INVU, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

The accompanying financial statements have been prepared without audit pursuant to the rules and regulations of the Securities and Exchange Commission. Certain information and footnote disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been condensed or omitted pursuant to such rules and regulations. These statements include all adjustments, consisting only of normal recurring accruals, considered necessary for a fair presentation of financial position and results of operations. The financial statements included herein should be read in conjunction with the financial statements and notes thereto included in the latest annual report on Form 10-KSB. The results of operations for the nine month period ended October 31, 2001 are not necessarily indicative of the results to be expected for the full year.

NOTE A - COMPANY DESCRIPTION

INVU, Inc. (the Company) is a holding company which operates one subsidiary INVU Plc, which is a holding company for two subsidiaries of its own, INVU Services (Services) and INVU International Holdings Limited (Holdings). The Company was incorporated under the laws of the State of Colorado, United States of America, in February 1997. INVU Plc, Services and Holdings are companies incorporated under English Law. The Company operates in one industry segment which includes developing and selling software for electronic management of many types of information and documents such as forms, correspondence, literature, faxes, technical drawings and electronic files. Services is the sales, marketing and trading company and Holdings holds the intellectual property rights to the INVU software.

On August 31, 1998, Sunburst Acquisitions I Inc. (Sunburst) (a public development stage enterprise) acquired all of the outstanding shares of INVU Plc in exchange for restricted shares of common stock of Sunburst (the Exchange) pursuant to a Share Exchange Agreement between Sunburst and the principal shareholders of INVU Plc. Sunburst exchanged 26,506,552 shares of common stock for all of INVU Plc's issued and outstanding shares of common stock. For accounting purposes, the Exchange was treated as a recapitalization of INVU Plc where INVU Plc is the accounting acquirer. All periods have been restated to give effect to the recapitalization. The historic statements from inception up to the Exchange are those of INVU Plc.

In connection with the Exchange, the directors and officers of INVU Plc became the directors and officers of Sunburst. Also, Sunburst changed its name to INVU, Inc. At the time of the Exchange, the Company issued 1,510,344 shares of Common Stock of the Company to a consultant pursuant to a consulting agreement for introducing INVU Plc and Sunburst. The shares were estimated to have a value of \$750,000 and have been treated as a transaction cost in connection with the Exchange. Immediately after the Exchange, INVU Plc's former shareholders owned approximately 88% of the outstanding common stock of Sunburst.

Edgar Filing: INVU INC - Form 10QSB

F-6

NOTE B - GOING CONCERN

The financial statements have been prepared on a going concern basis which assumes that the Company can meet its financial obligations as they fall due in the ordinary course of business. The Company's total liabilities exceeded its total assets by \$4,874,766 at October 31, 2001 and the Company had negative cash flows from operations of \$1,169,741 for the nine months to October 31, 2001. The Company is starting to generate revenues from operations and has obtained additional financing since January 31, 2001 amounting to \$1,959,000. Operations to date have been funded principally by equity capital and borrowings. However, the Company needs to raise sufficient financing to meet current obligations and to fund operations until the operations become profitable. The Company is in the process of negotiating the necessary additional financing to fund its operations. The Company's ability to continue to develop its operations depends on its ability to raise further financing. The financial statements do not include any adjustments that might result from the outcome of this uncertainty.

NOTE C - INVENTORIES

Inventories consist of the following:

	October 31, 2001 (unaudited) \$	January, 31 2001 \$
Goods for resale	22,373	35,150
General stock	11,076	-
	----- 33,449 =====	----- 35,150 =====

Goods for resale represent the finished consolidated product to be sold to the end user.

NOTE D - INTANGIBLE ASSET

The Company purchased certain assets comprising software, intellectual property rights and the customer list from an unaffiliated entity on July 31, 2001 for \$145,430 ((pound)100,000). This intangible is to be amortised, by equal instalments over a three year period as this is the estimated useful economic life over which the Company expects to generate revenues from the assets acquired. Amortisation of \$12,119 ((pound)8,333) has been charged during the period.

NOTE E - SHORT-TERM CREDIT FACILITY

The Company has a \$1,163,440 ((pound)800,000) (January 31, 2001 \$1,169,000 ((pound)800,000)), 6.5% short-term credit facility with an English bank. The credit facility is collateralized by all assets of the Company and a corporate guarantee given by Vertical Investments Limited, a company in which a non-executive director of this Company has an interest. The amount drawn against the facility at October 31, 2001 was \$1,123,214 ((pound)772,340), (January 31, 2001 \$1,682,975 ((pound)1,151,855)). The amount drawn is payable on demand at

Edgar Filing: INVU INC - Form 10QSB

the bank's discretion.

After the period end, \$872,580 ((pound)600,000) of the credit facility was converted into a medium term loan. This loan carries interest at 2% above the UK bank base rate and will be repaid at a rate of \$72,715 ((pound)50,000) a month from November 30, 2002.

F-7

	----- 3,958,782	
Less current maturities	(3,050,238)	

F-8

Scheduled maturities of long-term obligation are as follows:

Year ending October 31,	\$
2002	3,050,238
2003	122,598
2004	33,145
2005	-
2006	752,801

	3,958,782
	=====

1) Convertible debentures

All corporate and individual investors are minority shareholders in the Company.

The A and B Convertible Notes 1999-2002 are held by individuals who are minority shareholders in the Company. They are convertible into common shares at the rate of one common share for every US\$0.65 of outstanding principal Note converted for the A Notes and one common share for every US\$0.50 of outstanding principal Note converted for the B Notes. Conversion will take place:

- i) immediately prior to a Public Offering
- ii) at the option of the investors for the B Notes and automatically for the A Notes, upon new equity capital resulting in proceeds to the Company of at least \$4,000,000
- iii) at the option of the investor giving 30 days notice to the Company.

Interest amounting to \$215,665 has been accrued to October 31, 2001 (January 31, 2001 \$99,241) in respect of the A and B Convertible Notes 1999-2002.

Any outstanding principal not converted or redeemed by the anniversary date, which was August 16, 2000, will be redeemed at par plus interest in the year 2002 upon receipt of 30 days written notice from the Company or the Investors.

In consideration of the Investors advancing an aggregate of \$1,000,000, the Company caused Montague Limited the principal shareholder to transfer, and register in the name of the Investors, 225,000 shares of Common Stock of no par value.

2) Convertible loan notes

The investors are a related party of the minority shareholder of the Company. The convertible loan notes are repayable at any time within 2 years from the date of issue. They are convertible into common shares at the rate of one share for every US \$0.25 of outstanding principal at any time within the 2 years from the date of issue provided that 45 days notice has been given.

F-9

Edgar Filing: INVU INC - Form 10QSB

3) Capital leases

The Company leases vehicles under noncancellable capitalized leases.

	October 31, 2001 (unaudited) \$	January 31, 2001 \$
Vehicles	296,069	289,970
Less accumulated depreciation	(120,602)	(88,902)
	----- 175,467 =====	----- 201,068 =====

Scheduled maturities of minimum lease payments are as follows:

Period ending October 31,	\$
2002	85,783
2003	110,673
2004	14,608
	----- 211,064
Less amount representing interest	(32,918)
Present value of net minimum lease payments	----- 178,146 =====

The scheduled net minimum lease payments to maturity are included in the long-term obligation table above.

F-10

NOTE G - RELATED PARTY TRANSACTIONS

At October 31, 2001 David Morgan owed \$20,152 ((pound)13,857) (January 31, 2001 \$5,635 ((pound)3,857)) to the Company. The maximum liability during the period amounted to \$20,152 and the interest charge amounted to \$Nil (January 31, 2001 \$Nil).

The Company made purchases during the period under normal commercial terms from Impakt Software Limited, a company owned by Paul O'Sullivan who was a director of the Company until July 12, 2000 and who is a potential beneficiary of a discretionary trust, the res of which includes beneficial ownership of the Company's common stock. The percentage of Mr O'Sullivan's interest in the assets of the trust has not been determined. Total purchases amounted to \$36,927 in the three months to October 31, 2001 (Year to January 31, 2001 \$85,800) and the balance owed by the Company at October 31, 2001 was \$8,714 (January 31, 2001 \$2,233).

NOTE H - CONTINGENT LIABILITY

Edgar Filing: INVU INC - Form 10QSB

A complaint was filed against the Company on February 23, 2001 relating to a \$100,000 demand promissory note dated May 1, 2000 and payable to the order of GEM Advisors Inc (GEM). The note bears interest at a rate of 3% per annum and if payment is not made upon demand, the rate increases to 15% per annum. GEM was entitled to convert the unpaid balance and interest into shares of the Company's Common Stock if payment was not made on demand. Demand on the note was made by GEM on September 21, 2000, subsequently GEM sent the Company a conversion notice on December 18, 2000 electing to convert the note into 179,643 shares of the Company's Common Stock. The note was subsequently converted and a share certificate was delivered to GEM, which GEM returned to the Company contending that the timeliness of the delivery of the share certificate violated the terms of the note agreements. Although the Company is unable to predict any outcome of the litigation, it is the Company's position that GEM made a binding election to convert unpaid amounts due under the note into shares of the Company's Common Stock, and that the Company fully satisfied the obligations under the note.

NOTE I - STOCK OPTIONS

On September 14, 2001 the Company granted stock options to certain employees to purchase an aggregate of 1,036,365 shares of its common stock at an exercise price of \$0.50 per share. The stock options contain performance targets over the next 3 to 4 years which accelerate the vesting of the options to the individuals. If the performance targets are not met the options would vest to the individuals on the sixth anniversary of the implementation of the schemes. On the measurement date of September 14, 2001, the market price of the common stock was \$0.20 per share and accordingly no expense charge has been recorded in the financial statements.

NOTE J - RECENT PRONOUNCEMENTS

On July 20, 2001, the Financial Accounting Standards Board ("FASB") issued Statement of Financial Accounting Standards ("SFAS") 141, Business Combinations and SFAS 142, Goodwill and Other Intangible Assets. SFAS 141 is effective for business combinations completed after June 30, 2001. SFAS 142 is effective for fiscal years beginning after December 15, 2001; however certain provisions of this Statement apply to goodwill and other intangible assets acquired between July 1, 2001 and the effective date of SFAS 142.

These statements address how intangible assets that are acquired individually, with a group of other assets or in connection with a business combination should be accounted for in financial statements upon and subsequent to their acquisition. The new statements require that all business combinations initiated after June 30, 2001 be accounted for using the purchase method and establish specific criteria for the recognition of intangible assets separately from goodwill.

The Company will adopt SFAS 141 on February 1, 2002, as permitted by the new statement. The Company does not expect the adoption of SFAS 141 to have a material impact on its financial position or its results of operations.

The Company will adopt SFAS 142 on February 1, 2002, as required by the new statement. Upon adoption, the Company will no longer amortize goodwill and other indefinite lived intangible assets. The Company will be required to test its goodwill and intangible assets that are determined to have an indefinite life for impairment at least annually. Other than in those periods in which the Company may record an asset impairment, the Company expects that the adoption of SFAS 142 will not impact its financial position or its results of operations.

The FASB issued SFAS 143, Accounting for Asset Retirement Obligations, in June 2001. SFAS 143 addresses financial accounting and reporting for obligations associated with the retirement of tangible long-lived assets and the associated

Edgar Filing: INVU INC - Form 10QSB

asset retirement costs. SFAS 143 is effective for fiscal years beginning after June 15, 2002. While the Company is currently evaluating the impact the adoption of SFAS 143 will have on its financial position and results of operations, it does not expect such impact to be material.

The FASB issued SFAS 144, Accounting for the Impairment or Disposal of Long-Lived Assets, in August 2001. SFAS 144, which addresses financial accounting and reporting for the impairment of long-lived assets and for long-lived assets to be disposed of, supercedes SFAS 121 and is effective for fiscal years beginning after December 15, 2001. While the Company is currently evaluating the impact the adoption of SFAS 144 will have on its financial position and results of operations, it does not expect such impact to be material.

NOTE K - SUBSEQUENT EVENTS

Subsequent to October 31, 2001 the Company has received a \$200,000 loan advance with no set interest rate or maturity date from a company in which Daniel Goldman, a non-executive director of this company, has an interest.

F-11

Item 2. Management's Discussion and Analysis or Plan of Operation

The following description of "Management's Plan of Operation" constitutes forward-looking statements for purposes of the Securities Act of 1933, as amended (the "Securities Act"), and the Securities Exchange Act of 1934, as amended (the "Exchange Act"), and as such involves known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of INVU, Inc., a Colorado corporation (the "Company"), to be materially different from future results, performance or achievements expressed or implied by such forward-looking statements. The words "expect", "estimate", "anticipate", "predict", "believe", "plan", "seek", "objective", and similar expressions are intended to identify forward-looking statements. Important factors that could cause the actual results, performance or achievement of the Company to differ materially from the Company's expectations include the following: (1) one or more of the assumptions or other cautionary factors discussed in connection with particular forward-looking statements or elsewhere in the Company's Form 10-KSB for the fiscal year ending January 31, 2001 or in this Form 10-QSB prove not to be accurate; (2) the Company is unsuccessful in increasing sales through its anticipated marketing efforts; (3) mistakes in cost estimates and cost overruns; (4) the Company's inability to obtain financing for general operations including the marketing of the Company's products; (5) non-acceptance of one or more products of the Company in the marketplace for whatever reason; (6) the Company's inability to supply any product to meet market demand; (7) generally unfavorable economic conditions which would adversely effect purchasing decisions by distributors, resellers or consumers; (8) development of a similar competing product at a similar price point; (9) the inability to successfully integrate one or more acquisitions, joint ventures or new subsidiaries with the Company's operations (including the inability to successfully integrate businesses which may be diverse as to type, geographic area, or customer base and the diversion of management's attention among several acquired businesses) without substantial costs, delays, or other problems; (10) if the Company experiences labor and or employment problems such as the loss of key personnel, inability to hire and/or retain competent personnel, etc.; (11) the Company's cross-motion for summary judgment in its litigation with GEM Advisors, Inc. is not granted; and (12) if the Company experiences unanticipated problems and/or force majeure events (including but not limited to accidents, fires, acts of God etc.), or is adversely affected by problems of its suppliers, shippers, customers or others. All written or oral forward-looking statements attributable to the Company are

Edgar Filing: INVU INC - Form 10QSB

expressly qualified in their entirety by such factors. The Company undertakes no obligation to publicly release the result of any revisions to these forward-looking statements which may be made to reflect events or circumstances after the date hereof or to reflect the occurrence of unanticipated events. Notwithstanding the foregoing, the Company is not entitled to rely on the safe harbor for forward looking statements under 27A of the Securities Act or 21E of the Exchange Act as long as the Company's stock is classified as a penny stock within the meaning of Rule 3a51-1 of the Exchange Act. A penny stock is generally defined to be any equity security that has a market price (as defined in Rule 3a51-1) of less than \$5.00 per share, subject to certain exceptions.

The following discussion should be read in conjunction with the Consolidated Financial Statements, including the notes thereto.

The Company develops, markets and sells fully scalable software (under the brand name of INVU) for the electronic management of all types of information and documents, such as forms, correspondence, literature, faxes, e-mail, technical drawings, electronic files and web pages. Management believes that the INVU software is simple, intuitive and cost effective, yet powerful.

The Company's objective is to establish itself as a leading global supplier of information and document management software and services. For its professional range of products, INVU Series 100, Series 200, ViewSafe, and Series 2000 (formerly WEBFAST), the Company expects to target its marketing efforts initially in the United Kingdom and the United States on departmental users in organizations, distributors and resellers. The majority of the Company's development and marketing resources are now directed at its fast growing and higher margin small/medium size enterprise (SME) market and corporate professional series of products.

In November 1999, Management decided to adopt a value added reseller (VAR) model for sales of its professional range in the UK. The Company is also pursuing non-exclusive distributors for its products in other territories. Management is extremely encouraged by the number and quality of the resellers that have been recruited to date to sell the product. Each VAR is currently engaged, as an accredited reseller, at an initial fee of approximately \$3000, with a recurring annual fee thereafter. Having now recruited 95 resellers, the Company continues to monitor existing resellers to ensure that they meet the

1

stringent INVU accreditation requirements. The Company has recently embarked on an aggressive VAR recruitment campaign, and Management expects to recruit a further 20 VARs by January 31, 2002.

As is typical in a VAR based route to market, some resellers have significantly higher early sales success than others. INVU's experience is similar, with a small number of resellers gaining notable success soon after product adoption.

The INVU sales management team has implemented an intensive marketing and sales support program with its resellers, including joint seminars, direct mail and joint telephone blitz weeks.

The success of this ongoing program has provided many of the recruited resellers with a pipeline of end-user opportunities, which they are actively pursuing with the involvement of Company sales personnel. Many newly recruited resellers are taking sales orders within two weeks of accreditation. The level of end user inquiries continues to grow and these inquiries are now being converted into sales at a rapidly increasing rate. Even more satisfying is the increase in average number of users per sale and the significant reduction in

Edgar Filing: INVU INC - Form 10QSB

time between first contact and order placement by end users. Management believes that this reflects the Company's brand values of ease of use, high quality and price performance. Together with the steady increase in adoption of the INVU range by SME companies, Management is encouraged by the continuing level of interest from large organizations with orders being received from Lancashire Fire & Rescue Service, Spring Grove Property Maintenance, States of Jersey Police, Mansell Construction (a large UK construction company), River Island, Millfield Partnership Limited (a large firm of financial advisors) and Thales Contact Solutions.

The Company has also progressed further with regard to two Original Equipment Manufacture (OEM) opportunities with Xerox and Epson UK. As an Independent Software Vendor, INVU has been designated as a Xerox Business Partner. Utilizing Xerox SDK (standard development kits), the Company has been given the opportunity to develop software for the Xerox Document Centre Range, of which 70,000 machines are currently in use in the UK. Epson UK and INVU have agreed to a joint marketing strategy, whereby Epson UK, with the assistance of INVU personnel, has agreed to introduce the INVU product line to its resellers at formal events to be followed by roadshows.

During the quarter ended October 31, 2001, the Company held discussions regarding further requirements from Universal Music Group, a member of the global music, film and leisure group. The total value of orders received to date from Universal Music Group now exceeds \$258,000, and further orders are anticipated by the Company throughout the remainder of the fiscal year ended January 31, 2002 (the "Current Fiscal Year"). INVU's unique code free integration technology allows it to integrate with Universal Music Group's JD Edwards system. Development of a web-based solution for Universal Music Group is currently in progress.

The Company continues to receive repeat orders from other existing end users. In addition, Management is encouraged by the growing number of SME companies that are adopting INVU products. This is seen as continued vindication of the Company's overall strategy. The Company's sales team continues to target these enterprises, and Management believes that its expanding reseller and customer base will generate steadily increasing sales levels during the remainder of the Current Fiscal Year.

Throughout the nine months ended October 31, 2001, the Company has continued to develop its software products.

The Company's professional range of products, INVU Series 100, Series 200 and ViewSafe, were first introduced in beta format in October 1999. Version 5.1 was released to distributors in May 2000, version 5.1.1 was released to distributors in March 2001 and the latest version 5.1.2 was released in October 2001. Version 5.2 is scheduled for release in the fourth fiscal quarter of the Current Fiscal Year. Each subsequent version has built upon the original premise of ease of use, functionality and price performance. Enhancements have been added in the light of customer feedback and technical advances achieved by the Company's development department. Version 5.2 will contain the newly developed OCR (Optical Character Recognition) functionality, which works with all Microsoft Office™ file types and scanned images. This functionality will automatically allow a user to keyword search all existing documents in the system. This release will also contain a Microsoft Office Add-In, which allows integration with Microsoft Office™ 2000. This gives INVU the ability to send items from Microsoft Outlook to a user-selectable in-tray. It will also allow users to save documents from Microsoft WORD, EXCEL and PowerPoint as an INVU filing, even if these files are created outside of INVU. A separate "Sequential Workflow Module" is also planned for release alongside Version 5.2. The

Edgar Filing: INVU INC - Form 10QSB

"Sequential Workflow Module" allows documents, forms and files to be routed electronically to specific departments and individuals in a pre-determined sequence. Individuals who receive the file may review and revise it, and the file will then be sent to the next individual in the pre-determined order. The new module will be a generic adoption of the bespoke program, which is already in use with customers such as Universal Music Group. The workflow module to be released is designed to be customer friendly and easy to use. This will be a separate 5.2 Module, which when integrated with Version 5.2 will be sold as INVU Series 250, and charged accordingly.

The Company has successfully developed a highly sophisticated code free integration tool for use with the INVU professional range of products. This allows INVU products to be linked to any other Windows(TM) or Windows(TM) emulation-based applications. For instance, an INVU scanned image of a supplier invoice can be retrieved directly from an accounts software application. This is achieved without the need for further software development and gives INVU resellers the ability to add considerable value to the INVU product offering without the difficulty and cost of hiring and managing development programmers. Management believes the use of this product for Universal Music Group and other projects has significantly reduced cost and installation timescales. The Company believes that this product provides a significant competitive advantage when compared to other information and document management technologies. During the quarter ended October 31, 2001, sales of the "codefree" module have again increased, and Management expects this trend to continue throughout the Current Fiscal Year and beyond.

INVU Series 2000 (formerly INVU WEBFAST) continues to be developed. This product allows global access to retrieve, view, create or edit, and file information via the web. Management believes that this product will form the basis of future developments for many of its existing and future end users. In view of customer driven demands for various other unique features for the existing professional range, Management now estimates that this product will be released to distributors in early 2002. However, a web browser "view only" product, "i200," is expected to be released before the end of the Current Fiscal Year. Management believes this technology will place INVU in direct competition with the world's most established document management solutions providers, but at a significantly lower price level.

As previously reported, development of a highly sophisticated content addressable indexing and retrieval system reached the prototype stage during the second fiscal quarter of the Current Fiscal Year. Further work has been undertaken during the current quarter. This development allows access to data and documents through intelligent frequency of word and phrase recognition and semantic networking. Scanned images can be converted into text using standard Optical Character Recognition technology, and even poor quality scanned images can yield words and phrases that INVU's technology will retrieve. The Company expects this product to further enhance filing and retrieval speeds for organizations with large multiple data storage requirements across networks, intranets, extranets and the internet. After "beta" trials are concluded, Management expects to launch this product during the fourth fiscal quarter of the Current Fiscal Year.

Company software engineers have also successfully developed a prototype information management internet service. Management believes that this service will allow advanced internet information management within fully encrypted secure databases. Management believes that individuals and corporations will be able to store their documents on an INVU web site and access and update them in real time, via password and pin number controls, from anywhere in the world. Management believes that, although important for the long term strategy of the business, this service has a lower priority than both i200

Edgar Filing: INVU INC - Form 10QSB

and Series 2000 in the short term.

INVU's development team has produced a prototype module, which allows speech files to be stored within the INVU central database. As with all records stored within INVU, these can be attached to other corresponding files. Using advanced compression techniques, this application is capable of storing 2,800 hours of recorded sound on a standard 40 gigabyte hard disk. With the addition of a "raid card" attached to a 10 disk storage system, end users can obtain 28,000 hours of storage space for approximately \$2,000. Management believes this application may appeal to many different users. For instance, hospitals may have a need for such an application in connection with patient records, lawyers and police may use the application to record oral statements and call centers may use it to record conversations. This product now joins the Company's growing portfolio of modules and enhancements ready for release in the fourth fiscal quarter of the Current Fiscal Year.

3

During the quarter ended October 31, 2001, sales orders received were \$472,997, which represents an increase of 20% over the previous quarter. However, an additional \$111,325 has been deferred in accordance with management's position on revenue recognition.

In view of the Company's improving financial position, Management continues to review its resource requirements for the remainder of the Current Fiscal Year and the following fiscal year. Management recognizes that additional sales and technical staff will be required in order to fulfill the Company's ambitious product development and sales plans. With the expectation that funding will be available, both of these personnel issues will be addressed with the engagement of additional technical staff and sales staff.

Results of Operations

The following is a discussion of the results of operations for the nine months ended October 31, 2001, compared with the nine months ended October 31, 2000, with further comparison between the three months ended October 31, 2001 and the three months ended October 31, 2000, together with changes in financial condition during the nine month period ended October 31, 2001.

Total revenues increased by \$141,148, or 64%, from \$220,524 for the three months ended October 31, 2000 to \$361,672 for the three months ended October 31, 2001, and by \$781,984, or 284%, from \$274,843 for the nine months ended October 31, 2000 to \$1,056,827 for the nine months ended October 31, 2001. This reflects the Company's continued expansion of its customer base.

The net loss for the three months ended October 31, 2001 was \$413,187, which is 27% less than the net loss for the corresponding period in fiscal year 2000 of \$563,254, mainly due to increased sales of \$141,148. The net loss for the nine months ended October 31, 2001 was \$973,246, a reduction of \$624,564, or 39%, from the corresponding period in fiscal year 2000 of \$1,597,810, mainly due to increased sales of \$781,984.

Production costs consist of royalty fees associated with third party software, costs related to reproduction, packaging, and despatch of software, direct costs associated with the implementation of software solutions, consulting and training services and other costs related to product upgrades for existing users. Production costs as a percentage of total revenues were 16% and 15%, respectively, during the three and nine months ended October 31, 2001 compared to 19% and 24%, respectively, during the same periods in fiscal year 2000. Production costs increased \$15,859, or 37%, and \$93,499, or 143%,

Edgar Filing: INVU INC - Form 10QSB

respectively, during the three and nine months ended October 31, 2001 compared to the same periods in fiscal year 2000. The dollar increases mirror the increases in sales and the decreases in the percentages of total sales reflect the fall in production costs per unit due to economies of scale, mass production techniques and improved supply terms.

Selling and distribution costs consist primarily of personnel costs, commissions, marketing literature, travel and promotional activities such as trade shows, seminars, advertising and public relations programs. Selling and distribution costs decreased \$103,977, or 36%, during the three months ended October 31, 2001 and decreased \$154,277, or 22%, during the nine months ended October 31, 2001 compared to the same periods in fiscal year 2000. Selling and distribution costs as a percentage of total revenues were 51% and 50%, respectively, during the three and nine months ended October 31, 2001 compared to 131% and 250%, respectively, during the same periods in fiscal year 2000. The decreases over the comparable three and nine month periods were due to the Company's sales growth in 2001 and re-focussed marketing to the SME sector in 2001 rather than to retail markets in fiscal year 2000.

Research and development costs consist of continued software development and further enhancements to existing software products. These costs are expensed as incurred until technical feasibility has been established. To date, the establishment of technical feasibility and the subsequent general release to customers have been almost simultaneous, and, therefore, the Company has not capitalized software development costs. Research and development costs increased \$53,877, or 59%, and \$161,164, or 75%, respectively, during the three and nine months ended October 31, 2001 compared to the same periods in fiscal year 2000. Research and development costs as a percentage of total revenues were 40% and 35%, respectively, during the three and nine months ended October 31, 2001 compared to 41% and 78%, respectively, during the same periods in 2000. The increases over the comparable three and nine month periods reflected the Company's continued investment in its current and future products and the move from the development stage during 2001.

4

Administrative costs include the personnel and other costs of the administration, human resources and finance departments, together with property expenses, amortization of intangibles and depreciation of tangible assets. These costs decreased \$70,175, or 22%, during the three months ended October 31, 2001 and decreased \$77,821, or 10%, during the nine months ended October 31, 2001, compared to the same periods in fiscal year 2000. Administrative costs as a percentage of total revenues were 67% and 68%, respectively, during the three and nine months ended October 31, 2001 compared to 142% and 291%, respectively, during the same periods in fiscal year 2000. The decreases over the comparable three and nine month periods were due to the Company's reduced requirement for external legal, accounting and consultancy services and the increase in revenues in those periods.

During the three and nine months ended October 31, 2001, the Company incurred net interest expense of \$144,010 and \$241,479, respectively, compared to net interest expense of \$48,513 and \$106,624, respectively, during the corresponding periods in fiscal year 2000. These increases are entirely due to increased bank and loan facilities. Management expects these costs to fall as soon as additional investment funding is secured. Interest costs will also decrease when net revenues are adequate to generate net cash inflows.

The tax rates for the periods in question are zero due to a net loss in each period.

Edgar Filing: INVU INC - Form 10QSB

The total current assets of the Company were \$833,450 at October 31, 2001, an increase of \$377,113 compared to \$456,337 at January 31, 2001. Working capital was negative \$4,378,618 as of October 31, 2001, compared with negative \$2,256,025 as of January 31, 2001. These changes are mainly due to increases in accounts receivable and current maturities of long term obligations, together with decreases in short term facilities and accounts payable. The Company has obtained loan advances from Daniel Goldman (a non-executive director) and his related parties and from other entities totaling \$1,500,000 and convertible loans of \$459,000 from the same source during the nine month period ended October 31, 2001. Management believes that these amounts will either be repaid from the proceeds of future financings or converted into common stock of the Company before the end of the Current Fiscal Year, which, although it will significantly reduce the working capital deficit, will also dilute the holdings of the Company's current shareholders.

Total assets of the Company were \$1,245,846 at October 31, 2001, an increase of \$477,564 compared to \$768,282 at January 31, 2001. This is attributable to decreases in fixed assets of \$32,860, an increase in current assets of \$377,113, and an increase in intangible assets of \$133,311, which represents the acquisition of the source code, intellectual property rights and customer database of the Easifile business from Peopledoc Limited.

The total current liabilities of the Company increased by \$2,499,706 from \$2,712,362 at January 31, 2001 to \$5,212,068 at October 31, 2001. The change in current liabilities is due to decreases in accounts payable of \$145,581 and short term credit facilities of \$559,761 and increases in current maturities of long-term obligations of \$2,980,614 and accrued liabilities of \$224,434. This, together with the decrease in long-term obligations less current maturities, reflects the replacement of short-term credit facilities with short term unsecured loans and convertible loans from Daniel Goldman (a non-executive director) and his affiliates and other unrelated entities of \$1,959,000 and the subsequent repayment of accounts payable. See "Financing Management Plan of Operation." Long-term obligations less current maturities were \$908,544 at October 31, 2001 compared to \$1,962,635 at January 31, 2001.

Total stockholders' equity decreased by \$968,051 during the nine month period ended October 31, 2001 from a deficit of \$3,906,715 at January 31, 2001 to a deficit of \$4,874,766 at October 31, 2001. The Company continues to evaluate various financing options, including issuing debt and equity to finance future development and marketing of products as the Company has now moved to an operational stage.

Financing Management's Plan of Operation

The Company remains committed to raising the necessary funds and is engaged in or presently pursuing the following financing transactions.

In February 2001, Vertical Investments Limited, an entity in which Daniel Goldman, a non-executive director of the Company, has an interest, lent the Company \$1,000,000. Although initially granted with no stated maturity date or interest rate, this short term loan now bears an annual interest rate of 1.5% above the UK bank base rate and is due on December 17, 2001. Approximately \$500,000 of the loan was used to reduce the amount owed by the Company under the short-term credit facility described below with the remaining \$500,000 used for working capital.

In May 2001, the Company received loan advances of \$250,000 from Goldman Ventures Limited and \$50,000 from Paysage Investments Limited, both

Edgar Filing: INVU INC - Form 10QSB

companies in which Daniel Goldman, a non-executive director of the Company, has an interest. In July 2001, the Company received a further loan advance of \$50,000 from Goldman Ventures Limited, a company in which Daniel Goldman, a non-executive director of the Company, has an interest. Also in July 2001, the Company received \$84,000 from Pershing Nominees and \$25,000 from Guernroy Limited. Each of these advances referenced in this paragraph were made by way of convertible loans at an interest rate per annum of 1.5% above the UK bank base rate. Each of the convertible loans has maturity date 24 months from date of issue, but principal and interest may be repaid at any time without penalty. The loans are convertible at the rate of \$0.25 per share of Common Stock, and the investor may convert, having given 45 days notice, at any time during the 24 month period.

A further short-term loan of \$500,000 was made on September 25, 2001 by Goldman Ventures Limited, a company in which Daniel Goldman, a non-executive director of the Company, has an interest. This loan bears an annual interest rate of 12% per annum and is due on December 17, 2001.

Management expects that the outstanding short term loans of \$1,000,000 and \$500,000 from the various Daniel Goldman associated entities will be satisfactorily restructured on December 17, 2001.

In addition, the Company had a \$ 1,163,440 short-term credit facility with an annual interest rate of 2.0% above UK bank base note with an English bank. The Company's bank had agreed to a temporary increase in the facility of \$285,040, which was repaid on receipt of the \$500,000 from Goldman Ventures Limited on September 25, 2001. On October 29, 2001, the Company agreed with its bankers to convert \$872,580 of the principal amount of this short-term credit facility to a term loan facility. This facility will bear annual interest at the rate of 2% above UK bank base rate with repayments of principal of \$72,715 per month from November 30, 2002 with the last currently scheduled payment to occur on October 31, 2003. Interest that the Company currently pays will be debited monthly from the Company's bank current account. The remaining short-term credit facility of \$290,860 will bear annual interest at the rate of 2% above UK bank base rate and is due on September 30, 2002. Both of these credit facilities are collateralized by all assets of the Company and a corporate guarantee given by Vertical Investments Limited, a company in which Daniel Goldman, a non-executive director of this Company, has an interest. The amount drawn against the facility at October 31, 2001 was \$1,123,214. Since October 31, 2001, the Company has received a \$200,000 loan with no established interest rate or maturity date from a company in which Daniel Goldman, a non-executive director, has an interest.

Management believes that the Company can secure sufficient financing to fund the operations for a period up to the point at which net sales revenues could sustain the Company's day to day operations. Management believes that, subject to this additional investment, break-even will be achieved in the first fiscal quarter of the next fiscal year ended January 31, 2003. Management's belief is based on the assumption that its revenue forecast for the fourth quarter of the Current Fiscal Year and the next fiscal year ended January 31, 2003 is met or exceeded and that the outstanding loans other than the bank facilities are converted into equity of the Company. To the extent that the loans are ultimately converted, the Company may be required to recognize an accounting charge equal to the amount by which the aggregate market value of the common stock into which the loan could be converted exceeds the value of the loan. There can, however, be no assurance that the above transaction will be consummated, that the Company will be able to achieve monthly break-even in the first fiscal quarter of the next fiscal year ended January 31, 2003, or that additional debt or equity financing will be available, if and when needed, or that, if available, such financing could be completed on commercially favorable terms. Failure to obtain additional financing if and when needed, could have a material adverse affect on the Company's business, results of operations and financial condition. Please refer to Note B of the Consolidated Financial

Edgar Filing: INVU INC - Form 10QSB

Statements in conjunction with this paragraph regarding the Company's ability to continue as a going concern.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings.

As reflected in the Company's 10-KSB for the fiscal year ended January 31, 2001, a complaint was filed against the Company on February 23, 2001, in the United States District Court for the Southern District of New York on behalf of GEM Advisors, Inc. ("GEM") seeking money damages in the amount of \$100,000

6

together with interest from September 21, 2000, costs, disbursement and attorney fees. In response, the Company filed an answer on or about April 16, 2001 denying that any amounts are owing under the Note. It is the Company's position that GEM made a binding election to convert unpaid amounts due under the Note into shares of the Company's Common Stock, and that the Company's tender of the share certificate to GEM, and GEM's acceptance and retention of the share certificate, fully satisfied the Company's obligations under the Note and discharged the Company from any further liability under the Note.

On August 9, 2001, GEM filed a Motion for Summary Judgment. The Company filed a Cross-Motion for Summary Judgment on August 27, 2001. Both motions were submitted and are presently being considered by the court.

Item 2. Changes in Securities.

The Company granted 17 of its employees, including a director and executive officer (as described below), options to purchase an aggregate of 1,036,365 shares of its common stock. Four employees were granted options pursuant to the Invu, Inc. Enterprise Management Share Option Agreement (Group A) (the "Group A Agreement"). Under each Group A Agreement, 25% of the options vest and become exercisable each year provided that certain performance targets are met and the optionee remains an employee of the Company, subject to certain exceptions. If on the sixth anniversary of the date of grant, the performance targets have not been met and such optionee continues to remain an employee of the Company, subject to certain exceptions, the entire number of options shall vest and become exercisable. Options granted under the Group A Agreement are exercisable at an exercise price of \$.50 per share. The remaining employees were granted options pursuant to the Invu, Inc. Enterprise Management Share Option Agreement (Group B) (the "Group B Agreement"). Under each Group B Agreement, the entire number of options vest on the third anniversary of the date of grant provided that certain performance goals are met and provided that the optionee continues to remain an employee of the Company, subject to certain exceptions. However, if an optionee has been employed by the Company for five years and terminates employment with the Company before the third anniversary of the date of grant, the option shall become immediately vested and exercisable on the date of termination despite the fact that performance goals have not been met. In addition, if the performance goals have not been met by the sixth anniversary of the date of grant, the entire option shall become vested and exercisable provided that the optionee continues to remain employed with the Company, subject to certain exceptions. Options granted under the Group B Agreement are also exercisable at an exercise price of \$.50 per share. All options granted under the Group A Agreement and the Group B Agreement shall expire on the tenth anniversary of the date of grant. In the event of a change in control of the Company or a liquidation, both Group A and Group B Agreements provide for accelerated vesting of options.

Edgar Filing: INVU INC - Form 10QSB

Jon Halestrap, the Company's Vice-President of Sales and a director, was granted options under the Group A Agreement to purchase 250,000 shares of common stock. John Agostini, the Company's Chief Financial Officer, was also granted options to purchase 250,000 shares of common stock under the Group A Agreement.

The grant of the options was not registered under the Securities Act and such options are restricted securities under the Securities Act. In addition, except as set forth below, the issuance of the shares of the Company's common stock upon the exercise of the options will not be registered under the Securities Act and such shares will be restricted securities under the Securities Act subject to the restrictions on transfer set forth in Rule 144 thereunder. Except as set forth below, the share certificates issuable upon the exercise of the options will contain a legend with respect to the restrictions on transfer of such shares. The Company intends to file a registration statement on Form S-8 under the Securities Act with respect to options granted under either the Group A or Group B Agreements. If employees exercise their options after the effectiveness of such registration statement, the issuance of the shares of common stock upon exercise of the options will have been registered under the Securities Act.

The grant of the options to the Company's employees was not a "sale" under the Securities Act, however, if the grant were considered a "sale," the options were, nonetheless, granted in reliance on the exemption set forth in Section 4(2) of the Securities Act. The grants were made without any general solicitation or advertising, to a limited number of individuals, all Company employees who the Company believes were sophisticated investors and had access to all information concerning the Company needed to make an informed decision.
