FC Rating On PLDT Affirmed At BB- ; Outlook Negative

SINGAPORE (Standard & Poor's) Aug. 31, 2005-Standard & Poor's Ratings Services said today it affirmed its 'BB-' foreign currency rating on Philippine Long Distance Telephone Co. (PLDT), the leading telecommunications operator in the Philippines. The outlook is negative. At the same time, the rating on PLDT's existing series III preferred stock was to B+ from B .

"The rating on PLDT benefits from the company's dominant market position and its improving financial profile, although these strengths are offset by slowing domestic subscriber growth, heightened competition, and the risk of peso depreciation," said Standard & Poor's credit analyst Yasmin Wirjawan. "The negative outlook reflects that of the sovereign ratings on the Philippines."

PLDT is the largest and most diversified telecommunications provider in the Philippines. The company had a wireless subscriber base of about 20.8 million, representing a market share of 57%, compared with 38% for its main competitor, Globe Telecom Inc. In the fixed line market, PLDT is the market leader with 60% share, or 2.1 million lines in service.

The company's financial profile has improved significantly following its deleveraging program. Its annualized funds from operations (FFO) to total debt improved to 41% at June 30, 2005, compared with its three-year (2002-2004) average of 17%. This ratio is expected to improve to about 40%-50% in the next three years after gradual debt repayment. Debt to EBITDA, which reached 1.9x as at June 30, 2005, is expected to improve to about 1.5x by year-end 2006, due to its plan to reduce debt by US\$600 million by year-end 2005.

PLDT's liquidity is adequate. At June 30, 2005, the company's cash of Philippine peso (PHP) 36 billion (US\$643 million) was more than enough to cover PHP30 billion of debt due in one year.

Nevertheless, PLDT is exposed to the risk of peso weakness, as about 98% of its US\$2.5 billion debt is denominated in foreign currency, said Ms. Wirjawan. About half of the company's total debt is covered by hedges and U.S. dollar cash balance (equivalent to US\$351 million as at June 30, 2005). To some extent, the risk of peso depreciation is mitigated by the linkage of about 40% of PLDT's revenues to the U.S. dollar. About 18% of PLDT's U.S. dollar linked revenues are sourced from the monthly charges payable by postpaid fixed-line users. This monthly charge may

substantially increase if the Philippine peso depreciates significantly over a short period of time, which could result in higher receivables.

In addition, pricing competition in the cellular market has intensified due to slowing domestic subscriber growth and the entry of a third player, Digital Telecommunications Ltd. (Digitel). Although Digitel is unlikely to pose a significant competitive threat to PLDT in the near to medium term, pricing pressures have emerged as existing operators pursue aggressive pricing and promotions to build market share.

In the medium term, Standard & Poor's expects the rating on PLDT to be driven by its ability to improve its liquidity and liability management, and to maintain its solid market position and steady cash flows amid increasing competition.

Complete ratings information is available to subscribers of RatingsDirect, Standard & Poor's Web-based credit analysis system, at www.ratingsdirect.com. All ratings affected by this rating action can be found on Standard & Poor's public Web site at www.standardandpoors.com; under Credit Ratings in the left navigation bar, select Find a Rating, then Credit Ratings Search.
