On February 22, 2007, the Company completed the acquisition of EndoArt SA for approximately \$97.1 million in cash, net of cash acquired. In connection with the EndoArt SA acquisition, the Company acquired assets with a fair value of \$101.9 million and assumed liabilities of \$4.8 million.

On January 2, 2007, the Company completed the acquisition of Groupe Cornéal Laboratoires for \$215.9 million in cash, net of cash acquired. In connection with the Groupe Cornéal Laboratoires acquisition, the Company acquired assets with a fair value of \$288.6 million and assumed liabilities of \$79.4 million.

On March 23, 2006, the Company completed the acquisition of Inamed Corporation. In exchange for the common stock of Inamed Corporation, the Company issued common stock with a fair value of \$1,859.3 million and paid \$1,328.7 million in cash, net of cash acquired. In connection with the Inamed acquisition, the Company acquired assets with a fair value of \$3,813.4 million and assumed liabilities of \$522.7 million, based on a final measurement of the purchase price as of December 31, 2006.

Notes to Unaudited Condensed Consolidated Financial Statements

Note 1: Basis of Presentation

In the opinion of management, the accompanying unaudited condensed consolidated financial statements contain all adjustments necessary (consisting only of normal recurring accruals) to present fairly the financial information contained therein. These statements do not include all disclosures required by accounting principles generally accepted in the United States of America (GAAP) for annual periods and should be read in conjunction with the Company's audited consolidated financial statements and related notes for the year ended December 31, 2006. The Company prepared the condensed consolidated financial statements following the requirements of the Securities and Exchange Commission for interim reporting. As permitted under those rules, certain footnotes or other financial information that are normally required by GAAP can be condensed or omitted. The results of operations for the three and six month periods ended June 29, 2007 are not necessarily indicative of the results to be expected for the year ending December 31, 2007 or any other period(s).

Reclassifications

Certain reclassifications of prior year amounts have been made to conform with the current year presentation. Beginning with the second fiscal quarter of 2006, the Company reports amortization of acquired intangible assets on a separate line in its statements of operations. Previously, amortization of intangible assets was reported in cost of sales, selling, general and administrative expenses, and research and development (R&D) expenses. Intangible asset amortization for the six month period ended June 30, 2006 includes a total reclassification of \$5.1 million, representing the reclassification of \$4.3 million, \$0.1 million and \$0.7 million from cost of sales, selling, general and administrative expenses, and research and development expenses, respectively, previously reported for the three month period ended March 31, 2006.

Common Stock Split

On June 22, 2007, the Company completed a two-for-one stock split of its common stock. The stock split was structured in the form of a 100% stock dividend and was paid to stockholders of record on June 11, 2007.

All share and per share data (except par value) have been adjusted to reflect the effect of the stock split for all periods presented.

Recently Adopted Accounting Standards

In September 2006, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standards No. 158, *Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans* (SFAS No. 158). SFAS No. 158 requires the recognition of the over-funded or under-funded status of a defined benefit pension and other postretirement plan as an asset or liability in the balance sheet, the recognition of changes in that funded status through other comprehensive income in the year in which the changes occur, and the measurement of a plan's assets and obligations that determine its funded status as of the end of the employer's fiscal year. The Company adopted the balance sheet recognition and reporting provisions of SFAS No. 158 during the fourth fiscal quarter of 2006. The Company currently expects to adopt in the fourth fiscal quarter of 2008 the provisions of SFAS No. 158 relating to the change in measurement date, which is not expected to have a material impact on the Company's consolidated financial statements.

In June 2006, the FASB issued FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes - An Interpretation of FASB Statement No. 109* (FIN 48), which prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. Historically, the Company's policy has been to account for uncertainty in income taxes in accordance with the provisions of Statement of Financial Accounting Standards No. 5, *Accounting for Contingencies*, which considered whether the tax benefit from an uncertain tax position was probable of being sustained. Under FIN 48,

Table of Contents

Allergan, Inc.

Notes to Unaudited Condensed Consolidated Financial Statements (Continued)

the tax benefit from uncertain tax positions may be recognized only if it is more likely than not that the tax position will be sustained, based solely on its technical merits, with the taxing authority having full knowledge of all relevant information. After initial adoption of FIN 48, deferred tax assets and liabilities for temporary differences between the financial reporting basis and the tax basis of the Company's assets and liabilities along with net operating loss and tax credit carryovers are recognized only for tax positions that meet the more likely than not recognition criteria. Additionally, recognition and derecognition of tax benefits from uncertain tax positions are recorded as discrete tax adjustments in the first interim period that the more likely than not threshold is met. The Company adopted FIN 48 as of the beginning of the first quarter of 2007, which resulted in an increase to total income taxes payable of \$2.8 million and interest payable of \$0.5 million and a decrease to total deferred tax assets of \$1.0 million and beginning retained earnings of \$4.3 million. In addition, the Company reclassified \$27.0 million of net unrecognized tax benefit liabilities from current to non-current liabilities.

In February 2006, the FASB issued Statement of Financial Accounting Standards No. 155, *Accounting for Certain Hybrid Financial Instruments* – an amendment of FASB Statements No. 133 and 140 (SFAS No. 155). SFAS No. 155 permits an entity to measure at fair value any financial instrument that contains an embedded derivative that otherwise would require bifurcation. This statement is effective for all financial instruments acquired, issued, or subject to a remeasurement event occurring after an entity's first fiscal year that begins after September 15, 2006. The Company adopted the provisions of SFAS No. 155 in the first fiscal quarter of 2007. The adoption did not have a material effect on the Company's consolidated financial statements.

New Accounting Standards Not Yet Adopted

In June 2007, the FASB ratified the consensus reached by the Emerging Issues Task Force (EITF) in EITF Issue No. 07-3, *Accounting for Nonrefundable Advance Payments for Goods or Services Received for Use in Future Research and Development Activities* (EITF 07-3), which requires that nonrefundable advance payments for goods or services that will be used or rendered for future research and development activities be deferred and amortized over the period that the goods are delivered or the related services are performed, subject to an assessment of recoverability. EITF 07-3 will be effective for fiscal years beginning after December 15, 2007, which will be the Company's fiscal year 2008. The Company does not expect that the adoption of EITF 07-3 will have a material impact on the Company's consolidated financial statements.

In June 2007, the FASB ratified the consensus reached by the EITF in EITF Issue No. 06-11, *Accounting for Income Tax Benefits of Dividends on Share-Based Payment Awards* (EITF 06-11), which requires that the income tax benefits of dividends or dividend equivalents on unvested share-based payments be recognized as an increase in additional paid-in capital and reclassified from additional paid-in capital to the income statement when the related award is forfeited (or is no longer expected to vest). The reclassification is limited to the amount of the entity's pool of excess tax benefits available to absorb tax deficiencies on the date of the reclassification. EITF 06-11 will be effective for fiscal years beginning after December 15, 2007, which will be the Company's fiscal year 2008. The Company does not expect that the adoption of EITF 06-11 will have a material impact on the Company's consolidated financial statements.

In February 2007, the FASB issued Statement of Financial Accounting Standards No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities* (SFAS No. 159), which allows an entity to voluntarily choose to measure certain financial assets and liabilities at fair value. SFAS No. 159 will be effective for fiscal years beginning after November 15, 2007, which will be the Company's fiscal year 2008. The Company has not yet evaluated the potential impact of adopting SFAS No. 159 on the Company's consolidated financial statements.

In September 2006, the FASB issued Statement of Financial Accounting Standards No. 157, *Fair Value Measurements* (SFAS No. 157), which defines fair value, establishes a framework for measuring fair value under GAAP, and expands disclosures about fair value measurements. SFAS No. 157 will be effective for fiscal years beginning after November 15, 2007, which will be the Company's fiscal year 2008. The Company has not yet evaluated the potential impact of adopting SFAS No. 157 on the Company's consolidated financial statements.

Table of Contents

Allergan, Inc.

Notes to Unaudited Condensed Consolidated Financial Statements (Continued)

Note 2: Acquisitions***Cornéal Acquisition***

On January 2, 2007, the Company purchased all of the outstanding common stock of Groupe Cornéal Laboratoires (Cornéal), a privately held healthcare company that develops, manufactures and markets dermal fillers, viscoelastics and a range of ophthalmic products, for an aggregate purchase price of approximately \$209.2 million, net of \$2.3 million effectively paid in connection with the settlement of a pre-existing unfavorable distribution agreement. The Company recorded the \$2.3 million charge at the acquisition date to effectively settle a pre-existing unfavorable distribution agreement between Cornéal and one of the Company's subsidiaries primarily related to distribution rights for *Juvéderm* in the United States. Prior to the acquisition, the Company also had a \$4.4 million payable to Cornéal for products purchased under the distribution agreement, which was effectively settled upon the acquisition. As a result of the acquisition, the Company obtained the technology, manufacturing process and worldwide distribution rights for *Juvéderm*, *Surgiderm* and certain other hyaluronic acid-based dermal fillers. The acquisition was funded from the Company's cash and equivalents balances and its committed long-term credit facility.

The following table summarizes the components of the Cornéal purchase price:

	(in millions)
Cash consideration, net of cash acquired	\$ 212.0
Transaction costs	3.9
Cash paid	215.9
Less relief from a previously existing third-party payable	(4.4)
Less settlement of a pre-existing distribution agreement	(2.3)
	\$ 209.2

Purchase Price Allocation

The Cornéal purchase price was allocated to tangible and intangible assets acquired and liabilities assumed based upon their estimated fair values at the acquisition date. The excess of the purchase price over the fair value of net assets acquired was allocated to goodwill. The goodwill acquired in the Cornéal acquisition is not deductible for tax purposes.

The Company believes the fair values assigned to the Cornéal assets acquired and liabilities assumed were based upon reasonable assumptions. The following table summarizes the estimated fair values of the net assets acquired:

	(in millions)
Current assets	\$ 40.0
Property, plant and equipment	19.8
Identifiable intangible assets	115.7
Goodwill	111.6
Other non-current assets	1.5
Accounts payable and accrued liabilities	(19.3)
Current portion of long-term debt	(11.6)
Deferred tax liabilities - non-current	(45.9)
Other non-current liabilities	(2.6)
	\$ 209.2

The Company's fair value estimates for the Cornéal purchase price allocation may change during the allowable allocation period, which is up to one year from the acquisition date, if additional information becomes available.

In-process Research and Development

In conjunction with the Cornéal acquisition, the Company determined that the research and development efforts related to Cornéal products did not give rise to identifiable in-process research and development assets with anticipated future economic value that could be reasonably estimated.

Table of Contents

Allergan, Inc.

Notes to Unaudited Condensed Consolidated Financial Statements (Continued)

Identifiable Intangible Assets

Acquired identified intangible assets include product rights for approved indications of currently marketed products, core technology and trademarks. The amount assigned to each class of intangible assets and the related weighted-average amortization periods are summarized in the following table:

	Value of Intangible Assets Acquired (in millions)	Weighted-average Amortization Period
Developed technology	\$ 72.4	8.3 years
Core technology	39.4	13.0 years
Trademarks	3.9	9.5 years
	\$ 115.7	

Acquired developed technology assets primarily consist of the following currently marketed Cornéal products:

	Value of Intangible Assets Acquired (in millions)
<i>Juvéderm</i> worldwide	\$ 56.1
<i>Surgiderm</i> [®] worldwide	13.1
Other	3.2
	\$ 72.4

Impairment evaluations in the future for acquired developed technology will occur at a consolidated cash flow level within the Company's medical devices segment, with valuation analysis and related potential impairment actions segregated among the United States, the European Union, Canada, Australia, and the rest of the world, which were the markets used to originally value the intangible assets.

The Company determined that the Cornéal assets acquired included proprietary technology which has alternative future use in the development of aesthetics products. These assets were separately valued and capitalized as core technology. Trademarks acquired are primarily related to *Juvéderm* and *Surgiderm*.

Goodwill

Goodwill represents the excess of the Cornéal purchase price over the sum of the amounts assigned to assets acquired less liabilities assumed. The Company believes that the Cornéal acquisition will produce the following significant benefits:

Control over the Manufacturing Process and Future Development. The acquisition will allow the Company to control product quality and availability and to gain additional expertise and intellectual property to further develop the next generation of dermal fillers.

Expanded Distribution Rights. The Company has expanded its exclusive distribution rights for *Juvéderm* from the United States, Canada and Australia to all countries worldwide.

Enhanced Product Mix. The complementary nature of the Company's facial aesthetics products with those of Corneal should benefit current customers of both companies.

Operating Efficiencies. The combination of the Company and Corneal provides the opportunity for product cost savings due to manufacturing efficiencies.

The Company believes that these primary factors support the amount of goodwill recognized as a result of the purchase price paid for Corneal in relation to other acquired tangible and intangible assets.

Effective July 2, 2007, the Company completed the sale of the ophthalmic surgical devices business that it acquired as a part of the Corneal acquisition in January 2007.

Table of Contents

Allergan, Inc.

Notes to Unaudited Condensed Consolidated Financial Statements (Continued)

EndoArt SA Acquisition

On February 22, 2007, the Company completed the acquisition of EndoArt SA (EndoArt), a provider of telemetrically-controlled (or remote-controlled) implants used in the treatment of morbid obesity and other conditions. Under the terms of the purchase agreement, the Company acquired all of the outstanding capital stock of EndoArt for an aggregate purchase price of approximately \$97.1 million, net of cash acquired. The acquisition consideration was all cash, funded from the Company's cash and equivalents balances.

The following table summarizes the components of the EndoArt purchase price:

	(in millions)
Cash consideration, net of cash acquired	\$ 96.6
Transaction costs	0.5
	\$ 97.1

Purchase Price Allocation

The EndoArt purchase price was allocated to tangible and intangible assets acquired and liabilities assumed based on their estimated fair values at the acquisition date. The excess of the purchase price over the fair value of net assets acquired was allocated to goodwill. The goodwill acquired in the EndoArt acquisition is not deductible for tax purposes.

The Company believes the fair values assigned to the EndoArt assets acquired and liabilities assumed were based on reasonable assumptions. The following table summarizes the estimated fair values of net assets acquired:

	(in millions)
Current assets	\$ 0.8
Property, plant and equipment	0.7
Identifiable intangible assets	17.6
In-process research and development	72.0
Goodwill	10.8
Accounts payable and accrued liabilities	(0.8)
Deferred tax liabilities	(4.0)
	\$ 97.1

The Company's fair value estimates for the EndoArt purchase price allocation may change during the allowable allocation period, which is up to one year from the acquisition date, if additional information becomes available.

In-process Research and Development

In conjunction with the EndoArt acquisition, the Company recorded an in-process research and development expense of \$72.0 million related to EndoArt's *EASYBAND*[®] Remote Adjustable Gastric Band System in the United States, which had not received approval by the U.S. Food and Drug Administration (FDA) as of the EndoArt acquisition date of February 22, 2007 and had no alternative future use.

As of the EndoArt acquisition date, the *EASYBAND*[®] Remote Adjustable Gastric Band System was expected to be approved by the FDA in 2011. Additional research and development expenses needed prior to expected FDA approval are expected to range from \$20 million to \$25 million. This range represents management's best estimate as to the additional R&D expenses required to obtain FDA approval to market the product in the United States. Remaining efforts will be focused on completing discussions with the FDA regarding study design and performing a future clinical trial to pursue a premarket approval in the United States.

The estimated fair value of the in-process research and development assets was determined based on the use of a discounted cash flow model using an income approach for the acquired technologies. Estimated revenues were probability adjusted to take into account the stage of completion and the risks surrounding successful development and commercialization. The estimated after-tax cash flows were then discounted to a present value using a discount rate of 28%. At the time of the EndoArt acquisition, material net cash inflows were estimated to begin in 2011.

Table of Contents

Allergan, Inc.

Notes to Unaudited Condensed Consolidated Financial Statements (Continued)

The major risks and uncertainties associated with the timely and successful completion of the acquired in-process projects consist of the ability to confirm the safety and efficacy of the technology based on the data from clinical trials and obtaining necessary regulatory approvals. No assurance can be given that the underlying assumptions used to forecast cash flows or the timely and successful completion of the projects will materialize as estimated. For these reasons, among others, actual results may vary significantly from estimated results.

Identifiable Intangible Assets

Acquired identifiable intangible assets include product rights for approved indications of currently marketed products and core technology. The amounts assigned to each class of intangible assets and the related weighted average amortization periods are summarized in the following table:

	Value of Intangible Assets	Weighted-average Amortization Period
	Acquired (in millions)	Period
Developed technology	\$ 12.3	11.8 years
Core technology	5.3	15.8 years
Total	\$ 17.6	

The acquired developed technology asset represents the *EASYBAND*[®] Remote Adjustable Gastric Band System, which has been approved in Europe and is pending approval in Australia. The Company determined that there are no substantive risks remaining in order to obtain approval in Australia.

Impairment evaluations in the future for acquired developed technology will occur at a consolidated cash flow level within the Company's medical devices segment, with valuation analysis and related potential impairment actions segregated between two markets, Europe and Australia, which were used to originally value the intangible assets.

The Company determined that the EndoArt assets acquired included proprietary technology which has alternative future use in the development of remote adjustable gastric band products. The major risks and uncertainties associated with the core technology consist of the Company's ability to successfully utilize the technology in future research projects.

Goodwill

Goodwill represents the excess of the EndoArt purchase price over the sum of the amounts assigned to assets acquired less liabilities assumed. The Company believes that the acquisition of EndoArt will produce the following significant benefits:

Increased Market Presence and Opportunities. The acquisition of EndoArt should increase the Company's market presence and opportunities for growth in sales, earnings and stockholder returns.

Enhanced Product Mix. The complementary nature of the Company's obesity intervention products with those of EndoArt should benefit the Company's current target group of patients and customers and provide the Company with the ability to access new patients and physician customers.

The Company believes that these primary factors support the amount of goodwill recognized as a result of the purchase price paid for EndoArt, in relation to other acquired tangible and intangible assets, including in-process research and development.

The Company does not consider the acquisitions of Cornéal or EndoArt to be material business combinations, either individually or in the aggregate. Accordingly, the Company has not provided any supplemental *pro forma* operating results, which would not be materially different from historical financial statements.

Table of Contents

Allergan, Inc.

Notes to Unaudited Condensed Consolidated Financial Statements (Continued)

Inamed Acquisition

On March 23, 2006, the Company completed the acquisition of Inamed Corporation, a global healthcare company that develops, manufactures and markets a diverse line of products, including breast implants, a range of facial aesthetics and obesity intervention products, for approximately \$3.3 billion, consisting of approximately \$1.4 billion in cash and 34,883,386 shares of the Company's common stock.

In connection with the Inamed acquisition, the Company recorded a total in-process research and development expense of \$579.3 million in 2006 for acquired in-process research and development assets that the Company determined were not yet complete and had no alternative future uses in their current state. The Company recorded a \$562.8 million expense for in-process research and development during the first fiscal quarter of 2006 and an additional charge of \$16.5 million during the second fiscal quarter of 2006. The acquired in-process research and development assets are composed of Inamed's silicone breast implant technology for use in the United States, Inamed's *Juvéderm* dermal filler technology for use in the United States, and Inamed's *BIB BioEnterics* IntraGastric Balloon technology for use in the United States, which were valued at \$405.8 million, \$41.2 million and \$132.3 million, respectively. All of these assets had not received approval by the FDA as of the Inamed acquisition date of March 23, 2006. Because the in-process research and development assets had no alternative future use, they were charged to expense on the Inamed acquisition date.

Unaudited *pro forma* operating results for the Company, assuming the Inamed acquisition occurred on January 1, 2006 and excluding any *pro forma* charges for in-process research and development, inventory fair value adjustments and Inamed share-based compensation expense in 2006 and transaction costs are as follows:

(in millions, except per share amounts)	Three months ended June 30, 2006	Six months ended June 30, 2006
Product net sales	\$ 787.0	\$ 1,501.6
Total revenues	\$ 801.7	\$ 1,526.8
Net earnings	\$ 108.0	\$ 211.3
Basic earnings per share	\$ 0.36	\$ 0.70
Diluted earnings per share	\$ 0.35	\$ 0.69

The *pro forma* information is not necessarily indicative of the actual results that would have been achieved had the acquisition occurred as of January 1, 2006, or the results that may be achieved in the future.

Note 3: Restructuring Charges, Integration Costs, and Transition and Duplicate Operating Expenses**Restructuring and Integration of Cornéal Operations**

In connection with the January 2007 Cornéal acquisition, the Company initiated a restructuring and integration plan to merge the Cornéal facial aesthetics business operations with the Company's operations. Specifically, the restructuring and integration activities involve moving key business functions to Company locations, integrating Cornéal's distributor operations with the Company's existing distribution network and integrating Cornéal's information systems with the Company's information systems. The Company currently estimates that the total pre-tax charges resulting from the restructuring and integration of the Cornéal facial aesthetics business operations will be between \$28.0 million and \$34.0 million, consisting primarily of contract termination costs, salaries, travel and consulting costs, all of which are expected to be cash expenditures.

The foregoing estimates are based on assumptions relating to, among other things, a reduction of approximately 26 positions, principally general and administrative positions at Cornéal locations. Charges associated with the workforce reduction, including severance, relocation and one-time termination benefits, and payments to public employment and training programs, are currently expected to total approximately \$3.0 million to \$5.0 million. Estimated charges include estimates for contract termination costs, including the termination of duplicative distribution arrangements. Contract termination costs are expected to total approximately \$16.0 million to \$20.0 million.

Table of Contents

Allergan, Inc.

Notes to Unaudited Condensed Consolidated Financial Statements (Continued)

The Company began to record costs associated with the restructuring and integration of the Cornéal facial aesthetics business in the first quarter of 2007 and expects to continue to incur costs up through and including the second quarter of 2008. During the three and six month periods ended June 29, 2007, the Company recorded pre-tax restructuring charges of \$2.0 million associated with the termination of duplicative distribution arrangements. During the three and six month periods ended June 29, 2007, the Company recorded pre-tax integration and transition costs of \$2.1 million and \$5.6 million, respectively, as selling, general and administrative expenses.

Restructuring and Integration of Inamed Operations

In connection with the March 2006 Inamed acquisition, the Company initiated a global restructuring and integration plan to merge Inamed's operations with the Company's operations and to capture synergies through the centralization of certain general and administrative and commercial functions. Specifically, the restructuring and integration activities involve eliminating certain general and administrative positions, moving key commercial Inamed business functions to the Company's locations around the world, integrating Inamed's distributor operations with the Company's existing distribution network and integrating Inamed's information systems with the Company's information systems.

The Company has incurred, and anticipates that it will continue to incur, charges relating to severance, relocation and one-time termination benefits, payments to public employment and training programs, integration and transition costs, and contract termination costs in connection with the Inamed restructuring. The Company currently estimates that the total pre-tax charges resulting from the restructuring, including integration and transition costs, will be between \$50.0 million and \$61.0 million, all of which are expected to be cash expenditures. In addition to the pre-tax charges, the Company expects to incur capital expenditures of approximately \$20.0 million to \$25.0 million, primarily related to the integration of information systems. The Company also expects to pay an additional amount of approximately \$1.5 million to \$2.0 million for taxes related to intercompany transfers of trade businesses and net assets.

The foregoing estimates are based on assumptions relating to, among other things, a reduction of approximately 60 positions, principally general and administrative positions at Inamed locations. These workforce reduction activities began in the second quarter of 2006 and are expected to be substantially completed by the end of 2007. Charges associated with the workforce reduction, including severance, relocation and one-time termination benefits, and payments to public employment and training programs, are currently expected to total approximately \$11.0 million to \$13.0 million. Estimated charges include estimates for contract and lease termination costs, including the termination of duplicative distribution arrangements. Contract and lease termination costs are expected to total approximately \$13.0 million to \$17.0 million. The Company began to record these costs in the second quarter of 2006 and expects to continue to incur them up through and including the fourth quarter of 2007.

On January 30, 2007, the Company's Board of Directors approved an additional plan to restructure and eventually sell or close the collagen manufacturing facility in Fremont, California that the Company acquired in the Inamed acquisition. This plan is the result of a reduction in anticipated future market demand for human and bovine collagen products. In connection with the restructuring and eventual sale or closure of the collagen manufacturing facility, the Company estimates that total pre-tax charges for severance, lease termination and contract settlement costs will be between \$6.0 million and \$8.0 million, all of which are expected to be cash expenditures. The foregoing estimates are based on assumptions relating to, among other things, a reduction of approximately 69 positions, consisting principally of manufacturing positions at the facility, that are expected to result in estimated total employee severance costs of approximately \$1.5 million to \$2.0 million. Estimated charges for contract and lease termination costs are expected to total approximately \$4.5 million to \$6.0 million. The Company began to record these costs in the first quarter of 2007 and expects to continue to incur them up through and including the fourth quarter of 2008. Prior to any closure or sale of the collagen manufacturing facility, the Company intends to manufacture a sufficient quantity of inventories of collagen products to meet estimated market demand through 2010.

As of June 29, 2007, the Company has recorded cumulative pre-tax restructuring charges of \$23.7 million, cumulative pre-tax integration and transition costs of \$24.3 million, and \$1.6 million for income tax costs related to

intercompany transfers of trade businesses and net assets. The restructuring charges primarily consist of employee severance, one-time termination benefits, employee relocation, termination of duplicative distributor agreements and

Table of Contents

Allergan, Inc.

Notes to Unaudited Condensed Consolidated Financial Statements (Continued)

other costs related to the restructuring of the Inamed operations. The integration and transition costs primarily consist of salaries, travel, communications, recruitment and consulting costs. During the three and six month periods ended June 29, 2007, the Company recorded \$7.1 million and \$10.2 million, respectively, of restructuring charges. Integration and transition costs included in selling, general and administrative expenses were \$1.7 million and \$3.6 million for the three and six month periods ended June 29, 2007, respectively.

During the three and six month periods ended June 30, 2006, the Company recorded pre-tax restructuring charges of \$1.7 million related to the restructuring of the Inamed operations. For the three month period ended June 30, 2006, the Company recorded \$5.3 million of integration and transition costs associated with the Inamed integration, consisting of \$0.4 million in cost of sales, \$4.7 million in selling, general and administrative expenses and \$0.2 million in research and development expenses. For the six month period ended June 30, 2006, the Company recorded \$10.4 million of integration and transition costs associated with the Inamed integration, consisting of \$0.5 million in cost of sales, \$9.7 million in selling, general and administrative expenses and \$0.2 million in research and development expenses.

The following table presents the cumulative restructuring activities related to the Inamed operations through June 29, 2007:

	Employee Severance	Contract and Lease Termination Costs (in millions)	Total
Net charge during 2006	\$ 6.1	\$ 7.4	\$ 13.5
Spending	(2.1)	(2.5)	(4.6)
Balance at December 31, 2006	4.0	4.9	8.9
Net charge during the six month period ended June 29, 2007	4.6	5.6	10.2
Spending	(3.1)	(8.3)	(11.4)
Balance at June 29, 2007 (included in Other accrued expenses)	\$ 5.5	\$ 2.2	\$ 7.7

Restructuring and Streamlining of European Operations

Effective January 2005, the Company's Board of Directors approved the initiation and implementation of a restructuring of certain activities related to the Company's European operations to optimize operations, improve resource allocation and create a scalable, lower cost and more efficient operating model for the Company's European research and development and commercial activities. Specifically, the restructuring involved moving key European research and development and select commercial functions from the Company's Mougins, France and other European locations to the Company's Irvine, California, Marlow, United Kingdom and Dublin, Ireland facilities and streamlining functions in the Company's European management services group. The workforce reduction began in the first quarter of 2005 and was substantially completed by the close of the second quarter of 2006.

As of December 31, 2006, the Company substantially completed all activities related to the restructuring and streamlining of its European operations. As of December 31, 2006, the Company recorded cumulative pre-tax restructuring charges of \$37.5 million, primarily related to severance, relocation and one-time termination benefits, payments to public employment and training programs, contract termination costs and capital and other asset-related expenses. During the second quarter and first six months of 2007, the Company recorded an additional \$1.0 million of restructuring charges for an abandoned leased facility related to its European operations. During the three and six month periods ended June 30, 2006, the Company recorded \$3.2 million and \$6.1 million, respectively, of restructuring charges related to its European operations. As of June 29, 2007, remaining accrued expenses of

\$6.9 million for restructuring charges related to the restructuring and streamlining of the Company's European operations are included in Other accrued expenses and Other liabilities in the amount of \$3.2 million and \$3.7 million, respectively.

Additionally, as of December 31, 2006, the Company has incurred cumulative transition and duplicate operating expenses of \$11.8 million relating primarily to legal, consulting, recruiting, information system implementation costs and taxes in connection with the European restructuring activities. For the three month period ended June 30, 2006, the Company recorded \$0.6 million of transition and duplicate operating expenses, consisting of \$0.4 million in selling, general and administrative expenses and \$0.2 million in research and development expenses. For the six

Table of Contents

Allergan, Inc.

Notes to Unaudited Condensed Consolidated Financial Statements (Continued)

month period ended June 30, 2006, the Company recorded \$2.5 million of transition and duplicate operating expenses, consisting of \$2.1 million in selling, general and administrative expenses and \$0.4 million in research and development expenses. Additionally, during the six month period ended June 30, 2006, the Company recorded a \$3.4 million loss related to the sale of its Mougins, France facility, which was included in selling, general and administrative expenses. There were no transition and duplicate operating expenses related to the restructuring and streamlining of the Company's European operations recorded in the first six months of 2007.

Other Restructuring Activities

Included in the first six months of 2007 are \$0.1 million in restructuring charges related to the Company's February 2007 EndoArt acquisition. Included in the second quarter and first six months of 2006 are \$0.8 million and \$1.1 million, respectively, of restructuring charges related to the scheduled June 2005 termination of the Company's manufacturing and supply agreement with Advanced Medical Optics, which the Company spun-off in June 2002. Also included in the first six months of 2006 is a \$0.4 million restructuring charge reversal related to the streamlining of the Company's operations in Japan.

Note 4: Intangibles and Goodwill

At June 29, 2007 and December 31, 2006, the components of amortizable and unamortizable intangibles and goodwill and certain other related information were as follows:

Intangibles

	June 29, 2007			December 31, 2006		
	Gross Amount (in millions)	Accumulated Amortization (in millions)	Weighted Average Amortization Period (in years)	Gross Amount (in millions)	Accumulated Amortization (in millions)	Weighted Average Amortization Period (in years)
Amortizable Intangible Assets:						
Developed technology	\$ 883.0	\$ (72.3)	14.8	\$ 796.4	\$ (39.9)	15.4
Customer relationships	42.3	(17.2)	3.1	42.3	(10.3)	3.1
Licensing	154.5	(53.8)	8.0	149.4	(44.2)	8.0
Trademarks	27.8	(8.3)	7.0	23.5	(5.7)	6.5
Core technology	188.4	(17.5)	15.2	142.6	(11.4)	15.8
	1,296.0	(169.1)	13.5	1,154.2	(111.5)	13.9
Unamortizable Intangible Assets:						
Business licenses	0.9			0.9		
	\$1,296.9	\$ (169.1)		\$1,155.1	\$ (111.5)	

Developed technology consists primarily of current product offerings, primarily saline and silicone breast implants, obesity intervention products and dermal fillers acquired in connection with the Inamed, Cornéal and EndoArt acquisitions. Customer relationship assets consist of the estimated value of relationships with customers acquired in connection with the Inamed acquisition, primarily in the breast implant market in the United States. Licensing assets consist primarily of capitalized payments to third party licensors related to the achievement of regulatory approvals to commercialize products in specified markets and up-front payments associated with royalty obligations for products that have achieved regulatory approval for marketing. Core technology consists of proprietary technology associated

with silicone breast implants and intragastric balloon systems acquired in connection with the Inamed acquisition, dermal filler technology acquired in connection with the Cornéal acquisition, gastric band technology acquired in connection with the EndoArt acquisition, and a drug delivery technology acquired in connection with the Company's 2003 acquisition of Oculex Pharmaceuticals, Inc. The increase in developed technology, trademarks and core technology at June 29, 2007 compared to December 31, 2006 is primarily due to the Cornéal and EndoArt acquisitions. The increase in licensing assets is primarily due to a milestone payment incurred in 2007 related to expected annual *Restasis*[®] net sales.

Table of Contents

Allergan, Inc.

Notes to Unaudited Condensed Consolidated Financial Statements (Continued)

The following table provides amortization expense by major categories of acquired amortizable intangible assets for the three and six month periods ended June 29, 2007 and June 30, 2006, respectively:

	Three months ended		Six months ended	
	June 29, 2007	June 30, 2006	June 29, 2007	June 30, 2006
	(in millions)		(in millions)	
Developed technology	\$16.4	\$13.3	\$32.4	\$13.3
Customer relationships	3.4	3.4	6.8	3.4
Licensing	4.9	4.7	9.7	9.2
Trademarks	1.2	1.1	2.4	1.2
Core technology	3.1	2.3	6.1	2.8
	\$29.0	\$24.8	\$57.4	\$29.9

Amortization expense related to acquired intangible assets generally benefits multiple business functions within the Company, such as the Company's ability to sell, manufacture, research, market and distribute products, compounds and intellectual property. The amount of amortization expense excluded from cost of sales consists primarily of amounts amortized with respect to developed technology and licensing intangible assets.

Estimated amortization expense is \$114.8 million for 2007, \$113.2 million for 2008, \$103.2 million for 2009, \$98.8 million for 2010 and \$92.4 million for 2011.

Goodwill

	June 29, 2007	December 31, 2006
	(in millions)	
Specialty Pharmaceuticals	\$ 9.8	\$ 9.4
Medical Devices	1,945.3	1,824.2
	\$1,955.1	\$1,833.6

Goodwill related to the Inamed, Cornéal and EndoArt acquisitions are reflected in the Medical Devices balance above.

Note 5: Inventories

Components of inventories were:

	June 29, 2007	December 31, 2006
	(in millions)	
Finished products	\$119.6	\$107.1
Work in process	35.9	31.2
Raw materials	46.7	30.2
Total	\$202.2	\$168.5

At June 29, 2007, approximately \$11.2 million of Allergan's finished goods medical device inventories, primarily breast implants, were held on consignment at a large number of doctors' offices, clinics, and hospitals worldwide. The value and quantity at any one location is not significant.

Note 6: Income Taxes

The provision for income taxes is determined using an estimated annual effective tax rate, which is generally less than the U.S. federal statutory rate, primarily because of lower tax rates in certain non-U.S. jurisdictions, research and development tax credits available in the United States and other jurisdictions, and deductions available in the United States for domestic production activities. The Company's effective tax rate may be subject to fluctuations during the year as new information is obtained, which may affect the assumptions management uses to estimate the annual effective tax rate, including factors such as the Company's mix of pre-tax earnings in the various tax jurisdictions in which it operates, valuation allowances against deferred tax assets, the recognition or derecognition

Table of Contents

Allergan, Inc.

Notes to Unaudited Condensed Consolidated Financial Statements (Continued)

of tax benefits related to uncertain tax positions, utilization of research and development tax credits and changes in or the interpretation of tax laws in jurisdictions where the Company conducts operations. The Company recognizes interest on income taxes payable as interest expense and penalties related to income taxes payable as income tax expense in its consolidated statements of operations. The Company recognizes deferred tax assets and liabilities for temporary differences between the financial reporting basis and the tax basis of its assets and liabilities along with net operating loss and credit carryforwards. The Company records a valuation allowance against its deferred tax assets to reduce the net carrying value to an amount that it believes is more likely than not to be realized. When the Company establishes or reduces the valuation allowance against deferred tax assets, its provision for income taxes will increase or decrease, respectively, in the period such determination is made.

Valuation allowances against deferred tax assets were \$26.3 million and \$20.8 million at June 29, 2007 and December 31, 2006, respectively. Changes in the valuation allowances are generally a component of the estimated annual effective tax rate. The increase in the amount of valuation allowances at June 29, 2007 compared to December 31, 2006 is primarily due to the EndoArt acquisition.

In the first fiscal quarter of 2007, the Company adopted FIN 48, which resulted in an increase in total income taxes payable of \$2.8 million and interest payable of \$0.5 million and a decrease in total deferred tax assets of \$1.0 million and beginning retained earnings of \$4.3 million. In addition, the Company reclassified \$27.0 million of net unrecognized tax benefit liabilities from current to non-current liabilities. The Company's total unrecognized tax benefit liabilities recorded under FIN 48 as of the date of adoption were \$61.7 million, including \$37.1 million of uncertain tax positions that were previously recognized as income tax expense and \$18.7 million relating to uncertain tax positions of acquired subsidiaries that existed at the time of acquisition. Total interest accrued on income taxes payable was \$7.6 million as of the date of adoption and no income tax penalties were recorded. There have been no material changes in these balances as of June 29, 2007.

The Company expects that during the next 12 months it is reasonably possible that unrecognized tax benefit liabilities related to research credits, AMT credits and transfer pricing will decrease by approximately \$25.9 million due to the settlement of a U.S. Internal Revenue Service (IRS) tax audit.

The following tax years remain subject to examination:

<u>Major Jurisdictions</u>	<u>Open Years</u>	
U.S. Federal	2003	2005
California	2000	2005
Brazil	2001	2005
Canada	2000	2005
France	2004	2005
Germany	2002	2005
Italy	2002	2005
Ireland	2002	2005
Spain	2002	2005
United Kingdom	2004	2005

The Company has not provided for withholding and U.S. taxes for the unremitted earnings of certain non-U.S. subsidiaries because it has currently reinvested these earnings indefinitely in such operations, or such earnings will be offset by appropriate credits for foreign income taxes paid. At December 31, 2006, the Company had approximately \$725.5 million in unremitted earnings outside the United States for which withholding and U.S. taxes were not provided. Such earnings would become taxable upon the sale or liquidation of these non-U.S. subsidiaries or upon the remittance of dividends. It is not practicable to estimate the amount of the deferred tax liability on such unremitted earnings. Upon remittance, certain foreign countries impose withholding taxes that are then available, subject to certain limitations, for use as credits against the Company's U.S. tax liability, if any. The Company annually updates its estimate of unremitted earnings outside the United States after the completion of each fiscal year.

Note 7: Share-Based Compensation

The Company recognizes compensation expense for all share-based awards made to employees and directors. The fair value of share-based awards is estimated at the grant date using the Black-Scholes option-pricing model and the

Table of Contents

Allergan, Inc.

Notes to Unaudited Condensed Consolidated Financial Statements (Continued)

portion that is ultimately expected to vest is recognized as compensation cost over the requisite service period using the straight-line single option method.

The determination of fair value using the Black-Scholes option-pricing model is affected by the Company's stock price as well as assumptions regarding a number of complex and subjective variables, including expected stock price volatility, risk-free interest rate, expected dividends and projected employee stock option exercise behaviors. The Company currently estimates stock price volatility based upon an equal weighting of the five year historical average and the average implied volatility of at-the-money options traded in the open market. The Company estimates employee stock option exercise behavior based on actual historical exercise activity and assumptions regarding future exercise activity of unexercised, outstanding options.

Share-based compensation expense is recognized only for those awards that are ultimately expected to vest, and the Company has applied an estimated forfeiture rate to unvested awards for the purpose of calculating compensation cost. These estimates will be revised, if necessary, in future periods if actual forfeitures differ from the estimates. Changes in forfeiture estimates impact compensation cost in the period in which the change in estimate occurs.

For the three and six month periods ended June 29, 2007 and June 30, 2006, share-based compensation expense was as follows:

	Three months ended		Six months ended	
	June 29, 2007	June 30, 2006	June 29, 2007	June 30, 2006
	(in millions)		(in millions)	
Cost of sales	\$ 1.6	\$ 1.3	\$ 3.0	\$ 2.4
Selling, general and administrative	13.6	11.5	27.7	21.8
Research and development	4.7	3.8	10.5	7.8
Pre-tax share-based compensation expense	19.9	16.6	41.2	32.0
Income tax benefit	7.0	5.9	14.7	11.5
Net share-based compensation expense	\$12.9	\$10.7	\$26.5	\$20.5

As of June 29, 2007, total compensation cost related to non-vested stock options and restricted stock not yet recognized was \$144.5 million, which is expected to be recognized over the next 48 months (34 months on a weighted-average basis). The Company has not capitalized as part of inventory any share-based compensation costs because such costs were negligible.

Note 8: Employee Retirement and Other Benefit Plans

The Company sponsors various qualified defined benefit pension plans covering a substantial portion of its employees. In addition, the Company sponsors two supplemental nonqualified plans covering certain management employees and officers and one retiree health plan covering U.S. retirees and dependents.

Table of Contents

Allergan, Inc.

Notes to Unaudited Condensed Consolidated Financial Statements (Continued)

Components of net periodic benefit cost for the three and six month periods ended June 29, 2007 and June 30, 2006, respectively, were as follows:

	Three months ended			
	Pension Benefits		Other Postretirement Benefits	
	June 29, 2007	June 30, 2006	June 29, 2007	June 30, 2006
	(in millions)		(in millions)	
Service cost	\$ 6.3	\$ 5.7	\$ 0.7	\$ 0.7
Interest cost	7.8	6.8	0.5	0.4
Expected return on plan assets	(9.3)	(8.1)		
Amortization of prior service cost			(0.2)	(0.1)
Plans acquired in business combination	(0.9)			
Recognized net actuarial loss	2.9	3.3		
Net periodic benefit cost	\$ 6.8	\$ 7.7	\$ 1.0	\$ 1.0

	Six months ended			
	Pension Benefits		Other Postretirement Benefits	
	June 29, 2007	June 30, 2006	June 29, 2007	June 30, 2006
	(in millions)		(in millions)	
Service cost	\$ 12.6	\$ 11.4	\$ 1.4	\$ 1.5
Interest cost	15.6	13.6	1.0	0.9
Expected return on plan assets	(18.6)	(16.2)		
Amortization of prior service cost			(0.4)	(0.3)
Plans acquired in business combination	0.5			
Recognized net actuarial loss	5.8	6.5		
Net periodic benefit cost	\$ 15.9	\$ 15.3	\$ 2.0	\$ 2.1

In the six months ended June 29, 2007, the Company recorded \$0.5 million in pension expense to recognize the pension liability of two non-U.S. defined benefit pension plans acquired in connection with the Inamed acquisition that were determined to be material during the period. In 2007, the Company expects to contribute between \$20.0 million and \$21.0 million to its U.S. and non-U.S. pension plans and between \$0.8 million and \$0.9 million to its other postretirement plan.

Note 9: Litigation

The following supplements and amends the discussion set forth under Part I, Item 3, Legal Proceedings in the Company's Annual Report on Form 10-K for the year ended December 31, 2006 and Part II, Item 1, Legal Proceedings in the Company's Quarterly Report on Form 10-Q for the period ended March 30, 2007.

In June 2001, after receiving paragraph 4 invalidity and noninfringement Hatch-Waxman Act certifications from Apotex, Inc. indicating that Apotex had filed an Abbreviated New Drug Application (ANDA) with the FDA for a

generic form of *Acular*[®], the Company and Roche Palo Alto, LLC, formerly known as Syntex (U.S.A.) LLC, the holder of the *Acular*[®] patent, filed a lawsuit entitled *Syntex (U.S.A.) LLC and Allergan, Inc. v. Apotex, Inc., et al.* in the United States District Court for the Northern District of California. Following a trial, the court entered final judgment in the Company's favor in January 2004, holding that the patent at issue is valid, enforceable and infringed by Apotex's proposed generic drug. Following an appeal by Apotex, the United States Court of Appeals for the Federal Circuit issued an opinion in May 2005 affirming the lower court's ruling on inequitable conduct and claim construction and reversing and remanding the issue of obviousness. On remand, in June 2006, the district court ruled that the defendants' ANDA infringes U.S. Patent No. 5,110,493 (the '493 patent'), which is owned by Syntex and licensed by Allergan, and that the patent is valid and enforceable. The district court further ruled that the effective date of any approval of the defendants' ANDA may not occur before the patent expires in 2009 and that the defendants, and all persons and entities acting in concert with them, are enjoined from making any preparations to make, sell, or offer for sale ketorolac tromethamine ophthalmic solution 0.5% in the United States. On April 9, 2007, the United States Court of Appeals for the Federal Circuit affirmed the district court's ruling in all respects

Table of Contents

Allergan, Inc.

Notes to Unaudited Condensed Consolidated Financial Statements (Continued)

and on April 17, 2007 entered a Judgment Per Curiam. On May 3, 2007, Apotex filed a Motion to Recall and Stay the Mandate and a Combined Petition for Panel Rehearing and Rehearing En Banc with the United States Court of Appeals for the Federal Circuit. On June 5, 2007, the United States Court of Appeals for the Federal Circuit denied Apotex's motions. On July 9, 2007, Apotex filed a Petition for Writ of Certiorari in the Supreme Court of the United States. In June 2001, the Company filed a separate lawsuit in Canada against Apotex similarly relating to a generic version of *Acular*[®]. On April 27, 2007, the court set a trial date in the Canadian lawsuit for February 2, 2009.

In May 2005, after receiving a paragraph 4 invalidity and noninfringement Hatch-Waxman Act certification from Apotex indicating that Apotex had filed an ANDA with the FDA for a generic form of *Acular LS*[®], the Company and Roche Palo Alto, LLC, formerly known as Syntex (U.S.A.) LLC, the holder of the 493 patent, filed a lawsuit entitled *Roche Palo Alto LLC, formerly known as Syntex (U.S.A.) LLC and Allergan, Inc. v. Apotex, Inc., et al.* in the United States District Court for the Northern District of California. In the complaint, the Company and Roche asked the court to find that the 493 patent is valid, enforceable and infringed by Apotex's proposed generic drug. Apotex filed an answer to the complaint and a counterclaim against the Company and Roche. On July 30, 2007, the Company and Roche moved for summary judgment, which motion will be heard by the court on August 31, 2007.

In February 2007, the Company received a paragraph 4 invalidity and noninfringement Hatch-Waxman Act certification from Exela PharmSci, Inc. indicating that Exela had filed an ANDA with the FDA for a generic form of *Alphagan*[®] *P*. In the certification, Exela contends that U.S. Patent Nos. 5,424,078, 6,562,873, 6,627,210, 6,641,834 and 6,673,337, all of which are assigned to the Company and are listed in the Orange Book under *Alphagan*[®] *P*, are invalid and/or not infringed by the proposed Exela product. In March 2007, the Company filed a complaint against Exela in the United States District Court for the Central District of California entitled *Allergan, Inc. v. Exela PharmSci, Inc., et al.* (the *Exela Action*). In its complaint, the Company alleges that Exela's proposed product infringes U.S. Patent No. 6,641,834. In April 2007, the Company filed an amended complaint adding Paddock Laboratories, Inc. and PharmaForce, Inc. as defendants. In April 2007, Exela filed a complaint for declaratory judgment in the United States District Court for the Eastern District of Virginia, Alexandria Division, entitled *Exela PharmSci, Inc. v. Allergan, Inc.* Exela's complaint seeks a declaration of noninfringement, unenforceability, and/or invalidity of U.S. Patent Nos. 5,424,078, 6,562,873, 6,627,210, 6,641,834 and 6,673,337. In June 2007, Exela filed a voluntary dismissal without prejudice in the Virginia action.

In May 2007, the Company received a paragraph 4 invalidity and noninfringement Hatch-Waxman Act certification from Apotex, Inc. indicating that Apotex had filed ANDAs with the FDA for generic versions of *Alphagan*[®] *P* and *Alphagan*[®] *P* 0.1%. In the certification, Apotex contends that U.S. Patent Nos. 5,424,078, 6,562,873, 6,627,210, 6,641,834 and 6,673,337, all of which are assigned to the Company and are listed in the Orange Book under *Alphagan*[®] *P* and *Alphagan*[®] *P* 0.1%, are invalid and/or not infringed by the proposed Apotex products. In May 2007, the Company filed a complaint against Apotex in the United States District Court for the District of Delaware entitled *Allergan, Inc. v. Apotex, Inc. and Apotex Corp.* (the *Apotex Action*). In its complaint, the Company alleges that Apotex's proposed products infringe U.S. Patent Nos. 5,424,078, 6,562,873, 6,627,210, 6,641,834 and 6,673,337. In June 2007, Apotex filed an answer, defenses, and counterclaims. In July 2007, the Company filed a response to Apotex's counterclaims.

In May 2007, the Company filed a motion with the multidistrict litigation panel to consolidate the *Exela Action* and the *Apotex Action* in the District of Delaware. In June 2007, Exela and Apotex filed their responses and oppositions to the motion. A hearing on the Company's motion took place on July 26, 2007 and the court took the matter under advisement.

Inamed Related Litigation Matters Assumed in the Company's Acquisition of Inamed

In connection with its purchase of Collagen Aesthetics, Inc. (Collagen) in September 1999, the Company's subsidiary Inamed assumed certain liabilities relating to the Trilucent breast implant, a soybean oil-filled breast implant, which had been manufactured and distributed by various subsidiaries of Collagen between 1995 and November 1998. In November 1998, Collagen announced the sale of its LipoMatrix, Inc. subsidiary, manufacturer

Table of Contents

Allergan, Inc.

Notes to Unaudited Condensed Consolidated Financial Statements (Continued)

of the Trilucent implant to Sierra Medical Technologies, Inc. Collagen retained certain liabilities for Trilucent implants sold prior to November 1998.

In March 1999, the United Kingdom Medical Devices Agency, or MDA, announced the voluntary suspension of marketing and withdrawal of the Trilucent implant in the United Kingdom as a precautionary measure. The MDA did not identify any immediate hazard associated with the use of the product but stated that it sought the withdrawal because it had received reports of local complications in a small number of women who had received those implants, involving localized swelling. The same notice stated that there has been no evidence of permanent injury or harm to general health as a result of these implants. In March 1999, Collagen agreed with the U.K. National Health Service that, for a period of time, it would perform certain product surveillance with respect to U.K. patients implanted with the Trilucent implant and pay for explants for any U.K. women with confirmed Trilucent implant ruptures. Subsequently, LipoMatrix's notified body in Europe suspended the product's CE Mark pending further assessment of the long-term safety of the product. Sierra Medical has since stopped sales of the product. Subsequent to acquiring Collagen, Inamed elected to continue the voluntary program.

In June 2000, the MDA issued a hazard notice recommending that surgeons and their patients consider explanting the Trilucent implants even if the patient is asymptomatic. The MDA also recommended that women avoid pregnancy and breast-feeding until the explantation as a precautionary measure stating that although there have been reports of breast swelling and discomfort in some women with these implants, there has been no clinical evidence of any serious health problems, so far.

Concurrently with the June 2000 MDA announcement, Inamed announced that, through its AEI, Inc. subsidiary, it had undertaken a comprehensive program of support and assistance for women who have received Trilucent breast implants, under which it was covering medical expenses associated with the removal and replacement of those implants for women in the European Community, the United States and other countries. After consulting with competent authorities in each affected country, Inamed terminated this support program in March 2005 in all countries other than the United States and Canada. Notwithstanding the termination of the general program, Inamed continued to pay for explantations and related expenses in certain cases if a patient justified her delay in having her Trilucent implants removed on medical grounds or owing to lack of notice. Under this program, Inamed may pay a fee to any surgeon who conducts an initial consultation with any Trilucent implantee. Inamed also pays for the explantation procedure and related costs, and for replacement (non-Trilucent) implants for women who are candidates for and who desire them. To date, virtually all of the U.K. residents and more than 95% of the non-U.K. residents who have requested explantations as a result of an initial consultation have had them performed. However, there may be other U.K. residents and non-U.K. residents who have not come forth that may request explantation.

A Spanish consumer union has commenced a single action in the Madrid district court in which the consumer union, Avinesa, alleges that it represents 38 Spanish Trilucent explantees. To date, approximately 65 women in Spain have commenced individual legal proceedings in court against Inamed, of which approximately 9 were still pending as of July 31, 2007. Prior to the issuance of a decision by an Appellate Court sitting in Madrid in the second quarter of 2005, Inamed won approximately one-third, and lost approximately two-thirds of its Trilucent cases in the lower courts. The average damages awarded in cases the Company lost were approximately \$18,000. In the second quarter of 2005, in a case called Gomez Martin v. AEI, for the first time an appellate court in Spain issued a decision holding that Trilucent breast implants were not defective within the meaning of applicable Spanish product liability law and dismissed a 60,000 (approximately \$78,000) award issued by the lower court. While this ruling is a positive development for Inamed, it may not be followed by other Spanish appellate courts or could be modified or found inapplicable to other cases filed in the Madrid district. Since the ruling in Gomez Martin v. AEI, Inamed has had greater success in winning the Spanish cases than before the ruling. In 2006, the Company settled nine Spanish litigated matters; the average compensation paid per case was under 12,000 (approximately \$16,000).

As of June 29, 2007, the Company had an accrual for future Trilucent claims, costs, and expenses of \$2.8 million.

In May 2002, Ernest Manders filed a lawsuit against Inamed and other defendants entitled Ernest K. Manders, M.D. v. McGhan Medical Corporation, et al., in the United States District Court for the Western District of

Pennsylvania, Case No. 02-CV-1341. Manders amended complaint seeks damages for alleged infringement of a
21

Table of Contents

Allergan, Inc.

Notes to Unaudited Condensed Consolidated Financial Statements (Continued)

patent allegedly held by Manders in the field of tissue expanders. In February 2003, Inamed answered the complaint, denying its material allegations and counterclaiming against Manders for declarations of invalidity as well as noninfringement. Following fact discovery and expert discovery, Manders elected to limit his claim for infringement to twelve of the forty-six claims in his patent. In September 2004 and October 2004, the court held a Markman hearing on claim construction under the patent and in February 2006, the court issued its Memorandum Opinion on claim construction. A mediation was held on June 19, 2007, at which time the parties reached a settlement and entered into a confidential settlement agreement. On June 29, 2007, the court dismissed the matter.

The Company is involved in various other lawsuits and claims arising in the ordinary course of business. These other matters are, in the opinion of management, immaterial both individually and in the aggregate with respect to the Company's consolidated financial position, liquidity or results of operations.

Because of the uncertainties related to the incurrence, amount and range of loss on any pending litigation, investigation or claim, management is currently unable to predict the ultimate outcome of any litigation, investigation or claim, determine whether a liability has been incurred or make an estimate of the reasonably possible liability that could result from an unfavorable outcome. The Company believes, however, that the liability, if any, resulting from the aggregate amount of uninsured damages for any outstanding litigation, investigation or claim will not have a material adverse effect on the Company's consolidated financial position, liquidity or results of operations. However, an adverse ruling in a patent infringement lawsuit involving the Company could materially affect its ability to sell one or more of its products or could result in additional competition. In view of the unpredictable nature of such matters, the Company cannot provide any assurances regarding the outcome of any litigation, investigation or claim to which the Company is a party or the impact on the Company of an adverse ruling in such matters. As additional information becomes available, the Company will assess its potential liability and revise its estimates.

Note 10: Guarantees

The Company's Certificate of Incorporation, as amended, provides that the Company will indemnify, to the fullest extent permitted by the Delaware General Corporation Law, each person that is involved in or is, or is threatened to be, made a party to any action, suit or proceeding by reason of the fact that he or she, or a person of whom he or she is the legal representative, is or was a director or officer of the Company or was serving at the request of the Company as a director, officer, employee or agent of another corporation or of a partnership, joint venture, trust or other enterprise. The Company has also entered into contractual indemnity agreements with each of its directors and executive officers pursuant to which, among other things, the Company has agreed to indemnify such directors and executive officers against any payments they are required to make as a result of a claim brought against such executive officer or director in such capacity, excluding claims (i) relating to the action or inaction of a director or executive officer that resulted in such director or executive officer gaining personal profit or advantage, (ii) for an accounting of profits made from the purchase or sale of securities of the Company within the meaning of Section 16(b) of the Securities Exchange Act of 1934 or similar provisions of any state law or (iii) that are based upon or arise out of such director's or executive officer's knowingly fraudulent, deliberately dishonest or willful misconduct. The maximum potential amount of future payments that the Company could be required to make under these indemnification provisions is unlimited. However, the Company has purchased directors' and officers' liability insurance policies intended to reduce the Company's monetary exposure and to enable the Company to recover a portion of any future amounts paid. The Company has not previously paid any material amounts to defend lawsuits or settle claims as a result of these indemnification provisions. As a result, the Company believes the estimated fair value of these indemnification arrangements is minimal.

The Company customarily agrees in the ordinary course of its business to indemnification provisions in agreements with clinical trials investigators in its drug development programs, in sponsored research agreements with academic and not-for-profit institutions, in various comparable agreements involving parties performing services for the Company in the ordinary course of business, and in its real estate leases. The Company also customarily agrees to certain indemnification provisions in its drug discovery and development collaboration agreements. With respect to the Company's clinical trials and sponsored research agreements, these indemnification provisions typically apply to

any claim asserted against the investigator or the investigator's institution relating to personal injury or property damage, violations of law or certain breaches of the Company's contractual obligations

Table of Contents

Allergan, Inc.

Notes to Unaudited Condensed Consolidated Financial Statements (Continued)

arising out of the research or clinical testing of the Company's compounds or drug candidates. With respect to real estate lease agreements, the indemnification provisions typically apply to claims asserted against the landlord relating to personal injury or property damage caused by the Company, to violations of law by the Company or to certain breaches of the Company's contractual obligations. The indemnification provisions appearing in the Company's collaboration agreements are similar, but in addition provide some limited indemnification for the collaborator in the event of third party claims alleging infringement of intellectual property rights. In each of the above cases, the term of these indemnification provisions generally survives the termination of the agreement. The maximum potential amount of future payments that the Company could be required to make under these provisions is generally unlimited. The Company has purchased insurance policies covering personal injury, property damage and general liability intended to reduce the Company's exposure for indemnification and to enable the Company to recover a portion of any future amounts paid. The Company has not previously paid any material amounts to defend lawsuits or settle claims as a result of these indemnification provisions. As a result, the Company believes the estimated fair value of these indemnification arrangements is minimal.

Note 11: Product Warranties

The Company provides warranty programs for breast implant sales primarily in the United States, Europe, and certain other countries. Management estimates the amount of potential future claims from these warranty programs based on actuarial analyses. Expected future obligations are determined based on the history of product shipments and claims and are discounted to a current value. The liability is included in both current and long-term liabilities on the Company's consolidated balance sheet. The U.S. programs include the *ConfidencePlus* and *ConfidencePlus* Premier warranty programs. The *ConfidencePlus* program currently provides lifetime product replacement and \$1,200 of financial assistance for surgical procedures within ten years of implantation. The *ConfidencePlus* Premier program, which requires a low additional enrollment fee, currently provides lifetime product replacement, \$2,400 of financial assistance for surgical procedures within ten years of implantation and contralateral implant replacement. The enrollment fee is deferred and recognized as income over the ten year warranty period for financial assistance. The warranty programs in non-U.S. markets have similar terms and conditions to the U.S. programs. The Company does not warrant any level of aesthetic result and, as required by government regulation, makes extensive disclosures concerning the risks of the use of its products and implantation surgery. Changes to actual warranty claims incurred and interest rates could have a material impact on the actuarial analysis and the Company's estimated liabilities. Substantially all of the product warranty liability arises from the U.S. warranty programs. The Company does not currently offer any similar warranty program on any other product.

The following table provides a reconciliation of the change in estimated product warranty liabilities through June 29, 2007:

	(in millions)
Balance at December 31, 2006	\$ 24.8
Provision for warranties issued during the period	3.0
Settlements made during the period	(2.4)
Balance at June 29, 2007	\$ 25.4
Current portion	\$ 6.2
Non-current portion	19.2
Total	\$ 25.4

Table of Contents

Allergan, Inc.

Notes to Unaudited Condensed Consolidated Financial Statements (Continued)

Note 12: Earnings Per Share

The table below presents the computation of basic and diluted earnings (loss) per share:

	Three months ended		Six months ended	
	June 29, 2007	June 30, 2006	June 29, 2007	June 30, 2006
	(in millions, except per share amounts)			
Net earnings (loss)	\$ 137.8	\$ 74.2	\$ 181.6	\$(370.6)
Weighted average number of shares issued	304.7	300.0	304.3	285.1
Net shares assumed issued using the treasury stock method for options and non-vested equity shares and share units outstanding during each period based on average market price	3.5	2.8	3.5	
Dilutive effect of assumed conversion of convertible notes outstanding		1.7		
Diluted shares	308.2	304.5	307.8	285.1
Earnings (loss) per share:				
Basic	\$ 0.45	\$ 0.25	\$ 0.60	\$(1.30)
Diluted	\$ 0.45	\$ 0.24	\$ 0.59	\$(1.30)

For the three and six month periods ended June 29, 2007, options to purchase 6.1 million and 8.8 million shares of common stock at exercise prices ranging from \$49.94 to \$63.76 and \$48.07 to \$63.76 per share, respectively, were outstanding, but were not included in the computation of diluted earnings per share because the effect from the assumed exercise of these options calculated under the treasury stock method would be anti-dilutive.

For the three month period ended June 30, 2006, options to purchase 6.7 million shares of common stock at exercise prices ranging from \$37.64 to \$63.76 per share were outstanding, but were not included in the computation of diluted earnings per share because the effect from the assumed exercise of these options calculated under the treasury stock method would be anti-dilutive. Stock options outstanding during the six month period ended June 30, 2006 were not included in the computation of diluted earnings per share because the Company incurred a loss from continuing operations and, as a result, the impact would be antidilutive. Options to purchase 23.2 million shares of common stock at exercise prices ranging from \$6.50 to \$63.76 per share were outstanding as of June 30, 2006. Additionally, for the six month period ended June 30, 2006, the effect of approximately 3.3 million common shares related to the Company's convertible subordinated notes was not included in the computation of diluted earnings per share because the Company incurred a loss from continuing operations and, as a result, the impact would be antidilutive.

Other comprehensive income	\$17.3	\$(0.7)	16.6	\$25.5	\$(4.6)	20.9
Net earnings (loss)			181.6			(370.6)
Total comprehensive income (loss)			\$198.2			\$(349.7)

Note 14: Business Segment Information

Through the first fiscal quarter of 2006, the Company operated its business on the basis of a single reportable segment – specialty pharmaceuticals. Due to the Inamed acquisition, beginning with the second fiscal quarter of 2006, the Company operates its business on the basis of two reportable segments – specialty pharmaceuticals and medical devices. The specialty pharmaceuticals segment produces a broad range of pharmaceutical products, including: ophthalmic products for glaucoma therapy, ocular inflammation, infection, allergy and dry eye; skin care products for acne, psoriasis and other prescription and over-the-counter dermatological products; and *Botox*[®] for certain therapeutic and cosmetic indications. The medical devices segment produces breast implants for aesthetic augmentation and reconstructive surgery; facial aesthetics products; the *LAP-BAND*[®] System designed to treat severe and morbid obesity and the *BIB* System for the treatment of obesity; and ophthalmic surgical devices. The Company provides global marketing strategy teams to ensure development and execution of a consistent marketing strategy for its products in all geographic regions that share similar distribution channels and customers.

The Company evaluates segment performance on a revenue and operating income (loss) basis exclusive of general and administrative expenses and other indirect costs, restructuring charges, in-process research and development expenses, amortization of identifiable intangible assets related to the Inamed, Corneal and EndoArt acquisitions and certain other adjustments, which are not allocated to the Company's segments for performance assessment by the Company's chief operating decision maker. Other adjustments excluded from the Company's segments for performance assessment represent income or expenses that do not reflect, according to established Company-defined criteria, operating income or expenses associated with the Company's core business activities. Because operating segments are generally defined by the products they design and sell, they do not make sales to

Table of Contents

Allergan, Inc.

Notes to Unaudited Condensed Consolidated Financial Statements (Continued)

each other. The Company does not discretely allocate assets to its operating segments, nor does the Company's chief operating decision maker evaluate operating segments using discrete asset information.

Operating Segments

	Three months ended		Six months ended	
	June 29, 2007	June 30, 2006	June 29, 2007	June 30, 2006
	(in millions)		(in millions)	
Product net sales:				
Specialty pharmaceuticals	\$765.5	\$658.7	\$1,462.9	\$1,273.9
Medical devices	207.3	128.3	382.3	128.3
Total product net sales	972.8	787.0	1,845.2	1,402.2
Other corporate and indirect revenues	15.3	14.7	29.4	25.2
Total revenues	\$988.1	\$801.7	\$1,874.6	\$1,427.4

	Three months ended		Six months ended	
	June 29, 2007	June 30, 2006	June 29, 2007	June 30, 2006
	(in millions)		(in millions)	
Operating income (loss):				
Specialty pharmaceuticals	\$251.5	\$208.2	\$474.1	\$ 406.3
Medical devices	56.2	51.9	110.8	51.9
Total segments	307.7	260.1	584.9	458.2
General and administrative expenses, other indirect costs and other adjustments	92.4	93.2	176.0	148.5

Amortization of acquired intangible assets (a)	23.5	19.5	46.5	19.5
Restructuring charges	10.1	5.7	13.3	8.5
Total operating income (loss)	\$181.7	\$125.2	\$277.1	\$(297.6)

(a) Represents amortization of identifiable intangible assets related to the Inamed, Cornéal and EndoArt acquisitions.

Product net sales for the Company's various global product portfolios are presented below. The Company's principal markets are the United States, Europe, Latin America and Asia Pacific. The U.S. information is presented separately

as it is the Company's headquarters country. U.S. sales, including manufacturing operations, represented 64.6% and 67.2% of the Company's total consolidated product net sales for the three month periods ended June 29, 2007 and June 30, 2006, respectively, and 65.1% and 67.3% of the Company's total consolidated product net sales for the six month periods ended June 29, 2007 and June 30, 2006, respectively.

Sales to two customers in the Company's specialty pharmaceuticals segment generated over 10% of the Company's total consolidated product net sales. Sales to McKesson Drug Company for the three month periods ended June 29, 2007 and June 30, 2006 were 10.9% and 12.6% of the Company's total consolidated product net sales, respectively, and 11.2% and 14.2% of the Company's total consolidated product net sales for the six month periods ended June 29, 2007 and June 30, 2006, respectively. Sales to Cardinal Healthcare for the three month periods ended June 29, 2007 and June 30, 2006 were 10.1% and 12.0% of the Company's total consolidated product net sales, respectively, and 11.2% and 13.2% of the Company's total consolidated product net sales for the six month periods ended June 29, 2007 and June 30, 2006, respectively. No other country or single customer generates over 10% of total product net sales. Net sales for the Europe region also include sales to customers in Africa and the Middle East, and net sales in the Asia Pacific region include sales to customers in Australia and New Zealand.

The increase in long-lived assets at June 29, 2007 compared to December 31, 2006 was primarily due to the Company's 2007 Cornéal and EndoArt acquisitions. Long-lived assets related to the Cornéal and EndoArt acquisitions, including goodwill and intangible assets, are reflected in the Europe balance above. Goodwill and intangible assets

related to the Inamed acquisition are reflected in the United States balance above.

ALLERGAN, INC.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

This financial review presents our operating results for the three and six month periods ended June 29, 2007 and June 30, 2006, and our financial condition at June 29, 2007. Except for the historical information contained herein, the following discussion contains forward-looking statements which are subject to known and unknown risks, uncertainties and other factors that may cause our actual results to differ materially from those expressed or implied by such forward-looking statements. We discuss such risks, uncertainties and other factors throughout this report and specifically under the caption "Risk Factors" in Item 1A of Part II below. The following review should be read in connection with the information presented in our unaudited condensed consolidated financial statements and related notes for the three and six month periods ended June 29, 2007 and our audited consolidated financial statements and related notes for the year ended December 31, 2006.

Critical Accounting Policies

The preparation and presentation of financial statements in conformity with U.S. generally accepted accounting principles requires us to establish policies and to make estimates and assumptions that affect the amounts reported in our consolidated financial statements. In our judgment, the accounting policies, estimates and assumptions described below have the greatest potential impact on our consolidated financial statements. Accounting assumptions and estimates are inherently uncertain and actual results may differ materially from our estimates.

Revenue Recognition

We recognize revenue from product sales when goods are shipped and title and risk of loss transfer to our customers. A substantial portion of our revenue is generated by the sale of specialty pharmaceutical products (primarily eye care pharmaceuticals and skin care products) to wholesalers within the United States, and we have a policy to attempt to maintain average U.S. wholesaler inventory levels at an amount less than eight weeks of our net sales. A portion of our revenue is generated from consigned inventory of breast implants maintained at physician, hospital and clinic locations. These customers are contractually obligated to maintain a specific level of inventory and to notify us upon the use of consigned inventory. Revenue for consigned inventory is recognized at the time we are notified by the customer that the product has been used. Notification is usually through the replenishing of the inventory, and we periodically review consignment inventories to confirm the accuracy of customer reporting.

We generally offer cash discounts to customers for the early payment of receivables. Those discounts are recorded as a reduction of revenue and accounts receivable in the same period that the related sale is recorded. The amounts reserved for cash discounts were \$2.1 million and \$2.3 million at June 29, 2007 and December 31, 2006, respectively. Provisions for cash discounts deducted from consolidated sales in the second quarter of 2007 and the second quarter of 2006 were \$8.3 million and \$7.7 million, respectively. Provisions for cash discounts deducted from consolidated sales in the first six months of 2007 and the first six months of 2006 were \$16.5 million and \$15.1 million, respectively. We permit returns of product from most product lines by any class of customer if such product is returned in a timely manner, in good condition and from normal distribution channels. Return policies in certain international markets and for certain medical device products, primarily breast implants, provide for more stringent guidelines in accordance with the terms of contractual agreements with customers. Our estimates for sales returns are based upon the historical patterns of products returned matched against the sales from which they originated, and management's evaluation of specific factors that may increase the risk of product returns. The amount of allowances for sales returns recognized in our consolidated balance sheets at June 29, 2007 and December 31, 2006 were \$26.2 million and \$20.1 million, respectively. Provisions for sales returns deducted from consolidated sales were \$80.6 million and \$50.3 million in the second quarter of 2007 and the second quarter of 2006, respectively. Provisions for sales returns deducted from consolidated sales were \$151.7 million and \$58.0 million in the first six months of 2007 and the first six months of 2006, respectively. The increase in the allowance for sales returns at June 29, 2007 compared to December 31, 2006 and the increase in the provision for sales returns in the second quarter and first six months of 2007 compared to the second quarter and first six months of 2006 were primarily due to growth in net sales of the acquired Inamed medical device products, primarily breast implants, which generally have a significantly higher rate of return than specialty pharmaceutical products. Historical allowances for cash discounts and product returns have been within the amounts reserved or accrued.

We participate in various managed care sales rebate and other incentive programs, the largest of which relates to Medicaid and Medicare. Sales rebate and other incentive programs also include chargebacks, which are contractual

Table of Contents

discounts given primarily to federal government agencies, health maintenance organizations, pharmacy benefits managers and group purchasing organizations. Sales rebates and incentive accruals reduce revenue in the same period that the related sale is recorded and are included in Other accrued expenses in our consolidated balance sheets. The amounts accrued for sales rebates and other incentive programs at June 29, 2007 and December 31, 2006 were \$76.0 million and \$71.2 million, respectively. Provisions for sales rebates and other incentive programs deducted from consolidated sales were \$52.6 million and \$108.1 million in the second quarter and first six months of 2007, respectively. Provisions for sales rebates and other incentive programs deducted from consolidated sales were \$39.9 million and \$93.1 million in the second quarter and first six months of 2006, respectively. The \$4.8 million increase in the amounts accrued for sales rebates and other incentive programs at June 29, 2007 compared to December 31, 2006 is primarily due to a difference in the timing of when payments were made against accrued amounts at June 29, 2007 compared to December 31, 2006, and an increase in the ratio of U.S. specialty pharmaceutical sales, principally eye care pharmaceutical products, which are subject to such rebate and incentive programs. In addition, an increase in our published list prices in the United States for pharmaceutical products, which occurred for several of our products early in each of 2007 and 2006, generally results in higher provisions for sales rebates and other incentive programs deducted from consolidated sales.

Our procedures for estimating amounts accrued for sales rebates and other incentive programs at the end of any period are based on available quantitative data and are supplemented by management's judgment with respect to many factors, including but not limited to, current market dynamics, changes in contract terms, changes in sales trends, an evaluation of current laws and regulations and product pricing. Quantitatively, we use historical sales, product utilization and rebate data and apply forecasting techniques in order to estimate our liability amounts. Qualitatively, management's judgment is applied to these items to modify, if appropriate, the estimated liability amounts. There are inherent risks in this process. For example, customers may not achieve assumed utilization levels; customers may misreport their utilization to us; and actual movements of the U.S. Consumer Price Index - Urban (CPI-U), which affect our rebate programs with U.S. federal and state government agencies, may differ from those estimated. On a quarterly basis, adjustments to our estimated liabilities for sales rebates and other incentive programs related to sales made in prior periods have not been material and have generally been less than 0.5% of consolidated product net sales. An adjustment to our estimated liabilities of 0.5% of consolidated product net sales on a quarterly basis would result in an increase or decrease to net sales and earnings before income taxes of approximately \$4.0 million to \$5.0 million. The sensitivity of our estimates can vary by program and type of customer. Additionally, there is a significant time lag between the date we determine the estimated liability and when we actually pay the liability. Due to this time lag, we record adjustments to our estimated liabilities over several periods, which can result in a net increase to earnings or a net decrease to earnings in those periods. Material differences may result in the amount of revenue we recognize from product sales if the actual amount of rebates and incentives differ materially from the amounts estimated by management.

We recognize license fees, royalties and reimbursement income for services provided as other revenues based on the facts and circumstances of each contractual agreement. In general, we recognize income upon the signing of a contractual agreement that grants rights to products or technology to a third party if we have no further obligation to provide products or services to the third party after entering into the contract. We defer income under contractual agreements when we have further obligations indicating that a separate earnings process has not been completed.

Pensions

We sponsor various pension plans in the United States and abroad in accordance with local laws and regulations. Our U.S. pension plans account for a large majority of our aggregate pension plans' net periodic benefit costs and projected benefit obligations. In connection with these plans, we use certain actuarial assumptions to determine the plans' net periodic benefit costs and projected benefit obligations, the most significant of which are the expected long-term rate of return on assets and the discount rate.

Our assumption for the weighted average expected long-term rate of return on assets in our U.S. pension plans for determining the net periodic benefit cost is 8.25% for 2007, which is the same rate used for 2006. Our assumptions for the weighted average expected long-term rate of return on assets in our non-U.S. pension plans were 6.43% and 6.19% for 2007 and 2006, respectively. We determine, based upon recommendations from our pension plans' investment

advisors, the expected rate of return using a building block approach that considers diversification and rebalancing for a long-term portfolio of invested assets. Our investment advisors study historical market returns and preserve long-term historical relationships between equities and fixed income in a manner consistent with the widely-accepted capital market principle that assets with higher volatility generate a greater return over the long run.

Table of Contents

They also evaluate market factors such as inflation and interest rates before long-term capital market assumptions are determined. The expected rate of return is applied to the market-related value of plan assets. Market conditions and other factors can vary over time and could significantly affect our estimates of the weighted average expected long-term rate of return on our plan assets. As a sensitivity measure, the effect of a 0.25% decline in our rate of return on assets assumptions for our U.S. and non-U.S. pension plans would increase our expected 2007 pre-tax pension benefit cost by approximately \$1.2 million.

The weighted average discount rates used to calculate our U.S. and non-U.S. pension benefit obligations at December 31, 2006 and our net periodic benefit costs for 2007 were 5.90% and 4.65%, respectively. The discount rates used to calculate our U.S. and non-U.S. net periodic benefit costs for 2006 were 5.60% and 4.24%, respectively. We determine the discount rate largely based upon an index of high-quality fixed income investments (for our U.S. plans, we use the U.S. Moody's Aa Corporate Long Bond Index and for our non-U.S. plans, we use the iBoxx £ Corporate AA 10+ Year Index and the iBoxx £ Corporate AA 15+ Year Index) and, for our U.S. plans, a constructed hypothetical portfolio of high quality fixed income investments with maturities that mirror the pension benefit obligations at the plans' measurement date. Market conditions and other factors can vary over time and could significantly affect our estimates for the discount rates used to calculate our pension benefit obligations and net periodic pension benefit costs for future years. As a sensitivity measure, the effect of a 0.25% decline in the discount rate assumption for our U.S. and non-U.S. pension plans would increase our expected 2007 pre-tax pension benefit costs by approximately \$3.7 million and increase our pension plans' projected benefit obligations at December 31, 2006 by approximately \$27.0 million.

Share-Based Compensation

We recognize compensation expense for all share-based awards made to employees and directors. The fair value of share-based awards is estimated at the grant date using the Black-Scholes option-pricing model and the portion that is ultimately expected to vest is recognized as compensation cost over the requisite service period using the straight-line single option method.

The determination of fair value using the Black-Scholes option-pricing model is affected by our stock price as well as assumptions regarding a number of complex and subjective variables, including expected stock price volatility, risk-free interest rate, expected dividends and projected employee stock option exercise behaviors. We currently estimate stock price volatility based upon an equal weighting of the five year historical average and the average implied volatility of at-the-money options traded in the open market. We estimate employee stock option exercise behavior based on actual historical exercise activity and assumptions regarding future exercise activity of unexercised, outstanding options.

Share-based compensation expense is recognized only for those awards that are ultimately expected to vest, and we have applied an estimated forfeiture rate to unvested awards for the purpose of calculating compensation cost. These estimates will be revised, if necessary, in future periods if actual forfeitures differ from the estimates. Changes in forfeiture estimates impact compensation cost in the period in which the change in estimate occurs.

Income Taxes

The provision for income taxes is determined using an estimated annual effective tax rate, which is generally less than the U.S. federal statutory rate, primarily because of lower tax rates in certain non-U.S. jurisdictions, research and development (R&D) tax credits available in the United States and other jurisdictions, and deductions available in the United States for domestic production activities. Our effective tax rate may be subject to fluctuations during the year as new information is obtained, which may affect the assumptions we use to estimate our annual effective tax rate, including factors such as our mix of pre-tax earnings in the various tax jurisdictions in which we operate, valuation allowances against deferred tax assets, the recognition or derecognition of tax benefits related to uncertain tax positions, utilization of R&D tax credits and changes in or the interpretation of tax laws in jurisdictions where we conduct business. We recognize deferred tax assets and liabilities for temporary differences between the financial reporting basis and the tax basis of our assets and liabilities along with net operating loss and tax credit carryovers. We record a valuation allowance against our deferred tax assets to reduce the net carrying value to an amount that we believe is more likely than not to be realized. When we establish or reduce the valuation allowance against our deferred tax assets, our provision for income taxes will increase or decrease, respectively, in the period such

determination is made.

Table of Contents

Valuation allowances against our deferred tax assets were \$26.3 million and \$20.8 million at June 29, 2007 and December 31, 2006, respectively. Changes in the valuation allowances are recognized in the provision for income taxes as incurred and are generally included as a component of the estimated annual effective tax rate. The increase in the amount of valuation allowances at June 29, 2007 compared to December 31, 2006 is primarily due to our February 2007 acquisition of EndoArt SA, or EndoArt. Material differences in the estimated amount of valuation allowances may result in an increase or decrease in the provision for income taxes if the actual amounts for valuation allowances required against deferred tax assets differ from the amounts we estimate.

We have not provided for withholding and U.S. taxes for the unremitted earnings of certain non-U.S. subsidiaries because we have currently reinvested these earnings indefinitely in these foreign operations. At December 31, 2006, we had approximately \$725.5 million in unremitted earnings outside the United States for which withholding and U.S. taxes were not provided. Income tax expense would be incurred if these funds were remitted to the United States. It is not practicable to estimate the amount of the deferred tax liability on such unremitted earnings. Upon remittance, certain foreign countries impose withholding taxes that are then available, subject to certain limitations, for use as credits against our U.S. tax liability, if any. We annually update our estimate of unremitted earnings outside the United States after the completion of each fiscal year.

In the first quarter of 2007, we adopted FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes An Interpretation of FASB Statement No. 109* (FIN 48), which prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. Historically, our policy has been to account for uncertainty in income taxes in accordance with the provisions of Statement of Financial Accounting Standards No. 5, *Accounting for Contingencies*, which considered whether the tax benefit from an uncertain tax position was probable of being sustained. Under FIN 48, the tax benefit from uncertain tax positions may be recognized only if it is more likely than not that the tax position will be sustained, based solely on its technical merits, with the taxing authority having full knowledge of all relevant information. After initial adoption of FIN 48, deferred tax assets and liabilities for temporary differences between the financial reporting basis and the tax basis of our assets and liabilities along with net operating loss and tax credit carryovers are recognized only for tax positions that meet the more likely than not recognition criteria. Additionally, recognition and derecognition of tax benefits from uncertain tax positions are recorded as discrete tax adjustments in the first interim period that the more likely than not threshold is met. Due to the inherent risks in the estimates and assumptions used in determining the sustainability of our tax positions and in the measurement of the related tax, our provision for income taxes and our effective tax rate may vary significantly from our estimates and from amounts reported in future or prior periods. We discuss this change in accounting principle and its effect on our consolidated financial statements in Note 6, *Income Taxes*, in the financial statements under Item 1(D) of Part I of this report.

Purchase Price Allocation

The purchase price allocation for acquisitions requires extensive use of accounting estimates and judgments to allocate the purchase price to the identifiable tangible and intangible assets acquired, including in-process research and development, and liabilities assumed based on their respective fair values. Additionally, we must determine whether an acquired entity is considered to be a business or a set of net assets, because a portion of the purchase price can only be allocated to goodwill in a business combination.

On January 2, 2007, we acquired Groupe Cornéal Laboratoires, or Cornéal, for an aggregate purchase price of approximately \$209.2 million, net of cash acquired. On February 22, 2007, we acquired EndoArt for an aggregate purchase price of approximately \$97.1 million, net of cash acquired. The purchase prices for the acquisitions were allocated to tangible and intangible assets acquired and liabilities assumed based on their estimated fair values at the acquisition dates. We engaged an independent third-party valuation firm to assist us in determining the estimated fair values of in-process research and development, identifiable intangible assets and certain tangible assets. Such a valuation requires significant estimates and assumptions, including but not limited to, determining the timing and estimated costs to complete the in-process projects, projecting regulatory approvals, estimating future cash flows, and developing appropriate discount rates. We believe the estimated fair values assigned to the assets acquired and liabilities assumed are based on reasonable assumptions. However, the fair value estimates for the purchase price allocations may change during the allowable allocation period, which is up to one year from the acquisition dates, if

additional information becomes available.

Table of Contents

Operations

Headquartered in Irvine, California, we are a technology-driven, global health care company that discovers, develops and commercializes specialty pharmaceutical and medical device products for the ophthalmic, neurological, facial aesthetics, medical dermatological, breast aesthetics, obesity intervention and other specialty markets. We are a pioneer in specialty pharmaceutical research, targeting products and technologies related to specific disease areas such as glaucoma, retinal disease, dry eye, psoriasis, acne and movement disorders. Additionally, we discover, develop and market medical devices, aesthetic-related pharmaceuticals, and over-the-counter products. Within these areas, we are an innovative leader in saline and silicone gel-filled breast implants, dermal facial fillers and obesity intervention products, therapeutic and other prescription products, and to a limited degree, over-the-counter products that are sold in more than 100 countries around the world. We employ approximately 7,526 persons around the world. Our principal markets are the United States, Europe, Latin America and Asia Pacific.

Results of Operations

Through the first fiscal quarter of 2006, we operated our business on the basis of a single reportable segment specialty pharmaceuticals. Due to the Inamed acquisition, beginning in the second fiscal quarter of 2006, we operate our business on the basis of two reportable segments specialty pharmaceuticals and medical devices. The specialty pharmaceuticals segment produces a broad range of pharmaceutical products, including: ophthalmic products for glaucoma therapy, ocular inflammation, infection, allergy and dry eye; skin care products for acne, psoriasis and other prescription and over-the-counter dermatological products; and *Botox*[®] for certain therapeutic and aesthetic indications. The medical devices segment produces breast implants for aesthetic augmentation and reconstructive surgery; facial aesthetics products; the *LAP-BAND*[®] System designed to treat severe and morbid obesity and the *BIB* System for the treatment of obesity; and ophthalmic surgical devices. We provide global marketing strategy teams to coordinate the development and execution of a consistent marketing strategy for our products in all geographic regions that share similar distribution channels and customers.

Management evaluates our business segments and various global product portfolios on a revenue basis, which is presented below. We also report sales performance using the non-GAAP financial measure of constant currency sales. Constant currency sales represent current period reported sales, adjusted for the translation effect of changes in average foreign exchange rates between the current period and the corresponding period in the prior year. We calculate the currency effect by comparing adjusted current period reported sales, calculated using the monthly average foreign exchange rates for the corresponding period in the prior year, to the actual current period reported sales. We routinely evaluate our net sales performance at constant currency so that sales results can be viewed without the impact of changing foreign currency exchange rates, thereby facilitating period-to-period comparisons of our sales. Generally, when the U.S. dollar either strengthens or weakens against other currencies, the growth at constant currency rates will be higher or lower, respectively, than growth reported at actual exchange rates.

Table of Contents

The following table compares net sales by product line within each reportable segment and certain selected pharmaceutical products for the three and six month periods ended June 29, 2007 and June 30, 2006:

<u>(in millions)</u>	Three months ended			Percent Change in Product Net Sales

(a) Percentage change in selected product net sales is calculated on amounts reported to the nearest whole dollar.

Product Net Sales

The \$185.8 million increase in product net sales in the second quarter of 2007 compared to the second quarter of 2006 primarily resulted from an increase of \$106.8 million in our specialty pharmaceuticals product net sales and an increase of \$79.0 million in our medical device product net sales. The increase in specialty pharmaceuticals product net sales is due primarily to increases in sales of our eye care pharmaceuticals and *Botox*[®] product lines. The increase in medical device product net sales is due primarily to increases in sales of our breast aesthetics, obesity intervention and facial aesthetics product lines.

Eye care pharmaceuticals sales increased in the second quarter of 2007 compared to second quarter of 2006 primarily because of strong growth in sales of *Restasis*[®], our therapeutic treatment for chronic dry eye disease, an increase in sales of our glaucoma drug *Lumigan*[®], including strong sales growth from *Ganfort*[®], our *Lumigan*[®] and timolol combination, which we launched in 2006 in certain European markets, an increase in product net sales of

Table of Contents

Alphagan[®] P 0.1%, our most recent generation of *Alphagan*[®] for the treatment of glaucoma that we launched in the United States in the first quarter of 2006, an increase in sales of *Combigan* in Europe, Latin America, Asia and Canada, an increase in sales of *Acular LS*[®], our more recent non-steroidal anti-inflammatory, growth in sales of eye drop products, primarily *Refresh*[®] and *Optive*, our recently launched artificial tear, and an increase in sales of *Zymar*[®], a newer anti-infective. This increase in eye care pharmaceuticals sales was partially offset by lower sales of *Alphagan*[®] P 0.15% due to a general decline in U.S. wholesaler demand resulting from a decrease in promotion efforts, and lower sales of *Alphagan*[®], which is subject to generic competition. We continue to believe that generic formulations of *Alphagan*[®] may have a negative effect on future net sales of our *Alphagan*[®] franchise. We estimate the majority of the increase in our eye care pharmaceuticals sales was due to a shift in sales mix to a greater percentage of higher priced products, and an overall net increase in the volume of product sold. We increased the published list prices for certain eye care pharmaceutical products in the United States, ranging from seven percent to nine percent, effective February 3, 2007. We increased the published U.S. list price for *Restasis*[®] by seven percent, *Lumigan*[®] by seven percent, *Alphagan*[®] P 0.15% and *Alphagan*[®] P 0.1% by eight percent, *Acular LS*[®] by nine percent, *Elestar*[®] by seven percent, and *Zymar*[®] by seven percent. This increase in prices had a positive net effect on our U.S. sales for the second quarter of 2007, but the actual net effect is difficult to determine due to the various managed care sales rebate and other incentive programs in which we participate. Wholesaler buying patterns and the change in dollar value of prescription product mix also affected our reported net sales dollars, although we are unable to determine the impact of these effects. We have a policy to attempt to maintain average U.S. wholesaler inventory levels of our specialty pharmaceutical products at an amount less than eight weeks of our net sales. At June 29, 2007, based on available external and internal information, we believe the amount of average U.S. wholesaler inventories of our specialty pharmaceutical products was near the lower end of our stated policy levels.

Botox[®] sales increased in the second quarter of 2007 compared to the second quarter of 2006 primarily due to strong growth in demand in the United States and in international markets for both cosmetic and therapeutic use. Effective January 1, 2007, we increased the published price for *Botox*[®] and *Botox*[®] Cosmetic in the United States by approximately four percent, which we believe had a positive effect on our U.S. sales growth in the second quarter of 2007, primarily related to sales of *Botox*[®] Cosmetic. In the United States, the actual net effect from the increase in price for sales of *Botox*[®] for therapeutic use is difficult to determine, primarily due to rebate programs with U.S. federal and state government agencies. International *Botox*[®] sales benefited from strong sales growth for both cosmetic and therapeutic use in Europe and Latin America and cosmetic use in Asia Pacific, partially offset by slower growth in *Botox*[®] sales for therapeutic uses in Asia Pacific due to timing of shipments to distributors. We believe our worldwide market share for neuromodulators, including *Botox*[®], is currently over 85%.

Skin care sales decreased in the second quarter of 2007 compared to the second quarter of 2006 primarily due to lower sales of *Tazorac*[®] and physician dispensed creams, including *M.D. Forte*[®] and *Prevage* MD in the United States, partially offset by an increase in new product sales of *Vivité*, a physician dispensed line of skin care products. Net sales of *Tazorac*[®], *Zorac*[®] and *Avage*[®] decreased \$3.6 million, or 16.1%, to \$18.8 million in the second quarter of 2007, compared to \$22.4 million in the second quarter of 2006. The decrease in sales of *Tazorac*[®], *Zorac*[®] and *Avage*[®] resulted primarily from lower U.S. wholesaler demand, partially offset by an increase in the published U.S. list price for these products of nine percent effective February 3, 2007.

Breast aesthetics product net sales, which consist primarily of sales of silicone gel-filled and saline-filled breast implants and tissue expanders, increased \$14.3 million, or 22.1%, to \$78.9 million in the second quarter of 2007 compared to \$64.6 million in the second quarter of 2006 primarily due to strong sales growth in the United States, Europe, Latin America and Asia. Net sales were positively impacted in the United States in the second quarter of 2007 compared to the second quarter of 2006 by the November 2006 U.S. Food and Drug Administration, or FDA, approval of certain silicone gel-filled breast implants for breast augmentation, reconstruction and revision.

Obesity intervention product net sales, which consist primarily of sales of devices used for minimally invasive long-term treatments of obesity such as our *LAP-BAND*[®] System and *BIB* System, increased \$23.1 million, or 50.4%, to \$68.9 million in the second quarter of 2007 compared to \$45.8 million in the second quarter of 2006 primarily due to strong sales growth in the United States, Europe and Asia.

Facial aesthetics product net sales, which consist primarily of sales of hyaluronic acid-based and collagen-based dermal fillers used to correct facial wrinkles, increased \$31.4 million, or 175.4%, to \$49.3 million in the second quarter of 2007 compared to \$17.9 million in the second quarter of 2006 primarily due to strong sales growth in the

Table of Contents

United States, Europe and Asia. Net sales were positively impacted in the United States in the second quarter of 2007 compared to the second quarter of 2006 by the January 2007 launch of our FDA approved hyaluronic acid-based dermal fillers *Juvéderm Ultra* and *Juvéderm Ultra Plus*. This increase in net sales was partially offset by a general decline in sales of collagen-based dermal fillers due to reduced promotion efforts. Net sales of facial aesthetic products in Europe and Asia were positively impacted in the second quarter of 2007 compared to the second quarter of 2006 by the acquisition of Cornéal in January 2007.

Net sales of ophthalmic surgical devices were \$10.2 million in the second quarter of 2007 and consist of product net sales related to the Cornéal acquisition. Effective July 2, 2007, we completed the sale of the ophthalmic surgical devices business that we acquired as a part of the acquisition of Cornéal in January 2007.

Foreign currency changes increased product net sales by \$18.8 million in the second quarter of 2007 compared to the second quarter of 2006, primarily due to the strengthening of the euro, British pound, Australian dollar, Brazilian real, and the Canadian dollar compared to the U.S. dollar.

U.S. sales as a percentage of total product net sales decreased by 2.6 percentage points to 64.6% in the second quarter of 2007 compared to U.S. sales of 67.2% in the second quarter of 2006, due primarily to a decrease in U.S. skin care sales as a percentage of total product net sales, an increase in international product net sales of *Botox*[®] and dermal fillers as a percentage of total product net sales and the impact of ophthalmic surgical device product net sales, which are sold in international markets.

The \$443.0 million increase in product net sales in the first six months of 2007 compared to the same period in 2006 primarily resulted from an increase of \$189.0 million in our specialty pharmaceuticals product net sales and an increase of \$254.0 million in our medical device product net sales. The increase in product net sales for the first six months of 2007 is primarily due to the same factors discussed above with respect to the increase in product net sales in the second quarter of 2007. In addition, net sales of eye care pharmaceuticals benefited from an increase in net sales of *Elestat*[®], our topical antihistamine used for the prevention of itching associated with allergic conjunctivitis, in the first six months of 2007 compared to the first six months of 2006. The increase in medical device product net sales for the first six months of 2007 compared to the first six months of 2006 was also positively benefited by the March 2006 Inamed and January 2007 Cornéal acquisitions.

Foreign currency changes increased product net sales by \$29.8 million in the first six months of 2007 compared to the same period in 2006, primarily due to the strengthening of the euro, British pound, Australian dollar, Brazilian real, and the Canadian dollar compared to the U.S. dollar.

U.S. sales as a percentage of total product net sales decreased by 2.2 percentage points to 65.1% in the first six months of 2007 compared to U.S. sales of 67.3% in the first six months of 2006, due primarily to a decrease in U.S. skin care sales as a percentage of total product net sales and the increase in total medical device net sales, which have a higher amount of international sales as a percentage of product net sales compared to our specialty pharmaceutical net sales.

Other Revenues

Other revenues increased \$0.6 million to \$15.3 million in the second quarter of 2007 compared to \$14.7 million in the second quarter of 2006. The increase in other revenues is primarily related to an increase of approximately \$1.2 million in royalty income earned, principally from sales of *Botox*[®] in Japan by GlaxoSmithKline, or GSK, under a license agreement, and other miscellaneous royalty income, partially offset by a decrease in reimbursement income primarily related to services provided in connection with a contractual agreement for the development of *Posurdex*[®] for the ophthalmic specialty pharmaceutical market in Japan.

Other revenues increased \$4.2 million to \$29.4 million in the first six months of 2007 compared to \$25.2 million in the first six months of 2006 primarily due to the same factors described above with respect to the increase in the second quarter of 2007.

Cost of Sales

Cost of sales increased \$6.3 million, or 3.7%, in the second quarter of 2007 to \$174.5 million, or 17.9% of product net sales, compared to \$168.2 million, or 21.4% of product net sales, in the second quarter of 2006. Cost of

Table of Contents

sales includes charges of \$0.8 million in the second quarter of 2007 and \$24.0 million in the second quarter of 2006 for purchase accounting fair-market value inventory adjustment rollouts related to the January 2007 acquisition of Cornéal and the March 2006 acquisition of Inamed, respectively. Excluding the effect of these purchase accounting charges, cost of sales increased \$29.5 million, or 20.5%, in the second quarter of 2007 compared to the second quarter of 2006. This increase in cost of sales, excluding the effect of purchase accounting charges, is primarily a result of the 23.6% increase in product net sales and an increase in the mix of medical device product net sales as a percentage of total product net sales. Our medical device product net sales generally have a higher cost of sales percentage compared to our specialty pharmaceutical products. Cost of sales as a percentage of product net sales in the second quarter of 2007 compared to the second quarter of 2006 also benefited from an increase in the mix of sales related to the January 2007 launch of *Juvéderm Ultra*, *Juvéderm Ultra Plus* and the November 2006 FDA approval of certain silicone gel-filled breast implants in the United States, which generally have lower cost of sales as a percentage of product net sales compared to our collagen-based dermal fillers and saline-filled breast implants.

Cost of sales increased \$68.4 million, or 25.8%, in the first six months of 2007 to \$333.9 million, or 18.1% of product net sales, compared to \$265.5 million, or 18.9% of product net sales, in the first six months of 2006. Cost of sales includes charges of \$1.7 million in the first six months of 2007 and \$24.0 million in the first six months of 2006 for purchase accounting fair-market value inventory adjustment rollouts related to the January 2007 acquisition of Cornéal and the March 2006 acquisition of Inamed, respectively. Excluding the effect of these purchase accounting charges, cost of sales increased \$90.7 million, or 37.6%, in the first six months of 2007 compared to the first six months of 2006. This increase in cost of sales, excluding the effect of purchase accounting charges, in the first six months of 2007 compared to the first six months of 2006 is primarily a result of the 31.6% increase in product net sales. Cost of sales as a percentage of product net sales, excluding the effect of purchase accounting charges, in the first six months of 2007 compared to the first six months of 2006 was negatively impacted by the increase in medical device product net sales, which generally have a higher cost of sales percentage compared to our specialty pharmaceutical products.

Selling, General and Administrative

Selling, general and administrative, or SG&A, expenses increased \$100.3 million, or 29.7%, to \$437.8 million, or 45.0% of product net sales, in the second quarter of 2007 compared to \$337.5 million, or 42.9% of product net sales, in the second quarter of 2006. The increase in SG&A expenses in dollars primarily relates to an increase in selling and marketing expenses, principally personnel and related incentive compensation costs driven by the expansion of our U.S. facial aesthetics, neuroscience, ophthalmology and obesity intervention sales forces and our European glaucoma sales force to promote growth in product sales, especially for *Restasis*[®], *Lumigan*[®], *Combigan*[™], *Ganfort*[®], *Botox*[®], *Botox*[®] Cosmetic and *LAP-BAND*[®] System. SG&A expenses also increased in the second quarter of 2007 compared to the second quarter of 2006 due to an increase in promotion expenses and general and administrative expenses. Promotion expenses primarily increased due to additional costs to promote our medical device product lines that we obtained in the Inamed acquisition, including an increase in direct-to-consumer advertising and other promotional costs for our *LAP-BAND*[®] System and the January 2007 launch of *Juvéderm*[™] Ultra and *Juvéderm*[™] Ultra Plus in the United States. General and administrative expenses primarily increased due to an increase in legal, finance, information systems and facilities costs. In the second quarter of 2007, SG&A expenses included \$3.8 million of integration and transition costs related to the Inamed and Cornéal acquisitions and \$6.4 million of expenses associated with the settlement of a patent dispute assumed in the Inamed acquisition that related to tissue expanders. In the second quarter of 2006, SG&A expenses included \$4.7 million of integration and transition costs related to the acquisition of Inamed and \$1.3 million of transition and duplicate operating expenses primarily related to the restructuring and streamlining of our European operations.

Selling, general and administrative expenses increased \$215.8 million, or 35.3%, to \$827.2 million, or 44.8% of product net sales, in the first six months of 2007 compared to \$611.4 million, or 43.6% of product net sales, in the first six months of 2006. The increase in SG&A expenses in the first six months of 2007 compared to the same period in 2006 primarily resulted from the same factors described above with respect to the increase in SG&A expenses in the second quarter of 2007. We did not incur any significant SG&A expenses related to our medical device product lines prior to our acquisition of Inamed on March 23, 2006. In the first six months of 2007, SG&A expenses also include

\$9.2 million of integration and transition costs related to the Inamed and Cornéal acquisitions and \$2.3 million of expenses associated with the settlement of a pre-existing unfavorable distribution agreement with Cornéal. In the first six months of 2006, SG&A expenses included \$9.7 million of integration and transition

Table of Contents

costs related to the acquisition of Inamed and \$5.5 million of transition and duplicate operating expenses primarily related to the restructuring and streamlining of our European operations.

Research and Development

Research and development, or R&D, expenses increased \$14.7 million, or 10.5%, to \$155.0 million in the second quarter of 2007, or 15.9% of product net sales, compared to \$140.3 million, or 17.8% of product net sales, in the second quarter of 2006. R&D expenses for the second quarter of 2006 include a charge of \$16.5 million for an adjustment to the estimated value of in-process research and development assets acquired in the Inamed acquisition originally recorded in the first quarter of 2006. In-process research and development represents an estimate of the fair value of purchased in-process technology as of the date of acquisition that had not reached technical feasibility and had no alternative future uses in its current state. Excluding the effect of the in-process research and development charges, R&D expenses in the second quarter of 2006 were \$123.8 million, or 15.7% of product net sales. Excluding the effect of the in-process research and development charges, R&D expenses increased by \$31.2 million, or 25.2%, in the second quarter of 2007 over the second quarter of 2006. The increase in R&D expenses, excluding the in-process research and development charges, was primarily a result of higher rates of investment in our eye care pharmaceuticals and *Botox*[®] product lines, increased spending for new pharmaceutical technologies, and the addition of development expenses associated with our medical device products acquired in the Inamed, Cornéal and EndoArt acquisitions. R&D spending increases in the second quarter of 2007 compared to the second quarter of 2006 were primarily driven by an increase in clinical trial costs associated with *Posurdex*[®], *Trivaris*, certain *Botox*[®] indications for overactive bladder and migraine headache, and alpha agonists for the treatment of neuropathic pain, and an increase in costs related to breast implant follow-up studies and additional spending on obesity intervention technologies.

Research and development expenses decreased \$444.0 million, or 54.8%, to \$365.7 million in the first six months of 2007, or 19.8% of product net sales, compared to \$809.7 million, or 57.7% of product net sales, in the first six months of 2006. R&D expenses for the first six months of 2007 include a charge of \$72.0 million for in-process research and development assets acquired in the EndoArt acquisition, and the first six months of 2006 includes a charge of \$579.3 million for in-process research and development assets acquired in the Inamed acquisition. Excluding the effect of the in-process research and development charges, R&D expenses increased by \$63.3 million, or 27.5%, to \$293.7 million in the first six months of 2007, or 15.9% of product net sales, compared to \$230.4 million, or 16.4% of product net sales in first six months of 2006. The increase in R&D expenses in dollars, excluding the in-process research and development charges, was primarily a result of the same factors described above with respect to the increase in R&D expenses in the second quarter of 2007 and an increase in clinical trial costs for memantine.

The decrease in R&D expenses, excluding the in-process research and development charges, as a percentage of product net sales in the second quarter of 2007 compared to the second quarter of 2006 and in the first six months of 2007 compared to the first six months of 2006 was primarily due to an increase in mix of R&D expenses for our medical device products, which have a lower level of R&D expense as a percentage of product net sales relative to our specialty pharmaceutical products.

Amortization of Acquired Intangible Assets

Amortization of acquired intangible assets increased \$4.2 million to \$29.0 million in the second quarter of 2007, or 3.0% of product net sales, compared to \$24.8 million, or 3.2% of product net sales, in the second quarter of 2006. This increase in amortization expense is primarily due to an increase in amortization of acquired intangible assets related to the Cornéal and EndoArt acquisitions.

Amortization of acquired intangible assets increased \$27.5 million to \$57.4 million in the first six months of 2007, or 3.1% of product net sales, compared to \$29.9 million, or 2.1% of product net sales, in the first six months of 2006. This increase in amortization expense in dollars and as a percentage of product net sales is primarily due to an increase in amortization of acquired intangible assets related to the Inamed, Cornéal and EndoArt acquisitions.

Restructuring Charges, Integration Costs, and Transition and Duplicate Operating Expenses

Restructuring charges in the second quarter of 2007 were \$10.1 million compared to \$5.7 million in the second

Table of Contents

quarter of 2006. Restructuring charges in the first six months of 2007 were \$13.3 million compared to \$8.5 million in the first six months of 2006. The \$4.4 million increase in restructuring charges in the second quarter of 2007 compared to the second quarter of 2006 and \$4.8 million increase in restructuring charges in the first six months of 2007 compared to the first six months of 2006 were due primarily to an increase in restructuring costs associated with the integration of the Cornéal and Inamed operations, partially offset by a decrease in restructuring costs associated with the streamlining of our European operations.

Restructuring and Integration of Cornéal Operations

In connection with our January 2007 Cornéal acquisition, we initiated a restructuring and integration plan to merge the Cornéal facial aesthetics business operations with our operations. Specifically, the restructuring and integration activities involve moving key business functions to our locations, integrating Cornéal's distributor operations with our existing distribution network and integrating Cornéal's information systems with our information systems. We currently estimate that the total pre-tax charges resulting from the restructuring and integration of the Cornéal facial aesthetics business operations will be between \$28.0 million and \$34.0 million, consisting primarily of contract termination costs, salaries, travel and consulting costs, all of which are expected to be cash expenditures.

The foregoing estimates are based on assumptions relating to, among other things, a reduction of approximately 26 positions, principally general and administrative positions at Cornéal locations. Charges associated with the workforce reduction, including severance, relocation and one-time termination benefits, and payments to public employment and training programs, are currently expected to total approximately \$3.0 million to \$5.0 million. Estimated charges include estimates for contract termination costs, including the termination of duplicative distribution arrangements. Contract termination costs are expected to total approximately \$16.0 million to \$20.0 million.

We began to record costs associated with the restructuring and integration of the Cornéal facial aesthetics business in the first quarter of 2007 and expect to continue to incur costs up through and including the second quarter of 2008. During the three and six month periods ended June 29, 2007, we recorded pre-tax restructuring charges of \$2.0 million associated with the termination of duplicative distribution arrangements. During the three and six month periods ended June 29, 2007, we recorded pre-tax integration and transition costs of \$2.1 million and \$5.6 million, respectively, as selling, general and administrative expenses.

Restructuring and Integration of Inamed Operations

In connection with the March 2006 Inamed acquisition, we initiated a global restructuring and integration plan to merge Inamed's operations with our operations and to capture synergies through the centralization of certain general and administrative and commercial functions. Specifically, the restructuring and integration activities involve eliminating certain general and administrative positions, moving key commercial Inamed business functions to our locations around the world, integrating Inamed's distributor operations with our existing distribution network and integrating Inamed's information systems with our information systems.

We have incurred, and anticipate that we will continue to incur, charges relating to severance, relocation and one-time termination benefits, payments to public employment and training programs, integration and transition costs, and contract termination costs in connection with the Inamed restructuring. We currently estimate that the total pre-tax charges resulting from the restructuring, including integration and transition costs, will be between \$50.0 million and \$61.0 million, all of which are expected to be cash expenditures. In addition to the pre-tax charges, we expect to incur capital expenditures of approximately \$20.0 million to \$25.0 million, primarily related to the integration of information systems. We also expect to pay an additional amount of approximately \$1.5 million to \$2.0 million for taxes related to intercompany transfers of trade businesses and net assets.

The foregoing estimates are based on assumptions relating to, among other things, a reduction of approximately 60 positions, principally general and administrative positions at Inamed locations. These workforce reduction activities began in the second quarter of 2006 and are expected to be substantially completed by the end of 2007. Charges associated with the workforce reduction, including severance, relocation and one-time termination benefits, and payments to public employment and training programs, are currently expected to total approximately \$11.0 million to \$13.0 million. Estimated charges include estimates for contract and lease termination costs, including the

Table of Contents

termination of duplicative distribution arrangements. Contract and lease termination costs are expected to total approximately \$13.0 million to \$17.0 million. We began to record these costs in the second quarter of 2006 and expect to continue to incur them up through and including the fourth quarter of 2007.

On January 30, 2007, our Board of Directors approved an additional plan to restructure and eventually sell or close our collagen manufacturing facility in Fremont, California that we acquired in the Inamed acquisition. This plan is the result of a reduction in anticipated future market demand for human and bovine collagen products. In connection with the restructuring and eventual sale or closure of the collagen manufacturing facility, we estimate that total pre-tax charges for severance, lease termination and contract settlement costs will be between \$6.0 million and \$8.0 million, all of which are expected to be cash expenditures. The foregoing estimates are based on assumptions relating to, among other things, a reduction of approximately 69 positions, consisting principally of manufacturing positions at our facility, that are expected to result in estimated total employee severance costs of approximately \$1.5 million to \$2.0 million. Estimated charges for contract and lease termination costs are expected to total approximately \$4.5 million to \$6.0 million. We began to record these costs in the first quarter of 2007 and expect to continue to incur them up through and including the fourth quarter of 2008. Prior to any closure or sale of the collagen manufacturing facility, we intend to manufacture a sufficient quantity of inventories of collagen products to meet estimated market demand through 2010.

As of June 29, 2007, we have recorded cumulative pre-tax restructuring charges of \$23.7 million, cumulative pre-tax integration and transition costs of \$24.3 million, and \$1.6 million for income tax costs related to intercompany transfers of trade businesses and net assets. The restructuring charges primarily consist of employee severance, one-time termination benefits, employee relocation, termination of duplicative distributor agreements and other costs related to the restructuring of the Inamed operations. The integration and transition costs primarily consist of salaries, travel, communications, recruitment and consulting costs. During the three and six month periods ended June 29, 2007, we recorded \$7.1 million and \$10.2 million, respectively, of restructuring charges. Integration and transition costs included in selling, general and administrative expenses were \$1.7 million and \$3.6 million for the three and six month periods ended June 29, 2007, respectively.

During the three and six month periods ended June 30, 2006, we recorded pre-tax restructuring charges of \$1.7 million related to the restructuring of the Inamed operations. For the three month period ended June 30, 2006, we recorded \$5.3 million of integration and transition costs associated with the Inamed integration, consisting of \$0.4 million in cost of sales, \$4.7 million in selling, general and administrative expenses and \$0.2 million in research and development expenses. For the six month period ended June 30, 2006, we recorded \$10.4 million of integration and transition costs associated with the Inamed integration, consisting of \$0.5 million in cost of sales, \$9.7 million in selling, general and administrative expenses and \$0.2 million in research and development expenses.

The following table presents the cumulative restructuring activities related to the Inamed operations through June 29, 2007:

	Employee Severance	Contract and Lease Termination Costs (in millions)	Total
Net charge during 2006	\$ 6.1	\$ 7.4	\$ 13.5
Spending	(2.1)	(2.5)	(4.6)
Balance at December 31, 2006	4.0	4.9	8.9
Net charge during the six month period ended June 29, 2007	4.6	5.6	10.2
Spending	(3.1)	(8.3)	(11.4)
Balance at June 29, 2007 (included in Other accrued expenses)	\$ 5.5	\$ 2.2	\$ 7.7

Restructuring and Streamlining of European Operations

Effective January 2005, our Board of Directors approved the initiation and implementation of a restructuring of certain activities related to our European operations to optimize operations, improve resource allocation and create a scalable, lower cost and more efficient operating model for our European research and development and commercial activities. Specifically, the restructuring involved moving key European research and development and select commercial functions from our Mougins, France and other European locations to our Irvine, California, Marlow, United Kingdom and Dublin, Ireland facilities and streamlining functions in our European management services

Table of Contents

group. The workforce reduction began in the first quarter of 2005 and was substantially completed by the close of the second quarter of 2006.

As of December 31, 2006, we substantially completed all activities related to the restructuring and streamlining of our European operations. As of December 31, 2006, we recorded cumulative pre-tax restructuring charges of \$37.5 million, primarily related to severance, relocation and one-time termination benefits, payments to public employment and training programs, contract termination costs and capital and other asset-related expenses. During the second quarter and first six months of 2007, we recorded an additional \$1.0 million of restructuring charges for an abandoned leased facility related to our European operations. During the three and six month periods ended June 30, 2006, we recorded \$3.2 million and \$6.1 million, respectively, of restructuring charges related to our European operations. As of June 29, 2007, remaining accrued expenses of \$6.9 million for restructuring charges related to the restructuring and streamlining of our European operations are included in Other accrued expenses and Other liabilities in the amount of \$3.2 million and \$3.7 million, respectively.

Additionally, as of December 31, 2006, we have incurred cumulative transition and duplicate operating expenses of \$11.8 million relating primarily to legal, consulting, recruiting, information system implementation costs and taxes in connection with the European restructuring activities. For the three month period ended June 30, 2006, we recorded \$0.6 million of transition and duplicate operating expenses, consisting of \$0.4 million in selling, general and administrative expenses and \$0.2 million in research and development expenses. For the six month period ended June 30, 2006, we recorded \$2.5 million of transition and duplicate operating expenses, consisting of \$2.1 million in selling, general and administrative expenses and \$0.4 million in research and development expenses. Additionally, during the six month period ended June 30, 2006, we recorded a \$3.4 million loss related to the sale of our Mougins, France facility, which was included in selling, general and administrative expenses. There were no transition and duplicate operating expenses related to the restructuring and streamlining of our European operations recorded in the first six months of 2007.

Other Restructuring Activities

Included in the first six months of 2007 are \$0.1 million in restructuring charges related to the February 2007 EndoArt acquisition. Included in the second quarter and first six months of 2006 are \$0.8 million and \$1.1 million, respectively, of restructuring charges related to the scheduled June 2005 termination of our manufacturing and supply agreement with Advanced Medical Optics, which was spun-off in June 2002. Also included in the first six months of 2006 is a \$0.4 million restructuring charge reversal related to the streamlining of our operations in Japan.

Operating Income (Loss)

Management evaluates business segment performance on an operating income (loss) basis exclusive of general and administrative expenses and other indirect costs, restructuring charges, in-process research and development expenses, amortization of identifiable intangible assets related to business acquisitions and certain other adjustments, which are not allocated to our business segments for performance assessment by our chief operating decision maker. Other adjustments excluded from our business segments for purposes of performance assessment represent income or expenses that do not reflect, according to established company-defined criteria, operating income or expenses associated with our core business activities.

General and administrative expenses, other indirect costs and other adjustments not allocated to our business segments for purposes of performance assessment consisted of the following items: for the second quarter of 2007, general and administrative expenses of \$74.2 million, integration and transition costs related to the acquisitions of Inamed and Cornéal of \$3.8 million, \$6.4 million of expenses associated with the settlement of a patent dispute, a purchase accounting fair-market value inventory adjustment related to the Cornéal acquisition of \$0.8 million, and other net indirect costs of \$7.2 million; for the second quarter of 2006, general and administrative expenses of \$62.7 million, a purchase accounting fair-market value inventory adjustment related to the Inamed acquisition of \$24.0 million, integration and transition costs related to the Inamed operations of \$5.3 million, transition and duplicate operating expenses related to the restructuring and streamlining of our operations in Europe of \$1.5 million, and other net indirect income of \$0.3 million; for the first six months of 2007, general and administrative expenses of \$145.7 million, integration and transition costs related to the acquisitions of Inamed and Cornéal of \$9.2 million, \$6.4 million of expenses associated with the settlement of a patent dispute, \$2.3 million of expenses associated with

the settlement of a pre-existing unfavorable distribution agreement with Cornéal, a purchase accounting fair-market
40

Table of Contents

value inventory adjustment related to the Cornéal acquisition of \$1.7 million, and other net indirect costs of \$10.7 million; and for the first six months of 2006, general and administrative expenses of \$108.6 million, a purchase accounting fair-market value inventory adjustment related to the Inamed acquisition of \$24.0 million, integration and transition costs related to the Inamed operations of \$10.4 million, transition and duplicate operating expenses related to the restructuring and streamlining of our operations in Europe of \$5.9 million, and other net indirect income of \$0.4 million.

The following table presents operating income for each reportable segment for the three and six month periods ended June 29, 2007 and June 30, 2006 and a reconciliation of our segments operating income to consolidated operating income (loss):

	Three months ended		Six months ended	
	June 29, 2007	June 30, 2006	June 29, 2007	June 30, 2006
	(in millions)		(in millions)	
Operating income (loss):				
Specialty pharmaceuticals	\$251.5	\$208.2	\$474.1	\$ 406.3
Medical devices	56.2	51.9	110.8	51.9
Total segments	307.7	260.1	584.9	458.2
General and administrative expenses, other indirect costs and other adjustments	92.4	93.2	176.0	148.5
In-process research and development		16.5	72.0	579.3
Amortization of acquired intangible assets (a)	23.5	19.5	46.5	19.5
Restructuring charges	10.1	5.7	13.3	8.5
Total operating income (loss)	\$181.7	\$125.2	\$277.1	\$(297.6)

(a) Represents amortization of identifiable intangible assets related to the Inamed, Cornéal and EndoArt acquisitions.

Our consolidated operating income in the second quarter of 2007 was \$181.7 million, or 18.7% of product net sales, compared to consolidated operating income of \$125.2 million, or 15.9% of product net sales in the second quarter of 2006. The \$56.5 million increase in consolidated operating income was due to a \$185.8 million increase in product net sales and a \$0.6 million increase in other revenues, partially offset by a \$6.3 million increase in cost of sales, a \$100.3 million increase in SG&A expenses, a \$14.7 million increase in R&D expenses, a \$4.2 million increase in amortization of acquired intangible assets, and a \$4.4 million increase in restructuring charges.

Our specialty pharmaceuticals segment operating income in the second quarter of 2007 was \$251.5 million, compared to operating income of \$208.2 million in the second quarter of 2006. The \$43.3 million increase in specialty pharmaceuticals segment operating income was due primarily to an increase in product net sales of our eye care pharmaceuticals and *Botox*[®] product lines, partially offset by an increase in cost of sales, an increase in promotion, selling and marketing expenses, primarily due to increased sales personnel costs and additional promotion and marketing expenses to support our expanded selling efforts, and an increase in research and development expenses.

Our medical devices segment operating income in the second quarter of 2007 was \$56.2 million, compared to operating income of \$51.9 million in the second quarter of 2006. The increase in our medical devices segment operating income of \$4.3 million in the second quarter of 2007 was due primarily to an increase in product net sales, and the combined operating results of the Cornéal and EndoArt acquisitions, partially offset by an increase in cost of sales, an increase in promotion, selling and marketing expenses, and an increase in research and development expenses.

Our consolidated operating income in the first six months of 2007 was \$277.1 million, or 15.0% of product net sales, compared to a consolidated operating loss of \$297.6 million, or (21.2)% of product net sales in the first six months of 2006. The \$574.7 million increase in consolidated operating income was due to a \$443.0 million increase in product net sales, a \$4.2 million increase in other revenues, and a \$444.0 million decrease in R&D expenses, partially offset by a \$68.4 million increase in cost of sales, a \$215.8 million increase in SG&A expenses, a \$27.5 million increase in amortization of acquired intangible assets, and a \$4.8 million increase in restructuring charges.

Table of Contents

Our specialty pharmaceuticals segment operating income for the six month period ended June 29, 2007 was \$474.1 million, compared to operating income of \$406.3 million for the six month period ended June 30, 2006. The \$67.8 million increase in specialty pharmaceuticals segment operating income was due primarily to the same reasons discussed in the analysis of the second quarter of 2007.

Our medical devices segment operating income for the six month period ended June 29, 2007 was \$110.8 million, compared to operating income of \$51.9 million for the six month period ended June 30, 2006. The increase in our medical devices segment operating income of \$58.9 million was due to the combined operating results of the Inamed, Cornéal and EndoArt acquisitions in 2007 compared to only three months of operating results for the Inamed acquisition only in 2006.

Non-Operating Income and Expenses

Total net non-operating expenses in the second quarter of 2007 were \$7.4 million compared to \$12.9 million in the second quarter of 2006. Interest income in the second quarter of 2007 was \$14.8 million compared to interest income of \$12.3 million in the second quarter of 2006. The increase in interest income was primarily due to higher average cash equivalent balances earning interest of approximately \$176 million and an increase in average interest rates earned on all cash equivalent balances earning interest of approximately 0.6% in the second quarter of 2007 compared to the second quarter of 2006. Interest expense decreased \$3.0 million to \$17.5 million in the second quarter of 2007 compared to \$20.5 million in the second quarter of 2006, primarily due to the write-off of unamortized debt origination fees of \$3.2 million in the second quarter of 2006 as a result of the redemption of our zero coupon convertible senior notes due 2022. During the second quarter of 2007, we recorded a net unrealized loss on derivative instruments of \$0.4 million compared to a net unrealized loss of \$0.2 million in the second quarter of 2006. Other, net expense was \$4.3 million in the second quarter of 2007, consisting primarily of \$4.3 million in net realized losses from foreign currency transactions. Other, net expense was \$4.5 million in the second quarter of 2006, which includes \$4.8 million of accrued costs for a previously disclosed contingency involving non-income taxes in Brazil.

Total net non-operating expenses in the first six months of 2007 were \$12.9 million compared to \$13.2 million in the first six months of 2006. Interest income in the first six months of 2007 was \$30.2 million compared to interest income of \$21.5 million in the first six months of 2006. The increase in interest income was primarily due to a \$4.9 million reversal of previously recognized estimated statutory interest income included in the first six months of 2006 related to a matter involving the recovery of previously paid state income taxes, higher average cash equivalent balances earning interest of approximately \$157 million and an increase in average interest rates earned on all cash equivalent balances earning interest of approximately 0.7% in the first six months of 2007 compared to the same period in 2006. Interest expense increased \$7.7 million to \$36.0 million in the first six months of 2007 compared to \$28.3 million in the first six months of 2006, primarily due to an increase in average outstanding borrowings for the first six months of 2007 compared to the same period in 2006, partially offset by the write-off of unamortized debt origination fees of \$4.4 million in the first six months of 2006 due to the redemption of our zero coupon convertible senior notes due 2022. We incurred a substantial increase in borrowings to fund the Inamed acquisition on March 23, 2006. During the first six months of 2007, we recorded a net unrealized loss on derivative instruments of \$1.7 million compared to a net unrealized loss of \$1.2 million in the first six months of 2006. Other, net expense was \$5.4 million in the first six months of 2007, consisting primarily of \$5.6 million in net realized losses from foreign currency transactions. Other, net expense was \$5.2 million in the first six months of 2006, which includes \$4.8 million of accrued costs for a previously disclosed contingency involving non-income taxes in Brazil and net realized losses from foreign currency transactions of \$1.1 million.

Income Taxes

Our effective tax rate for the second quarter of 2007 was 20.7%. Included in our operating income for the second quarter of 2007 are total integration and transition costs of \$3.8 million related to the Inamed and Cornéal acquisitions, total restructuring charges of \$10.1 million and a legal settlement cost of \$6.4 million. In the second quarter of 2007, we recorded income tax benefits of \$1.0 million related to the total integration and transition costs, \$2.2 million related to the total restructuring charges and \$2.5 million related to the legal settlement cost. Included in the provision for income taxes in the second quarter of 2007 is \$2.1 million of tax benefit related to state income tax refunds for the settlement of tax audits. Excluding the impact of the total pre-tax charges of \$20.3 million and the total

net income tax benefit of \$7.8 million for the items discussed above, our adjusted effective tax rate for the
42

Table of Contents

second quarter of 2007 was 22.5%. We believe the use of an adjusted effective tax rate provides a more meaningful measure of the impact of income taxes on our results of operations because it excludes the effect of certain discrete items that are not included as part of our core business activities. This allows stockholders to better determine the effective tax rate associated with our core business activities.

The calculation of our adjusted effective tax rate for the second quarter of 2007 is summarized below:

	2007 (in millions)
Earnings before income taxes and minority interest, as reported	\$ 174.3
Total integration and transition costs	3.8
Total restructuring charges	10.1
Legal settlement cost	6.4
	\$ 194.6
Provision for income taxes, as reported	\$ 36.0
Income tax benefit for:	
Total integration and transition costs	1.0
Total restructuring charges	2.2
Legal settlement cost	2.5
State income tax refunds	2.1
	\$ 43.8
Adjusted effective tax rate	22.5%

Our effective tax rate for the first six months of 2007 was 31.1%. Included in our operating income for the first six months of 2007 are pre-tax charges of \$72.0 million for in-process research and development acquired in the EndoArt acquisition, \$2.3 million of expenses associated with the settlement of a pre-existing unfavorable distribution agreement with Cornéal, total integration and transition costs of \$9.2 million related to the Inamed and Cornéal acquisitions, total restructuring charges of \$13.3 million and a legal settlement cost of \$6.4 million. In the first six months of 2007, we recorded income tax benefits of \$2.0 million related to the total integration and transition costs, \$3.3 million related to the total restructuring charges and \$2.5 million related to the legal settlement cost. We did not record any income tax benefit for the in-process research and development charges or the expenses associated with the settlement of the pre-existing unfavorable distribution agreement with Cornéal. Included in the provision for income taxes in the first six months of 2007 is \$1.6 million of tax benefit related to state income tax refunds for the settlement of tax audits. Excluding the impact of the total pre-tax charges of \$103.2 million and the total net income tax benefit of \$9.4 million for the items discussed above, our adjusted effective tax rate for the first six months of 2007 was 24.9%.

Table of Contents

The calculation of our adjusted effective tax rate for the first six months of 2007 is summarized below:

	2007 (in millions)
Earnings before income taxes and minority interest, as reported	\$264.2
In-process research and development expense	72.0
Settlement of pre-existing unfavorable distribution agreement with Corneal	2.3
Total integration and transition costs	9.2
Total restructuring charges	13.3
Legal settlement cost	6.4
	\$367.4
Provision for income taxes, as reported	\$ 82.2
Income tax benefit for:	
Total integration and transition costs	2.0
Total restructuring charges	3.3
Legal settlement cost	2.5
State income tax refunds	1.6
	\$ 91.6
Adjusted effective tax rate	24.9%

Our effective tax rates for the second quarter and the first six months of 2006 were 33.7% and 19.2%, respectively, our effective tax rate for the year ended December 31, 2006 was 551.3%, and our adjusted effective tax rate for the year ended December 31, 2006 was 25.9%. Included in our operating loss for the year ended December 31, 2006 are pre-tax charges of \$579.3 million for in-process research and development acquired in the Inamed acquisition, a \$47.9 million charge to cost of sales associated with the Inamed purchase accounting fair-market value inventory adjustment rollout, total integration, transition and duplicate operating expenses of \$26.9 million related to the Inamed acquisition and restructuring and streamlining of our European operations, a \$28.5 million contribution to The Allergan Foundation and total restructuring charges of \$22.3 million. In 2006, we recorded income tax benefits of \$15.7 million related to the Inamed purchase accounting fair-market value inventory adjustment rollout, \$9.1 million related to total integration, transition and duplicate operating expenses, \$11.3 million related to the contribution to The Allergan Foundation, and \$3.5 million related to total restructuring charges. Also included in the provision for income taxes in 2006 is a \$17.2 million reduction in the provision for income taxes due to the reversal of the valuation allowance against a deferred tax asset that we have determined is now realizable, a reduction of \$14.5 million in estimated income taxes payable primarily due to the resolution of several significant previously uncertain income tax audit issues associated with the completion of an audit by the U.S. Internal Revenue Service for tax years 2000 to 2002, a \$2.8 million reduction in income taxes payable previously estimated for the 2005 repatriation of foreign earnings that had been permanently re-invested outside the United States, a beneficial change of \$1.2 million for the expected income tax benefit for previously paid state income taxes, which became recoverable due to a favorable state court decision concluded in 2004, an unfavorable adjustment of \$3.9 million for a previously filed income tax return currently under examination and a provision for income taxes of \$1.6 million related to intercompany transfers of trade businesses and net assets associated with the Inamed acquisition. Excluding the impact of the total pre-tax charges of \$704.9 million and the total net income tax benefits of \$69.8 million for the items discussed above, our

adjusted effective tax rate for 2006 was 25.9%.

Table of Contents

The calculation of our 2006 adjusted effective tax rate is summarized below:

	2006 (in millions)
Earnings before income taxes and minority interest, as reported	\$ (19.5)
In-process research and development expense	579.3
Inamed fair-market value inventory rollout	47.9
Total integration, transition and duplicate operating expenses	26.9
Contribution to The Allergan Foundation	28.5
Total restructuring charges	22.3
	\$685.4
Provision for income taxes, as reported	\$ 107.5
Income tax (provision) benefit for:	
Inamed fair-market value inventory rollout	15.7
Total integration, transition and duplicate operating expenses	9.1
Contribution to The Allergan Foundation	11.3
Total restructuring charges	3.5
Reduction in valuation allowance associated with a refund claim	17.2
Resolution of uncertain income tax audit issues	14.5
Adjustment to estimated taxes on 2005 repatriation of foreign earnings	2.8
Recovery of previously paid state income taxes	1.2
Unfavorable adjustment for previously filed tax return currently under examination	(3.9)
Intercompany transfers of trade businesses and net assets	(1.6)
	\$177.3
Adjusted effective tax rate	25.9%

The decrease in the adjusted effective tax rate to 24.9% in the first six months of 2007 compared to the adjusted effective tax rate for the year ended December 31, 2006 of 25.9% is primarily due to a decrease in the mix of earnings in higher tax rate jurisdictions resulting from increased deductions in the United States for research and development expenses and interest expense, and the beneficial tax rate effect from increased deductions related to the amortization of acquired intangible assets for the full fiscal year 2007 compared to approximately nine months of such beneficial tax rate effect in fiscal year 2006.

The lower adjusted effective tax rate of 22.5% in the second quarter of 2007 compared to the adjusted effective tax rate of 24.9% in the first six months of 2007 is primarily due to the catch-up effect in the second quarter of 2007 related to adjusting the estimated annual effective tax rate for 2007 to a lower amount compared to the estimate used in the first quarter of 2007.

Net Earnings (Loss)

Our net earnings in the second quarter of 2007 were \$137.8 million compared to net earnings of \$74.2 million in the second quarter of 2006. The \$63.6 million increase in net earnings was primarily the result of the increase in operating income of \$56.5 million, the decrease in net non-operating expense of \$5.5 million and the decrease in the provision for income taxes of \$1.8 million.

Our net earnings in the first six months of 2007 were \$181.6 million compared to a net loss of \$370.6 million in the first six months of 2006. The \$552.2 million increase in net earnings was primarily the result of the increase in

operating income of \$574.7 million, partially offset by the increase in the provision for income taxes of \$22.5 million.

LIQUIDITY AND CAPITAL RESOURCES

We assess our liquidity by our ability to generate cash to fund our operations. Significant factors in the management of liquidity are: funds generated by operations; levels of accounts receivable, inventories, accounts payable and capital expenditures; the extent of our stock repurchase program; funds required for acquisitions; adequate credit facilities; and financial flexibility to attract long-term capital on satisfactory terms.

Historically, we have generated cash from operations in excess of working capital requirements. The net cash

Table of Contents

provided by operating activities for the six month period ended June 29, 2007 was \$330.8 million compared to cash provided of \$322.3 million for the six month period ended June 30, 2006. The increase in net cash provided by operating activities of \$8.5 million was primarily due to an increase in earnings, including the effect of adjusting for non-cash items, partially offset by a net increase in cash required to fund growth in net operating assets and liabilities and an increase in income taxes paid.

Net cash used in investing activities in the first six months of 2007 was \$368.4 million. Net cash used in investing activities in the first six months of 2006 was \$1,394.1 million. In the first six months of 2007, we paid \$313.0 million, net of cash acquired, for the acquisitions of Cornéal and EndoArt. In the first six months of 2006, we paid \$1,328.3 million, net of cash acquired, for the cash portion of the Inamed acquisition. We invested \$49.0 million in new facilities and equipment during the first six months of 2007 compared to \$49.3 million during the same period in 2006. Additionally, in the first six months of 2007, we capitalized as intangible assets total milestone payments of \$5.0 million related to *Restasis*[®] and collected \$8.9 million on a receivable related to the 2006 sale of our Mougins, France facility. In the first six months of 2006, we capitalized as intangible assets total milestone fees of \$11.0 million for regulatory approvals to commercialize the *Juvéderm*[™] dermal filler family of products in the United States and Australia and collected \$3.2 million primarily from the sale of our Mougins, France facility. Net cash used in investing activities also includes \$10.3 million and \$9.0 million to acquire software during the first six months of 2007 and 2006, respectively. We currently expect to invest between \$130 million and \$140 million in capital expenditures for administrative and manufacturing facilities and other property, plant and equipment during 2007.

Net cash used in financing activities was \$103.2 million in the first six months of 2007 compared to net cash provided by financing activities of \$666.9 million in the first six months of 2006. In the first six months of 2007, we repurchased approximately 1.1 million shares of our common stock for \$61.7 million, had net repayments of notes payable of \$107.4 million and paid \$30.3 million in dividends. This use of cash was partially offset by \$83.8 million received from the sale of stock to employees and \$12.4 million in excess tax benefits from share-based compensation. In the first six months of 2006, in order to fund part of the cash portion of the Inamed purchase price, we borrowed \$825.0 million under a bridge credit facility entered into in connection with the transaction. On April 12, 2006, we completed concurrent private placements of \$750 million in aggregate principal amount of 1.50% Convertible Senior Notes due 2026, or 2026 Convertible Notes, and \$800 million in aggregate principal amount of 5.75% Senior Notes due 2016, or 2016 Notes. We used part of the proceeds from these debt issuances to repay all borrowings under the bridge credit facility. Additionally, in the first six months of 2006 we received \$79.0 million from the sale of stock to employees, \$13.0 million upon termination of an interest rate swap contract related to the 2016 Notes and \$15.0 million in excess tax benefits from share-based compensation. These amounts were partially offset by net repayments of notes payable of \$110.5 million, cash payments of \$19.3 million in offering fees related to the issuance of the 2026 Convertible Notes and the 2016 Notes, cash paid on the conversion of our zero coupon convertible senior notes due 2022 of \$521.9 million, repurchase of approximately 5.8 million shares of our common stock for approximately \$307.8 million and \$28.3 million in dividends paid to stockholders. Effective July 31, 2007, our Board of Directors declared a quarterly cash dividend of \$0.05 per share, payable on September 7, 2007 to stockholders of record on August 17, 2007. We maintain an evergreen stock repurchase program. Our evergreen stock repurchase program authorizes us to repurchase our common stock for the primary purpose of funding our stock-based benefit plans. Under the stock repurchase program, we may maintain up to 18.4 million repurchased shares in our treasury account at any one time. As of June 29, 2007, we held approximately 1.6 million treasury shares under this program. We are uncertain as to the level of stock repurchases, if any, to be made in the future.

The 2026 Convertible Notes, pay interest semi-annually at a rate of 1.50% per annum and are convertible, at the holder's option, at an initial conversion rate of 15.7904 shares per \$1,000 principal amount of notes. In certain circumstances the 2026 Convertible Notes may be convertible into cash in an amount equal to the lesser of their principal amount or their conversion value. If the conversion value of the 2026 Convertible Notes exceeds their principal amount at the time of conversion, we will also deliver common stock or, at our election, a combination of cash and common stock for the conversion value in excess of the principal amount. We will not be permitted to redeem the 2026 Convertible Notes prior to April 5, 2009, will be permitted to redeem the 2026 Convertible Notes from and after April 5, 2009 to April 4, 2011 if the closing price of our common stock reaches a specified threshold,

and will be permitted to redeem the 2026 Convertible Notes at any time on or after April 5, 2011. Holders of the 2026 Convertible Notes will also be able to require us to redeem the 2026 Convertible Notes on April 1, 2011, April 1, 2016 and April 1, 2021 or upon a change in control of us. The 2026 Convertible Notes mature on April 1, 2026, unless previously redeemed by us or earlier converted by the note holders.

Table of Contents

The 2016 Notes, were sold at 99.717% of par value with an effective interest rate of 5.79%, will pay interest semi-annually at a rate of 5.75% per annum, and are redeemable at any time at our option, subject to a make-whole provision based on the present value of remaining interest payments at the time of the redemption. The aggregate outstanding principal amount of the 2016 Notes will be due and payable on April 1, 2016, unless earlier redeemed by us.

On January 31, 2007, we entered into a nine-year, two-month interest rate swap with a \$300.0 million notional amount with semi-annual settlements and quarterly interest rate reset dates. The swap receives interest at a fixed rate of 5.75% and pays interest at a variable interest rate equal to LIBOR plus 0.368%, and effectively converts \$300.0 million of our 2016 Notes to a variable interest rate. Based on the structure of the hedging relationship, the hedge meets the criteria for using the short-cut method for a fair value hedge under the provisions of Statement of Financial Accounting Standards No. 133, *Accounting for Derivative Instruments and Hedging Activities* (SFAS No. 133). Under the provisions of SFAS No. 133, the investment in the derivative and the related long-term debt are recorded at fair-value. As a result, we have recognized a liability associated with the fair-value of the derivative of \$5.6 million reported in Other liabilities and a corresponding decrease in Long-term debt of \$5.6 million reported in our unaudited condensed consolidated balance sheet as of June 29, 2007. As the hedge meets the criteria for using the short-cut method under the provisions of SFAS No. 133, the change in the fair-value of the derivative is assumed to exactly equal the related change in the fair-value of the 2016 Notes, so there is no gain or loss reported in our unaudited condensed consolidated statements of operations related to the interest rate hedge.

At June 29, 2007, we had a committed long-term credit facility, a commercial paper program, a medium term note program, an unused debt shelf registration statement that we may use for a new medium term note program and other issuances of debt securities, and various foreign bank facilities. In May 2007, we amended the termination date of our committed long-term credit facility to May 2012. The termination date can be further extended from time to time upon our request and acceptance by the issuer of the facility for a period of one year from the last scheduled termination date for each request accepted. The committed long-term credit facility allows for borrowings of up to \$800 million. The commercial paper program also provides for up to \$600 million in borrowings. The current medium term note program allows us to issue up to an additional \$6.0 million in registered notes on a non-revolving basis. The debt shelf registration statement provides for up to \$350 million in additional debt securities. Borrowings under the committed long-term credit facility and medium-term note program are subject to certain financial and operating covenants that include, among other provisions, maintaining maximum leverage ratios. Certain covenants also limit subsidiary debt. We believe we were in compliance with these covenants at June 29, 2007. As of June 29, 2007, we had no borrowings under our committed long-term credit facility, \$59.0 million in borrowings outstanding under the medium term note program, \$6.5 million borrowings outstanding under various foreign bank facilities and no borrowings under our commercial paper program.

At December 31, 2006, we had consolidated unrecognized net actuarial losses of \$162.1 million which were included in our accrued pension benefit liabilities. The unrecognized net actuarial losses resulted primarily from lower than expected investment returns on pension plan assets in 2002 and 2001 and decreases in the discount rates used to measure projected benefit obligations that occurred from 2001 to 2005. Assuming constant actuarial assumptions estimated as of our pension plans measurement date of September 30, 2006, we expect the amortization of these unrecognized net actuarial losses, which is a component of our annual pension cost, to be approximately \$11.3 million in 2007 compared to \$13.0 million in 2006. The future amortization of the unrecognized net actuarial losses is not expected to materially affect future pension contribution requirements. In the first six months of 2007 and 2006, we paid pension contributions of \$4.5 million and \$5.0 million, respectively, to our U.S. defined benefit pension plan. In 2007, we expect to pay pension contributions of between approximately \$20.0 million and \$21.0 million for our U.S. and non-U.S. pension plans.

In connection with our March 2006 Inamed acquisition, we initiated a global restructuring and integration plan to merge the Inamed operations with our operations and to capture synergies through the centralization of certain general and administrative functions. In addition, in January 2007, we initiated an additional plan to restructure and eventually sell or close our collagen manufacturing facility in Fremont, California that we acquired in connection with the Inamed acquisition. As of June 29, 2007, we have recorded cumulative pre-tax restructuring and integration charges of

\$48.0 million and \$1.6 million of income tax costs related to intercompany transfers of trade businesses and net assets. We currently estimate that the total pre-tax charges resulting from the restructurings, including integration and transition costs, will be between \$56.0 million and \$69.0 million, all of which are expected to be

Table of Contents

cash expenditures. In addition to the pre-tax charges, we expect to incur capital expenditures of approximately \$20.0 million to \$25.0 million, primarily related to the integration of information systems, and to pay an additional amount of approximately \$1.5 million to \$2.0 million for taxes related to intercompany transfers of trade businesses and net assets.

In connection with our January 2007 Cornéal acquisition, we initiated a restructuring and integration plan to merge the Cornéal facial aesthetics business operations with our operations. As of June 29, 2007, we have recorded pre-tax restructuring and integration costs of \$7.6 million. We currently estimate that the total pre-tax charges resulting from the restructuring and integration of the Cornéal facial aesthetics business operations will be between \$28.0 million and \$34.0 million, all of which are expected to be cash expenditures.

A significant amount of our existing cash and equivalents are held by non-U.S. subsidiaries. We currently plan to use these funds in our operations outside the United States. Withholding and U.S. taxes have not been provided for unremitted earnings of certain non-U.S. subsidiaries because we have reinvested these earnings indefinitely in such operations. As of December 31, 2006, we had approximately \$725.5 million in unremitted earnings outside the United States for which withholding and U.S. taxes were not provided. Tax costs would be incurred if these funds were remitted to the United States.

We believe that the net cash provided by operating activities, supplemented as necessary with borrowings available under our existing credit facilities and existing cash and equivalents, will provide us with sufficient resources to meet our current expected obligations, working capital requirements, debt service and other cash needs over the next year.

ALLERGAN, INC.

Item 3. *Quantitative and Qualitative Disclosures About Market Risk*

In the normal course of business, our operations are exposed to risks associated with fluctuations in foreign currency exchange rates and interest rates. We address these risks through controlled risk management that includes the use of derivative financial instruments to economically hedge or reduce these exposures. We do not enter into financial instruments for trading or speculative purposes.

To ensure the adequacy and effectiveness of our interest rate and foreign exchange hedge positions, we continually monitor our interest rate swap positions and foreign exchange forward and option positions both on a stand-alone basis and in conjunction with our underlying interest rate and foreign currency exposures, from an accounting and economic perspective.

However, given the inherent limitations of forecasting and the anticipatory nature of the exposures intended to be hedged, we cannot assure you that such programs will offset more than a portion of the adverse financial impact resulting from unfavorable movements in either interest or foreign exchange rates. In addition, the timing of the accounting for recognition of gains and losses related to mark-to-market instruments for any given period may not coincide with the timing of gains and losses related to the underlying economic exposures and, therefore, may adversely affect our consolidated operating results and financial position.

Interest Rate Risk

Our interest income and expense is more sensitive to fluctuations in the general level of U.S. interest rates than to changes in rates in other markets. Changes in U.S. interest rates affect the interest earned on our cash and equivalents, interest expense on our debt as well as costs associated with foreign currency contracts.

In February 2006, we entered into interest rate swap contracts based on the 3-month LIBOR with an aggregate notional amount of \$800 million, a swap period of 10 years and a starting swap rate of 5.198%. We entered into these swap contracts as a cash flow hedge to effectively fix the future interest rate for our \$800 million aggregate principal amount 2016 Notes issued in April 2006. In April 2006, we terminated the interest rate swap contracts and received approximately \$13.0 million. The total gain is being amortized as a reduction to interest expense over a 10 year period to match the term of the 2016 Notes. As of June 29, 2007, the remaining unrecognized gain, net of tax, of \$6.9 million is recorded as a component of accumulated other comprehensive loss.

On January 31, 2007, we entered into a nine-year, two-month interest rate swap with a \$300.0 million notional amount with semi-annual settlements and quarterly interest rate reset dates. The swap receives interest at a fixed rate of 5.75% and pays interest at a variable interest rate equal to LIBOR plus 0.368%, and effectively converts \$300.0 million of our 2016 Notes to a variable interest rate. Based on the structure of the hedging relationship, the hedge meets the criteria for using the short-cut method for a fair value hedge under the provisions of SFAS No. 133. Under the provisions of SFAS No. 133, the investment in the derivative and the related long-term debt are recorded at fair value. At June 29, 2007, we have recognized a liability associated with the fair-value of the derivative of \$5.6 million reported in Other liabilities and a corresponding decrease in Long-term debt of \$5.6 million reported in our unaudited condensed consolidated balance sheet. The differential to be paid or received as interest rates change is accrued and recognized as an adjustment of interest expense related to the 2016 Notes. The adjustment of interest expense in the six month period ended June 29, 2007 is immaterial.

At June 29, 2007, we had approximately \$1.8 million of variable rate debt compared to \$102.0 million of variable rate debt at December 31, 2006. If interest rates were to increase or decrease by 1% for the year, annual interest expense, including the effect of the \$300.0 million notional amount of our interest rate swap entered into on January 31, 2007, would increase or decrease by approximately \$3.0 million.

Table of Contents

The tables below present information about certain of our investment portfolio and our debt obligations at June 29, 2007 and December 31, 2006.

Table of Contents

Foreign Currency Risk

Overall, we are a net recipient of currencies other than the U.S. dollar and, as such, benefit from a weaker dollar and are adversely affected by a stronger dollar relative to major currencies worldwide. Accordingly, changes in exchange rates, and in particular a strengthening of the U.S. dollar, may negatively affect our consolidated revenues or operating costs and expenses as expressed in U.S. dollars.

From time to time, we enter into foreign currency option and forward contracts to reduce earnings and cash flow volatility associated with foreign exchange rate changes to allow our management to focus its attention on our core business issues. Accordingly, we enter into various contracts which change in value as foreign exchange rates change to economically offset the effect of changes in the value of foreign currency assets and liabilities, commitments and anticipated foreign currency denominated sales and operating expenses. We enter into foreign currency option and forward contracts in amounts between minimum and maximum anticipated foreign exchange exposures, generally for periods not to exceed one year.

We use foreign currency option contracts, which provide for the purchase or sale of foreign currencies to offset foreign currency exposures expected to arise in the normal course of our business. While these instruments are subject to fluctuations in value, such fluctuations are anticipated to offset changes in the value of the underlying exposures.

All of our outstanding foreign currency option contracts are entered into to reduce the volatility of earnings generated in currencies other than the U.S. dollar, primarily earnings denominated in the Canadian dollar, Mexican peso, Australian dollar, Brazilian real, euro, Japanese yen, Swedish krona, Swiss franc and U.K. pound. Current changes in the fair value of open foreign currency option contracts are recorded through earnings as Unrealized gain (loss) on derivative instruments, net while any realized gains (losses) on settled contracts are recorded through earnings as Other, net in the accompanying unaudited condensed consolidated statements of operations. The premium costs of purchased foreign exchange option contracts are recorded in Other current assets and amortized to Other, net over the life of the options.

All of our outstanding foreign exchange forward contracts are entered into to protect the value of intercompany receivables denominated in currencies other than the lender's functional currency. The realized and unrealized gains and losses from foreign currency forward contracts and the revaluation of the foreign denominated intercompany receivables are recorded through Other, net in the accompanying unaudited condensed consolidated statements of operations.

Table of Contents

The following table provides information about our foreign currency derivative financial instruments outstanding as of June 29, 2007 and December 31, 2006. The information is provided in U.S. dollars, as presented in our unaudited condensed consolidated financial statements.

Item 4. Controls and Procedures**Evaluation of Disclosure Controls and Procedures**

We maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed in our Exchange Act reports is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms, and that such information is accumulated and communicated to our management, including our Principal Executive Officer and our Principal Financial Officer, as appropriate, to allow timely decisions regarding required disclosures. Our management, including our Principal Executive Officer and our Principal Financial Officer, does not expect that our disclosure controls or procedures will prevent all error and all fraud. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within Allergan have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty, and that breakdowns can occur because of simple error or mistake. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the control. The design of any system of controls is also based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions. Because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and not be detected. Also, we have investments in certain unconsolidated entities. As we do not control or manage these entities, our disclosure controls and procedures with respect to such entities are necessarily substantially more limited than those we maintain with respect to our consolidated subsidiaries.

We carried out an evaluation, under the supervision and with the participation of our management, including our Principal Executive Officer and our Principal Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures as of June 29, 2007, the end of the quarterly period covered by this report. Based on the foregoing, our Principal Executive Officer and our Principal Financial Officer concluded that, as of the end of the period covered by this report, our disclosure controls and procedures were effective and were operating at the reasonable assurance level.

Further, management determined that, as of June 29, 2007, there were no changes in our internal control over financial reporting that occurred during the first six month period of 2007 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting, except for the potential impact from reporting the Inamed and Cornéal acquisitions, as more fully disclosed in Note 2, *Acquisitions*, to the unaudited condensed consolidated financial statements under Item 1(D) of Part I of this report. We are currently in the process of assessing and integrating Inamed's and Cornéal's internal controls over financial reporting into our financial reporting systems and expect to complete our integration activities related to internal controls over financial reporting by December 31, 2007.

PART II OTHER INFORMATION**Item 1. Legal Proceedings**

The information required by this Item is incorporated herein by reference to Note 9, *Litigation*, to the unaudited condensed consolidated financial statements under Item 1(D) of Part I of this report.

Item 1A. Risk Factors

There have been no significant changes to the risk factors previously disclosed by us in Part II, Item 1A of our Quarterly Report on Form 10-Q for the three month period ended March 30, 2007 and Part I, Item 1A of our Annual Report on Form 10-K for the fiscal year ended December 31, 2006.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

The following table discloses the purchases of our equity securities during the second fiscal quarter of 2007.

Period	Total Number of Shares Purchased(1)	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number (or Approximate Dollar Value) of Shares that May Yet Be Purchased Under the Plans or Programs(2)
March 31, 2007 to April 30, 2007	0	N/A	0	15,401,602
May 1, 2007 to May 31, 2007	0	N/A	0	16,486,390
June 1, 2007 to June 29, 2007	0	N/A	0	16,754,618
Total	0	N/A	0	N/A

(1) We maintain an evergreen stock repurchase program, which we first announced on September 28, 1993. Under the stock repurchase program after giving effect to our June 22, 2007 two-for-one stock split, we may maintain up to 18.4 million repurchased shares in our treasury account

at any one time.
As of June 29,
2007, we held
approximately
1.6 million
treasury shares
under this
program.

two-for-one
stock split.

Item 3. Defaults Upon Senior Securities

None.

Table of Contents**Item 4. Submission of Matters to a Vote of Security Holders**

We held our Annual Meeting of Stockholders on May 1, 2007. At the Annual Meeting, our stockholders elected three directors to our Board of Directors and approved one other proposal, as more fully described below. At our Annual Meeting, there were present in person or by proxy 136,384,719 votes, representing approximately 89.66% of the total outstanding eligible votes, which was prior to our June 22, 2007 two-for-one stock split. The proposals considered at the Annual Meeting were voted on as follows:

1. The following directors were elected for three-year terms of office expiring in 2010 and received the number of votes set forth opposite their names, with no abstentions or broker non-votes:

Directors	Affirmative Votes	Withheld
Michael R. Gallagher	134,160,895	2,223,824
Gavin S. Herbert	129,406,471	6,978,248
Stephen J. Ryan, M.D.	134,235,472	2,149,247

The following directors continue to serve on our Board of Directors with terms expiring as set forth opposite their names*:

Directors	Term Expires
Deborah Dunsire, M.D.**.	2008
Trevor M. Jones, Ph.D	2008
Louis J. Lavigne, Jr.	2008
Leonard D. Schaeffer	2008
Herbert W. Boyer, Ph.D.	2009
Robert A. Ingram	2009
David E.I. Pyott	2009
Russell T. Ray	2009

* As announced in the Current Report on Form 8-K filed by us with the Securities and Exchange Commission on May 4, 2007, Mr. Handel E. Evans term as a director expired and he retired from our Board of Directors effective as of May 1, 2007.

** As announced in the Current Report on Form 8-K filed by us with the Securities and Exchange Commission on December 4, 2006, Dr. Dunsire was appointed to our Board of Directors effective as of December 4, 2006.

2. A proposal to ratify the appointment of Ernst & Young LLP as our independent registered public accounting firm for fiscal year 2007 was approved by our stockholders. The proposal received 133,166,209 votes in favor and 2,419,794 votes against. There were 798,716 abstentions and no broker non-votes.

Item 5. Other Information

None.
