(Zip Code)

Registrant's telephone number, including area code (203) 975-7110

Securities registered pursuant to Section 12(b) of the Act:

Title of each class

Common Stock, par value \$0.01 per share

Name of each exchange on which registered

Nasdaq Global Select Market

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark if the Registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the Registrant is not required to file reports pursuant to Section 13 or 15(d) of the Act. Yes No

Indicate by check mark whether the Registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the Registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the Registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the Registrant was required to submit and post such files).

Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of Registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the Registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company

Edgar Filing: SILGAN HOLDINGS INC - Form 10-K

(Do not check if a smaller reporting company)

Indicate by check mark whether the Registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

The aggregate market value of the Registrant's Common Stock held by non-affiliates, computed by reference to the price at which the Registrant's Common Stock was last sold as of June 28, 2013, the last business day of the Registrant's most recently completed second fiscal quarter, was approximately \$2.055 billion. Common Stock of the Registrant held by executive officers and directors of the Registrant has been excluded from this computation in that such persons may be deemed to be affiliates. This determination of affiliate status is not a conclusive determination for other purposes.

As of February 1, 2014, the number of shares outstanding of the Registrant's Common Stock, par value \$0.01 per share, was 63,415,444.

Documents Incorporated by Reference:

Portions of the Registrant's Proxy Statement, to be filed with the Securities and Exchange Commission within 120 days after the end of the fiscal year covered by this Annual Report on Form 10-K, for its Annual Meeting of Stockholders to be held in 2014 are incorporated by reference in Part III of this Annual Report on Form 10-K.

PART I

ITEM 1. BUSINESS.

GENERAL

We are a leading manufacturer of rigid packaging for shelf-stable food and other consumer goods products. We had consolidated net sales of approximately \$3.7 billion in 2013. Our products are used for a wide variety of end markets and we operate 88 manufacturing plants in North America, Europe, Asia and South America. Our products include: steel and aluminum containers for human and pet food and general line products;

metal, composite and plastic closures for food and beverage products; and

custom designed plastic containers, tubes and closures for personal care, food, health care, pharmaceutical, household and industrial chemical, pet care, agricultural chemical, automotive and marine chemical products.

We are a leading manufacturer of metal containers in North America and Europe, and in North America we are the largest manufacturer of metal food containers with a unit volume market share in the United States in 2013 of approximately half of the market. Our leadership in these markets is driven by our high levels of quality, service and technological support, our low cost producer position, our strong long-term customer relationships and our proximity to customers through our widespread geographic presence. We have 44 metal container manufacturing facilities located in the United States, Europe and Asia, serving over 50 countries throughout the world, which includes several new facilities in developing Eastern countries. Additionally, we believe that we have the most comprehensive equipment capabilities in the industry. For 2013, our metal container business had net sales of \$2.34 billion (approximately 63.1 percent of our consolidated net sales) and income from operations of \$236.3 million (approximately 69.9 percent of our consolidated income from operations excluding corporate expense).

We are also a leading worldwide manufacturer of metal, composite and plastic closures for food and beverage products. Our leadership position in closures is a result of our ability to provide customers with high levels of quality, service and technological support. Our closures business provides customers with an extensive variety of proprietary metal, composite and plastic closures that ensure closure quality and safety, as well as state-of-the-art capping/sealing equipment and detection systems to complement our closures product offering. We have 20 closure manufacturing facilities located in North America, Europe, Asia and South America, from which we serve over 70 countries throughout the world. In addition, we license our technology to five other manufacturers for various markets we do not serve directly. For 2013, our closures business had net sales of \$720.1 million (approximately 19.4 percent of our consolidated net sales) and income from operations of \$63.0 million (approximately 18.7 percent of our consolidated income from operations excluding corporate expense).

Additionally, we are a leading manufacturer of plastic containers in North America for a variety of markets, including the personal care, food, health care and household and industrial chemical markets. Our success in the plastic packaging market is largely due to our demonstrated ability to provide our customers with high levels of quality, service and technological support, along with our value-added design-focused products and our extensive geographic presence with 24 manufacturing facilities in the United States and Canada. We produce plastic containers from a full range of resin materials and offer a comprehensive array of molding and decorating capabilities. For 2013, our plastic container business had net sales of \$647.0 million (approximately 17.5 percent of our consolidated net sales) and income from operations of \$38.6 million (approximately 11.4 percent of our consolidated income from operations excluding corporate expense).

Our customer base includes some of the world's best-known branded consumer products companies. Our philosophy has been to develop long-term customer relationships by acting in partnership with our customers by providing reliable quality, service and technological support and utilizing our low cost producer position. The strength of our customer relationships is evidenced by our large number of multi-year supply arrangements, our high retention of customers' business and our continued recognition from customers, as demonstrated by the many quality and service awards we have received. We estimate that in 2014 approximately 90 percent of our projected metal container sales in North America, a majority of our projected closures sales in the United States and a majority of our projected plastic container sales will be under multi-year customer supply arrangements.

Our objective is to increase shareholder value by efficiently deploying capital and management resources to grow our business, reduce operating costs and build sustainable competitive positions, or franchises, and to complete acquisitions that generate attractive cash returns. We believe that we will accomplish this goal because of

our leading market positions and management expertise in acquiring, financing, integrating and efficiently operating consumer goods packaging businesses.

OUR HISTORY

We are a Delaware corporation. We were founded in 1987 by our Non-Executive Co-Chairmen of the Board, R. Philip Silver and D. Greg Horrigan. Since our inception, we have acquired thirty-two businesses. As a result of the benefits of acquisitions and organic growth, we have become a leading manufacturer of metal containers in North America and Europe, with net sales of \$2.34 billion in 2013, and have increased our overall share of the metal food container market in the United States from approximately 10 percent in 1987 to approximately half of the market in 2013. Through acquisitions, we have become a leading worldwide manufacturer of closures for food and beverage products, with net sales of \$720.1 million in 2013. We have also grown our market position in the plastic container business since 1987, with net sales increasing sevenfold to \$647.0 million in 2013. The following chart shows our acquisitions since our inception:

Acquired Business	Year	Products
Nestlé Food Company's metal container manufacturing division	1987	Metal food containers
Monsanto Company's plastic container business	1987	Plastic containers
Fort Madison Can Company of The Dial Corporation	1988	Metal food containers
Seaboard Carton Division of Nestlé Food Company	1988	Paperboard containers
Aim Packaging, Inc.	1989	Plastic containers
Fortune Plastics Inc.	1989	Plastic containers
Express Plastic Containers Limited	1989	Plastic containers
Amoco Container Company	1989	Plastic containers
Del Monte Corporation's U.S. can manufacturing operations	1993	Metal food containers
Food Metal and Specialty business of American National Can Company	1995	Metal food containers and metal closures
Finger Lakes Packaging Company, Inc., a subsidiary of Birds Eye Foods, Inc.	1996	Metal food containers
Alcoa Inc.'s North American aluminum roll-on closures business	1997	Aluminum roll-on closures
Rexam PLC's North American plastic container business	1997	Plastic containers and closures
Winn Packaging Co.	1998	Plastic containers
Campbell Soup Company's steel container manufacturing business	1998	Metal food containers
Clearpass Containers, Inc.	1998	Plastic containers
RXI Holdings, Inc.	2000	Plastic containers and plastic closures, caps, sifters and fitments
Thatcher Tubes LLC	2003	Plastic tubes
Amcor White Cap, LLC	2003	Metal, composite and plastic vacuum closures
Pacific Coast Producers' can manufacturing operations	2003	Metal food containers
Amcor White Cap (Europe, Asia and South America)	2006 - 2008	Metal, composite and plastic vacuum closures
Cousins-Currie Limited	2006	Plastic containers
Grup Vemsa 1857, S.L.'s metal vacuum closures operations in Spain and China	2008	Metal vacuum closures

Acquired Business	Year	Products
IPEC Global, Inc. and its subsidiaries	2010	Plastic closures
Vogel & Noot Holding AG's metal container operations	2011	Metal containers
DGS S.A.'s twist-off metal closures operations	2011	Metal vacuum closures
Nestlé Purina PetCare's metal container manufacturing operations	2011	Metal containers
Öntaş Öner Teneke Ambalaj Sanayi ve Ticaret A.S.	2012	Metal containers and metal vacuum closures
Rexam High Barrier Food Containers, Inc., Rexam PLC's plastic food container operations	2012	Plastic food containers
Amcor Packaging (Australia) Pty Ltd's metal vacuum closures operations in Australia	2013	Metal vacuum closures
Portola Packaging, Inc. and its subsidiaries	2013	Plastic closures
Tecnocap S.p.A.'s and Tecnocap LLC's metal vacuum closures operations in the U.S.	2013	Metal vacuum closures

In February 2013, we acquired the metal vacuum closures operations in Australia of Amcor Limited, or Amcor Australia Metal Closures, and we combined these operations with our closures operations in Southeast Asia.

In October 2013, we acquired Portola Packaging, Inc. and its subsidiaries, or Portola. Portola is a leading manufacturer of plastic closures for beverages and operates five plastic closure manufacturing facilities in the United States, Mexico, the United Kingdom and the Czech Republic. Portola also manufactures plastic bottles in three facilities in Canada, which facilities are now included in our plastic container business.

In December 2013, we acquired the U.S. metal vacuum closures operations of Tecnocap S.p.A. and Tecnocap LLC, or Tecnocap U.S. Metal Closures, and we combined these operations with our closures operations in the United States.

OUR STRATEGY

We intend to enhance our position as a leading manufacturer of consumer goods packaging products by continuing to aggressively pursue a strategy designed to achieve future growth and increase shareholder value by focusing on the following key elements:

SUPPLY "BEST VALUE" PACKAGING PRODUCTS WITH HIGH LEVELS OF QUALITY, SERVICE AND TECHNOLOGICAL SUPPORT

Since our inception, we have been, and intend to continue to be, devoted to consistently supplying our products with the combination of quality, price and service that our customers consider to be "best value." In our metal container business, we focus on providing high quality and high levels of service and utilizing our low cost producer position. We have made and are continuing to make significant capital investments to offer our customers value-added features such as our family of Quick Top® easy-open ends for our metal food containers, shaped metal food containers and alternative color offerings for metal food containers. In addition, we have begun to make investments for our Can Vision 2020SM program which are intended to enhance the competitive advantages of metal packaging for food. In our closures business, we emphasize high levels of quality, service and technological support. We believe our closures business is the premier innovative closures solutions provider to the food and beverage industry by offering customers an extensive variety of metal, composite and plastic closures, as well as proprietary equipment solutions such as cap feeders, cappers and detection systems to ensure high quality package safety. In our plastic container business, we provide high levels of quality and service and focus on value-added, custom designed plastic containers to meet changing product and packaging demands of our customers. We believe that we are one of the few plastic packaging businesses that can custom design, manufacture and decorate a wide variety of plastic containers and plastic tubes, providing the customer with the ability to satisfy more of its plastic packaging needs through one supplier. We will continue to supply customized products that can be delivered quickly to our customers with superior levels of design, development and technological support.

MAINTAIN LOW COST PRODUCER POSITION

We will continue pursuing opportunities to strengthen our low cost position in our business by:

- maintaining a flat, efficient organizational structure, resulting in low selling, general and administrative expenses as a percentage of consolidated net sales;
- achieving and maintaining economies of scale;
- prudently investing in new technologies to increase manufacturing and production efficiency;
- rationalizing our existing plant structure; and
- serving our customers from our strategically located plants.

Through our metal container facilities, we believe that we provide the most comprehensive manufacturing capabilities in the industry. Through our closures business, we manufacture an extensive variety of metal, composite and plastic closures for the food and beverage industry throughout the world utilizing state-of-the-art technology and equipment, and we provide our customers with state-of-the-art capping/sealing equipment and detection systems. Through our plastic container facilities, we have the capacity to manufacture customized products across the entire spectrum of resin materials, decorating techniques and molding processes required by our customers. We intend to leverage our manufacturing, design and engineering capabilities to continue to create cost-effective manufacturing systems that will drive our improvements in product quality, operating efficiency and customer support.

MAINTAIN AN OPTIMAL CAPITAL STRUCTURE TO SUPPORT GROWTH AND INCREASE SHAREHOLDER VALUE

Our financial strategy is to use reasonable leverage to support our growth and increase shareholder returns. Our stable and predictable cash flow, generated largely as a result of our long-term customer relationships and generally recession resistant business, supports our financial strategy. We intend to continue using reasonable leverage, supported by our stable cash flows, to make value enhancing acquisitions. In determining reasonable leverage, we evaluate our cost of capital and manage our level of debt to maintain an optimal cost of capital based on current market conditions. If acquisition opportunities are not identified over a longer period of time, we may use our cash flow to repay debt, repurchase shares of our common stock or increase dividends to our stockholders or for other permitted purposes. In March 2011, we funded the purchase price for the metal container operations of Vogel & Noot Holding AG, or VN, with Euro denominated borrowings under a previous senior secured credit facility, or our 2010 Credit Facility. In 2011, we also refinanced our 2010 Credit Facility with a new senior secured credit facility, or our 2011 Credit Facility, and we funded repurchases of our common stock for \$15.8 million and the purchase price for Nestlé Purina PetCare's steel container self-manufacturing assets, or Purina Steel Can, with cash on hand. In March 2012, we issued \$500 million of 5% Senior Notes due 2020, or the 5% Notes, and used part of the proceeds from that issuance to redeem all \$250 million of our 7¼% Senior Notes due 2016, or the 7¼% Notes. In 2012, we also funded repurchases of our common stock for \$34.1 million and the purchase price for our acquisitions of Öntaş Öner Teneke Ambalaj Sanayi ve Ticaret A.S., or Öntaş, and the plastic food container operations of Rexam PLC now operating under the name Silgan Plastic Food Containers, or PFC, with cash on hand. In 2013, we used cash on hand, revolving loan borrowings under our 2011 Credit Facility and other foreign bank revolving loans to fund repurchases of our common stock for \$267.6 million (which included \$250.0 million of our common stock purchased pursuant to a "modified Dutch auction" tender offer completed in February 2013), the purchase price for our acquisitions of Portola, Amcor Australia Metal Closures and Tecnocap U.S. Metal Closures and the repayment of \$300.9 million of term loans under our 2011 Credit Facility. In addition, we issued \$300 million of 5½% Senior Notes due 2022, or the 5½% Notes, in September 2013, the net proceeds of which were used to repay revolving loans under our 2011 Credit Facility. Additionally, in 2013 we commenced the refinancing of our 2011 Credit Facility, which we completed in January 2014 with our new senior secured credit facility, or the Credit Agreement. Our Credit Agreement refinanced all outstanding amounts under our 2011 Credit Facility and provides us with a \$985.6 million multicurrency revolving loan facility and a Cdn \$15.0 million revolving loan facility for working capital requirements and other strategic initiatives.

EXPAND THROUGH ACQUISITIONS AND INTERNAL GROWTH

We intend to continue to increase our market share in our current business lines and related business lines through acquisitions and internal growth. We use a disciplined approach to make acquisitions that generate attractive cash returns. As a result, we expect to continue to expand and diversify our customer base, geographic presence and product lines. This strategy has enabled us to increase our net sales and income from operations over the last ten years.

We are a leading manufacturer of metal containers in North America and Europe, primarily as a result of our acquisitions but also as a result of growth with existing customers. During the past twenty-seven years, the metal

4

food container market in North America has experienced significant consolidation primarily due to the desire by food processors to reduce costs and focus resources on their core operations rather than self-manufacture their metal food containers. Our acquisitions of the metal food container manufacturing operations of Nestlé Food Company, or Nestlé, The Dial Corporation, or Dial, Del Monte Corporation, or Del Monte, Birds Eye Foods, Inc., or Birds Eye, Campbell Soup Company, or Campbell, Pacific Coast Producers, or Pacific Coast, and, most recently, Purina Steel Can reflect this trend. We estimate that approximately five percent of the market for metal food containers in the United States is still served by self-manufacturers.

While we have expanded our metal container business and increased our market share of metal containers primarily through acquisitions and growth with existing customers, we have also made over the last several years, and are continuing to make, significant capital investments in our metal container business to enhance our business and offer our customers value-added features, such as our family of Quick Top® easy-open ends for metal food containers, shaped metal food containers and alternative color offerings for metal food containers. In 2013, approximately 65 percent of our metal food containers sold had an easy-open end. In addition, we have begun to make investments for our Can Vision 2020SM program which are intended to enhance the competitive advantages of metal packaging for food. We have also made significant capital investments to expand VN into new developing Eastern countries. With our acquisitions of our closures operations in North America, Europe, Asia and South America, we established ourselves as a leading worldwide manufacturer of metal, composite and plastic closures for food and beverage products, with leadership positions in the North American and European markets. In 2013 and 2012, we expanded the geographic scope, product offerings and scale of our closures business with the acquisitions of Portola, Amcor Australia Metal Closures, Tecnocap U.S. Metal Closures and Öntaş. We may pursue further consolidation opportunities in the closures markets in which we operate. Additionally, we expect to continue to generate internal growth in our closures business, particularly in plastic closures. In making investments for internal growth, we use a disciplined approach to pursue internal growth in order to generate attractive cash returns.

We have grown our market position for our plastic container business since 1987, with net sales increasing sevenfold to \$647.0 million in 2013. We achieved this improvement primarily through strategic acquisitions as well as through internal growth. In 2012, we completed the strategic acquisition of PFC, broadening our product offerings for shelf-stable food products to include plastic thermoformed barrier and non-barrier bowls and trays. As part of the acquisition of Portola in 2013, we acquired three plastic container manufacturing facilities in Canada, further expanding the geographic scope and product offerings of our plastic container business. The plastic containers segment of the consumer goods packaging industry continues to be highly fragmented, and we intend to pursue further consolidation opportunities in this market. Over the long term, we also expect to continue to generate internal growth in our plastic container business. As with acquisitions, we use a disciplined approach to pursue internal growth in order to generate attractive cash returns. Through a combination of these efforts, we intend to continue to expand our customer base in the markets that we serve, such as the personal care, food, health care, pharmaceutical, household and industrial chemical, pet care, agricultural chemical, automotive and marine chemical markets.

ENHANCE PROFITABILITY THROUGH PRODUCTIVITY IMPROVEMENTS AND COST REDUCTIONS

We intend to continue to enhance profitability through productivity and cost reduction opportunities. The additional sales and production capacity provided through acquisitions have enabled us to rationalize plant operations and decrease overhead costs through plant closings and downsizings. From 2009, we have closed two metal container manufacturing facilities, one closure manufacturing facility and three plastic container manufacturing facilities in connection with our continuing efforts to streamline our plant operations, reduce operating costs and better match supply with geographic demand. In addition, we have consolidated various positions in our corporate offices across all businesses to further enhance profitability.

We would expect that most future acquisitions will continue to enable us to realize manufacturing efficiencies as a result of optimizing production scheduling and other benefits from economies of scale and the elimination of redundant selling and administrative functions. In addition to the benefits realized through the integration of acquired businesses, we have improved and expect to continue to improve the operating performance of our plant facilities by investing capital for productivity improvements and manufacturing cost reductions. While we have made some of these investments in certain of our plants, more opportunities still exist throughout our system. We will continue to use a disciplined approach to identify these opportunities to generate attractive cash returns.

BUSINESS SEGMENTS

We are a holding company that conducts our business through various operating subsidiaries. We operate three businesses, our metal container business, our closures business and our plastic container business.

METAL CONTAINERS—63.1 PERCENT OF OUR CONSOLIDATED NET SALES IN 2013

We are a leading manufacturer of metal containers in North America and Europe, and in North America we are the largest manufacturer of metal food containers with a unit volume market share in the United States in 2013 of approximately half of the market. Our metal container business is engaged in the manufacture and sale of steel and aluminum containers that are used primarily by processors and packagers for food products, such as soup, vegetables, fruit, meat, tomato based products, coffee, seafood, adult nutritional drinks, pet food and other miscellaneous food products, as well as general line metal containers primarily for chemicals. We have 44 metal container manufacturing facilities located in the United States, Europe and Asia, serving over 50 countries throughout the world. For 2013, our metal container business had net sales of \$2.34 billion (approximately 63.1 percent of our consolidated net sales) and income from operations of \$236.3 million (approximately 69.9 percent of our consolidated income from operations excluding corporate expense). We estimate that approximately 90 percent of our projected North American metal container sales in 2014 will be pursuant to multi-year customer supply arrangements.

Although metal containers face competition from plastic, paper, glass and composite containers, we believe metal containers are superior to plastic, paper and composite containers in applications where the contents are processed at high temperatures, or packaged in larger consumer or institutional quantities, or where the long-term storage of the product is desirable while maintaining the product's quality. We also believe that metal containers are generally more desirable than glass containers because metal containers are more durable and less costly to transport. Additionally, while the market for metal food containers in the United States has experienced little or no growth over the last ten years, we have increased our market share of metal food containers in the United States primarily through acquisitions and growth with existing customers, and have enhanced our business by focusing on providing customers with high quality, high levels of service and value-added features such as our family of Quick Top® easy-open ends, shaped metal food containers and alternative color offerings for metal food containers. In addition, we have begun to make investments for our Can Vision 2020SM program which are intended to enhance the competitive advantages of metal packaging for food.

CLOSURES—19.4 PERCENT OF OUR CONSOLIDATED NET SALES IN 2013

We are a leading worldwide manufacturer of metal, composite and plastic closures for food and beverage products. Our closures business provides customers with an extensive variety of proprietary metal, composite and plastic closures that ensure closure quality and safety, as well as state-of-the-art capping/sealing equipment and detection systems to complement our closures product offering. We have 20 closure manufacturing facilities located in North America, Europe, Asia and South America, from which we serve over 70 countries throughout the world. In addition, we license our technology to five other manufacturers for various markets we do not serve directly. For 2013, our closures business had net sales of \$720.1 million (approximately 19.4 percent of our consolidated net sales) and income from operations of \$63.0 million (approximately 18.7 percent of our consolidated income from operations excluding corporate expense).

We manufacture metal, composite and plastic closures for food and beverage products, such as juices and juice drinks, ready-to-drink teas, sports and energy drinks, dairy products, ketchup, salsa, pickles, tomato sauce, soup, cooking sauces, gravies, fruits, vegetables, preserves, baby food, baby juices and infant formula products. We provide customers of our closures business with custom formulations of sealing/lining materials, designed to minimize removal torques and to enhance openability of our closures while meeting applicable regulatory requirements. We offer our customers an extensive range of printing options for our closures. We also provide customers with sealing/capping equipment and detection systems to complement our closures product offering for food and beverage products. As a result of our extensive range of closures, our geographic presence and our focus on providing high levels of quality, service and technological support, we believe that we are uniquely positioned to serve food and beverage product companies for their closure needs.

PLASTIC CONTAINERS—17.5 PERCENT OF OUR CONSOLIDATED NET SALES IN 2013

We produce plastic containers from a full range of resin materials and offer a comprehensive array of molding and decorating capabilities. We are one of the leading manufacturers of custom designed high density polyethylene, or

HDPE, and polyethylene terephthalate, or PET, containers for the personal care market in North

6

America. Through our acquisition of PFC, we are also a leading manufacturer in North America of plastic thermoformed barrier and non-barrier bowls and trays for shelf-stable food products. We operate 24 plastic container manufacturing facilities in the United States and Canada. For 2013, our plastic container business had net sales of \$647.0 million (approximately 17.5 percent of our consolidated net sales) and income from operations of \$38.6 million (approximately 11.4 percent of our consolidated income from operations excluding corporate expense). Since 1987, we have improved our market position for our plastic container business, with net sales increasing sevenfold. We manufacture custom designed and stock plastic containers for personal care and health care products, including containers for mouthwash, shampoos, conditioners, hand creams, lotions, liquid soap, respiratory and gastrointestinal products, cosmetics and toiletries; food and beverage products, including peanut butter, salad dressings, condiments, dairy products, powdered drink mixes and liquor; household and industrial chemical products, including containers for scouring cleaners, cleaning agents and lawn, garden and agricultural chemicals; and pharmaceutical products, including containers for tablets, antacids and eye cleaning solutions. We also manufacture plastic tubes primarily for personal care products such as skin lotions and hair treatment products, and plastic closures, caps, sifters and fitments for food and household products, including salad dressings, peanut butter, spices, liquid margarine, powdered drink mixes and arts and crafts supplies. In addition, we manufacture plastic thermoformed barrier and non-barrier bowls and trays for food products, such as soups and other ready-to-eat meals and pet food, as well as thermoformed plastic tubs for personal care and household products, including soft fabric wipes.

Our leading position in the plastic container market is largely driven by our rapid response to our customers' design, development and technology support needs and our value-added, diverse product line. This product line is the result of our ability to produce plastic containers from a full range of resin materials using a broad array of manufacturing, molding and decorating capabilities. We also have the ability to manufacture decorated plastic tubes for our customers, providing our customers with the ability to satisfy more of their plastic packaging needs through one supplier. We benefit from our large scale and nationwide presence, as significant consolidation is occurring in many of our customers' markets. Through these capabilities, we are well-positioned to serve our customers, who demand customized solutions as they continue to seek innovative means to differentiate their products in the marketplace using packaging.

MANUFACTURING AND PRODUCTION

As is the practice in the industry, most of our customers provide us with quarterly or annual estimates of products and quantities pursuant to which periodic commitments are given. These estimates enable us to effectively manage production and control working capital requirements. We schedule our production to meet customers' requirements. Because the production time for our products is short, the backlog of customer orders in relation to our sales is not material.

As of February 1, 2014, we operated a total of 88 manufacturing facilities in 23 different countries throughout the world that serve the needs of our customers.

METAL CONTAINER BUSINESS

The manufacturing operations of our metal container business include cutting, coating, lithographing, fabricating, assembling and packaging finished cans. We use three basic processes to produce cans. The traditional three-piece method requires three pieces of flat metal to form a cylindrical body with a welded side seam, a bottom and a top. High integrity of the side seam is assured by the use of sophisticated electronic weld monitors and organic coatings that are thermally cured by induction and convection processes. The other two methods of producing cans start by forming a shallow cup that is then formed into the desired height using either the draw and iron process or the draw and redraw process. Using the draw and redraw process, we manufacture steel and aluminum two-piece cans, the height of which generally does not exceed the diameter. For cans the height of which is greater than the diameter, we manufacture steel two-piece cans by using a drawing and ironing process. Quality and stackability of these cans are comparable to that of the shallow two-piece cans described above. We manufacture can bodies and ends from thin, high-strength aluminum alloys and steels by utilizing proprietary tool and die designs and selected can making equipment. We also manufacture our Quick Top® easy-open ends from both steel and aluminum alloys in a sophisticated precision progressive die process. We regularly review our Quick Top® easy-open end designs for improvements for optimum consumer preference through consumer studies and feedback.

CLOSURES BUSINESS

The manufacturing operations for metal closures include cutting, coating, lithographing, fabricating and lining. We manufacture twist-off, lug style and press-on, twist-off steel closures and aluminum roll-on closures for glass, metal and plastic containers, ranging in size from 18 to 110 millimeters in diameter. We employ state-of-the-art multi-die presses to manufacture metal closures, offering a low-cost, high quality means of production. We also provide customers of our closures business with custom formulations of sealing/lining materials, designed to minimize torque removal and enhance the openability of our closures while meeting applicable regulatory requirements.

We utilize two basic processes to produce plastic closures. In the injection molded process, pellets of plastic resin are heated and injected into a mold, forming a plastic closure shell. The shell can be lined with a linerless seal mechanism or a custom formulated, compression molded sealing system, and then printed depending on its end use. In the compression molded process, pellets of plastic resin are heated and extruded, and then compressed to form a plastic closure shell. The shell can be lined with a linerless seal mechanism or a custom formulated, compression molded sealing system, slit, and then printed depending on its end use. In either process, the shell can also be lined with foil seal systems formulated for its end use.

For composite closures, a metal panel is manufactured using the same manufacturing process for metal closures, including the use of custom formulations of sealing/lining materials, and then it is inserted into a plastic closure shell.

PLASTIC CONTAINER BUSINESS

We utilize two basic processes to produce plastic containers. In the extrusion blowmolding process, pellets of plastic resin are heated and extruded into a tube of plastic. A two-piece metal mold is then closed around the plastic tube and high pressure air is blown into it causing a bottle to form in the mold's shape. In the injection and injection stretch blowmolding processes, pellets of plastic resin are heated and injected into a mold, forming a plastic preform. The plastic preform is then blown into a bottle-shaped metal mold, creating a plastic bottle.

In our proprietary plastic tube manufacturing process, we continually extrude a plastic tube in various diameters from pellets of plastic resin. A neck finish is then compression molded onto the plastic tube. The plastic tube is then decorated, and a cap or closure is put on the decorated plastic tube before it is shipped to the customer. Our process permits us to produce multi-layer tubes with barrier in the neck.

We also manufacture plastic closures, caps, sifters and fitments using runnerless injection molding technology. In this process, pellets of plastic resin are melted and forced under pressure into a mold, where they take the mold's shape. Our plastic thermoformed bowls, trays and tubs are manufactured by melting pellets of plastic resin into an extruded plastic sheet. The plastic sheet is then formed in a mold to make the plastic bowl, tray or tub.

We have state-of-the-art decorating equipment, including several of the largest sophisticated decorating facilities in the United States. Our decorating methods for plastic containers are in-mold labeling, which applies a plastic film label to the bottle during the blowing process, and post-mold decoration. For plastic tubes, we offer all commercially available post-mold decoration technologies. Post-mold decoration includes:

- silk screen decoration which enables the applications of images in multiple colors to the bottle;
- pressure sensitive decoration which uses a plastic film or paper label with an adhesive;
- heat transfer decoration which uses a plastic coated label applied by heat;
- hot stamping decoration which transfers images from a die using metallic foils; and
- shrink sleeve labeling.

RAW MATERIALS

Based upon our existing arrangements with suppliers and our current and anticipated requirements, we believe that we have made adequate provisions for acquiring our raw materials. As a result of significant consolidation of suppliers, we are, however, dependent upon a limited number of suppliers for our steel, aluminum, coatings and compound raw materials. Increases in the prices of raw materials have generally been passed along

to our customers in accordance with our multi-year customer supply arrangements and through general price increases.

METAL CONTAINER BUSINESS

We use tinplated and chromium plated steel, aluminum, copper wire, organic coatings, lining compound and inks in the manufacture and decoration of our metal container products. Although there has been significant consolidation of suppliers, we believe that we have made adequate provisions to purchase sufficient quantities of these raw materials for the foreseeable future.

Our metal container supply arrangements with our customers in the United States provide for the pass through of changes in our metal costs. For our non-contract domestic customers, we have also generally increased prices to pass through increases in our metal costs. In Europe, most supply arrangements are negotiated annually, and we generally pass along changes in our raw material costs to customers. Although no assurances can be given, we expect to be able to purchase sufficient quantities of metal to timely meet all of our customers' requirements in 2014.

Our material requirements are supplied through agreements and purchase orders with suppliers with whom we have long-term relationships. If our suppliers fail to deliver under their arrangements, we would be forced to purchase raw materials on the open market, and no assurances can be given that we would be able to purchase such raw materials or, if we are so able, that we would be able to purchase such raw materials at comparable prices or terms.

CLOSURES BUSINESS

We use tinplated and chromium plated steel, aluminum, organic coatings, low-metallic inks and pulpboard, plastic and organic lining materials in the manufacture of metal closures.

We use resins in pellet form, such as homopolymer polypropylene, copolymer polypropylene and HDPE, thermoplastic elastomer lining materials, processing additives and colorants in the manufacture of plastic closures.

Our domestic closures operations have generally passed along to customers changes in the prices of metal and resin raw materials in accordance with supply arrangements. For non-contract customers, our domestic closures operations have also generally passed through changes in our metal and resin costs. In Europe, most supply arrangements are negotiated annually, and we generally pass along changes in our raw material costs to customers. Although no assurances can be given, we believe we have made adequate provisions to purchase sufficient quantities of these raw materials for the foreseeable future, despite the significant consolidation of suppliers.

PLASTIC CONTAINER BUSINESS

The raw materials we use in our plastic container business are primarily resins in pellet form such as virgin HDPE, virgin PET, recycled HDPE, recycled PET, polypropylene and, to a lesser extent, polystyrene, low density polyethylene, polyethylene terephthalate glycol, polyvinyl chloride and medium density polyethylene. Our resin requirements are acquired through multi-year arrangements for specific quantities of resins with several major suppliers of resins. The price that we pay for resin raw materials is not fixed and is subject to market pricing, which has fluctuated significantly in the past few years. Our plastic container business has passed along to our customers changes in the prices of our resin raw materials in accordance with customer supply arrangements.

We believe that we have made adequate provisions to purchase sufficient quantities of resins for the foreseeable future, absent unforeseen events such as significant hurricanes.

SALES AND MARKETING

Our philosophy has been to develop long-term customer relationships by acting in partnership with our customers, providing reliable quality and service. We market our products primarily by a direct sales force and for our plastic container business, in part, through a network of distributors. Because of the high cost of transporting empty containers, our metal container business generally sells to customers within a 300 mile radius of its manufacturing plants.

In 2013, 2012 and 2011, approximately 12 percent, 12 percent and 11 percent, respectively, of our consolidated net sales were to Nestlé, and approximately 10 percent of our consolidated net sales in each such

year were to Campbell. No other customer accounted for more than 10 percent of our total consolidated net sales during those years.

You should also read “Risk Factors—We face competition from many companies and we may lose sales or experience lower margins on sales as a result of such competition” included elsewhere in this Annual Report.

METAL CONTAINER BUSINESS

We are a leading manufacturer of metal containers in North America and Europe, and in North America we are the largest manufacturer of metal food containers with a unit volume market share in the United States in 2013 of approximately half of the market. We have 44 metal container manufacturing facilities located in the United States, Europe and Asia, serving over 50 countries throughout the world, which includes several new facilities in developing Eastern countries. Our largest customers for these products include Campbell, ConAgra Foods, Inc., Del Monte, General Mills, Inc., Hormel Foods Corporation, or Hormel, Mars, Incorporated, Nestlé, Pacific Coast, Pinnacle Foods Group LLC, Stanislaus Food Products Company and Treehouse Foods, Inc.

We have entered into multi-year supply arrangements with many of our customers, including Nestlé, Campbell and other food producers. We estimate that approximately 90 percent of our projected North American metal container sales in 2014 will be pursuant to multi-year customer supply arrangements. Historically, we have been successful in continuing these multi-year customer supply arrangements. In Europe, our metal container business has had long-term relationships with many of its customers, although, as is common practice, many supply arrangements are negotiated on a year-by-year basis.

Since our inception in 1987, we have supplied Nestlé with substantially all of its U.S. metal food container requirements purchased from third party manufacturers. Our net sales of metal food containers to Nestlé in 2013 were \$425.5 million. We have a supply agreement with Nestlé for a substantial portion of the metal food containers we supply Nestlé, which agreement runs through December 2019. In September 2011, we acquired Purina Steel Can from Nestlé and consolidated such assets into our existing metal container facilities in the United States. In connection with this acquisition, we entered into a long-term supply agreement with Nestlé that runs through December 2021 for the steel container volume previously manufactured by Purina Steel Can. In addition to these supply agreements, other metal food containers that we sell to Nestlé are supplied pursuant to a shorter-term supply agreement. Each of these supply agreements provide for certain prices and specify that those prices will be increased or decreased based upon cost change formulas.

Since our acquisition of Campbell's steel container manufacturing operations in June 1998, we have supplied Campbell with substantially all of its steel container requirements used for the packaging of foods and beverages in the United States pursuant to the terms of a supply agreement entered into at the time of such acquisition and extended in 2004. In April 2005, Campbell exercised its right to expand our supply agreement to include Campbell's steel container requirements in Canada. In 2013, our net sales of metal food containers to Campbell were \$323.3 million. Effective January 1, 2014, we entered into a new ten year supply agreement with Campbell for substantially all of its steel container requirements used for the packaging of foods and beverages in the United States and Canada, which new supply agreement replaced our prior supply agreement with Campbell. Our new supply agreement with Campbell runs through December 2023 and provides for certain prices for metal containers supplied by us to Campbell and specifies that those prices will be increased or decreased based upon cost change formulas. As provided in the new supply agreement, Campbell may receive limited proposals during the term of the new supply agreement from independent commercial can manufacturers for the supply of metal containers to Campbell, which proposals must satisfy certain requirements as specified in the new supply agreement. We have the right to retain the business subject to the terms of the competitive proposal and the terms of the new supply agreement. Upon any material breach by us, Campbell has the right to terminate the new supply agreement. At the end of the term of the new supply agreement or upon the occurrence of certain other specified limited circumstances under the new supply agreement, Campbell has the right to purchase from us the assets located at the three former Campbell facilities used to manufacture metal containers for Campbell, at a purchase price to be determined at the time of purchase in accordance with an agreed upon formula as provided in the new supply agreement.

Our metal container business' sales and income from operations are dependent, in part, upon the vegetable and fruit harvests in the midwest and western regions of the United States and, to a lesser extent, in a variety of national growing regions in Europe. The size and quality of these harvests varies from year to year, depending in large part

upon the weather conditions in those regions. Because of the seasonality of the harvests, we have

10

historically experienced higher unit sales volume in the third quarter of our fiscal year and generated a disproportionate amount of our annual income from operations during that quarter. You should also read “Risk Factors—The seasonality of the fruit and vegetable packing industry causes us to incur short term debt” included elsewhere in this Annual Report.

CLOSURES BUSINESS

We are a leading worldwide manufacturer of metal, composite and plastic closures for food and beverage products. We have 20 closure manufacturing facilities located in North America, Europe, Asia and South America, from which we serve over 70 countries throughout the world.

Our largest customers of our closures business include Andros Group, Campbell, The Coca-Cola Company, Dean Foods Company, Dr Pepper Snapple Group, Inc., Heinz Group, Hipp GmbH & CoKG, The J.M. Smucker Company, MillerCoors LLC, Nestlé Group, PepsiCo Inc., Treehouse Foods, Inc. and Unilever N.V. We have multi-year supply arrangements with many of our customers in the United States. Outside of the United States, the closures business has had long-term relationships with most of its customers, although, as is common practice, many supply arrangements are negotiated on a year-by-year basis.

In addition, we license our technology to five other manufacturers who supply products in China, India, Israel, Korea, Malaysia, Maldives, South Africa, Sri Lanka, Taiwan and Thailand.

PLASTIC CONTAINER BUSINESS

We are one of the leading manufacturers of custom designed and stock plastic containers sold in North America for a variety of markets, including the personal care, food, health care and household and industrial chemical markets. We are also a leading manufacturer in North America of plastic thermoformed barrier and non-barrier bowls and trays for shelf-stable food products. We market our plastic containers, tubes and closures in most areas of North America through a direct sales force and a large network of distributors. We also market certain stock plastic containers for personal care and health care products through an on-line shopping catalog.

Our largest customers for our plastic container business include Berlin Packaging LLC, Campbell, The Clorox Company, ConAgra Foods, Inc., Johnson & Johnson, Kraft Foods, Inc., L’Oréal, Mars, Incorporated, McCormick & Company, Inc., Merck & Co., Inc., The Procter & Gamble Company, The Scotts Company LLC, Treehouse Foods, Inc., TricorBraun, Unilever N.V. and Vi-Jon Laboratories, Inc.

We have arrangements to sell some of our plastic containers and closures to distributors, who in turn resell those products primarily to regional customers. Plastic containers sold to distributors are generally manufactured by using generic and custom molds with decoration added to meet the end users’ requirements. The distributors’ warehouses and their sales personnel enable us to market and inventory a wide range of such products to a variety of customers.

We have written purchase orders or contracts for the supply of containers with the majority of our customers. In general, these purchase orders and contracts are for containers made from proprietary molds and are for a duration of one to five years.

COMPETITION

The packaging industry is highly competitive. We compete in this industry with manufacturers of similar and other types of packaging, as well as fillers, food processors and packers who manufacture containers for their own use and for sale to others. We attempt to compete effectively through the quality of our products, competitive pricing and our ability to meet customer requirements for delivery, performance and technical assistance.

METAL CONTAINER BUSINESS

Of the commercial metal container manufacturers, Ardagh Group, Ball Corporation, Crown Holdings, Inc. and Mivisa Envases, S.A.U. are our most significant competitors. As an alternative to purchasing containers from commercial can manufacturers, customers have the ability to invest in equipment to self-manufacture their containers.

Because of the high cost of transporting empty containers, our metal container business generally sells to customers within a 300 mile radius of its manufacturing plants. Strategically located existing plants give us an

advantage over competitors from other areas, but we could be potentially disadvantaged by the relocation of a major customer.

Although metal containers face competition from plastic, paper, glass and composite containers, we believe that metal containers are superior to plastic, composite and paper containers in applications, where the contents are processed at high temperatures or packaged in larger consumer or institutional quantities or where long-term storage of the product is desirable while maintaining the product's quality. We also believe that metal containers are more desirable generally than glass containers because metal containers are more durable and less costly to transport.

CLOSURES BUSINESS

Our closures business competes primarily with Bericap Group, Berry Plastics Corporation, Closures Systems International, Inc. (part of Rank Group Limited), Crown Holdings, Inc., Groupe Massilly and Tecnocap S.p.A. With our ability to manufacture an extensive range of metal, composite and plastic closures as well as state-of-the-art capping/sealing equipment and detection systems and our geographic presence, we believe we are uniquely positioned to serve food and beverage product companies for their closure needs.

PLASTIC CONTAINER BUSINESS

Our plastic container business competes with a number of large national producers of plastic containers, tubes and closures for personal care, food, health care, pharmaceutical, household and industrial chemical, pet care, agricultural chemical, automotive and marine chemical products. These competitors include Alpha Plastics, Inc., Alpla-Werke Alwin Lehner GmbH & Co., Amcor PET Packaging, Berry Plastics Corporation, CCL Industries Inc., Cebal Americas, Consolidated Container Company LLC, Graham Packaging Company Inc. (part of Rank Group Limited), Plastipak Packaging Inc. and Sonoco Products Company. To compete effectively in the constantly changing market for plastic containers, tubes and closures, we must remain current with, and to some extent anticipate, innovations in resin composition and applications and changes in the technology for the manufacturing of plastic containers, tubes and closures.

EMPLOYEES

As of December 31, 2013, we employed approximately 2,500 salaried and 7,000 hourly employees on a full-time basis. Approximately 44 percent of our hourly plant employees in the United States and Canada as of that date were represented by a variety of unions, and most of our hourly employees in Europe, Asia, South America and Central America were represented by a variety of unions or other labor organizations. In addition, as of December 31, 2013, Campbell provided us with approximately 110 hourly employees on a full-time basis at one of the facilities that we lease from Campbell.

Our labor contracts expire at various times between 2014 and 2017. As of December 31, 2013, contracts covering approximately 12 percent of our hourly employees in the United States and Canada will expire during 2014. We expect no significant changes in our relations with these unions.

ENVIRONMENTAL AND OTHER REGULATIONS

We are subject to federal, foreign, state and local environmental laws and regulations. In general, these laws and regulations limit the discharge of pollutants into the environment and establish standards for the treatment, storage, and disposal of solid and hazardous waste. We believe that we are either in compliance in all material respects with all presently applicable environmental laws and regulations or are operating in accordance with appropriate variances, schedules under compliance orders or similar arrangements.

In addition to costs associated with regulatory compliance, we may be held liable for alleged environmental damage associated with the past disposal of hazardous substances. Those that generate hazardous substances that are disposed of at sites at which environmental problems are alleged to exist, as well as the owners of those sites and other classes of persons, are subject to claims for clean up and natural resource damages under the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, or CERCLA, regardless of fault or the legality of the original disposal. CERCLA and many similar state and foreign statutes may hold a responsible party liable for the entire cleanup cost at a particular site even though that party may not have caused the entire problem. Other state statutes may impose proportionate rather than joint and several liability. The federal Environmental Protection Agency or a state or foreign agency may also issue orders requiring responsible parties to undertake removal or remedial actions at sites.

We are also subject to the Occupational Safety and Health Act and other federal, foreign, state and local laws regulating noise exposure levels and other safety and health concerns in the production areas of our plants. While management does not believe that any of the regulatory matters described above, individually or in the aggregate, will have a material effect on our capital expenditures, earnings, financial position or competitive position, we cannot assure you that a material environmental or other regulatory claim will not arise in the future.

RESEARCH AND PRODUCT DEVELOPMENT

Our research, product development and product engineering efforts relating to our metal container business are conducted at our research facilities in Oconomowoc, Wisconsin. Our research, product development and product engineering efforts relating to our metal, composite and plastic closures business for food and beverage products are conducted at our research facilities in Downers Grove, Illinois and Hannover, Germany. Our research, product development and product engineering efforts with respect to our plastic container business are performed by our manufacturing and engineering personnel located at our Norcross, Georgia facility. In addition to research, product development and product engineering, these sites also provide technical support to our customers. The amounts we have spent on research and development during the last three fiscal years are not material.

We rely on a combination of patents, trade secrets, unpatented know-how, technological innovation, trademarks and other intellectual property rights, nondisclosure agreements and other protective measures to protect our intellectual property. We do not believe that any individual item of our intellectual property portfolio is material to our business. We employ various methods, including confidentiality agreements and nondisclosure agreements, with third parties, employees and consultants to protect our trade secrets and know-how. However, others could obtain knowledge of our trade secrets and know-how through independent development or other means.

FINANCIAL INFORMATION ABOUT SEGMENTS AND GEOGRAPHIC AREAS

Financial and other information by segment and relating to geographic areas for the fiscal years ended December 31, 2013, December 31, 2012 and December 31, 2011 is set forth in Note 16 to our Consolidated Financial Statements for the year ended December 31, 2013 included elsewhere in this Annual Report.

For the year ended December 31, 2013, our foreign operations for all our businesses generated \$783.0 million of net sales, which represents approximately 21 percent of our consolidated net sales worldwide. For a discussion of risks attendant to our foreign operations, see “Risk Factors—Global economic conditions, disruptions in the credit markets and the instability of the Euro could adversely affect our business, financial condition or results of operations,” “Risk Factors—Our international operations are subject to various risks that may adversely affect our financial results” and “Risk Factors—We are subject to the effects of fluctuations in foreign currency exchange rates” included elsewhere in this Annual Report, as well as “Quantitative and Qualitative Disclosures about Market Risk—Foreign Currency Exchange Rate Risk” included elsewhere in this Annual Report.

AVAILABLE INFORMATION

We file annual reports on Form 10-K, quarterly reports on Form 10-Q and current reports on Form 8-K, proxy statements and other information with the Securities and Exchange Commission, or the SEC. You may read and copy any materials we file with the SEC at the SEC’s Public Reference Room at 100 F Street, N.E., Room 1580, Washington, D.C. 20549. You may obtain information on the operation of the SEC’s Public Reference Room by calling the SEC at 1-800-SEC-0330. The SEC maintains a website that contains annual, quarterly and current reports, proxy statements and other information that issuers (including the Company) file electronically with the SEC. The Internet address of the SEC’s website is <http://www.sec.gov>.

We maintain a website, the Internet address of which is <http://www.silganholdings.com>. Information contained on our website is not part of this Annual Report. We make available free of charge on or through our website our annual reports on Form 10-K, quarterly reports on Form 10-Q and current reports on Form 8-K (and any amendments to those reports) and Forms 3, 4 and 5 filed on behalf of our directors and executive officers as soon as reasonably practicable after such documents are electronically filed with, or furnished to, the SEC.

ITEM 1A. RISK FACTORS.

The following are certain risk factors that could materially and adversely affect our business, financial condition or results of operations. Additional risks and uncertainties not currently known to us or that we currently view as immaterial may also materially and adversely affect our business, financial condition or results of operations.

OUR INDEBTEDNESS COULD ADVERSELY AFFECT OUR CASH FLOW.

At December 31, 2013, we had \$1,703.8 million of total consolidated indebtedness. We incurred much of this indebtedness as a result of financing acquisitions and refinancing our previously outstanding debt. In addition, we have up to \$985.6 million and Cdn \$15.0 million of revolving loans that we may borrow under our Credit Agreement. We also have available to us under our Credit Agreement an uncommitted multicurrency incremental loan facility in an amount of up to an additional \$1.25 billion (which amount may be increased as provided under our Credit Agreement), and we may incur additional indebtedness as permitted by our Credit Agreement and our other instruments governing our indebtedness.

A significant portion of our cash flow must be used to service our indebtedness and is therefore not available to be used in our business. In 2013, we paid \$58.0 million in interest on our indebtedness. Our ability to generate cash flow is subject to general economic, financial, competitive, legislative, regulatory and other factors that may be beyond our control. In addition, a substantial portion of our indebtedness bears interest at floating rates, and therefore a substantial increase in interest rates could adversely impact our results of operations. Based on the average outstanding amount of our variable rate indebtedness in 2013, a one percentage point change in the interest rates for our variable rate indebtedness would have impacted our 2013 interest expense by an aggregate of approximately \$10.0 million, after taking into account the average outstanding notional amount of our interest rate swap agreements during 2013.

Our indebtedness could have important consequences. For example, it could:

- increase our vulnerability to general adverse economic and industry conditions;
- require us to dedicate a significant portion of our cash flow from operations to payments on our indebtedness, thereby reducing the availability of our cash flow to fund working capital, acquisitions and capital expenditures, and for other general corporate purposes;
- limit our flexibility in planning for, or reacting to, changes in our business and the industry in which we operate;
- restrict us from making strategic acquisitions or exploiting business opportunities; and
- limit, along with the financial and other restrictive covenants in our indebtedness, among other things, our ability to borrow additional funds.

DESPITE OUR CURRENT LEVELS OF INDEBTEDNESS, WE MAY INCUR ADDITIONAL DEBT IN THE FUTURE, WHICH COULD INCREASE THE RISKS ASSOCIATED WITH OUR LEVERAGE.

We are continually evaluating and pursuing acquisition opportunities in the consumer goods packaging market and may incur additional indebtedness, including indebtedness under our Credit Agreement, to finance any such acquisitions and to fund any resulting increased operating needs. If new debt is added to our current debt levels, the related risks we now face could increase. We will have to effect any new financing in compliance with the agreements governing our then existing indebtedness. The indentures governing the 5% Notes and the 5½% Notes do not restrict our ability to incur additional indebtedness.

THE TERMS OF OUR DEBT INSTRUMENTS RESTRICT THE MANNER IN WHICH WE CONDUCT OUR BUSINESS AND MAY LIMIT OUR ABILITY TO IMPLEMENT ELEMENTS OF OUR GROWTH STRATEGY.

Our Credit Agreement contains numerous covenants, including financial and operating covenants, some of which are quite restrictive. These covenants affect, and in many respects limit, among other things, our ability to:

- incur additional indebtedness;
- create liens;

- consolidate, merge or sell assets;
- make certain advances, investments and loans;
- enter into certain transactions with affiliates; and
- engage in any business other than the packaging business and certain related businesses.

The indentures governing the 5% Notes and the 5½% Notes contain certain covenants that also restrict our ability to create liens, engage in sale and leaseback transactions and consolidate, merge or sell assets. These covenants could restrict us in the pursuit of our growth strategy.

GLOBAL ECONOMIC CONDITIONS, DISRUPTIONS IN THE CREDIT MARKETS AND THE INSTABILITY OF THE EURO COULD ADVERSELY AFFECT OUR BUSINESS, FINANCIAL CONDITION OR RESULTS OF OPERATIONS.

In the recent past, the global financial markets have experienced substantial disruption, including, among other things, volatility in securities prices, diminished liquidity and credit availability, rating downgrades of certain investments and declining valuations of others. Additionally, the global economy experienced a recession, and economic weakness has generally continued in European markets. If such economic conditions, disruption of global financial markets and tightening of credit in the financial markets were to occur again, then, among other risks we face, our business, financial condition, results of operations and ability to obtain additional financing in the future, including on terms satisfactory to us, could be adversely affected.

Economic conditions and disruptions in the credit markets could also harm the liquidity or financial position of our customers or suppliers, which could in turn cause such parties to fail to meet their contractual or other obligations to us or reduce our customers' purchases from us, any of which could negatively affect our business, financial condition or results of operations. Additionally, under such circumstances, the creditworthiness of the counterparties to our interest rate and commodity pricing transactions could deteriorate, thereby increasing the risk that such counterparties fail to meet their contractual obligations to us.

Additionally, there has been concern regarding the overall stability of the Euro and the future of the Euro as a single currency given the diverse economic and political circumstances in individual Eurozone countries. Potential negative developments (such as a Eurozone country in which we operate replacing the Euro with its own currency) and market perceptions related to the Euro could adversely affect the value of our Euro-denominated assets, reduce the amount of our translated amounts of U.S. dollar revenue and income from operations, negatively impact our indebtedness in any such Eurozone country (including our ability to refinance such indebtedness) and otherwise negatively affect our business, financial condition or results of operations.

WE FACE COMPETITION FROM MANY COMPANIES AND WE MAY LOSE SALES OR EXPERIENCE LOWER MARGINS ON SALES AS A RESULT OF SUCH COMPETITION.

The manufacture and sale of metal and plastic containers and closures is highly competitive. We compete with other manufacturers of metal and plastic containers and closures and manufacturers of alternative packaging products, as well as packaged goods companies who manufacture containers and closures for their own use and for sale to others. We compete primarily on the basis of price, quality and service. To the extent that any of our competitors is able to offer better prices, quality and/or services, we could lose customers and our sales and margins may decline.

Approximately 90 percent of our North American metal container sales, a majority of sales of our domestic closures operations and a majority of sales of our plastic container business in 2013 were pursuant to multi-year supply arrangements. In general, many of these arrangements provide that during the term the customer may receive competitive proposals for all or up to a portion of the products we furnish to the customer. We have the right to retain the business subject to the terms and conditions of the competitive proposal. If we match a competitive proposal, it may result in reduced sales prices for the products that are the subject of the proposal. If we choose not to match a competitive proposal, we may lose the sales that were the subject of the proposal.

In addition, the loss of any major customer, a significant reduction in the purchasing levels of any major customer or a significant adverse change in the terms of our supply agreement with any major customer could adversely affect our results of operations.

DEMAND FOR OUR PRODUCTS COULD BE AFFECTED BY CHANGES IN LAWS AND REGULATIONS APPLICABLE TO FOOD AND BEVERAGES AND CHANGES IN CONSUMER PREFERENCES.

We manufacture and sell metal and plastic rigid packaging for shelf-stable food and other consumer goods products. Many of our products are used to package food and beverages, and therefore they come into direct contact with these products. Accordingly, such products must comply with various laws and regulations for food and beverages applicable to our customers. Changes in such laws and regulations could negatively impact our customers' demand for our products as they comply with such changes and/or require us to make changes to our products. Such changes to our products could include modifications to the coatings and compounds that we use, possibly resulting in the incurrance by us of additional costs. Additionally, because our products are used to package consumer goods, we are subject to a variety of risks that could influence consumer behavior and negatively impact demand for our products, including changes in consumer preferences driven by various health-related concerns and perceptions.

OUR FINANCIAL RESULTS COULD BE ADVERSELY AFFECTED IF WE ARE NOT ABLE TO OBTAIN SUFFICIENT QUANTITIES OF RAW MATERIALS OR MAINTAIN OUR ABILITY TO PASS RAW MATERIAL PRICE INCREASES THROUGH TO OUR CUSTOMERS.

We purchase steel, aluminum, plastic resins and other raw materials from various suppliers. Sufficient quantities of these raw materials may not be available in the future, whether due to reductions in capacity because of, among other things, significant consolidation of suppliers, increased demand in excess of available supply, unforeseen events such as significant hurricanes or other reasons. In addition, such materials are subject to price fluctuations due to a number of factors, including increases in demand for the same raw materials, the availability of other substitute materials and general economic conditions that are beyond our control.

Over the last few years, there has been significant consolidation of suppliers of steel. Additionally, tariffs and court cases in the United States have negatively impacted the ability and desire of certain foreign steel suppliers to competitively supply steel in the United States. Our metal container and metal closures supply arrangements with our customers in the United States provide for the pass through of changes in our metal costs in accordance with such arrangements. For our non-contract customers in the United States, we also generally increase prices to pass through increases in our metal costs. In Europe, our metal container and metal closures operations have had long-term relationships with many of their customers and we generally increase prices to pass through increases in our metal costs, although, as is common practice, supply arrangements are negotiated on a year-by-year basis.

Our resin requirements are acquired through multi-year arrangements for specific quantities of resins with several major suppliers of resins. The prices that we pay for resins are not fixed and are subject to market pricing, which has fluctuated significantly in the past few years. Our plastic container and plastic closures supply arrangements with our customers in North America provide for the pass through of changes in resin prices in accordance with such arrangements, subject in most cases to a lag in the timing of such pass through. For non-contract customers, we also generally pass through changes in resin prices.

Although no assurances can be given, we expect to be able to purchase sufficient quantities of raw materials to timely meet all of our customers' requirements in 2014. Additionally, although no assurances can be given, we generally have been able to pass raw material price increases through to our customers. The loss of our ability to pass those price increases through to our customers or the inability of our suppliers to meet our raw material requirements, however, could have a materially adverse impact on our business, financial condition or results of operations.

A SUBSTANTIALLY LOWER THAN NORMAL CROP YIELD MAY REDUCE DEMAND FOR OUR METAL CONTAINERS AND CLOSURES FOR FOOD PRODUCTS.

Our metal container business' sales and income from operations are dependent, in part, upon the vegetable and fruit harvests in the midwest and western regions of the United States and, to a lesser extent, in a variety of national growing regions in Europe. Our closures business is also dependent, in part, upon the vegetable and fruit harvests. The size and quality of these harvests varies from year to year, depending in large part upon the weather conditions in applicable regions, and our results of operations could be impacted accordingly. Our sales, income from operations and net income could be materially adversely affected in a year in which crop yields are substantially lower than normal. For example, unit volumes in 2013 in our metal container business were negatively impacted by poor fruit and vegetable pack conditions, particularly in the west coast of the United States and in Central and Southern Europe.

THE SEASONALITY OF THE FRUIT AND VEGETABLE PACKING INDUSTRY CAUSES US TO INCUR SHORT-TERM DEBT.

We sell metal containers and closures used in the fruit and vegetable packing process which is a seasonal industry. As a result, we have historically generated a disproportionate amount of our annual income from operations in our third quarter. Additionally, as is common in the packaging industry, we must access working capital to build inventory ahead of the fruit and vegetable packing process. We also provide extended payment terms to some of our customers due to the seasonality of the fruit and vegetable packing process and, accordingly, carry accounts receivable for some customers beyond the end of the packing season. Due to our seasonal requirements, we may incur short-term indebtedness to finance our working capital requirements.

THE COST OF PRODUCING OUR PRODUCTS MAY BE ADVERSELY AFFECTED BY INCREASES TO THE PRICE OF ENERGY.

The cost of producing our products is sensitive to our energy costs, such as natural gas and electricity. We have, from time to time, entered into contracts to hedge a portion of our natural gas costs. Energy prices, in particular oil and natural gas prices, have been volatile in recent years, with a corresponding effect on our production costs.

WE MAY NOT BE ABLE TO PURSUE OUR GROWTH STRATEGY BY ACQUISITION.

Historically, we have grown predominantly through acquisitions. Our future growth will depend in large part on additional acquisitions of consumer goods packaging businesses. We may not be able to locate or acquire other suitable acquisition candidates consistent with our strategy, and we may not be able to fund future acquisitions because of limitations under our indebtedness or otherwise, including due to the limited availability of funds if the financial markets are impaired.

FUTURE ACQUISITIONS MAY CREATE RISKS AND UNCERTAINTIES THAT COULD ADVERSELY AFFECT OUR OPERATING RESULTS AND DIVERT OUR MANAGEMENT'S ATTENTION.

In pursuing our strategy of growth through acquisitions, we will face risks commonly encountered with an acquisition strategy. These risks include:

- failing to identify material problems and liabilities in our due diligence review of acquisition targets;
- failing to obtain sufficient indemnification rights to fully offset possible liabilities associated with acquired businesses;
- failing to assimilate the operations and personnel of the acquired businesses;
- difficulties in identifying or retaining employees for the acquired businesses;
- disrupting our ongoing business;
- diluting our limited management resources;
- operating in new geographic regions; and
- impairing relationships with employees and customers of the acquired business as a result of changes in ownership and management.

Through our experience integrating our acquisitions, we have learned that, depending upon the size of the acquisition, it can take us up to two to three years to completely integrate an acquired business into our operations and systems and realize the full benefit of the integration. During the early part of this integration period, the operating results of an acquired business may decrease from results attained prior to the acquisition due to costs, delays or other problems in integrating the acquired business. Moreover, additional indebtedness incurred to fund acquisitions could adversely affect our liquidity and financial stability.

IF WE ARE UNABLE TO RETAIN KEY MANAGEMENT, WE MAY BE ADVERSELY AFFECTED.

We believe that our future success depends, in large part, on our experienced management team. Losing the services of key members of our current management team could make it difficult for us to manage our business and meet our objectives.

PROLONGED WORK STOPPAGES AT OUR FACILITIES WITH UNIONIZED LABOR COULD JEOPARDIZE OUR FINANCIAL CONDITION.

As of December 31, 2013, we employed approximately 7,000 hourly employees on a full-time basis. Approximately 44 percent of our hourly plant employees in the United States and Canada as of that date were

represented by a variety of unions, and most of our hourly employees in Europe, Asia, South America and Central America were represented by a variety of unions or other labor organizations. Our labor contracts expire at various times between 2014 and 2017. We cannot assure you that, upon expiration of existing collective bargaining agreements, new agreements will be reached without union action or that any such new agreements will be on terms no less favorable to us than current agreements. Disputes with the unions representing our employees could result in strikes or other labor protests that could disrupt our operations and divert the attention of management from operating our business. If we were to experience a strike or work stoppage, it could be difficult for us to find a sufficient number of employees with the necessary skills to replace these employees. Prolonged work stoppages at our facilities could have a material adverse effect on our business, financial condition or results of operations.

WE ARE SUBJECT TO COSTS AND LIABILITIES RELATED TO ENVIRONMENTAL AND HEALTH AND SAFETY LAWS AND REGULATIONS.

We continually review our compliance with environmental and other laws, such as the Occupational Safety and Health Act and other laws regulating noise exposure levels and other safety and health concerns in the production areas of our plants in the United States and environmental protection, health and safety laws and regulations abroad. We may incur liabilities for noncompliance, or substantial expenditures to achieve compliance, with environmental and other laws or changes thereto in the future or as a result of the application of additional laws and regulations to our business, including those limiting greenhouse gas emissions and those requiring compliance with the European Commission's registration, evaluation and authorization of chemicals (REACH) procedures. In addition, stricter regulations, or stricter interpretations of existing laws or regulations, may impose new liabilities on us, and we may become obligated in the future to incur costs associated with the investigation and/or remediation of contamination at our facilities or other locations. Additionally, many of our products come into contact with the food and beverages that they package, and therefore we may be subject to risks and liabilities related to health and safety matters in connection with our products. Changes in or additional health and safety laws and regulations in connection with our products may also impose new requirements and costs on us. Such requirements, liabilities and costs could have a material adverse effect on our capital expenditures, results of operations, financial condition or competitive position.

OUR INTERNATIONAL OPERATIONS ARE SUBJECT TO VARIOUS RISKS THAT MAY ADVERSELY AFFECT OUR FINANCIAL RESULTS.

Our international operations generated approximately \$783.0 million, or approximately 21 percent, of our consolidated net sales in 2013. As of February 1, 2014, we have a total of 29 manufacturing facilities in a total of 21 countries in Europe, Asia, South America and Central America, serving customers in over 90 countries worldwide, including several new manufacturing facilities in developing Eastern countries for our metal container business. Our business strategy may include continued expansion of international activities. Accordingly, the risks associated with operating in foreign countries, including countries located in Europe, Asia, South America and Central America, may have a negative impact on our liquidity and net income. Risks associated with operating in foreign countries include, but are not limited to:

- political, social and economic instability;
- inconsistent product regulation or policy changes by foreign agencies or governments;
- war, civil disturbance or acts of terrorism;
- compliance with and changes in applicable foreign laws;
- loss or non-renewal of treaties or similar agreements with foreign tax authorities;
- difficulties in enforcement of contractual obligations and intellectual property rights;
- high social benefits for labor;
- national and regional labor strikes;
- imposition of limitations on conversions of foreign currencies into dollars or payment of dividends and other payments by non-U.S. subsidiaries;
- foreign exchange rate risks;
- difficulties in expatriating cash generated or held by non-U.S. subsidiaries in a tax efficient manner;
- uncertainties arising from local business practices and cultural considerations;

• changes in tax laws, or the interpretation thereof, affecting foreign tax credits or tax deductions relating to our non-U.S. earnings or operations;

• hyperinflation, currency devaluation or defaults in certain foreign countries;

• duties, taxes or government royalties, including the imposition or increase of withholding and other taxes on remittances and other payments by non-U.S. subsidiaries;

• customs, import/export and other trade compliance regulations;

• non-tariff barriers and higher duty rates;

• difficulty in collecting international accounts receivable and potentially longer payment cycles;

• application of the Foreign Corrupt Practices Act and similar laws;

• increased costs in maintaining international manufacturing and marketing efforts; and

• taking of property by nationalization or expropriation without fair compensation.

WE ARE SUBJECT TO THE EFFECTS OF FLUCTUATIONS IN FOREIGN CURRENCY EXCHANGE RATES.

Our reporting currency is the U.S. dollar. As a result of our international operations, a portion of our consolidated net sales, and some of our costs, assets and liabilities, are denominated in currencies other than the U.S. dollar. As a result, we must translate local currency financial results into U.S. dollars based on average exchange rates prevailing during a reporting period for the preparation of our consolidated financial statements. Consequently, changes in exchange rates may unpredictably and adversely affect our consolidated operating results. For example, during times of a strengthening U.S. dollar, our reported international revenue and earnings will be reduced because the local currency will translate into fewer U.S. dollars. Conversely, a weakening U.S. dollar will effectively increase the dollar-equivalent of our expenses denominated in foreign currencies. Although we may use currency exchange rate protection agreements from time to time to reduce our exposure to currency exchange rate fluctuations in some cases, these hedges may not eliminate or reduce the effect of currency fluctuations.

IF THE INVESTMENTS IN OUR PENSION BENEFIT PLANS DO NOT PERFORM AS EXPECTED, WE MAY HAVE TO CONTRIBUTE ADDITIONAL AMOUNTS TO THESE PLANS, WHICH WOULD OTHERWISE BE AVAILABLE TO COVER OPERATING AND OTHER EXPENSES.

We maintain noncontributory, defined benefit pension plans covering a substantial number of our employees, which we fund based on certain actuarial assumptions. The plans' assets consist primarily of common stocks and fixed income securities. If the investments of the plans do not perform at expected levels, then we will have to contribute additional funds to ensure that the plans will be able to pay out benefits as scheduled. Such an increase in funding could result in a decrease in our available cash flow.

WE PARTICIPATE IN MULTIEMPLOYER PENSION PLANS UNDER WHICH, IN THE EVENT OF CERTAIN CIRCUMSTANCES, WE COULD INCUR ADDITIONAL LIABILITIES WHICH MAY BE MATERIAL AND MAY NEGATIVELY AFFECT OUR FINANCIAL RESULTS,

We participate in four multiemployer pension plans which provide defined benefits to certain of our union employees. Because of the nature of multiemployer pension plans, there are risks associated with participating in such plans that differ from single-employer pension plans. Amounts contributed by an employer to a multiemployer pension plan are not segregated into a separate account and are not restricted to provide benefits only to employees of that contributing employer. In the event that another participating employer to a multiemployer pension plan in which we participate no longer contributes to such plan, the unfunded obligations of such plan may be borne by the remaining participating employers, including us. In such event, our required contributions to such plan could increase, which could negatively affect our financial condition and results of operations. In the event that we withdraw from participation in a multiemployer pension plan in which we participate or otherwise cease to make contributions to such a plan or in the event of the termination of such a plan, we potentially could be required under applicable law to make additional contributions to such plan in respect of the unfunded accrued benefits of such plan, which unfunded accrued benefits could be significant. Such additional contributions could be material and could negatively affect our financial condition and results of operations. As further discussed in Note 11 to our Consolidated Financial Statements for the year ended December 31, 2013 included elsewhere in this Annual Report, two of the multiemployer pension plans in which we participate have a funded status of less than 65 percent.

IF WE WERE REQUIRED TO WRITE-DOWN ALL OR PART OF OUR GOODWILL OR TRADE NAMES, OUR NET INCOME AND NET WORTH COULD BE MATERIALLY ADVERSELY AFFECTED.

As a result of our acquisitions, we have \$651.0 million of goodwill and \$32.1 million of indefinite-lived trade names recorded on our consolidated balance sheet at December 31, 2013. We are required to periodically determine if our goodwill and trade names have become impaired, in which case we would write-down the impaired portion. If we were required to write-down all or part of our goodwill or trade names, our net income and net worth could be materially adversely affected.

INCREASED INFORMATION TECHNOLOGY SECURITY THREATS AND MORE SOPHISTICATED AND TARGETED COMPUTER CRIME COULD POSE A RISK TO OUR SYSTEMS, NETWORKS, PRODUCTS, SOLUTIONS AND SERVICES.

Increased global security threats and more sophisticated and targeted computer crime pose a risk to the security of our systems and networks and the confidentiality, availability and integrity of our data. While we attempt to mitigate these risks by employing a number of measures, including employee training, comprehensive monitoring of our networks and systems and maintenance of backup and protective systems, our systems, networks, products, solutions and services remain potentially vulnerable to advanced persistent threats. Depending on their nature and scope, such threats could potentially lead to the compromise of confidential information, improper use of our systems and networks, manipulation and destruction of data, defective products, production downtimes and operational disruptions, which in turn could adversely affect our reputation, competitiveness and results of operations.

OUR PRINCIPAL STOCKHOLDERS HAVE SUBSTANTIAL INFLUENCE OVER US AND THEIR EXERCISE OF THAT INFLUENCE COULD BE ADVERSE TO YOUR INTERESTS.

As of December 31, 2013, Messrs. Silver and Horrigan beneficially owned an aggregate of 19,226,778 shares of our common stock, or approximately 30 percent of our outstanding common stock. Accordingly, if they act together, they will be able to exercise substantial influence over all matters submitted to the stockholders for a vote, including the election of directors. In addition, we and Messrs. Silver and Horrigan have entered into an amended and restated principal stockholders agreement, or the Stockholders Agreement, that provides for certain director nomination rights. Under the Stockholders Agreement, the Group (as defined in the Stockholders Agreement and generally including Messrs. Silver and Horrigan and their affiliates and related family transferees and estates) has the right to nominate for election all of our directors until the Group holds less than one-half of the number of shares of our common stock held by it in the aggregate on February 14, 1997. At least one of the Group's nominees must be either Mr. Silver or Mr. Horrigan. On February 14, 1997, the Group held 28,612,360 shares of our common stock in the aggregate (as adjusted for our two-for-one stock splits in 2005 and 2010). Additionally, the Group has the right to nominate for election either Mr. Silver or Mr. Horrigan as a member of our Board of Directors when the Group no longer holds at least one-half of the number of shares of our common stock held by it in the aggregate on February 14, 1997 but beneficially owns 5 percent of our common stock. The Stockholders Agreement continues until the death or disability of both of Messrs. Silver and Horrigan. The provisions of the Stockholders Agreement could have the effect of delaying, deferring or preventing a change of control of Silgan Holdings Inc. and preventing our stockholders from receiving a premium for their shares of our common stock in any proposed acquisition of Silgan Holdings Inc.

ANTI-TAKEOVER PROVISIONS IN OUR AMENDED AND RESTATED CERTIFICATE OF INCORPORATION AND OUR AMENDED AND RESTATED BY-LAWS COULD HAVE THE EFFECT OF DISCOURAGING, DELAYING OR PREVENTING A MERGER OR ACQUISITION. ANY OF THESE EFFECTS COULD ADVERSELY AFFECT THE MARKET PRICE OF OUR COMMON STOCK.

Provisions of our amended and restated certificate of incorporation and our amended and restated by-laws may have the effect of delaying or preventing transactions involving a change of control of Silgan Holdings Inc., including transactions in which stockholders might otherwise receive a substantial premium for their shares over then current market prices, and may limit the ability of stockholders to approve transactions that they may deem to be in their best interests.

In particular, our amended and restated certificate of incorporation provides that:

-

the Board of Directors is authorized to issue one or more classes of preferred stock having such designations, rights and preferences as may be determined by the Board;

the Board of Directors is divided into three classes, and each year approximately one-third of the directors are elected for a term of three years;

20

the Board of Directors is fixed at seven members; and
 action taken by the holders of common stock must be taken at a meeting and may not be taken by consent in writing. Additionally, our amended and restated by-laws provide that a special meeting of the stockholders may only be called by either of our Co-Chairmen of the Board on their own initiative or at the request of a majority of the Board of Directors, and may not be called by the holders of common stock.

UPON THE OCCURRENCE OF CERTAIN CHANGE OF CONTROL EVENTS, WE MAY NOT BE ABLE TO SATISFY ALL OF OUR OBLIGATIONS UNDER OUR CREDIT AGREEMENT AND INDENTURES.

Under our Credit Agreement, the occurrence of a change of control (as defined in our Credit Agreement) constitutes an event of default, permitting, among other things, the acceleration of amounts owed thereunder. Additionally, upon the occurrence of a change of control as defined in the indentures governing the 5% Notes and the 5½% Notes, we must make an offer to repurchase the 5% Notes and the 5½% Notes at a purchase price equal to 101% of the principal amount thereof, plus accrued interest to the date of purchase. We may not have sufficient funds or be able to obtain sufficient financing to meet such obligations under our Credit Agreement and such indentures.

ITEM 1B. UNRESOLVED STAFF COMMENTS.

None.

ITEM 2. PROPERTIES.

Our principal executive offices are located at 4 Landmark Square, Suite 400, Stamford, Connecticut 06901. The administrative headquarters and principal places of business for our metal container business are located at 21800 Oxnard Street, Woodland Hills, California 91367 and Landskronngasse 5/1, 1010 Vienna, Austria; the administrative headquarters and principal places of business for our closures business are located at 1140 31st Street, Downers Grove, Illinois 60515 and Hansastrasse 4, 30419 Hannover, Germany; and the administrative headquarters and principal place of business for our plastic container business is located at 14515 N. Outer Forty, Chesterfield, Missouri 63017. We lease all of these offices.

We own and lease properties for use in the ordinary course of business. The properties consist primarily of 44 operating facilities for the metal container business, 20 operating facilities for the closures business and 24 operating facilities for the plastic container business. We own 49 of these facilities and lease 39. The leases expire at various times through 2029. Some of these leases provide renewal options as well as various purchase options.

Below is a list of our operating facilities, including attached warehouses, as of February 1, 2014 for our metal container business:

Location	Approximate Building Area (square feet)	
Antioch, CA	144,500	(leased)
Modesto, CA	37,800	(leased)
Modesto, CA	128,000	(leased)
Modesto, CA	150,000	(leased)

We lease our research facilities in Oconomowoc, Wisconsin, Downers Grove, Illinois, Hannover, Germany and Norcross, Georgia. We also own and lease other warehouse facilities that are detached from our manufacturing facilities. Additionally, we may sublease other facilities that we previously operated.

We believe that our plants, warehouses and other facilities are in good operating condition, adequately maintained, and suitable to meet our present needs and future plans. We believe that we have sufficient capacity to satisfy the demand for our products in the foreseeable future. To the extent that we need additional capacity, we believe that we can convert certain facilities to continuous operation or make the appropriate capital expenditures to increase capacity.

ITEM 3. LEGAL PROCEEDINGS.

We are a party to routine legal proceedings, contract disputes and claims arising in the ordinary course of our business. We are not a party to, and none of our properties are subject to, any pending legal proceedings which could have a material adverse effect on our business or financial condition.

ITEM 4. MINE SAFETY DISCLOSURES.

Not applicable.

PART II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES.

Our common stock is quoted on the Nasdaq Global Select Market System under the symbol SLGN. As of January 31, 2014, we had 42 holders of record of our common stock.

We began paying quarterly cash dividends on our common stock in 2004, and have increased the amount of the quarterly cash dividend payable on our common stock each year since then. In February 2013, our Board of Directors increased the amount of our quarterly cash dividend payable on our common stock from \$0.12 per share to \$0.14 per share. The payment of future dividends is at the discretion of our Board of Directors and will be dependent upon our consolidated results of operations and financial condition, federal tax policies and other factors deemed relevant by our Board of Directors.

The table below sets forth the high and low closing sales prices of our common stock as reported by the Nasdaq Global Select Market System for the periods indicated below and the cash dividends paid per share of our common stock in the periods indicated below.

	Closing Sales Prices		Cash Dividends Per Share
	High	Low	
2013			
First Quarter	\$48.47	\$41.98	\$0.14
Second Quarter	49.36	46.35	0.14
Third Quarter	50.35	46.86	0.14
Fourth Quarter	48.68	44.61	0.14
	Closing Sales Prices		Cash Dividends Per Share
	High	Low	
2012			
First Quarter	\$44.39	\$38.66	\$0.12
Second Quarter	44.83	41.60	0.12
Third Quarter	44.64	40.00	0.12
Fourth Quarter	44.66	40.81	0.12

ISSUER PURCHASES OF EQUITY SECURITIES

On August 5, 2011, our Board of Directors authorized the repurchase of up to \$300.0 million of our common stock, inclusive of prior authorizations, from time to time through and including December 31, 2014. On November 19, 2012, our Board of Directors authorized the repurchase by us of up to an additional \$100.0 million of our common stock from time to time through and including December 31, 2014. Pursuant to these authorizations, we have repurchased \$66.5 million of our common stock through open market purchases and an additional \$250.0 million of our common stock on February 8, 2013 pursuant to a "modified Dutch auction" tender offer commenced in November 2012 (including 515,806 shares beneficially owned by Mr. Horrigan, our Non-Executive Co-Chairman of the Board, for \$23.3 million). Accordingly, as of December 31, 2013, we are authorized to repurchase up to approximately \$83.5 million of our common stock.

During the fourth quarter of 2013, we did not repurchase any of our equity securities.

ITEM 6. SELECTED FINANCIAL DATA.

In the table that follows, we provide you with selected financial data of Silgan Holdings Inc. We have derived this data from our consolidated financial statements for the five years ended December 31, 2013. Our consolidated financial statements for the five years ended December 31, 2013 have been audited by Ernst & Young LLP, our independent registered public accounting firm.

You should read this selected financial data along with the consolidated financial statements and accompanying notes included elsewhere in this Annual Report, as well as the section of this Annual Report titled "Management's Discussion and Analysis of Financial Condition and Results of Operations."

Selected Financial Data

	Year Ended December 31,				
	2013(a)	2012(a)	2011(a)	2010(a)	2009
	(Dollars in millions, except per share data)				
Operating Data:					
Net sales	\$3,708.5	\$3,588.3	\$3,509.2	\$3,071.5	\$3,066.8
Cost of goods sold	3,161.3	3,070.7	2,990.6	2,599.1	2,605.7
Gross profit	547.2	517.6	518.6	472.4	461.1
Selling, general and administrative expenses (b)	211.0	183.4	156.8	166.9	161.0
Rationalization charges	12.0	8.7	7.7	22.2	1.5
Income from operations	324.2	325.5	354.1	283.3	298.6
Interest and other debt expense before loss on early extinguishment of debt	67.4	63.0	63.0	54.1	49.7
Loss on early extinguishment of debt	2.1	38.7	1.0	7.5	1.3

Notes to Selected Financial Data

In October 2013, we acquired Portola. In 2013, we also acquired Amcor Australia Metal Closures and Tecnocap U.S. Metal Closures. In August 2012, we acquired PFC, the plastic food container operations of Rexam PLC. In 2012, we also acquired Öntaş. In 2011, we acquired the metal container operations of Vogel & Noot Holding AG in (a) Central and Eastern Europe, the twist-off metal closures operations of DGS S.A. in Poland and Nestlé Purina PetCare's steel container self-manufacturing assets in the United States. In November 2010, we acquired IPEC Global, Inc.

Selling, general and administrative expenses include income of \$25.2 million in 2011 for proceeds of \$39.5 million received as a result of the termination of the merger agreement with Graham Packaging Company Inc., net of costs (b) associated with certain corporate development activities, and costs attributable to announced acquisitions of \$1.5 million, \$1.5 million and \$2.7 million in 2013, 2012 and 2010, respectively.

Per share amounts have been retroactively adjusted for the two-for-one stock split of our common stock that (c) occurred on May 3, 2010.

Income from operations of the metal container business includes rationalization charges of \$2.5 million, (d) \$2.5 million, \$1.4 million and \$0.7 million in 2013, 2012, 2011 and 2010, respectively. Income from operations of the metal container business also includes new plant start-up costs of \$0.8 million and \$6.4 million in 2013 and 2012, respectively, and a charge for the resolution of a past product liability dispute of \$3.3 million in 2011.

Income from operations of the closures business includes rationalization charges of \$5.6 million, \$2.9 million, (e) \$1.8 million, \$9.2 million and \$1.3 million in 2013, 2012, 2011, 2010 and 2009, respectively, and a charge for the remeasurement of net assets in Venezuela due to currency devaluations of \$3.0 million and \$3.2 million in 2013 and 2010, respectively.

Income from operations of the plastic container business includes rationalization charges of \$3.9 (f) million, \$3.3 million, \$4.0 million, \$12.3 million and \$0.2 million in 2013, 2012, 2011, 2010 and 2009, respectively.

(g) Depreciation and amortization excludes amortization of debt discount and issuance costs.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.

The following discussion and analysis is intended to assist you in understanding our consolidated financial condition and results of operations for the three-year period ended December 31, 2013. Our consolidated financial statements and the accompanying notes included elsewhere in this Annual Report contain detailed information that you should refer to in conjunction with the following discussion and analysis.

GENERAL

We are a leading manufacturer of rigid packaging for shelf-stable food and other consumer goods products. We currently produce steel and aluminum containers for human and pet food and general line products; metal, composite and plastic closures for food and beverage products; and custom designed plastic containers, tubes and closures for personal care, food, health care, pharmaceutical, household and industrial chemical, pet care, agricultural chemical, automotive and marine chemical products. We are a leading manufacturer of metal containers in North America and Europe, the largest manufacturer of metal food containers in North America with a unit volume market share for the year ended December 31, 2013 of approximately half of the market in the United States, a leading worldwide manufacturer of metal, composite and plastic closures for food and beverage products and a leading manufacturer of plastic containers in North America for a variety of markets, including the personal care, food, health care and household and industrial chemical markets.

Our objective is to increase shareholder value by efficiently deploying capital and management resources to grow our business, reduce operating costs, build sustainable competitive positions, or franchises, and to complete acquisitions that generate attractive cash returns. We have grown our net sales and income from operations largely through acquisitions but also through internal growth, and we continue to evaluate acquisition opportunities in the consumer goods packaging market.

SALES GROWTH

We have increased net sales and market share in our metal container, closures and plastic container businesses through both acquisitions and internal growth. As a result, we have expanded and diversified our customer base, geographic presence and product lines.

We are a leading manufacturer of metal containers in North America and Europe, primarily as a result of our acquisitions but also as a result of growth with existing customers. During the past twenty-seven years, the metal food container market has experienced significant consolidation primarily due to the desire by food processors to reduce costs and focus resources on their core operations rather than self-manufacture their metal food containers. Our acquisitions of the metal food container manufacturing operations of Nestlé, Dial, Del Monte, Birds Eye, Campbell, Pacific Coast and, most recently, Purina Steel Can reflect this trend. We estimate that approximately five percent of the market for metal food containers in the United States is still served by self-manufacturers. In addition, the metal food container market in North America has been relatively flat during this period, despite losing market share as a result of more dining out, fresh produce and competing materials. However, we increased our share of the market for metal food containers in the United States primarily through acquisitions and growth with existing customers, and we have enhanced our business by focusing on providing customers with high levels of quality and service and value-added features such as our Quick Top® easy-open ends, shaped metal food containers and alternative color offerings for metal food containers. We anticipate that the market will be relatively flat in the future, but will continue to increase in areas of consumer convenience products such as single-serve sizes and easy-open ends. In 2013, approximately 65 percent of our metal food containers sold had an easy-open end. We expect to further enhance our metal container business through our Can Vision 2020SM program which is intended to further the competitive advantages of metal packaging for food.

With our acquisitions of our closures operations in North America, Europe, Asia and South America, we established ourselves as a leading worldwide manufacturer of metal, composite and plastic closures for food and beverage products, with leadership positions in the North American and European markets. In 2013 and 2012, we expanded the geographic scope, product offerings and scale of our closures business with the acquisitions of Portola, Amcor Australia Metal Closures, Tecnocap U.S. Metal Closures and Öntaş. We may pursue further consolidation opportunities in the closures markets in which we operate. Additionally, we expect to continue to generate internal growth in our closures business, particularly in plastic closures.

We have improved the market position of our plastic container business since 1987, with net sales increasing sevenfold to \$647.0 million in 2013. We achieved this improved market position primarily through strategic acquisitions as well as through internal growth. In 2012, we completed the strategic acquisition of PFC, broadening

our product offerings for shelf-stable food products to include plastic thermoformed barrier and non-barrier bowls and trays. As part of the acquisition of Portola in 2013, we acquired three plastic container manufacturing facilities in Canada, further expanding the geographic scope and product offerings of our plastic container business. The plastic container market of the consumer goods packaging industry continues to be highly fragmented, with growth rates in excess of population expansion due to substitution of plastic for other materials. We have focused on the segment of this market where custom design and decoration allows customers to differentiate their products such as in personal care. We intend to pursue further acquisition opportunities in markets where we believe that we can successfully apply our acquisition and value-added operating expertise and strategy.

OPERATING PERFORMANCE

We operate in a competitive industry where it is necessary to realize cost reduction opportunities to offset continued competitive pricing pressure. We have improved the operating performance of our plant facilities through the investment of capital for productivity improvements and manufacturing cost reductions. Our acquisitions have enabled us to rationalize plant operations and decrease overhead costs through plant closings and downsizings and to realize manufacturing efficiencies as a result of optimizing production scheduling. From 2009, we have closed two metal container manufacturing facilities, one closure manufacturing facility and three plastic container manufacturing facilities in connection with our continuing efforts to streamline our plant operations, reduce operating costs and better match supply with geographic demand. In addition, we have consolidated various positions in our corporate offices across all businesses to further enhance profitability.

We have also invested substantial capital in the past several years for new market opportunities and value-added products such as new Quick Top[®] easy-open ends for metal food containers, shaped metal food containers and alternative color offerings for metal food containers. In addition, we have begun to make investments for our Can Vision 2020SM program which are intended to enhance the competitive advantages of metal packaging for food. We have also made significant capital investments to expand VN into new developing Eastern countries. Over the past five years, we have invested \$600.4 million in capital to invest in new market opportunities, maintain our market position, improve our productivity and reduce our manufacturing costs.

Historically, we have been successful in renewing our multi-year supply arrangements with our customers. We estimate that in 2014 approximately 90 percent of our projected North American metal container sales, a majority of our projected closures sales in the United States and a majority of our projected plastic container sales will be under multi-year arrangements.

Many of our multi-year customer supply arrangements generally provide for the pass through of changes in raw material, labor and other manufacturing costs, thereby significantly reducing the exposure of our results of operations to the volatility of these costs. Under our supply arrangements in the United States, we were able to increase prices to pass through higher metal costs. For our non-contract domestic customers, we have also generally increased prices to pass through higher metal costs. In Europe, our businesses have had long-term relationships with many of their customers and we have generally increased prices to pass through higher metal costs, although, as is common practice, many supply arrangements are negotiated on a year-by-year basis. Resin prices have also fluctuated significantly in the past few years, and we have been able to pass through changes in resin costs in accordance with our supply arrangements.

Our metal container business' sales and income from operations are dependent, in part, upon the vegetable and fruit harvests in the midwest and western regions of the United States and, to a lesser extent, in a variety of national growing regions in Europe. Our closures business is also dependent, in part, upon vegetable and fruit harvests. The size and quality of these harvests varies from year to year, depending in large part upon the weather conditions in applicable regions. Because of the seasonality of the harvests, we have historically experienced higher unit sales volume in the third quarter of our fiscal year and generated a disproportionate amount of our annual income from operations during that quarter. Additionally, as is common in the packaging industry, we provide extended payment terms to some of our customers in our metal container business due to the seasonality of the vegetable and fruit packing process.

USE OF CAPITAL

Historically, we have used leverage to support our growth and increase shareholder returns. Our stable and predictable cash flow, generated largely as a result of our long-term customer relationships and generally recession resistant

business, supports our financial strategy. We intend to continue using reasonable leverage, supported by our stable cash flows, to make value enhancing acquisitions. In determining reasonable leverage, we evaluate our

cost of capital and manage our level of debt to maintain an optimal cost of capital based on current market conditions. If acquisition opportunities are not identified over a longer period of time, we may use our cash flow to repay debt, repurchase shares of our common stock or increase dividends to our stockholders or for other permitted purposes. In March 2011, we funded the purchase price for VN with Euro denominated borrowings under our 2010 Credit Facility. In 2011, we also refinanced our 2010 Credit Facility with our 2011 Credit Facility, and we funded repurchases of our common stock for \$15.8 million and the purchase price for Purina Steel Can with cash on hand. In March 2012, we issued \$500 million of the 5% Notes and used part of the proceeds from that issuance to redeem all \$250 million of the 7¼% Notes. In 2012, we also funded repurchases of our common stock for \$34.1 million and the purchase price for our acquisitions of Öntaş and PFC with cash on hand. In 2013, we used cash on hand, revolving loan borrowings under our 2011 Credit Facility and other foreign bank revolving loans to fund repurchases of our common stock for \$267.6 million (which included \$250.0 million of our common stock purchased pursuant to a "modified Dutch auction" tender offer completed in February 2013), the purchase price for our acquisitions of Amcor Australia Metal Closures, Portola and Tecnocap U.S. Metal Closures and the repayment of \$300.9 million of term loans under our 2011 Credit Facility. In addition, we issued \$300 million of the 5½% Notes in September 2013, the net proceeds of which were used to repay revolving loans under our 2011 Credit Facility. Additionally, in 2013 we commenced the refinancing of our 2011 Credit Facility, which we completed in January 2014 with our Credit Agreement. Our Credit Agreement refinanced all outstanding amounts under our 2011 Credit Facility and provides us with a \$985.6 million multicurrency revolving loan facility and a Cdn \$15.0 million revolving loan facility for working capital requirements and other strategic initiatives.

To the extent we utilize debt for acquisitions or other permitted purposes in future periods, our interest expense may increase. Further, since the revolving loan and term loan borrowings under our Credit Agreement bear interest at floating rates, our interest expense is sensitive to changes in prevailing rates of interest and, accordingly, our interest expense may vary from period to period. After taking into account interest rate swap agreements that we entered into to mitigate the effect of interest rate fluctuations, at December 31, 2013 we had \$633.4 million of indebtedness, or 37 percent of our total outstanding indebtedness, which bore interest at floating rates. You should read Note 9 to our Consolidated Financial Statements for the year ended December 31, 2013 included elsewhere in this Annual Report for information regarding our interest rate swap agreements.

In light of our strategy to use leverage to support our growth and optimize shareholder returns, we have incurred and will continue to incur significant interest expense. For 2013, 2012 and 2011, our aggregate interest and other debt expense before loss on early extinguishment of debt as a percentage of our income from operations was 20.8 percent, 19.4 percent and 17.8 percent, respectively.

RESULTS OF OPERATIONS

The following table sets forth certain income statement data expressed as a percentage of net sales for each of the periods presented. You should read this table in conjunction with our Consolidated Financial Statements for the year ended December 31, 2013 and the accompanying notes included elsewhere in this Annual Report.

	Year Ended December 31,			
	2013	2012	2011	
Operating Data:				
Net sales:				
Metal containers	63.1	% 63.9	% 63.0	%
Closures	19.4	19.0	19.6

Corporate ⁽⁴⁾	(13.7) (9.9) 9.3
Consolidated	\$324.2	\$325.5	\$354.1

Includes rationalization charges of \$2.5 million, \$2.5 million and \$1.4 million in 2013, 2012 and 2011, (1) respectively, plant start-up costs of \$0.8 million and \$6.4 million in 2013 and 2012, respectively, and a charge for the resolution of a past product liability dispute of \$3.3 million in 2011.

(2) Includes rationalization charges of \$5.6 million, \$2.9 million and \$1.8 million in 2013, 2012 and 2011, respectively, and a charge of \$3.0 million in 2013 for the remeasurement of net assets in Venezuela.

(3) Includes rationalization charges of \$3.9 million, \$3.3 million and \$4.0 million in 2013, 2012 and 2011, respectively.

(4) Includes costs attributable to announced acquisitions of \$1.5 million in each of 2013 and 2012, rationalization charges of \$0.5 million in 2011 and income of \$25.2 million in 2011 for proceeds received as a result of the termination of the merger agreement with Graham Packaging Company Inc., net of costs associated with certain corporate development activities.

YEAR ENDED DECEMBER 31, 2013 COMPARED WITH YEAR ENDED DECEMBER 31, 2012

Overview. Consolidated net sales were \$3.71 billion in 2013, representing a 3.3 percent increase as compared to 2012 primarily due to the inclusion of net sales from operations acquired in 2013 and 2012, the impact of favorable foreign currency translation in the metal container and closures businesses, higher unit volumes in the metal container business, higher average selling prices due to the pass through of higher raw material costs in all of our businesses and a more favorable mix of products sold in the plastic container business. These increases were partially offset by lower volumes in our legacy closures and plastic container operations. Income from operations for 2013 decreased by \$1.3 million, or 0.4 percent, as compared to 2012 primarily as a result of the charge for the remeasurement of net assets and the unfavorable impact of currency restrictions and the political climate in Venezuela, lower unit volumes in the legacy closures and plastic container operations, continued economic challenges in Europe, the impact of under absorbed operating costs at the new metal container facilities in Eastern Europe and the Middle East, a less favorable mix of products sold in the metal container business, higher rationalization charges, the unfavorable comparison of the year-over-year resin pass through lag effect in the plastic container business and higher corporate expenses. These decreases were partially offset by the inclusion of operations acquired in 2013 and 2012, higher unit volumes in the metal container business, improved manufacturing efficiencies across all of our businesses, a more favorable mix of products sold in the plastic container business and lower new plant start-up costs in the metal container business. Results for 2013 and 2012 included rationalization charges of \$12.0 million and \$8.7 million, respectively, and a loss on early extinguishment of debt of \$2.1 million and \$38.7 million, respectively. Net income in 2013 was \$185.4 million as compared to \$151.3 million in 2012.

Net Sales. The \$120.2 million increase in consolidated net sales in 2013 as compared to 2012 was due to higher net sales across all of our businesses.

Net sales for the metal container business increased \$47.7 million, or 2.1 percent, in 2013 as compared to the same period in 2012. This increase was primarily attributable to an increase in unit volumes of approximately 2.5 percent, the impact of favorable foreign currency translation of approximately \$10.4 million and the pass through of higher raw material costs. The increase in unit volumes was due in large part to pet food products in the U.S. and sales from the new plants in Eastern Europe, partially offset by poor fruit and vegetable pack conditions, particularly in the west coast of the U.S. and in Central and Southern Europe.

Net sales for the closures business in 2013 increased \$40.0 million, or 5.9 percent, as compared to the same period in 2012. This increase was primarily the result of an increase in unit volumes of approximately 8.5 percent due to the inclusion of net sales from Portola, the impact of favorable foreign currency translation of approximately \$10.7 million and the pass through of higher raw material costs. These increases were partially offset by lower unit volumes in the legacy closures operations primarily as a result of lower sales for single-serve beverages largely attributable to cooler temperatures in 2013 and lower sales in Venezuela due to economic challenges.

Net sales for the plastic container business in 2013 increased \$32.5 million, or 5.3 percent, as compared to the same period in 2012. This increase was primarily due to higher volumes of approximately 3 percent, a more favorable mix of products sold and higher average selling prices due to the pass through of higher raw material costs, partially offset by the impact of unfavorable foreign currency translation of approximately \$3.3 million. The increase in volumes was attributable to the inclusion for a full year of the PFC operations, which more than offset lower volumes in the legacy operations due in part to weaker customer demand as well as ongoing efforts to rebalance the portfolio of the business. Gross Profit. Gross profit margin increased 0.3 percentage points to 14.7 percent in 2013 as compared to 14.4 percent in 2012 for the reasons discussed below in "Income from Operations."

Selling, General and Administrative Expenses. Selling, general and administrative expenses increased \$27.7 million in 2013 as compared to 2012. Selling, general and administrative expenses as a percentage of consolidated net sales increased to 5.7 percent in 2013 as compared to 5.1 percent in 2012. These increases were primarily due to the inclusion of expenses from recent acquisitions, a charge of \$3.0 million for the remeasurement of net assets in our closures operations in Venezuela due to the devalued official Bolivar exchange rate and an increase in corporate expenses.

Income from Operations. Income from operations for 2013 decreased by \$1.3 million as compared to 2012, and operating margin decreased to 8.7 percent from 9.1 percent over the same periods. These decreases were principally due to lower income from operations in the closures business and an increase in corporate expenses,

partially offset by higher income from operations in the metal and plastic container businesses. Income from operations included rationalization charges of \$12.0 million and \$8.7 million in 2013 and 2012, respectively. Income from operations of the metal container business for 2013 increased \$4.8 million, or 2.1 percent, as compared to 2012, and operating margin remained unchanged at 10.1 percent over the same periods. The increase in income from operations was primarily due to an increase in unit volumes, comparatively lower new plant start-up costs of \$5.6 million, improved manufacturing efficiencies and lower depreciation expense, partially offset by continued economic challenges in Europe, the impact of under absorbed operating costs at the new plants in Eastern Europe and the Middle East and a less favorable mix of products sold. Rationalization charges were \$2.5 million in each of 2013 and 2012.

Income from operations of the closures business for 2013 decreased \$10.1 million, or 13.8 percent, as compared to the same period in 2012, and operating margin decreased to 8.7 percent from 10.7 percent over the same periods. These decreases were primarily attributable to the \$3.0 million charge for the remeasurement of net assets of the Venezuela operations, a \$5.0 million unfavorable comparative operational impact in Venezuela due to political instability and currency restrictions, lower unit volumes in the legacy closures operations and higher rationalization charges, partially offset by improved manufacturing efficiencies. In addition, operating margin was unfavorably impacted by the write-up of inventory of Portola for purchase accounting. Rationalization charges were \$5.6 million and \$2.9 million in 2013 and 2012, respectively.

Income from operations of the plastic container business for 2013 increased \$7.8 million, or 25.3 percent, as compared to 2012, and operating margin increased to 6.0 percent from 5.0 percent over the same periods. These increases were primarily attributable to the inclusion of the PFC operations for a full year, continued improvement in operating performance and a more favorable mix of products sold, partially offset by lower volumes in the legacy operations, the unfavorable impact from the lagged pass through of increases in resin costs in 2013 as compared to the favorable impact from resin in 2012 and higher rationalization charges. Rationalization charges were \$3.9 million and \$3.3 million in 2013 and 2012, respectively.

Interest and Other Debt Expense. Interest and other debt expense before loss on early extinguishment of debt for 2013 increased \$4.4 million as compared to 2012 primarily due to higher average outstanding borrowings. The loss on early extinguishment of debt of \$2.1 million in 2013 was a result of the prepayment of \$300.9 million of bank term debt under our 2011 Credit Facility, while the loss on early extinguishment of debt of \$38.7 million in 2012 was a result of the redemption of the 7¼% Notes.

Provision for Income Taxes. The effective tax rate for 2013 was 35.0 percent, excluding the \$19.7 million favorable tax adjustment primarily related to the completion of tax audits in the second quarter of 2013, as compared to 32.4 percent for 2012. The effective tax rate for 2013 was unfavorably impacted by the cumulative adjustment of increases in enacted tax rates in certain foreign countries, the nondeductible portion of the charge for the remeasurement of net assets in the Venezuela closures operations and the geographic distribution of international income. The effective tax rate for 2012 was favorably impacted by changes to statutory tax rates enacted in certain jurisdictions and the resolution of certain issues with tax authorities.

YEAR ENDED DECEMBER 31, 2012 COMPARED WITH YEAR ENDED DECEMBER 31, 2011

Overview. Consolidated net sales were \$3.59 billion in 2012, representing a 2.3 percent increase as compared to 2011 primarily due to an increase in unit volumes in all of our businesses largely as a result of the inclusion of net sales from operations acquired in 2012 and 2011 and higher average selling prices in the metal container business due to the pass through of higher raw material costs, partially offset by the impact of unfavorable foreign currency translation, lower net sales in Europe largely due to weak economic conditions and lower average selling prices in the closures and plastic container businesses as a result of the pass through of lower resin costs. Income from operations for 2012 decreased by \$28.6 million, or 8.1 percent, as compared to 2011 primarily as a result of the inclusion in 2011 of \$25.2 million of income from proceeds received as a result of the termination of the merger agreement with Graham Packaging Company Inc., or the Graham Packaging merger agreement, net of costs attributable to certain corporate development activities, the impact from weak economic conditions in Europe, the unfavorable impact from inventory reductions and manufacturing inefficiencies in the metal container business, start-up costs for new metal container production facilities in Eastern Europe and the Middle East, an increase in depreciation expense, the impact of unfavorable foreign currency translation in the closures business and an increase in rationalization charges. These

decreases were partially offset by higher unit volumes in all of our businesses due in large part to the inclusion of the operations acquired in 2012 and 2011, the favorable comparison of the year-over-year resin pass through lag effect in the plastic container business which benefited 2012, cost

33

reduction initiatives and improved manufacturing efficiencies in the closures and plastic container businesses and a \$3.3 million charge in 2011 for the resolution of a past product liability dispute. Results for 2012 and 2011 included rationalization charges of \$8.7 million and \$7.7 million, respectively, and a loss on early extinguishment of debt of \$38.7 million and \$1.0 million, respectively. Net income in 2012 was \$151.3 million as compared to \$193.2 million in 2011.

Net Sales. The \$79.1 million increase in consolidated net sales in 2012 as compared to 2011 was due to higher net sales in the metal container and plastic container businesses, partially offset by a decrease in net sales in the closures business.

Net sales for the metal container business increased \$82.2 million, or 3.7 percent, in 2012 as compared to the same period in 2011. This increase was primarily attributable to an increase in unit volumes of approximately 3.5 percent due in large part to the inclusion of net sales from acquisitions completed in 2011 and 2012, and higher average selling prices as a result of the pass through of higher raw material costs, partially offset by the impact of unfavorable foreign currency translation of approximately \$23.3 million and lower price realization in the European markets largely in exchange for improved customer credit terms.

Net sales for the closures business in 2012 decreased \$7.7 million, or 1.1 percent, as compared to the same period in 2011. This decrease was primarily the result of the impact of unfavorable foreign currency translation of approximately \$26.0 million, lower net sales in Europe due to weak economic conditions and lower average selling prices as a result of the pass through of lower resin costs, partially offset by higher unit volumes of approximately 1.5 percent principally due to an increase in sales of single-serve beverages in the U.S. largely as a result of warmer temperatures in 2012.

Net sales for the plastic container business in 2012 increased \$4.6 million, or 0.8 percent, as compared to the same period in 2011. This increase was primarily attributable to an increase in volumes of approximately 1.0 percent due in large part to the inclusion of net sales from the PFC operations acquired in August 2012, partially offset by lower average selling prices as a result of the pass through of lower raw material costs, selectively lower volumes in the legacy operations to rebalance the portfolio of the business and the impact of unfavorable foreign currency translation of approximately \$1.8 million.

Gross Profit. Gross profit margin decreased 0.4 percentage points to 14.4 percent in 2012 as compared to 14.8 percent in 2011 for the reasons discussed below in "Income from Operations."

Selling, General and Administrative Expenses. Selling, general and administrative expenses increased \$26.6 million in 2012 as compared to 2011. Selling, general and administrative expenses as a percentage of consolidated net sales increased to 5.1 percent in 2012 as compared to 4.5 percent in 2011. These increases were primarily due to the inclusion in 2011 of \$25.2 million of income from proceeds received as a result of the termination of the Graham Packaging merger agreement, net of costs attributable to certain corporate development activities.

Income from Operations. Income from operations for 2012 decreased by \$28.6 million as compared to 2011, and operating margin decreased to 9.1 percent from 10.1 percent over the same periods. These decreases were principally due to the inclusion in 2011 of \$25.2 million of income from proceeds received as a result of the termination of the Graham Packaging merger agreement, net of costs attributable to certain corporate development activities, and lower income from operations in the metal container and closures businesses, partially offset by higher income from operations in the plastic container business. Income from operations included rationalization charges of \$8.7 million and \$7.7 million in 2012 and 2011, respectively.

Income from operations of the metal container business for 2012 decreased \$24.8 million, or 9.7 percent, as compared to 2011, and operating margin decreased to 10.1 percent from 11.6 percent over the same periods. These decreases were primarily due to lower overhead absorption in 2012 as a result of planned inventory reductions as compared to favorable overhead absorption in 2011 due to an inventory build in advance of labor negotiations in 2012, inefficiencies as a result of the timing, mix and geography of customer requirements, the impact from lower price realization in Europe, start-up costs of \$6.4 million for new production facilities in Eastern Europe and the Middle East, higher depreciation expense and higher rationalization charges. These decreases were partially offset by an increase in unit volumes and a \$3.3 million charge in 2011 for the resolution of a past product liability dispute. Rationalization charges were \$2.5 million and \$1.4 million in 2012 and 2011, respectively.

Income from operations of the closures business for 2012 decreased \$2.8 million, or 3.7 percent, as compared to the same period in 2011, and operating margin decreased to 10.7 percent from 11.0 percent over the

same periods. These decreases were primarily attributable to price pressure and lower unit volumes in the European market, unfavorable foreign currency translation and higher rationalization charges. These decreases were partially offset by higher unit volumes in the single-serve beverage market in the United States and benefits from ongoing cost reduction initiatives and improved manufacturing efficiencies. Rationalization charges were \$2.9 million and \$1.8 million in 2012 and 2011, respectively.

Income from operations of the plastic container business for 2012 increased \$18.2 million, or 144.4 percent, as compared to 2011, and operating margin increased to 5.0 percent from 2.1 percent over the same periods. These increases were primarily attributable to continued improvement in operating performance, the favorable comparison of the year-over-year resin pass through lag effect which benefited 2012, the inclusion of the PFC operations and lower rationalization charges. Rationalization charges were \$3.3 million and \$4.0 million in 2012 and 2011, respectively.

Interest and Other Debt Expense. Interest and other debt expense before loss on early extinguishment of debt for 2012 remained unchanged at \$63.0 million as compared to 2011, with the impact of higher average outstanding borrowings being offset by lower average interest rates largely attributable to the issuance in March 2012 of \$500 million of the 5% Notes and the refinancing of our 2010 Credit Facility in July 2011 with our 2011 Credit Facility. The loss on early extinguishment of debt of \$38.7 million in 2012 was a result of the redemption of the 7¼% Notes, while the loss on early extinguishment of debt of \$1.0 million in 2011 was a result of the refinancing of our 2010 Credit Facility.

Provision for Income Taxes. The effective tax rate was 32.4 percent and 33.4 percent for 2012 and 2011, respectively. The effective tax rate for 2012 was favorably impacted by changes to statutory tax rates enacted in certain jurisdictions and the resolution of certain issues with tax authorities.

CAPITAL RESOURCES AND LIQUIDITY

Our principal sources of liquidity have been net cash from operating activities and borrowings under our debt instruments, including our senior secured credit facility. Our liquidity requirements arise primarily from our obligations under the indebtedness incurred in connection with our acquisitions and the refinancing of that indebtedness, capital investment in new and existing equipment and the funding of our seasonal working capital needs.

On January 14, 2014, we completed the refinancing of our 2011 Credit Facility by entering into the Credit Agreement. Under the Credit Agreement, we borrowed term loans and have available to us revolving loans. The term loans, or the Term Loans, provided under the Credit Agreement refinanced the term loans under our 2011 Credit Facility. The Term Loans consist of \$365 million of U.S. term loans, Cdn \$70 million of Canadian term loans and €220 million of Euro term loans. The Term Loans mature on January 14, 2020, and principal on the Term Loans is required to be repaid in scheduled annual installments as provided in the Credit Agreement beginning in December 2015. The revolving loans, or the Revolving Loans, consist of a \$985.6 million multicurrency revolving loan facility and a Cdn \$15.0 million Canadian revolving loan facility. We may use Revolving Loans under the Credit Agreement for working capital and other general corporate purposes, including acquisitions, dividends, stock repurchases and refinancing of other debt. Revolving Loans may be borrowed, repaid and reborrowed until their final maturity on January 14, 2019. The Credit Agreement also provides us with an uncommitted multicurrency incremental loan facility for up to an additional \$1.25 billion (which amount may be increased as provided in the Credit Agreement), which may be used to finance acquisitions and for other permitted purposes. All amounts owed under our 2011 Credit Facility were repaid on January 14, 2014 with proceeds from the Credit Agreement, and our 2011 Credit Facility was terminated. As a result of the refinancing of our 2011 Credit Facility, we expect to record a pre-tax charge for the loss on early extinguishment of debt of approximately \$1.6 million in the first quarter of 2014.

On September 9, 2013, we issued \$300 million aggregate principal amount of the 5½% Notes at 100 percent of their principal amount. Interest on the 5½% Notes is payable semi-annually in cash on February 1 and August 1 of each year beginning February 1, 2014, and the 5½% Notes mature on February 1, 2022. Net proceeds from the issuance of the 5½% Notes were used to repay outstanding bank revolving loans under our 2011 Credit Facility.

On March 23, 2012, we issued \$500 million aggregate principal amount of the 5% Notes at 100 percent of their principal amount. Interest on the 5% Notes is payable semi-annually in cash on April 1 and October 1 of each year, and the 5% Notes mature on April 1, 2020. Proceeds from the issuance of the 5% Notes were used to redeem the 7¼% Notes in April 2012, to pay the applicable premium for such redemption, to pay related fees and expenses and for

general corporate purposes. We incurred a \$38.7 million loss on early extinguishment of debt for the premium paid in connection with this redemption and the write-off of unamortized debt issuance costs and discount.

In 2013, we used cash and cash equivalents of \$305.1 million, proceeds from the issuance of the 5½% Notes of \$300.0 million and other foreign term loans of \$5.0 million, cash provided by operating activities of \$350.7 million, net borrowings of revolving loans of \$22.4 million and increases in outstanding checks of \$13.1 million to fund the repayment of \$308.3 million of long-term debt (including the repayment of \$7.4 million of foreign bank term loans), the purchase price for the acquisitions of Portola, Amcor Australia Metal Closures and Tecnocap U.S. Metal Closures for an aggregate of \$281.7 million, repurchases of our common stock of \$267.6 million, net capital expenditures of \$94.7 million, dividends paid on our common stock of \$36.2 million, debt issuance costs of \$5.7 million related to the 5½% Notes and net payments for stock-based compensation issuances of \$2.1 million.

In 2012, we used proceeds from the issuance of long-term debt of \$526.6 million and cash provided by operating activities of \$351.7 million (after voluntary contributions of \$76.0 million to our domestic pension benefit plans) to fund the repayment of long-term debt of \$285.9 million (including the redemption of the 7¼% Notes for \$280.9 million), the purchase price for the acquisitions of PFC and Öntaş for \$268.1 million, net capital expenditures of \$117.7 million, deferred payments of purchase price for prior acquisitions of \$51.0 million, dividends paid on our common stock of \$33.8 million, repurchases of our common stock of \$34.1 million, debt issuance costs of \$9.8 million related to the 5% Notes, decreases in outstanding checks of \$4.8 million, net repayments of revolving loans of \$3.7 million and net payments for stock-based compensation issuances of \$0.9 million and to increase cash and cash equivalents by \$68.5 million.

Changes in working capital and outstanding checks provided cash of \$59.1 million and \$80.4 million in 2013 and 2012, respectively. Working capital in 2013 and 2012 provided cash primarily as a result of planned reductions in inventory and the timing of customer payments.

In 2011, we used proceeds from the issuance of long-term debt of \$1,088.8 million, cash provided by operating activities of \$359.6 million (which included the benefit of \$25.2 million of proceeds received as a result of the termination of the Graham Packaging merger agreement, net of costs attributable to certain corporate development activities), net borrowings of revolving loans of \$20.0 million and net proceeds from stock-based compensation issuances of \$0.6 million to fund the repayment of long-term debt of \$691.4 million, the purchase price for acquisitions completed in 2011 of \$290.8 million, net capital expenditures of \$169.1 million, decreases in outstanding checks of \$33.7 million, dividends paid on our common stock of \$31.1 million, repurchases of our common stock of \$15.8 million, debt issuance costs of \$12.9 million related to our 2011 Credit Facility and other financing activities of \$2.3 million and to increase cash and cash equivalents by \$221.9 million.

At December 31, 2013, we had \$1,703.8 million of total consolidated indebtedness and \$160.5 million of cash and cash equivalents on hand, which included \$54.7 million of cash and cash equivalents on hand in foreign countries. In addition, at December 31, 2013, we had outstanding letters of credit of \$22.7 million and no outstanding revolving loan borrowings under our 2011 Credit Facility.

Under the Credit Agreement, we have available to us revolving loans consisting of \$985.6 million under a multicurrency revolving loan facility and Cdn \$15.0 million under a Canadian revolving loan facility. Revolving loans under the Credit Agreement may be used for working capital and other general corporate purposes, including acquisitions, dividends, stock repurchases and refinancing of other debt. Revolving loans may be borrowed, repaid and reborrowed over the life of the Credit Agreement until their final maturity in January 2019. Under the Credit Agreement, we also have available to us an uncommitted multicurrency incremental loan facility in an amount of up to an additional \$1.25 billion (which amount may be increased as provided in the Credit Agreement), and we may incur additional indebtedness as permitted by the Credit Agreement and our other instruments governing our indebtedness. You should also read Note 8 to our Consolidated Financial Statements for the year ended December 31, 2013 included elsewhere in this Annual Report.

Because we sell metal containers and closures used in fruit and vegetable pack processing, we have seasonal sales. As is common in the industry, we must utilize working capital to build inventory and then carry accounts receivable for some customers beyond the end of the packing season. Due to our seasonal requirements, which generally peak sometime in the summer or early fall, we may incur short-term indebtedness to finance our working capital requirements. In recent years, our peak seasonal working capital requirements have averaged approximately \$350 million and were generally funded with revolving loans under our respective senior secured credit facilities, other foreign bank loans and cash on hand. For 2014, we expect to fund our seasonal working capital requirements with

revolving loans under the Credit Agreement, foreign bank loans and cash on hand. We may use the available portion of revolving loans under the Credit Agreement, after taking into account our seasonal needs and outstanding letters of credit, for other general corporate purposes, including acquisitions, dividends, stock repurchases and refinancing and repurchases of other debt.

In 2011, our Board of Directors authorized the repurchase by us of up to \$300.0 million of our common stock, inclusive of prior authorizations, from time to time through and including December 31, 2014. On November 19, 2012, our Board of Directors authorized the repurchase by us of an additional \$100.0 million of our common stock from time to time through and including December 31, 2014. Pursuant to these authorizations, we repurchased 354,154 shares of our common stock in 2013 at an average price per share of \$46.90, for a total purchase price of \$16.6 million; 805,346 shares of our common stock in 2012 at an average price per share of \$42.33, for a total purchase price of \$34.1 million; and 441,416 shares of our common stock in 2011 at an average price per share of \$35.77, for a total purchase price of \$15.8 million. In addition, pursuant to these authorizations, we completed a "modified Dutch auction" tender offer on February 8, 2013 pursuant to which we repurchased 5,524,861 shares of our common stock from our stockholders at a price of \$45.25 per share, for a total purchase price of \$250.0 million. Mr. Horrigan, our Non-Executive Co-Chairman of our Board of Directors, participated in the tender offer, and we purchased 515,806 shares beneficially owned by him at a price of \$45.25 per share, for a total purchase price of \$23.3 million. At December 31, 2013, we had \$85.3 million remaining under these authorizations for the repurchase of our common stock.

In addition to our operating cash needs and excluding any impact from acquisitions, we believe our cash requirements over the next few years will consist primarily of:

- annual capital expenditures of approximately \$120 million to \$160 million, which may increase as a result of projects emanating out of Can Vision 2020 SM;

- principal amortization payments of bank term loans under the Credit Agreement and other outstanding debt agreements of \$126.2 million in 2014, \$46.7 million in 2015, \$76.9 million in each of 2016, 2017 and 2018, \$480.7 million in 2019, \$501.7 million in 2020 and \$300.0 million in 2022;

- cash payments for quarterly dividends on our common stock as approved by our Board of Directors;

- annual payments to satisfy employee withholding tax requirements resulting from certain restricted stock units becoming vested, which payments are dependent upon the price of our common stock at the time of vesting and the number of restricted stock units that vest, none of which is estimable at this time (payments in 2013 were not significant);

- our interest requirements, including interest on revolving loans (the principal amount of which will vary depending upon seasonal requirements) and term loans under the Credit Agreement, which bear fluctuating rates of interest, the 5½% Notes and the 5% Notes;

- payments of approximately \$100 million to \$120 million for federal, state and foreign tax liabilities in 2014, which may increase annually thereafter; and

- payments for pension benefit plan contributions, which are not expected to be significant based on the current funded status of our domestic pension plans at December 31, 2013.

We believe that cash generated from operations and funds from borrowings available under the Credit Agreement will be sufficient to meet our expected operating needs, planned capital expenditures, debt service, tax obligations, pension benefit plan contributions, share repurchases required under our 2004 Stock Incentive Plan and common stock dividends for the foreseeable future. We continue to evaluate acquisition opportunities in the consumer goods packaging market and may incur additional indebtedness, including indebtedness under the Credit Agreement, to finance any such acquisition.

The Credit Agreement contains restrictive covenants that, among other things, limit our ability to incur debt, sell assets and engage in certain transactions. The indentures governing the 5½% Notes and the 5% Notes contain certain covenants that restrict our ability to create liens, engage in sale and leaseback transactions and consolidate, merge or sell assets. We do not expect these limitations to have a material effect on our business or our results of operations. We are in compliance with all financial and operating covenants contained in our financing agreements and believe that we will continue to be in compliance during 2014 with all of these covenants.

We continually evaluate cost reduction opportunities across each of our businesses, including rationalizations of our existing facilities through plant closings and downsizings. We use a disciplined approach to identify opportunities that generate attractive cash returns. Under our rationalization plans, we made cash payments of \$6.9 million, \$6.6 million and \$13.3 million in 2013, 2012 and 2011, respectively. Additional cash spending under our rationalization plans of approximately \$11.0 million is expected primarily in 2014 and, to a lesser extent, thereafter. You should also read

Note 3 to our Consolidated Financial Statements for the year ended December 31, 2013 included elsewhere in this Annual Report.

37

CONTRACTUAL OBLIGATIONS

Our contractual cash obligations at December 31, 2013 are provided below:

	Payment due by period				
	Total	Less than 1 year	1-3 years	3-5 years	More than 5 years
	(Dollars in millions)				
Long-term debt obligations ⁽¹⁾	\$1,685.9	\$126.2	\$123.5	\$153.8	\$1,282.4
Interest on fixed rate debt	293.8	42.8	84.7	83.9	82.4
Interest on variable rate debt ⁽²⁾	84.7	24.4	29.0	22.2	9.1
Operating lease obligations	167.8	34.4	49.4	33.3	50.7
Purchase obligations ⁽³⁾	3.8	3.8	—	—	—
Other postretirement benefit obligations ⁽⁴⁾	27.3	3.3	6.0	5.5	12.5
Total ⁽⁵⁾	\$2,263.3	\$234.9	\$292.6	\$298.7	\$1,437.1

These amounts represent expected cash payments of principal of our debt, assuming we had entered into the Credit (1) Agreement and completed the refinancing of our 2011 Credit Facility on December 31, 2013 which resulted in a net decrease in our term loan borrowings of \$17.9 million.

These amounts represent expected cash payments of interest on our variable rate long-term debt under the Credit (2) Agreement, after taking into consideration our interest rate swap agreements, at prevailing interest rates at December 31, 2013.

(3) Purchase obligations represent commitments for capital expenditures of \$3.8 million. Obligations that are cancelable without penalty are excluded.

(4) Other postretirement benefit obligations have been actuarially determined through the year 2023.

(5) Based on current legislation and the current funded status of our domestic pension benefit plans, there are no significant minimum required contributions to our pension benefit plans in 2014.

At December 31, 2013, we also had outstanding letters of credit of \$22.7 million that were issued under our 2011 Credit Facility.

You should also read Notes 8, 9, 10 and 11 to our Consolidated Financial Statements for the year ended December 31, 2013 included elsewhere in this Annual Report.

OFF-BALANCE SHEET ARRANGEMENTS

We do not have any off-balance sheet arrangements.

EFFECT OF INFLATION AND INTEREST RATE FLUCTUATIONS

Historically, inflation has not had a material effect on us, other than to increase our cost of borrowing. In general, we have been able to increase the sales prices of our products to reflect any increases in the prices of raw materials (subject to contractual lag periods) and to significantly reduce the exposure of our results of operations to increases in other costs, such as labor and other manufacturing costs.

Because we have indebtedness which bears interest at floating rates, our financial results will be sensitive to changes in prevailing market rates of interest. As of December 31, 2013, we had \$1,703.8 million of indebtedness outstanding, of which \$633.4 million bore interest at floating rates, after taking into account interest rate swap agreements that we entered into to mitigate the effect of interest rate fluctuations. Under these agreements, we pay fixed rates of interest ranging from 0.75 percent to 4.1 percent and receive floating rates of interest based on three month LIBOR or Euribor, as applicable. These agreements mature as follows: €105 million notional principal amount in 2014, \$50 million notional principal amount in 2015 and \$50 million notional principal amount in 2017. In addition, we have entered into one other interest rate swap agreement for \$50 million notional principal amount, with a forward start date in 2014 that matures in 2017. Depending upon market conditions, we may enter into additional interest rate swap or hedge agreements (with counterparties that, in our judgment, have sufficient creditworthiness) to hedge our exposure against interest rate volatility.

CRITICAL ACCOUNTING POLICIES

U.S. generally accepted accounting principles require estimates and assumptions that affect the reported amounts in our consolidated financial statements and the accompanying notes. Some of these estimates and assumptions require difficult, subjective and/or complex judgments. Critical accounting policies cover accounting matters that are inherently uncertain because the future resolution of such matters is unknown. We believe that our accounting policies for pension expense and obligations, rationalization charges and acquisition reserves and testing goodwill and other intangible assets with indefinite lives for impairment reflect the more significant judgments and estimates in our consolidated financial statements. You should also read our Consolidated Financial Statements for the year ended December 31, 2013 and the accompanying notes included elsewhere in this Annual Report.

Our pension expense and obligations are developed from actuarial valuations. Two critical assumptions in determining pension expense and obligations are the discount rate and expected long-term return on plan assets. We evaluate these assumptions at least annually. Other assumptions reflect demographic factors such as retirement, mortality and turnover and are evaluated periodically and updated to reflect our actual experience. Actual results may differ from actuarial assumptions. The discount rate represents the market rate for non-callable high-quality fixed income investments and is used to calculate the present value of the expected future cash flows for benefit obligations under our pension benefit plans. A decrease in the discount rate increases the present value of benefit obligations and increases pension expense, while an increase in the discount rate decreases the present value of benefit obligations and decreases pension expense. A 25 basis point decrease in the discount rate would result in an increase in our annual pension expense by approximately \$1.2 million, while a 25 basis point increase in the discount rate would result in a decrease in our annual pension expense by approximately \$0.5 million. For 2013, we increased our domestic discount rate from 4.1 percent to 4.9 percent to reflect market interest rate conditions. We consider the current and expected asset allocations of our pension benefit plans, as well as historical and expected long-term rates of return on those types of plan assets, in determining the expected long-term rate of return on plan assets. A 25 basis point change in the expected long-term rate of return on plan assets would have a countervailing impact our annual pension expense by approximately \$1.7 million. Our expected long-term rate of return on plan assets will remain at 8.5 percent in 2014. You should also read Note 11 to our Consolidated Financial Statements for the year ended December 31, 2013 included elsewhere in this Annual Report.

Historically, we have maintained a strategy of acquiring businesses and enhancing profitability through productivity and cost reduction opportunities. Acquisitions require us to estimate the fair value of the assets acquired and liabilities assumed in the transactions. These estimates of fair value are based on market participant perspectives when available and our business plans for the acquired entities, which include eliminating operating redundancies, facility closings and rationalizations and assumptions as to the ultimate resolution of liabilities assumed. We also continually evaluate the operating performance of our existing facilities and our business requirements and, when deemed appropriate, we exit or rationalize existing operating facilities. Establishing reserves for acquisition plans and facility rationalizations requires the use of estimates. Although we believe that these estimates accurately reflect the costs of these plans, actual costs incurred may differ from these estimates.

Goodwill and other intangible assets with indefinite lives are reviewed for impairment each year and more frequently if circumstances indicate a possible impairment. Our tests for impairment require us to make assumptions regarding the expected earnings and cash flows of our reporting units. These assumptions are based on our internal forecasts. Developing these assumptions requires the use of significant judgment and estimates. Actual results may differ from these forecasts. If an impairment were to be identified, it could result in additional expense recorded in our consolidated statements of income.

CHANGE IN DEPRECIABLE LIVES

Based on the long duration of utilization of our production assets, due in part to our maintenance practices for such assets, and the consistent outperformance of their depreciable lives, we recently engaged a third party appraiser to assist in the evaluation of the useful lives of certain production equipment in each of our business segments. As a result of this evaluation, effective January 1, 2014, we have increased the estimated useful lives of certain production equipment by an average of approximately 5 years to a maximum of 20 years. Accordingly, we currently expect depreciation and amortization expense for 2014 to be approximately \$155 million as compared to \$167.6 million in 2013.

FORWARD-LOOKING STATEMENTS

The statements we have made in “Risk Factors” and “Management’s Discussion and Analysis of Results of Operations and Financial Condition” and elsewhere in this Annual Report which are not historical facts are “forward-looking statements” made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995 and the Securities Exchange Act of 1934, as amended, or the Exchange Act. These forward-looking statements are made based upon management’s expectations and beliefs concerning future events impacting us and therefore involve a number of uncertainties and risks. Therefore, the actual results of our operations or our financial condition could differ materially from those expressed or implied in these forward-looking statements.

The discussion in our “Risk Factors” and our “Management’s Discussion and Analysis of Results of Operations and Financial Condition” sections highlight some of the more important risks identified by our management, but should not be assumed to be the only factors that could affect future performance. Other factors that could cause the actual results of our operations or our financial condition to differ from those expressed or implied in these forward-looking statements include, but are not necessarily limited to, our ability to effect cost reduction initiatives and realize benefits from capital investments; our ability to satisfy our obligations under our contracts; the impact of customer claims; compliance by our suppliers with the terms of our arrangements with them; changes in consumer preferences for different packaging products; changes in general economic conditions; the idling or loss of one or more of our significant manufacturing facilities; significant increases in the costs of health care benefits in the United States as well as the unknown impact of recent health care legislation in the United States; the adoption of new accounting standards or interpretations; changes in income tax provisions; and other factors described elsewhere in this Annual Report or in our other filings with the SEC.

Except to the extent required by the federal securities laws, we undertake no obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise. The foregoing review of factors pursuant to the Private Securities Litigation Reform Act of 1995 should not be construed as exhaustive or as any admission regarding the adequacy of our disclosures. Certain risk factors are detailed from time to time in our various public filings. You are advised, however, to consult any further disclosures we make on related subjects in our filings with the SEC.

You can identify forward-looking statements by the fact that they do not relate strictly to historic or current facts.

Forward-looking statements use terms such as “anticipates,” “believes,” “continues,” “could,” “estimates,” “expects,” “intends,” “plans,” “potential,” “predicts,” “will,” “should,” “seeks,” “pro forma” or similar expressions in connection with any disclosure of future operating or financial performance. These statements are only predictions and involve known and unknown risks, uncertainties and other factors, including the risks described under “Risk Factors,” that may cause our actual results of operations, financial condition, levels of activity, performance or achievements to be materially different from any future results of operations, financial condition, levels of activity, performance or achievements expressed or implied by such forward-looking statements. You should not place undue reliance on these forward-looking statements.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.

Market risks relating to our operations result primarily from changes in interest rates and, with respect to our international metal container and closures operations and our Canadian plastic container operations, from foreign currency exchange rates. In the normal course of business, we also have risk related to commodity price changes for items such as natural gas. We employ established policies and procedures to manage our exposure to these risks. Interest rate, foreign currency and commodity pricing transactions are used only to the extent considered necessary to meet our objectives. We do not utilize derivative financial instruments for trading or other speculative purposes.

INTEREST RATE RISK

Our interest rate risk management objective is to limit the impact of interest rate changes on our net income and cash flow. To achieve our objective, we regularly evaluate the amount of our variable rate debt as a percentage of our aggregate debt. During 2013 and 2012, our average outstanding variable rate debt, after taking into account the average outstanding notional amount of our interest rate swap agreements, was 55 percent and 59 percent of our average outstanding total debt, respectively. At December 31, 2013, our outstanding variable rate debt, after taking into account interest rate swap agreements, was approximately 37 percent of our outstanding total debt. We manage a portion of our exposure to interest rate fluctuations in our variable rate debt through interest rate swap agreements.

These agreements effectively convert interest rate exposure from variable rates to fixed rates of interest. We have entered into these agreements with banks under our Credit Agreement, and our obligations under

40

these agreements are guaranteed and secured on a pari passu basis with our obligations under our Credit Agreement. You should also read Notes 4, 8 and 9 to our Consolidated Financial Statements for the year ended December 31, 2013 included elsewhere in this Annual Report which outline the principal and notional amounts, interest rates, fair values and other terms required to evaluate the expected cash flows from these agreements.

Based on the average outstanding amount of our variable rate indebtedness in 2013, a one percentage point change in the interest rates for our variable rate indebtedness would have impacted our 2013 interest expense by an aggregate of approximately \$10.0 million, after taking into account the average outstanding notional amount of our interest rate swap agreements during 2013.

FOREIGN CURRENCY EXCHANGE RATE RISK

Currently, we conduct a portion of our manufacturing and sales activity outside the United States, primarily in Europe and Canada. In an effort to minimize foreign currency exchange risk, we have financed our acquisitions of our European and Canadian operations primarily with term loans borrowed under our Credit Agreement denominated in Euros and Canadian dollars, respectively. Our European operations include non-Euro denominated entities, including, most significantly, in Poland, Russia, Hungary, Turkey and the United Kingdom. We also have operations in Asia, South America and Central America that are not considered significant to our consolidated financial statements. Where available, we have borrowed funds in local currency or implemented certain internal hedging strategies to minimize our foreign currency risk related to foreign operations. In addition, we are exposed to gains and losses from limited transactions of our operations denominated in a currency other than the functional currency of such operations. We are also exposed to possible losses in the event of a currency devaluation in any of the foreign countries where we have operations. We generally do not utilize external derivative financial instruments to manage our foreign currency risk.

COMMODITY PRICING RISK

We purchase raw materials for our products such as metal and resins. These raw materials are generally purchased pursuant to contracts or at market prices established with the vendor. In general, we do not engage in hedging activities for these raw materials due to our ability to pass on price changes to our customers.

We also purchase commodities, such as natural gas and electricity, and are subject to risks on the pricing of these commodities. In general, we purchase these commodities pursuant to contracts or at market prices. We manage a portion of our exposure to natural gas price fluctuations through natural gas swap agreements. During 2013 and 2012, we entered into natural gas swap agreements to hedge approximately 27 percent and 21 percent, respectively, of our exposure to fluctuations in natural gas prices. As of December 31, 2013, we had entered into natural gas swap agreements to hedge approximately 3 percent of our expected 2014 exposure to fluctuations in natural gas prices. These agreements effectively convert pricing exposure for natural gas from market pricing to a fixed price. You should also read Notes 4 and 9 to our Consolidated Financial Statements for the year ended December 31, 2013 included elsewhere in this Annual Report which outline the terms necessary to evaluate these transactions.

Based on our natural gas usage in 2013, a ten percent change in natural gas costs would have impacted our 2013 cost of goods sold by approximately \$2.3 million, after taking into account our natural gas swap agreements.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA.

We refer you to Item 15, “Exhibits and Financial Statement Schedules,” below for a listing of financial statements and schedules included in this Annual Report, which are incorporated here in this Annual Report by this reference.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE.

Not applicable.

ITEM 9A. CONTROLS AND PROCEDURES.

DISCLOSURE CONTROLS AND PROCEDURES

As required by Rule 13a-15(e) of the Exchange Act, we carried out an evaluation, under the supervision and with the participation of management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of our disclosure controls and procedures. Based upon that evaluation, as of the end of the period covered by this Annual Report, our Chief Executive Officer and Chief Financial Officer concluded that the disclosure controls and procedures were effective to ensure that information required to be disclosed by us in the reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the SEC’s rules and forms, and that our disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by us in the reports we file or submit under the Exchange Act is accumulated and communicated to our management, including the Principal Executive Officer and the Principal Financial Officer, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure.

There were no changes in our internal controls over financial reporting during the period covered by this Annual Report that have materially affected, or are reasonably likely to materially affect, these internal controls.

MANAGEMENT’S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

Our management is responsible for establishing and maintaining adequate internal control over financial reporting. Our internal control over financial reporting is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements in accordance with generally accepted accounting principles. Because of inherent limitations, internal control over financial reporting may not prevent or detect misstatements.

Management assessed the effectiveness of our internal control over financial reporting as of December 31, 2013. In making this assessment, management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in Internal Control—Integrated Framework (1992 Framework). Based on this assessment and those criteria, management believes that we maintained effective internal control over financial reporting as of December 31, 2013.

The effectiveness of our internal control over financial reporting as of December 31, 2013 has been audited by Ernst & Young LLP, our independent registered public accounting firm, and Ernst & Young LLP has issued an attestation report on our internal control over financial reporting which is provided below.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM
THE BOARD OF DIRECTORS AND STOCKHOLDERS OF SILGAN HOLDINGS INC.

We have audited Silgan Holdings Inc.'s internal control over financial reporting as of December 31, 2013, based on criteria established in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (1992 framework) (the COSO criteria). Silgan Holdings Inc.'s management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Silgan Holdings Inc. maintained, in all material respects, effective internal control over financial reporting as of December 31, 2013, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Silgan Holdings Inc. as of December 31, 2013 and 2012 and the related consolidated statements of income, comprehensive income, stockholders' equity, and cash flows for each of the three years in the period ended December 31, 2013 of Silgan Holdings Inc. and our report dated February 28, 2014 expressed an unqualified opinion thereon.
