PLEXUS CORP. AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

FOR THE THREE AND NINE MONTHS ENDED JULY 2, 2016 AND JULY 4, 2015

Unaudited

1. Basis of Presentation and Significant Accounting Policies

Basis of Presentation

The accompanying Condensed Consolidated Financial Statements included herein have been prepared by Plexus Corp. and its subsidiaries (together "Plexus" or the "Company") without audit and pursuant to the rules and regulations of the United States ("U.S.") Securities and Exchange Commission ("SEC"). In the opinion of the Company, the accompanying Condensed Consolidated Financial Statements reflect all adjustments, which include normal recurring adjustments necessary for the fair statement of the consolidated financial position of the Company as of July 2, 2016 and October 3, 2015, and the results of operations for the three and nine months ended July 2, 2016 and July 4, 2015, and the cash flows for the same nine month periods.

The Company's fiscal year ends on the Saturday closest to September 30. The Company also uses a "4-4-5" weekly accounting system for the interim periods in each quarter. Each quarter, therefore, ends on a Saturday at the end of the 4-4-5 period. Periodically, an additional week must be added to the fiscal year to re-align with the Saturday closest to September 30. The first quarter of fiscal 2015 included 14 weeks, all other fiscal quarters presented included 13 weeks.

Certain information and footnote disclosures, normally included in financial statements prepared in accordance with generally accepted accounting principles, have been condensed or omitted pursuant to the SEC's rules and regulations dealing with interim financial statements. However, the Company believes that the disclosures made in the Condensed Consolidated Financial Statements included herein are adequate to make the information presented not misleading. It is suggested that these Condensed Consolidated Financial Statements be read in conjunction with the Consolidated Financial Statements and notes thereto included in the Company's 2015 Annual Report on Form 10-K.

The Company's reportable segments consist of the "Americas" ("AMER"), "Asia-Pacific" ("APAC") and "Europe, Middle East and Africa" ("EMEA") segments. Refer to Note 9, "Reportable Segments," for further details on reportable segments.

Cash and Cash Equivalents

Cash and cash equivalents include short-term, highly liquid investments and are classified as Level 1 in the fair value hierarchy described below.

Fair Value of Financial Instruments

The Company holds financial instruments consisting of cash and cash equivalents, accounts receivable, certain deferred compensation assets held under trust arrangements, accounts payable, debt, derivatives, and capital lease obligations. The carrying values of cash and cash equivalents, accounts receivable, accounts payable, and capital lease obligations as reported in the Condensed Consolidated Financial Statements approximate fair value. Derivatives and certain deferred compensation assets held under trust arrangements are recorded at fair value. Accounts receivable are reflected at net realizable value based on anticipated losses due to potentially uncollectible balances. Anticipated losses are based on management's analysis of historical losses and changes in customers' credit status. The fair value of the Company's long-term debt was \$247.7 million and \$250.2 million as of July 2, 2016 and October 3, 2015, respectively. The carrying value of the Company's long-term debt was \$250.0 million as of both July 2, 2016 and October 3, 2015. The Company uses quoted market prices when available or discounted cash flows to calculate the fair value of its debt. If measured at fair value in the financial statements, long-term debt (including the current portion) would be classified as Level 2 in the fair value hierarchy described below. Refer to Note 4, "Derivatives and Fair Value Measurements," for further details on derivatives.

Fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability (or exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. Valuation techniques used to measure fair value must maximize the use of observable inputs and minimize the use of unobservable inputs. The accounting guidance establishes a fair value hierarchy based on three levels of inputs that may be used to measure fair value. The input levels are:

Level 1: Quoted (observable) market prices in active markets for identical assets or liabilities.

Table of Contents

Level 2: Inputs other than Level 1 that are observable, such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the asset or liability.

Level 3: Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the asset or liability.

2. Inventories

Inventories as of July 2, 2016 and October 3, 2015 consisted of (in thousands):

	July 2, 2016	October 3, 2015
Raw materials	\$411,133	\$407,637
Work-in-process	74,459	84,472
Finished goods	89,529	77,262
Total inventories	\$575,121	\$569,371

Customer deposits are received by the Company for various reasons, including to offset certain obsolete and excess inventory risks. The total amount of customer deposits related to inventory and included within current liabilities on the accompanying Condensed Consolidated Balance Sheets as of July 2, 2016 and October 3, 2015 was \$77.0 million and \$64.3 million, respectively.

3. Debt, Capital Lease Obligations and Other Financing

Debt, capital lease obligations and other financing amounts outstanding at July 2, 2016 and October 3, 2015 are summarized below (in thousands):

	July 2, 2016	October 3, 2015
Borrowing under the credit facility	\$75,000	\$75,000
5.20% senior notes, due June 15, 2018	175,000	175,000
Capital lease & non-cash financing of leased facility obligations	12,758	12,770
Total obligations	262,758	262,770
Less: current portion	(78,279)	(3,513)
Long-term debt, capital lease and other financing obligations, net of current portion	\$184,479	\$259,257

The Company has a senior unsecured revolving credit facility (the "Credit Facility"), which was amended on July 5, 2016, subsequent to the end of the fiscal 2016 third quarter, to, among other changes, extend its expiration from May 15, 2019, to July 5, 2021, and increase the maximum commitment from \$265.0 million to \$300.0 million. The Credit Facility, as amended, may be further increased to \$500.0 million, generally by mutual agreement of the Company and the lenders, subject to certain customary conditions. For more information regarding the amendment of the Credit Facility, see Note 14, "Subsequent Events." During the three and nine months ended July 2, 2016, the highest daily borrowing was \$225.0 million and the average daily borrowing was \$195.2 million and \$185.2 million, respectively. The Company borrowed and repaid \$164.0 million and \$453.0 million, respectively, of revolving borrowings under the Credit Facility during the three and nine months ended July 2, 2016.

The financial covenants (as defined under the related Credit Agreement) require that the Company maintain, as of each fiscal quarter end, a maximum total leverage ratio and a minimum interest coverage ratio. As of July 2, 2016, the Company was in compliance with all financial covenants of the Credit Agreement. For the nine months ended July 2, 2016, borrowings under the Credit Facility, at the Company's option, bore interest at a defined base rate or the LIBOR rate plus, in each case, an applicable margin based upon the Company's leverage ratio as defined in the Credit Agreement. Rates would increase upon negative changes in specified Company financial metrics and would decrease to no less than LIBOR plus 1.00% or base rate plus 0.00% upon reduction in the current total leverage ratio. As of July 2, 2016, the borrowing rate under the Credit Agreement was LIBOR plus 1.125% (or 1.588%). As of July 2, 2016, the \$75.0 million of outstanding borrowing under the Credit Facility is effectively at a fixed interest rate as a result of a \$75.0 million interest rate swap contract discussed in Note 4, "Derivatives"

Table of Contents

and Fair Value Measurements." The Company is required to pay an annual commitment fee based on the daily unused revolver credit commitment based on the Company's leverage ratio; the fee was 0.175% as of July 2, 2016.

The Company also has outstanding 5.20% senior notes, due on June 15, 2018 (the "Notes"). As of July 2, 2016 and October 3, 2015, \$175.0 million of Notes was outstanding, and the Company was in compliance with all financial covenants relating to the Notes, which are generally consistent with those in the Credit Agreement discussed above. Subsequent to the end of the Company's fiscal third quarter, on July 5, 2016, the Company also amended the related Note Purchase Agreement; refer to Note 14, "Subsequent Events," for further detail.

4. Derivatives and Fair Value Measurements

All derivatives are recognized in the accompanying Condensed Consolidated Balance Sheets at their estimated fair value. The Company uses derivatives to manage the variability of foreign currency obligations and interest rates. The Company has cash flow hedges related to variable rate debt and forecasted foreign currency obligations, in addition to non-designated hedges to manage foreign currency exposures associated with certain foreign currency denominated assets and liabilities. The Company does not enter into derivatives for speculative purposes.

ASC Topic 815-10, "Derivatives and Hedging," requires companies to recognize all derivative instruments as either assets or liabilities at fair value in the statement of financial position. In accordance with ASC Topic 815-10, the Company designates some foreign currency exchange contracts and float-to-fixed interest rate derivative contracts as cash flow hedges of forecasted foreign currency expenses and of variable rate interest payments, respectively.

Changes in the fair value of the derivatives that qualify as cash flow hedges are recorded in "Accumulated other comprehensive loss" in the accompanying Condensed Consolidated Balance Sheets until earnings are affected by the variability of the cash flows. In the next twelve months, the Company estimates that \$2.8 million of unrealized gains, net of tax, related to cash flow hedges will be reclassified from other comprehensive loss into earnings. Changes in the fair value of the non-designated derivatives related to recognized foreign currency denominated assets and liabilities are recorded in "Other income (expense)" in the accompanying Condensed Consolidated Statements of Comprehensive Income.

The Company enters into forward currency exchange contracts for its Malaysian operations on a rolling basis. The Company had cash flow hedges outstanding with a notional value of \$67.0 million as of both July 2, 2016 and October 3, 2015. These forward currency contracts fix the exchange rates for the settlement of future foreign currency obligations that have yet to be realized. The total fair value of the cash flow hedges was a \$3.1 million asset as of July 2, 2016, and a \$9.4 million liability as of October 3, 2015.

The Company had additional forward currency exchange contracts outstanding with a notional value of \$86.7 million as of July 2, 2016; there were no such contracts outstanding as of October 3, 2015. The Company has not designated these derivative instruments as hedging instruments. In accordance with ASC Topic 815-10, the net settlement amount (fair value) related to these contracts is recorded on the Condensed Consolidated Balance Sheets as either a current or long-term asset or liability, depending on the term, and as an element of "Other income (expense)." The total fair value of these derivatives was a net \$0.3 million asset as of July 2, 2016.

In 2013, the Company entered into a \$75.0 million notional amount interest rate swap contract, which expires on May 5, 2017, related to \$75.0 million of borrowings outstanding under the Credit Facility. This interest rate swap pays the Company variable interest at the one month LIBOR rate, and the Company pays the counterparty a fixed interest rate. The fixed interest rate for the contract is 0.875%. Based on the terms of the interest rate swap contract and the underlying borrowings outstanding under the Credit Facility, the interest rate contract was determined to be effective, and thus qualifies as a cash flow hedge. As such, any changes in the fair value of the interest rate swap are recorded in "Accumulated other comprehensive loss" on the accompanying Condensed Consolidated Balance Sheets until earnings are affected by the variability of cash flows. The total fair value of the interest rate swap contract as of July 2, 2016 and October 3, 2015, was a \$0.3 million and \$0.5 million liability, respectively. The notional amount of the

Company's interest rate swap was \$75.0 million as of both July 2, 2016 and October 3, 2015.

8

Table of Contents

The tables below present information regarding the fair values of derivative instruments (as defined in Note 1, "Basis of Presentation and Significant Accounting Policies") and the effects of derivative instruments on the Company's Condensed Consolidated Financial Statements:

October 3, 2015				
Interest rate swaps	\$	—\$(497)	\$	—\$(497)
Foreign currency forward contracts	\$	—\$(9,408)	\$	—\$(9,408)

The fair value of interest rate swaps and foreign currency forward contracts is determined using a market approach, which includes obtaining directly or indirectly observable values from third parties active in the relevant markets. The primary input in the fair value of the interest rate swaps is the relevant LIBOR forward curve. Inputs in the fair value of the foreign currency forward contracts include prevailing forward and spot prices for currency and interest rate forward curves.

5. Income Taxes

Income tax expense for the three and nine months ended July 2, 2016 was \$2.6 million and \$8.2 million, respectively. The effective tax rates for the three and nine months ended July 2, 2016 were 9.1 percent and 12.6 percent, respectively, compared to the effective tax rates for the three and nine months ended July 4, 2015, which were 10.8 percent and 11.4 percent, respectively.

Table of Contents

The effective tax rate for the three months ended July 2, 2016 decreased from the effective tax rate for the three months ended July 4, 2015, primarily due to the geographic distribution of worldwide earnings.

The effective tax rate for the nine months ended July 2, 2016 increased from the effective tax rate for the nine months ended July 4, 2015, primarily due to a decrease in pre-tax earnings in lower tax-rate jurisdictions and in jurisdictions where the Company maintains a valuation allowance. The Company's effective tax rate will fluctuate with the geographic distribution of its worldwide earnings, changes in tax laws, disputes with taxing authorities, tax planning activities, adjustments to uncertain tax positions and changes to deferred tax assets and related valuation allowances. There were no material additions to the amount of unrecognized tax benefits recorded for uncertain tax positions as of July 2, 2016 as compared to October 3, 2015. The Company recognizes accrued interest and penalties on uncertain tax positions as a component of income tax expense. The amount of interest and penalties recorded for the three and nine months ended July 2, 2016 was not material.

It is possible that one or more federal and state tax positions may be settled within the next 12 months. Settlement of these matters is not expected to have a material effect on the Company's consolidated results of operations, financial position and cash flows. The Company is not currently under examination by taxing authorities in the U.S. or any foreign jurisdictions in which the Company operates.

The Company maintains valuation allowances when it is more likely than not that all or a portion of a net deferred tax asset will not be realized. During the three months ended July 2, 2016, the Company continued to record a full valuation allowance against its net deferred tax assets in certain jurisdictions within the AMER and EMEA segments, as it was more likely than not that these assets would not be fully realized based primarily on historical performance. The Company will continue to provide a valuation allowance against its net deferred tax assets in each of the applicable jurisdictions going forward until it determines it is more likely than not that the deferred tax assets will be realized.

6. Earnings Per Share

The following is a reconciliation of the amounts utilized in the computation of basic and diluted earnings per share for the three and nine months ended July 2, 2016 and July 4, 2015 (in thousands, except per share amounts):

	Three Months		Nine Months	
	Ended		Ended	
	July 2, 2016	July 4, 2015	July 2, 2016	July 4, 2015
Net income	\$26,099	\$23,794	\$57,334	\$70,467
Basic weighted average common shares outstanding	33,402	33,653	33,379	33,617
Dilutive effect of share-based awards outstanding	772	801	664	783
Diluted weighted average shares outstanding	34,174	34,454	34,043	34,400
Earnings per share:				
Basic	\$0.78	\$0.71	\$1.72	\$2.10
Diluted	\$0.76	\$0.69	\$1.68	\$2.05

For the three and nine months ended July 2, 2016, share-based awards for approximately 0.5 million and 0.7 million shares, respectively, were not included in the computation of diluted earnings per share because they were anti-dilutive.

For the three and nine months ended July 4, 2015, share-based awards for approximately 0.3 million and 0.6 million shares, respectively, were not included in the computation of diluted earnings per share because they were anti-dilutive.

See Note 11, "Shareholders' Equity," for more information regarding the Company's common stock repurchase program.

7. Share-Based Compensation

On February 17, 2016, the Company's shareholders approved the Plexus Corp. 2016 Omnibus Incentive Plan (the "2016 Plan"). The 2016 Plan is a stock and cash-based incentive plan, and includes provisions by which the Company may grant executive officers, employees and directors stock options, stock appreciation rights ("SARs"), restricted stock (including restricted stock units ("RSUs")), performance stock awards (including performance stock units ("PSUs")), other stock awards and cash incentive awards. Similar awards were offered under its predecessor, the 2008 Long-Term Incentive Plan (the "2008

Table of Contents

Plan"), which is no longer being used for grants; however, outstanding awards granted under the 2008 Plan and its predecessor continue until vesting, exercise, forfeiture or expiration.

The Company recognized \$3.6 million and \$10.6 million of compensation expense associated with share-based awards for the three and nine months ended July 2, 2016, respectively, and \$3.5 million and \$10.6 million for the three and nine months ended July 4, 2015, respectively.

The Company uses the Black-Scholes valuation model to determine the fair value of stock options and stock-settled SARs. The Company uses its stock price on grant date as the fair value assigned to RSUs.

The Company uses the Monte Carlo valuation model to determine the fair value of PSUs at the date of grant. The PSUs are payable in shares and vest based on the relative total shareholder return of the Company's common stock as compared to companies in the Russell 3000 Index during a three year performance period. The number of shares that may be issued pursuant to PSUs ranges from zero to 0.3 million.

The Company recognizes share-based compensation expense over the share-based awards' vesting period.

8. Litigation

The Company is party to lawsuits in the ordinary course of business. Management does not believe that these proceedings, individually or in the aggregate, will have a material positive or adverse effect on the Company's consolidated financial position, results of operations or cash flows.

9. Reportable Segments

Reportable segments are defined as components of an enterprise about which separate financial information is available that is evaluated regularly by the chief operating decision maker, or group, in assessing performance and allocating resources. The Company uses an internal management reporting system, which provides important financial data to evaluate performance and allocate the Company's resources on a regional basis. Net sales for segments are attributed to the region in which the product is manufactured or the service is performed. The services provided, manufacturing processes used, class of customers serviced and order fulfillment processes used are similar and generally interchangeable across the segments. A segment's performance is evaluated based upon its operating income (loss). A segment's operating income (loss) includes its net sales less cost of sales and selling and administrative expenses, but excludes corporate and other expenses. Corporate and other expenses primarily represent corporate selling and administrative expenses, and restructuring and impairment charges, if any. These costs are not allocated to the segments, as management excludes such costs when assessing the performance of the segments. Inter-segment transactions are generally recorded at amounts that approximate arm's length transactions. The accounting policies for the segments are the same as for the Company taken as a whole.

Table of Contents

Information about the Company's three reportable segments for the three and nine months ended July 2, 2016 and July 4, 2015, respectively, is as follows (in thousands):

	Three Months Ended		Nine Months Ended	
	July 2, 2016	July 4, 2015	July 2, 2016	July 4, 2015
Net sales:				
AMER	\$359,412	\$365,860	\$994,750	\$1,029,876
APAC	292,644	313,900	862,535	966,433
EMEA	41,041	33,885	126,830	97,737
Elimination of inter-segment sales	(25,481)	(44,060)	(81,175)	(108,486)
	\$667,616	\$669,585	\$1,902,940	\$1,985,560
Operating income (loss):				
AMER	\$22,099	\$20,369	\$45,937	\$55,506
APAC	38,283	37,082	110,097	119,852
EMEA	(1,572)	(2,511)	(2,997)	(8,136)
Corporate and other costs	(27,892)	(26,309)	(77,249)	(80,357)
	\$30,918	\$28,631	\$75,788	\$86,865
Other income (expense):				
Interest expense	\$(3,637)	\$(3,280)	\$(10,845)	\$(10,440)
Interest income	1,134	866	3,081	2,552
Miscellaneous	297	471	(2,451)	549
Income before income taxes	\$28,712	\$26,688	\$65,573	\$79,526
	July 2, 2016	October 3, 2015		
Total assets:				
AMER	\$584,039	\$573,437		
APAC	1,093,234	1,011,622		
EMEA	124,051	128,306		
Corporate and eliminations	(40,374)	(10,977)		
	\$1,760,950	\$1,702,388		

10. Guarantees

The Company offers certain indemnifications under its customer manufacturing agreements. In the normal course of business, the Company may from time to time be obligated to indemnify its customers or its customers' customers against damages or liabilities arising out of the Company's negligence, misconduct, breach of contract, or infringement of third party intellectual property rights. Certain agreements have extended broader indemnification, and while most agreements have contractual limits, some do not. However, the Company generally does not provide for such indemnities and seeks indemnification from its customers for damages or liabilities arising out of the Company's adherence to customers' specifications or designs or use of materials furnished, or directed to be used, by its customers. The Company does not believe its obligations under such indemnities are material.

In the normal course of business, the Company also provides its customers a limited warranty covering workmanship, and in some cases materials, on products manufactured by the Company. Such warranty generally provides that products will be free from defects in the Company's workmanship and meet mutually agreed-upon specifications for periods generally ranging from 12 months to 24 months. If a product fails to comply with the Company's limited warranty, the Company's obligation is generally limited to correcting, at its expense, any defect by repairing or replacing such defective product. The Company's warranty generally excludes defects resulting from faulty customer-supplied components, customer design defects or damage caused by any party or cause other than the Company.

Table of Contents

The Company provides for an estimate of costs that may be incurred under its limited warranty at the time product revenue is recognized and establishes additional reserves for specifically identified product issues. These costs primarily include labor and materials, as necessary, associated with repair or replacement and are included in the Company's accompanying Condensed Consolidated Balance Sheets in "Other accrued liabilities." The primary factors that affect the Company's warranty liability include the value and the number of shipped units and historical and anticipated rates of warranty claims. As these factors are impacted by actual experience and future expectations, the Company regularly assesses the adequacy of its recorded warranty liabilities and adjusts the amounts as necessary. Below is a table summarizing the activity related to the Company's limited warranty liability for fiscal 2015 and for the nine months ended July 2, 2016 (in thousands):

Limited warranty liability, as of September 27, 2014	\$6,803
Accruals for warranties issued during the period	1,742
Settlements (in cash or in kind) during the period	(2,698)
Limited warranty liability, as of October 3, 2015	5,847
Accruals for warranties issued during the period	1,653
Settlements (in cash or in kind) during the period	(1,151)
Limited warranty liability, as of July 2, 2016	\$6,349

11. Shareholders' Equity

On June 6, 2016, the Board of Directors approved a stock repurchase program under which the Company is authorized to repurchase up to \$150.0 million of its common stock beginning in fiscal 2017.

On August 20, 2015, the Board of Directors approved a stock repurchase program under which the Company is authorized to repurchase up to \$30.0 million of its common stock during fiscal 2016. During the three months ended July 2, 2016, the Company repurchased 170,355 shares for approximately \$7.2 million, at an average price of \$42.13 per share. During the nine months ended July 2, 2016, the Company repurchased 606,236 shares for approximately \$22.9 million, at an average price of \$37.80 per share. These shares were recorded as treasury stock.

On August 13, 2014, the Board of Directors approved a stock repurchase program under which the Company was authorized to repurchase up to \$30.0 million of its common stock during fiscal 2015. During the three months ended July 4, 2015, the Company repurchased 169,774 shares for approximately \$7.5 million, at an average price of \$44.40 per share. During the nine months ended July 4, 2015, the Company repurchased 549,656 shares for approximately \$22.5 million, at an average price of \$40.97 per share. During fiscal 2015, the Company repurchased 745,227 shares for approximately \$30.0 million, at an average price of \$40.26 per share. These shares were recorded as treasury stock.

12. Restructuring Costs

Restructuring costs for the three months ended July 2, 2016, incurred primarily in the AMER segment, relate largely to the Company's closure of its manufacturing facility in Fremont, California as a result of the Company's optimization of its capacity to better reflect customer demand. The Company also recorded restructuring costs in the EMEA segment related to the partial closure of its Livingston, Scotland facility to align with reduced end-market demand, particularly in the oil and gas industry. These charges are recorded within "Restructuring charges" on the Condensed Consolidated Statements of Comprehensive Income. Restructuring liabilities are recorded within "Other accrued liabilities" in the Condensed Consolidated Balance Sheets.

For the three months ended July 2, 2016, the Company incurred restructuring costs of \$1.8 million, which consisted of \$1.6 million of employee termination and severance costs, primarily related to the Company's workforce in Fremont, California and Livingston, Scotland, and \$0.2 million of other exit costs.

The Company incurred no restructuring costs during the three months ended July 4, 2015.

For the nine months ended July 2, 2016, the Company incurred restructuring costs of \$5.2 million, which consisted of \$4.7 million of employee termination and severance costs, primarily related to the Company's workforce in Fremont

and Livingston, and \$0.5 million of other exit costs.

Table of Contents

Restructuring costs for the nine months ended July 4, 2015 related to the relocation of manufacturing operations from Juarez, Mexico to Guadalajara, Mexico. For the nine months ended July 4, 2015, the Company incurred restructuring costs of \$1.7 million, which consisted of \$1.5 million of moving and transition costs resulting from the relocation of manufacturing operations from Juarez to Guadalajara and \$0.1 million of employee termination and severance costs related to the Company's former workforce in Juarez.

In the three and nine months ended July 2, 2016 and July 4, 2015, the Company did not recognize an income tax benefit for these restructuring costs due to tax losses in the jurisdictions where the restructuring costs occurred.

The Company's restructuring accrual activity for the three and nine months ended July 2, 2016 is included in the table below (in thousands):

	Employee Termination and Severance Costs	Other Exit Costs	Total
Accrued balance, October 3, 2015	\$ —	\$—	\$—
Restructuring costs	1,394	113	1,507
Amounts utilized	(338) (113)	(451)
Accrued balance, January 2, 2016	1,056	—	1,056
Restructuring costs	1,656	261	1,917
Amounts utilized	(313) (6)	(319)
Accrued balance, April 2, 2016	2,399	255	2,654
Restructuring costs	1,641	164	1,805
Amounts utilized	(1,201) (62)	(1,263)
Accrued balance, July 2, 2016	\$ 2,839	\$357	\$3,196

The restructuring accrual balance is expected to be utilized by the end of the first fiscal quarter of 2017. Total fiscal 2016 restructuring costs are expected to be between \$5.5 million and \$6.0 million.

13. New Accounting Pronouncements

In March 2016, the Financial Accounting Standards Board (“FASB”) issued guidance that changes the accounting for certain aspects of share-based payments to employees. The guidance requires the recognition of the income tax effects of awards in the income statement when the awards vest or are settled, thus eliminating additional paid-in capital pools. The guidance also allows for the employer to repurchase more of an employee’s shares for tax withholding purposes without triggering liability accounting. In addition, the guidance allows for a policy election to account for forfeitures as they occur rather than on an estimated basis. The guidance is effective for fiscal years, and interim periods within those years, beginning after December 15, 2016. Early adoption is permitted. The Company is currently in the process of assessing the impact of the adoption of the new standard on its Consolidated Financial Statements and the timing of adoption.

In February 2016, the FASB issued guidance that primarily requires lessees to recognize most leases on their balance sheets but record expenses on their income statements in a manner similar to current accounting. For lessors, the guidance modifies the classification criteria and the accounting for sales-type and direct financing leases. The guidance is effective for fiscal years, and interim periods within those years, beginning after December 15, 2018. Early adoption is permitted. The Company is currently in the process of assessing the impact of the adoption of the new standard on its Consolidated Financial Statements and the timing of adoption.

In November 2015, the FASB issued an accounting standard to simplify the presentation of deferred taxes. The new guidance requires that all deferred tax assets and liabilities, along with any related valuation allowance, be classified as noncurrent on the balance sheet, as opposed to being presented as current and non-current. This guidance is required to be adopted for annual periods beginning after December 15, 2016, and interim periods within those annual

periods. Early adoption is permitted, and the guidance may be applied either prospectively, for all deferred tax assets and liabilities, or retrospectively. The adoption of this guidance is not expected to have a material impact on the Company's Consolidated Financial Statements.

In April 2015, the FASB issued amended guidance that requires debt issuance costs related to a recognized debt liability to be presented in the balance sheet as a direct deduction from the carrying amount of that debt liability, consistent with debt

Table of Contents

discounts. Under the new guidance, the recognition and measurement of debt issuance costs is not affected. This guidance is effective for annual periods beginning on or after December 15, 2015, and interim periods within those fiscal years, with early adoption permitted. The adoption of this guidance is not expected to have a material impact on the Company's Consolidated Financial Statements.

In May 2014, the FASB issued amended guidance for revenue recognition. The standard's core principle is that a company will recognize revenue when it transfers promised goods or services to customers in an amount that reflects the consideration to which the company expects to be entitled in exchange for those goods or services. In doing so, companies will need to use more judgment and make more estimates than under current guidance. This may include identifying performance obligations in the contract, estimating the amount of variable consideration to include in the transaction price and allocating the transaction price to each separate performance obligation. In July 2015 the FASB approved a one-year deferral of the standard. The new standard will become effective retrospectively for annual reporting periods beginning after December 15, 2017, including interim reporting periods within that reporting period. Earlier application is permitted for annual reporting periods beginning after December 15, 2016. The Company is currently in the process of evaluating the impact of the adoption of this guidance on its Consolidated Financial Statements and the timing of its adoption.

14. Subsequent Events

On July 5, 2016, the Company amended its Credit Facility. As a result of the amendment, the maximum commitment under the Credit Facility was increased from \$265 million to \$300 million. The Credit Facility, as amended, may potentially be increased by up to \$200 million to \$500 million generally by mutual agreement of the Company, the lenders, the letter of credit issuers and the administrative agent named in the related Credit Agreement, subject to certain customary conditions. Borrowings under the Credit Facility, as amended, bear interest, at the Company's option, at a eurocurrency or base rate plus, in each case, an applicable interest rate margin based on the Company's then-current consolidated total debt to consolidated EBITDA (as defined in the Credit Agreement) ratio. In addition, the Amendment extends the termination date of the Credit Facility from May 15, 2019 to July 5, 2021, and modifies certain definitions and other provisions.

Also on July 5, 2016, the Company amended the note purchase agreement (the "Note Purchase Agreement"), relating to the Notes. Among other changes, as a result of the amendment, certain financing and purchase transactions are now permitted and the financial covenants in the Note Purchase Agreement have been aligned with those in the Credit Agreement.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

"SAFE HARBOR" CAUTIONARY STATEMENT UNDER THE PRIVATE SECURITIES LITIGATION REFORM ACT OF 1995:

The statements contained in this Form 10-Q that are guidance or which are not historical facts (such as statements in the future tense and statements including believe, expect, intend, plan, anticipate, goal, target and similar terms and concepts), including all discussions of periods which are not yet completed, are forward-looking statements that involve risks and uncertainties. These risks and uncertainties include, but are not limited to: the risk of customer delays, changes, cancellations or forecast inaccuracies in both ongoing and new programs; the lack of visibility of future orders, particularly in view of changing economic conditions; the economic performance of the industries, sectors and customers we serve; the effects of the volume of revenue from certain sectors or programs on our margins in particular periods; our ability to secure new customers, maintain our current customer base and deliver product on a timely basis; the particular risks relative to new or recent customers, programs or services, which risks include customer and other delays, start-up costs, potential inability to execute, the establishment of appropriate terms of agreements, and the lack of a track record of order volume and timing; the risks of concentration of work for certain customers; the effect of start-up costs of new programs and facilities; possible unexpected costs and operating disruption in transitioning programs, including as a result of a facility closure; the risk that new program wins and/or customer demand may not result in the expected revenue or profitability; the fact that customer orders may not lead to long-term relationships; our ability to manage successfully and execute a complex business model characterized by high product mix, low volumes and demanding quality, regulatory, and other requirements; the ability to realize anticipated savings from restructuring or similar actions, as well as the adequacy of related charges as compared to actual expenses; increasing regulatory and compliance requirements; the potential effects of regional results on our taxes and ability to use deferred tax assets and net operating losses; risks related to information technology systems and data security; the effects of shortages and delays in obtaining components as a result of economic cycles or natural disasters; the risks associated with excess and obsolete inventory, including the risk that inventory purchased on behalf of our customers may not be consumed or otherwise paid for by the customer, resulting in an inventory write-off; the weakness of areas of the global economy; the effect of changes in the pricing and margins of products; raw materials and component cost fluctuations; the potential effect of fluctuations in the value of the currencies in which we transact business; potential economic weakness and other effects resulting from the June 2016 vote of the United Kingdom to exit the European Union; the potential effect of other world or local events or other events outside our control (such as changes in energy prices, terrorism and weather events); the impact of increased competition; and other risks detailed herein and in our other Securities and Exchange Commission filings (particularly in "Risk Factors" in our fiscal 2015 Form 10-K).

OVERVIEW

Plexus Corp. and its subsidiaries (together "Plexus," the "Company," or "we") participate in the Electronic Manufacturing Services ("EMS") industry. We deliver optimized solutions to our customers through our unique Product Realization Value Stream. Our customer-focused solutions model seamlessly integrates innovative product conceptualization, design, commercialization, manufacturing, fulfillment and sustaining solutions. Plexus delivers comprehensive end-to-end solutions for customers in the Americas ("AMER"), Europe, Middle East, and Africa ("EMEA") and Asia-Pacific ("APAC") regions.

Plexus is the industry leader in servicing mid-to-low volume, higher complexity customer programs characterized by unique flexibility, technology, quality and regulatory requirements. Plexus provides award-winning customer service to more than 140 branded product companies in the Networking/Communications, Healthcare/Life Sciences, Industrial/Commercial and Defense/Security/Aerospace market sectors. The Company's customers have stringent quality, reliability and regulatory requirements, requiring exceptional production and supply chain agility. Their products require complex configuration management, direct order fulfillment (to end customers) and global logistics

management and Aftermarket Services. To service the complexities that the Company's customers' products demand, Plexus utilizes its Product Realization Value Stream, addressing its customers' products from concept to end of life. The following information should be read in conjunction with our Condensed Consolidated Financial Statements included herein, the "Risk Factors" section in Part I, Item 1A of our annual report on Form 10-K for the fiscal year ended October 3, 2015, and our "Safe Harbor" Cautionary Statement included above.

Table of Contents

RESULTS OF OPERATIONS

Consolidated Performance Summary. The following table presents selected consolidated financial data (dollars in millions, except per share data):

	Three Months Ended		Nine Months Ended	
	July 2, 2016	July 4, 2015	July 2, 2016	July 4, 2015
Net sales	\$667.6	\$669.6	\$1,902.9	\$1,985.6
Cost of sales	\$605.1	\$610.5	\$1,737.1	\$1,805.3
Gross profit	\$62.5	\$59.1	\$165.8	\$180.3
Gross margin	9.4	% 8.8	% 8.7	% 9.1
Operating income	\$30.9	\$28.6	\$75.8	\$86.9
Operating margin	4.6	% 4.3	% 4.0	% 4.4
Net income	\$26.1	\$23.8	\$57.3	\$70.5
Diluted earnings per share	\$0.76	\$0.69	\$1.68	\$2.05
Return on invested capital*			13.0	% 14.1
Economic return*			2.0	% 3.1

* Non-GAAP metric; refer to "Return on Invested Capital ("ROIC") and Economic Return" below for more information and Exhibit 99.1 for a reconciliation.

Net sales. For the three months ended July 2, 2016, net sales decreased \$2.0 million, or 0.3 percent, as compared to the three months ended July 4, 2015. Net sales remained relatively flat due to a \$66.2 million decrease in net sales in the Networking/Communications sector, which was substantially offset by increased net sales of \$27.0 million, \$25.8 million and \$11.4 million in the Healthcare/Life Sciences, Industrial/Commercial and Defense/Security/Aerospace sectors, respectively.

Net sales for the nine months ended July 2, 2016, decreased \$82.7 million, or 4.2 percent, as compared to the nine months ended July 4, 2015. The decrease was primarily driven by decreased net sales of \$196.7 million in the Networking/Communications sector, which was partially offset by increased net sales of \$59.0 million in the Industrial/Commercial sector, \$33.7 million in the Defense/Security/Aerospace sector and \$21.3 million in the Healthcare/Life Sciences sector.

Our net sales by market sector for the indicated periods were as follows (in millions):

Market Sector	Three Months Ended		Nine Months Ended	
	July 2, 2016	July 4, 2015	July 2, 2016	July 4, 2015
Networking/Communications	\$155.6	\$221.8	\$469.0	\$665.7
Healthcare/Life Sciences	206.8	179.8	588.0	566.7
Industrial/Commercial	202.1	176.3	543.7	484.7
Defense/Security/Aerospace	103.1	91.7	302.2	268.5
Total net sales	\$667.6	\$669.6	\$1,902.9	\$1,985.6

Networking/Communications. Net sales in the Networking/Communications sector decreased \$66.2 million for the three months ended July 2, 2016 as compared to the three months ended July 4, 2015. The reduction in net sales was primarily driven by a \$24.4 million decrease in net sales due to a previously announced program disengagement and a \$23.6 million decrease in net sales to another customer that resulted from decreased end-market demand of a product previously launched. Overall decreased end-market demand drove the remaining reduction in net sales during the quarter. Partially offsetting the decreases was a \$4.1 million increase in net sales due to the ramp of production of a new program for an existing customer.

During the nine months ended July 2, 2016, net sales in the Networking/Communications sector decreased \$196.7 million as compared to the nine months ended July 4, 2015. The decrease in net sales was primarily driven by a \$68.9

million decrease in net sales to one customer that resulted from decreased end-market demand of a product previously launched, a \$58.7 million decrease due to a previously announced program disengagement with another customer, and a \$27.1 million decrease due to the disengagement of a customer. The remaining decrease in net sales was the result of decreased end-market demand with various customers. Partially offsetting the decreases was a \$8.7 million increase in net sales from new program ramps with three existing customers.

Table of Contents

Healthcare/Life Sciences. Net sales in the Healthcare/Life Sciences sector increased \$27.0 million for the three months ended July 2, 2016 as compared to the three months ended July 4, 2015. The increase was primarily driven by a \$14.1 million increase in net sales due to the ramp of various new programs for three existing customers and \$8.6 million from the ramp of production for two new customers. The remaining increase in net sales was the result of increased end-market demand. Partially offsetting the increases was a \$4.1 million decrease in net sales due to a customer bringing the manufacturing process of two programs in house.

During the nine months ended July 2, 2016, net sales in the Healthcare/Life Sciences sector increased \$21.3 million as compared to the nine months ended July 4, 2015. The increase was primarily driven by a \$26.7 million increase in net sales due to the ramp of various new programs for four existing customers and \$17.3 million from the ramp of production for three new customers. The remaining increase in net sales was the result of increased end-market demand with various customers. Partially offsetting the increases were decreases in net sales of \$11.8 million due to two customers bringing the manufacturing process of three programs in house, \$7.2 million due to programs transitioning into the production stage, \$5.2 million due to a product disengagement with one customer, and \$4.0 million due to a customer disengagement.

Industrial/Commercial. Net sales in the Industrial/Commercial sector increased \$25.8 million for the three months ended July 2, 2016 as compared to the three months ended July 4, 2015. The increase was primarily due to ramps of production for a new customer, which resulted in increased net sales of \$62.4 million. Partially offsetting the increase were decreases of \$14.8 million related to the previously announced disengagement of a customer and \$12.8 million that resulted from a customer revising its business model as a result of decreased end-market demand. Decreased end-market demand led to the remaining decrease in net sales in the sector.

Net sales in the Industrial/Commercial sector increased \$59.0 million for the nine months ended July 2, 2016 as compared to the nine months ended July 4, 2015. The increase was primarily due to ramps of production for a new customer, which resulted in increased net sales of \$136.4 million. The increase was partially offset by decreases of \$28.0 million related to the previously announced disengagement of a customer and \$19.7 million due to two customers revising their business models as a result of decreased end-market demand. Net sales decreased \$7.9 million due to pilot programs for two customers not transitioning into the production stage. Decreased end-market demand, particularly in the oil and gas industry, resulted in the remaining decrease in net sales.

Defense/Security/Aerospace. Net sales in the Defense/Security/Aerospace sector increased \$11.4 million for the three months ended July 2, 2016 as compared to the three months ended July 4, 2015. The improvement was primarily attributable to increased net sales of \$6.5 million that resulted from the ramp of two new programs for two existing customers and \$2.5 million due to increased demand for an end-of-life program. The remaining increase in net sales was driven by overall improved end-market demand.

Net sales in the Defense/Security/Aerospace sector increased \$33.7 million during the nine months ended July 2, 2016 as compared to the nine months ended July 4, 2015. The improvement was primarily attributable to increased net sales of \$26.4 million that resulted from the ramp of production of new programs for five existing customers and \$6.0 million due to increased demand for an end-of-life program. The remaining increase in net sales was driven by overall increased end-market demand.

Cost of sales. For the three months ended July 2, 2016, cost of sales decreased \$5.4 million, or 0.9 percent, as compared to the three months ended July 4, 2015. Cost of sales is comprised primarily of material and component costs, labor costs, and overhead. Cost of sales decreased primarily due to a \$3.8 million decrease in variable labor costs that resulted mainly from the successful completion of a quality initiative in the AMER segment. For the three months ended July 2, 2016 and July 4, 2015, approximately 90 percent of the total cost of sales was variable in nature and fluctuated with sales volumes. Of this amount, over 91 percent of the variable costs for both periods was related to material and component costs. As a result of using a cost-plus markup pricing arrangement with our customers, changes in costs typically result in corresponding changes in price, which generally results in an immaterial impact on gross profit. Therefore, as expected, the decrease in cost of sales of 0.9 percent was generally in line with the 0.3 percent decrease in net sales.

For the nine months ended July 2, 2016, cost of sales decreased \$68.2 million, or 3.8 percent, as compared to the nine months ended July 4, 2015, while net sales decreased \$82.7 million, or 4.2 percent. The cost of sales decreased

primarily due to the reduction in net sales as well as a \$2.9 million decrease in variable labor costs in the APAC segment. These factors were partially offset by a \$3.0 million increase in material costs as compared to the prior year that was driven by a change in net sales mix and a \$2.0 million increase in fixed manufacturing expenses that resulted from lower fixed cost absorption. For the nine months ended July 2, 2016 and July 4, 2015, approximately 90 percent of the total cost of sales was variable in nature and fluctuated with sales volumes. Of this amount, approximately 91 percent of the variable costs for both periods was related to material and component costs.

Table of Contents

Gross profit. For the three months ended July 2, 2016, gross profit increased \$3.4 million, or 5.8 percent, as compared to the three months ended July 4, 2015. Gross margin increased 60 basis points as compared to the three months ended July 4, 2015. The primary driver of the increase in gross profit and gross margin was a \$4.0 million decrease in variable labor costs, which resulted from production shifting to lower cost manufacturing locations and productivity improvements from the successful completion of a quality initiative in the AMER segment.

Gross profit for the nine months ended July 2, 2016 decreased \$14.5 million, or 8.0 percent, as compared to the nine months ended July 4, 2015. Gross margin decreased 40 basis points as compared to the nine months ended July 4, 2015. The decrease in gross profit and gross margin was primarily due to the decrease in net sales discussed above, a \$3.9 million decrease due to a slight shift in sales mix and a \$2.0 million reduction due to under absorption of fixed costs.

Operating income. For the three months ended July 2, 2016, operating income increased \$2.3 million, or 8.0 percent, as compared to the three months ended July 4, 2015. The increase was primarily due to the increase in gross profit noted above and a \$0.7 million decrease in selling and administrative (“S&A”) expenses as compared to the prior year period, which was primarily driven by decreased variable compensation expense. These benefits to operating income were partially offset by a \$1.8 million increase in restructuring charges in the current period. Operating margin increased 30 basis points to 4.6 percent for the three months ended July 2, 2016 as compared to the three months ended July 4, 2015 due to the increase in gross margin and decrease in S&A expenses, partially offset by the increase in restructuring charges.

For the nine months ended July 2, 2016, operating income decreased \$11.1 million, or 12.8 percent, as compared to the nine months ended July 4, 2015. The decrease was primarily due to the decrease in gross profit and a \$3.5 million increase in restructuring charges in the current period. These unfavorable changes were partially offset by a \$6.9 million decrease in S&A expenses as compared to the prior year period, which was primarily driven by decreased variable compensation expense. Operating margin decreased 40 basis points to 4.0 percent for the nine months ended July 2, 2016 as compared to the prior period due to the decrease in gross margin and an increase in restructuring charges.

Other income (expense). Other expense increased by \$0.3 million for the three months ended July 2, 2016 as compared to the three months ended July 4, 2015.

Other expense increased \$2.9 million for the nine months ended July 2, 2016 as compared to the nine months ended July 4, 2015. The increase in other expense was primarily the result of a \$3.1 million increase in foreign exchange losses for the nine months ended July 2, 2016 as compared to the prior year. The losses resulted from foreign exchange volatility, primarily in the APAC segment.

Income taxes. Effective income tax rates for the indicated periods were as follows:

	Three Months Ended		Six Months Ended	
	July 2, 2016	July 4, 2015	July 2, 2016	July 4, 2015

Effective tax rate 9.1% 10.8% 12.6% 11.4%

Income tax expense for the three months ended July 2, 2016 and July 4, 2015 was \$2.6 million and \$2.9 million, respectively. Income tax expense for the nine months ended July 2, 2016 and July 4, 2015 was \$8.2 million and \$9.1 million, respectively. The decrease in the effective tax rate for the three months ended July 2, 2016 compared to the three months ended July 4, 2015 was primarily due to the geographic distribution of worldwide earnings. The increase in the effective tax rate for the nine months ended July 2, 2016 compared to the nine months ended July 4, 2015 was primarily due to a decrease in pre-tax earnings in low tax-rate jurisdictions and in jurisdictions where the Company maintains a valuation allowance.

Our effective tax rate will vary from the U.S. statutory rate of 35.0 percent primarily due to the geographic distribution of worldwide earnings as well as a tax holiday granted to a subsidiary within our APAC segment, where we derive a significant portion of our earnings. In addition, our effective tax rate may be impacted by changes in tax laws, disputes with taxing authorities, tax planning activities, adjustments to uncertain tax positions and changes to

deferred tax assets and related valuation allowances.

The estimated effective income tax rate for fiscal 2016 is expected to be between 11.0 percent and 13.0 percent. Net income. Net income for the three months ended July 2, 2016 increased \$2.3 million, or 9.7 percent, to \$26.1 million from \$23.8 million for the three months ended July 4, 2015. Net income increased primarily as a result of the increase in operating income discussed above.

Table of Contents

Net income for the nine months ended July 2, 2016 decreased \$13.2 million, or 18.7 percent, to \$57.3 million from \$70.5 million for the nine months ended July 4, 2015. Net income decreased primarily as a result of the reduction in operating income discussed above and a \$3.1 million increase in foreign exchange losses compared to the prior year. Diluted earnings per share. Diluted earnings per share, as reported, and diluted earnings per share, as adjusted to exclude restructuring costs, a non-GAAP financial measure, for the three and nine months ended July 2, 2016 and July 4, 2015, respectively, were as follows:

	Three Months Ended July 2, July 4, 2016 2015		Nine Months Ended July 2, July 4, 2016 2015	
Diluted earnings per share, as reported	\$0.76	\$0.69	\$1.68	\$2.05
Impact of restructuring costs	0.06	—	0.16	0.05
Diluted earnings per share, as adjusted*	\$0.82	\$0.69	\$1.84	\$2.10

*The Company believes the non-GAAP presentation of diluted earnings per share, as adjusted provides additional insight to investors regarding the Company's performance over the comparative reporting periods by eliminating restructuring and other non-recurring charges or gains, which are unrelated to operations in those periods. In addition, the Company believes that diluted earnings per share, as adjusted enhances investors' ability to analyze the Company's operational performance.

The increase in adjusted diluted earnings per share for the three months ended July 2, 2016 as compared to the prior year period was primarily the result of the increase in net income. There were also fewer weighted average outstanding shares in the current quarter as compared to the three months ended July 4, 2015, due to our common stock repurchase program and a decreased dilutive impact attributable to share-based awards.

The decrease in adjusted diluted earnings per share for the nine months ended July 2, 2016 as compared to the prior year was primarily the result of the decrease in net income. This was partially offset by the positive impact of fewer weighted average outstanding shares during the nine months ended July 2, 2016 as compared to the nine months ended July 4, 2015, due to our common stock repurchase program and a decreased dilutive impact attributable to share-based awards.

For information regarding restructuring costs, see Note 12, "Restructuring Costs," in Notes to Condensed Consolidated Financial Statements and see Note 11, "Shareholders' Equity," for further information surrounding the common stock repurchase program.

Return on Invested Capital ("ROIC") and Economic Return. We use a financial model that is aligned with our business strategy and includes a ROIC goal of 500 basis points over our weighted average cost of capital ("WACC"), which we refer to as "Economic Return," and a 4.7 percent to 5.0 percent operating margin target. Our primary focus is on our Economic Return goal of 5.0 percent, which is designed to create shareholder value and generate sufficient cash to self-fund our targeted organic revenue growth rate of 12.0 percent. ROIC and Economic Return are non-GAAP financial measures, as discussed below.

We review our internal calculation of WACC annually, and our estimated WACC is 11.0 percent for fiscal 2016. By exercising discipline to generate ROIC in excess of our WACC, our goal is to create value for our shareholders. ROIC was 13.0 percent and 14.1 percent for the nine months ended July 2, 2016 and July 4, 2015, respectively, and was calculated excluding restructuring costs of \$5.2 million and \$1.7 million, respectively. Refer to the table below, which includes the calculation of ROIC and Economic Return (dollars in millions):

	Nine Months Ended			
	July 2, 2016		July 4, 2015	
Annualized operating income (tax effected)	\$96,141		\$105,088	
Average invested capital	738,397		745,030	
After-tax ROIC	13.0	%	14.1	%
WACC	11.0	%	11.0	%

Economic Return 2.0 % 3.1 %

We define ROIC as tax-effected operating income before restructuring charges divided by average invested capital over a rolling four-quarter period for the third quarter. Invested capital is defined as equity plus debt, less cash and cash equivalents. Other companies may not define or calculate ROIC in the same way. ROIC, Economic Return and other non-GAAP financial measures should be considered in addition to, not as a substitute for, measures of our financial performance prepared in accordance with U.S. generally accepted accounting principles (“GAAP”).

21

Table of Contents

Non-GAAP financial measures, including ROIC and Economic Return, are used for internal management goals and decision making because such measures provide management and investors additional insight into financial performance. In particular, we provide ROIC and Economic Return because we believe they offer insight into the metrics that are driving management decisions because we view ROIC and Economic Return as important measures in evaluating the efficiency and effectiveness of our long-term capital requirements. We also use a derivative measure of ROIC as a performance criteria in determining certain elements of compensation.

For a reconciliation of ROIC and Economic Return to our financial statements that were prepared using GAAP, see exhibit 99.1 to this quarterly report on Form 10-Q, which exhibit is incorporated herein by reference.

Table of Contents

REPORTABLE SEGMENTS

A discussion of financial performance by reportable segment is presented below (dollars in millions):

	Three Months Ended		Nine Months Ended	
	July 2, 2016	July 4, 2015	July 2, 2016	July 4, 2015
Net sales:				
AMER	\$359.4	\$365.9	\$994.8	\$1,029.9
APAC	292.6	313.9	862.5	966.4
EMEA	41.0	33.9	126.8	97.7
Elimination of inter-segment sales	(25.4)	(44.0)	(81.2)	(108.4)
Total net sales	\$667.6	\$669.7	\$1,902.9	\$1,985.6
Operating income (loss):				
AMER	\$22.1	\$20.4	\$45.9	\$55.5
APAC	38.3	37.1	110.1	119.9
EMEA	(1.6)	(2.5)	(3.0)	(8.1)
Corporate expenses and other costs	(27.9)	(26.3)	(77.2)	(80.4)
Total operating income	\$30.9	\$28.7	\$75.8	\$86.9

AMER. Net sales for the three months ended July 2, 2016 decreased \$6.5 million, or 1.8 percent, as compared to the three months ended July 4, 2015. The decrease in net sales was due to: a \$23.6 million decrease in net sales to one customer that resulted from decreased end-market demand of a product previously launched; a decrease of \$14.8 million due to a previously announced customer disengagement; a reduction of \$3.5 million due to a customer bringing the manufacturing process of two programs in house; a \$4.9 million decrease due to the manufacturing process of various programs for one customer being transferred to our APAC segment; and overall decreased customer end-market demand. Substantially offsetting the decreases were increases in net sales of \$51.4 million due to the ramp of production for two new customers and \$5.4 million due to the ramp of production of new programs for two existing customers. Operating income for the three months ended July 2, 2016 increased \$1.7 million as compared to the three months ended July 4, 2015, primarily due to a \$2.1 million decrease in variable labor costs, which resulted from production shifting to lower cost manufacturing locations and productivity improvements from the successful completion of a quality initiative.

During the nine months ended July 2, 2016 net sales decreased \$35.1 million, or 3.4 percent, as compared to the nine months ended July 4, 2015. The decrease in net sales was due to: a \$68.7 million decrease in net sales to one customer that resulted from decreased end-market demand of a product previously launched; a decrease of \$27.9 million due to a previously announced customer disengagement; a reduction of \$27.1 million due to a disengagement with another customer; a \$8.3 million decrease due to a customer bringing the manufacturing process of two programs in house; a reduction of \$7.9 million due to pilot programs for two customers not transitioning into the production phase; a \$7.2 million decrease due to programs transitioning into the production stage; a \$5.2 million reduction due to a product disengagement with one customer; and overall decreased customer end-market demand. Partially offsetting these decreases were increased net sales of \$129.8 million due to the ramp of production for two new customers, \$25.4 million from the ramp of various new programs for five existing customers, and \$6.0 million due to increased demand for an end-of-life program with one customer. Operating income for the nine months ended July 2, 2016 decreased \$9.6 million, or 17.3 percent, as compared to the nine months ended July 4, 2015, driven primarily by decreased net sales and a shift in net sales mix, which resulted in a \$13.3 million decrease in operating income.

APAC. Net sales for the three months ended July 2, 2016 decreased \$21.3 million, or 6.8 percent, as compared to the three months ended July 4, 2015, primarily due to a previously announced program disengagement, which resulted in a \$25.3 million decrease in net sales. A shift in a customer's business model as a result of decreased end-market demand and a customer disengagement resulted in decreased net sales of \$12.8 million and \$5.8 million, respectively. The remaining decrease was due to decreased end-market demand for various customers. These decreases were partially offset by a \$24.9 million increase in net sales due to production ramps for four new customers, \$4.7 million

due to new program ramps for two existing customer and \$2.2 million due to the transfer of the manufacturing process of various programs for one customer from our AMER to our APAC segment. Operating income for the three months ended July 2, 2016 increased by \$1.2 million, or 3.2 percent, as compared to the three months ended July 4, 2015. The increase was driven primarily by a shift in net sales mix, which resulted in a \$2.6 million increase in operating income, and a \$1.0 million decrease in fixed labor costs. These increases were partially offset by a reduction in operating income due to the decrease in net sales.

Table of Contents

Net sales decreased \$103.9 million, or 10.8 percent, during the nine months ended July 2, 2016, as compared to the nine months ended July 4, 2015. The decrease was primarily due to a previously announced program disengagement, which resulted in a \$58.0 million decrease in net sales. Net sales also decreased by \$22.7 million and \$20.2 million due to two customer disengagements and a shift in two customers business models due to decreased end-market demand. The remaining decrease was due to decreased customer end-market demand, due in part to the downturn in the oil and gas markets. Partially offsetting the decreases in net sales were increases of \$29.9 million due to the ramp of production for four new customers and \$14.8 million due to the ramp of production of various new programs for two existing customers. Operating income for the nine months ended July 2, 2016 decreased \$9.8 million, or 8.2 percent, as compared to the nine months ended July 4, 2015, due primarily to decreased net sales. Partially offsetting the impact of the decrease in net sales were increases in operating income of \$5.0 million due to a positive change in sales mix, \$1.3 million due to a decrease in fixed labor costs and \$1.3 million due to a decrease in depreciation expense as compared to the prior year.

EMEA. Net sales for the three months ended July 2, 2016 increased \$7.1 million, or 20.9 percent, as compared to the three months ended July 4, 2015. The increase in net sales was attributable primarily to the ramp of production for two new customers, which resulted in increased net sales of \$4.7 million. Increased end-market demand resulted in the remaining increase in net sales. Operating loss for the three months ended July 2, 2016 decreased by \$0.9 million, or 36.0 percent, as compared to the three months ended July 4, 2015, primarily due to increased net sales.

Net sales during the nine months ended July 2, 2016 increased \$29.1 million, or 29.8 percent, as compared to the nine months ended July 4, 2015. The increase in net sales was attributable primarily to the ramps of production for two new customers, which resulted in increased net sales of \$13.9 million, and the ramp of production of a new program with an existing customer, which resulted in \$5.8 million in net sales. Increased end-market demand with various customers resulted in the remaining increase in net sales. Operating loss for the nine months ended July 2, 2016 decreased by \$5.1 million, or 63.0 percent, as compared to the nine months ended July 4, 2015, primarily due to increased net sales, partially offset by a \$0.8 million increase in fixed labor costs.

The Company has operations in the European Union, including the United Kingdom. The June 2016 U.K. vote to exit from the European Union (“Brexit”) led to a significant decline in the U.K. pound late in the quarter; beyond the currency effects to date, which have not been material to the Company, the Company has not yet determined what effect, if any, the Brexit will have on its business and results of operations.

Table of Contents

LIQUIDITY AND CAPITAL RESOURCES

Cash and cash equivalents were \$433.7 million as of July 2, 2016, and \$357.1 million as of October 3, 2015.

As of July 2, 2016, approximately 97.0 percent of our cash balance was held outside of the U.S. by our foreign subsidiaries. Certain foreign countries impose taxes and overall penalties on transfers of cash. While our intent has been to permanently reinvest the funds held in these countries, from time to time we review and evaluate that strategy, particularly as the percentage of our cash balance held outside the U.S. has increased. If this cash were remitted to the U.S., additional tax obligations may reduce the amount of cash ultimately available to us in the U.S., although the effects of such taxes would likely be substantially offset by our U.S. tax loss carry-forward. Currently, we believe that cash held in the U.S., together with cash available under our Credit Facility and cash from our foreign subsidiaries that could be remitted to the U.S. without material tax consequences, will be sufficient to meet our U.S. liquidity needs for the next twelve months and for the foreseeable future.

Cash Flows. The table below provides a summary of cash flows for the periods presented, excluding the effect of exchange rates on cash and cash equivalents (in millions):

	Nine Months Ended	
	July 2, 2016	July 4, 2015
Cash provided by operating activities	\$ 122.6	\$ 55.6
Cash used in investing activities	\$(23.7)	\$(26.6)
Cash used in financing activities	\$(18.5)	\$(17.8)

Operating Activities. Cash flows provided by operating activities were \$122.6 million for the nine months ended July 2, 2016, as compared to \$55.6 million for the nine months ended July 4, 2015. Cash flows provided by operating activities increased primarily due to the impact of decreases in working capital, driven by better working capital management and a reduction in net sales. This effect was partially offset by the decrease in net income discussed previously. The largest driver of the decrease in working capital was an improvement in inventory cash flow, which increased \$11.3 million during the nine months ended July 2, 2016, as compared to the \$65.6 million increase in inventory during the nine months ended July 4, 2015. Prior year inventory cash flow was negatively impacted by decreased customer demand at the end of the fiscal 2015 third quarter that resulted in forecast decommitments, particularly within our Networking/Communications sector, and lower than expected demand in our Healthcare/Life Sciences sector. Working capital was also positively impacted by the \$5.0 million decrease in accounts receivable during the nine months ended July 2, 2016, as compared to the increase of \$28.4 million during the prior year period. The improvement in the accounts receivable cash flow was due to an increased emphasis placed on receiving timely payments during fiscal 2016. Partially offsetting the improvements was a decrease in customer deposit cash flows of \$13.2 million during the nine months ended July 2, 2016 as compared to the prior year period.

The following table shows a summary of cash cycle days for the periods indicated (in days):

	Three Months Ended	
	July 2, 2016	July 4, 2015
Days in accounts receivable	51	48
Days in inventory	87	88
Days in accounts payable	(62)	(62)
Days in cash deposits	(13)	(12)
Annualized cash cycle	63	62

We calculate days in accounts receivable as accounts receivable for the respective quarter divided by annualized sales for the respective quarter by day. We calculate days in inventory, accounts payable, and cash deposits as each balance sheet line item for the respective quarter divided by annualized cost of sales for the respective quarter by day. We

calculate annualized cash cycle as the sum of days in accounts receivable and days in inventory, less days in accounts payable and days in cash deposits.

As of July 2, 2016, annualized cash cycle days increased by one day as compared to July 4, 2015 due to the following factors:

Days in accounts receivable for the three months ended July 2, 2016 increased three days as compared to the three months ended July 4, 2015, primarily due to our net sales mix shifting to customers with longer payment terms.

Table of Contents

Days in inventory for the three months ended July 2, 2016 decreased by one day compared to the three months ended July 4, 2015. The decrease is primarily driven by the reduction in inventory due to better working capital management.

Days in accounts payable for the three months ended July 2, 2016 remained flat as compared to the three months ended July 4, 2015.

Days in cash deposits for the three months ended July 2, 2016, increased by one day compared to the three months ended July 4, 2015, due to the increase in the customer deposit balance as compared to the three months ended July 4, 2015, as a significant deposit was received from one customer during the three months ended July 2, 2016.

Free Cash Flow. We define free cash flow (“FCF”), a non-GAAP financial measure, as cash flows provided by (used in) operations less capital expenditures. Free cash flow for the nine months ended July 2, 2016 was \$98.8 million, an improvement of \$70.1 million from the \$28.7 million of free cash flow for the nine months ended July 4, 2015. The increase was primarily due to the increase in cash flows provided by operations, as compared to the nine months ended July 4, 2015, and a slight decrease in capital expenditures.

Non-GAAP financial measures, including FCF, are used for internal management assessments because such measures provide additional insight to investors into ongoing financial performance. In particular, we provide FCF because we believe it offers insight into the metrics that are driving management decisions. We view FCF as an important financial metric as it demonstrates our ability to generate cash and allows us to pursue opportunities that enhance shareholder value. FCF is a non-GAAP financial measure that should be considered in addition to, not as a substitute for, measures of our financial performance prepared in accordance with GAAP.

A reconciliation of FCF to our financial statements that were prepared using GAAP follows (in millions):

	Nine Months Ended	
	July 2, 2016	July 4, 2015
Cash flows provided by operating activities	\$122.6	\$55.6
Payments for property, plant and equipment	(23.8)	(26.9)
Free cash flow	\$98.8	\$28.7

Investing Activities. Cash flows used in investing activities totaled \$23.7 million for the nine months ended July 2, 2016, a decrease of \$2.9 million as compared to cash flows used in investing activities of \$26.6 million for the nine months ended July 4, 2015.

We estimate funded capital expenditures for fiscal 2016 to be approximately \$40.0 million, of which \$23.8 million was utilized through the first nine months of fiscal 2016. The remaining fiscal 2016 capital expenditures are anticipated to be used primarily to support new capabilities, new program ramps, and to replace or refresh older equipment. We believe our estimated capital expenditures will continue to be funded from cash flows provided by operations, and may be supplemented by short-term borrowings and available cash, if required.

Financing Activities. Cash flows used in financing activities totaled \$18.5 million for the nine months ended July 2, 2016 as compared to \$17.8 million for the nine months ended July 4, 2015. During the nine months ended July 2, 2016, we borrowed and repaid an aggregate of \$453.0 million under our revolving credit facility (described below). Cash flows used in financing activities for the nine months ended July 2, 2016 were comprised primarily of \$22.9 million for purchases of common stock as part of our stock repurchase program as well as \$3.6 million for payments on capital leases. The \$0.7 million increase in cash flows used in financing activities for the nine months ended July 2, 2016, as compared to the nine months ended July 4, 2015, was driven by \$0.4 million increase in purchases of common stock as part of our stock repurchase program.

On August 20, 2015, the Board of Directors approved a stock repurchase program under which the Company is authorized to repurchase up to \$30.0 million of its common stock in fiscal 2016. During the nine months ended July 2, 2016, the Company repurchased 606,236 shares for approximately \$22.9 million, at an average price of \$37.80 per share. These shares were recorded as treasury stock. The Company plans to repurchase the approximately \$7.1 million remaining under the authorization prior to the end of fiscal 2016, when this authorization expires.

On June 6, 2016, the Board of Directors approved a stock repurchase program under which the Company is authorized to repurchase up to \$150.0 million of its common stock beginning in fiscal 2017. We do not have a specific schedule or commitment for the repurchase of the shares and may repurchase shares, in amounts, at prices, and at such times that we deem appropriate, subject to market conditions and other considerations.

Table of Contents

On July 5, 2016, we amended the Credit Agreement, increasing the maximum commitment under the Credit Facility from \$265 million to \$300 million, providing a potential additional \$200 million increase in borrowing capacity to \$500 million with the approval of the lenders, and extending the termination date of the facility to July 5, 2021. Prior to its amendment, borrowings under the Credit Facility, at the Company's option, bore interest at a defined base rate or the LIBOR rate plus, in each case, an applicable margin based upon the Company's leverage ratio as defined in the related Credit Agreement. As of July 2, 2016, the borrowing rate under the Credit Agreement was LIBOR plus 1.125% (or 1.588%). As of July 2, 2016, the \$75.0 million of outstanding debt under the Credit Facility is effectively at a fixed interest rate as a result of a \$75.0 million notional amount of interest rate swap contracts discussed in Note 4, "Derivatives and Fair Value Measurements," in Notes to Condensed Consolidated Financial Statements. The Company is required to pay an annual commitment fee on the daily unused revolver credit commitment based on the Company's leverage ratio; the fee was 0.175% as of July 2, 2016. For further information regarding the Credit Facility and its amendment, see Note 3, "Debt, Capital Lease Obligations and Other Financing," and Note 14, "Subsequent Events" in Notes to Condensed Consolidated Financial Statements.

The financial covenants under the Credit Agreement require, among other covenants, that the Company maintain, as of each fiscal quarter end, a maximum total leverage ratio and a minimum interest coverage ratio. As of July 2, 2016, the Company was in compliance with all financial covenants of the Credit Agreement.

In fiscal 2011, Plexus issued \$175.0 million in principal amount of 5.20% Senior Notes, due on June 15, 2018 (the "Notes"). The related Note Purchase Agreement contains certain financial covenants, which include a maximum total leverage ratio, a minimum interest coverage ratio and a minimum net worth test, all as defined in the agreement. As of July 2, 2016, the Company was in compliance with all such covenants relating to the Notes and the Note Purchase Agreement. On July 5, 2016, we amended the Note Purchase Agreement; refer to Note 14, "Subsequent Events," for further information on the amendment to the Note Purchase Agreement.

The Credit Agreement and the Note Purchase Agreement allow for the future payment of cash dividends or the repurchase of shares provided that no event of default (including any failure to comply with a financial covenant) exists at the time of, or would be caused by, the dividend payment or the share repurchases. We have not paid cash dividends in the past and do not currently anticipate paying them in the future. However, we evaluate from time to time potential uses of excess cash, which in the future may include share repurchases above those already authorized, a special dividend or recurring dividends.

Based on current expectations, we believe that our projected cash flows provided by operations, available cash and cash equivalents, potential borrowings under the Credit Facility, and our leasing capabilities, should be sufficient to meet our working capital and fixed capital requirements for the next twelve months. If our future financing needs increase, we may need to arrange additional debt or equity financing. Accordingly, we evaluate and consider from time to time various financing alternatives to supplement our financial resources. However, we cannot be assured that we will be able to make any such arrangements on acceptable terms.

Table of Contents**CONTRACTUAL OBLIGATIONS, COMMITMENTS AND OFF-BALANCE SHEET OBLIGATIONS**

Our disclosures regarding contractual obligations and commercial commitments are located in various parts of our regulatory filings. Information in the following table provides a summary of our contractual obligations and commercial commitments as of July 2, 2016 (dollars in millions):

Contractual Obligations	Payments Due by Fiscal Year				
	Total	Remaining 2016	2017-2018	2019-2020	2021 and thereafter
Long-Term Debt Obligations (1,2)	\$271.9	\$ 3.0	\$ 192.9	\$ 76.0	\$ —
Capital Lease Obligations	3.2	0.8	2.2	0.2	—
Operating Lease Obligations	30.2	2.0	14.4	10.6	3.2
Purchase Obligations (3)	460.1	351.5	107.4	1.1	0.1
Other Long-Term Liabilities on the Balance Sheet (4)	10.7	0.4	0.5	0.2	9.6
Other Long-Term Liabilities not on the Balance Sheet (5)	6.8	0.8	4.0	1.1	0.9
Other Financing Obligations (6)	13.3	0.4	3.0	3.2	6.7
Total Contractual Cash Obligations	\$796.2	\$ 358.9	\$ 324.4	\$ 92.4	\$ 20.5

1) Includes amounts outstanding under the Credit Facility. As of July 2, 2016, the outstanding balance was \$75.0 million. The amounts listed above include estimated interest obligations; see Note 3, "Debt, Capital Lease Obligations and Other Financing," and Note 14, "Subsequent Events," in Notes to Condensed Consolidated Financial Statements for further information.

2) Includes \$175.0 million in principal amount of the Notes. The amounts listed above include estimated interest obligations; see Note 3, "Debt, Capital Lease Obligations and Other Financing," in Notes to Condensed Consolidated Financial Statements for further information.

3) As of July 2, 2016, purchase obligations consist of commitments to purchase inventory and equipment in the ordinary course of business.

4) As of July 2, 2016, other long-term obligations on the balance sheet included deferred compensation obligations to certain of our former and current executive officers, as well as other key employees, and asset retirement obligations. We have excluded from the above table the impact of approximately \$2.4 million, as of July 2, 2016, related to unrecognized income tax benefits. The Company cannot make reliable estimates of the future cash flows by period related to this obligation.

5) As of July 2, 2016, other long-term obligations not on the balance sheet consisted of guarantees and a commitment for salary continuation and certain benefits in the event employment of one executive officer of the Company is terminated without cause. Excluded from the amounts disclosed are certain bonus and incentive compensation amounts, which would be paid on a prorated basis in the year of termination.

6) Includes future minimum payments under the lease agreement for our Guadalajara, Mexico facility. Excludes \$20.3 million of future minimum payments under renewal options from 2025 through 2034.

DISCLOSURE ABOUT CRITICAL ACCOUNTING POLICIES

Our critical accounting policies are disclosed in our 2015 annual report on Form 10-K. During the third quarter of fiscal 2016, there were no material changes to these policies.

NEW ACCOUNTING PRONOUNCEMENTS

See Note 13, "New Accounting Pronouncements," in Notes to Condensed Consolidated Financial Statements for further information regarding new accounting pronouncements.

Table of Contents

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We are exposed to market risk from changes in foreign exchange and interest rates. We selectively use financial instruments to reduce such risks.

Foreign Currency Risk

We do not use derivative financial instruments for speculative purposes. Our policy is to selectively hedge our foreign currency denominated transactions in a manner that partially offsets the effects of changes in foreign currency exchange rates. We typically use foreign currency contracts to hedge only those currency exposures associated with certain assets and liabilities denominated in non-functional currencies. Corresponding gains and losses on the underlying transaction generally offset the gains and losses on these foreign currency hedges. Our international operations create potential foreign exchange risk.

Our percentages of transactions denominated in currencies other than the U.S. dollar for the indicated periods were as follows:

	Three Months	
	Ended	
	July 2, 2016	July 4, 2015
Net sales	7.2 %	7.4 %
Total costs	12.7 %	12.2 %

The Company has evaluated the potential foreign currency exchange rate risk on transactions denominated in currencies other than the U.S. dollar for the periods presented above. Based on the Company's overall currency exposure, as of July 2, 2016, a 10.0 percent change in the value of the U.S. dollar relative to our other transactional currencies would not have a material effect on the Company's financial position, results of operations, or cash flows. We will continue to monitor developments related to the Brexit and their potential impact on the Company.

Interest Rate Risk

We have financial instruments, including cash equivalents and debt, which are sensitive to changes in interest rates. We consider the use of interest rate swaps based on existing market conditions and have entered into interest rate swaps for our revolving credit facility. For more information, refer to Note 4, "Derivatives and Fair Value Measurements," in Notes to Condensed Consolidated Financial Statements. Interest rate swap agreements are subject to the further risk that the counterparties to these agreements may fail to comply with their obligations thereunder. The primary objective of our investment activities is to preserve principal, while maximizing yields without significantly increasing market risk. To achieve this, we maintain our portfolio of cash equivalents in a variety of highly rated securities, money market funds and certificates of deposit, and limit the amount of principal exposure to any one issuer.

As of July 2, 2016, our only material interest rate risk is associated with our Credit Facility. Through the use of an interest rate swap, as described above, we fixed the basis on which we pay interest, and the borrowings under the Note Purchase Agreement are based on a fixed interest rate, thus mitigating much of our interest rate risk.

ITEM 4. CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

The Company maintains disclosure controls and procedures designed to ensure that the information the Company must disclose in its filings with the Securities and Exchange Commission (“SEC”) is recorded, processed, summarized and reported on a timely basis. The Company’s principal executive officer and principal financial officer have reviewed and evaluated, with the participation of the Company’s management, the Company’s disclosure controls and procedures as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the “Exchange Act”) as of the end of the period covered by this report (the “Evaluation Date”). Based on such evaluation, the chief executive officer and chief financial officer have concluded that, as of the Evaluation Date, the Company’s disclosure controls and procedures are effective (a) in recording, processing, summarizing and reporting, on a timely basis, information required to be disclosed by the Company in the reports the Company files or submits under the Exchange Act, and (b) in assuring that information is accumulated and communicated to the Company’s management, including the chief executive officer and chief financial officer, as appropriate to allow timely decisions regarding required disclosure.

Changes in Internal Control Over Financial Reporting

During the third quarter of fiscal 2016, there have been no changes to the Company’s internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) that have materially affected, or are reasonably likely to materially affect, the Company’s internal control over financial reporting.

Limitations on the Effectiveness of Controls

Our management, including our chief executive officer and chief financial officer, does not expect that our disclosure controls and internal controls will prevent all errors and all fraud. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty, and that breakdowns can occur because of simple errors or mistakes. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the control. The design of any system of controls also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions; over time, a control may become inadequate because of changes in conditions, or the degree of compliance with the policies or procedures may deteriorate. Because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and not be detected.

Notwithstanding the foregoing limitations on the effectiveness of controls, we have nonetheless reached the conclusion that the Company’s disclosure controls and procedures and internal control over financial reporting are effective at the reasonable assurance level.

PART II. OTHER INFORMATION

ITEM 1A. Risk Factors

In addition to the risks and uncertainties discussed herein, particularly those discussed in the "Safe Harbor" Cautionary Statement and "Management's Discussion and Analysis of Financial Condition and Results of Operations" in Part I, Item 2, see the risk factors set forth in Part I, Item 1A of our annual report on Form 10-K for the fiscal year ended October 3, 2015.

ITEM 2. Unregistered Sales Of Equity Securities and Use Of Proceeds

The following table provides the specified information about the repurchases of shares by the Company during the three months ended July 2, 2016.

Period	Total number of shares purchased	Average price paid per share	Total number of shares purchased as part of publicly announced plans or programs	Maximum approximate dollar value of shares that may yet be purchased under the plans or programs*
April 3, 2016 to April 30, 2016	52,125	\$ 39.54	52,125	\$12,201,384
May 1, 2016 to May 28, 2016	57,510	\$ 42.32	57,510	\$9,767,641
May 29, 2016 to July 2, 2016	60,720	\$ 44.17	60,720	\$157,085,773
Total	170,355	\$ 42.13	170,355	

* On August 20, 2015, the Board of Directors approved a stock repurchase program under which the Company is authorized to repurchase up to \$30.0 million of its common stock in fiscal 2016. During the three months ended July 2, 2016, the Company repurchased 170,355 shares for approximately \$7.2 million, at an average price of \$42.13 per share. These shares were recorded as treasury stock. On June 6, 2016, the Board of Directors approved an additional stock repurchase program under which the Company is authorized to repurchase up to \$150.0 million of its common stock beginning in fiscal 2017.
