TAITRON COMPONENTS INCORPORATED

Notes to Condensed Consolidated Financial Statements

March 31, 2006

(All amounts are unaudited)

Note 1 - Basis of Presentation

The accompanying unaudited condensed consolidated financial statements of Taitron Components Incorporated ("the Company") were prepared in accordance with accounting principles generally accepted in the United States of America and reflect all adjustments, consisting of normal recurring accruals and adjustments, which are, in the opinion of management, necessary for a fair presentation of the consolidated financial position and results of operations at and for the periods presented. Such financial statements do not include all the information or footnotes necessary for a complete presentation and, accordingly, should be read in conjunction with the Company's Annual Report on Form 10-KSB for the fiscal year ended December 31, 2005, and the notes thereto, which include significant accounting policies and estimates. The results of operations for the interim periods are not necessarily indicative of results for the full year.

Note 2 - Summary of Significant Accounting Policies and Estimates

Principles of Consolidation

The unaudited condensed consolidated financial statements include the

Edgar Filing: TAITRON COMPONENTS INC - Form 10QSB

accounts of the Company and its 60% majority-owned subsidiary, Taitron Components Mexico SA de CV. All significant intercompany transactions and balances have been eliminated in consolidation.

Revenue Recognition

Revenue is typically recognized upon shipment of merchandise and sales are recorded net of discounts, rebates, and returns. Reserves for sales allowances and customer returns are established based upon historical experience and management's estimates as shipments are made. Sales returns for the quarters ended March 31, 2006 and 2005 were \$15,000 and \$17,000, respectively.

Allowance for Sales Returns and Doubtful Accounts

On a case-by-case basis, the Company accepts returns of products from its customers, without restocking charges, when they can demonstrate an acceptable cause for the return. Requests by a distributor to return products purchased for its own inventory generally are not included under this policy. The Company will, on a case-by-case basis, accept returns of products upon payment of a restocking fee, which is generally 15% to 30% of the net sales price. The Company will not accept returns of any products that were special-ordered by a customer or that otherwise are not generally included in inventory. The allowance for sales returns and doubtful accounts at March 31, 2006 aggregated \$64,000.

Inventory

Inventory, consisting principally of products held for resale, is recorded at the lower of cost (determined using the first in-first out method) or estimated market value. Inventory is presented net of valuation allowances of \$1,421,000 at March 31, 2006.

Income Taxes

The Company accounts for income taxes under the asset and liability method. Deferred tax assets and liabilities are recognized for future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which the temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date. Valuation allowances are recorded, when necessary, to reduce deferred tax assets to the amount expected to be realized. The Company has fully reserved against its deferred income tax assets, as management could not determine that it was more likely than not such assets would be realized.

Page 5

Loss Per Share

Basic loss per share is computed by dividing net loss available to common shareholders by the weighted-average number of common shares outstanding during the period. Common equivalent shares of approximately 447,000 shares for the three months ended March 31, 2006, are excluded from the computation of diluted loss per share as their effect is anti-dilutive.

Reclassification

Edgar Filing: TAITRON COMPONENTS INC - Form 10QSB

Certain amounts in the prior year condensed consolidated financial statements have been reclassified to conform to the current year presentation.

Use of Estimates

Management has made a number of estimates and assumptions relating to the reporting of assets and liabilities and the disclosure of contingent assets and liabilities to prepare these condensed consolidated financial statements in conformity with accounting principles generally accepted in the United States. These estimates have a significant impact on the Company's valuation and reserve accounts relating to the allowance for sales returns, doubtful accounts, inventory reserves and deferred income taxes. Actual results could differ from these estimates.

Stock-Based Compensation

In March 1995, the Company established the 1995 Stock Incentive Plan (the Plan) that expired in March 2005. The Plan provided for the issuance of an aggregate 1,080,000 incentive stock options, nonstatutory options or stock appreciation rights (SAR's) to directors, officers and other employees of the Company. Under the Plan, incentive stock options were granted at prices equal to at least the fair market value of the Company's Class A common stock at the date of grant. Nonstatutory options and stock appreciation rights were granted at prices equal to at least 85% and 100%, respectively, of the fair market value of the Company's Class A common stock at the date of grant. Outstanding options and rights vest in three equal annual installments beginning one year from the date of grant and are subject to termination provisions as defined in the Plan. The Plan also provided for automatic grants of nonstatutory options to purchase 5,000 shares of Class A common stock to all members of the committee administering the Plan, upon their initial election to the committee and each year thereafter. The exercise prices of these options are equal to the fair market value of the Company's Class A common stock at the date of grant. The fair value of options is the estimated present value at grant date using the Black-Scholes option-pricing model with the following weighted average assumptions used for 2006 and 2005: dividend yield of 0%; expected volatility of 35%; a risk free interest rate of approximately 5% and an expected holding period of five years.

Effective January 1, 2006, the Company adopted SFAS No. 123 (revised 2004), "Share-Based Payment" (SFAS 123R). SFAS 123R requires that the Company account for all stock-based compensation using a fair-value method and recognize the fair value of each award as an expense over the service period. For the year ended December 31, 2005 and earlier years, the Company accounted for stock-based compensation using the intrinsic value method of APB Opinion No. 25 and followed the disclosure requirements of SFAS No. 123, as amended by SFAS 148.

The Company elected to adopt SFAS 123R using the "modified prospective application." Under that method, compensation expense includes the fair value of new awards, modified awards and any unvested awards outstanding at January 1, 2006. However, the consolidated financial statements for periods prior to the adoption of SFAS 123R have not been restated to reflect the fair value method of accounting for stock-based compensation, but rather disclosed the cost in accordance with APB 25.

The following table illustrates the effect on net loss and net loss per share as if compensation expense for all awards of stock-based employee compensation had been determined under the fair value-based method prescribed by SFAS 123 for periods prior to the adoption of SFAS 123R:

	Three months ended March 31, 2005

Net loss, as reported	(129,000)
Net loss, pro forma	(137,000)
Diluted loss, as reported	(0.02)
Diluted loss, pro forma	(0.03)

Stock option activity during the periods indicated is as follows:

	Number of Shares	Weighted Average Exercise Price
	-----	-----
Balance at December 31, 2005	526,166	\$1.78
Exercised	(16,666)	1.41
Balance at March 31, 2006	509,500	\$1.80
	=====	

The weighted average fair value of options granted in the three months period ended March 31, 2006 and 2005 was \$0, as there were no options granted during either period.

At March 31, 2006, the range of individual weighted average exercise prices was \$1.29 to \$2.17. The remaining contractual life of outstanding options is 90 days after termination of employment of option holder.

At March 31, 2006, the approximate number of options exercisable was 413,000 and the weighted average exercise prices of those exercisable options were \$1.87.

Note 3 - Commitments and Contingencies

On July 9, 2005, the Company renewed its revolving line of credit facility providing up to \$3 million for operating purposes. The agreement governing this credit facility expires on June 17, 2006 and contains security agreements covering essentially all assets of the Company and financial covenants requiring compliance with certain financial ratios. As of the date of this report, the Company has not yet used this credit facility.

Effective July 1, 2006, the European Union ("EU") will begin restricting the distribution of products within the EU containing certain substances, including lead. At the present time, much of the Company's inventory contains substances prohibited by the RoHS directive and management believes it is likely that the Company will not be able to distribute non-RoHS compliant products to most customers who intend to sell their finished goods in the EU after the effective date. Upon effectiveness of the RoHS legislation, some of the Company's inventory may become obsolete and unsaleable and, as a result, have to be written off. See Item 2 - "Management's Discussion and Analysis - Critical Accounting Policies and Estimates - Impact of Governmental Regulation.

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OR PLAN OF OPERATION.

The following discussion should be read in conjunction with the condensed

Edgar Filing: TAITRON COMPONENTS INC - Form 10QSB

consolidated financial statements, including the related notes, appearing in Item 1 of this report as well as our most recent annual report on Form 10-KSB for the year ended December 31, 2005. Also, several of the matters discussed in this document contain forward-looking statements that involve risks and uncertainties. Forward-looking statements usually are denoted by words or phrases such as "believes," "expects," "projects," "estimates," "anticipates," "will likely result" or similar expressions. We wish to caution readers that all forward-looking statements are necessarily speculative and not to place undue reliance on forward-looking statements, which speak only as of the date made, and to advise readers that actual results could vary due to a variety of risks and uncertainties. Factors associated with the forward looking statements that could cause the forward looking statements to be inaccurate and could otherwise impact our future results are set forth in detail in our most recent annual report on Form 10-KSB. In addition to the other information contained in this document, readers should carefully consider the information contained in our most recent annual report on Form 10-KSB under the heading "Cautionary Statements and Risk Factors."

References to "Taitron," "the Company," "we," "our" and "us" refer to Taitron Components Incorporated and its majority-owned subsidiary, unless the context otherwise requires.

Critical Accounting Policies and Estimates

Use Of Estimates - Management has made a number of estimates and assumptions relating to the reporting of assets and liabilities and the disclosure of contingent assets and liabilities to prepare its condensed consolidated financial statements in conformity with accounting principles generally accepted in the United States. These estimates have a significant impact on the Company's valuation and reserve accounts relating to the allowance for sales returns, doubtful accounts, inventory reserves and deferred income taxes. Actual results could differ from these estimates.

Page 7

Revenue Recognition - Revenue is recognized upon shipment of the merchandise, which is when legal transfer of title occurs. Reserves for sales allowances and customer returns are established based upon historical experience and our estimates of future returns. Sales returns for the quarter ended March 31, 2006 and 2005 were \$15,000 and \$17,000, respectively. The allowance for sales returns and doubtful accounts at March 31, 2006 aggregated \$64,000.

Inventory - Inventory, consisting principally of products held for resale, is recorded at the lower of cost (determined using the first in-first out method) or estimated market value. We had inventory balances in the amount of \$16,367,000 at March 31, 2006, which is presented net of valuation allowances of \$1,421,000. We evaluate inventories to identify excess, high-cost, slow-moving or other factors rendering inventories as unmarketable at normal profit margins. Due to the large number of transactions and the complexity of managing and maintaining a large inventory of product offerings, estimates are made regarding adjustments to the cost of inventories. Based on our assumptions about future demand and market conditions, inventories are carried at the lower of cost or estimated market value. If our assumptions about future demand change, or market conditions are less favorable than those projected, additional write-downs of inventories may be required. In any case, actual amounts could be different from those estimated.

Impact of Governmental Regulation - Our worldwide operations are subject to local laws and regulations. As such, of particular interest is the European Union ("EU") directive relating to the Restriction of Certain Hazardous

Edgar Filing: TAITRON COMPONENTS INC - Form 10QSB

Substance ("RoHS"). Effective July 1, 2006, this directive restricts the distribution of products within the EU containing certain substances, including lead. While the enabling legislation of a number of EU member countries has not yet been adopted, we believe it is likely that we will not be able to distribute non-RoHS compliant products to most customers who intend to sell their finished goods in the EU after the effective date. At the present time, much of our inventory contains substances prohibited by the RoHS directive. Further, many of our suppliers are not yet supplying RoHS compliant products. Upon effectiveness of the RoHS legislation, some of our inventory may become obsolete and unsaleable and, as a result, have to be written off. While we are working closely with our customers and suppliers to minimize this impact, at this time, it is difficult to quantify the financial impact, if any, of such obsolete inventory.

Deferred Taxes - We review the nature of each component of our deferred income taxes for reasonableness. If determined that it is more likely than not that we will not realize all or part of our net deferred tax assets in the future, we record a valuation allowance against the deferred tax assets, which allowance will be charged to income tax expense in the period of such determination. We also consider the scheduled reversal of deferred tax liabilities, tax planning strategies and future taxable income in assessing the realizability of deferred tax assets. We also consider the weight of both positive and negative evidence in determining whether a valuation allowance is needed. Based upon recent operating results and the difficulty of estimating future market conditions, we have fully reserved a \$721,000 allowance against our net deferred tax assets.

Selected Recent Accounting Policies

In May 2005, the FASB issued SFAS No. 154, "Accounting Changes and Error Corrections," which replaces APB Opinion No. 20 "Accounting Changes," and FASB Statement No. 3 "Reporting Accounting Changes in Interim Financial Statements," and changes the requirements for the accounting for and reporting of a change in accounting principle. This Statement requires retrospective application to prior periods' financial statements of changes in accounting principle, unless it is impracticable to determine either the period-specific effects or the cumulative effect of the change. This Statement shall be effective for accounting changes and corrections of errors made in fiscal years beginning after December 15, 2005. We do not believe that adoption of SFAS 154 will have a material impact on our financial statements.

Overview

We are a national distributor of electronic components, primarily focused on transistors, diodes and other discrete semiconductors, optoelectronic devices and passive components with a reputation of in-depth inventories and knowledge of the products we sell. Our customers consist of other electronic distributors, contract electronic manufacturers (CEMs) and original equipment manufacturers (OEMs).

We believe that demand for discrete semiconductors in the U.S. market has drastically declined since 2000. This declining demand has resulted from the accelerated trend of moving the production capacity of OEM/CEM customers abroad and the consolidation of CEM customers domestically. In response, we are refocusing our business strategy beyond the traditional role of electronic components fulfillment to the additional role of engineering and turn-key services for our existing OEM and CEM customers by outsourcing their product design and manufacturing work offshore. We formed some strategic business

Edgar Filing: TAITRON COMPONENTS INC - Form 10QSB

partnerships with a few customers and are providing them with original design and manufacturing (ODM) services for their multi-year turn-key projects. We expect to see more opportunities and results from these additional services during 2006.

Our core strategy of electronic components fulfillment, however, consists of carrying a substantial quantity and variety of products in inventory to meet the rapid delivery requirements of our customers. This strategy allows us to fill customer orders immediately from stock on hand. Although we believe better market conditions may return, we are focused on lowering our inventory balances and increasing our cash holdings. Our long-term strategy is to rely not only on our core strategy of component fulfillment service, but also the value-added engineering and turn-key services. In accordance with Generally Accepted Accounting Principles, we classify inventory as a current asset. However, if all or a substantial portion of the inventory was required to be immediately liquidated, the inventory would not be as readily marketable or liquid as other items included or classified as a current asset, such as cash. We cannot assure you that demand in the discrete semiconductor market will increase and that market conditions will improve. Therefore, it is possible that further declines in our carrying values of inventory may result.

Results of Operations

Three month Period Ended March 31, 2006 Compared To The Three month Period Ended March 31, 2005.

Net sales for the quarter ended March 31, 2006 increased by 8% to \$1,989,000 from \$1,842,000 in the prior year period. The overall increase primarily came from our original design manufactured products in the amount of \$124,000, compared with the prior year period.

Gross margins were 24.1% for the quarter ended March 31, 2006, compared to 27.2% for the prior year period. The decrease can be primarily attributed to pricing pressures for our Samsung brand components sold in the domestic market and higher sales levels of non-RoHS compliant products sold in the overseas market.

Selling, general and administrative expenses increased by \$18,000 for the quarter ended March 31, 2006 as compared to the prior year period, primarily related to higher professional fees.

Operating loss was \$156,000 or 7.8% of net sales for quarter ended March 31, 2006, as compared to \$117,000 in the prior year period. Operating loss increased primarily as a result of lower gross margins discussed above.

Interest expense was \$0 for quarter ended March 31, 2006 as compared to \$21,000 in the prior year period. The decrease is due to lowered borrowing levels related to repayment of our long-term debt obligations.

Income tax provision was \$4,000 for the quarter ended March 31, 2006, as compared to \$0 for the prior year period. Our tax provision is primarily based upon our state income tax liabilities.

We incurred net losses of \$162,000 for the quarter ended March 31, 2006 as compared with net losses of \$129,000 for the prior year period, an increase of \$33,000 or 25.6%. Net loss as a percentage of net sales increased to 8.1% from 7%.

Effective January 1, 2006, we adopted SFAS 123(R) and such had a minimal financial impact for the three month period ended March 31, 2006.

Liquidity and Capital Resources

Edgar Filing: TAITRON COMPONENTS INC - Form 10QSB

We have satisfied our liquidity requirements principally through cash generated from operations, short-term commercial loans, subordinated promissory notes and issuance of equity securities. A summary of our cash flows resulting from our operating, investing and financing activities for the quarter ended March 31, 2006 and 2005 are as follows:

Page 9

(Dollars in thousands)	Three months ended March 31,	
	2006	2005
	(Unaudited)	(Unaudited)
Operating activities	\$ 373	\$ 211
Investing activities	(28)	(4)
Financing activities	24	(34)

Cash flows provided by operating activities increased to \$373,000 during the quarter ended March 31, 2006, as compared to \$211,000 during the same period last year.

Cash flows used in investing activities was \$28,000 during the quarter ended March 31, 2006 compared with \$4,000 during the same period last year.

Cash flows provided by financing activities increased to \$24,000 during the quarter ended March 31, 2006, from \$34,000 used in during the same period last year.

Inventory is included in current assets; however, it will take over one year for the inventory to turn. Hence, inventory would not be as readily marketable or liquid as other items included in current assets, such as cash.

We believe that funds generated from operations, in addition to existing cash balances, and the revolving line of credit facility is likely to be sufficient to finance our working capital and capital expenditure requirements for the foreseeable future. If these funds are not sufficient, we may secure new sources of asset-based lending on accounts receivables or issue debt or equity securities. Otherwise, we may need to liquidate assets to generate the necessary working capital.

As of the date of this Report, we had no commitments for other equity or debt financing or other capital expenditures.

Item 3. Controls and Procedures.

The Company's management, including its Chief Executive Officer and Chief Financial Officer, have evaluated the effectiveness of the Company's disclosure controls and procedures (as such term is defined in Rules 13a-15(e) under the Securities Exchange Act of 1934 (the "Exchange Act")) as of the end of the reporting period covered by this quarterly report. Based on such evaluation, the Chief Executive Officer and Chief Financial Officer have concluded that, as of the end of the period covered by this quarterly report, the Company's disclosure controls and procedures are effective such that material information required to be disclosed by the Company (including its consolidated subsidiary) in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified by the Securities and Exchange Commission's rules and forms relating to the Company.

During the quarterly period covered by this report, there have been no

Edgar Filing: TAITRON COMPONENTS INC - Form 10QSB

changes to the Company's internal control over financial reporting that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II - OTHER INFORMATION

Item 1. Legal Proceedings.

None.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

There were no issuances or sales of our securities by us during the first quarter of 2006 that were not registered under the Securities Act.

Item 3. Defaults Upon Senior Securities.

None.

Page 10

Item 4. Submission of Matters to a Vote of Security Holders.

None.

Item 5. Other Information.

None.

Item 6. Exhibits.

- a. Certification Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
- b. Certification Pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.
