ALICO, INC. AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

(Dollars in thousands except for share and per share data)

Note 1. Description of Business and Basis of Presentation

Description of Business

Alico Inc. (“Alico”) and its wholly owned subsidiaries (collectively, the “Company”) is an agribusiness and land management company. The Company owns approximately 130,400 acres of land in five Florida counties (Collier, Glades, Hendry, Lee and Polk). Our principal lines of business are citrus groves, improved farmland including sugarcane, cattle ranching and conservation, and other operations which includes rock mining.

Basis of Presentation

The accompanying (a) condensed consolidated balance sheet as of September 30, 2012, which has been derived from audited financial statements, and (b) unaudited condensed consolidated interim financial statements (the “Financial Statements”) of the Company have been prepared in accordance with accounting principles generally accepted in the United States of America (“GAAP”). The Financial Statements include all adjustments, consisting of normal and recurring adjustments, which in the opinion of management were necessary for a fair presentation of the financial position, results of operations and cash flows for the periods presented. The results of the interim period are not necessarily indicative of the results for any other interim periods or the entire fiscal year.

The Financial Statements have been presented according to the rules and regulations of the Securities and Exchange Commission (“SEC”), instructions to Form 10-Q and Rule 10-01 of Regulation S-X. Certain information, footnotes and disclosures normally included in annual financial statements prepared in accordance with GAAP have been condensed or omitted in accordance with those rules and regulations. The Company believes that the disclosures made are adequate to make the information not misleading. The Financial Statements should be read in conjunction with the audited consolidated financial statements and notes thereto included in the Company’s Annual Report on Form 10-K for the year ended September 30, 2012.

Principles of Consolidation

The Financial Statements include the accounts of Alico, and its wholly owned subsidiaries, Alico Land Development, Inc. (“ALDI”), Alico-Agri, Ltd. (“Alico-Agri”), Alico Plant World, LLC and Alico Fruit Company, LLC (formerly known as Bowen Brothers Fruit Company, LLC) (“Alico Fruit”). All significant intercompany accounts and transactions have been eliminated in consolidation.

Reclassifications

Certain reclassifications have been made to the prior years’ consolidated financial statements to conform to the fiscal year 2013 presentation. These reclassifications had no impact on working capital, net income, stockholders’ equity or cash flows as previously reported.

Use of Estimates

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates based upon future events. The Company periodically evaluates the estimates. The estimates are based on current and expected economic conditions, historical experience and various other specific assumptions that the Company believes to be reasonable.

Seasonality

The Company is primarily engaged in agriculture, which is of a seasonal nature and subject to the influence of natural phenomena and wide price fluctuations. The results of the reported period herein are not necessarily indicative of the results for any other interim periods or the entire fiscal year.

Recent Accounting Pronouncements

The Company does not believe that any recent accounting pronouncements issued by the FASB (including its Emerging Issues Task Force), the AICPA, or the SEC would have a material effect on its financial position, results of operations or cash flows.

On October 3, 2012, the restriction on the \$2,500,000 was lifted.

Note 4. Income taxes

Alico's effective tax rate was 39.0% and 38.1% for the six months ended March 31, 2013 and 2012, respectively.

The Company applies a "more likely than not" threshold to the recognition and non-recognition of tax positions. A change in judgment related to prior years' tax positions is recognized in the quarter of such change. The Company had no reserve for uncertain tax positions at March 31, 2013 and September 30, 2012. The Company recognizes interest and/or penalties related to income tax matters in income tax expense and in income taxes payable.

On May 16, 2012, the Company reached a settlement with the IRS related to its examination of the returns of Alico, Agri-Insurance, Ltd., (a former subsidiary of the Company) and Alico-Agri for the tax years 2005 through 2007. As a result of the settlement, the Company paid Federal taxes of \$613,000 and interest of \$225,000. On October 9, 2012, the Company paid the State of Florida \$318,000 for taxes and \$5,000 for interest as a result of the IRS settlement. The Company accrued \$149,000 at September 30, 2012, for additional state interest and penalties. The actual amount paid was \$135,000 for state interest. No amount was due for state penalties and the remaining accrual was reversed during the second quarter of fiscal year 2013.

Note 5. Long-Term Debt

The Company has a credit facility including a revolving line of credit ("RLOC") and term loan with Rabo AgriFinance, Inc. ("Rabo") totaling \$97,000,000. The revolving line of credit and term note are collateralized by 43,991 acres of farmland and 12,280 acres of additional real property containing approximately 8,600 acres of producing citrus groves.

The \$60,000,000 RLOC bears interest at a floating rate payable on the first day of each calendar quarter. The RLOC matures on October 1, 2020. At March 31, 2013, there was no outstanding balance on the RLOC. The Company pays an annual commitment fee on the RLOC equal to 0.15% of the difference between the annual average unpaid balance and the \$60,000,000 loan commitment. The commitment fee is payable on February 1 of each year. Commitment fees of approximately \$87,000 were paid during February 2013 and \$15,000 was accrued at March 31, 2013.

The interest rate on the RLOC is based on the one month LIBOR plus a spread. The spread is determined based upon our debt service coverage ratios for the preceding fiscal year and can vary from 225 to 250 basis points. The rate is currently at Libor plus 225 basis points. On October 1, 2015, Rabo may adjust the interest rate spread to any percentage above one month Libor. Rabo must provide a 30 day notice of the new spreads; at that time, the Company has the right to prepay the outstanding balance.

Edgar Filing: ALICO INC - Form 10-Q

The term loan requires quarterly payments of interest at a floating rate of one month LIBOR plus 250 basis points. It also requires quarterly principal payments of \$500,000 through October 1, 2020, when the remaining principal balance and accrued interest will be due and payable.

At March 31, 2013 and September 30, 2012, Alico was in compliance with all of its covenants under the various Rabo loan agreements.

On October 10, 2012, the outstanding mortgage note held by Farm Credit of Florida was paid in full. The payment included \$1,794,000 for the principal balance and \$66,000 for a prepayment penalty which was included in interest expense on our consolidated statement of operations. The mortgage was collateralized by 7,680 acres of real estate used for farm leases, sugarcane and citrus production. The collateral was released upon satisfaction of the mortgage.

Due within 1 year	\$2,000

Note 6. Disclosures about reportable segments

Lines of Business

The Company operates five lines of business related to our various land holdings. The lines of business are as follows:

Citrus Groves include activities related to planting, owning, cultivating and/or managing citrus groves on prepared grove land in order to produce fruit for sale to fresh and processed citrus markets.

Agricultural Supply Chain Management and Support includes activities related to value-added services which include contracting for harvesting, marketing and hauling and the purchase and resale of fruit.

Improved Farmland includes activities related to planting, owning, cultivating, managing and/or leasing improved farmland. Improved farmland is acreage that has been recovered from native pasture and which has various improvements including irrigation, drainage and roads.

Ranch and Conservation includes activities related to cattle grazing and management, sod, native plant and animal sales, leasing, management and/or conservation of unimproved native pasture land.

Other Operations include activities related to rock and sand mining, oil exploration and other insignificant lines of business.

Segments

The Company is organized into six operating segments which span our five lines of business. The operating segments are strategic business units that offer different products and services. They are managed separately and decisions about allocation of resources are determined by our management team based on these strategic business units. The operating segments are as follows:

Citrus Groves include activities related to planting, cultivating and/or managing citrus groves in order to produce fruit for delivery to fresh and processed citrus markets.

Alico Fruit includes activities related to agricultural value-added services which include contracting for harvesting, hauling and marketing and the purchase and resale of fruit.

Sugarcane includes activities related to planting, cultivating and/or managing sugarcane fields in order to produce sugarcane for sale to a sugar processor.

Cattle includes the production of beef cattle for sale.

Land Leasing and Rentals includes the leasing of land to others on a tenant-at-will basis for grazing, farming, oil and mineral exploration and recreational uses.

Other Operations consists of insignificant operations that do not otherwise fit within the other five defined operating segments.

Intersegment sales and transfers are accounted for by the Company as if the sales or transfers were to third parties at current market prices. Goods and services produced by these segments are sold to wholesalers and processors in the United States which prepare the products for consumption. The Company evaluates the segments performance based on direct margins from operations before general and administrative costs, interest expense and income taxes, not including nonrecurring gains and losses.

The accounting policies of the segments are the same as those described in Note 1, Description of the Business and Basis of Presentation. Total revenues represent sales to unaffiliated customers, as reported in the Company's Condensed Consolidated Statements of Operations. All intercompany transactions have been eliminated.

Note 7. Stockholders' Equity

Effective November 1, 2008, the Company's Board of Directors authorized the repurchase of up to 350,000 shares of the Company's common stock through November 1, 2013 for the purpose of funding restricted stock grants under its 2008 Equity Incentive Plan (the "2008 Plan"). The 2008 Plan was approved by shareholders on February 20, 2009. The stock repurchases began in November 2008 and were made on a quarterly basis through open market transactions at times and in such amounts as the Company's broker determines subject to the provisions of SEC Rule 10b-18.

Effective April 1, 2013, the Board of Directors adopted the 2013 Incentive Plan (the "2013 Plan") which supersedes the 2008 Plan. The 2013 Plan was approved by shareholders at the February 22, 2013 shareholders meeting. Under the terms of the 2013 Plan, 350,000 shares of the Company's common stock may be purchased and reserved for awards.

The following table provides information relating to purchases of the Company's common shares on the open market pursuant to the 2008 Plan for the six months ended March 31, 2013:

	Shares	Cost
Balance September 30, 2012	23,235	\$543
Purchases	73,768	2,810
Issuances to Directors	(9,710)	(221)
Balance March 31, 2013	87,293	\$3,132

Through March 31, 2013, the Company had purchased 163,376 shares and had available to purchase an additional 186,654 shares in accordance with the 2008 Plan which was superseded by the 2013 Plan on April 1, 2013.

Stock-based compensation expense recognized in the Condensed Consolidated Statement of Operations in general and administrative expenses was \$174,000 and \$315,000 for the three and six months ended March 31, 2013, respectively, and \$125,000 and \$246,000 for the three and six months ended March 31, 2012, respectively. Stock-based compensation is recorded for the Board of Directors fees paid in treasury stock and the Long Term Incentive Compensation Plan restricted common stock awards.

Long Term Incentive Plan

On May 26, 2011, the Company's Board of Directors approved the adoption of the Long-Term Incentive Program (the "Program"), as part of the 2008 Plan. The Compensation Committee and the Board of Directors of the Company approved the contingent award of 152,403 shares of common stock to the Named Executive Officers (the "NEOs") of the Company. On May 26, 2011, 58,610 shares were granted to the NEOs other than the Chief Executive Officer ("CEO") and on April 19, 2012, 93,793 shares

were awarded to the CEO under restricted stock award agreements. The total value of the awards at the grant date were \$321,000. The value was determined by application of a valuation model. In addition to the various criteria outlined herein, the model assumed annual volatility of 53.3% and a risk free interest rate of 2.80%.

Performance Criteria:

Either the “Performance Criteria” or “Partial Performance” must be achieved during the five year period following the award date (the “Performance Period”) as well as certain service conditions for the CEO and/or the NEOs to receive the awards. The performance criteria will have been achieved if, at any time during the Performance Period, the average of the closing prices of the common stock over the most recent 20 consecutive trading day period exceeds (i) \$46.00 for the CEO and \$50.40 for the NEOs (representing 200% of the 20 Day Average Closing Price determined as of the Award Date at any time during the three year period commencing on the award date, or the “base stock price”), or (ii) \$49.22 for the CEO and \$53.93 for the NEOs (representing 214% of the base stock price) at any time during the one year period commencing on the third anniversary of the award date and ending on the fourth anniversary of the award date, or (iii) \$52.44 for CEO and \$57.46 for other NEOs (representing 228% of the base stock price) at any time during the one year period commencing on the fourth anniversary of the award date and ending on the fifth anniversary of the award date. If the 20 Day Average Closing Price equals or exceeds 100% of the applicable target average stock price on any day during the Performance Period, the recipients will be awarded, subject to vesting, 100% of the shares. Participants must be employed in an executive position through the following dates to receive their stock awards: (i) Fifty Percent (50%) of the Award Level shall immediately vest upon achievement of the Target Average Stock Price (the “Achievement Date”), (ii) Twenty-Five Percent (25%) of the Award Level shall vest on the first anniversary of the Achievement Date, and (iii) Twenty-Five Percent (25%) of the Award Level shall vest on the second anniversary of the Achievement Date.

If the Performance Criteria is not achieved during the Performance Period, but at any time during the Performance Period the 20 Day Average Closing Price exceeds 90% of the applicable target average stock price, then fifty percent (50%) of the common shares will be awarded, subject to vesting, at the end of the Performance Period (“Partial Performance”). Participants must be employed in an executive position through the following dates to receive their stock awards: (i) Twenty-Five Percent (25%) of the Award Level shall vest on the last day of the Performance Period (“Partial Performance Achievement Date” in the case of Partial Performance), (ii) Twelve and One-Half Percent (12.5%) of the Award Level shall vest on the first anniversary of the Partial Performance Achievement Date and (iii) Twelve and One-Half Percent (12.5%) of the Award Level shall vest on the second anniversary of the Partial Performance Achievement Date.

No restricted common stock will be awarded under the Program unless the Performance Criteria or Partial Performance Criteria are achieved during the five year period following the Award Date as specified. Each participant signed an award agreement with the Company setting forth the terms of the award.

On February 8, 2013, the CEO’s restricted common stock award under the Program exceeded 90% of the applicable Target Average Stock Price in accordance with the Partial Performance Criteria. Additionally, on April 3, 2013, the

NEO's stock awards under the Program exceeded 90% of the applicable Target Average Stock Price.

The portion of stock-based compensation expense recorded in general and administrative expenses in the Condensed Consolidated Statement of Operations for the six months ended March 31, 2013 for these market-based awards was \$27,000. The Company used a binomial model to calculate the fair value at the grant date.

In the event of a change in control, reorganization, liquidation or sale of the Company, all shares awarded but unvested will become fully vested provided the recipient remains employed by the Company through such event.

Note 8. Employee Benefits Plans

Management Security Plan

The Management Security Plan ("MSP") is a nonqualified, noncontributory defined supplemental deferred retirement benefit plan for a select group of management personnel. The MSP provides fixed supplement retirement benefits for 180 months. The MSP is frozen with no new participants being added. The MSP benefit expense and the projected obligation are determined using assumptions at the end of the fiscal year. The MSP currently is unfunded and benefits are paid as they become due. At March 31, 2013, the total balance of the deferred retirement benefits liability was \$4,170,000.

The Company has established a "Rabbi Trust" to provide for the funding of accrued benefits under the MSP. According to the terms of the Rabbi Trust, funding is voluntary until a change of control in the Management Security Plan(s) Trust Agreement occurs. Upon a change of control, funding is triggered. As of March 31, 2013, the Rabbi Trust had no assets, and no change of control had occurred.

Note 9. Contingencies

The Company is also involved from time to time in routine legal matters incidental to its business. When appropriate, the Company establishes estimated accruals for litigation matters which meet the requirements of ASC 450—*Contingencies*. Based upon available information, the Company believes that the resolution of such matters will not have a material adverse effect on its financial position or results of operations.

Forward-Looking Statements

We make forward-looking statements in this Quarterly Report, particularly in this Management's Discussion and Analysis, pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995, Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934, as amended (the "Exchange Act"). Any statements in this Quarterly Report that are not historical facts are forward-looking statements. Forward-looking statements include, but are not limited to, statements that express our intentions, beliefs, expectations, strategies, predictions or any other statements relating to our future activities or other future events or conditions. These statements are based on our current expectations, estimates and projections about our business based, in part, on assumptions made by our management. These assumptions are not guarantees of future performance and involve risks, uncertainties and assumptions that are difficult to predict. Therefore, actual outcomes and results may differ materially from what is expressed or forecasted in the forward-looking statements due to numerous factors, including those risks factors described in our Annual Report on Form 10-K for the year ended September 30, 2012 and our Quarterly Reports on Form 10-Q.

Overview

We own approximately 130,400 acres of land in five Florida counties (Collier, Glades, Hendry, Lee and Polk), and operate five lines of business.

Lines of Business

We operate five lines of business related to our various land holdings.

Agricultural Supply Chain Management and Support includes activities related to value-added services which include contracting for harvesting, marketing and hauling and the purchase and resale of fruit.

Improved Farmland includes activities related to planting, owning, cultivating, managing and/or leasing improved farmland. Improved farmland is acreage that has been converted from native pasture and has various improvements including irrigation, drainage and roads.

Ranch and Conservation includes activities related to cattle herd grazing and management, sod, native plant and animal sales, leasing, management and/or conservation of unimproved native pastureland.

Other Operations include activities related to rock and sand mining, oil exploration, office building leasing and other insignificant lines of business.

Segments

We are organized into six operating segments which span our five lines of business. Our operating segments are strategic business units that offer different products and services. They are managed separately and decisions about allocation of resources are determined by our management team based on these strategic business units. Our operating segments are as follows:

Edgar Filing: ALICO INC - Form 10-Q

Citrus Groves include activities related to planting, cultivating and/or managing citrus groves in order to produce fruit for sale to fresh and processed citrus markets.

Alico Fruit includes activities related to agricultural value-added services which include contracting for harvesting, hauling and marketing and the purchase and resale of fruit.

Sugarcane includes activities related to planting, cultivating and/or managing sugarcane fields in order to produce sugarcane for sale to a sugar processor.

Land Leasing and Rentals includes the leasing of land to others on a tenant-at-will basis for grazing, farming, oil and mineral exploration and recreational uses.

Other Operations consists of insignificant operations that do not otherwise fit within the five defined operating segments.

Critical Accounting Policies and Estimates

The discussion and analysis of our financial condition and results of operations are based upon our unaudited condensed consolidated financial statements which have been prepared in accordance with accounting principles generally accepted in the United States of America (“GAAP”). The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets and liabilities, revenues and expenses, and related disclosures of contingent assets and liabilities. We base these estimates on historical experience, available current market information and on various other assumptions that management believes are reasonable under the circumstances. Additionally we evaluate the results of these estimates on an on-going basis. Management’s estimates form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions.

There have been no significant changes during this reporting period to the policies and disclosures set forth in Part II, Item 7 in our Annual Report on Form 10-K for the fiscal year ended September 30, 2012.

Recently Issued Accounting Standards

See Item 1. Financial Statements, Note 1. Description of Business and Basis of Presentation in the Notes to Condensed Consolidated Financial Statements (Unaudited) included in this report for recently issued accounting standards, including the expected dates of adoption and estimated effects on our consolidated financial statements.

Recent Events

On January 28, 2013, Atlanticblue, the holder of 50.6% of Alico’s common stock, informed Alico of its intention, in light of recent changes in the tax code relating to the sale of certain assets by “subchapter S corporations” such as Atlanticblue, to explore the potential sale of substantially all of its assets during the 2013 calendar year and, in connection therewith, to actively pursue the sale of its entire equity position in Alico to a strategic or financial buyer.

The Board of Directors of Alico has formed a Special Committee comprised of its independent Directors to explore working cooperatively with Atlanticblue, to investigate all transaction possibilities and to protect the interests of all shareholders. The Special Committee has engaged Deutsche Bank Securities Inc. to act as its financial advisors and Greenberg Traurig, P.A. to act as its legal counsel to assist and advise the Special Committee with respect to pursuing potential strategic and financial transaction alternatives, including merger, business combination and sale transaction involving Alico. The Special Committee intends to work with its independent financial and legal advisors to identify and evaluate all available strategic and financial alternatives to maximize shareholder value and that are in the best interests of Alico and its shareholders. Atlanticblue has informed Alico that it intends to work cooperatively with the

Special Committee with respect to this process

Operating Revenue

The decrease in operating revenue of \$15,687,000 or 29.0% and \$20,378,000 or 25.5% for the three and six months ended March 31, 2013, as compared to the three months ended March 31, 2012, respectively, is primarily due to a decrease in the sale of citrus fruit by the Alico Fruit and Citrus Groves segments, partially offset by an increase in Sugarcane sales. See *Segment Results* below for further discussion of our revenues from operations.

Gross Profit

Gross profit decreased by \$7,224,000 or 50.8% and \$8,952,000 or 45.4% for the three and six months ended March 31, 2013, as compared to the three and six months ended March 31, 2012, respectively, primarily as a result of the decrease in the Citrus Groves segment. See *Segment Results* below for further discussion of our revenues and expenses from operations.

Operating revenue and gross profit of our Citrus Groves and Alico Fruit segments were negatively impacted by a combination of lower citrus prices and a smaller overall citrus crop. The smaller citrus crop is being driven primarily by higher than average premature fruit drop. Several factors may have caused the early drop, including drought, unfavorable weather conditions during the crops growing cycle and Citrus Greening. Citrus Greening is a bacterial disease that decreases the productivity of infected trees and causes fruit to drop early. The disease, which was first introduced into Florida in 2005, is spread by Asian Citrus Psyllids.

This harvest season's statewide environmental and horticultural factors have negatively impacted our crops, therefore, we expect the total number of boxes produced by our Citrus Groves segment and handled through Alico Fruit to decrease over the prior harvest season. The USDA, in its April 10, 2013 Citrus Forecast, indicated that it expects the Florida orange crop to decline by 8,700,000 boxes or approximately 6% versus the prior year. In each of its last five monthly estimates, the USDA has revised its estimate of the 2012/2013 Florida orange crop downward. Over the course of these revisions, the USDA has decreased its 2012/2013 Florida Orange crop estimate a total of 10%.

General and administrative expenses

The increase was primarily due to the expenses incurred by the Special Committee of our Board of Directors pursuing strategic and financial alternatives, which totaled approximately \$628,000 during the second quarter of fiscal year 2013, partially offset by decreases in professional fees as a result of the IRS settlement and the settlement of shareholder derivative action complaint.

No expenses were incurred for the IRS audit appeals process in fiscal year 2013. Legal fees of \$7,000 and \$41,000 for the three and six months ended March 31, 2013, respectively, were incurred by the Special Litigation Committee in their efforts to recover costs from the shareholder derivative action complaint which was settled on April 1, 2012. For the three and six months ended March 31, 2012, \$175,000 and \$280,000 in legal fees were incurred as result of the IRS audit and appeals process, respectively, and \$186,000 and \$386,000 in legal fees were incurred in defense of the shareholder derivative action complaint, respectively.

Interest and investment income, net

Interest and investment income results primarily from our investment in Magnolia TC 2, LLC (“Magnolia”) and interest bearing bank accounts. Interest and investment income increased by \$341,000 or 516.7% for the quarter ended March 31, 2013, as compared with the same period in 2012, and \$319,000 or 759.6% for the six months ended March 31, 2013, as compared to the six months ended March 31, 2012. The increase in interest and investment income was due to our investment in Magnolia.

In May 2010, we invested \$12,150,000 to obtain a 39% limited partner equity interest in Magnolia. Alico is accounting for the investment in Magnolia in accordance with the equity method of accounting in which we record our 39% interest in the reported income or loss of Magnolia each quarter. We recorded net investment income of \$245,000 and \$324,000 for the three and six months ended March 31, 2013, as compared to a net investment loss of \$87,000 and net investment income of \$10,000 for the three and six months ended March 31, 2012.

Interest expense

Interest expense decreased by \$156,000 or 33.4% for the three months ended March 31, 2013 as compared with the three months ended March 31, 2012. For the six months ended March 31, 2013, interest expense decreased by \$258,000 or 27.6% as compared to the six months ended March 31, 2012. The decrease in interest expense is primarily due to the reduction of our outstanding debt and the payoff of the \$1,794,000 Farm Credit of Florida mortgage note in the first quarter of fiscal year 2013 and, to a lesser extent, to a decrease in the average interest rates quarter-over-quarter. The decrease was partially offset by the pre-payment penalty incurred on the Farm Credit of Florida mortgage note of \$66,000 which was included in interest expense for the first quarter of fiscal year 2013.

The weighted average interest rate for the three and six months ended March 31, 2013, was 2.70% and 2.72%, respectively, as compared to 2.90% and 2.93% for the three and six months ended March 31, 2012, respectively. Revenues from land rentals were \$621,000 and \$625,000 for the three months ended March 31, 2013 and 2012, respectively, a decrease of 0.7%. Gross profits increased by 18.2% for the three months ended March 31, 2013, as compared to the same period in fiscal year 2012, due to reductions in certain property taxes. Revenues from land rentals were \$1,168,000 and \$1,256,000 for the six months ended March 31, 2013 and 2012, respectively, a decrease of \$88,000 or 7.0%. Gross profits decreased by \$40,000 or 5.4% for the six months ended March 31, 2013, as compared to the same period in fiscal year 2012. The decrease in revenue and gross profit for the six months ended March 31, 2013 were due to the non-renewal of a farmland lease by one of our tenants during the first quarter of fiscal year 2013. We are currently pursuing additional leases for our improved farm land.

Other

Other operations include sod production, the sale of native plants to local landscaping companies, mining royalties and real estate. The sales of sod, native plants and mining royalties are not significant to our financial position, results of operations and cash flows.

We believe that our current cash position, revolving credit facility and the cash we expect to generate from operating activities will provide us with sufficient liquidity to satisfy our working capital requirements and capital expenditures for the foreseeable future. We have a \$60,000,000 revolving line of credit (“RLOC”) which was available for our general use at March 31, 2013. See Item 1. Financial Statement, Note 5. Long-Term Debt in the Notes to the Condensed Consolidated Financial Statements (Unaudited).

The decrease in cash and cash equivalents was primarily due to capital expenditures of \$12,973,000, paying off the principal balance of the Farm Credit of Florida (“Farm Credit”) note payable of \$1,966,000, which included a \$66,000 pre-payment penalty and the purchase of treasury shares of \$2,809,000, partially offset by cash provided from our operations.

Our credit facility with Rabobank includes a 10 year \$37,000,000 term note bearing interest at one month LIBOR plus 250 basis points, payable quarterly. Quarterly principal payments of \$500,000 are due through July 2020 with a balloon payment equal to the remaining unpaid principal and interest due in October 2020. The \$60,000,000 RLOC has a 10 year term. The interest rate spread over LIBOR is subject to an annual adjustment pursuant to a pricing grid based on our debt service coverage ratio for the immediately preceding fiscal year. The spreads may range from 225 to 275 basis points over monthly LIBOR. The rate remained at Libor plus 225 basis points at January 1, 2013, due to the favorable debt service coverage ratio in fiscal year 2012. On October 1, 2015, Rabobank may adjust the interest rate spread to any percentage. Rabobank must provide a 30 day notice of the new spreads, and we have the right to prepay the outstanding balance without penalty.

On September 6, 2012, we reached an agreement with the United States Department of Agriculture, through its administering agency, The Natural Resources Conservation Service, to sell a conservation easement on approximately 11,600 acres of property located in Hendry County, Florida for approximately \$20,700,000. We expect to recognize a

\$19,500,000 gain which will be treated as a capital gain for tax purposes and may be used against our \$48,500,000 capital loss carryforward from the sale of our Lee County, Florida properties which closed on July 25, 2012 and October 3, 2012. We expect to finalize the sale of the easement in fiscal year 2013. The easement agreement provides for the property to be enrolled in perpetuity in the Wetlands Reserve Program. The Wetlands Program is designed to restore, protect and enhance the values of the wetland and for the conservation of natural resources.

Net Cash Provided By Operating Activities

Cash provided by operating activities was \$6,942,000 for the six months ended March 31, 2013, which compared unfavorably to cash provided by operating activities of \$13,600,000 for the six months ended March 31, 2012. The change in cash provided by operating activities was due to changes in our working capital accounts, primarily accounts receivables, accounts payables and accrued expenses. Net income decreased by \$5,536,000 which was unfavorable to cash flows provided by operating activities. Due to the seasonal nature of our business, working capital requirements are typically greater in the first and fourth quarters of our fiscal year coinciding with our planting and harvest cycles. Cash flows from operating activities typically improve in our second and third fiscal quarters as we harvest our crops.

Net Cash Used In Investing Activities

Cash used in investing activities for the six months ended March 31, 2013 and 2012 was \$10,166,000 and \$5,247,000, respectively. The use of cash in investing activities is primarily due to capital expenditures. Capital expenditures were \$12,973,000 for the first six months of fiscal year 2013, which included \$4,581,000 for completing the expansion of approximately 4,000 acres into improved farmland for sugarcane, \$3,064,000 for replanting sugarcane to be harvested in fiscal year 2014, \$3,032,000 for the purchase of cattle, \$1,113,000 for citrus, and approximately \$1,183,000 for other capital expenditures. We received net cash proceeds of \$2,394,000 for the sale of properties in Lee County, Florida on October 3, 2012 and \$400,000 from certain other land sales and disposals.

Capital expenditures during the first six months of fiscal year 2012 were \$7,901,000, which included \$4,500,000 for the expansion of our sugarcane operations of which \$2,900,000 was attributable to planting an additional 5,200 acres of sugarcane to be harvested in fiscal year 2013, \$500,000 for sugarcane equipment purchases, \$1,100,000 for land improvements, \$700,000 for cattle, and \$2,700,000 for certain other capital expenditures. The use of cash in investing activities during the first six months of fiscal 2012 was partially offset by the return on investment in Magnolia for \$1,300,000.

Net Cash Used In Financing Activities

Cash used in financing activities was \$6,591,000 and \$8,921,000 for the six months ended March 31, 2013 and 2012, respectively. Cash used in financing activities for the six months ended March 31, 2013 was a result of purchasing treasury shares totaling \$2,810,000, paying off the outstanding balance of the Farm Credit note payable of \$1,900,000 and the principal payment of \$1,000,000 on our Rabobank term loan. Additionally, we paid cash for dividends of \$881,000 during the six months ended March 31, 2013. During the six months ended March 31, 2012, we used cash to make net repayments on outstanding debt of \$7,458,000, pay cash dividends of \$1,175,000 and repurchase treasury shares totaling \$288,000.

We purchased 35,221 and 73,768 shares on the open market at an average price of \$39.69 and \$38.08 during the three and six months ended March 31, 2013. We purchased 12,026 shares of our common stock in the open market at an average price of \$23.95 during the six months ended March 31, 2012. At March 31, 2013, 186,654 shares were available for acquisition in accordance with our 2008 Equity Incentive Plan.

Purchase Commitments

Alico, through its wholly owned subsidiary Alico Fruit, enters into contracts for the purchase of citrus fruit during the normal course of its business. The remaining obligations under these purchase agreements totaled approximately \$19,030,000 at March 31, 2013 for delivery in fiscal years 2013 through 2016. All of these obligations are covered by sales agreements totaling \$19,030,000. Alico's management currently believes that all committed purchase quantities

will be sold at cost or higher.
