Quarterly Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934
For the quarterly period ended September 30, 2016

or

Transition Report Pursuant to Section 13 or 15 (d) of the Securities Exchange Act of 1934

For the transition period from _____ to _____

Commission File No. 1-15461

MATRIX SERVICE COMPANY
(Exact name of registrant as specified in its charter)

DELAWARE 73-1352174
(State of incorporation) (I.R.S. Employer Identification No.)
5100 East Skelly Drive, Suite 500, Tulsa, Oklahoma 74135
(Address of principal executive offices and zip code)

Registrant's telephone number, including area code: (918) 838-8822

Not Applicable

(Former name, former address and former fiscal year, if changed since last report)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Inter Active Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definition of "accelerated filer", "large accelerated filer", and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer

Non-accelerated filer Smaller reporting company

Edgar Filing: MATRIX SERVICE CO - Form 10-Q

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

As of November 3, 2016 there were 27,888,217 shares of the Company's common stock, \$0.01 par value per share, issued and 26,533,332 shares outstanding.

Matrix Service Company

Notes to Condensed Consolidated Financial Statements
(unaudited)

Note 1 – Basis of Presentation and Accounting Policies

The condensed consolidated financial statements include the accounts of Matrix Service Company (“Matrix”, “we”, “our”, “us”, “its” or the “Company”) and its subsidiaries, unless otherwise indicated. Intercompany balances and transactions have been eliminated in consolidation.

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with Rule 10-01 of Regulation S-X for interim financial statements required to be filed with the Securities and Exchange Commission and do not include all information and footnotes required by generally accepted accounting principles for complete financial statements. The information furnished reflects all adjustments, consisting of normal recurring adjustments and other adjustments described herein, that are, in the opinion of management, necessary for a fair statement of the results of operations, cash flows and financial position for the interim periods presented. The accompanying condensed financial statements should be read in conjunction with the audited financial statements for the year ended June 30, 2016, included in the Company’s Annual Report on Form 10-K for the year then ended. The results of operations for the three month period ended September 30, 2016 may not necessarily be indicative of the results of operations for the full year ending June 30, 2017.

Recently Issued Accounting Standards

Accounting Standards Update 2014-09, Revenue from Contracts with Customers (Topic 606)

On May 28, 2014, the Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update (“ASU”) No. 2014-09. The standard outlines a single comprehensive model for entities to use in accounting for revenue arising from contracts with customers and supersedes most current revenue recognition guidance, including industry-specific guidance. The core principle of the revenue model is that “an entity recognizes revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services.” The ASU also requires entities to disclose both quantitative and qualitative information that enables users of financial statements to understand the nature, amount, timing, and uncertainty of revenue and cash flows arising from contracts with customers. The ASU’s disclosure requirements are significantly more comprehensive than those in existing revenue standards. The ASU applies to all contracts with customers except those that are within the scope of other topics in the FASB Accounting Standards Codification (“ASC”).

The ASU is effective for annual reporting periods beginning after December 15, 2017, with early adoption permitted on a limited basis. Upon adoption, the Company may elect one of two application methods, a full retrospective application or a modified retrospective application. We expect to adopt this standard on July 1, 2018 and are currently evaluating its expected impact on our financial statements.

Accounting Standards Update 2014-15, Presentation of Financial Statements-Going Concern (Subtopic 205-40):

Disclosure of Uncertainties about an Entity’s Ability to Continue as a Going Concern

On August 27, 2014, the FASB issued ASU 2014-15, which provides guidance on determining when and how reporting entities must disclose going-concern uncertainties in their financial statements. The new standard requires management to perform interim and annual assessments of an entity’s ability to continue as a going concern within one year of the date of issuance of the entity’s financial statements. Further, an entity must provide certain disclosures if there is “substantial doubt about the entity’s ability to continue as a going concern.” The FASB believes that requiring management to perform the assessment will enhance the timeliness, clarity, and consistency of related disclosures and improve convergence with international financial reporting standards (“IFRSs”) (which emphasize management’s responsibility for performing the going-concern assessment). However, the time horizon for the assessment (look-forward period) and the disclosure thresholds under U.S. GAAP and IFRSs will continue to differ. The ASU is effective for annual periods ending after December 15, 2016, and interim periods thereafter; early adoption is

permitted.

The ASU was adopted during the Company's first fiscal quarter ending September 30, 2016. In connection with the adoption of the ASU, the Company now performs an assessment of its ability to continue as a going concern on a quarterly basis. Disclosure regarding the status of the Company's ability to continue as a going concern is required when there are conditions or events that raise substantial doubt about its ability to continue as a going concern within one year after the date that the financial statements are issued.

Accounting Standards Update 2015-16, Business Combinations (Topic 805): Simplifying the Accounting for Measurement-Period Adjustments

On September 25, 2015, the FASB issued ASU 2015-16 to simplify the accounting for measurement-period adjustments. The ASU was issued in response to stakeholder feedback that restatements of prior periods to reflect adjustments made to provisional amounts recognized in a business combination increase the cost and complexity of financial reporting but do not significantly improve the usefulness of the information. Under the ASU, an acquirer must recognize adjustments to provisional amounts that are identified during the measurement period in the reporting period in which the adjustment amounts are determined. The ASU also requires acquirers to present separately on the face of the income statement, or disclose in the notes, the portion of the amount recorded in current-period earnings by line item that would have been recorded in previous reporting periods if the adjustment to the provisional amounts had been recognized as of the acquisition date. For public business entities, the ASU is effective for fiscal years beginning after December 15, 2015, including interim periods within those fiscal years. We adopted this standard on July 1, 2016 with no material impact to the Company's financial statements.

Accounting Standards Update 2016-02, Leases (Topic 842)

On February 25, 2016, the FASB issued ASU 2016-02. The amendments in this update require, among other things, that lessees recognize the following for all leases (with the exception of short-term leases) at the commencement date: (1) a lease liability, which is a lessee's obligation to make lease payments arising from a lease, measured on a discounted basis; and (2) a right-of-use asset, which is an asset that represents the lessee's right to use, or control the use of, a specified asset for the lease term. Lessees and lessors must apply a modified retrospective transition approach for leases existing at, or entered into after, the beginning of the earliest comparative period presented in the financial statements. For public business entities, the ASU is effective for fiscal years beginning after December 15, 2018, including interim periods within those fiscal years. We are currently evaluating the ASU's expected impact on our financial statements.

Accounting Standards Update 2016-09, Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting

On March 30, 2016, the FASB issued ASU 2016-09, which simplified several aspects of accounting for stock-based compensation transactions, including the accounting for income taxes and forfeitures and statutory tax withholding requirements. The ASU is effective for the Company on July 1, 2017 and early adoption is permitted. The Company adopted the ASU during its first fiscal quarter ending September 30, 2016. The following is a description of the key provisions of the ASU and their impacts to the Company's financial statements:

Accounting for Income Taxes: The amendments require the Company to recognize excess tax benefits or tax deficiencies in its provision for income taxes in its consolidated statements of income during the period of vesting or exercise of its nonvested deferred share awards and stock options, respectively, for which it expects to receive an income tax deduction. Previously, the Company recognized any excess tax benefits in additional paid-in capital ("APIC") in the balance sheet and any tax deficiencies were recognized as a reduction of APIC to the extent the Company has accumulated excess tax benefits. Any tax deficiencies in excess of accumulated excess tax benefits in APIC were recognized in the provision for income taxes. The amendments also require the Company to only present excess tax benefits and tax deficiencies in the operating section of its statements of cash flows as a component of deferred tax activity. Previously, the Company was required to present such items in both the financing section and operating section of its statements of cash flows. Amendments related to the recognition of excess tax benefits and tax deficiencies in income are required to be applied prospectively, and amendments related to the cash flow statement presentation of excess tax benefits and tax deficiencies may be applied either retrospectively or prospectively. The Company applied the amendments requiring the recognition of excess tax benefits and tax deficiencies in income prospectively. As a result, the Company recognized \$0.4 million of excess tax benefits in its provision for income

taxes during the three months ended September 30, 2016, which increased basic and diluted earnings per share by \$0.01. Under the prior accounting standard, the Company would have recognized the excess tax benefits in equity as additional paid-in capital. The amendments relating to the presentation of excess tax benefits and tax deficiencies in the statement of cash flows were applied retrospectively. The effect of the retrospective adjustment was to eliminate the presentation of an operating cash outflow and a financing cash inflow for excess tax benefits on exercised stock options and vesting of deferred shares. These eliminations reduced both net cash used by operating activities and net cash provided by financing activities by less than \$0.1 million for the three months ended September 30, 2015. Net cash flows did not change as a result of the retrospective adjustment.

Table of Contents

Matrix Service Company
Notes to Condensed Consolidated Financial Statements
(unaudited)

Accounting for Forfeitures: The amendments in this ASU allow the Company to elect, as a company-wide accounting policy, either to continue to estimate the amount of forfeitures to exclude from compensation expense or to exclude forfeitures from compensation expense as they occur. Upon the adoption of the ASU during the first quarter of fiscal 2017, the Company elected to account for forfeitures as they occur. The Company is required to apply these amendments on a modified retrospective basis with a cumulative adjustment to retained earnings as of the beginning of the fiscal year. The Company recorded a modified retrospective adjustment to reduce the June 30, 2016 retained earnings balance and increase the additional paid-in capital balance by \$0.1 million each.

Statutory Tax Withholding Requirements: Under the prior accounting standard, an entire award must be classified as a liability if the fair value of the shares withheld exceeds the Company's minimum statutory withholding obligation. Under the ASU, the Company is allowed to withhold shares with a fair value up to the amount of tax owed using the maximum statutory tax rate in the employee's applicable jurisdictions. The Company is allowed to determine one maximum rate for all employees in each jurisdiction, rather than a rate for each employee in the jurisdiction. Also, the ASU requires that cash outflows to reacquire shares withheld for taxes to be classified in the financing section of the statement of cash flows.

The Company adopted the ASU during the first quarter of fiscal 2017. Since the Company did not have any awards classified as liabilities due to statutory tax withholding requirements as of September 30, 2016, and since the Company already presented its cash outflows for reacquiring shares withheld for taxes as a financing activity in its statements of cash flows, these amendments did not have any impact on its financial statements upon adoption. The Company does not expect changes to employee withholdings for stock compensation to have a material impact to the financial statements.

Accounting Standards Update 2016-13, Financial Instruments - Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments

On June 16, 2016, the FASB issued ASU 2016-13, which changes how the Company accounts for its allowance for uncollectible accounts. The amendments in this update require a financial asset (or a group of financial assets) to be presented at the net amount expected to be collected. The income statement will reflect any increases or decreases of expected credit losses that have taken place during the period. The measurement of expected credit losses is based on relevant information about past events, including historical experience, current conditions, and reasonable and supportable forecasts that affect the collectibility of the reported amount.

Current GAAP delays the recognition of the full amount of credit losses until the loss is probable of occurring. The amendments in this update eliminate the probable initial recognition threshold and, instead, reflect the Company's current estimate of all expected credit losses. In addition, current guidance limits the information the Company may consider in measuring a credit loss to its past events and current conditions. The amendments in this update broaden the information the Company may consider in developing its expected credit loss estimate to include forecasted information.

The amendments in this update are effective for the Company on July 1, 2020 and the Company may early adopt on July 1, 2019. The Company must apply the amendments in this update through a cumulative-effect adjustment to retained earnings as of the beginning of the first reporting period in which the guidance is effective. At this time, the Company does not expect this update to have a material impact to its estimate of the allowance for uncollectible accounts.

Note 2 – Acquisition

Purchase of Baillie Tank Equipment, Ltd.

On February 1, 2016, the Company completed the acquisition of all outstanding stock of Baillie Tank Equipment, Ltd. (“BTE”), an internationally-based company with nearly 20 years of experience in the design and manufacture of products for use on aboveground storage tanks. Founded in 1998, BTE is a provider of tank products including geodesic domes, aluminum internal floating roofs, floating suction and skimmer systems, roof drain systems, and seals. BTE is headquartered in Sydney, Australia with a manufacturing facility in Seoul, South Korea. The Company acquired BTE to expand its service offerings of certain technical solutions for aboveground storage tanks. The business is now known as Matrix Applied Technologies, and its operating results are included in the Storage Solutions segment.

The Company purchased BTE with cash on-hand for a net purchase price of \$13.0 million. The Company paid \$15.4 million when including the subsequent repayment of long-term debt acquired and the settlement of certain other liabilities acquired, and excluding the cash acquired and certain amounts owed to the former owners for working capital adjustments. The net purchase price was allocated to the major categories of assets and liabilities based on their estimated fair value at the acquisition date.

The following table summarizes the preliminary net purchase price allocation (in thousands):

Current assets	\$5,574
Property, plant and equipment	4,347
Goodwill	7,030
Other intangible assets	720
Other assets	233
Total assets acquired	17,904
Current liabilities	1,669
Deferred income taxes	329
Long-term debt	1,858
Other liabilities	407
Net assets acquired	13,641
Cash acquired	592
Net purchase price	\$13,049

The goodwill recognized from the acquisition is attributable to the synergies of combining our operations and the technical expertise of the acquired workforce. None of the goodwill recognized is deductible for income tax purposes. The fair value of the net assets acquired is preliminary pending the final valuation of those assets. As a result, goodwill is also preliminary since it has been recorded as the excess of the purchase price over the estimated fair value of the net assets acquired.

The Company incurred \$0.8 million of expenses related to the acquisition during fiscal 2016, which were included within selling, general and administrative expenses in the consolidated statements of income. The acquired business contributed revenues of \$1.0 million and an operating loss of \$0.4 million during the three months ended September 30, 2016.

Note 3 – Uncompleted Contracts

Contract terms of the Company’s construction contracts generally provide for progress billings based on project milestones. The excess of costs incurred and estimated earnings over amounts billed on uncompleted contracts is reported as a current asset. The excess of amounts billed over costs incurred and estimated earnings recognized on uncompleted contracts is reported as a current liability. Gross and net amounts on uncompleted contracts are as follows:

Table of ContentsMatrix Service Company
Notes to Condensed Consolidated Financial Statements
(unaudited)

	September 30, 2016	June 30, 2016
	(in thousands)	
Costs incurred and estimated earnings recognized on uncompleted contracts	\$2,107,546	\$1,875,014
Billings on uncompleted contracts	2,054,834	1,829,340
	\$52,712	\$45,674
Shown in balance sheet as:		
Costs and estimated earnings in excess of billings on uncompleted contracts	\$105,094	\$104,001
Billings on uncompleted contracts in excess of costs and estimated earnings	52,382	58,327
	\$52,712	\$45,674

Progress billings in accounts receivable at September 30, 2016 and June 30, 2016 included retentions to be collected within one year of \$43.2 million and \$29.7 million, respectively. Contract retentions collectible beyond one year are included in other assets in the condensed consolidated balance sheet and totaled \$0.3 million at June 30, 2016. There were no retentions collectible beyond one year at September 30, 2016.

Other

Under percentage of completion accounting for fixed-priced contracts, contract revenues and earnings are recognized ratably over the contract term based on the proportion of actual costs incurred to total estimated costs. As of September 30, 2016, the Company is performing work on two previously announced significant multi-year projects that are contracted on a fixed price basis. One of the projects is expected to be complete in fiscal 2017 and the second project is expected to be complete in fiscal 2018.

On the project that is expected to complete in fiscal 2018, which is a contract for the construction of a power generating station, the Company recorded a project charge in the first quarter of fiscal 2017. The charge primarily related to costs incurred that relate to a pending claim for which the Company did not recognize any profit and changes in estimated costs on certain portions of the work. The Company is in active negotiations with the client regarding the recovery of claim related costs and extension of the project completion date. These costs primarily relate to owner provided engineering and equipment, which has resulted in additional work and a delayed project completion date. The outcome of these negotiations is unpredictable and may have a significant financial impact to the Company. Although there is significant uncertainty surrounding the client negotiations on the power generation project, based on the information currently available, the Company believes that its current estimates relating to these projects are reasonable. However, it is possible that changes to these contract estimates, including those related to project costs, project timelines, and change orders or claims, could occur and have a material positive or negative impact to our results of operations and financial position in subsequent accounting periods.

Note 4 – Intangible Assets Including Goodwill

Goodwill

The changes in the carrying value of goodwill by segment are as follows:

	Electrical Infrastructure	Oil Gas & Chemical	Storage Solutions	Industrial	Total
	(In thousands)				
Net balance at June 30, 2016	\$42,170	\$ 14,008	\$ 16,681	\$ 5,434	\$78,293
Purchase price adjustment for BTE (Note 2)	—	—	88	—	88
Translation adjustment (1)	(92)	—	2	(17)	(107)
Net balance at September 30, 2016	\$42,078	\$ 14,008	\$ 16,771	\$ 5,417	\$78,274

The translation adjustments relate to the periodic translation of Canadian Dollar and South Korean Won (1)denominated goodwill recorded as a part of prior acquisitions in Canada and South Korea, in which the local currency was determined to be the functional currency.

The Company performed its annual goodwill impairment test as of May 31, 2016, which did not indicate the existence of any impairment at that time. While the operating results for the Oil Gas & Chemical and Industrial segments indicated a loss for the three months ended September 30, 2016, the Company does not consider these results to be a triggering event requiring the performance of an interim goodwill impairment test since the Company has not significantly changed its forecasts since the annual test was performed and the Company continues to consider these segments as core to its business and believes future performance will improve. The Company will continue to monitor its operating results for indicators of impairment and perform additional tests as necessary.

Other Intangible Assets

Information on the carrying value of other intangible assets is as follows:

	At September 30, 2016			
	Useful Life (Years)	Gross Carrying Amount (In thousands)	Accumulated Amortization (In thousands)	Net Carrying Amount
Intellectual property	9 to 15	\$2,579	\$ (1,291)	\$ 1,288
Customer-based	1.5 to 15	28,113	(10,227)	17,886
Non-compete agreements	4 to 5	1,453	(1,138)	315
Trade names	3 to 5	1,615	(953)	662
Total amortizing intangible assets		\$33,760	\$ (13,609)	\$ 20,151

Table of Contents

Matrix Service Company
Notes to Condensed Consolidated Financial Statements
(unaudited)

	At June 30, 2016			Net Carrying Amount
	Useful Life (Years)	Gross Carrying Amount (In thousands)	Accumulated Amortization (In thousands)	
Intellectual property	9 to 15	\$2,579	\$ (1,246)	\$ 1,333
Customer-based	1.5 to 15	28,179	(9,655)	18,524
Non-compete agreements	4 to 5	1,453	(1,102)	351
Trade names	3 to 5	1,615	(824)	791
Total amortizing intangible assets		\$33,826	\$ (12,827)	\$ 20,999

Amortization expense totaled \$0.8 million during each of the three months ended September 30, 2016 and 2015. We estimate that the remaining amortization expense at September 30, 2016 will be as follows (in thousands):

Period ending:

Remainder of Fiscal 2017	\$2,482
Fiscal 2018	2,935
Fiscal 2019	2,582
Fiscal 2020	2,572
Fiscal 2021	2,552
Fiscal 2022	1,705
Thereafter	5,323
Total estimated remaining amortization expense at September 30, 2016	\$20,151

Note 5 – Debt

The Company has a five-year \$200.0 million senior secured revolving credit facility under a credit agreement (the "Credit Agreement") that expires March 13, 2019. Advances under the credit facility may be used for working capital, acquisitions, capital expenditures, issuances of letters of credit and other lawful purposes.

The Credit Agreement includes the following covenants and borrowing limitations:

• Our Senior Leverage Ratio, as defined in the agreement, may not exceed 2.50 to 1.00, determined as of the end of each fiscal quarter.

• We are required to maintain a Fixed Charge Coverage Ratio, as defined in the agreement, greater than or equal to 1.25 to 1.00, determined as of the end of each fiscal quarter.

• Asset dispositions (other than inventory and obsolete or unneeded equipment disposed of in the ordinary course of business) are limited to \$20.0 million per 12-month period.

Amounts borrowed under the Credit Agreement bear interest at LIBOR or an Alternate Base Rate, plus in each case, an additional margin based on the Senior Leverage Ratio. The additional margin on Alternate Base Rate and LIBOR-based loans ranges between 0.25% and 1.0% and between 1.25% and 2.0%, respectively.

The Credit Agreement also permits us to borrow in Canadian dollars with a sub-limit of U.S. \$40.0 million. Amounts borrowed in Canadian dollars will bear interest either at the CDOR Rate, plus an additional margin based on the Senior Leverage Ratio ranging from 1.25% to 2.0%, or at the Canadian Prime Rate, plus an additional margin based on the Senior Leverage Ratio ranging from 1.75% to 2.5%. The CDOR Rate is equal to the sum of the annual rate of interest, which is the rate determined as being the arithmetic average of the quotations of all institutions listed in respect of the relevant CDOR interest period for Canadian Dollar denominated bankers' acceptances, plus 0.1%. The Canadian Prime Rate is equal to the greater of (i) the rate of interest per annum most recently announced or

established by JPMorgan Chase Bank, N.A., Toronto Branch as its reference rate in effect on such

- 14-

Table of Contents

Matrix Service Company
Notes to Condensed Consolidated Financial Statements
(unaudited)

day for determining interest rates for Canadian Dollar denominated commercial loans in Canada and (ii) the CDOR Rate plus 1.0%.

The Unused Credit Facility Fee is between 0.20% and 0.35% based on the Senior Leverage Ratio.

The Credit Agreement includes a Senior Leverage Ratio covenant, which provides that Consolidated Funded Indebtedness, as of the end of any fiscal quarter, may not exceed 2.5 times Consolidated EBITDA, as defined in the Credit Agreement, over the previous four quarters. For the four quarters ended September 30, 2016, Consolidated EBITDA, as defined in the Credit Agreement, was \$70.2 million. Accordingly, at September 30, 2016, there was a restriction on our ability to access the full amount of the credit facility. Consolidated Funded Indebtedness at September 30, 2016 was \$30.1 million.

Availability under the senior revolving credit facility was as follows:

	September 30, 2016	September 30, 2015
	(In thousands)	
Senior revolving credit facility	\$200,000	\$200,000
Capacity constraint due to the Senior Leverage Ratio	24,395	20,138
Capacity under the credit facility	175,605	179,862
Borrowings outstanding	17,186	—
Letters of credit	20,784	20,755
Availability under the senior revolving credit facility	\$137,635	\$159,107

Outstanding borrowings at September 30, 2016 under our Credit Agreement were primarily used to fund working capital needs in our Canadian business due to the timing of collections and disbursements on the previously announced power generating project.

The Company is in compliance with all affirmative, negative, and financial covenants under the Credit Agreement.

Note 6 – Income Taxes

We use the asset and liability approach for financial accounting and reporting for income taxes. Deferred income tax assets and liabilities are computed annually for differences between the financial statement and tax bases of assets and liabilities that will result in taxable or deductible amounts in the future based on enacted tax laws and rates applicable to the periods in which the differences are expected to affect taxable income. Valuation allowances based on our judgments and estimates are established when necessary to reduce deferred tax assets to the amount expected to be realized in future operating results. Company management believes that realization of deferred tax assets in excess of the valuation allowance is more likely than not. Our estimates are based on facts and circumstances in existence as well as interpretations of existing tax regulations and laws applied to the facts and circumstances.

The Company provides for income taxes regardless of whether it has received a tax assessment. Taxes are provided when it is considered probable that additional taxes will be due in excess of amounts included in the tax return. The Company regularly reviews exposure to additional income taxes due, and as further information is known or events occur, adjustments may be recorded.

Our effective tax rate for the three months ended September 30, 2016 was 33.6% compared to 34.3% in the same period a year earlier. The Company recorded discrete benefits of \$0.3 million during the three months ended September 30, 2016 and recorded \$0.5 million of discrete benefits during the three months ended September 30, 2015. The fiscal 2017 discrete benefits primarily relate to the application of ASU 2016-09 (See Note 1) and the fiscal 2016 tax rate was positively impacted by a discrete item related to our Canadian operations.

Note 7 – Commitments and Contingencies

Insurance Reserves

The Company maintains insurance coverage for various aspects of its operations. However, exposure to potential losses is retained through the use of deductibles, self-insured retentions and coverage limits.

- 15-

Table of ContentsMatrix Service Company
Notes to Condensed Consolidated Financial Statements
(unaudited)

Typically our contracts require us to indemnify our customers for injury, damage or loss arising from the performance of our services and provide warranties for materials and workmanship. The Company may also be required to name the customer as an additional insured up to the limits of insurance available, or we may be required to purchase special insurance policies or surety bonds for specific customers or provide letters of credit in lieu of bonds to satisfy performance and financial guarantees on some projects. Matrix maintains a performance and payment bonding line sufficient to support the business. The Company generally requires its subcontractors to indemnify the Company and the Company's customer and name the Company as an additional insured for activities arising out of the subcontractors' work. We also require certain subcontractors to provide additional insurance policies, including surety bonds in favor of the Company, to secure the subcontractors' work or as required by the subcontract.

There can be no assurance that our insurance and the additional insurance coverage provided by our subcontractors will fully protect us against a valid claim or loss under the contracts with our customers.

Unapproved Change Orders and Claims

Costs and estimated earnings in excess of billings on uncompleted contracts included revenues for unapproved change orders and claims of \$26.2 million at September 30, 2016 and \$10.3 million at June 30, 2016. During the first quarter of fiscal 2017, the Company recognized \$5.8 million of unapproved change orders and a \$11.4 million claim in connection with its ongoing work on a gas fired generating facility being constructed in Canada. Generally, collection of amounts related to unapproved change orders and claims is expected within twelve months. However, since customers may not pay these amounts until final resolution of related claims, collection of these amounts may extend beyond one year.

Other

The Company and its subsidiaries are participants in various legal actions. It is the opinion of management that none of the known legal actions will have a material impact on the Company's financial position, results of operations or liquidity.

Note 8 – Earnings per Common Share

Basic earnings per share ("Basic EPS") is calculated based on the weighted average shares outstanding during the period. Diluted earnings per share ("Diluted EPS") includes the dilutive effect of stock options and nonvested deferred shares.

The computation of basic and diluted earnings per share is as follows:

	Three Months Ended	
	September 30, 2016	September 30, 2015
	(In thousands, except per share data)	
Basic EPS:		
Net income attributable to Matrix Service Company	\$ 9,342	\$ 9,941
Weighted average shares outstanding	26,387	26,476
Basic earnings per share	\$ 0.35	\$ 0.38
Diluted EPS:		
Weighted average shares outstanding – basic	26,387	26,476
Dilutive stock options	50	86
Dilutive nonvested deferred shares	359	488
Diluted weighted average shares	26,796	27,050
Diluted earnings per share	\$ 0.35	\$ 0.37

	2016	2015
	(In thousands)	

Nonvested deferred shares	78	56
---------------------------	----	----

Note 9 – Segment Information

We operate our business through four reportable segments: Electrical Infrastructure, Oil Gas & Chemical, Storage Solutions, and Industrial.

The Electrical Infrastructure segment primarily encompasses construction and maintenance services to a variety of power generation facilities, such as combined cycle plants, natural gas fired power stations, and renewable energy installations. We also provide high voltage services to investor owned utilities, including construction of new substations, upgrades of existing substations, short-run transmission line installations, distribution upgrades and maintenance, and storm restoration services.

The Oil Gas & Chemical segment includes turnaround activities, plant maintenance services and construction in the downstream petroleum industry. Another key offering is industrial cleaning services, which include hydroblasting, hydroexcavating, chemical cleaning and vacuum services. We also perform work in the petrochemical, natural gas, gas processing and compression, and upstream petroleum markets.

The Storage Solutions segment includes new construction of crude and refined products aboveground storage tanks (“ASTs”), as well as planned and emergency maintenance services. The Storage Solutions segment also includes balance of plant work in storage terminals and tank farms. Also included in the Storage Solutions segment is work related to specialty storage tanks, including liquefied natural gas (“LNG”), liquid nitrogen/liquid oxygen (“LIN/LOX”), liquid petroleum (“LPG”) tanks and other specialty vessels, including spheres. Finally, we offer AST products, including geodesic domes, aluminum internal floating roofs, floating suction and skimmer systems, roof drain systems and floating roof seals.

The Industrial segment includes construction and maintenance work in the iron and steel and mining and minerals industries. Our work in the mining and minerals industry is primarily for customers engaged in the extraction of copper. We also perform work in bulk material handling and fertilizer production facilities, thermal vacuum chambers, and other industrial markets.

The Company evaluates performance and allocates resources based on operating income. The accounting policies of the reportable segments are the same as those described in the Summary of Significant Accounting Policies footnote included in the Company’s Annual Report on Form 10-K for the year ended June 30, 2016. Intersegment sales and transfers are recorded at cost; therefore, no intersegment profit or loss is recognized.

Segment assets consist primarily of cash and cash equivalents, accounts receivable, costs and estimated earnings in excess of billings on uncompleted contracts, property, plant and equipment, goodwill and other intangible assets.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

CRITICAL ACCOUNTING ESTIMATES

There have been no material changes in our critical accounting policies from those reported in our fiscal 2016 Annual Report on Form 10-K filed with the SEC. For more information on our critical accounting policies, see Part II, Item 7 of our fiscal 2016 Annual Report on Form 10-K. The following section provides certain information with respect to our critical accounting estimates as of the close of our most recent quarterly period.

Revenue Recognition

Under percentage of completion accounting for fixed-priced contracts, contract revenues and earnings are recognized ratably over the contract term based on the proportion of actual costs incurred to total estimated costs. As of September 30, 2016, the Company is performing work on two previously announced significant multi-year projects that are contracted on a fixed price basis. One of the projects is expected to be complete in fiscal 2017 and the second project is expected to be complete in fiscal 2018.

On the project that is expected to complete in fiscal 2018, which is a contract for the construction of a power generating station, the Company recorded a project charge in the first quarter of fiscal 2017. The charge primarily related to costs incurred that relate to a pending claim for which the Company did not recognize any profit and changes in estimated costs on certain portions of the work. The Company is in active negotiations with the client regarding the recovery of claim related costs and extension of the project completion date. These costs primarily relate to owner provided engineering and equipment, which has resulted in additional work and a delayed project completion date. The outcome of these negotiations is unpredictable and may have a significant financial impact to the Company. Although there is significant uncertainty surrounding the client negotiations on the power generation project, based on the information currently available, the Company believes that its current estimates relating to these projects are reasonable. However, it is possible that changes to these contract estimates, including those related to project costs, project timelines, and change orders or claims, could occur and have a material positive or negative impact to our results of operations and financial position in subsequent accounting periods.

Goodwill

We performed our annual impairment test in the fourth quarter of fiscal 2016 to determine whether an impairment existed and to determine the amount of headroom. We define "headroom" as the percentage difference between the fair value of a reporting unit and its carrying value. The amount of headroom varies by reporting unit. Approximately 54% of our goodwill balance was attributable to one reporting unit. This unit had headroom of 158%. The remaining goodwill was attributable to six reporting units, with headroom of between 17% and 488%. Our significant assumptions, including revenue growth rates, gross margins, discount rate, interest expense and other factors may change in light of changes in the economic and competitive environment in which we operate.

While the operating results for the Oil Gas & Chemical and Industrial segments indicated a loss for the three months ended September 30, 2016, the Company does not consider these results to be a triggering event requiring the performance of an interim goodwill impairment test since the Company has not significantly changed its forecasts since the annual test was performed and the Company continues to consider these segments as core to its business and believes future performance will improve. The Company will continue to monitor its operating results for indicators of impairment and perform additional tests as necessary.

Other Intangible Assets

Intangible assets that have finite useful lives are amortized by the straight-line method over their useful lives ranging from 1.5 to 15 years. The Company evaluates intangible assets with finite lives for impairment whenever events or circumstances indicate that the carrying value may not be recoverable. The Company did not observe any events or circumstances during the three months ended September 30, 2016 that would indicate that the carrying value of its intangible assets may not be recoverable. The Company's evaluation included values assigned to customer relationships in the iron and steel industry which is currently experiencing short to medium term weakness. If the

Company's view of this market adversely changes or if other factors develop which change our view of the value of these relationships, the Company will reevaluate this conclusion.

- 19-

Table of Contents

Unapproved Change Orders and Claims

Costs and estimated earnings in excess of billings on uncompleted contracts included revenues for unapproved change orders and claims of \$26.2 million at September 30, 2016 and \$10.3 million at June 30, 2016. During the first quarter of fiscal 2017, the Company recognized \$7.7 million of unapproved change orders and a \$15.0 million claim in connection with its ongoing work on a gas fired generating facility being constructed in Canada. The amounts ultimately realized may be significantly different than the recorded amounts resulting in a material adjustment to future earnings.

Insurance Reserves

We maintain insurance coverage for various aspects of our operations. However, we retain exposure to potential losses through the use of deductibles, self-insured retentions and coverage limits. We establish reserves for claims using a combination of actuarially determined estimates and management judgment on a case-by-case basis and update our evaluations as further information becomes known. Judgments and assumptions, including the assumed losses for claims incurred but not reported, are inherent in our reserve accruals; as a result, changes in assumptions or claims experience could result in changes to these estimates in the future. If actual results of claim settlements are different than the amounts estimated, we may be exposed to gains and losses that could be significant.

Recently Issued Accounting Standards

Accounting Standards Update 2014-09, Revenue from Contracts with Customers (Topic 606)

On May 28, 2014, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") No. 2014-09. The standard outlines a single comprehensive model for entities to use in accounting for revenue arising from contracts with customers and supersedes most current revenue recognition guidance, including industry-specific guidance. The core principle of the revenue model is that "an entity recognizes revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services." The ASU also requires entities to disclose both quantitative and qualitative information that enables users of financial statements to understand the nature, amount, timing, and uncertainty of revenue and cash flows arising from contracts with customers. The ASU's disclosure requirements are significantly more comprehensive than those in existing revenue standards. The ASU applies to all contracts with customers except those that are within the scope of other topics in the FASB Accounting Standards Codification ("ASC").

The ASU is effective for annual reporting periods beginning after December 15, 2017, with early adoption permitted on a limited basis. Upon adoption, the Company may elect one of two application methods, a full retrospective application or a modified retrospective application. We expect to adopt this standard on July 1, 2018 and are currently evaluating its expected impact on our financial statements.

Accounting Standards Update 2014-15, Presentation of Financial Statements-Going Concern (Subtopic 205-40):

Disclosure of Uncertainties about an Entity's Ability to Continue as a Going Concern

On August 27, 2014, the FASB issued ASU 2014-15, which provides guidance on determining when and how reporting entities must disclose going-concern uncertainties in their financial statements. The new standard requires management to perform interim and annual assessments of an entity's ability to continue as a going concern within one year of the date of issuance of the entity's financial statements. Further, an entity must provide certain disclosures if there is "substantial doubt about the entity's ability to continue as a going concern." The FASB believes that requiring management to perform the assessment will enhance the timeliness, clarity, and consistency of related disclosures and improve convergence with international financial reporting standards ("IFRSs") (which emphasize management's responsibility for performing the going-concern assessment). However, the time horizon for the assessment (look-forward period) and the disclosure thresholds under U.S. GAAP and IFRSs will continue to differ. The ASU is effective for annual periods ending after December 15, 2016, and interim periods thereafter; early adoption is permitted.

The ASU was adopted during the Company's first fiscal quarter ending September 30, 2016. In connection with the adoption of the ASU, the Company now performs an assessment of its ability to continue as a going concern on a quarterly basis. Disclosure regarding the status of the Company's ability to continue as a going concern is required when there are conditions or events that raise substantial doubt about its ability to continue as a going concern within one year after the date that the financial statements are issued.

- 20-

Table of Contents

Accounting Standards Update 2015-16, Business Combinations (Topic 805): Simplifying the Accounting for Measurement-Period Adjustments

On September 25, 2015, the FASB issued ASU 2015-16 to simplify the accounting for measurement-period adjustments. The ASU was issued in response to stakeholder feedback that restatements of prior periods to reflect adjustments made to provisional amounts recognized in a business combination increase the cost and complexity of financial reporting but do not significantly improve the usefulness of the information. Under the ASU, an acquirer must recognize adjustments to provisional amounts that are identified during the measurement period in the reporting period in which the adjustment amounts are determined. The ASU also requires acquirers to present separately on the face of the income statement, or disclose in the notes, the portion of the amount recorded in current-period earnings by line item that would have been recorded in previous reporting periods if the adjustment to the provisional amounts had been recognized as of the acquisition date. For public business entities, the ASU is effective for fiscal years beginning after December 15, 2015, including interim periods within those fiscal years. We adopted this standard on July 1, 2016 with no material impact to the Company's financial statements.

Accounting Standards Update 2016-02, Leases (Topic 842)

On February 25, 2016, the FASB issued ASU 2016-02. The amendments in this update require, among other things, that lessees recognize the following for all leases (with the exception of short-term leases) at the commencement date: (1) a lease liability, which is a lessee's obligation to make lease payments arising from a lease, measured on a discounted basis; and (2) a right-of-use asset, which is an asset that represents the lessee's right to use, or control the use of, a specified asset for the lease term. Lessees and lessors must apply a modified retrospective transition approach for leases existing at, or entered into after, the beginning of the earliest comparative period presented in the financial statements. For public business entities, the ASU is effective for fiscal years beginning after December 15, 2018, including interim periods within those fiscal years. We are currently evaluating the ASU's expected impact on our financial statements.

Accounting Standards Update 2016-09, Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting

On March 30, 2016, the FASB issued ASU 2016-09, which simplified several aspects of accounting for stock-based compensation transactions, including the accounting for income taxes and forfeitures and statutory tax withholding requirements. The ASU is effective for the Company on July 1, 2017 and early adoption is permitted. The Company adopted the ASU during its first fiscal quarter ending September 30, 2016. The following is a description of the key provisions of the ASU and their impacts to the Company's financial statements:

Accounting for Income Taxes: The amendments require the Company to recognize excess tax benefits or tax deficiencies in its provision for income taxes in its consolidated statements of income during the period of vesting or exercise of its nonvested deferred share awards and stock options, respectively, for which it expects to receive an income tax deduction. Previously, the Company recognized any excess tax benefits in additional paid-in capital ("APIC") in the balance sheet and any tax deficiencies were recognized as a reduction of APIC to the extent the Company has accumulated excess tax benefits. Any tax deficiencies in excess of accumulated excess tax benefits in APIC were recognized in the provision for income taxes. The amendments also require the Company to only present excess tax benefits and tax deficiencies in the operating section of its statements of cash flows as a component of deferred tax activity. Previously, the Company was required to present such items in both the financing section and operating section of its statements of cash flows. Amendments related to the recognition of excess tax benefits and tax deficiencies in income are required to be applied prospectively, and amendments related to the cash flow statement presentation of excess tax benefits and tax deficiencies may be applied either retrospectively or prospectively. The Company applied the amendments requiring the recognition of excess tax benefits and tax deficiencies in income prospectively. As a result, the Company recognized \$0.4 million of excess tax benefits in its provision for income taxes during the three months ended September 30, 2016, which increased basic and diluted earnings per share by \$0.01. Under the prior accounting standard, the Company would have recognized the excess tax benefits in equity as

additional paid-in capital. The amendments relating to the presentation of excess tax benefits and tax deficiencies in the statement of cash flows were applied retrospectively. The effect of the retrospective adjustment was to eliminate the presentation of an operating cash outflow and a financing cash inflow for excess tax benefits on exercised stock options and vesting of deferred shares. These eliminations reduced both net cash used by operating activities and net cash provided by financing activities by less than \$0.1 million for the three months ended September 30, 2015. Net cash flows did not change as a result of the retrospective adjustment.

- 21-

Table of Contents

Accounting for Forfeitures: The amendments in this ASU allow the Company to elect, as a company-wide accounting policy, either to continue to estimate the amount of forfeitures to exclude from compensation expense or to exclude forfeitures from compensation expense as they occur. Upon the adoption of the ASU during the first quarter of fiscal 2017, the Company elected to account for forfeitures as they occur. The Company is required to apply these amendments on a modified retrospective basis with a cumulative adjustment to retained earnings as of the beginning of the fiscal year. The Company recorded a modified retrospective adjustment to reduce the June 30, 2016 retained earnings balance and increase the additional paid-in capital balance by \$0.1 million each.

Statutory Tax Withholding Requirements: Under the prior accounting standard, an entire award must be classified as a liability if the fair value of the shares withheld exceeds the Company's minimum statutory withholding obligation. Under the ASU, the Company is allowed to withhold shares with a fair value up to the amount of tax owed using the maximum statutory tax rate in the employee's applicable jurisdictions. The Company is allowed to determine one maximum rate for all employees in each jurisdiction, rather than a rate for each employee in the jurisdiction. Also, the ASU requires that cash outflows to reacquire shares withheld for taxes to be classified in the financing section of the statement of cash flows.

The Company adopted the ASU during the first quarter of fiscal 2017. Since the Company did not have any awards classified as liabilities due to statutory tax withholding requirements as of September 30, 2016, and since the Company already presented its cash outflows for reacquiring shares withheld for taxes as a financing activity in its statements of cash flows, these amendments did not have any impact on its financial statements upon adoption. The Company does not expect changes to employee withholdings for stock compensation to have a material impact to the financial statements.

Accounting Standards Update 2016-13, Financial Instruments - Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments

On June 16, 2016, the FASB issued ASU 2016-13, which changes how the Company accounts for its allowance for uncollectible accounts. The amendments in this update require a financial asset (or a group of financial assets) to be presented at the net amount expected to be collected. The income statement will reflect any increases or decreases of expected credit losses that have taken place during the period. The measurement of expected credit losses is based on relevant information about past events, including historical experience, current conditions, and reasonable and supportable forecasts that affect the collectibility of the reported amount.

Current GAAP delays the recognition of the full amount of credit losses until the loss is probable of occurring. The amendments in this update eliminate the probable initial recognition threshold and, instead, reflect the Company's current estimate of all expected credit losses. In addition, current guidance limits the information the Company may consider in measuring a credit loss to its past events and current conditions. The amendments in this update broaden the information the Company may consider in developing its expected credit loss estimate to include forecasted information.

The amendments in this update are effective for the Company on July 1, 2020 and the Company may early adopt on July 1, 2019. The Company must apply the amendments in this update through a cumulative-effect adjustment to retained earnings as of the beginning of the first reporting period in which the guidance is effective. At this time, the Company does not expect this update to have a material impact to its estimate of the allowance for uncollectible accounts.

Table of Contents

RESULTS OF OPERATIONS

Overview

We operate our business through four reportable segments: Electrical Infrastructure, Oil Gas & Chemical, Storage Solutions, and Industrial.

The Electrical Infrastructure segment primarily encompasses construction and maintenance services to a variety of power generation facilities, such as combined cycle plants, natural gas fired power stations, and renewable energy installations. We also provide high voltage services to investor owned utilities, including construction of new substations, upgrades of existing substations, short-run transmission line installations, distribution upgrades and maintenance, and storm restoration services.

The Oil Gas & Chemical segment includes turnaround activities, plant maintenance services and construction in the downstream petroleum industry. Another key offering is industrial cleaning services, which include hydroblasting, hydroexcavating, chemical cleaning and vacuum services. We also perform work in the petrochemical, natural gas, gas processing and compression, and upstream petroleum markets.

The Storage Solutions segment includes new construction of crude and refined products aboveground storage tanks (“ASTs”), as well as planned and emergency maintenance services. The Storage Solutions segment also includes balance of plant work in storage terminals and tank farms. Also included in the Storage Solutions segment is work related to specialty storage tanks, including liquefied natural gas (“LNG”), liquid nitrogen/liquid oxygen (“LIN/LOX”), liquid petroleum (“LPG”) tanks and other specialty vessels, including spheres. Finally, we offer AST products, including geodesic domes, aluminum internal floating roofs, floating suction and skimmer systems, roof drain systems and floating roof seals.

The Industrial segment includes construction and maintenance work in the iron and steel and mining and minerals industries. Our work in the mining and minerals industry is primarily for customers engaged in the extraction of copper. We also perform work in bulk material handling and fertilizer production facilities, thermal vacuum chambers, and other industrial markets.

Three Months Ended September 30, 2016 Compared to the Three Months Ended September 30, 2015

Consolidated

Consolidated revenue was \$341.8 million for the three months ended September 30, 2016, compared to \$319.3 million in the same period in the prior fiscal year. On a segment basis, consolidated revenue increased in the Storage Solutions and Electrical Infrastructure segments by \$55.3 million and \$22.4 million, respectively. These increases were partially offset by decreases in revenue in the Oil Gas & Chemical and Industrial segments of \$35.8 million and \$19.4 million, respectively.

Consolidated gross profit decreased from \$34.6 million in the three months ended September 30, 2015 to \$32.3 million in the three months ended September 30, 2016. Gross margin decreased to 9.4% in the three months ended September 30, 2016 compared to 10.8% in the same period in the prior fiscal year. The reduction in gross margin in fiscal 2017 is primarily attributable to a project charge related to the construction of a power generating facility more fully discussed in Note 3 - Uncompleted Contracts and increased under recovery of construction overhead costs in the Oil Gas & Chemical and Industrial segments largely related to the reduction in volume in the current year.

Consolidated SG&A expenses were \$18.0 million in the three months ended September 30, 2016 compared to \$19.5 million in the same period a year earlier. The lower SG&A expenses in fiscal 2017 was due to a reduction in the IT costs charged to the administrative portion of the business. Excluding the change in allocation method, there were no significant variances in SG&A expense in the three months ended September 30, 2016 compared to the prior fiscal year.

Net interest expense was \$0.2 million in each of the three months ended September 30, 2016 and 2015.

Our effective tax rate for the three months ended September 30, 2016 was 33.6% compared to 34.3% in the same period a year earlier. The fiscal 2017 tax rate was positively impacted by a discrete item related to the excess tax benefit realized upon the vesting of deferred shares which is more fully described in Note 1 - Basis of Presentation

and Accounting Policies. The fiscal 2016 tax rate was positively impacted by a discrete item related to our Canadian operations.

For the three months ended September 30, 2016, net income attributable to Matrix Service Company and the related fully diluted earnings per share were \$9.3 million and \$0.35 compared to \$9.9 million and \$0.37 in the same period a year earlier.

- 23-

Table of Contents

Electrical Infrastructure

Revenue for the Electrical Infrastructure segment increased \$22.4 million to \$88.0 million in the three months ended September 30, 2016 compared to \$65.6 million in the same period a year earlier as a result from continued work on a power generating facility being constructed in Canada. The fiscal 2017 gross margin was 6.0% compared to 7.2% in the same period last year. The reduction in gross margin in fiscal 2017 is primarily attributable to a project charge related to the construction of the power generating facility mentioned above and more fully discussed in Note 3 - Uncompleted Contracts, lower margin work in our high voltage distribution business and, while improved, the under recovery of overhead costs.

Oil Gas & Chemical

Revenue for the Oil Gas & Chemical segment was \$32.5 million in the three months ended September 30, 2016 compared to \$68.3 million in the same period a year earlier. The decrease of \$35.8 million is related to lower volume across the business as refiners continue to limit spending as the result of continued volatility in commodity prices. The gross margin was break-even for the three months ended September 30, 2016 compared to 8.3% in the same period last year. The gross margin for fiscal 2017 was affected by lower volume which led to the under recovery of overhead costs and an audit settlement with a customer.

Storage Solutions

Revenue for the Storage Solutions segment was \$199.5 million in the three months ended September 30, 2016 compared to \$144.2 million in the same period a year earlier, an increase of 38.3%. The increase is primarily attributable to increased activity on a previously announced project for the construction of crude gathering terminals that support the Dakota Access Pipeline. The gross margin was 13.3% in the three months ended September 30, 2016 compared to 14.0% in the three months ended September 30, 2015 as a result of effective project execution in both periods.

Industrial

Revenue for the Industrial segment decreased \$19.4 million to \$21.8 million in the three months ended September 30, 2016 compared to \$41.2 million in the same period a year earlier. The decline in revenue is primarily attributable to lower business volumes in the iron and steel and mining markets, and lower revenue recognized on a large fertilizer project that is nearing completion. The gross margin was 2.6% in the three months ended September 30, 2016 compared to 9.6% in the same period a year earlier. The fiscal 2017 gross margin was negatively impacted by the under recovery of construction overhead costs due to reduced volume. The fiscal 2016 gross margin was positively impacted by the mix of work and strong project execution.

Backlog

We define backlog as the total dollar amount of revenue that we expect to recognize as a result of performing work that has been awarded to us through a signed contract, notice to proceed or other type of assurance that we consider firm. The following arrangements are considered firm:

fixed-price awards;

minimum customer commitments on cost plus arrangements; and

certain time and material arrangements in which the estimated value is firm or can be estimated with a reasonable amount of certainty in both timing and amounts.

For long-term maintenance contracts and other established customer arrangements, we include only the amounts that we expect to recognize into revenue over the next 12 months. For all other arrangements, we calculate backlog as the estimated contract amount less revenue recognized as of the reporting date.

The following table provides a summary of changes in our backlog for the three months ended September 30, 2016:

Electrical	Oil Gas & Storage	Industrial Total
------------	-------------------	------------------

Edgar Filing: MATRIX SERVICE CO - Form 10-Q

	Infrastructure	Chemical	Solutions		
	(In thousands)				
Backlog as of June 30, 2016	\$369,791	\$91,478	\$359,013	\$48,390	\$868,672
Project awards	72,520	120,338	38,650	28,213	259,721
Revenue recognized	(88,025)	(32,542)	(199,522)	(21,692)	(341,781)
Backlog as of September 30, 2016	\$354,286	\$179,274	\$198,141	\$54,911	\$786,612

- 24-

Table of Contents

Project awards in all segments are cyclical and are typically the result of a sales process that can take several months to complete. Backlog in the Storage Solutions and Electrical Infrastructure segments generally have the greatest volatility because individual project awards can be less frequent and more significant.

The change in backlog in the Electrical Infrastructure segment is mainly attributable to the work related to the previously announced Napanee Power Generating Station project largely offset by power delivery awards which continue to meet the Company's expectations.

The increase in backlog in the Oil, Gas & Chemical segment is mainly attributable to increased project awards such as the previously announced Ultra-Low Gasoline Project awarded by KBR, Inc, partially offset by low volume in the Company's turnarounds and plant services.

The decline in backlog in the Storage Solutions Segment is attributable to the work related to the previously announced project for the construction of terminals supporting the Dakota Access Pipeline. In addition, a more cautious approach to decision-making on the part of clients, together with more stringent financial and regulatory requirements, is delaying the timing of some of the larger awards. Although we are seeing increased competition, awards for small and medium sized projects are generally meeting the Company's expectations.

Seasonality and Other Factors

Our operating results can exhibit seasonal fluctuations, especially in our Oil Gas & Chemical segment, for a variety of reasons. Turnarounds and planned outages at customer facilities are typically scheduled in the spring and the fall when the demand for energy is lower. Within the Electrical Infrastructure segment, transmission and distribution work is generally scheduled by the public utilities when the demand for electricity is at its lowest. Therefore, revenue volume in the summer months is typically lower than in other periods throughout the year. Also, we typically see a lower level of operating activity relating to construction projects during the winter months and early in the calendar year because many of our customers' capital budgets have not been finalized. Our business can also be affected, both positively and negatively, by seasonal factors such as energy demand or weather conditions including hurricanes, snowstorms, and abnormally low or high temperatures. Some of these seasonal factors may cause some of our offices and projects to close or reduce activities temporarily. In addition to the above noted factors, the general timing of project starts and completions could exhibit significant fluctuations. Accordingly, results for any interim period may not necessarily be indicative of operating results for the full year.

Other factors impacting operating results in all segments come from work site permitting delays or customers accelerating or postponing work. The differing types, sizes, and durations of our contracts, combined with their geographic diversity and stages of completion, often results in fluctuations in the Company's operating results.

Impact of Commodity Price Volatility

The prolonged decline in crude prices continues to impact our income from operations and project awards, particularly in the Oil Gas & Chemical and Storage Solutions segments. The Industrial segment continues to be negatively impacted by the low prices of other commodities, principally steel and copper. The decline in commodity prices has not had, and we do not expect a significant impact on the Electrical Infrastructure segment.

In the midstream and downstream portions of the Oil Gas & Chemical segment, we continue to see lower volumes of routine maintenance and turnaround work as well as a general slowdown of capital projects. Additionally, since some of our mid and downstream customers are integrated oil companies with exposure to the price of crude, if the prices remain at current levels or decline further, spending levels may continue to be reduced. Our exposure to non-integrated upstream clients in the Oil Gas & Chemical segment is not significant.

In our Storage Solutions segment, our customers continue to take a long-term view of the market, but continue to be cautious short-term, particularly on larger projects. Based on current market conditions, we are seeing a reduction in customer spending and project award delays. Although we are seeing signs of market improvement, we cannot predict the direction of commodity prices or our customers' ultimate reaction to the market and therefore cannot predict the magnitude of the impact to our future earnings.

Table of Contents

In the Industrial segment, our iron and steel customers face significant uncertainty related to the slowdown in the Chinese economy and the related impact on steel imports and steel prices, the strong United States Dollar, the domestic demand for steel and the impact of anti-dumping duties on steel imports. This uncertainty has reduced the capital, expansion and elective maintenance spending of our customers. Although we are seeing some encouraging signs in the market, we do not expect higher levels of spending until the overall uncertainty in this market is reduced and economic conditions within the industry improve. In the mining and minerals markets, we continue to see lower spending due to the softness of other commodity prices, particularly copper, to which our clients are exposed.

Non-GAAP Financial Measure

EBITDA is a supplemental, non-GAAP financial measure. EBITDA is defined as earnings before interest expense, income taxes, depreciation and amortization. We have presented EBITDA because it is used by the financial community as a method of measuring our performance and of evaluating the market value of companies considered to be in similar businesses. We believe that the line item on our Consolidated Statements of Income entitled "Net Income" is the most directly comparable GAAP measure to EBITDA. Since EBITDA is not a measure of performance calculated in accordance with GAAP, it should not be considered in isolation of, or as a substitute for, net earnings as an indicator of operating performance. EBITDA, as we calculate it, may not be comparable to similarly titled measures employed by other companies. In addition, this measure is not a measure of our ability to fund our cash needs. As EBITDA excludes certain financial information compared with net income, the most directly comparable GAAP financial measure, users of this financial information should consider the type of events and transactions that are excluded. Our non-GAAP performance measure, EBITDA, has certain material limitations as follows:

It does not include interest expense. Because we have borrowed money to finance our operations, pay commitment fees to maintain our credit facility, and incur fees to issue letters of credit under the credit facility, interest expense is a necessary and ongoing part of our costs and has assisted us in generating revenue. Therefore, any measure that excludes interest expense has material limitations.

It does not include income taxes. Because the payment of income taxes is a necessary and ongoing part of our operations, any measure that excludes income taxes has material limitations.

It does not include depreciation or amortization expense. Because we use capital and intangible assets to generate revenue, depreciation and amortization expense is a necessary element of our cost structure. Therefore, any measure that excludes depreciation or amortization expense has material limitations.

A reconciliation of EBITDA to net income follows:

	Three Months Ended	
	September 30,	September 30,
	2016	2015
	(In thousands)	
Net income attributable to Matrix Service Company	\$9,342	\$ 9,941
Interest expense	243	263
Provision for income taxes	4,735	5,076
Depreciation and amortization	4,904	5,429
EBITDA	\$19,224	\$ 20,709

FINANCIAL CONDITION AND LIQUIDITY

Overview

We define liquidity as the ongoing ability to pay our liabilities as they become due, fund business operations and meet all monetary contractual obligations. Our primary sources of liquidity for the three months ended September 30, 2016 were cash on hand, capacity under our senior revolving credit facility and cash generated from operations before consideration of changes in working capital. Cash on hand at September 30, 2016 totaled \$35.6 million and availability under the senior revolving credit facility totaled \$137.6 million resulting in available liquidity of \$173.2 million.

- 26-

Table of Contents

Factors that routinely impact our short-term liquidity and may impact our long-term liquidity include, but are not limited to:

Changes in costs and estimated earnings in excess of billings on uncompleted contracts and billings on uncompleted contracts in excess of costs due to contract terms that determine the timing of billings to customers and the collection of those billings

Some cost plus and fixed price customer contracts are billed based on milestones which may require us to incur significant expenditures prior to collections from our customers.

Time and material contracts are normally billed in arrears. Therefore, we are routinely required to carry these costs until they can be billed and collected.

Some of our large construction projects may require significant retentions or security in the form of letters of credit.

Other changes in working capital

Capital expenditures

Other factors that may impact both short and long-term liquidity include:

Acquisitions of new businesses

Strategic investments in new operations

Purchases of shares under our stock buyback program

Contract disputes which can be significant

Collection issues, including those caused by weak commodity prices or other factors which can lead to credit deterioration of our customers

Capacity constraints under our credit facility and remaining in compliance with all covenants contained in the credit agreement

A default by one of the major financial institutions for which our deposits exceed insured deposit limits

Cash on hand outside of the United States that cannot be repatriated without incremental taxation.

As discussed under the caption "Senior Revolving Credit Facility" included in this Financial Condition and Liquidity section of the Form 10-Q, our Credit Agreement includes a Senior Leverage Ratio covenant, which provides that Consolidated Funded Indebtedness, as of the end of any fiscal quarter, may not exceed 2.5 times Consolidated EBITDA, as defined in the Credit Agreement, over the previous four quarters. Consequently, recent operating results have caused a short term capacity constraint on the Company's senior revolving credit facility. Although the constraint reduces our liquidity, the Company believes that the remaining availability under our senior revolving credit facility along with cash on hand and cash generated from operations will provide sufficient liquidity to achieve both our short-term and long-term business objectives. However, if we were to complete a significant acquisition for cash, it is possible that we would need to increase the size of our credit facility.

Table of Contents

Cash Flow for the Three Months Ended September 30, 2016

Cash Flows Used by Operating Activities

Cash used by operating activities for the three months ended September 30, 2016 totaled \$49.6 million. The various components are as follows:

Net Cash Used by Operating Activities

(In thousands)

Net income	\$9,342
Non-cash expenses	6,472
Deferred income tax	1,044
Cash effect of changes in working capital	(66,509)
Other	63
Net cash used by operating activities	\$(49,588)

Working capital changes at September 30, 2016 in comparison to June 30, 2016 include the following:

Accounts receivable, net of bad debt expense recognized during the period, increased by \$40.6 million during the three months ended September 30, 2016. The variance is primarily attributable to the timing of billing and collections in connection with the previously announced Dakota Access Project.

- Accounts payable decreased by \$13.6 million during the three months ended September 30, 2016. The variance is primarily attributable to the timing of vendor payments. Costs and estimated earnings in excess of billings on uncompleted contracts ("CIE") increased \$1.1 million while billings on uncompleted contracts in excess of costs and estimated earnings ("BIE") decreased \$5.9 million. The net change in CIE and BIE decreased cash \$7.0 million for the three months ended September 30, 2016. CIE and BIE balances can experience significant fluctuations based on the timing of when job costs are incurred, the invoicing of those job costs to the customer, and other working capital management factors.

Cash Flows Used for Investing Activities

Investing activities used \$1.7 million of cash in the three months ended September 30, 2016 primarily due to capital expenditures. Capital expenditures consisted of purchases of: \$1.2 million for office equipment, \$0.2 million for construction equipment, \$0.2 million for transportation and fabrication equipment, and \$0.1 million for land and buildings. Proceeds from asset sales provided \$0.2 million of cash.

Cash Flows Provided by Financing Activities

Financing activities provided \$15.4 million of cash in the three months ended September 30, 2016 primarily due to net borrowings of \$17.2 million under our credit facility and the repurchase of \$1.9 million of Company stock for payment of withholding taxes due on equity-based compensation.

Senior Revolving Credit Facility

As noted previously in Note 5 of the Notes to Condensed Consolidated Financial Statements included in Part 1, Item 1 of this Quarterly Report on Form 10-Q, the Company has a five-year \$200.0 million senior secured revolving credit facility under a credit agreement (the "Credit Agreement") that expires March 13, 2019.

The Credit Agreement includes the following covenants and borrowing limitations:

- Our Senior Leverage Ratio, as defined in the agreement, may not exceed 2.50 to 1.00, determined as of the end of each fiscal quarter.

- We are required to maintain a Fixed Charge Coverage Ratio, as defined in the agreement, greater than or equal to 1.25 to 1.00, determined as of the end of each fiscal quarter.

Table of Contents

- Asset dispositions (other than inventory and obsolete or unneeded equipment disposed of in the ordinary course of business) are limited to \$20.0 million per 12-month period.

Amounts borrowed under the Credit Agreement bear interest at LIBOR or an Alternate Base Rate, plus in each case, an additional margin based on the Senior Leverage Ratio. The additional margin on Alternate Base Rate and LIBOR-based loans ranges between 0.25% and 1.0% and between 1.25% and 2.0%, respectively.

The Credit Agreement also permits us to borrow in Canadian dollars with a sublimit of U.S. \$40.0 million. Amounts borrowed in Canadian dollars will bear interest either at the CDOR Rate, plus an additional margin based on the Senior Leverage Ratio ranging from 1.25% to 2.0%, or at the Canadian Prime Rate, plus an additional margin based on the Senior Leverage Ratio ranging from 1.75% to 2.5%. The CDOR Rate is equal to the sum of the annual rate of interest, which is the rate determined as being the arithmetic average of the quotations of all institutions listed in respect of the relevant CDOR interest period for Canadian Dollar denominated bankers' acceptances, plus 0.1%. The Canadian Prime Rate is equal to the greater of (i) the rate of interest per annum most recently announced or established by JPMorgan Chase Bank, N.A., Toronto Branch as its reference rate in effect on such day for determining interest rates for Canadian Dollar denominated commercial loans in Canada and (ii) the CDOR Rate plus 1.0%.

The Unused Credit Facility Fee is between 0.20% and 0.35% based on the Senior Leverage Ratio.

The Credit Agreement includes a Senior Leverage Ratio covenant, which provides that Consolidated Funded Indebtedness, as of the end of any fiscal quarter, may not exceed 2.5 times Consolidated EBITDA, as defined in the Credit Agreement, over the previous four quarters. For the four quarters ended September 30, 2016, Consolidated EBITDA, as defined in the Credit Agreement, was \$70.2 million. Accordingly, at September 30, 2016, there was a restriction on our ability to access the full amount of the credit facility. However, any continued constraint in future fiscal periods is not expected to impact our ability to operate the business. Consolidated Funded Indebtedness at September 30, 2016 was \$30.1 million.

Availability under the senior credit facility at September 30, 2016 and June 30, 2016 was as follows:

	September 30, 2016	June 30, 2016
	(In thousands)	
Senior revolving credit facility	\$200,000	\$200,000
Capacity constraint due to the Senior Leverage Ratio	24,395	20,138
Capacity under the credit facility	175,605	179,862
Borrowings outstanding	17,186	—
Letters of credit	20,784	20,755
Availability under the senior revolving credit facility	\$137,635	\$159,107

Outstanding borrowings at September 30, 2016 primarily consisted funds borrowed for working capital needs in our Canadian business due to the timing of collections and disbursements on the previously announced power generating project.

The Company is in compliance with all affirmative, negative, and financial covenants under the Credit Agreement.

Dividend Policy

We have never paid cash dividends on our common stock, and the terms of our Credit Agreement limit the amount of cash dividends we can pay. Under our Credit Agreement, we may declare and pay dividends on our capital stock during any fiscal year up to an amount which, when added to all other dividends paid during such fiscal year, does not exceed 50% of our cumulative net income for such fiscal year to such date. While we currently do not intend to pay cash dividends, any future dividend payments will depend on our financial condition, capital requirements and earnings as well as other relevant factors.

Table of Contents

Stock Repurchase Program and Treasury Shares

Treasury Shares

On November 4, 2014 the Board of Directors approved a stock buyback program that replaced the program that had previously been in place. The program, which expires on December 31, 2016, allows the Company to purchase up to \$25.0 million of common stock annually if sufficient liquidity exists and management believes the purchase would be beneficial to the Company's stockholders. The annual \$25.0 million limitation is applied on a calendar year basis. The cumulative number of shares repurchased cannot exceed 2,653,399, which represents 10% of the shares outstanding on the date the new repurchase program was approved. As of September 30, 2016, the Company has purchased 938,730 shares under the program, none of which were purchased during fiscal 2017.

In addition to the stock buyback program, the Company may withhold shares of common stock to satisfy the tax withholding obligations upon vesting of an employee's deferred shares. Matrix withheld 113,762 shares in the first three months of fiscal 2017 to satisfy these obligations. These shares were returned to the Company's pool of treasury shares.

The Company has 1,360,157 treasury shares as of September 30, 2016 and intends to utilize these treasury shares solely in connection with equity awards under the Company's stock incentive plans.

FORWARD-LOOKING STATEMENTS

This Form 10-Q includes “forward-looking statements” within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. All statements, other than statements of historical facts, included in this Form 10-Q which address activities, events or developments which we expect, believe or anticipate will or may occur in the future are forward-looking statements. The words “believes,” “intends,” “expects,” “anticipates,” “projects,” “estimates,” “predicts” and similar expressions are also intended to identify forward-looking statements.

These forward-looking statements include, among others, such things as:

- the impact to our business of crude oil and other commodity prices;
- amounts and nature of future revenues and margins from each of our segments;
- trends in the industries we serve;
- our ability to generate sufficient cash from operations or to raise cash in order to meet our short and long-term capital requirements;
- the likely impact of new or existing regulations or market forces on the demand for our services;
- expansion and other trends of the industries we serve;
- our expectations with respect to the likelihood of a future impairment; and
- our ability to comply with the covenants in our credit agreement.

These statements are based on certain assumptions and analyses we made in light of our experience and our historical trends, current conditions and expected future developments as well as other factors we believe are appropriate. However, whether actual results and developments will conform to our expectations and predictions is subject to a number of risks and uncertainties which could cause actual results to differ materially from our expectations, including:

- the risk factors discussed in our Form 10-K for the fiscal year ended June 30, 2016 and listed from time to time in our filings with the Securities and Exchange Commission;
- economic, market or business conditions in general and in the oil, gas, power, iron and steel and mining industries in particular;
 - reduced creditworthiness of our customer base and the higher risk of non-payment of receivables due to low prevailing crude oil and other commodity prices;
- the inherently uncertain outcome of current and future litigation;
- the adequacy of our reserves for contingencies;
- changes in laws or regulations; and

Other factors, many of which are beyond our control.

Consequently, all of the forward-looking statements made in this Form 10-Q are qualified by these cautionary statements and there can be no assurance that the actual results or developments anticipated by us will be realized or, even if substantially realized, that they will have the expected consequences or effects on our business operations. We assume no obligation to update publicly, except as required by law, any such forward-looking statements, whether as a result of new information, future events or otherwise.

Table of Contents

Item 3. Quantitative and Qualitative Disclosures about Market Risk

There have been no material changes in market risk faced by us from those reported in our Annual Report on Form 10-K for the fiscal year ended June 30, 2016, filed with the Securities and Exchange Commission. For more information on market risk, see Part II, Item 7A in our fiscal 2016 Annual Report on Form 10-K.

Item 4. Controls and Procedures

We maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed in our Securities Exchange Act reports is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure based on the definition of "disclosure controls and procedures" in Rule 13a-15(e).

The disclosure controls and procedures are designed to provide reasonable, not absolute, assurance of achieving the desired control objectives. The Company's management, including the Chief Executive Officer and Chief Financial Officer, does not expect that the disclosure controls and procedures or our internal controls over financial reporting will prevent or detect all errors or fraud. The design of our internal control system takes into account the fact that there are resource constraints and the benefits of controls must be weighed against the costs. Additionally, controls can be circumvented by the acts of key individuals, collusion or management override.

We carried out an evaluation, under the supervision and with the participation of our management, including our Chief Executive Officer and our Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures as of September 30, 2016. Based on the foregoing, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective at the reasonable assurance level at September 30, 2016.

There have been no changes in our internal controls over financial reporting that have materially affected, or are reasonably likely to materially affect our internal controls over financial reporting during the quarter ended September 30, 2016.

PART II

OTHER INFORMATION

Item 1. Legal Proceedings

We are a party to a number of legal proceedings. We believe that the nature and number of these proceedings are typical for a company of our size engaged in our type of business and that none of these proceedings will result in a material effect on our business, results of operations, financial condition, cash flows or liquidity.

Item 1A. Risk Factors

There were no material changes in our Risk Factors from those reported in Item 1A of Part I of our Annual Report on Form 10-K for the fiscal year ended June 30, 2016.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Issuer Purchases of Equity Securities

The table below sets forth the information with respect to purchases made by the Company of its common stock during the first quarter of fiscal year 2017.

	Total Number of Shares Purchased	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares That May Yet Be Purchased Under the Plans or Programs (C)
July 1 to July 31, 2016				
Share Repurchase Program (A)	—	\$ —	—	1,714,669
Employee Transactions (B)	429	\$ 16.69	—	
August 1 to August 31, 2016				
Share Repurchase Program (A)	—	\$ —	—	1,714,669
Employee Transactions (B)	110,709	\$ 16.47	—	
September 1 to September 30, 2016				
Share Repurchase Program (A)	—	\$ —	—	1,714,669
Employee Transactions (B)	2,624	\$ 17.67	—	

(A) Represents shares purchased under our stock buyback program.

(B) Represents shares withheld to satisfy the employee's tax withholding obligation that is incurred upon the vesting of deferred shares granted under the Company's stock incentive plans.

(C) On November 4, 2014 the Board of Directors approved a stock buyback program. The program, which expires on December 31, 2016, allows the Company to purchase up to \$25.0 million of common stock annually if sufficient liquidity exists and management believes the purchase would be beneficial to the Company's stockholders. The annual \$25.0 million limitation is applied on a calendar year basis. The cumulative number of shares repurchased cannot exceed 2,653,399, which represents 10% of the shares outstanding on the date the new repurchase program was approved.

Dividend Policy

We have never paid cash dividends on our common stock, and the terms of our Credit Agreement limit the amount of cash dividends we can pay. Under our Credit Agreement, we may declare and pay dividends on our capital stock during any fiscal year up to an amount which, when added to all other dividends paid during such fiscal year, does not exceed 50% of our cumulative net income for such fiscal year to date. While we currently do not intend to pay cash dividends, any future dividend payments will depend on our financial condition, capital requirements and earnings as

well as other relevant factors.

Item 3. Defaults Upon Senior Securities

None

Item 4. Mine Safety Disclosures

Section 1503(a) of the Dodd-Frank Wall Street Reform and Consumer Protection Act (the "Dodd-Frank Act") requires domestic mine operators to disclose violations and orders issued under the Federal Mine Safety and Health Act of 1977 (the "Mine Act") by the federal Mine Safety and Health Administration. We do not act as the owner of any mines, but as a result of our performing services or construction at mine sites as an independent contractor, we are considered an "operator" within the meaning of the Mine Act.

Information concerning mine safety violations or other regulatory matters required to be disclosed in this quarterly report under Section 1503(a) of the Dodd-Frank Act and Item 104 of Regulation S-K is included in Exhibit 95.

Item 5. Other Information

None

Item 6. Exhibits:

Exhibit 10.1*: Form of Long-Term Incentive Award Agreement (Matrix Service Company 2012 Stock and Incentive Compensation Plan).

Exhibit 10.2*: Form of Restricted Stock Unit Award Agreement for employees (Matrix Service Company 2012 Stock and Incentive Compensation Plan).

Exhibit 31.1: Certification Pursuant to Section 302 of Sarbanes-Oxley Act of 2002 – CEO.
