Sidebar text: WE THINK THAT MUNICIPAL BOND INVESTMENTS LIKE YOUR NUVEEN FUND CAN BE IMPORTANT BUILDING BLOCKS IN A WELL-BALANCED PORTFOLIO.

Dear
SHAREHOLDER

I am very pleased to report that for the fiscal year ended May 31, 2004, your Nuveen Fund continued to provide you with attractive monthly tax-free income.

While tax-free income is always welcome, we know that many shareholders are beginning to wonder whether interest rates will rise significantly, and whether that possibility should cause them to adjust that portion of their investment portfolios allocated to tax-free municipal bonds. We believe this is a question you should consider carefully with the help of a trusted financial advisor. In many cases, it may be more appropriate to focus on long-term goals and objectives rather than shorter-term market movements, and this is where a professional advisor may be able to help keep you focused on the larger objectives of your investment program.

As you read through this report, please review the inside front cover and consider receiving future Fund reports and other Fund information by e-mail and the Internet. Not only will you be able to receive the information faster, but this also may help lower your Fund's expenses. Sign up is quick and easy.

Since 1898, Nuveen Investments has offered financial products and solutions that incorporate careful research, diversification and the application of conservative risk-management principles. We are grateful that you have chosen us as a partner as you pursue your financial goals. We look forward to continuing to earn your trust in the months and years ahead.

WHAT FACTORS AFFECTED THE U.S. ECONOMY AND MUNICIPAL MARKET DURING THE 12-MONTH

Edgar Filing: NUVEEN MASSACHUSETTS DIVIDEND ADVANTAGE MUNICIPAL FUND - Form N-CSR

REPORTING PERIOD ENDED MAY 31, 2004?

During this reporting period, the U.S. economy demonstrated growing evidence of improvement in such key areas as employment, capital spending and industrial production. Indeed, during the third quarter of last year, the U.S. gross domestic product grew at an annualized rate of 8.2%, more than double the second quarter's performance and the fastest annualized quarterly growth rate in nearly 20 years. Although this rapid pace was not considered sustainable, the economy continued to turn in steady performance for the rest of the 12-month reporting period, expanding by an annualized 4.1% in the fourth quarter of 2003 and an annualized 3.9% in the first three months of 2004.

Inflation also showed some signs of acceleration, driven mainly by higher energy and transportation costs, with the Consumer Price Index rising at a 5.1% rate (annualized) during the first five months of 2004. The combination of economic momentum and growing inflation concerns served as a catalyst for heightened volatility in the fixed-income markets. Although short-term interest rates remained at or near historical lows throughout this 12-month period, the long-term bond markets, including the municipal market, were increasingly driven by expectations that the Federal Reserve would move to increase interest rates and by speculation over the timing and extent of those increases. As one example, the yield on the Bond Buyer 25 Revenue Bond Index, a widely followed municipal bond index, rose from 4.83% at the beginning of the period to 5.50% by the middle of August 2003. The index yield then fell steadily over the next seven months to reach 4.73% by the middle of March 2004, before rising to 5.36% by the end of the reporting period.

In general, municipal supply nationwide remained strong over the 12-month reporting period, with \$384.8 billion in new bonds coming to market. This represented an increase of 2% over the preceding 12-month period. However, the pace of issuance slowed toward the end, with \$147.8 billion in new municipal supply during the first five months of 2004, down 6% from January-May 2003. In May 2004 alone, volume decreased 9% from one year earlier.

HOW ABOUT ECONOMIC AND MARKET CONDITIONS IN CONNECTICUT, MASSACHUSETTS AND MISSOURI?

Connecticut's economy continued its struggle toward recovery during the period, hampered by weakness in the manufacturing sector and the relatively high cost of doing business in the state. Although Connecticut's per capita income was the highest in the nation, its state government also had the highest per capita debt, which has acted to constrain growth. However, Connecticut remains economically diverse, and the job picture continued to improve, with a May 2004 unemployment rate of 4.6%, down from 5.4% in May 2003 and below the national rate of 5.6%. Current estimates call for Connecticut to end fiscal 2004 with a budget surplus of between \$50 million and \$100 million. It is expected that these funds will be deposited into the rainy day fund, which was depleted during 2003's budget crisis. In July 2003, Moody's downgraded the state's debt to Aa3 from Aa2, citing Connecticut's fiscal difficulties, high debt levels and underfunded pension plans. On the other hand, in September 2003, Standard & Poor's maintained its AA rating on the state's debt and changed its outlook to stable from negative because of the

2

corrective actions taken to address fiscal problems. During the 12-month reporting period ended May 2004, Connecticut issued \$6.4 billion in new municipal bonds, an increase of 12% over the previous 12-month period.

Like Connecticut, Massachusetts continued to grapple with a sluggish economy, budget problems and a high debt burden. While the commonwealth's manufacturing sector continued to shed jobs, overall job losses abated during this reporting period. Massachusetts seemed positioned to benefit from increased federal defense spending and emerging signs of recovery in its healthcare, education, financial services and technology sectors. As of May 2004, Massachusetts unemployment was 5.2%, down from 5.8% a year earlier. In March 2004, Moody's reconfirmed its rating of Massachusetts' debt at Aa2 with a negative outlook, citing the ongoing budgetary pressures in the commonwealth. In the same month, S&P also affirmed its rating of AA- with a stable outlook. Massachusetts new municipal bond issuance during the 12 months ended May 2004 totaled \$11.5 billion, down 15% from the previous 12 months.

Missouri's economy also remained weak, especially in terms of job creation, after a deep manufacturing-led recession over the past two years. However, the state's financial operations continued to be well managed, and debt ratios were below average. Tax revenues in fiscal 2004 increased over the prior year, and the state's budget reserve fund was expected to be fully funded by the end of the current fiscal period. Missouri continued to feature a large and industrially diverse economy, including construction, wholesale trade, transportation, communications and utilities, which positioned the state to benefit as the U.S. economy strengthens. The biotech/life sciences industry has also emerged as a potential growth driver in the state. While any rebound in manufacturing is not expected to create many jobs, the employment scenario has become more positive with the end of deep layoffs, as reflected in the May 2004 unemployment rate of 5.1%, compared with 5.8% in May 2003. Municipal new issue supply in Missouri for the 12-month period ended May 2004 was \$5.8 billion, down 9% compared with the prior 12 months. As of May 2004, Missouri's general obligation debt retained its rating of Aaa/AAA with stable outlooks from Moody's and Standard & Poor's, respectively.

IN THIS ENVIRONMENT, WHAT KEY STRATEGIES WERE USED TO MANAGE THESE FUNDS DURING THE 12 MONTHS ENDED MAY 31, 2004?

As the market continued to anticipate rising interest rates, our major focus during this reporting period remained on trying to mitigate some of the interest rate risk inherent in each Fund's portfolio. Interest rate risk is the risk that the value of a Fund's portfolio will decline if market interest rates rise (since bond prices move in the opposite direction of interest rates). Since longer-term bonds often carry more interest rate risk than intermediate-term or short-term bonds, we concentrated on finding attractive securities with defensive structures in the long- intermediate part of the yield curve (i.e., bonds that mature in 15 to 20 years). In many cases, bonds in this part of the curve offered yields similar to those of longer-term bonds with less inherent interest rate risk and greater total return potential.

The combination of tighter supply and lower yields over most of this period meant that the new issue market did not offer many uninsured bonds that we thought would perform better than those we already owned in our portfolios. At the same time, the supply of insured bonds was more plentiful, allowing us to adjust NGX's portfolio in ways that we thought would better position the Fund going forward.

When we did find attractive bonds, especially for the Connecticut and uninsured Massachusetts Funds, we sought to diversify the Funds' holdings with purchases of higher-rated general obligation bonds and other tax-backed securities. In addition, some of the Funds made purchases in the healthcare sector, where improvements in cost containment and reimbursement practices have helped the sector's long-term outlook. Some of these additions were financed through the sale of bonds with longer maturities or with proceeds from bond calls,

while in other cases we sold bonds that had become advanced refunded but were not yet called.

For NGX, our efforts during the first half of this period also focused largely on enhancing diversification as an additional way of reducing risk following the Fund's initial investing period. As part of this, we decreased our allocation of tax-backed securities, healthcare and multifamily housing, and added to our holdings in the education and water and sewer sectors. We also worked to enhance and support NGX's income stream by adding longer bonds priced near par to the Fund's portfolio.

NOM had a significant holding of AAA/U.S. Guaranteed rated bonds at the beginning of this period, and we sought more diversity by looking for lower-rated investment-grade securities. Among the higher credit quality bonds we sold were a number of prerefunded and escrowed bonds. The proceeds from these bonds were reallocated to limited tax obligation and healthcare bonds.

For additional information, see the individual Performance Overview for your

Fund in this report.

For the 12 months ended May 31, 2004, the total returns on net asset value (NAV) for all seven of the uninsured Funds in this report underperformed the return on the Lehman Brothers Municipal Bond Index. NGX, an insured Fund, trailed the Lehman Brothers Insured Municipal Bond Index. NTC, NFC and NMT outperformed the Lipper Other States peer group, while NMB and NOM performed in line with this Lipper average. NGK, NGO, and NGX underperformed the Lipper group average.

One of the primary factors affecting the 12-month performance of each of these Funds compared with that of the unleveraged Lehman index was the Funds' use of leverage. Leveraging can provide opportunities for additional income and total return for common shareholders, but it is a strategy that adds volatility to the Funds' NAVs and share prices, especially when interest rates move significantly. While each of these Funds was able to generate additional income over this period through the use of leverage, rising interest rates caused larger declines in each Fund's NAV than would have been the case had the Fund not used leverage. This had a direct and negative effect on total returns over this period.

On the positive side, the Funds' performances were helped by their holdings of lower-rated investment-grade quality bonds, which outperformed higher-rated bonds as the economy improved and investors' risk tolerance increased. For example, despite its relatively high concentration of AAA rated bonds, NOM benefited from having 3% of its portfolio in Baa2 rated bonds issued for Maryville University of St. Louis. In the other uninsured Funds, allocations of BBB rated bonds as of May 31, 2004, ranged from 14% in NFC to 13% in NMB, 10% in NGO, 9% in NTC, 8% in NGK and NMT, and 7% in NOM. Although NGX is an insured Fund, it is allowed to invest up to 20% of its portfolio in uninsured investment-grade securities. This Fund had 1% of its portfolio in BBB rated bonds as of May 31, 2004.

Several Funds also benefited from their callable bond holdings in the housing sector, especially

- 1 The Lehman Brothers Municipal Bond Index is an unleveraged, unmanaged national index comprising a broad range of investment-grade municipal bonds, while the Lehman Brothers Insured Municipal Bond Index is an unleveraged, unmanaged national index consisting of a broad range of insured municipal bonds. Results for the Lehman indexes do not reflect any expenses.
- 2 The Lipper Other States Municipal Debt Funds category average is calculated using the returns of all closed-end exchange-traded funds in this category for each period as follows: 1 year, (44 funds); 5 years, (19 funds); and 10 years, (17 funds). Fund and Lipper returns assume reinvestment of dividends.

multifamily housing. While call exposure is a factor that we generally work to reduce in order to protect the Funds' income streams, many callable bonds have reduced interest rate risk and tended to perform well late in this reporting period as interest rates rose. Other holdings making positive contributions to the Connecticut Funds' total returns during this reporting period were bonds backed by revenues from the 1998 master tobacco settlement agreement.

For NGX, its relative underperformance was due to its large holdings of bonds with long maturities and durations (see the inside back cover for a definition of leverage-adjusted duration). These bonds provided attractive income, but

their prices are more vulnerable to rises in interest rates than bonds with shorter maturities.

HOW ABOUT THE FUNDS' DIVIDENDS AND SHARE PRICES?

With short-term interest rates remaining at historically low levels during this reporting period, the leveraged structures of these eight Funds continued to support their dividend-paying capabilities. The extent of this benefit is tied in part to the short-term rates the Funds pay their MuniPreferred(R) shareholders. During periods of low short-term rates, the Funds generally pay relatively lower dividends to their MuniPreferred shareholders, which can leave more earnings to support common share dividends. During this reporting period, this strategy enabled us to implement two dividend increases in NGK and NMB, one increase in NFC and NOM, and maintain the dividends of NTC, NGO, NMT and NGX throughout the period.

All of these Funds seek to pay stable dividends at rates that reflect each Fund's past results and projected future performance. During certain periods, each Fund may pay dividends at a rate that may be more or less than the amount of net investment income actually earned by the Fund during the period. If a Fund has cumulatively earned more than it has paid in dividends, it holds the excess in reserve as undistributed net investment income (UNII) as part of the Fund's NAV. Conversely, if a Fund has cumulatively paid dividends in excess of its earnings, the excess constitutes negative UNII that is likewise reflected in the Fund's NAV. Each Fund will, over time, pay all of its net investment income as dividends to shareholders. As of May 31, 2004, all of the Funds in this report except NGX had positive UNII balances.

NMT, NMB and NOM were trading at premiums to their net asset values as of May 31, 2004. The other five Funds were trading at discounts. As of the end of the fiscal year, all eight Funds were trading at smaller premiums or greater discounts than their average premium or discount over the course of the 12-month period.

HOW WERE THE FUNDS POSITIONED IN TERMS OF CREDIT QUALITY AND BOND CALLS AS OF MAY 31, 2004?

Given the current geopolitical and economic climate, we continued to believe that maintaining strong credit quality was an important requirement. As of the end of May 2004, the seven uninsured Funds continued to offer excellent credit quality, with allocations of bonds rated AAA/U.S. guaranteed and AA ranging from 88% in both NTC and NGK to 85% in NGO, 84% in NMB, 83% in NOM, 81% in NMT and 76% in NFC. NGX, which is allowed to invest up to 20% in uninsured investment-grade quality securities, held 83% of its portfolio in insured bonds as of May 31, 2004.

As of May 31, 2004, potential call exposure for these Funds during 2004-2005 ranged from 1% in NMB, 2% in NGX, 3% in NGK and NOM, and 4% in NFC and NGO to 10% in NTC and NMT. The number of actual bond calls in all of the Funds will depend largely on market interest rates.

1. GENERAL INFORMATION AND SIGNIFICANT ACCOUNTING POLICIES

The state Funds (the "Funds") covered in this report and their corresponding Common share stock exchange symbols are Nuveen Connecticut Premium Income Municipal Fund (NTC), Nuveen Connecticut Dividend Advantage Municipal Fund (NFC), Nuveen Connecticut Dividend Advantage Municipal Fund 2 (NGK), Nuveen Connecticut Dividend Advantage Municipal Fund 3 (NGO), Nuveen Massachusetts Premium Income Municipal Fund (NMT), Nuveen Massachusetts Dividend Advantage Municipal Fund (NMB), Nuveen Insured Massachusetts Tax-Free Advantage Municipal Fund (NGX) and Nuveen Missouri Premium Income Municipal Fund (NOM). Common shares of Connecticut Premium Income (NTC) and Massachusetts Premium Income (NMT) are traded on the New York Stock Exchange while Common shares of Connecticut Dividend Advantage (NFC), Connecticut Dividend Advantage 2 (NGK), Connecticut Dividend Advantage 3 (NGO), Massachusetts Dividend Advantage (NMB), Insured Massachusetts Tax-Free Advantage (NGX) and Missouri Premium Income (NOM) are traded on the American Stock Exchange. The Funds are registered under the Investment Company Act of 1940, as amended, as closed-end management investment companies.

Prior to the commencement of operations of Connecticut Dividend Advantage 3 (NGO) and Insured Massachusetts Tax-Free Advantage (NGX), each Fund had no operations other than those related to organizational matters, the initial capital contribution of \$100,275 per Fund by Nuveen Advisory Corp. (the "Adviser"), a wholly owned subsidiary of Nuveen Investments, Inc., and the recording of the organization expenses (\$11,500 per Fund) and their reimbursement by Nuveen Investments, LLC, also a wholly owned subsidiary of Nuveen Investments, Inc.

Each Fund seeks to provide current income exempt from both regular federal and designated state income taxes, and in the case of Insured Massachusetts Tax-Free Advantage (NGX) the alternative minimum tax applicable to individuals, by investing primarily in a diversified portfolio of municipal obligations issued by state and local government authorities within a single state.

The following is a summary of significant accounting policies followed by the Funds in the preparation of their financial statements in accordance with U.S. generally accepted accounting principles.

Securities Valuation

The prices of municipal bonds in each Fund's investment portfolio are provided by a pricing service approved by the Fund's Board of Trustees. When price quotes are not readily available (which is usually the case for municipal securities), the pricing service establishes fair market value based on yields or prices of municipal bonds of comparable quality, type of issue, coupon, maturity and rating, indications of value from securities dealers, evaluations of anticipated cash flows or collateral and general market conditions. If it is determined that market prices for a security are unavailable or inappropriate, the Board of Trustees of the Funds, or its designee, may establish a fair value for the security. Temporary investments in securities that have variable rate and demand features qualifying them as short-term securities are valued at amortized cost, which approximates market value.

Securities Transactions

Securities transactions are recorded on a trade date basis. Realized gains and losses from such transactions are determined on the specific identification method. Securities purchased or sold on a when-issued or delayed delivery basis may have extended settlement periods. The securities so purchased are subject to market fluctuation during this period. The Funds have instructed the custodian to segregate assets with a current value at least equal to the amount of the when-issued and delayed delivery purchase commitments. At May 31, 2004, Massachusetts Premium Income (NMT) and Massachusetts Dividend Advantage (NMB) had outstanding when-issued purchase commitments of \$400,000 and \$200,000, respectively. There were no such outstanding purchase commitments in any of the other Funds.

Investment Income

Interest income, which includes the amortization of premiums and accretion of discounts for financial reporting purposes, is recorded on an accrual basis.

Income Taxes

Each Fund is a separate taxpayer for federal income tax purposes. Each Fund intends to comply with the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute all of its net investment income to its shareholders. Therefore, no federal income tax provision is required. Furthermore, each Fund intends to satisfy conditions which will enable interest from municipal securities, which is exempt from regular federal and designated state income taxes, and in the case of Insured Massachusetts Tax-Free Advantage (NGX) the alternative minimum tax applicable to individuals, to retain such tax-exempt status when distributed to shareholders of the Funds. All monthly tax-exempt income dividends paid during the fiscal year ended May 31, 2004, have been designated Exempt Interest Dividends.

Dividends and Distributions to Common Shareholders

Dividends from tax-exempt net investment income are declared monthly. Net realized capital gains and/or market discount from investment transactions, if any, are distributed to shareholders not less frequently than annually. Furthermore, capital gains are distributed only to the extent they exceed available capital loss carryforwards.

Distributions to Common shareholders of tax-exempt net investment income, net

realized capital gains and/or market discount, if any, are recorded on the ex-dividend date. The amount and timing of distributions are determined in accordance with federal income tax regulations, which may differ from U.S. generally accepted accounting principles.

Preferred Shares

The Funds have issued and outstanding \$25,000 stated value Preferred shares. Each Fund's Preferred shares are issued in one Series. The dividend rate on each Series may change every seven days, as set pursuant to a dutch auction process by the auction agent, and is payable at or near the end of each rate period. The number of Preferred shares outstanding for each Fund is as follows:

| | CONNECTICUT PREMIUM INCOME (NTC) | CONNECTICUT DIVIDEND ADVANTAGE (NFC) | CONNECTICUT DIVIDEND ADVANTAGE 2 (NGK) | CONNECTICUT DIVIDEND ADVANTAGE 3 (NGO) |

| Series W | -- | -- | 820 | -- |

| Series F | -- | -- | -- | -- |

Effective November 15, 2002, Connecticut Dividend Advantage 3 (NGO) issued 1,280 Series F, \$25,000 stated value Preferred shares.

Effective January 17, 2003, Insured Massachusetts Tax-Free Advantage (NGX) issued 820 Series W, \$25,000 stated value Preferred shares.

Insurance

Insured Massachusetts Tax-Free Advantage (NGX) invests at least 80% of its net assets (including net assets applicable to Preferred shares) in municipal securities that are covered by insurance. The Fund may also invest up to 20% of its net assets (including net assets applicable to Preferred shares) in municipal securities which are either (i) backed by an escrow or trust containing sufficient U.S. Government or U.S. Government agency securities, or (ii) municipal bonds that are rated, at the time of investment, within the four highest grades (Baa or BBB or better by Moody's, S&P or Fitch) or unrated but judged to be of comparable quality by the Adviser.

Each insured municipal security is covered by Original Issue Insurance, Secondary Market Insurance or Portfolio Insurance. Such insurance does not

guarantee the market value of the municipal securities or the value of the Fund's Common shares. Original Issue Insurance and Secondary Market Insurance remain in effect as long as the municipal securities covered thereby remain outstanding and the insurer remains in business, regardless of whether the Fund ultimately disposes of such municipal securities. Consequently, the market value of the municipal securities covered by Original Issue Insurance or Secondary Market Insurance may reflect value attributable to the insurance. Portfolio Insurance is effective only while the municipal securities are held by the Fund. Accordingly, neither the prices used in determining the market value of the underlying municipal securities nor the Common share net asset value of the Fund includes value, if any, attributable to the Portfolio Insurance. Each policy of the Portfolio Insurance does, however, give the Fund the right to obtain permanent insurance with respect to the municipal security covered by the Portfolio Insurance policy at the time of its sale.

Notes to
FINANCIAL STATEMENTS (continued)

Derivative Financial Instruments

The Funds may invest in certain derivative financial instruments including futures, forward, swap and option contracts, and other financial instruments with similar characteristics. Although the Funds are authorized to invest in such financial instruments, and may do so in the future, they did not make any such investments during the fiscal year ended May 31, 2004.

Custodian Fee Credit

Each Fund has an arrangement with the custodian bank whereby certain custodian fees and expenses are reduced by credits earned on each Fund's cash on deposit with the bank. Such deposit arrangements are an alternative to overnight investments.

Offering Costs

Nuveen Investments, LLC has agreed to pay all Common share offering costs (other than the sales load) that exceed \$.03 per Common share for Connecticut Dividend Advantage 3 (NGO) and Insured Massachusetts Tax-Free Advantage (NGX). Connecticut Dividend Advantage 3's (NGO) and Insured Massachusetts Tax-Free Advantage's (NGX) share of Common share offering costs (\$129,330 and \$81,000, respectively) were recorded as a reduction of the proceeds from the sale of Common shares.

Costs incurred by Connecticut Dividend Advantage 3 (NGO) and Insured Massachusetts Tax-Free Advantage (NGX) in connection with their offering of Preferred shares (\$776,084 and \$548,378, respectively) were recorded as a reduction to paid-in surplus.

Indemnifications

Under the Funds' organizational documents, its Officers and Trustees are indemnified against certain liabilities arising out of the performance of their duties to the Funds. In addition, in the normal course of business, the Funds enter into contracts that provide general indemnifications to other parties. The Funds' maximum exposure under these arrangements is unknown as this would

Edgar Filing: NUVEEN MASSACHUSETTS DIVIDEND ADVANTAGE MUNICIPAL FUND - Form N-CSR

involve future claims that may be made against the Funds that have not yet occurred.

Use of Estimates

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of increases and decreases in net assets applicable to Common shares from operations during the reporting period. Actual results may differ from those estimates.

5. MANAGEMENT FEE AND OTHER TRANSACTIONS WITH AFFILIATES

Under Connecticut Premium Income's (NTC), Massachusetts Premium Income's (NMT) and Missouri Premium Income's (NOM) investment management agreements with the Adviser, each Fund pays an annual management fee, payable monthly, at the rates set forth below, which are based upon the average daily net assets (including net assets attributable to Preferred shares) of each Fund as follows:

| AVERAGE DAILY NET ASSETS (INCLUDING NET ASSETS ATTRIBUTABLE TO PREFERRED SHARES) | MANAGEMENT FEE |
|--|----------------|
| For the first \$125 million | .6500% |
| For the next \$125 million | .6375 |
| For the next \$250 million | .6250 |
| For the next \$500 million | .6125 |
| For the next \$1 billion | .6000 |
| For the next \$3 billion | .5875 |
| For net assets over \$5 billion | .5750 |

Under Connecticut Dividend Advantage's (NFC), Connecticut Dividend Advantage 2's (NGK), Connecticut Dividend Advantage 3's (NGO), Massachusetts Dividend Advantage's (NMB) and Insured Massachusetts Tax-Free Advantage's (NGX) investment management agreements with the Adviser, each Fund pays an annual management fee, payable monthly, at the rates set forth below, which are based upon the average daily net assets (including net assets attributable to Preferred shares) of each Fund as follows:

| AVERAGE DAILY NET ASSETS (INCLUDING NET ASSETS ATTRIBUTABLE TO PREFERRED SHARES) | MANAGEMENT FEE |
|--|----------------|
| For the first \$125 million | .6500% |
| For the next \$125 million | .6375 |
| For the next \$250 million | .6250 |
| For the next \$500 million | .6125 |
| For the next \$1 billion | .6000 |
| For net assets over \$2 billion | .5750 |

The management fee compensates the Adviser for overall investment advisory and administrative services and general office facilities. The Funds pay no compensation directly to those of its Trustees who are affiliated with the

Adviser or to their officers, all of whom receive remuneration for their services to the Funds from the Adviser or its affiliates. The Board of Trustees has adopted a deferred compensation plan for independent Trustees that enables Trustees to elect to defer receipt of all or a portion of the annual compensation they are entitled to receive from certain Nuveen advised Funds. Under the plan, deferred amounts are treated as though equal dollar amounts had been invested in shares of select Nuveen advised Funds.

As approved by the Board of Trustees, a complex-wide fee schedule for all Funds managed by the Adviser and its affiliates will go into effect on August 1, 2004. The implementation of this complex-wide fee schedule is expected to result in a marginal immediate decrease in the rate at which management fees are to be paid by the Funds. As assets in the Nuveen Fund complex grow, the management fee rates to be paid by the Funds will decrease further. Under no circumstances will the complex-wide fee schedule result in an increase in the rate at which management fees would be paid by the Funds if the complex-wide fee schedule were not implemented.

Build Your Wealth
AUTOMATICALLY

Sidebar text: NUVEEN MAKES REINVESTING EASY. A PHONE CALL IS ALL IT TAKES TO SET UP YOUR REINVESTMENT ACCOUNT.

NUVEEN CLOSED-END EXCHANGE-TRADED FUNDS DIVIDEND REINVESTMENT PLAN

Your Nuveen Closed-End Exchange-Traded Fund allows you to conveniently reinvest dividends and/or capital gains distributions in additional fund shares.

By choosing to reinvest, you'll be able to invest money regularly and automatically, and watch your investment grow through the power of tax-free compounding. Just like dividends or distributions in cash, there may be times

when income or capital gains taxes may be payable on dividends or distributions that are reinvested.

It is important to note that an automatic reinvestment plan does not ensure a profit, nor does it protect you against loss in a declining market.

EASY AND CONVENIENT

To make recordkeeping easy and convenient, each month you'll receive a statement showing your total dividends and distributions, the date of investment, the shares acquired and the price per share, and the total number of shares you own.

HOW SHARES ARE PURCHASED

The shares you acquire by reinvesting will either be purchased on the open market or newly issued by the Fund. If the shares are trading at or above net asset value at the time of valuation, the Fund will issue new shares at the then-current market price. If the shares are trading at less than net asset value, shares for your account will be purchased on the open market. Dividends and distributions received to purchase shares in the open market will normally be invested shortly after the dividend payment date. No interest will be paid on dividends and distributions awaiting reinvestment. Because the market price of shares may increase before purchases are completed, the average purchase price per share may exceed the market price at the time of valuation, resulting in the acquisition of fewer shares than if the dividend or distribution had been paid in shares issued by the Fund. A pro rata portion of any applicable brokerage commissions on open market purchases will be paid by Plan participants. These commissions usually will be lower than those charged on individual transactions.

FLEXIBILITY

You may change your distribution option or withdraw from the Plan at any time, should your needs or situation change. Should you withdraw, you can receive a certificate for all whole shares credited to your reinvestment account and cash payment for fractional shares, or cash payment for all reinvestment account shares, less brokerage commissions and a \$2.50 service fee.

You can reinvest whether your shares are registered in your name, or in the name of a brokerage firm, bank, or other nominee. Ask your investment advisor if his or her firm will participate on your behalf. Participants whose shares are registered in the name of one firm may not be able to transfer the shares to another firm and continue to participate in the Plan.

The Fund reserves the right to amend or terminate the Plan at any time. Although the Fund reserves the right to amend the Plan to include a service charge payable by the participants, there is no direct service charge to participants in the Plan at this time.

For more information on the Nuveen Automatic Reinvestment Plan or to enroll in or withdraw from the Plan, speak with your financial advisor or call us at (800) 257-8787.

GLOSSARY OF TERMS USED IN THIS REPORT

Average Annual Total Return: This is a commonly used method to express an investment's performance over a particular, usually multi-year time period. It expresses the return (including change in NAV and reinvested dividends) that would have been necessary on an annual basis to equal the investment's actual performance over the time period being considered.

Average Effective Maturity: The average of all the maturities of the bonds in a fund's portfolio, computed by weighting each maturity date (the date the security comes due) by the market value of the security. This figure does not account for the likelihood of prepayments or the exercise of call provisions.

Leverage-Adjusted Duration: Duration is a measure of a bond or bond fund's sensitivity to changes in interest rates. Generally, the longer a bond or fund's duration, the more the price of the bond or fund will change as interest rates change. Leverage-adjusted duration takes into account the leveraging process for a Fund and therefore is generally longer than the duration of the actual

portfolio of individual bonds that make up the Fund.

Market Yield (also known as Dividend Yield or Current Yield): An investment's current annualized dividend divided by its current market price.

Net Asset Value (NAV): A fund's NAV is calculated by subtracting the liabilities of the fund from its total assets and then dividing the remainder by the number of shares outstanding. Fund NAVs are calculated at the end of each business day.

Taxable-Equivalent Yield: The yield necessary from a fully taxable investment to equal, on an after-tax basis, the yield of a municipal bond investment.

Each Fund intends to repurchase shares of its own common or preferred stock in the future at such times and in such amounts as is deemed advisable. No shares were repurchased during the fiscal year ended May 31, 2004. Any future repurchases will be reported to shareholders in the next annual or semiannual report.

ITEM 2. CODE OF ETHICS.

As of the end of the period covered by this report, the registrant has adopted

a code of ethics that applies to the registrant's principal executive officer, principal financial officer, principal accounting officer or controller, or persons performing similar functions. The registrant has posted such code of ethics on its website at www.nuveen.com/etf.

ITEM 3. AUDIT COMMITTEE FINANCIAL EXPERT.

During the reporting period, the registrant's board of directors determined that the registrant had at least one "audit committee financial expert" (as defined in Item 3 of Form N-CSR) serving on its Audit Committee. The registrant's audit committee financial expert for the reporting period was William E. Bennett, who was "independent" for purposes of Item 3 of Form N-CSR.

Although Mr. Bennett served as the audit committee financial expert for part of reporting period, he unexpectedly resigned from the Board effective April 30, 2004. Since that time, the Audit Committee determined that Jack B. Evans, the Chairman of the Audit Committee, qualifies as an audit committee financial expert and recommended to the full Board that he be designated as such. On July 26, 2004, the full Board voted to so designate Mr. Evans.

ITEM 4. PRINCIPAL ACCOUNTANT FEES AND SERVICES.

NUVEEN MASSACHUSETTS DIVIDEND ADVANTAGE MUNICIPAL FUND
FORM N-CSR DISCLOSURE RE: AUDIT FEES

The following table shows the amount of fees that Ernst & Young LLP, the Fund's auditor, billed to the Fund during the Fund's last two full fiscal years. For engagements with Ernst & Young LLP entered into on or after May 6, 2003, the Audit Committee approved in advance all audit services and non-audit services that Ernst & Young LLP provided to the Fund, except for those non-audit services that were subject to the pre-approval exception under Rule 2-01 of Regulation S-X (the "pre-approval exception"). The pre-approval exception for services provided directly to the Fund waives the pre-approval requirement for services other than audit, review or attest services if: (A) the aggregate amount of all such services provided constitutes no more than 5% of the total amount of revenues paid by the Fund during the fiscal year in which the services are provided; (B) the Fund did not recognize the services as non-audit services at the time of the engagement; and (C) the services are promptly brought to the Audit Committee's attention, and the Committee (or its delegate) approves the services before the audit is completed.

The Audit Committee has delegated certain pre-approval responsibilities to its Chairman (or, in his absence, any other member of the Audit Committee).

("NAC" or the "Adviser"), and any entity controlling, controlled by or under common control with NAC ("Control Affiliate") that provides ongoing services to the Fund ("Affiliated Fund Service Provider"), for engagements directly related to the Fund's operations and financial reporting, during the Fund's last two full fiscal years.

The table also shows the percentage of fees subject to the pre-approval exception. The pre-approval exception for services provided to the Adviser and any Affiliated Fund Service Provider (other than audit, review or attest services) waives the pre-approval requirement if: (A) the aggregate amount of all such services provided constitutes no more than 5% of the total amount of revenues paid to Ernst & Young LLP by the Fund, the Adviser and Affiliated Fund Service Providers during the fiscal year in which the services are provided that would have to be pre-approved by the Audit Committee; (B) the Fund did not recognize the services as non-audit services at the time of the engagement; and (C) the services are promptly brought to the Audit Committee's attention, and the Committee (or its delegate) approves the services before the Fund's audit is completed.

NON-AUDIT SERVICES

The following table shows the amount of fees that Ernst & Young LLP billed during the Fund's last two full fiscal years for non-audit services. The Audit Committee requested and received information from Ernst & Young LLP about any non-audit services that Ernst & Young LLP rendered during the Fund's last fiscal year to the Adviser and any Affiliated Fund Service Provider. The Committee considered this information in evaluating Ernst & Young LLP independence.

| FISCAL YEAR ENDED | TOTAL NON-AUDIT FEES BILLED TO FUND | TOTAL NON-AUDIT FEES BILLED TO ADVISER AND AFFILIATED FUND SERVICE PROVIDERS (ENGAGEMENTS RELATED DIRECTLY TO THE OPERATIONS AND FINANCIAL REPORTING OF THE FUND) | TOTAL NON-AUDIT FEES BILLED TO AFFILIATED FUND SERVICE PROVIDER |

In the rare event that a municipal issuer held by the Fund were to issue a proxy or that the Fund were to receive a proxy issued by a cash management security, NAC would either engage an independent third party to determine how the proxy should be voted or vote the proxy with the consent, or based on the instructions, of the Fund's Board of Directors or Trustees or its representative. In the case of a conflict of interest, the proxy would be submitted to the applicable Fund's Board to determine how the proxy should be voted. A member of the Adviser's legal department would oversee the administration of the voting, and ensure that records were maintained in accordance with Rule 204-2(c)(2) under the Investment Advisers Act of 1940 (17 CFR 275.204-2(c)(2)), reports were filed with the SEC on Form N-PX, and the results were provided to the Board of Directors or Trustees and made available to shareholders as required by applicable rules.
