GRUPO SIMEC ANNOUNCES RESULTS OF OPERATIONS FOR THE FIRST SIX MONTHS OF 2007

GUADALAJARA, MEXICO, July 18, 2007- Grupo Simec, S.A.B. de C.V. (AMEX-SIM) (“Simec”) announced today its results of operations for the six-month period ended June 30, 2007.

Six-Month Period Ended June 30, 2007, compared to Six-Month Period Ended June 30, 2006

Sales volume during the first six months of 2007 remained stable, increasing 1% compared with the same period of the previous year. Although steel prices decreased in comparison to the same period of the previous year, the cost of sales also decreased principally because of productivity improvements in the plants of Republic as well as continued synergies from its acquisition. As a result, Simec obtained an increase of 1% in gross profit and 3% in EBITDA.

Net Sales

Net sales decreased 2% to Ps. 12,174 million in the six-month period ended June 30, 2007, compared to Ps. 12,375 million in the same period of 2006. Shipments of finished steel products increased 1% to 1,383 thousand tons in the six-month period ended June 30, 2007, compared to 1,369 thousand tons in the same period of 2006. Total sales outside of Mexico in the six-month period ended June 30, 2007, decreased 7% to Ps. 8,471 million, compared with Ps. 9,066 million in the same period of 2006, while total Mexican sales increased 12% from 3,308 million in the six-month period ended June 30, 2006 to Ps. 3,703 million in the same period of 2007. Our Mexican sales increased while our non Mexican sales decreased principally due to different price levels in the two markets. The average price of steel products decreased 3% in real terms in the six-month period ended June 30, 2007, compared to the same period in 2006.

Direct Cost of Sales

Direct cost of sales decreased 2% from Ps. 10,058 million in the six-month period ended June 30, 2006, to Ps. 9,827 million in the same period 2007. Direct cost of sales as a percentage of net sales remained stable at 81% for both periods. The decrease in cost is attributable mainly to a decrease of 3% in the average cost of raw materials used to produce steel products in real terms in the six-month period ended June 30, 2007, versus the same period of 2006.

Gross Profit

Gross profit in the six-month period ended June 30, 2007, increased 1% to Ps. 2,347 million, compared to Ps. 2,317 million in the same period 2006. Gross profit as a percentage of net sales remained stable at 19% for both periods. This was principally due to an increase of 1% in sales volume and a decrease of 3% in the average cost of raw materials.

Operating Expenses

Operating expenses increased 1% to Ps. 696 million in the six-month period ended June 30, 2007, compared to Ps. 690 million in the same period 2006, but remained stable at 6% of net sales.

Operating Profit

Operating profit increased 1% from Ps. 1,627 million in the six-month period ended June 30, 2006, to Ps. 1,651 million in the same period 2007. Operating profit as a percentage of net sales was 14% for the six-month period ended June 30, 2007, compared to 13% in the same period of 2006. This was due principally to an increase of 1% in sales volume and a decrease of 3% in the average cost of raw materials.

Integral Financial Cost

Integral financial cost in the six-month period ended June 30, 2007, represented a gain of Ps. 113 million, compared with a gain of Ps. 47 million for the same period in 2006. Interest income was Ps.133 million in the six-month period ended June 30, 2007, compared with Ps. 21 million in the same period 2006, due to larger cash balances during this year partly reflecting our recent capital increase in February 2007. At the same time we registered an exchange loss of Ps. 30 million in the six-month period ended June 30, 2007 compared with an exchange gain of Ps. 19 million in the same period of 2006, reflecting a 0.1% increase in the value of the peso versus the dollar in the six-month period ended June 30, 2007.

Other Expenses (Income) net

The company recorded other income net of Ps. 18 million in the six-month period ended June 30, 2007, compared to other income net for Ps. 34 million for the same period of 2006.

Taxes and Profit Sharing

Taxes and profit sharing in the six-month period ended June 30, 2007, increased to Ps. 526 million compared to Ps. 109 million for the same period of 2006, due to an increase in differed taxes during the first quarter 2007. In the six-month period ended June 30, 2006, we amortized Ps. 350 million of our deferred credit which is non-taxable income.

Net Profit

Net profit decreased by 21% to Ps. 1,256 million in the six-month period ended June 30, 2007, from Ps. 1,599 million in the same period of 2006. The decrease is principally due to the fact that we did not amortize the deferred credit as we did in the same period of 2006.

Liquidity and Capital Resources

At June 30, 2007, Simec had no consolidated debt other than US \$302,000 of its 8 7/8% medium term notes that remain outstanding.

Net resources provided by operations were Ps. 1,124 million in the six-month period ended June 30, 2007, versus Ps. 808 million of net resources provided by operations in the same period of 2006. Net resources provided by financing activities were Ps. 2,336 million in the six-month period ended June 30, 2007, (which amount includes the capital increase of Ps. 2,346 million in February 2007) versus Ps. 298 million of net resources used by financing activities in the same period of 2006. Net resources used in investing activities (to acquire property, plant and equipment, other non-current assets and liabilities) were Ps. 340 million in the six-month period ended June 30, 2007, versus net resources provided by investing activities (to acquire property, plant and equipment, other non-current assets and liabilities and proceeds for insurance claim) of Ps. 258 million in the same period of 2006.

Comparative second quarter 2007 vs. first quarter 2007

Net sales in the second quarter of 2007 increased 1% compared with the first quarter of 2007, mainly during as a result of an increase in steel prices. Direct cost of sales increased 3% and operating expenses decreased 3%, the reason why Simec registered a decrease of 6% in its operating profit and 5% in its EBITDA. In the second quarter of 2007, net income decreased 26% compared with the first quarter of 2007, due mainly to reduced income from operations and an increase in deferred taxes.

Net Sales

Net sales increased 1% due to a increase of 7% in prices and a 5% decrease in sales volume, causing net sales go from Ps. 6,047 million for the first quarter 2007 to Ps. 6,127 million for the second quarter 2007. Sales in tons of finished steel products decreased 4% to 679 thousand tons in the second quarter 2007, compared with 704 thousand tons in the first quarter 2007. The total sales outside of Mexico for the second quarter 2007 increased to Ps. 4,243 million, compared with Ps. 4,228 million for the first quarter 2007. Total Mexican sales increased from Ps. 1.819 million in the first quarter 2007 to Ps.1,884 millions in the second quarter 2007. The average price of steel products increased 7% in real terms in the second quarter of 2007 compared to the first quarter of 2007.

Direct Cost of Sales

Direct cost of sales increased 3% from Ps. 4,843 million in the first quarter 2007 to Ps. 4,984 million for the second quarter 2007. In the second quarter 2007, the direct cost of sales represented 81% of net sales compared to 81% for the first quarter 2007. The average cost of raw materials used to produce steel products increased 8% in real terms in the second quarter 2007 compared to the first quarter 2006, primarily resulting from increased raw materials costs.

Gross Profit

Gross profit for the second quarter 2007 decreased 5% to Ps. 1,143 million, compared to Ps. 1,204 million in the first quarter 2007. Gross profit as a percentage of net sales for the second quarter 2007 was 19%, compared with 20% for the first quarter 2007. The increase in gross profit was to an increase of 7% in prices, a 4% decrease in sales volume and an increase of 8% in the average cost of raw materials.

Operating Expenses

Operating expenses decreased 3% to Ps. 343 million in the second quarter 2007, compared to Ps. 353 million for the first quarter 2007. As a percentage of sales, operating expenses represented 6% during the second quarter of 2007, compared to 6% in the first quarter of 2007.

Operating Profit

Operating profit decreased 8% from Ps. 851 million in the first quarter 2007, to Ps. 800 million for the second quarter 2007. Operating profit as a percentage of net sales decreased to 13% in the second quarter 2007, from 14 % in the first quarter 2007. This was due to a decrease of 4% in sales volume, a 7% increase in prices and an increase of 8% in the average cost of raw materials.

Integral Financial Cost

Integral financial cost for the second quarter 2007 represented an income of Ps. 38 million, compared with an income of Ps. 75 million for the first quarter 2007. Net interest income was Ps. 87 million in the second quarter 2007, compared with Ps. 46 million in the first quarter 2007, due to larger cash balances during this year, partly reflecting our recent capital increase in February 2007.

Other Expenses (Income) net

The company recorded other expenses net of Ps. 9 million for the second quarter 2007 compared with other income net of Ps. 27 million for the first quarter 2007.

Taxes and Profit Sharing

Taxes and profit sharing for the second quarter 2007 were Ps. 296 million, compared to Ps. 230 million for the first quarter 2007.

Net Profit

Net profit decreased by 26% to Ps. 533 million in the second quarter 2007, from Ps. 723 million in the first quarter 2007. We attribute the decrease in the second quarter of 2007 mainly to a decrease in sales volume, increase in prices, an increase in the average cost of raw materials and the increase in the tax provision.

Comparative second quarter 2007 vs. second quarter 2006

During the second quarter 2007 Simec had a decrease of 7% in its net sales and 1% in its sales volume compared with the same period of 2006. This decrease is due to the fact that during the second quarter 2006 there was an increase in steel prices, the increase in the second quarter 2007 did not reach the levels of the second quarter 2006. Simec decreased its cost of sales 4% and its operating expenses 4%. In spite of the concerted effort of Simec to reduce the

cost of sales, it was not sufficient to offset the decrease in prices. Thus Simec recorded a decrease of 20% in its operating profit and a decrease of 15% in its EBITDA.

Net Sales

Net sales decreased 7% from Ps. 6,557 million for the second quarter 2006, compared with Ps. 6,127 million for the same period 2007. Sales in tons of finished steel decreased 1% to 679 thousand tons in the second quarter 2007, compared with

689 thousand tons in the same period 2006. The total sales outside of Mexico for the second quarter 2007 decreased 9% to Ps. 4,243 million compared with Ps. 4,647 million for the same period 2006. This decrease was principally to the minor volume of sales for 7 thousand tons (decrease of 18 thousand tons from our Republic facilities and increase of 11 thousand tons from our plants in Mexico). The total of national sales decreased 1% to 1,910 million in 2006, from Ps. 1,884 million in the same period 2006. The average price of steel products decreased 5% in real terms in the second quarter 2007 compared to the same period in 2006.

Direct Cost of Sales

Direct cost of sales decreased 4% from Ps. 5,202 million in the second quarter 2006 to Ps. 4,984 million for the same period 2007. With respect to sales, in the second quarter 2007, the direct cost of sales represents 81% compared to 79% for the same period 2006. The decrease in cost is attributed mainly to a decrease of 3% in the average cost of raw materials used to produce steel products in real terms in the second quarter 2007 versus the same period of 2006.

Gross Profit

Gross profit for the second quarter 2007 decreased 16% to Ps. 1,143 million, compared to Ps. 1,355 million in the same period 2006. The gross profit as a percentage of net sales for the second quarter 2007 was 19% compared with 21% for the same period of 2006. The decrease in gross profit was due to a decrease of 5% in prices, a 1% decrease in sales volume and a decrease of 3% in the average cost.

Operating Expenses

Operating expenses decreased 4% to Ps. 343 million in the second quarter 2007, compared to Ps. 359 million for the same period 2006. Operating expenses as a percentage of net sales represented 6% during the second quarter compared to 5% of the same period.

Operating Profit

Operating profit decreased 20% from Ps. 996 million in the second quarter 2006 to Ps. 800 million for the same period 2007. The operating profit as a percentage of net sales in the second quarter 2006 was 15% compared to 13% in the same period 2007. This was due to a decrease in sales volume, decrease in prices and an increase in the average cost of raw materials.

Integral Financial Cost

Integral financial cost for the second quarter 2007 represented a gain of Ps. 38 million, compared with the gain of Ps. 52 million for the same period 2006.

Other Expenses (Income) net

The company recorded other expenses net of Ps. 9 million for the second quarter 2007, compared with other income net of Ps. 22 million for the same period 2006.

Taxes and Profit Sharing

Taxes and profit sharing for the second quarter 2007 increased to Ps. 296 million compared to Ps. 11 million for the same period 2006. In the second quarter of 2006 we amortized Ps. 350 million of our deferred credit which is non-taxable income and in the second quarter of 2007 we did not have deferred credit.

Net Profit

Net profit decreased by 50% to Ps. 1,059 million in the second quarter 2007, from Ps. 533 million in the second quarter 2006. The decrease occurred principally because in the six-month period ended June 30, 2007, we did not have the amortization of the deferred credit and in the same period of 2006 we amortized Ps. 350 million, the decrease in sales volume, decrease in prices and an increase in the average cost of raw materials also contributed to the decrease.

GRUPO SIMEC, S.A.B. DE C.V.

DIRECTOR REPORT

CONSOLIDATED

Six-Month Period Ended June 30, 2007, compared to Six-Month Period Ended June 30, 2006

Sales volume during the first six months of 2007 remained stable, increasing 1% compared with the same period of the previous year. Although steel prices decreased in comparison to the same period of the previous year, the cost of sales also decreased principally because of productivity improvements in the plants of Republic as well as continued synergies from its acquisition. As a result, Simec obtained an increase of 1% in gross profit and 3% in EBITDA.

Net Sales

Net sales decreased 2% to Ps. 12,174 million in the six-month period ended June 30, 2007, compared to Ps. 12,375 million in the same period of 2006. Shipments of finished steel products increased 1% to 1,383 thousand tons in the six-month period ended June 30, 2007, compared to 1,369 thousand tons in the same period of 2006. Total sales outside of Mexico in the six-month period ended June 30, 2007, decreased 7% to Ps. 8,471 million, compared with Ps. 9,066 million in the same period of 2006, while total Mexican sales increased 12% from 3,308 million in the six-month period ended June 30, 2006 to Ps. 3,703 million in the same period of 2007. Our Mexican sales increased while our non Mexican sales decreased principally due to different price levels in the two markets. The average price of steel products decreased 3% in real terms in the six-month period ended June 30, 2007, compared to the same period in 2006.

Direct Cost of Sales

Direct cost of sales decreased 2% from Ps. 10,058 million in the six-month period ended June 30, 2006, to Ps. 9,827 million in the same period 2007. Direct cost of sales as a percentage of net sales remained stable at 81% for both periods. The decrease in cost is attributable mainly to a decrease of 3% in the average cost of raw materials used to produce steel products in real terms in the six-month period ended June 30, 2007, versus the same period of 2006.

Gross Profit

Gross profit in the six-month period ended June 30, 2007, increased 1% to Ps. 2,347 million, compared to Ps. 2,317 million in the same period 2006. Gross profit as a percentage of net sales remained stable at 19% for both periods. This was principally due to an increase of 1% in sales volume and a decrease of 3% in the average cost of raw materials.

Operating Expenses

Operating expenses increased 1% to Ps. 696 million in the six-month period ended June 30, 2007, compared to Ps. 690 million in the same period 2006, but remained stable at 6% of net sales.

Operating Profit

Operating profit increased 1% from Ps. 1,627 million in the six-month period ended June 30, 2006, to Ps. 1,651 million in the same period 2007. Operating profit as a percentage of net sales was 14% for the six-month period ended June 30, 2007, compared to 13% in the same period of 2006. This was due principally to an increase of 1% in sales volume and a decrease of 3% in the average cost of raw materials.

Integral Financial Cost

Integral financial cost in the six-month period ended June 30, 2007, represented a gain of Ps. 113 million, compared with a gain of Ps. 47 million for the same period in 2006. Interest income was Ps.133 million in the six-month period ended June 30, 2007, compared with Ps. 21 million in the same period 2006, due to larger cash balances during this year partly reflecting our recent capital increase in February 2007. At the same time we registered an exchange loss of Ps. 30 million in the six-month period ended June 30, 2007 compared with an exchange gain of Ps. 19 million in the same period of 2006, reflecting a 0.1% increase in the value of the peso versus the dollar in the six-month period ended June 30, 2007.

Other Expenses (Income) net

The company recorded other income net of Ps. 18 million in the six-month period ended June 30, 2007, compared to other income net for Ps. 34 million for the same period of 2006.

Taxes and Profit Sharing

Taxes and profit sharing in the six-month period ended June 30, 2007, increased to Ps. 526 million compared to Ps. 109 million for the same period of 2006, due to an increase in differed taxes during the first quarter 2007. In the six-month period ended June 30, 2006, we amortized Ps. 350 million of our deferred credit which is non-taxable income.

Net Profit

Net profit decreased by 21% to Ps. 1,256 million in the six-month period ended June 30, 2007, from Ps. 1,599 million in the same period of 2006. The decrease is principally due to the fact that we did not amortize the deferred credit as we did in the same period of 2006.

Liquidity and Capital Resources

At June 30, 2007, Simec had no consolidated debt other than US \$302,000 of its 8 7/8 medium term notes that remain outstanding.

Net resources provided by operations were Ps. 1,124 million in the six-month period ended June 30, 2007, versus Ps. 808 million of net resources provided by operations in the same period of 2006. Net resources provided by financing activities were Ps. 2,336 million in the six-month period ended June 30, 2007, (which amount includes the capital increase of Ps. 2,346 million in February 2007) versus Ps. 298 million of net resources used by financing activities in the same period of 2006. Net resources used in investing activities (to acquire property, plant and equipment, other non-current assets and liabilities) were Ps. 340 million in the six-month period ended June 30, 2007, versus net resources provided by investing activities (to acquire property, plant and equipment, other non-current assets and liabilities and proceeds for insurance claim) of Ps. 258 million in the same period of 2006.

Comparative second quarter 2007 vs. first quarter 2007

Net sales in the second quarter of 2007 increased 1% compared with the first quarter of 2007, mainly during as a result of an increase in steel prices. Direct cost of sales increased 3% and operating expenses decreased 3%, the reason why Simec registered a decrease of 6% in its operating profit and 5% in its EBITDA. In the second quarter of 2007, net income decreased 26% compared with the first quarter of 2007, due mainly to reduced income from operations and an increase in deferred taxes.

Net Sales

Net sales increased 1% due to a increase of 7% in prices and a 5% decrease in sales volume, causing net sales go from Ps. 6,047 million for the first quarter 2007 to Ps. 6,127 million for the second quarter 2007. Sales in tons of finished steel products decreased 4% to 679 thousand tons in the second quarter 2007, compared with 704 thousand tons in the first quarter 2007. The total sales outside of Mexico for the second quarter 2007 increased to Ps. 4,243 million, compared with Ps. 4,228 million for the first quarter 2007. Total Mexican sales increased from Ps. 1.819 million in the first quarter 2007 to Ps.1,884 millions in the second quarter 2007. The average price of steel products increased 7% in real terms in the second quarter of 2007 compared to the first quarter of 2007.

Direct Cost of Sales

Direct cost of sales increased 3% from Ps. 4,843 million in the first quarter 2007 to Ps. 4,984 million for the second quarter 2007. In the second quarter 2007, the direct cost of sales represented 81% of net sales compared to 81% for the first quarter 2007. The average cost of raw materials used to produce steel products increased 8% in real terms in the second quarter 2007 compared to the first quarter 2006, primarily resulting from increased raw materials costs.

Gross Profit

Gross profit for the second quarter 2007 decreased 5% to Ps. 1,143 million, compared to Ps. 1,204 million in the first quarter 2007. Gross profit as a percentage of net sales for the second quarter 2007 was 19%, compared with 20% for the

first quarter 2007. The increase in gross profit was to an increase of 7% in prices, a 4% decrease in sales volume and an increase of 8% in the average cost of raw materials.

Operating Expenses

Operating expenses decreased 3% to Ps. 343 million in the second quarter 2007, compared to Ps. 353 million for the first quarter 2007. As a percentage of sales, operating expenses represented 6% during the second quarter of 2007, compared to 6% in the first quarter of 2007.

Operating Profit

Operating profit decreased 8% from Ps. 851 million in the first quarter 2007, to Ps. 800 million for the second quarter 2007. Operating profit as a percentage of net sales decreased to 13% in the second quarter 2007, from 14 % in the first quarter 2007. This was due to a decrease of 4% in sales volume, a 7% increase in prices and an increase of 8% in the average cost of raw materials.

Integral Financial Cost

Integral financial cost for the second quarter 2007 represented an income of Ps. 38 million, compared with an income of Ps. 75 million for the first quarter 2007. Net interest income was Ps. 87 million in the second quarter 2007, compared with Ps. 46 million in the first quarter 2007, due to larger cash balances during this year, partly reflecting our recent capital increase in February 2007.

Other Expenses (Income) net

The company recorded other expenses net of Ps. 9 million for the second quarter 2007 compared with other income net of Ps. 27 million for the first quarter 2007.

Taxes and Profit Sharing

Taxes and profit sharing for the second quarter 2007 were Ps. 296 million, compared to Ps. 230 million for the first quarter 2007.

Net Profit

Net profit decreased by 26% to Ps. 533 million in the second quarter 2007, from Ps. 723 million in the first quarter 2007. We attribute the decrease in the second quarter of 2007 mainly to a decrease in sales volume, increase in prices, an increase in the average cost of raw materials and the increase in the tax provision.

Comparative second quarter 2007 vs. second quarter 2006

During the second quarter 2007 Simec had a decrease of 7% in its net sales and 1% in its sales volume compared with the same period of 2006. This decrease is due to the fact that during the second quarter 2006 there was an increase in steel prices, the increase in the second quarter 2007 did not reach the levels of the second quarter 2006. Simec decreased its cost of sales 4% and its operating expenses 4%. In spite of the concerted effort of Simec to reduce the cost of sales, it was not sufficient to offset the decrease in prices. Thus Simec recorded a decrease of 20% in its operating profit and a decrease of 15% in its EBITDA.

Net Sales

Net sales decreased 7% from Ps. 6,557 million for the second quarter 2006, compared with Ps. 6,127 million for the same period 2007. Sales in tons of finished steel decreased 1% to 679 thousand tons in the second quarter 2007, compared with 689 thousand tons in the same period 2006. The total sales outside of Mexico for the second quarter 2007 decreased 9% to Ps. 4,243 million compared with Ps. 4,647 million for the same period 2006, this decrease was

principally to the minor volume of sales for 7 thousand tons (decrease of 18 thousand tons from our Republic facilities and increase of 11 thousand tons from our plants in Mexico). The total of national sales decreased 1% to 1,910 million in 2006, from Ps. 1,884 millions in the same period 2006. The average price of steel products decreased 5% in real terms in the second quarter 2007 compared to the same period in 2006.

Direct Cost of Sales

Direct cost of sales decreased 4% from Ps. 5,202 million in the second quarter 2006 to Ps. 4,984 million for the same period 2007. With respect to sales, in the second quarter 2007, the direct cost of sales represents 81% compared to 79% for the same period 2006. The decrease in cost is attributed mainly to a decrease of 3% in the average cost of raw materials used to produce steel products in real terms in the second quarter 2007 versus the same period of 2006.

Gross Profit

Gross profit for the second quarter 2007 decreased 16% to Ps. 1,143 million, compared to Ps 1,355 million in the same period 2006. The gross profit as a percentage of net sales for the second quarter 2007 was 19% compared with 21% for the same period of 2006. The decrease in gross profit was due to a decrease of 5% in prices, a 1% decrease in sales volume and a decrease of 3% in the average cost.

Operating Expenses

Operating expenses decreased 4% to Ps. 343 million in the second quarter 2007, compared to Ps.359 million for the same period 2006. Operating expenses as a percentage of net sales represented 6% during the second quarter compared to 5% of the same period.

Operating Profit

Operating profit decreased 20% from Ps. 996 million in the second quarter 2006 to Ps. 800 million for the same period 2007. The operating profit as a percentage of net sales in the second quarter 2006 was 15% compared to 13% in the same period 2007. This was due to a decrease in sales volume, decrease in prices and an increase in the average cost of raw materials.

Integral Financial Cost

Integral financial cost for the second quarter 2007 represented a gain of Ps. 38 million, compared with the gain of Ps. 52 million for the same period 2006.

Other Expenses (Income) net

The company recorded other expenses net of Ps. 9 million for the second quarter 2007, compared with other income net of Ps. 22 million for the same period 2006.

Taxes and Profit Sharing

Taxes and profit sharing for the second quarter 2007 increased to Ps. 296 million compared to Ps. 11 million for the same period 2006. In the second quarter of 2006 we amortized Ps. 350 million of our deferred credit which is non-taxable income and in the second quarter of 2007 we did not have deferred credit.

Net Profit

Net profit decreased by 50% to Ps.1,059 million in the second quarter 2007, from Ps. 533 million in the second quarter 2006. The decrease occurred principally because in the six-month period ended June 30, 2007, we did not have the amortization of the deferred credit and in the same period of 2006 we amortized Ps. 350 million, the decrease in sales volume, decrease in prices and an increase in the average cost of raw materials also contributed to the decrease.

STOCK EXCHANGE CODE: **SIMEC**
GRUPO SIMEC, S.A.B. DE C.V.

QUARTER: **2** YEAR: **2007**

FINANCIAL STATEMENT NOTES

CONSOLIDATED

(1) Operations preparation bases and summary of significant accounting policies:

Grupo Simec, S.A. de C.V. and its Subsidiaries ("the Company") are subsidiaries of Industrias CH, S.A. de C.V. ("ICH"), and their main activities consist of the manufacturing and sale of steel products primarily destined for the construction sector of Mexico and other countries.

Significant accounting policies and practices followed by the Companies which affect the principal captions of the financial statements are described below:

a. Financial statement presentation - The consolidated financial statements have been prepared in accordance with principles generally accepted in Mexico, which include the recognition of the effects of inflation on the financial information and the presentation in constant Mexican pesos.

b. Principles of Consolidation – As part of the financial debt restructuring agreement into during 1997, Compañía Siderúrgica de Guadalajara, S.A. de C.V. ("CSG") assumed all of the debt of the Company in return for an equity interest in its subsidiaries. As a result of the above, the Company is the principal shareholder of CSG, and CSG is the principal shareholder of the other subsidiaries that Grupo Simec, S.A. de C.V. ("Simec") controlled before the restructuring.

The main subsidiaries of CSG are the following:

- Compañía Siderúrgica de California, S.A. de C.V.
- Industrias del Acero y del Alambre, S.A. de C.V.
- Pacific Steel Inc.
- SimRep Corporation and PAV Republic and Subsidiaries

All significant intercompany balances and transactions have been eliminated in consolidation.

c. Cash and cash equivalents - The Company considers short-term investments with original maturities not greater than three months to be cash equivalent. Cash equivalents include temporary investments and Mexican Government Treasury Bonds, and are stated at market value, which approximates cost plus earned interest. Any increase in market value is credited to operations for the period.

d. Inventories - The inventories are originally stated at average cost and subsequently adjusted to replacement value at the balance sheet date. The replacement values do not exceed market and are determined as follows:

Billet finished goods and work in process - At the latest production cost for the month.

Raw materials - According to purchase prices prevailing in the market at the balance sheet date.

Materials, supplies and rollers – At historical cost, restated by applying the steel industry inflation index.

The Company presents as non-current inventories the rollers and spare parts, which according to historical data and production trends will not be used within a one-year period.

e.- Derivative financial instruments-- The Company is using derivative financial instruments for hedging risks associated with natural gas prices and conducted studies on historical consumption, future requirements and commitments; thus it avoided exposure to risks other than the normal operating risks. Management of the Company examines its financial risks by continually analyzing price, credit and liquidity risks.

The Company uses futures contracts for hedging risks from fluctuations in natural gas prices, which are based on demand and supply at the principal international markets.

As applicable, the Company recognized the fair value of instruments either as liabilities or assets. Such fair value and thus, the value of these assets or liabilities were restated at each month's-end. The Company opted for the early adoption of Bulletin C-10 "Derivative Financial Instruments and Hedging"; therefore, at December 31, 2003 the fair value of natural gas in force during 2004, 2005 and 2006 and which effective portions will not be offset against the asset risks until consumed, were recognized within the comprehensive income account in stockholders' equity.

f. Property, plant and equipment - Property, plant and equipment of domestic origin are restated by using factors derived from The National Consumer Price Index ("NCPI") from the date of their acquisition, and imported machinery and equipment are restated by applying devaluation and inflation factors of the country of origin. Depreciation recorded in the consolidated statement of income (loss) is computed based upon the estimated useful life and the restated cost of each asset. In addition, Financial expense incurred during the construction period is capitalized as construction in progress. The capitalized amounts are restated using a factor derived from the NCPI cumulative from the date of capitalization through period-end and are amortized over the average depreciation period of the corresponding assets. The estimated useful lives of assets as of June 30, 2007 are as follows:

	<u>Years</u>
Buildings	15 to 50
Machinery and equipment	10 to 40
Buildings and improvements (Republic)	10 to 25
Land improvements (Republic)	5 to 25
Machinery and equipment (Republic)	5 to 20

g. Other assets - Organization and pre-operating expenses are capitalized and restated using a factor derived from the NCPI cumulative from the date of generation through period-end, and their amortization is calculated by the straight-line method over a period of 20 years.

h. Seniority premiums and severance payments – According to Federal Labor Law, employees are entitled to seniority premiums after fifteen years or more of services. These premiums are recognized as expenses in the years in which the services are rendered, using actuarial calculations based on the projected unit credit method, and since 1996 by applying real interest and salary increases.

Any other payments to which employees may be entitled in case of separation, disability or death, are charged to operations in the period in which they become payable.

i. Pension plan - Until 1995, the Company provided pension benefits for all personnel with a minimum of 10 years of service and 35 years of age. The Company had established an irrevocable trust for its contributions, which were based on actuarial calculations. In December 1995, the board of directors of the Company, in

agreement with the trade union, discontinued these benefits and related contributions to the trust fund. This decision was made because of the new Mexican pension fund system, Administradoras de Fondos para el Retiro, which establishes similar benefits for the employees. The balance of the trust fund will be applied to the retirement benefits of qualifying employees until the fund is exhausted due to the irrevocable status of the fund.

The Company does not have any contractual obligation regarding the payment of pensions of retirements.

j. Cost of sales - Cost of sales related to sales of inventory items is recorded at standard cost, which approximates the replacement cost at the date of sale.

k. Income tax and employee profit sharing - In 1999, the Mexican Institute of Public Accountants issued Bulletin D-4, "Accounting for Income and Asset Taxes and Employee Profit Sharing", which is effective for all fiscal years beginning January 1, 2000. Bulletin D-4 establishes financial accounting and reporting standards for the effects of asset tax, income tax and employee profit sharing that result from enterprise activities during the current and preceding years.

The Company and its subsidiaries are included in the consolidated tax returns of the company's parent.

l. Foreign currency transactions and exchange differences – All transactions in foreign currency are recorded at the exchange rates prevailing on the date of their execution or liquidation. Foreign currency denominated assets and liabilities are translated at the exchange rates prevailing at the balance sheet date. Any exchange differences incurred with regard to assets or liabilities denominated in foreign currency are charged to operations of the period and are included in financial income (expense) in the accompanying consolidated statements of income (loss).

For consolidation purposes, the financial statements of the subsidiaries abroad, SimRep and subsidiaries, Pacific Steel and Undershaft Investment, were translated into pesos in conformity with Mexican accounting Bulletin B-15, Transactions in Foreign Currency and Translation of Financial Statements of Foreign Operations.

The subsidiary SimRep was considered as a foreign entity for translation purposes; therefore the financial statements as reported by the subsidiary abroad were adjusted to conform with Mexican GAAP, which includes the recognition of the effects of inflation as required by Mexican accounting Bulletin B-10, applying inflation adjustment factors derived from the U.S. Consumer Price Index (CPI) published by the U.S. labor department, The financial information already restated to include inflationary effects, is translated to Mexican pesos as follows:

- By applying the prevailing exchange rate at the consolidated balance sheet date for monetary and non-monetary assets and liabilities.
- By applying the prevailing exchange rate for stockholders' equity accounts, at the time capital contributions were made and earnings were generated.
- By applying the prevailing exchange rate at the consolidated balance sheet date for revenues and expenses during the reporting period.
- The related effect of translation is recorded in stockholders' equity under the caption Equity adjustments for non monetary assets.
- The resulting amounts were restated applying adjustment factors derived from the NCPI, in conformity with Mexican accounting Bulletin B-10.

The subsidiaries Pacific Steel and Undershaft Investment, were considered an "integral part of the operations" of the Company; and the financial statements of such subsidiaries were translated into Mexican pesos as follows:

By applying the prevailing exchange rate at the consolidated balance sheet date for monetary items.

By applying the prevailing exchange rate at the time the non-monetary assets and capital are generated, and the weighted average exchange rate of the period for income statement items.

The related effect of translation is recorded in the statement of operations as part of the caption Comprehensive financing cost.

The resulting amounts were restated applying adjustment factors derived from the Mexican NCPI, in conformity with Mexican accounting Bulletin B-10.

m. Geographic concentration of credit risk - The Company sells its products primarily to distributors for the construction industry with no specific geographic concentration. Additionally, no single customer accounted for a significant amount of the Company's sales, and there were no significant accounts receivable from a single customer or affiliate at June 30, 2006 and at June 30, 2007, direct sales to two customers accounted for approximately 10% and 16.6% of the Republic's sales. The Company performs evaluations of its customers' credit histories and establishes an allowance for doubtful accounts based upon the credit risk of specific customers and historical trends.

n. Other income (expenses)- Other income (expenses) shown in the consolidated statements of operations primarily includes other financial operations.

o. Gain on monetary position - The gain on monetary position in the consolidated statements of income (loss) is determined by applying to net monetary assets or liabilities at the beginning of each month the factor of inflation derived from the NCPI and is restated at period-end with the corresponding factor.

p. Restatement of capital stock and retained earnings (losses) – This is determined by multiplying capital stock contributions and retained earnings (losses) by factors derived from the NCPI, which measure the cumulative inflation from the date when capital stock contributions were made and earnings (losses) were generated, through the latest period-end.

q. Effect of restatement of stockholders' equity – The effect resulting from restating stockholders' equity includes the accumulated effect from holding non-monetary assets, which represents the change in the specific price level of those assets compared to the change in the NCPI.

(2) Financial Debt:

At June 30, 2007 Simec's total consolidated debt consisted of U.S. \$302,000 of 8 7/8% medium-term notes ("MTN's") due 1998 (accrued interest at June 30, 2007 was U.S. \$ 350,679 dollars. At December 31, 2006 Simec's total consolidated debt consisted of U.S. \$302,000 of 8 7/8% medium-term notes ("MTN's") due 1998 (accrued interest at December 31, 2006 was U.S. \$336,525 dollars.

(3) Commitments and contingent liabilities:

a. Pacific Steel, Inc. (a wholly-owned subsidiary located in the U.S.A.) has been named in various claims and suits relating to the generation, storage, transport, disposal and cleanup of materials classified as hazardous waste. The Company has accrued approximately Ps. 9,105 (U.S. \$837,962) at June 30, 2007, (included in accrued liabilities) relating to these actions; the reduction of this reserve from previous levels reflects clean-up activities undertaken by Simec. Management believes the ultimate liability with respect to this matter will not exceed the amounts that have been accrued.

b. The Company is subject to various other legal proceeding and claims, which have arisen, in the ordinary course of its business. It is the opinion of management that their ultimate resolution will not have a material adverse effect on the Company's consolidated financial position or consolidated results of operations.

c. Compañía Siderúrgica de Guadalajara, S.A. de C.V. has entered into a gas and liquid oxygen purchase agreement with Praxair de México, S.A. de C.V., under which it is committed to acquire monthly over a fifteen-

year period beginning January 1, 1989, a certain amount of product. At present required purchases amount to Ps. 1,700 per month.

INFORMATION RELATED TO BULLETIN B-15
(FOREIGN CURRENCY TRANSLATION)

CONSOLIDATED

Foreign currency transactions and exchange differences – All transactions in foreign currency are recorded at the exchange rates prevailing on the date of their execution or liquidation. Foreign currency denominated assets and liabilities are translated at the exchange rates prevailing at the balance sheet date. Any exchange differences incurred with regard to assets or liabilities denominated in foreign currency are charged to operations of the period and are included in financial income (expense) in the accompanying consolidated statements of income (loss).

The financial statements of foreign subsidiaries are translated into Mexican pesos in conformity with Bulletin B-15 “Transactions in Foreign Currency and Translation of Financial Statements of Foreign Operations”.

Pacific Steel and Undershaft investments are considered to be “integrated foreign operations”, as defined in Bulletin B-15, and accordingly such financial statements were translated as follows:

- Monetary items at the exchange rate at the balance sheet date.
- Non-monetary items and stockholders’ equity at the exchange rate prevailing at the date the transactions occurred.
- Income and expense items at an appropriate average exchange rate.
- The resulting foreign currency translation differences are included in the financial income (expense) in the statement of income (loss).
- All resulting Mexican peso amounts are restated for the effects of inflation in accordance with the dispositions of Bulletin B-10 using the NCPI, where such effects are considered significant.

SimRep and subsidiaries are considered to be “foreign operations”, as defined in Bulletin B-15, and accordingly such financial statements were translated as follows:

- Monetary and non-monetary items at the exchange rate at the balance sheet date.
 - Income and expense items at the exchange rate at the balance sheet date.
 - The resulting foreign currency translation differences are included in the stockholders’ equity.
 - All resulting Mexican peso amounts are restated for the effects of inflation in accordance with the dispositions of Bulletin B-10 using the NCPI, where such effects are considered significant.
