DST SYSTEMS, INC. ANNOUNCES REVISION TO SECOND QUARTER 2005 FINANCIAL RESULTS

KANSAS CITY, MO. (August 9, 2005) - DST Systems, Inc. (NYSE: DST) previously announced financial results for the three and six month periods ended June 30, 2005 on July 25, 2005. In that announcement, DST described a \$154.4 million gain recorded upon completion of the sale of EquiServe to Computershare Ltd. (AUS: CPU) on June 17, 2005. In addition, DST described a \$34 million charge related to Fairway software, which was recorded as depreciation and amortization expense when the EquiServe transaction was closed. DST has determined that the \$34 million of Fairway software should be considered in determining the overall gain on the sale of EquiServe rather than be recorded as depreciation and amortization expense. Under the terms of the acquisition agreement, DST provided a perpetual sourcecode license for Fairway to CPU and agreed to restrict DST's use of the software. Upon the closing of this transaction, Fairway software was redesignated from software that was developed for internal use in the Company's stock transfer business to software that will be for external use, in accordance with SOP 98-1, "Accounting for the Costs of Software Obtained or Developed for Internal Use". As a result, the \$34 million Fairway software has now been taken into account in the determination of the \$120.4 million pretax gain (the net gain was approximately \$70 million after taxes, deferrals and other expenses) from the sale of the EquiServe business during the three and six month periods ended June 30, 2005.

The table below presents the effect of the \$34 million reclassification on the consolidated statement of income for the three and six months ended June 30, 2005, as compared to amounts reported in the second quarter earnings release on July 25, 2005 (amounts in millions, except per share amounts):
