the satellite, is in the process of collecting data prior to the initiation of available corrective actions to complete deployment of the North array. Incomplete deployment of a solar array, if not corrected, reduces a satellite's power. The satellite is in safe mode and has more than sufficient power to maintain satellite health.

Telstar 14/Estrela do Sul, to be operated by Loral Skynet do Brasil at 63 degrees West longitude, is insured for partial and total losses up to a maximum of \$250 million.
