INFORMATION CONCERNING FORWARD-LOOKING STATEMENTS

Certain statements contained in this report, including, without limitation, statements as to management expectations and beliefs presented in Part I, Item 2. "Management's Discussion and Analysis of Financial Condition and Results of Operations," Part I, Item 3. "Quantitative and Qualitative Disclosures About Market Risk," Part II, Item I. "Legal Proceedings" and in the notes to the financial statements are forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, Section 21E of the Exchange Act, and the Private Securities Litigation Reform Act of 1995. Forward-looking statements can also be identified by the use of forward-looking terminology such as "anticipate," "estimate," "may," "intend," "expect," "believe," "will" "plan," "should," or "continue" or comparable terms and are made based upon management's current expectations, assumptions and beliefs as of this date concerning future developments and their potential effect on us. There can be no assurance that future developments will be in accordance with management's expectations, assumptions or beliefs, or that the effect of future developments on us will be those anticipated by management.

We caution readers that the expectations, assumptions and beliefs that form the basis for forward-looking statements regarding customer growth, customer usage, qualifications for ITCs, PTCs and SRECs, financial condition, results of operations, cash flows, capital requirements, future capital expenditures, market risk, effective tax rate and other matters for fiscal 2016 and thereafter include many factors that are beyond our ability to control or estimate precisely, such as estimates of future market conditions, the behavior of other market participants and changes in the debt and equity capital markets. The factors that could cause actual results to differ materially from our expectations, assumptions and beliefs include, but are not limited to, those discussed in Item 1A. Risk Factors of our Annual Report on Form 10-K for the fiscal year ended September 30, 2015, as well as the following:

- weather and economic conditions;
- demographic changes in the NJNG service territory and their effect on NJNG's customer growth;
- volatility of natural gas and other commodity prices and their impact on NJNG customer usage, NJNG's BGSS incentive programs, NJRES operations and on our risk management efforts;
- changes in rating agency requirements and/or credit ratings and their effect on availability and cost of capital to us;
- the impact of volatility in the credit markets on our access to capital;
- the ability to comply with debt covenants;
- the impact to the asset values and resulting higher costs and funding obligations of our pension and postemployment benefit plans as a result of potential downturns in the financial markets, lower discount rates, revised actuarial assumptions or impacts associated with the Patient Protection and Affordable Care Act;
- risks associated with hedging activities and use of derivatives contracts;
- commercial and wholesale credit risks, including the availability of creditworthy customers and counterparties, and liquidity in the wholesale energy trading market;
- regulatory approval of NJNG's planned infrastructure programs;
- the ability to obtain governmental and regulatory approvals, land-use rights, electric grid connection (in the case of distributed power projects) and/or financing for the construction, development and operation of our unregulated energy investments and NJNG's infrastructure projects in a timely manner;
- risks associated with the management of our joint ventures and partnerships;
- risks associated with our investments in distributed power projects, including the availability of regulatory and tax incentives, the availability of viable projects, our eligibility for ITCs and PTCs, the future market for SRECs, electricity prices, and operational risks related to projects in service;
- timing of qualifying for ITCs and PTCs due to delays or failures to complete planned solar and wind energy projects and the resulting effect on our effective tax rate and earnings;
- the level and rate at which NJNG's costs are incurred and the extent to which they are allowed to be recovered from customers through the regulatory process;

- access to adequate supplies of natural gas and dependence on third-party storage and transportation facilities for natural gas supply;
- operating risks incidental to handling, storing, transporting and providing customers with natural gas;
- risks related to our employee workforce;
- the regulatory and pricing policies of federal and state regulatory agencies;
- the costs of compliance with present and future environmental laws, including potential climate change-related legislation;
- risks related to changes in accounting standards;
- the impact of a disallowance of recovery of environmental-related expenditures and other regulatory changes;
- environmental-related and other litigation and other uncertainties;
- risks related to cyber-attack or failure of information technology systems; and
- the impact of natural disasters, terrorist activities, and other extreme events could adversely affect our operations, financial conditions and results of operations.

While we periodically reassess material trends and uncertainties affecting our results of operations and financial condition in connection with its preparation of management's discussion and analysis of results of operations and financial condition contained in our Quarterly and Annual Reports on Form 10-Q and Form 10-K, respectively, we do not, by including this statement, assume any obligation to review or revise any particular forward-looking statement referenced herein in light of future events.

New Jersey Resources Corporation
Part I

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

1. NATURE OF THE BUSINESS

New Jersey Resources Corporation provides regulated gas distribution services and operates certain unregulated businesses primarily through the following subsidiaries:

New Jersey Natural Gas Company provides natural gas utility service to approximately 519,100 retail customers in central and northern New Jersey and is subject to rate regulation by the BPU. NJNG comprises the Natural Gas Distribution segment;

NJR Energy Services Company comprises the Energy Services segment that maintains and transacts around a portfolio of natural gas storage and transportation capacity contracts and provides physical wholesale energy and energy management services;

NJR Clean Energy Ventures Corporation, the Company's distributed power subsidiary, comprises the Clean Energy Ventures segment and consists of the Company's capital investments in distributed power projects, including commercial and residential solar projects and onshore wind investments;

NJR Midstream Holdings Corporation invests in energy-related ventures through its subsidiaries, NJR Steckman Ridge Storage Company, which holds the Company's 50 percent combined interest in Steckman Ridge, and NJR Pipeline Company, which holds the Company's 20 percent ownership interest in PennEast and 1.84 million Common Units of Dominion Midstream Partners, L.P. The investments in Steckman Ridge, PennEast and DM comprise the Midstream segment; and

NJR Retail Holdings Corporation has two principal subsidiaries, NJR Home Services Company, which provides heating, central air conditioning, standby generators, solar and other indoor and outdoor comfort products to residential homes and businesses throughout New Jersey, and Commercial Realty & Resources Corporation, which owns commercial real estate. NJR Retail Holdings Corporation and NJR Energy Corporation are included in Home Services and Other operations.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The accompanying Unaudited Condensed Consolidated Financial Statements have been prepared by NJR in accordance with the rules and regulations of the U.S. Securities and Exchange Commission and Accounting Standards Generally Accepted in the United States of America. The September 30, 2015, Balance Sheet data is derived from the audited financial statements of the Company. These Unaudited Condensed Consolidated Financial Statements should be read in conjunction with the consolidated financial statements and the notes thereto included in NJR's 2015 Annual Report on Form 10-K.

The Unaudited Condensed Consolidated Financial Statements include the accounts of NJR and its subsidiaries. In the opinion of management, the accompanying Unaudited Condensed Consolidated Financial Statements reflect all adjustments necessary, for a fair presentation of the results of the interim periods presented. These adjustments are of a normal and recurring nature. Because of the seasonal nature of NJR's utility and wholesale energy services operations, in addition to other factors, the financial results for the interim periods presented are not indicative of the results that are to be expected for the fiscal year ending September 30, 2016. Intercompany transactions and accounts have been eliminated.

Gas in Storage

The following table summarizes gas in storage, at average cost by company as of:

	March 31, 2016		September 30, 2015	
(\$ in thousands)	Gas in Storage	Bcf	Gas in Storage	Bcf
NJRES	\$89,514	52.3	\$93,696	44.6
NJNG	27,976	9.3	70,209	21.4
Total	\$117,490	61.6	\$163,905	66.0

Sales Tax Accounting

Sales tax, that is collected from customers and presented in both operating revenues and operating expenses on the Unaudited Condensed Consolidated Statements of Operations, was \$20.7 million and \$34 million during the six months ended March 31, 2016 and 2015, respectively.

New Jersey Resources Corporation
Part I

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Continued)

Available for Sale Securities

Included in available for sale securities on the Unaudited Condensed Consolidated Balance Sheets are investments in two publicly traded energy companies. Total unrealized gains associated with these investments are included as a part of accumulated other comprehensive income, a component of common stock equity. Reclassifications of realized gains out of other comprehensive income into income are determined based on average cost.

The Company's available for sale securities had a fair value of \$73.4 million and \$59.5 million as of March 31, 2016 and September 30, 2015, respectively. Total unrealized gains associated with these equity securities were \$24.8 million, \$14.6 million after tax, and \$10.8 million, \$6.4 million after tax, as of March 31, 2016 and September 30, 2015, respectively.

Customer Accounts Receivable

Customer accounts receivable include outstanding billings from the following subsidiaries as of:

(Thousands)	March 31, 2016	September 30, 2015

Total	\$148,822 100%	\$155,273 100%

⁽¹⁾ Does not include unbilled revenues of \$27.1 million and \$6.4 million as of March 31, 2016 and September 30, 2015, respectively.

Loan Receivable

NJNG provides loans, with terms ranging from two to 10 years, to customers that elect to purchase and install certain energy efficient equipment in accordance with its BPU-approved SAVEGREEN program. The loans are recognized at net present value on the Unaudited Condensed Consolidated Balance Sheets. The Company has recorded \$7.5 million and \$6.2 million in other current assets and \$40.2 million and \$36.2 million in other noncurrent assets as of March 31, 2016 and September 30, 2015, respectively, on the Unaudited Condensed Consolidated Balance Sheets, related to the loans.

NJR's policy is to establish an allowance for doubtful accounts when loan balances are in arrears for more than 60 days. As of March 31, 2016 and September 30, 2015, there was no allowance for doubtful accounts established for the SAVEGREEN loans.

Recent Updates to the Accounting Standards Codification

Revenue

In May 2014, the FASB issued ASU No. 2014-09, and added Topic 606, Revenue from Contracts with Customers, to the ASC. ASC 606 supersedes ASC 605, Revenue Recognition, as well as most industry-specific guidance, and

prescribes a single, comprehensive revenue recognition model designed to improve financial reporting comparability across entities, industries, jurisdictions and capital markets. In August 2015, the FASB issued ASU No. 2015-14, which defers the implementation of the new guidance for one year. The new guidance will become effective for fiscal years, and interim periods within those years, beginning after December 15, 2017. Upon adoption, the guidance will be applied on a full or modified retrospective basis. The Company is currently evaluating the provisions of ASC 606 to understand the impact, if any, to its financial position, results of operations and cash flows upon adoption.

Stock Compensation

In June 2014, the FASB issued ASU No. 2014-12, an amendment to ASC 718, Compensation - Stock Compensation, which clarifies the accounting for performance awards when the terms of the award provide that a performance target could be achieved after the requisite service period. The new guidance will become effective for fiscal years, and interim periods within those years, beginning after December 15, 2015. Upon adoption, the amendment will be applied on a prospective or retrospective basis. The Company does not expect this standard to have any impact to its financial position, results of operations and cash flows upon adoption.

New Jersey Resources Corporation
Part I

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Continued)

In March 2016, the FASB issued ASU 2016-9, an amendment to ASC 718, Compensation - Stock Compensation, which simplifies several aspects of the accounting for employee share-based payment transactions including the accounting for income taxes, forfeitures and statutory tax withholding requirements. The update also addresses the related classification of transactions within the statement of cash flows. The guidance is effective for fiscal years, and interim periods within those years, beginning after December 15, 2016 with early adoption permitted. Upon adoption, the amendments will be applied on a prospective or retrospective basis. The Company is currently evaluating the amendment to understand the impact on its financial position, results of operations and cash flows upon adoption.

Consolidation

In February 2015, the FASB issued ASU No. 2015-02, an amendment to ASC 810, Consolidation, which changes the consolidation analysis required under GAAP and reevaluates whether limited partnerships and similar entities must be consolidated. The new guidance will become effective for fiscal years, and interim periods within those years, beginning after December 15, 2015. Upon adoption, the amendment will be applied on a full or modified retrospective basis. The Company is currently evaluating the provisions of ASU No. 2015-02 to understand the impact, if any, on its financial position, results of operations and cash flows upon adoption.

Interest

In April 2015, the FASB issued ASU No. 2015-03, an amendment to ASC 835, Interest - Imputation of Interest, which simplifies the presentation of debt issuance costs by requiring them to be presented in the balance sheet as a deduction from the carrying amount of the liability. The amendments do not affect the recognition and measurement guidance for debt issuance costs. In August 2015, the FASB issued ASU No. 2015-15, which clarified that the amendments contained within ASU No. 2015-03 do not require companies to modify their accounting for costs incurred in obtaining revolving credit facilities. The amended guidance becomes effective for fiscal years, and interim periods within those years, beginning after December 15, 2015. Upon adoption, the amendment will be applied on a retrospective basis. The Company does not expect this standard to have a material impact to its financial position, results of operations or cash flows upon adoption.

Intangibles

In April 2015, the FASB issued ASU No. 2015-05, an amendment to ASC 350, Intangibles - Goodwill and Other - Internal-Use Software, which clarifies the accounting for fees in a cloud computing arrangement. The amendments provide guidance on how an entity should evaluate the accounting for fees paid in a cloud computing arrangement to determine whether an arrangement includes the sale or license of software. The amended guidance becomes effective for fiscal years, and interim periods within those years, beginning after December 15, 2015. Upon adoption, the amendment can be applied on a prospective or retrospective basis. The Company plans to adopt the guidance on a prospective basis and does not expect this standard to have a material impact to its financial position, results of operations or cash flows upon adoption.

Inventory

In July 2015, the FASB issued ASU No. 2015-11, an amendment to ASC 330, Inventory, which requires entities to measure most inventory "at the lower of cost and net realizable value," thereby simplifying the current guidance under

which an entity must measure inventory at the lower of cost or market. The guidance is effective for fiscal years, and interim periods within those years, beginning after December 15, 2016. Upon adoption, the amendments will be applied on a prospective basis. The Company is currently evaluating the amendment to understand the impact on its financial position, results of operations and cash flows upon adoption.

Income Taxes

In November 2015, the FASB issued ASU 2015-17, an amendment to ASC 740, Income Taxes, to simplify the balance sheet presentation of deferred income taxes. The update requires entities to present all deferred tax assets and liabilities as noncurrent. The Company elected to early adopt the amended guidance effective October 1, 2015, and applied the new provisions retrospectively.

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Continued)

Accordingly, the following amounts on the Unaudited Condensed Consolidated Balance Sheets, as of September 30, 2015, have been adjusted:

(Thousands)	As Previously Reported	Effect of Change	As Adjusted
Assets			
Deferred taxes (current)	\$56,296	\$(56,296)	\$—
Total current assets	\$544,511	\$(56,296)	\$488,215
Other noncurrent assets	\$60,300	\$1,615	\$61,915
Total noncurrent assets	\$666,266	\$1,615	\$667,881
Total assets	\$3,339,038	\$(54,681)	\$3,284,357
Capitalization and Liabilities			
Deferred income taxes	\$499,616	\$(54,681)	\$444,935
Total noncurrent liabilities	\$952,387	\$(54,681)	\$897,706
Total capitalization and liabilities	\$3,339,038	\$(54,681)	\$3,284,357

There was no additional impact to the Unaudited Condensed Consolidated Statements of Operations or the Unaudited Condensed Consolidated Statements of Cash Flows.

Financial Instruments

In January 2016, the FASB issued ASU 2016-1, an amendment to ASC 825, Financial Instruments, to address certain aspects of the recognition, measurement, presentation and disclosure of financial instruments. The standard affects investments in equity securities that do not result in consolidation and are not accounted for under the equity method and the presentation of certain fair value changes for financial liabilities measured at fair value. It also simplifies the impairment assessment of equity investments without a readily determinable fair value by requiring a qualitative assessment. The guidance is effective for fiscal years, and interim periods within those years, beginning after December 15, 2017. Upon adoption, the amendments will be applied on a modified-retrospective basis. The Company has evaluated the amendments and noted that, upon adoption, subsequent changes to the fair value of the Company's available for sale securities will be recorded in the statement of operations as opposed to other comprehensive income. The Company does not expect any other material impacts to its financial position, results of operations or cash flows upon adoption.

Leases

In February 2016, the FASB issued ASU 2016-2, an amendment to ASC 842, Leases, which provides for a comprehensive overhaul of the lease accounting model and changes the definition of a lease within the accounting literature. Under the new standard, all leases with a term greater than one year will be recorded on the balance sheet. Amortization of the related asset will be accounted for using one of two approaches prescribed by the guidance. Additional disclosures will be required to allow the user to assess the amount, timing and uncertainty of cash flows arising from leasing activities. A modified retrospective transition approach is required for leases existing at the time of adoption. The guidance is effective for fiscal years, and interim periods within those years, beginning after December 15, 2018 with early adoption permitted. The Company is currently evaluating the amendments to understand the impact on its financial position, results of operations and cash flows upon adoption.

3. REGULATION

NJNG is subject to cost-based regulation, therefore, it is permitted to recover authorized operating expenses and earn a reasonable return on its utility investment based on the BPU's approval. The impact of the ratemaking process and decisions authorized by the BPU allows NJNG to capitalize or defer certain costs that are expected to be recovered from its customers as regulatory assets and to recognize certain obligations representing amounts that are probable future expenditures as regulatory liabilities in accordance with accounting guidance applicable to regulated operations.

NJNG's recovery of costs is facilitated through its base tariff rates, BGSS and other regulatory tariff riders. As recovery of regulatory assets is subject to BPU approval, if there are any changes in regulatory positions that indicate recovery is not probable, the related cost would be charged to income in the period of such determination.

Regulatory filings and/or actions that occurred during the current fiscal year include the following:

On October 15, 2015, the BPU approved a base rate increase related to NJ RISE allowing NJNG to recover costs through July 31, 2015, resulting in a .07 percent increase to the average residential heat customer's bill, effective November 1, 2015.

On October 15, 2015, the BPU issued an order approving the continuation of the BGSS Incentive Programs with modification to the storage incentive program, beginning with the 2015 storage injection period, and termination of the FRM Program, effective November 1, 2015.

On October 27, 2015, NJNG notified the BPU that bill credits to residential and small commercial customers would be issued from November 2015 through February 2016. A total of \$61.6 million in bill credits were issued during that

period.

On November 13, 2015, NJNG filed a base rate petition with the BPU to increase its base tariff rates in the amount of \$147.6 million. On May 4, 2016, NJNG supplemented its base rate case testimony supporting its November 2015 petition, which amended the accounting treatment and noted that the SRL project would not be completed by December 31, 2016. In addition, the Company seeks to modify the rate treatment to include the September 30, 2016 balance of project spending and rate adjustments on a quarterly basis until the project is complete.

On December 24, 2015, NJNG filed an SBC petition with the BPU to increase the RA factor, to decrease the NJCEP factor and to request approval of its remediation expenses incurred through June 30, 2015, resulting in an overall decrease of .8 percent to the average residential heat customer's bill.

12

New Jersey Resources Corporation

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Continued)

On January 27, 2016, the BPU approved NJNG's July 2015 petition to maintain its existing SAVEGREEN recovery rate. On April 15, 2016, NJNG filed a petition with the BPU to extend its current program, which was set to expire on July 31, 2017, to December 31, 2018.

- On January 27, 2016, the BPU approved NJNG's proposed SRL pipeline installation, operation and route selection, as modified by NJNG, including specific requirements regarding permitting, safety and integrity assessment. On March 18, 2016, the BPU approved the application for the SRL to be exempt from municipal land use ordinances.

On February 24, 2016, the BPU approved on a final basis NJNG's June 2015 BGSS/CIP filing which continues its existing BGSS rate and adjusted its CIP rates resulting in a .08 percent increase to the average residential heat customer's bill effective October 1, 2015.

4. DERIVATIVE INSTRUMENTS

The Company is subject to commodity price risk due to fluctuations in the market price of natural gas, SRECs, and electricity. To manage this risk, the Company enters into a variety of derivative instruments including, but not limited to, futures contracts, physical forward contracts, financial options and swaps to economically hedge the commodity price risk associated with its existing and anticipated commitments to purchase and sell natural gas, SRECs, and electricity. In addition, the Company may utilize foreign currency derivatives to hedge Canadian dollar denominated gas purchases and/or sales. Therefore, the Company's primary underlying risks include commodity prices, interest rates and foreign currency. These contracts, with a few exceptions as described below, are accounted for as derivatives. Accordingly, all of the financial and certain of the Company's physical derivative instruments are recorded at fair value on the Unaudited Condensed Consolidated Balance Sheets. For a more detailed discussion of the Company's fair value measurement policies and level disclosures associated with NJR's derivative instruments, see Note 5. Fair Value.

NJRES

Since NJRES chooses not to designate its financial commodity and physical forward commodity derivatives as accounting hedges or to elect NPNS, changes in the fair value of these derivatives are recorded as a component of gas purchases or operating revenues, as appropriate for NJRES, on the Unaudited Condensed Consolidated Statements of Operations as unrealized gains or (losses). For NJRES at settlement, realized gains and (losses) on all financial derivative instruments are recognized as a component of gas purchases and realized gains and (losses) on all physical derivatives follow the presentation of the related unrealized gains and (losses) as a component of either gas purchases or operating revenues.

NJRES also enters into natural gas transactions in Canada and, consequently, is exposed to fluctuations in the value of Canadian currency relative to the U.S. dollar. NJRES may utilize foreign currency derivatives to lock in the currency translation rate associated with natural gas transactions denominated in Canadian currency. The derivatives may include currency forwards, futures, or swaps and are accounted for as derivatives. These derivatives may be used to hedge future forecasted cash payments associated with transportation and storage contracts along with purchases of natural gas. For transactions occurring on or before December 31, 2015, NJRES designates its foreign exchange contracts as cash flow hedges, and the effective portion of the hedges are recorded in OCI. Effective January 1, 2016,

on a prospective basis, the Company has elected not to designate its foreign currency derivatives as accounting hedges. Accordingly, changes in the fair value of foreign exchange contracts entered into from January 1, 2016 on, are recognized in gas purchases on the Unaudited Condensed Consolidated Statements of Operations.

As a result of NJRES entering into transactions to borrow gas, commonly referred to as “park and loans,” an embedded derivative is created relating to differences between the fair value of the amount borrowed and the fair value of the amount that will ultimately be repaid, based on changes in the forward price for natural gas prices at the borrowed location over the contract term. This embedded derivative is accounted for as a forward sale in the month in which the repayment of the borrowed gas is expected to occur, and is considered a derivative transaction that is recorded at fair value on the Unaudited Condensed Consolidated Balance Sheets, with changes in value recognized in current period earnings.

Expected production of SRECs is hedged through forward and futures contracts. The contracts require the Company to physically deliver the SRECs upon settlement. For transactions occurring on or before December 31, 2015, the Company elects NPNS accounting treatment on SREC forward and futures contracts. Effective January 1, 2016, on a prospective basis, NJRES no longer elects NPNS accounting treatment on SREC contracts and recognizes changes in the fair value of these derivatives as a component of operating revenues. Upon settlement of the contract, the related revenue is recognized when the SREC certificate is transferred to the counterparty. NPNS is a contract-by-contract election and, where it makes sense to do so, we can and may elect certain contracts to be normal.

New Jersey Resources Corporation
Part I

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Continued)

NJNG

Changes in fair value of NJNG's financial commodity derivatives are recorded as a component of regulatory assets or liabilities on the Unaudited Condensed Consolidated Balance Sheets. The Company elects NPNS accounting treatment on all physical commodity contracts that NJNG entered into on or before December 31, 2015, and accounts for these contracts on an accrual basis. Accordingly, physical natural gas purchases are recognized in regulatory assets or liabilities on the Unaudited Condensed Consolidated Balance Sheets when the contract settles and the natural gas is delivered. The average cost of natural gas is amortized in current period earnings based on the current BPU BGSS factor and therm sales. Effective January 1, 2016, on a prospective basis, NJNG no longer elects NPNS accounting treatment on all of its physical commodity contracts. However, since NPNS is a contract-by-contract election, where it makes sense to do so, we can and may elect certain contracts to be normal. Because NJNG recovers these amounts through future BGSS rates as increases or decreases to the cost of natural gas in NJNG's tariff for gas service, the changes in fair value of these contracts are deferred as a component of regulatory assets or liabilities on the Unaudited Condensed Consolidated Balance Sheets.

In an April 2014 BPU Order, NJNG received regulatory approval to enter into interest rate risk management transactions related to long-term debt securities. On June 1, 2015, NJNG entered into a treasury lock transaction to fix a benchmark treasury rate of 3.26 percent associated with a forecasted \$125 million debt issuance expected in May 2018. This forecasted debt issuance coincides with the maturity of NJNG's existing \$125 million, 5.6 percent notes due May 15, 2018. The change in fair value of NJNG's treasury lock agreement is recorded as a component of regulatory assets or liabilities on the Unaudited Condensed Consolidated Balance Sheets since NJNG believes that the market value upon settlement will be reflected in future rates. Upon settlement, any gain or loss will be amortized in earnings over the life of the future debt issuance.

Fair Value of Derivatives

The following table reflects the fair value of NJR's derivative assets and liabilities recognized on the Unaudited Condensed Consolidated Balance Sheets as of:

Offsetting of Derivatives

NJR transacts under master netting arrangements or equivalent agreements that allow it to offset derivative assets and liabilities with the same counterparty. However, NJR's policy is to present its derivative assets and liabilities on a gross basis on the Unaudited Condensed Consolidated Balance Sheets. The following table summarizes the reported gross amounts, the amounts that NJR has the right to offset but elects not to, financial collateral, as well as the net amounts NJR could present on the Unaudited Condensed Consolidated Balance Sheets but elects not to.

(Thousands)	Amounts Presented in Balance Sheets ⁽¹⁾	Offsetting Derivative Instruments ⁽²⁾	Financial Collateral Received/Pledged ⁽³⁾	Net Amounts ⁽⁴⁾

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Continued)

NJRES utilizes financial derivatives to economically hedge the gross margin associated with the purchase of physical gas for injection into storage and the subsequent sale of physical gas at a later date. The gains or (losses) on the financial transactions that are economic hedges of the cost of the purchased gas are recognized prior to the gains or (losses) on the physical transaction, which are recognized in earnings when the natural gas is sold. Therefore, mismatches between the timing of the recognition of realized gains or (losses) on the financial derivative instruments and gains or (losses) associated with the actual sale of the natural gas that is being economically hedged along with fair value changes in derivative instruments creates volatility in the results of NJRES, although the Company's intended economic results relating to the entire transaction are unaffected.

The following table reflects the effect of derivative instruments on the Unaudited Condensed Consolidated Statements of Operations as of:

(Thousands)	Location of gain (loss) recognized in income on derivatives	Amount of gain (loss) recognized in income on derivatives			
		Three Months Ended		Six Months Ended	
		March 31, 2016	2015	March 31, 2016	2015
Derivatives not designated as hedging instruments:					
NJRES:					
Physical commodity contracts	Operating revenues	\$9,128	\$(1,144)	\$21,002	\$14,947
Physical commodity contracts	Gas purchases	(5,583)	10,063	(26,820)	(9,793)
Financial commodity contracts	Gas purchases	21,820	(27,204)	63,096	90,517
Total unrealized and realized gains (losses)		\$25,365	\$(18,285)	\$57,278	\$95,671

The table above does not include (losses) gains associated with NJNG's financial derivatives of \$(5.2) million and \$(5.5) million for the three months ended March 31, 2016 and 2015, respectively, and \$(10.8) million and \$(24.5) million for the six months ended March 31, 2016 and 2015, respectively, NJNG's physical derivatives of \$(14.5) million for both the three and six months ended March 31, 2016, and the treasury rate lock of \$(11.1) million and \$(8.7) million for the three and six months ended March 31, 2016. NJNG's derivative contracts are part of the Company's risk management activities that relate to its natural gas purchases, BGSS incentive programs and debt financing. These transactions are entered into pursuant to regulatory guidance and, at settlement, the resulting gains and/or losses are payable to and/or recoverable from customers. Any changes in the value of NJNG's financial derivatives are deferred in regulatory assets or liabilities resulting in no impact to earnings.

NJRES previously designated its foreign exchange contracts as cash flow hedges, therefore, changes in fair value of the effective portion of the hedges are recorded in OCI and, upon settlement of the contracts, realized gains and (losses) are reclassified from OCI to gas purchases on the Unaudited Condensed Consolidated Statements of Operations. The following table reflects the effect of derivative instruments designated as cash flow hedges on OCI as of March 31:

(Thousands)	Amount of Gain or (Loss)	Amount of Gain or (Loss)	Amount of Gain or (Loss)

	Recognized in OCI on Derivatives (Effective Portion)	Reclassified from OCI into Income (Effective Portion)	Recognized on Derivative (Ineffective Portion and Amount Excluded from Effectiveness Testing)

			\$	-\$ —

NJNG and NJRES had the following outstanding long (short) derivatives as of:

	Volume (Bcf)	
	March 31, 2016	September 30, 2015
NJNG Futures ⁽¹⁾	15.2	25.8
Physical	5.9	—
NJRES Futures	(88.6)	(91.1)
Options	3.6	1.2
Physical ⁽²⁾	137.4	48.2

(1) Not included is the notional amount of \$125 million related to NJNG's treasury lock agreement.

(2) Not included are 48,000 SRECs that are open as of March 31, 2016.

Broker Margin

Generally, exchange-traded futures contracts require posted collateral, referred to as margin, usually in the form of cash. The amount of margin required is comprised of a fixed initial amount based on exchange requirements and a variable amount based on a daily mark-to-market. The Company maintains separate broker margin accounts for NJNG and NJRES. The balances by company, are as follows:

(Thousands)	Balance Sheet Location	March 31, September 30,	
		2016	2015
NJNG	Broker margin - Current assets	\$ 20,235	\$ 12,990
NJRES	Broker margin - Current assets	\$ 13,921	\$ —
	Broker margin - Current (liabilities)	\$(12,798)	\$(4,103)

Wholesale Credit Risk

NJNG and NJRES are exposed to credit risk as a result of their wholesale marketing activities. As a result of the inherent volatility in the prices of natural gas commodities, derivatives, SRECs and RECs, the market value of contractual positions with individual counterparties could exceed established credit limits or collateral provided by those counterparties. If a counterparty failed to perform the obligations under its contract (e.g., failed to deliver or pay for natural gas, SRECs and RECs), then the Company could sustain a loss.

NJR monitors and manages the credit risk of its wholesale marketing operations through credit policies and procedures that management believes reduce overall credit risk. These policies include a review and evaluation of current and prospective counterparties' financial statements and/or credit ratings, daily monitoring of counterparties' credit limits and exposure, daily communication with traders regarding credit status and the use of credit mitigation measures, such as collateral requirements and netting agreements. Examples of collateral include letters of credit and cash received for either prepayment or margin deposit. Collateral may be requested due to NJR's election not to extend credit or because exposure exceeds defined thresholds. Most of NJR's wholesale marketing contracts contain standard netting provisions. These contracts include those governed by ISDA and the NAESB. The netting provisions refer to payment netting, whereby receivables and payables with the same counterparty are offset and the resulting net amount is paid to the party to which it is due.

New Jersey Resources Corporation
Part I

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Continued)

Internally-rated exposure applies to counterparties that are not rated by S&P or Moody's. In these cases, the Company's or guarantor's financial statements are reviewed, and similar methodologies and ratios used by S&P and/or Moody's are applied to arrive at a substitute rating. Gross credit exposure is defined as the unrealized fair value of physical and financial derivative commodity contracts, plus any outstanding wholesale receivable for the value of natural gas delivered and/or financial derivative commodity contract that has settled for which payment has not yet been received.

The following is a summary of gross credit exposures grouped by investment and noninvestment grade counterparties, as of March 31, 2016. The amounts presented below have not been reduced by any collateral received or netting and exclude accounts receivable for NJNG retail natural gas sales and services and NJRCEV residential solar installations.

(Thousands)	Gross Credit Exposure
Investment grade	\$84,613
Noninvestment grade	8,407
Internally rated investment grade	11,537
Internally rated noninvestment grade	12,974
Total	\$ 117,531

Conversely, certain of NJNG's and NJRES' derivative instruments are linked to agreements containing provisions that would require cash collateral payments from the Company if certain events occur. These provisions vary based upon the terms in individual counterparty agreements and can result in cash payments if NJNG's credit rating were to fall below its current level. NJNG's credit rating, with respect to S&P, reflects the overall corporate credit profile of NJR. Specifically, most, but not all, of these additional payments will be triggered if NJNG's debt is downgraded by the major credit agencies, regardless of investment grade status. In addition, some of these agreements include threshold amounts that would result in additional collateral payments if the values of derivative liabilities were to exceed the maximum values provided for in relevant counterparty agreements. Other provisions include payment features that are not specifically linked to ratings, but are based on certain financial metrics.

Collateral amounts associated with any of these conditions are determined based on a sliding scale and are contingent upon the degree to which the Company's credit rating and/or financial metrics deteriorate, and the extent to which liability amounts exceed applicable threshold limits. The aggregate fair value of all derivative instruments with credit-risk-related contingent features that were in a liability position on March 31, 2016 and September 30, 2015, was \$13 million and \$4.2 million, respectively, for which the Company had not posted collateral. If all thresholds related to the credit-risk-related contingent features underlying these agreements had been invoked on March 31, 2016 and September 30, 2015, the Company would have been required to post an additional \$13 million and \$4.2 million, respectively, to its counterparties. These amounts differ from the respective net derivative liabilities reflected on the Unaudited Condensed Consolidated Balance Sheets because the agreements also include clauses, commonly known as "Rights of Offset," that would permit the Company to offset its derivative assets against its derivative liabilities for determining additional collateral to be posted, as previously discussed.

5. FAIR VALUE

Fair Value of Assets and Liabilities

The fair value of cash and temporary investments, accounts receivable, current loan receivables, accounts payable, commercial paper and borrowings under revolving credit facilities are estimated to equal their carrying amounts due to the short maturity of those instruments. Non-current loan receivables are recorded based on what the Company expects to receive, which approximates fair value. The Company regularly evaluates the credit quality and collection profile of its customers to approximate fair value.

The estimated fair value of long-term debt, including current maturities and excluding capital leases is as follows:

(Thousands)	March 31, September 30,	
	2016	2015
Carrying value ⁽¹⁾	\$ 807,845	\$ 807,845
Fair market value	\$ 832,202	\$ 817,319

⁽¹⁾ Excludes capital leases of \$48.2 million and \$46.9 million as of March 31, 2016 and September 30, 2015, respectively.

New Jersey Resources Corporation
Part I

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Continued)

NJR utilizes a discounted cash flow method to determine the fair value of its debt. Inputs include observable municipal and corporate yields, as appropriate for the maturity of the specific issue and the Company's credit rating. As of March 31, 2016, NJR discloses its debt within Level 2 of the fair value hierarchy.

Fair Value Hierarchy

NJR applies fair value measurement guidance to its financial assets and liabilities, as appropriate, which include financial derivatives and physical commodity contracts qualifying as derivatives, available for sale securities and other financial assets and liabilities. In addition, authoritative accounting literature prescribes the use of a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value based on the source of the data used to develop the price inputs. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities and the lowest priority to inputs that are based on unobservable market data and include the following:

Level 1 Unadjusted quoted prices for identical assets or liabilities in active markets. NJR's Level 1 assets and liabilities include exchange traded natural gas futures and options contracts, listed equities and money market funds. Exchange traded futures and options contracts include all energy contracts traded on the NYMEX/CME and ICE that NJR refers internally to as basis swaps, fixed swaps, futures and financial options that are cleared through a FCM.

Level 2 Other significant observable inputs such as interest rates or price data, including both commodity and basis pricing that is observed either directly or indirectly from publications or pricing services. NJR's Level 2 assets and liabilities include over-the-counter physical forward commodity contracts and swap contracts, SREC forward sales or derivatives that are initially valued using observable quotes and are subsequently adjusted to include time value, credit risk or estimated transport pricing components for which no basis price is available. Level 2 financial derivatives consist of transactions with non-FCM counterparties (basis swaps, fixed swaps and/or options). NJNG's treasury lock is also considered Level 2 as valuation is based on quoted market interest and swap rates as inputs to the valuation model. Inputs are verifiable and do not require significant management judgment. For some physical commodity contracts the Company utilizes transportation tariff rates that are publicly available and that it considers to be observable inputs that are equivalent to market data received from an independent source. There are no significant judgments or adjustments applied to the transportation tariff inputs and no market perspective is required. Even if the transportation tariff input were considered to be a "model," it would still be considered to be a Level 2 input as:

- 1) The data is widely accepted and public
- 2) The data is non-proprietary and sourced from an independent third party
- 3) The data is observable and published

These additional adjustments are generally not considered to be significant to the ultimate recognized values.

Level 3 Inputs derived from a significant amount of unobservable market data. These include NJR's best estimate of fair value and are derived primarily through the use of internal valuation methodologies.

New Jersey Resources Corporation

(1) Includes various money market funds.

6. INVESTMENTS IN EQUITY INVESTEES

NJR's investments in equity investees includes the following investments as of:

(Thousands)	March 31, September 30,	
	2016	2015
Steckman Ridge ⁽¹⁾	\$ 124,446	\$ 125,649
PennEast	12,528	6,353
Total	\$ 136,974	\$ 132,002

(1) Includes loans with a total outstanding principal balance of \$70.4 million for both March 31, 2016 and September 30, 2015. The loans accrue interest at a variable rate that resets quarterly and are due October 1, 2023.

NJR, through a subsidiary, NJR Pipeline Company, formed PennEast with five other investors, and plans to construct and operate a 118-mile pipeline that will extend from northeast Pennsylvania to western New Jersey.

New Jersey Resources Corporation
Part I

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Continued)

NJRES and NJNG have entered into storage and park and loan agreements with Steckman Ridge. In addition, NJNG has entered into a precedent capacity agreement with PennEast, which is estimated to be in service during the last quarter of fiscal 2018 or the first quarter of fiscal 2019. See Note 14. Related Party Transactions for more information on these intercompany transactions.

7. EARNINGS PER SHARE

The following table presents the calculation of the Company's basic and diluted earnings per share for:

	Three Months Ended		Six Months Ended	
	March 31, 2016	March 31, 2015	March 31, 2016	March 31, 2015
(Thousands, except per share amounts)				
Net income, as reported	\$73,328	\$60,903	\$121,975	\$184,223
Basic earnings per share				
Weighted average shares of common stock outstanding-basic	85,834	85,328	85,754	84,940
Basic earnings per common share	\$0.85	\$0.71	\$1.42	\$2.17
Diluted earnings per share				
Weighted average shares of common stock outstanding-basic	85,834	85,328	85,754	84,940
Incremental shares ⁽¹⁾	1,024	1,042	1,024	1,042

Cash dividend declared (\$.48 per share)						(41,227)	(41,227)
Treasury stock and other	(139)		(55)		(6,235)		(6,290)
Balance at March 31, 2016	85,969	\$221,633	\$215,961	\$ (675)	\$(87,930)	\$858,493	\$1,207,482

NJR satisfies its external common equity requirements, if any, through issuances of its common stock, including the proceeds from stock issuances under its DRP. The DRP allows NJR, at its option, to use treasury shares or newly issued shares to raise capital. On December 14, 2015, NJR registered 5 million shares of NJR common stock for issuance under the DRP. NJR raised \$8.2 million and \$7.7 million of equity through the DRP, by issuing approximately 260,000 and 279,000 shares of treasury stock, during the six months ended March 31, 2016 and 2015, respectively. NJR also raised approximately \$19.8 million of equity by issuing approximately 688,000 new shares through the waiver discount feature of the DRP during the six months ended March 31, 2015. NJR issued no new shares through the waiver discount feature of the DRP during the six months ended March 31, 2016.

New Jersey Resources Corporation

Credit Facilities

A summary of NJR's credit facility and NJNG's commercial paper program and credit facility are as follows:

(Thousands)	March 31, 2016	September 30, 2015	Expiration Dates
NJR			
Bank revolving credit facilities ⁽¹⁾	\$ 425,000	\$ 425,000	September 2020
Notes outstanding at end of period	\$ 115,500	\$ 39,350	
Weighted average interest rate at end of period	1.36 %	1.17 %	
Amount available at end of period ⁽²⁾	\$ 286,441	\$ 369,176	
Bank revolving credit facilities ⁽³⁾	\$ —	\$ 100,000	October 2015
Amount available at end of period	\$ —	\$ 100,000	
NJNG			
Bank revolving credit facilities ⁽¹⁾	\$ 250,000	\$ 250,000	May 2019
Commercial paper outstanding at end of period	\$ 37,000	\$ 27,000	
Weighted average interest rate at end of period	.46 %	.20 %	
Amount available at end of period ⁽⁴⁾	\$ 212,269	\$ 222,269	

(1) Committed credit facilities, which require commitment fees on the unused amounts.

(2) Letters of credit outstanding total \$23.1 million and \$16.5 million as of March 31, 2016 and September 30, 2015, respectively, which reduces amount available by the same amount.

(3) Uncommitted credit facilities, which require no commitment fees.

(4) Letters of credit outstanding total \$731,000 and \$731,000 as of March 31, 2016 and September 30, 2015, respectively, which reduces the amount available by the same amount.

On October 24, 2014, NJR entered into a \$100 million uncommitted line of credit agreement, with Santander Bank, N.A., which expired on October 24, 2015.

Amounts available under credit facilities are reduced by bank or commercial paper borrowings, as applicable, and any outstanding letters of credit. Neither NJNG nor the results of its operations are obligated or pledged to support the NJR credit or debt shelf facilities.

NJR Long-term Debt

On March 22, 2016, NJR entered into a Note Purchase Agreement, under which the Company has agreed to sell, on August 18, 2016, \$50 million of the Company's 3.2 percent senior notes due August 18, 2023, and \$100 million of the Company's 3.54 percent senior notes due August 18, 2026. The notes will be guaranteed by certain unregulated subsidiaries of the Company. The notes will be unsecured. The proceeds of the notes will be used for general corporate purposes, including working capital and capital expenditures.

NJNG Long-term Debt

NJNG received \$7.1 million and \$7.2 million in December 2015 and 2014, respectively, in connection with the sale-leaseback of its natural gas meters. NJNG records a capital lease obligation that is paid over the term of the lease and has the option to purchase the meters back at fair value upon expiration of the lease.

10. EMPLOYEE BENEFIT PLANS

Pension and Other Postemployment Benefit Plans

The components of the net periodic cost for pension benefits, including the Company's Pension Equalization Plan, and OPEB costs (principally health care and life insurance) for employees and covered dependents were as follows:

	Pension		OPEB					
	Three Months Ended March 31,	Six Months Ended March 31,	Three Months Ended March 31,	Six Months Ended March 31,	2016	2015	2016	2015
(Thousands)	2016	2015	2016	2015	2016	2015	2016	2015
Service cost	\$ 1,898	\$ 1,871	\$ 3,796	\$ 3,742	\$ 1,131	\$ 1,064	\$ 2,261	\$ 2,127
Interest cost	2,835	2,550	5,671	5,100	1,564	1,435	3,128	2,870
Expected return on plan assets	(5,030)	(4,273)	(10,059)	(8,545)	(1,211)	(1,244)	(2,422)	(2,488)
Recognized actuarial loss	1,821	1,747	3,641	3,492	818	735	1,637	1,471
Prior service cost amortization	27	27	55	55	(91)	(91)	(182)	(182)
Net periodic benefit cost	\$ 1,551	\$ 1,922	\$ 3,104	\$ 3,844	\$ 2,211	\$ 1,899	\$ 4,422	\$ 3,798

The Company made a discretionary contribution of \$30 million during the six months ended March 31, 2016, to improve the funded status of the pension plans based on current actuarial assumptions, which includes the most recent mortality table change. The Company does not expect to be required to make additional contributions to fund the pension plans over the next two fiscal years based on current actuarial assumptions; however, funding requirements are uncertain and can depend significantly on changes in actuarial assumptions, returns on plan assets, interest rates and changes in the demographics of eligible employees and covered dependents. In addition, as in the past, the Company may elect to make contributions in excess of the minimum required amount to the plans. There were no discretionary contributions made during the six months ended March 31, 2015.

11. INCOME TAXES

NJR evaluates its tax positions to determine the appropriate accounting and recognition of potential future obligations associated with uncertain tax positions. During the six months ended March 31, 2016 and 2015, based on its analysis, the Company determined there was no need to recognize any liabilities associated with uncertain tax positions.

To calculate the estimated annual effective tax rate, NJR considers forecasted pre-tax book income and estimated permanent book versus tax differences, as well as tax credits associated with solar and wind projects. For investment tax credits the estimate is based on solar projects that are probable of being completed and placed in service during the current fiscal year based on the best information available at each reporting period. For production tax credits the estimate is based on the forecast of electricity produced during the current fiscal year based on the best information available at each reporting period. Adjustments to the effective tax rate and management's estimates will occur as information and assumptions change.

The forecasted effective tax rates for the six months ended March 31, 2016 and 2015, were 17.7 percent and 24.9 percent, respectively. The decreased tax rate is due primarily to a decrease in forecasted pre-tax income for the fiscal year ended September 30, 2016, compared to the prior fiscal year. Forecasted tax credits, net of deferred taxes, are

\$27.1 million and \$26.7 million for fiscal 2016 and 2015, respectively.

As of March 31, 2016, the Company has total state income tax net operating losses of approximately \$226.1 million, which generally have a life of 20 years. The Company has recorded a deferred state tax asset of approximately \$13.2 million on the Unaudited Condensed Consolidated Balance Sheets, reflecting the tax benefit associated with the loss carryforwards. In addition, as of March 31, 2016, the Company has recorded a valuation allowance of \$270,000 because it believes that it is more likely than not that the state net operating losses related to CR&R will expire unused. As of September 30, 2015, the Company had total state income tax net operating losses of approximately \$218.1 million, a deferred state tax asset of approximately \$12.8 million and a valuation allowance of \$176,000.

New Jersey Resources Corporation
Part I

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Continued)

In addition, as of September 30, 2015, the Company had an ITC carryforward of approximately \$22.1 million, all of which was generated in fiscal year 2015, and has a life of 20 years. The Company expects to utilize this entire carryforward.

In December 2015, the Consolidated Appropriations Act extended the 30 percent ITC for solar property that is under construction on or before December 31, 2019. The credit will decline to 26 percent for property under construction as of and during 2020 and to 20 percent for property under construction as of and during 2021. For any property that is under construction before 2022, but not placed in service before 2024 the energy credit will be reduced to 10 percent. In addition, the Consolidated Appropriations Act retroactively extends the PTC for five years through December 31, 2019, with a gradual three year phase out for any project for which construction of the facility begins after December 31, 2016.

12. COMMITMENTS AND CONTINGENT LIABILITIES

Cash Commitments

NJNG has entered into long-term contracts, expiring at various dates through October 2033, for the supply, storage and transportation of natural gas. These contracts include annual fixed charges of approximately \$35.7 million at current contract rates and volumes, which are recoverable through BGSS.

For the purpose of securing storage and pipeline capacity, NJRES enters into storage and pipeline capacity contracts, which require the payment of certain demand charges by NJRES to maintain the ability to access such natural gas storage or pipeline capacity, during a fixed time period, which generally ranges from one to 10 years. Demand charges are established by interstate storage and pipeline operators and are regulated by the FERC. These demand charges represent commitments to pay storage providers or pipeline companies for the right to store and/or transport natural gas utilizing their respective assets.

Commitments as of March 31, 2016, for natural gas purchases and future demand fees for the next five fiscal year periods are as follows:

(Thousands)	2016	2017	2018	2019	2020	Thereafter
NJRES:

Legal Proceedings

Manufactured Gas Plant Remediation

NJNG is responsible for the remedial cleanup of five MGP sites, dating back to gas operations in the late 1800s and early 1900s, which contain contaminated residues from former gas manufacturing operations. NJNG is currently involved in administrative proceedings with the NJDEP, and participating in various studies and investigations by outside consultants, to determine the nature and extent of any such contaminated residues and to develop appropriate programs of remedial action, where warranted, under Administrative Consent Orders or Memoranda of Agreement with the NJDEP.

New Jersey Resources Corporation
Part I

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Continued)

NJNG may recover its remediation expenditures, including carrying costs, over rolling seven-year periods pursuant to a RA approved by the BPU. In May 2015, the BPU approved NJNG's MGP expenditures incurred through June 2014 and to recover \$8.5 million annually related to the SBC RA factor, with rates effective June 1, 2015. On December 24, 2015, NJNG requested approval of its MGP expenditures incurred through June 30, 2015. As of March 31, 2016, \$16.1 million of previously incurred remediation costs, net of recoveries from customers and insurance proceeds, are included in regulatory assets on the Unaudited Condensed Consolidated Balance Sheets.

NJNG periodically, and at least annually, performs an environmental review of the MGP sites, including a review of potential liability for investigation and remedial action. NJNG estimated at the time of the most recent review that total future expenditures to remediate and monitor the five MGP sites for which it is responsible, including potential liabilities for Natural Resource Damages that might be brought by the NJDEP for alleged injury to groundwater or other natural resources concerning these sites, will range from approximately \$150.9 million to \$242.1 million. NJNG's estimate of these liabilities is based upon known facts, existing technology and enacted laws and regulations in place when the review was completed. Where it is probable that costs will be incurred, and the information is sufficient to establish a range of possible liability, NJNG accrues the most likely amount in the range. If no point within the range is more likely than the other, it is NJNG's policy to accrue the lower end of the range. Accordingly, as of March 31, 2016, NJNG recorded an MGP remediation liability and a corresponding regulatory asset of \$178.5 million on the Unaudited Condensed Consolidated Balance Sheets, based on the most likely amount. The actual costs to be incurred by NJNG are dependent upon several factors, including final determination of remedial action, changing technologies and governmental regulations, the ultimate ability of other responsible parties to pay and any insurance recoveries.

NJNG will continue to seek recovery of MGP-related costs through the RA. If any future regulatory position indicates that the recovery of such costs is not probable, the related non-recoverable costs would be charged to income in the period of such determination.

General

The Company is party to various other claims, legal actions and complaints arising in the ordinary course of business. In the Company's opinion, the ultimate disposition of these matters will not have a material effect on its financial condition, results of operations or cash flows.

13. BUSINESS SEGMENT AND OTHER OPERATIONS DATA

NJR organizes its businesses based on a combination of factors, including its products and its regulatory environment. As a result, the Company manages the businesses through the following reportable segments and other operations: the Natural Gas Distribution segment consists of regulated energy and off-system, capacity and storage management operations; the Energy Services segment consists of unregulated wholesale energy operations; the Clean Energy Ventures segment consists of capital investments in distributed power projects; the Midstream segment consists of NJR's investments in natural gas transportation and storage facilities; the Home Services and Other operations consist of heating, cooling and water appliance sales, installations and services, commercial real estate development, other investments and general corporate activities.

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Continued)

The Chief Executive Officer, who uses NFE as a measure of profit or loss in measuring the results of the Company's segments and operations, is the chief operating decision maker of the Company. A reconciliation of consolidated NFE to consolidated net income is as follows:

(Thousands)	Three Months Ended		Six Months Ended	
	March 31, 2016	March 31, 2015	March 31, 2016	March 31, 2015
Net financial earnings	\$77,880	\$99,143	\$127,512	\$154,253
Less:				
Unrealized loss (gain) on derivative instruments and related transactions	3,170	68,474	2,035	(20,198)
Effects of economic hedging related to natural gas inventory	(1,054)	(23,450)	2,759	(32,215)
Tax adjustments	2,436	(6,784)	743	22,443
Net income	\$73,328	\$60,903	\$121,975	\$184,223

The Company uses derivative instruments as economic hedges of purchases and sales of physical gas inventory. For GAAP purposes, these derivatives are recorded at fair value and related changes in fair value are included in reported earnings. Revenues and cost of gas related to physical gas flow is recognized when the gas is delivered to customers. Consequently, there is a mismatch in the timing of earnings recognition between the economic hedges and physical gas flows. Timing differences occur in two ways:

• Unrealized gains and losses on derivatives are recognized in reported earnings in periods prior to physical gas inventory flows; and

• Unrealized gains and losses of prior periods are reclassified as realized gains and losses when derivatives are settled in the same period as physical gas inventory movements occur.

NFE is a measure of the earnings based on eliminating these timing differences, to effectively match the earnings effects of the economic hedges with the physical sale of gas, SRECs and foreign currency contracts. Consequently, to reconcile between GAAP and NFE, current period unrealized gains and losses on the derivatives are excluded from NFE as a reconciling item. Additionally, realized derivative gains and losses are also included in current period net income. However, NFE includes only realized gains and losses related to natural gas sold out of inventory, effectively matching the full earnings effects of the derivatives with realized margins on physical gas flows. NJR also calculates a quarterly tax adjustment based on an estimated annual effective tax rate for NFE purposes.

The Company's assets for the various business segments and business operations are detailed below:

(Thousands)	March 31, 2016	September 30, 2015
Assets at end of period:		
Natural Gas Distribution	\$2,372,033	\$2,305,293

14. RELATED PARTY TRANSACTIONS

NJRES may periodically enter into storage or park and loan agreements with its affiliated FERC-regulated natural gas storage facility, Steckman Ridge. As of March 31, 2016, NJRES has entered into storage and park and loan transactions with Steckman Ridge for varying terms, all of which will expire by October 2020. NJRES had demand fees, net of eliminations, associated with Steckman Ridge of \$1.4 million and \$926,000 during the six months ended March 31, 2016 and 2015, respectively, and demand fees payable of \$377,000 and \$375,000 as of March 31, 2016 and September 30, 2015, respectively.

In January 2010, NJNG entered into a 10-year agreement effective April 1, 2010, for 3 Bcf of firm storage capacity with Steckman Ridge. Under the terms of the agreement, NJNG incurs demand fees, at market rates, of approximately \$9.3 million annually, a portion of which is eliminated in consolidation. These fees are recoverable through NJNG's BGSS mechanism and are included in regulatory assets. During the six months ended March 31, 2016 and 2015, NJNG had demand fees, net of eliminations, associated with Steckman Ridge of \$2.8 million and \$2.9 million, respectively, and demand fees payable of \$775,000 as of both March 31, 2016 and September 30, 2015.

NJNG and NJRES have entered into various asset management agreements. Under the terms of these agreements, NJNG releases certain transportation and storage contracts to NJRES. NJNG retains the right to purchase market priced gas or fixed price storage gas from NJRES. As of March 31, 2016, NJNG and NJRES had three asset management agreements with expiration dates ranging from October 2016 through March 2018.

NJNG has entered into a 15 year transportation precedent agreement for committed capacity of 180,000 dths per day with PennEast, which is estimated to be in service during the last quarter of fiscal 2018 or the first quarter of fiscal 2019.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Critical Accounting Policies

A summary of our critical accounting policies is included in Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations of its Annual Report on Form 10-K for the period ended September 30, 2015. Our critical accounting policies have not changed from those reported in the 2015 Annual Report on Form 10-K.

Recently Issued Accounting Standards

Refer to Note 2. Summary of Significant Accounting Policies for discussion of recently issued accounting standards.

Management's Overview

Consolidated

NJR is an energy services holding company providing retail natural gas service in New Jersey and wholesale natural gas and related energy services to customers in the United States and Canada, through its subsidiaries NJNG and NJRES. In addition, we invest in distributed power projects, midstream assets and provides various repair, sales and installations services. A more detailed description of our organizational structure can be found in Item 1. Business of our 2015 Annual Report on Form 10-K.

New Jersey Resources Corporation
Part I

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS
(Continued)

Business Segments

We have four primary business segments as presented in the chart below:

In addition to the four business segments, we have non-utility operations that either provide corporate support services or do not meet management's criteria to be treated as a separate business segment. These operations, which comprise Home Services and Other, include: appliance repair services, sales and installations at NJRHS; energy-related ventures at NJR Energy and commercial real estate holdings at CR&R.

Net income (loss) by business segment and operations are as follows:

(Thousands)	Three Months Ended				Six Months Ended			
	March 31,		March 31,		March 31,		March 31,	
	2016	2015	2016	2015	2016	2015	2016	2015
Net Income (Loss)								
Natural Gas Distribution	\$48,961	66 %	\$48,594	80 %	\$79,531	65 %	\$76,780	42 %
Energy Services	13,578	19	6,743	11	22,684	18	85,630	46
Clean Energy Ventures	8,602	12	3,240	5	16,828	14	18,847	10
Midstream	2,228	3	2,604	4	4,572	4	4,724	3
Home Services and Other	(2,040)	(3)	(1,359)	(2)	(2,623)	(2)	(1,951)	(1)
Eliminations ⁽¹⁾	1,999	3	1,081	2	983	1	193	—
Total	\$73,328	100 %	\$60,903	100 %	\$121,975	100 %	\$184,223	100 %

(1) Consists of transactions between subsidiaries that are eliminated in consolidation.

The increase in net income during the three months ended March 31, 2016, compared with the three months ended March 31, 2015, was driven primarily by increases at NJRES due primarily to changes in the value of derivative instruments and at NJRCEV due primarily to an increase in tax credits recognized. The decrease in net income during the six months ended March 31, 2016, compared with the six months ended March 31, 2015, was driven primarily by lower gross margin at NJRES due primarily to record warmth across the eastern United States, as well as changes in the value of derivative instruments, partially offset by decreased income tax expense. The primary drivers of the changes noted above are described in more detail in the individual segment discussions.

New Jersey Resources Corporation
Part I

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

(Continued)

Assets by business segment and operations are as follows:

(Thousands)	March 31, 2016		September 30, 2015	
Assets				
Natural Gas Distribution	\$2,372,033	69 %	\$2,305,293	70 %
Energy Services	243,989	7	260,021	8
Clean Energy Ventures	566,582	17	504,885	15
Midstream	199,703	6	182,007	6
Home Services and Other	106,541	3	88,880	3
Intercompany assets ⁽¹⁾	(69,254)	(2)	(56,729)	(2)
Total	\$3,419,594	100 %	\$3,284,357	100 %

(1) Consists of transactions between subsidiaries that are eliminated in consolidation.

The increase in assets during the six months ended March 31, 2016, was due primarily to additional wind expenditures at NJRCEV, additional utility plant expenditures at NJNG, partially offset by decreased accounts receivable at NJRES.

Management of the Company uses NFE, a non-GAAP financial measure, when evaluating the operating results of the Company. NJRES economically hedges its natural gas inventory with financial derivative instruments. NFE is a measure of the earnings based on eliminating timing differences surrounding the recognition of certain gains or losses, to effectively match the earnings effects of the economic hedges with the physical sale of gas and, therefore, eliminates the impact of volatility to GAAP earnings associated with the derivative instruments.

For NFE purposes, an annual estimated effective tax rate is calculated and any necessary quarterly tax adjustment is applied to NJRCEV, as such adjustment is primarily related to tax credits generated by NJRCEV. The details of such tax adjustments can be found in the table below.

Non-GAAP financial measures are not in accordance with, or an alternative to GAAP, and should be considered in addition to, and not as a substitute for, the comparable GAAP measure.

The following is a reconciliation of consolidated net income, the most directly comparable GAAP measure, to NFE:

(\$ in Thousands)	Three Months Ended		Six Months Ended	
	March 31, 2016	2015	March 31, 2016	2015
Net income	\$73,328	\$60,903	\$121,975	\$184,223
Add:				
Unrealized loss (gain) on derivative instruments and related transactions	3,170	68,474	2,035	(20,198)
Effects of economic hedging related to natural gas inventory	(1,054)	(23,450)	2,759	(32,215)
Tax adjustments	2,436	(6,784)	743	22,443
Net financial earnings	\$77,880	\$99,143	\$127,512	\$154,253

NFE by business segment and other operations, discussed in more detail within the operating results sections of each segment, is summarized as follows:

Edgar Filing: NEW JERSEY RESOURCES CORP - Form 10-Q

Total	\$77,880	100 %	\$99,143	100 %	\$127,512	100 %	\$154,253	100 %

(1) Consists of transactions between subsidiaries that are eliminated in consolidation.

New Jersey Resources Corporation
Part I

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS
(Continued)

The decrease in NFE during the three and six months ended March 31, 2016, compared with the three and six months ended March 31, 2015 was primarily driven by lower financial margin at NJRES due primarily to lower volatility and narrower price spreads resulting from the record warmth across the eastern United States, partially offset by decreased income tax expense.

Natural Gas Distribution Segment

Overview

Our Natural Gas Distribution segment is comprised of NJNG, a natural gas utility that provides regulated retail natural gas service in central and northern New Jersey to approximately 519,100 residential and commercial customers in its service territory and also participates in the off-system sales and capacity release markets. The business is subject to various risks, which can negatively impact customer growth, operating and financing costs, fluctuations in commodity prices and customer conservation efforts. These risks include, but are not limited to, adverse economic conditions, customer usage, certain regulatory actions, environmental remediation and severe weather conditions. It is often difficult to predict the impact of events or trends associated with these risks.

In addition, NJNG's business is seasonal by nature, as weather conditions directly influence the volume of natural gas delivered. Specifically, customer demand substantially increases during the winter months when natural gas is used for heating purposes. As a result, NJNG receives most of its gas distribution revenues during the first and second fiscal quarters and is subject to variations in earnings and working capital during the year.

As a regulated company, NJNG is required to recognize the impact of regulatory decisions on its financial statements. See Note 3. Regulation in the accompanying Unaudited Condensed Consolidated Financial Statements for a more detailed discussion on regulatory actions, including filings related to programs and associated expenditures, as well as rate requests related to recovery of costs.

NJNG's operations are managed with the goal of providing safe and reliable service, growing its customer base, diversifying its gross margin, promoting clean energy programs and mitigating the risks discussed above through several key initiatives, including:

earning a reasonable rate of return on the investments in its natural gas distribution and transmission businesses, as well as timely recovery of all prudently incurred costs in order to provide safe and reliable service throughout NJNG's territory:

- NJNG filed a base rate case petition with the BPU on November 13, 2015 requesting an increase in base tariff rates in the amount of \$147.6 million;

- continuing to invest in the safety and integrity of its infrastructure;

- managing its customer growth rate, which NJNG expects will be approximately 1.6 percent annually through fiscal 2018;

- maintaining a collaborative relationship with the BPU on regulatory initiatives, including:

- planning and authorization of infrastructure investments;
- pursuing rate and regulatory strategies to stabilize and decouple margin, including CIP;
- utilizing BGSS incentive programs through BPU-approved mechanisms to reduce gas costs and generate margin;
and
- administering and promoting NJNG's BPU-approved SAVEGREEN Project;

managing the volatility of wholesale natural gas prices through a hedging program designed to keep customers' BGSS rates as stable as possible; and

working to manage its financial obligations related to remediation activities associated with its former MGP sites.

New Jersey Resources Corporation
Part I

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS
(Continued)

Infrastructure projects

NJNG has significant annual capital expenditures associated with the management of its natural gas distribution and transmission system, including new utility plant associated with customer growth and its associated PIM and infrastructure programs.

Below is a summary of actual capital expenditures for the six months ended March 31, 2016, and estimates for fiscal 2016 and 2017:

Estimated capital expenditures are reviewed on a regular basis and may vary based on the ongoing effects of regulatory oversight, environmental regulations, unforeseen events and the ability to access capital.

SAFE and NJ RISE

NJNG has implemented BPU-approved infrastructure projects that are designed to enhance the reliability of NJNG's gas distribution system.

NJNG has implemented its SAFE program whereby NJNG has approval to invest up to \$130 million, exclusive of AFUDC, to replace portions of its gas distribution infrastructure, consisting of unprotected steel and cast iron, over a four-year period. As of December 31, 2015, NJNG completed the removal of cast iron mains throughout its entire service territory. The SAFE program was authorized by the BPU to earn an overall weighted average cost of capital of 6.9 percent, with a return on equity of 9.75 percent. NJNG has included its SAFE infrastructure investments for recovery in its base rate case petition filed on November 13, 2015.

On July 23, 2014, the BPU approved a Stipulation of Settlement related to the recovery of NJNG's NJ RISE capital infrastructure program, which consists of six capital investment projects estimated to cost \$102.5 million, excluding AFUDC, for gas distribution storm hardening and mitigation projects, along with associated depreciation expense. These system enhancements are intended to minimize service impacts during extreme weather events to customers that live in the most storm prone areas of NJNG's service territory. The submission was made in response to a March 2013 BPU order, initiating a proceeding to investigate prudent, cost efficient and effective opportunities to protect New Jersey's utility infrastructure from future major storm events. In the filing, NJNG proposed the recovery of its capital costs associated with NJ RISE through an annual adjustment to its base rate. On May 29, 2015, NJNG filed a petition with the BPU requesting approval to recover costs through July 31, 2015. On October 15, 2015, the BPU approved a base rate increase resulting in a .07 percent increase to the average residential heat customer's bill, effective November 1, 2015. Investments through July 31, 2015, will earn a weighted average cost of capital of 6.74 percent, including a return on equity of 9.75 percent. Estimated capital expenditures through December 31, 2016, have been included for recovery in NJNG's base rate case petition filed with the BPU on November 13, 2015.

New Jersey Resources Corporation
Part I

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS
(Continued)

NGV Advantage

The BPU approved a pilot program for NJNG to invest up to \$10 million to build NGV refueling stations. In addition, the BPU approved a deferred accounting methodology related to the NGV investment costs consistent with NJNG's SAFE Program. The NGV program was authorized by the BPU to earn an overall weighted average cost of capital of 7.1 percent, including a return on equity of 10.3 percent. A portion of the proceeds from the utilization of the compressed natural gas equipment, along with any available federal and state incentives, will be credited back to ratepayers to help offset the cost of this investment. NJNG has opened all three of its NGV stations to the public and has included its NGV investments for recovery in its base rate case petition filed with the BPU on November 13, 2015.

Liquefaction/LNG

NJNG is in the construction phase of its Liquefaction project and is expected to be operational by the second half of fiscal 2016, which, when completed, will allow NJNG to convert natural gas into LNG to fill NJNG's existing LNG storage tanks. NJNG's base rate case petition filed with the BPU on November 13, 2015, includes capital cost recovery for the project. NJNG estimates that the total costs for this project along with other plant upgrades will be \$35.7 million.

Southern Reliability Link

The SRL is an approximate 30-mile, 30-inch transmission main designed to support improved system integrity and reliability in the southern portion of NJNG's service territory, estimated to cost between \$175 million and \$180 million. In April 2015, NJNG filed two petitions with the BPU to construct, operate and finalize the route for the SRL. In June 2015, NJNG filed two petitions with the BPU to amend the previously proposed route. The capital investment cost associated with the SRL has been included for recovery in NJNG's base rate case petition, filed with the BPU on November 13, 2015. On January 27, 2016, the BPU issued an order approving NJNG's proposed SRL pipeline installation, operation and route selection, as modified by NJNG, including specific requirements regarding permitting, safety and integrity assessment. On March 18, 2016, the BPU issued an order designating the SRL route and exempting the SRL from municipal land use ordinances, regulations, permits and license requirements. The two BPU orders have been appealed by third parties. We believe that they will be upheld on appeal. On May 4, 2016, NJNG supplemented its base rate case testimony supporting its November 2015 petition, which amended the accounting treatment and noted that the project would not be completed by December 31, 2016. In addition, we seek to modify the rate treatment to include the September 30, 2016 balance of project spending and rate adjustments on a quarterly basis until the project is complete.

Customer growth

In conducting NJNG's business, management focuses on factors it believes may have significant influence on its future financial results. NJNG's policy is to work with all stakeholders, including customers, regulators and policymakers, to achieve favorable results. These factors include the rate of NJNG's customer growth in its service territory, which can be influenced by political and regulatory policies, the delivered cost of natural gas compared with competing fuels, interest rates and general economic and business conditions.

During the six months ended March 31, 2016 and 2015 respectively, NJNG added 3,655 and 4,079 new customers and converted 400 and 390 existing customers to natural gas heat and other services. The current customer growth represents an estimated increase of approximately \$3.1 million annually to utility gross margin assuming normal weather and usage. In addition, NJNG currently expects to add approximately 24,000 to 28,000 new customers during the three-year period of fiscal 2016 to 2018. Based on information from municipalities and developers, as well as external industry analysts and management's experience, NJNG estimates that approximately 50 percent of the growth will come from new construction markets and another 50 percent from customer conversions to natural gas from other fuel sources. This new customer and conversion growth would increase utility gross margin under NJNG's base rates by approximately \$4.4 million annually, as calculated under NJNG's CIP tariff. See the Natural Gas Distribution Results of Operations section of Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations for a definition and further discussion of utility gross margin.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

(Continued)

SAVEGREEN

SAVEGREEN conducts home energy audits and provides various grants, incentives and financing alternatives, that are designed to encourage the installation of high efficiency heating and cooling equipment and other energy efficiency upgrades. Depending on the specific incentive or approval, NJNG recovers costs associated with the programs over a two to 10-year period through a tariff rider mechanism. On July 22, 2015, the BPU approved NJNG's petition filed in December 2014, allowing the extension of SAVEGREEN through July 31, 2017, with an additional \$75.2 million in investments and a weighted average cost of capital of 6.69 percent. On April 15, 2016, NJNG filed a petition with the BPU to extend its current program, which was set to expire on July 31, 2017, to December 31, 2018.

Since inception, the BPU has approved total SAVEGREEN investments of approximately \$219.3 million, of which \$131 million in grants, rebates and loans has been provided to customers, with a total annual recovery of approximately \$20 million. On January 27, 2016, the BPU approved NJNG's July 2015 petition to maintain its existing SAVEGREEN recovery rate. The recovery includes a weighted average cost of capital that ranges from 6.69 percent, with a return on equity of 9.75 percent, to 7.76 percent, with a return on equity of 10.3 percent.

Conservation Incentive Program

The CIP facilitates normalizing NJNG's utility gross margin for variances not only due to weather but also for other factors affecting customer usage, such as conservation and energy efficiency. Recovery of utility gross margin for the non-weather variance through the CIP is limited to the amount of certain gas supply cost savings achieved and is subject to an annual earnings test. An annual review of the CIP must be filed by June 1, coincident with NJNG's annual BGSS filing, during which NJNG can request rate changes to the CIP. In May 2014, the BPU approved the continuation of the CIP program with no expiration date; however, it is subject to review in the 2017 tariff rate filing. On April 15, 2015, the BPU approved on a final basis a reduction to NJNG's CIP rates which were provisionally approved effective October 1, 2014, and resulted in a 4.3 percent reduction to the average residential heat customer's bill. On June 1, 2015, NJNG filed a petition with the BPU to adjust its CIP rates resulting in a .08 percent increase to the average residential heat customer's bill, which was provisionally approved to be effective October 1, 2015. The BPU approved these rates on a final basis on February 24, 2016.

NJNG's total utility firm gross margin includes the following adjustments related to the CIP mechanism:

	Three Months Ended		Six Months Ended	
	March 31,		March 31,	
(Thousands)	2016	2015	2016	2015
Weather ⁽¹⁾	\$9,431	\$(15,889)	\$27,593	\$(13,635)
Usage	1,806	(1,686)	6,098	1,538
Total	\$11,237	\$(17,575)	\$33,691	\$(12,097)

Compared with the CIP 20-year average, weather was 11.9 percent warmer and 22.7 percent colder-than-normal (1) during the three months ended March 31, 2016 and 2015, respectively, and 20.4 percent warmer and 12.9 percent colder-than-normal during the six months ended March 31, 2016 and 2015, respectively.

As of March 31, 2016, NJNG has \$31.9 million in regulatory assets to be collected from customers in future periods on the Unaudited Condensed Consolidated Balance Sheets related to CIP. As of September 30, 2015, NJNG had \$5.2

million in regulatory liabilities, on the Unaudited Condensed Consolidated Balance Sheets related to CIP to be returned to customers in future periods.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

(Continued)

Commodity prices

Our Natural Gas Distribution segment is affected by the price of natural gas, which can have a significant impact on our cash flows, short-term financing costs, the price of natural gas charged to our customers through the BGSS clause, our ability to collect accounts receivable, which impacts our bad debt expense, and our ability to maintain a competitive advantage over other fuel sources. Natural gas commodity prices may experience high volatility as shown in the graph below for the six months ended March 31, 2016 and 2015, which illustrates the daily natural gas prices⁽¹⁾ in the Northeast market region, also known as Tetco M-3:

(1) Data source from Platts, a division of McGraw Hill Financial.

The maximum daily price at Tetco M-3 was \$4.74 and \$21.09 for the six months ended March 31, 2016 and 2015, respectively, and the minimum daily price was \$0.74 and \$1.15 for the six months ended March 31, 2016 and 2015, respectively. A more detailed discussion of the impacts of the price of natural gas on operating revenues, gas purchases and cash flows can be found in the Results of Operations and Cash Flow sections of Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

BGSS

Recovery of natural gas costs

NJNG's cost of natural gas is passed through to our customers, without markup, by applying NJNG's authorized BGSS tariff rate to actual therms delivered. There is no utility gross margin associated with BGSS costs; therefore, changes in such costs do not impact NJNG's earnings. NJNG monitors its actual gas costs in comparison to its tariff rates to manage its cash flows associated with its allowed recovery of natural gas costs, which is facilitated through BPU-approved deferred accounting and the BGSS pricing mechanism. Accordingly, NJNG occasionally adjusts its periodic BGSS tariff rates or can issue credits or refunds, as appropriate, for its residential and small commercial customers when the commodity cost varies from the existing BGSS tariff rate. BGSS tariff rates for its large commercial customers are adjusted monthly based on NYMEX prices.

On June 1, 2015, NJNG filed a petition with the BPU to continue its existing BGSS rate for residential and small commercial customers, which was provisionally approved by the BPU on September 11, 2015. NJNG's petition included a notification to provide estimated bill credits to NJNG's residential and small commercial customers during the months of November 2015 through February 2016, as a result of the decline in the wholesale price of natural gas. On October 27, 2015, NJNG notified the BPU that the estimated bill credits will be approximately \$76 million and will result in an approximate 17 percent decrease to the average residential heat customer's bill. Due to weather being approximately 25 percent warmer than normal during the months of November 2015 through February 2016, a total of \$61.6 million in bill credits were issued during that period. Refer to Note 3. Regulation in the accompanying Unaudited Condensed Consolidated Financial Statements, for a discussion of BGSS rate actions.

New Jersey Resources Corporation
Part I

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

(Continued)

BGSS Incentive Programs

NJNG is eligible to receive financial incentives for reducing BGSS costs through a series of utility gross margin-sharing programs that include off-system sales, capacity release and storage incentive programs, and through October 31, 2015, the FRM program. These programs are designed to encourage better utilization and hedging of its natural gas supply, transportation and storage assets. Depending on the program, NJNG shares 80 or 85 percent of utility gross margin generated by these programs with firm customers. Should performance of the existing incentives or market conditions warrant, NJNG is permitted to propose a process to re-evaluate and discuss alternative incentive programs annually. On October 15, 2015, the BPU issued an order approving NJNG's request to continue the BGSS Incentive Programs with modification to the storage incentive program beginning with the 2015 storage injection period and termination of the FRM Program, effective November 1, 2015.

Utility gross margin from incentive programs was \$8.3 million and \$7.3 million during the six months ended March 31, 2016 and 2015, respectively. A more detailed discussion of the impacts to utility gross margin can be found in the Results of Operations section of Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Hedging

In order to provide relative price stability to its natural gas supply portfolio, NJNG employs a hedging strategy with the goal of having at least 75 percent of the Company's projected winter periodic BGSS gas sales volumes hedged by each November 1 and at least 25 percent of the projected BGSS gas sales hedged for the following April through March period. This is accomplished with the use of various financial instruments including futures, swaps and options used in conjunction with commodity and/or weather-related hedging activity.

Due to the capital-intensive nature of NJNG's operations and the seasonal nature of its working capital requirements, significant changes in interest rates can impact NJNG's results. In an April 2014 BPU Order, NJNG received regulatory approval to enter into interest rate risk management transactions related to long-term debt securities. On June 1, 2015, NJNG entered into a treasury lock transaction to fix a benchmark treasury rate of 3.26 percent associated with the forecasted \$125 million debt issuance expected in May 2018. This forecasted debt issuance coincides with the maturity of NJNG's existing \$125 million, 5.6 percent notes on May 15, 2018. The change in fair value of NJNG's treasury lock agreement is recorded as a component of regulatory assets or liabilities on the Unaudited Condensed Consolidated Balance Sheets since the Company believes that the market value upon settlement will be reflected in future rates. Upon settlement, any gain or loss will be amortized in earnings over the life of the future debt issuance.

A more detailed discussion of NJNG's debt can be found in the Liquidity and Capital Resources and Cash Flow sections of Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Environmental Remediation

NJNG is responsible for the environmental remediation of five MGP sites, which contain contaminated residues from former gas manufacturing operations that ceased operating at these sites by the mid-1950s and, in some cases, had been discontinued many years earlier. Actual MGP remediation costs may vary from management's estimates due to the developing nature of remediation requirements, regulatory decisions by the NJDEP and related litigation. NJNG

reviews these costs at the end of each fiscal year and adjusts its liability and corresponding regulatory asset as necessary to reflect its expected future remediation obligation. Accordingly, NJNG recognized a regulatory asset and an obligation of \$178.5 million as of March 31, 2016, an increase of \$1.5 million, compared with the prior fiscal period. NJNG is currently authorized to recover remediation costs of approximately \$8.5 million annually, which is based on expenditures incurred through June 30, 2014. On December 24, 2015, NJNG filed an SBC petition with the BPU to increase the RA factor, to decrease the NJCEP factor and to request approval of its remediation expenses incurred through June 30, 2015, resulting in an overall decrease of .8 percent to the average residential heat customer's bill.

Other regulatory filings and a more detailed discussion of the filings in this section can be found in Note 3. Regulation in the accompanying Unaudited Condensed Consolidated Financial Statements.

New Jersey Resources Corporation
Part I

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

(Continued)

Operating Results

NJNG's operating results, including a reconciliation of operating revenues, the closest GAAP financial measurement, to NJNG's utility gross margin are as follows:

(Thousands)	Three Months Ended		Six Months Ended	
	March 31, 2016	2015	March 31, 2016	2015
Utility gross margin				
Operating revenues	\$242,536	\$374,703	\$394,142	\$583,430
Less:				
Gas purchases ⁽¹⁾	86,266	189,562	131,509	278,130
Energy and other taxes	13,246	21,925	20,154	33,453
Regulatory rider expense	21,215	42,692	30,843	64,155
Total utility gross margin	121,809	120,524	211,636	207,692
Operation and maintenance	33,882	32,638	63,510	62,618
Depreciation and amortization	11,598	10,647	22,836	21,192
Other taxes not reflected in utility gross margin	1,250	1,290	2,504	2,369
Operating income	75,079	75,949	122,786	121,513
Other income, net	1,282	811	2,596	2,208
Interest expense, net of capitalized interest	4,690	4,388	9,278	8,997
Income tax provision	22,710	23,778	36,573	37,944
Net income	\$48,961	\$48,594	\$79,531	\$76,780

Includes related party transactions of approximately \$2.3 million and \$1.6 million for the three months ended (1) March 31, 2016 and 2015, respectively, and \$4.6 million and \$3.2 million for the six months ended March 31, 2016 and 2015, respectively.

Operating Revenues and Gas Purchases

Operating revenues decreased by 35.3 percent and gas purchases decreased 54.5 percent during the three months ended March 31, 2016, compared with the three months ended March 31, 2015. Operating revenues decreased by 32.4 percent and gas purchases decreased 52.7 percent during the six months ended March 31, 2016, compared with the six months ended March 31, 2015.

The factors contributing to the (decreases) increases in operating revenues and gas purchases are as follows:

(Millions)	Three Months Ended		Six Months Ended	
	March 31, 2016 v. 2015	Operating revenues	March 31, 2016 v. 2015	Operating revenues
Firm sales	\$(78.2)	\$(35.4)	\$(122.0)	\$(54.1)
Bill credits	(42.0)	(39.2)	(61.6)	(57.6)
Off-system sales	(25.4)	(25.6)	(29.4)	(29.5)

Average BGSS rates ⁽¹⁾	(2.6)	(2.4)	(4.6)	(4.3)
CIP adjustments	28.8	—	45.8	—
Other	(12.8)	(0.7)	(17.5)	(1.1)
Total decrease	\$(132.2)	\$(103.3)	\$(189.3)	\$(146.6)

(1) Operating revenues include changes in sales tax of \$(3) million and \$(4.3) million during the three and six months ended March 31, 2016, compared with the three and six months ended March 31, 2015, respectively.

New Jersey Resources Corporation
Part I

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

(Continued)

The decrease in operating revenues and gas purchases during the three and six months ended March 31, 2016, compared with the three and six months ended March 31, 2015, was due primarily to:

decreased firm sales due primarily to lower usage related to weather being 26.6 percent and 28.5 percent warmer, respectively;

bill credits issued to residential and small commercial customers effective November 1, 2015, that were not issued during fiscal 2015;

lower off-system sales due primarily to a 54.2 percent and 56.4 percent decrease in the average price of gas sold, respectively, partially offset by a 13.8 percent and 42.9 percent increase in volumes, respectively;

a decrease in rider revenues, categorized in other, due primarily to a 23.3 percent and 24.5 percent decrease in usage, respectively; partially offset by

an increase in CIP adjustments of \$25.3 million and \$41.2 million related to weather and \$3.5 million and \$4.6 million related to usage, respectively.

Utility Gross Margin

NJNG's utility gross margin is a non-GAAP financial measure defined as natural gas revenues less natural gas purchases, sales tax, and regulatory rider expenses, and may not be comparable to the definition of gross margin used by others in the natural gas distribution business and other industries. Management believes that utility gross margin provides a more meaningful basis than revenue for evaluating utility operations since natural gas costs, sales tax and regulatory rider expenses are included in operating revenue and passed through to customers and, therefore, have no effect on utility gross margin. Non-GAAP financial measures are not in accordance with, or an alternative to, GAAP and should be considered in addition to, and not as a substitute for, the comparable GAAP measure.

Utility gross margin is described in three major categories: 1) utility firm gross margin from residential and commercial customers who receive natural gas service from NJNG through either sales or transportation tariffs; 2) incentive programs, where revenues generated or savings achieved from BPU-approved off-system sales, capacity release, FRM or storage incentive programs are shared between customers and NJNG; and 3) utility gross margin from interruptible customers who have the ability to switch to alternative fuels and are subject to BPU-approved incentives.

The following provides more information on the components of utility gross margin and associated throughput (Bcf) of natural gas delivered to customers:

	Three Months Ended				Six Months Ended			
	March 31,		March 31,		March 31,		March 31,	
	2016	2015	2016	2015	2016	2015	2016	2015
(\$ in thousands)	Margin	Bcf	Margin	Bcf	Margin	Bcf	Margin	Bcf
Utility gross margin/throughput								
Residential	\$78,673	19.3	\$76,909	25.4	\$133,749	28.2	\$129,753	37.8
Commercial, industrial and other	18,238	3.7	18,966	5.6	31,517	5.4	32,063	7.9

Edgar Filing: NEW JERSEY RESOURCES CORP - Form 10-Q

Firm transportation	19,984	6.2	20,335	7.4	35,531	9.6	36,532	12.0
Total utility firm gross margin/throughput	116,895	29.2	116,210	38.4	200,797	43.2	198,348	57.7
BGSS incentive programs	3,748	55.8	3,093	56.2	8,283	111.7	7,270	109.1
Interruptible/off-tariff agreements	1,166	12.5	1,221	10.3	2,556	28.5	2,074	14.4
Total utility gross margin/throughput	\$121,809	97.5	\$120,524	104.9	\$211,636	183.4	\$207,692	181.2

Utility Firm Gross Margin

Utility firm gross margin is earned from residential and commercial customers who receive natural gas service from NJNG through either sales tariffs, which include a commodity and delivery component, or transportation tariffs, which include a delivery component only.

New Jersey Resources Corporation
Part I

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

(Continued)

The factors contributing to the increases in utility firm gross margin are as follows:

	Three Months Ended March 31, 2016 v. 2015	Six Months Ended March 31, 2016 v. 2015
(Thousands)		
Customer growth	\$ 407	\$1,855
SAVEGREEN	278	594
Total increase	\$ 685	\$2,449

The decrease in firm transportation margin is a result of customers returning to NJNG from third party natural gas providers in NJNG's distribution service territory. The transfer of residential and commercial customers has no net impact on NJNG's total utility firm gross margin because distribution tariff rates are the same for these customer classes.

NJNG's total customers include the following:

	March 31, 2016	March 31, 2015
Firm customers		
Residential	443,932	432,118
Commercial, industrial & other	27,722	27,566
Residential transport	37,146	42,355
Commercial transport	10,227	9,956
Total firm customers	519,027	511,995
Other	65	71
Total customers	519,092	512,066

NJNG added 3,655 and 4,079 new customers and converted 400 and 390 existing customers to natural gas heat and other services during the six months ended March 31, 2016 and 2015, respectively. This customer growth represents an estimated annual increase of approximately .5 Bcf in sales to firm customers, assuming normal weather and usage, which would contribute approximately \$3.1 million annually to utility gross margin.

BGSS Incentive Programs

The factors contributing to the increases (decreases) in utility gross margin generated by BGSS incentive programs are as follows:

	Three Months Ended March 31, (Thousands)	Six Months Ended March 31, (Thousands)

	2016 v. 2015	2016 v. 2015
Storage	\$991	\$1,610
FRM	(298)	(500)
Capacity release	(205)	(208)
Off-system sales	167	111
Total increase	\$655	\$1,013

The increase in the storage incentive program was due primarily to the timing of storage injections. The FRM Program was terminated effective November 1, 2015.

New Jersey Resources Corporation
Part I

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

(Continued)

Operation and Maintenance Expense

A summary and description of the factors contributing to the increases (decreases) in O&M expense is as follows:

	Three Months Ended March 31, 2016 v. 2015	Six Months Ended March 31, 2016 v. 2015
(Thousands)		
Shared corporate costs	\$1,092	\$1,825
Compensation and benefits	455	241
Bad debt	(234)	(855)
Consulting	(259)	(677)
Other	190	358
Total increase	\$1,244	\$892

The increase in O&M expense during the three and six months ended March 31, 2016, compared with the three and six months ended March 31, 2015, was due primarily to:

• increased shared corporate costs resulting primarily from increased head count, as well as increased temporary staffing and consulting services; and

• increased compensation costs due primarily to increased head count, partially offset by reduced pension expense due to an increase in the expected return on assets in the pension plan related to the \$30 million discretionary contribution made in November 2015; partially offset by

• a decrease in bad debt due primarily to a decrease in write-offs of customer receivables; and

• a decrease in consulting costs due primarily to reduced software maintenance and tax audit expenses.

Depreciation Expense

Depreciation expense increased \$951,000 and \$1.6 million during the three and six months ended March 31, 2016, respectively, compared with the three and six months ended March 31, 2015, as a result of additional utility plant being placed into service.

Operating Income

Operating income decreased \$870,000 during the three months ended March 31, 2016, compared with the three months ended March 31, 2015, due primarily to the increases in depreciation and O&M described above, partially offset by the increase in utility gross margin of \$1.3 million as discussed above.

Operating income increased \$1.3 million during the six months ended March 31, 2016, compared with the six months ended March 31, 2015, due primarily to the increase in total utility gross margin of \$3.9 million, partially offset by the increases in depreciation expense and O&M, as previously discussed.

Net Income

Net income increased \$367,000, or 0.8 percent, to \$49 million during the three months ended March 31, 2016, compared with the three months ended March 31, 2015, and increased \$2.8 million, or 3.6 percent, to \$79.5 million during the six months ended March 31, 2016, compared with the six months ended March 31, 2015, due primarily to an increase in other income related to AFUDC interest earned on infrastructure projects, as well as a decrease in the income tax provision due primarily to increased forecasted tax benefits related to AFUDC, partially offset by an increase in interest expense associated with higher long-term debt outstanding. For the three months ended March 31, 2016, compared with the three months ended March 31, 2015, the increased net income was offset by the decreased operating income as discussed above. For the six months ended March 31, 2016, compared with the six months ended March 31, 2015, the increased operating income discussed above also contributed to the increase in net income.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS
(Continued)

Energy Services Segment

Overview

NJRES markets and sells natural gas to wholesale customers and manages natural gas storage and transportation assets throughout major market areas across North America.

NJRES maintains a strategic portfolio of natural gas storage and transportation contracts that it utilizes in conjunction with its market expertise to provide service and value to its customers. Availability of these storage and transportation contracts from a time and location perspective allows NJRES to generate market opportunities by capturing price differentials over specific time horizons and between geographic market locations.

NJRES also provides management of storage and transportation assets for natural gas producers and regulated utilities. These management transactions typically involve the release of producer/utility owned storage and/or transportation capacity in combination with either an obligation to purchase and/or deliver physical natural gas. In addition to the contractual purchase and/or sale of physical natural gas embedded in these agreements, NJRES generates fee-based margin and may provide the producer and/or utility with additional margin based on actual results.

In conjunction with the active management of these contracts, NJRES generates financial margin by simultaneously entering into contracts for the purchase/sale of physical natural gas and financial derivative contracts. In cases where storage is utilized to fulfill these contracts, these forecast sales and/or purchases are economically hedged through the use of financial derivative contracts. The financial derivative contracts consist primarily of exchange-traded futures, options, and swap contracts, and are frequently used to lock in transactional cash flows and help manage volatility in natural gas market prices. Generally, when its storage and transportation contracts are exposed to periods of increased market volatility, NJRES is able to implement strategies that allow them to capture margin by improving the respective time or geographic spreads on a forward basis.

NJRES accounts for its physical commodity contracts and its financial derivative instruments at fair value on the Unaudited Condensed Consolidated Balance Sheets. Changes in the fair value of physical commodity contracts and financial derivative instruments are included in earnings as a component of operating revenue and/or gas purchases, and gas purchases, respectively, on the Unaudited Condensed Consolidated Statements of Operations. Volatility in reported net income at NJRES can occur over periods of time due to changes in the fair value of derivatives as well as timing differences related to certain transactions. Unrealized gains and losses can fluctuate as a result of changes in the price of natural gas, SRECs and foreign currency from the original transaction price compared with the market price of natural gas at each reporting date. Volatility in earnings can also occur as a result of timing differences between the settlement of financial derivatives and the sale of the corresponding physical natural gas. For example, when a financial instrument settles and the natural gas is placed in inventory, the realized gains and losses associated with the financial instrument are recognized in earnings. However, the gains and losses associated with the physical natural gas are not recognized in earnings until the natural gas inventory is sold, at which time NJRES realizes the entire margin on the transaction.

New Jersey Resources Corporation
Part I

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

(Continued)

Operating Results

NJRES' financial results are summarized as follows:

(Thousands)	Three Months Ended		Six Months Ended	
	March 31, 2016	March 31, 2015	March 31, 2016	March 31, 2015
Operating revenues	\$319,958	\$682,204	\$598,651	\$1,285,892
Gas purchases (including demand charges ⁽¹⁾)	293,994	664,495	554,233	1,139,442
Gross margin	25,964	17,709	44,418	146,450
Operation and maintenance	4,174	6,343	7,931	9,331
Depreciation and amortization	23	23	46	45
Other taxes	216	403	453	857
Operating income	21,551	10,940	35,988	136,217
Other income	—	14	72	14
Interest expense, net	168	288	376	801
Income tax provision	7,805	3,923	13,000	49,800
Net income	\$13,578	\$6,743	\$22,684	\$85,630

(1) Costs associated with pipeline and storage capacity that are expensed over the term of the related contracts, which generally varies from less than one year to ten years.

NJRES' portfolio of financial derivative instruments are composed of:

(in Bcf)	Six Months Ended March 31, 2016	2015
Net short futures contracts	88.6	37.9
Net long options	3.6	1.2

Operating Revenues and Gas Purchases

Operating revenues decreased \$362.2 million and gas purchases decreased \$370.5 million during the three months ended March 31, 2016, compared with the three months ended March 31, 2015, due primarily to an approximate 29.9 percent decrease in average gas prices as well as a 22.1 percent decrease in sales volumes. Operating revenues decreased \$687.2 million and gas purchases decreased \$585.2 million during the six months ended March 31, 2016, compared with the six months ended March 31, 2015, due primarily to an approximate 37.5 percent decrease in average gas prices as well as a 21.1 percent decrease in sales volumes. The decreases were due to record warmth across the eastern United States, during the three and six months ended March 31, 2016, compared with the three and six months ended March 31, 2015. Future results at NJRES are subject to volatility in the natural gas market due to weather. Variations in weather may affect earnings during the fiscal year. Demand and volatility in the natural gas market may decrease due to milder temperatures, which can negatively impact NJRES' earnings.

Gross Margin

Gross margin was higher by approximately \$8.3 million during the three months ended March 31, 2016, compared with the three months ended March 31, 2015, due primarily to a decrease of \$63.8 million in unrealized losses on derivative instruments and related transactions as a result of timing differences in the settlement of certain economic hedges, partially offset by the decreases in operating revenues and gas purchases as described above and a decrease of \$22.4 million related to changes in the value of economic inventory hedges.

Gross margin was lower by approximately \$102 million, during the six months ended March 31, 2016, compared with the six months ended March 31, 2015, due primarily to the decreases in operating revenues and gas purchases as described above, as well as a decrease of \$23.8 million in unrealized gains on derivative instruments and a decrease of \$35 million related to changes in the value of economic inventory hedges.

New Jersey Resources Corporation
Part I

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS
(Continued)

Operation and Maintenance Expense

O&M expense decreased \$2.2 million and \$1.4 million, during the three and six months ended March 31, 2016, respectively, compared with the three and six months ended March 31, 2015, due primarily to decreases in incentive compensation expense.

Net Income

Net income increased \$6.8 million during the three months ended March 31, 2016, compared with the three months ended March 31, 2015, due primarily to the higher gross margin and the decrease in O&M expense discussed above, partially offset by increased income tax expense related to the gross margin.

Net income decreased \$62.9 million during the six months ended March 31, 2016, compared with the six months ended March 31, 2015, due primarily to the lower gross margin, partially offset by decreased income tax expense related to the gross margin and the decrease in O&M expense discussed above.

Non-GAAP Financial Measures

Management uses financial margin and NFE, non-GAAP financial measures, when evaluating the operating results of NJRES. Financial margin and NFE are measures of margin and earnings based on eliminating timing differences associated with certain derivative instruments, as discussed above. Management views these measures as more representative of the overall expected economic result and uses these measures to compare NJRES' results against established benchmarks and earnings targets as these measures eliminate the impact of volatility on GAAP earnings as a result of timing differences associated with these derivative instruments. To the extent that there are unanticipated changes in the markets or to the effectiveness of the economic hedges, NJRES' non-GAAP results can differ from what was originally planned at the beginning of the transaction. Non-GAAP financial measures are not in accordance with, or an alternative to, GAAP and should be considered in addition to, and not as a substitute for, the comparable GAAP measure.

When NJRES reconciles the most directly comparable GAAP measure to both financial margin and NFE, the current period unrealized gains and losses on the derivatives are excluded as a reconciling item. Financial margin and NFE also exclude the effects of economic hedging of the value of our natural gas in storage and, therefore, only include realized gains and losses related to natural gas sold out of inventory, effectively matching the full earnings effects of the derivatives with realized margins on the related physical gas flows.

Financial Margin

The following table is a computation of NJRES' financial margin:

(Thousands)	Three Months Ended		Six Months Ended	
	March 31, 2016	2015	March 31, 2016	2015
Operating revenues	\$319,958	\$682,204	\$598,651	\$1,285,892
Less: Gas purchases	293,994	664,495	554,233	1,139,442
Add:				

Edgar Filing: NEW JERSEY RESOURCES CORP - Form 10-Q

Unrealized loss (gain) on derivative instruments and related transactions (1)	6,432	70,219	4,045	(19,781)
Effects of economic hedging related to natural gas inventory	(1,054)(23,450)2,759	(32,215)
Financial margin	\$31,342	\$64,478	\$51,222	\$94,454	

(1) Includes unrealized (gains) related to an intercompany transaction between NJNG and NJRES that have been eliminated in consolidation of approximately \$(3.3) million and \$(1.1) million for the three months ended March 31, 2016, and 2015, respectively, and \$(2) million and \$(263,000) for the six months ended March 31, 2016 and 2015, respectively.

New Jersey Resources Corporation
Part I

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

(Continued)

A reconciliation of operating income, the closest GAAP financial measurement, to NJRES' financial margin is as follows:

(Thousands)	Three Months Ended		Six Months Ended	
	March 31, 2016	March 31, 2015	March 31, 2016	March 31, 2015
Operating income	\$21,551	\$10,940	\$35,988	\$136,217
Add:				
Operation and maintenance	4,174	6,343	7,931	9,331
Depreciation and amortization	23	23	46	45
Other taxes	216	403	453	857
Subtotal - Gross margin	25,964	17,709	44,418	146,450
Add:				
Unrealized loss (gain) on derivative instruments and related transactions	6,432	70,219	4,045	(19,781)
Effects of economic hedging related to natural gas inventory	(1,054)	(23,450)	2,759	(32,215)
Financial margin	\$31,342	\$64,478	\$51,222	\$94,454

Financial margin decreased \$33.1 million and \$43.2 million during the three and six months ended March 31, 2016, respectively, compared with the three and six months ended March 31, 2015, due primarily to the timing of certain transactions related to storage and narrower price spreads related to the decreased average gas prices discussed above resulting in lower financial margin from transportation and storage assets.

Net Financial Earnings

A reconciliation of NJRES' net (loss) income, the most directly comparable GAAP financial measurement to NFE is as follows:

(Thousands)	Three Months Ended		Six Months Ended	
	March 31, 2016	March 31, 2015	March 31, 2016	March 31, 2015
Net income	\$13,578	\$6,743	\$22,684	\$85,630
Add:				
Unrealized loss (gain) on derivative instruments and related transactions	6,432	70,219	4,045	(19,781)
Effects of economic hedging related to natural gas inventory	(1,054)	(23,450)	2,759	(32,215)
Tax adjustments	(1,951)	(17,196)	(2,469)	19,118
Net financial earnings	\$17,005	\$36,316	\$27,019	\$52,752

NFE decreased \$19.3 million and \$25.7 million during the three and six months ended March 31, 2016, respectively, compared with the three and six months ended March 31, 2015, due primarily to lower financial margin, partially offset by lower taxes and O&M, as previously discussed.

Future results are subject to NJRES' ability to expand its wholesale sales and service activities and are contingent upon many other factors, including an adequate number of appropriate and credit qualified counterparties, volatility in the natural gas market due to weather or other factors, availability of transportation and storage arbitrage

opportunities, sufficient liquidity in the overall energy trading market, supply and demand for natural gas and continued access to liquidity in the capital markets.

Clean Energy Ventures Segment

Overview

Our Clean Energy Ventures segment actively pursues opportunities in the clean energy markets, including solar and onshore wind. Clean Energy Ventures has entered into various agreements to install solar net-metered systems for residential and commercial customers, as well as large commercial grid-connected projects. In addition, Clean Energy Ventures has entered into various long-term agreements, including PPAs, to supply energy from wind and solar projects.

New Jersey Resources Corporation
Part I

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

(Continued)

Solar

Since its inception, Clean Energy Ventures has placed a total of 120.2 MW of solar capacity into service and as of March 31, 2016, had 22.9 MW under construction. We estimate total solar-related capital expenditures for projects to be placed in service during fiscal 2016 to be between \$75 million and \$95 million. There were no commercial projects placed into service during the six months ended March 31, 2016. During the six months ended March 31, 2015, NJRCEV placed into service two commercial project totaling approximately 16.2 MW of solar capacity.

As part of its solar investment portfolio, NJRCEV operates a residential solar program, The Sunlight Advantage®, that provides qualifying homeowners the opportunity to have a solar system installed at their home with no installation or maintenance expenses. NJRCEV owns, operates and maintains the system over the life of the contract in exchange for monthly lease payments. NJRCEV's residential solar leasing program installed approximately 1.8 MW of capacity on 207 homes and 1.2 MW of capacity on 127 homes during the three months ended March 31, 2016 and 2015, respectively, and 2.5 MW of capacity on 291 homes and 2.6 MW of capacity on 272 homes during the six months ended March 31, 2016 and 2015, respectively.

Once a solar installation commences operations and is properly registered, each MWh of electricity produced creates an SREC that represents the renewable energy attribute of the solar-electricity generated that can be sold to third parties, predominantly load-serving entities that are required to comply with the solar requirements under New Jersey's renewable portfolio standard. In addition, under the recently updated federal tax guidelines, projects that are placed in service through December 31, 2019, qualify for a 30 percent federal ITC.

SREC activity consisted of the following:

	Six Months Ended March 31,	
	2016	2015
Beginning balance as of October 1,	33,203	29,970
SRECs generated	57,595	39,994
SRECs delivered	(37,232)	(34,728)
Ending balance as of March 31,	53,566	35,236

NJRCEV hedges a portion of its expected SREC production through the use of forward sales contracts. The following table reflects the hedged percentage of SREC inventory and projected SREC production related to its in-service commercial and residential assets:

Fiscal Year Percent of SRECs Hedged

2016	100%
2017	91%
2018	73%

Onshore Wind

Clean Energy Ventures invests in small to mid-size onshore wind projects that fit its investment profile, including the following as of March 31, 2016:

- \$20.3 million, 9.7 MW project in Two Dot, Montana that was completed in June 2014;
- \$42.1 million, 20 MW project in Carroll County, Iowa that was completed in January 2015;
- \$84.8 million, 50.7 MW project in Rush County, Kansas that was completed in December 2015; and
- \$84 million, 39.9 MW project in Somerset County, Pennsylvania that is currently under construction and which we expect to be completed in the first quarter of fiscal 2017.

The wind projects are eligible for PTCs for a 10-year period following commencement of operations and have power purchase agreements of various terms in place, which govern the sale of energy, capacity and renewable energy credits.

New Jersey Resources Corporation
Part I

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

(Continued)

Clean Energy Ventures' investments are subject to a variety of factors, such as timing of construction schedules, permitting and regulatory processes, volatility of energy prices, the ability to secure PPAs, delays related to electric grid interconnection, which can affect our ability to commence operations on a timely basis or, at all, economic trends, the ability to access capital or allocation of capital to other investments or business opportunities and other unforeseen events. Solar projects not placed in service, as originally planned prior to the end of a reporting period, may result in a failure to qualify for ITCs and changes in prices on the unhedged portion of SREC production could have a significant adverse impact on earnings. Wind projects for which construction of a facility begins after December 31, 2016 through December 31, 2019, will be subject to reduced PTCs, and could have a significant adverse impact on 10 years of forward earnings. In addition, since the primary contributors toward the value of qualifying power projects are tax incentives and SRECs, changes in the federal statutes related to the ITC or PTC or in the marketplace and/or relevant legislation surrounding renewable energy credits, could also significantly affect earnings.

Operating Results

The financial results of NJRCEV are summarized as follows:

(Thousands)	Three Months Ended		Six Months Ended	
	March 31,		March 31,	
	2016	2015	2016	2015
Operating revenues	\$7,662	\$4,068	\$15,456	\$10,303
Operation and maintenance	4,775	3,818	8,632	6,951
Depreciation and amortization	5,876	4,297	10,986	7,888
Other taxes	203	118	456	332
Operating (loss)	(3,192)	(4,165)	(4,618)	(4,868)
Other income (expense), net	431	24	549	(1,570)
Interest expense, net	2,552	1,661	4,605	3,478
Income tax (benefit)	(13,915)	(9,042)	(25,502)	(28,763)
Net Income	\$8,602	\$3,240	\$16,828	\$18,847

Operating Revenues

Operating revenues consist of the following:

The average SREC sales price was \$212 and \$173 during the six months ended March 31, 2016, and 2015, respectively.

New Jersey Resources Corporation
Part I

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

(Continued)

There are no direct production costs associated with the revenue generation by our solar assets. All related costs are included as a component of O&M expenses on the Unaudited Condensed Consolidated Statements of Operations, including such expenses as facility maintenance and various fees.

Operation and Maintenance Expense

O&M expense increased \$957,000 and \$1.7 million during the three and six months ended March 31, 2016, respectively, compared with the three and six months ended March 31, 2015, due primarily to additional maintenance and leasing costs associated with wind and solar projects placed in service and higher shared services costs due primarily to increased compensation costs.

Depreciation Expense

Depreciation expense increased \$1.6 million and \$3.1 million during the three and six months ended March 31, 2016, respectively, compared with the three and six months ended March 31, 2015, as a result of increases in solar and wind capital additions.

Income Tax (Benefit)

Our effective tax rate is significantly impacted by the amount of tax credits forecast to be earned during the fiscal year. GAAP requires us to estimate our annual effective tax rate and use this rate to calculate its year-to-date tax provision. Based on NJRCEV's forecast of solar projects to be completed and wind production during the fiscal year, our estimated annual effective tax rate for fiscal 2016 is 17.7 percent and \$11.7 million and \$21.9 million related to tax credits, net of deferred taxes, were recognized during the three and six months ended March 31, 2016, respectively. The effective annual effective tax rate as of March 31, 2015, was 24.9 percent and \$6.7 million and \$24.7 million related to tax credits, net of deferred taxes, were recognized during the three and six months ended March 31, 2015, respectively.

Net Income

Net income increased \$5.4 million during the three months ended March 31, 2016, compared with the three months ended March 31, 2015, due primarily to:

- an increase in tax benefits recognized due primarily to a lower estimated annual effective tax rate, partially offset by higher quarterly consolidated income; and
- an increase in operating revenues as described above; partially offset by
- increased costs related to depreciation and O&M as discussed above; and
- an increase in interest expense due to higher debt associated with capital expenditures.

Net income decreased \$2 million, during the six months ended March 31, 2016, compared with the six months ended March 31, 2015, due primarily to:

• increased costs related to depreciation and O&M as discussed above;

• a decrease in tax benefit recognized due primarily to a lower estimated annual effective tax rate coupled with lower year-to-date consolidated income; and

• an increase in interest expense due to higher debt associated with its capital expenditures; partially offset by

• an increase in operating revenues as discussed above.

Non-GAAP Financial Measures

Management of the Company uses NFE, a non-GAAP financial measure, when evaluating the operating results of Clean Energy Ventures. For NFE purposes an annual estimated effective tax rate is calculated and any necessary quarterly tax adjustment is applied to NJRCEV, as such adjustment is primarily related to tax credits generated by NJRCEV. Accordingly, for NFE purposes, the effective tax rate for fiscal 2016 is estimated at 16.6 percent and \$14.9 million and \$24.5 million of tax credits, net of deferred taxes, were recognized during the three and six months ended March 31, 2016, respectively.

New Jersey Resources Corporation
Part I

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

(Continued)

During the three and six months ended March 31, 2015, the effective tax rate for fiscal 2015 was estimated at 20 percent and \$16.5 million and \$27.9 million of tax credits, net of deferred taxes, were recognized during the three and six months ended March 31, 2015, respectively. Since the effective tax rate is based on certain forecasted assumptions, including estimates surrounding completion of projects, the rate and resulting NFE are subject to change. The details of such tax adjustments can be found in the table below. Non-GAAP financial measures are not in accordance with, or an alternative to GAAP, and should be considered in addition to, and not as a substitute for the comparable GAAP measure.

A reconciliation of NJRCEV's net income, the most directly comparable GAAP financial measurement to NFE is as follows:

	Three Months Ended March 31,		Six Months Ended March 31,	
(Thousands)	2016	2015	2016	2015
Net income	\$8,602	\$3,240	\$16,828	\$18,847
Add:				
Tax adjustments	3,204	9,770	2,483	3,171
Net financial earnings	\$11,806	\$13,010	\$19,311	\$22,018

Midstream Segment

Overview

Our Midstream segment invests in natural gas assets, such as natural gas transportation and storage facilities. We believe that acquiring, owning and developing these midstream assets, which operate under a tariff structure that has either regulated or market-based rates, can provide a growth opportunity for us. To that end, we have a 50 percent ownership interest in Steckman Ridge, a storage facility that operates under market-based rates and a 20 percent ownership interest in PennEast, a natural gas pipeline, which we estimate will be completed and operational during the last quarter of fiscal 2018 or the first quarter of fiscal 2019. As of March 31, 2016, our net investments in Steckman Ridge and PennEast were \$124.4 million and \$12.5 million, respectively.

During fiscal 2015, NJR Midstream Holdings Corporation, through its subsidiary, NJNR Pipeline Company, also held a 5.53 percent ownership interest in Iroquois. On September 29, 2015, NJNR Pipeline Company exchanged its ownership interest in Iroquois with Dominion Midstream Partners, L.P. for 1.84 million DM Common Units.

Operating Results

The financial results of Midstream are summarized as follows:

	Three Months Ended March 31,		Six Months Ended March 31,	
(Thousands)	2016	2015	2016	2015
Equity in earnings of affiliates	\$3,508	\$4,581	\$7,053	\$8,356
Operation and maintenance	\$461	\$186	\$609	\$333

Other income	\$843	\$242	\$1,475	\$481
Interest expense, net	\$130	\$210	\$172	\$460
Income tax provision	\$1,530	\$1,818	\$3,170	\$3,311
Net income	\$2,228	\$2,604	\$4,572	\$4,724

Equity in earnings, which is driven primarily by storage revenues generated by Steckman Ridge transportation revenues generated by Iroquois, is as follows:

	Three Months		Six Months	
	Ended	Ended	Ended	Ended
	March 31,	March 31,	March 31,	March 31,
(Thousands)	2016	2015	2016	2015
Steckman Ridge	\$3,524	\$2,764	\$7,069	\$5,493
Iroquois ⁽¹⁾	—	1,817	—	2,863
PennEast	(16)	—	(16)	—
Total equity in earnings	\$3,508	\$4,581	\$7,053	\$8,356

(1) Transportation revenues generated by Iroquois ended September 29, 2015.

New Jersey Resources Corporation
Part I

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

(Continued)

Equity in earnings of affiliates decreased \$1.1 million and \$1.3 million during the three and six months ended March 31, 2016, respectively, compared with the three and six months ended March 31, 2015, due primarily to the exchange of our ownership interest in Iroquois, partially offset by increases in storage service revenue and demand for hub services at Steckman Ridge.

Other income increased \$601,000 and \$994,000 for the three and six months ended March 31, 2016, respectively, compared with the three and six months ended March 31, 2015, due to dividend income from the DM Common Units.

Home Services and Other Operations

Overview

The financial results of Home Services and Other consist primarily of the operating results of NJRHS, CR&R, and NJR Energy. NJRHS provides service, sales and installation of appliances to approximately 115,000 service contract customers and has been focused on growing its installation business and expanding its service contract customer base. CR&R seeks additional opportunities to enhance the value of its building and undeveloped land. NJR Energy invests in other energy-related ventures. Home Services and Other also includes organizational expenses incurred at NJR.

Operating Results

The consolidated financial results of Home Services and Other are summarized as follows:

(Thousands)	Three Months Ended		Six Months Ended	
	March 31,		March 31,	
	2016	2015	2016	2015
Operating revenues	\$7,931	\$8,587	\$17,504	\$17,598
Operation and maintenance	\$10,383	\$10,140	\$19,776	\$18,995
Energy and other taxes	\$927	\$893	\$1,910	\$1,936
Income tax (benefit)	\$(1,456)	\$(972)	\$(1,744)	\$(1,424)
Net (loss)	\$(2,040)	\$(1,359)	\$(2,623)	\$(1,951)

Operating revenue decreased \$656,000 and \$94,000 during the three and six months ended March 31, 2016, respectively, compared with the three and six months ended March 31, 2015, due primarily to a decrease in installations at NJRHS resulting from warmer weather as well as a decrease in generator sales, partially offset by increased solar installations and increased contract revenue as a result of existing customers upgrading to the total comfort and platinum comfort plans and expanded service contract product line.

O&M expense increased \$243,000 and \$781,000 during the three and six months ended March 31, 2016, respectively, compared with the three and six months ended March 31, 2015, due primarily to increased labor costs resulting from increased head count and increased consulting fees and temporary staffing.

Energy & other taxes remained relatively flat during the three and six months ended March 31, 2016, compared with the three and six months ended March 31, 2015.

Income tax benefit increased \$484,000 and \$320,000 during the three and six months ended March 31, 2016, respectively, compared with the three and six months ended March 31, 2015, due primarily to the decrease in operating results and the increase in O&M discussed above.

Net loss increased \$681,000 and \$672,000 during the three and six months ended March 31, 2016, respectively, compared with the three and six months ended March 31, 2015, due primarily to the decrease in revenue and the increase in O&M, partially offset by the increase in income tax benefit as discussed above.

New Jersey Resources Corporation

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

(Continued)

Liquidity and Capital Resources

Our objective is to maintain an efficient consolidated capital structure that reflects the different characteristics of each business segment and business operations and provides adequate financial flexibility for accessing capital markets as required.

Our consolidated capital structure was as follows:

	March 31, 2016		September 30, 2015	
Common stock equity	55	%	54	%
Long-term debt	38		42	
Short-term debt	7		4	
Total	100	%	100	%

Common Stock Equity

We satisfy our external common equity requirements, if any, through issuances of our common stock, including the proceeds from stock issuances under our DRP. The DRP allows us, at our option, to use treasury shares or newly issued shares to raise capital. On December 14, 2015, we registered an additional 5 million shares of our common stock for issuance under the DRP. We raised \$8.2 million and \$7.7 million of equity through the DRP, by issuing approximately 260,000 and 279,000 shares of treasury stock, during the six months ended March 31, 2016 and 2015, respectively. We also raised approximately \$19.8 million of equity by issuing approximately 688,000 new shares through the waiver discount feature of the DRP during the six months ended March 31, 2015. We issued no new shares through the waiver discount feature of the DRP during the six months ended March 31, 2016.

In 1996, the Board of Directors authorized us to implement a share repurchase program, which was expanded seven times since the inception of the program. As of March 31, 2016, we have repurchased a total of approximately 16.9 million of those shares and may repurchase an additional 2.6 million shares under the approved program. There were 34,700 and 108,400 shares repurchased during the six months ended March 31, 2016 and 2015, respectively.

Debt

NJR and its unregulated subsidiaries generally rely on cash flows generated from operating activities and the utilization of committed credit facilities to provide liquidity to meet working capital and short-term debt financing requirements. NJNG also relies on the issuance of commercial paper for short-term funding. NJR and NJNG periodically access the capital markets to fund long-life assets through the issuance of long-term debt securities.

We believe that our existing borrowing availability and cash flow from operations will be sufficient to satisfy our and our subsidiaries' working capital, capital expenditures and dividend requirements for the next 12 months. NJR, NJNG, NJRCEV and NJRES currently anticipate that each of their financing requirements for the next 12 months will be met primarily through the issuance of short and long-term debt, meter sale-leasebacks and proceeds from our DRP.

We believe that as of March 31, 2016, NJR and NJNG were, and currently are, in compliance with all existing debt covenants, both financial and non-financial.

Short-Term Debt

We use our short-term borrowings primarily to finance our share repurchases, NJRES' short-term liquidity needs and, on an initial basis, NJRCEV's investments and our Midstream segment's PennEast contributions. NJRES' use of high volume storage facilities and anticipated pipeline park-and-loan arrangements, combined with related economic hedging activities in the volatile wholesale natural gas market, create significant short-term cash requirements.

As of March 31, 2016, NJR had a revolving credit facility totaling \$425 million, as described below, with \$286.4 million available under the facility.

New Jersey Resources Corporation
Part I

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

(Continued)

NJNG satisfies its debt needs by issuing short- and long-term debt based on its financial profile. The seasonal nature of NJNG's operations creates large short-term cash requirements, primarily to finance natural gas purchases and customer accounts receivable. NJNG obtains working capital for these requirements, and for the temporary financing of construction and MGP remediation expenditures and energy tax payments, based on its financial profile, through the issuance of commercial paper supported by the NJNG Credit Facility or through short-term bank loans under the NJNG Credit Facility.

NJNG's commercial paper is sold through several commercial banks under an issuing and paying agency agreement and is supported by the \$250 million NJNG Credit Facility. As of March 31, 2016, the unused amount available under the NJNG Credit Facility, including amounts allocated to the backstop under the commercial paper program and the issuance of letters of credit, was \$212.3 million.

Due to the seasonal nature of natural gas prices and demand and because inventory levels are built up during its natural gas injection season (April through October), NJR and NJNG's short-term borrowings tend to peak in November and December.

Short-term borrowings were as follows:

(Thousands)	Three Months Ended March 31, 2016	Six Months Ended March 31, 2016
NJR		
Notes Payable to banks:		
Balance at end of period	\$ 115,500	\$ 115,500
Weighted average interest rate at end of period	1.36 %	1.36 %
Average balance for the period	\$ 146,865	\$ 111,884
Weighted average interest rate for average balance	1.34 %	1.25 %
Month end maximum for the period	\$ 170,000	\$ 170,000
NJNG		
Commercial Paper and Notes Payable to banks:		
Balance at end of period	\$ 37,000	\$ 37,000
Weighted average interest rate at end of period	0.46 %	0.46 %
Average balance for the period	\$ 65,684	\$ 69,934
Weighted average interest rate for average balance	0.46 %	0.34 %
Month end maximum for the period	\$ 77,000	\$ 96,000

NJR

As noted above, based on its average borrowings during the six months ended March 31, 2016, NJR's average interest rate was 1.25 percent, resulting in interest expense of \$717,000.

As of March 31, 2016, NJR had six letters of credit outstanding totaling \$23.1 million, which reduced the amount available under the NJR Credit Facility by the same amount. NJR does not anticipate that these letters of credit will be drawn upon by the counterparties.

NJR's \$100 million uncommitted Line of Credit Agreement with Santander Bank, N.A. expired on October 24, 2015, and was not renewed.

Neither NJNG nor its assets are obligated or pledged to support the NJR Credit Facility.

NJNG

As noted above, NJNG's weighted average interest rate on outstanding commercial paper was .34 percent during the six months ended March 31, 2016, resulting in interest expense of \$119,400.

As of March 31, 2016, NJNG had two letters of credit outstanding for \$731,000, which reduced the amount available under NJNG's committed credit facility by the same amount. NJNG does not anticipate that these letters of credit will be drawn upon by the counterparties.

New Jersey Resources Corporation
Part I

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS
(Continued)

Short-Term Debt Covenants

Borrowings under the NJR Credit Facility and NJNG Credit Facility are conditioned upon compliance with a maximum leverage ratio (consolidated total indebtedness to consolidated total capitalization as defined in the applicable agreements), of not more than .65 to 1.00 at any time. These revolving credit facilities contain customary representations and warranties for transactions of this type. They also contain customary events of default and certain covenants that will limit NJR's or NJNG's ability, beyond agreed upon thresholds, to, among other things:

- incur additional debt;
- incur liens and encumbrances;
- make dispositions of assets;
- enter into transactions with affiliates; and
- merge, consolidate, transfer, sell or lease all or substantially all of the borrower's or guarantors' assets.

These covenants are subject to a number of exceptions and qualifications set forth in the applicable agreements.

Default Provisions

The agreements governing our long-term and short-term debt obligations include provisions that, if not complied with, could require early payment or similar actions. Default events include, but are not limited to, the following:

- defaults for non-payment;
- defaults for breach of representations and warranties;
- defaults for insolvency;
- defaults for non-performance of covenants;
- cross-defaults to other debt obligations of the borrower; and
- guarantor defaults.

The occurrence of an event of default under these agreements could result in all loans and other obligations of the borrower becoming immediately due and payable and the termination of the credit facilities or term loan.

Long-Term Debt

NJR

NJR has outstanding \$50 million of 6.05 percent senior unsecured notes due September 2017, \$25 million of 2.51 percent senior notes due September 2018, \$50 million of 3.25 percent senior notes due September 2022 and \$100 million of 3.48 percent senior notes due November 2024, which were issued under private placement debt shelf facilities. NJR has an unsecured, uncommitted \$100 million private placement shelf note agreement that expires September 26, 2016. As of March 31, 2016, \$100 million remains available for borrowing on that shelf facility.

On March 22, 2016, NJR entered into a Note Purchase Agreement, under which we agreed to sell, on August 18, 2016, \$50 million of the Company's 3.2 percent senior notes due August 18, 2023, and \$100 million of the Company's 3.54 percent senior notes due August 18, 2026. The notes will be guaranteed by certain unregulated subsidiaries of the Company. The notes will be unsecured. The proceeds of the notes will be used for general corporate purposes, including working capital and capital expenditures.

Neither NJNG nor its assets are obligated or pledged to support NJR's long-term debt.

New Jersey Resources Corporation
Part I

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS
(Continued)

NJNG

As of March 31, 2016, NJNG's long-term debt consisted of \$485.8 million in fixed-rate debt issuances secured by the Mortgage Indenture, with maturities ranging from 2018 to 2045, \$97 million in secured variable rate debt with maturities ranging from 2027 to 2041 and \$36.5 million in capital leases with various maturities ranging from 2016 to 2022.

NJR is not obligated directly or contingently with respect to the NJNG notes or the FMB.

Long-Term Debt Covenants and Default Provisions

The NJR and NJNG long-term debt instruments contain customary representations and warranties for transaction of their type. They also contain customary events of default and certain covenants that will limit NJR or NJNG's ability beyond agreed upon thresholds to, among other things:

- incur additional debt (including a covenant that limits the amount of consolidated total debt of the borrower at the end of a fiscal quarter to 65 percent of the consolidated total capitalization of the borrower, as those terms are defined in the applicable agreements, and a covenant limiting priority debt to 20 percent of the borrower's consolidated total capitalization, as those terms are defined in the applicable agreements);
- incur liens and encumbrances;
- make loans and investments;
- make dispositions of assets;
- make dividends or restricted payments;
- enter into transactions with affiliates; and
- merge, consolidate, transfer, sell or lease substantially all of the borrower's assets.

The aforementioned covenants are subject to a number of exceptions and qualifications set forth in the applicable note purchase agreements.

In addition, the FMB issued by NJNG under the Mortgage Indenture are subject to certain default provisions. Events of Default, as defined in the Mortgage Indenture, consist mainly of:

- failure for 30 days to pay interest when due;
- failure to pay principal or premium when due and payable;
- failure to make sinking fund payments when due;

- failure to comply with any other covenants of the Mortgage Indenture after 30 days' written notice from the Trustee;
- failure to pay or provide for judgments in excess of \$30 million in aggregate amount within 60 days of the entry thereof; or
- certain events that are or could be the basis of a bankruptcy, reorganization, insolvency or receivership proceeding.

Upon the occurrence and continuance of such an Event of Default, the Mortgage Indenture, subject to any provisions of law applicable thereto, provides that the Trustee may take possession and conduct the business of the NJNG, may sell the trust estate, or proceed to foreclose the lien of the Mortgage Indenture. The interest rate on defaulted principal and interest, to the extent permitted by law, on the FMB issued under the Mortgage Indenture is the rate stated in the applicable supplement or, if no such rate is stated, six percent per annum.

New Jersey Resources Corporation
Part I

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS
(Continued)

Sale-Leaseback

NJNG received \$7.1 million and \$7.2 million in December 2015 and 2014, respectively, in connection with the sale-leaseback of its natural gas meters. NJNG continues to evaluate this sale-leaseback program based on current market conditions.

Contractual Obligations

NJNG's total capital expenditures are projected to be \$203.4 million and \$318.2 million, in fiscal 2016 and 2017, respectively. Total capital expenditures spent or accrued during the six months ended March 31, 2016 were \$83.9 million.

NJNG expects to fund its obligations with a combination of cash flow from operations, cash on hand, issuance of commercial paper, available capacity under its revolving credit facility and the issuance of long-term debt.

As of March 31, 2016, NJNG's future MGP expenditures are estimated to be \$178.5 million. For a more detailed description of MGP see Note 12. Commitments and Contingent Liabilities in the accompanying Unaudited Condensed Consolidated Financial Statements.

Estimated capital expenditures are reviewed on a regular basis and may vary based on the ongoing effects of regulatory constraints, environmental regulations, unforeseen events, and the ability to access capital.

NJRCEV's expenditures include distributed power projects that support our goal to promote clean energy. Accordingly, NJRCEV enters into agreements to install solar equipment involving both residential and commercial projects. During the six months ended March 31, 2016, capital expenditures spent related to the purchase and installation of solar equipment were \$31.7 million. An additional \$53.2 million has been committed or accrued for solar projects to be placed into service during fiscal 2016 and beyond. We estimate solar-related capital expenditures placed in service in fiscal 2016 will be between \$75 million and \$95 million.

During the first quarter of fiscal 2016, NJRCEV commenced construction of an \$84 million, 39.9 MW onshore wind project in Somerset County, Pennsylvania which is expected to be completed in the first quarter of fiscal 2017.

As of March 31, 2016, a total of \$39.2 million has been spent and an additional \$47.1 million has been committed or accrued for wind projects. In fiscal 2016, NJRCEV estimates that its wind-related capital expenditures will range between \$80 million and \$100 million.

Capital expenditures related to distributed power projects are subject to change due to a variety of factors that may affect our ability to commence operations at these projects on a timely basis or, at all, including logistics associated with the start-up of residential and commercial solar projects, such as timing of construction schedules, the permitting and regulatory process, any delays related to electric grid interconnection, economic trends, unforeseen events and the ability to access capital or allocation of capital to other investments or business opportunities.

We expect our expenditures related to our investment in the PennEast pipeline project to total between \$10 million and \$15 million in fiscal 2016.

NJRES does not currently anticipate any significant capital expenditures in fiscal 2016 and 2017.

Off-Balance-Sheet Arrangements

Our off-balance-sheet arrangements consist of guarantees covering approximately \$283.4 million of natural gas purchases, SREC sales and demand fee commitments and outstanding letters of credit totaling \$23.8 million, as noted above.

56

New Jersey Resources Corporation
Part I

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS
(Continued)

Cash Flow

Operating Activities

Cash flows from operating activities during the six months ended March 31, 2016, totaled \$114.8 million compared with \$326.5 million during the six months ended March 31, 2015. Operating cash flows are primarily affected by variations in working capital, which can be impacted by several factors, including:

- seasonality of our business;
- fluctuations in wholesale natural gas prices and other energy prices, including changes in derivative asset and liability values;
- timing of storage injections and withdrawals;
- the deferral and recovery of gas costs;
- changes in contractual assets utilized to optimize margins related to natural gas transactions;
- broker margin requirements;
- timing of the collections of receivables and payments of current liabilities;
- volumes of natural gas purchased and sold; and
- timing of SREC deliveries.

The decrease of \$211.7 million in operating cash flows during the six months ended March 31, 2016, compared with the six months ended March 31, 2015, was impacted by:

•lower commodity prices, as well as decrease in market volatility, which resulted in a reduction in sales volumes and contributed to a decrease in profitability and working capital at NJRES;

•lower usage related to warmer winter weather, coupled with bill credits of \$61.6 million issued to NJNG's customers during fiscal 2016 for overrecovered gas costs; and

•a discretionary contribution of \$30 million to our pension plan during fiscal 2016.

Investing Activities

Cash flows used in investing activities totaled \$171.4 million during six months ended March 31, 2016, compared with \$160.2 million during the six months ended March 31, 2015. The increase of \$11.2 million was due primarily to an increase in utility plant expenditures of \$26.4 million, partially offset by a decrease in capital expenditures of \$17.5 million related primarily to wind projects at NJRCEV. NJR also contributed an additional \$4.7 million for its

investment in PennEast during six months ended March 31, 2016.

Financing Activities

Financing cash flows generally are seasonal in nature and are impacted by the volatility in pricing in the natural gas and other energy markets. NJNG's inventory levels are built up during its natural gas injection season (April through October) and reduced during withdrawal season (November through March) in response to the supply requirements of its customers. Changes in financing cash flows can also be impacted by gas management and marketing activities at NJRES and distributed power investments at NJRCEV.

Cash flows from financing activities totaled \$53.5 million during the six months ended March 31, 2016, compared with \$(65.1) million cash flows used in financing activities during the six months ended March 31, 2015. The increase of \$118.6 million is due primarily to increased short-term borrowings at NJR, partially offset by the issuance of \$100 million in long-term debt for

New Jersey Resources Corporation
Part I

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

(Continued)

NJR during the six months ended March 31, 2015, along with a decrease in proceeds from the issuance of common stock when compared with the six months ended March 31, 2015, during which 688,000 new shares were issued through the waiver discount feature of the DRP.

Credit Ratings

On January 30, 2014, Moody's upgraded NJNG's senior secured rating from Aa3 to Aa2, while maintaining a stable outlook. The rating upgrade was driven primarily by the overall credit supportiveness of the regulatory environment under which NJNG operates. In its review of NJNG's credit rating, Moody's considered the BPU's continued support of NJNG's rate mechanisms, which allows for timely recovery of costs, including those associated with NJNG's BGSS and CIP. In addition, the favorable recovery of investments related to NJNG's infrastructure and energy efficiency programs factored into the rating upgrade.

The table below summarizes NJNG's current credit ratings issued by two rating entities, S&P and Moody's

	Standard and Poor's	Moody's
Corporate Rating	A	N/A
Commercial Paper	A-1	P-1
Senior Secured	A+	Aa2
Ratings Outlook	Stable	Stable

These ratings were re-affirmed by each agency respectively prior to December 31, 2015. NJNG's S&P and Moody's ratings are investment-grade ratings. NJR is not a rated entity.

Although NJNG is not party to any lending agreements that would accelerate the maturity date of any obligation caused by a failure to maintain any specific credit rating, if such ratings are downgraded below investment grade, borrowing costs could increase, as would the costs of maintaining certain contractual relationships and future financing and our access to capital markets would be reduced. Even if ratings are downgraded without falling below investment grade, NJR and NJNG could face increased borrowing costs under their credit facilities. A rating set forth above is not a recommendation to buy, sell or hold NJR's or NJNG's securities and may be subject to revision or withdrawal at any time. Each rating set forth above should be evaluated independently of any other rating.

The timing and mix of any external financings will target a common equity ratio that is consistent with maintaining NJNG's current short-term and long-term credit ratings.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Financial Risk Management

Commodity Market Risks

Natural gas is a nationally traded commodity. Its prices are determined effectively by the NYMEX, ICE and over-the-counter markets. The prices on the NYMEX/CME, ICE and over-the-counter markets generally reflect the national balance of natural gas supply and demand, but are also significantly influenced from time to time by other

events.

Our regulated and deregulated businesses are subject to market risk due to fluctuations in the price of natural gas. To economically hedge against such fluctuations, we have entered into forwards, futures, options and swap agreements. To manage these derivative instruments, we have well-defined risk management policies and procedures that include daily monitoring of volumetric limits and monetary guidelines. Our natural gas businesses are conducted through three of our operating subsidiaries. NJNG is a regulated utility that uses futures, options and swaps to economically hedge against price fluctuations, and its recovery of natural gas costs is governed by the BPU. NJRES uses futures, options, swaps and physical contracts to economically hedge purchases and sales of natural gas. Financial derivatives have historically been transacted on an exchange and cleared through an FCM, thus requiring daily cash margining for a majority of NJRES' and NJNG's positions. As a result of the Dodd-Frank Act, certain NJRES and NJNG transactions that were previously executed in the over-the-counter markets are now cleared through an FCM, resulting in increased margin requirements. The related cash flow impact from the increased requirements is expected to

58

New Jersey Resources Corporation
Part I

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK
(Continued)

be minimal. Non-financial (i.e., physical) derivatives utilized by us have received statutory exclusion from similar Dodd-Frank provisions due to the element of physical settlement.

The following table reflects the changes in the fair market value of financial derivatives related to natural gas purchases and sales from September 30, 2015 to March 31, 2016:

	Balance	Increase	Less	Balance
		(Decrease)		
(Thousands)	September 30, 2015	in Fair Market Value	Amounts Settled	March 31, 2016
NJNG	\$ (10,881)	\$ (12,156)	\$ (4,275)	\$ (18,762)
NJRES	24,575	68,578	70,214	22,939
Total	\$ 13,694	\$ 56,422	\$ 65,939	\$ 4,177

There were no changes in methods of valuations during the six months ended March 31, 2016.

The following is a summary of fair market value of financial derivatives at March 31, 2016, excluding foreign exchange contracts discussed below, by method of valuation and by maturity for each fiscal year period:

(Thousands)	2016	2017	2018 - After 2020	Total Fair Value
Price based on NYMEX/CME	\$(6,785)	\$(3,134)	\$—	\$ —(9,919)

New Jersey Resources Corporation
Part I

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK
(Continued)

Our market price risk is predominately related to changes in the price of natural gas at Henry Hub, which is the delivery point for the NYMEX natural gas futures contracts. As the fair value of futures and fixed price swaps is derived from this location, the price sensitivity analysis has been prepared for all open Henry Hub natural gas futures and fixed swap positions. Based on this, an illustrative 10 percent movement in Henry Hub natural gas futures contract prices, for example, increases (decreases) the reported derivative fair value of all open, unadjusted Henry Hub natural gas futures and fixed swap positions by approximately \$15 million. This analysis does not include potential changes to reported credit adjustments embedded in the \$18.1 million reported fair value.

Derivative Fair Value Sensitivity Analysis
(Thousands)

	Henry Hub Futures and Fixed Price Swaps				
	0%	5%	10%	15%	20%
Percent increase in NYMEX natural gas futures prices	0%	5%	10%	15%	20%
Estimated change in derivative fair value	\$—	\$(7,495)	\$(14,990)	\$(22,486)	\$(29,981)
Ending derivative fair value	\$18,122	\$10,627	\$3,132	\$(4,364)	\$(11,859)
Percent decrease in NYMEX natural gas futures prices	0%	(5)%	(10)%	(15)%	(20)%
Estimated change in derivative fair value	\$—	\$7,495	\$14,990	\$22,486	\$29,981
Ending derivative fair value	\$18,122	\$25,617	\$33,112	\$40,608	\$48,103

Wholesale Credit Risk

The following is a summary of gross and net credit exposures, grouped by investment and non-investment grade counterparties, as of March 31, 2016. Gross credit exposure is defined as the unrealized fair value of derivative and energy trading contracts plus any outstanding wholesale receivable for the value of natural gas or power delivered and/or financial derivative commodity contract that has settled for which payment has not yet been received. Net credit exposure is defined as gross credit exposure reduced by collateral received from counterparties and/or payables, where netting agreements exist. The amounts presented below exclude accounts receivable for NJNG retail natural gas sales and services.

NJRES' & NJRCEV's counterparty credit exposure as of March 31, 2016, is as follows:

(Thousands)	Gross Credit Exposure	Net Credit Exposure
Investment grade	\$81,813	\$63,499
Noninvestment grade	7,908	274
Internally rated investment grade	11,461	7,294
Internally rated noninvestment grade	3,234	131
Total	\$104,416	\$71,198

NJNG's counterparty credit exposure as of March 31, 2016, is as follows:

(Thousands)	Gross Credit Exposure	Net Credit Exposure
Investment grade	\$2,800	\$2,590
Noninvestment grade	499	71
Internally rated investment grade	76	63

Internally rated noninvestment grade	9,740	5,194
Total	\$ 13,115	\$ 7,918

Due to the inherent volatility in the prices of natural gas commodities and derivatives, the market value of contractual positions with individual counterparties could exceed established credit limits or collateral provided by those counterparties. If a counterparty failed to perform the obligations under its contract (for example, failed to deliver or pay for natural gas), we could sustain a loss. This loss would comprise the loss on natural gas delivered but not paid for and/or the cost of replacing natural gas not delivered or received at a price that is unfavorable to the price in the original contract. Any such loss could have a material impact on our financial condition, results of operations or cash flows.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK (Continued)

Information regarding NJR's interest rate risk can be found in Item 7A. Quantitative and Qualitative Disclosures About Market Risks and the Liquidity and Capital Resources - Debt section of Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations of our Annual Report on Form 10-K for the period ended September 30, 2015.

Effects of Interest Rate and Foreign Currency Rate Fluctuations

We are also exposed to changes in interest rates on our debt hedges, variable rate debt and changes in foreign currency rates for our business conducted in Canada using Canadian dollars. We do not believe an immediate 10 percent increase or decrease in interest rates or foreign currency rates would have a material effect on our operating results or cash flows.

Effects of Inflation

Although inflation rates have been relatively low to moderate in recent years, including the three most recent fiscal years, any change in price levels has an effect on operating results due to the capital-intensive and regulated nature of our utility subsidiary. We attempt to minimize the effects of inflation through cost control, productivity improvements and regulatory actions, when appropriate.

ITEM 4. CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

Under the supervision and with the participation of our management, including our principal executive officer and principal financial officer, we conducted an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act), as of the end of the period covered by this report. Based on this evaluation, our principal executive officer and principal financial officer concluded that, as of end of the period covered by this report, our disclosure controls and procedures are effective, to ensure that information required to be disclosed by us in the reports that we file or submit under the Exchange Act, is recorded, processed, summarized and reported, within the time periods specified in the U.S. Securities and Exchange Commission's rules and forms, and that such information is accumulated and communicated to our management, including our principal executive officer and principal financial officer, as appropriate, to allow timely decisions regarding required disclosure.

Changes in Internal Control over Financial Reporting

There has been no change in internal control over financial reporting (as such term is defined in Exchange Act Rule 13a-15(f)) that occurred during the quarter ended March 31, 2016, that has materially affected, or is reasonably likely to materially affect, internal control over financial reporting.

New Jersey Resources Corporation
Part II

ITEM 1. LEGAL
PROCEEDINGS

Information regarding reportable legal proceedings is contained in Part I, “Item 3. Legal Proceedings” in our Annual Report on Form 10-K for the year ended September 30, 2015, and is set forth in Part I, Item 1, Note 12. Commitment and Contingent Liabilities-Legal Proceedings on the Unaudited Condensed Consolidated Financial Statements. No legal proceedings became reportable during the quarter ended March 31, 2016, and there have been no material developments during such quarter regarding any previously reported legal proceedings, which have not been previously disclosed.

ITEM 1A. RISK
FACTORS

While we attempt to identify, manage and mitigate risks and uncertainties associated with our business to the extent practical, under the circumstances, some level of risk and uncertainty will always be present. Part I, Item 1A. Risk Factors of our 2015 Annual Report on Form 10-K includes a detailed discussion of our risk factors. Those risks and uncertainties have the potential to materially affect our financial condition and results of operations. There have been no material changes in our risk factors from those previously disclosed in Part I, Item 1A, of our 2015 Annual Report on Form 10-K.

ITEM 2. UNREGISTERED SALE OF EQUITY SECURITIES AND USE OF
PROCEEDS

The following table sets forth our repurchase activity for the quarter ended March 31, 2016:

Period	Total Number of Shares (or Units) Purchased	Average Price Paid per Share (or Unit)	Total Number of Shares (or Units) Purchased as Part of Publicly Announced Plans or Programs	Maximum Number (or Approximate Dollar Value) of Shares (or Units) That May Yet Be Purchased Under the Plans or Programs
1/01/16 - 1/31/16	—	\$	—	2,627,953
2/01/16 - 2/29/16	—	\$	—	2,627,953
3/01/16 - 3/31/16	—	\$	—	2,627,953
Total	—	\$	—	2,627,953

The stock repurchase plan, which was authorized by our Board of Directors, became effective in September 1996 and as of March 31, 2016, included 19.5 million shares of common stock for repurchase, of which, approximately 2.6 million shares remained available for repurchase. The stock repurchase plan will expire when we have repurchased all shares authorized for repurchase thereunder, unless the repurchase plan is earlier terminated by action of our Board of Directors or further shares are authorized for repurchase.
