UNITED STATES
SECURITIES AND EXCHANGE COMMISSION

Washington, DC 20549

FORM 10-Q

(Mark One)

Quarterly Report Pursuant to Section 13 or 15 (d) of the Securities Exchange Act of 1934.

For the quarterly period ended: December 27, 2002

or

Transition Report Pursuant to Section 13 or 15 (d) of the Securities Exchange Act of 1934.

For the Transition period from _____ to _____

Commission file number 0-28568

KEYSTONE AUTOMOTIVE INDUSTRIES, INC.

(Exact name of registrant as specified in its charter)

California
(State or other jurisdiction of incorporation or organization)

95-2920557
(I.R.S. Employer Identification Number)

700 East Bonita Avenue, Pomona, CA 91767

(Address of principal executive offices) (Zip Code)

(909) 624-8041

(Registrant's telephone number including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes x No .

The number of shares outstanding of the registrant's Common Stock, no par value, at December 27, 2002 was 14,654,920 shares.

This Form 10-Q contains 20 pages.

Keystone Automotive Industries, Inc.

Notes to Condensed Consolidated Financial Statements

(Unaudited)

December 27, 2002

1. Basis of Presentation

The accompanying unaudited financial statements have been prepared in accordance with accounting principles generally accepted in the United States for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by accounting principles generally accepted in the United States for complete financial statements. In the opinion of management, all adjustments, consisting only of normal recurring accruals considered necessary for fair presentation, with respect to the interim financial statements, have been included. The results of operations for the 39 week period ended December 27, 2002 are not necessarily indicative of the results that may be expected for the full year ending March 28, 2003. For further information, refer to the financial statements and footnotes thereto for the year ended March 29, 2002, included in Keystone Automotive Industries, Inc.'s (the Company) Form 10-K filed with the Securities and Exchange Commission on June 27, 2002.

2. Fiscal Year

The Company uses a 52/53 week fiscal year. The Company's fiscal year ends on the last Friday of March.

3. Income Taxes

The income tax provision for interim periods is based on an estimated effective annual income tax rate.

4. New Accounting Standards

Statement of Financial Accounting Standards (SFAS) No. 143, Accounting for Asset Retirement Obligations, addresses financial accounting and reporting for obligations associated with the retirement of tangible long-lived assets and the associated asset retirement costs. This Statement is effective for financial statements issued for fiscal years beginning after June 15, 2002. It is not anticipated that the financial impact of this Statement will have a material effect on the Company.

Edgar Filing: KEYSTONE AUTOMOTIVE INDUSTRIES INC - Form 10-Q

Effective March 30, 2002, the Company implemented SFAS No. 144, Accounting for the Impairment or Disposal of Long-Lived Assets, which addresses financial accounting and reporting for the Impairment or disposal of long-lived assets. This Statement supersedes SFAS No. 121, Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of, and the accounting and reporting provisions of Accounting Principle Board Opinion (APB) No. 30, Reporting the Results of Operations-Reporting the Effects of Disposal of a Segment of a Business, and Extraordinary, Unusual and Infrequently Occurring Events and Transactions, for the disposal of a segment of a business. The provisions of this Statement generally are to be applied prospectively. The implementation of this Statement did not have a material effect on the Company.

5. Goodwill and Other Intangibles

In July 2001, the Financial Accounting Standards Board (FASB) issued SFAS No. 141, Business Combinations. SFAS No. 141 supersedes APB No. 16 Business Combinations and SFAS No. 38 Accounting for Preacquisition Contingencies of Purchased Enterprises. SFAS No. 141 requires all business combinations initiated after June 30, 2001 to be accounted for using the purchase method. The Company implemented SFAS No. 141 on March 31, 2001. This statement did not have a material effect on the Company's consolidated financial position or results of operations.

The Company elected to early adopt the provisions of SFAS No. 142, Goodwill and Other Intangible Assets, which supersedes APB No. 17 Intangible Assets. SFAS No. 142 applies to goodwill and intangible assets acquired after June 30, 2001, as well as goodwill and intangible assets previously acquired. Under this statement, goodwill as well as certain other intangible assets, determined to have an infinite life, will no longer be amortized. These assets will be reviewed for impairment on a periodic basis. The Company early adopted SFAS No. 142 effective March 31, 2001. Consequently, all goodwill on the Company's balance sheet from that date forward will no longer be subject to amortization. Goodwill at December 27, 2002 and March 29, 2002 is net of

Table of Contents

accumulated amortization of \$0. Other intangibles, consisting of covenants not to compete with finite lives, will continue to be amortized over the term of the respective covenant. Pursuant to SFAS No. 142, the Company performed a transitional assessment of impairment of goodwill and other intangibles by applying a fair-value-based test and determined that the Company's goodwill was impaired. Pursuant to SFAS No. 3,

Reporting Accounting Changes in Interim Financial Statements, effective March 31, 2001, the Company recorded the cumulative effect of the change in accounting principle (\$28.7 million, net of tax) and accordingly, the financial information for the thirty-nine weeks ended December 28, 2001, which had been previously reported, has been restated, in thousands, as follows:

Net income reported	\$ 2,524
Restatement:	
Cumulative effect of the change in accounting principle, net of tax	(28,691)
	<hr/>
Net loss (restated)	\$ (26,167)
	<hr/>

Other Intangibles are comprised of covenants not to compete and are as follows:

	December 27, 2002	March 29, 2002
	<hr/>	<hr/>
	(in thousands)	
Gross carrying amount	\$ 4,008	\$ 4,152
Accumulated amortization	(2,970)	(2,755)
	<hr/>	<hr/>
Other intangibles net	\$ 1,038	\$ 1,397
	<hr/>	<hr/>

Aggregate amortization expense for other intangible assets for each of the thirty-nine week periods ended December 27, 2002 and December 28, 2001 was \$0.4 million. Other intangible assets will be fully amortized within the next five years.

6. Acquisitions

The results of operations for the thirteen week and thirty-nine week periods ended December 27, 2002 reflect the operations from certain businesses acquired in July 2001 and January, February and April 2002, accounted for using the purchase method of accounting. Other than with respect to the July 2001 acquisition, no results relating to these acquisitions were included with respect to the thirteen week and thirty-nine week periods of fiscal 2002. The unaudited pro forma results for the thirteen week and thirty-nine week periods of fiscal 2002, assuming these acquisitions had been made at the beginning of fiscal 2002, would not be materially different from the results presented.

7. Sales By Product

Edgar Filing: KEYSTONE AUTOMOTIVE INDUSTRIES INC - Form 10-Q

	Thirteen Weeks Ended		Thirty-nine Weeks Ended

Net Sales	\$ 108.5	\$ 94.1	\$ 316.4	\$ 274.4

SFAS No. 131, Disclosures about Segments of an Enterprise and Related Information, requires companies to report financial and descriptive information about their reportable operating segments, including segment profit or loss, certain specific revenue and expense items, and segments assets, as well as information about the revenues derived from the company's products and services, the countries in which the company earns revenues and holds assets, and major customers. This statement also requires companies that have a single reportable segment to disclose information about product and services, information about geographic areas, and information about major customers. This statement requires the use of the management approach to determine the information to be reported. The management approach is based on the way management organizes the enterprise to assess performance and make operating decisions regarding the allocation of resources. It is management's opinion that, at this time, the Company has one operating and reporting segment.

Table of Contents

The following discussions sets forth the required disclosure regarding single segment information:

The Company operates as a single reportable segment as a wholesale distributor for automobile aftermarket collision parts, paint and related supplies and equipment in the United States with net sales for the thirty-nine weeks ended December 27, 2002 of \$316.4 million, including operations outside the United States, which were immaterial. The Company sells its products to more than 25,000 collision repair shops located in the United States, Vancouver, Canada and Tijuana, Mexico.

The Company's product offerings, comprised of more than 19,000 stock keeping units, may be divided into four primary categories (i) the Company's core business continues to be automotive body parts which consist primarily of fenders, hoods, headlight and taillight assemblies, radiators, condensers and grilles, (ii) the Company distributes new and remanufactured plastic bumper covers and steel bumpers manufactured by multiple domestic and foreign manufacturers, (iii) the Company distributes paint and other materials used in repairing a damaged vehicle primarily to repair shops (iv) the Company distributes wheels and related products.

No single customer accounted for more than 1% of the Company's net sales for the thirty-nine weeks ended December 27, 2002 or December 28, 2001.

8. Non-Recurring Expenses

In September 2001, the enterprise software provider informed the Company that it was ceasing all development for the software package licensed by the Company. As a result, in the second quarter ended September 28, 2001, the Company determined that it could not proceed with the Company-wide installation and booked a pre-tax charge of \$6.8 million to write off the previously capitalized software development costs. With this charge, the Company has written off its investment in this software package.

9. Earnings Per Share

Basic net income (loss) per share is computed by dividing net income (loss) available to common shareholders by the weighted average number of common shares outstanding during the period. Diluted net income (loss) per share includes the dilutive effect of potential stock options exercises, calculated using the treasury stock method.

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Except for the historical information contained herein, certain matters addressed in this Item 2 constitute forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. Such forward-looking statements are subject to a variety of risks and uncertainties that could cause actual results to differ materially from those anticipated by the Company's management. The Private Securities Litigation Reform Act of 1995 (the Act) provides certain safe harbor provisions for forward-looking statements. All forward-looking statements made in this Quarterly Report on Form 10-Q are made pursuant to the Act and are subject to the cautionary statements set forth herein and in the Company's Form 10-K for the year ended March 29, 2002, on file

with the Securities and Exchange Commission.

Critical Accounting Policies

General. The Company's discussion and analysis of its financial condition and results of operations are based upon its consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States. The preparation of these financial statements requires the Company to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses and related disclosure of contingent assets and liabilities. On an ongoing basis, the Company evaluates its estimates, including those related to product returns, bad debts, inventories, intangible assets, income taxes, insurance, pensions and contingencies and litigation. The Company bases its estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities. Actual results may differ from these estimates under different assumptions or conditions.

The Company believes the following critical accounting policies affect its more significant judgments and estimates used in the preparation of its consolidated financial statements.

Table of Contents

Inventory. The Company writes down its inventory for estimated obsolescence or unmarketable inventory equal to the difference between the cost of the inventory and its estimated market value based upon assumptions about future demand and market conditions. If actual market conditions are less favorable than those projected by management, additional inventory write-downs may be required.

Bad Debt. The Company maintains allowances for doubtful accounts for estimated losses resulting from the inability of its customers to make required payments. If the financial condition of the Company's customers were to deteriorate, resulting in an impairment of their ability to make payments, additional allowances may be required.

Deferred Taxes. The Company records a valuation allowance to reduce its deferred tax assets to the amount that is more likely than not to be realized. While the Company has considered future taxable income and ongoing prudent and feasible tax planning strategies in assessing the need for the valuation allowance, in the event the Company were to determine that it would be able to realize its deferred tax assets in the future in excess of its net recorded amount, an adjustment to the deferred tax asset would increase income in the period such determination was made. Likewise, should the Company determine that it would not be able to realize all or part of its net deferred tax asset in the future, an adjustment to the deferred tax asset would be charged to income in the period such determination was made.

Table of Contents**KEYSTONE AUTOMOTIVE INDUSTRIES, INC.****Results of Operations**

The following table sets forth for the periods indicated, certain selected income statement items as a percentage of net sales.

	Thirteen	Thirteen	Thirty-nine	Thirty-nine
	Weeks Ended	Weeks Ended	Weeks Ended	Weeks Ended
	December 27,	December 28,	December 27,	December 28,
	2002	2001	2002	2001

Income before income taxes and cumulative effect of a change in accounting principle	5.5	5.0	5.2	1.6
Income tax provision	2.2	2.0	2.1	0.7
Net income before cumulative effect of a change in accounting principle	3.3	3.0	3.1	0.9
Cumulative effect of a change in accounting principle, net of tax				(10.4)
Net income (loss)	3.3%	3.0	3.1%	(9.5%)

Thirteen weeks ended December 27, 2002 compared to thirteen weeks ended December 28, 2001

Net sales were \$108.5 million for the quarter ended December 27, 2002 (the 2002 Quarter) compared to \$94.1 million for the quarter ended December 28, 2001 (the 2001 Quarter), an increase of \$14.4 million or 15.3%. This increase was due primarily to increases in sales of automotive body parts, bumpers and wheels. During the 2002 Quarter, sales of automotive body parts (including fenders, hoods, headlights, radiators, grilles and other crash parts) increased by \$10.1 million (an increase of 22.3%); sales of new and recycled bumpers increased by \$4.4

Edgar Filing: KEYSTONE AUTOMOTIVE INDUSTRIES INC - Form 10-Q

million (an increase of 16.4%); sales of remanufactured wheels and related products increased by \$1.6 million (an increase of 23.5%) and sales of paint and related materials decreased by \$1.1 million (a decrease of 7.9%). The increases were attributable primarily to the fact that insurance companies are increasingly specifying aftermarket parts in the repair of damaged vehicles and the growing acceptance of the Platinum Plus private label line. See Item 5 below.

Gross profit increased in the 2002 Quarter to \$47.5 million (43.8% of net sales) from \$40.7 million (43.2% of net sales) in the 2001 Quarter, an increase of \$6.8 million or 16.8%, primarily as a result of the increase in net sales. The Company's increase in gross profit as a percentage of net sales in the 2002 Quarter reflects the continued fluctuation in cost of sales, primarily because of factors such as product mix and competition. The Company's gross profit margin has fluctuated, and may continue to fluctuate, depending on a number of factors, including changes in product mix, competition and currency exchange rates. While the Company has not seen any recent increases in prices at the manufacturing level, increases in raw material costs to manufacturers would in all likelihood be passed on in the form of higher prices to the Company. Higher prices would impact margins if the Company was not able to pass on the increases to its customers.

Table of Contents

Selling and distribution expenses increased to \$32.1 million (29.6% of net sales) in the 2002 Quarter from \$27.8 million (29.5% of net sales) in the 2001 Quarter, an increase of 15.5%, as a result of increased sales.

General and administrative expenses increased to \$9.7 million (9.0% of net sales) in the 2002 Quarter compared to \$8.5 million (9.0% of net sales) in the 2001 Quarter, an increase of 15.3%. The increase in general and administrative expenses was generally the result of increased sales and increases in salaries and wages (in large part as a result of acquisitions), increased professional fees and increases in costs relating to the implementation of the new enterprise software system.

The Company is experiencing premium increases and higher retentions in connection with the annual renewal of certain of its insurance policies which may negatively impact expenses in future quarters.

Thirty-nine weeks ended December 27, 2002 compared to thirty-nine weeks ended December 28, 2001

Net sales were \$316.4 million for the thirty-nine weeks ended December 27, 2002 (the 2002 Nine Months) compared to \$274.4 million for the thirty-nine weeks ended December 28, 2001 (the 2001 Nine Months), an increase of \$42.0 million or 15.3%. This increase was made up of increases of \$28.7 million in sales of automotive body parts (including fenders, hood, headlights, radiators, grilles, and other crash parts); \$11.0 million in sales of new and recycled bumpers; \$6.2 million in sales of remanufactured wheels and related products and a decrease of \$2.2 million in sales of paint and related materials, which changes represent increases of approximately 22.8%, 13.8% and 31.6% and a decrease of 4.9%, respectively, over the comparable period in the prior fiscal year.

Gross profit increased in the 2002 Nine Months to \$137.9 million (43.6% of net sales) from \$117.4 million (42.8% of net sales) in the 2001 Nine Months, an increase of \$20.5 million or 17.5%, primarily as a result of the increase in net sales. The increase in gross margins during the 2002 Nine Months primarily reflects a change in product mix and competition. The Company's gross profit margin has fluctuated, and may continue to fluctuate, depending on a number of factors, including changes in product mix, competition and currency exchange rates. While the Company has not seen any recent increases in prices at the manufacturing level, increases in raw material costs to manufacturers would in all likelihood be passed on in the form of higher prices to the Company. Higher prices would impact margins if the Company was not able to pass on the increases to its customers.

Selling and distribution expenses increased to \$94.3 million (29.8% of net sales) in the 2002 Nine Months from \$83.3 million (30.4% of sales) in the 2001 Nine Months, an increase of 13.1%, primarily as a result of increased sales. The decrease in these expenses as a percentage of net sales was generally the result of certain fixed costs being spread over increased sales and the fixed nature of certain of these costs.

General and administrative expenses increased to \$28.1 million (8.9% of net sales) in the 2002 Nine Months from \$23.7 million (8.6% of net sales) in the 2001 Six Months, an increase of 18.9%. The increase was primarily due to increased sales and the increase in these expenses as a percentage of net sales was primarily the result of increases in salaries and wages (in large part as a result of acquisitions), increased professional fees and increases in costs relating to the implementation of the new enterprise software system.

Edgar Filing: KEYSTONE AUTOMOTIVE INDUSTRIES INC - Form 10-Q

During the 2001 Nine Months, the Company recognized \$6.8 million (2.5% of net sales) of non-recurring expenses. This recognition reflects a pre-tax charge that is related to a write-off of its investment in an enterprise-wide software package resulting from the notification from the Company's software provider that it was ceasing further development of the software licensed by the Company. As a direct result of that recognition, the Company had a reduction of its net income from operations for the 2001 Nine Months to \$3.6 million.

In addition, the Company recorded a loss as a cumulative effect of change in accounting principle (net of tax) retroactive to March 31, 2001, which relates to the Company's early adoption of SFAS No. 142 Goodwill and Other Intangible Assets. SFAS No. 142 requires that the Company test its goodwill and indefinite-lived intangibles for impairment. As a result of the test, completed in the fourth quarter of fiscal 2002, the Company restated its results of operations for the thirty-nine week period ended December 28, 2001 and recorded a non-cash impairment charge of \$28.7 million, net of taxes of \$4.8 million.

As a result of the above factors, the Company had net income of \$9.8 million for the 2002 Nine Months (3.1% of net sales), as compared to a loss of \$26.2 million (9.5% of net sales) in the 2001 Nine Months.

Table of Contents

Variability of Quarterly Results and Seasonality

The Company has experienced, and expects to continue to experience, variations in its sales and profitability from quarter to quarter due, in part, to the timing and integration of acquisitions and the seasonal nature of Keystone's business. The number of collision repairs is directly impacted by the weather. Accordingly, the Company's sales generally are highest during the five-month period from December to April. The impact of seasonality has reduced somewhat as Keystone has become more geographically diversified. Other factors which influence quarterly variations include the number of business days during the holiday seasons, the timing of the introduction of new products, the level of consumer acceptance of new products, general economic conditions that affect consumer spending, the timing of supplier price changes and the timing of expenditures in anticipation of increased sales and customer delivery requirements.

Liquidity and Capital Resources

The Company's primary use of funds over the past two years has been for acquisitions, the development and implementation of an enterprise-wide management information system and increased working capital needs. At December 27, 2002, working capital was \$101.5 million compared to \$95.4 million at March 29, 2002. The increase in working capital is primarily the result of cash generated from operating activities and increased levels of accounts receivable and inventory. The Company financed its working capital requirements, capital expenditures and the acquisition completed during the first three quarters of fiscal 2003 primarily from borrowings under the Company's line of credit and from cash flows from operations.

During the nine months ended December 27, 2002, the Company's cash and cash equivalents decreased by \$1.1 million. This decrease is the result of a decrease in cash used in investing activities of \$13.3 million, primarily as a result of cash used to purchase equipment primarily related to the implementation of the Company's enterprise software system and cash paid for an acquisition, partially offset by an increase in cash provided by operating activities of \$5.0 million and an increase in cash provided by financing activities of \$7.2 million. The increase in cash provided by operating activities resulted primarily from the elimination of \$8.3 million of non-cash expenses from the reported net income of \$9.8 million and the use of cash to increase inventories and accounts receivable. The most significant non-cash expenses were depreciation and amortization and an increase in the provision for a write-down of inventories. The increase in inventory for the 2002 Nine Months was primarily as a result of the purchase of certain inventory and related assets from Eagle Automotive, Inc. in April 2002, a buildup of inventory of products manufactured in Taiwan as a safeguard from a pending West Coast dock workers strike, which was subsequently settled, and a bulk purchase of bumpers for reconditioning. The increase in cash provided by financing activities resulted primarily from borrowings under the Company's credit facility and to a lesser extent from cash proceeds from the exercise of stock options.

The Company has in place a revolving line of credit with a commercial lender that provides for a \$30.0 million secured credit facility due on February 1, 2005. Advances under the revolving line of credit bear interest at LIBOR plus 1.0%. At December 27, 2002, \$13.5 million had been drawn down under the line of credit. The line of credit is subject to certain restrictive covenants set forth in the loan agreement, which requires that the Company maintain certain financial ratios. The Company was in compliance with all such covenants at December 27, 2002, and at the date of the filing of this Quarterly Report. The \$6.6 million increase in borrowings from March 29, 2002 is primarily the result of cash used to complete an acquisition in April 2002 and increases in inventories.

Inflation

The Company does not believe that the relatively moderate rates of inflation over the past three years have had a significant effect on its net sales or its profitability.

Intangible Assets

Goodwill, which represents the excess of cost over the fair value of net assets acquired, amounted to \$2.2 million at December 27, 2002, or approximately 1.2% of total assets or 1.7% of consolidated shareholders' equity. In June 2001, the FASB issued SFAS No. 141, Business Combinations, and SFAS No. 142, Goodwill and Other Intangible Assets. SFAS No. 141 requires business combinations initiated after June 30, 2001 to be accounted for using the purchase method of accounting, and broadens the criteria for recording intangible assets apart from goodwill. Under SFAS No. 142, goodwill and intangible assets that have indefinite useful lives will no longer be amortized but will be tested at least annually for impairment. Intangible assets with finite useful lives will continue to be amortized over their useful lives. The goodwill test for impairment consists of a two-step process that begins with an estimation of the fair value of the reporting unit. The first step of the test is a screen for potential impairment and the second step measures the amount of impairment, if any. SFAS No. 142 requires an entity to complete the first step of the transactional goodwill impairment test within six months of adopting the Statement. See Note 3 of Notes to Consolidated Financial Statements.

Table of Contents

As a result of the early adoption of SFAS Nos. 141 and 142 effective March 31, 2001, the Company tested its goodwill for impairment and recorded a charge of \$28.7 million, net of tax, retroactive to the first quarter of fiscal 2002, accounted for as the cumulative effect of a change in accounting principle. The net loss for the nine months ended December 28, 2001 reflects this charge. With SFAS No. 142, effective March 31, 2001, the Company will not continue to amortize goodwill.

Other intangible assets, consisting primarily of covenants not to compete obtained in acquisitions, which have finite lives, will continue to be amortized over the finite life. As of December 27, 2002, other intangible assets amounted to \$1.0 million. Amortization of other intangible assets was approximately \$0.4 million for each of the thirty-nine week periods ended December 27, 2002 and December 28, 2001. Other intangible assets will continue to be evaluated under SFAS No. 142.

New Accounting Standards

SFAS No. 143, *Accounting for Asset Retirement Obligations*, addresses financial accounting and reporting for obligations associated with the retirement of tangible long-lived assets and the associated asset retirements costs. This Statement is effective for financial statements issued for fiscal years beginning after June 15, 2002. It is not anticipated that the financial impact of this Statement will have a material effect on the Company.

Effective March 30, 2002, the Company implemented SFAS No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets*, which addresses financial accounting and reporting for the impairment or disposal of long-lived assets. This Statement supersedes SFAS No. 121, *Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of*, and the accounting and reporting provisions of APB Opinion No. 30, *Reporting the Results of Operations - Reporting the Effects of Disposal of a Segment of a Business, and Extraordinary, Unusual and Infrequently Occurring Events and Transactions*, for the disposal of a segment of a business. The provisions of this Statement generally are to be applied prospectively. The implementation of this Standard did not have a material effect on the Company.

Item 3. QUANTITATIVE AND QUALITATIVE DISCLOSURE ABOUT MARKET RISKS

The Company's results of operations are exposed to changes in interest rates primarily with respect to borrowings under its credit facility, where interest rates are tied to the prime rate or LIBOR. Under its current policies, the Company does not use interest rate derivative instruments to manage exposure to interest rate changes. Based on the current levels of debt, the exposure to interest rate fluctuations is not considered to be material. The Company is also exposed to currency fluctuations, primarily with respect to its product purchases in Taiwan. While all transactions with Taiwan are conducted in U.S. Dollars, changes in the relationship between the U.S. dollar and the New Taiwan dollar might impact the price of products purchased in Taiwan. The Company might not be able to pass on any price increases to customers. Under its present policies, the Company does not attempt to hedge its currency exchange rate exposure.

Item 4. CONTROLS AND PROCEDURES

The Company maintains disclosure controls and procedures that are designed to ensure that information required to be disclosed in the Company's Exchange Act reports is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms,

Edgar Filing: KEYSTONE AUTOMOTIVE INDUSTRIES INC - Form 10-Q

and that such information is accumulated and communicated to the Company's management, including its Chief Executive Office and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure. In designing and evaluating the disclosure controls and procedures, management recognized that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives and management necessarily was required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures.

Within 90 days prior to the date of this report, the Company carried out an evaluation, under the supervision and with the participation of the Company's management, including the Company's Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures. Based on the foregoing, the Company's Chief Executive Officer and Chief Financial Officer concluded that the Company's disclosure controls and procedures were effective.

There have been no significant changes in the Company's internal controls or in other factors that could significantly affect the internal controls subsequent to the date the Company completed its evaluation.

Item 3. Defaults Upon Senior Securities. None

Item 4. Submission of Matters to a Vote of Security Holders. None

Item 5. Other Information.

Litigation Impacting Aftermarket Collision Replacement Parts. Over the past fifteen years, there have been numerous lawsuits brought relating to the use of aftermarket parts in repairing motor vehicles. Initially, these cases were brought primarily by automobile manufacturers (OEMs) against manufacturers and distributors of aftermarket parts seeking to protect their trademarks, copyrights and other proprietary interests in replacement parts. In more recent years, class action attorneys have commenced numerous cases against insurance companies primarily alleging a violation of the insurance contract and state consumer laws relating to the specification of aftermarket crash parts in the repair of policyholders vehicles on the theory that aftermarket parts are inferior to OEM parts and thus incapable of restoring a vehicle to its pre-loss condition as required in many insurance policies. Another line of cases currently in the courts is referred to as the Diminished Value cases, the contention being that an insured should be compensated by the insurance company for the difference between the pre-loss value of the vehicle and the value after the vehicle is repaired.

The leading case involving aftermarket crash parts *Avery v. State Farm Insurance Company* was brought in Marion, Illinois in July 1997. In that case, the plaintiffs asserted claims for breach of contract, consumer fraud and equitable relief relating to State Farm's then practice of sometimes specifying aftermarket parts rather than OEM parts when adjusting claims for the damage to insured vehicles. It was alleged that this practice breached State Farm's insurance agreements with its policyholders and was a violation of the Illinois Consumer Fraud and Deceptive Business Practices Act. In October 1999, after a lengthy trial, the jury in *Avery* awarded the plaintiffs compensatory damages of approximately \$586 million. In addition, the judge assessed punitive damages against State Farm of over \$600 million. In April 2001, the Appellate Court of Illinois, Fifth District, upheld the verdict, reducing damages by \$130 million, resulting in an aggregate award of \$1.06 billion. Thereafter, a Petition for Allowance of Appeal to the Illinois Supreme Court was filed by State Farm. In October, 2002, the Illinois Supreme Court agreed to hear the appeal.

Shortly after the verdict in the *Avery* case, State Farm and many other insurance companies suspended their practice of specifying non-OEM crash parts on repair estimates. In early 2001, however, certain insurance companies announced that they were again going to specify certain aftermarket parts in the repair of insured vehicles. While several insurance companies are once again specifying non-OEM crash parts, the action of insurance companies following the State Farm decision has had, and continues to have, an adverse impact on the Company's sales and net income.

Until May 2002, the Company had not been a party to any of the lawsuits filed against insurance companies. In March 2002, a Philadelphia Court certified a 50-state class joining all Erie policyholders whose cars had been repaired with one or more of 25 specific parts or had received monetary compensation based on the value of these parts between 1994 and the date the complaint was filed. In May 2002, Keystone, along with 44 other manufacturers and distributors of aftermarket crash parts, were joined as additional defendants in a class action filed in the Philadelphia County Court of Common Pleas in Philadelphia, Pennsylvania, captioned *Foultz v. Erie Insurance Exchange and Erie Insurance Company, et al.* Plaintiff alleges, among other things, that she was the holder of an Erie Insurance Company (Erie) automobile insurance policy, that her vehicle had been in an accident and, at the direction of Erie, certain of the parts used to repair her vehicle were aftermarket parts rather than original equipment manufacturer parts. Plaintiff alleges that the aftermarket parts were defective, inferior and substandard compared to OEM parts and failed to restore her vehicle to its pre-loss condition and value in violation of her insurance contract and in violation of Pennsylvania laws.

Erie alleges that Keystone and the other additional defendants are liable to the policyholders and, to Erie by way of indemnification, based upon breach of express and implied warranties, for misrepresenting the quality of their aftermarket parts, negligence and violation of Pennsylvania consumer protection law. No specific amount of damages are sought by plaintiff on behalf of the class or by Erie. As of January 29, 2003, Erie and the plaintiffs have reached a tentative settlement of the class action and the judge in the case has stayed all activity pending the settlement. The settlement, as proposed, would result in the dismissal of all claims against Keystone without cost to Keystone. There can be no assurance that the case will settle because it is subject to a final agreement among the parties and court approval of the terms.

Table of Contents

Currently, there are a number of aftermarket parts cases pending in various jurisdictions across the country. Other than the Erie case, the Company has not been made a party in any of these cases. There can be no assurance, however, that Keystone will not be brought into one of these cases or some other aftermarket parts case in the future.

A recent case in the State of Georgia has upheld the Diminished Value theory. In *Mabry v. State Farm Mutual Automobile Ins. Co.*, the Georgia Supreme Court ruled that the insurer is obligated to pay not only the cost of repairs, but also the loss in the value of a damaged and repaired vehicle. Since no distinction appears to have been made in that case between original and aftermarket parts, the impact, if any, on the Company is uncertain. Other Diminished Value cases are pending against insurance companies.

A substantial portion of the Company's business consists of the distribution of aftermarket crash parts to collision repair shops, the vast majority of the customers of the repair shops are covered by insurance policies. In the event that the State Farm verdict is repeated in other similar cases, with the result that aftermarket crash parts are no longer specified by insurance companies to repair insured vehicles, the aggregate cost to consumers will be substantial and the impact on Keystone would be material and adverse. Should this occur, OEM's would likely have monopoly pricing power with respect to many of the products required to repair damaged vehicles. In addition, if the Company were to become a defendant in additional aftermarket parts cases, the costs of defense and the potential for liability could have a material adverse impact on the Company.

The Company believes that substantially all of the non-OEM crash parts which it distributes are of similar quality to OEM crash parts and when installed in a competent manner by collision repair shops, vehicles are restored to their pre-loss condition. In addition, the Company provides a limited warranty with respect to the parts it distributes for as long as the owner at the time repairs are made continues to own the vehicle.

Other Litigation. In November 2002, General Motors Corporation instituted suit against Keystone and a Taiwan-based manufacturer in the Federal District Court for the Eastern District of Michigan, Southern Division. The complaint alleges that Keystone is distributing replacement grilles for General Motors vehicles with a placeholder matched exactly to the Chevrolet Bow Tie design emblem and the GMC mark emblem, which infringes on General Motors' federal, state and common law trademarks. The suit claims this violates the Lanham Act and constitutes unfair competition under Michigan law. General Motors is seeking damages in an unspecified amount as well as certain equitable relief, including an injunction. Keystone has only recently been served with the complaint and has not yet been able to thoroughly evaluate the case and obtain advice of counsel.

Based on a preliminary evaluation, Keystone believes that it has meritorious defenses and intends to defend its business practices. The Company estimates the products in question will constitute an immaterial percentage of total sales once it formally ascertains which products are the subject of the complaint. Consequently, Keystone believes that whatever the outcome of the case, it will not have a material adverse impact on the Company's operations or financial condition.

Federal and State Action. During the past five years, legislation was introduced or considered in the majority of states seeking to prohibit or limit the use of aftermarket parts in collision repair work and/or to require special disclosure before using aftermarket parts. During 2002, 37 separate bills have been considered in 14 states and, to date, none have passed into law. As of February 1, 2003, 25 bills were pending in eight states. The Company anticipates that additional bills will be introduced in 2003.

To date, legislation has passed in only eight states requiring some form of consent from the vehicle owner prior to installing aftermarket collision replacements parts. Approximately 31 states require consumer disclosure to vehicle owners. To date, state laws have not had a material

Edgar Filing: KEYSTONE AUTOMOTIVE INDUSTRIES INC - Form 10-Q

impact on the Company's overall business. If a number of states were to adopt legislation prohibiting or restricting the use of aftermarket crash parts, it could have a material adverse impact on the Company.

In addition, during 2000, a U.S. Congressman requested that the General Accounting Office (GAO) review the role of the National Highway Traffic Safety Administration in regulating the safety and quality of replacement automotive parts. A GAO report was released in January 2001. The report may lead to Congressional hearings and possible future legislation, which could be adverse to the interests of the Company.

Prelude Software System Installation. The Company is at a crucial juncture in developing and installing an enterprise-wide management information system, consolidating the 11 systems under which the Company now operates. This is an extremely costly and time-consuming process and an effective implementation is necessary to enable the Company to continue to grow and prosper in the future. In January 2002 the Company entered into an agreement with Prelude Systems, Inc. (Prelude) for the purchase of a software package which will enable the Company to migrate to an enterprise-wide system. The Company has also entered into other software license agreements and engaged service providers to enable it to fully implement the Prelude system. The Prelude system includes, among other capabilities, modules for financial reporting (general ledger, accounts payable and receivable and fixed assets),

Table of Contents

order entry, purchasing and distribution management (inventory and warehouse management and replenishment). Keystone is adopting the Prelude modules with limited customization.

Management installed the system at five locations in California starting on July 1, 2002 as beta sites and adjustments to the system were made during this first implementation phase. The system was then installed in five additional locations in late October 2002. Because of the increased sales activity at most locations during what is the busiest time of the year for the Company, a decision was reached to delay further installation until April 2003. As a result, complete installation of the system company-wide is now expected by October 2004.

It is estimated that total costs from inception through the complete roll-out will be approximately \$16.0 million, which includes hardware, software, infrastructure and employee related expenses. Through December 27, 2002, the Company had capitalized approximately \$3.4 million of costs, primarily software licenses and hardware. The Company estimates that the total amount to be capitalized through implementation will be approximately \$7.0 million. The balance of the costs will be expensed as incurred. The cost and timing for a project such as the Company is undertaking are subject to numerous uncertainties some of which are beyond the control of the Company and others of which cannot be foreseen at the present time. Consequently, the ultimate functionality may not meet the needs of the operations and the cost and timing to implement the Prelude system Company-wide may vary greatly from the estimates set forth above.

Continued Acceptance of Aftermarket Collision Replacement Parts. Based upon industry sources, the Company estimates that approximately 85% of automobile collision repair work is paid for in part by insurance; accordingly, the Company's business is highly dependent upon the continued acceptance of aftermarket collision replacement parts by the insurance industry and the governmental agencies that regulate insurance companies and the ability of insurers to recommend the use of such parts for collision repair jobs, as opposed to OEM parts. As described above, the use of many of the products distributed by the Company is being disputed in various forums.

Disruption of Shipping. The Company's operations are dependent on a continued source of supply of the many automotive body parts, which are presently only available from Taiwan. These products are transported to the United States aboard container ships which dock primarily in the Los Angeles, California area. Any disruption in shipping, whether from labor issues or acts of terrorism, for any prolonged period would likely have a material adverse impact on the Company's sales and earnings.

b. Reports on form 8-K None

Table of Contents

I, Charles J. Hogarty, certify that:

1. I have reviewed this quarterly report on Form 10-Q of Keystone Automotive Industries, Inc.;

2. Based on my knowledge, this quarterly report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this quarterly report;

3. Based on my knowledge, the financial statements, and other financial information included in this quarterly report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this quarterly report;

4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-14 and 15d-14) for the registrant and we have:
 - a) designed such disclosure controls and procedures to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this quarterly report is being prepared;

 - b) evaluated the effectiveness of the registrant's disclosure controls and procedures as of a date within 90 days prior to the filing date of this quarterly report (the Evaluation Date); and

 - c) presented in this quarterly report our conclusions about the effectiveness of the disclosure controls and procedures based on our evaluation as of the Evaluation Date;

5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation, to the registrant's auditors and the audit committee of registrant's board of directors (or person performing the equivalent function):
 - a) all significant deficiencies in the design or operation of internal controls which could adversely affect the registrant's ability to record, process, summarize and report financial data and have identified for the registrant's auditors any material weaknesses in internal controls; and

 - b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal controls; and

6. The registrant's other certifying officer and I have indicated in this quarterly report whether or not there were significant changes in internal controls or in other factors that could significantly affect internal controls subsequent to the date of our most recent evaluation, including any corrective actions with regard to significant deficiencies and material weaknesses.
