(Mark one)

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES AND EXCHANGE ACT OF 1934

For fiscal year ended January 31, 2015

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission File Number 1-16497

MOVADO GROUP, INC.

(Exact name of registrant as specified in its charter)

New York (State or Other Jurisdiction of Incorporation or Organization)	13-2595932 (IRS Employer Identification No.)
---	--

650 From Road, Ste. 375

Paramus, New Jersey (Address of Principal Executive Offices)	07652-3556 (Zip Code)
---	--------------------------

Registrant's Telephone Number, Including Area Code: (201) 267-8000

Securities Registered Pursuant to Section 12(b) of the Act:

Title of Each Class	Name of Each Exchange on which Registered
---------------------	---

Edgar Filing: MOVADO GROUP INC - Form 10-K

Common stock, par
value \$0.01 per share New York Stock Exchange

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.
Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Exchange Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).
Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

The aggregate market value of the voting stock held by non-affiliates of the registrant as of July 31, 2014, was approximately \$740,352,000 (based on the closing sale price of the registrant's Common Stock on that date as reported on the New York Stock Exchange). For purposes of this computation, each share of Class A Common Stock is assumed to have the same market value as one share of Common Stock into which it is convertible and only shares of stock held by directors and executive officers were excluded.

The number of shares outstanding of the registrant's Common Stock and Class A Common Stock as of March 24, 2015, were 17,471,383 and 6,644,105, respectively.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the definitive proxy statement relating to registrant's 2015 annual meeting of shareholders (the "Proxy Statement") are incorporated by reference in Part III hereof.

FORWARD-LOOKING STATEMENTS

Statements in this annual report on Form 10-K, including, without limitation, statements under Item 7 “Management’s Discussion and Analysis of Financial Condition and Results of Operations” and elsewhere in this report, as well as statements in future filings by the Company with the Securities and Exchange Commission (“SEC”), in the Company’s press releases and oral statements made by or with the approval of an authorized executive officer of the Company, which are not historical in nature, are intended to be, and are hereby identified as, “forward-looking statements” for purposes of the safe harbor provided by the Private Securities Litigation Reform Act of 1995. These statements are based on current expectations, estimates, forecasts and projections about the Company, its future performance, the industry in which the Company operates and management’s assumptions. Words such as “expects”, “anticipates”, “targets”, “goals”, “projects”, “intends”, “plans”, “believes”, “seeks”, “estimates”, “may”, “will”, “should” and variations of such words expressions are also intended to identify such forward-looking statements. The Company cautions readers that forward-looking statements include, without limitation, those relating to the Company’s future business prospects, projected operating or financial results, revenues, working capital, liquidity, capital needs, plans for future operations, expectations regarding capital expenditures and operating expenses, effective tax rates, margins, interest costs, and income as well as assumptions relating to the foregoing. Forward-looking statements are subject to certain risks and uncertainties, some of which cannot be predicted or quantified. Actual results and future events could differ materially from those indicated in the forward-looking statements, due to several important factors herein identified, among others, and other risks and factors identified from time to time in the Company’s reports filed with the SEC including, without limitation, the following: general economic and business conditions, which may impact disposable income of consumers in the United States and the other significant markets (including Europe) where the Company’s products are sold, uncertainty regarding such economic and business conditions, trends in consumer debt levels and bad debt write-offs, general uncertainty related to possible terrorist attacks, natural disasters, the stability of the European Union and defaults on or downgrades of sovereign debt and the impact of any of those events on consumer spending, changes in consumer preferences and popularity of particular designs, new product development and introduction, the ability of the Company to successfully implement its business strategies, competitive products and pricing, the impact of “smart” watches and other wearable tech products on the traditional watch market, seasonality, availability of alternative sources of supply in the case of the loss of any significant supplier or any supplier’s inability to fulfill the Company’s orders, the loss of or curtailed sales to significant customers, the Company’s dependence on key employees and officers, the ability to successfully integrate the operations of acquired businesses without disruption to other business activities, the continuation of the company’s major warehouse and distribution centers, the continuation of licensing arrangements with third parties, losses possible from pending or future litigation, the ability to secure and protect trademarks, patents and other intellectual property rights, the ability to lease new stores on suitable terms in desired markets and to complete construction on a timely basis, the ability of the Company to successfully manage its expenses on a continuing basis, information systems failure or breaches of network security, the continued availability to the Company of financing and credit on favorable terms, business disruptions, disease, general risks associated with doing business outside the United States including, without limitation, import duties, tariffs, quotas, political and economic stability, changes to existing laws or regulations, and success of hedging strategies with respect to currency exchange rate fluctuations.

These risks and uncertainties, along with the risk factors discussed under Item 1A “Risk Factors” in this Annual Report on Form 10-K, should be considered in evaluating any forward-looking statements contained in this report or incorporated by reference herein. All forward-looking statements speak only as of the date of this report or, in the case of any document incorporated by reference, the date of that document. All subsequent written and oral forward-looking statements attributable to the Company or any person acting on its behalf are qualified by the cautionary statements in this section. The Company undertakes no obligation to update or publicly release any revisions to forward-looking statements to reflect events, circumstances or changes in expectations after the date of this report.

Item 1. Business

GENERAL

In this Form 10-K, all references to the “Company” or “Movado Group” include Movado Group, Inc. and its subsidiaries, unless the context requires otherwise.

Movado Group designs, sources, markets and distributes fine watches. Its portfolio of brands is currently comprised of Coach® Watches, Concord®, Ebel®, ESQ® Movado, Scuderia Ferrari® Watches, HUGO BOSS® Watches, Juicy Couture® Watches, Lacoste® Watches, Movado®, and Tommy Hilfiger® Watches. The Company is a leader in the design, development, marketing and distribution of watch brands sold in almost every major category comprising the watch industry.

The Company was incorporated in New York in 1967 under the name North American Watch Corporation to acquire Piaget Watch Corporation and Corum Watch Corporation, which had been, respectively, the exclusive importers and distributors of Piaget and Corum watches in the United States since the 1950’s. The Company sold its Piaget and Corum distribution businesses in 1999 and 2000, respectively, to focus on its own portfolio of brands. Since its incorporation, the Company has developed its brand-building reputation and distinctive image across an expanding number of brands and geographic markets. Strategic acquisitions of watch brands and their subsequent growth, along with license agreements, have played an important role in the expansion of the Company’s brand portfolio.

In 1970, the Company acquired the Concord brand and the Swiss company that had been manufacturing Concord watches since 1908. In 1983, the Company acquired the U.S. distributor of Movado watches and substantially all of the assets related to the Movado brand from the Swiss manufacturer of Movado watches. The Company changed its name to Movado Group, Inc. in 1996. In March 2004, the Company completed its acquisition of Ebel, one of the world’s premier luxury watch brands that was established in La Chaux-de-Fonds, Switzerland in 1911.

The Company is highly selective in its licensing strategy and chooses to enter into long-term agreements with only powerful brands that are leaders in their respective businesses.

The following table sets forth the brands licensed by the Company and the year in which the Company launched each licensed brand for watches.

Brand	Licensors	Calendar Year Launched
ESQ	Hearst Communication, Inc.	1992
Coach	Coach, Inc.	1999
Tommy Hilfiger	Tommy Hilfiger Licensing LLC	2001
HUGO BOSS	HUGO BOSS Trade Mark Management GmbH & Co	2006
Juicy Couture	ABG Juicy Couture, LLC	2007
Lacoste	Lacoste S.A., Sporloisirs S.A. and Lacoste Alligator S.A.	2007

Scuderia Ferrari Ferrari Brand S.p.A.

2013

The Company's common stock is traded on the NYSE under the trading symbol MOV.

RECENT DEVELOPMENTS

On March 31, 2015, the Board approved the payment of a cash dividend of \$0.11 for each share of the Company's outstanding common stock and class A common stock. The dividend will be paid on April 24, 2015 to all shareholders of record as of the close of business on April 10, 2015. The decision of whether to declare any future cash dividend, including the amount of any such dividend and the establishment of record and payment dates, will be determined, in each quarter, by the Board of Directors, in its sole discretion.

2

On January 30, 2015, the Company entered into a Credit Agreement (the "Credit Agreement") with the lenders party thereto and Bank of America, N.A. as administrative agent (in such capacity, the "Agent"). The Credit Agreement provides for a \$100.0 million senior secured revolving credit facility (the "Facility") including a \$15.0 million letter of credit subfacility, that matures on January 30, 2020, with provisions for uncommitted increases of up to \$50.0 million in the aggregate subject to customary terms and conditions. The Credit Agreement replaces the Amended and Restated Loan and Security Agreement dated as of July 17, 2009, which we had amended on September 30, 2014 to, among other things, extend its maturity through 2020 and reflect favorable changes in market rate conditions.

Also, on January 30, 2015, the Company entered into an amended and restated license agreement with Coach, Inc. that amends and restates the original license agreement which the Company had entered into on December 9, 1996, and extends its term from June 30, 2015 through June 30, 2020.

On November 25, 2014, the Board approved an increase in the Company's share repurchase program, from \$50.0 million, originally approved on March 21, 2013, to \$100.0 million. Under the program, the Company is authorized to purchase shares of its outstanding common stock from time to time, depending on market conditions, share price and other factors. The Company may purchase shares of its common stock through open market purchases, repurchase plans, block trades or otherwise. This authorization expires on January 31, 2016.

Also, on November 25, 2014, the Board approved the payment of a cash dividend of \$0.10 for each share of the Company's outstanding common stock and class A common stock. The dividend was paid on December 19, 2014 to all shareholders of record as of the close of business on December 5, 2014.

On August 26, 2014, the Board approved the payment of a cash dividend of \$0.10 for each share of the Company's outstanding common stock and class A common stock. The dividend was paid on September 19, 2014 to all shareholders of record as of the close of business on September 5, 2014.

On May 22, 2014, the Board approved the payment of a cash dividend of \$0.10 for each share of the Company's outstanding common stock and class A common stock. The dividend was paid on June 16, 2014 to all shareholders of record as of the close of business on June 2, 2014.

On March 28, 2014, the Company entered into an amended and restated license agreement with Lacoste S.A., Sporloisirs S.A. and Lacoste Alligator S.A. that amends and restates the original license agreement which the Company had entered into in March, 2006, and that extends its term from January 1, 2015 through December 31, 2022.

INDUSTRY OVERVIEW

The largest markets for watches are North America, Europe and Asia. The Company divides the watch market into five principal categories as set forth in the following table.

Market Category	Suggested Retail Price	
	Range	Primary Category of Movado Group, Inc. Brands
Exclusive	\$10,000 and over	—
Luxury	\$2,000 to \$9,999	Concord and Ebel
Accessible Luxury	\$500 to \$2,499	Movado
Moderate and Fashion	\$75 to \$500	ESQ Movado, Coach, HUGO BOSS, Juicy Couture, Tommy Hilfiger, Scuderia Ferrari and Lacoste

Mass Market	Less than \$75	—
-------------	----------------	---

Exclusive Watches

Exclusive watches are usually made of precious metals, including 18 karat gold or platinum, and are often set with precious gems. These watches are primarily mechanical or quartz-analog watches. Mechanical watches keep time with intricate mechanical movements consisting of an arrangement of wheels, jewels and winding and regulating mechanisms. Quartz-analog watches have quartz movements in which time is precisely calibrated to the regular frequency of the vibration of quartz crystal. Exclusive watches are manufactured almost entirely in Switzerland. Well-known brand names of exclusive watches include Audemars Piguet, Patek Philippe, Piaget and Vacheron Constantin. The Company does not compete in the exclusive watch category.

Luxury Watches

Luxury watches are either quartz-analog watches or mechanical watches. These watches typically are made with either 14 or 18 karat gold, stainless steel, ceramic or a combination of gold and stainless steel, and are occasionally set with precious gems. Luxury watches are primarily manufactured in Switzerland. In addition to a majority of the Company's Ebel and Concord watches, well-known brand names of luxury watches include Baume & Mercier, Breitling, Cartier, Omega, Rolex and TAG Heuer.

Accessible Luxury Watches

The majority of accessible luxury watches are quartz-analog watches. These watches typically are made with gold finish, stainless steel, ceramic or a combination of gold finish and stainless steel. Accessible luxury watches are manufactured primarily in Switzerland, although some are manufactured in Asia. In addition to a majority of the Company's Movado watches, well-known brand names of accessible luxury watches include Gucci, Rado, Michele and Raymond Weil.

Moderate and Fashion Watches

Most moderate and fashion watches are quartz-analog watches. These watches typically are made with gold finish, stainless steel, brass, plastic or a combination of gold finish and stainless steel. Moderate and fashion watches are manufactured primarily in Asia and Switzerland. In addition to the Company's ESQ Movado, Coach, HUGO BOSS, Juicy Couture, Tommy Hilfiger, Scuderia Ferrari and Lacoste brands, well-known brand names of watches in the moderate category include Anne Klein, Bulova, Citizen, Fossil, Guess, Seiko, Michael Kors, Swatch and Wittnauer.

Mass Market Watches

Mass market watches typically consist of digital watches and analog watches made from stainless steel, brass and/or plastic and are manufactured in Asia. Well-known brands include Casio, Pulsar, Seiko and Timex. The Company does not compete in the mass market watch category.

BRANDS

The Company designs, develops, sources, markets and distributes products under the following watch brands:

Coach Watches

Coach Watches are an extension of the Coach leathersgoods brand and reflect the Coach brand image. A distinctive American brand, Coach delivers stylish, aspirational, well-made products that represent excellent value. Coach watches are made with stainless steel, gold finish or a combination of stainless steel and gold finish with leather straps, stainless steel bracelets or gold finish bracelets.

Concord

Concord was founded in 1908 in Bienne, Switzerland. Concord watches have Swiss movements and are made with solid 18 karat gold, stainless steel or a combination of 18 karat gold and stainless steel. Some are set with diamonds.

Ebel

The Ebel brand was established in La Chaux-de-Fonds, Switzerland in 1911. Since acquiring Ebel, Movado Group has returned Ebel to its roots as the “Architects of Time” through its product development, marketing initiatives and global advertising campaigns. All Ebel watches feature Swiss movements and are made with solid 18 karat yellow or rose gold, stainless steel or a combination of 18 karat yellow or rose gold, ceramic and, or stainless steel. Some are set with diamonds.

4

ESQ

ESQ watches have been marketed by the Company since fiscal 2013 as a collection within the Movado brand. The watches are priced to compete in the entry level Swiss watch category and are defined by bold sport and fashion designs. All ESQ watches contain Swiss movements and most are made with stainless steel, gold finish or a combination of stainless steel and gold finish, with leather straps, stainless steel bracelets or gold finish bracelets. In the fourth quarter of fiscal 2014, the Company made the strategic decision to reduce the presence of ESQ watches while expanding the Movado brand offering in certain retail doors and the Company recorded a pre-tax charge of \$7.8 million to sales in fiscal 2014 for anticipated ESQ watch returns in fiscal 2015. This strategy was intended to drive incremental sales of the Company's more profitable Movado brand watch families by utilizing the increased case space at the point of sale that otherwise would have been occupied by relatively less productive ESQ Movado SKUs. The Company continues to offer ESQ Movado in select retail locations as well as its direct-to-consumer outlet stores and through e-commerce at Movado.com.

Scuderia Ferrari Watches

Asserting Scuderia Ferrari's proud racing heritage and Italian pedigree, Movado Group's Scuderia Ferrari watch collection for men and women brings the unparalleled excitement and distinctive style of the time honored racing team to fans around the world.

HUGO BOSS Watches

HUGO BOSS is a global market leader in the world of fashion. The HUGO BOSS watch collection is an extension of the parent brand and includes classy, sporty, elegant and fashion timepieces with distinctive features, giving this collection a strong and coherent identity.

Juicy Couture Timepieces

Juicy Couture is a lifestyle brand that delivers sophisticated, yet fun fashion for women, men and children. Juicy Couture timepieces reflect the brand's clear vision, unique identity in the upscale contemporary category, encompassing both trend-right and core styling contemporary watches.

Lacoste Watches

The Lacoste watch collection embraces the Lacoste lifestyle proposition which encompasses elegance, refinement and comfort, as well as a dedication to quality and innovation. Mirroring key attributes of the Lacoste brand, the collection features stylish timepieces with a contemporary sport elegant feel.

Movado

The Movado brand is renowned for its iconic Museum® dial and modern design aesthetic. Since its founding in La Chaux-de-Fonds, Switzerland in 1881, Movado has earned more than 100 patents and 200 international awards for artistry and innovation in watch design and technology, and Movado timepieces have won world renown for their unique beauty and timeless design.

Movado is a hallmark of some of the most famous timepieces ever created, most notably, the Movado Museum® Watch. Designed in 1947 by Bauhaus-influenced artist Nathan George Horwitt, the watch dial defined by a solitary dot at 12, symbolizing the sun at high noon, has been acclaimed for purity of design unrivaled in the history of time-keeping. When Horwitt's dial was selected for the permanent design collection of the Museum of Modern Art,

New York, in 1960, it became the first watch dial ever awarded this distinction. Known today as the Movado Museum Watch, this legendary dial is regarded as an icon of Modernism. A trademarked and award-winning design, the celebrated single dot dial now distinguishes a wide range of Movado timepieces.

The Movado brand experience is defined by its long, rich heritage of design innovation, and a close, enduring association with the arts. Expressions of Movado's commitment to the fine and cultural arts encompass commissioned watch designs by famed artists, affiliations with talented brand ambassadors, sponsorship of major arts institutions and support of emerging artists.

All Movado watches have Swiss movements and are made with 14 or 18 karat gold, 18 karat gold finish, stainless steel, ceramic or a combination of 18 karat gold finish and stainless steel.

Tommy Hilfiger Watches

Reflecting the fresh, fun all-American style for which Tommy Hilfiger is known, Tommy Hilfiger watches feature quartz, digital or analog-digital movements, with stainless steel, titanium, aluminum, silver-tone, two-tone or gold-tone cases and bracelets, and leather, fabric, plastic or rubber straps. The line includes fashion and sport models.

DESIGN AND PRODUCT DEVELOPMENT

The Company's offerings undergo two phases before they are produced for sale to customers: design and product development. The design phase includes the creation of artistic and conceptual renderings while product development involves the construction of prototypes. The Company's Movado BOLD, ESQ Movado and licensed brands are designed by in-house design teams in Switzerland and the United States in cooperation with outside sources, including (in the case of the licensed brands except for ESQ Movado) licensors' design teams. Product development for the licensed brands, ESQ Movado and Movado BOLD takes place in the Company's Asia operations. For the Company's Movado (with the exception of Movado BOLD), Ebel and Concord brands, the design phase is performed by a combination of in-house and freelance designers in Europe and the United States while product development is carried out in the Company's Swiss operations. Senior management of the Company is actively involved in the design and product development process.

MARKETING

The Company's marketing strategy is to communicate a consistent, brand-specific message to the consumer. Recognizing that advertising is an integral component to the successful marketing of its product offerings, the Company devotes significant resources to advertising and maintains its own in-house advertising department which focuses primarily on the implementation and management of global marketing and advertising strategies for each of the Company's brands, ensuring consistency of presentation. The Company utilizes outside agencies for the creative development of advertising campaigns which are developed individually for each of the Company's brands and are directed primarily to the end consumer rather than to trade customers. The Company's advertising targets consumers with particular demographic characteristics appropriate to the image and price range of each brand. Most Company advertising is placed in magazines and other print media but some is also created for radio and television campaigns, online, catalogs, outdoor and other promotional materials. Marketing expenses totaled 12.3%, 13.0% and 13.5% of net sales in fiscal 2015, 2014 and 2013, respectively.

OPERATING SEGMENTS

The Company conducts its business primarily in two operating segments: Wholesale and Retail. For operating segment data and geographic segment data for the years ended January 31, 2015, 2014 and 2013, see Note 13 to the Consolidated Financial Statements regarding Segment Information.

The Company's Wholesale segment includes the design, development, sourcing, marketing and distribution of high quality watches, unallocated corporate expenses, in addition to after-sales service activities and shipping. The Retail segment includes the Company's outlet stores.

The Company divides its business into two major geographic locations: United States operations, and International, which includes the results of all other Company operations. The allocation of geographic revenue is based upon the location of the customer. The Company's International operations in Europe, the Americas (excluding the United States), Asia and the Middle East account for 18.9%, 11.4%, 8.0% and 7.1%, respectively, of the Company's total net sales for fiscal 2015. Substantially all of the Company's international assets are located in Switzerland and Asia. For a discussion of the risks associated with the Company's operations conducted outside the United States see "A significant portion of the Company's business is conducted outside of the United States. Many factors affecting business activities outside the United States could adversely impact this business" under Item 1A, Risk Factors, below.

Wholesale

United States Wholesale

The Company sells all of its brands in the U.S. wholesale market primarily to major jewelry store chains such as Helzberg Diamonds Corp. and Sterling, Inc. department stores, such as Macy's, and Nordstrom, as well as independent jewelers. Sales to trade customers in the United States are made directly by the Company's U.S. sales force and, to a lesser extent, independent sales representatives. Sales representatives are responsible for a defined geographic territory, generally specialize in a particular brand and sell to and service independent jewelers within their territory. The sales force also consists of account executives and account representatives who, respectively, sell to and service chain and department store accounts.

International Wholesale

Internationally, the Company's brands are sold in department stores such as El Cortes Ingles in Spain and Galeries Lafayette in France, jewelry chain stores such as Christ in Switzerland and Germany and independent jewelers. The Company employs its own international sales force operating at the Company's sales and distribution offices in Canada, China, France, Germany, Hong Kong, Singapore, Switzerland, the United Kingdom and the United Arab Emirates. In addition, the Company sells all of its brands other than ESQ Movado through a network of independent distributors operating in numerous countries around the world. Distribution of ESQ Movado watches, which outside of the United States are sold primarily in Canada and the Caribbean, is handled by the Company's Canadian subsidiary and Caribbean-based sales teams. A majority of the Company's arrangements with its international distributors are long-term, generally require certain minimum purchases and minimum advertising expenditures and restrict the distributor from selling competitive products.

In France and Germany, the Company's licensed brands are marketed and distributed by subsidiaries of a joint venture company owned 51% by the Company and 49% by a French company with established distribution, marketing and sales operations in France and Germany. The terms of the joint venture agreement include financial performance measures which, if not attained, give either party the right to terminate the agreement by the following April 30th after the tenth year (January 31, 2016); restrictions on the transfer of shares in the joint venture company; and a buy out right whereby the Company can purchase all of the shares in the joint venture company as of July 1, 2016 and every fifth anniversary thereafter at a pre-determined price.

In the U.K., the Company distributes both its licensed brands as well as Movado and Ebel watches through MGS Distribution Limited ("MGS"), an English company in which the Company has a 90% ownership interest. The Company's former joint venture partner in MGS, Swico Limited, also based in the U.K., provides MGS with logistical support and after-sales service.

Retail

The Company's subsidiary, Movado Retail Group, Inc., operates 38 outlet stores located in outlet centers across the United States, which serve as an effective vehicle to sell discontinued models and factory seconds of all of the Company's watches.

SEASONALITY

The Company's U.S. sales are traditionally greater during the Christmas and holiday season. Consequently, the Company's net sales historically have been higher during the second half of a fiscal year. The amount of net sales and operating profit generated during the second half of each fiscal year depends upon the general level of retail sales during the Christmas and holiday season, as well as economic conditions and other factors beyond the Company's control. Major selling seasons in certain international markets center on significant local holidays that occur in late winter or early spring. The second half of each year accounted for 54.9%, 56.5%, and 56.1% of the Company's net sales for the fiscal years ended January 31, 2015, 2014, and 2013, respectively.

BACKLOG

At March 24, 2015, the Company had unfilled orders of \$54.1 million compared to \$30.4 million at March 19, 2014 and \$35.7 million at March 14, 2013. Unfilled orders include both confirmed orders and orders that the Company believes will be confirmed based on the historic experience with the customers. It is customary for many of the Company's customers not to confirm their future orders with formal purchase orders until shortly before their desired delivery dates.

CUSTOMER SERVICE, WARRANTY AND REPAIR

The Company assists in the retail sales process of its wholesale customers by monitoring their sales and inventories by product category and style. The Company also assists in the conception, development and implementation of customers' marketing vehicles. The Company places considerable emphasis on cooperative advertising programs with its retail customers. The Company's retail sales process has resulted in close relationships with its principal customers, often allowing for influence on the mix, quantity and timing of their purchasing decisions. The Company believes that customers' familiarity with its sales approach has facilitated, and should continue to facilitate, the introduction of new products through its distribution network.

The Company permits the return of damaged or defective products. In addition, although the Company has no obligation to do so, it accepts other returns from customers in certain instances.

The Company has service facilities around the world including seven Company-owned service facilities and multiple independent service centers which are authorized to perform warranty repairs. A list of authorized service centers can be accessed online at www.mgiservice.com. In order to maintain consistency and quality at its service facilities and authorized independent service centers, the Company conducts training sessions and distributes technical information and updates to repair personnel. All watches sold by the Company come with limited warranties covering the movement against defects in material and workmanship for periods ranging from two to three years from the date of purchase, with the exception of Tommy Hilfiger watches, for which the warranty period is ten years. In addition, the warranty period is five years for the gold plating on certain Movado watch cases and bracelets. Products that are returned under warranty to the Company are generally serviced by the Company's employees at its service facilities.

The Company retains adequate levels of component parts to facilitate after-sales service of its watches for an extended period of time after the discontinuance of such watches.

The Company makes available a web-based system at www.mgiservice.com providing immediate access for the Company's retail partners to the information they may want or need about after sales service issues. The website allows the Company's retailers to track their repair status online 24 hours a day. The system also permits customers to authorize repairs, track repair status through the entire repair life cycle, view repair information and obtain service order history.

SOURCING, PRODUCTION AND QUALITY

The Company does not manufacture any of the products it sells. The Company employs a flexible manufacturing model that relies on independent manufacturers to meet shifts in marketplace demand and changes in consumer preferences. All product sources must achieve and maintain the Company's high quality standards and specifications. With strong supply chain organizations in Switzerland, China and Hong Kong, the Company maintains control over the quality of its products, wherever they are manufactured. Compliance is monitored with strictly implemented quality control standards, including on-site quality inspections.

A majority of the Swiss watch movements used in the manufacture of Movado, Ebel, Concord and ESQ Movado watches are purchased from two suppliers. The Company obtains other watch components for all of its brands, including movements, cases, hands, dials, bracelets and straps from a number of other suppliers. The Company does not have long-term supply commitments with any of its component parts suppliers.

Movado (with the exception of Movado BOLD), Ebel and Concord watches are manufactured in Switzerland by independent third party assemblers. All Movado, ESQ Movado, Ebel and Concord watches are manufactured using Swiss movements. All of the Company's products are manufactured using components obtained from third party suppliers. ESQ Movado and Movado BOLD watches are manufactured by independent contractors in Asia using Swiss movements. Coach, Tommy Hilfiger, HUGO BOSS, Juicy Couture, Scuderia Ferrari and Lacoste watches are manufactured by independent contractors in Asia.

TRADEMARKS, PATENTS AND LICENSE AGREEMENTS

The Company owns the trademarks CONCORD®, EBEL® and MOVADO®, as well as trademarks for the Movado Museum dial design, and related trademarks for watches and jewelry in the United States and in numerous other countries.

The Company licenses ESQUIRE®, ESQ® and related trademarks on an exclusive worldwide basis for use in connection with the manufacture, distribution, advertising and sale of watches pursuant to a license agreement with Hearst Magazine, a division of Hearst Communications, Inc., dated as of January 1, 1992 (as amended, the "Hearst

License Agreement”). The current term of the Hearst License Agreement expires December 31, 2015, and contains options for renewal at the Company’s discretion through December 31, 2042.

The Company licenses the trademark COACH® and related trademarks on an exclusive worldwide basis for use in connection with the manufacture, distribution, advertising and sale of watches pursuant to an amended and restated license agreement with Coach, Inc., dated January 30, 2015, which expires on June 30, 2020.

Under an amended and restated license agreement with Tommy Hilfiger Licensing LLC dated September 16, 2009 (as amended the “Tommy Hilfiger License Agreement”), the Company has the exclusive license to use the trademark TOMMY HILFIGER® and related trademarks in connection with the manufacture of watches and jewelry worldwide and in connection with the marketing, advertising, sale and distribution of watches and jewelry at wholesale (and at retail through its outlet stores) worldwide (excluding certain accounts in Japan). The term of the Tommy Hilfiger License Agreement expires December 31, 2019 and may be extended by the Company for an additional five years ending on December 31, 2024, subject to the satisfaction of minimum sales requirements and approval of a new business plan.

On March 5, 2012, the Company entered into an amended and restated license agreement with HUGO BOSS Trade Mark Management GmbH & Co. (the “Hugo Boss License Agreement”), extending the term and making certain other changes to the license agreement originally entered by the parties on December 15, 2004, under which the Company received a worldwide exclusive license to use the trademark HUGO BOSS® and any other trademarks containing the names “HUGO” or “BOSS”, in connection with the production, promotion and sale of watches. The term of the Hugo Boss License Agreement continues through December 31, 2018.

In November 2005, the Company entered into a license agreement with L.C. Licensing, Inc., for the exclusive worldwide license to use the trademarks JUICY COUTURE® and related trademarks in connection with the manufacture, advertising, merchandising, promotion, sale and distribution of timepieces and components (as amended, the “Juicy Couture License Agreement”). In November 2013, L.C. Licensing, Inc. assigned its entire interest in the Juicy Couture License Agreement to ABG Juicy Couture, LLC. The current term of the Juicy Couture License Agreement is through December 31, 2016.

The Company entered into an exclusive worldwide license agreement with Lacoste S.A., Sporloisirs, S.A. and Lacoste Alligator, S.A. in 2006 to design, produce, market and distribute Lacoste watches under the Lacoste® name and the distinctive “alligator” logo beginning in the first half of 2007. On March 28, 2014, the Company entered into an amended and restated license agreement with Lacoste S.A., Sporloisirs S.A. and Lacoste Alligator S.A. which amends and restates the original license agreement with the Licensor and extends its term from January 1, 2015 through December 31, 2022.

On March 22, 2012, the Company entered into an exclusive worldwide license agreement with Ferrari S.p.A. to use certain well known trademarks of Ferrari including the S.F. and Prancing Horse device in shield, FERRARI OFFICIAL LICENSED PRODUCT and SCUDERIA FERRARI, in connection with the manufacture, advertising, merchandising, promotion, sale and distribution of watches with a suggested retail price not exceeding €1,500 (the “Ferrari License Agreement”). The current term of the Ferrari License Agreement is through December 31, 2017.

The Company also owns, and has pending applications for, a number of design patents in the United States and internationally for various watch designs, as well as designs of watch dials, cases, bracelets and jewelry.

The Company actively seeks to protect and enforce its intellectual property rights by working with industry associations, anti-counterfeiting organizations, private investigators and law enforcement authorities, including customs authorities in the United States and internationally, and, when necessary, suing infringers of its trademarks and patents. Consequently, the Company is involved from time to time in litigation or other proceedings to determine the enforceability, scope and validity of these rights. With respect to the trademarks MOVADO®, EBEL®, CONCORD® and certain other related trademarks, the Company has received exclusion orders that prohibit the importation of counterfeit goods or goods bearing confusingly similar trademarks into the United States and other countries. In accordance with customs regulations, these exclusion orders, however, do not cover the importation of genuine Movado, Ebel and Concord watches because the Company is considered the manufacturer of such watches. All of the Company’s exclusion orders are renewable.

COMPETITION

The markets for each of the Company’s watch brands are highly competitive. With the exception of Swatch Group, Ltd., a large Swiss-based competitor, no single company competes with the Company across all of its brands. Certain companies, however, compete with Movado Group with respect to one or more of its watch brands. Certain of these companies have, and other companies that may enter the Company’s markets in the future may have, greater financial, distribution, marketing and advertising resources than the Company. The Company’s future success will depend, to a significant degree, upon its continued ability to compete effectively with regard to, among other things, the style,

quality, price, advertising, marketing, distribution and availability of supply of the Company's watches and other products.

EMPLOYEES

As of January 31, 2015, the Company had approximately 1,110 full-time employees in its global operations. No employee of the Company is represented by a labor union or is subject to a collective bargaining agreement. The Company has never experienced a work stoppage due to labor difficulties and believes that its employee relations are good.

9

AVAILABLE INFORMATION

The Company's annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and all amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934, as amended, are available free of charge on the Company's website, located at www.movadogroup.com, as soon as reasonably practicable after the same are electronically filed with, or furnished to, the SEC. The public may read any materials filed by the Company with the SEC at the SEC's public reference room at 100 F. Street, N.E., Washington, D.C., 20549. The public may obtain information on the operation of the public reference room by calling the SEC at 1-800-SEC-0330. The SEC maintains a website that contains reports, proxy and information statements, and other information regarding the Company at www.sec.gov.

The Company has adopted a Code of Business Conduct and Ethics that applies to all directors, officers and employees, including the Company's Chief Executive Officer, Chief Financial Officer and principal accounting and financial officers, which is posted on the Company's website. The Company will post any amendments to the Code of Business Conduct and Ethics and any waivers that are required to be disclosed by SEC regulations on the Company's website. In addition, the committee charters for the audit committee, the compensation committee and the nominating/corporate governance committee of the Board of Directors of the Company and the Company's corporate governance guidelines have been posted on the Company's website.

Item 1A. Risk Factors

The following risk factors and the forward-looking statements contained in this Form 10-K should be read carefully in connection with evaluating Movado Group's business. These risks and uncertainties could cause actual results and events to differ materially from those anticipated. Additional risks which the Company does not presently consider material, or of which it is not currently aware, may also have an adverse impact on the business. Please also see "Forward-Looking Statements" on page 1.

Adverse economic conditions in the U.S. or in other key markets, and the resulting declines in consumer confidence and spending, could have a material adverse effect on the Company's operating results.

The Company's results are dependent on a number of factors impacting consumer confidence and spending, including, but not limited to, general economic and business conditions; wages and employment levels; volatility in the stock market; home values; inflation; consumer debt levels; availability and cost of consumer credit; economic uncertainty; solvency concerns of major financial institutions; fluctuations in foreign currency exchange rates; fuel and energy costs and/or shortages; tax issues; and general political conditions, both domestic and abroad.

Adverse economic conditions, including declines in employment levels, disposable income, consumer confidence and economic growth could result in decreased consumer spending that would adversely affect sales of consumer goods, particularly those, such as the Company's products, that are viewed as discretionary items. In addition, events such as war, terrorism, natural disasters or outbreaks of disease could further suppress consumer spending on discretionary items. If any of these events should occur, the Company's future sales could decline.

Changes to existing laws or regulations, or the adoption of new laws or regulations, whether in the United States or in any of the other key markets in which the Company does business, could require the Company to change any number of its business practices which could have a material adverse effect on its financial condition or results of operations.

The Company conducts business, either directly or indirectly, in numerous countries and accordingly is subject to a multitude of legal requirements impacting every aspect of its operations. Changes to existing laws and regulations or new laws and regulations could impose new requirements and additional, associated costs on the Company and its

suppliers, making the Company's products more costly to produce, forcing the Company to change its existing business practices and potentially affecting its financial condition and results of operations. The Swiss parliament recently amended its Federal Act on the Protection of Trade Marks and Indications of Source to require that a greater percentage of manufacturing costs be incurred in Switzerland for goods to bear a Swiss indication of origin. The date of entry into force of this new, so-called "Swissness" act remains to be confirmed and its implementation with respect to watches requires the further approval of an ordinance by the Swiss Federal Council. A draft of such an ordinance has been proposed by the Federation of the Swiss Watch Industry ("FH"). Under the FH draft ordinance (which calls for a five year transition period from the date the ordinance is approved), a watch may only be marked with a Swiss indication of origin if, in addition to meeting existing requirements, the design and prototyping of the watch occurred in, and that at least 60% percent of the manufacturing costs were incurred in, Switzerland. Compliance with the new Swissness law and regulations may require the Company to incur additional costs and seek different sources of supply, which may increase the production costs of Movado, Ebel and Concord watches. The Company may also be unable to secure adequate Swiss-based suppliers to meet all of its needs. If the production costs for these watches become more expensive or the watches can no longer be marked as "Swiss", the Company may then be at a competitive disadvantage as compared to other watch brands and sales of its products may decline, adversely affecting its financial condition and results of operations.

The Company faces intense competition in the worldwide watch industry not only from competitors selling traditional watches but also from those selling smart watches and other smart wearables.

The watch industry is highly competitive and the Company competes globally with numerous manufacturers, importers, distributors and Internet-based retailers, some of which are larger than the Company and have greater financial, distribution, advertising and marketing resources than the Company. The Company's products compete on the basis of price, features, brand image, design, perceived desirability, reliability and perceived attractiveness. However, there can be no assurance that the Company's products will compete effectively in the future and, unless the Company remains competitive, its future results of operations and financial condition could be adversely affected. The Company also faces increased, new competition from companies introducing and selling smart wearable devices including smart watches. Many of these companies have significantly greater financial, distribution, advertising and marketing resources than does the Company. The sale of these new smart products could materially adversely impact the traditional watch market and the Company's results of operations and financial condition unless the Company is able to effectively compete in this new product area. The Company's ability to successfully design, produce, market and sell products which are competitive with smart watches and other similar wearables will depend, among other things, on its ability to obtain the necessary expertise in this area by enhancing its internal capabilities or by entering into business relationships with third parties that have such expertise. Even if the Company is able to launch smart watches or other such products, there is no assurance that it will be able to do so in a timely manner or frequently enough to remain competitive or that those products will be successful commercially. Any of these events could have a material adverse effect on the Company's business, results of operations and financial condition or could result in the Company's products not achieving market acceptance or becoming obsolete.

Maintaining favorable brand recognition is essential to the success of the Company, and failure to do so could materially and adversely affect the Company's results of operations.

Favorable brand recognition is an important factor to the future success of the Company. The Company sells its products under a variety of owned and licensed brands. Factors affecting brand recognition are often outside the Company's control, and the Company's efforts to create or enhance favorable brand recognition, such as making significant investments in marketing and advertising campaigns, product design and anticipation of fashion trends, may not have their desired effects. Additionally, the Company relies on its licensors to maintain favorable brand recognition of their respective brands, and the Company often has no control over the brand management efforts of its licensors. Finally, although the Company's independent distributors are subject to contractual requirements to protect the Company's brands, it may be difficult to monitor or enforce such requirements, particularly in foreign jurisdictions.

Any decline in perceived favorable recognition of the Company's owned or licensed brands could materially and adversely affect future results of operations and profitability. If the Company is unable to respond to changes in consumer demands and fashion trends in a timely manner, sales and profitability could be adversely affected.

Fashion trends and consumer demands and tastes often shift quickly. The Company attempts to monitor these trends in order to adapt its product offerings to suit customer demand. There is a risk that the Company will not properly perceive changes in trends or tastes, which may result in the failure to adapt the Company's products accordingly. In addition, new model designs are regularly introduced into the market for all brands to keep ahead of evolving fashion trends as well as to initiate new trends of their own. There is risk that the public may not favor these new models or that the models may not be ready for sale until after the trend has passed. If the Company fails to respond to and keep up to date with fashion trends and consumer demands and tastes, its brand image, sales, profitability and results of operations could be materially and adversely affected.

If the Company misjudges the demand for its products, high inventory levels could adversely affect future operating results and profitability.

Consumer demand for the Company's products can affect inventory levels. If consumer demand is lower than expected, inventory levels can rise causing a strain on operating cash flow. If the inventory cannot be sold through the Company's wholesale or retail outlets, additional write-downs or write-offs to future earnings could be necessary. Conversely, if consumer demand is higher than expected, insufficient inventory levels could result in unfilled customer orders, loss of revenue and an unfavorable impact on customer relationships. In particular, volatility and uncertainty related to macro-economic factors make it more difficult for the Company to forecast customer demand in its various markets. Failure to properly judge consumer demand and properly manage inventory could have a material adverse effect on profitability and liquidity.

An increase in product returns could negatively impact the Company's operating results and profitability.

The Company recognizes revenue as sales when merchandise is shipped and title and risk of loss transfers to the customer. The Company permits the return of damaged or defective products and accepts limited amounts of product returns in certain instances. Accordingly, the Company provides allowances for the estimated amounts of these returns at the time of revenue recognition based on historical experience. While such returns have historically been within management's expectations and the provisions established, future return rates may differ from those experienced in the past. Any significant increase in damaged or defective products or expected returns could have a material adverse effect on the Company's operating results for the period or periods in which such returns materialize.

The Company's business relies on the use of independent parties to manufacture its products. Any loss of an independent manufacturer, or the Company's inability to deliver quality goods in a timely manner, could have an adverse effect on customer relations, brand image, net sales and results of operations.

The Company employs a flexible manufacturing model that relies on independent manufacturers to meet shifts in marketplace demand. Most of these manufacturers rely on third party suppliers for the various component parts needed to assemble finished watches sold to the Company. All such independent manufacturers and suppliers must achieve and maintain the Company's high quality standards and specifications. The inability of a manufacturer to ship orders in a timely manner or to meet the Company's high quality standards and specifications could cause the Company to miss committed delivery dates with customers, which could result in cancellation of the customers' orders. In addition, delays in delivery of satisfactory products could have a material adverse effect on the Company's profitability, particularly if the delays cause the Company to be unable to market certain products during the seasonal periods when its sales are typically higher. See "Risk Factors – The Company's business is seasonal, with sales traditionally greater during certain holiday seasons, so events and circumstances that adversely affect holiday consumer spending will have a disproportionately adverse effect on the Company's results of operations." A majority of the Swiss watch movements used in the manufacture of Movado, Ebel, Concord and ESQ watches are purchased from two suppliers, one of which is a wholly-owned subsidiary of one of the Company's competitors. Additionally, the Company generally does not have long-term supply commitments with its manufacturers and thus competes for production facilities with other organizations, some of which are larger and have greater resources. Any loss of an independent manufacturer or disruption in the supply chain with respect to critical component parts may result in the Company's inability to deliver quality goods in a timely manner and could have an adverse effect on customer relations, brand image, net sales and results of operations.

The Company contractually obligates its contract manufacturers to adhere to the Company's vendor code of conduct and similar codes of conduct adopted by the Company's trademark licensors and the Company monitors compliance with those codes by conducting periodic factory audits. There can be no assurance, however, that any of those independent manufacturers or one or more of the Company's licensors might not violate labor or other laws or use labor practices that deviate from those generally accepted as ethical in the United States or other countries in which the violation or other activities occurred. Such an event could interrupt or otherwise disrupt the shipment of finished products or damage the Company's reputation and could have a material adverse effect on our financial condition and results of operations.

The loss or shut down of any of the Company's major warehouse and distribution centers could materially adversely affect its business.

The Company operates one distribution facility in New Jersey that is responsible for importing and warehousing products as well as fulfilling and shipping orders to all of the Company's customers in the United States, Canada and the Caribbean. The Company operates a smaller, similar facility in Bienne, Switzerland for the distribution of its Swiss watch brands throughout Europe and the Middle East, and has contracted with a third party warehouse and

fulfillment provider in Asia to handle most of the distribution of its licensed brands. The complete or partial loss or temporary shutdown of any of these facilities (including as a result of fire or other casualty or labor or other disturbances) could have a material adverse effect on the Company's business. In addition, the Company's New Jersey warehouse and distribution facility is operated in a special purpose sub-zone established by the U.S. Department of Commerce Foreign Trade Zone Board and is highly regulated by U.S. Customs and Border Protection, which, under certain circumstances, has the right to shut down the entire sub-zone and, therefore, the entire warehouse and distribution facility. If that were to occur, the Company's ability to fill orders for its U.S., Canadian and Caribbean customers would be significantly impacted, which could have a material adverse effect on the Company's business, results of operations and financial condition.

If the Company loses any of its license agreements, there may be significant loss of revenues and a negative effect on business.

The Company has the right to produce, market and distribute watches under the brand names of ESQ, Coach, Tommy Hilfiger, HUGO BOSS, Juicy Couture, Scuderia Ferrari and Lacoste pursuant to license agreements with the respective owners of those trademarks. There are certain minimum royalty payments as well as other requirements associated with these agreements. Failure to meet any of these requirements could result in the loss of the license. Additionally, after the term of any license agreement has concluded, the licensor may decide not to renew with the Company. For the fiscal year ended January 31, 2015, the above mentioned licensed brands represented approximately 51% of the Company's net sales. While no individual licensed brand represented net sales greater than 20% of the Company's total consolidated net sales, the loss of any single licensed brand could have a material adverse effect on the Company's results of operations and although the Company is not substantially dependent on a particular license brand, the loss of one or more of the Company's licenses could result in loss of future revenues which could adversely affect its financial condition. In addition, the Company's revenues and profitability under its various license agreements may change from period to period due to various factors, including the maturity of the Company's relationship with the respective licensor, changes in consumer preferences, brand repositioning activities and other factors, some of which are outside of the Company's control.

Changes in the sales or channel mix of the Company's products could impact gross profit margins.

The individual brands that are sold by the Company are sold at a wide range of price points and yield a variety of gross profit margins. In addition, sales of excess and/or discontinued inventory into the liquidation channel generate a lower gross profit margin than non-liquidation sales. Thus, the mix of sales by brand as well as by distribution channel can have an impact on the gross profit margins of the Company. If the Company's sales mix shifts unfavorably toward brands with lower gross profit margins than the Company's historical consolidated gross profit margin or if a greater proportion of liquidation sales are made, it could have an adverse effect on the results of operations.

The Company's business is seasonal, with sales traditionally greater during certain holiday seasons, so events and circumstances that adversely affect holiday consumer spending will have a disproportionately adverse effect on the Company's results of operations.

The Company's sales are seasonal by nature. The Company's U.S. sales are traditionally greater during the Christmas and holiday season. Internationally, major selling seasons center on significant local holidays that occur in late winter or early spring. The amount of net sales and operating income generated during these seasons depends upon the general level of retail sales at such times, as well as economic conditions and other factors beyond the Company's control. The second half of each year accounted for 54.9%, 56.5%, and 56.1% of the Company's net sales for the fiscal years ended January 31, 2015, 2014, and 2013, respectively. If events or circumstances were to occur that negatively impact consumer spending during such holiday seasons, it could have a material adverse effect on the Company's sales, profitability and results of operations.

Sales in the Company's retail outlet stores are dependent upon customer foot traffic.

The success of the Company's retail outlet stores is, to a certain extent, dependent upon the amount of customer foot traffic generated by the outlet centers in which those stores are located.

Factors that can affect customer foot traffic include:

- decline in customer discretionary spending;
- the location of the outlet center;

- the location of the Company's store within the outlet center;
 - the other tenants in the outlet center;
 - the occupancy rate of the outlet center;
 - the success of the outlet center and tenant advertising to attract customers;
 - increased competition in areas surrounding the outlet center; and
 - increased competition from shopping over the internet and other alternatives such as mail-order.
- Additionally, since most of the Company's outlet stores are located near vacation destinations, factors that affect travel could decrease outlet center traffic. Such factors include the price and supply of fuel, travel concerns and restrictions, international instability, terrorism and inclement weather. A reduction in foot traffic in relevant shopping centers could have a material adverse effect on retail sales and profitability.

If the Company is unable to maintain existing space or to lease new space for its retail stores in prime outlet center locations or is unable to complete construction on a timely basis, the Company's ability to achieve favorable results in its retail business could be adversely affected.

The Company's outlet stores are strategically located in top outlet centers in the United States, most of which are located near vacation destinations. If the Company cannot maintain and secure locations in prime outlet centers for its outlet stores, it could jeopardize the operations of the stores and business plans for the future. Additionally, if the Company cannot complete construction in new stores within the planned timeframes, cost overruns and lost revenue could adversely affect the profitability of the retail segment. The Company on average plans for two to three new stores or renovations per fiscal year. The average time required to build-out or renovate each store and open it after delivery of possession is generally less than 60 days.

Current or future cost reduction, streamlining, restructuring or business optimization initiatives could result in the Company incurring various one-time, non-recurring or unusual charges and other items, which could have a material adverse effect on the Company's reported earnings per share and other unadjusted financial measures.

In the course of the Company's efforts to implement its business plan to adapt to the changing economic environment, the Company may be required to take actions that could result in the incurrence of various one-time, non-recurring or unusual charges and other items. These charges and other items may include severance and relocation expenses, write-offs or write-downs of assets, impairment charges, facilities closure costs or other business optimization costs. In general, these costs will reduce the Company's operating income and net income (along with the associated unadjusted per share measures). Therefore, such charges and other items could have a material adverse effect on the Company's reported results of operations and the market price of the Company's securities.

If the Company is unable to successfully implement its growth strategies, its future operating results could suffer.

There are certain risks involved in the Company seeking to expand its business through acquisitions, license agreements, joint ventures and other initiatives. There is risk involved with each of these. Acquisitions and new license agreements require the Company to ensure that new brands will successfully complement the other brands in its portfolio. The Company assumes the risk that the new brand will not be viewed by the public as favorably as its other brands. In addition, the integration of an acquired company or licensed brand into the Company's existing business can strain the Company's current infrastructure with the additional work required and there can be no assurance that the integration of acquisitions or licensed brands will be successful or that acquisitions or licensed brands will generate sales increases. The Company needs to ensure it has the adequate human resources and systems in place to allow for successful assimilation of new businesses. The inability to successfully implement its growth strategies could adversely affect the Company's future financial condition and results of operations.

The loss or infringement of the Company's trademarks or other intellectual property rights could have an adverse effect on future results of operations.

The Company believes that its trademarks and other intellectual property rights are vital to the competitiveness and success of its business and therefore it takes all appropriate actions to register and protect them. Such actions may not be adequate to prevent imitation of the Company's products or infringement of its intellectual property rights, or to assure that others will not challenge the Company's rights, or that such rights will be successfully defended. Moreover, the laws of some foreign countries, including some in which the Company sells its products, may not protect intellectual property rights to the same extent as do the laws of the United States, which could make it more difficult to successfully defend such challenges to them. The Company's inability to obtain or maintain rights in its trademarks, including its licensed marks, could have an adverse effect on brand image and future results of operations.

Fluctuations in the pricing of commodities or the cost of labor could adversely affect the Company's ability to produce products at favorable prices.

Some of the Company's higher-end watch offerings are made with materials such as diamonds, precious metals and gold. The Company relies on independent contractors to manufacture and assemble the majority of its watch brands. A significant change in the prices of these commodities or the cost of third-party labor could adversely affect the Company's business by:

- reducing gross profit margins;
- forcing an increase in suggested retail prices; which could lead to
- decreasing consumer demand; which could lead to
- higher inventory levels.

14

Any and all of the above events could adversely affect the Company's future cash flow and results of operations.

The Company's business is subject to foreign currency exchange rate risk.

A significant portion of the Company's inventory purchases are denominated in Swiss francs. The Company reduces its exposure to the Swiss franc exchange rate risk through a hedging program. Under the hedging program, the Company manages most of its foreign currency exposures on a consolidated basis, which allows it to net certain exposures and take advantage of natural offsets. In the event these exposures do not offset, the Company has the ability under a hedging program to utilize forward exchange contracts and purchased foreign currency options to mitigate foreign currency risk. If these hedge instruments are unsuccessful at minimizing the risk or are deemed ineffective, any fluctuation of the Swiss franc exchange rate could impact the future results of operations. Changes in currency exchange rates may also affect relative prices at which the Company and its foreign competitors sell products in the same market. Additionally, a portion of the Company's net sales are recorded in its foreign subsidiaries in a currency other than the local currency of that subsidiary. This predominantly occurs in the Company's Hong Kong and Swiss subsidiaries when they sell to Euro and British Pound based customers. As of January 31, 2015, this exposure was not hedged by the Company. Starting in fiscal 2016 the Company plans to utilize forward exchange contracts to mitigate this exposure. Any fluctuation in the Euro and British Pound exchange rates in relation to the Hong Kong dollar and Swiss franc would have an effect on these sales that are recorded in Euros and British Pounds. The currency effect on these sales has an equal effect on their recorded gross profit since the costs of these sales are recorded in the entities' respective local currency. As a result of these and other foreign currency sales, certain of the Company's subsidiaries have outstanding foreign currency receivables. Furthermore, since the Company's consolidated financial statements are presented in U.S. dollars, revenues, income and expenses, as well as assets and liabilities of foreign currency denominated subsidiaries must be translated into U.S. dollars at exchange rates in effect during or at the end of each reporting period. Fluctuations in foreign currency exchange rates could adversely affect the Company's reported revenues, earnings, financial position and the comparability of results of operations from period to period.

The Grinberg family owns a majority of the voting power of the Company's stock.

Each share of common stock of the Company is entitled to one vote per share while each share of class A common stock of the Company is entitled to ten votes per share. While the members of the Grinberg family do not own a majority of the Company's outstanding common stock, by their significant holdings of class A common stock they control a majority of the voting power represented by all outstanding shares of both classes of stock. Consequently, the Grinberg family is in a position to significantly influence any matters that are brought to a vote of the shareholders including, but not limited to, the election of the Board of Directors and any action requiring the approval of shareholders, including any amendments to the Company's certificate of incorporation, mergers or sales of all or substantially all of the Company's assets. This concentration of ownership also may delay, defer or even prevent a change in control of the Company and make some transactions more difficult or impossible without the support of the Grinberg family. These transactions might include proxy contests, tender offers, mergers or other purchases of shares of common stock that could give stockholders the opportunity to realize a premium over the then-prevailing market price for shares of the Company's common stock.

The Company's stock price could fluctuate and possibly decline due to changes in revenue, operating results and cash flow.

The Company's revenue, results of operations and cash flow can be affected by several factors, some of which are not within its control. Those factors include, but are not limited to, those described as risk factors in this Item 1A and under "Forward-Looking Statements" on page 1.

Any or all of these factors could cause a decline in revenues or increased expenses, both of which could have an adverse effect on the results of operations. If the Company's earnings failed to meet the expectations of the public in any given period, the Company's stock price could fluctuate and possibly decline.

If the Company were to lose its relationship with any of its key customers or distributors or any of such customers or distributors were to experience financial difficulties or go out of business, there may be a significant loss of revenue and operating results.

The Company's customer base covers a wide range of distribution including national jewelry store chains, department stores, independent regional jewelers, licensors' retail stores and a network of independent distributors in many countries throughout the world. Except for its agreements with independent distributors, the Company does not have long-term sales contracts with its customers, nor does it have a significant backlog of unfilled orders. Customer purchasing decisions could vary with each selling season. A material change in the Company's customers' purchasing decisions could have an adverse effect on its revenue and operating results.

The Company extends credit to its customers based on an evaluation of each customer's financial condition usually without requiring collateral. Should any of the Company's larger customers experience financial difficulties, it could result in the Company's curtailing of doing business with them, an increased rate of product returns or an increase in its exposure related to its accounts receivable. The inability to collect on these receivables could have an adverse effect on the Company's financial results and cash flows.

The inability or difficulty of the Company's customers, suppliers and business partners to obtain credit, could materially and adversely affect its results of operations and liquidity.

Many of the Company's customers, suppliers and business partners rely on a stable, liquid and well-functioning financial system to fund their operations and a disruption in their ability to access liquidity could cause serious disruptions to or an overall deterioration of their businesses which could impair their ability to meet their obligations to the Company, including delivering product ordered by the Company and placing or paying for future orders of the Company's products, any of which could have a material adverse effect on the Company's results of operations and liquidity.

The Company's wholesale business could be negatively affected by further changes of ownership, contraction and consolidation in the retail industry.

A large portion of the Company's U.S. wholesale business is based on sales to major jewelry store chains and department stores. In recent years, the retail industry has experienced changes in ownership, contraction and consolidations, with a number of jewelry chain stores and department store operators going out of business and liquidating their inventory. Future reorganizations, changes of ownership and consolidations could further reduce the number of retail doors in which the Company's products are sold and increase the concentration of sales among fewer national or large regional retailers, which could materially adversely affect the Company's wholesale business.

If the Company were to lose key members of management or be unable to attract and retain the talent required for the business, operating results could suffer.

The Company's ability to execute key operating initiatives as well as to deliver product and marketing concepts appealing to target consumers depends largely on the efforts and abilities of key executives and senior management's competencies. The unexpected loss of one or more of these individuals could have an adverse effect on the future business. The Company cannot guarantee that it will be able to attract and retain the talent and skills needed in the future.

If the Company cannot secure financing and credit on favorable terms, the Company's financial condition and results of operations may be materially adversely affected.

Credit and equity markets remain sensitive to world events and macro-economic developments. Therefore, the Company's cost of borrowing may increase and it may be more difficult to obtain financing for the Company's operations or to refinance long-term obligations as they become payable. In addition, the Company's borrowing costs can be affected by independent rating agencies' short and long-term debt ratings which are based largely on the Company's performance as measured by credit metrics including interest coverage and leverage ratios. A decrease in these ratings would likely also increase the Company's cost of borrowing and make it more difficult for it to obtain financing. A significant increase in the costs that the Company incurs in order to finance its operations may have a material adverse impact on its business results and financial condition.

A significant portion of the Company's business is conducted outside of the United States. Many factors affecting business activities outside the United States could adversely impact this business.

The Company assembles all of its watches in Europe and Asia. The Company also generates approximately 45% of its revenue from international sources.

Factors that could affect this business activity vary by region and market and generally include without limitation:

- instability or changes in social, political and/or economic conditions that could disrupt the trade activity in the countries where the Company's manufacturers, suppliers and customers are located;
- the imposition of additional duties, taxes and other charges on imports and exports;
- changes in foreign laws and regulations;
- the adoption or expansion of trade sanctions;
- recessions in foreign economies; and
- a significant change in currency valuation in specific countries or markets.

16

If the Company was unable to protect the security of personal information about its customers or employees or prevent a privacy breach, it could be subject to costly government enforcement actions and private litigation and suffer significant negative publicity which could materially and adversely affect the Company's results of operations.

As part of the normal course of business the Company is involved in the receipt and storage of electronic information about customers and employees, as well as proprietary financial and non-financial data. Although the Company believes it has taken reasonable and appropriate actions to protect the security of this information, if the Company were to experience a security breach, acts of vandalism, computer viruses, misplaced or lost data, programming and/or human errors or other similar events, it could result in government enforcement actions and private litigation, attract a substantial amount of media attention, and damage the Company's reputation and its relationships with its customers and employees, materially adversely affecting the Company's sales and results of operations.

The Company depends on its information systems to run its business and any significant disruption to those systems could materially disrupt the Company's business and adversely affect its results of operations.

The Company relies on its information systems to operate every aspect of its world-wide business, including, without limitation, order processing, inventory and supply chain management, customer communications, purchasing and financial reporting. Although the Company attempts to take all reasonable steps to mitigate the risks to its information management systems, including such measures as the use of firewalls, automatically expiring passwords, encryption technology and periodic vulnerability tests, no system can be completely secure against all threats. It is possible that the Company's information systems will experience system failures, viruses, security breaches, power outages, network and telecommunications failures, usage errors by our employees, harmful acts by our website visitors or other events which could disable or significantly impair the systems' functionality. Additionally, the Company's systems may fail to operate properly or effectively, experience problems transitioning to upgraded or replacement systems or difficulties in integrating new systems. Any material disruption or slowdown of the Company's information systems could result in the loss of critical data, the inability to process and properly record transactions and could materially impair the Company's ability to conduct business, leading to cancelled orders and lost sales. In addition, the Company engages in e-commerce and is vulnerable to certain additional risks and uncertainties associated with the Internet, including changes in required technology interfaces, website downtime and other technical failures, security breaches and consumer privacy concerns. A breach and loss of data could also subject the Company to liability to its customers or suppliers and could also cause competitive harm if sensitive information is publicized. In the event the Company is not successful in responding to these risks and uncertainties, its online sales may decline, the associated costs with its e-commerce activity may increase and the reputation of its brands may be damaged.

Item 1B. Unresolved Staff Comments

None.

Item 2. Properties

The Company leases various facilities in North America, Europe, the Middle East and Asia for its corporate, watch assembly, distribution and sales operations. As of January 31, 2015, the Company's leased facilities were as follows:

Location	Function	Square Footage	Lease Expiration
Moonachie, New Jersey	Watch distribution and repair	100,000	July 2019
Paramus, New Jersey	Executive offices	98,300	June 2018
Bienne, Switzerland	Watch distribution, assembly and repair	35,790	October 2017
Bienne, Switzerland	Corporate functions and watch sales	35,500	June 2017
Hong Kong	Watch sales, distribution and repair	16,560	March 2016
Villers le Lac, France	European service and watch distribution	12,800	January 2016
New York, New York	Public relations office, licensed brand showroom	9,900	August 2016
Markham, Canada	Office, watch distribution and repair	7,800	August 2019
Hackensack, New Jersey	Warehouse	6,600	July 2015
ChangAn Dongguan, China	Quality control and engineering	6,460	December 2015
Shanghai, China	Watch sales and distribution	6,050	January 2017
Munich, Germany	Watch sales and repair	4,380	January 2017
Coral Gables, Florida	Caribbean office, watch sales	2,880	January 2017
Grenchen, Switzerland	Watch sales	2,800	July 2015
Singapore	Watch sales, distribution and repair	970	December 2016
Dubai, United Arab Emirates	Watch sales	730	July 2015

All of the foregoing facilities are used exclusively in connection with the wholesale segment of the Company's business except that a portion of the Company's executive office space in Paramus, New Jersey is used in connection with management of its retail business.

Since acquiring it in 2004, as part of its acquisition of Ebel, the Company owns an architecturally significant building in La Chaux-de-Fonds.

The Company also owns approximately 2,500 square feet of office space in Hanau, Germany, which it previously used for sales, distribution and watch repair functions.

The Company leases retail space averaging 1,700 square feet per store with leases expiring from January 2016 to September 2025 for the operation of the Company's 38 outlet stores in the United States. The Company believes that its existing facilities are suitable and adequate for its current operations.

Item 3. Legal Proceedings

The Company is involved in various legal proceedings and claims from time to time in the ordinary course of its business.

On February 4, 2015, an individual plaintiff filed a complaint against the Company and several of its officers in the United States District Court for the District of New Jersey (the "Complaint") as a purported class action, alleging that between March 26, 2014 and November 13, 2014, the Company made false and misleading statements about the Company's financial performance. The Complaint also claims that these alleged false and misleading statements resulted in the Company's stock trading at an artificially high price until November 14, 2014, when the Company

issued a press release preliminarily announcing financial results and reducing its previous projections, after which the Company's stock price fell. The Company believes that the Complaint is meritless and it intends to vigorously defend this matter.

The Company believes that it has valid legal defenses to all of the matters currently pending against it. These matters are inherently unpredictable and the resolutions of these matters are subject to many uncertainties and the outcomes are not predictable with assurance. Consequently, management is unable to estimate the ultimate aggregate amount of monetary loss, if any, amounts covered by insurance or the financial impact that will result from such matters.

Item 4. Mine Safety Disclosures

Not applicable.

PART II

Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

As of March 24, 2015, there were 51 holders of record of the Company's class A common stock and, the Company estimates, 6,100 beneficial owners of the common stock represented by 414 holders of record. The Company's common stock is traded on the New York Stock Exchange under the symbol "MOV" and on March 24, 2015, the closing price of the Company's common stock was \$25.37. In connection with the October 7, 1993 public offering, each share of the Company's then currently existing class A common stock was converted into 10.46 shares of new class A common stock, par value of \$0.01 per share (the "class A common stock"). Each share of common stock is entitled to one vote per share and each share of class A common stock is entitled to 10 votes per share on all matters submitted to a vote of the shareholders. Each holder of class A common stock is entitled to convert, at any time, any and all such shares into the same number of shares of common stock. Each share of class A common stock is converted automatically into common stock in the event that the beneficial or record ownership of such shares of class A common stock is transferred to any person, except to certain family members or affiliated persons deemed "permitted transferees" pursuant to the Company's Restated Certificate of Incorporation as amended. The class A common stock is not publicly traded and consequently, there is currently no established public trading market for these shares. The following table sets forth high and low bid quotations reported for the Company's common stock for each quarter during fiscal 2015 and 2014 and the dividends declared per share in respect of each such quarter.

Quarter Ended	Fiscal Year Ended January 31, 2015			Fiscal Year Ended January 31, 2014		
	Low	High	Dividends per Share	Low	High	Dividends per Share
April 30	\$ 35.55	\$ 46.39	\$ 0.10	\$ 30.08	\$ 38.30	\$ 0.05
July 31	\$ 36.95	\$ 43.20	\$ 0.10	\$ 29.27	\$ 38.61	\$ 0.08
October 31	\$ 32.58	\$ 44.04	\$ 0.10	\$ 35.87	\$ 47.24	\$ 0.08
January 31	\$ 23.50	\$ 38.70	\$ 0.11	\$ 37.75	\$ 47.33	\$ 0.10

During each of fiscal 2014 and 2015, the Company declared four quarters of dividends as indicated in the table above. The decision of whether to declare any future cash dividend, including the amount of any such dividend and the establishment of record and payment dates, will be determined, in each quarter, by the Board of Directors, in its sole discretion.

On November 25, 2014, the Board approved an increase in the Company's share repurchase program, from \$50.0 million, originally approved on March 21, 2013, to \$100.0 million. Under the program, the Company is authorized to purchase shares of its outstanding common stock from time to time, depending on market conditions, share price and other factors. The Company may purchase shares of its common stock through open market purchases, repurchase plans, block trades or otherwise. This authorization expires on January 31, 2016. During the twelve months ended January 31, 2015, the Company repurchased a total of 833,973 shares of its common stock at a total cost of approximately \$26.4 million, or an average of \$31.63 per share.

An aggregate of 30,105 shares were repurchased during the twelve months ended January 31, 2015 as a result of the surrender of shares of common stock in connection with the vesting of certain restricted stock awards and stock

options. At the election of an employee, upon the vesting of a stock award or the exercise of a stock option, shares of common stock having an aggregate value on the vesting of the award or the exercise date of the option, as the case may be, equal to the employee's withholding tax obligation may be surrendered to the Company by netting them from the vested shares issued. Similarly, shares having an aggregate value equal to the exercise price of an option may be tendered to the Company in payment of the option exercise price and netted from the shares of common stock issued upon the option exercise.

The following table summarizes information about the Company's purchases of shares of its common stock in the fourth quarter of fiscal 2015.

Issuer Repurchase of Equity Securities

Period	Total Number of Shares Purchased	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Amount that May Yet Be Purchased Under the Plans or Programs
November 1, 2014 – November 30, 2014	34,900	\$ 29.99	34,900	25,316,124
December 1, 2014 – December 31, 2014	205,900	\$ 27.88	205,900	69,575,510
January 1, 2015 – January 31, 2015	248,100	\$ 25.98	248,100	63,130,725
Total	488,900	\$ 27.06	488,900	63,130,725

PERFORMANCE GRAPH

The performance graph set forth below compares the cumulative total shareholder return of the Company's shares of common stock for the last five fiscal years through the fiscal year ended January 31, 2015 with that of the Broad Market (NYSE Stock Market – U.S. Companies), the S&P SmallCap 600 Index and the Russell 2000 Index. Each index assumes an initial investment of \$100.0 on January 31, 2010 and the reinvestment of dividends (where applicable).

Company Name / Index	1/31/10	1/31/11	1/31/12	1/31/13	1/31/14	1/31/15
Movado Group, Inc.	100.00	131.84	169.73	353.79	367.73	236.83
S&P SmallCap 600 Index	100.00	130.93	140.75	162.50	208.71	221.55
NYSE (U.S. Companies)	100.00	123.25	126.55	149.11	176.85	197.09
Russell 2000 Index	100.00	131.36	135.12	156.03	198.20	211.34

Item 6. Selected Financial Data

The selected financial data presented below has been derived from the Consolidated Financial Statements. This information should be read in conjunction with, and is qualified in its entirety by, the Consolidated Financial Statements and “Management’s Discussion and Analysis of Financial Condition and Results of Operations” contained in Item 7 of this report. The Company’s subsidiary, Movado Retail Group, Inc., closed its Movado boutique division during its second quarter ended July 31, 2010. As a result, the financial results of the boutiques were reported as discontinued operations on the face of the Consolidated Statements of Operations for all periods presented. Amounts are in thousands except per share amounts:

(1) Fiscal 2014 net sales include a pre-tax charge of \$7.8 million for anticipated returns in fiscal 2015, as a result of the Company's decision to reduce the presence of ESQ Movado while expanding the Movado brand offering in certain retail doors.

21

- (2) Fiscal 2013 net sales include a sales allowance of \$4.9 million related to the repositioning of the Coach watch brand.
- (3) Fiscal 2012 net sales include a \$3.0 million sale of certain proprietary watch movements.
- (4) Fiscal 2014 includes a \$2.5 million pre-tax duty refund received relating to payments made by the Company in calendar years 2008 through 2011 for drawback claims filed with U.S. Customs & Border Protection and a \$7.5 million pre-tax charge related to anticipated ESQ Movado product returns and the write down of ESQ Movado excess inventory. This charge resulted from the Company's decision to reduce the presence of ESQ Movado while expanding the Movado brand offering in certain retail doors.
- (5) Fiscal 2011 includes a non-cash charge of \$24.1 million for certain non-core gold and mechanical movement inventory.
- (6) Fiscal 2014 includes a \$2.0 million donation to the Movado Group Foundation and a \$0.8 million pre-tax charge related to the write down of excess displays and point of sale materials, as a result of the Company's decision to reduce the presence of ESQ Movado while expanding the Movado brand offering in certain retail doors.
- (7) Fiscal 2013 and 2012 each includes a \$3.0 million donation to the Movado Group Foundation.
- (8) Fiscal 2011 includes non-cash charges of \$3.1 million and \$2.5 million, respectively, for write-downs of certain assets primarily related to intangible assets, tooling costs and trade booths for Baselworld Watch and Jewelry Show.
- (9) Fiscal 2011 includes a reversal of a previously recorded liability of \$4.3 million for a retirement agreement with the Company's former Chairman.
- (10) Fiscal 2014 other income consists of a pre-tax gain of \$1.5 million on the sale of a building which was completed in the first quarter of fiscal 2014.
- (11) Fiscal 2012 other income consists of a pre-tax gain of \$0.7 million on the sale of a building which was completed in the second quarter of fiscal 2012.
- (12) Fiscal 2014 provision for income taxes includes a benefit of \$1.0 million related to U.S. and foreign tax settlements and the release of uncertain tax positions.
- (13) Fiscal 2013 effective tax rate of (18.0)% includes a tax benefit of \$19.8 million attributable to the reversal of a majority of the valuation allowance on the U.S. net deferred tax assets and a tax benefit of \$0.5 million attributable to foreign business restructurings in Japan and the UK.
- (14) Fiscal 2012 effective tax rate of 1.8% includes a release of a valuation allowance against net deferred tax assets in Switzerland, partially offset by the accrual of a Swiss withholding tax settlement, the continued recording of other valuation allowances, most notably the valuation allowance against net U.S. deferred tax assets, and the tax accrued on the repatriation of foreign earnings.
- (15) Fiscal 2011 effective tax rate of (62.7)% includes a charge for the establishment of a valuation allowance against net deferred tax assets in Switzerland, in addition to continued recording of valuation allowances, most notably the valuation allowance against net U.S. deferred tax assets, and the tax accrued on the repatriation of foreign earnings.
- (16) The Company defines working capital as current assets less current liabilities.

* Effective February 1, 2011, the Company changed its method of valuing its U.S. inventory to the average cost method. The consolidated financial statements of fiscal 2011 have been adjusted to apply the new accounting method retroactively.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

GENERAL

Net Sales. The Company operates and manages its business in two principal business segments – Wholesale and Retail. The Company also operates in two geographic locations – United States and International. Since April 30, 2014, the Company has divided its watch business into two principal categories: the luxury category and the licensed brands category. The luxury category consists of the Ebel®, Concord®, Movado® and ESQ® Movado brands. Previously, the Company classified the Movado and the ESQ Movado brands together as a separate category referred to as accessible luxury. Watches in the licensed brands category include the following brands manufactured and distributed under license agreements with the respective brand owners: Coach®, HUGO BOSS®, Juicy Couture®, Lacoste®, Tommy Hilfiger® and SCUDERIA FERRARI®. These changes to the Company's watch brand categories did not change the Company's operating segments.

The primary factors that influence annual sales are general economic conditions in the Company's U.S. and international markets, new product introductions, the level and effectiveness of advertising and marketing expenditures and product pricing decisions.

Approximately 45.0% of the Company's total sales are from international markets (see Note 13 to the Consolidated Financial Statements), and therefore reported sales made in those markets are affected by foreign exchange rates. The Company's international sales are primarily billed in local currencies (predominantly Euros and Swiss francs) and translated to U.S. dollars at average exchange rates for financial reporting purposes.

The Company divides its business into two major geographic locations: United States operations, and International, which includes the results of all other Company operations. The allocation of geographic revenue is based upon the location of the customer. The Company's International operations in Europe, the Americas (excluding the United States), Asia and the Middle East account for 18.9%, 11.4%, 8.0% and 7.1%, respectively, of the Company's total net sales for fiscal 2015. Substantially all of the Company's international assets are located in Switzerland and Asia.

The Company's business is seasonal. There are two major selling seasons in the Company's markets: the spring season, which includes school graduations and several holidays and, most importantly, the Christmas and holiday season. Major selling seasons in certain international markets center on significant local holidays that occur in late winter or early spring. The Company's net sales historically have been higher during the second half of the fiscal year. The second half of each year accounted for 54.9%, 56.5%, and 56.1% of the Company's net sales for the fiscal years ended January 31, 2015, 2014 and 2013, respectively.

The Company's retail operations consist of 38 outlet stores located throughout the United States.

The significant factors that influence annual sales volumes in the Company's retail operations are similar to those that influence U.S. wholesale sales. In addition, most of the Company's outlet stores are located near vacation destinations and, therefore, the seasonality of these stores is driven by the peak tourist seasons associated with these locations.

In the fourth quarter of fiscal 2014, the Company recorded a pre-tax charge of \$7.8 million to net sales, for anticipated returns in fiscal 2015 resulting from the Company's strategic decision to reduce the presence of ESQ Movado watches in certain retail doors while expanding the Movado brand offering. The Company believes it did not fully realize all of the anticipated benefits of this strategy which was intended to drive incremental sales of its more productive Movado brand watch families by utilizing the increased case space at the point of sale that otherwise would have been occupied by relatively less productive ESQ Movado SKUs. Although Movado brand sales at retail increased while, at the same time, as expected, sales of ESQ Movado watches at retail declined, there was less of an increase than

expected in the level of Movado watch sales at wholesale due to retailers tightly managing their inventory. It is expected that this trend will continue into next year. The Company continues to offer ESQ Movado in select retail locations as well as its direct-to-consumer outlet stores and through e-commerce at Movado.com.

In the fourth quarter of fiscal 2013, the Company recorded a pre-tax charge of \$4.9 million related to the repositioning of the Coach watch brand from a collection that is priced for sale in a department store's fine watch department to one suitable for sale in the fashion watch department. The charge represented the Company's estimated cost of the aggregate sales allowance to Coach watch retailers affected by the repositioning.

Gross Margins. The Company's overall gross margins are primarily affected by four major factors: brand and product sales mix, product pricing strategy, manufacturing costs and fluctuation in foreign currency exchange rates, in particular the relationship between the U.S. dollar and the Swiss franc and the Euro. Gross margins for the Company may not be comparable to those of other companies, since some companies include all the costs related to their distribution networks in cost of sales whereas the Company does not include the costs associated with its U.S. and Asia warehousing and distribution facilities nor the occupancy costs for the retail segment in the cost of sales line item. Those are included in selling, general and administrative expenses.

Gross margins vary among the brands included in the Company's portfolio and also among watch models within each brand. Watches in the luxury category generally earn higher gross margin percentages than watches in the licensed brand category. The difference in gross margin percentages for the licensed brand category is primarily due to the impact of royalty payments made on the licensed brands. Gross margins in the Company's outlet business are affected by the mix of product sold and may exceed those of the wholesale business since the Company earns margins on its outlet store sales from manufacture to point of sale to the consumer.

All of the Company's brands compete with a number of other brands not only on styling but also on wholesale and retail price. The Company's ability to improve margins through price increases is therefore, to some extent, constrained by competitors' actions.

Cost of sales of the Company's products consists primarily of component costs, royalties, assembly costs, depreciation, amortization and unit overhead costs associated with the Company's supply chain operations in Switzerland and Asia. The Company's supply chain operations consist of logistics management of assembly operations and product sourcing in Switzerland and Asia and minor assembly in Switzerland. Through productivity improvement efforts, the Company has controlled the level of overhead costs and maintained flexibility in its cost structure by outsourcing a significant portion of its component and assembly requirements.

Cost of sales of the Company's products includes costs for raw material and components, as well as labor for assembly of finished goods, all of which can be impacted by inflation. While inflation in costs has negatively impacted gross margin percentage, this effect has not been material to the Company's results of operations for the periods presented in this report. A significant increase in these costs due to inflation could have a material adverse effect on the Company's future results of operations. While the Company may seek to offset the negative inflationary impact on these costs with price increases on its products, its ability to effectively do so will depend on the extent it can pass on price increases and still remain competitive in the marketplace.

In the fourth quarter of fiscal 2014, gross margin was impacted by a \$7.5 million pre-tax charge related to anticipated ESQ Movado watch brand returns and the write down of ESQ Movado excess inventory. This charge resulted from the Company's decision to reduce the presence of ESQ Movado while expanding the Movado brand offering in certain retail doors. The Company reallocated certain of the ESQ Movado retail space in the first half of fiscal 2015 to drive incremental sales of its more productive Movado brand watch families, and continues to offer ESQ Movado in select retail locations as well as its direct-to-consumer outlet stores and Movado.com.

In calendar years 2010 through 2012, drawback claims were filed with U.S. Customs & Border Protection ("CBP") to recover duty payments made by the Company in calendar years 2008 through 2011. The drawback claims concerned duty paid on watches that were subsequently exported from the United States. A number of drawback claims filed on behalf of the Company were denied by CBP in calendar year 2012 and an administrative protest was filed requesting reconsideration of the denials. This protest was approved and, as a result, in the fourth quarter of fiscal 2014 the Company recorded and received a net pre-tax refund of \$2.5 million. The Company does not anticipate receipt of any additional refunds related to this matter nor does the Company anticipate return of any of these refunds to CBP.

Since a substantial amount of the Company's product costs are incurred in Swiss francs, fluctuations in the U.S. dollar/Swiss franc exchange rate can impact the Company's cost of goods sold and, therefore, its gross margins. The Company reduces its exposure to the Swiss franc exchange rate risk through a hedging program. Under the hedging program, the Company manages most of its foreign currency exposures on a consolidated basis, which allows it to net certain exposures and take advantage of natural offsets. In the event these exposures do not offset, the Company has the ability to hedge its Swiss franc purchases using a combination of forward contracts and purchased currency options. The Company's hedging program mitigated the impact of the exchange rate fluctuations on product costs and gross margins for fiscal years 2015, 2014 and 2013.

Selling, General and Administrative (“SG&A”) Expenses. The Company’s SG&A expenses consist primarily of marketing, selling, distribution, general and administrative expenses. In fiscal 2014, the Company recorded a \$2.0 million pre-tax charge related to donations made to the Movado Group Foundation. In fiscal 2014, the Company also recorded a \$0.8 million pre-tax charge related to the write down of excess displays and point of sale materials, as a result of the Company’s decision to reduce the presence of ESQ Movado while expanding the Movado brand offering in certain retail doors. In fiscal 2013 the Company recorded a \$3.0 million pre-tax charge related to donations made to the Movado Group Foundation.

Annual marketing expenditures are based principally on overall strategic considerations relative to maintaining or increasing market share in markets that management considers to be crucial to the Company’s continued success as well as on general economic conditions in the various markets around the world in which the Company sells its products. Marketing expenses include various forms of media advertising, digital advertising and co-operative advertising with customers and distributors and other point of sale marketing and promotion spending.

Selling expenses consist primarily of salaries, sales commissions, sales force travel and related expenses, depreciation and amortization, expenses associated with the annual Baselworld Watch and Jewelry Show and other industry trade shows and operating costs incurred in connection with the Company's retail business. Sales commissions vary with overall sales levels. Retail selling expenses consist primarily of payroll related and store occupancy costs.

Distribution expenses consist primarily of salaries of distribution staff, rental and other occupancy costs, security, depreciation and amortization of furniture and leasehold improvements and shipping supplies.

General and administrative expenses consist primarily of salaries and other employee compensation including performance based compensation, employee benefit plan costs, office rent, management information systems costs, professional fees, bad debts, depreciation and amortization of furniture, computer software and leasehold improvements, patent and trademark expenses and various other general corporate expenses.

Interest Expense. To the extent it borrows, the Company will record interest expense on its revolving credit facility. Additionally, interest expense includes the amortization of deferred financing costs associated with the Company's revolving credit facility.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

The Company's consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States and those significant policies are more fully described in Note 1 to the Company's consolidated financial statements. The preparation of these financial statements and the application of certain critical accounting policies require management to make judgments based on estimates and assumptions that affect the information reported. On an on-going basis, management evaluates its estimates and judgments, including those related to sales discounts and markdowns, product returns, bad debt, inventories, income taxes, warranty obligations, useful lives of property, plant and equipment, impairments, stock-based compensation and contingencies and litigation. Management bases its estimates and judgments about the carrying values of assets and liabilities that are not readily apparent from other sources on historical experience, contractual commitments and on various other factors that are believed to be reasonable under the circumstances. Actual results could differ from these estimates. Management believes the following are the critical accounting policies requiring significant judgments and estimates used in the preparation of its consolidated financial statements.

Revenue Recognition

In the wholesale segment, the Company recognizes revenue upon transfer of title and risk of loss in accordance with its FOB shipping point terms of sale and after the sales price is fixed and determinable and collectability is reasonably assured. In the retail segment, transfer of title and risk of loss occurs at the time of register receipt. The Company records estimates for sales returns and sales and cash discount allowances as a reduction of revenue in the same period that the sales are recorded. These estimates are based upon historical analysis, customer agreements and/or currently known factors that arise in the normal course of business. While returns have historically been within the Company's expectations and the provisions established, future return rates may differ from those experienced in the past. In the event that returns are authorized at a rate significantly higher than the Company's historic rate, the resulting returns could have an adverse impact on its operating results for the period in which such results materialize.

In the fourth quarter of fiscal 2014, the Company recorded a pre-tax charge of \$7.8 million to sales, for anticipated returns resulting from the Company's decision to reduce the presence of ESQ Movado while expanding the Movado brand offering in certain retail doors.

In the fourth quarter of fiscal 2013, the Company recorded a pre-tax charge of \$4.9 million related to the repositioning of the Coach watch brand from a collection, which was priced for sale in a department store's fine watch department to one suitable for sale in the fashion watch department.

Allowance for Doubtful Accounts

Accounts receivable are reduced by an allowance for amounts that may be uncollectible in the future. Estimates are used in determining the allowance for doubtful accounts and are based on an analysis of the aging of accounts receivable, assessments of collectability based on historic trends, the financial condition of the Company's customers and an evaluation of economic conditions. In general, the actual bad debt losses have historically been within the Company's expectations and the allowances it established. As of January 31, 2015, except for those accounts provided for in the reserve for doubtful accounts, the Company knew of no situations with any of the Company's major customers which would indicate the customer's inability to make their required payments.

Inventories

The Company previously valued its inventory at the lower of cost or market. Effective February 1, 2011, the Company changed its method of valuing its U.S. inventories to the average cost method. With this change, all of the Company's inventories are now valued using the average cost method. The Company believes that the average cost method of inventory valuation is preferable because (1) it permits the Company to use a single method of accounting for all of the Company's U.S. and international inventories, (2) it aligns costs with the Company's forecasting and procurement decisions, and (3) since a number of the Company's key competitors use the average cost method, it improves comparability of the Company's financial statements. The Company reviews its on-hand inventory to determine amounts, if any, of inventory that is deemed discontinued, excess, or unsaleable. Inventory classified as discontinued, together with the related component parts that can be assembled into saleable finished goods, is sold primarily through the Company's outlet stores. When management determines that finished product is unsaleable or that it is impractical to build the excess components into watches for sale, a charge is recorded to value those products and components at the lower of cost or market value.

In the fourth quarter of fiscal 2014, the Company recorded inventory reserves of \$2.6 million related to the write down of ESQ Movado excess watch inventory as a result of the Company's decision to reduce the presence of ESQ Movado while expanding the Movado brand offering in certain retail doors.

Long-Lived Assets

The Company periodically reviews the estimated useful lives of its depreciable assets based on factors including historical experience, the expected beneficial service period of the asset, the quality and durability of the asset and the Company's maintenance policy including periodic upgrades. Changes in useful lives are made on a prospective basis unless factors indicate the carrying amounts of the assets may not be recoverable and an impairment is necessary.

The Company performs an impairment review of its long-lived assets once events or changes in circumstances indicate, in management's judgment, that the carrying value of such assets may not be recoverable. When such a determination has been made, management compares the carrying value of the assets with their estimated future undiscounted cash flows. If it is determined that an impairment loss has occurred, the loss is recognized during that period. The impairment loss is calculated as the difference between asset carrying values and the fair value of the long-lived assets.

Warranties

All watches sold by the Company come with limited warranties covering the movement against defects in material and workmanship for periods ranging from two to three years from the date of purchase, with the exception of Tommy Hilfiger watches, for which the warranty period is ten years. In addition, the warranty period is five years for the gold plating on certain Movado watch cases and bracelets. The Company records an estimate for future warranty costs based on historical repair costs. Warranty costs have historically been within the Company's expectations and the provisions established. If such costs were to substantially exceed estimates, they could have an adverse effect on the Company's operating results.

Stock-Based Compensation

Under the accounting guidance for share-based payments, the Company utilizes the Black-Scholes option-pricing model to calculate the fair value of each employee stock option at its grant date which requires that certain assumptions be made. The expected life of stock option grants is determined using historical data and represents the time period during which the stock option is expected to be outstanding until it is exercised. The risk free interest rate

is the yield on the grant date of U.S. Treasury constant maturities with a maturity date closest to the expected life of the stock option. The expected stock price volatility is derived from historical volatility and calculated based on the estimated term structure of the stock option grant. The expected dividend yield is calculated using a historical average of annualized dividend yields.

Compensation expense for equity instruments is accrued based on the estimated number of instruments for which the requisite service is expected to be rendered. This estimate is reflected in the period of change. Expense related to stock option compensation is recognized on a straight-line basis over the vesting term.

Income Taxes

The Company follows the asset and liability method of accounting for income taxes under which deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax laws and tax rates in each jurisdiction where the Company operates, and applied to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities due to a change in tax rates is recognized in income

in the period that includes the enactment date. In addition, the amounts of any future tax benefits are reduced by a valuation allowance to the extent such benefits are not expected to be realized on a more-likely-than-not basis. The Company calculates estimated income taxes in each of the jurisdictions in which it operates. This process involves estimating actual current tax expense along with assessing temporary differences resulting from differing treatment of items for both book and tax purposes. See Note 7 to the Company's Consolidated Financial Statements for further information regarding income taxes.

The Company follows guidance for accounting for uncertainty in income taxes. This guidance clarifies the accounting for uncertainty in income taxes recognized in an enterprise's financial statements and prescribes a recognition threshold and measurement standard for the financial statement recognition and measurement of an income tax position taken or expected to be taken in a tax return. This guidance also provides guidance on de-recognition, classification, interest and penalties, accounting in interim periods, disclosures and transitions

RESULTS OF OPERATIONS

The following is a discussion of the results of operations for fiscal 2015 compared to fiscal 2014 and fiscal 2014 compared to fiscal 2013 along with a discussion of the changes in financial condition during fiscal 2015.

The following are net sales by business segment and geographic location (in thousands):

	Fiscal Year Ended January 31,		
	2015	2014	2013
Wholesale:			
United States	\$255,705	\$243,830	\$207,362
International	266,555	267,160	241,927
Retail	64,720	59,265	56,189
Net sales	\$586,980	\$570,255	\$505,478

The following are net sales by category as follows (in thousands):

	Fiscal Year Ended January 31,		
	2015	2014	2013
Wholesale:			
Luxury brand category	\$212,684	\$220,267	\$207,271
Licensed brands category	294,316	276,356	226,230
After-sales service and all other	15,260	14,367	15,788
Total Wholesale	522,260	510,990	449,289
Retail	64,720	59,265	56,189
Consolidated Total	\$586,980	\$570,255	\$505,478

The following table presents the Company's results of operations expressed as a percentage of net sales for the fiscal years indicated:

Fiscal Year Ended January 31,

Edgar Filing: MOVADO GROUP INC - Form 10-K

	2015	2014	2013		
	% of net sales	% of net sales	% of net sales		
Net sales	100 %	100.0	%	100.0	%
Gross margin	52.8%	53.5	%	55.0	%
Selling, general and administrative expenses	40.6%	41.7	%	45.2	%
Operating income	12.2%	11.8	%	9.8	%
Other income	0.0 %	0.2	%	0.0	%
Interest expense	0.1 %	0.1	%	0.1	%
Interest income	0.1 %	0.1	%	0.1	%
Provision /(benefit) for income taxes	3.3 %	3.0	%	(1.7)	%
Noncontrolling interests	0.1 %	0.1	%	0.2	%
Net income attributed to Movado Group, Inc.	8.8 %	8.9	%	11.3	%

27

Fiscal 2015 Compared to Fiscal 2014

Net Sales

Net sales in fiscal 2015 were \$587.0 million, \$16.7 million or 2.9% above the prior year. Net sales in fiscal 2014 included an additional pre-tax charge of \$7.8 million to sales, for anticipated returns in fiscal 2015 resulting from the Company's decision to reduce the presence of ESQ Movado while expanding the Movado brand offering in certain retail doors. For fiscal 2015, fluctuations in foreign currency exchange rates unfavorably impacted net sales by \$2.2 million when compared to the prior year.

United States Wholesale Net Sales

Net sales in fiscal 2015 in the United States location of the wholesale segment were \$255.7 million, above the prior year period by \$11.9 million or 4.9%, primarily driven by sales increases in the licensed brand and luxury brand categories. Net sales in the licensed brands category were above the prior year's net sales by \$5.9 million, or 7.1%. The increase in sales in the licensed brands category was primarily due to higher sales of certain licensed brands, as a result of strong sell-through and expansion in the Company's distribution channels. Net sales in the luxury category were above the prior year by \$4.6 million, or 3.0%. The increase in sales in the luxury category was primarily due to higher sales in both Movado and ESQ Movado brand sales. The sales increase in the Movado brand was primarily due to strong sell-through in the Company's Movado brand distribution channels, which included higher sales of the Movado BOLD and Museum watch collections and the introduction of new products in the current year, all of which were supported by the Company's continued focus and investment in marketing and advertising. The year on year fluctuation in sales in the ESQ Movado brand was primarily due to the \$7.8 million sales charge in the prior year, for anticipated returns resulting from the Company's strategic decision to reduce the presence of ESQ Movado watches while expanding the Movado brand offering in certain retail doors. The Company believes it did not fully realize all of the anticipated benefits of this strategy which was intended to drive incremental sales of its more productive Movado brand watch families by utilizing the increased case space at the point of sale that otherwise would have been occupied by relatively less productive ESQ Movado SKUs. Although Movado brand sales at retail increased while, at the same time, sales of ESQ Movado watches at retail declined, Movado brand sales at wholesale increased less than expected due to retailers tightly managing their inventory. It is expected that this trend will continue into next year. Sales increases in the luxury brand category were partially offset by net sales decreases in Ebel and Concord brand watches of \$3.2 million when compared to the prior year, primarily due to higher sell-in to retailers of newer product and lower promotional sales in the prior year. Also contributing to the increase in sales was a sales increase of \$1.4 million in 2015 from after-sales service and all other category, primarily due to sales from special events in the current year.

International Wholesale Net Sales

Net sales in fiscal 2015 in the International location of the wholesale segment were \$266.6 million, below the prior year by \$0.6 million or 0.2%, driven by a sales decrease in the luxury brand category, partially offset by a sales increase in the licensed brand category. The net sales decrease in the luxury category of \$12.2 million was primarily due to lower sales of Movado and the other luxury brand watches. The decrease in Movado watch sales was primarily due to weaker than expected performance in certain markets, including Asia. The decrease in sales of all other luxury brands was primarily the result of higher sell-in to retailers of newer product in the prior year. These sales decreases were mostly offset by a sales increase in the licensed brand category of \$12.1 million, or 6.2% compared to the prior year, primarily due to higher sales of certain licensed brands as a result of strong sell-through, as well as geographic expansion in the Company's distribution channels. In fiscal 2015, fluctuations in foreign currency exchange rates unfavorably impacted net sales by \$2.2 million when compared to the prior year.

Retail Net Sales

Net sales in fiscal 2015 in the retail segment were \$64.7 million, representing a 9.2% increase from the prior year sales of \$59.3 million. The increase in sales was primarily attributable to the opening of new stores. Comparable outlet store sales increased 2.5% from the prior year sales. As of January 31, 2015 and 2014, the Company operated 38 and 35 outlet stores, respectively.

The Company considers comparable store sales to be sales of stores that were open as of February 1st of the prior fiscal year through January 31st of the current fiscal year. The Company had 33 comparable outlet stores for the year ended January 31, 2015. The sales from stores that have been relocated, renovated or refurbished are included in the calculation of comparable store sales. The method of calculating comparable store sales varies across the retail industry. As a result, the Company's method for the calculation of comparable store sales may not be the same as measures used or reported by other companies.

Gross Profit

Gross profit for fiscal 2015 was \$310.0 million or 52.8% of net sales as compared to \$305.3 million or 53.5% of net sales in the prior year. The increase in gross profit of \$4.7 million was primarily due to higher net sales for the current year partially offset by a lower gross margin percentage. The gross margin percentage for fiscal 2015 decreased by approximately 70 basis points. The decrease reflects the unfavorable impact of fluctuations in foreign currency exchange rates of approximately 60 basis points, an unfavorable shift in channel and product mix of approximately 40 basis points, and a duty refund received in the prior year relating to payments made by the Company in calendar years 2008 through 2011 for drawback claims filed with U.S. Customs & Border Protection of approximately 40 basis points. These decreases were partially offset by the positive impact of approximately 60 basis points due to the Company's decision to reduce the presence of ESQ Movado while expanding the Movado brand offering in certain retail doors and the positive impact of approximately 10 basis points resulting from leverage gained on certain fixed costs due to the increase in sales volume year-over-year.

Selling, General and Administrative

SG&A expenses for fiscal 2015 were \$238.5 million, representing an increase from the prior year of \$1.0 million or 0.4%. The increase in SG&A expenses was attributable to higher compensation and benefit expense of \$7.9 million primarily in support of the Company's brand building and growth initiatives. Also contributing to the increase in SG&A expenses was the unfavorable effect of fluctuations in foreign currency exchange rates of \$1.8 million, which was the result of losses on Euro receivables in entities whose functional currency is not the Euro. Also contributing to the increase in SG&A expenses were higher other selling expenses of \$2.1 million, higher trade show expenses of \$1.0 million (primarily related to the Baselworld Watch and Jewelry Show), higher rent related expenses of \$0.7 million (primarily related to the opening of new stores and warehousing expansion), higher bad debt expense of \$0.6 million and higher depreciation and amortization expense of \$0.3 million. The increases in SG&A expenses were partially offset by a decrease in performance-based compensation of \$9.0 million, resulting from the Company not meeting certain financial targets, lower marketing expense of \$2.4 million, which included a \$0.8 million pre-tax charge in the prior year related to the write down of unused displays and point of sale materials, as a result of the Company's strategic decision to reduce the presence of ESQ Movado watches while expanding the Movado brand offering in certain retail doors, and a decrease of \$2.0 million of charitable contributions, related to the prior year contribution of \$2.0 million to the Movado Group Foundation.

Wholesale Operating Income

Operating income of \$58.2 million and \$55.2 million, which included \$19.3 million and \$26.5 million of unallocated corporate expenses, was recorded in the Wholesale segment for fiscal 2015 and 2014, respectively. The \$3.0 million increase in operating income was the net result of an increase in gross profit of \$2.1 million and a decrease in SG&A expenses of \$0.9 million. The increase in gross profit of \$2.1 million was primarily due to higher net sales and partially offset by a lower gross margin percentage. Gross profit in the prior year was negatively impacted by a \$7.5 million pre-tax charge related to the anticipated ESQ Movado watch brand returns and the write down of ESQ Movado excess inventory. The decrease in SG&A expense included a decrease in performance-based compensation of \$9.0 million, resulting from the Company not meeting certain financial targets. Also contributing to the decrease was lower marketing expense of \$2.4 million (which included a \$0.8 million pre-tax charge in the prior year related to the write down of unused displays and point of sale materials, as a result of the Company's strategic decision to reduce the presence of ESQ Movado watches while expanding the Movado brand offering in certain retail doors), and a decrease of \$2.0 million of charitable contributions related to the prior year contribution of \$2.0 million to the Movado Group Foundation. These decreases in SG&A expenses were partially offset by higher compensation and benefit expense of \$7.0 million primarily in support of the Company's brand building and growth initiatives and the unfavorable effect of fluctuations in foreign currency exchange rates of \$1.8 million, which was the result of losses on Euro receivables in

entities whose functional currency is not the Euro. Also contributing to the partial offset were higher other selling expenses of \$2.0 million, higher trade show expenses of \$1.0 million, primarily related to the Baselworld Watch and Jewelry Show, higher bad debt expense of \$0.6 million, higher depreciation and amortization expense of \$0.2 million, and higher rent related expenses of \$0.2 million, primarily related to warehousing expansion.

U.S. Wholesale Operating Income / Loss

Operating income of \$5.5 million and an operating loss of \$1.5 million, which included \$19.3 million and \$26.5 million of unallocated corporate expenses, was recorded in the United States location of the Wholesale segment for fiscal 2015 and 2014, respectively. The increase in income of \$7.0 million was due to lower SG&A expenses of \$4.2 million and higher gross profit of \$2.8 million, which was primarily attributable to higher sales and partially offset by a lower gross margin percentage. The decrease in SG&A expense included lower compensation and benefit expense of \$2.5 million (resulting from a decrease in performance-based compensation, partially offset by higher headcount, salaries and stock award expenses) and a decrease of \$2.0 million of charitable contributions. These decreases were partially offset by higher marketing expense of \$0.7 million, which included a \$0.8 million pre-tax charge in the prior year related to the write down of unused displays and point of sale materials, as a result of the Company's strategic decision to reduce the presence of ESQ Movado watches while expanding the Movado brand offering in certain retail doors. The increase in gross profit of \$2.8 million was primarily due to higher sales and the non-recurrence of a \$7.5 million pre-tax charge that affected the prior year related to the anticipated ESQ Movado watch brand returns and the write down of ESQ Movado excess inventory.

International Wholesale Operating Income

Operating income of \$52.7 million and \$56.7 million was recorded in the international location of the Wholesale segment for fiscal 2015 and 2014, respectively, which included \$47.1 million and \$44.2 million, respectively, of certain profits related to the Company's supply chain operations. The decrease in operating income of \$4.0 million was due to higher SG&A expenses of \$3.4 million and lower gross profit of \$0.6 million, which was primarily attributable to lower sales. The increase in SG&A expenses of \$3.4 million included higher other selling expenses of \$2.0 million, the unfavorable effect of fluctuations in foreign currency exchange rates of \$1.8 million, higher trade show expenses of \$1.0 million, primarily related to the Baselworld Watch and Jewelry Show, higher bad debt expense of \$0.7 million and higher compensation and benefit expenses of \$0.5 million resulting primarily from a higher headcount and salaries, partially offset by a lower expense for performance-based compensation. These increased SG&A expenses were partially offset by higher marketing expenses of \$3.1 million.

Retail Operating Income

Operating income of \$13.3 million and \$12.5 million was recorded in the retail segment for fiscal 2015 and 2014, respectively. The \$0.8 million increase in operating income was the result of an increase in gross profit of \$2.6 million, partially offset by an increase in SG&A expenses of \$1.8 million. The increase in gross profit of \$2.6 million was primarily attributable to higher sales and partially offset by a lower gross margin percentage. The increase in SG&A expenses of \$1.8 million was primarily due to higher compensation, benefit expenses and occupancy expenses related to the opening of new stores in the current year.

Other Income

Other income for fiscal 2014 consisted of a \$1.5 million pre-tax gain on the sale of a building. The Company received cash proceeds from the sale of \$2.2 million in the first quarter of fiscal year 2014. Prior to the sale, the building had been classified as an asset held for sale in other current assets.

Interest Expense

Interest expense was \$0.5 million and \$0.4 million for fiscal 2015 and 2014, respectively, which primarily consisted of the amortization of deferred financing costs.

For information on the Company's borrowings for fiscal 2015 and fiscal 2014, see Note 4 to the Consolidated Financial Statements.

Interest Income

Interest income was \$0.2 million and \$0.1 million for fiscal 2015 and 2014.

Income Taxes

The Company recorded a tax expense of \$19.3 million and of \$17.4 million for fiscal 2015 and 2014, respectively. The effective tax rate for fiscal 2015 was 27.1%, primarily as a result of foreign profits being taxed in lower taxing jurisdictions and the recognition of a tax benefit related to intercompany transactions in certain jurisdictions. The effective tax rate for fiscal 2014 was 25.2%, primarily as a result of foreign profits being taxed in lower taxing jurisdictions and the release of liabilities for uncertain tax positions as a result of favorable U.S. and foreign audit settlements, which were partially offset by no tax being realized on certain foreign net operating losses. See Note 7 to the Company's Consolidated Financial Statements for further information regarding income taxes.

Net Income Attributed to Movado Group, Inc.

For fiscal 2015 and 2014, the Company recorded net income attributed to Movado Group, Inc. of \$51.8 million and \$50.9 million, respectively.

30

Fiscal 2014 Compared to Fiscal 2013

Net Sales

Net sales in fiscal 2014 were \$570.3 million, \$64.8 million or 12.8% above the prior year. Net sales in fiscal 2014 included an additional pre-tax charge of \$7.8 million to sales, for anticipated returns in fiscal 2015 resulting from the Company's decision to reduce the presence of ESQ Movado while expanding the Movado brand offering in certain retail doors. Net sales in fiscal 2013 included a sales allowance of \$4.9 million related to the repositioning of the Coach watch brand from a watch line, which was priced for sale in a department store's fine watch department to one suitable for sale in the fashion watch department. For fiscal 2014, fluctuations in foreign currency exchange rates favorably impacted net sales by \$3.0 million when compared to the prior year.

United States Wholesale Net Sales

Net sales in fiscal 2014 in the United States location of the wholesale segment were \$243.8 million, above the prior year period by \$36.5 million or 17.6%, primarily driven by sales increases in the licensed brand and luxury brand categories. Net sales in the luxury category were above the prior year by \$16.8 million, or 12.3%. Net sales in the licensed brand category were above the prior year by \$19.6 million, or 31.2%, primarily due to higher sales of Coach watches as a result of the repositioning of the Coach watch brand into the fashion watch category. Also contributing to the increase were sales of the Company's newly introduced Scuderia Ferrari watch line and the strong sell-through of certain other licensed brands. The increase in sales in the luxury category was primarily due to strong sell-through in the Company's Movado brand distribution channels, which included higher sales of the Movado BOLD and Museum watch collections and the introduction of Movado TC and SE Pilot watch collections in the current year, all of which were supported by the Company's continued focus and investment in marketing and advertising. The increase in sales in the luxury category was partially offset by sales decreases of the ESQ Movado brand primarily due to the \$7.8 million sales reserve in the current year, for anticipated returns resulting from the Company's decision to reduce the presence of ESQ Movado while expanding the Movado brand offering in certain retail doors. Net sales increases were also recorded in the luxury category of \$1.9 million when compared to the prior year period, primarily due to higher promotional sales.

International Wholesale Net Sales

Net sales in fiscal 2014 in the International location of the wholesale segment were \$267.2 million, above the prior year by \$25.2 million or 10.4%, primarily driven by a sales increase in the licensed brand category. Net sales in the licensed brand category were above the prior year period by \$30.5 million, or 18.7%, primarily due to the introduction of the Scuderia Ferrari watch line. Also contributing to the increase were higher sales of Coach watches as a result of the repositioning of the Coach watch brand into the fashion watch category, as well as geographic expansion. Net sales in the luxury category were below the prior year period by \$3.8 million, or 5.3%, primarily due to the sell-in of the newly launched Ebel Onde and X1 in the prior year. In fiscal 2014, fluctuations in foreign currency exchange rates favorably impacted net sales by \$3.0 million when compared to the prior year.

Retail Net Sales

Net sales in fiscal 2014 in the retail segment were \$59.3 million, representing a 5.5% increase from the prior year sales of \$56.2 million. The increase in sales was primarily attributable to the opening of new stores. Comparable outlet store sales increased 1.5% from the prior year sales. As of January 31, 2014, the Company operated 35 outlet stores, compared to 34 outlet stores at the end of the prior year.

The Company considers comparable store sales to be sales of stores that were open as of February 1st of the prior fiscal year through January 31st of the current fiscal year. The Company had 32 comparable outlet stores for the year ended January 31, 2014. The sales from stores that have been relocated, renovated or refurbished are included in the calculation of comparable store sales. The method of calculating comparable store sales varies across the retail industry. As a result, the Company's method for the calculation of comparable store sales may not be the same as measures used or reported by other companies.

Gross Profit

Gross profit for fiscal 2014 was \$305.3 million or 53.5% of net sales as compared to \$277.9 million or 55.0% of net sales in the prior year. The increase in gross profit of \$27.4 million was primarily due to higher net sales for the current year partially offset by a lower gross margin percentage. The gross margin percentage for fiscal 2014 decreased by approximately 220 basis points due to a shift in channel and product mix, approximately 60 basis points due to the Company's decision to reduce the presence of ESQ Movado while expanding the Movado brand offering in certain retail doors and by approximately 10 basis points due to the unfavorable impact of fluctuations in foreign currency exchange rates. These decreases in the gross margin percentage were partially offset by the positive impact of approximately 60 basis points resulting from leverage gained on certain fixed costs due to the increase in sales volume year-over-year, approximately 40 basis points related to a charge for a sales allowance resulting from the repositioning of the Coach watch brand in the prior year, and approximately 40 basis points resulting from a duty refund received relating to payments made by the Company in calendar years 2008 through 2011 for drawback claims filed with U.S. Customs & Border Protection.

Selling, General and Administrative

SG&A expenses for fiscal 2014 were \$237.5 million, representing an increase from the prior year of \$9.0 million or 3.9%. The increase in SG&A expense included higher marketing expenses of \$6.2 million, which included a \$0.8 million pre-tax charge related to the write down of unused displays and point of sale materials, as a result of the Company's decision to reduce the presence of ESQ Movado while expanding the Movado brand offering in certain retail doors. Also contributing to the increase in SG&A expenses were higher trade show expenses of \$2.5 million, primarily related to the Baselworld Watch and Jewelry Show, a recovery of bad debt of \$1.2 million in fiscal 2013 that did not recur and higher office related expenses of \$0.7 million. These increases in SG&A expenses were partially offset by lower compensation and benefit expense of \$1.1 million resulting primarily from a lower accrual for performance-based compensation that was partially offset by higher headcount and salaries and was also partially offset by a decrease of \$1.0 million of charitable contributions made to the Movado Group Foundation.

Wholesale Operating Income

Operating income of \$55.2 million and \$38.0 million, which included \$26.5 million and \$27.2 million of unallocated corporate expenses, was recorded in the Wholesale segment for fiscal 2014 and 2013, respectively. The \$17.2 million increase in operating income was the net result of an increase in gross profit of \$25.6 million, partially offset by an increase in SG&A expenses of \$8.0 million. The increase in gross profit of \$25.6 million was primarily due to higher net sales. Gross profit was impacted by a \$7.5 million pre-tax charge related to the anticipated ESQ Movado watch brand returns and the write down of ESQ Movado excess inventory. The increase in SG&A expense included higher marketing expenses of \$6.3 million, which included a \$0.8 million pre-tax charge related to the write down of unused displays and point of sale materials, as a result of the Company's decision to reduce the presence of ESQ Movado while expanding the Movado brand offering in certain retail doors. Also contributed to the increase in SG&A expenses were higher trade show expenses of \$2.5 million, primarily related to the Baselworld Watch and Jewelry Show, a recovery of bad debt of \$1.2 million in fiscal 2013 that did not recur and higher office related expenses of \$0.7 million. These increases in SG&A expenses were partially offset by lower compensation and benefit expense of \$1.4 million resulting primarily from a lower accrual for performance-based compensation, the lower performance-based compensation accrual was partially offset by higher headcount and salaries, also partially offsetting the increases in SG&A was a decrease of \$1.0 million of charitable contributions made to the Movado Group Foundation.

U.S. Wholesale Operating Loss

Operating loss of \$1.5 million and \$9.2 million, which included \$26.5 million and \$27.2 million of unallocated corporate expenses, was recorded in the United States location of the Wholesale segment for fiscal 2014 and 2013, respectively. The decrease in loss of \$7.7 million was due to higher gross profit of \$12.4 million, which was primarily attributable to higher sales. Gross profit was impacted by a \$7.5 million pre-tax charge related to the anticipated ESQ Movado watch brand returns and the write down of ESQ Movado excess inventory. The higher gross profit was partially offset by higher SG&A expenses of \$4.7 million, which was primarily attributable to higher marketing expense of \$3.8 million resulting from the Company's decision to continue investment in this area to drive sales growth, and which included a \$0.8 million pre-tax charge related to the write down of unused displays and point of sale materials as a result of the Company's decision to reduce the presence of ESQ Movado while expanding the Movado brand offering in certain retail doors. Also contributing to the increase in SG&A expenses was a recovery of bad debt of \$0.9 million in the prior year period due to settlements with certain customers that did not recur. Additionally, the increase in SG&A expenses included higher compensation and benefit expense of \$1.5 million recorded during the current year resulting from higher headcount and salary increases, partially offset by a lower accrual for performance-based compensation. Higher office related expenses of \$0.5 million also contributed to the increase in SG&A expenses. These increases were partially offset by a decrease of \$1.0 million in charitable contributions made to the Movado Group Foundation and a smaller foreign currency loss of \$0.5 million related to the settlement of certain foreign denominated assets.

International Wholesale Operating Income

Operating income of \$56.7 million and \$47.2 million was recorded in the international location of the Wholesale segment for fiscal 2014 and 2013, respectively, which included \$44.2 million and \$40.2 million, respectively, of certain profits related to the Company's supply chain operations. The increase in income of \$9.5 million was due to higher gross profit of \$13.2 million, which was primarily attributable to higher sales. The higher gross profit was partially offset by higher SG&A expenses of \$3.6 million, which included higher marketing expenses of \$2.5 million and higher trade show expenses of \$2.5 million, primarily related to the Baselworld Watch and Jewelry Show and the effect of fluctuations in foreign currency exchange rates, which unfavorably impacted SG&A expenses for fiscal 2014 by \$0.9 million. These increased SG&A expenses were partially offset by lower compensation and benefit expenses of \$2.9 million resulting primarily from a lower accrual for performance-based compensation and lower expenses related to separation agreements.

Retail Operating Income

Operating income of \$12.5 million and \$11.3 million was recorded in the retail segment for fiscal 2014 and 2013, respectively. The \$1.2 million increase in operating income was the result of an increase in gross profit of \$1.8 million, partially offset by an increase in SG&A expenses of \$0.6 million. The increase in gross profit of \$1.8 million was primarily attributable to higher sales. The increase in SG&A expenses of \$0.6 million was primarily due to higher compensation, benefit expenses and occupancy expenses related to the opening of new stores in the current year.

Other Income

Other income for fiscal 2014 consisted of a \$1.5 million pre-tax gain on the sale of a building. The Company received cash proceeds from the sale of \$2.2 million in the first quarter of fiscal year 2014. Prior to the sale, the building had been classified as an asset held for sale in other current assets.

Interest Expense

Interest expense was \$0.4 million for both fiscal 2014 and 2013, which primarily consisted of the amortization of deferred financing costs. For borrowings data for the fiscal years ended January 31, 2014 and 2013, see Note 4 to the Consolidated Financial Statements.

Interest Income

Interest income was \$0.1 million for both fiscal 2014 and 2013.

Income Taxes

The Company recorded a tax expense of \$17.4 million and a tax benefit of \$8.8 million for fiscal 2014 and 2013, respectively. Fiscal 2013 included a tax benefit of \$19.8 million attributable to the reversal of a majority of the valuation allowance on the U.S. net deferred tax assets. The effective tax rate for fiscal 2014 was 25.2%. The effective tax rate for fiscal 2014 was primarily the result of foreign profits being taxed in lower taxing jurisdictions and the release of liabilities for uncertain tax positions as a result of favorable U.S. and foreign audit settlements partially offset by no tax benefit being realized on certain foreign net operating losses. The effective tax rate for fiscal 2013 was -18.0%. The effective tax rate for fiscal 2013 was primarily the result of the release of the majority of a valuation allowance against net deferred tax assets in the United States, and the net tax benefit related to foreign business restructurings in Japan and the UK. See Note 7 to the Company's Consolidated Financial Statements for further information regarding income taxes.

Net Income Attributed to Movado Group, Inc.

For fiscal 2014 and 2013, the Company recorded net income attributed to Movado Group, Inc. of \$50.9 million and \$57.1 million, respectively.

LIQUIDITY AND CAPITAL RESOURCES

At January 31, 2015 and January 31, 2014, the Company had \$199.9 million and \$157.7 million of cash and cash equivalents, \$192.4 million and \$120.7 million of which consisted of cash and cash equivalents at the Company's foreign subsidiaries, respectively. At January 31, 2014, one of the Company's foreign subsidiaries also had invested \$33.1 million in a six-month time deposit which matured on July 24, 2014, labeled as Short-term Investments on the Consolidated Balance Sheet. The majority of the foreign cash balances are associated with earnings that the Company has asserted are permanently reinvested, and which are required to support continued growth outside the U.S. through funding of capital expenditures, operating expenses and similar cash needs of the foreign

operations. The Company has recorded a federal income tax liability of \$2.7 million related to \$12.8 million of pre-2013 foreign earnings which have been earmarked for future repatriation. A deferred tax liability has not been recorded for the remaining undistributed foreign earnings of approximately \$244 million, because the Company intends to permanently reinvest such earnings in its foreign operations. It is not practicable to estimate the amount of tax that may be payable on the eventual distribution of these earnings.

At January 31, 2015, the Company had working capital of \$419.2 million as compared to \$401.7 million in the prior year. The Company defines working capital as the difference between current assets and current liabilities.

Cash provided by operating activities was \$59.6 million and \$54.5 million for fiscal 2015 and 2014, respectively. The \$59.6 million of cash provided by operating activities for fiscal 2015 was primarily due to income of \$51.9 million and favorable non-cash items of \$28.1 million, partially offset by the change in working capital of \$20.2 million. The change in working capital of \$20.2 million was primarily due to the payout of the Company's prior year performance-based compensation and the timing of payments of other liabilities. Also contributing to the change in working capital was higher accounts receivables primarily due to prior year allowances for returns related to the Company's strategic decision to reduce the presence of ESQ Movado watches in certain chain and department store retail doors while expanding Movado brand offerings in those same retail doors, partially offset by lower inventory related to the Company's efforts to manage inventory levels. The \$54.5 million of cash provided by operating activities for fiscal 2014 was primarily due to net income of \$51.5 million and favorable non-cash items of \$24.7 million, partially offset by the change in working capital of \$18.9 million. The change in working capital of \$18.9 million was primarily due to an increase in inventory primarily to support higher sales and new brand introduction and an increase in accounts receivable primarily due to increased sales. Also contributing to the change in working capital was the pay down of certain liabilities and the increase in certain other current assets primarily related to display inventory, partially offset by an increase in accounts payable related to the build of inventory and an increase in income taxes payable.

Cash provided by investing activities amounted to \$21.6 million and cash used in investing activities of \$47.9 million for fiscal 2015 and 2014, respectively. The cash provided by investing for fiscal 2015 consisted of proceeds from the maturity of time-deposits of \$33.7 million, proceeds from available-for-sale securities of \$0.3 million, partially offset by capital expenditures of \$11.1 million, primarily related to the construction of shop-in shops at some of the Company's wholesale customers, expenditures on hardware and software, spending on new store openings, construction of Baselworld Watch and Jewelry Show booths, spending on tooling and design and cash used on a long-term investment of \$1.2 million. The cash used in fiscal 2014 consisted of short-term investments of \$33.1 million related to the six-month time deposit described above, capital expenditures of \$16.7 million, primarily related to the construction of Baselworld Watch and Jewelry Show booths, office improvements, retail store renovations and construction of shop-in-shops at some of the Company's wholesale customers. These current period expenditures were partially offset by proceeds of \$2.2 million received from the sale of a building held for sale.

The Company expects that annual capital expenditures in fiscal 2016 will be approximately \$15.0 million as compared to approximately \$11.1 million in fiscal 2015. The capital spending will be primarily for projects in the ordinary course of business including facilities' and Baselworld Watch and Jewelry Show improvements, shop-in-shops, computer hardware and software and tooling costs. The Company has the ability to manage a portion of its capital expenditures on discretionary projects.

Cash used in financing activities amounted to \$36.2 million and \$16.5 million for fiscal 2015 and 2014, respectively. Cash used in financing activities for both fiscal 2015 and 2014, was primarily due to the repurchase of the Company's common stock and to pay dividends, partially offset by the result of stock option exercises for the year. In fiscal 2015, cash used in financing activities also included payment of debt issuance costs and distribution of noncontrolling interest earnings. Management believes that the cash on hand in addition to the expected cash flow from operations

and the Company's short-term borrowing capacity will be sufficient to meet its working capital needs for at least the next twelve months.

On January 30, 2015, the Company, together with Movado Group Delaware Holdings Corporation, Movado Retail Group, Inc. and Movado LLC (together with the Company, the "Borrowers"), each a wholly-owned domestic subsidiary of the Company, entered into a Credit Agreement (the "Credit Agreement") with the lenders party thereto and Bank of America, N.A. as administrative agent (in such capacity, the "Agent"). The Credit Agreement provides for a \$100.0 million senior secured revolving credit facility (the "Facility") including a \$15.0 million letter of credit sub-facility that matures on January 30, 2020, with provisions for uncommitted increases of up to \$50.0 million in the aggregate subject to customary terms and conditions. In connection with the Credit Agreement, the Borrowers also entered into a Security and Pledge Agreement dated as of January 30, 2015 in favor of the Agent ("Security Agreement").

As of January 30, 2015, no loans were drawn under the Facility; however approximately \$3.9 million in letters of credit which were outstanding under the Borrower's existing asset-based revolving credit facility, which was concurrently terminated as described below, were deemed to be issued and outstanding under the Facility. As of January 30, 2015, availability under the Facility was approximately \$96.1 million.

Borrowings under the Facility bear interest at rates selected periodically by the Company at LIBOR plus 1.25% per annum (subject to increases up to a maximum of 1.75% per annum based on the Company's consolidated leverage ratio) or a base rate plus 0.25% (subject to increase up to a maximum of 0.75% per annum based on the Company's consolidated leverage ratio). The Company has also agreed to pay certain fees and expenses and provide certain indemnities, all of which are customary for such financings.

The borrowings under the Facility are joint and several obligations of the Borrowers and are also cross-guaranteed by each Borrower. In addition, pursuant to the Security Agreement, the Borrowers' obligations under the Facility are secured by first priority liens, subject to permitted liens, on substantially all of the Borrowers' assets other than certain excluded assets. The Security Agreement contains representations and warranties and covenants, which are customary for pledge and security agreements of this type, relating to the creation and perfection of security interests in favor of the Agent over various categories of the Company's assets.

The Credit Agreement contains affirmative and negative covenants binding on the Borrowers and their subsidiaries that are customary for credit facilities of this type, including, but not limited to, restrictions and limitations on the incurrence of debt and liens, dispositions of assets, capital expenditures, dividends and other payments in respect of equity interests, the making of loans and equity investments, mergers, consolidations, liquidations and dissolutions, and transactions with affiliates (in each case, subject to various exceptions).

The Borrowers are also subject to a minimum consolidated EBITDA test of \$50.0 million, measured at the end of the four most recent quarters and a consolidated leverage ratio covenant not to exceed 2.50 to 1.00, measured as of the last day of each fiscal quarter.

The Credit Agreement contains events of default that are customary for facilities of this type, including, but not limited to, nonpayment of principal, interest, fees and other amounts when due, failure of any representation or warranty to be true in any material respect when made or deemed made, violation of covenants, cross default with material indebtedness, material judgments, material ERISA liability, bankruptcy events, asserted or actual revocation or invalidity of the loan documents, and change of control.

A Swiss subsidiary of the Company maintains unsecured lines of credit with an unspecified length of time with a Swiss bank. As of January 31, 2015 and 2014, these lines of credit totaled 5.0 million Swiss francs with a dollar equivalent of \$5.4 million and \$5.5 million, respectively. As of January 31, 2015 and 2014, there were no borrowings against these lines.

As of January 31, 2015, two European banks have guaranteed obligations to third parties on behalf of two of the Company's foreign subsidiaries in the amount equivalent to \$1.3 million in various foreign currencies.

The Company paid cash dividends of \$0.40 per share or approximately \$10.1 million for fiscal 2015. The Company paid cash dividends of \$0.26 per share or approximately \$6.6 million for fiscal 2014. The Company paid cash dividends of \$1.45 per share or approximately \$36.7 million for fiscal 2013, which included two special cash dividends of \$0.50 and \$0.75 per share of common stock and class A common stock.

On March 31, 2015, the Board approved the payment of a cash dividend of \$0.11 for each share of the Company's outstanding common stock and class A common stock. The dividend will be paid on April 24, 2015 to all shareholders of record as of the close of business on April 10, 2015. The decision of whether to declare any future cash dividend, including the amount of any such dividend and the establishment of record and payment dates, will be determined, in each quarter, by the Board of Directors, in its sole discretion.

On November 25, 2014, the Board approved the payment of a cash dividend of \$0.10 for each share of the Company's outstanding common stock and class A common stock. The dividend was paid on December 19, 2014 to all shareholders of record as of the close of business on December 5, 2014.

On August 26, 2014, the Board approved the payment of a cash dividend of \$0.10 for each share of the Company's outstanding common stock and class A common stock. The dividend was paid on September 19, 2014 to all shareholders of record as of the close of business on September 5, 2014.

On May 22, 2014, the Board approved the payment of a cash dividend of \$0.10 for each share of the Company's outstanding common stock and class A common stock. The dividend was paid on June 16, 2014 to all shareholders of record as of the close of business on June 2, 2014.

On March 21, 2013, the Board approved a share repurchase program under which the Company was authorized to purchase up to \$50.0 million of its outstanding common stock from time to time, depending on market conditions, share price and other factors. The Company may purchase shares of its common stock through open market purchases, repurchase programs, block trades or otherwise. On November 25, 2014, the Board increased the amount of the share repurchase authorization to \$100.0 million. This authorization expires on January 31, 2016. During the twelve months ended January 31, 2015, the Company repurchased a total of 833,973 shares of its common stock at a total cost of approximately \$26.4 million, or an average of \$31.63 per share.

CONTRACTUAL OBLIGATIONS AND OFF-BALANCE SHEET ARRANGEMENTS

Payments due by period (in thousands):

	Total	Less than 1 year	2-3 years	4-5 years	More than 5 years
Contractual Obligations:					
Operating Lease Obligations (1)	\$42,042	\$12,157	\$17,245	\$7,342	\$ 5,298
Purchase Obligations (2)	73,601	73,601	—	—	—
Other Long-Term Obligations (3)	187,066	36,483	75,302	48,123	27,158
Total Contractual Obligations	\$302,709	\$122,241	\$92,547	\$55,465	\$ 32,456

- (1) Includes store operating leases, which generally provide for payment of direct operating costs in addition to rent. These obligation amounts include future minimum lease payments and exclude direct operating costs.
- (2) The Company had outstanding purchase obligations with suppliers at the end of fiscal 2015 for raw materials, finished watches and packaging in the normal course of business. These purchase obligation amounts do not represent total anticipated purchases but represent only amounts to be paid for items required to be purchased under agreements that are enforceable, legally binding and specify minimum quantity, price and term.
- (3) Other long-term obligations primarily consist of two items: minimum commitments related to the Company's license agreements and endorsement agreements with brand ambassadors. The Company sources, distributes, advertises and sells watches pursuant to its exclusive license agreements with unaffiliated licensors. Royalty amounts are generally based on a stipulated percentage of revenues, although most of these agreements contain provisions for the payment of minimum annual royalty amounts. The license agreements have various terms and some have additional renewal options, provided that minimum sales levels are achieved. Additionally, the license agreements require the Company to pay minimum annual advertising amounts.

Unrecognized tax benefits at January 31, 2015 of \$2.7 million and accrued interest and penalties of \$0.8 million (both gross of tax benefit) are not included above. The final outcome of tax uncertainties is dependent upon various matters including tax examinations, interpretation of the applicable tax laws or expiration of statutes of limitations. The Company believes that its tax positions comply with applicable tax law and that it has adequately provided for these matters. However, the audits may result in proposed assessments where the ultimate resolution may result in the Company owing additional taxes. Management anticipates that it is reasonably possible that the total gross amount of unrecognized tax benefits will decrease by approximately \$0.3 million in the next 12 months due to the potential expiration of the statute of limitations for certain tax return examinations, a portion of which may affect the effective tax rate; however, management does not currently anticipate a significant effect on net earnings. Future developments may result in a change in this assessment.

Off-Balance Sheet Arrangements

The Company does not have off-balance sheet financing or unconsolidated special-purpose entities.

Recent Accounting Pronouncements

In August 2014, FASB issued 2014-15, "Presentation of Financial Statements-Going Concern." This pronouncement provides guidance on the Company's responsibility to perform interim and annual assessments of an entity's ability to continue as a going concern and to provide related disclosure requirements. This pronouncement applies to all entities and is effective for annual periods ending after December 15, 2016, and interim periods thereafter, with early adoption permitted. This pronouncement will not have a material impact on the Company's consolidated financial statements.

In May 2014, FASB issued ASU 2014-09, "Revenue from Contracts with Customers." The pronouncement affects any entity that either enters into contracts with customers to transfer goods or services or enters into contracts for the transfer of nonfinancial assets, unless those contracts are within the scope of other standards (for example, insurance contracts or lease contracts). The core principle of the guidance is that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. The

pronouncement provides alternative methods of retrospective adoption and is effective for fiscal years, and interim periods within those years, beginning after December 15, 2016. Early adoption is not permitted. The Company is evaluating the effect of adopting this pronouncement, but the adoption is not expected to have a material impact on the Company's consolidated financial statements.

Item 7A. Quantitative and Qualitative Disclosure about Market Risk

Foreign Currency Exchange Rate Risk

The Company's primary market risk exposure relates to foreign currency exchange risk (see Note 5 to the Consolidated Financial Statements). A significant portion of the Company's purchases are denominated in Swiss francs. The Company reduces its exposure to the Swiss franc exchange rate risk through a hedging program. Under the hedging program, the Company manages most of its foreign currency exposures on a consolidated basis, which allows it to net certain exposures and take advantage of natural offsets. In the event these exposures do not offset, the Company uses various derivative financial instruments to further reduce the net exposures to currency fluctuations, predominately forward and option contracts. When entered into, the Company designates and documents these derivative instruments as a cash flow hedge of a specific underlying exposure, and sets forth the risk management objectives and strategies for undertaking the hedge transactions. Changes in the fair value of a derivative that is designated and documented as a cash flow hedge, and which are highly effective, are recorded in other comprehensive income until the underlying transaction affects earnings, and then are later reclassified into earnings in the same account as the hedged transaction. The earnings impact is partially offset by the effects of currency movements on the underlying hedged transactions. If the Company does not engage in a hedging program, any change in the Swiss franc to local currency would have an equal effect on the Company's cost of sales.

The Company uses forward exchange contracts to offset its exposure to certain foreign currency receivables and liabilities. These forward contracts were not designated as qualified hedges and, therefore, changes in the fair value of these derivatives are recognized into earnings, thereby offsetting the current earnings effect of the related foreign currency receivables and liabilities.

As of January 31, 2015, the Company's entire net forward contracts hedging portfolio consisted of 38.0 million Swiss francs equivalent for various expiry dates ranging through July 15, 2015 compared to a portfolio of 48.0 million Swiss francs equivalent for various expiry dates ranging through July 17, 2014 as of January 31, 2014. If the Company were to settle its Swiss franc forward contracts at January 31, 2015, the net result would be a gain of \$0.8 million, net of tax expense of \$0.4 million. The Company had no Swiss franc option contracts related to cash flow hedges as of January 31, 2015 or January 31, 2014.

The Company's Board of Directors authorized the hedging of the Company's Swiss franc denominated investment in its wholly-owned Swiss subsidiaries using purchase options under certain limitations. These hedges are treated as net investment hedges under the relevant accounting guidance regarding derivative instruments. As of January 31, 2015 and 2014, the Company did not hold a purchased option hedge portfolio related to net investment hedging.

Commodity Risk

The Company considers its exposure to fluctuations in commodity prices to be primarily related to gold used in the manufacturing of the Company's watches. Under a hedging program, the Company can purchase various commodity derivative instruments, primarily future contracts. These derivatives are documented as qualified cash flow hedges, and gains and losses on these derivative instruments are first reflected in other comprehensive income, and later reclassified into earnings, partially offset by the effects of gold market price changes on the underlying actual gold purchases. The Company did not hold any futures contracts in its gold hedge portfolio related to cash flow hedges as

of January 31, 2015 and 2014, thus any changes in the gold price will have an equal effect on the Company's cost of sales.

Debt and Interest Rate Risk

In addition, the Company has certain debt obligations with variable interest rates, which are based on LIBOR plus a fixed additional interest rate. The Company does not hedge these interest rate risks. As of January 31, 2015, the Company had no outstanding debt. For additional information concerning potential changes to future interest obligations, see "Management's Discussion and Analysis of Financial Condition and Results of Operations – Liquidity and Capital Resources."

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

None.

Item 9A. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

The Company's disclosure controls and procedures are designed to provide reasonable assurance of achieving their objectives, and the Company's Chief Executive Officer and Chief Financial Officer have concluded that such disclosure controls and procedures are effective at that reasonable assurance level. However, it should be noted that a control system, no matter how well conceived or operated, can only provide reasonable, not absolute, assurance that its objectives will be met and may not prevent all errors or instances of fraud.

The Company, under the supervision and with the participation of its management, including the Chief Executive Officer and the Chief Financial Officer, evaluated the effectiveness of the Company's disclosure controls and procedures, as such terms are defined in Rule 13a-15(e) under the Securities Exchange Act of 1934, as amended (the "Exchange Act"). Based on that evaluation, the Chief Executive Officer and the Chief Financial Officer concluded that the Company's disclosure controls and procedures are effective at a reasonable assurance level as of the end of the period covered by this report.

The Company's Chief Executive Officer and Chief Financial Officer have furnished the Sections 302 and 906 certifications required by the U.S. Securities and Exchange Commission in this annual report on Form 10-K. In addition, the Company's Chief Executive Officer certified to the NYSE in June 2014 that he was not aware of any violation by the Company of the NYSE's corporate governance listing standards.

Changes in Internal Control Over Financial Reporting

There has been no change in the Company's internal control over financial reporting (as defined in Rule 13a-15(f) under the Exchange Act) during the year ended January 31, 2015, that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

See Consolidated Financial Statements and Supplementary Data for Management's Annual Report on Internal Control Over Financial Reporting and the Report of Independent Registered Public Accounting Firm.

Item 9B. Other Information

None.

PART III

Item 10. Directors, Executive Officers and Corporate Governance

The information required by this item is included in the Company's Proxy Statement for the 2015 annual meeting of shareholders under the captions "Election of Directors" and "Management" and is incorporated herein by reference.

Information on the beneficial ownership reporting for the Company's directors and executive officers is contained in the Company's Proxy Statement for the 2015 annual meeting of shareholders under the caption "Section 16(a) Beneficial Ownership Reporting Compliance" and is incorporated herein by reference.

Information on the Company's Audit Committee and Audit Committee Financial Expert is contained in the Company's Proxy Statement for the 2015 annual meeting of shareholders under the caption "Information Regarding the Board of Directors and Its Committees" and is incorporated herein by reference.

The Company has adopted and posted on its website at www.movadogroup.com a Code of Business Conduct and Ethics that applies to all directors, officers and employees, including the Company's Chief Executive Officer, Chief Financial Officer and principal financial and accounting officers. The Company will post any amendments to the Code of Business Conduct and Ethics, and any waivers that are required to be disclosed by SEC regulations, on the Company's website.

Item 11. Executive Compensation

The information required by this item is included in the Company's Proxy Statement for the 2015 annual meeting of shareholders under the captions "Executive Compensation" and "Compensation of Directors" and is incorporated herein by reference.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

The information required by this item is included in the Company's Proxy Statement for the 2015 annual meeting of shareholders under the caption "Security Ownership of Certain Beneficial Owners and Management" and is incorporated herein by reference.

Item 13. Certain Relationships and Related Transactions and Director Independence

The information required by this item is included in the Company's Proxy Statement for the 2015 annual meeting of shareholders under the caption "Certain Relationships and Related Transactions" and is incorporated herein by reference.

Management's Annual Report on Internal Control Over Financial Reporting

The management of the Company is responsible for establishing and maintaining internal control over financial reporting, as such term is defined in Rule 13a-15(f) under the Exchange Act, for the Company. With the participation of the Chief Executive Officer and the Chief Financial Officer, the Company's management conducted an evaluation of the effectiveness of the Company's internal control over financial reporting based on the framework and criteria established in the Internal Control – Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Based on this evaluation, the Company's management has concluded that the Company's internal control over financial reporting was effective as of January 31, 2015.

Our internal control over financial reporting as of January 31, 2015 has been audited by PricewaterhouseCoopers LLP, an independent registered public accounting firm, as stated in their report which appears herein.

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Shareholders of Movado Group, Inc.:

In our opinion, the consolidated financial statements listed in the index appearing under item 15(a)1 present fairly, in all material respects, the financial position of Movado Group, Inc. and its subsidiaries (the "Company") at January 31, 2015 and January 31, 2014, and the results of their operations and their cash flows for each of the three years in the period ended January 31, 2015 in conformity with accounting principles generally accepted in the United States of America. In addition, in our opinion, the financial statement schedule listed in the index appearing under Item 15(a)(2) presents fairly, in all material respects, the information set forth therein when read in conjunction with the related consolidated financial statements. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of January 31, 2015, based on criteria established in Internal Control - Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for these financial statements and financial statement schedule, for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in Management's Annual Report on Internal Control Over Financial Reporting appearing in the accompanying index. Our responsibility is to express opinions on these financial statements, on the financial statement schedule, and on the Company's internal control over financial reporting based on our integrated audits. We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that

controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.
