Notes to Condensed Consolidated Financial Statements (unaudited)

Note 1 — Basis of Presentation

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and disclosures required by accounting principles generally accepted in the United States (“GAAP”) for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. Certain prior period information has been reclassified to conform to the current period presentation, and these reclassifications had no impact on net income or equity as previously reported. Operating results for the three months ended March 31, 2018 are not necessarily indicative of the results that may be expected for the year ending December 31, 2018.

The condensed consolidated balance sheet at December 31, 2017 has been derived from the audited financial statements at that date but does not include all of the information and disclosures required by GAAP for complete financial statements.

Note 2 — Summary of Significant Accounting Policies

The information contained in the consolidated financial statements and accompanying notes included in the Company’s Annual Report on Form 10-K for the year ended December 31, 2017, as filed with the Securities and Exchange Commission (the “SEC”) on February 23, 2018, should be referenced when reading these unaudited condensed consolidated financial statements. Unless otherwise mentioned or unless the context requires otherwise, references herein to "South State," the "Company" "we," "us," "our" or similar references mean South State Corporation and its consolidated subsidiaries. References to the “Bank” means South State Corporation’s wholly owned subsidiary, South State Bank, a South Carolina banking corporation.

Revenue from Contracts with Customers (Topic 606) and Method of Adoption

On January 1, 2018, we adopted the requirements of Accounting Standards Update (“ASU”) 2014-09, Revenue from Contracts with Customers (“ASU Topic 606”). The majority of our revenue is derived primarily from interest income from receivables (loans) and securities. Other revenues are derived from fees received in connection with deposit accounts, mortgage banking activities including gains from the sale of loans and loan origination fees, and trust and investment advisory services. The core principle of the new standard is that a company should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services.

The Company adopted ASU Topic 606 using the modified retrospective transition approach which does not require restatement of prior periods. The method was selected as there were no material changes in the timing of revenue recognition resulting in no comparability issues with prior periods. This adoption method is considered a change in accounting principle requiring additional disclosure of the nature of and reason for the change, which is solely a result of the adoption of the required standard. When applying the modified retrospective approach under ASU Topic 606, the Company has elected, as a practical expedient, to apply the revenue standard only to contracts that are not completed as of January 1, 2018. A completed contract is considered to be a contract for which all (or substantially all) of the revenue was recognized in accordance with revenue guidance that was in effect before January 1, 2018. There were no uncompleted contracts as of January 1, 2018 for which application of the new standard required an adjustment to retained earnings.

The following disclosures related to ASU Topic 606 involve income derived from contracts with customers. Within the scope of ASU Topic 606, we maintain contracts to provide services, primarily for investment advisory and/or custody of assets. Through our wholly-owned subsidiaries, the Bank, South State Advisory and Minis, Inc., we contract with our customers to perform IRA, Trust, and/or Custody and Agency advisory services. Total revenue recognized from these contracts with customers was \$7.5 million for the three months ended March 31, 2018. The Bank contracts with our customers to perform deposit account services. Total revenue recognized from these contracts with customers is

Table of Contents

\$25.8 million for the three months ended March 31, 2018. Due to the nature of our relationship with the customers that we provide services, we do not incur costs to obtain contracts and there are no material incremental costs to fulfill these contracts that should be capitalized.

Disaggregation of Revenue - Our portfolio of services provided to our customers consists of over 791,000 active contracts. We have disaggregated revenue according to timing of the transfer of service. Total revenue derived from contracts in which services are transferred at a point in time is \$33.8 million for the three months ended March 31, 2018. Total revenue derived from contracts in which services are transferred over time is \$4.8 million for the three months ended March 31, 2018. Revenue is recognized as the services are provided to the customers. Economic factors impacting the customers could affect the nature, amount, and timing of these cash flows, as unfavorable economic conditions could impair the customers' ability to provide payment for services. This risk is mitigated as we generally deduct payments from customers' accounts as services are rendered.

Contract Balances - The timing of revenue recognition, billings, and cash collections results in billed accounts receivable on the balance sheet. Most contracts call for payment by a charge or deduction to the respective customer account but there are some that require a receipt of payment from the customer. For fee per transaction contracts, the customers are billed as the transactions are processed. For hourly rate and monthly service contracts related to trust and some investment revenues, the customers are billed monthly (generally as a percentage basis point of the market value of the investment account). In some cases, specific to Minis, Inc. and South State Advisory customers are billed in advance for quarterly services to be performed based on the past quarters average account balance. These do create contract liabilities or deferred revenue, as the customers pay in advance for service. Neither the contract liabilities nor the accounts receivables balances are material to the Company's balance sheet.

Performance Obligations - A performance obligation is a promise in a contract to transfer a distinct good or service to the customer, and is the unit of account in ASU Topic 606. A contract's transaction price is allocated to each distinct performance obligation and recognized as revenue when, or as, the performance obligation is satisfied. The performance obligations for these contracts are satisfied as the service is provided to the customer (either over time or at a point in time). The payment terms of the contracts are typically based on a basis point percentage of the investment account market value, fee per hour of service, or fee for service incurred. There are no significant financing components in the contracts. Excluding deposit services revenues which are mostly billed at a point in time as a fee for services incurred, all other contracts within the scope of ASU Topic 606 contain variable consideration in that fees earned are derived from market values of accounts or from hours worked for services performed which determines the amount of consideration to which we are entitled. The variability is resolved when the hours are incurred or services are provided. The contracts do not include obligations for returns, refunds, or warranties. The contracts are specific to the amounts owed to the Company for services performed during a period should the contracts be terminated.

Significant Judgements - All of the contracts create performance obligations that are satisfied at a point in time excluding the contracts billed in advance through Minis and South State Advisory and some immaterial deposit revenues. Revenue is recognized as services are billed to the customers. Variable consideration does exist for contracts related to our trust and investment services as revenues are based on market values and services performed.

We have adopted the right-to-invoice practical expedient for trust management contracts through South State Bank which we contract with our customers to perform IRA, Trust, and/or Custody services.

Note 3 — Recent Accounting and Regulatory Pronouncements

In February 2018, the Financial Accounting Standards Board (“FASB”) issued (“ASU”) No. 2018-03, Technical Corrections and Improvements to Financial Instruments-Overall (Subtopic 825-10) (“ASU 2018-03”). ASU 2018-03 updates the new financial instruments standard by clarifying issues that arisen from ASU 2016-01, but does not change the core principle of the new standard. The issues addressed in this ASU include: (1) Equity securities without a readily determinable fair value-discontinuation, (2) Equity securities without a readily determinable fair value-adjustments, (3) Forward contracts and purchased options, (4) Presentation requirements for certain fair value option liabilities, (5) Fair value option liabilities denominated in a foreign currency, (6) Transition guidance for equity securities without a readily determinable fair value, and (7) Transition and open effective date information. For public business entities, the amendments in ASU 2018-03 and ASU 2016-01 are effective for interim and annual periods beginning after December 15, 2017. An entity should apply the amendments by means of a cumulative-effect adjustment to the balance sheet as of the beginning of the fiscal year of adoption. The amendments related to equity

Table of Contents

securities without readily determinable fair values (including disclosure requirements) should be applied prospectively to equity investments that exist as of the date of adoption of ASU 2018-03 and ASU 2016-01. This guidance became effective on January 1, 2018 and the Company has determined that the implementation of this standard did not have a material impact to the Company's consolidated financial statements.

In February 2018, the FASB issued ASU No. 2018-02, Income Statement-Reporting Comprehensive Income (Topic 220): Reclassification of Certain Tax Effects from Accumulated Other Comprehensive Income; ("ASU 2018-02"). ASU 2018-02 amends ASC Topic 220 and allows a reclassification from accumulated other comprehensive income to retained earnings for stranded tax effects resulting from the Tax Cuts and Jobs Act ("Tax Reform Act"). Consequently, this amendment eliminates the stranded tax effects resulting from the Tax Reform Act and will improve the usefulness of information reported to financial statement users. However, because the amendments only related to the reclassification of the income tax effects of the Tax Reform Act, the underlying guidance that requires that the effects of the change in tax laws or rates be included in income from continuing operations is not affected. The guidance is effective for public companies for annual periods beginning on or after December 15, 2018 and interim periods within those fiscal years. Early adoption is permitted, including adoption in any interim period, (1) for public business entities for reporting periods for which financial statements have not yet been issued and (2) for all other entities for reporting periods for which financial statements have not yet been made available for issuance. This amendment should be applied either in the period of adoption or retrospectively to each period (or periods) in which the effect of the change in U.S. federal corporate income tax rate in the Tax Reform Act is recognized. The Company early adopted this amendment in the first quarter of 2018 and reclassified \$2.9 million from accumulated other comprehensive income to retained earnings for the stranded tax effects resulting from the Tax Reform Act.

In August 2017, the FASB issued ASU No. 2017-12, Derivatives and Hedging (Topic 815): Targeted Improvements to Accounting for Hedging Activities; ("ASU 2017-12"). ASU 2017-12 amends Accounting Standards Codification ("ASC") Topic 815 to better align an entity's risk management activities and financial reporting for hedging relationships through changes to both the designation and measurement guidance for qualifying hedging relationships and the presentation of hedge results. These amendments will improve the transparency of information about an entity's risk management activities and simplify the application of hedge accounting. The guidance is effective for public companies for annual periods beginning on or after December 15, 2018 and interim periods within those fiscal years. Early adoption is permitted. All transition requirements and elections should be applied to hedging relationships existing on the date of adoption. The Company is still assessing the impact of this new guidance, but does not believe it will have a material impact on the Company's consolidated financial statements.

In May 2017, the FASB issued ASU No. 2017-09, Compensation-Stock Compensation (Topic 718): Scope of Modification Accounting; ("ASU 2017-09"). ASU 2017-09 provides clarity by offering guidance on the scope of modification accounting for share-based payment awards and gives direction on which changes to the terms or conditions of these awards require an entity to apply modification accounting. Under the new guidance, modification accounting is required only if the fair value, the vesting conditions, or the classification of the award (as equity or liability) changes as a result of the change in terms or conditions. The guidance is effective prospectively for all companies for annual periods beginning on or after December 15, 2017. Early adoption is permitted. The Company adopted this standard in the first quarter of 2018 and determined that this guidance did not have a material impact on the Company's consolidated financial statements.

In March 2017, the FASB issued ASU No. 2017-08, Receivables-Nonrefundable Fees and Other Cost (Subtopic 310-20): Premium Amortization on Purchased Callable Debt Securities; ("ASU 2017-08"). ASU 2017-08 shortens the amortization period of the premium for certain callable debt securities, from the contractual maturity date to the earliest call date. The amendments do not require an accounting change for securities held at a discount; an entity will continue to amortize to the contractual maturity date the discount related to callable debt securities. The amendments apply to the amortization of premiums on callable debt securities with explicit, noncontingent call features that are

callable at fixed prices on preset dates. For public business entities, ASU 2017-08 is effective in fiscal years beginning after December 15, 2018, including interim periods within those fiscal years. For entities other than public business entities, the amendments are effective in fiscal years beginning after December 15, 2019 and in interim periods in fiscal years beginning after December 15, 2020. Early adoption is permitted for all entities, including in an interim period. The amendments should be applied on a modified retrospective basis, with a cumulative-effect adjustment to retained earnings as of the beginning of the first reporting period in which the amendments are adopted. The Company has determined that this guidance will not have a material impact on the Company's consolidated financial statements.

Table of Contents

In March 2017, the FASB issued ASU No. 2017-07, Compensation-Retirement Benefits (Topic 715): Improving the Presentation of Net Periodic Pension Cost and Net Periodic Postretirement Benefit Cost; (“ASU 2017-07”). ASU 2017-07 applies to any employer that sponsors a defined benefit pension plan, other postretirement benefit plan, or other types of benefits accounted for under Topic 715. The amendments require that an employer disaggregate the service cost component from the other components of net benefit cost, as follows (1) service cost must be presented in the same line item(s) as other employee compensation costs. These costs are generally included within income from continuing operations, but in some cases may be eligible for capitalization, (2) all other components of net benefit cost must be presented in the income statement separately from the service cost component and outside a subtotal of income from operations, if one is presented, (3) the amendments permit capitalizing only the service cost component of net benefit cost, assuming such costs meet the criteria required for capitalization by other GAAP, rather than total net benefit cost which has been permitted under prior GAAP. The guidance is effective for public business entities for fiscal years beginning after December 15, 2017, and interim periods within those years. The amendments should be adopted prospectively and allows a practical expedient that permits an employer to use the amounts disclosed in its pension and other postretirement benefit plan note for the prior periods to apply the retrospective presentation requirements. The Company adopted this standard in the first quarter of 2018 and determined that this guidance did not have a material impact on the Company’s consolidated financial statements.

In January 2017, the FASB issued ASU No. 2017-04, Intangible-Goodwill and other (Topic 350): Simplifying the Test for Goodwill Impairment; (“ASU 2017-04”). ASU 2017-04 simplifies the accounting for goodwill impairment for all entities by requiring impairment charges to be based on the first step in today’s two-step impairment test under ASC Topic 350 and eliminating Step 2 from the goodwill impairment test. As amended, the goodwill impairment test will consist of one step comparing the fair value of a reporting unit with its carrying amount. An entity should recognize a goodwill impairment charge for the amount by which the carrying amount exceeds the reporting unit’s fair value. The guidance is effective for public business entities for fiscal years beginning after December 15, 2019, and interim periods within those years. The amendments should be adopted prospectively and early adoption is permitted for interim or annual goodwill impairment tests performed on testing dates after January 1, 2017. At this point in time, the Company does not expect that this guidance will have a material impact on the Company’s consolidated financial statements.

In January 2017, the FASB issued ASU No. 2017-01, Business Combinations (Topic 805): Clarifying the Definition of a Business; (“ASU 2017-01”). ASU 2017-01 requires an entity to evaluate if substantially all of the fair value of the gross assets acquired is concentrated in a single identifiable asset or a group of similar identifiable assets; if so, the set of transferred assets and activities is not a business. The guidance also requires a business to include at least one substantive process and narrows the definition of outputs by more closely aligning it with how outputs are described in ASC Topic 606. The guidance is effective for public business entities for fiscal years beginning after December 15, 2017, and interim periods within those years. Early adoption is permitted. The Company has determined that this guidance did not have a material impact on the Company’s consolidated financial statements.

In December 2016, the FASB issued ASU No. 2016-20, Technical Corrections and Improvements to Topic 606, Revenue from Contracts with Customers; (“ASU 2016-20”). ASU 2016-20 updates the new revenue standard by clarifying issues that arisen from ASU 2014-09, but does not change the core principle of the new standard. The issues addressed in this ASU include: 1) Loan guarantee fees, 2) Impairment testing of contract costs, 3) Interaction of impairment testing with guidance in other topics, 4) Provisions for losses on construction-type and production-type contracts, 5) Scope of topic 606, 6) Disclosure of remaining performance obligations, 7) Disclosure of prior-period performance obligations, 8) Contract modifications, 9) Contract asset vs. receivable, 10) Refund liability, 11) Advertising costs, 12) Fixed-odds wagering contracts in the casino industry, 13) Cost capitalization for advisors to private funds and public funds. The updated guidance is effective for interim and annual reporting periods beginning after December 15, 2017. The amendments can be applied retrospectively to each prior reporting period or retrospectively with the cumulative effect of initially applying this new guidance recognized at the date of initial

application. The Company's revenue includes net interest income on financial assets and financial liabilities, which is explicitly excluded from the scope of ASU 2014-09, and non-interest income. ASU 2016-20, ASU 2016-08 and ASU 2014-09 became effective on January 1, 2018 and the Company refined its disclosures around the standard in the first quarter of 2018. The Company has determined that there is no material change on how the Company recognizes its revenue streams and the adoption of these standards did not have a material impact on the Company's consolidated financial statements.

Table of Contents

In August 2016, the FASB issued ASU No. 2016-15, Statement of Cash Flows (Topic 230): Classification of Certain Cash Receipts and Cash Payments: (“ASU 2016-15”). ASU 2016-15 addresses eight classification issues related to the statement of cash flows: Debt prepayment or debt extinguishment costs; Settlement of zero-coupon bonds; Contingent consideration payments made after a business combination; Proceeds from the settlement of insurance claims; Proceeds from the settlement of corporate-owned life insurance policies, including bank-owned life insurance policies; Distributions received from equity method investees; Beneficial interests in securitization transactions; and Separately identifiable cash flows and application of the predominance principle. The updated guidance is effective for interim and annual reporting periods beginning after December 15, 2017, including interim periods within those fiscal years. Early adoption is permitted. Entities will apply the standard's provisions using a retrospective transition method to each period presented. The Company adopted this standard in the first quarter of 2018 and determined that this guidance did not have a material impact on the Company’s consolidated financial statements.

In June 2016, the FASB issued ASU No. 2016-13, Financial Instruments-Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments: (“ASU 2016-13”). ASU 2016-13 requires an entity to utilize a new impairment model known as the current expected credit loss ("CECL") model to estimate its lifetime "expected credit loss" and record an allowance that, when deducted from the amortized cost basis of the financial asset, presents the net amount expected to be collected on the financial asset. The CECL model is expected to result in earlier recognition of credit losses. ASU 2016-13 also requires new disclosures for financial assets measured at amortized cost, loans and available-for-sale debt securities. The updated guidance is effective for interim and annual reporting periods beginning after December 15, 2019, including interim periods within those fiscal years. Early adoption is permitted. Entities will apply the standard's provisions as a cumulative-effect adjustment to retained earnings as of the beginning of the first reporting period in which the guidance is adopted. The Company has dedicated staff and resources in place evaluating the Company’s options including evaluating the appropriate model options and collecting and reviewing loan data for use in these models. The Company is currently still assessing the impact that this new guidance will have on its consolidated financial statements.

In March 2016, the FASB issued ASU No. 2016-08, Revenue from Contracts with Customers (Topic 606): Principal versus Agent considerations (Reporting Revenue Gross versus Net); (“ASU 2016-08”). ASU 2016-08 updates the new revenue standard by clarifying the principal versus agent implementation guidance, but does not change the core principle of the new standard. The updates to the principal versus agent guidance: (i) require an entity to determine whether it is a principal or an agent for each distinct good or service (or a distinct bundle of goods or services) to be provided to the customer; (ii) illustrate how an entity that is a principal might apply the control principle to goods, services, or rights to services, when another party is involved in providing goods or services to a customer and (iii) Clarify that the purpose of certain specific control indicators is to support or assist in the assessment of whether an entity controls a good or service before it is transferred to the customer, provide more specific guidance on how the indicators should be considered, and clarify that their relevance will vary depending on the facts and circumstances. For public business entities, the effective date and transition requirements for these amendments are the same as the effective date and transition requirements of ASU 2014-09 which is effective for interim and annual periods beginning after December 15, 2017. The amendments can be applied retrospectively to each prior reporting period or retrospectively with the cumulative effect of initially applying this new guidance recognized at the date of initial application. The Company’s revenue includes net interest income on financial assets and financial liabilities, which is explicitly excluded from the scope of ASU 2014-09, and non-interest income. ASU 2016-20, ASU 2016-08 and ASU 2014-09 became effective on January 1, 2018 and the Company refined its disclosures around the standard in the first quarter of 2018. The Company has determined that there is no material change on how the Company recognizes its revenue streams and the adoption of these standards did not have a material impact on the Company’s consolidated financial statements, other than the required disclosures.

Table of Contents

In March 2016, the FASB issued ASU No. 2016-05, Derivatives and Hedging (Topic 815): Effect of Derivative Contract Novations on Existing Hedge Accounting Relationships (“ASU 2016-05”). ASU 2016-05 requires an entity to discontinue a designated hedging relationship in certain circumstances, including termination of the derivative hedging instrument or if the entity wishes to change any of the critical terms of the hedging relationship. ASU 2016-05 amends Topic 815 to clarify that novation of a derivative (replacing one of the parties to a derivative instrument with a new party) designated as the hedging instrument would not, in and of itself, be considered a termination of the derivative instrument or a change in critical terms requiring discontinuation of the designated hedging relationship. For public business entities, the amendments in ASU 2016-05 are effective for interim and annual periods beginning after December 15, 2016. An entity has an option to apply the amendments in ASU 2016-05 on either a prospective basis or a modified retrospective basis. ASU 2016-05 became effective for the Company on January 1, 2017 and did not have a significant impact on the Company’s consolidated financial statements.

In February 2016, the FASB issued ASU No. 2016-02, Leases (Topic 842) (“ASU 2016-02”). ASU 2016-02 applies a right-of-use (ROU) model that requires a lessee to record, for all leases with a lease term of more than 12 months, an asset representing its right to use the underlying asset and a liability to make lease payments. For leases with a term of 12 months or less, a practical expedient is available whereby a lessee may elect, by class of underlying asset, not to recognize an ROU asset or lease liability. At inception, lessees must classify all leases as either finance or operating based on five criteria. Balance sheet recognition of finance and operating leases is similar, but the pattern of expense recognition in the income statement, as well as the effect on the statement of cash flows, differs depending on the lease classification. For public business entities, the amendments in ASU 2016-02 are effective for interim and annual periods beginning after December 15, 2018. In transition, lessees and lessors are required to recognize and measure leases at the beginning of the earliest period presented using a modified retrospective approach which includes a number of optional practical expedients that entities may elect to apply. The Company has reviewed its outstanding lease agreements and has centrally documented the terms of its leases. The Company is still currently evaluating the provisions of ASU 2016-02 in relation to its outstanding leases to determine the potential impact the new standard will have to the Company’s consolidated financial statements. Based on the Company’s current evaluation, the Company estimates that it would have recorded a right to use asset and a lease liability of approximately \$83 million if the standard was effective at March 31, 2018.

In January 2016, the FASB issued ASU No. 2016-01, Financial Instruments – Overall (Subtopic 825-10); Recognition and Measurement of Financial Assets and Financial Liabilities (“ASU 2016-01”). This update is intended to improve the recognition and measurement of financial instruments and it requires an entity to: (i) measure equity investments at fair value through net income, with certain exceptions; (ii) present in OCI the changes in instrument-specific credit risk for financial liabilities measured using the fair value option; (iii) present financial assets and financial liabilities by measurement category and form of financial asset; (iv) calculate the fair value of financial instruments for disclosure purposes based on an exit price and; (v) assess a valuation allowance on deferred tax assets related to unrealized losses of AFS debt securities in combination with other deferred tax assets. ASU 2016-01 also provides an election to subsequently measure certain nonmarketable equity investments at cost less any impairment and adjusted for certain observable price changes and requires a qualitative impairment assessment of such equity investments and amends certain fair value disclosure requirements. For public business entities, the amendments in ASU 2016-01 are effective for interim and annual periods beginning after December 15, 2017. An entity should apply the amendments by means of a cumulative-effect adjustment to the balance sheet as of the beginning of the fiscal year of adoption. The amendments related to equity securities without readily determinable fair values (including disclosure requirements) should be applied prospectively to equity investments that exist as of the date of adoption of the ASU 2016-01. This guidance became effective on January 1, 2018 and the Company has determined that the implementation of this standard did not have a material impact to the Company’s consolidated financial statements.

In May 2014, the FASB issued ASU 2014-09, Revenue from Contracts with Customers, Topic 606 (“ASU 2014-09”). The new standard’s core principle is that a company will recognize revenue when it transfers promised goods or

services to customers in an amount that reflects the consideration to which the company expects to be entitled in exchange for those goods or services. In doing so, companies will need to use more judgment and make more estimates than under existing guidance. These may include identifying performance obligations in the contract, estimating the amount of variable consideration to include in the transaction price and allocating the transaction price to each separate performance obligation. In August of 2015, the FASB issued ASU 2015-14, Revenue from Contracts with Customers, Topic 606: Deferral of the Effective Date, deferring the effective date of ASU 2014-09 until annual reporting periods beginning after December 15, 2017, including interim periods within that reporting period. The amendments can be applied retrospectively to each prior reporting period or retrospectively with the cumulative effect of initially applying

Table of Contents

this new guidance recognized at the date of initial application. The Company's revenue includes net interest income on financial assets and financial liabilities, which is explicitly excluded from the scope of ASU 2014-09, and non-interest income. ASU 2016-20, ASU 2016-08 and ASU 2014-09 became effective on January 1, 2018 and the Company refined its disclosures around the standard in the first quarter of 2018. The Company has determined that there is no material change on how the Company recognizes its revenue streams and the adoption of these standards did not have a material impact on the Company's consolidated financial statements.

Note 4 — Mergers and Acquisitions

The following business combinations have occurred over the past two years:

- Park Sterling Corporation ("PSC" or "Park") – November 30, 2017 – Whole bank acquisition
- Southeastern Bank Financial Corporation ("SBFC" or "Southeastern") – January 3, 2017 – Whole bank acquisition

Park Sterling Corporation Acquisition

On November 30, 2017, SSB acquired all of the outstanding common stock of PSC of Charlotte, North Carolina, the bank holding company for Park Sterling Bank ("PSB"), in a stock transaction. PSC common shareholders received 0.14 shares of the Company's common stock in exchange for each share of PSC stock resulting in the Company issuing 7,480,343 shares of its common stock. In total, the purchase price for PSC was \$693.0 million including the value of "in the money" outstanding stock options totaling \$4.3 million.

The PSC transaction was accounted for using the acquisition method of accounting and, accordingly, assets acquired, liabilities assumed and consideration exchanged were recorded at estimated fair value on the acquisition date. The following table presents the assets acquired and liabilities assumed as of November 30, 2017 and their initial and subsequent fair value estimates, as recorded by the Company. Fair values are preliminary and subject to refinement for up to a year after the closing date of the acquisition.

Explanation of fair value adjustments

(a)—Adjustment reflects marking the securities portfolio to fair value as of the acquisition date.

Edgar Filing: SOUTH STATE Corp - Form 10-Q

(b)—Adjustment reflects a reclass of \$68.7 million by SSB of Shared National Credits (loans) from loans held for investment to loans held for sale.

(c)—Adjustment reflects the fair value adjustments (discount) of \$60.9 million based on the Company's evaluation of the acquired loan portfolio. This amount excludes the allowance for loan losses ("ALLL") and fair value adjustment (discount) of \$12.5 million and \$21.3 million, respectively, recorded by PSC and is net of the \$68.7 million reclass related to the Shared National Credits noted in (b).

(d)—Adjustment reflects the fair value adjustments based on the Company's evaluation of the acquired premises and equipment.

(e)—Adjustment reflects the recording of a 1.66% Core Deposit Intangible ("CDI") on the acquired deposit accounts that totaled \$26.2 million offset by a write-off of \$73.1 million of existing goodwill and CDI acquired from PSC.

(f)—Adjustment reflects the fair value adjustments to other real estate owned ("OREO") based on the Company's evaluation of the acquired OREO portfolio.

Table of Contents

(g)—Adjustment to record deferred tax asset related to the fair value adjustments and an adjustment from the PSC tax rate to the SSB tax rate.

(h)—Adjustment reflects the write-off of accrued interest receivable and along with certain prepaid expenses.

(i)—Adjustment reflects the premium for fixed maturity time deposits of \$2.95 million offset by the write-off of existing fair value marks of \$253,000 acquired from PSC.

(j)—Adjustment reflects the fair value adjustment (discount) of \$2.4 million on PSC’s Trust Preferred Securities offset by the write-off of the existing PSC discount on its senior debt and TRUPs of \$14.0 million.

(k)—Adjustment reflects the fair value adjustments to employee benefit plans of \$1.5 million along with other adjustments of miscellaneous liabilities.

Comparative and Pro Forma Financial Information for the PSC Acquisition

The adjusted results of the Company for the period ended March 31, 2018, include the adjusted results of the acquired assets and assumed liabilities since the acquisition date of November 30, 2017 related to the PSC acquisition. Merger-related charges of \$11.3 million are recorded in the consolidated statement of income for the three month ended March 31, 2018; and include incremental costs related to closing of the acquisition, including legal, accounting and auditing, investment banker cost, termination of certain employment related contracts, travel costs, printing, supplies and other costs.

The following table discloses the impact of the merger (excluding the impact of merger-related expenses) with PSC for three month ended March 31, 2018. The table also presents certain pro forma information as if PSC had been acquired on January 1, 2017. These results combine the historical results of PSC in the Company’s consolidated statement of income and, while certain adjustments were made for the estimated impact of certain fair value adjustments and other acquisition-related activity, they are not indicative of what would have occurred had the acquisition taken place on January 1, 2017.

Merger-related costs of \$21.0 million from the SBFC acquisition were incurred during the first quarter of 2017 and were excluded from pro forma information below. In addition, no adjustments have been made to the pro formas to eliminate the provision for loan losses for the three months ended March 31, 2017 of PSC in the amount of \$678,000. No adjustments have been made to reduce the impact of any OREO write downs, investment securities sold or repayment of borrowings recognized by PSC in the three months ended March 31, 2017. Expenses related to systems conversions and other costs of integration are expected to be recorded in the second and third quarters of 2018 for the PSC merger. The Company expects to achieve further operating cost savings and other business synergies as a result of the acquisitions which are not reflected in the pro forma amounts below:

Estimated/Actual	
For PSC	Pro Forma
For the Three	Three

(Dollars in thousands)	Ended March 31, 2018	Ended March 31, 2017
Total revenues (net interest income plus noninterest income)	\$ 36,085	\$ 167,044
Net adjusted income available to the common shareholder	\$ 11,072	\$ 49,233

Southeastern Bank Financial Corporation Acquisition

On January 3, 2017, SSB acquired all of the outstanding common stock of SBFC of Augusta, Georgia, the bank holding company for Georgia Bank & Trust Company of Augusta (“GB&T”), in a stock transaction. SBFC common shareholders received 0.7307 shares of the Company’s common stock in exchange for each share of SBFC stock resulting in the Company issuing 4,978,338 shares of its common stock. In total, the purchase price for SBFC was \$435.1 million including the value of “in the money” outstanding stock options totaling \$490,000.

The SBFC transaction was accounted for using the acquisition method of accounting and, accordingly, assets acquired, liabilities assumed and consideration exchanged were recorded at estimated fair value on the acquisition date.

Table of Contents

The following table presents the assets acquired and liabilities assumed as of January 3, 2017 and their initial and subsequent fair value estimates, as recorded by the Company. The Company has up to one year after the acquisition date to make subsequent fair value adjustments.

Explanation of fair value adjustments

- (a)—Adjustment reflects marking the securities portfolio to fair value as of the acquisition date.
- (b)—Adjustment reflects the fair value adjustments of \$30.7 million based on the Company’s evaluation of the acquired loan portfolio and excludes the allowance for loan losses (“ALLL”) of \$20.1 million recorded by SBFC.
- (c)—Adjustment reflects the fair value adjustments based on the Company’s evaluation of the acquired premises and equipment.
- (d)—Adjustment reflects the recording of the core deposit intangible on the acquired deposit accounts that totaled \$18.1 million.
- (e)—Adjustment reflects the fair value adjustments to other real estate owned (“OREO”) and repossessed assets based on the Company’s evaluation of the acquired OREO and repossessed assets portfolio.
- (f)—Adjustment to record deferred tax asset related to the fair value adjustments.

Table of Contents

(g)—Adjustment reflects uncollectible portion of accrued interest receivable and loan fees receivable along with the write-off of certain prepaid expenses.

(h)—Adjustment reflects the fair value adjustments based on the Company's evaluation of other borrowings of Trust Preferred Securities with a discount of \$2.1 million, netted with premium on certain Federal Home Loan Bank ("FHLB") advances of \$1.0 million.

(i)—Adjustment reflects the fair value adjustments to employee benefit plans of \$8.3 million netted against an adjustment of other miscellaneous liabilities of \$496,000.

Note 5 — Investment Securities

Management evaluates securities for other-than-temporary impairment (“OTTI”) on at least a quarterly basis, and more frequently when economic or market concerns warrant such evaluation. Consideration is given to (1) the financial condition and near-term prospects of the issuer, (2) the outlook for receiving the contractual cash flows of the investments, (3) the length of time and the extent to which the fair value has been less than cost, (4) the intent and ability of the Company to retain its investment in the issuer for a period of time sufficient to allow for any anticipated recovery in fair value or for a debt security whether it is more-likely-than-not that the Company will be required to sell the debt security prior to recovering its fair value, and (5) the anticipated outlook for changes in the general level of interest rates. All debt securities available for sale in an unrealized loss position as of March 31, 2018 continue to perform as scheduled. As part of the Company's evaluation of its intent and ability to hold investments for a period of time sufficient to allow for any anticipated recovery in the market, the Company considers its investment strategy, cash flow needs, liquidity position, capital adequacy and interest rate risk position. The Company does not currently intend to sell the securities within the portfolio and it is not more-likely-than-not that the Company will be required to sell the debt securities; therefore, management does not consider these investments to be other-than-temporarily impaired at March 31, 2018.

Management continues to monitor all of the Company's securities with a high degree of scrutiny. There can be no assurance that the Company will not conclude in future periods that conditions existing at that time indicate some or all of its securities may be sold or are other than temporarily impaired, which would require a charge to earnings in such periods.

Table of Contents

Note 6 — Loans and Allowance for Loan Losses

The following is a summary of non-acquired loans:

(Dollars in thousands)	March 31, 2018	December 31, 2017	March 31, 2017
Non-acquired loans:			
Commercial non-owner occupied real estate:

Total FASB ASC Topic 310-20 acquired loans	\$ 3,274,938	\$ 3,507,907	\$ 1,715,642

The unamortized discount related to the acquired non-credit impaired loans totaled \$55.3 million, \$65.2 million, and \$26.3 million at March 31, 2018, December 31, 2017, and March 31, 2017, respectively.

Table of Contents

In accordance with FASB ASC Topic 310-30, the Company aggregated acquired loans that have common risk characteristics into pools of loan categories as described in the table below. The following is a summary of acquired credit impaired loans accounted for under FASB ASC Topic 310-30 (identified as credit impaired at the time of acquisition), net of related discount:

(Dollars in thousands)	March 31, 2018	December 31, 2017	March 31, 2017
FASB ASC Topic 310-30 acquired loans:			
Commercial real estate	233,277	234,595	223,156
Commercial real estate—construction and development	46,219	49,649	57,343
Residential real estate	248,766	260,787	266,484
Consumer	48,801	51,453	58,688
Commercial and industrial	24,295	26,946	26,225
Total FASB ASC Topic 310-30 acquired loans	601,358	623,430	631,896
Less allowance for loan losses	(4,084)	(4,627)	(4,556)
FASB ASC Topic 310-30 acquired loans, net	\$ 597,274	\$ 618,803	\$ 627,340

Contractual loan payments receivable, estimates of amounts not expected to be collected, other fair value adjustments and the resulting fair values of FASB ASC Topic 310-30 acquired loans impaired and non-impaired at the acquisition date for PSC (November 30, 2017) are as follows:

(Dollars in thousands)	November 30, 2017 Loans Impaired at Acquisition
Contractual principal and interest	\$ 92,600
Non-accretable difference	(12,840)
Cash flows expected to be collected	79,760
Accretable difference	(8,829)
Carrying value	\$ 70,931

The table above excludes \$2.2 billion (\$2.3 billion in contractual principal less a \$50.1 million fair value adjustment) in acquired loans at fair value that were identified as either performing with no discount related to the credit or as revolving lines of credit (commercial or consumer) as of the acquisition date and will be accounted for under FASB ASC Topic 310-20.

Contractual loan payments receivable, estimates of amounts not expected to be collected, other fair value adjustments and the resulting fair values of FASB ASC Topic 310-30 acquired loans impaired and non-impaired at the acquisition date for SBFC (January 3, 2017) are as follows:

	January 3, 2017 Loans Impaired at Acquisition
(Dollars in thousands)	
Contractual principal and interest	\$ 73,365
Non-accretable difference	(12,912)
Cash flows expected to be collected	60,453
Accretable difference	(4,603)
Carrying value	\$ 55,850

The table above excludes \$991.5 million (\$1.01 billion in contractual principal less a \$18.8 million fair value adjustment) in acquired loans at fair value that were identified as either performing with no discount related to the credit or as revolving lines of credit (commercial or consumer) as of the acquisition date and will be accounted for under FASB ASC Topic 310-20.

Table of Contents

Contractual loan payments receivable, estimates of amounts not expected to be collected, other fair value adjustments and the resulting carrying values of acquired credit impaired loans as of March 31, 2018, December 31, 2017 and March 31, 2017 are as follows:

(Dollars in thousands)	March 31, 2018	December 31, 2017	March 31, 2017
Contractual principal and interest	\$ 765,057	\$ 795,850	\$ 812,892
Non-accretable difference	(33,841)	(39,324)	(31,273)
Cash flows expected to be collected	731,216	756,526	781,619
Accretable yield	(129,858)	(133,096)	(149,723)
Carrying value	\$ 601,358	\$ 623,430	\$ 631,896
Allowance for acquired loan losses	\$ (4,084)	\$ (4,627)	\$ (4,556)

Income on acquired credit impaired loans that are not impaired at the acquisition date is recognized in the same manner as loans impaired at the acquisition date. A portion of the fair value discount on acquired non-impaired loans has been ascribed as an accretable difference that is accreted into interest income over the estimated remaining life of the loans. The remaining nonaccretable difference represents cash flows not expected to be collected.

The following are changes in the carrying value of acquired credit impaired loans:

(Dollars in thousands)	Three Months Ended March 31,	
	2018	2017
Balance at beginning of period	\$ 618,803	\$ 602,546
Fair value of acquired loans	—	55,850
Net reductions for payments, foreclosures, and accretion	(22,072)	(29,895)
Change in the allowance for loan losses on acquired loans	543	(1,161)
Balance at end of period, net of allowance for loan losses on acquired loans	\$ 597,274	\$ 627,340

The table below reflects refined accretable yield balance for acquired credit impaired loans:

(Dollars in thousands)	Three Months Ended March 31,	
	2018	2017
Balance at beginning of period	\$ 133,096	\$ 155,379
Addition from the SBFC acquisition	—	4,603

Edgar Filing: SOUTH STATE Corp - Form 10-Q

Accretion	(12,366)	(15,214)
Reclass of nonaccretable difference due to improvement in expected cash flows	9,204	5,062
Other changes, net	(76)	(107)
Balance at end of period	\$ 129,858	\$ 149,723

In the first quarter of 2018, the accretable yield balance declined by \$3.2 million as loan accretion (income) of \$12.4 million was recognized. This was partially offset by improved expected cash flows of \$9.2 million during the first quarter of 2018.

Our loan loss policy adheres to GAAP as well as interagency guidance. The ALLL is based upon estimates made by management. We maintain an ALLL at a level that we believe is appropriate to cover estimated credit losses on individually evaluated loans that are determined to be impaired as well as estimated credit losses inherent in the remainder of our loan portfolio. Arriving at the allowance involves a high degree of management judgment and results in a range of estimated losses. We regularly evaluate the adequacy of the allowance through our internal risk rating system, outside credit review, and regulatory agency examinations to assess the quality of the loan portfolio and identify problem loans. The evaluation process also includes our analysis of current economic conditions, composition of the loan portfolio, past due and nonaccrual loans, concentrations of credit, lending policies and procedures, and historical loan loss experience. While management uses available information to recognize losses on loans, future additions to the allowance may be necessary based on, among other factors, changes in economic conditions in our markets. In addition, as noted above, regulatory agencies, as an integral part of their examination process, periodically review our allowances for losses on loans. These agencies may require management to recognize additions to the allowances based on their judgments about information available to them at the time of their examination. Because of these and other factors, it is

Table of Contents

possible that the allowances for losses on loans may change. The provision for loan losses is charged to expense in an amount necessary to maintain the allowance at an appropriate level.

The ALLL on non-acquired loans consists of general and specific reserves. The general reserves are determined by applying loss percentages to the portfolio that are based on historical loss experience for each class of loans and management's evaluation and "risk grading" of the loan portfolio. Additionally, the general economic and business conditions affecting key lending areas, credit quality trends, collateral values, loan volumes and concentrations, seasoning of the loan portfolio, the findings of internal and external credit reviews and results from external bank regulatory examinations are included in this evaluation. Currently, these adjustments are applied to the non-acquired loan portfolio when estimating the level of reserve required. The specific reserves are determined on a loan-by-loan basis based on management's evaluation of our exposure for each credit, given the current payment status of the loan and the value of any underlying collateral. These are loans classified by management as doubtful or substandard. For such loans that are also classified as impaired, an allowance is established when the discounted cash flows (or collateral value or observable market price) of the impaired loan is lower than the carrying value of that loan. Generally, the need for specific reserve is evaluated on impaired loans, and once a specific reserve is established for a loan, a charge-off of that amount occurs in the quarter subsequent to the establishment of the specific reserve. Loans that are determined to be impaired are provided a specific reserve, if necessary, and are excluded from the calculation of the general reserves.

Beginning with the First Financial Holdings, Inc. acquisition in 2013, the Company segregates the acquired loan portfolio into performing loans ("non-credit impaired) and purchased credit impaired loans. The performing loans and revolving type loans are accounted for under FASB ASC 310-20, with each loan being accounted for individually. The ALLL on these loans will be measured and recorded consistent with non-acquired loans. The acquired credit impaired loans will follow the description in the next paragraph.

In determining the acquisition date fair value of purchased loans, and in subsequent accounting, the Company generally aggregates purchased loans into pools of loans with common risk characteristics. Expected cash flows at the acquisition date in excess of the fair value of loans are recorded as interest income over the life of the loans using a level yield method if the timing and amount of the future cash flows of the pool is reasonably estimable. Subsequent to the acquisition date, increases in cash flows over those expected at the acquisition date are reclassified from the non-accretable difference to accretable yield and recognized as interest income prospectively. Decreases in expected cash flows after the acquisition date are recognized by recording an ALLL. Management analyzes the acquired loan pools using various assessments of risk to determine an expected loss. The expected loss is derived based upon a loss given default based upon the collateral type and/or detailed review by loan officers and the probability of default that is determined based upon historical data at the loan level. All acquired loans managed by Special Asset Management are reviewed quarterly and assigned a loss given default. Acquired loans not managed by Special Asset Management are reviewed twice a year in a similar method to the Company's originated portfolio of loans which follow review thresholds based on risk rating categories. In the fourth quarter of 2015, the Company modified its methodology to a more granular approach in determining loss given default on substandard loans with a net book balance between \$100,000 and \$500,000 by adjusting the loss given default to 90% of the most current collateral valuation based on appraised value. Substandard loans greater than \$500,000 were individually assigned loss given defaults each quarter. Trends are reviewed in terms of accrual status, past due status, and weighted average grade of the loans within each of the accounting pools. In addition, the relationship between the change in the unpaid principal balance and change in the mark is assessed to correlate the directional consistency of the expected loss for each pool.

Table of Contents

An aggregated analysis of the changes in allowance for loan losses is as follows:

(Dollars in thousands)	Non-acquired Loans	Acquired Non-Credit Impaired Loans	Acquired Credit Impaired Loans	Total
Three Months Ended March 31, 2018:				
Balance at beginning of period	\$ 43,448	\$ —	\$ 4,627	\$ 48,075
Loans charged-off	(1,169)	(334)	—	(1,503)
Recoveries of loans previously charged off (1)	802	165	—	967
Net charge-offs	(367)	(169)	—	(536)
Provision for loan losses charged to operations	2,122	169	163	2,454
Reduction due to loan removals	—	—	(706)	(706)
Balance at end of period	\$ 45,203	\$ —	\$ 4,084	\$ 49,287
Three Months Ended March 31, 2017:				
Balance at beginning of period	\$ 36,960	\$ —	\$ 3,395	\$ 40,355
Loans charged-off	(1,297)	(389)	—	(1,686)
Recoveries of loans previously charged off (1)	669	63	—	732
Net charge-offs	(628)	(326)	—	(954)
Provision for loan losses charged to operations	2,117	326	1,264	3,707
Reduction due to loan removals	—	—	(103)	(103)
Balance at end of period	\$ 38,449	\$ —	\$ 4,556	\$ 43,005

(1) – Recoveries related to acquired credit impaired loans are recorded through other noninterest income on the consolidated statement of income and do not run through the ALLL.

The following tables present a disaggregated analysis of activity in the allowance for loan losses and loan balances for non-acquired loans:

Construction & Land Development	Commercial Non-owner Occupied	Commercial Owner Occupied	Consumer Owner Occupied	Home Equity	Commercial & Industrial	Other Income Producing Property	Consumer	Other Loans

*— The carrying value of acquired credit impaired loans includes a non accretable difference which is primarily associated with the assessment of credit quality of acquired loans.

As part of the ongoing monitoring of the credit quality of the Company's loan portfolio, management tracks certain credit quality indicators, including trends related to (i) the level of classified loans, (ii) net charge-offs, (iii) non-performing loans (see details below), and (iv) the general economic conditions of the markets that we serve.

Table of Contents

The Company utilizes a risk grading matrix to assign a risk grade to each of its loans. A description of the general characteristics of the risk grades is as follows:

- Pass—These loans range from minimal credit risk to average, however, still acceptable credit risk.
- Special mention—A special mention loan has potential weaknesses that deserve management's close attention. If left uncorrected, these potential weaknesses may result in deterioration of the repayment prospects for the loan or the institution's credit position at some future date.
- Substandard—A substandard loan is inadequately protected by the current sound worth and paying capacity of the obligor or of the collateral pledged, if any. Loans so classified must have a well-defined weakness, or weaknesses, that may jeopardize the liquidation of the debt. A substandard loan is characterized by the distinct possibility that the Bank will sustain some loss if the deficiencies are not corrected.
- Doubtful—A doubtful loan has all of the weaknesses inherent in one classified as substandard with the added characteristic that the weaknesses make collection or liquidation in full, on the basis of the currently existing facts, conditions and values, highly questionable and improbable.

Table of Contents

In the course of resolving delinquent loans, the Bank may choose to restructure the contractual terms of certain loans. Any loans that are modified are reviewed by the Bank to determine if a troubled debt restructuring (“TDR” or “restructured loan”) has occurred. The Bank designates loan modifications as TDRs when it grants a concession to a borrower that it would not otherwise consider due to the borrower experiencing financial difficulty (FASB ASC Topic 310-40). The concessions granted on TDRs generally include terms to reduce the interest rate, extend the term of the debt obligation, or modify the payment structure on the debt obligation.

Loans on nonaccrual status at the date of modification are initially classified as nonaccrual TDRs. Loans on accruing status at the date of concession are initially classified as accruing TDRs if the note is reasonably assured of repayment and performance is expected in accordance with its modified terms. Such loans may be designated as nonaccrual loans subsequent to the concession date if reasonable doubt exists as to the collection of interest or principal under the restructuring agreement. Nonaccrual TDRs are returned to accruing status when there is economic substance to the restructuring, there is documented credit evaluation of the borrower’s financial condition, the remaining balance is reasonably assured of repayment in accordance with its modified terms, and the borrower has demonstrated sustained repayment performance in accordance with the modified terms for a reasonable period of time (generally a minimum of six months). For the three months ended March 31, 2018 and 2017, the Company’s TDRs were not material.

Note 7—Other Real Estate Owned

The following is a summary of information pertaining to OREO:

(Dollars in thousands)	Three Months Ended	
	March 31,	
	2018	2017
Beginning balance	\$ 11,203	\$ 18,316
Acquired in Southeastern Bank acquisition	—	550
Acquired in Park Sterling Corp. acquisition	210	—
Additions	2,895	4,284
Writedowns	(777)	(936)
Sold	(2,458)	(2,207)
Ending Balance	\$ 11,073	\$ 20,007

At March 31, 2018, there were a total of 77 properties included in OREO compared to 101 properties at March 31, 2017. At March 31, 2018, the Company had \$2.7 million in residential real estate included in OREO and \$6.2 million in residential real estate consumer mortgage loans in the process of foreclosure.

Note 8 — Deposits

The Company's total deposits are comprised of the following:

(Dollars in thousands)	March 31, 2018	December 31, 2017	March 31, 2017
Certificates of deposit	\$ 1,765,576	\$ 1,738,384	\$ 1,060,048
Interest-bearing demand deposits	5,308,154	5,300,108	3,981,920
Non-interest bearing demand deposits	3,120,818	3,047,432	2,599,111
Savings deposits	1,464,074	1,443,918	1,388,388
Other time deposits	4,476	2,924	3,971
Total deposits	\$ 11,663,098	\$ 11,532,766	\$ 9,033,438

At March 31, 2018, December 31, 2017, and March 31, 2017, the Company had \$340.9 million, \$325.3 million, and \$196.9 million in certificates of deposits of \$250,000 and greater, respectively. At March 31, 2018, December 31, 2017, and March 31, 2017, the Company had \$35.0 million, \$43.6 million and \$55.2 million, in traditional, out-of-market brokered deposits, respectively. The increase in certificates of deposits of \$250,000 and greater from March 31, 2107 was primarily the result of deposits acquired through the merger with PSC.

Table of Contents

Note 9 — Retirement Plans

The Company and the Bank provide certain retirement benefits to their employees in the form of a non-contributory defined benefit pension plan and an employees' savings plan. The non-contributory defined benefit pension plan covers all employees hired on or before December 31, 2005, who have attained age 21, and who have completed a year of eligible service. Employees hired on or after January 1, 2006 are not eligible to participate in the non-contributory defined benefit pension plan, but are eligible to participate in the employees' savings plan. On this date, a new benefit formula applies only to participants who have not attained age 45 or who do not have five years of service.

Effective July 1, 2009, the Company suspended the accrual of benefits for pension plan participants under the non-contributory defined benefit plan. The pension plan remained suspended as of March 31, 2018.

The components of net periodic pension expense (benefit) recognized are as follows:

(Dollars in thousands)	Three Months Ended	
	2018	2017
Interest cost	\$ 270	\$ 281
Service cost	19	31
Expected return on plan assets	(582)	(553)
Recognized net actuarial loss	194	188
Net periodic pension benefit	\$ (99)	\$ (53)

Based on the immaterial nature of the components of the net periodic pension expense (benefit), the Company has recorded the entire amount in the line item salaries and employee benefits on the statement of income.

The Company did not contribute to the pension plan for the three months ended March 31, 2018, and does not expect to make any additional contributions during the remainder of 2018. The Company reserves the right to contribute between the minimum required and maximum deductible amounts as determined under applicable federal laws.

Under the provisions of Internal Revenue Code Section 401(k), electing employees are eligible to participate in the employees' savings plan after attaining age 21. Plan participants elect to contribute portions of their annual base compensation as a before tax contribution. Employer contributions may be made from current or accumulated net profits. Participants may elect to contribute 1% to 50% of annual base compensation as a before tax contribution. In

2017, employees participating in the plan received a 100% matching of their 401(k) plan contribution, up to 5% of their salary. The employees were also eligible for an additional 1% discretionary matching contribution contingent upon achievement of the Company's annual financial goals which would be paid in the first quarter of the following year. The Company met its financials goals in 2017 and paid the 1% discretionary matching contribution in the first quarter of 2018. Also in 2018, the Company changed the 100% matching of their 401(k) plan contribution to, up to 4% of the participant's salary and raised the discretionary matching contribution to 2% upon achievement of the Company's 2018 financial goals. The Company expensed \$2.4 million and \$1.6 million for the 401(k) plan during the three months ended March 31, 2018 and 2017, respectively.

Employees can enter the savings plan on or after the first day of each month. The employee may enter into a salary deferral agreement at any time to select an alternative deferral amount or to elect not to defer in the plan. If the employee does not elect an investment allocation, the plan administrator will select a retirement-based portfolio according to the employee's number of years until normal retirement age. The plan's investment valuations are generally provided on a daily basis.

Note 10 — Earnings Per Share

Basic earnings per share are calculated by dividing net income by the weighted-average shares of common stock outstanding during each period, excluding non-vested shares. The Company's diluted earnings per share are based on the weighted-average shares of common stock outstanding during each period plus the maximum dilutive effect of common stock issuable upon exercise of stock options or vesting of restricted shares. The weighted-average number of shares and equivalents are determined after giving retroactive effect to stock dividends and stock splits.

Table of Contents

The following table sets forth the computation of basic and diluted earnings per share:

(Dollars and shares in thousands, except for per share amounts)	Three Months Ended	
	2018	2017
Basic earnings per common share:		
Net income	\$ 42,326	\$ 18,264
Weighted-average basic common shares	36,646	28,892
Basic earnings per common share	\$ 1.15	\$ 0.63
Diluted earnings per share:		
Net income	\$ 42,326	\$ 18,264
Weighted-average basic common shares	36,646	28,892
Effect of dilutive securities	253	267
Weighted-average dilutive shares	36,899	29,159
Diluted earnings per common share	\$ 1.15	\$ 0.63

The calculation of diluted earnings per common share excludes outstanding stock options for which the results would have been anti-dilutive under the treasury stock method as follows:

(Dollars in thousands)	Three Months Ended March 31,	
	2018	2017
Number of shares	61,272	34,712
Range of exercise prices	\$ 91.05 to \$ 91.35	\$ 69.48 to \$ 91.35

Note 11 — Share-Based Compensation

The Company's 2004 and 2012 share-based compensation plans are long-term retention plans intended to attract, retain, and provide incentives for key employees and non-employee directors in the form of incentive and non-qualified stock options, restricted stock, and restricted stock units ("RSUs").

Stock Options

With the exception of non-qualified stock options granted to directors under the 2004 and 2012 plans, which in some cases may be exercised at any time prior to expiration and in some other cases may be exercised at intervals less than a

year following the grant date, incentive stock options granted under the plans may not be exercised in whole or in part within a year following the date of the grant, as these incentive stock options become exercisable in 25% increments pro rata over the four-year period following the grant date. The options are granted at an exercise price at least equal to the fair value of the common stock at the date of grant and expire ten years from the date of grant. No options were granted under the 2004 plan after January 26, 2012, and the 2004 plan is closed other than for any options still unexercised and outstanding. The 2012 plan is the only plan from which new share-based compensation grants may be issued. It is the Company's policy to grant options out of the 1,684,000 shares registered under the 2012 plan, of which no more than 817,476 shares can be granted as restricted stock or RSUs.

Activity in the Company's stock option plans is summarized in the following table. All information has been retroactively adjusted for stock dividends and stock splits.

	Shares	Weighted Average Price	Weighted Average Remaining (Yrs.)	Aggregate Intrinsic (000's)
Outstanding at January 1, 2018	218,689	\$ 52.75		
Granted	34,407	91.05		
Exercised	(2,240)	29.95		
Forfeited	(5,806)	91.35		
Outstanding at March 31, 2018	245,050	57.42	5.78	\$ 7,194
Exercisable at March 31, 2018	171,299	46.05	4.42	\$ 6,767
Weighted-average fair value of options granted during the year	\$ 28.01			

Table of Contents

The fair value of options is estimated at the date of grant using the Black-Scholes option pricing model and expensed over the options' vesting periods. The following weighted-average assumptions were used in valuing options issued:

	Three months ended March 31,	
	2018	2017
Dividend yield	1.46 %	1.40 %
Expected life	8.5 years	8.5 years
Expected volatility	28.0 %	37.2 %
Risk-free interest rate	2.54 %	2.43 %

As of March 31, 2018, there was \$2.0 million of total unrecognized compensation cost related to nonvested stock option grants under the plans. The cost is expected to be recognized over a weighted-average period of 1.87 years as of March 31, 2018. The total fair value of shares vested during the three months ended March 31, 2018 was \$700,000.

Restricted Stock

The Company from time-to-time also grants shares of restricted stock to key employees and non-employee directors. These awards help align the interests of these employees and directors with the interests of the shareholders of the Company by providing economic value directly related to increases in the value of the Company's stock. The value of the stock awarded is established as the fair market value of the stock at the time of the grant. The Company recognizes expenses, equal to the total value of such awards, ratably over the vesting period of the stock grants. Restricted stock grants to employees typically "cliff vest" after four years. Grants to non-employee directors typically vest within a 12-month period.

All restricted stock agreements are conditioned upon continued employment. Termination of employment prior to a vesting date, as described below, would terminate any interest in non-vested shares. Prior to vesting of the shares, as long as employed by the Company, the key employees and non-employee directors will have the right to vote such shares and to receive dividends paid with respect to such shares. All restricted shares will fully vest in the event of change in control of the Company or upon the death of the recipient.

Nonvested restricted stock for the three months ended March 31, 2018 is summarized in the following table. All information has been retroactively adjusted for stock dividends and stock splits.

Restricted Stock	Shares	Weighted-Average Grant-Date Fair Value
Nonvested at January 1, 2018	142,692	\$ 59.66
Granted	1,169	88.04
Vested	(16,442)	63.90
Nonvested at March 31, 2018	127,419	59.37

As of March 31, 2018, there was \$3.9 million of total unrecognized compensation cost related to nonvested restricted stock granted under the plans. This cost is expected to be recognized over a weighted-average period of 2.09 years as of March 31, 2018. The total fair value of shares vested during the three months ended March 31, 2018 was \$1.2 million.

Restricted Stock Units

The Company from time-to-time also grants performance and discretionary RSUs to key employees. These awards help align the interests of these employees with the interests of the shareholders of the Company by providing economic value directly related to the performance of the Company. Some performance RSU grants contain a three-year performance period while others contain a one-year performance period and a time vested requirement (generally four years from grant date). The Company communicates threshold, target, and maximum performance RSU awards and performance targets to the applicable key employees at the beginning of a performance period. Discretionary RSUs are based upon prior performance and typically cliff-vest over four years from the grant date. Dividends are not paid in respect to the awards during the performance or the vesting period. The value of the RSUs awarded is established as the

Table of Contents

fair market value of the stock at the time of the grant. The Company recognizes expenses on a straight-line basis typically over the performance and vesting periods based upon the probable performance target that will be met. For the three months ended March 31, 2018, the Company accrued for 86% of the RSUs granted, based on Management's expectations of performance.

Nonvested RSUs for the three months ended March 31, 2018 is summarized in the following table.

Restricted Stock Units	Shares	Weighted-Average Grant-Date Fair Value
Nonvested at January 1, 2018	140,036	\$ 78.49
Granted	96,363	86.26
LTIP Adjustment	(3,213)	89.40
Nonvested at March 31, 2018	233,186	81.55

As of March 31, 2018, there was \$11.7 million of total unrecognized compensation cost related to nonvested RSUs granted under the plan. This cost is expected to be recognized over a weighted-average period of 2.29 years as of March 31, 2018. The total fair value of RSUs vested during the three months ended March 31, 2018 was \$2.6 million. During the three months ended March 31, 2018, 38,365 vested restricted stock units were issued to the participants in the 2015 Long-Term Incentive Plan and 15,836 nonvested restricted stock units were issued to participants in the 2017 Management Incentive Plan.

Note 12 — Commitments and Contingent Liabilities

In the normal course of business, the Company makes various commitments and incurs certain contingent liabilities, which are not reflected in the accompanying financial statements. The commitments and contingent liabilities include guarantees, commitments to extend credit, and standby letters of credit. At March 31, 2018, commitments to extend credit and standby letters of credit totaled \$3.0 billion. The Company does not anticipate any material losses as a result of these transactions.

The Company has been named as defendant in various legal actions, arising from its normal business activities, in which damages in various amounts are claimed. The Company is also exposed to litigation risk related to the prior business activities of banks acquired through whole bank acquisitions as well as banks from which assets were acquired and liabilities assumed in FDIC-assisted transactions. Although the amount of any ultimate liability with respect to such matters cannot be determined, in the opinion of management, any such liability is not expected to have a material effect on the Company's consolidated financial statements.

Note 13 — Fair Value

FASB ASC Topic 820, Fair Value Measurements and Disclosures, defines fair value, establishes a framework for measuring fair value under accounting principles generally accepted in the United States, and enhances disclosures about fair value measurements. FASB ASC Topic 820 clarifies that fair value should be based on the assumptions market participants would use when pricing an asset or liability and establishes a fair value hierarchy that prioritizes the information used to develop those assumptions.

The Company utilizes fair value measurements to record fair value adjustments to certain assets and liabilities and to determine fair value disclosures. Available for sale securities, derivative contracts, and mortgage servicing rights (“MSRs”) are recorded at fair value on a recurring basis. Additionally, from time to time, the Company may be required to record at fair value other assets on a nonrecurring basis, such as impaired loans, OREO, and certain other assets. These nonrecurring fair value adjustments typically involve application of lower of cost or market accounting or write-downs of individual assets.

FASB ASC Topic 820 establishes a three-tier fair value hierarchy which prioritizes the inputs used in measuring fair value as follows:

Level 1 Observable inputs such as quoted prices in active markets;

Table of Contents

Inputs, other than the quoted prices in active markets, that are observable either directly or indirectly; and
Level 2
Level 3 Unobservable inputs in which there is little or no market data, which require the reporting entity to develop its own assumptions.

The following is a description of valuation methodologies used for assets recorded at fair value.

Investment Securities

Securities available for sale are valued on a recurring basis at quoted market prices where available. If quoted market prices are not available, fair values are based on quoted market prices of comparable securities. Level 1 securities include those traded on an active exchange, such as the New York Stock Exchange and The NASDAQ Stock Market, or U.S. Treasury securities that are traded by dealers or brokers in active over-the-counter markets and money market funds. Level 2 securities include mortgage-backed securities and debentures issued by government sponsored entities, municipal bonds and corporate debt securities. Securities held to maturity are valued at quoted market prices or dealer quotes similar to securities available for sale. The carrying value of FHLB stock approximates fair value based on the redemption provisions.

Mortgage Loans Held for Sale

Mortgage loans held for sale are carried at fair value. The fair values of mortgage loans held for sale are based on commitments on hand from investors within the secondary market for loans with similar characteristics. As such, the fair value adjustments for mortgage loans held for sale are recurring Level 2.

Loans

The Company does not record loans at fair value on a recurring basis. However, from time to time, a loan may be considered impaired and an ALLL may be established. Loans for which it is probable that payment of interest and principal will not be made in accordance with the contractual terms of the loan agreement are considered impaired. Once a loan is identified as individually impaired, management measures impairment using estimated fair value methodologies. The fair value of impaired loans is estimated using one of several methods, including collateral value, market value of similar debt, enterprise value, liquidation value and discounted cash flows. Those impaired loans not requiring an allowance represent loans for which the fair value of the expected repayments or collateral exceed the recorded investments in such loans. At March 31, 2018, substantially all of the impaired loans were evaluated based on the fair value of the collateral because such loans were considered collateral dependent. Impaired loans, where an allowance is established based on the fair value of collateral; require classification in the fair value hierarchy. When

the fair value of the collateral is based on an observable market price or a current appraised value, the Company considers the impaired loan as nonrecurring Level 2. When an appraised value is not available or management determines the fair value of the collateral is further impaired below the appraised value and there is no observable market price, the Company considers the impaired loan as nonrecurring Level 3.

Other Real Estate Owned

Typically OREO, consisting of properties obtained through foreclosure or in satisfaction of loans, is reported at fair value, determined on the basis of current appraisals, comparable sales, and other estimates of value obtained principally from independent sources, adjusted for estimated selling costs (Level 2). However, OREO is considered Level 3 in the fair value hierarchy because management has qualitatively applied a discount due to the size, supply of inventory, and the incremental discounts applied to the appraisals. Management also considers other factors, including changes in absorption rates, length of time the property has been on the market and anticipated sales values, which have resulted in adjustments to the collateral value estimates indicated in certain appraisals. At the time of foreclosure, any excess of the loan balance over the fair value of the real estate held as collateral is treated as a charge against the ALLL. Gains or losses on sale and generally any subsequent adjustments to the value are recorded as a component of OREO expense.

Table of Contents

Derivative Financial Instruments

Fair value is estimated using pricing models of derivatives with similar characteristics; accordingly, the derivatives are classified within Level 2 of the fair value hierarchy (see Note 15—Derivative Financial Instruments for additional information).

Mortgage servicing rights

The estimated fair value of MSR is obtained through an independent derivatives dealer analysis of future cash flows. The evaluation utilizes assumptions market participants would use in determining fair value including market discount rates, prepayment speeds, servicing income, servicing costs, default rates and other market driven data, as well as the market's perception of future interest rate movements. MSR is classified as Level 3.

Table of Contents

Assets and Liabilities Recorded at Fair Value on a Recurring Basis

The tables below present the recorded amount of assets and liabilities measured at fair value on a recurring basis.

(Dollars in thousands)	Fair Value	Quoted Prices In Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)

Table of Contents

Changes in Level 1, 2 and 3 Fair Value Measurements

When a determination is made to classify a financial instrument within Level 3 of the valuation hierarchy, the determination is based upon the significance of the unobservable factors to the overall fair value measurement. However, since Level 3 financial instruments typically include, in addition to the unobservable or Level 3 components, observable components (that is, components that are actively quoted and can be validated to external sources), the gains and losses below include changes in fair value due in part to observable factors that are part of the valuation methodology.

There were no changes in hierarchy classifications of Level 3 assets or liabilities for the three months ended March 31, 2018. A reconciliation of the beginning and ending balances of Level 3 assets and liabilities recorded at fair value on a recurring basis for the three months ended March 31, 2018 and 2017 is as follows:

(Dollars in thousands)	Assets	Liabilities
Fair value, January 1, 2018	\$ 31,119	\$ —
Servicing assets that resulted from transfers of financial assets	1,490	—
Changes in fair value due to valuation inputs or assumptions	2,516	—
Changes in fair value due to decay	(929)	—
Fair value , March 31, 2018	\$ 34,196	\$ —
Fair value, January 1, 2017	\$ 29,037	\$ —
Servicing assets that resulted from transfers of financial assets	1,385	—
Changes in fair value due to valuation inputs or assumptions	444	—
Changes in fair value due to decay	(803)	—
Fair value, March 31, 2017	\$ 30,063	\$ —

There were no unrealized losses included in accumulated other comprehensive income related to Level 3 financial assets and liabilities at March 31, 2018 or 2017.

Assets and Liabilities Recorded at Fair Value on a Nonrecurring Basis

The tables below present the recorded amount of assets and liabilities measured at fair value on a nonrecurring basis:

Quoted Prices In Active Markets	Significant Other	Significant
---------------------------------------	----------------------	-------------

Edgar Filing: SOUTH STATE Corp - Form 10-Q

(Dollars in thousands)	Fair Value	for Identical Assets (Level 1)	Observable Inputs (Level 2)	Unobservable Inputs (Level 3)
March 31, 2018:

OREO	Discounted appraisals	Collateral discounts and estimated costs to sell	28	%	21		%	20	%

Fair Value of Financial Instruments

The following methods and assumptions were used by the Company in estimating its fair value disclosures for financial instruments. In cases where quoted market prices are not available, fair values are based on estimates using present value or other valuation techniques. Those models are significantly affected by the assumptions used, including the discount rates and estimates of future cash flows. In that regard, the derived fair value estimates cannot be substantiated by comparison to independent markets and, in many cases, could not be realized in immediate settlement of the instrument. The use of different methodologies may have a material effect on the estimated fair value amounts. The fair value estimates presented herein are based on pertinent information available to management as of March 31, 2018, December 31, 2017 and March 31, 2017. Such amounts have not been revalued for purposes of these consolidated financial statements since those dates and, therefore, current estimates of fair value may differ significantly from the amounts presented herein.

The following methods and assumptions were used to estimate the fair value of each class of financial instruments for which it is practicable to estimate that value:

Cash and Cash Equivalents — The carrying amount is a reasonable estimate of fair value.

Investment Securities — Securities held to maturity are valued at quoted market prices or dealer quotes. The carrying value of FHLB stock approximates fair value based on the redemption provisions. The carrying value of the Company's investment in unconsolidated subsidiaries approximates fair value. See Note 5—Investment Securities for additional information, as well as page 40 regarding fair value.

Loans held for sale — The fair values disclosed for loans held for sale are based on commitments from investors for loans with similar characteristics.

Loans — ASU 2016-01 - Financial Instruments – Overall – Recognition and Measurement of Financial Assets and Financial Liabilities became effective for the Company on January 1, 2018. This accounting standard requires the company to calculate the fair value of our loans for disclosure purposes based on an estimated exit price. In previous periods we have valued using only discounted cash flows on fixed rate loans. Therefore, the fair value for loans for March 31, 2018 will be calculated using a different method than that used at December 31, 2017 and March 31, 2017.

With ASU 2016-01, to estimate an exit price, all loans (fixed and variable) are being valued with a discounted cash flow analyses for loans that includes the Company's estimate of future credit losses expected to be incurred over the life of the loans. Fair values for certain mortgage loans (e.g., one-to-four family residential) and other consumer loans are estimated using discounted cash flow analyses based on the Company's current rates offered for new loans of the same type, structure and credit quality. Fair values for other loans (e.g., commercial real estate and investment property mortgage loans, commercial and industrial loans) are estimated using discounted cash flow analyses, using interest rates currently being offered by the Company for loans with similar terms to borrowers of similar credit quality. Fair values for non-performing loans are estimated using a discounted cash flow analyses.

For previous periods, variable-rate loans that reprice frequently and with no significant change in credit risk, fair values are based on carrying values. Also, for all other loans where a discounted cash flow analyses was used, there was no estimate of future credit losses expected to be incurred over the life of the loans included in the valuation.

Table of Contents

Deposit Liabilities — The fair values disclosed for demand deposits (e.g., interest and non-interest bearing checking, passbook savings, and certain types of money market accounts) are, by definition, equal to the amount payable on demand at the reporting date (i.e., their carrying amounts). The carrying amounts of variable-rate, fixed-term money market accounts, and certificates of deposit approximate their fair values at the reporting date. Fair values for fixed-rate certificates of deposit are estimated using a discounted cash flow calculation that applies interest rates currently being offered on certificates to a schedule of aggregated expected monthly maturities on time deposits.

Federal Funds Purchased and Securities Sold Under Agreements to Repurchase — The carrying amount of federal funds purchased, borrowings under repurchase agreements, and other short-term borrowings maturing within ninety days approximate their fair values.

Other Borrowings — The fair value of other borrowings is estimated using discounted cash flow analysis on the Company's current incremental borrowing rates for similar types of instruments.

Accrued Interest — The carrying amounts of accrued interest approximate fair value.

Derivative Financial Instruments — The fair value of derivative financial instruments (including interest rate swaps) is estimated using pricing models of derivatives with similar characteristics.

Commitments to Extend Credit, Standby Letters of Credit and Financial Guarantees — The fair values of commitments to extend credit are estimated using the fees currently charged to enter into similar agreements, taking into account the remaining terms of the agreements and the present creditworthiness of the counterparties. For fixed-rate loan commitments, fair value also considers the difference between current levels of interest rates and the committed rates. The fair values of guarantees and letters of credit are based on fees currently charged for similar agreements or on the estimated costs to terminate them or otherwise settle the obligations with the counterparties at the reporting date.

Table of Contents

The estimated fair value, and related carrying amount, of the Company's financial instruments are as follows:

Table of Contents

Note 15 — Derivative Financial Instruments

The Company uses certain derivative instruments to meet the needs of its customers as well as to manage the interest rate risk associated with certain transactions. The following table summarizes the derivative financial instruments utilized by the Company:

(Dollars in thousands)	Balance Sheet Location	Notional Amount	March 31, 2018		Notional Amount	March 31, 2017	
			Estimated Fair Value Gain	Loss		Estimated Fair Value Gain	Loss
Cash flow hedges of interest rate risk:							
Pay fixed rate swap with counterparty	Other Liabilities	\$ 8,000	\$ —	\$ 162	\$ 8,000	\$ —	\$ 426
Fair value hedge of interest rate risk:							
Pay fixed rate swap with counterparty	Other Liabilities	\$ 2,824	\$ —	\$ 21	\$ —	\$ —	\$ —
Not designated hedges of interest rate risk:							
Customer related interest rate contracts:							
Matched interest rate swaps with borrowers	Other Assets and Other Liabilities	\$ 282,047	\$ 146	\$ 5,908	\$ 13,768	\$ 133	\$ —
Matched interest rate swaps with counterparty	Other Assets and Other Liabilities	\$ 282,047	\$ 5,609	\$ 3	\$ 13,768	\$ —	\$ 121
Not designated hedges of interest rate risk - mortgage banking activities:							
Contracts used to hedge mortgage servicing rights	Other Assets	\$ 69,000	\$ 390	\$ —	\$ 98,000	\$ 214	\$ —
Forward sales commitments used to hedge mortgage pipeline	Other Assets	\$ 98,860	\$ 1,275	\$ —	\$ 114,079	1,679	\$ —
Total derivatives		\$ 742,778	\$ 7,420	\$ 6,094	\$ 247,615	\$ 2,026	\$ 547

Cash Flow Hedge of Interest Rate Risk

The Company is exposed to interest rate risk in the course of its business operations and manages a portion of this risk through the use of derivative financial instruments, in the form of interest rate swaps. The Company accounts for its interest rate swap that is classified as a cash flow hedge in accordance with FASB ASC 815, Derivatives and Hedging, which requires that all derivatives be recognized as assets or liabilities on the balance sheet at fair value. For more information regarding the fair value of the Company's derivative financial instruments, see Note 13 to these financial statements.

The Company utilizes an interest rate swap agreement to essentially convert a portion of its variable-rate debt to a fixed rate (cash flow hedge). For derivatives designated as hedging exposure to variable cash flows of a forecasted transaction (cash flow hedge), the effective portion of the derivative's gain or loss is initially reported as a component of other comprehensive income and subsequently reclassified into earnings when the forecasted transaction affects earnings or when the hedge is terminated. The ineffective portion of the gain or loss is reported in earnings immediately. For derivatives that are not designated as hedging instruments, changes in the fair value of the derivatives are recognized in earnings immediately.

When applying hedge accounting for derivatives, the Company establishes a method for assessing the effectiveness of the hedging derivative and a measurement approach for determining the ineffective aspect of the hedge upon the inception of the hedge.

During 2009, the Company entered into a forward starting interest rate swap agreement with a notional amount of \$8.0 million to manage interest rate risk due to periodic rate resets on its junior subordinated debt issued by SCBT Capital Trust II, an unconsolidated subsidiary of the Company established for the purpose of issuing trust preferred securities. The Company hedges the variable rate cash flows of subordinated debt against future interest rate increases by using an interest rate swap that effectively fixed the rate on the debt beginning on June 15, 2010, at which time the debt contractually converted from a fixed interest rate to a variable interest rate. This hedge expires on June 15, 2019. The notional amount on which the interest payments are based will not be exchanged. This derivatives contract calls for the Company to pay a fixed rate of 4.06% on \$8.0 million notional amount and receive a variable rate of three-month LIBOR on the \$8.0 million notional amount.

The Company recognized an after-tax unrealized gain on its cash flow hedge in other comprehensive income of \$65,000 and \$44,000 for the three months ended March 31, 2018 and 2017, respectively. The Company recognized a \$162,000 cash flow hedge liability in other liabilities on the balance sheet at March 31, 2018, compared to a \$426,000

Table of Contents

liability at March 31, 2017. There was no ineffectiveness in the cash flow hedge during the three months ended March 31, 2018 and 2017.

Credit risk related to the derivative arises when amounts receivable from the counterparty (derivatives dealer) exceed those payable. The Company controls the risk of loss by only transacting with derivatives dealers that are national market makers whose credit ratings are strong. Each party to the interest rate swap is required to provide collateral in the form of cash or securities to the counterparty when the counterparty's exposure to a mark-to-market replacement value exceeds certain negotiated limits. These limits are typically based on current credit ratings and vary with ratings changes. As of March 31, 2018 and 2017, the Company provided \$300,000 and \$550,000 of collateral, respectively, which is included in cash and cash equivalents on the balance sheet as interest-bearing deposits with banks. Also, the Company has a netting agreement with the counterparty.

Balance Sheet Fair Value Hedge

The Company maintains one loan swap, with an aggregate notional amount of \$2.8 million at March 31, 2018, accounted for as fair value hedges in accordance with ASC 815, Derivatives and Hedging. This derivative protects the company from interest rate risk caused by changes in the LIBOR curve in relation to a certain designated fixed rate loan. The derivative converts the fixed rate loan to a floating rate. Settlement occurs in any given period where there is a difference in the stated fixed rate and variable rate. The fair value of this hedge is recorded in other assets and in other liabilities. All changes in fair value are recorded through earnings as noninterest income. There was no gain or loss recorded on this derivative for the three months ended March 31, 2018 or 2017.

Non-designated Hedges of Interest Rate Risk

Customer Swap

The Company maintains interest rate swap contracts with customers that are classified as non-designated hedges and are not speculative in nature. These agreements are designed to convert customer's variable rate loans with the Company to fixed rate. These interest rate swaps are executed with loan customers to facilitate a respective risk management strategy and allow the customer to pay a fixed rate of interest to the Company. These interest rate swaps are simultaneously hedged by executing offsetting interest rate swaps with unrelated market counterparties to minimize the net risk exposure to the Company resulting from the transactions and allow the Company to receive a variable rate of interest. The interest rate swaps pay and receive interest based on a floating rate based on one month LIBOR plus credit spread, with payments being calculated on the notional amount. The interest rate swaps are settled monthly with varying maturities.

As the interest rate swaps associated with this program do not meet the strict hedge accounting requirements, changes in the fair value of both the customer swaps and the offsetting swaps are recognized directly in earnings. As of March 31, 2018, the interest rate swaps had an aggregate notional amount of approximately \$564.1 million and the fair value of the interest rate swap derivatives are recorded in other assets at \$5.7 million and in other liabilities at \$5.9 million for a net liability position of \$156,000, which was recorded through earnings. The fair value of the interest rate swap derivative with the derivatives dealer was in a net asset position of \$12,000 at March 31, 2017.

Mortgage Banking

The Company also has derivatives contracts that are classified as non-designated hedges. These derivatives contracts are a part of the Company's risk management strategy for its mortgage banking activities. These instruments may include financial forwards, futures contracts, and options written and purchased, which are used to hedge MSR's; while forward sales commitments are typically used to hedge the mortgage pipeline. Such instruments derive their cash flows, and therefore their values, by reference to an underlying instrument, index or referenced interest rate. The Company does not elect hedge accounting treatment for any of these derivative instruments and as a result, changes in fair value of the instruments (both gains and losses) are recorded in the Company's consolidated statements of income in mortgage banking income.

Table of Contents

Mortgage Servicing Rights

Derivatives contracts related to MSRs are used to help offset changes in fair value and are written in amounts referred to as notional amounts. Notional amounts provide a basis for calculating payments between counterparties but do not represent amounts to be exchanged between the parties, and are not a measure of financial risk. On March 31, 2018, the Company had derivative financial instruments outstanding with notional amounts totaling \$69.0 million related to MSRs, compared to \$98.0 million on March 31, 2017. The estimated net fair value of the open contracts related to the MSRs was recorded as a gain of \$390,000 at March 31, 2018, compared to a gain of \$214,000 at March 31, 2017.

Mortgage Pipeline

The following table presents the Company's notional value of forward sale commitments and the fair value of those obligations along with the fair value of the mortgage pipeline.

(Dollars in thousands)	March 31, 2018	December 31, 2017	March 31, 2017
Mortgage loan pipeline	\$ 92,647	\$ 71,477	\$ 117,666
Expected closures	69,485	53,608	88,250
Fair value of mortgage loan pipeline commitments	1,190	920	2,066
Forward sales commitments	98,860	89,317	114,079
Fair value of forward commitments	85	19	(387)

Note 16 — Capital Ratios

The Company is subject to regulations with respect to certain risk-based capital ratios. These risk-based capital ratios measure the relationship of capital to a combination of balance sheet and off-balance sheet risks. The values of both balance sheet and off-balance sheet items are adjusted based on the rules to reflect categorical credit risk. In addition to the risk-based capital ratios, the regulatory agencies have also established a leverage ratio for assessing capital adequacy. The leverage ratio is equal to Tier 1 capital divided by total consolidated on-balance sheet assets (minus amounts deducted from Tier 1 capital). The leverage ratio does not involve assigning risk weights to assets.

In July 2013, the Federal Reserve announced its approval of a final rule to implement the regulatory capital reforms developed by the Basel Committee on Banking Supervision ("Basel III"), among other changes required by the Dodd-Frank Wall Street Reform and Consumer Protection Act. The new rules became effective January 1, 2015, subject to a phase-in period for certain aspects of the new rules.

As applied to the Company and the Bank, the new rules include a new minimum ratio of common equity Tier 1 capital ("CET1") to risk-weighted assets of 4.5%. The new rules also raised the minimum required ratio of Tier 1 capital to risk-weighted assets from 4% to 6%. The minimum required leverage ratio under the new rules is 4%. The minimum required total capital to risk-weighted assets ratio remains at 8% under the new rules.

In order to avoid restrictions on capital distributions and discretionary bonus payments to executives, under the new rules a covered banking organization is also required to maintain a "capital conservation buffer" in addition to its minimum risk-based capital requirements. This buffer is required to consist solely of common equity Tier 1, and the buffer applies to all three risk-based measurements (CET1, Tier 1 capital and total capital). The capital conservation buffer will be phased in incrementally over time, beginning January 1, 2016 and becoming fully effective on January 1, 2019, and will ultimately consist of an additional amount of Tier 1 common equity equal to 2.5% of risk-weighted assets.

The Bank is also subject to the regulatory framework for prompt corrective action, which identifies five capital categories for insured depository institutions (well capitalized, adequately capitalized, undercapitalized, significantly undercapitalized, and critically undercapitalized) and is based on specified thresholds for each of the three risk-based regulatory capital ratios (CET1, Tier 1 capital and total capital) and for the leverage ratio.

Table of Contents

The following table presents actual and required capital ratios as of March 31, 2018, December 31, 2017 and March 31, 2017 for the Company and the Bank under the Basel III capital rules. The minimum required capital amounts presented include the minimum required capital levels as of March 31, 2018 based on the phase-in provisions of the Basel III Capital Rules and the minimum required capital levels as of January 1, 2019 when the Basel III Capital Rules have been fully phased-in. Capital levels required to be considered well capitalized are based upon prompt corrective action regulations, as amended to reflect the changes under the Basel III Capital Rules.

	Actual		Minimum Capital Required - Basel III Phase-In Schedule Capital		Minimum Capital Required - Basel III Fully Phased In Capital		Required to be Considered Well Capitalized Capital	
(Dollars in thousands)	Amount	Ratio	Amount	Ratio	Amount	Ratio	Amount

South State Bank (the Bank)	998,061	12.37 %	584,750	7.25 %	685,569	8.50 %	645,241	
Total capital to risk-weighted assets:								
Consolidated	1,074,107	13.31 %	746,199	9.25 %	847,037	10.50 %	806,702	
South State Bank (the Bank)	1,041,277	12.91 %	746,060	9.25 %	846,879	10.50 %	806,552	
Tier 1 capital to average assets (leverage ratio):								
Consolidated	1,030,559	10.05 %	410,054	4.00 %	410,054	4.00 %	512,567	
South State Bank (the Bank)	998,061	9.75 %	409,567	4.00 %	409,567	4.00 %	511,959	

As of March 31, 2018, December 31, 2017, and March 31, 2017, the capital ratios of the Company and the Bank were well in excess of the minimum regulatory requirements and exceeded the thresholds for the “well capitalized” regulatory classification.

Note 17—Goodwill and Other Intangible Assets

The carrying amount of goodwill was \$1.0 billion at March 31, 2018. The Company added \$258.3 million in goodwill related to the SBFC merger during the first quarter of 2017 and \$403.0 million related to the PSC merger during the fourth quarter of 2017. The Company’s other intangible assets, consisting of core deposit intangibles, noncompete

intangibles, and client list intangibles are included on the face of the balance sheet. The Company added

51

Table of Contents

\$18.1 million and \$26.2 million in core deposit intangibles related to the SBFC and PSC mergers, respectively. The following is a summary of gross carrying amounts and accumulated amortization of other intangible assets:

(Dollars in thousands)	March 31, 2018	December 31, 2017	March 31, 2017
Gross carrying amount	\$ 126,449	\$ 126,449	\$ 100,274
Accumulated amortization	(56,073)	(52,660)	(44,813)
	\$ 70,376	\$ 73,789	\$ 55,461

Amortization expense totaled \$3.4 million and \$2.5 million for the three months ended March 31, 2018 and 2017, respectively. Other intangibles are amortized using either the straight-line method or an accelerated basis over their estimated useful lives, with lives generally between two and 15 years. Estimated amortization expense for other intangibles for each of the next five quarters is as follows:

(Dollars in thousands)	
Quarter ending:	
June 30, 2018	\$ 3,401
September 30, 2018	3,400
December 31, 2018	3,400
March 31, 2019	3,156
June 30, 2019	3,144
Thereafter	53,875
	\$ 70,376

Note 18 — Loan Servicing, Mortgage Origination, and Loans Held for Sale

As of March 31, 2018, December 31, 2017, and March 31, 2017, the portfolio of residential mortgages serviced for others, which is not included in the accompanying balance sheets, was \$3.0 billion, \$2.9 billion, and \$2.8 billion, respectively. Servicing loans for others generally consists of collecting mortgage payments, maintaining escrow accounts and disbursing payments to investors. The amount of contractually specified servicing fees earned by the Company during the three months ended March 31, 2018 and March 31, 2017 was \$1.9 million and \$1.8 million, respectively. Servicing fees are recorded in mortgage banking income in the Company's consolidated statements of income.

At March 31, 2018, December 31, 2017, and March 31, 2017, MSR's were \$34.2 million, \$31.1 million, and \$30.1 million on the Company's consolidated balance sheets, respectively. MSR's are recorded at fair value with changes in fair value recorded as a component of mortgage banking income in the consolidated statements of income. The market value adjustments related to MSR's recorded in mortgage banking income for the three months ended March 31, 2018 and March 31, 2017 were gains of \$2.5 million and \$444,000, respectively. The Company has used various free standing derivative instruments to mitigate the income statement effect of changes in fair value due to changes in market value adjustments and to changes in valuation inputs and assumptions related to MSR's.

See Note 13 — Fair Value for the changes in fair value of MSR's. The following table presents the changes in the fair value of the offsetting hedge.

(Dollars in thousands)	Three Months Ended	
	March 31, 2018	March 31, 2017
Increase in fair value of MSR's	\$ 2,516	\$ 444
Decay of MSR's	(929)	(803)
Gain (loss) related to derivatives	(1,554)	266
Net effect on statements of income	\$ 33	\$ (93)

The fair value of MSR's is highly sensitive to changes in assumptions and fair value is determined by estimating the present value of the asset's future cash flows utilizing market-based prepayment rates, discount rates and other assumptions validated through comparison to trade information, industry surveys and with the use of independent third party appraisals. Changes in prepayment speed assumptions have the most significant impact on the fair value of MSR's. Generally, as interest rates increase, mortgage loan prepayments decelerate due to decreased refinance activity, which

Table of Contents

results in a increase in the fair value of the MSR. Measurement of fair value is limited to the conditions existing and the assumptions utilized as of a particular point in time, and those assumptions may not be appropriate if they are applied at a different time. See Note 13 — Fair Value for additional information regarding fair value.

The characteristics and sensitivity analysis of the MSRs are included in the following table.

(Dollars in thousands)	March 31, 2018		December 31, 2017		March 31, 2017	
Composition of residential loans serviced for others						
Fixed-rate mortgage loans	99.7	%	99.7	%	99.6	%
Adjustable-rate mortgage loans	0.3	%	0.3	%	0.4	%
Total	100.0	%	100.0	%	100.0	%
Weighted average life	8.45	years	7.64	years	7.68	years
Constant Prepayment rate (CPR)	6.3	%	7.7	%	7.8	%
Weighted average discount rate	9.6	%	9.6	%	9.8	%
Effect on fair value due to change in interest rates						
25 basis point increase	\$ 1,025		\$ 1,485		\$ 1,375	
50 basis point increase	1,791		2,664		2,431	
25 basis point decrease	(1,439)		(1,850)		(1,746)	
50 basis point decrease	(3,189)		(4,014)		(3,774)	

The sensitivity calculations in the previous table are hypothetical and should not be considered to be predictive of future performance. Changes in fair value based on adverse changes in assumptions generally cannot be extrapolated because the relationship of the changes in assumptions to fair value may not be linear. Also, the effects of an adverse variation in a particular assumption on the fair value of the MSRs is calculated without changing any other assumptions, while in reality, changes in one factor may result in changing another, which may magnify or contract the effect of the change.

Custodial escrow balances maintained in connection with the loan servicing were \$20.9 million and \$18.2 million at March 31, 2018 and March 31, 2017, respectively.

Whole loan sales were \$154.9 million and \$177.7 million for the three months ended March 31, 2018 and March 31, 2017, respectively. For the three months ended March 31, 2018 and March 31, 2017, \$118.4 million and \$120.6 million, or 76.5% and 67.9%, respectively, were sold with the servicing rights retained by the company.

Loans held for sale have historically been comprised of residential mortgage loans awaiting sale in the secondary market, which generally settle in 15 to 45 days. Loans held for sale were \$42.7 million, \$70.9 million and \$47.0 million at March 31, 2018, December 31, 2017 and March 31, 2017, respectively. At December 31, 2017, loans held for sale included \$25.4 million in commercial loans (Shared National Credits) which were acquired in the Park Sterling acquisition that were sold in the first quarter of 2018, resulting in no material gains or losses. Loans held for sale, consisting of residential mortgage loans to be sold in the secondary market, were \$42.7 million, \$45.5 million, and \$47.0 million at March 31, 2018, December 31, 2017, and March 31, 2017, respectively.

Note 19 – Investments in Qualified Affordable Housing Projects

The Company has investments in qualified affordable housing projects (“QAHPs”) that provide low income housing tax credits and operating loss benefits over an extended period. The tax credits and the operating loss tax benefits that are generated by each of the properties are expected to exceed the total value of the investment made by the Company. For the three months ended March 31, 2018, tax credits and other tax benefits of \$1.2 million and amortization of \$1.0 million were recorded. For the three months ended March 31, 2017, the Company recorded tax credits and other tax benefits of \$771,000 thousand and amortization of \$587,000 million. At March 31, 2018 and 2017, the Company’s carrying value of QAHPs was \$38.7 million and \$26.2 million, respectively, with an original investment of \$49.7 million. The Company has \$17.9 million and \$9.4 million in remaining funding obligations related to these QAHPs recorded in liabilities at March 31, 2018 and 2017, respectively. None of the original investment will be repaid. The investment in QAHPs is being accounted for using the equity method.

Table of Contents

Note 20 – Repurchase Agreements

Securities sold under agreements to repurchase ("repurchase agreements") represent funds received from customers, generally on an overnight or continuous basis, which are collateralized by investment securities owned or, at times, borrowed and re-hypothecated by the Company. Repurchase agreements are subject to terms and conditions of the master repurchase agreements between the Company and the client and are accounted for as secured borrowings. Repurchase agreements are included in federal funds purchased and securities sold under agreements to repurchase on the condensed consolidated balance sheets.

At March 31, 2018, December 31, 2017 and March 31, 2017 the Company's repurchase agreements totaled \$269.5 million, \$211.1 million, and \$272.4 million, respectively. All of the Company's repurchase agreements were overnight or continuous (until-further-notice) agreements at March 31, 2018, December 31, 2017 and March 31, 2017. These borrowings were collateralized with government, government-sponsored enterprise, or state and political subdivision-issued securities with a carrying value of \$269.5 million, \$211.1 million and \$272.4 million at March 31, 2018, December 31, 2017 and March 31, 2017, respectively. Declines in the value of the collateral would require the Company to increase the amounts of securities pledged.

Note 21 – Subsequent Events

The Company has evaluated subsequent events for accounting and disclosure purposes through the date the financial statements are issued.

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

This Management's Discussion and Analysis of Financial Condition and Results of Operations ("MD&A") relates to the financial statements contained in this Quarterly Report beginning on page 3. For further information, refer to the MD&A appearing in the Annual Report on Form 10-K for the year ended December 31, 2017. Results for the three months ended March 31, 2018 are not necessarily indicative of the results for the year ending December 31, 2018 or any future period.

Overview

South State Corporation is a bank holding company headquartered in Columbia, South Carolina, and was incorporated under the laws of South Carolina in 1985. We provide a wide range of banking services and products to our customers through our wholly-owned bank subsidiary, South State Bank, a South Carolina-chartered commercial bank that opened for business in 1934. The Bank also operates Minis & Co., Inc. and South State Advisory (formerly First Southeast 401K Fiduciaries), both wholly owned registered investment advisors. The Company does not engage in any significant operations other than the ownership of our banking subsidiary.

At March 31, 2018, we had approximately \$14.7 billion in assets and 2,700 full-time equivalent employees. Through the Bank, we provide our customers with checking accounts, NOW accounts, savings and time deposits of various types, brokerage services and alternative investment products such as annuities and mutual funds, trust and asset management services, business loans, agriculture loans, real estate loans, personal use loans, home improvement loans, manufactured housing loans, automobile loans, credit cards, letters of credit, home equity lines of credit, safe deposit boxes, bank money orders, wire transfer services, correspondent banking services, and use of ATM facilities.

We have pursued, and continue to pursue, a growth strategy that focuses on organic growth, supplemented by acquisition of select financial institutions, or branches in certain market areas.

The following discussion describes our results of operations for the three months ended March 31, 2018 as compared to the three months ended March 31, 2017 and also analyzes our financial condition as of March 31, 2018 as compared to December 31, 2017 and March 31, 2017. Like most financial institutions, we derive most of our income from interest we receive on our loans and investments. Our primary source of funds for making these loans and investments is our deposits, on which we may pay interest. Consequently, one of the key measures of our success is the amount of our net interest income, or the difference between the income on our interest-earning assets, such as loans and investments, and the expense on our interest-bearing liabilities, such as deposits. Another key measure is the spread between the yield we earn on these interest-earning assets and the rate we pay on our interest-bearing liabilities.

Of course, there are risks inherent in all loans, so we maintain an ALLL to absorb probable losses on existing loans that may become uncollectible. We establish and maintain this allowance by charging a provision for loan losses against our operating earnings. In the following section, we have included a detailed discussion of this process.

In addition to earning interest on our loans and investments, we earn income through fees and other services we charge to our customers. We incur costs in addition to interest expense on deposits and other borrowings, the largest of which is salaries and employee benefits. We describe the various components of this noninterest income and noninterest expense in the following discussion.

The following section also identifies significant factors that have affected our financial position and operating results during the periods included in the accompanying financial statements. We encourage you to read this discussion and analysis in conjunction with the financial statements and the related notes and the other statistical information also included in this report.

Recent Events

Park Sterling Corporation Acquisition

On November 30, 2017, the Company acquired all of the outstanding common stock of PSC in a stock-for-stock merger. PSC common shareholders received 0.14 shares of the Company's common stock in exchange for each

Table of Contents

share of PSC common stock resulting in the Company issuing 7,480,343 shares of its common stock. In total, the purchase price for PSC was \$693.0 million including the value of “in the money” outstanding stock options totaling \$4.3 million. As a result of the merger, 53 locations were added to the Bank’s footprint, consisting of five offices in Georgia, 23 offices in South Carolina, 17 offices in North Carolina and eight offices in Virginia. See Note 4 – Mergers and Acquisitions for detail on the asset purchased and liabilities assumed through this merger.

Southeastern Bank Financial Corporation Acquisition

On January 3, 2017, SSB closed its merger with SBFC and GB&T. SSB issued 4,978,338 shares using a fixed exchange ratio of 0.7307 shares of SSB common stock for each outstanding share of SBFC common stock. The total purchase price was \$435.1 million, including the value of “in the money” outstanding stock options totaled \$490,000. GB&T had nine full service branches in Augusta, Georgia, three full service branches in Aiken, South Carolina that served individuals and businesses and a limited service loan production office in Athens, Georgia and was ranked second in market share in the Augusta, Georgia market. See Note 4 – Mergers and Acquisitions for detail on the asset purchased and liabilities assumed through this merger.

Critical Accounting Policies

We have established various accounting policies that govern the application of GAAP in the preparation of our financial statements. Significant accounting policies are described in Note 1 to the audited consolidated financial statements in our Annual Report on Form 10-K for the year ended December 31, 2017. These policies may involve significant judgments and estimates that have a material impact on the carrying value of certain assets and liabilities. Different assumptions made in the application of these policies could result in material changes in our financial position and results of operations.

Allowance for Loan Losses

The ALLL reflects the estimated losses that will result from the inability of our bank’s borrowers to make required loan payments. In determining an appropriate level for the allowance, we identify portions applicable to specific loans as well as providing amounts that are not identified with any specific loan but are derived with reference to actual loss experience, loan types, loan volumes, economic conditions, and industry standards. Changes in these factors may cause our estimate of the allowance to increase or decrease and result in adjustments to the provision for loan losses. See Note 6 — Loans and Allowance for Loan Losses in this Quarterly Report on Form 10-Q, “Provision for Loan Losses and Nonperforming Assets” in this MD&A and “Allowance for Loan Losses” in Note 1 to the audited consolidated financial statements in our Annual Report on Form 10-K for the year ended December 31, 2017 for further detailed descriptions of our estimation process and methodology related to the allowance for loan losses.

Goodwill and Other Intangible Assets

Goodwill represents the excess of the purchase price over the sum of the estimated fair values of the tangible and identifiable intangible assets acquired less the estimated fair value of the liabilities assumed in a business combination. As of March 31, 2018, December 31, 2017 and March 31, 2017, the balance of goodwill was \$999.6 million, \$999.6 million, and \$595.7 million, respectively. Goodwill has an indefinite useful life and is evaluated for impairment annually or more frequently if events and circumstances indicate that the asset might be impaired. An impairment loss is recognized to the extent that the carrying amount exceeds the asset's fair value. The goodwill impairment analysis is a two-step test. The first step, used to identify potential impairment, involves comparing each reporting unit's estimated fair value to its carrying value, including goodwill. If the estimated fair value of a reporting unit exceeds its carrying value, goodwill is not considered to be impaired. If the carrying value exceeds estimated fair value, there is an indication of potential impairment and the second step is performed to measure the amount of impairment, if any.

If required, the second step involves calculating an implied fair value of goodwill for each reporting unit for which the first step indicated impairment. The implied fair value of goodwill is determined in a manner similar to the amount of goodwill calculated in a business combination, by measuring the excess of the estimated fair value of the reporting unit, as determined in the first step, over the aggregate estimated fair values of the individual assets, liabilities and identifiable intangibles as if the reporting unit was being acquired in a business combination. If the implied fair value of goodwill exceeds the carrying value of goodwill assigned to the reporting unit, there is no impairment. If the

Table of Contents

carrying value of goodwill assigned to a reporting unit exceeds the implied fair value of the goodwill, an impairment charge is recorded for the excess. An impairment loss cannot exceed the carrying value of goodwill assigned to a reporting unit, and the loss establishes a new basis in the goodwill. Subsequent reversal of goodwill impairment losses is not permitted. Management has determined that the Company has two reporting units.

In January 2017, the FASB issued ASU No. 2017-04, which simplifies the accounting for goodwill impairment for all entities by requiring impairment charges to be based on the first step in today's two-step impairment test under ASC Topic 350 and eliminating Step 2 from the goodwill impairment test. This guidance is effective for the Company for fiscal years beginning after December 15, 2019, and interim periods within those years.

Our stock price has historically traded above its book value. As of March 31, 2018, book value was \$63.14 per common share. The lowest trading price during the first three months of 2018, as reported by the NASDAQ Global Select Market, was \$84.00 per share, and the stock price closed on March 31, 2018 at \$85.30 per share. In the event our stock was to consistently trade below its book value during the reporting period, we would consider performing an evaluation of the carrying value of goodwill as of the reporting date. Such a circumstance would be one factor in our evaluation that could result in an eventual goodwill impairment charge. We evaluated the carrying value of goodwill as of April 30, 2017, our annual test date, and determined that no impairment charge was necessary. Additionally, should our future earnings and cash flows decline and/or discount rates increase, an impairment charge to goodwill and other intangible assets may be required.

Core deposit intangibles, client list intangibles, and noncompetition ("noncompete") intangibles consist of costs that resulted from the acquisition of other banks from other financial institutions. Core deposit intangibles represent the estimated value of long-term deposit relationships acquired in these transactions. Client list intangibles represent the value of long-term client relationships for the wealth and trust management business. Noncompete intangibles represent the value of key personnel relative to various competitive factors such as ability to compete, willingness or likelihood to compete, and feasibility based upon the competitive environment, and what the Bank could lose from competition. These costs are amortized over the estimated useful lives, such as deposit accounts in the case of core deposit intangible, on a method that we believe reasonably approximates the anticipated benefit stream from this intangible. The estimated useful lives are periodically reviewed for reasonableness.

Income Taxes and Deferred Tax Assets

Income taxes are provided for the tax effects of the transactions reported in our condensed consolidated financial statements and consist of taxes currently due plus deferred taxes related to differences between the tax basis and accounting basis of certain assets and liabilities, including available for sale securities, allowance for loan losses, write downs of OREO properties, accumulated depreciation, net operating loss carry forwards, accretion income, deferred compensation, intangible assets, mortgage servicing rights, and pension plan and post retirement benefits. The deferred tax assets and liabilities represent the future tax return consequences of those differences, which will either be taxable or deductible when the assets and liabilities are recovered or settled. Deferred tax assets and liabilities are

reflected at income tax rates applicable to the period in which the deferred tax assets or liabilities are expected to be realized or settled. As a result, we revalued our deferred tax assets and liabilities at the end of 2017 due to the reduction in the Federal corporate tax rate from 35% to 21% as part of the Tax Reform Act that was passed into law. During 2017 we recorded an additional \$26.6 million of income tax expense associated with the revaluation of our deferred taxes. While we took significant efforts to estimate the impact of this revaluation, it is possible that additional refinement will be required during the current year. We believe that any refinement will emerge from any measurement period adjustments related to the acquisition of PSC, recognition of income from acquired loans, and any adjustments when our 2017 Federal and state income tax returns are filed in 2018. During the first quarter of 2018, there were no material adjustments as a result of measurement period adjustments related to the Tax Reform Act. A valuation allowance is recorded in situations where it is “more likely than not” that a deferred tax asset is not realizable. As changes in tax laws or rates are enacted, deferred tax assets and liabilities are adjusted through the provision for income taxes. We file a consolidated federal income tax return for our subsidiary bank. We evaluate the need for income tax reserves related to uncertain income tax positions but had no material reserves at March 31, 2018 or 2017.

Table of Contents

Other Real Estate Owned

OREO, consisting of properties obtained through foreclosure or through a deed in lieu of foreclosure in satisfaction of loans or through reclassification of former branch sites, is reported at the lower of cost or fair value, determined on the basis of current valuations obtained principally from independent sources, adjusted for estimated selling costs. At the time of foreclosure or initial possession of collateral, any excess of the loan balance over the fair value of the real estate held as collateral is treated as a charge against the ALLL. Subsequent adjustments to this value are described below.

Subsequent declines in the fair value of OREO below the new cost basis are recorded through valuation adjustments. Significant judgments and complex estimates are required in estimating the fair value of OREO, and the period of time within which such estimates can be considered current is significantly shortened during periods of market volatility. In response to market conditions and other economic factors, management may utilize liquidation sales as part of its problem asset disposition strategy. As a result of the significant judgments required in estimating fair value and the variables involved in different methods of disposition, the net proceeds realized from sales transactions could differ significantly from the current valuations used to determine the fair value of OREO. Management reviews the value of OREO periodically and adjusts the values as appropriate. Revenue and expenses from OREO operations as well as gains or losses on sales and any subsequent adjustments to the value are recorded as OREO expense and loan related expense, a component of non-interest expense.

Business Combinations and Method of Accounting for Loans Acquired

We account for acquisitions under FASB ASC Topic 805, Business Combinations, which requires the use of the acquisition method of accounting. All identifiable assets acquired, including loans, are recorded at fair value. No ALLL related to the acquired loans is recorded on the acquisition date because the fair value of the loans acquired incorporates assumptions regarding credit risk.

Acquired credit-impaired loans are accounted for under the accounting guidance for loans and debt securities acquired with deteriorated credit quality, found in FASB ASC Topic 310-30, Receivables—Loans and Debt Securities Acquired with Deteriorated Credit Quality, formerly American Institute of Certified Public Accountants Statement of Position 03-3, Accounting for Certain Loans or Debt Securities Acquired in a Transfer, and initially measured at fair value, which includes estimated future credit losses expected to be incurred over the life of the loans. Loans acquired in business combinations with evidence of credit deterioration are considered impaired. Loans acquired through business combinations that do not meet the specific criteria of FASB ASC Topic 310-30, but for which a discount is attributable, at least in part to credit quality, are also accounted for under this guidance. Certain acquired loans, including performing loans and revolving lines of credit (consumer and commercial), are accounted for in accordance with FASB ASC Topic 310-20, where the discount is accreted through earnings based on estimated cash flows over the estimated life of the loan.

For further discussion of the Company's loan accounting and acquisitions, see "Business Combinations and Method of Accounting for Loans Acquired" in our Annual Report on Form 10-K for the year ended December 31, 2017 and Note 4—Mergers and Acquisitions and Note 6—Loans and Allowance for Loan Losses in this Quarterly Report on Form 10-Q.

Costs and Requirements for Exceeding \$10 Billion in Total Assets

With the closing of the merger between the Company and SBFC in January 2017, we surpassed \$10.0 billion in total assets as of the closing date of the merger. Crossing over \$10.0 billion in total assets and sustaining assets in excess of \$10.0 billion for four quarters will result in a loss of interchange revenue and additional expenses associated with stress testing and FDIC insurance premiums. During 2018, our FDIC insurance costs will increase as a result of having been over \$10.0 billion in total assets for four consecutive quarters. Effective in July of 2018, the cap on interchange fees under the Durbin amendment will be in place. We estimate that when this rule becomes effective, our bankcard services income will be reduced by approximately \$8.5 million in the last half of 2018 before tax and \$6.6 million after tax. Also, as a part of crossing \$10.0 billion in total assets, we will submit our first Dodd-Frank Act Stress Test (DFAST) in July of 2019.

Table of Contents

Results of Operations

We reported consolidated net income of \$42.3 million, or diluted earnings per share (“EPS”) of \$1.15, for the first quarter of 2018 as compared to consolidated net income of \$18.3 million, or diluted EPS of \$0.63, in the comparable period of 2017, a 131.7% increase. The \$24.0 million increase in consolidated net income was primarily the net result of the following items:

- A \$37.1 million increase in interest income, which resulted both from the merger with PSC which contributed to higher investment securities income of \$1.7 million and acquired loan interest income of \$21.0 million and an increase in non-acquired loan interest income of \$14.4 million due to organic loan growth;
- A \$5.5 million increase in interest expense, which resulted from the merger with PSC as average interest-bearing liabilities increased \$2.2 billion and from an increase of 19 basis point in the cost of funds on interest-bearing liabilities due to both the addition of PSC’s funding cost which historically was higher than legacy SSB and the overall rising rate environment during 2017;
- A \$1.3 million decrease in the provision for loan losses, mainly resulted from a \$1.1 million decline in the provision for loan losses within the acquired credit impaired loan portfolio as multiple pools had releases and improved cash flows, offset by certain valuation impairments recognized on acquired credit impaired loan pools;
- A \$7.1 million increase in noninterest income, which resulted primarily from a \$3.8 million improvement in fees on deposit accounts, a \$1.6 million increase in trust and investment services income, and a \$1.4 million increase in recoveries on acquired loans;
- An \$11.7 million increase in noninterest expense, which resulted from the effects of the merger with PSC as salaries and employee benefits increased \$13.6 million, information services expense increased \$3.4 million, net occupancy and furniture and equipment expense increased \$2.6 million and amortization of intangibles increased \$906,000. These increases were partially offset by a decline in merger related expenses of \$9.3 million. The merger expense in 2017 was higher due to the merger with SBFC closing in the first quarter of 2017 and the merger with PSB closing in the fourth quarter of 2017; and
- A \$4.2 million increase in the provision for income taxes due to higher pre-tax income partially offset by the decline in our effective tax rate through the implementation of the Tax Reform Act

Our asset quality related to non-acquired loans continued to remain strong at the end of the first quarter of 2018 compared to the first quarter of 2017. Non-acquired nonperforming assets declined from \$18.7 million at March 31, 2017 to \$16.7 million at March 31, 2018, a decline of \$2.1 million which resulted from a \$3.3 million decline in OREO, partially offset by \$1.3 million increase in non-acquired nonperforming loans. Compared to the balance of non-acquired nonperforming assets at December 31, 2017, non-acquired nonperforming assets declined slightly from \$17.4 million at December 31, 2017 to \$16.7 million at March 31, 2018. Annualized net charge-offs for the first quarter of 2018 were 0.02%, or \$367,000, compared to net charge-offs in the first quarter of 2017 of 0.05%, or \$628,000, and net charge-offs in the fourth quarter of 2017 of 0.02%, or \$265,000.

The ALLL decreased to 0.67% of total non-acquired loans at March 31, 2018, down from 0.69% at March 31, 2017 and remained flat from December 31, 2017 at 0.67%. The allowance provides 3.16 times coverage of non-acquired nonperforming loans at March 31, 2018, an increase from 2.93 times at December 31, 2017, and 2.95 times at March 31, 2017. The Company continues to show solid and stable asset quality numbers and ratios.

During the first quarter of 2018, the Company had net charge-offs related to “acquired non-credit impaired loans” of \$169,000, or 0.02% annualized, and accordingly, recorded a provision for loan losses equal to the net charge-off for the same amount. Additionally, we have \$8.2 million in nonperforming loans from this loan portfolio, down from \$9.4 million at December 31, 2017 and up from \$5.0 million at March 31, 2017.

During the first quarter of 2018, the valuation allowance on acquired credit impaired loans decreased \$543,000, or 11.7%. This was due to loan removals from loans being paid off, fully charged off or transferred to OREO of \$706,000 partially offset by impairments recorded through the provision for loans losses of \$163,000.

The Company performs ongoing assessments of the estimated cash flows of its acquired credit impaired loan portfolios. In general, increases in cash flow expectations result in a favorable adjustment to interest income over the remaining life of the related loans, and decreases in cash flow expectations result in an immediate recognition of a provision for loans losses. When a provision for loan losses (impairments) has been recognized in earlier periods, subsequent improvement in cash flows will result in reversals of those impairments.

Table of Contents

During the first quarter of 2018, higher interest income resulted primarily from additional interest income from acquired loans of PSC. The fourth quarter of 2017 included only one month of balances and income from PSC, while the first quarter of 2018 included the impact of a full quarter. Below is a summary of the first quarter of 2018 assessment of the impact from the changes within the acquired loan portfolio:

- Acquired credit impaired period-end loan balances decreased by \$21.5 million, and acquired non-credit impaired period-end loan balances decreased by \$233.0 million, from December 31, 2017. In addition, the yield on acquired loans was down to 6.23% from 6.57% at December 31, 2017. The decline in the yield in the first quarter of 2018 was the result of less cash income within pools with zero carrying value and continued renewals of loans in the pools. The average balances of acquired loans increased due solely to having the balance of the PSC loans for the full quarter compared to the month of December in the fourth quarter of 2017.
- Impairment from certain loan pools of acquired credit impaired loans in the first quarter of 2018 resulted in a provision for loan losses of \$163,000 compared to an impairment of \$1.2 million in the fourth quarter of 2017.

The table below provides an analysis of the total loan portfolio yield which includes both non-acquired and acquired loans (credit impaired and non-credit impaired loan portfolios). The acquired loan yield declined from the first quarter of 2017 due to acquired credit impaired loans being renewed and the cash flow from these assets being extended out, increasing the weighted average life of the loan pools within all acquired loan portfolios. In addition, the yield on the loans acquired in the merger with PSC were lower than the existing acquired loan portfolio. These factors resulted in a lower yield on the acquired loan portfolio.

(Dollars in thousands)	Three Months Ended			
	March 31, 2018		March 31, 2017	
Average balances:				
Acquired loans, net of allowance for loan losses	\$ 4,007,757		\$ 2,384,149	
Non-acquired loans	6,596,749		5,402,372	
Total loans, excluding held for sale	\$ 10,604,506		\$ 7,786,521	
Interest income:				
Noncash interest income on acquired performing loans	\$ 9,585		\$ 4,191	
Acquired loan interest income	51,957		36,374	
Total acquired loans	61,542		40,565	
Non-acquired loans	65,192		50,779	
Total loans, excluding held for sale	\$ 126,734		\$ 91,344	
Non-taxable equivalent yield:				
Acquired loans	6.23	%	6.90	%
Non-acquired loans	4.01	%	3.81	%
Total loans, excluding held for sale	4.85	%	4.76	%

Compared to the balance at December 31, 2017, our non-acquired loan portfolio has increased \$270.4 million, or 16.9% annualized, to \$6.8 billion, driven by increases in almost all categories: consumer real estate lending by \$93.2 million, or 19.2% annualized; consumer non real estate lending by \$11.8 million, or 12.6% annualized; commercial owner occupied loans by \$34.0 million, or 10.9% annualized; commercial and industrial by \$57.2 million, or 28.5% annualized; construction/land development by \$40.3 million, or 19.7% annualized and commercial non-owner occupied by \$42.0 million, or 16.9% annualized. The acquired loan portfolio decreased by \$255.0 million to \$3.9 billion in the first quarter of 2018 compared to \$4.1 billion at December 31, 2017. This decrease was due to continued payoffs, charge-offs, transfers to OREO, and renewals of acquired loans moved to the non-acquired loan portfolio. Since March 31, 2017, the non-acquired loan portfolio has grown by \$1.2 billion, or 21.5%, driven by increases in most loan categories. Consumer real estate loans and commercial non-owner occupied real estate loans have accounted for the largest increases by \$411.6 million, or 25.0%, and \$471.5 million, or 32.5%, respectively, since March 31, 2017. Since March 31, 2017, the acquired loan portfolio increased by \$1.5 billion due to the merger with PSC. Excluding the addition of PSC's acquired loans at the date of the merger, the acquired loan portfolio declined by \$721.9 million due to

Table of Contents

continued payoffs, charge-offs, transfers to OREO, and renewals of acquired loans moved to the non-acquired loan portfolio.

Non-taxable equivalent net interest income increased \$31.6 million, or 32.5% and the non-taxable equivalent net interest margin increased to 4.19% from 4.14% during the first quarter of 2018 compared to the same period in 2017. The increase in net interest income was due to an increase in average interest-earning assets of \$2.9 billion or 30.7% from the merger with PSC and through organic loan growth. The increase in the net interest margin was mainly due to the increases in the yields on the non-acquired loan portfolio of 20 basis points and on the investment securities portfolio of 12 basis points. These positive effects on the net interest margin were partially offset by an increase in the rate on interest-bearing liabilities of 19 basis points and a decrease in the yield on the acquired loan portfolio of 67 basis points.

Compared to the fourth quarter of 2017, net interest income increased \$16.7 million or 14.9% and the non-taxable equivalent net interest margin increased 6 basis point from 4.13% during the first quarter of 2018. The increase in net interest income was due to an increase in average interest-earning assets of \$1.7 billion or 15.5% through the merger with PSC and through organic loan growth. The merger with PSC did not close until November 30, 2017 so the fourth quarter of 2017 only included the effects of the merger for one month compared to the first quarter of 2018 having the effect of the merger over the entire quarter. The increase in the net interest margin was mainly due to the increases in the yields on the non-acquired loan portfolio of 10 basis points and on the investment securities portfolio of 15 basis points. These positive effects on the net interest margin were partially offset by an increase in the rate on interest-bearing liabilities of 12 basis points and a decrease in the yield on the acquired loan portfolio of 34 basis points.

Our quarterly efficiency ratio improved to 67.2% in the first quarter of 2018 compared to 68.5% in the fourth quarter of 2017 and 77.5% in the first quarter of 2017. The improvement in the efficiency ratio compared to the fourth quarter of 2017 was the result of a 14.9% increase in net interest income and 11.3% increase in noninterest income which were partially offset by an 11.3% increase in noninterest expense. The increase in net interest income, noninterest income and noninterest expense from the fourth quarter of 2017 were all due to the effects of the merger with PSC. The main reason for the improvement in the efficiency ratio compared to the first quarter of 2017 was due to the decline in merger related expense of \$9.3 million. The merger related expense in the first quarter of 2017 was higher due to the merger with SBFC closing in the first quarter of 2017 and the merger with PSB closing in the fourth quarter of 2017.

Diluted EPS and basic EPS increased to \$1.15 and \$1.15, respectively for the first quarter of 2018, from the first quarter 2017 amounts of \$0.63 and \$0.63, respectively. This was the result of the 131.7% increase in net income being higher than the 25.8% increase in outstanding common shares.

Selected Figures and Ratios

(Dollars in thousands)	Three Months Ended			
	March 31,		2017	
	2018		2017	
Return on average assets (annualized)	1.19	%	0.68	%
Return on average equity (annualized)	7.41	%	4.74	%
Return on average tangible equity (annualized)*	14.69	%	8.87	%
Dividend payout ratio **	28.68	%	52.82	%
Equity to assets ratio	15.81	%	14.17	%
Average shareholders' equity	\$ 2,315,352		\$ 1,561,594	

* - Ratio is a non-GAAP financial measure. The section titled "Reconciliation of GAAP to non-GAAP" below provides a table that reconciles GAAP measures to non-GAAP measures.

** - See explanation of the dividend payout ratio below.

- For the three months ended March 31, 2018, return on average tangible equity increased to 14.69% compared to 8.87% for the same period in 2017. This increase was the result of the higher percentage increase in net income excluding amortization of intangible of 124.3% as compared to a 35.4% increase in average tangible equity.
- For the three months ended March 31, 2018, return on average assets increased to 1.19%, compared to 0.68% for the three months ended March 31, 2017, due to a 131.7% increase in net income offset by the effects of a 32.7% increase in average assets.
- Dividend payout ratio decreased to 28.68% for the three months ended March 31, 2018 compared with 52.82% for the three months ended March 31, 2017. The decrease from the comparable period in 2017 primarily reflects the increase in net income of 131.7% being higher than the 25.8% increase in the cash dividends declared per common

Table of Contents

share. The dividend payout ratio is calculated by dividing total dividends paid during the quarter by the total net income reported for the same period.

- Equity to assets ratio increased to 15.81% for the three months ended March 31, 2018 compared with 14.17% for the three months ended March 31, 2017. The increase from the comparable period in 2017 primarily reflects the higher percentage increase in equity of 47.0% as compared to a 31.7% increase in assets.

Reconciliation of GAAP to Non-GAAP

(Dollars in thousands)	Three Months Ended			
	March 31,			
	2018		2017	
Return on average equity (GAAP)	7.41	%	4.74	%
Effect to adjust for intangible assets	7.28	%	4.13	%
Return on average tangible equity (non-GAAP)	14.69	%	8.87	%
Average shareholders' equity (GAAP)	\$ 2,315,352		\$ 1,561,594	
Average intangible assets	(1,072,228)		(643,556)	
Adjusted average shareholders' equity (non-GAAP)	\$ 1,243,124		\$ 918,038	
Net income (GAAP)	\$ 42,326		\$ 18,264	
Amortization of intangibles	3,413		2,507	
Tax effect	(718)		(702)	
Net income excluding the after-tax effect of amortization of intangibles (non-GAAP)	\$ 45,021		\$ 20,069	

The return on average tangible equity is a non-GAAP financial measure. It excludes the effect of the average balance of intangible assets and adds back the after-tax amortization of intangibles to GAAP basis net income. Management believes that this non-GAAP measure provides additional useful information, particularly since this measure is widely used by industry analysts following companies with prior merger and acquisition activities. Non-GAAP measures should not be considered as an alternative to any measure of performance or financial condition as promulgated under GAAP, and investors should consider the company's performance and financial condition as reported under GAAP and all other relevant information when assessing the performance or financial condition of the company. Non-GAAP measures have limitations as analytical tools, and investors should not consider them in isolation or as a substitute for analysis of our results of financial condition as reported under GAAP.

Net Interest Income and Margin

Summary

Our taxable equivalent (“TE”) net interest margin for the first quarter of 2018 increased by 2 basis points from 4.20% in the first quarter of 2017 to 4.22%. This increase was due to increases in the yields on non-acquired loans of 20 basis points and on investment securities of 12 basis points partially offset by a decrease in the yield on acquired loan portfolio of 67 basis points and an increase in the cost of interest-bearing liabilities of 19 basis points.

The Non-TE net interest margin increased by 6 basis points from the fourth quarter of 2017, which was the result of the yield on interest-earning assets increasing by 16 basis point offset by the cost on interest-bearing liabilities increasing by 12 basis points during the period. The increase in the yield on interest-earning assets by 16 basis points was mainly a result of an increase in the yield on the non-acquired loan portfolio by 10 basis points and an increase in yield of investment securities of 15 basis points. These increases were offset by a decline of 34 basis points in the yield on the acquired loan portfolio and by a 12 basis point increase in the cost of interest-bearing liabilities. The yield on the non-acquired loan portfolio increased mainly due to the Federal Reserve increasing the federal funds target rate 100 basis points since December 2016 which effectively increased the Prime Rate which is used in pricing for a majority of our variable rate loans and new originated loans. The increase in the yield on the investment securities portfolio was also due to the rising rate environment as the Company has purchased new investment securities in this higher rate environment to replace calls and maturities. The yield on the acquired loan portfolio declined 34 basis points due to the acquired credit impaired loans being renewed and the cash flow from these assets being extended out, therefore, increasing the weighted average life of the loan pools within all acquired loan portfolios. In addition, the yield on the loans acquired in the merger with PSC during the fourth quarter of 2017 were lower than the yields on the existing

Table of Contents

acquired loan portfolio. The increase in the average cost of interest-bearing liabilities was mainly due to higher rates on all categories of interest-bearing deposits as a result of the merger with PSC in the fourth quarter of 2017 whose deposits rates were higher than the Company's legacy deposit rates and as a result of higher costs related to the rising rate environment. The cost of interest-bearing deposits increased 10 basis points from 0.23% in the fourth quarter of 2017 to 0.33% in the first quarter of 2018.

(Dollars in thousands)	Three Months Ended			
	March 31,		2017	
	2018		2017	
Non-TE net interest income	\$ 128,973		\$ 97,362	
Non-TE yield on interest-earning assets	4.49	%	4.29	%
Non-TE rate on interest-bearing liabilities	0.41	%	0.22	%
Non-TE net interest margin	4.19	%	4.14	%
TE net interest margin	4.22	%	4.20	%

Non-TE net interest income increased \$31.6 million, or 32.5%, in the first quarter of 2018 compared to the same period in 2017. Some key highlights are outlined below:

- Higher loan interest income of \$35.4 million with acquired loan interest income increasing by \$21.0 million due to the addition of the PSC loan portfolio through the merger and non-acquired loan interest income increasing by \$14.4 million due to higher average balances through organic loan growth and due to higher yields due to the rising rate environment; offset partially by;
- Higher interest expense of \$5.4 million with deposit interest expense increasing \$4.4 million and short and long-term borrowings interest expense increasing \$1.0 million. These increases were due to higher average balances in all categories of interest-bearing liabilities as a result of the merger with PSC and due to higher rates on all categories of interest-bearing deposits as a result of both the merger with PSC, whose deposits rates were higher than the Company's legacy deposit rates and higher costs related to the rising rate environment.
- Average interest-earning assets increased 30.7% to \$12.5 billion in the first quarter of 2018 compared to the same period in 2017 due to the increase in acquired loans and investment securities through the merger with PSC in the fourth quarter of 2017 and due to the increase in non-acquired loans through organic growth.
- Non-TE yield on interest-earning assets for the first quarter of 2018 increased 20 basis points from the comparable period in 2017. The increase in the yield on interest-earning assets was mainly a result of an increase in the yield on the non-acquired loan portfolio by 20 basis points and an increase in yield of investment securities of 12 basis points. These increases were offset by a decline of 67 basis points in the yield on the acquired loan portfolio. The yield on the non-acquired loan portfolio increased mainly due to the Federal Reserve increasing the federal funds target rate 100 basis points since December 2016 which effectively increased the Prime Rate which is used in pricing for a majority of our variable rate loans and new originated loans. The increase in the yield on the investment securities portfolio was also due to the rising rate environment as the Company has purchased new investment securities in this higher rate environment to replace calls and maturities. The yield on the acquired loan portfolio declined 67 basis points due to the acquired credit impaired loans being renewed and the cash flow from these assets being extended out, therefore, increasing the weighted average life of the loan pools within all acquired loan portfolios. In addition, the yield on the loans acquired in the merger with PSC during the fourth quarter of 2017 were lower than the yields on the existing acquired loan portfolio. The loan portfolio continues to remix with 67% of the portfolio being comprised of non-acquired loans and 33% being acquired loans. This compares to 70% and 30%, respectively, one year ago. The increase in the acquired loan portfolio as a percentage of the total portfolio

was due to the addition of the PSC loan portfolio through the merger in the fourth quarter of 2017. The percentage of the non-acquired loan portfolio of the total loan portfolio increased from December 31, 2017 with 65% being non-acquired loans and 35% being acquired loans.

- The average cost of interest-bearing liabilities for the first quarter of 2018 increased 19 basis points from the same period in 2017. The increase since the first quarter of 2017 was primarily the result of an increase in the cost of deposits due to rates on the deposits acquired through the merger with PSC being higher than the rates on our legacy deposits. The average cost of deposits increased from 0.16% during the first quarter of 2017 to 0.33% in the same period in 2018. Also, the average costs on federal funds purchased and repurchase agreements increased 27 basis points to 0.54% for the first quarter of 2018 compared to the same period in 2017. This increase was the result of the Federal Reserve increasing the federal funds target rate by 100 basis points since December 2016, which has increased short term borrowing rates.

Table of Contents

- The Non-TE net interest margin increased by 5 basis points and the TE net interest margin increased by 2 basis points in the first quarter of 2018 compared to the first quarter of 2017.

Note: Loan data excludes loans held for sale.

Table of Contents

Total loans, net of deferred loan costs and fees (excluding mortgage loans held for sale), increased by \$2.7 billion, or 34.5%, at March 31, 2018 as compared to the same period in 2017. Acquired non-credit impaired loans increased by \$1.6 billion and acquired credit impaired loans decreased by \$30.5 million as compared to the same period in 2017. The overall increase in acquired loans was the result of the addition of approximately \$2.3 billion in acquired loans in the PSC acquisition during the fourth quarter of 2017, partially offset by principal payments, charge-offs, foreclosures and renewals of acquired loans. Non-acquired loans or legacy loans increased by \$1.2 billion, or 21.5%, from March 31, 2017 to March 31, 2018. With the addition of loans through the PSC acquisition, the trend in the makeup of the loan portfolio shifted as acquired loans as a percentage of total loans increased to 36.4% at March 31, 2018 compared to 29.6% at March 31, 2017. As of March 31, 2018, non-acquired loans as a percentage of the overall portfolio were 63.6% compared to 70.4% at March 31, 2017.

(Dollars in thousands)	Three Months Ended March 31,			
	2018	2017		
Average total loans	\$ 10,604,506	\$ 7,786,521		
Interest income on total loans	126,734	91,344		
Non-TE yield	4.85	%	4.76	%

Interest earned on loans increased \$35.4 million in the first quarter of 2018 compared to the first quarter of 2017. Some key highlights for the quarter ended March 31, 2018 are outlined below:

- Our non-TE yield on total loans increased 9 basis points in the first quarter of 2018 compared to the same period in 2017 and average total loans increased \$2.8 billion or 36.2% in the first quarter of 2018, as compared to the same period in 2017. The increase in average total loans was the result of 22.1% growth in the average non-acquired loan portfolio and of 68.1% growth in the average acquired loan portfolio during period. The growth in the non-acquired loan portfolio was due to normal organic growth while the growth in the acquired loan portfolio was due to the addition of approximately \$2.3 billion in loans through the merger with PSC in the fourth quarter of 2017, partially offset by principal payments, charge-offs, and foreclosures and by renewals of acquired loans. The yield on the non-acquired loan portfolio increased from 3.81% in the first quarter of 2017 to 4.01% in the same period in 2018 and the yield on the acquired loan portfolio declined from 6.90% in the first quarter of 2017 to 6.23% in the same period in 2018. The yield on the non-acquired loan portfolio increased mainly due to the Federal Reserve increasing the federal funds target rate 100 basis points since December 2016 which effectively increased the Prime Rate which is used in pricing for a majority of our variable rate loans and new originated loans. The yield on the acquired loan portfolio decreased due to the acquired credit impaired loans being renewed and the cash flow from these assets being extended out, therefore, increasing the weighted average life of the loan pools within all acquired loan portfolios. In addition, the yield on the loans acquired in the merger with PSC during the fourth quarter of 2017 were lower than the yields on the existing acquired loan portfolio.

The balance of mortgage loans held for sale decreased \$28.2 million from December 31, 2017 to \$42.7 million at March 31, 2018, and decreased \$4.3 million from a balance of \$47.0 million at March 31, 2017.

Investment Securities

We use investment securities, our second largest category of earning assets, to generate interest income through the deployment of excess funds, to provide liquidity, to fund loan demand or deposit liquidation, and to pledge as collateral for public funds deposits and repurchase agreements. At March 31, 2018, investment securities totaled \$1.7 billion, compared to \$1.7 billion and \$1.4 billion at December 31, 2017 and March 31, 2017, respectively. Our investment portfolio remained flat from December 31, 2017 and increased \$265.0 million from March 31, 2017. The increase from March 31, 2017 was primarily a result of the acquisition of PSC in the fourth quarter of 2017 and its investment portfolio which totaled \$328.5 million as of March 31, 2018. Maturities, calls and paydowns of investment

Table of Contents

securities totaled \$57.3 million and sales totaled \$5.2 million which was offset by purchases of \$79.7 million during the first quarter of 2018.

(Dollars in thousands)	Three Months Ended			
	March 31,			
	2018	2017		
Average investment securities	\$ 1,666,199	\$ 1,464,758		
Interest income on investment securities	10,347	8,661		
Non-TE yield	2.52	%	2.40	%

Interest earned on investment securities was higher in the first quarter of 2018 compared to the first quarter of 2017, as result of a higher average balance which was mainly the result of the addition of the investment portfolio through the acquisition of PSC and an increase in yield on securities which was mainly due to the purchasing of securities in a rising rate environment over the past 12 months.

The following table provides a summary of the credit ratings for our investment portfolio (including held-to-maturity and available-for-sale securities) at March 31, 2018:

(Dollars in thousands)	Amortized Cost	Fair Value	Unrealized Gain (Loss)	AAA - A	BBB	BB or Lower	Not Rated
March 31, 2018							
Government-sponsored entities debt	\$ 91,483	\$ 89,746	\$ (1,737)	\$ 91,483	\$ —	\$ —	\$ —
State and municipal obligations	226,268	226,970	702	222,655	—	—	3,613
Mortgage-backed securities *	1,353,356	1,325,405	(27,951)	—	—	—	1,353,356
Corporate stocks	—	—	—	—	—	—	—
	\$ 1,671,107	\$ 1,642,121	\$ (28,986)	\$ 314,138	\$ —	\$ —	\$ 1,356,969

* - Agency mortgage-backed securities (“MBS”) are guaranteed by the issuing GSE as to the timely payments of principal and interest. Except for Government National Mortgage Association (“GNMA”) securities, which have the

full faith and credit backing of the United States Government, the GSE alone is responsible for making payments on this guaranty. While the rating agencies have not rated any of the MBS issued, senior debt securities issued by GSEs are rated consistently as "Triple-A." Most market participants consider agency MBS as carrying an implied Aaa rating (S&P rating of AA+) because of the guarantees of timely payments and selection criteria of mortgages backing the securities. We do not own any private label mortgage-backed securities.

At March 30, 2018, we had 380 securities available for sale in an unrealized loss position, which totaled \$31.5 million. At December 31, 2017, we had 223 securities available for sale in an unrealized loss position, which totaled \$12.8 million. At March 31, 2017, we had 143 securities available for sale in an unrealized loss position, which totaled \$7.6 million.

During the first quarter of 2018 as compared to the first quarter of 2017, the total number of available for sale securities with an unrealized loss position increased by 237 securities, while the total dollar amount of the unrealized loss increased by \$23.9 million. This increase was due to the higher interest rate environment at March 31, 2018 compared to March 31, 2017.

All debt securities available for sale in an unrealized loss position as of March 31, 2018 continue to perform as scheduled. We have evaluated the cash flows and determined that all contractual cash flows should be received; therefore impairment is temporary because we have the ability to hold these securities within the portfolio until the maturity or until the value recovers, and we believe that it is not likely that we will be required to sell these securities prior to recovery. We continue to monitor all of our securities with a high degree of scrutiny. There can be no assurance that we will not conclude in future periods that conditions existing at that time indicate some or all of these securities are other than temporarily impaired, which would require a charge to earnings in such periods. Any charges for OTTI related to securities available-for-sale would not impact cash flow, tangible capital or liquidity.

As securities are purchased, they are designated as held to maturity or available for sale based upon our intent, which incorporates liquidity needs, interest rate expectations, asset/liability management strategies, and capital

Table of Contents

requirements. We do not currently hold, nor have we ever held, any securities that are designated as trading securities. Although securities classified as available for sale may be sold from time to time to meet liquidity or other needs, it is not our normal practice to trade this segment of the investment securities portfolio. While management generally holds these assets on a long-term basis or until maturity, any short-term investments or securities available for sale could be converted at an earlier point, depending partly on changes in interest rates and alternative investment opportunities.

Other Investments

Other investment securities include primarily our investments in FHLB stock with no readily determinable market value. The amortized cost and fair value of all these securities are equal at March 31, 2018. As of March 31, 2017, the investment in FHLB stock represented approximately \$17.4 million, or 0.12% as a percentage of total assets.

Interest-Bearing Liabilities

Interest-bearing liabilities include interest-bearing transaction accounts, savings deposits, CDs, other time deposits, federal funds purchased, and other borrowings. Interest-bearing transaction accounts include NOW, HSA, IOLTA, and Market Rate checking accounts.

(Dollars in thousands)	Three Months Ended			
	March 31,			
	2018	2017		
Average interest-bearing liabilities	\$ 8,993,535	\$ 6,775,234		
Interest expense	9,075	3,624		
Average rate	0.41	0.22	%	%

The average balance of interest-bearing liabilities increased \$2.2 billion in the first quarter of 2018 compared to the first quarter of 2017 due to increases in all categories of interest bearing liabilities, with the exception of federal funds purchased and repurchase agreements. These increases were primarily driven by the interest-bearing liabilities acquired in the merger with PSC in the fourth quarter of 2017. The primary driver in this increase was in average interest-bearing deposits which increased \$2.1 billion in the first quarter of 2018 compared to the same period in 2017. Total deposits obtained through the PSC acquisition were \$2.3 billion. The increase in interest expense in the first quarter of 2018 compared to the same period in 2017 was largely driven by higher balances in most interest-bearing liabilities, as well as the impact of higher interest rates on our interest-bearing liabilities, with the exception of other borrowings. The increase in rates was due to the fact that the cost of deposits acquired through the merger with PSC were at higher rates than that of our legacy deposits and due to the Federal Reserve increasing the federal funds target rate 100 basis points since December 2016. Overall, this resulted in a 19 basis point increase in

the average rate on all interest-bearing liabilities from the three months ended March 31, 2017. Some key highlights are outlined below:

- Average interest-bearing deposits for the three months ended March 31, 2018 increased 33.6% from the same period in 2017.
- Interest-bearing deposits increased \$2.1 billion to \$8.5 billion at March 31, 2018 from the period end balance at March 31, 2017 of \$6.4 billion. This was mainly the result of the addition of interest bearing-deposits acquired through the PSC merger during the fourth quarter of 2017, which totaled \$1.8 billion at March 31, 2018. Interest-bearing deposits grew \$311.2 million through organic growth outside the acquisition since March 31, 2017. The company continues to monitor and adjust rates paid on deposit products as part of its strategy to manage its net interest margin.
- Average transaction and money market accounts balances increased 34.2%, up \$1.3 billion from the average balance in the first quarter of 2017 as balances acquired from the PSC transaction totaled approximately \$1.1 billion at March 31, 2018. Interest expense on transaction and money market accounts increased \$1.9 million as a result of the growth in average balances and a 12 basis point increase in the average rate to 22 basis points for the three months ended March 31, 2018 as compared to the same period in 2017.
- Average savings account balances increased 6.9%, up \$93.7 million from the average balance in the first quarter of 2017 as balances acquired from the PSC transaction totaled approximately \$108.6 million at March 31, 2018. Interest expense on savings accounts increased \$170,000 as a result of the growth in average balances and a 4 basis point increase in the average rate to 19 basis points for the three months ended March 31, 2018 as compared to the same period in 2017.

Table of Contents

- The average rate on certificates of deposit and other time deposits for the three months ended March 31, 2018 increased 39 basis points to 77 basis points from the comparable period in 2017. Average balances on certificates of deposits and other time deposits for the three months ended March 31, 2018 increased \$693.1 million from the comparable period in 2017. This was mainly the result of the addition of certificates of deposit from the PSC acquisition, which totaled \$587.5 million at March 31, 2018.
- In the first quarter of 2018, average other borrowings increased \$115.0 million compared to the first quarter of 2017. The average rate on other borrowings experienced a 19 basis point decrease to 3.07% for the three months ended March 31, 2018 compared to 3.26% for the same period in 2017. The increase in average balance was the result of trust preferred subordinated debt acquired in the PSC merger and the addition of short-term FHLB advances. The Company acquired \$40.9 million in trust preferred subordinated debt during the PSC acquisition, and the Company borrowed FHLB short-term advances in first quarter of 2018 to provide some liquidity related to the PSC acquisition. FHLB short - borrowings averaged \$110.1 million and had a weighted average rate of 1.73% during the first quarter of 2018 compared to \$37.5 million in the first quarter of 2017 at a weighted average rate of 1.02%. The higher balance in short-term FHLB advances drove the overall average rate on other borrowings down during the quarter compared to the same period in 2017.

Noninterest-Bearing Deposits

Noninterest-bearing deposits are transaction accounts that provide our Bank with “interest-free” sources of funds. Average noninterest-bearing deposits increased \$530.8 million, or 21.5%, to \$3.0 billion in the first quarter of 2018 compared to \$2.5 billion during the same period in 2017. The noninterest-bearing deposits added through the PSC acquisition totaled approximately \$535.0 million at March 31, 2018. At March 31, 2018, the period end balance of noninterest-bearing deposits was \$3.1 billion, exceeding the March 31, 2017 balance by \$521.7 million.

Provision for Loan Losses and Nonperforming Assets

The ALLL is based upon estimates made by management. We maintain an ALLL at a level that we believe is appropriate to cover estimated credit losses on individually evaluated loans that are determined to be impaired as well as estimated credit losses inherent in the remainder of our loan portfolio. Arriving at the allowance involves a high degree of management judgment and results in a range of estimated losses. We regularly evaluate the adequacy of the allowance through our internal risk rating system, outside and internal credit review, and regulatory agency examinations to assess the quality of the loan portfolio and identify problem loans. The evaluation process also includes our analysis of current economic conditions, composition of the loan portfolio, past due and nonaccrual loans, concentrations of credit, lending policies and procedures, and historical loan loss experience. The provision for loan losses is charged to expense in an amount necessary to maintain the allowance at an appropriate level.

The ALLL on non-acquired loans consists of general and specific reserves. The general reserves are determined by applying loss percentages to the portfolio that are based on historical loss experience for each class of loans and management’s evaluation and “risk grading” of the loan portfolio. Additionally, the general economic and business conditions affecting key lending areas, credit quality trends, collateral values, loan volumes and concentrations, seasoning of the loan portfolio, the findings of internal and external credit reviews and results from external bank regulatory examinations are included in this evaluation. Currently, these adjustments are applied to the non-acquired

loan portfolio when estimating the level of reserve required. The specific reserves are determined on a loan-by-loan basis based on management's evaluation of our exposure for each credit, given the current payment status of the loan and the value of any underlying collateral. These are loans classified by management as doubtful or substandard. For such loans that are also classified as impaired, an allowance is established when the discounted cash flows (or collateral value or observable market price) of the impaired loan is lower than the carrying value of that loan. Generally, the need for a specific reserve is evaluated on impaired loans, and once a specific reserve is established for a loan, a charge-off of that amount occurs in the quarter subsequent to the establishment of the specific reserve. Loans that are determined to be impaired are provided a specific reserve, if necessary, and are excluded from the calculation of the general reserves.

The Company segregates the acquired loan portfolio into performing loans ("non credit impaired") and credit impaired loans. The acquired non credit impaired loans and acquired revolving type loans are accounted for under FASB ASC 310 20, with each loan being accounted for individually. Acquired credit impaired loans are recorded net of any acquisition accounting discounts and have no ALLL associated with them at acquisition date. The related discount, if applicable, is accreted into interest income over the remaining contractual life of the loan using the level yield method. Subsequent deterioration in the credit quality of these loans is recognized by recording a provision for loan losses

Table of Contents

through the income statement, increasing the non-acquired and acquired non-credit impaired ALLL. The acquired credit impaired loans will follow the description in the next paragraph.

In determining the acquisition date fair value of acquired credit impaired loans, and in subsequent accounting, the Company generally aggregates purchased loans into pools of loans with common risk characteristics. Expected cash flows at the acquisition date in excess of the fair value of loans are recorded as interest income over the life of the loans using a level yield method if the timing and amount of the future cash flows of the pool is reasonably estimable. Subsequent to the acquisition date, increases in cash flows over those expected at the acquisition date are recognized as interest income prospectively. Decreases in expected cash flows after the acquisition date are recognized by recording an ALLL. Evidence of credit quality deterioration for the loan pools may include information such as increased past-due and nonaccrual levels and migration in the pools to lower loan grades. For further discussion of the Company's ALLL on acquired loans, see Note 6—Loans and Allowance for Loan Losses.

During the first quarter of 2018, the valuation allowance on acquired credit impaired loans declined by \$543,000. This was the result of impairments of \$163,000 which was recorded through the provision for loan losses, being offset by loan removals of \$706,000.

The following table presents a summary of the changes in the ALLL for the three months ended March 31, 2018 and 2017:

	Three Months Ended March 31,				2017			
	2018	Acquired Non-credit Impaired Loans	Acquired Credit Impaired Loans	Total	Non-acquired Loans	Acquired Non-credit Impaired Loans	Acquired Credit Impaired Loans	Total
(Dollars in thousands)								
Balance at beginning of period	\$ 43,448	\$ —	\$ 4,627	\$ 48,075	\$ 36,960	\$ —	\$ 3,395	\$ 40,355
Loans charged-off	(1,169)	(334)	—	(1,503)	(1,297)	(389)	—	(1,686)
Recoveries of loans previously charged off	802	165	—	967	669	63	—	732
Net charge-offs	(367)	(169)	—	(536)	(628)	(326)	—	(954)
Provision for loan losses	2,122	169	163	2,454	2,117	326	1,264	3,707
Reductions due to loan removals	—	—	(706)	(706)	—	—	(103)	(103)
Balance at end of period	\$ 45,203	\$ —	\$ 4,084	\$ 49,287	\$ 38,449	\$ —	\$ 4,556	\$ 43,005
Total non-acquired loans:								
At period end	\$ 6,762,512				\$ 5,564,307			
Average	6,596,749				5,402,372			

Net charge-offs as a percentage of average non-acquired loans (annualized)	0.02	%	0.05	%
Allowance for loan losses as a percentage of period end non-acquired loans	0.67	%	0.69	%
Allowance for loan losses as a percentage of period end non-performing non-acquired loans ("NPLs")	315.95	%	294.97	%

The ALLL as a percent of non-acquired loans continues to reflect the Company's strong credit quality. While the balance of our nonaccrual loans and past due loans both increased slightly during the first quarter of 2018 compared to the same quarter in 2017, they declined as a percentage of total non-acquired loans. Non-acquired classified loans declined during the first quarter of 2018 compared to the same period in 2017. Nonaccrual, past due and classified loans all declined when compared to the fourth quarter of 2017, both as a balance and as a percentage of total non-acquired loans. Overall net charge offs for the quarter on non-acquired loans was 2 basis points annualized, or \$367,000, compared to 5 basis points annualized, or \$628,000, a year ago, and 2 basis points, or \$265,000 in the fourth quarter of 2017. Net charge offs on non-acquired loans have remained low at 5 basis points or less over the past seven quarters. Excluding acquired assets, nonperforming assets decreased by \$2.1 million during the first quarter of 2018 compared to the first quarter of 2017 and decreased \$697,000 from the fourth quarter of 2017, to \$16.7 million. The ratio of the ALLL to cover total nonperforming non-acquired loans increased from 294.97% at March 31, 2017 and 292.95% at December 31, 2017 to 315.95% at March 31, 2018.

We increased the ALLL compared to the first quarter of 2017, as well as compared to the fourth quarter of 2017, due primarily to larger loan growth and increases in certain loan types during the first quarter that require higher reserves. From a general perspective, we generally consider a three-year historical loss rate on all loan portfolios, unless circumstances within a portfolio loan type require the use of an alternate historical loss rate to better capture the risk within the portfolio. We also consider qualitative factors such as economic risk, model risk and operational risk when determining the ALLL. We adjust our qualitative factors to account for uncertainty and certain risk inherent in the portfolio that cannot be measured with historical loss rates. All of these factors are reviewed and adjusted each reporting period to account for management's assessment of loss within the loan portfolio. Overall, the general reserve increased

Table of Contents

by \$6.7 million compared to the balance at March 31, 2017, and \$1.7 million compared to the balance at December 31, 2017.

On a specific reserve basis, the ALLL increased \$88,000 from December 31, 2017 to \$1.7 million, with loan balances being evaluated for specific reserves increasing \$3.3 million during the first quarter of 2018, to \$66.7 million. Specific reserves increased \$54,000 from \$1.7 million at March 31, 2017 with the loan balances being evaluated for specific reserves increasing \$39.4 million from \$27.3 million at March 31, 2017. The increase in loans being evaluated for specific reserves during the first quarter of 2018 compared to the same period in 2017 include builder loans for which greater scrutiny was provided. All of these loans are performing under their contractual terms.

During the three months ended March 31, 2018, qualitative factors remained consistent, which is reflective of stability in the unemployment rates and economy as a whole within the markets that we serve. We continue to work our nonperforming assets out through collections, transfers to OREO and disposals of OREO.

The following table summarizes our nonperforming assets for the past five quarters:

(Dollars in thousands)	March 31, 2018	December 31, 2017	September 30, 2017	June 30, 2017	March 31, 2017
Non-acquired:					
Nonaccrual loans	\$ 13,327	\$ 13,415	\$ 11,509	\$ 12,100	\$ 11,909
Accruing loans past due 90 days or more	198	491	529	432	77
Restructured loans - nonaccrual	782	925	858	967	1,049
Total nonperforming loans	14,307	14,831	12,896	13,499	13,035
Other real estate owned (2)	2,363	2,415	6,219	4,519	5,653
Other nonperforming assets (3)	—	121	111	114	52
Total non-acquired nonperforming assets	16,670	17,367	19,226	18,132	18,740
Acquired non-credit impaired:					
Nonaccrual loans	8,076	9,397	5,457	5,134	4,915

Other acquired nonperforming assets (3)	429	475	538	528	637
Total acquired OREO and other nonperforming assets	9,139	9,263	7,846	10,439	14,992
Total nonperforming assets	\$ 34,042	\$ 36,077	\$ 33,473	\$ 34,364	\$ 38,682

Excluding Acquired Assets

Edgar Filing: SOUTH STATE Corp - Form 10-Q

Total NPAs as a percentage of total loans and repossessed assets (4)	0.25	%	0.27	%	0.31	%	0.30	%	0.34	%
Total NPAs as a percentage of total assets (5)	0.11	%	0.12	%	0.17	%	0.16	%	0.17	%
Total NPLs as a percentage of total loans (4)	0.21	%	0.23	%	0.21	%	0.23	%	0.23	%
Including Acquired Assets										
Total NPAs as a percentage of total loans and repossessed assets (4)	0.32	%	0.34	%	0.40	%	0.42	%	0.49	%
Total NPAs as a percentage of total assets	0.23	%	0.25	%	0.30	%	0.31	%	0.35	%
Total NPLs as a percentage of total loans (4)	0.21	%	0.23	%	0.23	%	0.24	%	0.23	%

(1) Excludes the acquired credit impaired loans that are contractually past due 90 days or more totaling \$20.1 million, \$16.7 million, \$13.1 million, \$19.0 million, and \$20.8 million as of March 31, 2018, December 31, 2017, September 30, 2017, June 30, 2017, and March 31, 2017, respectively, including the valuation discount. Acquired credit impaired loans are considered to be performing due to the application of the accretion method under FASB ASC Topic 310-30. (For further discussion of the Company's application of the accretion method, see "Business Combinations and Method of Accounting for Loans Acquired" in our Annual Report on Form 10-K for the year ended December 31, 2017.)

Table of Contents

- (2) Includes certain real estate acquired as a result of foreclosure and property not intended for bank use.
- (3) Consists of non-real estate foreclosed assets, such as repossessed vehicles.
- (4) Loan data excludes mortgage loans held for sale.
- (5) For purposes of this calculation, total assets include all assets (both acquired and non-acquired).

Excluding the acquired non-credit impaired loans, total nonperforming loans, including restructured loans, were \$14.3 million, or 0.21% of non-acquired loans, at March 31, 2018, an increase of \$1.3 million, or 9.8%, from March 31, 2017. The increase in nonperforming loans was driven primarily by an increase in consumer nonaccrual loans of \$1.2 million, commercial nonaccrual loans of \$241,000, and past due 90 day loans still accruing of \$121,000, partially offset by restructured nonaccrual loans which declined by \$267,000.

Nonperforming non-acquired loans overall, including restructured loans, decreased by \$524,000 during the first quarter of 2018 from the level at December 31, 2017. This decrease was primarily driven by a decrease in consumer nonaccrual loans of \$276,000, restructured nonaccrual loans of \$143,000, and loans greater than ninety days past due but still accruing of \$293,000, partially offset by an increase in commercial nonaccrual loans of \$188,000.

At March 31, 2018, non-acquired OREO decreased by \$52,000 from December 31, 2017 to \$2.4 million. At March 31, 2018, non-acquired OREO consisted of 18 properties with an average value of \$131,000. This compared to 15 properties with an average value of \$161,000 at December 31, 2017. In the first quarter of 2018, we added five properties with an aggregate value of \$652,000 into non-acquired OREO, and we sold two properties with a basis of \$702,000.

Potential Problem Loans

Potential problem loans (excluding all acquired loans) totaled \$5.9 million, or 0.09% of total non-acquired loans outstanding, at March 31, 2018, compared to \$5.2 million, or 0.08% of total non-acquired loans outstanding, at December 31, 2017, and compared to \$6.7 million, or 0.12% of total non-acquired loans outstanding, at March 31, 2017. Potential problem loans related to acquired non-credit impaired loans totaled \$8.3 million, or 0.25% of total acquired non-credit impaired loans, at March 31, 2018, compared to \$13.4 million, or 0.38% of total acquired non-credit impaired loans outstanding, at December 31, 2017, and compared to \$8.2 million, or 0.48% of total acquired non-credit impaired loans outstanding, at March 31, 2017. All potential problem loans represent those loans where information about possible credit problems of the borrowers has caused management to have serious concern about the borrower's ability to comply with present repayment terms.

Noninterest Income

Three Months Ended

Edgar Filing: SOUTH STATE Corp - Form 10-Q

(Dollars in thousands)	2018	2017
Fees on deposit accounts	\$ 25,506	\$ 21,719
Mortgage banking income	4,948	5,569
Trust and investment services income	7,514	5,941
Recoveries on acquired loans	2,975	1,532
Other	2,575	1,674
Total noninterest income	\$ 43,518	\$ 36,435

Note that “Fees on deposit accounts” include service charges on deposit accounts and bankcard income

Noninterest income increased by \$7.1 million, or 19.4%, during the first quarter of 2018 compared to the same period in 2017. The quarterly increase in total noninterest income primarily resulted from the following:

- Fees on deposit accounts increased \$3.8 million, or 17.4%, which resulted primarily from higher bankcard services income and higher service charges on deposit accounts associated with the increase in customers and accounts through the merger with PSC;
- Trust and investment services income increased by \$1.6 million, or 26.5%, due to the increase in wealth customers and assets under management added through the PSC merger and through organic growth of the legacy wealth business; and
- Recoveries on acquired loans increased by \$1.4 million, or 94.2%; partially offset by

Table of Contents

- Mortgage banking income decreased by \$621,000, or 11.2%, which was a result from lower income from the secondary market of \$850,000 due to lower sales volume and pricing partially offset by a decline of \$228,000 in income from mortgage servicing rights, net of the hedge.

Bankcard Services Income

The Company exceeded \$10 billion in total consolidated assets upon consummation of our merger with SBFC on January 3, 2017. Banks with over \$10 billion in total assets are no longer exempt from the requirements of the Federal Reserve's rules on interchange transaction fees for debit cards. This means that, beginning on July 1 2018, the Bank will be limited to receiving only a "reasonable" interchange transaction fee for any debit card transactions processed using debit cards issued by the Bank to our customers. The Federal Reserve has determined that it is unreasonable for a bank with more than \$10 billion in total assets to receive more than \$0.21 plus 5 basis points of the transaction plus a \$0.01 fraud adjustment for an interchange transaction fee for debit card transactions. A reduction in the amount of interchange fees we receive for electronic debit interchange will reduce our revenues. As noted above, bankcard income including interchange transaction fees is included in "Fees on deposit accounts". In the first three months of 2018, we earned approximately \$10.1 million in interchange transaction fees for debit cards. This regulation will become effective for the Company in July 2018; however, if it were effective for the first three months of 2018, we estimate that our bankcard services income would have been reduced by approximately \$4.3 million.

Noninterest Expense

(Dollars in thousands)	Three Months Ended	
	2018	2017
Salaries and employee benefits	\$ 62,465	\$ 48,886
Net occupancy expense	8,166	6,388
Information services expense	9,738	6,360
Furniture and equipment expense	4,626	3,794
OREO expense and loan related	1,661	2,142
Bankcard expense	3,654	2,770
Amortization of intangibles	3,413	2,507
Supplies, printing and postage expense	1,392	1,654
Professional fees	1,699	1,773
FDIC assessment and other regulatory charges	1,263	1,122
Advertising and marketing	736	559
Merger and branch consolidation related expense	11,296	21,024
Other	6,317	5,744
Total noninterest expense	\$ 116,426	\$ 104,723

Noninterest expense increased by \$11.7 million, or 11.2%, in the first quarter of 2018 as compared to the same period in 2017. The quarterly increase in total noninterest expense primarily resulted from the following:

- Salaries and employee benefits expense increased by \$13.6 million, or 27.8%, in 2018 compared to the same period in 2017. This increase was mainly attributable to the addition of personnel mainly through the merger with PSC. The number of full time equivalent employees increased by 423, or 18.6%, from March 31, 2017 to March 31, 2018. The increase was also attributable to the payment of bonuses to employees in early February of \$2.8 million;
- Information services expense was up by \$3.4 million, or 53.1%, in 2018 as compared to the same period in 2017. This increase was related to the additional cost associated with facilities, employees and systems added through the merger with PSC. The number of branches increased by 50 from 129 at March 31, 2017 to 179 and March 31, 2018 related to the merger with PSC;
- Net occupancy expense and furniture and equipment expense increased by \$1.8 million and \$832,000, respectively, in 2018 as compared to the same period in 2017. These increases were due to additional costs related to the facilities added through the acquisition of PSC. The number of branches increased by 50 from 129 at March 31, 2017 to 179 and March 31, 2018 related to the merger with PSC; and
- Amortization of intangibles increased \$906,000 due to amortization from the core deposit intangible created with the merger with PSC; partially offset by
- A decrease in merger and branch consolidation related expense of \$9.7 million, or 46.3%, compared to the first quarter of 2017. These cost were primarily related to the merger with SBFC in the first quarter of 2017 and included closing, compared to PSC merger-related cost in the first quarter of 2018.

Table of Contents

Income Tax Expense

Our effective income tax rate was 21.05% for the three months ended March 31, 2018. This compares to 28.00% for the three months ended March 31, 2017. The reason for the decline during the three months ended March 31, 2018 compared to the same period in 2017 is the implementation of the Tax Reform Act that was signed into law in December 2017 and effective for 2018. While we took significant efforts to estimate the impact of the revaluation of deferred taxes relate to the law change, it is possible that additional refinement will be required during 2018. We believe that any refinement will emerge from any measurement period adjustments related to the acquisition of PSC and the final 2017 income tax return adjustments related to acquired loan accounting. During the first quarter of 2018, there were no material adjustments as a result of measurement period adjustments related to the Tax Reform Act.

Capital Resources

Our ongoing capital requirements have been met primarily through retained earnings, less the payment of cash dividends. As of March 31, 2018, shareholders' equity was \$2.3 billion, an increase of \$13.6 million, or 0.6%, from December 31, 2017, and an increase of \$742.7 million, or 47.0%, from \$1.6 billion at March 31, 2017. The driving factor for the increase from year-end was attributable to net income of \$42.3 million, which was offset by the common stock dividend paid of \$12.1 million and a decline in accumulated other comprehensive income (loss) of \$19.9 million. At March 31, 2018, we had accumulated other comprehensive loss of \$30.4 million compared to an accumulated other comprehensive loss of \$10.4 million at December 31, 2017. This change was mainly attributable to the increase of \$17.2 million, net of tax, in the unrealized loss position in the available for sale securities portfolio during the first quarter of 2018 due to the rising rate environment. The increase in shareholder's equity from March 30, 2017 was primarily the result of the issuance of common stock through the merger with PSC during the fourth quarter of 2017 of \$688.6 million. The increase was also attributable to net income of \$111.6 million and partially offset by dividends paid to common shareholders of \$41.1 million and a decline in accumulated other comprehensive income (loss) of \$25.5 million. Our common equity-to-assets ratio was 15.81% at March 31, 2018, down from 15.96% at December 31, 2017 and up from 14.17% at March 31, 2017.

We are subject to regulations with respect to certain risk-based capital ratios. These risk-based capital ratios measure the relationship of capital to a combination of balance sheet and off-balance sheet risks. The values of both balance sheet and off-balance sheet items are adjusted based on the rules to reflect categorical credit risk. In addition to the risk-based capital ratios, the regulatory agencies have also established a leverage ratio for assessing capital adequacy. The leverage ratio is equal to Tier 1 capital divided by total consolidated on-balance sheet assets (minus amounts deducted from Tier 1 capital). The leverage ratio does not involve assigning risk weights to assets.

As disclosed in our Annual Report on Form 10-K for the year ended December 31, 2017, in July 2013, the Federal Reserve announced its approval of a final rule to implement the regulatory capital reforms developed by the Basel Committee on Banking Supervision (“Basel III”), among other changes required by the Dodd-Frank Wall Street Reform and Consumer Protection Act. The new rules became effective January 1, 2015, subject to a phase-in period for certain aspects of the new rules.

The new capital rules framework requires banking organizations to hold more and higher quality capital, which acts as a financial cushion to absorb losses, taking into account the impact of risk. As applied to the Company and the Bank, the new rules include a new minimum ratio of common equity Tier 1 capital (“CET1”) to risk-weighted assets of 4.5%. The new rules also raise our minimum required ratio of Tier 1 capital to risk-weighted assets from 4% to 6%. Our minimum required leverage ratio under the new rules is 4% (the new rules eliminated an exemption that permitted a minimum leverage ratio of 3% for certain institutions). Our minimum required total capital to risk-weighted assets ratio remains at 8% under the new rules.

In order to avoid restrictions on capital distributions and discretionary bonus payments to executives, under the new rules a covered banking organization will also be required to maintain a “capital conservation buffer” in addition to its minimum risk-based capital requirements. This buffer will be required to consist solely of common equity Tier 1, and the buffer will apply to all three risk-based measurements (CET1, Tier 1 capital and total capital). The capital conservation buffer will be phased in over a four year period at 0.625% per annual, beginning January 1, 2016 and

Table of Contents

becoming fully effective on January 1, 2019, and will ultimately consist of an additional amount of Tier 1 common equity equal to 2.5% of risk-weighted assets.

In terms of quality of capital, the final rule emphasizes common equity Tier 1 capital and implements strict eligibility criteria for regulatory capital instruments. It also changes the methodology for calculating risk-weighted assets to enhance risk sensitivity.

Under the Basel III rules, accumulated other comprehensive income (“AOCI”) is presumptively included in common equity Tier 1 capital and can operate to reduce this category of capital. The final rule provided a one-time opportunity at the end of the first quarter of 2015 for covered banking organizations to opt out of much of this treatment of AOCI, which election the Bank and the Company have made. As a result, the Company and the Bank will retain the pre-existing treatment for AOCI.

The Bank is also subject to the regulatory framework for prompt corrective action, which identifies five capital categories for insured depository institutions (well capitalized, adequately capitalized, undercapitalized, significantly undercapitalized, and critically undercapitalized) and is based on specified thresholds for each of the three risk-based regulatory capital ratios (CET1, Tier 1 capital and total capital) and for the leverage ratio.

The Company’s and the Bank’s regulatory capital ratios for the following periods are reflected below:

	March 31, 2018		December 31, 2017		March 31, 2017	
South State Corporation:						
Common equity Tier 1 risk-based capital	11.85	%	11.59	%	11.90	%
Tier 1 risk-based capital	12.86	%	12.60	%	12.77	%
Total risk-based capital	13.32	%	13.04	%	13.31	%
Tier 1 leverage	10.50	%	10.36	%	10.05	%
South State Bank:						
Common equity Tier 1 risk-based capital	12.67	%	12.38	%	12.37	%
Tier 1 risk-based capital	12.67	%	12.38	%	12.37	%
Total risk-based capital	13.12	%	12.82	%	12.91	%
Tier 1 leverage	10.35	%	10.18	%	9.75	%

The Tier 1 leverage ratio increased compared to December 31, 2017 due to the increase in our capital outpacing the increase in our average asset size. The Common equity Tier 1 risk-based capital, Tier 1 risk-based capital and total risk-based capital ratios all increased compared to December 31, 2017 due to our capital increasing while our

risk-based assets declined. The decline in risk-based assets was due to a decline in high volatility commercial real estate loans and a decline in receivables from loans sold during the fourth quarter of 2017 but not settled until the first quarter of 2018. Our capital ratios are currently well in excess of the minimum standards and continue to be in the “well capitalized” regulatory classification.

Liquidity

Liquidity refers to our ability to generate sufficient cash to meet our financial obligations, which arise primarily from the withdrawal of deposits, extension of credit and payment of operating expenses. Our Asset/Liability Management Committee (“ALCO”) is charged with monitoring liquidity management policies, which are designed to ensure acceptable composition of asset/liability mix. Two critical areas of focus for ALCO are interest rate sensitivity and liquidity risk management. We have employed our funds in a manner to provide liquidity from both assets and liabilities sufficient to meet our cash needs.

Asset liquidity is maintained by the maturity structure of loans, investment securities and other short-term investments. Management has policies and procedures governing the length of time to maturity on loans and investments. Normally, changes in the earning asset mix are of a longer-term nature and are not utilized for day-to-day corporate liquidity needs.

Table of Contents

Our liabilities provide liquidity on a day-to-day basis. Daily liquidity needs are met from deposit levels or from our use of federal funds purchased, securities sold under agreements to repurchase and other short-term borrowings. We engage in routine activities to retain deposits intended to enhance our liquidity position. These routine activities include various measures, such as the following:

- Emphasizing relationship banking to new and existing customers, where borrowers are encouraged and normally expected to maintain deposit accounts with our Bank;
- Pricing deposits, including certificates of deposit, at rate levels that will attract and/or retain balances of deposits that will enhance our Bank's asset/liability management and net interest margin requirements; and
- Continually working to identify and introduce new products that will attract customers or enhance our Bank's appeal as a primary provider of financial services.

Our non-acquired loan portfolio increased by approximately \$1.2 billion, or approximately 21.5%, compared to the balance at March 31, 2017, and by \$270.4 million, or 16.9% annualized, compared to the balance at December 31, 2017.

Our investment securities portfolio increased \$265.0 million, or 18.9%, compared to the balance at March 31, 2017, and decreased by \$8.2 million compared to the balance at December 31, 2017. The main reason for the increase from March 31, 2017 was the addition of the investment portfolio of PSC through the merger in the fourth quarter of 2017, which totaled \$328.5 million as of March 31, 2018. The Company's recent strategy has been to increase the investment portfolio as a percentage to total assets as we identify securities that meet our strategy and objectives. Total cash and cash equivalents were \$644.5 million at March 31, 2018 as compared to \$377.6 million at December 31, 2017 and \$663.1 million at March 31, 2017.

At March 31, 2018, December 31, 2017 and March 31, 2017, the Company had \$35.0 million, \$43.6 million and \$55.2 million, respectively, in traditional, out-of-market brokered deposits and \$101.0 million, \$113.3 million, and \$57.3 million, respectively, of reciprocal brokered deposits. Total deposits were \$11.7 billion at March 31, 2018, up \$2.6 billion or 29.1%, from March 31, 2017. This increase was mainly related to the deposits acquired through the merger with PSC, which totaled \$2.3 billion at March 31, 2017. The deposits related to PSC included \$535.0 million in noninterest-bearing transaction accounts, \$465.7 million in interest-bearing transaction accounts, \$743.5 million in savings and money market accounts and \$587.5 million in certificates of deposit. These deposit balances do not include new deposits opened in the PSC market. The Company has had legacy deposit growth since March 31, 2017 of \$298.0 million, which included an increase in interest-bearing transaction accounts of \$230.8 million and certificates of deposit of \$118.5 million. Savings and money market accounts declined by \$38.0 million and noninterest-bearing transaction accounts declined by \$13.3 million. Other borrowings increased \$107.6 million to \$215.6 million from the balance at March 31, 2017. This balance mainly consists of junior subordinated debt of \$114.7 million and FHLB borrowings of \$100.1 million. With the merger with PSC, the Company acquired \$40.9 million in junior subordinated debt, \$270.0 million in FHLB borrowings and \$30.0 million senior debt. As of December 31, 2017 all of the debt acquired except for the junior subordinated debt has either matured or paid off. The Company did borrow \$100.0 million in FHLB short term advances in December 2017 to provide some liquidity related to the PSC acquisition. To the extent that we employ other types of non-deposit funding sources, typically to accommodate retail and correspondent customers, we continue to take in some shorter maturities of such funds. Our

current approach may provide an opportunity to sustain a low funding rate or possibly lower our cost of funds but could also increase our cost of funds if interest rates rise.

Our ongoing philosophy is to remain in a liquid position taking into account our current composition of earning assets, asset quality, capital position, and operating results. Our liquid earning assets include federal funds sold, balances at the Federal Reserve Bank, reverse repurchase agreements, and/or other short-term investments. Cyclical and other economic trends and conditions can disrupt our Bank's desired liquidity position at any time. We expect that these conditions would generally be of a short-term nature. Under such circumstances, our Bank's federal funds sold position and any balances at the Federal Reserve Bank serve as the primary sources of immediate liquidity. At March 31, 2018, our Bank had total federal funds credit lines of \$556.0 million with no balance outstanding. If additional liquidity were needed, the Bank would turn to short-term borrowings as an alternative immediate funding source and would consider other appropriate actions such as promotions to increase core deposits or the sale of a portion of our investment portfolio. At March 31, 2018, our Bank had \$351.9 million of credit available at the Federal Reserve Bank's Discount Window, but had no outstanding advances as of the end of the quarter. In addition, we could draw on additional alternative immediate funding sources from lines of credit extended to us from our correspondent banks and/or the FHLB. At March 31, 2018, our Bank had a total FHLB credit facility of \$1.9 billion with total outstanding letters of

Table of Contents

credit consuming \$6.3 million, \$100.1 million in outstanding advances and \$87,000 in credit enhancements from participation in the FHLB's Mortgage Partnership Finance Program. The Company has a \$10.0 million unsecured line of credit with U.S. Bank National Association with no outstanding advances. We believe that our liquidity position continues to be adequate and readily available.

Our contingency funding plans incorporate several potential stages based on liquidity levels. Also, we review on at least an annual basis our liquidity position and our contingency funding plans with our principal banking regulator. The Company maintains various wholesale sources of funding. If our deposit retention efforts were to be unsuccessful, our Company would utilize these alternative sources of funding. Under such circumstances, depending on the external source of funds, our interest cost would vary based on the range of interest rates charged to our Company. This could increase our Company's cost of funds, impacting net interest margins and net interest spreads.

Deposit and Loan Concentrations

We have no material concentration of deposits from any single customer or group of customers. We have no significant portion of our loans concentrated within a single industry or group of related industries. Furthermore, we attempt to avoid making loans that, in an aggregate amount, exceed 10% of total loans to a multiple number of borrowers engaged in similar business activities. As of March 31, 2018, there were no aggregated loan concentrations of this type. We do not believe there are any material seasonal factors that would have a material adverse effect on us. We do not have foreign loans or deposits.

Concentration of Credit Risk

We consider concentrations of credit to exist when, pursuant to regulatory guidelines, the amounts loaned to a multiple number of borrowers engaged in similar business activities which would cause them to be similarly impacted by general economic conditions represents 25% of total risk-based capital, or \$364.1 million at March 31, 2018. Based on this criteria, the Company had three such credit concentrations for non-acquired loans and acquired non-credit impaired loans at March 31, 2018, including \$506.2 million of loans to lessors of residential buildings, \$1.2 billion of loans to lessors of nonresidential buildings (except mini-warehouses) and \$539.9 million of loans for construction purposes.

Cautionary Note Regarding Any Forward-Looking Statements

Statements included in Management's Discussion and Analysis of Financial Condition and Results of Operations that are not historical in nature are intended to be, and are hereby identified as, forward-looking statements for purposes of

the safe harbor provided by Section 27A of the Securities Act of 1933 and Section 21E of the Securities and Exchange Act of 1934. The words “may,” “will,” “anticipate,” “should,” “would,” “believe,” “contemplate,” “expect,” “estimate,” “contend,” and “intend,” as well as other similar words and expressions of the future, are intended to identify forward-looking statements. We caution readers that forward-looking statements are estimates reflecting our judgment based on current information, and are subject to certain risks and uncertainties that could cause actual results to differ materially from anticipated results. Such risks and uncertainties include, among others, the matters described in Item 1A. Risk Factors of our Annual Report on Form 10-K for the year ended December 31, 2017, and the following:

- Credit risk associated with an obligor’s failure to meet the terms of any contract with the Bank or otherwise fail to perform as agreed;
- Interest rate risk involving the effect of a change in interest rates on both the Bank’s earnings and the market value of the portfolio equity;
- Liquidity risk affecting our Bank’s ability to meet its obligations when they come due;
- Price risk focusing on changes in market factors that may affect the value of financial instruments which are “marked-to-market” periodically;
- Merger and merger integration risk including potential deposit attrition, higher than expected costs, customer loss and business disruption, including, without limitation, potential difficulties in maintaining relationships with key personnel and other integration related-matters, and the potential inability to identify and successfully negotiate and complete additional successful combinations with potential merger or acquisition partners;
- Transaction risk arising from problems with service or product delivery;
- Compliance risk involving risk to earnings or capital resulting from violations of or nonconformance with laws, rules, regulations, prescribed practices, or ethical standards;

Table of Contents

- Controls and procedures risk, including the potential failure or circumvention of our controls and procedures or failure to comply with regulations related to controls and procedures;
- Regulatory change risk resulting from new laws, rules, regulations, proscribed practices or ethical standards, including the possibility that regulatory agencies may require higher levels of capital above the current regulatory-mandated minimums, including the impact of the new capital rules under Basel III and the possibility of changes in accounting standards, policies, principles and practices, including changes in accounting principles relating to loan loss recognition;
- Strategic risk resulting from adverse business decisions or improper implementation of business decisions;
- Reputation risk that adversely affects earnings or capital arising from negative public opinion;
- Terrorist activities risk that result in loss of consumer confidence and economic disruptions;
- Cybersecurity risk related to our dependence on internal computer systems and the technology of outside service providers, as well as the potential impacts of third-party security breaches, subjects us to potential business disruptions or financial losses resulting from deliberate attacks or unintentional events;
- Noninterest income risk resulting from the effect of final rules amending Regulation E that prohibit financial institutions from charging consumer fees for paying overdrafts on ATM and one-time debit card transactions, unless the consumer consents or opts-in to the overdraft service for those types of transactions;
- Economic downturn risk resulting in changes in the credit markets, greater than expected non-interest expenses, excessive loan losses and other factors, which risks could be exacerbated by potential negative economic developments resulting from the expiration of the federal tax reductions, and the implementation of federal spending cuts currently scheduled to go into effect; and
- \$10.0 billion asset size threshold risk resulting in increased expenses, loss of revenues, and increased regulatory scrutiny associated with our total assets exceeding \$10.0 billion.

Additional information with respect to factors that may cause actual results to differ materially from those contemplated by our forward-looking statements may also be included in other reports that the Company files with the SEC. The Company cautions that the foregoing list of risk factors is not exclusive and not to place undue reliance on forward-looking statements.

For any forward-looking statements made in this Quarterly Report on Form 10-Q or in any documents incorporated by reference into this Quarterly Report on Form 10-Q, we claim the protection of the safe harbor for forward looking statements contained in the Private Securities Litigation Reform Act of 1995. Such forward-looking statements speak only as of the date of this Quarterly Report on Form 10-Q or the date of any document incorporated by reference in Quarterly Report on Form 10-Q. We do not undertake to update forward looking statements to reflect facts, circumstances, assumptions or events that occur after the date the forward-looking statements are made. All subsequent written and oral forward looking statements by the Company or any person acting on its behalf are expressly qualified in their entirety by the cautionary statements contained or referred to in this Quarterly Report on Form 10-Q.

Item 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

There have been no material changes in our quantitative and qualitative disclosures about market risk as of March 31, 2018 from those disclosures presented in our Annual Report on Form 10-K for the year ended December 31, 2017

Item 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

Management, including our Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of our disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) as of the end of the period covered by this report. Based upon that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective to ensure that information required to be disclosed in the reports we file and submit under the Exchange Act is (i) recorded, processed, summarized and reported as and when required and (ii) accumulated and communicated to our management, including our Chief Executive Officer and the Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

Table of Contents

The design of any system of controls and procedures is based in part upon certain assumptions about the likelihood of future events. There can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions, regardless of how remote.

Changes in Internal Control over Financial Reporting

There has been no change in our internal control over financial reporting during the three months ended March 31, 2018, that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II — OTHER INFORMATION

Item 1. LEGAL PROCEEDINGS

As of March 31, 2018 and the date of this Quarterly Report on Form 10-Q, we believe that we are not party to, nor is any or our property the subject of, any pending material proceeding other than those that may occur in the ordinary course of our business.

Item 1A. RISK FACTORS

Investing in shares of our common stock involves certain risks, including those identified and described in Item 1A. of our Annual Report on Form 10-K for the fiscal year ended December 31, 2017, as well as cautionary statements contained in this Quarterly Report on Form 10-Q, including those under the caption “Cautionary Note Regarding Any Forward-Looking Statements” set forth in Part I, Item 2 of this Quarterly Report on Form 10-Q, risks and matters described elsewhere in this Quarterly Report on Form 10-Q and in our other filings with the SEC.

Item 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

- (a) Not applicable
- (b) Not applicable
- (c) Issuer Purchases of Registered Equity Securities:

In February 2004, we announced a stock repurchase program with no formal expiration date to repurchase up to 250,000 shares of our common stock. In March 2017, the Board of Directors approved and reset the number of shares available to be repurchased under the 2004 stock repurchase program to 1,000,000. The following table reflects share repurchase activity during the first quarter of 2018:

(a) Total	(c) Total Number of Shares (or Units) Purchased as	(d) Maximum Number (or Approximate Dollar Value) of Shares (or Units) that May
-----------	--	---

Edgar Filing: SOUTH STATE Corp - Form 10-Q

Period	Number of Shares (or Units) Purchased	(b) Average Price Paid per Share (or Unit)	Part of Publicly Announced Plans or Programs	Yet Be Purchased Under the Plans or Programs
January 1 - January 31	12,943	* \$ 91.03	—	1,000,000
February 1 - February 30	—	* —	—	1,000,000
March 1 - March 31	5,049	* 85.97	—	1,000,000
Total	17,992		—	1,000,000

*These shares were repurchased under arrangements, authorized by our stock-based compensation plans and Board of Directors, whereby officers or directors may sell previously owned shares to the Company in order to pay for the exercises of stock options or for income taxes owed on vesting shares of restricted stock. These shares were not purchased under the 2004 stock repurchase program to purchase 1,000,000 shares.

Item 3. DEFAULTS UPON SENIOR SECURITIES

Not applicable.

Item 4. MINE SAFETY DISCLOSURES

Not applicable.
