Form 10-K  
February 27, 2017

UNITED STATES  
SECURITIES AND EXCHANGE COMMISSION  
Washington, DC 20549

---

FORM 10-K

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended December 31, 2016,

or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

Commission File Number: 0-10587

---

FULTON FINANCIAL CORPORATION

(Exact name of registrant as specified in its charter)

Pennsylvania 23-2195389

(State or other jurisdiction of (I.R.S. Employer  
incorporation or organization) Identification No.)

One Penn Square, P. O. Box 4887, Lancaster, Pennsylvania 17604  
(Address of principal executive offices) (Zip Code)

(717) 291-2411

(Registrant's telephone number, including area code)

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Name of exchange on which registered
---------------------	--------------------------------------

Common Stock, \$2.50 par value	The NASDAQ Stock Market, LLC
--------------------------------	------------------------------

Securities registered pursuant to Section 12(g) of the Act:

None

Indicate by checkmark whether the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes  No

Indicate by checkmark whether the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes  No

Indicate by checkmark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes  No

Indicate by checkmark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes  No

Indicate by checkmark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (§ 229.405) is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by checkmark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check One):

Large accelerated filer  Accelerated filer

Non-accelerated filer  Smaller reporting company

Indicate by checkmark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes  No

The aggregate market value of the voting Common Stock held by non-affiliates of the registrant, based on the average bid and asked prices on June 30, 2016, the last business day of the registrant's most recently completed second fiscal quarter, was approximately \$2.3 billion. The number of shares of the registrant's Common Stock outstanding on February 17, 2017 was 174,097,000.

Portions of the Definitive Proxy Statement of the Registrant for the Annual Meeting of Shareholders to be held on May 15, 2017 are incorporated by reference in Part III.

## PART I

### Item 1. Business

#### General

Fulton Financial Corporation (the "Corporation") was incorporated under the laws of Pennsylvania on February 8, 1982 and became a bank holding company through the acquisition of all of the outstanding stock of Fulton Bank N.A. ("Fulton Bank") on June 30, 1982. In 2000, the Corporation became a financial holding company as defined in the Gramm-Leach-Bliley Act ("GLB Act"), which gave the Corporation the ability to expand its financial services activities under its holding company structure (See "Competition" and "Supervision and Regulation" below). The Corporation directly owns 100% of the common stock of six community banks and eight non-bank entities. As of December 31, 2016, the Corporation had approximately 3,500 full-time equivalent employees.

The common stock of the Corporation is listed for quotation on the Global Select Market of The NASDAQ Stock Market under the symbol FULT. The Corporation's Internet address is [www.fult.com](http://www.fult.com). Electronic copies of the Corporation's 2016 Annual Report on Form 10-K are available free of charge by visiting "Investor Relations" at [www.fult.com](http://www.fult.com). Electronic copies of quarterly reports on Form 10-Q and current reports on Form 8-K are also available at this Internet address. These reports, as well as any amendments thereto, are posted on the Corporation's website as soon as reasonably practicable after they are electronically filed with the Securities and Exchange Commission ("SEC").

#### Bank and Financial Services Subsidiaries

The Corporation's six subsidiary banks are located primarily in suburban or semi-rural geographic markets throughout a five-state region (Pennsylvania, Delaware, Maryland, New Jersey and Virginia). Each of these banking subsidiaries delivers financial services in a highly personalized, community-oriented style that emphasizes relationship banking. Where appropriate, operations are centralized through common platforms and back-office functions. The Corporation has announced that it is developing plans to seek regulatory approval to begin the process of consolidating its six subsidiary banks in connection with a transition to a business model that will be less oriented on geographic boundaries and will instead focus more on alignment with the customer segments the Corporation serves. The Corporation also believes that consolidating its subsidiary banks will enhance its ability to manage risk more efficiently and effectively through a centralized risk management and compliance function. This multi-year process is expected to eventually result in the Corporation conducting its core banking business through a single subsidiary bank. Consolidation of the bank subsidiaries will result in a single subsidiary bank with greater than \$10 billion in assets, subjecting it to more stringent regulation applicable to institutions that exceed that threshold. See Item 1A. "Risk Factors - Legal, Compliance and Reputational Risks - The Corporation's largest subsidiary, Fulton Bank, is expected to have had total assets of \$10 billion or more for four consecutive quarters as of March 31, 2017, which will subject it to additional regulation and increased supervision." The timing of the commencement of this process will depend significantly on the Corporation and its banking subsidiaries making necessary progress in enhancing a largely centralized compliance program designed to comply with the requirements of the Bank Secrecy Act, the USA Patriot Act of 2001 and related anti-money laundering regulations, and establishing, to the satisfaction of the Corporation's banking regulatory agencies, that those enhancements are sustainable to achieve compliance with the regulatory enforcement orders issued to the Corporation and its subsidiary banks by their respective banking regulatory agencies relating to identified deficiencies in that compliance program. See Item 1A. "Risk Factors - Legal, Compliance and Reputational Risks - The Corporation and its bank subsidiaries are subject to regulatory enforcement orders requiring improvement in compliance functions and remedial actions."

The Corporation's subsidiary banks are located in areas that are home to a wide range of manufacturing, distribution, health care and other service companies. The Corporation and its banks are not dependent upon one or a few customers or any one industry, and the loss of any single customer or a few customers would not have a material adverse impact on any of the subsidiary banks. However, a large portion of the Corporation's loan portfolio is comprised of commercial loans, commercial mortgage loans and construction loans. See Item 1A. "Risk Factors - Economic and Credit Risks - Economic downturns and the composition of the Corporation's loan portfolio subject the Corporation to credit risk."

Each of the subsidiary banks offers a full range of consumer and commercial banking products and services in its local market area. Personal banking services include various checking account and savings deposit products, certificates of deposit and individual retirement accounts. The subsidiary banks offer a variety of consumer lending products to creditworthy customers in their market areas. Secured consumer loan products include home equity loans and lines of credit, which are underwritten based on loan-to-value limits specified in the Corporation's lending policy. The subsidiary banks also offer a variety of fixed, variable and adjustable rate products, including construction loans and jumbo loans. Residential mortgages are offered through Fulton Mortgage Company,

which operates as a division of each subsidiary bank. Consumer loan products also include automobile loans, automobile and equipment leases, personal lines of credit and checking account overdraft protection.

Commercial banking services are provided to small and medium sized businesses (generally with sales of less than \$150 million) in the subsidiary banks' market areas. The Corporation's policies limit the maximum total lending commitment to a single borrower to \$50.0 million as of December 31, 2016, which is below the Corporation's regulatory lending limit. In addition, the Corporation has established lower total lending limits based on the Corporation's internal risk rating of the borrower and for certain types of lending commitments. Commercial lending products include commercial, financial, agricultural and real estate loans. Variable, adjustable and fixed rate loans are provided, with variable and adjustable rate loans generally tied to an index, such as the Prime Rate or the London Interbank Offered Rate ("LIBOR"), as well as interest rate swaps. The commercial lending policy of the Corporation's subsidiary banks encourages relationship banking and provides strict guidelines related to customer creditworthiness and collateral requirements for secured loans. In addition, equipment leasing, letters of credit, cash management services and traditional deposit products are offered to commercial customers.

Investment management, trust, brokerage, insurance and investment advisory services are offered to consumer and commercial banking customers in the market areas serviced by the Corporation's subsidiary banks by Fulton Financial Advisors (a division of the Corporation's subsidiary, Fulton Bank).

The Corporation's subsidiary banks deliver their products and services through traditional branch banking, with a network of full service branch offices. Electronic delivery channels include a network of automated teller machines, telephone banking, mobile banking and online banking. The variety of available delivery channels allows customers to access their account information and perform certain transactions, such as depositing checks, transferring funds and paying bills, at virtually any time of the day.

The following table provides certain information for the Corporation's banking subsidiaries as of December 31, 2016:

Subsidiary	Main Office Location	Total Assets	Total Deposits	Branches (1)
		(dollars in millions)		
Fulton Bank, N.A.	Lancaster, PA	\$10,700	\$ 8,310	112
Fulton Bank of New Jersey	Mt. Laurel, NJ	3,814	3,246	65
The Columbia Bank	Columbia, MD	2,287	1,790	31
Lafayette Ambassador Bank	Bethlehem, PA	1,526	1,266	21
FNB Bank, N.A.	Danville, PA	350	286	7
Swineford National Bank	Middleburg, PA	319	276	7
				243

(1) Remote service facilities (mainly stand-alone automated teller machines) are excluded. See additional information in Item 2. "Properties."

#### Non-Bank Subsidiaries

The Corporation owns 100% of the common stock of five non-bank subsidiaries, which are consolidated for financial reporting purposes: (i) Fulton Financial Realty Company, which holds title to or leases certain properties where Corporation branch offices and other facilities are located; (ii) Central Pennsylvania Financial Corp., which owns limited partnership interests in partnerships invested primarily in low- and moderate-income housing projects; (iii) FFC Management, Inc., which owns certain investment securities and other passive investments; (iv) FFC Penn

Edgar Filing: FULTON FINANCIAL CORP - Form 10-K

Square, Inc., which owns trust preferred securities ("TruPS") issued by a subsidiary of Fulton Bank; and (v) Fulton Insurance Services Group, Inc., which engages in the sale of various life insurance products.

The Corporation also owns 100% of the common stock of three non-bank subsidiaries which are not consolidated for financial reporting purposes. The following table provides information for these non-bank subsidiaries, whose sole assets consist of junior subordinated deferrable interest debentures issued by the Corporation, as of December 31, 2016:

Subsidiary	State of Incorporation	Total Assets (in thousands)
Columbia Bancorp Statutory Trust	Delaware	\$ 6,186
Columbia Bancorp Statutory Trust II	Delaware	4,124
Columbia Bancorp Statutory Trust III	Delaware	6,186

## Competition

The banking and financial services industries are highly competitive. Within its geographic region, the Corporation's subsidiaries face direct competition from other commercial banks, varying in size from local community banks to larger regional and national banks, credit unions and non-bank entities. As a result of the wide availability of electronic delivery channels, the subsidiary banks also face competition from financial institutions that do not have a physical presence in the Corporation's geographic markets.

The industry is also highly competitive due, in part, to the GLB Act. As a result of the GLB Act, various types of entities aggressively compete for customers that were traditionally served only by the banking industry. Under the GLB Act, banks, insurance companies and securities firms may affiliate under a financial holding company structure, allowing their expansion into non-banking financial services activities that had previously been restricted. These activities include a full range of banking, securities and insurance activities, including securities and insurance underwriting, issuing and selling annuities and merchant banking activities. While the Corporation does not currently engage in many of these activities, further entry into these businesses may enhance the ability of the Corporation to compete in the future.

## Market Share

Deposit market share information is compiled as of June 30 of each year by the Federal Deposit Insurance Corporation ("FDIC"). The Corporation's banks maintain branch offices in 52 counties across five states. In 14 of these counties, the Corporation ranked in the top five in deposit market share (based on deposits as of June 30, 2016). The following table summarizes information about the counties in which the Corporation has branch offices and its market position in each county:

County	State	Population (2016 Est.)	Banking Subsidiary	No. of Financial Institutions		Deposit Market Share (June 30, 2016)		
				Banks/Thriffs	Credit Unions	Rank	%	
Lancaster	PA	541,000	Fulton Bank, N.A.	20	13	1	26.7	%

### Supervision and Regulation

The Corporation and its subsidiaries operate in an industry that is subject to laws and regulations that are enforced by a number of federal and state agencies. Changes in these laws and regulations, including interpretation and enforcement activities, could impact the cost of operating in the financial services industry, limit or expand permissible activities or affect competition among banks and other financial institutions.

The Corporation is a registered financial holding company under the Bank Holding Company Act ("BHCA") and is regulated, supervised and examined by the Federal Reserve Bank. The Corporation's subsidiary banks are depository institutions whose deposits are insured by the FDIC. The following table summarizes the charter types and primary regulators for each of the Corporation's subsidiary banks:

Subsidiary	Charter	Primary Regulator(s)
Fulton Bank, N.A.	National	OCC
Fulton Bank of New Jersey	NJ	NJ/FDIC
The Columbia Bank	MD	MD/FDIC
Lafayette Ambassador Bank	PA	PA/Federal Reserve
FNB Bank, N.A.	National	OCC
Swineford National Bank	National	OCC

OCC - Office of the Comptroller of the Currency

Federal statutes that apply to the Corporation and its subsidiaries include the GLB Act, the BHCA, the Dodd-Frank Wall Street Reform and Consumer Protection Act ("Dodd-Frank Act"), the Federal Reserve Act, the National Bank Act and the Federal Deposit Insurance Act, among others. In general, these statutes, regulations promulgated thereunder, and related interpretations establish the eligible business activities of the Corporation, certain acquisition and merger restrictions, limitations on intercompany transactions, such as loans and dividends, and capital adequacy requirements, among other things.

BHCA - The Corporation is subject to regulation and examination by the Federal Reserve Bank, and is required to file periodic reports and to provide additional information that the Federal Reserve may require. The BHCA regulates activities of bank holding companies, including requirements and limitations relating to capital, transactions with officers, directors and affiliates, securities issuances, dividend payments, extensions of credit, among others. The BHCA permits the Federal Reserve, in certain circumstances,

7

---

to issue cease and desist orders and other enforcement actions against bank holding companies (and their non-banking affiliates) to correct or curtail unsafe or unsound banking practices. In addition, the Federal Reserve must approve certain proposed changes in organizational structure or other business activities before they occur. The BHCA imposes certain restrictions upon the Corporation regarding the acquisition of substantially all of the assets of, or direct or indirect ownership or control of, any bank for which it is not already the majority owner.

**Dodd-Frank Act** - The Dodd-Frank Act was enacted in July 2010 and resulted in significant financial regulatory reform. The Dodd-Frank Act also changed the responsibilities of the current federal banking regulators. Among other things, the Dodd-Frank Act created the Financial Stability Oversight Council, with oversight authority for monitoring and regulating systemic risk, and the Consumer Financial Protection Bureau ("CFPB"), which has broad regulatory and enforcement powers over consumer financial products and services. Effective July 21, 2011, the CFPB became responsible for administering and enforcing numerous federal consumer financial laws enumerated in the Dodd-Frank Act. The Dodd-Frank Act also provided that, for banks with total assets of more than \$10 billion, the CFPB would have exclusive or primary authority to examine those banks for, and enforce compliance with, the federal consumer financial laws. As of December 31, 2016, the Corporation's largest subsidiary bank, Fulton Bank, had \$10.7 billion in assets and had assets of \$10 billion or more as of the end of each of the previous two quarters. If Fulton Bank has assets of \$10 billion or more as of March 31, 2017, it and the Corporation's other subsidiary banks will become subject to the supervision, examination and enforcement jurisdiction of the CFPB with respect to the federal consumer financial laws, among other things. Although currently not subject to CFPB examination, Fulton Bank and the Corporation's other subsidiary banks remain subject to the review and supervision of other applicable regulatory authorities, and such authorities may enforce compliance with regulations issued by the CFPB.

**Stress testing** - In October 2012, the Board of Governors of the Federal Reserve System ("FRB") issued final rules regarding company-run stress testing. In accordance with these rules, the Corporation is required to conduct an annual stress test in the manner specified, and using assumptions for baseline, adverse and severely adverse scenarios announced by the FRB. The stress test is designed to assess the potential impact of the various scenarios on the Corporation's earnings, capital levels and capital ratios over a nine-quarter time horizon. The Corporation's board of directors and its senior management are required to consider the results of the stress test in the normal course of business, including as part of the Corporation's capital planning process and the evaluation of the adequacy of its capital. Public disclosure of summary stress test results under the severely adverse scenario began in June 2015 for stress tests that commenced in the fall of 2014. The Corporation believes that both the quality and magnitude of its capital base are sufficient to support its current operations given its risk profile. The results of the annual stress testing process did not lead the Corporation to raise additional capital or alter the mix of its capital components. Pursuant to final rules published in October 2014 and December 2015, the FRB modified the start date of the stress test cycles so that, beginning in 2016, stress tests must be conducted using financial data as of December 31 of the prior year, the results of the stress test must be reported to the FRB on or before July 31 and a summary of the results of the stress test must be publicly disclosed between October 15 and October 31. The Corporation timely submitted its stress test report to the FRB before its required date of July 31, 2016, and a summary of the results was publicly disclosed on October 18, 2016, as required by the final rules.

Under similar rules adopted by the OCC, the primary regulator of Fulton Bank, national banks with total consolidated assets of more than \$10 billion are also required to conduct annual stress tests. A national bank becomes subject to the annual stress testing requirement when the institution's total consolidated assets, calculated as the average of the institution's total consolidated assets, as reported on the institution's quarterly Call Reports, for the most recent four consecutive quarters exceeds \$10 billion. As of June 30, 2016, Fulton Bank crossed the \$10 billion in assets threshold and has maintained that level of assets through the quarter ended December 31, 2016. Provided that Fulton Bank reports total consolidated assets of \$8.3 billion or more on its Call Report for the quarter ending March 31, 2017, it will be required to conduct annual stress tests in accordance with the OCC rules and as a result, to submit its first stress test report to the OCC on or before July 31, 2018.

Consumer Lending Laws - Bank regulatory agencies are increasingly focusing attention on consumer protection laws and regulations. To promote fairness and transparency for mortgages, credit cards, and other consumer financial products and services, the Dodd-Frank Act established the CFPB. This agency is responsible for interpreting and enforcing federal consumer financial laws, as defined by the Dodd-Frank Act, that, among other things, govern the provision of deposit accounts along with mortgage origination and servicing. Some federal consumer financial laws enforced by the CFPB include the Equal Credit Opportunity Act, Truth in Lending Act ("TILA"), the Truth in Savings Act, the Home Mortgage Disclosure Act, Real Estate Settlement Procedures Act ("RESPA"), the Equal Credit Opportunity Act, the Fair Debt Collection Practices Act, and the Fair Credit Reporting Act. The CFPB is also authorized to prevent any institution under its authority from engaging in an unfair, deceptive, or abusive act or practice in connection with consumer financial products and services. As a residential mortgage lender, the Corporation and its bank subsidiaries are subject to multiple federal consumer protection statutes and regulations, including, but not limited to, TILA, the Home Mortgage Disclosure Act, the Equal Credit Opportunity Act, RESPA, the Fair Credit Reporting Act, the Fair Debt Collection Act and the Flood Disaster Protection Act. Failure to comply with these and similar statutes and regulations can result

in the Corporation and its bank subsidiaries becoming subject to formal or informal enforcement actions, the imposition of civil money penalties and consumer litigation.

**Ability-to-pay rules and qualified mortgages** - As required by the Dodd-Frank Act, the CFPB issued a series of final rules in January 2013 amending Regulation Z, implementing TILA, which requires mortgage lenders to make a reasonable and good faith determination, based on verified and documented information, that a consumer applying for a residential mortgage loan has a reasonable ability to repay the loan according to its terms. These final rules prohibit creditors, such as the Corporation's bank subsidiaries, from extending residential mortgage loans without regard for the consumer's ability to repay and add restrictions and requirements to residential mortgage origination and servicing practices. In addition, these rules restrict the imposition of prepayment penalties and compensation practices relating to residential mortgage loan origination. Mortgage lenders are required to determine consumers' ability to repay in one of two ways. The first alternative requires the mortgage lender to consider eight underwriting factors when making the credit decision. Alternatively, the mortgage lender can originate "qualified mortgages," which are entitled to a presumption that the creditor making the loan satisfied the ability-to-repay requirements. In general, a qualified mortgage is a residential mortgage loan that does not have certain high risk features, such as negative amortization, interest-only payments, balloon payments, or a term exceeding 30 years. In addition, to be a qualified mortgage, the points and fees paid by a consumer cannot exceed 3% of the total loan amount and the borrower's total debt-to-income ratio must be no higher than 43% (subject to certain limited exceptions for loans eligible for purchase, guarantee or insurance by a government sponsored enterprise or a federal agency).

**Integrated disclosures under the Real Estate Settlement Procedures Act and the Truth in Lending Act** - As required by the Dodd-Frank Act, the CFPB issued final rules in December 2013 revising and integrating previously separate disclosures required under RESPA and TILA in connection with certain closed-end consumer mortgage loans. These final rules became effective August 1, 2015 and require lenders to provide a new Loan Estimate, combining content from the former Good Faith Estimate required under RESPA and the initial disclosures required under TILA, not later than the third business day after submission of a loan application, and a new Closing Disclosure, combining content of the former HUD-1 Settlement Statement required under RESPA and the final disclosures required under TILA, at least three days prior to the loan closing.

**Consumer Financial Protection Enforcement** - The CFPB has exclusive examination and primary enforcement authority with respect to compliance with federal consumer financial protection laws and regulations by institutions under its supervision and is authorized, individually or jointly with the federal bank regulatory agencies (the "Agencies"), to conduct investigations to determine whether any person is, or has, engaged in conduct that violates such laws or regulations. The CFPB may bring an administrative enforcement proceeding or civil action in federal district court. In addition, in accordance with a memorandum of understanding entered into between the CFPB and the Department of Justice ("DOJ"), the two agencies have agreed to coordinate efforts related to enforcing the fair lending laws, which includes information sharing and conducting joint investigations. As an independent bureau funded by the FRB, the CFPB may impose requirements that are more severe than those of the other bank regulatory agencies. As an insured depository institution with total assets of more than \$10 billion, Fulton Bank and the Corporation's other subsidiary banks will become subject to the CFPB's supervisory and enforcement authorities if it maintains that level of assets through March 31, 2017. The Dodd-Frank Act also permits states to adopt stricter consumer protection laws and state attorneys general to enforce consumer protection rules issued by the CFPB. As a result of these aspects of the Dodd-Frank Act, going forward, the Corporation's subsidiary banks would operate in a stringent consumer compliance environment and may incur additional costs related to consumer protection compliance, including but not limited to potential costs associated with CFPB examinations, regulatory and enforcement actions and consumer-oriented litigation, which is likely to increase as a result of the consumer protection provisions of the Dodd-Frank Act. The CFPB, other financial regulatory agencies, including the OCC, as well as the Department of Justice have recently pursued a number of enforcement actions against depository institutions with respect to compliance with fair lending laws.

Volcker Rule - As mandated by the Dodd-Frank Act, in December 2013, the OCC, FRB, FDIC, SEC and Commodity Futures Trading Commission issued final rulings (the "Final Rules") implementing certain prohibitions and restrictions on the ability of a banking entity and non-bank financial company supervised by the FRB to engage in proprietary trading and have certain ownership interests in, or relationships with, a "covered fund" (the so-called "Volcker Rule"). The Final Rules generally treat as a covered fund any entity that would be an investment company under the Investment Company Act of 1940 (the "1940 Act") but for the application of the exemptions from SEC registration set forth in Section 3(c)(1) (fewer than 100 beneficial owners) or Section 3(c)(7) (qualified purchasers) of the 1940 Act. The Final Rules also require regulated entities to establish an internal compliance program that is consistent with the extent to which it engages in proprietary trading and covered fund activities covered by the Volcker Rule. Although the Final Rules provide some tiering of compliance and reporting obligations based on size, the fundamental prohibitions of the Volcker Rule apply to banking entities of any size, including the Corporation. In December 2014, the FRB extended, until July 21, 2016, the date by which banking entities must conform their covered fund activities and investments to the requirements of the Final Rules, and in July 2016, the FRB granted an additional one-year extension of the conformance period to July 21, 2017. The Corporation does not engage in proprietary trading or in any other activities prohibited by the Final Rules.

Based on the Corporation's evaluation of its investments, none fell within the definition of a "covered fund" and none needed to be disposed of during 2016 or by July 31, 2017. The Corporation does not currently expect that the Final Rules will have a material effect on its business, financial condition or results of operations.

Capital Requirements - There are a number of restrictions on financial and bank holding companies and FDIC-insured depository subsidiaries that are designed to minimize potential loss to depositors and the FDIC insurance funds. Also, a bank holding company is required to serve as a source of financial strength to its depository institution subsidiaries and to commit resources to support such institutions in circumstances where it might not do so absent such policy. Under the BHCA, the FRB has the authority to require a bank holding company to terminate any activity or to relinquish control of a non-bank subsidiary upon the FRB's determination that such activity or control constitutes a serious risk to the financial soundness and stability of a depository institution subsidiary of the bank holding company.

The Basel Committee on Banking Supervision ("Basel") is a committee of central banks and bank regulators from major industrialized countries that develops broad policy guidelines for use by each country's regulators with the purpose of ensuring that financial institutions have adequate capital given the risk levels of assets and off-balance sheet financial instruments. In December 2010, Basel released frameworks for strengthening international capital and liquidity regulations, referred to as Basel III.

In July 2013, the FRB approved final rules (the "U.S. Basel III Capital Rules") establishing a new comprehensive capital framework for U.S. banking organizations and implementing the Basel's December 2010 framework for strengthening international capital standards. The U.S. Basel III Capital Rules substantially revise the risk-based capital requirements applicable to bank holding companies and depository institutions.

The minimum regulatory capital requirements established by the U.S. Basel III Capital Rules became effective for the Corporation on January 1, 2015, and will be fully phased in on January 1, 2019.

The U.S. Basel III Capital Rules require the Corporation and its bank subsidiaries to:

- Meet a minimum Common Equity Tier 1 capital ratio of 4.50% of risk-weighted assets and a minimum Tier 1 capital ratio of 6.00% of risk-weighted assets;
  - Continue to require a minimum Total capital ratio of 8.00% of risk-weighted assets and a minimum Tier 1 leverage capital ratio of 4.00% of average assets; and
  - Comply with a revised definition of capital to improve the ability of regulatory capital instruments to absorb losses.
- Certain non-qualifying capital instruments, including cumulative preferred stock and TruPS, are being phased out as a component of Tier 1 capital for institutions of the Corporation's size.

The U.S. Basel III Capital Rules use a standardized approach for risk weightings that expand the risk-weightings for assets and off balance sheet exposures from the previous 0%, 20%, 50% and 100% categories to a much larger and more risk-sensitive number of categories, depending on the nature of the assets and off-balance sheet exposures and resulting in higher risk weights for a variety of asset categories.

When fully phased in on January 1, 2019, the Corporation and its bank subsidiaries will also be required to maintain a "capital conservation buffer" of 2.50% above the minimum risk-based capital requirements. The required minimum capital conservation buffer began to be phased in incrementally, starting at 0.625%, on January 1, 2016, increasing to 1.25% on January 1, 2017, and will continue to increase, to 1.875% on January 1, 2018 and 2.50% on January 1, 2019. The rules provide that the failure to maintain the "capital conservation buffer" will result in restrictions on capital distributions and discretionary cash bonus payments to executive officers. As a result, under the U.S. Basel III Capital Rules, if any of the Corporation's bank subsidiaries fails to maintain the required minimum capital conservation buffer, the Corporation will be subject to limits, and possibly prohibitions, on its ability to obtain capital distributions from such subsidiaries. If the Corporation does not receive sufficient cash dividends from its bank

subsidiaries, it may not have sufficient funds to pay dividends on its capital stock, service its debt obligations or repurchase its common stock. In addition, the restrictions on payments of discretionary cash bonuses to executive officers may make it more difficult for the Corporation to retain key personnel.

As of December 31, 2016, the Corporation met the fully-phased in minimum capital requirements, including the new capital conservation buffer, as prescribed in the U.S. Basel III Capital Rules.

The Basel III liquidity framework also includes new liquidity requirements that require financial institutions to maintain increased levels of liquid assets or alter their strategies for liquidity management. The Basel III liquidity framework requires banks and bank holding companies to measure their liquidity against specific ratios.

In September 2014, the FRB approved final rules (the "U.S. Liquidity Coverage Ratio Rule") implementing portions of the Basel III liquidity framework for large, internationally active banking organizations, generally those having \$250 billion or more in total assets, and similar, but less stringent rules, applicable to bank holding companies with consolidated assets of \$50 billion or more. The U.S. Liquidity Coverage Ratio Rule requires banking organizations to maintain a Liquidity Coverage Ratio ("LCR") that is designed to ensure that sufficient high quality liquid resources are available for a one month period in case of a stress scenario. Impacted financial institutions are required to have been compliant with the U.S. Liquidity Coverage Ratio Rule by January 1, 2017. The Corporation's total assets and the scope of its operations do not currently meet the thresholds set forth in the U.S. Liquidity Coverage Ratio Rule, as a result of which the Corporation is not currently required to maintain a minimum LCR.

The Basel III liquidity framework also introduced a second ratio, referred to as the Net Stable Funding Ratio ("NSFR"), which is designed to promote funding resiliency over longer-term time horizons by creating additional incentives for banks to fund their activities with more stable sources of funding on an ongoing structural basis. This new liquidity standard is subject to further rulemaking. To date, U.S. banking regulators have not proposed any additional liquidity rules. Because of the Corporation's size, neither the U.S. Liquidity Coverage Ratio Rule nor any additional proposed rules under the Basel III liquidity framework are applicable to it.

Prompt Corrective Regulatory Action - The Federal Deposit Insurance Corporation Improvement Act ("FDICIA") established a system of prompt corrective action to resolve the problems of undercapitalized institutions. Under this system, the federal bank regulators are required to take certain, and authorized to take other, supervisory actions against undercapitalized institutions, based upon five categories of capitalization which FDICIA created: "well capitalized," "adequately capitalized," "undercapitalized," "significantly undercapitalized," and "critically undercapitalized," the severity of which depends upon the institution's degree of capitalization. Generally, a capital restoration plan must be filed with the institution's primary federal regulator within 45 days of the date an institution receives notice that it is "undercapitalized," "significantly undercapitalized" or "critically undercapitalized," and the plan must be guaranteed by any parent holding company. In addition, various mandatory supervisory actions become immediately applicable to the institution, including restrictions on growth of assets and other forms of expansion. Prior to January 1, 2015, an insured depository institution was treated as well capitalized if its total risk-based capital ratio was 10.00% or greater, its Tier 1 risk-based capital ratio was 6.00% or greater and its Tier 1 leverage capital ratio was 5.00% or greater, and it was not subject to any order or directive by its primary federal regulator to meet a specific capital level. Effective January 1, 2015, an insured depository institution was treated as well capitalized if its total risk-based capital ratio is 10.00% or greater, its Tier 1 risk-based capital ratio is 8.00% or greater, its Common Equity Tier 1 risk-based capital ratio is 6.50% or greater and its Tier 1 leverage capital ratio is 5.00% or greater, and it is not subject to any order or directive to meet a specific capital level. As of December 31, 2016, each of the Corporation's bank subsidiaries' capital ratios was above the minimum levels required to be considered "well capitalized" by its primary federal regulator.

Loans and Dividends from Subsidiary Banks - There are various restrictions on the extent to which the Corporation's bank subsidiaries can make loans or extensions of credit to, or enter into certain transactions with, its affiliates, which would include the Corporation and its non-banking subsidiaries. In general, these restrictions require that such loans be secured by designated amounts of specified collateral and are limited, as to any one of the Corporation or its non-bank subsidiaries, to 10% of the lending bank's regulatory capital (20% in the aggregate to all such entities). The Dodd-Frank Act expanded these restrictions, effective in July 2012, to cover securities lending, repurchase agreement and derivatives activities that the Corporation's bank subsidiaries may have with an affiliate.

For safety and soundness reasons, banking regulations also limit the amount of cash that can be transferred from subsidiary banks to the parent company in the form of dividends. Dividend limitations vary, depending on the subsidiary bank's charter and whether or not it is a member of the Federal Reserve System. Generally, subsidiaries are prohibited from paying dividends when doing so would cause them to fall below the regulatory minimum capital

levels. Additionally, limits may exist on paying dividends in excess of net income for specified periods. See "Note 11 - Regulatory Matters," in the Notes to Consolidated Financial Statements in Item 8. "Financial Statements and Supplementary Data" for additional information regarding regulatory capital and dividend and loan limitations.

Federal Deposit Insurance - Substantially all of the deposits of the Corporation's subsidiary banks are insured up to the applicable limits by the Deposit Insurance Fund ("DIF") of the FDIC, generally up to \$250,000 per insured depositor.

The subsidiary banks pay deposit insurance premiums based on assessment rates established by the FDIC. The FDIC has established a risk-based assessment system under which institutions are classified and pay premiums according to their perceived risk to the DIF. An institution's base assessment rate is generally subject to following adjustments: (1) a decrease for the institution's long-term unsecured debt, including most senior and subordinated debt, (2) an increase for brokered deposits above a threshold amount and (3) an increase for unsecured debt held that is issued by another insured depository institution.

On April 1, 2011, as required by the Dodd-Frank Act, the deposit insurance assessment base changed from total domestic deposits to average total assets, minus average tangible equity. In addition, the FDIC also created a two scorecard system, one for large depository institutions that have \$10 billion or more in assets and another for highly complex institutions that have \$50 billion or more in assets. As of December 31, 2016, the Corporation's largest subsidiary bank, Fulton Bank, had assets of \$10.7 billion and had assets of \$10 billion or more as of the end of each of the previous two quarters. If Fulton Bank has assets of \$10 billion or more as of March 31, 2017, it will become subject to a modified methodology for calculating FDIC insurance assessments and potentially higher assessment rates as a result of institutions with \$10 billion or more in assets being required to bear the cost of raising the FDIC reserve ratio to 1.35% as required by the Dodd-Frank Act.

The FDIC annually establishes for the DIF a designated reserve ratio, or DRR, of estimated insured deposits. The FDIC has announced that the DRR for 2017 will remain at 2.00%, which is the same ratio that has been in effect since January 1, 2011. The FDIC is authorized to change deposit insurance assessment rates as necessary to maintain the DRR, without further notice-and-comment rulemaking, provided that: (1) no such adjustment can be greater than three basis points from one quarter to the next, (2) adjustments cannot result in rates more than three basis points above or below the base rates and (3) rates cannot be negative.

The Dodd-Frank Act increased the minimum DIF reserve ratio to 1.35% of insured deposits, which must be reached by September 30, 2020, and provides that, in setting the assessment rates necessary to meet the new requirement, the FDIC shall offset the effect of this provision on insured depository institutions with total consolidated assets of less than \$10 billion, so that more of the cost of raising the reserve ratio will be borne by the institutions with more than \$10 billion in assets. In October 2010, the FDIC adopted a restoration plan to ensure that the DIF reserve ratio reaches 1.35% by September 30, 2020.

On October 22, 2015, the FDIC issued a proposal to increase the reserve ratio for the DIF to the minimum level of 1.35% as required by the Reform Act. The FDIC adopted the final rule on March 15, 2016, which imposes on insured depository institutions with \$10 billion or more in total consolidated assets (such as Fulton Bank) a quarterly surcharge equal to an annual rate of 4.5 basis points applied to the deposit insurance assessment base, after making certain adjustments. The rule became effective on July 1, 2016.

Pursuant to the Dodd-Frank Act, the FDIC has backup enforcement authority over a depository institution holding company, such as the Corporation, if the conduct or threatened conduct of such holding company poses a risk to the DIF, although such authority may not be used if the holding company is generally in sound condition and does not pose a foreseeable and material risk to the DIF.

USA Patriot Act - Anti-terrorism legislation enacted under the USA Patriot Act of 2001 ("Patriot Act") expanded the scope of anti-money laundering laws and regulations and imposed significant new compliance obligations for financial institutions, including the Corporation's subsidiary banks. The Patriot Act gives the federal government powers to address terrorist threats through enhanced domestic security measures, expanded surveillance powers, increased information sharing and broadened anti-money laundering requirements. By way of amendments to the Bank Secrecy Act ("BSA"), Title III of the Patriot Act takes measures intended to encourage information sharing among bank regulatory agencies and law enforcement bodies. Further, these regulations impose affirmative obligations on a wide range of financial institutions to maintain appropriate policies, procedures and controls to detect, prevent and report money laundering and terrorist financing.

Among other requirements, the Patriot Act and the related regulations impose the following requirements with respect to financial institutions:

• Establishment of anti-money laundering programs;

•

- Establishment of a program specifying procedures for obtaining identifying information from customers seeking to open new accounts, including verifying the identity of customers within a reasonable period of time;
- Establishment of enhanced due diligence policies, procedures and controls designed to detect and report money laundering; and
- Prohibition on correspondent accounts for foreign shell banks and compliance with recordkeeping obligations with respect to correspondent accounts of foreign banks.

Failure to comply with the Patriot Act's requirements could have serious legal, financial, regulatory and reputational consequences. In addition, bank regulators will consider a holding company's effectiveness in combating money laundering when ruling on BHCA and Bank Merger Act applications. In May 2016, the regulations implementing the BSA were amended to explicitly include risk-based procedures for conducting ongoing customer due diligence, to include understanding the nature and purpose of customer relationships for the purpose of developing a customer risk profile. In addition, banks must identify and verify the identity of the beneficial owners of all legal entity customers (other than those that are excluded) at the time a new account is opened (other than accounts that are exempted). The Corporation and its banking subsidiaries must comply with these amendments and new requirements by May 11, 2018. The Corporation has adopted policies, procedures and controls to address compliance with the

Patriot Act and will continue to revise and update its policies, procedures and controls to reflect required changes (including the May 2016 amendments).

The Corporation and its banking subsidiaries are currently subject to regulatory enforcement orders (the "Consent Orders") issued by bank regulatory agencies relating to identified deficiencies in a largely centralized compliance program (the "BSA/AML Compliance Program") designed to comply with the BSA, the Patriot Act and related anti-money laundering regulations (the "BSA/AML Requirements"). The Consent Orders require, among other things, that the Corporation and its banking subsidiaries review, assess and take actions to strengthen and enhance the BSA/AML Compliance Program, and, in some cases, conduct retrospective reviews of past account activity and transactions, as well as certain reports filed in accordance with the BSA/AML Requirements, to determine whether suspicious activity and certain transactions in currency were properly identified and reported in accordance with the BSA/AML Requirements. See Item 1A. "Risk Factors-Legal, Compliance and Reputational Risks-The Corporation and its bank subsidiaries are subject to regulatory enforcement orders requiring improvement in compliance functions and remedial actions;" "Note-17 Commitments and Contingencies - Legal Proceedings," in the Notes to Consolidated Financial Statements in Item 8. "Financial Statements and Supplementary Data."

Commercial Real Estate Guidance - In December 2015, the Agencies released a statement entitled "Statement on Prudent Risk Management for Commercial Real Estate Lending" (the "CRE Statement"). In the CRE Statement, the Agencies express concerns with institutions which ease commercial real estate underwriting standards, direct financial institutions to maintain underwriting discipline and exercise risk management practices to identify, measure and monitor lending risks, and indicate that they will continue to pay special attention to commercial real estate lending activities and concentrations going forward. The Agencies previously issued guidance in December 2006, entitled "Interagency Guidance on Concentrations in Commercial Real Estate Lending, Sound Risk Management Practices," which states that an institution is potentially exposed to significant commercial real estate concentration risk, and should employ enhanced risk management practices, where (1) total commercial real estate loans represents 300% or more of its total capital and (2) the outstanding balance of such institution's commercial real estate loan portfolio has increased by 50% or more during the prior 36 months.

Community Reinvestment - Under the Community Reinvestment Act ("CRA"), each of the Corporation's subsidiary banks has a continuing and affirmative obligation, consistent with its safe and sound operation, to ascertain and meet the credit needs of its entire community, including low and moderate income areas. The CRA does not establish specific lending requirements or programs for financial institutions, nor does it limit an institution's discretion to develop the types of products and services that it believes are best suited to its particular community. The CRA requires an institution's primary federal regulator, in connection with its examination of the institution, to assess the institution's record of meeting the credit needs of its community and to take such record into account in its evaluation of certain applications by such institution. The assessment focuses on three tests: (1) a lending test, to evaluate the institution's record of making loans, including community development loans, in its designated assessment areas; (2) an investment test, to evaluate the institution's record of investing in community development projects, affordable housing, and programs benefiting low- or moderate-income individuals and areas and small businesses; and (3) a service test, to evaluate the institution's delivery of banking services throughout its CRA assessment area, including low- and moderate-income areas. The CRA also requires all institutions to make public disclosure of their CRA ratings. As of December 31, 2016, all of the Corporation's subsidiary banks are rated at least as "satisfactory." Regulations require that the Corporation's subsidiary banks publicly disclose certain agreements that are in fulfillment of CRA. None of the Corporation's subsidiary banks are party to any such agreements at this time.

Standards for Safety and Soundness - Pursuant to the requirements of FDICIA, as amended by the Riegle Community Development and Regulatory Improvement Act of 1994, the federal bank regulatory agencies adopted guidelines establishing general standards relating to internal controls, information systems, internal audit systems, loan documentation, credit underwriting, interest rate risk exposure, asset growth, asset quality, earnings, compensation,

fees and benefits. In general, the guidelines require, among other things, appropriate systems and practices to identify and manage the risks and exposures specified in the guidelines. An institution must submit a compliance plan to its regulator if it is notified that it is not satisfying any such safety and soundness standards. If the institution fails to submit an acceptable compliance plan or fails in any material respect to implement an accepted compliance plan, the regulator must issue an order directing corrective actions and may issue an order directing other actions of the types to which a significantly undercapitalized institution is subject under the "prompt corrective action" provisions of FDICIA. If the institution fails to comply with such an order, the regulator may seek to enforce such order in judicial proceedings and to impose civil money penalties.

The guidelines prohibit excessive compensation as an unsafe and unsound practice and describe compensation as excessive when the amounts paid are unreasonable or disproportionate to the services performed by an executive officer, employee, director or principal shareholder. In July 2010, the federal banking agencies issued Guidance on Sound Incentive Compensation Policies ("Guidance") that applies to all banking organizations supervised by the agencies (thereby including both the Corporation and its banking subsidiaries). Pursuant to the Guidance, to be consistent with safety and soundness principles, a banking organization's

incentive compensation arrangements should: (1) provide employees with incentives that appropriately balance risk and reward; (2) be compatible with effective controls and risk management; and (3) be supported by strong corporate governance, including active and effective oversight by the banking organization's board of directors. Monitoring methods and processes used by a banking organization should be commensurate with the size and complexity of the organization and its use of incentive compensation.

Section 956 of the Dodd-Frank Act requires the federal banking agencies and the SEC to establish joint regulations or guidelines prohibiting incentive-based payment arrangements at specified regulated entities that encourage inappropriate risk-taking by providing an executive officer, employee, director or principal shareholder with excessive compensation, fees, or benefits or that could lead to material financial loss to the entity. The federal banking agencies issued such proposed rules in April 2011 and issued a revised proposed rule in June 2016, implementing the requirements and prohibitions set forth in Section 956. The revised proposed rule would apply to all banks, among other institutions, with at least \$1 billion in average total consolidated assets, for which it would go beyond the existing Guidance to (i) prohibit certain types and features of incentive-based compensation arrangements for senior executive officers, (ii) require incentive-based compensation arrangements to adhere to certain basic principles to avoid a presumption of encouraging inappropriate risk, (iii) require appropriate board or committee oversight, (iv) establish minimum record keeping and (v) mandate disclosures to the appropriate federal banking agency.

Privacy Protection and Cybersecurity - The Corporation's bank subsidiaries are subject to regulations implementing the privacy protection provisions of the GLB Act. These regulations require each of the Corporation's bank subsidiaries to disclose its privacy policy, including identifying with whom it shares "nonpublic personal information," to customers at the time of establishing the customer relationship and annually thereafter. The regulations also require each bank to provide its customers with initial and annual notices that accurately reflect its privacy policies and practices. In addition, to the extent its sharing of such information is not covered by an exception, each bank is required to provide its customers with the ability to "opt-out" of having the bank share their nonpublic personal information with unaffiliated third parties.

The Corporation's bank subsidiaries are subject to regulatory guidelines establishing standards for safeguarding customer information. These regulations implement certain provisions of the GLB Act. The guidelines describe the federal bank regulatory agencies' expectations for the creation, implementation and maintenance of an information security program, which would include administrative, technical and physical safeguards appropriate to the size and complexity of the institution and the nature and scope of its activities. The standards set forth in the guidelines are intended to ensure the security and confidentiality of customer records and information, protect against any anticipated threats or hazards to the security or integrity of such records and protect against unauthorized access to or use of such records or information that could result in substantial harm or inconvenience to any customer. These guidelines, along with related regulatory materials, increasingly focus on risk management and processes related to information technology and the use of third parties in the provision of financial services. In October 2016, the federal banking agencies issued an advance notice of proposed rulemaking on enhanced cybersecurity risk-management and resilience standards that would apply to large and interconnected banking organizations and to services provided by third parties to these firms. These enhanced standards would apply only to depository institutions and depository institution holding companies with total consolidated assets of \$50 billion or more.

Federal Reserve System - FRB regulations require depository institutions to maintain cash reserves against their transaction accounts (primarily NOW and demand deposit accounts). A reserve of 3% is to be maintained against aggregate transaction accounts between \$15.2 million and \$110.2 million (subject to adjustment by the FRB) plus a reserve of 10% (subject to adjustment by the FRB between 8% and 14%) against that portion of total transaction accounts in excess of \$110.2 million. The first \$15.2 million of otherwise reservable balances (subject to adjustment by the FRB) is exempt from the reserve requirements. Each of the Corporation's bank subsidiaries is in compliance with the foregoing requirements.

Required reserves must be maintained in the form of either vault cash, an account at a Federal Reserve Bank or a pass-through account as defined by the FRB. Pursuant to the Emergency Economic Stabilization Act of 2008, the Federal Reserve Banks pay interest on depository institutions' required and excess reserve balances. The interest rate paid on required reserve balances is currently the average target federal funds rate over the reserve maintenance period. The rate on excess balances will be set equal to the lowest target federal funds rate in effect during the reserve maintenance period.

Federal Securities Laws - The Corporation is subject to the periodic reporting, proxy solicitation, tender offer, insider trading, corporate governance and other requirements under the Securities Exchange Act of 1934. Among other things, the federal securities laws require management to issue a report on the effectiveness of its internal controls over financial reporting. In addition, the Corporation's independent registered public accountants are required to issue an opinion on the effectiveness of the Corporation's internal control over financial reporting. These reports can be found in Part II, Item 8, "Financial Statements and Supplementary Data." Certifications of the Chief Executive Officer and the Chief Financial Officer as required by Sarbanes-Oxley and the resulting SEC rules can be found in the "Signatures" and "Exhibits" sections.

Executive Officers

As of December 31, 2016, the executive officers of the Corporation are as follows:

Name	Age	Office Held and Term of Office
E. Philip Wenger	59	Director of the Corporation since 2009. Mr. Wenger was appointed Chairman of the Board, President and Chief Executive Officer of the Corporation in January 2013. He previously served as President and Chief Operating Officer of the Corporation from 2008 to 2012, a Director of Fulton Bank, N.A. from 2003 to 2009, Chairman of Fulton Bank, N.A. from 2006 to 2009 and has been employed by the Corporation in a number of positions since 1979.  Senior Executive Vice President, Chief Operating Officer and Chief Financial Officer of the Corporation effective December 6, 2016. He joined the Corporation in November 2012 as Senior Executive Vice President and Chief Risk Officer and became Senior Executive Vice President and Chief Operating Officer effective June 1, 2016. Mr. Rohrbaugh was a managing partner of KPMG, LLP's Chicago office from 2009 to 2012; Vice Chairman Industries and part of the U.S. Management Committee of KPMG from 2006 to 2009; he joined KPMG in 2002. He has more than 35 years of experience in public accounting with substantial audit experience serving public and private companies, including financial institutions, and advising companies on accounting, financial reporting matters, equity and debt offerings, and merger and acquisition transactions. Mr. Rohrbaugh currently serves as a director of a public manufacturing company and a national department store chain.
Philmer H. Rohrbaugh	64	
Beth Ann Chivinski	56	Senior Executive Vice President and Chief Risk Officer of the Corporation effective June 1, 2016. Ms. Chivinski has worked in various positions with the Corporation since June of 1994. Most recently she served as the Corporation's Senior Executive Vice President and Chief Audit Executive since April 1, 2013. Prior to that, she served as the Corporation's Executive Vice President, Controller and Chief Accounting Officer from June 2004 to March 31, 2013. Ms. Chivinski is a Certified Public Accountant.
Meg R. Mueller	52	Senior Executive Vice President and Chief Credit Officer of the Corporation since July 2013. Executive Vice President and Chief Credit Officer since 2010. Ms. Mueller has been employed by the Corporation in a number of positions since 1996.
Curtis J. Myers	48	Senior Executive Vice President of the Corporation; and President and Chief Operating Officer of Fulton Bank, N.A. since July 2013. President and Chief Operating Officer of Fulton Bank, N.A. and Executive Vice President of the Corporation since August 2011. President and Chief Operating Officer of Fulton Bank, N.A. since February 2009. Mr. Myers has been employed by Fulton Bank, N.A. in a number of positions since 1990.
Craig A. Roda	60	Senior Executive Vice President of Community Banking of the Corporation since July 2011; and Chairman and Chief Executive Officer of Fulton Bank, N.A., since February 2009. Chief Executive Officer and President of Fulton Bank, N.A. from 2006 to 2009. Mr. Roda has been employed by the Corporation in a number of positions since 1979.
Angela M. Sargent	49	Senior Executive Vice President and Chief Information Officer of the Corporation since July 2013. Executive Vice President and Chief Information Officer since 2002. Ms. Sargent has been employed by the Corporation in a number of positions since 1992.

## Item 1A. Risk Factors

An investment in the Corporation's securities involves certain risks, including, among others, the risks described below. In addition to the other information contained in this report, you should carefully consider the following risk factors.

### ECONOMIC AND CREDIT RISKS.

Difficult conditions in the economy and the capital markets may materially adversely affect the Corporation's business and results of operations.

The Corporation's results of operations and financial condition are affected by conditions in the capital markets and the economy generally. The Corporation's financial performance is highly dependent upon the business environment in the markets where the Corporation operates and in the U.S. as a whole. Unfavorable or uncertain economic and market conditions can be caused by declines in economic growth, business activity or investor or business confidence, limitations on the availability, or increases in the cost, of credit and capital, changes in the rate of inflation, changes in interest rates, high unemployment, natural disasters, acts of war or terrorism, global economic conditions and geopolitical factors, or a combination of these or other factors.

Specifically, the business environment impacts the ability of borrowers to pay interest on, and repay principal of, outstanding loans and the value of collateral securing those loans, as well as demand for loans and other products and services the Corporation offers. If the quality of the Corporation's loan portfolio declines, the Corporation may have to increase its provision for credit losses, which would negatively impact its results of operations, and could result in charge-offs of a higher percentage of its loans. Unlike large, national institutions, the Corporation is not able to spread the risks of unfavorable local economic conditions across a large number of diversified economies and geographic locations. If the communities in which the Corporation operates do not grow, or if prevailing economic conditions locally or nationally are unfavorable, its business could be adversely affected. In addition, increased market competition in a lower demand environment could adversely affect the profit potential of the Corporation.

The Corporation is subject to certain risks in connection with the establishment and level of its allowance for credit losses.

The allowance for credit losses consists of the allowance for loan losses and the reserve for unfunded lending commitments. While the Corporation believes that its allowance for credit losses as of December 31, 2016 is sufficient to cover incurred losses in the loan portfolio on that date, the Corporation may need to increase its provision for credit losses due to changes in the risk characteristics of the loan portfolio, thereby negatively impacting its results of operations.

The allowance for loan losses represents management's estimate of losses inherent in the loan portfolio as of the balance sheet date and is recorded as a reduction to loans. Management's estimate of losses inherent in the loan portfolio is dependent on the proper application of its methodology for determining its allowance needs. The most critical judgments underpinning that methodology include: the ability to identify potential problem loans in a timely manner; proper collateral valuation of loans evaluated for impairment; proper measurement of allowance needs for pools of loans measured for impairment; and an overall assessment of the risk profile of the loan portfolio.

The Corporation determines the appropriate level of the allowance for credit losses based on many quantitative and qualitative factors, including, but not limited to: the size and composition of the loan portfolio; changes in risk ratings; changes in collateral values; delinquency levels; historical losses; and economic conditions. In addition, as the Corporation's loan portfolio grows, it will generally be necessary to increase the allowance for credit losses through

additional provisions, which will impact the Corporation's operating results.

If the Corporation's assumptions and judgments regarding such matters prove to be inaccurate, its allowance for credit losses might not be sufficient, and additional provisions for credit losses might need to be made. Depending on the amount of such provisions for credit losses, the adverse impact on the Corporation's earnings could be material.

Furthermore, banking regulators may require the Corporation to make additional provisions for credit losses or otherwise recognize further loan charge-offs or impairments following their periodic reviews of the Corporation's loan portfolio, underwriting procedures and allowance for credit losses. Any increase in the Corporation's allowance for credit losses or loan charge-offs as required by such regulatory agencies could have a material adverse effect on the Corporation's financial condition and results of operations. See Item 7. "Management's Discussion and Analysis of Financial Condition and Results of Operations-Financial Condition-Provision and Allowance for Credit Losses."

Economic downturns and the composition of the Corporation's loan portfolio subject the Corporation to credit risk.

National, regional and local economic conditions can impact the Corporation's loan portfolio. For example, an increase in unemployment, a decrease in real estate values or changes in interest rates, as well as other factors, such as a substantial decline in the stock market, could weaken the economies of the communities the Corporation serves. Weakness in the market areas served by the Corporation may depress the Corporation's earnings and consequently its financial condition because:

Borrowers may not be able to pay interest on, and repay their principal of, outstanding loans;  
the value of the collateral securing the Corporation's loans to borrowers may decline; and  
demand for loans, as well as and other products and services the Corporation offers, may decline.

Approximately \$10.9 billion, or 74.5%, of the Corporation's loan portfolio was in commercial loans, commercial mortgage loans, and construction loans at December 31, 2016. Commercial loans, commercial mortgage loans and construction loans generally involve a greater degree of credit risk than residential mortgage loans and consumer loans because they typically have larger balances and are likely to be more sensitive to broader economic factors and conditions. Because payments on these loans often depend on the successful operation and management of businesses and properties, repayment of such loans may be affected by factors outside the borrower's control, such as adverse conditions in the real estate markets, adverse economic conditions or changes in government regulation. In recent years, commercial real estate markets have been experiencing substantial growth, and increased competitive pressures have contributed significantly to historically low capitalization rates and rising property values. Commercial real estate prices, according to many U.S. commercial real estate indices, are currently above the 2007 peak levels that contributed to the financial crisis. Accordingly, the federal bank regulatory agencies have expressed concerns about weaknesses in the current commercial real estate market. The Corporation's failure to adequately implement enhanced risk management policies, procedures and controls could adversely affect its ability to increase this portfolio going forward and could result in an increased rate of delinquencies in, and increased losses, from this portfolio. Furthermore, intense competition among lenders, coupled with moderate levels of recent economic growth, can increase pressure on the Corporation to relax its credit standards and/or underwriting criteria in order to achieve the Corporation's loan growth targets. A relaxation of credit standards or underwriting criteria could result in greater challenges in the repayment or collection of loans should economic conditions, or individual borrower performance, deteriorate to a degree that could impact loan performance. Additionally, competitive pressures could drive the Corporation to consider loans and customer relationships that are outside of the Corporation's established risk appetite or target customer base. See Item 7. "Management's Discussion and Analysis of Financial Condition and Results of Operations-Financial Condition-Loans."

## MARKET RISKS.

The Corporation is subject to interest rate risk.

The Corporation cannot predict or control changes in interest rates. The Corporation is affected by fiscal and monetary policies of the federal government, including those of the FRB, which regulates the national money supply and engages in other lending and investment activities in order to manage recessionary and inflationary pressures, many of which affect interest rates charged on loans and paid on deposits.

Net interest income is the difference between interest earned on interest-earning assets and interest paid on interest-bearing liabilities. Net interest income is the most significant component of the Corporation's net income, accounting for approximately 74% of total revenues in 2016. In recent years, the narrowing of interest rate spreads, the difference between interest rates earned on loans and investments and interest rates paid on deposits and borrowings, has adversely affected the Corporation's net interest income.

Low market interest rates have pressured the net interest margin in recent years. Interest-earning assets, such as loans and investments, have been originated, acquired or repriced at lower rates, reducing the average rate earned on those assets. While the average rate paid on interest-bearing liabilities, such as deposits and borrowings, has also declined, the decline has not always occurred at the same pace as the decline in the average rate earned on interest-earning assets, resulting in a narrowing of the net interest margin.

Competition sometimes pressures the Corporation to lower rates charged on loans more than the decline in market rates would otherwise indicate. Competition may also pressure the Corporation to pay higher rates on deposits than market rates would otherwise indicate. Thus, although loan demand has improved in recent years, intense competition among lenders has contributed to downward pressure on loan yields, also narrowing the net interest margin. Further, due to historically low market interest rates, rates paid on deposits have tended to reach a natural floor below which it is difficult to further reduce such rates. See Item 7. "Management's Discussion and Analysis of Financial Condition and Results of Operations-Net Interest Income."

Changes in interest rates may also affect the average life of loans and certain investment securities, most notably mortgage-backed securities. Decreases in interest rates can result in increased prepayments of loans and certain investment securities, as borrowers or issuers refinance to reduce their borrowing costs. Under those circumstances, the Corporation would be subject to reinvestment risk to the extent that it is not able to reinvest the cash received from such prepayments at rates that are comparable to the rates on the loans and investment securities which are prepaid. Conversely, increases in interest rates may extend the average life of fixed rate assets, which could restrict the Corporation's ability to reinvest in higher yielding alternatives, and may result in customers withdrawing certificates of deposit early so long as the early withdrawal penalty is less than the interest they could receive as a result of the higher interest rates.

Changes in interest rates also affect the fair value of interest-earning investment securities. Generally, the value of interest-earning investment securities moves inversely with changes in interest rates. At December 31, 2016, the fair value of the Corporation's portfolio of interest-earning investment securities was \$2.5 billion. Net unrealized losses on these securities was \$47.3 million at December 31, 2016. Whether a decline in fair value below the amortized cost of an investment security constitutes other-than-temporary impairment depends on a number of factors, including whether the Corporation has the intent and ability to retain the investment security for a period of time sufficient to allow for any anticipated recovery in fair value.

Changes in interest rates can affect demand for the Corporation's products and services.

Movements in interest rates can cause demand for some of the Corporation's products and services to be cyclical. As a result, the Corporation may need to periodically increase or decrease the size of certain of its businesses, including its personnel, to more appropriately match increases and decreases in demand and volume. The need to change the scale of these businesses is challenging, and there is often a lag between changes in the businesses and the Corporation's reaction to these changes. For example, demand for residential mortgage loans has historically tended to increase during periods when interest rates were declining and to decrease during periods when interest rates were rising.

Price fluctuations in securities markets, as well as other market events, such as a disruption in credit and other markets and the abnormal functioning of markets for securities, could have an impact on the Corporation's results of operations.

The market value of the Corporation's securities investments, which include mortgage-backed securities, state and municipal securities, auction rate securities, corporate debt securities and equity investments, as well as the revenues the Corporation earns from its trust and investment management services business, are particularly sensitive to price fluctuations and market events. Declines in the values of the Corporation's securities holdings, combined with adverse changes in the expected cash flows from these investments, could result in other-than-temporary impairment charges.

As of December 31, 2016, the Corporation's securities investments included \$97.3 million of investments in student loan auction rate certificates ("ARCs"). Following the failures of periodic auctions for these ARCs, which began in 2008 and have continued since that time, there has not been an active market for these securities. Other than sporadic redemptions and tender offers made by the issuers of these ARCs, these securities are illiquid. Secondary market transactions involving ARCs typically represent forced liquidations or distressed sales and do not provide an accurate basis for determining their fair value. The Corporation does not have the intent to sell the ARCs it holds and does not believe it will more likely than not be required to sell any of the ARCs it holds prior to a recovery of their fair value to amortized cost, which may be at maturity. However, if the Corporation chose to liquidate these securities prior to their maturity, it would likely have to do so at "distressed" sale prices and would likely do so at a loss.

A portion of the Corporation's securities portfolio includes holdings of equity investments, including stocks of publicly traded financial institutions. The portfolio of publicly traded financial institutions includes shares of a single

financial institution which, as of December 31, 2016, had a fair value of \$11.9 million. The Corporation's holdings of this financial institution's securities constituted approximately 50.5% of the fair value of the Corporation's aggregate holdings of publicly traded financial institutions' securities as of that date.

The Corporation's investment management and trust services revenue, which is partially based on the value of the underlying investment portfolios, can also be impacted by fluctuations in the securities markets. If the values of those investment portfolios decrease, whether due to factors influencing U.S. or international securities markets, in general, or otherwise, the Corporation's revenue could be negatively impacted. In addition, the Corporation's ability to sell its brokerage services is dependent, in part, upon consumers' level of confidence in securities markets. See Item 7A. "Quantitative and Qualitative Disclosures About Market Risk."

## LIQUIDITY RISK.

Changes in interest rates or disruption in liquidity markets may adversely affect the Corporation's sources of funding.

The Corporation must maintain sufficient sources of liquidity to meet the demands of its depositors and borrowers, support its operations and meet regulatory expectations. The Corporation's liquidity management policies and practices emphasize core deposits and repayments and maturities of loans and investments as its primary sources of liquidity. These primary sources of liquidity can be supplemented by FHLB advances, borrowings from the Federal Reserve Bank, proceeds from the sales of loans and use of liquidity resources of the holding company, including capital markets funding. Lower-cost, core deposits may be adversely affected by changes in interest rates, and secondary sources of liquidity can be more costly to the Corporation than funding provided by deposit account balances having similar maturities. In addition, adverse changes in the Corporation's results of operations or financial condition, downgrades in the Corporation's credit ratings, regulatory actions involving the Corporation, or changes in regulatory, industry or market conditions could lead to increases in the cost of these secondary sources of liquidity, the inability to refinance or replace these secondary funding sources as they mature, or the withdrawal of unused borrowing capacity under these secondary funding sources.

While the Corporation attempts to manage its liquidity through various techniques, the assumptions and estimates used do not always accurately forecast the impact of changes in customer behavior. For example, the Corporation may face limitations on its ability to fund loan growth if customers move funds out of the Corporation's bank subsidiaries' deposit accounts in response to increases in interest rates. In the years following the 2008 financial crisis, even as the general level of market interest rates remained low by historical standards, depositors frequently avoided higher-yielding and higher-risk alternative investments, in favor of the safety and liquidity of non-maturing deposit accounts. These circumstances contributed to significant growth in non-maturing deposit account balances at the Corporation, and at depository financial institutions generally. Should interest rates rise, customers may become more sensitive to interest rates when making deposit decisions and considering alternative opportunities. This increased sensitivity to interest rates could cause customers to move funds into higher-yielding deposit accounts offered by the Corporation's bank subsidiaries, require the Corporation's bank subsidiaries to offer higher interest rates on deposit accounts to retain customer deposits or cause customers to move funds into alternative investments or deposits of other banks or non-bank providers. Technology and other factors have also made it more convenient for customers to transfer low-cost deposits into higher-cost deposits or into alternative investments or deposits of other banks or non-bank providers. Movement of customer deposits into higher-yielding deposit accounts offered by the Corporation's bank subsidiaries, the need to offer higher interest rates on deposit accounts to retain customer deposits or the movement of customer deposits into alternative investments or deposits of other banks or non-bank providers could increase the Corporation's funding costs, reduce its net interest margin and/or create liquidity challenges.

Market conditions have been negatively impacted by disruptions in the liquidity markets in the past, and such disruptions or an adverse change in the Corporation's results of operations or financial condition could, in the future, have a negative impact on secondary sources of liquidity. If the Corporation is not able to continue to rely primarily on customer deposits to meet its liquidity and funding needs, continue to access secondary, non-deposit funding sources on favorable terms or otherwise fails to manage its liquidity effectively, the Corporation's ability to continue to grow may be constrained and the Corporation's liquidity, operating margins, results of operations and financial condition may be materially adversely affected. See Item 7A. "Quantitative and Qualitative Disclosures About Market Risk-Interest Rate Risk, Asset/Liability Management and Liquidity."

Liquidity planning at both the bank and holding company levels has become an area of increased regulatory emphasis.

Due to regulatory constraints on the Corporation's ability to rely on short-term borrowings, any significant movements of deposits away from traditional depository accounts which negatively impacts the Corporation's loan-to-deposit ratio

could restrict its ability to achieve growth in loans or require the Corporation to pay higher interest rates on deposit products in order to retain deposits to fund loans.

Liquidity must also be managed at the holding company level. Banking regulators carefully scrutinize liquidity at the holding company level, in addition to consolidated and bank liquidity levels. For safety and soundness reasons, banking regulations limit the amount of cash that can be transferred from bank subsidiaries to the parent company in the form of loans and dividends. Generally, these limitations are based on the bank subsidiaries' regulatory capital levels and their net income. These factors have affected some institutions' ability to pay dividends and have required some institutions to establish borrowing facilities at the holding company level.

#### LEGAL, COMPLIANCE AND REPUTATIONAL RISKS.

The Corporation and its bank subsidiaries are subject to extensive regulation and supervision and may be adversely affected by changes in laws and regulations or any failure to comply with laws and regulations.

Virtually every aspect of the Corporation's and its bank subsidiaries' operations is subject to extensive regulation and supervision by federal and state regulatory agencies. Under this regulatory framework, regulatory agencies have broad authority in carrying out their supervisory, examination and enforcement responsibilities to address compliance with applicable laws and regulations, including laws and regulations relating to capital adequacy, asset quality, liquidity and risk management, as well as laws and regulations governing consumer protection, fair lending, privacy, information security and anti-money laundering and anti-terrorism laws, among other aspects of the Corporation's business.

Federal and state legislatures and regulatory agencies continually review banking and other laws, regulations and policies for possible changes. Changes in federal or state laws, regulations or governmental policies, including income tax laws, affecting the Corporation and its business, and the effects of such changes, are difficult to predict and may produce unintended consequences. New laws, regulations or changes in the regulatory environment could limit the types of financial services and products the Corporation may offer, alter demand for existing products and services, increase the ability of non-banks to offer competing financial services and products, increase compliance burdens, or otherwise adversely affect the Corporation's business, results of operations or financial condition.

The Corporation has six bank subsidiaries, and the Corporation and its subsidiaries are subject to regulation by a relatively large number of federal and state regulatory agencies. This corporate structure presents challenges, specifically, the need for compliance with different, and potentially inconsistent, regulatory requirements and expectations. The time, expense and internal and external resources associated with regulatory compliance continue to increase, and balancing the need to address regulatory changes and effectively manage overall non-interest expenses has become more challenging than it has been in the past. As a result, the Corporation's compliance obligations increase the Corporation's expense, require increasing amounts of management's attention and can be a disadvantage from a competitive standpoint with respect to non-regulated competitors and larger bank competitors with more extensive resources.

The Corporation has announced that it is developing plans to seek regulatory approval to begin the process of consolidating its six bank subsidiaries. This multi-year consolidation process is expected to eventually result in the Corporation conducting its core banking business through a single bank subsidiary, which would reduce the number of government agencies that regulate the Corporation's banking operations. The timing of the commencement of this consolidation process will depend significantly on the Corporation and its bank subsidiaries making necessary progress in enhancing a largely centralized compliance program designed to comply with the requirements of the BSA, the Patriot Act and related anti-money laundering regulations (collectively, the "BSA/AML Requirements"). The Corporation will also need to establish, to the satisfaction of the Corporation's banking regulatory agencies, that those enhancements are sustainable to achieve compliance with the regulatory enforcement orders issued to the Corporation and its bank subsidiaries by their respective banking regulatory agencies relating to identified deficiencies in that compliance program. There is no assurance that the regulatory approvals required for such consolidation can be obtained or that such consolidation would significantly reduce the time, expense and internal and external resources associated with regulatory compliance.

Compliance with banking statutes and regulations is important to the Corporation's ability to engage in new activities and to consummate certain transactions. Banking regulators are scrutinizing banks through longer and more intensive bank examinations. Federal and state banking agencies possess broad powers to take supervisory actions, as they deem appropriate. These supervisory actions may result in higher capital requirements, higher deposit insurance premiums and limitations on the Corporation's operations and expansion activities that could have a material adverse effect on its business and profitability. As noted below and as examples of such limitations, the regulatory enforcement orders to which the Corporation and each of its bank subsidiaries are subject impose certain restrictions on the expansion activities of the Corporation and such bank subsidiaries.

In addition, in September 2016, the CFPB and the OCC entered into a consent order with a large national bank alleging widespread improper sales practices, which prompted the federal bank regulatory agencies to conduct a horizontal review of sales practices throughout the banking industry. The elevated attention likely will result in continued additional regulatory scrutiny and regulation of incentive arrangements, which could adversely impact the delivery of services and increase compliance costs.

Failure to comply with these regulatory requirements, including inadvertent or unintentional violations, may result in the assessment of fines and penalties, or the commencement of further informal or formal regulatory enforcement actions against the Corporation or its bank subsidiaries. Other negative consequences can also result from such failures, including regulatory restrictions on the Corporation's activities, including restrictions on the Corporation's ability to grow through acquisition, reputational damage, restrictions on the ability of institutional investment managers to invest in the Corporation's securities, and increases in the Corporation's costs of doing business. The occurrence of one or more of these events may have a material adverse effect on the Corporation's business, financial condition and/or results of operations.

The Corporation and its bank subsidiaries are subject to regulatory enforcement orders requiring improvement in compliance functions and remedial actions.

In recent years, a combination of financial reform legislation and heightened scrutiny by banking regulators have significantly increased expectations regarding what constitutes an effective risk and compliance management infrastructure. To keep pace with these expectations, the Corporation has invested considerable resources in initiatives designed to strengthen its risk management framework and regulatory compliance programs, including those designed to comply with the BSA/AML Requirements.

Nonetheless, as mentioned above, the Corporation and each of its bank subsidiaries are subject to regulatory enforcement orders issued during 2014 and 2015 by their respective Federal and state bank regulatory agencies relating to identified deficiencies in the Corporation's centralized BSA and anti-money laundering compliance program (the "BSA/AML Compliance Program"), which was designed to comply with the BSA/AML Requirements.

The regulatory enforcement orders, which are in the form of consent orders or orders to cease and desist issued upon consent (the "Consent Orders"), generally require, among other things, that the Corporation and its bank subsidiaries undertake a number of required actions to strengthen and enhance the BSA/AML Compliance Program, and, in some cases, conduct retrospective reviews of past account activity and transactions, as well as certain reports filed in accordance with the BSA/AML Requirements, to determine whether suspicious activity and certain transactions in currency were properly identified and reported in accordance with the BSA/AML Requirements.

In addition to requiring strengthening and enhancement of the BSA/AML Compliance Program, while the Consent Orders remain in effect, the Corporation is subject to certain restrictions on expansion activities, such as growth through acquisition or branching to supplement organic growth of the Corporation and its bank subsidiaries. Further, any failure to comply with the requirements of any of the Consent Orders involving the Corporation or its bank subsidiaries could result in further enforcement actions, the imposition of material restrictions on the activities of the Corporation or its bank subsidiaries, or the assessment of fines or penalties.

Additional expenses and investments have been incurred as the Corporation expanded its hiring of personnel and use of outside professionals, such as consulting and legal services, and capital investments in operating systems to strengthen and support the BSA/AML Compliance Program, as well as the Corporation's broader compliance and risk management infrastructures. The expense and capital investment associated with all of these efforts, including in connection with the Consent Orders, have had an adverse effect on the Corporation's results of operations in recent periods and could have a material adverse effect on the Corporation's results of operations in one or more future periods.

Finally, due to the existence of the Consent Orders, some counterparties may not be permitted to, due to their internal policies, or may choose not to do business with the Corporation or its bank subsidiaries. Should counterparties upon which the Corporation or its bank subsidiaries rely for the conduct of their business become unwilling to do business with the Corporation or its bank subsidiaries, the Corporation's results of operations and/or financial condition could be materially adversely effected.

While the Corporation believes that it has made significant progress in improving its BSA/AML Compliance Program, there is no assurance as to how long the Consent Orders will remain in effect.

The Corporation's largest subsidiary, Fulton Bank, is expected to have had total assets of \$10 billion or more for four consecutive quarters as of March 31, 2017, which will subject it to additional regulation and increased supervision.

The Dodd-Frank Act imposes additional regulatory requirements on institutions with \$10 billion or more in assets. The Corporation's largest bank subsidiary, Fulton Bank, had \$10.7 billion in assets as of December 31, 2016, and had assets of \$10 billion or more as of the end of each of the previous two quarters. If Fulton Bank has assets of \$10 billion or more as of March 31, 2017, it will become subject to the following:

- Supervision, examination and enforcement jurisdiction by the CFPB with respect to consumer financial protection laws;
- Additional stress testing requirements;
- A modified methodology for calculating FDIC insurance assessments and potentially higher assessment rates as a result of institutions with \$10 billion or more in assets being required to bear the cost of raising the FDIC reserve ratio to 1.35% as required by the Dodd-Frank Act;
- Heightened compliance standards under the Volcker Rule; and
- Enhanced bank regulatory supervision as a larger financial institution.

In addition, the Corporation's other bank subsidiaries will also become subject to the supervision, examination and enforcement jurisdiction by the CFPB with respect to consumer financial protection laws. See Item 1. "Business-Supervision and Regulation."

Financial reform legislation continues to have a significant impact on the Corporation's business and results of operations; however, until more implementing regulations are adopted, the extent to which the legislation will impact the Corporation is uncertain.

The Dodd-Frank Act was enacted in 2010. The scope of the Dodd-Frank Act impacted many aspects of the financial services industry, and the Act required the development and adoption of many regulations, a number of which have not yet been adopted or fully implemented. The delay in the implementation of many of the regulations mandated by the Dodd-Frank Act on the timelines contemplated by such legislation has resulted in a lack of clear regulatory guidance to banks with respect to certain matters. The resulting uncertainty can cause banks to take a cautious approach to certain business initiatives and planning. Additional uncertainty regarding the effect of the Dodd-Frank Act exists due to court decisions and the potential for additional legislative changes to the Dodd-Frank Act.

The Corporation has been impacted, and will likely continue to be in the future, by the so-called Durbin Amendment to the Dodd-Frank Act, which reduced debit card interchange revenue of banks, and revised FDIC deposit insurance assessments. The Corporation has also been impacted by the Dodd-Frank Act in the areas of corporate governance, capital requirements, risk management, stress testing and regulation under consumer protection laws.

The Dodd-Frank Act established the CFPB. Among other things, the CFPB was given rulemaking authority over most providers of consumer financial services in the U.S., examination and enforcement authority over the consumer operations of large banks, as well as interpretive authority with respect to numerous existing consumer financial services regulations. The CFPB began exercising these oversight authorities over the largest banks during 2011. As an independent bureau funded by the FRB, the CFPB may impose requirements more severe than the previous bank regulatory agencies. The CFPB has also been directed to write rules identifying practices or acts that are unfair, deceptive or abusive in connection with any transaction with a consumer for a consumer financial product or service, or the offering of a consumer financial product or service. The CFPB has initiated enforcement actions against a variety of bank and non-bank market participants with respect to a number of consumer financial products and services that has resulted in those participants expending significant time, money and resources to adjust to the initiatives being pursued by the CFPB. These enforcement actions may serve as precedent for how the CFPB interprets and enforces consumer protection laws, including practices or acts that are deemed to be unfair, deceptive or abusive, with respect to all supervised institutions, which may result in the imposition of higher standards of compliance with such laws. The concept of what may be considered to be an "abusive" practice is relatively new under the law.

Pursuant to the Dodd-Frank Act, the CFPB issued a series of final rules in January 2013 related to mortgage loan origination and mortgage loan servicing. These final rules prohibit creditors, such as the Corporation's bank subsidiaries, from extending residential mortgage loans without regard for the consumer's ability to repay, provide certain safe harbor protections for the origination of loans that meet the requirements for a "qualified mortgage" and add restrictions and requirements to residential mortgage origination and servicing practices. In addition, these rules restrict the imposition of prepayment penalties and compensation practices relating to residential mortgage loan origination. These rules may subject the Corporation's bank subsidiaries to increased potential liability related to their residential loan origination activities, as well as increase costs. See Item 1. "Business-Supervision and Regulation."

In May 2016, the CFPB issued a proposed rule that would prohibit banks from using a pre-dispute arbitration agreement to block consumer class actions in court and would require banks to insert language into their arbitration agreements reflecting this limitation. The proposed rule would also require banks that use pre-dispute arbitration

agreements to submit certain records relating to arbitral proceedings to the CFPB. The proposed rule would generally apply to contracts entered into more than 180 days after the effective date of any final rule. If adopted as proposed, this rule could result in increased litigation and defense costs as plaintiff's class action firms would feel encouraged to seek clients as class representatives for alleged consumer harm that otherwise would have been the subject to the existing arbitration clauses in consumer contracts. This proposed rule, if adopted, and other CFPB regulations likely will continue to increase the Corporation's compliance expenses.

Fulton Bank and the Corporation's other bank subsidiaries are expected to become (as of March 31, 2017) subject to supervision and examination by the CFPB for compliance with the CFPB's regulations and policies. The costs and limitations related to this additional regulatory regimen have yet to be fully determined, however they could result in material adverse effects on the Corporation's profitability.

The financial services industry, as well as the broader economy, may be subject to new legislation, regulation, and government policy.

At this time, it is difficult to predict the legislative and regulatory changes that will result from the combination of a new President of the United States and, for the first year since 2010, both Houses of Congress and the White House have majority memberships from the same political party. In recent years, however, both the new President and senior members of the House of Representatives have advocated for significant reduction of financial services regulation, to include amendments to the Dodd-Frank Act and structural changes to the CFPB, and consideration of significant changes to the federal income tax code. In addition, the new Administration and Congress may cause broader economic changes due to changes in governing ideology and governing style. New appointments to the Board of Governors of the Federal Reserve could affect monetary policy and interest rates, and changes in fiscal policy could affect broader patterns of trade and economic growth. Future legislation, regulation, and government policy could affect the banking industry as a whole, including the Corporation's business and results of operations, in ways that are difficult to predict. In addition, the Corporation's results of operations could also be adversely affected by changes in the way in which existing statutes and regulations are interpreted or applied by courts and government agencies.

Negative publicity could damage the Corporation's reputation and business.

Reputation risk, or the risk to the Corporation's earnings and capital from negative public opinion, is inherent in the Corporation's business. Negative public opinion could result from the Corporation's actual or alleged conduct in any number of activities, including lending practices, corporate governance, regulatory, compliance, mergers and acquisitions, and disclosure, sharing or inadequate protection of customer information, and from actions taken by government agencies and community organizations in response to that conduct. Because the Corporation conducts the majority of its businesses under the "Fulton" brand, negative public opinion about one line of business could affect the Corporation's other lines of businesses.

From time to time the Corporation and its subsidiaries may be the subject of litigation and governmental or administrative proceedings. Adverse outcomes of any such litigation or proceedings may have a material adverse impact on the Corporation's business and results of operations as well as its reputation.

Many aspects of the Corporation's business involve substantial risk of legal liability. From time to time, the Corporation and its subsidiaries have been named or threatened to be named as defendants in various lawsuits arising from its business activities (and in some cases from the activities of companies that were acquired). In addition, the Corporation and its bank subsidiaries are regularly the subject of governmental investigations and other forms of regulatory inquiry. For example, the Corporation is cooperating with the U.S. Department of Justice in an investigation regarding potential violations of the fair lending laws by Fulton Bank, Fulton Bank of New Jersey, The Columbia Bank and Lafayette Ambassador Bank due to potential lending discrimination on the basis of race and national origin. Like other large financial institutions, the Corporation is also subject to risk from potential employee misconduct, including non-compliance with policies and improper use or disclosure of confidential information. These matters could result in adverse judgments, settlements, fines, penalties, injunctions or other relief. Substantial legal liability or significant regulatory actions against us could materially adversely affect our business, financial condition or results of operations and/or cause significant reputational harm to our business. The Corporation establishes reserves for legal claims when payments associated with the claims become probable and the costs can be reasonably estimated. However, the Corporation may still incur legal costs for a matter, even if a reserve has not been established.

Currently, the Corporation and its bank subsidiaries are the subject of regulatory proceedings in the form of the Consent Orders. The Corporation can provide no assurance as to the outcome or resolution of legal or administrative actions, and such actions may result in judgments against us for significant damages or the imposition of regulatory restrictions on our operations. Resolution of these types of matters can be prolonged and costly, and the ultimate results or judgments are uncertain due to the inherent uncertainty in the outcomes of litigation and other proceedings.

The Corporation is subject to a variety of risks in connection with origination and sale of loans.

The Corporation originates residential mortgage loans and other loans, such as loans guaranteed, in part, by the U.S. Small Business Administration, all or portions of which are later sold in the secondary market to government sponsored enterprises or agencies, such as the Federal National Mortgage Association (Fannie Mae), and other non-government sponsored investors. In connection with such sales, the Corporation makes certain representations and warranties with respect to matters such as the underwriting, origination, documentation or other characteristics of the loans sold. The Corporation may be required to repurchase a loan, or to reimburse the purchaser of a loan for any related losses, if it is determined that the loan sold was in violation of representations or warranties made at the time of the sale, and, in some cases, if there is evidence of borrower fraud, in the event of early payment default by the borrower on the loan, or for other reasons. The Corporation maintains reserves for potential losses on certain loans sold, however, it is possible that losses incurred in connection with loan repurchases and reimbursement payments may be in

23

---

excess of any applicable reserves, and the Corporation may be required to increase reserves and may sustain additional losses associated with such loan repurchases and reimbursement payments in the future. Increases to the reserves and losses incurred in connection with actual loan repurchases and reimbursement payments in excess of the amount of any applicable reserves could have a material adverse effect on the Corporation's financial condition or results of operations.

#### STRATEGIC AND EXTERNAL RISKS.

The Corporation is in the process of transforming its business model and this transformation may not be successful.

The Corporation historically has followed a "super-community" banking strategy under which the Corporation has operated its bank subsidiaries autonomously to maximize the advantages of the community banking model in serving the needs of its customers. Reliance on this model has posed challenges to the Corporation's efforts to manage risk efficiently and effectively through a centralized risk management and compliance function. As a result of these challenges and a desire to refine its business strategy, the Corporation is in the process of transitioning to a business model that is primarily focused on alignment of services with the customer segments the Corporation serves and less oriented to geographic boundaries.

The transformation of the Corporation's business model, which is being implemented over a period of several years, may have some or all of the following unintended effects:

- The efficiencies sought may not be achieved;
- Some customers may not receive the change in business model in a positive manner, and relationships with these customers may be jeopardized;
- The changes in organizational structure and the evolution of the Corporation's culture that will be required to support the transition to the new business model may lead to dissatisfaction among employees which could make it more difficult for the Corporation to retain key employees;
- The transition to the new business model may create operational and other challenges that are disruptive to the Corporation's business; and
- Expenses will be incurred in the implementation of the new business model, and the implementation process may distract the Corporation from achieving other fundamental business objectives.

The Corporation may not be able to achieve its growth plans.

The Corporation's business plan includes the pursuit of profitable growth. Under current economic, competitive and regulatory conditions, profitable growth may be difficult to achieve due to one or more of the following factors:

- In the current, prolonged low interest rate environment, the Corporation's net interest margin has been compressed, and it is possible that a net interest margin that is lower than historical levels could continue for some time. As a result, income growth will likely need to come from growth in the volume of earning assets, particularly loans, and an increase in non-interest income. However, customer demand and competition could make such income growth difficult to achieve;
- Operating expenses, particularly in the compliance and risk management areas, have been elevated, and such expenses may increase in the near future, as a result of Fulton Bank surpassing the \$10 billion in assets threshold; and
- Growth through acquisition or branching to supplement organic growth is unlikely to occur while the Consent Orders referenced above are in place, due to an inability to obtain the required regulatory approvals.

The competition the Corporation faces is significant and may reduce the Corporation's customer base and negatively impact the Corporation's results of operations.

There is significant competition among commercial banks in the market areas served by the Corporation. In addition, the Corporation also competes with other providers of financial services, such as savings and loan associations, credit unions, consumer finance companies, securities firms, insurance companies, commercial finance and leasing companies, the mutual funds industry, full service brokerage firms and discount brokerage firms, some of which are subject to less extensive regulation than the Corporation is with respect to the products and services they provide and have different cost structures. Some of the Corporation's competitors have greater resources, higher lending limits, lower cost of funds and may offer other services not offered by the Corporation. The Corporation also experiences competition from a variety of institutions outside its market areas. Some of these institutions conduct business primarily over the Internet and, as a result, may be able to realize certain cost savings and offer products and services at more favorable rates and with greater convenience to the customer. The financial services industry could become even more competitive as a result of legislative, regulatory and technological changes and continued consolidation. In addition, technology

has lowered barriers to entry and made it possible for non-banks to offer products and services traditionally provided by banks, such as transferring funds and paying bills.

Competition may adversely affect the rates the Corporation pays on deposits and charges on loans, and could result in the loss of fee income, as well as the loss of customer deposits and the income generated from those deposits, thereby potentially adversely affecting the Corporation's profitability and its ability to continue to grow. The Corporation's profitability and continued growth depends upon its continued ability to successfully compete in the market areas it serves. See Item 1. "Business-Competition."

If the goodwill that the Corporation has recorded in connection with its acquisitions becomes impaired, it could have a negative impact on the Corporation's results of operations.

In the past, the Corporation supplemented its internal growth with strategic acquisitions of banks, branches and other financial services companies. If the purchase price of an acquired company exceeds the fair value of the company's net assets, the excess is carried on the acquirer's balance sheet as goodwill. As of December 31, 2016, the Corporation had \$530.6 million of goodwill recorded on its balance sheet. The Corporation is required to evaluate goodwill for impairment at least annually. Write-downs of the amount of any impairment, if necessary, are to be charged to earnings in the period in which the impairment occurs. There can be no assurance that future evaluations of goodwill will not result in impairment charges.

Changes in accounting policies, standards, and interpretations could materially affect how we report our financial condition and results of operations.

The preparation of the Corporation's financial statements in accordance with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities as of the date of the financial statements, as well as revenues and expenses during the period. A summary of the accounting policies that the Corporation considers to be most important to the presentation of its financial condition and results of operations, because they require management's most difficult judgments as a result of the need to make estimates about the effects of matters that are inherently uncertain, including those related to the allowance for credit losses, goodwill, income taxes, and fair value measurements, is set forth in Item 7. "Management's Discussion and Analysis of Financial Condition and Results of Operations-Critical Accounting Policies" and within "Note 1-Summary of Significant Accounting Policies," in the Notes to Consolidated Financial Statements in Item 8. "Financial Statements and Supplementary Data."

A variety of factors could affect the ultimate values of assets, liabilities, income and expenses recognized and reported in the Corporation's financial statements and these ultimate values may differ materially from those determined based on management's estimates and assumptions. In addition, the Financial Accounting Standards Board ("FASB"), regulatory agencies, and other bodies that establish accounting standards from time to time change the financial accounting and reporting standards governing the preparation of the Corporation's financial statements. Further, those bodies that establish and interpret the accounting standards (such as the FASB, the Securities and Exchange Commission, and banking regulators) may change prior interpretations or positions regarding how these standards should be applied. These changes can be difficult to predict and can materially affect how the Corporation records and reports its financial condition and results of operations. For example, during 2016, the FASB issued a new accounting standard, Accounting Standards Update 2016-13, that will require the recognition of credit losses on loans and other financial assets based on an entity's current estimate of expected losses over the lifetime of each loan or other financial asset, referred to as the current expected credit loss ("CECL") model, as opposed to current accounting standards, which require recognition of losses on loans and other financial assets only when those losses are "probable." The Corporation's adoption of this accounting standard, which is required for interim and annual reporting periods beginning after December 15, 2019, could materially affect the Corporation's allowance for credit losses methodology,

financial condition, capital levels and results of operations, including expenses the Corporation may incur in implementing this accounting standard. See "Note 1 - Summary of Significant Accounting Policies - Recently Issued Accounting Standards" in the Notes to Consolidated Financial Statements in Item 8. "Financial Statements and Supplementary Data."

#### OPERATIONAL RISKS.

The Corporation is exposed to many types of operational and other risks and the Corporation's framework for managing risks may not be effective in mitigating risk.

The Corporation is exposed to many types of operational risk, including the risk of human error or fraud by employees and other third parties, intentional and inadvertent misrepresentation by loan applicants, unsatisfactory performance by employees and vendors, clerical and record-keeping errors, computer and telecommunications systems malfunctions or failures and reliance on data that may be faulty or incomplete. In an environment characterized by continual, rapid technological change, as discussed below, when the Corporation introduces new products and services, or makes changes to its information technology systems and

processes, these operational risks are increased. Any of these operational risks could result in the Corporation's diminished ability to operate one or more of its businesses, financial loss, potential liability to customers, inability to secure insurance, reputational damage and regulatory intervention, which could materially adversely affect the Corporation.

The Corporation's risk management framework is subject to inherent limitations, and risks may exist, or develop in the future, that the Corporation has not anticipated or identified. If the Corporation's risk management framework proves to be ineffective, the Corporation could suffer unexpected losses and could be materially adversely affected. As noted above, the Corporation's historical decentralized banking strategy further challenges the Corporation's efforts to manage risk efficiently and effectively through a centralized risk management and compliance function.

The Corporation's operational risks include risks associated with third-party vendors and other financial institutions.

The Corporation relies upon certain third-party vendors to provide products and services necessary to maintain its day-to-day operations, including, notably, responsibility for the core processing system that services all of the Corporation's bank subsidiaries. Accordingly, the Corporation's operations are exposed to the risk that these vendors might not perform in accordance with applicable contractual arrangements or service level agreements. The failure of an external vendor to perform in accordance with applicable contractual arrangements or service level agreements could be disruptive to the Corporation's operations, which could have a material adverse effect on the Corporation's financial condition and/or results of operations. Further, third-party vendor risk management has become a point of regulatory emphasis recently. A failure of the Corporation to follow applicable regulatory guidance in this area could expose the Corporation to regulatory sanctions.

The commercial soundness of many financial institutions may be closely interrelated as a result of credit, trading, execution of transactions or other relationships between the institutions. As a result, concerns about, or a default or threatened default by, one institution could lead to significant market-wide liquidity and credit problems, losses or defaults by other institutions. This risk is sometimes referred to as "systemic risk" and may adversely affect financial intermediaries, such as clearing agencies, clearing houses, banks, securities firms and exchanges, with which the Corporation interacts on a daily basis, and therefore could adversely affect the Corporation.

Any of these operational or other risks could result in the Corporation's diminished ability to operate one or more of its businesses, financial loss, potential liability to customers, inability to secure insurance, reputational damage and regulatory intervention, which could materially adversely affect the Corporation.

The Corporation's internal controls may be ineffective.

One critical component of the Corporation's risk management framework is its system of internal controls. Management regularly reviews and updates the Corporation's internal controls, disclosure controls and procedures, and corporate governance policies and procedures. Any system of controls, however well designed and operated, is based in part on certain assumptions and can provide reasonable, but not absolute, assurances that the objectives of the controls are met. Any failure or circumvention of the Corporation's controls and procedures or failure to comply with regulations related to controls and procedures could have a material adverse effect on the Corporation's business, results of operations, financial condition and reputation. See Item 9A. "Controls and Procedures."

Loss of, or failure to adequately safeguard, confidential or proprietary information may adversely affect the Corporation's operations, net income or reputation.

The Corporation's business is highly dependent on information systems and technology and the ability to collect, process, transmit and store significant amounts of confidential information regarding customers, employees and others

on a daily basis. While the Corporation performs some of the functions required to operate its business directly, it also outsources significant business functions, such as processing customer transactions, maintenance of customer-facing websites, including its online banking function, and developing software for new products and services, among others. These relationships require the Corporation to allow third parties to access, store, process and transmit customer information. As a result, the Corporation may be subject to cyber security risks directly, as well as indirectly through the vendors to whom it outsources business functions. The increased use of smartphones, tablets and other mobile devices, as well as cloud computing, may also heighten these and other operational risks. Cyber threats could result in unauthorized access, loss or destruction of customer data, unavailability, degradation or denial of service, introduction of computer viruses and other adverse events, causing the Corporation to incur additional costs (such as repairing systems or adding new personnel or protection technologies). Cyber threats may also subject the Company to regulatory investigations, litigation or enforcement or require the payment of regulatory fines or penalties, all or any of which could adversely affect the Corporation's business, financial condition or results of operations and damage its reputation.

The Corporation attempts to reduce its exposure to its vendors' cyber incidents by performing initial vendor due diligence that is updated periodically for critical vendors, negotiating service level standards with vendors, negotiating for indemnification from vendors for confidentiality and data breaches, and limiting third-party access to the least privileged level necessary to perform outsourced functions, among other things. The Corporation also uses monitoring and preventive controls to detect and respond to cyber threats to its own systems before they become significant. However, there can be no assurance that the measures employed by the Corporation to combat direct or indirect cyber threats will be effective. In addition, because the methods of cyber attacks change frequently or, in some cases, are not recognized until launched, the Corporation may be unable to implement effective preventive control measures or proactively address these methods. The Corporation's or a vendor's failure to promptly identify and counter a cyber attack may result in increased costs and consequences of a successful cyber attack. Although the Corporation maintains insurance coverage that may, subject to policy terms and conditions, cover certain aspects of cyber risks, such insurance coverage may be inapplicable or otherwise insufficient to cover any or all losses.

Account data compromise events at large retailers, health insurers and others in recent years have resulted in heightened legislative and regulatory focus on privacy, data protection and information security. New or revised laws and regulations may significantly impact the Corporation's current and planned privacy, data protection and information security-related practices, the collection, use, sharing, retention and safeguarding of consumer and employee information, and current or planned business activities. Compliance with current or future privacy, data protection and information security laws to which the Corporation is subject could result in higher compliance and technology costs and could restrict the Corporation's ability to provide certain products and services, which could materially and adversely affect the Corporation's profitability. The Corporation's failure to comply with privacy, data protection and information security laws could result in potentially significant regulatory and governmental investigations and/or actions, litigation, fines, sanctions and damage to the Corporation's reputation and its brand.

The Corporation continually encounters technological change.

The financial services industry is continually undergoing rapid technological change with frequent introductions of new technology-driven products and services. The effective use of technology increases efficiency and enables financial institutions to better serve customers and to reduce costs. The Corporation's future success depends, in part, upon its ability to address the needs of its customers by using technology to provide products and services that will satisfy customer demands, as well as to create additional efficiencies in the Corporation's operations. The costs of new technology, including personnel, can be high, in both absolute and relative terms. Many of the Corporation's financial institution competitors have substantially greater resources to invest in technological improvements. In addition, new payment services developed and offered by non-bank competitors pose an increasing threat to the traditional payment services offered by financial institutions. The Corporation may not be able to effectively implement new technology-driven products and services, be successful in marketing these products and services to its customers, or effectively deploy new technologies to improve the efficiency of its operations. Failure to successfully keep pace with technological change affecting the financial services industry could have a material adverse impact on the Corporation's business, financial condition and results of operations.

There can be no assurance, given the past pace of change and innovation, that the Corporation's technology, either purchased or developed internally, will meet or continue to meet the needs of the Corporation and the needs of its customers.

In addition, advances in technology, as well as changing customer preferences favoring access to the Corporation's products and services through digital channels, could decrease the value of the Corporation's branch network and other assets. If customers increasingly choose to access the Corporation's products and services through digital channels, the Corporation may find it necessary to consolidate, close or sell branch locations or restructure its branch network. These actions could lead to losses on assets, expenses to reconfigure branches and the loss of customers in affected

markets. As a result, the Corporation's business, financial condition or results of operations may be adversely affected.

The Corporation may not be able to attract and retain skilled people.

The Corporation's success depends, in large part, on its ability to attract and retain skilled people. Competition for talented personnel in most activities engaged in by the Corporation can be intense, and the Corporation may not be able to hire sufficiently skilled people or to retain them. The unexpected loss of services of one or more of the Corporation's key personnel could have a material adverse impact on the Corporation's business because of their skills, knowledge of the Corporation's markets, years of industry experience and the difficulty of promptly finding qualified replacement personnel.

As an example, and as noted above, the Corporation is engaged in an effort to enhance its compliance and risk management functions. Because many of the Corporation's peers are engaged in similar efforts, the competition for personnel with skills in these areas can be significant and, to the extent that the Corporation is able to attract qualified personnel, the expense associated with hiring and retaining such personnel may be substantial.

## RISKS RELATED TO AN INVESTMENT IN THE CORPORATION'S SECURITIES.

The Corporation's future growth may require the Corporation to raise additional capital in the future, but that capital may not be available when it is needed or may be available only at an excessive cost.

The Corporation is required by regulatory agencies to maintain adequate levels of capital to support its operations. The Corporation anticipates that current capital levels will satisfy regulatory requirements for the foreseeable future. The Corporation, however, may at some point choose to raise additional capital to support future growth. The Corporation's ability to raise additional capital will depend, in part, on conditions in the capital markets at that time, which are outside of the Corporation's control. Accordingly, the Corporation may be unable to raise additional capital, if and when needed, on terms acceptable to the Corporation, or at all. If the Corporation cannot raise additional capital when needed, its ability to expand operations through internal growth and acquisitions could be materially impacted. In the event of a material decrease in the Corporation's stock price, future issuances of equity securities could result in dilution of existing shareholder interests.

Capital planning has taken on more importance due to regulatory requirements and the Basel III capital standards.

Consistent with current regulatory guidance, the Corporation conducts an annual stress test using internal financial data and different economic scenarios provided by the FRB, and reports the results of the stress test to the FRB. The Corporation's board of directors and its senior management are required to consider the results of the annual stress test in the normal course of business, including as part of its capital planning process and the evaluation of the adequacy of its capital. The results of future stress testing processes may lead the Corporation to retain additional capital or alter the mix of its capital components. In addition, the implementation of certain regulations with regard to regulatory capital could disproportionately affect the Corporation's regulatory capital position relative to that of its competitors, including those who may not be subject to the same regulatory requirements.

In 2013, the federal banking regulatory agencies implemented the U.S. Basel III Capital Rules, including: (i) minimum Common Equity Tier 1 capital ratio of 4.50% of risk-weighted assets, (ii) increased minimum Tier 1 capital ratio (from 4.00% to 6.00% of risk-weighted assets), (iii) retention of the minimum Total capital ratio of 8.00% of risk-weighted assets and the minimum Tier 1 leverage capital ratio at 4.00% of average assets and (iv) a "capital conservation buffer" of 2.50% above the minimum risk-based capital requirements which must be maintained to avoid restrictions on capital distributions and certain discretionary bonus payments. As a result of the implementation of the new capital standards, certain non-qualifying capital instruments, including cumulative preferred stock and TruPS, are excluded as a component of Tier 1 capital for institutions of the Corporation's size and are included in Tier 2 capital instead.

The fully phased-in capital standards under the U.S. Basel III Capital Rules require banks to maintain more capital than the minimum levels required under former regulatory capital standards. The new minimum regulatory capital requirements began to apply to the Corporation on January 1, 2015. The required minimum capital conservation buffer began to be phased in incrementally on January 1, 2016 and will be fully phased in on January 1, 2019. The failure to meet the established capital requirements could result in the federal banking regulators placing limitations or conditions on the activities of the Corporation or its bank subsidiaries or restricting the commencement of new activities, and such failure could subject the Corporation or its bank subsidiaries to a variety of enforcement remedies, including limiting the ability of the Corporation or its bank subsidiaries to pay dividends, issuing a directive to increase capital and terminating FDIC deposit insurance. In addition, the failure to comply with the capital conservation buffer will result in restrictions on capital distributions and discretionary cash bonus payments to executive officers. As of December 31, 2016, the Corporation's current capital levels met the fully phased-in minimum capital requirements, including capital conservation buffers, as set forth in the U.S. Basel III Capital Rules. See Item

1. "Business-Supervision and Regulation-Capital Requirements."

The Corporation is a holding company and relies on dividends and other payments from its subsidiaries for substantially all of its revenue and its ability to make dividend payments, distributions and other payments.

The Corporation is a separate and distinct legal entity from its bank and nonbank subsidiaries, and depends on the payment of dividends and other payments and distributions from its subsidiaries, principally its bank subsidiaries, for substantially all of its revenues. As a result, the Corporation's ability to make dividend payments on its common stock depends primarily on certain federal and state regulatory considerations and the receipt of dividends and other distributions from its subsidiaries. There are various regulatory and prudential supervisory restrictions, which may change from time to time, that impact the ability of the Corporation's bank subsidiaries to pay dividends or make other payments to it. There can be no assurance that the Corporation's bank subsidiaries will be able to pay dividends at past levels, or at all, in the future. If the Corporation does not receive sufficient cash dividends or is unable to borrow from its bank subsidiaries, then the Corporation may not have sufficient funds to pay dividends

to its shareholders, repurchase its common stock or service its debt obligations. See Item 1. "Business-Supervision and Regulation-Loans and Dividends from Subsidiary Banks."

In addition, as noted above, liquidity and capital planning at both the bank and holding company levels has become an area of increased regulatory emphasis. In recent years, the Corporation has pursued a strategy of capital management under which it has sought to deploy its capital, through stock repurchases, increased regular dividends and special dividends, in a manner that is beneficial to the Corporation's shareholders. This capital management strategy is subject to regulatory supervision.

A downgrade in the credit ratings of the Corporation or its bank subsidiaries could have a material adverse impact on the Corporation.

Fitch, Inc., Moody's Investors Service, Inc. and DBRS, Inc. continuously evaluate the Corporation and its subsidiaries, and their ratings of the Corporation and its subsidiary's long-term and short-term debt are based on a number of factors, including financial strength, as well as factors not entirely within the Corporation's and its subsidiaries' control, such as conditions affecting the financial services industry generally. In light of these reviews and the continued focus on the financial services industry generally, the Corporation and its subsidiaries may not be able to maintain their current respective ratings. Ratings downgrades by any of these credit rating agencies could have a significant and immediate impact on the Corporation's funding and liquidity through cash obligations, reduced funding capacity and collateral triggers. A reduction in the Corporation's or its subsidiaries' credit ratings could also increase the Corporation's borrowing costs and limit its access to the capital markets.

Downgrades in the credit or financial strength ratings assigned to the counterparties with whom the Corporation transacts could create the perception that the Corporation's financial condition will be adversely impacted as a result of potential future defaults by such counterparties. Additionally, the Corporation could be adversely affected by a general, negative perception of financial institutions caused by the downgrade of other financial institutions. Accordingly, ratings downgrades for other financial institutions could affect the market price of the Corporation's stock and could limit access to or increase its cost of capital.

Anti-takeover provisions could negatively impact the Corporation's shareholders.

Provisions of banking laws, Pennsylvania corporate law and of the Corporation's Amended and Restated Articles of Incorporation and Bylaws could make it more difficult for a third party to acquire control of the Corporation or have the effect of discouraging a third party from attempting to acquire control of the Corporation. To the extent that these provisions discourage such a transaction, holders of the Corporation's common stock may not have an opportunity to dispose of part or all of their stock at a higher price than that prevailing in the market. These provisions may also adversely affect the market price of the Corporation's stock. In addition, some of these provisions make it more difficult to remove, and thereby may serve to entrench, the Corporation's incumbent directors and officers, even if their removal would be regarded by some shareholders as desirable.

Certain provisions of Pennsylvania corporate law applicable to the Corporation and the Corporation's Amended and Restated Articles of Incorporation and Bylaws include provisions which may be considered to be "anti-takeover" in nature because they may have the effect of discouraging or making more difficult the acquisition of control of the Corporation by means of a hostile tender offer, exchange offer, proxy contest or similar transaction. These provisions are intended to protect the Corporation's shareholders by providing a measure of assurance that the Corporation's shareholders will be treated fairly in the event of an unsolicited takeover bid and by preventing a successful takeover bidder from exercising its voting control to the detriment of the other shareholders. Certain provisions in the Corporation's Amended and Restated Articles of Incorporation and Bylaws, taken as a whole, may also discourage a hostile tender offer, exchange offer, proxy solicitation or similar transaction relating to the Corporation's common

stock.

The ability of a third party to acquire the Corporation is also limited under applicable banking regulations. The BHCA requires any "bank holding company" (as defined in that Act) to obtain the approval of the FRB prior to acquiring more than 5% of the Corporation's outstanding common stock. Any person other than a bank holding company is required to obtain prior approval of the FRB to acquire 10% or more of the Corporation's outstanding common stock under the Change in Bank Control Act of 1978 and, under certain circumstances, such approvals are required at an even lower ownership percentage. Any holder of 25% or more of the Corporation's outstanding common stock, other than an individual, is subject to regulation as a bank holding company under the BHCA. In addition, the delays associated with obtaining necessary regulatory approvals for acquisitions of interests in bank holding companies also tend to make more difficult certain methods of effecting acquisitions. While these provisions do not prohibit an acquisition, they would likely act as deterrents to an unsolicited takeover attempt.

Item 1B. Unresolved Staff Comments

None.

## Item 2. Properties

The following table summarizes the Corporation's full-service branch properties, by subsidiary bank, as of December 31, 2016. Remote service facilities (mainly stand-alone automated teller machines) are excluded.

Subsidiary Bank	Owned	Leased	Total Branches
Fulton Bank, N.A.	45	67	112
Fulton Bank of New Jersey	36	29	65
The Columbia Bank	8	23	31
Lafayette Ambassador Bank	4	17	21
FNB Bank, N.A.	5	2	7
Swineford National Bank	5	2	7
Total	103	140	243

The following table summarizes the Corporation's other significant administrative properties. Banking subsidiaries also maintain administrative offices at their respective main banking branches, which are included within the preceding table.

Entity	Property	Location	Owned/Leased
Fulton Bank, N.A./Fulton Financial Corporation	Corporate Headquarters	Lancaster, PA	(1)
Fulton Financial Corporation	Operations Center	East Petersburg, PA	Owned
Fulton Bank, N.A.	Operations Center	Mantua, NJ	Owned

Includes approximately 100,000 square feet which is owned by an independent third party who financed the construction through a loan from Fulton Bank, N.A. The Corporation is leasing this space from the third party in an (1) arrangement accounted for as a capital lease. The lease term expires in 2027. The Corporation owns the remainder of the Corporate Headquarters location. This property also includes a Fulton Bank, N.A. branch, which is included in the preceding table.

## Item 3. Legal Proceedings

The information presented in the "Legal Proceedings" section of "Note 17 - Commitment and Contingencies" in the Notes to Consolidated Financial Statements is incorporated herein by reference.

## Item 4. Mine Safety Disclosures

Not applicable.

## PART II

## Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

## Common Stock

As of December 31, 2016, the Corporation had 174.0 million shares of \$2.50 par value common stock outstanding held by approximately 33,000 holders of record. The closing price per share of the Corporation's common stock on February 17, 2017 was \$19.10. The common stock of the Corporation is traded on the Global Select Market of The NASDAQ Stock Market under the symbol FULT.

The following table presents the quarterly high and low prices of the Corporation's stock and per share cash dividends declared for each of the quarterly periods in 2016 and 2015:

	Price Range		Per Share Dividend
	High	Low	
2016			
First Quarter	\$ 13.74	\$ 11.48	\$ 0.09
Second Quarter	14.35	12.66	0.10
Third Quarter	14.86	12.91	0.10
Fourth Quarter	19.45	14.04	0.12
2015			
First Quarter	\$ 12.68	\$ 11.00	\$ 0.09
Second Quarter	13.52	11.85	0.09
Third Quarter	13.66	11.60	0.09
Fourth Quarter	14.59	11.61	0.11

## Restrictions on the Payments of Dividends

The Corporation is a separate and distinct legal entity from its banking and nonbanking subsidiaries, and depends on the payment of dividends from its subsidiaries, principally its banking subsidiaries, for substantially all of its revenues. As a result, the Corporation's ability to make dividend payments on its common stock depends primarily on certain federal and state regulatory considerations and the receipt of dividends and other distributions from its subsidiaries. There are various regulatory and prudential supervisory restrictions, which may change from time to time, that impact the ability of its banking subsidiaries to pay dividends or make other payments to it. For additional information regarding the regulatory restrictions applicable to the Corporation and its subsidiaries, see "Supervision and Regulation," in Item 1. "Business;" Item 1A. "Risk Factors - The Corporation is a holding company and relies on dividends and other payments from its subsidiaries for substantially all of its revenue and its ability to make dividend payments, distributions and other payments," under "Risks Related to an Investment in the Corporation's Securities;" and "Note 11 - Regulatory Matters," in the Notes to Consolidated Financial Statements in Item 8. "Financial Statements and Supplementary Data."

## Securities Authorized for Issuance under Equity Compensation Plans

The following table provides information about options outstanding under the Corporation's Amended and Restated Equity and Cash Incentive Compensation Plan and the number of securities remaining available for future issuance under the Corporation's Amended and Restated Equity and Cash Incentive Compensation Plan, the 2011 Directors' Equity Participation Plan and the Employee Stock Purchase Plan as of December 31, 2016:

Plan Category	Number of securities to be issued upon exercise of outstanding options, warrants and rights (1)	Weighted-average exercise price of outstanding options, warrants and rights (2)	Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in first

			column) (3)
Equity compensation plans approved by security holders	2,837,963	\$ 10.98	13,767,305
Equity compensation plans not approved by security holders	—	—	—
Total	2,837,963	\$ 10.98	13,767,305

(1) The number of securities to be issued upon exercise of outstanding options, warrants and rights includes 1,046,296 performance-based restricted stock units ("PSUs"), which is the target number of PSUs that are payable under the Amended and Restated Equity and Cash Incentive Compensation Plan ("Employee

Equity Plan"), though no shares will be issued until achievement of applicable performance goals, and includes 461,484 time-vested restricted stock units ("RSUs") granted under the Employee Equity Plan

(2) The weighted-average exercise price of outstanding options, warrants and rights does not take into account outstanding PSUs and RSUs granted under the Employee Equity Plan.

(3) Consists of 11,427,029 shares that may be awarded under the Employee Equity and Cash Incentive Compensation Plan, 370,552 shares that may be awarded under the 2011 Directors' Equity Participation Plan and 1,969,724 of shares that may be purchased under the Employee Stock Purchase Plan. Excludes accrued purchase rights under the Employee Stock Purchase Plan as of December 31, 2016 as the number of shares to be purchased is indeterminable until the time shares are issued.

#### Performance Graph

The following graph shows cumulative total shareholder return (i.e., price change, plus reinvestment of dividends) on the common stock of Fulton Financial Corporation during the five-year period ended December 31, 2016, compared with (1) the NASDAQ Bank Index and (2) the Standard and Poor's 500 index ("S&P 500"). The graph is not indicative of future price performance.

The graph below is furnished under this Part II, Item 5 of this Form 10-K and shall not be deemed to be "soliciting material" or to be "filed" with the SEC or subject to Regulation 14A or 14C, or to the liabilities of Section 18 of the Securities Exchange Act of 1934, as amended.

Index	Year Ending December 31					
	2011	2012	2013	2014	2015	2016
Fulton Financial Corporation	\$100.00	\$100.93	\$141.13	\$137.10	\$148.68	\$220.81
S&P 500	\$100.00	\$116.00	\$153.57	\$174.60	\$177.01	\$198.18
NASDAQ Bank Index	\$100.00	\$118.35	\$162.04	\$193.48	\$212.35	\$227.80

Ratio represents a financial measure derived by methods other than Generally Accepted Accounting Principles (1)("GAAP"). See reconciliation of this non-GAAP financial measure to the most directly comparable GAAP measure under the following heading, "Supplemental Reporting of Non-GAAP Based Financial Measures" below.

## Supplemental Reporting of Non-GAAP Based Financial Measures

This Annual Report on Form 10-K contains supplemental financial information, as detailed below, which has been derived by methods other than Generally Accepted Accounting Principles ("GAAP"). The Corporation has presented these non-GAAP financial measures because it believes that these measures provide useful and comparative information to assess trends in the Corporation's results of operations. Presentation of these non-GAAP financial measures is consistent with how the Corporation evaluates its performance internally, and these non-GAAP financial measures are frequently used by securities analysts, investors and other interested parties in the evaluation of companies in the Corporation's industry. Management believes that these non-GAAP financial measures, in addition to GAAP measures, are also useful to investors to evaluate the Corporation's results. Investors should recognize that the Corporation's presentation of these non-GAAP financial measures might not be comparable to similarly-titled measures of other companies. These non-GAAP financial measures should not be considered a substitute for GAAP basis measures, and the Corporation strongly encourages a review of its consolidated financial statements in their entirety. Following are reconciliations of these non-GAAP financial measures to the most directly comparable GAAP measure as of and for the year ended December 31:

	2016	2015	2014	2013	2012
