Dated September 11, 2015      Registration Statement No. 333-203598

Company Presentation September, 2015

2 Disclaimer This presentation contains forward-looking statements and forward-looking information within the meaning of applicable securities laws. The use of any of the words “plans”, “expects”, or “does not expect”, “is expected”, “budget”, “scheduled”, “anticipates”, or “does not anticipate”, “continue”, “estimates”, “forecasts”, “objective”, “ongoing”, “m”, “project”, “should”, “believe”, “intends” or variations of such words and phrases or statements are intended to identify forward-looking information or statements. Forward-looking information is based on the opinions and estimates of management at the date the information is made, and is based on a number of assumptions and subject to a variety of risks and uncertainties and other factors that could cause actual events or results to differ materially from those projected in the forward-looking information. More particularly and without limitation, this presentation includes materials posted on the website of Pyxis Tankers Inc. (“Pyxis”) and contains forward-looking statements and information concerning the merger transaction (the “Merger”) by and among Pyxis, Maritime Technologies Corp., LookSmart Ltd. (“LookSmart”) and LookSmart Group, Inc. and the definitive agreement. The forward-looking statements and information are based on certain key expectations and assumptions made by LookSmart and Pyxis. Although LookSmart and Pyxis believe that the expectations and assumptions on which such forward-looking statements and information are based are reasonable, undue reliance should not be placed on the forward-looking statements and information because neither of them can give any assurance that it will prove to be correct. Since forward-looking statements and information address future events and conditions, by their very nature they involve inherent risks and uncertainties. There are risks also inherent in the nature of the transaction, including whether the completion of the transaction will ultimately occur, incorrect assessment of the value of the assets of Pyxis, and failure to obtain the required security holder, regulatory, third party and other approvals. Readers are cautioned that the foregoing list of factors is not exhaustive. There may be other factors that cause actions, events or results not to be anticipated, estimated or intended. The forward-looking statements and information contained in this presentation are made as of the date hereof. There can be no assurance that forward-looking information will prove to be accurate, as actual results and future events could differ materially from those anticipated in such information. Neither LookSmart nor Pyxis undertake any obligation to update publicly or revise any forward-looking statements or information, whether as a result of new information, future events or otherwise, except in accordance with applicable securities laws. The proposed merger transaction involving Pyxis and LookSmart will be submitted to LookSmart’s shareholders for their consideration. Pyxis and LookSmart have filed with the U.S. Securities and Exchange Commission (the “SEC”) a registration statement on Form F-4 containing a related preliminary proxy statement/prospectus with the SEC, which describes in detail, among other things, the Merger. In addition, each of Pyxis and LookSmart plan to file with the SEC other documents regarding the proposed Merger. This presentation is not intended as a substitute for the information contained in the registration statement and the related prospectus or the proxy statement. Investors are advised to read the preliminary proxy statement/prospectus in its entirety and to consult with their advisors regarding the Merger and the definitive proxy statement/prospectus when it becomes available, as well as other documents filed with the SEC because they contain important information. Shareholders may obtain a free copy of the preliminary proxy statement/prospectus, and will be able to obtain a free copy of the definitive proxy/prospectus when it becomes available, as well as other filings containing information about LookSmart and Pyxis, without charge at the SEC’s internet site (<http://www.sec.gov>). Copies of the definitive proxy statement/prospectus and the filings with the SEC that will be incorporated by reference in the definitive proxy statement/prospectus can also be obtained, when available, without charge, by directing a request to Pyxis Tankers Inc., 59 K. Karamanli Street, Maroussi 15125, Greece or to LookSmart Ltd., 50 California Street, 16th Floor, San Francisco, California 94108. If you have additional questions relating to the Merger you may also contact Antonios C. Backos, General Counsel of Pyxis at +30 210 638 0200. This presentation does not constitute an offer to sell or the solicitation of an offer to buy any securities covered by the preliminary proxy statement/prospectus, nor will there be any offer, solicitation or sale of these securities in any state or jurisdiction in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such state or jurisdiction. The information in this presentation has been prepared by Pyxis management, which believes that the information contained herein is reasonable. Where specifically referenced, certain statistical information and data contained in this presentation relating to the product tanker industry has been provided by Poten & Partners (“Poten”), is dated as of July 31, 2015 and is taken from Poten’s database and other sources. Poten has advised that: (i) some information in Poten’s database is derived from estimates or subjective

judgments; (ii) the information in the databases of other maritime data collection agencies may differ from the information in Poten's database; (iii) while Poten has taken reasonable care in the compilation of the statistical and graphical information and believes it to be accurate and correct, data compilation is subject to limited audit and validation procedures. Poten has not prepared, reviewed, provided information relating to or opined on any other portions of this presentation.

3 Company Highlights Solid Balance Sheet Excess balance sheet capacity to grow tonnage through acquisitions Moderate capitalization with low cost, long lived bank debt Experienced Management & Board Strong management team with over 70 years of combined shipping industry experience Founder has proven track record of investing at the right time in shipping cycles Proposed board to consist of prominent figures in maritime industry and/or with significant US capital markets experience Attractive Young Fleet including “eco”Vessels Young tanker fleet of 6 vessels on the water with weighted average age of 4.3 years Focus on medium range (“MR”) product tankers -operational flexibility and expected future enhanced earnings due to their “eco”features or modifications Potentially 1 or 2 additional MR’s to be delivered Reputable Customer Base & Diversified Chartering Strategy Long term, steady relationships with reputable customers worldwide Balanced operating strategy of time charter and spot market exposure Ability to obtain attractive longer term charters

**4 Merger Transaction Overview** On April 23, 2015, Pyxis Tankers Inc. (“Pyxis” or the “Company”) entered into definitive agreement involving a merger with LookSmart, Ltd. (“LookSmart”) (NASDAQ: LOOK)\*. Upon consummation of merger: LookSmart will have spun-off its assets and liabilities to a separate entity which will carry on the historical business of LookSmart. LookSmart will no longer be publicly traded on NASDAQ. LookSmart shareholders of record will receive their pro rata ownership in LookSmart’s spun-out entity. Pyxis will continue as the surviving holding company and become publicly traded on NASDAQ or NYSE (at Pyxis choice) with the trading symbol: PXS. **Make-Whole:** In the next 3 years, if Pyxis completes a common stock offering of at least \$5MM at a price lower than the value per share at merger closing, the LookSmart holders who still own their PXS shares will receive additional PXS shares for the difference between that value and the offering price; if no offering occurs and PXS is trading below that value at the end of 3 years, such legacy LookSmart holders have a “put” option on a pro-rata basis of up to \$2MM in cash from Pyxis. Each share of LookSmart held by holders of record of its common stock (post-Reverse Split) immediately prior to the merger will be cancelled and exchanged for a number of shares of Pyxis according to a conversion ratio based on the closing price of LookSmart’s stock. In addition, LookSmart also received a cash payment of \$600,000 upon execution of Merger Agreement. LookSmart shareholders will hold approximately 5.7% of Pyxis, while an affiliate of Pyxis’ CEO will own substantially all of remaining shares. \*Please see [https://www.sec.gov/Archives/edgar/data/1640043/000161577415002479/s101786\\_f4a.htm](https://www.sec.gov/Archives/edgar/data/1640043/000161577415002479/s101786_f4a.htm) for additional information on the merger transaction.

- Maritime supervises the commercial management of Northsea Alpha and Northsea Beta by North Sea Tankers BV, an unaffiliated 3<sup>rd</sup> party which receives €151/day/vessel
- Pyxis outsources the day-to-day technical management of all of its vessels to an unaffiliated 3<sup>rd</sup> party, International Tankers Management (“ITM”), an ISO certified manager
- ITM is paid \$425/day/vessel by Pyxis Quality, Cost Effective Ship Management Services

10 Strong Relationships Banks Customers Shipyards

11 PyxisGrowth Strategy Preserve Strong Safety Record & Commitment to Customer Service and Support Utilize Portfolio Approach for Commercial Employment Maintain High Quality Fleet of Modern Tankers Grow Fleet Opportunistically Maintain Financial Flexibility Meet charterer's preference for modern tankers, which offer more operating reliability and efficiency Focus on eco-efficient and eco-modified designed MR vessels which provide lower fuel consumption and reduced emissions Maintain the quality fleet through ITM's comprehensive planned and preventive maintenance programs Focus on acquisition of IMO II and III class product tankers of five years of age or less built in Tier 1 Asian shipyards Potential acquisition opportunity of one or two MR tankers owned/controlled by affiliates of Mr. Valentis Employ vessels under mix of time charters (with and without profit share), bareboat charters, pooling arrangements and on the spot market Diversify charters by customer and staggered duration Maintain high standards in order to provide customers with high level of safety, customer service and support Expand fleet by targeting balanced capital structure of debt and equity Maintain commercial banking and expand public capital markets relationships, including opening of NY representative office in near future

Market Overview

13 Products Market Overview Ocean transportation of petroleum and refined products (known as “CPP” or “clean products”) including gasoline, diesel oil, gasoil, fuel oil and jet fuel as well as certain bulk liquids such as edible oils and chemicals Transported globally via product tankers such as MR, LR1 and LR2 vessels • International Maritime Organization rated “IMO-II and III” specification vessels carry easy chemicals, vegetable oils and bio-fuels » MR or Medium Range tankers are typically 35,000 –59,999 deadweight tons(“dwt”) » LR1 or Long-Range 1 tankers are typically 60,000 –79,999 dwt » LR2 or Long-Range 2 tankers are typically 80,000 –119,999 dwt • Clean products represented 90%, 89% and 89% of total cargoes transported on product tankers in 2012, 2013 and 2014, respectively (1) (1) Source: Poten & Partners. These are estimates based on reported spot market fixtures using MR tankers as a proxy for all product tankers

14 Product Tanker Industry –Demand Product tanker demand has been increasing • The dislocation of refineries away from points of consumption resulting in greater ton-mile demand • Refined product trade is much more complicated than crude oil trade due to refinery capacity and technology, government regulations of fuel standards and arbitrage opportunities • Recent lower crude/feedstock prices generate incremental demand for broad range of CPP Growth in net refining capacity will drive the demand for product tankers • U.S. has become a major supplier of gasoil/diesel and gasoline in the Atlantic Basin market • Emerging markets in South America and Africa, which have little to no refining capacity, require CPP to fuel their economies • The closure of inefficient European refineries, falling European domestic demand and stricter fuel and environmental standards are creating a strong import and export market for various clean products • Global adoption of standardized CPP specifications are increasing trading opportunities • Refining capacity net of shutdowns will increase by 945 thousand barrels per day or “kb/d” in 2015, 1,511 kb/d in 2016 and 1,289 kb/d in 2017 (1) (1) Source: International Energy Agency –Medium-Term Oil Market Report 2015

15 Product Tanker Industry –Supply Global MR fleet stood at 1,698 tankers with aggregate 77.5 million dwt (1) MR orderbook has fallen from high of ~58% in 2008 to current level of ~12.5% of the existing fleet (1) Shipbuilding capacity booked into 2017 • Current MR newbuild construction prices approximate 15 year mean price • Worldwide MR fleet is expected to grow on average 5.7%/year between 2015 and 2017, exclusive of scrapping of older vessels and delays in new vessel deliveries (1) • Access to cost-effective capital still important factor in funding newbuild deliveries Level of scrapping is also affecting future supply • 26 MR tankers were removed from the global fleet in 2014, which represented 1.6% of MR tanker fleet at that year end (1) • Approximately 119 MRs are expected to be scrapped between 2015 and 2017 based on age profile (2) Positive Outlook For Product Tanker Fundamentals (1) Source: Poten & Partners (as of July 31, 2015) (2) Assumes vessels will be scrapped at age 20
