Salisbury Bancorp, Inc. and Subsidiary

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1 - BASIS OF PRESENTATION

The interim (unaudited) consolidated financial statements of Salisbury Bancorp, Inc. ("Salisbury") include those of Salisbury and its wholly owned subsidiary, Salisbury Bank and Trust Company (the "Bank"). In the opinion of management, the interim unaudited consolidated financial statements include all adjustments (consisting of normal recurring adjustments) necessary to present fairly the financial position of Salisbury and the consolidated statements of income, comprehensive income, shareholders' equity and cash flows for the interim periods presented.

The financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America. In preparing the financial statements, management is required to make extensive use of estimates and assumptions that affect the reported amounts of assets and liabilities as of the date of the statement of condition, and revenues and expenses for the period. Actual results could differ significantly from those estimates. Material estimates that are particularly susceptible to significant change in the near term relate to the determination of the allowance for loan losses, expected cash flows from loans acquired in a business combination, other-than-temporary impairment of securities and impairment of goodwill and intangibles.

Certain financial information, which is normally included in financial statements prepared in accordance with generally accepted accounting principles, but which is not required for interim reporting purposes, has been condensed or omitted. Operating results for the interim period ended March 31, 2017 are not necessarily indicative of the results that may be expected for the year ending December 31, 2017. The accompanying condensed financial statements should be read in conjunction with the financial statements and notes thereto included in Salisbury's 2016 Annual Report on Form 10-K for the year ended December 31, 2016.

The allowance for loan losses is a significant accounting policy and is presented in the Notes to Consolidated Financial Statements and in Management's Discussion and Analysis, which provides information on how significant assets are valued in the financial statements and how those values are determined. Based on the valuation techniques used and the sensitivity of financial statement amounts to the methods, assumptions and estimates underlying those amounts, management has identified the determination of the allowance for loan losses to be the accounting area that requires the most subjective judgments, and as such could be most subject to revision as new information becomes available.

Impact of New Accounting Pronouncements Issued

In May 2014, August 2015, May 2016, and December 2016, respectively, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") 2014-09, 2015-14, 2016-12, and 2016-20, "Revenue from Contracts with Customers (Topic 606)." The objective of ASU 2014-09 is to clarify principles for recognizing revenue and to develop a common revenue standard for GAAP and International Financial Reporting Standards. The guidance in ASU 2014-09 affects any entity that either enters into contracts with customers to transfer goods or services or enters into contracts for the transfer of nonfinancial assets unless those contracts are within the scope of other standards. The core principal of the guidance is that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. For public entities, the amendments in ASU 2015-14 defer the effective date of ASU 2014-09 to interim and annual reporting periods beginning after December 15, 2017. Early adoption is permitted, but not before the original effective date (i.e. interim and annual reporting periods beginning after December 15, 2016). The amendments in ASU 2016-12 do not change the core principle of the guidance in Topic 606, but rather affect only certain narrow aspects aimed to reduce the potential for diversity in practice at initial

application and the cost and complexity of applying Topic 606 both at transition and on an ongoing basis. The amendments in ASU 2016-20 include technical corrections and improvements to Topic 606 and other Topics amended by ASU 2014-09 to increase stakeholders' awareness of the proposals and to expedite improvements to ASU 2014-09. Salisbury is currently reviewing ASU 2014-09, 2015-14, 2016-12, and 2016-20 to determine if they will have an impact on its consolidated financial statements.

In January 2016, the FASB issued ASU No. 2016-01, Financial Instruments – overall (subtopic 825-10): "Recognition and Measurement of Financial Assets and Financial Liabilities." This ASU addresses certain aspects of recognition, measurement, presentation, and disclosure of financial instruments by making targeted improvements to GAAP as follows: (1) require equity investments (except those accounted for under the equity method of accounting or those that result in consolidation of the investee) to be measured at fair value with changes in fair value recognized in net income. However, an entity may choose to measure equity investments that do not have readily determinable fair values at cost minus impairment, if any, plus or minus changes resulting from observable price changes in orderly transactions for the identical or a similar investment of the same issuer; (2) simplify the impairment assessment of equity investments without readily determinable fair values by requiring a qualitative assessment to identify impairment. When a qualitative assessment indicates that impairment exists, an entity is required to measure the investment at fair value; (3) eliminate the requirement to disclose the fair value of financial instruments measured at amortized cost for entities that are not public business entities; (4) eliminate the requirement for public business entities to disclose the method(s) and significant assumptions used to estimate the fair value that is required to be disclosed for financial instruments measured at amortized cost on the balance sheet; (5) require public business entities to use the exit price notion when measuring the fair value of financial instruments for disclosure purposes; (6) require an entity to present separately in other comprehensive income the portion of the total change in the fair value of a liability resulting from a change in the instrument-specific credit risk when the entity has elected to measure the liability at fair value in accordance with the fair value option for financial instruments; (7) require separate presentation of financial assets and financial liabilities by measurement category and form of financial asset (that is, securities or loans and receivables) on the balance sheet or the accompanying notes to the financial statements; and (8) clarify that an entity should evaluate the need for a valuation allowance on a deferred tax asset related to available-for-sale securities in combination with the entity's other deferred tax assets. ASU No. 2016-01 is effective for interim and annual reporting periods beginning after December 15, 2017. Early application is permitted as of the beginning of the fiscal year of adoption only for provisions (3) and (6) above. Early adoption of the other provisions mentioned above is not permitted. Salisbury does not expect ASU No. 2016-01 to have a material impact on the Company's Consolidated Financial Statements; however, the Company will continue to closely monitor developments and additional guidance.

In February 2016, the FASB issued ASU 2016-02, "Leases (Topic 842)". Under the new guidance, lessees will be required to recognize the following for all leases (with the exception of short-term leases): 1) a lease liability, which is the present value of a lessee's obligation to make lease payments, and 2) a right-of-use asset, which is an asset that represents the lessee's right to use, or control the use of, a specified asset for the lease term. Lessor accounting under the new guidance remains largely unchanged as it is substantially equivalent to existing guidance for sales-type leases, direct financing leases, and operating leases. Leveraged leases have been eliminated, although lessors can continue to account for existing leveraged leases using the current accounting guidance. Other limited changes were made to align lessor accounting with the lessee accounting model and the new revenue recognition standard. All entities will classify leases to determine how to recognize lease-related revenue and expense. Quantitative and qualitative disclosures will be required by lessees and lessors to meet the objective of enabling users of financial statements to assess the amount, timing, and uncertainty of cash flows arising from leases. The intention is to require enough information to supplement the amounts recorded in the financial statements so that users can understand more about the nature of an entity's leasing activities. ASU 2016-02 is effective for interim and annual reporting periods beginning after December 15, 2018; early adoption is permitted. All entities are required to use a modified retrospective approach for leases that exist or are entered into after the beginning of the earliest comparative period in the financial statements. They have the option to use certain relief; full retrospective application is prohibited. Salisbury is currently evaluating this ASU to determine the impact on its consolidated financial statements.

In March 2016, the FASB issued ASU 2016-09, “Compensation—Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting.” This ASU includes provisions intended to simplify various aspects related to how share-based payments are accounted for and presented in the financial statements. Some of the key provisions of this new ASU include: (1) companies will no longer record excess tax benefits and certain tax deficiencies in additional paid-in capital (“APIC”). Instead, they will record all excess tax benefits and tax deficiencies as income tax expense or benefit in the income statement, and APIC pools will be eliminated. The guidance also eliminates the requirement that excess tax benefits be realized before companies can recognize them. In addition, the guidance requires companies to present excess tax benefits as an operating activity on the statement of cash flows rather than as a financing activity; (2) increase the amount an employer can withhold to cover income taxes on awards and still qualify for the exception to liability classification for shares used to satisfy the employer’s statutory income tax withholding obligation. The new guidance will also require an employer to classify the cash paid to a tax authority when shares are withheld to satisfy its statutory income tax withholding obligation as a financing activity on its statement of cash flows (current guidance did not specify how these cash flows should be classified); and (3) permit companies to make an accounting policy election for the impact of forfeitures on the recognition of expense for share-based payment awards. Forfeitures can be estimated, as required today, or recognized when they occur. ASU 2016-09 is effective for interim and annual reporting periods beginning after December 15, 2016. Early adoption is permitted, but all of the guidance must be adopted in the same period. Adoption of ASU 2016-09 did not have a material effect on the financial results for the first quarter of 2017.

In June 2016, the FASB issued ASU 2016-13, “Financial Instruments – Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments,” which adds a new Topic 326 to the Codification and removes the thresholds that companies apply to measure credit losses on financial instruments measured at amortized cost, such as loans, receivables, and held-to-maturity debt securities. Under current U.S. GAAP, companies generally recognize credit losses when it is probable that the loss has been incurred. The revised guidance will remove all recognition thresholds and will require companies to recognize an allowance for credit losses for the difference between the amortized cost basis of a financial instrument and the amount of amortized cost that the company expects to collect over the instrument’s contractual life. ASU 2016-13 also amends the credit loss measurement guidance for available-for-sale debt securities and beneficial interests in securitized financial assets. The guidance in ASU 2016-13 is effective for “public business entities,” as defined, that are SEC filers for fiscal years and for interim periods with those fiscal years beginning after December 15, 2019. Early adoption is permitted as of the fiscal years beginning after December 15, 2018, including interim periods within those fiscal years. Salisbury is currently evaluating the provisions of ASU 2016-13 to determine the potential impact the new standard will have on Salisbury’s Consolidated Financial Statements.

In August 2016, the FASB issued ASU 2016-15, “Classification of Certain Cash Receipts and Cash Payments.” This ASU is intended to reduce diversity in practice in how eight particular transactions are classified in the statement of cash flows. ASU 2016-15 is effective for public business entities for fiscal years beginning after December 15, 2017 and interim periods within those years. Early adoption is permitted, provided that all of the amendments are adopted in the same period. Entities will be required to apply the guidance retrospectively. If it is impracticable to apply the guidance retrospectively for an issue, the amendments related to that issue would be applied prospectively. As this guidance only affects the classification within the statement of cash flows, ASU 2016-15 is not expected to have a material impact on Salisbury’s Consolidated Financial Statements.

In October 2016, the FASB issued ASU 2016-16, “Income Taxes (Topic 740): Intra-Entity Transfers of Assets Other Than Inventory.” This ASU is intended to simplify and improve the accounting for the income tax consequences of intra-entity transfers of assets other than inventory. Current GAAP prohibits the recognition of current and deferred income taxes for an intra-entity asset transfer until the asset has been sold to an outside party. Under the revised guidance, an entity should recognize the income tax consequences of an intra-entity transfer of an asset other than inventory when the transfer occurs. ASU 2016-16 is effective for annual reporting periods beginning after December 15, 2017, including interim reporting periods within those annual reporting periods. Early adoption is permitted for all

entities as of the beginning of an annual reporting period for which financial statements (interim or annual) have not been issued or made available for issuance. Entities will be required to apply on a modified retrospective basis through a cumulative-effect adjustment directly to retained earnings as of the beginning of the period of adoption. Salisbury is currently evaluating the provisions of ASU 2016-16 to determine the potential impact the new standard will have on Salisbury's Consolidated Financial Statements.

In January 2017, the FASB issued ASU 2017-01, “Business Combinations (Topic 805): Clarifying the Definition of a Business.” The amendments in this ASU are intended to add guidance to assist entities with evaluating whether transactions should be accounted for as acquisitions (or disposals) of assets or businesses. The amendments in this ASU provide a screen to determine when a set of input, processes, and outputs is not a business and provides a framework to assist entities in evaluating whether both an input and a substantive process are present. ASU 2017-01 is effective for public business entities for fiscal years beginning after December 15, 2017 and interim periods within those years. Early adoption is permitted for transactions for which the acquisition date occurs before the issuance date or effective date of the amendments, only when the transaction has not been reported in financial statements that have been issued or made available for issuance, or for transactions in which a subsidiary is deconsolidated or a group of assets is derecognized that occur before the issuance date or effective date of the amendments, only when the transaction has not been reported in financial statements that have been issued or made available for issuance. Entities should apply the guidance prospectively on or after the effective date. Salisbury is currently evaluating the provisions of ASU 2017-01 to determine the potential impact the new standard will have on Salisbury’s Consolidated Financial Statements.

In January 2017, the FASB issued ASU 2017-04, “Intangibles—Goodwill and Other (Topic 350): Simplifying the Test for Goodwill Impairment.” This ASU is intended to allow companies to simplify how an entity is required to test goodwill for impairment by eliminating Step 2 from the goodwill impairment test. Step 2 measures a goodwill impairment loss by comparing the implied fair value of a reporting unit’s goodwill with the carrying amount of that goodwill. Under the new guidance, an entity should perform its annual, or interim, goodwill impairment test by comparing the fair value of a reporting unit with its carrying amount. An entity should recognize an impairment charge for the amount by which the carrying amount exceeds the reporting unit’s fair value; however, the loss recognized should not exceed the total amount of goodwill allocated to that reporting unit. Additionally, an entity should consider income tax effects from any tax deductible goodwill on the carrying amount of the reporting unit when measuring the goodwill impairment loss, if applicable. An entity still has the option to perform the qualitative assessment for a reporting unit to determine if the quantitative impairment test is necessary. ASU 2017-04 is effective for public business entities that are SEC filers for fiscal years beginning after December 15, 2019 and interim periods within those years. Early adoption is permitted for interim or annual goodwill impairment tests performed on testing dates after January 1, 2017. Entities should apply the guidance prospectively. Salisbury is currently evaluating the provisions of ASU 2017-04 to determine the potential impact the new standard will have on Salisbury’s Consolidated Financial Statements.

In February 2017, the FASB issued ASU 2017-05, “Other Income—Gains and Losses from the Derecognition of Nonfinancial Assets (Subtopic 610-20).” This ASU is intended to clarify the scope of Subtopic 610-20 and to add guidance for partial sales of nonfinancial assets. ASU 2017-05 is effective for public entities for fiscal years beginning after December 15, 2017 and interim periods within those years. Early adoption is permitted for annual reporting periods beginning after December 15, 2016, including interim reporting periods within that reporting period. Entities may apply the guidance either retrospectively or modified retrospectively. Salisbury is currently evaluating the provisions of ASU 2017-05 to determine the potential impact the new standard will have on Salisbury’s Consolidated Financial Statements.

In March 2017, the FASB issued ASU 2017-07, “Compensation—Retirement Benefits (Topic 715): Improving the Presentation of Net Periodic Pension Cost and Net Periodic Postretirement Benefit Cost.” This ASU is intended to improve the presentation of net periodic pension cost and net periodic postretirement benefit cost and provide additional guidance on the presentation of net benefit cost in the income statement and on the components eligible for capitalization in assets. The amendments in this Update require that an employer report the service cost component in the same line item or items as other compensation costs arising from services rendered by the pertinent employees during the period. The amendments require that an employer disaggregate the service cost component from the other components of net benefit cost. ASU 2017-07 is effective for public business entities for annual periods beginning after December 15, 2017, including interim periods within those annual periods. Early adoption is permitted as of the

beginning of an annual period for which financial statements (interim or annual) have not been issued or made available for issuance. Entities should apply the guidance retrospectively. Salisbury is currently evaluating the provisions of ASU 2017-07 to determine the potential impact the new standard will have on Salisbury's Consolidated Financial Statements.

In March 2017, the FASB issued ASU 2017-08, "Receivables—Nonrefundable Fees and Other Costs (Subtopic 310-20): Premium Amortization on Purchased Callable Debt Securities." This ASU will amend the amortization period for certain purchased callable debt securities held at a premium. The Board is shortening the amortization period for the premium to the earliest call date. Under current generally accepted accounting principles, entities generally amortize the premium as an adjustment of yield over the contractual life of the instrument. ASU 2017-08 is effective for public business entities for annual periods beginning after December 15, 2018, including interim periods within those annual periods. Early adoption is permitted, including adoption in an interim period. Entities should apply the guidance on a modified retrospective basis through a cumulative-effect adjustment directly to retained earnings as of the beginning of the period of adoption. Salisbury is currently evaluating the provisions of ASU 2017-08 to determine the potential impact the new standard will have on Salisbury's Consolidated Financial Statements.

NOTE 2 - SECURITIES

The composition of securities is as follows:

| (in thousands) | Amortized cost basis (1) | Gross un- realized gains | Gross un- realized losses | Fair Value |
|---|--------------------------------|-----------------------------------|------------------------------------|---------------|
| March 31, 2017 | | | | |
| Available-for-sale | | | | |
| Municipal bonds | \$ 12,816 | \$ 137 | \$ — | \$ 12,953 |
| Mortgage-backed securities: | | | | |
| U.S. Government agencies and U.S. Government- sponsored enterprises | 49,217 | 221 | 229 | 49,209 |
| Collateralized mortgage obligations: | | | | |

(1) Net of other-than-temporary impairment write-downs recognized in earnings.

Salisbury did not sell any available-for-sale securities during the three month periods ended March 31, 2017 and March 31, 2016.

Edgar Filing: SALISBURY BANCORP INC - Form 10-Q

The following table summarizes, for all securities in an unrealized loss position, including debt securities for which a portion of other-than-temporary impairment (OTTI) has been recognized in other comprehensive loss, the aggregate fair value and gross unrealized loss of securities that have been in a continuous unrealized loss position as of the date presented:

| March 31, 2017 (in thousands) | Less than 12 Months | | 12 Months or Longer | | Total | |
|---------------------------------------|---------------------|-------------------|---------------------|-------------------|------------|-------------------|
| | Fair value | Unrealized losses | Fair value | Unrealized losses | Fair value | Unrealized losses |
| Available-for-sale | | | | | | |
| Mortgage-backed securities | \$ 30,690 | \$ 223 | \$ 246 | \$ 6 | \$ 30,936 | \$ 229 |
| Collateralized mortgage obligations: | | | | | | |
| Non-agency | 44 | 5 | 305 | 4 | 349 | 9 |
| SBA bonds | 348 | 1 | 74 | — | 422 | 1 |
| CRA funds | 822 | 16 | — | — | 822 | 16 |
| Total temporarily impaired securities | \$ 31,904 | \$ 245 | \$ 625 | \$ 10 | \$ 32,529 | \$ 255 |

At March 31, 2017 there were no other than temporarily impaired securities with unrealized losses.

| December 31, 2016 (in thousands) | Less than 12 Months | | 12 Months or Longer | | Total | |
|---|---------------------|-------------------|---------------------|-------------------|------------|-------------------|
| | Fair value | Unrealized losses | Fair value | Unrealized losses | Fair value | Unrealized losses |
| Available-for-sale | | | | | | |
| Municipal bonds | \$517 | \$ 1 | \$— | \$ — | \$517 | \$ 1 |
| Mortgage-backed securities | 34,758 | 329 | 249 | 6 | 35,007 | 335 |
| Collateralized mortgage obligations | | | | | | |
| Non-agency | 60 | — | 339 | 5 | 399 | 5 |
| SBA bonds | 475 | 1 | — | — | 475 | 1 |
| CRA mutual funds | 818 | 16 | — | — | 818 | 16 |
| Corporate bonds | 498 | 3 | — | — | 498 | 3 |
| Total temporarily impaired securities | 37,126 | 350 | 588 | 11 | 37,714 | 361 |
| Other-than-temporarily impaired securities | | | | | | |
| Collateralized mortgage obligations | | | | | | |
| Non-agency | 174 | 1 | — | — | 174 | 1 |
| Total temporarily impaired and other-than-temporarily impaired securities | \$37,300 | \$ 351 | \$588 | \$ 11 | \$37,888 | \$ 362 |

The amortized cost, fair value and tax equivalent yield of securities, by maturity, are as follows:

| March 31, 2017 (in thousands) | Maturity | Amortized cost | Fair value | Yield(1) |
|-------------------------------|--|----------------|------------|----------|
| Municipal bonds | Within 1 year | \$75 | \$75 | 4.92 % |
| | After 1 year but within 5 years | 869 | 873 | 5.48 |
| | After 10 years but within 15 years | 4,478 | 4,522 | 6.64 |
| | After 15 years | 7,394 | 7,483 | 6.73 |
| | Total | 12,816 | 12,953 | 6.61 |
| Mortgage-backed securities | U.S. Government agency and U.S. Government-sponsored enterprises | 49,217 | 49,209 | 2.35 |

Edgar Filing: SALISBURY BANCORP INC - Form 10-Q

| | | | | |
|-------------------------------------|--|-----------|-----------|--------|
| Collateralized mortgage obligations | U.S. Government agency and U.S. Government-sponsored enterprises | 6,360 | 6,363 | 2.64 |
| | Non-agency | 2,997 | 3,407 | 4.04 |

| CRA mutual funds | | 838 | 822 | 4.51 |
| Corporate bonds | After 5 years but within 10 years | 2,000 | 2,041 | 5.50 |
| Preferred stock | | 7 | 172 | 0.00 |
| Securities available-for-sale | | \$ 76,111 | \$ 76,849 | 3.29 % |

(1) Yield is based on amortized cost.

Salisbury evaluates securities for OTTI where the fair value of a security is less than its amortized cost basis at the balance sheet date. As part of this process, Salisbury considers whether it has the intent to sell each debt security and whether it is more likely than not that it will be required to sell the security before its anticipated recovery. If either of these conditions is met, Salisbury recognizes an OTTI charge to earnings equal to the entire difference between the security's amortized cost basis and its fair value at the balance sheet date. For securities that meet neither of these conditions, an analysis is performed to determine if any of these securities are at risk for OTTI.

The following summarizes, by security type, the basis for evaluating if the applicable securities were OTTI at March 31, 2017.

U.S. Government agency mortgage-backed securities: The contractual cash flows are guaranteed by U.S. government agencies and U.S. government-sponsored enterprises. Changes in fair values are a function of changes in investment spreads and interest rate movements and not changes in credit quality. Management expects to recover the entire amortized cost basis of these securities. Furthermore, Salisbury evaluates these securities for strategic fit and may reduce its position in these securities, although it is not more likely than not that Salisbury will be required to sell these securities before recovery of their cost basis, which may be maturity, and does not intend to sell these securities. Therefore, management does not consider the twenty securities with unrealized losses at March 31, 2017 to be OTTI.

SBA bonds: The contractual cash flows are guaranteed by the U.S. government. Changes in fair values are a function of changes in investment spreads and interest rate movements and not changes in credit quality since time of purchase. Management expects to recover the entire amortized cost basis of these securities. Furthermore, Salisbury evaluates these securities for strategic fit and may reduce its position in these securities, although it is not more likely than not that Salisbury will be required to sell these securities before recovery of their cost basis, which may be maturity, and does not intend to sell these securities. Therefore, management evaluated the impairment status of these debt securities, and concluded that the gross unrealized losses on two positions were temporary in nature and does not consider these investments to be other-than temporarily impaired at March 31, 2017.

Non-agency CMOs: Salisbury performed a detailed cash flow analysis of its non-agency CMOs at March 31, 2017, to assess whether any of the securities were OTTI. Salisbury uses cash flow forecasts for each security based on a variety of market driven assumptions and securitization terms, including prepayment speed, default or delinquency rate, and default severity for losses including interest, legal fees, property repairs, expenses and realtor fees, that, together with the loan amount are subtracted from collateral sales proceeds to determine severity. In 2009, Salisbury determined that five non-agency CMO securities reflected OTTI and recognized losses for deterioration in credit quality of \$1,128,000. Salisbury judged the four remaining securities not to have additional OTTI and all other CMO securities not to be OTTI as of March 31, 2017. It is possible that future loss assumptions could change necessitating Salisbury to recognize future OTTI for further deterioration in credit quality. Salisbury evaluates these securities for strategic fit and depending upon such factor could reduce its position in these securities, although it has no present intention to do so, and it is not more likely than not that Salisbury will be required to sell these securities before recovery of their cost basis.

CRA mutual funds consist of an investment in a fixed income mutual fund (\$822 thousand in total fair value and \$16 thousand in total unrealized losses as of March 31, 2017). The severity of the impairment (fair value is approximately 1.91% less than cost) and the duration of the impairment correlates with interest rates in 2017. Salisbury evaluated the near-term prospects of this fund in relation to the severity and duration of the impairment. Based on that evaluation, Salisbury does not consider this investment to be OTTI at March 31, 2017.

The following table presents activity related to credit losses recognized into earnings on the non-agency CMOs held by Salisbury for which a portion of an OTTI charge was recognized in accumulated other comprehensive income:

| Three months ended March 31 (in thousands) | 2017 | 2016 |
|--|------|------|
|--|------|------|

Edgar Filing: SALISBURY BANCORP INC - Form 10-Q

| | | |

| Balance, beginning of period | \$1,128 | \$1,128 |
| Credit component on debt securities in which OTTI was not previously recognized | — | — |
| Balance, end of period | \$1,128 | \$1,128 |

14

The Federal Home Loan Bank of Boston (FHLBB) is a cooperative that provides services, including funding in the form of advances, to its member banking institutions. As a requirement of membership, the Bank must own a minimum amount of FHLBB stock, calculated periodically based primarily on its level of borrowings from the FHLBB. No market exists for shares of the FHLBB and therefore, they are carried at par value. FHLBB stock may be redeemed at par value five years following termination of FHLBB membership, subject to limitations which may be imposed by the FHLBB or its regulator, the Federal Housing Finance Board, to maintain capital adequacy of the FHLBB. While the Bank currently has no intentions to terminate its FHLBB membership, the ability to redeem its investment in FHLBB stock would be subject to the conditions imposed by the FHLBB. Based on the capital adequacy and the liquidity position of the FHLBB, management believes there is no impairment related to the carrying amount of the Bank's FHLBB stock as of March 31, 2017. Deterioration of the FHLBB's capital levels may require the Bank to deem its restricted investment in FHLBB stock to be OTTI. If evidence of impairment exists in the future, the FHLBB stock would reflect fair value using either observable or unobservable inputs. The Bank will continue to monitor its investment in FHLBB stock.

NOTE 3 – LOANS

The composition of loans receivable and loans held-for-sale is as follows:

| (In thousands) | March 31, 2017 | | | December 31, 2016 | | |
|---|------------------------|----------------|-----------|---------------------|----------------|-----------|
| | Business Activities | Acquired Loans | Total | Business Activities | Acquired Loans | Total |
| | Residential 1-4 family | \$297,111 | \$6,016 | \$303,127 | \$295,030 | \$6,098 |

| Residential 1-4 family | \$53 | \$— | \$53 | \$— | \$— | \$— |

Concentrations of Credit Risk

Salisbury's loans consist primarily of residential and commercial real estate loans located principally in northwestern Connecticut, New York and Massachusetts towns, which constitute Salisbury's service area. Salisbury offers a broad range of loan and credit facilities to borrowers in its service area, including residential mortgage loans, commercial real estate loans, construction loans, working capital loans, equipment loans, and a variety of consumer loans, including home equity lines of credit, and installment and collateral loans. All residential and commercial mortgage loans are collateralized by first or second mortgages on real estate. The ability of single family residential and

consumer borrowers to honor their repayment commitments is generally dependent on the level of overall economic activity within the market area and real estate values. The ability of commercial borrowers to honor their repayment commitments is dependent on the general economy as well as the health of the real estate economic sector in Salisbury's market area.

Loan Credit Quality

The composition of loans receivable by risk rating grade is as follows:

Business Activities Loans

| (in thousands) | Pass | Special mention | Substandard | Doubtful | Loss | Total |
|--|-----------|--------------------|-------------|----------|------|-----------|
| March 31, 2017 | | | | | | |
| Residential 1-4 family | \$288,103 | \$6,112 | \$ 2,896 | \$ — | \$ — | \$297,111 |
| Residential 5+ multifamily | 7,928 | 1,849 | 161 | — | — | 9,938 |
| Construction of residential 1-4 family | 10,990 | — | — | — | — | 10,990 |

(1) The table above reflects the book, note and specific allowance as of March 31, 2016, while the average balances and income recognized are for the three months ended March 31, 2016.

As of March 31, 2017 and December 31, 2016 the recorded investment in residential mortgage loans collateralized by real estate that were in the process of foreclosure was \$1.0 million and \$2.1 million, respectively. At March 31, 2017 and December 31, 2016, the carrying amount of foreclosed residential real estate held as a result of obtaining physical possession amounted to \$3.5 million and \$3.6 million respectively.

NOTE 4 - MORTGAGE SERVICING RIGHTS

| (in thousands) | March 31, 2017 | December 31, 2016 |
|--|----------------|-------------------|
| Residential mortgage loans serviced for others | \$123,925 | \$125,243 |
| Fair value of mortgage servicing rights | 810 | 902 |

Changes in mortgage servicing rights are as follows:

| Three months ended March 31, (in thousands) | 2017 | 2016 |
|---|---------|--------|
| Mortgage Servicing Rights | | |
| Balance, beginning of period | \$339 | \$486 |
| Originated | 25 | 20 |
| Amortization (1) | (68) | (51) |
| Balance, end of period | \$296 | \$455 |
| Valuation Allowance | | |
| Balance, beginning of period | \$(23) | \$(3) |
| Increase in impairment reserve (1) | (2) | (20) |
| Balance, end of period | (25) | (23) |
| Mortgage servicing rights, net | \$271 | \$432 |

(1) Amortization expense and changes in the impairment reserve are recorded in mortgage servicing, net, in the consolidated statements of income.

NOTE 5 - PLEDGED ASSETS

| (in thousands) | March 31, 2017 | December 31, 2016 |
|---|----------------|-------------------|
| Securities available-for-sale (at fair value) | \$63,904 | \$63,833 |
| Loans receivable | 137,500 | 137,117 |
| Total pledged assets | \$201,404 | \$200,950 |

At March 31, 2017, securities were pledged as follows: \$58.4 million to secure public deposits, \$5.5 million to secure repurchase agreements and \$0.1 million to secure FHLBB advances. Additionally, loans receivable were pledged to secure FHLBB advances and credit facilities.

NOTE 6 – EARNINGS PER SHARE

The Company defines unvested share-based payment awards that contain non-forfeitable rights to dividends as participating securities that are included in computing earnings per share (EPS) using the two-class method.

The two-class method is an earnings allocation formula that determines earnings per share for each share of common stock and participating securities according to dividends declared and participation rights in undistributed earnings. Under this method, all earnings (distributed and undistributed) are allocated to common shares and participating securities based on their respective rights to receive dividends. Basic EPS excludes dilution and is computed by dividing income allocated to common shareholders by the weighted-average number of common shares outstanding for the period. Diluted EPS reflects the potential dilution that could occur if securities or other contracts to issue common stock were exercised or converted into common stock or resulted in the issuance of common stock that then shared in the earnings of the entity.

The following table sets forth the computation of earnings per share (basic and diluted) for the periods indicated:

| Three months ended March 31, (in thousands, except per share data) | 2017 | 2016 |
|--|---------|---------|
| Net income | \$1,604 | \$1,512 |
| Less: Undistributed earnings allocated to participating securities | (10) | (13) |
| Net income allocated to common stock | \$1,594 | \$1,499 |
| Weighted-average common shares issued | 2,765 | 2,747 |
| Less: Unvested restricted stock awards | (16) | (24) |
| Weighted average common shares outstanding used to calculate basic earnings per common share | 2,749 | 2,723 |
| Add: Dilutive effect of stock options | 19 | 18 |
| Weighted-average common shares outstanding used to calculate diluted earnings per common share | 2,768 | 2,741 |
| Earnings per common share (basic) | \$0.58 | \$0.55 |
| Earnings per common share (diluted) | \$0.58 | \$0.55 |

NOTE 7 – SHAREHOLDERS' EQUITY**Capital Requirements**

Salisbury and the Bank are subject to various regulatory capital requirements administered by the federal banking agencies. Failure to meet minimum capital requirements can initiate certain mandatory and possibly additional and discretionary actions by the regulators that, if undertaken, could have a direct material effect on Salisbury's and the Bank's financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, Salisbury and the Bank must meet specific guidelines that involve quantitative measures of their assets, liabilities, and certain off-balance sheet items as calculated under regulatory accounting practices. Salisbury and the Bank's capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weightings, and other factors.

In July 2013, the Federal Reserve Bank (FRB) approved the final rules implementing the Basel Committee on Banking Supervision's capital guidelines for bank holding companies and their bank subsidiaries. On July 9, 2013, the FDIC also approved, as an interim final rule, the regulatory capital requirements for U.S. banks, following the actions of the FRB. On April 8, 2014, the FDIC adopted as final its interim final rule, which is identical in substance to the final rules issued by the FRB in July 2013. Under the final rules, minimum requirements increased for both the quantity and quality of capital held by the Bank and Company. The rules include a common equity Tier 1 capital risk-weighted assets minimum ratio of 4.5%, minimum ratio of Tier 1 capital to risk-weighted assets of 6.0%, require a minimum ratio of Total capital to risk-weighted assets of 8.0%, and require a minimum Tier 1 leverage ratio of 4.0%. A capital conservation buffer, comprised of common equity Tier 1 capital, is also established above the regulatory minimum capital requirements. The initial implementation of the capital conservation buffer began phasing in January 1, 2016 at 0.625% of risk-weighted assets and increases each subsequent January 1, by an additional 0.625% until reaching its final level of 2.5% on January 1, 2019. As of March 31, 2017, the Bank exceeded the fully phased in regulatory requirement for the capital conservation buffer. Strict eligibility criteria for regulatory capital instruments were also implemented under the final rules.

Edgar Filing: SALISBURY BANCORP INC - Form 10-Q

Actual regulatory capital position and minimum capital requirements as defined "To Be Well Capitalized Under Prompt Corrective Action Provisions" and "For Capital Adequacy Purposes" for Salisbury and the Bank are as follows:

Cash Dividends to Common Shareholders

Salisbury's ability to pay cash dividends is substantially dependent on the Bank's ability to pay cash dividends to Salisbury. There are certain restrictions on the payment of cash dividends and other payments by the Bank to Salisbury. Under Connecticut law, the Bank cannot declare a cash dividend except from net profits, defined as the remainder of all earnings from current operations. The total of all cash dividends declared by the Bank in any calendar

year shall not, unless specifically approved by the Banking Commissioner, exceed the total of its net profits of that year combined with its retained net profits of the preceding two years.

FRB Supervisory Letter SR 09-4, February 24, 2009, revised March 30, 2009, notes that, as a general matter, the Board of Directors of a Bank Holding Company (“BHC”) should inform the Federal Reserve and should eliminate, defer, or significantly reduce dividends if (1) net income available to shareholders for the past four quarters, net of dividends previously paid during that period, is not sufficient to fully fund the dividends; (2) the prospective rate of earnings retention is not consistent with capital needs and overall current and prospective financial condition; or (3) the BHC will not meet, or is in danger of not meeting, its minimum regulatory capital adequacy ratios. Moreover, a BHC should inform the Federal Reserve reasonably in advance of declaring or paying a dividend that exceeds earnings for the period (e.g., quarter) for which the dividend is being paid or that could result in a material adverse change to the BHC capital structure.

NOTE 8 –BENEFITS

Salisbury's 401(k) Plan expense was \$285 thousand and \$216 thousand, respectively, for the three month periods ended March 31, 2017 and 2016. Other post-retirement benefit obligation expense for endorsement split-dollar life insurance arrangements was \$18 thousand and \$19 thousand for the three month periods ended March 31, 2017 and 2016, respectively.

ESOP

Salisbury offers an ESOP to eligible employees. Under the Plan, Salisbury may make discretionary contributions to the Plan, which generally vests in full upon six years of qualified service.

Salisbury's ESOP expense was \$34 thousand and \$36 thousand, respectively, for the three month periods ended March 31, 2017 and 2016.

Other Retirement Plans

A Non-Qualified Deferred Compensation Plan (the "Plan") was adopted effective January 1, 2013. This Plan was adopted by the Bank for the benefit of certain key employees ("Executive" or "Executives") who have been selected and approved by the Bank to participate in this Plan and who have evidenced their participation by execution of a Non-Qualified Deferred Compensation Plan Participation Agreement ("Participation Agreement") in a form provided by the Bank. This Plan is intended to comply with Internal Revenue Code ("Code") Section 409A and any regulatory or other guidance issued under such Section.

In 2017, 2016, 2015, and 2014, the Bank awarded nine (9), nine (9), six (6) and seven (7) Executives, respectively, with discretionary contributions to the plan. Expenses related to this plan amounted to \$21 thousand for the first quarter of 2017 and \$11 thousand for the first quarter of 2016. The vesting schedule is based on the Executive's date of retirement and ranges from 7.7% per year to 50% per year with two exceptions which are both 10 year cliff vesting schedules from the date of initial award.

On January 27, 2017, the Compensation Committee granted a total of 56,600 Phantom Stock Appreciation Units pursuant to the 2013 Phantom Stock Appreciation Unit and Long-Term Incentive Plan (the "Plan"), including 23,100 units to three Named Executive Officers. Mr. Cantele received 11,500 units, Mr. Davies received 6,000 units and Mr. White received 5,600 units. The units will vest on the third anniversary of the grant date.

On January 29, 2016, the Compensation Committee granted a total of 47,470 Phantom Stock Appreciation Units pursuant to the 2013 Phantom Stock Appreciation Unit and Long-Term Incentive Plan (the "Plan"), including 23,012 units to three Named Executive Officers. Mr. Cantele received 11,484 units, Mr. Davies received 5,963 units and Mr. White received 5,565 units. The units will vest on the third anniversary of the grant date.

On January 2, 2015, the Compensation Committee granted a total of 48,894 Phantom Stock Appreciation Units pursuant to the 2013 Phantom Stock Appreciation Unit and Long-Term Incentive Plan (the "Plan"), including 23,012 units to three Named Executive Officers. Mr. Cantele received 11,484 units, Mr. Davies received 5,963 units and Mr. White received 5,565 units. The units will vest on the third anniversary of the grant date.

Grants of Restricted Stock and Options

Restricted stock

On January 29, 2016, Salisbury granted a total of 15,800 shares of restricted stock pursuant to its 2011 Long Term Incentive Plan, which was approved by shareholders at the 2011 Annual Meeting, to 42 employees, including 6,000 shares to three Named Executive Officers. Richard J. Cantele, Jr., President and Chief Executive Officer received 5,000 and John Davies, President New York Region and Chief Lending Officer and Donald E. White, Chief Financial Officer each received 500 shares. The fair value of the stock as of the grant date was determined to be \$466,000 and the stock will be vested three years from the grant date.

Expense in first quarter 2017 and 2016 related to stock based compensation totaled \$61 thousand and \$47 thousand respectively. Unrecognized compensation cost relating to the awards as of March 31, 2017 and 2016 totaled \$288 thousand and \$529 thousand, respectively. Forfeitures in the first quarter 2017 and 2016 totaled 200 and 0 shares, respectively.

The Board of Directors adopted the 2017 Long Term Incentive Plan (the “2017 LTIP”) on February 24, 2017, which is subject to shareholder approval at the 2017 Annual Meeting. Upon shareholder approval of the 2017 LTIP, no further awards will be made under the 2011 LTIP, which shall remain in existence solely for purposes of administering outstanding grants. Under the 2017 LTIP, the total number of shares of Common Stock reserved and available for issuance in the next ten years in connection with awards under the 2017 LTIP is 200,000 shares of Common Stock, which represents approximately 7% of Salisbury’s 2,770,036 outstanding shares of Common Stock as of March 20, 2017. Of the maximum shares available under the 2017 LTIP, 200,000 shares may be issued upon the exercise of stock options (all of which may be granted as incentive stock options) and 150,000 shares may be issued as restricted stock or restricted stock units (including deferred stock units), provided that, to the extent that a share is issued as a restricted stock award or a restricted stock unit, the share would no longer be available for award as a stock option, unless the restricted stock award or restricted unit is forfeited or otherwise returned to the 2017 LTIP.

On April 28, 2017, Salisbury granted a total of 10,750 shares of restricted stock pursuant to its 2011 Long Term Incentive Plan, which was approved by shareholders at the 2011 Annual Meeting, to 37 employees, including 2,500 shares to two Named Executive Officers. Richard J. Cantele, Jr., President and Chief Executive Officer received 2,000 and John Davies, President New York Region and Chief Lending Officer received 500 shares. The fair value of the stock as of the grant date was determined to be \$419,250 and the stock will be vested three years from the grant date.

On April 28, 2017, Salisbury granted a total of 2,056 shares of stock to directors as a component of their annual compensation. While all directors received partial awards for their 2016 service, Louise Brown received her full award due to her pending retirement from the board. The fair value of the stock as of the grant date was determined to be \$80,184.

Options

On January 9, 2017, 2,700 shares of stock options were exercised at \$25.93 per share by one former Riverside Bank executive.

On February 1, 2017, 1,350 shares of stock options were exercised at \$25.93 per share by one former Riverside Bank executive.

On February 9, 2017, 1,350 shares of stock options were exercised at \$25.93 per share by one former Riverside Bank executive.

On February 14, 2017 and February 20, 2017, 5,400 and 1,350 shares of stock options were exercised, respectively, at \$25.93 per share by two former Riverside Bank executives.

NOTE 9 –ACCUMULATED OTHER COMPREHENSIVE INCOME

The components of accumulated other comprehensive income are as follows:

| (in thousands) | March 31, 2017 | December 31, 2016 |
|---|----------------|-------------------|
| Unrealized gains on securities available-for-sale, net of tax | \$487 | \$477 |
| Accumulated other comprehensive income, net | \$487 | \$477 |

NOTE 10 – FAIR VALUE OF ASSETS AND LIABILITIES

Salisbury uses fair value measurements to record fair value adjustments to certain assets and liabilities and to determine fair value disclosures. Securities available-for-sale are recorded at fair value on a recurring basis. Additionally, from time to time, other assets are recorded at fair value on a nonrecurring basis, such as loans held for

sale, collateral dependent impaired loans, property acquired through foreclosure or repossession and mortgage servicing rights. These nonrecurring fair value adjustments typically involve the application of lower-of-cost-or-market accounting or write-downs of individual assets.

Salisbury adopted ASC 820-10, "Fair Value Measurement - Overall," which provides a framework for measuring fair value under generally accepted accounting principles. This guidance permitted Salisbury the irrevocable option to elect fair value for the initial and subsequent measurement for certain financial assets and liabilities on a contract-by-contract basis. Salisbury did not elect fair value treatment for any financial assets or liabilities upon adoption.

In accordance with ASC 820-10, Salisbury groups its financial assets and financial liabilities measured at fair value in three levels based on the markets in which the assets and liabilities are traded and the reliability of the assumptions used to determine fair value.

GAAP specifies a hierarchy of valuation techniques based on whether the types of valuation information (“inputs”) are observable or unobservable. Observable inputs reflect market data obtained from independent sources, while unobservable inputs reflect Salisbury’s market assumptions. These two types of inputs have created the following fair value hierarchy:

Level 1. Quoted prices in active markets for identical assets. Valuations for assets and liabilities traded in active exchange markets, such as the New York Stock Exchange. Level 1 also includes U.S. Treasury, other U.S. Government and agency mortgage-backed securities that are traded by dealers or brokers in active markets. Valuations are obtained from readily available pricing sources for market transactions involving identical assets or liabilities.

Level 2. Significant other observable inputs. Valuations for assets and liabilities traded in less active dealer or broker markets. Valuations are obtained from third party pricing services for identical or comparable assets or liabilities.

Level 3. Significant unobservable inputs. Valuations for assets and liabilities that are derived from other methodologies, including option pricing models, discounted cash flow models and similar techniques, are not based on market exchange, dealer, or broker traded transactions. Level 3 valuations incorporate certain assumptions and projections in determining the fair value assigned to such assets and liabilities.

A financial instrument’s level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. Salisbury did not have any significant transfers of assets between levels 1 and 2 of the fair value hierarchy during the year ended March 31, 2017.

The following is a description of valuation methodologies for assets recorded at fair value, including the general classification of such assets and liabilities pursuant to the valuation hierarchy:

Securities available-for-sale. Securities available-for-sale are recorded at fair value on a recurring basis. Level 1 securities include exchange-traded equity securities. Level 2 securities include debt securities with quoted prices, which are traded less frequently than exchange-traded instruments, whose value is determined using matrix pricing with inputs that are observable in the market or can be derived principally from or corroborated by observable market data. This category generally includes obligations of the U.S. Treasury and U.S. government-sponsored enterprises, mortgage-backed securities, collateralized mortgage obligations, municipal bonds, SBA bonds, corporate bonds and certain preferred equities. Level 3 is for positions that are not traded in active markets or are subject to transfer restrictions, valuations are adjusted to reflect illiquidity and/or non-transferability, and such adjustments are generally based on available market evidence. In the absence of such evidence, management’s best estimate is used. Subsequent to inception, management only changes level 3 inputs and assumptions when corroborated by evidence such as transactions in similar instruments, completed or pending third-party transactions in the underlying investment or comparable entities, subsequent rounds of financing, recapitalization and other transactions across the capital structure, offerings in the equity or debt markets, and changes in financial ratios or cash flows.

Collateral dependent loans that are deemed to be impaired are valued based upon the fair value of the underlying collateral less costs to sell. Such collateral primarily consists of real estate and, to a lesser extent, other business assets. Management may adjust appraised values to reflect estimated market value declines or apply other discounts to appraised values resulting from its knowledge of the property. Internal valuations are utilized to determine the fair value of other business assets. Collateral dependent impaired loans are categorized as Level 3.

Other real estate owned acquired through foreclosure or repossession is adjusted to fair value less costs to sell upon transfer out of loans. Subsequently, it is carried at the lower of carrying value or fair value less costs to sell. Fair value is generally based upon independent market prices or appraised values of the collateral. Management adjusts appraised values to reflect estimated market value declines or apply other discounts to appraised values for unobservable factors resulting from its knowledge of the property, and such property is categorized as Level 3.

Assets measured at fair value are as follows:

| (in thousands) | Fair Value Measurements Using | | | Assets at fair value |
|--|-------------------------------|----------|---------|----------------------|
| | Level 1 | Level 2 | Level 3 | |
| March 31, 2017 | | | | |
| Assets at fair value on a recurring basis | | | | |
| Municipal bonds | \$— | \$12,953 | \$— | \$12,953 |
| Mortgage-backed securities: | | | | |
| U.S. Government agencies and U.S. Government-sponsored enterprises | — | 49,209 | — | 49,209 |
| Collateralized mortgage obligations: | | | | |
| U.S. Government agencies | — | 6,363 | — | 6,363 |
| Non-agency | — | 3,407 | — | 3,407 |
| SBA bonds | — | 1,882 | — | 1,882 |

The carrying amounts of financial instruments shown in the above table are included in the consolidated balance sheets under the indicated captions or are included in accrued interest and other liabilities.

NOTE 11 – SUBSEQUENT EVENTS

On April 28, 2017 the Board of Directors approved the 2017 Long Term Incentive Plan, which is subject to shareholder approval. Refer to Note 8 for additional discussion.

On April 28, 2017 the Board of Directors declared a dividend of \$0.28 per common share payable on May 26, 2017 to shareholders of record on May 12, 2017.

32

Item 2. **MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

Management's Discussion and Analysis of Financial Condition and Results of Operations of Salisbury Bancorp, Inc. ("Salisbury" or the "Company") and its subsidiary should be read in conjunction with Salisbury's Annual Report on Form 10-K for the year ended December 31, 2016. Readers should also review other disclosures Salisbury files from time to time with the Securities and Exchange Commission (the "SEC").

BUSINESS

Salisbury Bancorp, Inc., a Connecticut corporation, formed in 1998, is the bank holding company for Salisbury Bank and Trust Company (the "Bank"), a Connecticut-chartered and Federal Deposit Insurance Corporation (the "FDIC") insured commercial bank headquartered in Lakeville, Connecticut. Salisbury's common stock is traded on the NASDAQ Capital Market under the symbol "SAL." Salisbury's principal business consists of its operation and control of the business of the Bank.

The Bank, formed in 1848, currently provides commercial banking, consumer financing, retail banking and trust and wealth advisory services through a network of thirteen banking offices and nine ATMs located in: Litchfield County, Connecticut; Dutchess and Orange Counties, New York; and Berkshire County, Massachusetts and through its internet website (salisburybank.com). In September 2016, the Bank entered into a purchase and assumption agreement with Empire State Bank, pursuant to which the Bank will acquire the New Paltz, New York branch of Empire State Bank and certain related deposits, loans and other assets. Such transaction has been approved by regulators and is anticipated to close in June 2017.

Critical Accounting Policies and Estimates

Salisbury's consolidated financial statements follow GAAP as applied to the banking industry in which it operates. Application of these principles requires management to make estimates, assumptions and judgments that affect the amounts reported in the financial statements. These estimates, assumptions and judgments are based on information available as of the date of the financial statements; accordingly, as this information changes, the financial statements could reflect different estimates, assumptions and judgments and as such have a greater possibility of producing results that could be materially different than originally reported. Estimates, assumptions and judgments are necessary when assets and liabilities are required to be recorded at fair value, when a decline in the value of an asset not carried at fair value warrants an impairment write-down or valuation reserve to be established, or when an asset or liability needs to be recorded contingent upon a future event.

Salisbury's significant accounting policies are presented in Note 1 of Notes to Consolidated Financial Statements, which, along with this Management's Discussion and Analysis, provide information on how significant assets are valued in the financial statements and how those values are determined. Management believes that the following accounting estimates are the most critical to aid in fully understanding and evaluating Salisbury's reported financial results, and they require management's most difficult, subjective or complex judgments, resulting from the need to make estimates about the effect of matters that are inherently uncertain.

Loans acquired in business combinations are initially recorded at fair value with no carryover of the related allowance for credit losses. Determining the fair value of the loans involves estimating the amount and timing of cash flows initially expected to be collected and discounting those cash flows at an appropriate market rate of interest. The Bank continues to evaluate reasonableness of the timing and the amount of cash to be collected. Subsequent decreases in expected cash flows may result in changes in the amortization or accretion of fair market value adjustments, and in some cases may result in the loan being considered impaired. Such decreases may also result in recognition of additional provisions to the allowance for loan losses. For collateral dependent loans with deteriorated credit quality,

the Bank estimates the fair value of the underlying collateral of the loans. These values are discounted using market derived rates of return, with consideration given to the period of time and costs associated with the foreclosure and disposition of the collateral.

The allowance for loan losses represents management's estimate of credit losses inherent in the loan portfolio. Determining the amount of the allowance for loan losses is considered a critical accounting estimate because it requires significant judgment and the use of estimates related to the amount and timing of expected future cash flows on impaired loans, estimated losses on pools of homogeneous loans based on historical loss experience, and consideration of current economic trends and conditions, all of which may be susceptible to significant change. The loan portfolio also represents the largest asset type on the balance sheet. Note 1 describes the methodology used to determine the allowance for loan losses. A discussion of the factors driving changes in the amount of the allowance for loan losses is included in the "Provision and Allowance for Loan Losses" section of Management's Discussion and Analysis.

Management evaluates goodwill and identifiable intangible assets for impairment annually using valuation techniques that involve estimates for discount rates, projected future cash flows and time period calculations, all of which are susceptible to change based on changes in economic conditions and other factors. Future events or changes in the estimates, which are used to determine the carrying value of goodwill and identifiable intangible assets or which otherwise adversely affect their value or estimated lives could have a material adverse impact on the results of operations.

Management evaluates securities for other-than-temporary impairment giving consideration to the extent to which the fair value has been less than cost, estimates of future cash flows, delinquencies and default severity, and the intent and ability of Salisbury to retain its investment in the issuer for a period of time sufficient to allow for any anticipated recovery in fair value. The consideration of the above factors is subjective and involves estimates and assumptions about matters that are inherently uncertain. Should actual factors and conditions differ materially from those used by management, the actual realization of gains or losses on investment securities could differ materially from the amounts recorded in the financial statements.

FINANCIAL CONDITION

Overview

Total assets were \$939.5 million at March 31, 2017, an increase of \$4.2 million from December 31, 2016. Loans receivable, net, were \$764.7 million at March 31, 2017, an increase of \$1.5 million from December 31, 2016. Non-performing assets of \$10.9 million at March 31, 2017, decreased \$1.7 million from \$12.6 million at December 31, 2016. Reserve coverage, as measured by the ratio of the allowance for loan losses to gross loans, was 0.82%, 0.80% and 0.80%, at March 31, 2017, December 31, 2016 and March 31, 2016, respectively. Deposits decreased \$9.4 million to \$772.4 million, down from \$781.8 million at December 31, 2016.

At March 31, 2017, book value and tangible book value per common share were \$34.38 and \$29.26, respectively. Salisbury's tier 1 leverage, total risk-based capital, and common equity tier 1 capital ratios were 8.83%, 13.34%, and 11.10%, respectively.

Securities and Short Term Funds

During the first quarter of 2017, securities decreased \$2.5 million to \$80.4 million primarily as a result of a \$7.1 million decrease of mortgage backed securities and municipal bonds, partially offset by a \$4.6 million increase of collateralized mortgage obligations. Cash and cash equivalents (non-time interest-bearing deposits with other banks, money market funds and federal funds sold) increased \$5.8 million to \$41.3 million.

Salisbury evaluates securities for OTTI where the fair value of a security is less than its amortized cost basis at the balance sheet date. As part of this process, Salisbury considers its intent to sell each debt security and whether it is more likely than not that it will be required to sell the security before its anticipated recovery. If either of these conditions is met, Salisbury recognizes an OTTI charge to earnings equal to the entire difference between the security's amortized cost basis and its fair value at the balance sheet date. For securities that meet neither of these conditions, an analysis is performed to determine if any of these securities are at risk for OTTI.

Salisbury evaluates securities for strategic fit and may reduce its position in securities, although it is not more likely than not that Salisbury will be required to sell securities before recovery of their cost basis, which may be maturity. Therefore, management does not consider any of its securities, other than four non-agency CMO securities reflecting OTTI, to be OTTI at March 31, 2017. As of March 31, 2017 each of these positions reflected an unrealized gain.

Salisbury has, and continues to monitor, CMO securities where historical recognition of losses has occurred as a result of OTTI. Salisbury determined, as of March 31, 2017, that additional recognition of OTTI was not required. It is possible that future loss assumptions could change necessitating Salisbury to recognize future OTTI.

Loans

Net loans receivable increased \$1.5 million to \$764.7 million at March 31, 2017, compared with \$763.2 million at December 31, 2016.

Loan Credit Quality

During the first three months of 2017, non-performing assets decreased \$1.7 million primarily from decreases in Commercial (\$1.3 million) and Home Equity Loans (\$432 thousand) while OREO had a net increase of \$60 thousand

During the first quarter of 2017, total impaired and potential problem loans decreased by \$2.1 million to \$21.5 million, or 2.8% of gross loans receivable at March 31, 2017, from \$23.6 million, compared to 3.1% of gross loans receivable at December 31, 2016.

Changes in impaired and potential problem loans are as follows:

| Three months ended (in thousands) | March 31, 2017 | | | | March 31, 2016 | | | |
|---|-----------------------------------|----------|-------------------------------|-----------|-----------------------------------|----------|-------------------------------|---------|
| | Impaired loans Non- accrual | Accruing | Potential problem loans | Total | Impaired loans Non- accrual | Accruing | Potential problem loans | Total |
| Loans placed on non-accrual status | \$343 | \$— | \$— | \$343 | \$1,316 | \$(229) | \$(564) | \$523 |
| Loans restored to accrual status | (452) | — | — | (452) | — | — | — | — |
| Loan risk rating downgrades to substandard | — | — | 26 | 26 | — | — | 3,754 | 3,754 |
| Loan risk rating upgrades from substandard | — | — | — | — | — | — | — | — |
| Loan repayments | (1,028) | (95) | (502) | (1,625) | (492) | (46) | 15 | (523) |
| Loan charge-offs | (167) | — | — | (167) | (187) | — | (30) | (217) |
| Increase (decrease) in TDR loans | — | — | — | — | — | — | — | — |
| Real estate acquired in settlement of loans | (204) | — | — | (204) | — | — | — | — |
| Inter-month tax advances | — | — | — | — | 18 | — | — | 18 |
| Increase (decrease) in loans | \$(1,508) | \$(95) | \$(476) | \$(2,079) | \$655 | \$(275) | \$3,175 | \$3,555 |

During the first quarter of 2017, Salisbury placed \$343 thousand of loans on non-accrual status as a result of deteriorated payment and financial performance and charged-off \$277 thousand of loans primarily as a result of collateral deficiencies.

Salisbury has cooperative relationships with the vast majority of its non-performing loan customers. Substantially all non-performing loans are collateralized with real estate and the repayment of such loans is largely dependent on the return of such loans to performing status or the liquidation of the underlying real estate collateral. Salisbury pursues the resolution of all non-performing loans through collections, restructures, voluntary liquidation of collateral by the borrower and, where necessary, legal action. When attempts to work with a customer to return a loan to performing status, including restructuring the loan, are unsuccessful, Salisbury will initiate appropriate legal action seeking to acquire property by deed in lieu of foreclosure or through foreclosure, or to liquidate business assets.

Credit Quality Segments

Salisbury categorizes loans receivable into the following credit quality segments:

- Impaired loans consist of all non-accrual loans and troubled debt restructured loans, and represent loans for which it is probable that Salisbury will not be able to collect all principal and interest amounts due according to the contractual terms of the loan agreements.

- Non-accrual loans, a sub-set of impaired loans, are loans for which the accrual of interest has been discontinued because, in the opinion of management, full collection of principal or interest is unlikely.

- Non-performing loans consist of non-accrual loans, and accruing loans past due 90 days and over that are well collateralized, in the process of collection and where full collection of principal and interest is reasonably assured.

- Non-performing assets consist of non-performing loans plus real estate acquired in settlement of loans.

Troubled debt restructured loans are loans for which concessions such as reduction of interest rates, other than normal market rate adjustments, or deferral of principal or interest payments, extension of maturity dates, or reduction of principal balance or accrued interest, have been granted due to a borrower's financial condition. Loan restructuring is employed when management believes the granting of a concession will increase the probability of the full or partial collection of principal and interest.

Potential problem loans consist of performing loans that have been assigned a substandard credit risk rating and are not classified as impaired.

Credit Risk Ratings

Salisbury assigns credit risk ratings to loans receivable in order to manage credit risk and to determine the allowance for loan losses. Credit risk ratings categorize loans by common financial and structural characteristics that measure the credit strength of a borrower. Salisbury's rating model has eight risk rating grades, with each grade corresponding to a progressively greater risk of default. Grades 1 through 4 are pass ratings and 5 through 8 are ratings (special mention, substandard, doubtful, and loss) defined by the bank's regulatory agencies, the FDIC and CTDOB. Risk ratings are assigned to differentiate risk within the portfolio and are reviewed on an ongoing basis and revised, if needed, to reflect changes in the borrowers' current financial position and outlook, risk profiles and the related collateral and structural positions.

Loans risk rated as "special mention" possess credit deficiencies or potential weaknesses deserving management's close attention that if left uncorrected may result in deterioration of the repayment prospects for the loans at some future date.

Loans risk rated as "substandard" are loans where the Bank's position is clearly not protected adequately by borrower current net worth or payment capacity. These loans have well defined weaknesses based on objective evidence and include loans where future losses to the Bank may result if deficiencies are not corrected, and loans where the primary source of repayment such as income is diminished and the Bank must rely on sale of collateral or other secondary sources of collection.

Loans risk rated as "doubtful" have the same weaknesses as substandard loans with the added characteristic that the weakness makes collection or liquidation in full, given current facts, conditions, and values, to be highly improbable. The possibility of loss is high, but due to certain important and reasonably specific pending factors, which may work to strengthen the loan, its reclassification as an estimated loss is deferred until its exact status can be determined.

Loans risk rated as "loss" are considered uncollectible and of such little value that continuance as Bank assets is unwarranted. This classification does not mean that the loan has absolutely no recovery or salvage value, but rather, it is not practical or desirable to defer writing off this loan even though partial recovery may be made in the future. Management actively reviews and tests its credit risk ratings against actual experience and engages an independent third-party to annually validate its assignment of credit risk ratings. In addition, the Bank's loan portfolio and risk ratings are examined annually on a rotating basis by its two primary regulatory agencies, the FDIC and CTDOB.

Impaired Loans

Loans individually evaluated for impairment (impaired loans) are loans for which Salisbury does not expect to collect all contractual principal and interest in accordance with the contractual terms of the loan. Impaired loans include all modified loans classified as troubled debt restructurings (TDRs) and loans on non-accrual status. The components of impaired loans are as follows:

| (in thousands) | March 31, 2017 | December 31, 2016 |
|--|----------------|-------------------|
| Troubled debt restructured loans, accruing | \$7,702 | \$7,798 |
| Troubled debt restructured loans, non-accrual | 2,029 | 2,262 |
| All other non-accrual loans | 4,999 | 6,274 |
| Total impaired loans | \$14,730 | \$16,334 |
| Commitments to lend additional amounts to impaired borrowers | \$— | \$— |

Non-Performing Assets

Non-performing assets decreased \$1.7 million to \$10.9 million, or 1.2% of assets at March 31, 2017, from \$12.6 million, or 1.3% of assets at December 31, 2016, and decreased \$5.9 million from \$16.8 million, or 1.9% of assets at March 31, 2016.

The 13.3% decrease in non-performing assets in the first three months of 2017 resulted primarily from \$1.0 million in payoffs and repayments, \$0.5 million reinstated to accrual, \$0.2 million change in 90 + past due status, and \$0.3 million charged off. This decrease was offset in part by \$0.3 million of loans placed on non-accrual.

The components of non-performing assets are as follows:

| (in thousands) | March 31, 2017 | December 31, 2016 |
|---|----------------|-------------------|
| Residential 1-4 family | \$ 2,138 | \$ 1,920 |
| Residential 5+ multifamily | 161 | 163 |
| Home equity lines of credit | 87 | 519 |
| Commercial | 3,617 | 4,901 |
| Farm land | 994 | 1,002 |
| Vacant land | — | — |
| Real estate secured | 6,997 | 8,505 |
| Commercial and industrial | 26 | 27 |
| Consumer | 4 | 4 |
| Non-accruing loans | 7,027 | 8,536 |
| Accruing loans past due 90 days and over | 30 | 256 |
| Non-performing loans | 7,057 | 8,792 |
| Real estate acquired in settlement of loans | 3,833 | 3,773 |
| Non-performing assets | \$ 10,890 | \$ 12,565 |

The past due status of non-performing loans is as follows:

| (in thousands) | March 31, 2017 | December 31, 2016 |
|----------------------------|----------------|-------------------|
| Current | \$927 | \$1,005 |
| Past due 30-59 days | 184 | 344 |
| Past due 60-89 days | 75 | — |
| Past due 90-179 days | 43 | 2,516 |
| Past due 180 days and over | 5,828 | 4,927 |
| Total non-performing loans | \$7,057 | \$8,792 |

At March 31, 2017, 13.13% of non-performing loans were current with respect to loan payments, compared with 11.43% at December 31, 2016.

Troubled Debt Restructured Loans

Troubled debt restructured loans improved slightly as a percentage of gross loans during first quarter 2017 at \$9.7 million, or 1.26% of gross loans receivable at March 31, 2017, compared to \$10.1 million, or 1.31% of gross loans receivable at December 31, 2016.

The components of troubled debt restructured loans are as follows:

| (in thousands) | March 31, 2017 | December 31, 2016 |
|---|----------------|-------------------|
| Residential 1-4 family | \$3,184 | \$4,869 |
| Residential 5+ multifamily | 1,606 | — |
| Home equity lines of credit | 113 | 114 |
| Personal | — | — |
| Vacant land | 207 | 210 |
| Commercial | 2,538 | 2,549 |
| Real estate secured | 7,648 | 7,742 |
| Commercial and industrial | 54 | 56 |
| Accruing troubled debt restructured loans | 7,702 | 7,798 |
| Residential 1-4 family | 75 | 240 |
| Residential 5+ multifamily | 161 | — |

Edgar Filing: SALISBURY BANCORP INC - Form 10-Q

| | | |
|--|---------|----------|
| Home equity lines of credit | — | — |
| Commercial | 1,793 | 2,022 |
| Vacant land | — | — |
| Real estate secured | 2,029 | 2,262 |
| Commercial and Industrial | — | — |
| Non-accrual troubled debt restructured loans | 2,029 | 2,262 |
| Troubled debt restructured loans | \$9,731 | \$10,060 |

37

The past due status of troubled debt restructured loans is as follows:

| (in thousands) | March 31, 2017 | December 31, 2016 |
|--|----------------|-------------------|
| Current | \$7,140 | \$7,683 |
| Past due 30-59 days | 527 | 115 |
| Past due 60-89 days | 35 | — |
| Accruing troubled debt restructured loans | 7,702 | 7,798 |
| Current | 211 | 240 |
| Past due 30-59 days | 25 | — |
| Past due 60-89 days | — | — |
| Past due 90-179 days | — | 1,793 |
| Past due 180 days and over | 1,793 | 229 |
| Non-accrual troubled debt restructured loans | 2,029 | 2,262 |
| Total troubled debt restructured loans | \$9,731 | \$10,060 |

At March 31, 2017, 75.54% of troubled debt restructured loans were current with respect to loan payments, as compared with 78.76% at December 31, 2016.

Past Due Loans

Loans past due 30 days or more increased \$5.5 million during first quarter 2017 to \$17.8 million, or 2.31% of gross loans receivable at March 31, 2017, compared with \$12.3 million, or 1.60% of gross loans receivable at December 31, 2016.

The components of loans past due 30 days or greater are as follows:

| (in thousands) | March 31, 2017 | December 31, 2016 |
|---|----------------|-------------------|
| Past due 30-59 days | \$8,142 | \$3,733 |
| Past due 60-89 days | 3,547 | 804 |
| Past due 90-179 days | 30 | 256 |
| Past due 180 days and over | — | — |
| Accruing loans | 11,719 | 4,793 |
| Past due 30-59 days | 184 | 344 |
| Past due 60-89 days | 76 | — |
| Past due 90-179 days | 13 | 2,260 |
| Past due 180 days and over | 5,828 | 4,927 |
| Non-accrual loans | 6,101 | 7,531 |
| Total loans past due 30 days or greater | \$17,820 | \$12,324 |

Potential Problem Loans

Potential problem loans decreased \$0.5 million during the three months of 2017 to \$6.8 million, or 0.88% of gross loans receivable at March 31, 2017, compared with \$7.3 million, or 0.95% of gross loans receivable at December 31, 2016.

The components of potential problem loans are as follows:

| (in thousands) | March 31, 2017 | December 31, 2016 |
|--|----------------|-------------------|
| Residential 1-4 family | \$508 | \$514 |
| Residential 5+ multifamily | — | — |
| Construction of residential 1-4 family | — | — |
| Home equity lines of credit | 122 | 123 |

Edgar Filing: SALISBURY BANCORP INC - Form 10-Q

| | | |
|-------------------------------|---------|---------|
| Residential real estate | 630 | 637 |
| Commercial | 5,992 | 6,057 |
| Construction of commercial | — | — |
| Commercial real estate | 5,992 | 6,057 |
| Farm land | — | — |
| Vacant land | — | — |
| Real estate secured | 6,622 | 6,694 |
| Commercial and industrial | 177 | 581 |
| Consumer | — | — |
| Total potential problem loans | \$6,799 | \$7,275 |

38

The past due status of potential problem loans is as follows:

| (in thousands) | March 31, 2017 | December 31, 2016 |
|-------------------------------|----------------|-------------------|
| Current | \$5,155 | \$6,383 |
| Past due 30-59 days | 1,001 | 826 |
| Past due 60-89 days | 643 | 66 |
| Total potential problem loans | \$6,799 | \$7,275 |

At March 31, 2017, 75.82% of potential problem loans were current with respect to loan payments, as compared with 87.74% at December 31, 2016.

Management cannot predict the extent to which economic or other factors may impact such borrowers' future payment capacity, and there can be no assurance that such loans will not be placed on nonaccrual status, restructured, or require increased provisions for loan losses.

Deposits and Borrowings

Deposits decreased \$9.4 million during first quarter 2017 to \$772.4 million, from \$781.8 million at December 31, 2016, and increased \$16.7 million year-over-year from \$755.7 million at March 31, 2016. The quarter over quarter change in deposits reflects a decline in DDA accounts which was partially offset by increases in interest bearing checking and savings accounts. Deposit increases in the current quarter 2017 as compared to the first quarter 2016 in interest bearing demand, non-interest bearing demand and savings accounts more than offset comparative period declines in money market and term deposits.

Retail repurchase agreements decreased \$3.1 million during first quarter 2017 to \$2.4 million, compared with \$5.5 million at December 31, 2016, and decreased \$0.2 million for year-over-year compared with \$2.6 million at March 31, 2016.

FHLBB advances increased \$15.5 million during first quarter 2017 to \$52.7 million as of March 31, 2017, from \$37.2 million at December 31, 2016, and increased \$25.7 million year-over-year from \$27.0 million at March 31, 2016. The increase was primarily due changes in the mix of balance sheet funding.

Liquidity

Salisbury manages its liquidity position to ensure that there is sufficient funding availability at all times to meet both anticipated and unanticipated deposit withdrawals, loan originations and advances, securities purchases and other operating cash outflows. Salisbury's primary sources of liquidity are principal payments and maturities of securities and loans, short-term borrowings through repurchase agreements and FHLBB advances, net deposit growth and funds provided by operations. Liquidity can also be provided through sales of loans and available-for-sale securities.

Salisbury manages its liquidity in accordance with a liquidity funding policy, and also maintains a contingency funding plan that provides for the prompt and comprehensive response to unexpected demands for liquidity. At March 31, 2017, Salisbury's liquidity ratio, as represented by cash, short term available-for-sale securities and marketable assets to net deposits and short term unsecured liabilities, was 19.75%, down from 21.89% at December 31, 2016. Management believes Salisbury's funding sources will meet anticipated funding needs.

Operating activities for the three-month period ended March 31, 2017 provided net cash of \$2.9 million. Investing activities provided net cash of \$0.4 million, principally from proceeds of \$7.8 million from calls and maturities of securities available-for-sale, offset by \$5.3 million of purchases of securities available-for-sale and FHLBB stock, \$1.7 million of net loan originations and principal collections and \$0.5 million of capital expenditures. Financing activities provided net cash of \$2.5 million, primarily due to \$15.5 million of overnight FHLBB borrowing, offset by

decrease of \$6.9 million in deposit transaction accounts, a decrease of \$3.2 million in securities sold under agreements to repurchase, and decrease of \$2.4 million in time deposits.

At March 31, 2017, Salisbury had outstanding commitments to fund new loan originations of \$31.5 million and unused lines of credit of \$102.6 million. Salisbury believes that these commitments can be met in the normal course of business. Salisbury believes that its liquidity sources will continue to provide funding sufficient to support operating activities, loan originations and commitments, and deposit withdrawals.

RESULTS OF OPERATIONS

For the three month periods ended March 31, 2017 and 2016

OVERVIEW

Net income allocated to common stock was \$1.6 million, or \$0.58 per common share, for the first quarter ended March 31, 2017 (first quarter 2017), compared with \$1.5 million, or \$0.55 per common share, for the fourth quarter ended December 31, 2016 (fourth quarter 2016), and \$1.5 million, or \$0.55 per common share, for the first quarter ended March 31, 2016 (first quarter 2016).

- Net Income per share increased to \$0.58 per share from \$0.55 last quarter and \$0.55 for the first quarter 2016.

- Non-Performing loans decreased to 0.92% of gross loans receivable from 2.29% at March 31, 2016.

Wealth assets under administration increased to \$524.5 million at March 31, 2017, an increase of \$101.5 million, or 24%, from first quarter 2016.

Book value per common share increased to \$34.38 at March 31, 2017 from \$34.07 at December 31, 2016, and \$33.20 at March 31, 2016.

Tangible book value per common share increased to \$29.26 at March 31, 2017 from \$28.90 at December 31, 2016 and \$27.84 at March 31, 2016.

Net Interest Income

Tax equivalent net interest income for first quarter 2017 increased \$248 thousand, or 3.11%, versus fourth quarter 2016, and increased \$240 thousand or 3.01%, versus first quarter 2016. Average earning assets increased \$9.65 million versus fourth quarter 2016, and increased \$41.6 million versus first quarter 2016. Average total interest bearing deposits decreased \$7.71 million versus fourth quarter 2016 and increased \$8.54 million versus first quarter 2016. The net interest margin of 3.74% increased 11 basis points versus 3.63% for the fourth quarter 2016 and decreased 6 basis points versus 3.80% for the first quarter 2016.

Edgar Filing: SALISBURY BANCORP INC - Form 10-Q

The following table sets forth the components of Salisbury's fully tax-equivalent ("FTE") net interest income and yields on average interest-earning assets and interest-bearing liabilities.

| Three months ended March 31, (dollars in thousands) | Average Balance | | Income / Expense | | Average Yield / Rate | |
|--|-----------------|-----------|------------------|---------|----------------------|--------|
| | 2017 | 2016 | 2017 | 2016 | 2017 % | 2016 % |
| Loans (a)(d)(f) | \$769,187 | \$721,618 | \$8,522 | \$8,101 | 4.43 | 4.47 |
| Securities (c)(d) | 75,902 | 72,964 | 562 | 718 | 2.96 | 3.94 |

| Net interest income (f) | | | \$8,214 | \$7,974 | | |
| Spread on interest-bearing funds | | | | | 3.57 | 3.62 |
| Net interest margin (e) | | | | | 3.74 | 3.80 |

(a) Includes non-accrual loans.

(b) Includes interest-bearing deposits in other banks and federal funds sold.

(c) Average balances of securities are based on historical cost.

(d) Includes tax exempt income benefit of \$261,000 and \$315,000, respectively, for 2017 and 2016 on tax-exempt securities and loans whose income and yields are calculated on a tax-equivalent basis.

(e) Net interest income divided by average interest-earning assets.

(f) Interest income for 2017 and 2016 reflect net accretion related to the fair value adjustments of loans acquired in the Riverside Bank acquisition in the amount of \$495,000 and \$586,000, respectively.

The following table sets forth the changes in FTE interest due to volume and rate.

| Three months ended March 31, (in thousands) | 2017 versus 2016 | | |
|---|------------------|---------|-------|
| Change in interest due to | Volume | Rate | Net |
| Interest-earning assets | | | |
| Loans | \$531 | \$(110) | \$421 |
| Securities | 25 | (181) | (156) |

| Net change in net interest income | \$449 | \$(209) | \$240 |

41

Interest Income

Tax equivalent interest income increased \$248 thousand to \$8.2 million for first quarter 2017 as compared with first quarter 2016.

Loan income as compared to first quarter 2016 increased \$421 thousand, or 5.2%, primarily due to a \$47.5 million, or 6.6%, increase in average loans, partially offset by a 4 basis point decrease in the average loan yield. The first quarter of 2017 reflects the net accretion of \$495 thousand related to fair value adjustments of loans related to the Riverside acquisition compared to net accretion of \$586 thousand in first quarter 2016.

Tax equivalent securities income decreased \$156 thousand, or 21.7%, for first quarter 2017 as compared with first quarter 2016, primarily due to a 98 basis point decrease in average yield, partially offset by a \$2.9 million, or 4.0%, increase in average volume.

Interest Expense

Interest expense increased \$34 thousand, or 3.7%, to \$953 thousand for first quarter 2017 as compared with first quarter 2016.

Interest on deposit accounts increased \$7 thousand, or 1.4%, as a result of an \$8.5 million increase in the average balances. Average deposit rates increased 1 basis point as compared with first quarter 2016.

Interest expense on FHLBB borrowings increased \$31 thousand as a result of an average balance increase of \$15.9 million as compared with first quarter 2016, partially offset by a lower average borrowings rate which decreased 95 basis points. Interest expense on subordinated debt totaled \$156 thousand for the first quarter in both 2017 and 2016.

Provision and Allowance for Loan Losses

Provision for loan loss expense was \$352 thousand for first quarter 2017 versus \$463 thousand for first quarter 2016. Included in the provision are impairments related to ASC 310-30 purchased loans of \$10 thousand for the first quarter 2017 and \$143 thousand for the first quarter 2016. Net loan charge-offs (recoveries) were \$194 thousand for the first quarter 2017 and \$302 thousand for the first quarter 2016. Reserve coverage, as measured by the ratio of the allowance for loan losses to gross loans, was 0.82% for the first quarter 2017, versus 0.80% for first quarter 2016.

The following table details the principal categories of credit quality ratios:

| | Q1 2017 | | Q4 2016 | |
|---|---------|---|---------|---|
| Net charge-offs (recoveries) to average loans receivable, gross | 0.03 | % | 0.04 | % |
| Non-performing loans to loans receivable, gross | 0.92 | | 1.16 | |
| Accruing loans past due 30-89 days to loans receivable, gross | 1.52 | | 0.60 | |
| Allowance for loan losses to loans receivable, gross | 0.82 | | 0.80 | |
| Allowance for loan losses to non-performing loans | 89.05 | | 69.43 | |
| Non-performing assets to total assets | 1.16 | | 1.34 | |

The ratio of non-performing loans (non-accrual loans and accruing loans past-due 90 days or more) to gross loans receivable decreased to 0.92% at March 31, 2017 compared to 1.16% at December 31, 2016. Such increase in non-performing loans is concentrated among a few specific relationships and is not considered to be generally indicative of any adverse trend. The ratio of accruing loans past due 30-89 days to gross loans receivable increased to 1.52% from 0.60% at December 31, 2016.

The allowance for loan losses represents management's estimate of the probable credit losses inherent in the loan portfolio as of the reporting date. The allowance is increased by provisions charged to earnings and by recoveries of amounts previously charged off, and is reduced by loan charge-offs. Loan charge-offs are recognized when management determines a loan, or portion of a loan, to be uncollectible. The allowance for loan losses is computed by segregating the portfolio into three components: (1) loans collectively evaluated for impairment: general loss allocation factors for non-impaired loans are segmented into pools of loans based on similar risk characteristics such as loan product, collateral type and loan-to-value, loan risk rating, historical loss experience, delinquency factors and other similar economic indicators, (2) loans individually evaluated for impairment: individual loss allocations for loans deemed to be impaired based on discounted cash flows or collateral value, and (3) unallocated: general loss allocations for other environmental factors.

Impaired loans and certain potential problem loans, when warranted, are individually evaluated for impairment. Impairment is measured for each individual loan, or for a borrower's aggregate loan exposure, using either the fair value of the collateral, less estimated costs to sell if the loan is collateral dependent, or the present value of expected future cash flows discounted at the loan's effective interest rate. A specific allowance is generally established when the collateral value or discounted cash flows of the loan is lower than the carrying value of that loan.

The component of the allowance for loan losses for loans collectively evaluated for impairment is estimated by stratifying loans into segments and credit risk ratings and then applying management's general loss allocation factors. The general loss allocation factors are based on expected loss experience adjusted for historical loss experience and other qualitative factors, including levels or trends in delinquencies; trends in volume and terms of loans; effects of changes in risk selection and underwriting standards and other changes in lending policies, procedures and practices; experience/ability/depth of lending management and staff; and national and local economic trends and conditions. The qualitative factors are determined based on the various risk characteristics of each loan segment. There were no significant changes in Salisbury's policies or methodology pertaining to the general component of the allowance for loan losses during first quarter 2017.

The unallocated component of the allowance is maintained to cover uncertainties that could affect management's estimate of probable losses. It reflects the margin of imprecision inherent in the underlying assumptions used in the methodologies for estimating allocated and general reserves in the portfolio.

Additionally reserves are established for off balance sheet exposures which include those related to loans serviced for others. Reserve balances related to loans serviced for others are included in other liabilities.

Determining the adequacy of the allowance and reserves at any given period is difficult, particularly during deteriorating or uncertain economic periods, and management must make estimates using assumptions and information that are often subjective and changing rapidly. The review of credit exposure related to loans is a continuing event in light of a changing economy and the dynamics of the banking and regulatory environment. Should the economic climate deteriorate, borrowers could experience difficulty and the level of non-performing loans, charge-offs and delinquencies could rise, requiring increased provisions and reserves. In management's judgment, Salisbury remains adequately reserved both against total loans and non-performing loans at March 31, 2017.

Management's loan risk rating assignments, loss percentages and specific reserves are subjected annually to an independent credit review by an external firm. In addition, the Bank is examined annually on a rotational basis by one of its two primary regulatory agencies, the FDIC and CTDOB. As an integral part of their examination process, the FDIC and CTDOB review the adequacy and methodology of the Bank's credit risk ratings and allowance for loan losses.

Non-Interest Income

The following table details the principal categories of non-interest income.

| Three months ended March 31, (dollars in thousands) | 2017 | 2016 | 2017 vs. 2016 | |
|--|---------|---------|------------------|---------|
| Trust and wealth advisory fees | \$854 | \$784 | \$70 | 8.9 % |
| Service charges and fees | 962 | 702 | 260 | 37.0 |
| Gains on sales of mortgage loans, net | 49 | 39 | 10 | 25.6 |
| Mortgage servicing, net | 45 | 34 | 11 | 32.4 |
| Gains on sales and calls of available-for-sale securities, net | — | 2 | (2) | (100.0) |
| Other | 113 | 114 | (1) | (0.9) |
| Total non-interest income | \$2,023 | \$1,675 | \$348 | 20.8 % |

Non-interest income increased \$348 thousand, or 20.8% in the first quarter of 2017 versus the first quarter of 2016. Trust and wealth advisory revenues increased \$70 thousand versus first quarter 2016. The year-over-year revenue increase is the result of net growth in asset based fees. Service charges and fees increased \$260 thousand versus first quarter 2016. Net fees related to NSF activity increased \$100 thousand in the first quarter 2017 as compared to the first quarter 2016. Higher fees related to ATM and interchange income contributed \$72 thousand. First quarter 2017 mortgage loans sales totaled \$1.9 million versus \$1.8 million for first quarter 2016. First quarter 2017 and first quarter 2016 included mortgage servicing amortization and periodic impairment charges (net) of \$70 thousand and \$71 thousand, respectively. Gain on sales and calls of securities decreased \$2 thousand versus first quarter 2016. Gains recognized in the first quarter of 2016 resulted from called securities. Other income includes bank owned life insurance income and rental income.

Non-Interest Expense

The following table details the principal categories of non-interest expense.

| Three months ended March 31, (dollars in thousands) | 2017 | 2016 | 2017 vs. 2016 | |
|---|---------|---------|---------------|---------|
| Salaries | \$2,890 | \$2,573 | \$317 | 12.32 % |
| Employee benefits | 1,088 | 1,088 | — | — |
| Premises and equipment | 895 | 892 | 3 | (0.34) |
| Data processing | 472 | 447 | 25 | 5.59 |
| Professional fees | 717 | 380 | 337 | 88.68 |
| Collections and OREO | 301 | 186 | 115 | 61.83 |
| FDIC insurance | 149 | 134 | 15 | 11.19 |
| Marketing and community support | 251 | 201 | 50 | 24.88 |
| Amortization of core deposit intangibles | 126 | 155 | (29) | (18.71) |
| Other | 538 | 781 | (243) | (31.11) |
| Non-interest expense | \$7,427 | \$6,837 | \$590 | 8.63 % |

Non-interest expense for first quarter 2017 increased \$590 thousand versus first quarter 2016. The first quarter 2017 results include OREO related expenses, which are discussed below, of \$232 thousand. Total salaries expense increased \$317 thousand versus first quarter 2016. This increase is mainly attributable to the mix and levels of staff as well as lower deferred expense related to loan origination for the current period. Professional fees increased \$337 thousand versus first quarter 2016 primarily as a result of higher consulting, investment management and legal fees. Loan related expenses increased \$115 thousand versus first quarter 2016, mainly due to the write-downs associated with OREO properties in first quarter 2017. Other expense decreased \$243 thousand versus first quarter 2016 primarily as a result of first quarter 2016 expenses related to sold loans serviced for others.

Income Taxes

The effective income tax rates for first quarter 2017 and first quarter 2016 were 27.0% and 25.9%, respectively. Generally, fluctuations in the effective tax rate result from changes in the mix of taxable and tax exempt income. Salisbury's effective tax rate is generally less than the 34% federal statutory rate due to holdings of tax-exempt municipal bonds and loans as well as bank owned life insurance.

Salisbury did not incur Connecticut income tax in 2017 (to date) or 2016, other than minimum state income tax, as a result of a Connecticut law that permits banks to shelter certain mortgage income from the Connecticut corporation business tax through the use of a special purpose entity called a Passive Investment Company or PIC. In 2004, Salisbury availed itself of this benefit by forming a PIC, SBT Mortgage Service Corporation. Salisbury's income tax provision reflects the full impact of the Connecticut legislation. Salisbury does not expect to pay other than minimum state income tax in the foreseeable future unless there is a change in Connecticut tax law.

CAPITAL RESOURCES

Shareholders' equity was \$95.2 million at March 31, 2017, up \$1.2 million from December 31, 2016. Book value and tangible book value per common share were \$34.38 and \$29.26, respectively, compared with \$33.13 and \$27.69, respectively, at December 31, 2016. Contributing to the increase in shareholders' equity for year-to-date 2017 was net income of \$1.6 million and stock options exercised of \$0.3 million, partially offset by common stock dividends of \$0.8 million. Accumulated other comprehensive income consists of unrealized gains on securities available-for-sale, net of tax, of \$0.5 million as of March 31, 2017.

Capital Requirements

Failure to meet minimum capital requirements can initiate certain mandatory and possibly additional and discretionary actions by the regulators that, if undertaken, could have a direct material effect on Salisbury's and the Bank's financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, Salisbury and the Bank must meet specific guidelines that involve quantitative measures of their assets, liabilities, and certain off-balance sheet items as calculated under regulatory accounting practices. Salisbury and the Bank's capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weightings, and other factors.

Salisbury and the Bank are subject to various regulatory capital requirements administered by the federal banking agencies. Salisbury and the Bank must meet specific guidelines that involve quantitative measures of their assets, liabilities, and certain off-balance sheet items as calculated under regulatory accounting practices.

Under current regulatory definitions, Salisbury and the Bank meet all capital adequacy requirements to which they are subject and the Bank is considered to be well-capitalized. As a result, the Bank pays lower federal deposit insurance premiums than those banks that are not “well-capitalized.” Requirements for classification as a well-capitalized institution and for minimum capital adequacy along with Salisbury’s and the Bank’s regulatory capital ratios are as follows:

| | March 31, 2017 | | December 31, 2016 | |
|--|----------------|---------|-------------------|---------|
| | Salisbury | Bank | Salisbury | Bank |
| Total Capital (to risk-weighted assets) | 13.34 % | 12.91 % | 13.26 % | 12.92 % |
| Tier 1 Capital (to risk-weighted assets) | 11.10 | 12.03 | 11.02 | 12.05 |
| Common Equity Tier 1 Capital (to risk-weighted assets) | 11.10 | 12.03 | 11.02 | 12.05 |
| Tier 1 Capital (to average assets) | 8.83 | 9.59 | 8.69 | 9.51 |

A well-capitalized institution, which is the highest capital category for an institution as defined by the Prompt Corrective Action regulations issued by the FDIC and the FRB, is one which maintains a Total Risk-Based ratio of 10% or above, a Tier 1 Risk-Based ratio of 8% or above, a Common Equity Tier 1 ratio of 6.5% or above, and a Leverage ratio of 5% or above, and is not subject to any written order, written agreement, capital directive, or prompt corrective action directive to meet and maintain a specific capital level. Maintaining strong capital is essential to Salisbury and the Bank’s safety and soundness. However, the effective management of capital resources requires generating attractive returns on equity to build value for shareholders while maintaining appropriate levels of capital to fund growth, meet regulatory requirements and be consistent with prudent industry practices.

In July 2013, the Federal Reserve Bank (FRB) approved the final rules implementing the Basel Committee on Banking Supervision’s capital guidelines for bank holding companies and their bank subsidiaries. On July 9, 2013, the FDIC also approved, as an interim final rule, the regulatory capital requirements for U.S. banks, following the actions of the FRB. On April 8, 2014, the FDIC adopted as final its interim final rule, which is identical in substance to the final rules issued by the FRB in July 2013. Under the final rules, minimum requirements increased for both the quantity and quality of capital held by the Bank and Salisbury. The rules include a common equity Tier 1 capital to risk-weighted assets minimum ratio of 4.5%, a minimum ratio of Tier 1 capital to risk-weighted assets of 6.0%, require a minimum ratio of Total capital to risk-weighted assets of 8.0%, and require a minimum Tier 1 leverage ratio of 4.0%. A capital conservation buffer, comprised of common equity Tier 1 capital, is also established above the regulatory minimum capital requirements. This capital conservation buffer began phasing in January 1, 2016 at 0.625% of risk-weighted assets and increases each subsequent year by an additional 0.625% until reaching its final level of 2.50% on January 1, 2019. Strict eligibility criteria for regulatory capital instruments were also implemented under the final rules.

The phase-in period for the final rules began for Salisbury and the Bank on January 1, 2015. As of March 31, 2017, the Company and the Bank met each of their capital requirements and the most recent notification from the FDIC categorized the Bank as “well-capitalized.” There are no conditions or events since that notification that management believes have changed the Bank’s category.

Dividends

During the three month period ended March 31, 2017, Salisbury paid \$774 thousand in dividends on common stock.

On April 28, 2017, the Board of Directors of Salisbury declared a common stock dividend of \$0.28 per common share payable on May 26, 2017 to shareholders of record on May 12, 2017. Common stock dividends, when declared, will

generally be paid the last Friday of February, May, August and November, although Salisbury is not obligated to pay dividends on those dates or at any other time.

Salisbury's ability to pay cash dividends is dependent on the Bank's ability to pay cash dividends to Salisbury. There are certain restrictions on the payment of cash dividends and other payments by the Bank to Salisbury. Under Connecticut law, the Bank cannot declare a cash dividend except from net profits, defined as the remainder of all earnings from current operations. The total of all cash dividends declared by the Bank in any calendar year shall not, unless specifically approved by the Banking Commissioner, exceed the total of its net profits of that year combined with its retained net profits of the preceding two years.

FRB Supervisory Letter SR 09-4, February 24, 2009, revised December 31, 2015, states that, as a general matter, the Board of Directors of a Bank Holding Company (“BHC”) should inform the Federal Reserve and should eliminate, defer, or significantly reduce dividends if (1) net income available to shareholders for the past four quarters, net of dividends previously paid during that period, is not sufficient to fully fund the dividends; (2) the prospective rate of earnings retention is not consistent with capital needs and overall current and prospective financial condition; or (3) the BHC will not meet, or is in danger of not meeting, its minimum regulatory capital adequacy ratios. Moreover, a BHC should inform the Federal Reserve reasonably in advance of declaring or paying a dividend that exceeds earnings for the period (e.g., quarter) for which the dividend is being paid or that could result in a material adverse change to the BHC capital position.

Salisbury believes that the payment of common stock cash dividends is appropriate, provided that such payment considers Salisbury's capital needs, asset quality, and overall financial condition and does not adversely affect the financial stability of Salisbury or the Bank. The continued payment of common stock cash dividends by Salisbury will be dependent on Salisbury's future core earnings, financial condition and capital needs, regulatory restrictions, and other factors deemed relevant by the Board of Directors of Salisbury.

IMPACT OF INFLATION AND CHANGING PRICES

Salisbury's consolidated financial statements and related notes thereto presented elsewhere in this Form 10-Q are prepared in conformity with GAAP, which require the measurement of financial condition and operating results in terms of historical dollars without considering changes in the relative purchasing power of money, over time, due to inflation. Unlike some other types of companies, the financial nature of Salisbury's consolidated financial statements is more clearly affected by changes in interest rates than by inflation. Interest rates do not necessarily fluctuate in the same direction or in the same magnitude as the prices of goods and services. However, inflation does affect Salisbury to some extent because, as prices increase, the money supply grows and interest rates are affected by inflationary expectations. There is no precise method, however, to measure the effects of inflation on the Company's consolidated financial statements. Accordingly, any examination or analysis of the financial statements should take into consideration the possible effects of inflation. Although not a material factor in recent years, inflation could impact earnings in future periods.

FORWARD-LOOKING STATEMENTS

This Form 10-Q and future filings made by Salisbury with the Securities and Exchange Commission, as well as other filings, reports and press releases made or issued by Salisbury and the Bank, and oral statements made by executive officers of Salisbury and the Bank, may include forward-looking statements relating to such matters as:

- (a) assumptions concerning future economic and business conditions and their effect on the economy in general and on the markets in which Salisbury and the Bank do business; and
- (b) expectations for revenues and earnings for Salisbury and the Bank.

Such forward-looking statements are based on assumptions rather than historical or current facts and, therefore, are inherently uncertain and subject to risk. For those statements, Salisbury claims the protection of the safe harbor for forward-looking statements contained in the Private Securities Litigation Reform Act of 1995.

Salisbury notes that a variety of factors could cause the actual results or experience to differ materially from the anticipated results or other expectations described or implied by such forward-looking statements. The risks and uncertainties that may affect the operation, performance, development and results of Salisbury's and the Bank's business include the following:

- (a) the risk of adverse changes in business conditions in the banking industry generally and in the specific markets in which the Bank operates;

- (b) changes in the legislative and regulatory environment that negatively impacts Salisbury and the Bank through increased operating expenses;
 - (c) increased competition from other financial and non-financial institutions;
 - (d) the impact of technological advances and cybersecurity matters;
 - (e) interest rate fluctuations; and
 - (f) other risks detailed from time to time in Salisbury's filings with the Securities and Exchange Commission.
- Such developments could have an adverse impact on Salisbury's and the Bank's financial position and results of operations.

Item 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Salisbury manages its exposure to interest rate risk through its Asset/Liability Management Committee (“ALCO”) using risk limits and policy guidelines to manage assets and funding liabilities to produce financial results that are consistent with Salisbury’s liquidity, capital adequacy, growth, risk and profitability targets. Interest rate risk is the risk of a negative impact to future earnings due to changes in interest rates.

The ALCO manages interest rate risk using income simulation to measure interest rate risk inherent in Salisbury’s financial instruments at a given point in time by showing the effect of interest rate shifts on net interest income over a 24-month horizon. In management’s March 31, 2017 analysis, three of the simulations incorporate static growth assumptions over the simulation horizons, with allowances made for loan, deposit and security product mix shifts in selected interest rate scenarios, such as movements between lower rate savings and money market deposit accounts and higher rate time deposits, and changes in the reinvestment of loan and securities cash flows. The fourth simulation incorporates management’s balance sheet growth assumptions. Additionally, the simulations take into account the specific re-pricing, maturity and prepayment characteristics of differing financial instruments that may vary under different interest rate scenarios.

The ALCO reviews the simulation results to determine whether Salisbury’s exposure to change in net interest income remains within established tolerance levels over the simulation horizons and to develop appropriate strategies to manage this exposure. Salisbury’s tolerance levels for changes in net interest income in its income simulations vary depending on the magnitude of interest rate changes and level of risk-based capital. All changes are measured in comparison to the projected net interest income that would result from an “unchanged” rate scenario where interest rates remain stable over the forecast horizon. The ALCO also evaluates the directional trends of net interest income, net interest margin and other financial measures over the forecast horizon for consistency with its liquidity, capital adequacy, growth, risk and profitability targets.

ALCO uses four interest rate scenarios to evaluate interest risk exposure and may vary these interest rate scenarios to show the effect of steepening or flattening changes in yield curves as well as parallel changes in interest rates. At March 31, 2017, ALCO used the following interest rate scenarios: (1) unchanged interest rates; (2) immediately rising interest rates – immediate parallel upward shift in market interest rates ranging from 300 basis points for the 2-year Treasury rates to 300 basis points for the 10-year Treasury; (3) immediately falling interest rates – immediate downward shift in market interest rates ranging from 100 basis points for the 2-year Treasury rates to 100 basis points for the 10-year Treasury; and (4) immediately rising interest rates – immediate parallel upward shift in market interest rates ranging from 200 basis points for the 2-year Treasury rates to 200 basis points for the 10-year Treasury. Deposit rates are assumed to shift by lesser amounts due to their relative historical insensitivity to market interest rate movements. Further, deposits are assumed to have certain minimum rate levels below which they will not fall. Income simulations do not reflect adjustments in strategy that the ALCO could implement in response to rates. As of March 31, 2017, net interest income simulations indicated that the Bank’s exposure to changing interest rates over the simulation horizons remained within its tolerance levels.

The following table sets forth the estimated change in net interest income from an unchanged interest rate scenario over the periods indicated for changes in market interest rates using the Bank’s financial instruments as of March 31, 2017:

| As of March 31, 2017 | Months | Months |
|--|----------|---------|
| | 1-12 | 13-24 |
| Immediately rising interest rates (static growth assumptions) | (6.27)% | 2.88 % |
| Immediately falling interest rates (static growth assumptions) | (3.16) | (5.85) |
| Immediately rising interest rates (static growth assumptions) | (3.13) | 4.19 |

The negative exposure of net interest income to immediately and gradually rising rates as compared to the unchanged rate scenario results from a faster projected rise in the cost of funds versus income from earning assets, as relatively rate-sensitive money market and time deposits re-price faster than longer duration earning assets. The negative exposure of net interest income to immediately falling rates as compared to an unchanged rate scenario results from a greater decline in earning asset yields compared to rates paid on funding liabilities, as a result of faster prepayments on existing assets and lower reinvestment rates on future loans originated and securities purchased.

While the ALCO reviews simulation assumptions and back-tests simulation results to ensure that they are reasonable and current, income simulation may not always prove to be an accurate indicator of interest rate risk or future net interest margin. Over time, the re-pricing, maturity and prepayment characteristics of financial instruments and the composition of Salisbury's balance sheet may change to a different degree than estimated. Simulation modeling assumes Salisbury's expectation for future balance sheet growth, which is a function of the business environment and customer behavior. Another significant simulation assumption is the sensitivity of core savings deposits to fluctuations in interest rates. Income simulation results assume that changes in both core savings deposit rates and balances are related to changes in short-term interest rates. The assumed relationship between short-term interest rate changes and core deposit rate and balance changes used in income simulation may differ from the ALCO's estimates. Lastly, mortgage-backed securities and mortgage loans involve a level of risk that unforeseen changes in prepayment speeds may cause related cash flows to vary significantly in differing rate environments. Such changes could affect the level of reinvestment risk associated with cash flow from these instruments, as well as their market value. Changes in prepayment speeds could also increase or decrease the amortization of premium or accretion of discounts related to such instruments, thereby affecting interest income.

Salisbury also monitors the potential change in market value of its available-for-sale debt securities in changing interest rate environments. The purpose is to determine market value exposure that may not be captured by income simulation, but which might result in changes to Salisbury's capital and liquidity position. Results are calculated using industry-standard analytical techniques and securities data. Available-for-sale equity securities are excluded from this analysis because the market value of such securities cannot be directly correlated with changes in interest rates.

The following table summarizes the potential change in market value of available-for-sale debt securities resulting from immediate parallel rate shifts:

| As of March 31, 2017 (in thousands) | Rates up 100bp | Rates up 200bp |
|--|----------------|----------------|
| Municipal bonds | (248) | (474) |
| Mortgage backed securities | (1,174) | (2,751) |
| Collateralized mortgage obligations | (388) | (738) |
| SBA pools | (4) | (8) |
| Other | (109) | (205) |
| Total available-for-sale debt securities | \$(1,923) | \$(4,176) |

Item 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

Salisbury's management, including its Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of the design and operation of Salisbury's disclosure controls and procedures as of March 31, 2017. Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the disclosure controls and procedures are effective as of March 31, 2017.

Disclosure controls and procedures are controls and other procedures that are designed to ensure that the information required to be disclosed in reports filed or submitted under the Securities Exchange Act of 1934, as amended (the "Exchange Act") is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by us in our reports filed under the Exchange Act is accumulated and communicated to management, including the principal executive officer and principal financial officer, as appropriate to allow timely decisions regarding required disclosure.

Changes in Internal Controls

In addition, based on an evaluation of its internal controls over financial reporting, no change in Salisbury's internal control over financial reporting occurred during the quarter ended March 31, 2017 that has materially affected, or is reasonably likely to materially affect, Salisbury's internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1. LEGAL PROCEEDINGS

The Bank is involved in various claims and legal proceedings arising in the ordinary course of business, which management currently believes are not material, individually or in the aggregate, to the business, financial condition or operating results of Salisbury or any of its subsidiaries. There are no material pending legal proceedings, other than ordinary routine litigation incidental to the registrant's business, to which Salisbury is a party or of which any of its property is subject.

Item 1A. RISK FACTORS

Not applicable

Item 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

None

Item 3. DEFAULTS UPON SENIOR SECURITIES

None

Item 4. MINE SAFETY DISCLOSURES

Not Applicable

Item 5. OTHER INFORMATION

None

Item 6. EXHIBITS

| Exhibit No. | Description |
|-------------|---|
| 2.1 | Agreement and Plan of Merger by and among Salisbury Bancorp, Inc., Salisbury Bank and Trust Company and Riverside Bank dated March 18, 2014 (incorporated by reference to Exhibit 2.1 of Form 8-K filed on March 19, 2014). |
| 3.1 | Certificate of Incorporation of Salisbury Bancorp, Inc. (incorporated by reference to Exhibit 3.1 of Registrant's 1998 Registration Statement on Form S-4 filed April 23, 1998, File No.: 33-50857). |
| 3.1.1 | Amendment to Article Third of Certificate of Incorporation of Registrant (incorporated by reference to Exhibit 3.1 of Registrant's Form 8-K filed March 11, 2009). |
| 3.1.2 | Certificate of Amendment to Certificate of Incorporation of Registrant (incorporated by reference to Exhibit 3.1 of Registrant's Form 8-K filed March 19, 2009). |
| 3.1.3 | Certificate of Amendment to Certificate of Incorporation for the Series B Preferred Stock (incorporated by reference to Registrant's Form 8-K filed on August 25, 2011). |
| 3.1.4 | Certificate of Amendment to Certificate of Incorporation of Registrant (incorporated by reference to Exhibit 3.1 of Registrant's Form 8-K filed October 30, 2014). |
| 3.2 | Amended and Restated Bylaws (incorporated by reference to Exhibit 3.1 of Form 8-K filed November 25, 2014). |
| 4.1 | Form of Subordinated Note, dated as of December 10, 2015, issued by Salisbury Bancorp, Inc. (incorporated by reference to Exhibit 4.1 of Registrant's Form 8-K filed December 10, 2015). |
| 10.1 | 2017 Long Term Incentive Plan adopted by the Board on February 24, 2017 and subject to approval by shareholders at Salisbury's 2017 Annual Meeting of Shareholders (incorporated by reference to Appendix A of the Registrant's definitive proxy statement filed April 10, 2017). |
| 10.2 | Amendment Number Three to 2011 Long Term Incentive Plan dated as of April 28, 2017. |

21.1 Subsidiaries of the Registrant.

23.1 Consent of Baker Newman & Noyes, LLC.

23.2 Consent of Shatswell, MacLeod & Company, P.C.

31.1 Chief Executive Officer Certification Pursuant to 17 CFR 240.13a-14, as adopted pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.

31.2 Chief Financial Officer Certification Pursuant to 17 CF 240.13a-14, as adopted pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.

32.1 Chief Executive Officer and Chief Financial Officer Certification Pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.
