SEC Registration No. 333-127635

**PROSPECTUS SUPPLEMENT NO. 1
(TO PROSPECTUS DATED DECEMBER 9, 2005)**

PROSPECTUS

GRYPHON GOLD CORPORATION

Cdn\$5,100,000

(\$4,370,000)

6,000,000 Units

This is the initial public offering of our securities. We are offering 6,000,000 units at a price of Cdn\$0.85 (\$0.7285) per unit. Each unit will consist of one (1) share of our common stock and one (1) Class A Warrant. Each Class A Warrant is exercisable to acquire one share of common stock at a price of Cdn\$1.15 (\$0.9857) until 5:00 p.m. (New York time) on December 22, 2006 (or one year from the Closing Date). Our units are being offered for sale concurrently by Canadian underwriters in the provinces of British Columbia, Alberta, Manitoba and Ontario, Canada under the terms of a prospectus filed with Canadian securities regulatory authorities and in Europe through selling agents in accordance with applicable law. The units will not be sold in the United States.

We have granted the underwriters a 15% over-allotment option, which if fully exercised, would allow them to acquire an additional 900,000 units at Cdn\$0.85 (\$0.7285) to cover over-allotments. The initial public offering price of the units and the terms of the Class A Warrants was determined by negotiation between Gryphon Gold and the underwriters in the context of the market. These prices may not reflect the market price of our common stock after our offering.

No public trading market currently exists for our units, common stock or warrants. We have received conditional listing approval to list our common stock on the Toronto Stock Exchange under the symbol GGN, subject to us fulfilling all of the listing requirements of the Toronto Stock Exchange.

Investing in our common stock involves risks. See Risk Factors and Uncertainties beginning on page 5.

	Price to Public	Underwriting Discounts and Commissions⁽¹⁾	Net Proceeds to Company⁽²⁾
Per Unit	Cdn\$0.85 (\$0.7285)	Cdn\$0.068 (\$0.058)	Cdn\$0.782 (\$0.067)
Total Offering ⁽²⁾	Cdn\$5,100,000 (\$4,370,000)	Cdn\$408,000 (\$350,000)	Cdn\$4,692,000 (\$4,020,000)

(1) We have agreed to underwriting discounts and commissions equal to 8% of the initial public offering price. Underwriters may pay selling agents selling agent commissions from underwriting discounts and commissions. In addition, we agreed to issue the underwriters compensation options exercisable to acquire a number of shares of common stock equal to 10% of the number of units sold. The compensation options are exercisable to acquire shares of common stock at the initial public offering price until December 22, 2006 (or one year from the Closing Date).

(2) After deducting the underwriting discounts and commission but before deducting the expenses of the offering which are estimated at Cdn\$1,400,000 (\$1,200,000). We have agreed to pay to Desjardins Securities Inc., one of the underwriters, a consulting fee of Cdn\$175,000 as compensation for corporate finance advice provided to us. The expenses of the offering, including the underwriters' expenses, will be paid by us.

We have granted the underwriters an over-allotment option, exercisable until the date which is 30 days following the closing of this offering, to purchase on the same terms a number of additional units equal to up to 15% of the

number of units sold in the offering. If the underwriters exercises the over-allotment option in full, the total offering will be Cdn\$5,865,000 (\$5,030,000) and proceeds to us (before expenses of the offering) will be approximately Cdn\$5,396,000 (\$4,625,000). This prospectus covers the shares of common stock issuable upon exercise of the Class A Warrants and the underwriters' compensation options.

The underwriters expect to deliver the shares of common stock and Class A Warrants comprising the units on or about December 22, 2005.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities or determined if this prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

The date of this Prospectus Supplement is February 21, 2006

Gryphon Gold Corporation
(an exploration stage company)

NOTES TO INTERIM CONSOLIDATED FINANCIAL STATEMENTS

(Stated in U.S. dollars)
(Unaudited)

1. NATURE OF OPERATIONS AND CONTINUANCE OF OPERATIONS

Gryphon Gold Corporation and its subsidiary, Borealis Mining Company (collectively, the Company), were incorporated in the State of Nevada in 2003. The Company is an exploration stage company in the process of exploring its mineral properties, and has not yet determined whether these properties contain reserves that are economically recoverable.

The recoverability of amounts shown for mineral property interests in the Company's consolidated balance sheets are dependent upon the existence of economically recoverable reserves, the ability of the Company to arrange appropriate financing to complete the development of its

properties, the receipt of necessary permitting and upon achieving future profitable production or receiving proceeds from the disposition of the properties. The timing of such events occurring, if at all, is not yet determinable.

2. BASIS OF PRESENTATION

These interim unaudited consolidated financial statements have been prepared by the Company in accordance with U.S. generally accepted accounting principles (GAAP) for interim financial statements, applied on a consistent basis. These interim financial statements follow the same significant accounting policies and methods of application as those disclosed in Note 2 to the Company's audited consolidated financial statements as at and for the year ended March 31, 2005 (the Annual Financial Statements). Accordingly, they do not include all disclosures required for annual financial statements. These interim unaudited consolidated financial statements and notes thereon should be read in conjunction with the Annual Financial Statements.

The preparation of these interim unaudited consolidated financial statements and the accompanying notes requires management to make estimates and assumptions that affect the amounts reported. In the opinion of management, these interim unaudited consolidated financial statements reflect all adjustments (which include only normal, recurring adjustments) necessary to state fairly the results for the periods presented. Actual results could vary from these estimates and the operating results for the interim periods presented are not necessarily indicative of the results expected for the full year.

March 31, 2005	32,080	9,144	22,936

4. MINERAL PROPERTY

On January 28, 2005, the Company purchased the rights to a full 100% interest in the Borealis property in Nevada, USA from Golden Phoenix Minerals, Inc. (GPXM) for \$1,400,000. A cash payment of \$400,000 was made on closing with four quarterly payments of \$250,000 to be made over the following 12 months. The Company pledged 15% of the shares of its subsidiary, Borealis Mining Company, as security to GPXM against non-payment of the outstanding obligation. At December 31, 2005, \$250,000 remained payable to GPXM and 3.75% of Borealis Mining Company shares were pledged. Subsequent event: On January 24, 2006, the Company paid \$250,000 to GPXM as the final instalment of the

4. MINERAL PROPERTY

6. CAPITAL STOCK

[a] Authorized share capital consists of 150,000,000 common shares with a par value of \$0.001 per share and 15,000,000 preferred shares with a par value of \$0.001 per share.

Edgar Filing: GRYPHON GOLD CORP - Form 424B3

On December 22, 2005 the Company completed an initial public offering of 6,900,000 units at a price of Cdn\$0.85 per unit. Each unit consisted of one share of common stock and one Class A warrant to purchase one share of common stock exercisable until December 22, 2006 at Cdn\$1.15. Total share issue costs associated with this offering were \$2,241,940 which includes the fair value of warrants issued to the underwriters as compensation, as described in note 6[b] below.

[b] Warrants

The following table contains information with respect to all warrants:

	Number of warrants	Fair value of warrants on issuance
Warrants outstanding, March 31, 2005	3,548,989	\$ 45,100
Issued for:

(Unaudited)

6. CAPITAL STOCK (cont d.)

The following table summarizes information about warrants outstanding and exercisable as at December 31, 2005:

Warrants Outstanding and Exercisable

Shares #	Average Remaining Life Years #	Weighted average price
6,423,185	1.0	\$0.90
271,008	1.7	\$0.65
6,900,000	1.0	Cdn\$1.15
690,000	1.0	Cdn\$0.85

14,284,193	Warrants Outstanding and Exercisable	1.0	\$0.93*
------------	---	-----	---------

* Based on December 31, 2005 exchange rate of Cdn\$1.1630 equals US\$1.

The fair value of agent's and underwriters' warrants issued in the nine months ended December 31, 2005 has been estimated using the Black-Scholes Option Pricing Model based on the following assumptions respectively: a risk-free interest rate of 3.02% to 3.89% as of the date of transaction; expected life of 3 and 1 years depending on their terms; an expected volatility of 72% and 65% (based on the average volatility of companies in the industry at date of issuance); and no expectation for the payment of dividends.

[c] Stock options:

As permitted by Statement of Financial Accounting Standards (SFAS) No. 123, Accounting for Stock-Based Compensation (SFAS No. 123), the Company has elected to follow Accounting Principles Board Opinion No. 25, Accounting for Stock Issued to Employees (APB No. 25), and complies with the disclosure provisions of SFAS No. 123 for its employee and director stock-based compensation.

On March 29, 2005, the Board of Directors adopted the 2004 Stock Incentive Plan (the Plan) and on May 13, 2005 the Plan was approved by the shareholders. Under the Plan a total of 3,000,000 stock options may be granted over a 10 year period, with vesting provisions determined by the Board. On the date of adoption 2,000,000 options were granted to directors, officers and a consultant, which vested immediately and are exercisable for 5 years at a price of \$0.75 per share. The consultant received 100,000 options which resulted in compensation expense of \$34,300 being recorded as consulting fees during the year ended March 31, 2005.

In August 2005, two newly appointed directors were granted 300,000 options which vest over the following 18 months and are exercisable for 5 years at a price of \$0.75 per share. In September 2005, a newly appointed officer was granted 100,000 options which vest over the following 24 months and are exercisable for 5 years at a price equal to the initial public offering price of units or Cdn\$0.85 per share.

6. CAPITAL STOCK (cont d.)

In November 2005, two employees were granted 95,000 options and a consultant was granted 20,000 options. These options vest over 18 to 24 months and are exercisable for 5 years at a price equal to the initial public offering price of units or Cdn\$0.85 per share. The option grant to the consultant resulted in a compensation expense of \$7,560 being recorded in the quarter ended December 31, 2005.

The following table summarizes information about stock options outstanding and exercisable as at December 31, 2005:

Options Outstanding and Exercisable Stock Options

Shares #	Average Remaining Life Years	Weighted average price
-------------	---------------------------------	---------------------------

Edgar Filing: GRYPHON GOLD CORP - Form 424B3

Options Outstanding and Exercisable Stock Options

\$

Outstanding	Exercisable		
2,300,000	2,072,000	4.3	US\$0.75
215,000	45,000	4.8	Cdn\$0.85

The impact on the Company's net loss and net loss per share had the Company recognized stock-based compensation using the fair value method for options issued to employees and directors would have been as follows:

	Three months ended		Nine months ended		Period from April 24, 2003 (inception) December 31, 2005
	December 31, 2005	December 31, 2004	December 31, 2005	December 31, 2004	
Net loss for the period	(1,557,646)	(490,505)	(3,188,834)	(1,654,985)	(6,830,179)
Additional compensation expense	(7,560)	--	(50,560)	--	(702,260)
Pro forma net loss for the period	(1,565,206)	(490,505)	(3,239,394)	(1,654,985)	(7,532,439)
Pro forma basic and diluted loss per share	\$ (0.05)	\$ (0.03)	\$ (0.12)	\$ (0.11)	

The pro forma compensation expense reflected above has been estimated using the Black-Scholes option pricing model. The assumptions used in the pricing model include:

	2006	2005
Dividend yield	0%	0%
Expected volatility	70%, 68%, 65%	73%
Risk free interest rate	3.38%, 3.45%, 3.83%	3.24%
Expected lives	4 years	4 years

Options pricing models require the input of highly subjective assumptions, particularly as to the expected price volatility of the stock. Changes in these assumptions can materially affect the fair value estimate and therefore it is management's view that the existing models do not necessarily provide a single reliable measure of the fair value of the Company's equity instruments.

NOTES TO INTERIM CONSOLIDATED FINANCIAL STATEMENTS

(Stated in U.S. dollars)

(Unaudited)

7. RECLAMATION DEPOSIT

The Company has purchased a performance bond in the amount of \$59,800 from an insurance company in support of its potential future obligations under a Plan of Operation for exploration filed with the U.S. Forest Service. At December 31, 2005, the Company recorded a reclamation liability of \$10,000 related to its drilling activities completed to date. The Company continues to hold the bond in support of current and future obligations under the Plan of Operation for exploration filed with the U.S. Forest Service.

8. COMMITMENTS

- [a] A portion of the Borealis Property is subject to a mining lease. The Company is required to make monthly lease payments of \$8,916, adjusted annually based on the Consumer Price Index, for the duration of the lease term. In addition, production of precious metals from the Borealis Property will be subject to the payment of a royalty under the terms of the mining lease. The mining lease expires in 2009, but may be renewed by the Company annually thereafter, so long as mining activity continues on the Borealis Property. The Company has the option to terminate the mining lease at any time prior to expiry in 2009.
- [b] The Company rents office space in Lakewood, CO and Vancouver, BC for 5 and 3 year terms, respectively. The following are related commitments in the next 5 years:

	\$
2006	17,471
2007	70,170
2008	70,862
2009	48,734
2010	38,016

9. CAPITAL LEASE

The Company entered into a two year lease, expiring in December 2007, to acquire a truck. The transaction is accounted for as a capital lease, with the present value of the required lease payments recorded as a liability and an asset at inception and thereafter lease payments reduce the liability and result in interest expense and the asset is depreciated.

10. SUBSEQUENT EVENT

In January 2006, the Company granted a total of 190,000 stock options, 90,000 to an employee and 100,000 to a consulting firm. These options vest over 24 and 14 months and are exercisable for 5 years at the closing market price of the common stock on the date of grant, of \$1.15 and \$1.25 respectively.

11. RECLASSIFICATION

Certain comparative amounts have been reclassified to conform with current period disclosure.

Item 2. Plan of Operation.

Overview

Gryphon Gold Corporation was incorporated in Nevada on April 24, 2003 and has corporate offices in Vancouver, British Columbia, and Lakewood, Colorado. Our objective is to establish a producing gold company through the development and extraction of gold deposits, beginning with the Borealis Property. Currently our sole asset is a 100% interest in the Borealis Property, located in Mineral County, Nevada. We have not determined if the mineralized material from the Borealis Property can be economically exploited.

In July 2003 we initially acquired from Golden Phoenix Minerals, Inc. an option to earn a 70% joint venture interest in the Borealis Property by incurring qualified development expenditures. On January 28, 2005 we acquired the remaining interest held by Golden Phoenix in the Borealis Property for \$1,400,000. Our subsidiary, Borealis Mining, paid to Golden Phoenix \$400,000 upon closing of the purchase on January 28, 2005, with four additional quarterly payments of \$250,000 due to Golden Phoenix. On January 24, 2006, Borealis Mining completed all its financial requirements with respect to Golden Phoenix with a final payment of \$250,000.

A portion of the Borealis Property is subject to the mining lease. We are required to make monthly lease payments of \$8,916, adjusted annually based on change in the Consumer Price Index. In addition, the production of precious metals from the Borealis Property will be subject to the payment of the royalty under the terms of the mining lease. The terms of the mining lease and royalty are described under Borealis Property . We have also entered into office lease arrangements for offices in Vancouver, British Columbia, Lakewood, Colorado and Hawthorne, Nevada.

In May 2005 we initiated a new drilling program, expected to continue to the early part of 2006. Approximately 140 holes (30,000 feet of RC drilling) are planned in the area of existing mineralization in order to allow us to complete a feasibility study with the aim of identifying gold reserves and, if economically feasible, building a mine.

We are preparing a feasibility study on the previously mined area of the Borealis Property to further delineate the gold mineralization available for the operation of a mine, to upgrade some or all of the mineralized material to proven and probable reserves, design the open pit mine, heap leach pads and gold recovery plant and to estimate the capital and operating costs of the proposed mining scenario. Metallurgical test work completed to date indicates the material is amenable to conventional heap-leach recovery methods. Once we have completed a feasibility study and, if warranted have made a decision to begin development, we intend to develop our Borealis Property and place it into production, assuming adequate additional capital is available.

In December, 2005, the Company completed its initial public offering of 6.9 million units for gross proceeds of Cdn \$5.9 million. The units were sold at a price of Cdn\$0.85 each and consist of one common share and one warrant. Each warrant is exercisable for a period of 12 months at a price of Cdn \$1.15. The common shares are listed on the Toronto Stock Exchange under the symbol GGN . The proceeds of the offering will be used principally for the completion of the Company s feasibility study for its Borealis Property and its exploration program on the Borealis Property, as well as for working capital.

In 2005 our exploration work focused on definition drilling contiguous to the areas of known gold deposits (the Central Borealis); the results of which will be compiled and is expected to be reported during this first quarter. During 2006 the Company plans to continue definition drilling (budgeted at C\$1.2 million) and to launch a broader scale district exploration program (budgeted at C\$1.7 million) targeting areas with known gold mineralization on the balance of the 23 square mile property.

Our plan for the 2006 fiscal year (ending March 31, 2006) and beyond is to work towards completing a feasibility study and mine plan for our Borealis Property and, if warranted and we are able to raise sufficient additional capital, building an open pit heap-leach mine. The following activities are planned for fiscal 2006:

Continuation of the permitting process, with the aim of obtaining substantial permits for mine development expected in early 2006.

Completion of a drilling program and a feasibility study designed to classify current resources into ore reserves and to develop an economic mine plan.

Initiate an exploration program to assess several identified zones on the Borealis property which have gold mineralization potential similar to the previously mined area.

Management's Discussion and Analysis

This discussion and analysis should be read in conjunction with the accompanying Consolidated Financial Statements and related notes. The discussion and analysis of the financial condition and results of operations are based upon the consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States. The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires the company to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of any contingent liabilities at the financial statement date and reported amounts of revenue and expenses during the reporting period. On an on-going basis the company reviews its estimates and assumptions. The estimates were based on historical experience and other assumptions that the company believes to be reasonable under the circumstances. Actual results are likely to differ from those estimates under different assumptions or conditions, but the company does not believe such differences will materially affect our financial position or results of operations. Critical accounting policies, the policies the company believes are most important to the presentation of its financial statements and require the most difficult, subjective and complex judgments, are outlined below in *Critical Accounting Policies*, and have not changed significantly.

We use words like *expects*, *believes*, *intends*, *anticipates*, *plans*, *targets*, *projects* or *estimates* in this quarterly report. When words and other, similar words and phrases or statements that an event, action or result will, may, could, or should occur, be taken or be achieved identify forward-looking statements. Such forward-looking statements reflect our current views with respect to future events and are subject to certain risks, uncertainties and assumptions, including, the risks and uncertainties outlined in Exhibit 99.1 titled *Risk Factors and Uncertainties*. Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those anticipated, believed, estimated or expected. Our management has included projections and estimates in this quarterly report, which are based primarily on management's experience in the industry, assessments of our results of operations, discussions and negotiations with third parties and a review of information filed by our competitors with the Securities and Exchange Commission or otherwise publicly available. We caution readers not to place undue reliance on any such forward-looking statements, which speak only as of the date made. We disclaim any obligation subsequently to revise any forward-looking statements to reflect events or circumstances after the date of such statements or to reflect the occurrence of anticipated or unanticipated events.

We qualify all the forward-looking statements contained in this quarterly report by the foregoing cautionary statements.

Critical Accounting Policies and Estimates

The preparation of our consolidated financial statements is in accordance with accounting principles generally accepted in the United States. We do not reconcile our consolidated financial statements to Canadian generally accepted accounting principles. The following are critical accounting policies and estimates which we believe are important to understanding our financial results.

Use of estimates

The preparation of financial statements requires us to make estimates and assumptions which affect the reported amounts of assets and liabilities at the date of the financial statements and the revenues and expenses for the period reported. By their nature, these estimates are subject to measurement uncertainty and the effect on the financial

statements of changes in such estimates in future periods could be significant. Actual results will likely differ from these estimates.

Exploration of mineral property interests

We expense exploration costs as they are incurred. When we determine that a mining deposit can be economically and legally extracted or produced based on established proven and probable reserves, development costs incurred after such determination will be capitalized. The establishment of proven and probable reserves is based on results of final feasibility studies which indicate whether a property is economically feasible. Upon commencement of commercial production, we will transfer capitalized costs to the appropriate asset category and amortize them over their estimated useful lives and/or ounces produced, as appropriate. We capitalize the cost of acquiring mineral property interests (including claims establishment and maintenance) until we have determined the viability of the property. We expense capitalized acquisition costs if we determine that the property has no future economic value. We will also write down capitalized amounts if estimated future cash flows, including potential sales proceeds, related to the mineral property are estimated to be less than the carrying value of the property.

Stock-based compensation

As permitted by the Statement of Financial Accounting Standards we have elected to follow Accounting Principles Board Opinion No. 25, Accounting for Stock Issued to Employees, and related interpretations for our employee stock-based compensation. Based on these standards, no compensation expense is recognized at the time of any option grant if the exercise price of the employee stock option is fixed and equals or exceeds the fair value of the underlying common stock on the date of the grant and the number of shares to be issued pursuant to the exercise of such option are known and fixed at the date of grant.

Asset retirement obligations

We record the present value of an asset retirement obligation as a liability in the period in which we incur a legal obligation associated with the retirement of tangible long-lived assets that results from the acquisition, construction, development or normal use of the assets with a corresponding increase in the carrying amount of the related long-lived asset. This amount is depreciated over the estimated useful life of the related assets. The liability is subsequently accreted through charges to expense over its expected life. Currently, we have no asset retirement obligations.

Tax valuation allowance

We have recorded a valuation allowance that fully reserves for our deferred tax assets because at this time we cannot establish that we will be able to utilize the tax loss carryforwards in the future. If in the future we determine that we will be able to use all or a portion of our deferred tax assets in the future, based on our projections of future taxable income, we will reduce the valuation allowance, thereby increasing income in that period.

Foreign currency translation

The United States dollar is our functional currency. Transactions involving foreign currencies for items included in operations are translated into U.S. dollars using average exchange rates; monetary assets and liabilities are translated at the exchange rate prevailing at the balance sheet date and all other balance sheet items are translated at the historical rates applicable to the transactions that comprise those amounts. Translation gains and losses are included in our determination of net income.

Recent Accounting Pronouncements

Edgar Filing: GRYPHON GOLD CORP - Form 424B3

The United States Securities and Exchange Commission recently announced that it would provide for a phased-in implementation process for FASB Statement No. 123(R), Share-Based Payment (SFAS 123(R)). Registrants must adopt SFAS 123(R) s fair value method of accounting for share-based payments to employees no later than the beginning of the first interim or annual period beginning after December 15, 2005. We plan to adopt SFAS 123(R) effective January 1, 2006.

The Financial Accounting Standards Board ratified the consensus of the Emerging Issues Task Force that stripping costs incurred during the production phase of a mine are variable production costs that should be included in the costs of the inventory produced during the period that the stripping costs are incurred. This consensus is effective for the first reporting period in fiscal years beginning after December 15, 2005, with early adoption

13

permitted. To date the Company has not incurred any stripping costs. We plan to adopt the consensus effective April 1, 2006.

Results of Operations

We are in an exploration stage and currently have no producing mineral properties and thus we had no revenues during all reporting periods.

Three months ended December 31, 2005 compared to three months ended December 31, 2004

For the three month period ended December 31, 2005 we had a net loss of \$1,557,646 or \$0.05 per share compared to a net loss of \$490,505 or \$0.03 per share in the same period in the prior year. Our operating expenses, excluding costs directly related to completion of our initial public offering (IPO), totaled \$1,591,567 during the quarter ended December 31, 2005 compared to \$498,812 in the same period in the prior year. Our largest costs are exploration expenses incurred on our Borealis property and in the quarter ended December 31, 2005 they reached \$926,361 or 58% of our total expenses, compared to \$104,288 or 21% of total expenses in the quarter ended December 31, 2004. The increase in spending was related to the ongoing definition drilling program and feasibility study, initiated in May 2005, and also the costs of continuing our permitting activities. During the quarter a total of 39 reverse circulation drill holes were completed, no drilling was carried out during the prior year quarter. Exploration expenses are anticipated to continue as we work to complete the feasibility study during the second calendar quarter of 2006. Management salaries and consulting fees in the quarter ended December 31, 2005 were \$478,582 compared to \$272,854 incurred in the quarter ended December 31, 2004 as staffing levels have increased. Salaries and consulting fees are expected to continue to increase in future periods as we expect to hire additional personnel if we commence mine development on the Borealis property. Legal and audit fees expensed during the quarter were \$58,223, which excludes costs directly attributable to the IPO, compared to \$60,294 during the quarter ended December 31, 2004. Travel and accommodation during the quarter ended December 31, 2005 was only \$6,317, as most travel during the current quarter was directly related to the IPO and compared to \$29,214 expended on travel in the prior year quarter. General and administrative expenses of \$120,549 compared to \$32,775 in the prior year quarter. Travel and general and administrative expenses will continue to increase in future periods with the expected continuing increase in activity to support the development of our Borealis property and with the additional obligations as a public company in the United States and in Canada. We had interest income of \$33,921 in the quarter ended December 31, 2005, compared to \$8,307 in the prior year as cash balances increased significantly.

Nine months ended December 31, 2005 compared to nine months ended December 31, 2004

For the nine month period ended December 31, 2005 we had a net loss of \$3,188,834 or \$0.12 per share compared to a loss of \$1,654,985 or \$0.11 per share in the nine months ended December 31, 2004 on fewer shares outstanding. The current year period loss does not reflect the costs directly related to the completion of the IPO, as those costs are treated as share issue costs and are offset directly against the proceeds of the offering. Exploration expenses during the nine month period ending December 31, 2005 were \$1,764,827 or 53% of our total expenses during the period compared to \$744,373 or 45% of total expenses in the nine month period ended December 31, 2004. The increase in spending was related to the definition drilling program and feasibility study initiated in May 2005. The definition drilling program is ongoing and the feasibility study is anticipated to be completed in the second calendar quarter of 2006. During the nine months ended December 31, 2005 a total

of 94 reverse circulation holes were drilled on the Borealis property, compared to 32 holes during same period in 2004. Management salaries and consulting fees in the nine month period ended December 31, 2005 were \$919,525 compared to \$617,772 expended in the nine months ended December 31, 2004 as staffing increased in the 2005 period. Legal and audit fees expensed during the current nine month period were \$247,694 compared to \$104,786 during the nine month period ended December 31, 2004, the increase in costs reflecting activity related to exploring financing alternatives and changing our reporting to US generally accepted accounting principles (GAAP) from Canadian GAAP. Our travel and accommodation expenses were \$102,474 during the first nine months of 2005 and compared to \$82,723

spent in the nine month period ending December 31, 2004, the increase was result of higher staffing and travel related to financing activity prior to the IPO and work on the Borealis property. General and administrative expenses during the nine month period ended December 31, 2005 were \$251,462 compared to \$107,691 in the prior year nine month period, the increase due to higher spending on investor relations, rent, office support, insurance and telephone. Interest income earned in the nine month period ending December 31, 2005 was \$113,050 compared to \$8,902 in the same period in 2004 due to higher cash balances and the use of interest bearing bank accounts in 2005.

Liquidity and Capital Resources

Our principal source of liquidity is cash which is raised by way of sale of commons shares from treasury. On December 22, 2005 we completed an underwritten initial public offering (IPO) in Canada by selling 6,900,000 units, consisting of one share of common stock and one Class A warrant, at Cdn\$0.85 per unit. The shares were listed on the TSX for trading. The net proceeds of this offering were \$2,794,557 after deducting costs of \$2,241,940. These costs, which include underwriters discounts and commissions, were higher than anticipated due to the complexity of the dual securities registration process (USA and Canada) and, as a percentage of funds raised, were high due to the fixed nature of many of the costs.

During the nine month period ended December 31, 2005 total cash of \$6,843,494 was raised from the sale of stock in private placements and the IPO, net of costs, compared to \$1,443,500 raised during the same period in the prior year. During the nine month period in 2005 total of \$849,865 was invested in the mineral property, principally in payments to Golden Phoenix, and \$113,513 was invested in equipment, including an electronic spectrometer, computers and furniture. During the nine month period ending December 31, 2004, \$233,550 was invested in the mineral property and \$12,958 was invested in equipment.

At December 31, 2005 we had working capital of \$5,068,805, and we had current assets consisting of \$6,215,053 in cash, \$56,659 in accounts receivable and \$53,273 in prepaid expenses. We had \$1,256,180 in current liabilities at December 31, 2005, consisting of \$996,385 in accounts payable and accrued liabilities, \$250,000 in property purchase obligations to Golden Phoenix (repaid on January 24, 2006) and \$9,795 in current portion of a capital lease. We believe we have sufficient working capital to fund completion of our drilling program, permitting and feasibility study, costs related to lease and claim maintenance fees, our payment obligations to Golden Phoenix and general and administrative expenses for approximately 18 months. In order to bring the Borealis property into production we will need to obtain additional capital, either by sale of common stock or by issuing debt.

Summary of any product research and development that the company will perform for the term of the plan.

The Company does not anticipate performing any product research and development under its plan of operation.

Expected purchase or sale of plant and significant equipment.

The Company is reviewing alternatives for purchase of mine equipment if the development of a mine on the Borealis property is warranted by a feasibility study and additional financing is obtained.

Significant changes in number of employees.

The Company expects the number of employees to gradually increase from current level (8).

Off-Balance Sheet Arrangements

The Company does not have any off-balance sheet arrangements that have or are reasonably likely to have a current or future effect on our financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources that is material to investors.

15

Item 3. Controls and Procedures

The Company maintains disclosure controls and procedures designed to ensure that information required to be disclosed in reports filed under the Securities Exchange Act of 1934, as amended, is recorded, processed, summarized and reported within the specified time periods. As of the end of the period covered by this report, the Company's principal executive officer and principal financial officer evaluated the effectiveness of our disclosure controls and procedures. Based on the evaluation, which disclosed no significant deficiencies or material weaknesses, the Company's principal executive officer and principal financial officer concluded that the Company's disclosure controls and procedures are effective.

There were no changes in the company's internal control over financial reporting that occurred during the company's most recent fiscal quarter and the period covered by this quarterly report that have materially affected, or are reasonably likely to materially affect, the company's internal control over financial reporting.

PART II OTHER INFORMATION

Item 1. Legal Proceedings.

Except as provided below, neither we nor any of our property, including the Borealis Property, are currently subject to any material legal proceedings or other regulatory proceedings, and to our knowledge no such proceedings are contemplated.

On September 16, 2005, our subsidiary, Borealis Mining Company, was named as a co-defendant in an ongoing civil action pending in the United States District Court for the District of Nevada, entitled *United States v. Walker River Irrigation District* (Court Doc. No. In Equity C-125, Subfile C-125-B). The action seeks to determine the existence and extent of water rights held by the federal government in the Walker River drainage area for use on federally reserved lands such as Indian reservations, National Forests, military reservations, and the like. The suit does not dispute nor seek to invalidate any existing water rights (including ours); rather, it seeks to determine the extent and priority of the federal government's water rights. On May 27, 2003, the Court stayed all proceedings to allow the United States, the State of Nevada, the State of California, the Walker River Paiute Tribe, the Walker River Irrigation District, Mono County, California, Lyon County, Nevada, Mineral County, Nevada and the Walker Lake Working Group to attempt to mediate a settlement. Borealis Mining Company was named as one of several hundred co-defendants in this action because it owns water rights within a portion of the Walker River drainage area in Nevada, which were granted under a permit on September 16, 2005. We, like most private water right owners, do not intend to participate in the merits of the lawsuit. We do not believe that this civil action, which will determine the extent and priority of federally reserved water rights in the area, will have any effect on our planned business operations as we currently have permits to access water from two sites for our Borealis Property, one of which is not subject to this action and either of which, individually, would provide a sufficient water supply for our planned operations.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

Since our inception we have offered and sold the following securities in unregistered transactions pursuant to exemptions under the Securities Act of 1933, as amended.

On or about May 15, 2003, we issued 3,000,000 shares of common stock to our founding shareholders at \$0.10 per share. We offered and sold shares outside the United States to non-U.S. persons in off-shore transactions pursuant to the exemption from registration available under Regulation S of the Securities Act and in the United States in private transactions not involving a public offering pursuant to exemptions available under Rule 506 of Regulation D and Section 4(2) of the Securities Act.

On or about June 15, 2003, we issued 1,885,000 shares of common stock at \$0.15 per share to our directors. We offered and sold shares outside the United States to non-U.S. persons in off-shore transactions pursuant to the exemption from registration available under Regulation S of the Securities Act and in the United States in private transactions not involving a public offering pursuant to exemptions available under Rule 506 of Regulation D and Section 4(2) of the Securities Act.

16

On or about August 15, 2003, we issued 1,902,500 shares of common stock at \$0.20 per share and 537,500 shares of common stock at \$0.225 per share payable by installment promissory notes. We offered and sold shares outside the United States to non-U.S. persons in off-shore transactions pursuant to the exemption from registration available under Regulation S of the Securities Act and in the United States in private transactions not involving a public offering pursuant to exemptions available under Rule 506 of Regulation D and Section 4(2) of the Securities Act.

On or about September 16, 2003, we issued 270,000 shares of common stock at \$0.15 per share to a director, 1,400,000 shares of our common stock at \$0.20 per share, and an additional 100,000 shares of our common stock at \$0.225 per share payable by installment promissory notes. We offered and sold shares outside the United States to non-U.S. persons in off-shore transactions pursuant to the exemption from registration available under Regulation S of the Securities Act and in the United States in private transactions not involving a public offering pursuant to exemptions available under Rule 506 of Regulation D and Section 4(2) of the Securities Act.

On or about December 17, 2003, we issued 95,000 shares of common stock at \$0.15 per share to a director, 3,663,500 shares of common stock at \$0.20 per share and 122,500 shares of common stock at \$0.225 per share payable by installment promissory notes. We offered and sold shares outside the United States to non-U.S. persons in off-shore transactions pursuant to the exemption from registration available under Regulation S of the Securities Act and in the United States in private transactions not involving a public offering pursuant to exemptions available under Rule 506 of Regulation D and Section 4(2) of the Securities Act.

On or about March 8, 2004, we issued 1,250,000 shares of common stock at \$0.15 per share to our directors and 150,000 shares of common stock at \$0.20 per share. We offered and sold shares outside the United States to non-U.S. persons in off-shore transactions pursuant to the exemption from registration available under Regulation S of the Securities Act and in the United States in private transactions not involving a public offering pursuant to exemptions available under Rule 506 of Regulation D and Section 4(2) of the Securities Act.

On September 7, 2004, we reserved for issuance and later sold 500,000 shares of common stock to our chief financial officer at \$0.35 per share under the terms of his employment agreement. The shares were issued in a private transaction not involving a public offering pursuant to exemptions available under Section 4(2) of the Securities Act.

On September 28, 2004, we sold 778,500 shares of common stock at \$0.65 per share and subsequently issued 389,250 share purchase warrants to each purchaser exercisable to acquire one share of common stock at \$0.90 per share until the earlier of two years from the date of issuance or twelve months after our shares of common stock are listed for trading on a recognized exchange. We offered and sold units outside the United States to non-U.S. persons in off-shore transactions pursuant to the exemption from registration available under Regulation S of the Securities Act. We offered and sold units solely to accredited investors in the United States in private transactions not involving a public offering pursuant to exemptions available under Rule 506 of Regulation D and Section 4(2) of the Securities Act.

Edgar Filing: GRYPHON GOLD CORP - Form 424B3
