SECTION 7 – REGULATION FD

Item 7.01 Regulation FD Disclosure

ALLETE, Inc. (ALLETE) expects to earn between \$2.35 and \$2.55 per share in 2011.

Significant assumptions impacting ALLETE’s 2011 earnings guidance include:

- similar taconite production on Minnesota’s Iron Range as in 2010, which impacts the electricity usage by Minnesota Power’s taconite customers. On December 1, 2010, Minnesota Power received demand nominations from its industrial customers for the period of January through April 2011, which are at similar levels to those for the September through December 2010 time period;
- a final Minnesota Power retail rate order consistent with the Minnesota Public Utilities Commission’s November 2, 2010, written order;
 - an increase in rider recoverable revenue related to the Bison I wind project;
- an order from the Wisconsin Public Service Commission approving higher rates at Superior Water, Light & Power Company;
- higher Square Butte Electric Cooperative operating expenses allocated to Minnesota Power related to an environmental retrofit at that generating station;
 - increased depreciation and interest expenses due to recent capital expenditures;
- increased production at BNI Coal Ltd. compared to 2010, due to the absence of a scheduled maintenance shut-down in 2010 by BNI Coal’s largest customer; and
 - a smaller projected net loss at ALLETE Properties, LLC than in 2010 due to expense management efforts.

ALLETE remains committed to providing its shareholders with an attractive dividend while at the same time funding its growth initiatives.

Readers are cautioned that forward-looking statements reflected in ALLETE’s earnings guidance for 2011 should be read in conjunction with ALLETE’s disclosures under the heading: “SAFE HARBOR STATEMENT UNDER THE PRIVATE SECURITIES LITIGATION REFORM ACT OF 1995” located on page 2 of this Form 8-K.
