## OPERATIONAL UPDATE

**November 13 , 2008, Vancouver, BC** - Taseko Mines Limited (TSX: TKO; AMEX: TGB) ("Taseko" or the "Company") announced today that approximately 75 employees will be laid off at its 100% owned Gibraltar Mine McLeese Lake operations.

Russell Hallbauer, President and CEO of Taseko stated, "In the past 24 months we have invested \$250 million into the Gibraltar Mine to reduce operating costs and ensure it could operate at very low copper price levels.

Our manpower levels during the construction period increased as we worked on the concentrator modernization and mine expansion programs. With the concentrator and mining fleet now upgraded and more efficient than in the past, the size of the work force is inconsistent with our new operating efficiencies.

We continue to monitor and adjust our manpower requirements and aggressively manage our overall cost structure to ensure Gibraltar remains profitable during metal market price fluctuations.

This manpower adjustment will not affect Gibraltar's annual copper production.

We would like to thank our employees, the Provincial Government and the Ministry of Energy Mines & Petroleum

Resources for working with us in helping Taseko get Gibraltar into a position to weather declining metal markets. As well, the support of the Mayor of Williams Lake, Scott Nelson, has been invaluable in successfully communicating the importance of an operating mine to central British Columbia and, in particular to the City of Williams Lake.

As a Company we have taken a very conservative approach to our expansion plans by not incurring any long term debt. Our aim is to keep Gibraltar profitable and a viable operation should copper cycle back to lower than US\$1.50/lb. We look forward to working with the Government and all the communities of the Cariboo-Chilcotin in the coming months as we enhance the competitive position of our Gibraltar Mine and move forward with the Environmental Assessment Review of Prosperity and receive an Environmental Assessment Certificate and ultimately build another long life mine in the central interior to complement Gibraltar."

Forward Looking Statements

This release includes certain statements that may be deemed "forward-looking statements". All statements in this release, other than statements of historical facts, that address future production, reserve potential, exploration drilling, exploitation activities and events or developments that the Company expects are forward-looking statements. Although the Company believes the expectations expressed in such forward-looking statements are based on reasonable assumptions, such statements are not guarantees of future performance and actual results or developments may differ materially from those in the forward-looking statements. Factors that could cause actual results to differ materially from those in forward-looking statements include capital market conditions, commodities market prices, exploitation and exploration successes, lack of continuity of mineralization, completion of the mill upgrade on time estimated and at scheduled cost, continued availability of capital and financing, and general economic, market or business conditions. Investors are cautioned that any such statements are not guarantees of future performance and that actual results or developments may differ materially from those projected in the forward-looking statements. For more information on the Company, Investors should review the Company's annual Form 40-F filing with the United States Securities and Exchange Commission or the Company's home jurisdiction filings at [www.sedar.com](http://www.sedar.com).
