Notes to Schedule of Investments

† In accordance with Accounting Standards Codification (“ASC”) 820 “Fair Value Measurements and Disclosures” (“ASC 820”), all investments held by each of Neuberger Berman California Intermediate Municipal Fund Inc. (“California”), Neuberger Berman Intermediate Municipal Fund Inc. (“Intermediate”) and Neuberger Berman New York Intermediate Municipal Fund Inc. (“New York”) (each individually a “Fund” and collectively, the “Funds”) are carried at the value that Neuberger Berman Management LLC (“Management”) believes a Fund would receive upon selling an investment in an orderly transaction to an independent buyer in the principal or most advantageous market for the investment under current market conditions. Various inputs, including the volume and level of activity for the asset or liability in the market, are considered in valuing the Funds’ investments, some of which are discussed below. Significant management judgment may be necessary to value investments in accordance with ASC 820.

ASC 820 established a three-tier hierarchy of inputs to create a classification of value measurements for disclosure purposes. The three-tier hierarchy of inputs is summarized in the three broad Levels listed below.

Level 1 – quoted prices in active markets for identical investments

Level 2 – other observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, amortized cost, etc.)

Level 3 – unobservable inputs (including a Fund’s own assumptions in determining the fair value of investments)

The inputs or methodology used for valuing an investment are not necessarily an indication of the risk associated with investing in those securities.

The value of the Funds’ investments in municipal securities is determined by Management primarily by obtaining valuations from independent pricing services based on readily available bid quotations, or if quotations are not available, by methods which include various considerations such as yields or prices of securities of comparable quality, coupon, maturity and type; indications as to values from dealers; and general market conditions (generally Level 2 inputs). Other Level 2 inputs used by an independent pricing service to value municipal securities include current trades, bid-wanted lists (which informs the market that a holder is interested in selling a position and that offers will be considered), offerings, general information on market movement, direction, trends, and specific data on specialty issues.

Management has developed a process to periodically review information provided by independent pricing services for all types of securities.

If a valuation is not available from an independent pricing service, or if Management has reason to believe that the valuation received does not represent the amount a Fund might reasonably expect to receive on a current sale in an orderly transaction, the applicable Fund seeks to obtain quotations from principal market makers (generally considered Level 3 inputs). If such quotations are not readily available, the security is valued using methods the Fund’s Board of Directors (each Fund’s Board of Directors, a “Board”) has approved on the belief that they reflect fair value. Numerous factors may be considered when determining the fair value of a security based on Level 2 or 3 inputs, including available analyst, media or other reports, trading in futures or American Depositary Receipts (“ADRs”) and whether the issuer of the security being fair valued has other securities outstanding.

Fair value prices are necessarily estimates, and there is no assurance that such a price will be at or close to the price at which the security is next quoted or next trades.

For information on the Funds' significant accounting policies, please refer to the Funds' most recent shareholder reports.
