may, directly or indirectly, have adverse effects on our operations, earnings and financial condition. Among other things, a credit rating downgrade could adversely impact the value of the residential agency MBS held in our investment portfolio and may trigger requirements that we post additional collateral for trades relative to these securities.

We and EverBank have entered into a consent order with the OTS, and failure to comply with the requirements of the consent order could have a negative impact on us and/or EverBank.

On April 13, 2011, we and EverBank each entered into a consent order with the OTS with respect to EverBank's mortgage foreclosure practices and our oversight of those practices. The consent orders required, among other things, that we establish a new compliance program for our mortgage servicing and foreclosure operations and that we ensure that we have dedicated resources for communicating with borrowers, policies and procedures for outsourcing foreclosure or related functions and management information systems that ensure timely delivery of complete and accurate information. We were also required to retain an independent firm to conduct a review of residential foreclosure actions that were pending from January 1, 2009 through December 31, 2010 in order to determine whether any borrowers sustained financial injury as a result of any errors, misrepresentations or deficiencies and to provide remediation as appropriate. We are working to fulfill the requirements of the consent orders. In response to the consent orders, we have established an oversight committee to monitor the implementation of the actions required by the consent orders. Furthermore, we have enhanced and updated several policies, procedures, processes and controls to help ensure the mitigation of the findings of the consent orders, and submitted them to the FRB and the OCC (the applicable successors to the OTS) for review. In addition, we have enhanced our third-party vendor management system and our compliance program, hired additional personnel

Table of Contents

and retained an independent firm to conduct foreclosure reviews. We may be subject to civil monetary penalties with respect to the consent order, but the federal banking agencies have not indicated what the amount of any such penalties would be.

In August 2013, EverBank reached an agreement with the OCC that would end its participation in the Independent Foreclosure Review program mandated by the April 2011 consent order and replace it with an accelerated remediation process. The agreement includes a cash payment of approximately \$37.4 million to be made by EverBank to a settlement fund, which would provide relief to qualified borrowers. In addition, we will contribute approximately \$6.3 million to organizations certified by the U.S. Department of Housing and Urban Development or other tax-exempt organizations that have as a principal mission providing affordable housing, foreclosure prevention and/or educational assistance to low and moderate income individuals and families. This agreement has not eliminated all of our risks associated with foreclosure-related practices and it does not protect us from potential individual borrower claims or class actions lawsuits, which could result in additional expenses. Consistent with the agreement, an amendment to the April 2011 consent order was entered on October 15, 2013. All terms of the April 2011 consent order that were not explicitly superseded by the amendment remain in effect without modification.

In October 2013, we, along with other mortgage servicers, received a letter from the OCC requesting, in connection with the April 2011 consent order, that we provide the OCC with an action plan to identify errors and remediate any borrowers serviced by EverBank for the period from January 1, 2011 through the present day, that may have been harmed by the same errors identified in the Independent Foreclosure Review. We are presently preparing our action plan for OCC review and will submit that action plan in November 2013. Any remedies or penalties that may be imposed on us as a result or arising out of the consent order, the action plan, or any other investigation or action related to mortgage origination or servicing may have a material adverse effect on our results of operations, capital base and the price of our securities.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

None.

Item 3. Default Upon Senior Securities

None.

Item 4. Mine Safety Disclosures

None.

Item 5. Other Information

None.
